1.0 INTRODUCTION

- This Hearing Statement has been prepared by the Kent SME Developers Network to respond to Matters, Issues and Questions (MIQs) raised for Matter 2 (Issue 3 and 5) and Matter 5 (Issue 5). This Statement focuses on matters raised by the Kent SME Developers Network expanding upon the response submitted to the Regulation 19 Consultation.
- 1.2 This statement does not seek to repeat the representations made at the Regulation 19 stage but will draw reference to specific paragraphs / points in answering the relevant questions to the Examination.
- 1.3 The Kent SME Network is due to appear the Matter 2 and Matter 5 hearing sessions.

2.0 MATTER 2: HOUSING GROWTH AND RESIDENTIAL WINDFALL DEVELOPMENT

Issue 3 – Housing Distribution – Policy SP3

Q7. Has the Council identified land to accommodate at least 10% of their housing requirement on sites no larger than 1 hectare, as required by paragraph 69 of the Framework? Does this include sites which have already been completed?

- The SME Network raised concerns within its Regulation 19 consultation response (paragraphs 2.1 2.13) that the Council was failing to meet the requirements of paragraph 69 of the NPPF which seeks to ensure that land is identified to accommodate at least 10% of housing on sites no larger than 1 ha.
- 2.2 The analysis undertaken by the Network considered (at that time) that the Council was not meeting the 10% requirement through a combination of double counting in the brownfield register of sites either already constructed or with planning permission (and therefore sitting within committed schemes). Accordingly, it was considered that a total of 522 dwellings (of the 733 on the BF register) should be removed and that only 6.6% of sites had been identified under the requirements of Paragraph 69.
- 2.3 There is no up to date position on the Council's figures at the time of writing these statements, albeit it is anticipated that in answering the Inspector's questions, the Council may update these figures and therefore we reserve the right to comment at the Hearing Session. It is however noted that at the time of the Regulation 19 consultation, the brownfield register was last updated in 2021 some 2 years prior to the Regulation 19 consultation period.
- 2.4 The Brownfield register has since been updated in 2023 (no specific date) and contained in **Appendix 01** of this Statement. An analysis of the 2023 data now identifies that:
 - There are a total of 62No. sites of 1ha or less totalling 1,113 dwellings.
 - Of the 62No. sites:
 - 49No. already have planning permission (825 dwellings)
 - o 12No. have no Planning Permission (278 dwellings)
 - 1No. has a pending decision (10 dwellings)
 - Of the 12No. sites without planning permission (278 dwellings):
 - o 7No. are identified as emerging allocations (223 dwellings);

- 5No. are identified as previous PP lapsing and 1No. being an allocation not being brought forward (55 dwellings).
- Of the 49No. with planning permission (825 dwellings):
 - o 7No. are for Non Residential uses (mainly C2) (135 dwellings);
- 2.5 **Appendix 01** of this statement provides the raw data as presented in the Brownfield register and **Appendix 02** is the analysed data and as summarised in Table 1.1 below.

Table 1.1. Dover Brownfield Register 2023 Sites 1HA and Under

	# of Sites	# of Dwellings
Overall Number of Sites	62	1,113
Have Planning permission	49	825
No Planning Permission	12	278
Pending Decision	1	10
Resi Planning Permissions	46	725
Non Resi Permission	7	135
Emerging Allocations	8	253

- Accordingly, the brownfield register 2023 confirms that sites have either already secured planning permission (and therefore they are counted in extant supply) or sites have been identified as emerging allocations (totalling 253 dwellings) and counted under that source of supply.
- 2.7 It is worth noting that all of the identified brownfield sites that do not have planning permission have had lapsed permissions or are allocations that are not being continued from previous plans. This questions the suitability of these sites in the context of relying on them to be delivered by SME developers and supports the Network's case that the brownfield register cannot be relied upon as it is potentially:
 - Double counting sites with existing PP and extant supply;
 - Double counting emerging allocations; or
 - Relies on sites proven to be undeliverable.
- 2.8 It is therefore still considered that the Council has not demonstrated how it has met the requirements under Paragraph 69 of the NPPF. The use of the Brownfield Register in this context is not appropriate as it fails to identify sufficient sites to achieve the 10% requirement when coupled with the emerging allocated sites.

- 2.9 We therefore consider that additional allocations of specific sites are required to be made in the Local Plan in order to achieve a justified and effective Local Plan.
 - II) Issue 5 Residential Windfall Development Policy SP4
 - Q2. Policy SP4 permits new residential development within or immediately adjoining the boundary of defined settlements provided that, amongst other things, development is commensurate with the scale of the settlement it adjoins. Is this sufficiently clear enough to be effective?
- 2.10 The Network's Regulation 19 Representations (paragraphs 2.14-2.34) set out our position on Policy SP4. In summary, we considered that the principle of Policy SP4 is not only supported but considered an extremely important Policy for SME developers. Such a policy allows the opportunity for SME Developers to come forward with development in sustainable locations that are not otherwise allocated in the Local Plan (a crucial opportunity given the LPAs position on meeting the 10% requirement above). It will allow SME developers to come forward with policy support for development.
- 2.11 However, the representations continued to propose amended wording to Policy SP4, as there are concerns that the policy will not be effective once it begins to be implemented by Development Management. The proposed Modifications in the supporting text as set out in the Main Modification Schedule (Examination Doc SD06) only seek to further reinforce these concerns.
- 2.12 The principal matter to be addressed is the wording referring to 'immediately adjoining' the confines of the settlement boundary as set out in the Policies Map. The settlement boundaries as identified in the updated Policies Map (as shown in the interactive map in Examination Document SD02) indicates areas of inconsistency in how the settlement boundary reflects and responds to the characteristics and context of the given village in which it surrounds. This inconsistency may create confusion and potentially result in logical development that sits comfortably within the settlement's context to immediately fall foul of the policy when it may in fact meet the principle purpose of the policy which is to deliver well designed and well located development in these sustainable locations.
- 2.13 By way of example, **Appendix 03** provides for screen shots of various settlements where the settlement boundary does not reflect the full village confines as seen on the ground or pockets

of areas are not covered by the settlement boundary – but may be seen as logical development parcels.

- 2.14 Furthermore, the modifications as set out in AM11 of SD06 seeks to specifically define the meaning of 'immediately adjoining'. This is a too perspective approach. It is considered that the proposed wording as set out in the Network's Regulation 19 representations be introduced which uses the following term in this context 'adjoining or close to the existing built up confines'. Such wording has successfully been used by Ashford Borough Council in a similar Policy (Policy HOU5).
- 2.15 This language allows for a more subjective view to be taken by the Council and allow for a more effective policy as it provides for a wider interpretation of the Policy rather than a narrow interpretation as proposed by the Council's Main Modifications.
- 2.16 As suggested earlier, the principle of the policy is wholly supported. However, the true effectiveness is in the detail of the wording and the concern that the tightness of reference to the settlement boundary, couple with the inconsistent settlement boundaries themselves, may result in an ineffective policy.

3.0 MATTER 5: TYPE AND MIX OF HOUSING

- III) Issue 5 Self Build and Custom House Building Policy H5
- Q2. What is the justification for allowing self-build, but only where it would not result in the 'over provision' of housing against the identified need? How would this be determined? Is Policy H5 justified and effective?
- 2.17 We support the inclusion of Policy H5 which sets out DDC support for self and custom build development on allocated and non-allocated windfall sites subject to compliance with the other policies in the Local Plan.
- 2.18 We do however have concerns with the 'over provision' reference as the delivery of these dwellings would still go towards meeting wider housing needs, including windfall development and potentially as part of Policy SP4. It is not correct to refer to the over-provision of this type of housing need and this should be removed.
