7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>1. Introduction</p> <p>1.1. Following the publication of the Dover District Council Local Plan (Regulation 18 Draft) and the Targeted Call for Sites on the 20th of January 2021, the Land Trust submitted representations in relation to the development of their own appropriate strategy for the possible future use and regeneration of Fort Burgoyne, Fort Burgoyne Road, Guston, Dover, CT15 5LP. These representations are included as Appendix A of this Statement, however, can be summarised as follows:</p> <ul style="list-style-type: none"> · The site at Fort Burgoyne extends across an area of approximately 42 hectares and includes a recreation ground, a substantial area of chalk grassland and the main buildings and immediate surrounding grounds (including the Parade Ground). Fort Burgoyne is also a designated Schedule Monument, confirming that the site is of national importance. · Fort Burgoyne was built in the 1860s to protect Dover Castle and was used to defend the South Coast of England as one of the “Palmerston Forts” built to defend against invasion. The polygonal system on which the building is built was used to defend and watch from the highest strategic point in Dover. After the First World War, Fort Burgoyne was used a military depot/store for Connaught Barracks before it ceased to be used for military purposes in 2006. In 2014 the Land Trust, a national charity, acquired the site from Homes England and since then has been considering a variety of options for the future development of Fort Burgoyne. This includes the submission of two pre-application enquiries relating to the future use of the site to DDC in July 2019 (DDC Ref: PE/19/00127) and July 2020 (DDC Ref: PE/20/00234), which serve to demonstrate that the Land Trust has a clear commitment to bringing Fort Burgoyne back into use for public benefit at the earliest opportunity. · DDC’s adopted Core Strategy 2010, recognised the importance of Fort Burgoyne within the criterion vii of “Strategic Allocation” policy CP10 (Former Connaught Barracks Complex), which stated that alongside the allocation for around 500 dwellinghouses, <i>“the condition of Fort Burgoyne is stabilised, if possible new uses are accommodated, a public access strategy is agreed and a management arrangement is incorporated that secures a sustainable future for the Fort”</i>. The Dover District Local Plan Regulation 18 Draft appeared to “down-grade” of the Former Connaught Barracks site from a “Strategic Allocation” to a “Non-Strategic Housing Allocation”. The Regulation 18 draft no longer made any specific reference to Fort Burgoyne with no strategic policy objective to deliver the future of the Fort, a Scheduled Monument of national historic interest that is included on the Historic England at risk register. · The representation therefore sought to raise that the Draft Local Plan needed to provide clarification as to how the regeneration of the two separate elements (being the residential development of Connaught Barracks and the regeneration of Fort Burgoyne) will be delivered to allow for proposals for Fort Burgoyne to be brought forward under a set of key objectives, independent of the Connaught Barracks housing development. It was subsequently suggested within the representation that the Fort’s future is secured through other means within the new Local Plan, either through its own strategic policy in other sections of the plan (such as the Employment and the Local Economy section), or through the re-wording of Site GUS002 or through other Development Management policies.

· Finally, given that, in a “Strategic Futures” Report (included as part of **Appendix A**) prepared by WYG and commissioned by the Land Trust, it was identified that there is circa 3,000 square metres of floorspace within existing buildings at Fort Burgoyne that would be potentially suitable for a wide variety of uses. It was also suggested that in order to secure a long-term future use for Fort Burgoyne and secure its regeneration, it would be wholly appropriate for it to be allocated within Strategic Policy 9 for business and employment purposes, in order for more flexibility to be given to the types of uses that might be permissible at the site.

1.2. Dover District Council (DDC) has subsequently published the Regulation 19 Submission of the Dover District Council Local Plan which sets out the vision, strategic objectives and overarching development strategy for future growth in the district over the period to 2040. The Land Trust have therefore instructed Bloomfields Chartered Town Planners to prepare further representations in relation to the Regulation 19 submission and the regeneration and future use of the Scheduled Monument, Fort Burgoyne.

2. Regulation 19 Submission of the Dover District Council Local Plan

2.1. It is welcomed that the aforementioned representations have been taken into account within the Regulation 19 Submission of the Dover District Council Local Plan.

SAP5 - Fort Burgoyne, Dover

2.2. In particular, the Trust is pleased to see the inclusion of Fort Burgoyne for Mixed Employment Use in table 4.1 and a positive site-specific policy to support site regeneration at Fort Burgoyne within Chapter 4: Housing and Employment Site Allocations at Strategic Allocation Policy SAP5 which states the following:

Figure 1: SAP 5- Fort Burgoyne, Dover as of Regulation 19 Submission, DDC Local Plan

2.3. The Land Trust also notes the pre-amble to Policy SAP5 which, at 4.109, recognises that Fort Burgoyne has the potential to accommodate new uses, provided that they are compatible with its status as a scheduled monument. The Trust continues to explore suitable uses for the reuse of the Fort, as evidenced by the grant of planning permission 21/01000 on the 7th July 2022 for the change of use of 4no. casemates to Use Class E with associated ancillary works.

2.4. The Land Trust remains committed to attracting uses for the Fort that will fit in with the long-term sustainable vision for investment in its re-use, as required by the preamble to Policy SAP5. The uses being explored, as evidenced in the previous Regulation 18 representations, are all being considered with the aim of supporting local business growth and ensuring at the same time that any mixture of uses at the site are compatible in respect of access, servicing, general amenity and crucially with the aims of conserving the Scheduled Monument.

2.5. While the inclusion of this policy is largely supported, The Trust has a number of comments in respect of the criteria:

2.6. Criterion h sets out that a Surface Water Management strategy should be produced for the site. The Trust recognises the importance of surface water management; however, it is highlighted that the Fort already benefits from an existing surface water drainage system which was built in the 1860s as part of the construction of the site. This system has always discharged directly to the ditch of the Fort where it soaks into the ground.

2.7. Given the Scheduled Ancient Monument status of the site, establishing an alternative strategy for managing surface water may not be practical and could result in harm. As such it is suggested that this criterion should be removed.

2.8. Notwithstanding this, where relevant, any future planning applications for uses or development at the Fort can demonstrate if required how it would be compatible with the existing surface water drainage system and not require any alternative arrangements for its disposal.

2.9. In respect of criterion j which suggests that “*development within the boundary of Fort Burgoyne which would have a detrimental impact on the heritage significance, setting, views, biodiversity, character of coherence of the components and elements of the complex will not be permitted*”.

2.10. While the Trust acknowledges the need to avoid development which will have a detrimental impact on the range of criteria identified in this policy, any development within Fort Burgoyne would be restricted by the requirement for Scheduled Monument Consent approved by Historic England which is considered to negate the need for this criterion. Draft Local Plan policies in respect of landscape (NE2), ecological (SP13) and historic environment (HE1, SP15) further negate the need for this criterion.

2.11. It is therefore respectfully suggested that criteria h and j are removed from policy SAP 5.

Chapter 2 - Vision and Objectives

2.12. Chapter 2 sets out the overarching vision for Dover District, including that *“through careful stewardship of its world class landscapes, thriving natural environments and wealth of historic sites, Dover District will be a destination of choice for people of all ages to make their home, for businesses to invest in and for visitors to explore and experience.”*

2.13. It is appreciated that the vision highlights the *“Sensitive restoration of elements of its rich built heritage, will enhance the attractiveness of the town, while improved connections to its seafront will have been delivered by high quality design and investment in place making.”* Together with the strategic objective (echoed in Strategic Policy 15) to conserve and enhance heritage assets in the district *“in a manner appropriate to their significance, recognising their intrinsic value as a finite resource as well as their contribution to the character of the District and the positive role they can play in the regeneration of the District.”*

2.14. The Trust also welcomes the identification of Fort Burgoyne on the Local Plan key diagram (Figure 2 below) alongside other Regeneration Sites covered by policy SP6 as set out further over the page.

Figure 2: Figure 2.1, Local Plan Key Diagram

Chapter 3 - Strategic Policies

2.15. Chapter 3 sets out the districts strategic policies to achieve the aforementioned strategic objectives.

SP6 Economic Growth

2.16. Strategic Policy 6 seeks to grow and diversify the Dover District economy by providing additional employment floorspace through the regeneration of brownfield sites in key locations in the district, such as Fort Burgoyne, to deliver flexible employment uses, achieve a higher level of job growth, and help provide additional flexibility and choice to the market over the Plan period.

Figure 3:

SP6- Economic Growth, Dover as of Regulation 19 Submission, DDC Local Plan

2.17. The Trust welcomes the inclusion of Fort Burgoyne at criterion 2 of policy SP6 as site where regeneration for a mix of uses to secure their future will be supported by Dover District Council.

2.18. It is noted that paragraph 3.117 sets out that no floorspace allowance has been included for Fort Burgoyne (and other sites allocated under criterion 2) as they are *“brownfield sites allocated for regeneration, and the mix of development and floorspace requirements will need to be determined through the planning application process in accordance with the policies in the Local Plan.”*

2.19. Given the complexities of the site we support this position but anticipate that employment floorspace will amount to circa 3,000 sqm.

Chapter 11 - The Natural Environment

Policy NE1 Biodiversity Net Gain

2.20. The Trust agrees with the requirements of Natural Environment Policy 1 for development proposals to provide a minimum of 10% biodiversity net gain above the ecological baseline within the development boundary. And notes criterion (a) which states that where it can be demonstrated that ecologically meaningful biodiversity net gain cannot be achieved within the site boundary, the Council will consider off-site alternatives in line with the mitigation hierarchy approach.

2.21. Given that a large portion of the 42 hectares at Fort Burgoyne has the potential to provide for significant biodiversity offering, in responding to this consultation The Trust wishes to record interest in working with the Council in developing its Dover District Biodiversity Net Gain Strategy with a view to Coombe Hole providing opportunity for off-site net gain whilst maximising the value of this Local Wildlife Site.

Figure 4: NE1- Biodiversity Net Gain, Dover as of Regulation 19 Submission, DDC Local Plan

2.22. In a similar vein to the BNG potential at Fort Burgoyne, the Land Trust has extensive experience of working with developers to create and provide in perpetuity management of Suitable Alternative Natural Greenspace (SANG), areas of greenspace that are of a quality and type that are suitable to divert recreational activities associated with new residential development away from protected sites (such as Special Protection Areas or Special Areas of Conservation).

2.23. In noting the requirement of Draft Policy SAP1(l) (Whitfield Urban Expansion) which requires a need for SANG to mitigate potential impacts upon the Lydden and Temple Ewell SAC, the Trust wishes to express interest in discussions with the Council and/or the developers of this site with a potential view to assisting them with meeting the policy requirements.

	<p>3. Summary</p> <p>3.1. The overall objective of the Trust remains to seek to deliver a strong, sustainable future for the Fort, that secures its long-term status as a nationally and locally important historic site that will make a vital contribution to the district. The Land Trust supports the Regulation 19 Submission Version of the Dover District Local Plan and welcomes the inclusion of Fort Burgoyne as a strategic allocation site for regeneration subject to the comments set out in this representation.</p> <p>4. Appendices</p> <p>Appendix A- Representations on the Regulation 18 Draft Dover District Local Plan 2021 and Targeted Call for Sites</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><i>DDC Note The text below is an extract from the original representation which is attached to SDLP1438.</i></p> <p><i>SP6 Economic Growth.</i></p> <p>Quality of 'growth' is more important in crisis-ridden 2020 to 2040 than quantity of 'growth'. Because it is more sustainable as we look ahead to 2040 – 2060 and beyond. Quick fixes, gig economy and nail-bars do not a climate-friendly sustainable economy make.</p> <p>November 2022. Energy prices, business rates, public sector cuts are making public and private sector employers (care homes, schools, health centres, hospitality, police (£30 million cut in Kent), buses, independent retail) fear for their survival. The reality.</p> <p>Public Works Loan Board or municipal loans could be used in Dover as in East Sussex, where they've invested in skilled jobs transforming existing homes into zero carbon homes across seven district councils, as demonstrated in the 'Lewes Model'. To be sound, effective, and compliant with the realities of here and now, this is the direction DDC Local Plan should take. The local economy needs pump-priming, national fuel security needs to be enhanced, people need lifting out of fuel poverty. The local plan could do more than allocating sites and floor space.</p> <p>Transition to a greener economy, a means of making us more resilient economically, will be helped considerably by the ambitions of Port of Dover to decarbonize its estate by 2025 and to take seriously its scope 3 corporate responsibility in an inclusive manner to support local communities and economic players as they transition to a greener business too.</p> <p>Suggestions have been put to the Port of Dover regarding more solar PV on their buildings and the installation of wind turbines on the harbour walls like the ports of Boulogne and Liverpool, Eurotunnel to be approached about wind turbines on the Samphire Hoe breakwaters, Network rail to be approached about solar PV on Dover priory station buildings, similarly for Stagecoach and the planned new bus station at York street. We have since become aware of PoD's interest in hydro renewables too. We also recommend high solar canopies over the marshalling yards of Port of Dover, to generate energy that fridge trucks (whose engine-idling contaminates Dover) could plug into while waiting to board ferries.</p> <p>There appears to be little mention of using the Local Plan to improve educational attainment by, for example, specific policies to a) forge deeper links with FE institutions (such as the laudable, forward-looking Dover Technical College) given the skills gap relating to the Green Homes agenda, b) encourage higher education establishments to develop facilities in the district, and thereby to develop a knowledge-based economy beyond the former Pfizer's site. And c) encourage the long-promised incubation hubs for the newly qualified in the district, have fallen victim to central govt's stop/start sound byte culture, these a, b, c, should be a requirement. This would contribute to raising the average level of earnings in the district and to combating the high levels of deprivation experienced in some wards.</p> <p>A glaring omission relates to new economic opportunities created by climate-friendly recovery sectors. Three are essential in Dover District. With a 70% rural economy, which is severely challenged by increased costs of imports, and climate problems including water shortage, our agricultural advisor tells us that diversification into Agri forestry could become popular among the farming community. It is recommended by Nature-Friendly Farming Network and featured on BBC Countryfile 28/2/21. Examples include a) protecting arable yields in cases of drought, by planted strips of suitable, native, drought-tolerant trees, (which counter soil erosion, while increasing carbon sequestration) and, b) bringing back to life existing but neglected, traditionally coppiced woodland, causing it to be harvested for small-scale biomass on a rotational basis. Similarly, short rotation forestry would create rural income and mitigate climate change. Another key to meeting climate targets is increasing</p>

the amount of land used for growing food for people rather than livestock. This would create new outdoor jobs as would replacing imported market-gardened food, (on which red-tape has increased) with locally grown fruit, vegetables and pulses, this is a growth sector too, and is especially sustainable where zero / minimal pesticides are used, and Nature Friendly Farming practices are used. (See comments on opportunity to protect and expand Horticultural Belt LCT D in north of district in NE2 below) So rural areas, fields and woodland should be valued as locations of employment in themselves.

The up-grading of all rented housing stock (both public and private sector) to zero homes standard, mentioned above, would mean, it doesn't need to be done again before the local and legally binding national target of 2050, and is thus a pre-requisite for the Local Plan to become legally compliant, and this can be made to benefit the local economy. It will be necessary to ensure that publicly owned rented housing stock stays in public hands. To incentivise private landlords, DDC should set up a register of private landlords, and to qualify for registration, landlords should have to show that homes rented are EPC C in 2023, EPC B in 2024, and zero carbon in 2025. As this will push up the value of their property, landlords should not find it difficult to access cheap loans to carry out the retrofit, (DDC could plan an intermediary role or suggest sources of finance). Tenants will benefit in terms of heating costs saved and improved standards of health, which is also a saving to the public purse. The economy will benefit in terms of jobs created for local trades people.

A third sector would include the fitting and maintenance of renewable energy installations, e.g. small-scale on-shore wind, small and medium scale solar (on domestic or non-residential roofs or to be combined with grazing land below, also on car parks), micro-tidal (tidal currents we are advised are very suitable locally), or 'green gas' as pioneered by Ecotricity in Hampshire (as the grass-cuttings from Dover's many golf courses and campsites are likely to be suitable). To maintain the returns on investment in these sectors within the regional economy, and stop them being off-shored, a priority should be given to schemes which are 51% or more community-owned.

The Dept for Transport bought the site they wanted for Dover Inland Border Facility from a farmer in Guston for £22million, and in 2022 DfT publicly said the site would not be needed as Dover IBF. Could this become a combination of grazing under solar canopies? Near 2 schools and a sports centre, it is an unsuitable location for the HGV park that is needed at a site further outside the Dover urban area.

Tourism and Tourist / Visitor Accommodation.

It is very unsound for DDC to fail to make Airbnb owners register with them, so that they can be charged business rate council tax. In terms of housing provision, Airbnb, both nationally, and in Kent's coastal towns especially, have a very negative effect of reducing the private rental market in 2022 and thus forcing up the average monthly rents for private tenants, while we have a cost-of-living crisis, so homelessness, hidden and audited, increases. Green tourism, and 'safe' country lanes, are East Kent assets that would be very unsound to trash.

The local plan would be more compliant with legality, if DDC regeneration took the greening of the economy more seriously and looked at smaller zero-carbon tourism /transport activity projects within Dover town; harbour trips with zero carbon, solar powered boats (like La Rochelle has had for 15 years), like electric hopper mini-buses (like the ones which have been coping with the 1 in 6 gradients of Aix-en-Provence for over 10 years).

Economic Growth in a coastal town aspiring to attract tourists would be unsound unless it included trebling the number of toilets installed. Tourists as well as residents have toilet needs. For a town with the iconic, historical importance of Dover NOT to have any coach park with lavatorial comfort facilities is a disgrace. The ratio of inhabitants to toilet blocks in Dover town is treble the ratio in other urban areas in the District, 1 : 10,000 or higher. The only coach park in Dover Town has, for 5 years, had 2 signs on Maison Dieu Road telling coach drivers and visiting car drivers that a toilet exists when in fact it doesn't.

At this location in Maison Dieu car park, behind the police station, visitors get out, pay to park and find nothing, merely a sign to a 15-minute walk to Pencester Gardens, difficult when legs are crossed. The DDC website misleads the public on this issue. The lack of toilets is a public health problem which we have referred to Kent Director of Public health

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Iceni Projects, on behalf of Quinn Estates, welcomes the opportunity to submit representations to the Dover District Council Local Plan Regulation 19 Consultation in respect of land to the north-east of Southwall Road, Deal (the 'Site'). This representation should be considered alongside and with regard to the following appended documents which comprise:</p> <ul style="list-style-type: none"> • Appendix 1 – Site Location Plan <p>The vision for the Draft Local Plan reflects the growing importance of new challenges facing local communities in regard to climate and ecological emergency, and greater emphasis on the protection and enhancement of retail, leisure, cultural and commercial development across the district area, and promoting the health and social wellbeing of communities. The corresponding objectives strive for a more prosperous economy, as well as vibrant new communities. Quinn Estates considers that there is much to welcome in the new Plan, however, the company considers the opportunity to deliver an appropriate and badly needed quantum of growth at Deal has not been positively planned for, and that the Plan would be strengthened by promoting additional growth at Deal.</p>

Quinn Estates considers that the proposal at Southwall Road presents a suitable site for locating employment growth for Deal adjacent to an existing and successful employment site, which would be easily accessible by public transport and be commensurate with the size of the settlement. Given the unique characteristics of the site, it is considered that it would logically lend itself to development of approximately 130,000 sq. ft of employment uses compatible with those alongside. As such, the site would in particular suit smaller light industrial occupiers (Use Class E(g)) benefiting from the sustainable town centre location. This would provide logical and tempered expansion of the town's employment provision thereby helping address the district's needs, at a location where demand for such uses is proven.

Quinn Estates has a proven track record of providing purpose-built employment space for wide range of end users, from smaller artisanal start-ups to larger established operators; and it is considered that this site would provide opportunities for end users from across that range.

a. The site and surroundings

The Site comprises approximately 3.3 acres of land lying to the north-east of Southwall Road, Deal. The Site is bound to the south-east by Minters Industrial Estate and Deal Business Park on Court Marsh Road and to the south-west by residential properties. The Southwall Industrial Estate encloses the Site to the north-west, separated by an open field; and to the north-east, Hutchings Timber lies beyond a wooded field. The land adjoins the Deal settlement boundary along its southern edge and is located on the north-western edge of the town.

The Site does not contain any Public Right of Ways (PRoWs). Existing access to the Site is via a gate on Southwall Road. Deal train station is located approximately 0.6 miles walking/cycling distance to the east within Deal town centre.

The Site is neither within or near a designated Conservation Area, nor are there any listed buildings or other heritage assets nearby. The land is classified as Flood Zone 2/3. The Kent Habitat Survey 2012 identifies the entirety of the Site as Neutral grassland. There are no significant ecological designations affecting the Site or in the vicinity which would restrict development at this location.

The Site has an uncertain history with regard to assessment under previous Local Plan work. The HELAA 2020 Appendix 1 'Housing Long list' references the site; however, it does not state whether it was proposed for housing or employment as it does with other sites. Appendix 3b 'Housing Sites Highways Assessment' references the DEA049 code as the previous code for another site in Walmer. Appendix 3e 'Initial Assessment Housing Sites Eliminated' notes the site, however, states it is for employment and will be assessed separately. Appendix 3f 'Initial Assessment – Employment Sites Eliminated' has no reference to the site under the DEA049 code, the postcode, or any of the site addresses.

b. Objection to Tables 4.2 of the Draft Local Plan

Quinn Estates considers that the economic growth strategy for Dover, as detailed in Table 3.5 of the Regulation 19 Submission Version of the Draft Local Plan cannot be considered sound plan-making. In its current form, the Plan fails to positively plan for economic growth in Deal under Policies SP6 and E1. Quinn Estates considers that the Plan should proactively support employment growth in Deal through the allocation of additional sites.

Sustainable patterns of growth

Sustainability lies at the heart of good strategic planning and is a core tenet of the National Planning Policy Framework at Paragraph 8. When determining the spatial strategy for employment growth, the Council should direct employment land to the most sustainable locations, namely those which reduce the need for access via private vehicle and are near key population centres.

Deal is the second largest town within the District and is home to approximately 30,000 people. Deal is recognised in the Draft Local Plan as the second largest settlement in the District, benefitting from a vibrant town centre, which benefits from a good level of accessibility and an attractive environment. It's well used by residents and visitors and has a low vacancy rate, as a result of the diverse retail offer. In addition, the town is highly sustainable in regard to public transport accessibility, being served by mainline rail, the high-speed train service to London and numerous bus routes.

Quinn Estates posit that the amount of employment land allocated to Deal within the draft Local Plan is wholly inconsistent with relation to its position as the second most sustainable location in the District for future growth. No new employment land is allocated to the town. The Deal Business Park is offered policy protection through draft Policy E2. Employment allocations have instead been directed to Dover, Aylesham and Eastry, a principal town, rural service centre and local centre within the Settlement Hierarchy, respectively. Table 3.1 of 2021 EDNA update (copied below) succinctly summarises the spatial distribution of employment land across the district, and outlines the strange situation the District

faces, where rural areas and smaller settlements hold more employment space than the second largest settlement within the District.

[See attachment]

Evidently, successive Local Plans have failed to plan proactively for employment in Deal, resulting in the picture painted above. Similar to the spatial approach to housing within the Draft Local Plan, the Council's proposed strategy looks to further cement this position, skewing economic growth away from one of the most sustainable locations in the District to areas that are far less sustainable and would require employees to largely arrive by private vehicle to work. The justification for channelling so little growth to Deal is not considered to be justified by evidence, when all the evidence points to the settlement being such a logical and sustainable location to channel growth to. The principles of sustainability and sound plan making appear to have been absent in key decision taking over spatial choices at the heart of the spatial strategy presented in the Draft Plan.

Ensuring the delivery of employment land

For a plan to be considered effective, the objectives and identified requirements must be deliverable and achievable. It is considered that, in its current form, the plan fails to accord with this part of the soundness test, in part due to over reliance on the White Cliffs Business Park to provide the majority of the District's employment land requirement across the Plan period. Therefore, to ensure the balanced and steady delivery of employment floorspace, further Sites should be allocated to meet the needs of the District, and in particular, the previously identified need of Deal.

The EDNA 2017, and the 2022 update, both highlight how the District has not been able to deliver, to date, the level of growth identified in the 2010 Core Strategy and there is a great deal of 'catching up' to do over the next ten years if there is any prospect that the overall job growth target of 6,500 is to be reached.

Policy CP2 of the existing Core Strategy (2010) seeks to provide approximately 200,000 sqm of employment floorspace and 35,000 sqm of retail floorspace between 2006-2026. The Authority Monitoring Report 2020-21 scores progress against Policy CP2 as amber – where 'progress has been made towards meeting the target however further work is required'. Over the monitoring period (2020- 21), the following net-gains in employment floorspace are found:

[See attachment]

To address this difficulty with delivery of employment land, the Draft Local Plan proposed the White Cliffs Business Park to deliver the bulk of the employment floorspace requirement in the plan and is expected to deliver a total of 120,000 sqm across four phases. However, there is uncertainty regarding the availability of part of Phase 2 and Phase 3 of White Cliffs Business Park which was proposed to be used as an Inland Border Facility, subject to a Special Development Order which is in place. In addition, the Council's own EDNA 2017 assesses the issues with the site, stating that 'the site has struggled to come forward for new B class development over recent years, in part due to viability issues limiting interest by investors to promote B class uses within the site. Retail development has started to erode the longer-term employment potential of parts of the site.' Given the uncertain nature of this site, the Council should seek to broaden the employment base through additional allocations across the District where there is an identified need, in the most sustainable settlements i.e., Deal.

Addressing Flood Zone constraint

The site lies within Flood Zone 3, as shown on the Environment Agency's flood zone map and as such, has the potential to be at risk of flooding from the sea. In partnership with the Environment Agency, the Council completed the Deal Coastal Defence Scheme, which provides a 1 in 300-year (0.33%) standard of protection to this area from coastal flooding and only at risk in the extremely unlikely event that the flood defence infrastructure was to fail (i.e. a breach).

Notwithstanding the unlikelihood of a breach, the NPPF requires a site-specific FRA to be submitted for all development located within Flood Zone 3. The NPPF states that development in areas at risk of flooding should be avoided by directing it in the first instance away from areas of highest risk. Where development within areas at risk of flooding is proposed, Para 161 of the NPPF requires that the Sequential Test is applied and, if necessary, that the Exception Test is applied (Para 163-165).

The Council's Strategic-Flood-Risk-Assessment (2019) provides an up-to-date appraisal of the flood risk in Deal, prepared in conjunction with the Environment Agency, Lead Local Flood Authority, Internal Drainage Board and Southern Water. One of the aims of this report is to provide sufficient data and information to enable the Council to apply the Sequential Test to land use allocations and to identify whether the application of the Exception Test is likely to be necessary. It is significant to note that the Site proposes to develop employment floorspace, which is considered to be a less vulnerable use.

A live application (ref: 22/00916) on an adjacent site 64-66 Southwall Road) is currently seeking permission in principle for up to 7 dwellings, along with a replacement place of worship with a community hub and nursery. The application site also lies within Flood Zone 3 and therefore faces the same constraint as the Site subject to these representations. As of 24th November 2022, the Environment Agency have responded to consultation with no objection to the scheme following clarification of residual flood risk on site. This demonstrates that the designation of land as Flood Zone 3 should not be considered as an absolute constraint affecting the principle

of development in this location, and that suitable growth for Deal can be supported subject to the necessary technical work being undertaken through site specific FRA's, and the Sequential and Exception Tests in accordance with NPPF guidance.

c. Conclusion

Quinn Estates wishes to support Dover in bringing forward a successful, effective and sound Local Plan that can serve the District across the Plan period. However, Quinn Estates considers that the current approach to the spatial strategy in the Draft Local Plan requires amendment to address a significant soundness issue concerning the level of growth identified for Deal, the District's second largest settlement. It is considered that the Plan currently fails to positively plan for a commensurate level of housing and employment at the settlement, as expressed in Policy SP3 and that the available evidence does not support or justify this approach. Moreover, the evidence does support channelling a greater quantum of growth to Deal.

The Council has struggled with delivery of employment floorspace across the District within the last plan period, and there is a recognised need for additional employment in Deal within the evidence base for the Draft Local Plan. To combat the current over reliance on the White Cliffs Business Park, which is facing delivery issues, the Council should seek to explore additional avenues for employment growth, through identifying suitable sites in Deal, such as the Site subject to this representation.

We trust that the above amendments is acceptable to the Council and that these representations will be taken into account in consideration of the current consultation. We also confirm that Quinn Estates would welcome the opportunity to be involved in the forthcoming Examination-in-Public and contribute to the debate to ensure that the best strategy for the District is found.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Allocate land at Northwall Road for employment uses

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><u>Introduction</u></p> <p>Walsingham Planning is submitting this representation on behalf of Lidl Great Britain, who has an existing store at Honeywood Parkway in Dover, and who also hopes to deliver additional investment in the District over the course of the new plan period.</p> <p><u>Context – The Need to Improve Convenience Retail Provision in Sandwich</u></p> <p>It is important to note from the outset that the existing, adopted Dover Land Allocations Local Plan identifies a clear need to improve convenience retail provision within the Deal / Sandwich trade area. Indeed, paragraph 3.237 of the Land Allocations Local Plan states that there is an identified quantitative need over the Plan period for around <u>2,400 sq.m gross</u> additional convenience goods floorspace within the area. Moreover, the adopted Plan explains that:</p> <p><i>“The Council considers that there is potential to increase the <u>quantity and quality</u> of convenience floorspace provision in Sandwich to help broaden the range and choice to the benefit of its local catchment population, whilst also helping to strengthen the role of Sandwich in the</i></p>

settlement hierarchy. New floorspace of an appropriate scale in a location that is well connected to the town centre would help to increase the 'claw back' and retention of shoppers and expenditure from the 2012 position" [our emphasis].

The adopted Local Plan goes on to explain that the tight historic grain of Sandwich town centre does not readily provide opportunities for larger retail provision. The adopted Local Plan could not identify any suitable or viable sites within or on the edge of Sandwich town centre to accommodate such a scheme, and so the Plan sets out a criteria-based policy, against which any future retail applications can be assessed. Policy LA19 relates directly to 'new convenience retail provision in Sandwich', and states that planning permission for new convenience provision in Sandwich will be permitted, provided that the scheme meets the six specified criteria.

We understand that Policy LA19 of the adopted Local Plan was framed by an evidence base that is now considered to be out-of-date. Notwithstanding this, it is clear that the current Local Plan identifies a very clear quantitative and qualitative need for additional food and grocery provision within the settlement of Sandwich, and this need remains unmet. Indeed, no new foodstores have been delivered within the town, and thus residents continue to have to travel further afield to undertake their main food shop.

The evidence base that informs the Regulation 19 Draft Local Plan includes an updated Dover Retail and Town Centre Needs Assessment (2021). The updated Needs Assessment shows that there is no District-wide capacity for new convenience goods floorspace in the period up to 2040, after taking into account commitments. However, when the specific towns are considered, the Study identifies that there remains some capacity for additional floorspace in Deal and Sandwich, equating to between 256 and 458 sq.m net convenience floorspace by 2040. It should be noted, however, that the 2021 Study is based on the very conservative assumptions that the retail market is in 'equilibrium' (i.e. that no stores are over-trading) and that market shares will remain constant over the study period.

Moreover, whilst the calculated quantitative need may have reduced based on the latest data assumptions, there has been no change in practice to the very real qualitative need that continues to exist for additional foodstore provision within Sandwich.

It is relevant to note that the evidence base (the 2021 Retail and Town Centre Needs Assessment) records that there were 104 retail and leisure units within Sandwich, as of 2021. Out of this total, 37% of the units comprised non-food retail stores, 23% of units provided leisure services, and 14% of units offered retail services. However, only 8% of the units (7 units in total) accommodated convenience retail shopping facilities. This is lower than the national average representation, and also represents a decline since 2015, when there were 10 food and grocery outlets within the centre.

Sandwich has limited representation from convenience retailers. Whilst the centre benefits from some independent food stores (bakers, butchers and greengrocers), there are limited 'main food' shopping opportunities. The only medium-sized foodstore is the Co-op at Moat Sole Road.

As a result, it is evident that many residents need to travel further afield – to Dover, Deal and out-of-centre destinations – to undertake their main food shopping. The household survey shopping results, reported in the Retail and Town Centre Needs Assessment, confirm that only 3% of convenience goods expenditure from the District is spent in Sandwich Town Centre, which is a very low level of expenditure retention. Within the more localised Sandwich study zone (Zone 6), less than a quarter of convenience goods expenditure is retained by local stores, which represents significant leakage of local expenditure to destinations located further afield.

Indeed, the market share analysis for main food shopping (Table 2, Appendix 2, Volume 4 of the 2021 Needs Assessment) shows that only 14% of main food expenditure within Zone 6 is retained within Sandwich. Instead, residents are travelling to Tesco Extra at White Cliffs Business Park (29%), Aldi at Cherry Tree Avenue, Dover (13%), Sainsbury's in Deal (11%), as well as destinations further afield (to Ramsgate, Margate and Canterbury) to undertake their weekly 'main food' shop. This is not a sustainable pattern of shopping, and the results highlight the clear deficiency in main food shopping provision within Sandwich that continues to exist.

We note that further growth is earmarked for Sandwich within the draft Local Plan. The identified disparity will continue to grow, as more residents move into the town, and the lack of local access to main food shopping opportunities becomes more apparent.

Strategic Policy 7 – Retail and Town Centres

The justification text for draft Strategic Policy 7 explains that: "*The District's town, local and village centres are a focus for activity and community life providing shopping, leisure, employment, culture as well as other services. This is particularly the case for Dover, Deal and Sandwich town centres*". Indeed, the draft Local Plan goes on to explain that Sandwich is a second-tier centre in the local retail hierarchy alongside Deal, and that it should provide a complementary role to Dover Town Centre.

Paragraph 3.130 of the draft Local Plan explains that Deal and Sandwich town centres offer a "wide range of shops to cater for everyday need", special interest and tourism.

The draft Local Plan then goes on to explain that there is no identified capacity for new convenience or comparison floorspace over the plan period to 2040, and thus no retail allocations are proposed. Draft Strategic Policy 7 – as currently worded - reflects this approach, and focuses

	<p>on: encouraging the reoccupation of existing vacant units; reducing town centre boundaries and consolidating primary shopping areas; and diversifying the uses within the existing town centre boundaries.</p> <p>It is our view that <u>draft Policy SP7 is not sound</u>, because it does not reflect positive planning and it is not consistent with national policy. As outlined above, it is our view that there is a <u>clearly identified need for additional main foodstore provision within Sandwich</u>. Even though the quantitative need is low (based on current calculations), the evidence base still shows a real qualitative need to enhance local provision, to ensure that Sandwich can adequately meet the ‘everyday needs’ of local residents. Sandwich is a second-tier centre, and yet it does not benefit from the same level of local provision as Deal.</p> <p>Moreover, the adopted Local Plan is clear that there is a requirement to improve the quantity and quality of convenience floorspace provision within the town, to strengthen the role of the town and clawback expenditure that currently leaks to destinations further afield. This identified deficiency has not been addressed, and thus it is not rational to remove this existing policy aspiration from the new draft Local Plan.</p> <p>Draft Policy SP7 represents a missed opportunity to identify and discuss the deficiencies in local retail provision within Sandwich and make provisions for future development (as reflected in adopted Local Plan Policy LA19).</p> <p>We note that paragraph 86 of the NPPF states that planning policies should support the role that town centres play at the heart of local communities, by taking a positive approach to their growth, management and adaptation. Moreover, paragraph 86 notes that planning policies should:</p> <ul style="list-style-type: none"> • “Allocate a range of suitable sites in town centres to meet the scale and type of development likely to be needed, looking at least ten years ahead. Meeting anticipated needs for retail, leisure, office and other main town centre uses over this period should not be compromised by limited site availability, so town centre boundaries should be kept under review where necessary; and • Where suitable and viable town centre sites are not available for main town centre uses, allocate appropriate edge of centre sites that are well connected to the town centre. If sufficient edge of centre sites cannot be identified, policies should explain how identified needs can be met in other accessible locations that are well connected to the town centre”. <p>The draft Local Plan does not reflect this positive and flexible approach to plan-making, and thus is inconsistent with national policy. The draft Local Plan does not seek to allocate any sites for retail development within Sandwich, despite the evidence of need identified, and it does not represent a positive approach to the growth and management of the key settlement of Sandwich over the plan period.</p> <p>In summary, by failing to make any provision for additional convenience floorspace, either as a retail allocation or criteria-based policy, it is our view that draft Policy SP7 is not sound, because it has not been positively prepared, it does not represent an appropriate and justified strategy, the policy will not be effective and it is not consistent with the approach to planning for town centres that is set out in the NPPF.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>It is our view that the retail and town centre strategy put forward in the draft Local Plan is flawed and unsound. The strategy places an over-reliance on the quantitative need figures derived from 2021 Retail and Town Centre Needs Assessment, and does not take into account evidence of qualitative need. In particular, it is of great concern that the draft Local Plan does not consider the clear need that exists for additional convenience provision within Sandwich, which is identified in the adopted Local Plan, and which remains unaddressed.</p> <p>Whilst the adopted Local Plan contains a positive and proactive policy to support new retail development within Sandwich (Policy LA19), this strategy has not been carried through to the draft Local Plan.</p> <p>In order to be sound, the new Local Plan (within Strategic Policy 7) should provide policy support to addressing the ongoing retail needs identified within Sandwich, as this currently represents an omission from the draft Local Plan.</p> <p>In the absence of an appropriate strategy to support new convenience provision within Sandwich, local residents will need to continue to travel to Deal, Dover and destinations further afield to undertake their food and grocery shopping. This is not a sustainable strategy.</p> <p>Strategic Policy 7 should identify the need to enhance convenience provision within the settlement of Sandwich, and should allocate a site for such use, or set out a criteria-based approach to considering future foodstore development proposals.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note</p>	<p>We would like to participate because we have recommended that modifications are required to Strategic Policy 7 (as well as other policies within the draft Local Plan).</p>

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Given the technical nature of the retail evidence base, it would be useful to participate directly in the oral examination in order to have the opportunity to discuss the proposed retail and town centre strategy for Sandwich in detail and answer questions directly.

It is positive that the Council has a significant focus on town centres and is developing tailored strategies for each town centre. We welcome reference in each of these to the district's rich historic towns but do suggest the role heritage can play in the future could be enhanced. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	It is impossible to create a more vibrant town centre, when the major focus on building is at Whitfield. Many of the houses newly built at Whitfield have been bought by people keen to relocate from Dover town, because it is drab and unattractive. Dover Town should have priority, although I recognise that it is unattractive to developers, because they can make more money much easier by building on farm land.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan for Dover Town centre is ambitious and I hope it is successful. I would argue that to comply with the climate emergency declaration all regeneration should involve renewables and be carbon zero.</p> <p>Regeneration has focused on the seafront and St James and i presume is now moving back. High street shops could be renovated and have flats above for locals to rent or buy.</p> <p>The Sunday farmers' market should be tempted back all year round, so that there were more footfall further inland. There is an especial need to incentivise retail start-ups along London Road, Dover between the Charlton Centre and the Cadet centre. This area of one-way west-bound A256 is crying out for air pollution to be reduced eg living walls of vertical planting / urban hedges that are called for. The same applies to one-way, port-bound Barton Rd / Maison Dieu Rd A256. Many public buildings in mid Dover area, offer opportunities to enhance national and local energy security if they were to gain solar power installation that could be used by neighbouring carehomes, or doctors' surgeries (solar energy is most economical viable when exported to neighbouring premises using electricity during daylight hours all year round).</p> <p>Walking / cycling / driving along London Road could become a much more cheering experience if Living Walls referred to above, combined with murals.</p> <p>More toilet facilities are required.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at	<p>More green infrastructure at the heart of continuing regeneration.</p> <p>Encourage more cycling and make the area more pleasant for pedestrians with green living walls.</p>

Dover Harbour Board notes and welcomes the reference in Strategic Policy SP8 – Dover Town Centre to improvements to the connectivity of the town centre with the seafront, facilitated in part through planned improvements to the Townwall Street/A20 underpass and the development of Dover Waterfront. However, the wording of the policy and at paragraph 3.158 should be clarified to make clear what measures are already being implemented with the benefit of funding secured from the Future High Fund and what further measures are identified which should be delivered through the development of Dover Waterfront and the Bench Street Opportunity Area.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	The wording of the policy and at paragraph 3.158 should be clarified to make clear what measures are already being implemented with the benefit of funding secured from the Future High Fund and what further measures are identified which should be delivered through the development of Dover Waterfront and the Bench Street Opportunity Area.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Item SP8- Dover Town Centre. Additional suggestions: a) Greening the main high street via avenue of ornamental trees. b) Less licensing of gambling establishments c) Encourage more world cuisine eateries, in addition to traditional ones.

d) More street art installations eg old Banksy wall as a nautical/ seascape backdrop to the anchor in situ-or even treat this site akin to Trafalgar Square's 4th plinth. This would create a continual cycle of interest from the art community.

e) In time...the high street going down to the port, to transform into a 'La Rambla' type tourist destination. To include Bench Street, and surrounds, being regenerated simultaneously.

f) Collaboration with the Premier Inn and the freeholder of the Gateway Flats & garages etc - in order to refurbish the currently shabby elevations facing the town centre.

g) Collaboration with the stores in St James retail park which back onto the A20/ sea face, to reinvigorate the aesthetic appeal here and complement the regeneration of the town centre.

h) Use of scenic printed hoarding panels to disguise dilapidated buildings etc pending renovations.

l) Encourage the perception first, which will then transform into a reality that Dover is a destination of choice, rather than a mere place for transit.

This will demand a holistic tourism strategy. Dover could certainly be marketed in terms of its unique heritage. It has one of the most iconic natural landforms in the whole of the UK - The white cliffs. The panoramic vistas from the coastal cliffs are unrivalled. The visitor is able to easily ascend the cliffs to take in the unrivalled panorama that is soon to be designated as a world Heritage site - the Dover Straits. Dover also contains not only one of the most spectacular, beautiful and historic castles in Europe, but it also contains the oldest building structure in England- the Roman lighthouse. A tourist strategy could easily be constructed around the huge Roman remains in the Town. The Roman house, somewhat tired, contains historic treasures.

One could obviously then develop a whole complimentary strategy around the role Dover played in the defence of Britain. From Napoleon, to the central role in Dunkirk and ultimately being the frontline of Britain.

Alternative tour interests could easily be developed. Dover's almost unique cliff top chalkland habitat would attract an array of nature enthusiasts. There are several rare species of flora and fauna found in this area - including many orchids and associated plants. There is the river Dour one of the rare chalk streams in the world.

The historic Saxon-Shore way walk to the unique St Margaret's Bay. In addition to breathtaking views, this will take visitors past one of the largest colonies of Skylarks in the South East, Peregrine falcons, Red-billed Choughs, past the lighthouse -the first in the world to be powered by electricity etc, descend the subterranean tunnels to the unique Fan-Bay shelter, stopping off for brief refreshment at Britains closest pub to France. Children and adults can then indulge in rock pooling in the stunning bay which was home to both Noel Coward and the Ian Fleming.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>There is a need for pleasurable, retail-browsing experiences; This means stopping the Dover gridlock events that lasted most of April 2022 and in July 2022. It means cutting business rates for independent, innovative start-ups especially those allowing residents to reduce their carbon footprint (zero-waste / re-fill shops, cycle + skate repair stores, up-cycling stores, plant swap-shops, etc).</p> <p>The Sunday farmers' market should be tempted back all year round, so that there were more footfall further inland, up Biggin Street, further west than the St James retail centre. e.g. car park behind Costa coffee, if it were offered space under a solar canopy under which shoppers could stroll round protected from the worst of the rain. Dover town spatially has much potential, it has long been overdependent on disparate, charitable initiatives. There is an especial need to incentivise retail start-ups along London Road, Dover between the Charlton Centre and the Cadet centre. This area of one-way west-bound A256 is crying out for air pollution to be reduced and for embellishment, and it is Living Walls of vertical planting / urban hedges that are called for. The same applies to one-way, port-bound Barton Rd / Maison Dieu Rd A256.</p> <p>Many public buildings in mid Dover area, offer opportunities to enhance national and local energy security if they were to gain solar power installation that could be used by neighbouring carehomes, or doctors' surgeries (solar energy is most economical viable when exported to neighbouring premises using electricity during daylight hours all year round).</p> <p>Walking / cycling / driving along London Road could become a much more cheering experience if Living Walls referred to above, combined with murals (for years community groups have offered creative talents to do this, time for Dover TC/ DDC to become more hearing councils. Underpinning the promotion of the town is the urgent installation of public toilets. (See comments above SP6 Economic Growth / Tourism) The stalemate between DoverTC and DDC has to be overcome by installing a minimum of 3 new modern self-cleaning toilet blocks, one at Maison Dieu, in 2023; in the interests of Dover residents, and local visitors from around East Kent and visitors from further afield. And as the Port of Dover Community Forum pointed out, while PoD have provided lavatories at the Clock Tower space, it is not their role to take away from councils their responsibility to restore toilets and make the town as hygienic as it was in the 1980s.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Council's aspirations for the town centre (for example, para 3.144) should more explicitly acknowledge the town's rich historic environment; e.g. how celebrating the town's rich past and heritage may contribute to its future attractiveness, vitality and success. Bullet point 5 of SP8 is welcomed as acknowledgement of the importance of the historic environment in the town's future, however the implementation section which follows the Principles could be strengthened by including a reference to the production of development briefs as an additional layer which will help ensure heritage is properly understood and celebrated within development sites, and that local character and distinctiveness is properly understood and embedded in the planning for a site. (DDC Note - This is an extract of the full Historic England representation which can be located at SDLP1169)
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP8
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note <i>The text below is an extract from the original representation which is attached to SDLP1438.</i></p> <p>SP8 Dover Town Centre</p> <p>There is a need for pleasurable, retail-browsing experiences; This means stopping the Dover gridlock events that lasted most of April 2022 and in July 2022. It means cutting business rates for independent, innovative start-ups especially those allowing residents to reduce their carbon footprint (zero-waste / re-fill shops, cycle + skate repair stores, up-cycling stores, plant swap-shops, etc).</p> <p>The Sunday farmers' market should be tempted back all year round, so that there were more footfall further inland, up Biggin Street, further west than the St James retail centre. e.g. car park behind Costa coffee, if it were offered space under a solar canopy under which shoppers could stroll round protected from the worst of the rain. Dover town spatially has much potential, it has long been overdependent on disparate, charitable initiatives. There is an especial need to incentivize retail start-ups along London Road, Dover between the Charlton Centre and the Cadet centre. This area of one-way west bound A256 is crying out for air pollution to be reduced and for embellishment, and it is Living Walls of vertical planting / urban hedges that are called for. The same applies to one-way, port-bound Barton Rd / Maison Dieu Rd A256.</p> <p>Many public buildings in mid Dover area, offer opportunities to enhance national and local energy security if they were to gain solar power installation that could be used by neighbouring care homes, or doctors' surgeries (solar energy is most economical viable when exported to neighbouring premises using electricity during daylight hours all year round).</p> <p>Walking / cycling / driving along London Road could become a much more cheering experience if Living Walls referred to above, combined with murals (for years community groups have offered creative talents to do this, time for Dover TC/ DDC to become more hearing councils. Underpinning the promotion of the town is the urgent installation of public toilets. (See comments above SP6 Economic Growth / Tourism) Dover TC and DDC have jointly agreed to install a minimum of 3 new modern self-cleaning toilet blocks, one at Maison Dieu, in 2023, in the interests of Dover residents, and local visitors from around East Kent and visitors from further afield. And as the Port of Dover Community Forum pointed out, while Port of Dover have provided lavatories at the Clock Tower space, it is not their role to take away from councils their responsibility to restore toilets and make the town as hygienic as it was in the 1980s.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	

<p>and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The relative success of Deal Town Centre is threatened by the congestion caused by over-development on the outskirts of Deal/ Walmer. With many developments still in the planning and building stage, even more congestion should be anticipated from 2023. Shoppers aged 50 – 90 will not want to sit in traffic queues to get to Deal Market on a Saturday, they will go elsewhere perhaps to Canterbury or to Thanet retail parks. Deal Town Council's report of June 2020 'Making Walking and cycling irresistible' is excellent, it provides detailed junction plans to make cycling safer and we fully endorse it.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Both of these compact centres would benefit from '20 is plenty' policies being introduced, Sandwich has. Walmer TC has put this on its HIP Highways Improvement Plan. This would protect the retail and residential streets that exist, and make the retail centres more attractive for young families with buggies, and for many others. A strong case exists for incentivising / cutting business rates for independent, innovative start-ups especially those allowing residents to reduce their carbon footprint (zero-waste / re-fill shops, cycle + skate repair stores, up-cycling stores, plant swap-shops, etc). The plan for a 'Park and Pedal', scheme at Borrowpit Carpark, Walmer is excellent. It would offer opportunities to SMEs to provide small electric hopper buses. This should be provided by a local CIC in preference to Stagecoach, who, experience shows, are disinclined to innovate in a timely fashion, and it could allow Deal town centre to retain footfall on the high street and cope with the developments which have already received planning permission, or are being built. The Deal / Walmer road system will not cope if permission is given for any more developments, these are reasons why we say SAP 14, SAP 15, SAP 34, are unsound. DDC dept of Planning are in danger of killing a Dealite goose laying golden eggs, if they don't put a brake on developments within 3 miles of the boundaries of Deal / Walmer.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Aylesham is designated as a "Rural Service Centre" on par with the town of Sandwich. Although Sandwich and Aylesham have equal weighting in the settlement hierarchy, they are not getting an equal weighting in housing development or in terms of investment. The Site Allocations refer to the district's "existing larger settlements of Dover, Deal and Sandwich" but in reality Aylesham is now likely to have a larger population than Sandwich.</p> <p>Aylesham is receiving 649 new homes (SAP24 and SAP27), whilst Sandwich has a proposed development of just over 200 homes.</p> <p>The Draft Local Plan proposes investment in Sandwich to improve the town and protect its historic environment. In addition, it will see investment in culture. This is not the same for Aylesham.</p> <p>This relates to SP3 – Housing Growth and SP10 – Sandwich Town Centre.</p> <p>The residents of Aylesham should also see their cultural capital widened and enriched in such an extensive Draft Local Plan. Other than house building, there seems to be little else on offer. Funding should be provided for organisations such as cinemas, museums, galleries etc that will help to enrich people's lives.</p> <p>For a rural settlement, a further 640 houses, on top of a recent development of 1,360 seems to be somewhat excessive.</p> <p>Aylesham Parish Council believes that Aylesham is being left behind. Aylesham must receive equal investment in comparison to other Rural Service centres to ensure the village thrives.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SP 10 appears to be lacklustre in its approach.</p> <p>It makes no mention of increasing footfall to businesses by providing extra housing for potential residents. It would almost appear that DDC has ignored the settlement hierarchy and purposely restricted this, to Sandwich's detriment.</p> <p>It does not seek to capitalise on those positive attributes of the town that draw people to come to live in the town, such as its excellent schools, historic environment, good road, and rail connections, and its close proximity to the largest high-end employment in the area, at Discovery Park.</p> <p>In its foreword to Sandwich in this document, DDC claim in one section that the housing is limited due to the lack of local jobs while conveniently forgetting that it has stated that Sandwich lies adjacent (within walking distance) to the largest source of employment in the area.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	DDC should realise that Sandwich has more to it than history and golf and aim to make more of the other attributes the town has. It should look to increase the housing supply so that the town can benefit from residents who are drawn to live there rather than people who are drawn to visit.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Introduction

Walsingham Planning is submitting this representation on behalf of Lidl Great Britain, who has an existing store at Honeywood Parkway in Dover, and who also hopes to deliver additional investment in the District over the course of the new plan period.

Context – The Need to Improve Convenience Retail Provision in Sandwich

It is important to note from the outset that the existing, adopted Dover Land Allocations Local Plan identifies a clear need to improve convenience retail provision within the Deal / Sandwich trade area. Indeed, paragraph 3.237 of the Land Allocations Local Plan states that there is an identified quantitative need over the Plan period for around 2,400 sq.m gross additional convenience goods floorspace within the area. Moreover, the adopted Plan explains that:

“The Council considers that there is potential to increase the quantity and quality of convenience floorspace provision in Sandwich to help broaden the range and choice to the benefit of its local catchment population, whilst also helping to strengthen the role of Sandwich in the settlement hierarchy. New floorspace of an appropriate scale in a location that is well connected to the town centre would help to increase the ‘claw back’ and retention of shoppers and expenditure from the 2012 position” [our emphasis].

The adopted Local Plan goes on to explain that the tight historic grain of Sandwich town centre does not readily provide opportunities for larger retail provision. The adopted Local Plan could not identify any suitable or viable sites within or on the edge of Sandwich town centre to accommodate such a scheme, and so the Plan sets out a criteria-based policy, against which any future retail applications can be assessed. Policy LA19 relates directly to ‘new convenience retail provision in Sandwich’, and states that planning permission for new convenience provision in Sandwich will be permitted, provided that the scheme meets the six specified criteria.

We understand that Policy LA19 of the adopted Local Plan was framed by an evidence base that is now considered to be out-of-date. Notwithstanding this, it is clear that the current Local Plan identifies a very clear quantitative and qualitative need for additional food and grocery provision within the settlement of Sandwich, and this need remains unmet. Indeed, no new foodstores have been delivered within the town, and thus residents continue to have to travel further afield to undertake their main food shop.

The evidence base that informs the Regulation 19 Draft Local Plan includes an updated Dover Retail and Town Centre Needs Assessment (2021). The updated Needs Assessment shows that there is no District-wide capacity for new convenience goods floorspace in the period up to 2040, after taking into account commitments. However, when the specific towns are considered, the Study identifies that there remains some capacity for additional floorspace in Deal and Sandwich, equating to between 256 and 458 sq.m net convenience floorspace by 2040. It should be noted, however, that the 2021 Study is based on the very conservative assumptions that the retail market is in ‘equilibrium’ (i.e. that no stores are over-trading) and that market shares will remain constant over the study period.

Moreover, whilst the calculated quantitative need may have reduced based on the latest data assumptions, there has been no change in practice to the very real qualitative need that continues to exist for additional foodstore provision within Sandwich.

It is relevant to note that the evidence base (the 2021 Retail and Town Centre Needs Assessment) records that there were 104 retail and leisure units within Sandwich, as of 2021. Out of this total, 37% of the units comprised non-food retail stores, 23% of units provided leisure services, and 14% of units offered retail services. However, only 8% of the units (7 units in total) accommodated convenience retail shopping facilities. This is lower than the national average representation, and also represents a decline since 2015, when there were 10 food and grocery outlets within the centre.

Sandwich has limited representation from convenience retailers. Whilst the centre benefits from some independent food stores (bakers, butchers and greengrocers), there are limited ‘main food’ shopping opportunities. The only medium-sized foodstore is the Co-op at Moat Sole Road.

As a result, it is evident that many residents need to travel further afield – to Dover, Deal and out-of-centre destinations – to undertake their main food shopping. The household survey shopping results, reported in the Retail and Town Centre Needs Assessment, confirm that only 3% of convenience goods expenditure from the District is spent in Sandwich Town Centre, which is a very low level of expenditure retention. Within the more localised Sandwich study zone (Zone 6), less than a quarter of convenience goods expenditure is retained by local stores, which represents significant leakage of local expenditure to destinations located further afield.

Indeed, the market share analysis for main food shopping (Table 2, Appendix 2, Volume 4 of the 2021 Needs Assessment) shows that only 14% of main food expenditure within Zone 6 is retained within Sandwich. Instead, residents are travelling to Tesco Extra at White Cliffs Business Park (29%), Aldi at Cherry Tree Avenue, Dover (13%), Sainsbury’s in Deal (11%), as well as destinations further afield (to Ramsgate, Margate and Canterbury) to undertake their weekly ‘main food’ shop. This is not a sustainable pattern of shopping, and the results highlight the clear deficiency in main food shopping provision within Sandwich that continues to exist.

We note that further growth is earmarked for Sandwich within the draft Local Plan. The identified disparity will continue to grow, as more residents move into the town, and the lack of local access to main food shopping opportunities becomes more apparent.

	<p><u>Strategic Policy 10 - Sandwich Town Centre</u></p> <p>It is our view that draft Strategic Policy 10 is unsound, because it fails to respond positively to the evidence base and does not reflect national policy.</p> <p>As set out above, it is clear that there is an identified qualitative need for additional foodstore provision within the settlement of Sandwich, to meet residents' shopping needs and clawback trade that currently leaks to destinations further afield.</p> <p>The policy justification text confirms that the proportion of convenience outlets in the town has reduced since 2018. As per the adopted Local Plan, the draft Local Plan also reiterates that the "<i>development potential of Sandwich Town Centre is limited due to its historic layout</i>". In these circumstances, we would expect the draft Local Plan to identify a suitable edge / out-of-centre site to accommodate future retail needs, or a criteria-based policy against which future development proposals can be positively assessed (akin to adopted Local Plan Policy LA19).</p> <p>However, the wording of draft Local Plan Policy SP10 is more restrictive, and – whilst it seeks to enhance the vitality and viability of Sandwich Town Centre – makes no provision for growth and does not identify how future needs can be met.</p> <p>The draft Local Plan does not therefore reflect a positive and flexible approach to plan-making, and is thus inconsistent with national policy. The draft Local Plan does not seek to allocate any sites for retail development within Sandwich, despite the evidence of need identified, and it does not represent a positive approach to the growth and management of the key settlement of Sandwich over the plan period.</p> <p>In summary, by failing to make any provision for additional convenience floorspace, either as a retail allocation or criteria-based policy, it is our view that draft Policy SP10 is not sound, because it has not been positively prepared, it does not represent an appropriate and justified strategy, the policy will not be effective and it is not consistent with the approach to planning for town centres that is set out in the NPPF.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>It is our view that the retail and town centre strategy put forward in the draft Local Plan is flawed and unsound. The strategy places an over-reliance on the quantitative need figures derived from 2021 Retail and Town Centre Needs Assessment, and does not take into account evidence of qualitative need. In particular, it is of great concern that the draft Local Plan does not consider the clear need that exists for additional convenience provision within Sandwich, which is identified in the adopted Local Plan, and which remains unaddressed.</p> <p>Whilst the adopted Local Plan contains a positive and proactive policy to support new retail development within Sandwich (Policy LA19), this strategy has not been carried through to the draft Local Plan.</p> <p>In order to be sound, the new Local Plan (within Strategic Policy 10) should provide policy support to addressing the ongoing retail needs identified within Sandwich, as this currently represents an omission from the draft Local Plan.</p> <p>In the absence of an appropriate strategy to support new convenience provision within Sandwich, local residents will need to continue to travel to Deal, Dover and destinations further afield to undertake their food and grocery shopping. This is not a sustainable strategy.</p> <p>Strategic Policy 10 should identify the need to enhance convenience provision within the settlement of Sandwich, and should allocate a site for such use, or set out a criteria-based approach to considering future foodstore development proposals.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>We would like to participate because we have recommended that modifications are required to Strategic Policy 10 (as well as other policies within the draft Local Plan).</p> <p>Given the technical nature of the retail evidence base, it would be useful to participate directly in the oral examination in order to have the opportunity to discuss the proposed retail and town centre strategy for Sandwich in detail and answer questions directly.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Both of these compact centres would benefit from '20 is plenty' policies being introduced, Sandwich has. Walmer TC has put this on its HIP Highways Improvement Plan. This would protect the retail and residential streets that exist, and make the retail centres more attractive for young families with buggies, and for many others. A strong case exists for incentivising / cutting business rates for independent, innovative start-ups especially those allowing residents to reduce their carbon footprint (zero-waste / re-fill shops, cycle + skate repair stores, up-cycling stores, plant swap-shops, etc).
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note The text below is an extract from the original representation which is attached to SDLP1438.</p> <p>SP9 & SP 10 Deal & Sandwich Town Centres</p> <p>Both of these compact centres would benefit from '20 is plenty' policies being introduced, Sandwich has. Walmer TC has put this on its HIP Highways Improvement Plan. This would protect the retail and residential streets that exist and make the retail centres more attractive for young families with buggies, and for many others. A strong case exists for incentivising / cutting business rates for independent, innovative start-ups especially those allowing residents to reduce their carbon footprint (zero-waste / re-fill shops, cycle + skate repair stores, up-cycling stores, plant swap-shops, etc)</p> <p>The relative success of Deal Town Centre is threatened by the congestion caused by overdevelopment on the outskirts of Deal/ Walmer. With many developments still in the planning and building stage, even more congestion should be anticipated from 2023. Shoppers aged 50 – 90 will not want to sit in traffic queues to get to Deal Market on a Saturday, they will go elsewhere perhaps to Canterbury or to Thanet retail parks. Deal Town Council's report of June 2020 'Making Walking and cycling irresistible' is excellent, it provides detailed junction plans to make cycling safer and we fully endorse it. The plan for a 'Park and Pedal' scheme at Borrow pit Carpark, Walmer is excellent. It would offer opportunities to SMEs to provide small electric hopper buses. This should be provided by a local CIC in preference to Stagecoach, who, experience shows, are disinclined to innovate in a timely fashion, and it could allow Deal town centre to retain footfall on the high street and cope with the developments which have already received planning permission or are being built. The Deal / Walmer road system will not cope if permission is given for any more developments, these are reasons why we say SAP 14, SAP 15, SAP 34, are unsound. DDC dept of Planning are in danger of killing a 'Dealite' goose laying golden eggs, if they don't put a brake on developments within 3 miles of the boundaries of Deal / Walmer.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)	

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The current development at Whitfield does not have the required infrastructure, which is why there have been flooding and sewerage problems. It also has inadequate transport links, resulting in more car use and all the problems which arise from that.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Infrastructure should be in place before developments are allowed to begin. Developments should not be permitted without a nearby rail connection.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP1
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>In October 2021, Aylesham Parish Council supported the Climate and Ecological Emergency (CEE) Bill which address the full extent of the climate and nature crisis in the UK. As a result, any local plan should use up-to-date science to make sound recommendations.</p> <p>As the district is extremely water scarce, all possible measures should be implemented to help mitigate water scarcity. The use of Sustainable Urban Drainage systems (SUDs) is required to be prominent in all future developments. This will help to deal with surface water flooding. We welcome the Draft Local Plan's hierarchy of methods of discharge, with the use of combined sewers coming last.</p> <p>This relates to CC6 of SP1 – Surface Water Management.</p> <p>There are a number of options to ensure new homes produce the least possible carbon emissions. Aylesham Parish Council would like to see Dover District Council require the full 2025 Future Homes Standard to be delivered now (this will reduce emissions by between 75-80% compared to current standards), not at some point during the Local Plan's lifetime.</p> <p>This relates to CC1 of SP1 – Reducing Carbon Emissions.</p>

We welcome the commitment to planting trees within new developments that are native to Kent. This will help to keep the rural feel of Aylesham alive. Currently we often see newly planted trees dying within the first few years of their lives. There must be a comprehensive plan to ensure that these trees reach maturity (part d) and how this will be enforced by the local authority.

This relates to CC8 of SP1 – Tree Planting and Protection.

Aylesham Parish Council welcomes the commitment to planting larger numbers of trees but feels this must come with a long-term solution to maintaining the trees. Dover District Council must also commit to the full 2025 future homes standard now.

Aylesham Parish Council welcomes the addition and enhancement of open spaces and play areas. However, there are two points to note in the IDP: why would \$106 monies from Aylesham be spent upgrading play areas in Nonington?; and play areas and open spaces are last to be delivered in developments – this must not happen in the future.

Aylesham Parish Council is identified as “Delivery Partners” on a number of projects due to be delivered: we have not been consulted on this prior to the Regulation 19 document being released.

The HRA[1] suggests that AYL003 – Land South of Aylesham is “high” suitability for the European Golden Plover, and so all measures must be taken to ensure this SPA protected bird species is still able to migrate and flourish in the area. SAP 25 (mixed use employment) is considered “moderate”.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP11 Infrastructure and developer contributions
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Paragraph 9.26 highlights the need for infrastructure, particularly transport infrastructure, and paragraphs 9.27 to 9.29 point out the difficulties of establishing what infrastructure is required to support each potential new development.</p> <p>Paragraph 9.30 concludes that infrastructure is best provided by Section 106 agreements rather than by a Community Infrastructure Levy (CIL). This underpins Strategic Policy 11 which concludes by stating that "In determining the nature and scale of any provision, the Council will have regard to viability considerations and site-specific circumstances."</p> <p>This statement, in effect and in practice, has allowed developers to reduce progressively the Section 106 payments and other conditions imposed on developments at the time of granting permission by suggesting that their potential developments are not financially viable once all the constraints have been factored in. A CIL would provide developers, planners and residents with the certainty of knowing what the community costs would be.</p> <p>It is not the Council's role to have regard to any planning application's financial viability. It is the responsibility of the applicant to have in place sufficient funding or access to sufficient funding in order to realise the project. It is the Council's responsibility to determine the use of the land and the conditions which make that use appropriate, and answer for its decisions before the electorate. The plan would become more sound and effective if it included Council intention to implement a CIL before the Plan has run a quarter of its projected course, and a further sentence should be added to SP11 stating that: "The Council intends to introduce a Community Infrastructure Levy as soon as possible but before 2025 so that the council, developers and residents can more clearly understand the financial requirements of any agreed planning permission."</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Implement CIL rather than S106
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SP11 - Infrastructure and Developer Contributions does not mention the recent legal compliance required under the Environment Act 2021, whereby new development will be legally required to compensate for habitat loss by providing a minimum of 10% BNG and to describe how this will be met and managed for a minimum 30 year period as part of a Biodiversity Net Gain Plan submitted with the planning application. We would recommend that the above is included or reference is made to other policies within the Plan. It is key that a strategic approach to Green and Blue Infrastructure and BNG is taken through the delivery of Local Nature Recovery Strategies, as set out within the Environment Act.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	10 Transport and Infrastructure
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><i>This comment applies to SP11 & SP12</i></p> <p>TRANSPORT INFRASTRUCTURE</p> <p>In the rural hinterland of the District, most roads are single track so most, if not all, of the roads around settlements are single track. Larger villages, unless they have (or had) a classified road running through them, may have a few dual track roads but these, although wide enough for two cars to pass are generally not sufficiently wide for a car and a wider vehicle (e.g. a lorry) to pass: one has to find a suitable place to pull in. This issue is not considered at all in the Regulation 19 Local Plan.</p> <p>In this area, most roads do not have a separate footway and, of those that do, most have it for only a small portion of their length. Pedestrian traffic here is not considered at all in the Regulation 19 Local Plan.</p>

Cycling is a more sustainable form of transport and will be encouraged.

It is likely that cyclists living in rural settlements will often choose to use more minor (hence single track) roads, in the expectation of less traffic on these. However, these are used by motor vehicles and any car or lorry would be reduced to the cyclist's speed as, in most places, there would not be room for the cyclist, a 1.5 m gap and the car or lorry.

A similar problem arises with cycle use on the few dual track roads, which tend to be the main connecting routes: with oncoming traffic and limited forward visibility (because of bends and hedges/banks), motor vehicles would have difficulty safely passing a cyclist, reducing traffic to the cyclist's speed and increasing congestion.

This issue is not considered at all in the Regulation 19 Local Plan.

The only consideration given to increased rural traffic levels (with consequent congestion - and so air quality - and road safety issues) relates to junctions; that relating to local road networks is deliberately not done. The aspirations of the Local Plan in this regard are outlined in the first two paragraphs of T12 but any consideration of these is consciously postponed: the last two paragraphs of T12 make clear that traffic levels are for the applicant to consider and Appendix 1 - Infrastructure Delivery Schedule (IDS) 2022 proposes a review/assessment/Traffic Assessment.

This means, of course, that considerations of both the traffic levels (with consequent congestion and road safety issues) and the pollution implications are omitted.

This lacuna makes the plan unsound, for four reasons.

“Positively prepared – providing a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs”: congestion on local roads is omitted, so there is no consideration of the needs this would present and what should be done to meet these.

“Justified – an appropriate strategy”: the strategy of having increased housing around rural settlements has not been justified because the effects on the local road networks are not considered.

“Effective – deliverable over the plan period”: there is no consideration of the improvements in local roads that would be needed, so no consideration of whether these would be deliverable over the plan period.

It is not **“Consistent with national policy”**, which the following extracts from the NPPF, especially paragraphs 104 and 110, illustrate.

8 sustainable development ... objectives:

a) **an economic objective** – to help build a strong, responsive and competitive economy, ... by identifying and coordinating the provision of infrastructure;

b) **a social objective** – ... safe places ...: (rural roads outside of the areas proposed for development are not considered and would become less safe);

11a) all plans should promote a sustainable pattern of development that seeks to: ... align growth and infrastructure...

16 Plans should:

a) be prepared with the objective of contributing to the achievement of sustainable development¹¹;

20 Strategic policies should set out an overall strategy for the pattern, scale and design quality of places, and make sufficient provision¹³ for:

...

b) infrastructure for transport, ...

85. Planning policies and decisions should recognise that sites to meet local business and community needs in rural areas may have to be found adjacent to or beyond existing settlements, and in locations that are not well served by public transport. In these circumstances it will be important to ensure that development is sensitive to its surroundings, does not have an unacceptable impact on local roads (my underlining) and exploits any opportunities to make a location more sustainable (for example by improving the scope for access on foot, by cycling or by public transport). ...

104. Transport issues should be considered from the earliest stages of plan-making and development proposals, so that:

a) the potential impacts of development on transport networks can be addressed;

d) the environmental impacts of traffic and transport infrastructure can be identified, assessed and taken into account – including appropriate opportunities for avoiding and mitigating any adverse effects, and for net environmental gains; and
e) patterns of movement, streets, parking and other transport considerations are integral to the design of schemes, and contribute to making high quality places.

110. In assessing sites that may be allocated for development in plans, or specific applications for development, it should be ensured that:

- a) appropriate opportunities to promote sustainable transport modes can be – or have been – taken up, given the type of development and its location;
- b) safe and suitable access to the site can be achieved for all users;
- c) the design of streets, parking areas, other transport elements and the content of associated standards reflects current national guidance, including the National Design Guide and the National Model Design Code 46; and
- d) any significant impacts from the development on the transport network (in terms of capacity and congestion), or on highway safety, can be cost effectively mitigated to an acceptable degree.

111. Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe.

112. Within this context, applications for development should:

- a) give priority first to pedestrian and cycle movements, both within the scheme and with neighbouring areas; and second – so far as possible – to facilitating access to high quality public transport, with layouts that maximise the catchment area for bus or other public transport services, and appropriate facilities that encourage public transport use;
- b) address the needs of people with disabilities and reduced mobility in relation to all modes of transport;
- c) create places that are safe, secure and attractive – which minimise the scope for conflicts between pedestrians, cyclists and vehicles, avoid unnecessary street clutter, and respond to local character and design standards (my underlining);
- d) allow for the efficient delivery of goods, and access by service and emergency vehicles;

Additionally, this lacuna is inconsistent with the following objectives (quoted from p 22 of the Plan):

(from 2.4) To focus new development at accessible and sustainable locations which can utilise existing infrastructure, facilities and services, and to ensure development contributes to the sustainability of local communities and services, supporting regeneration and wherever possible make the best use of brownfield land.

(from 2.5) To improve connectivity and movement through significantly enhancing the provision of walking and cycling routes and other sustainable modes of transport, as well as delivering improvements to the local and strategic road network.

To ensure infrastructure is delivered, in a timely manner, to support the needs of new and existing communities in the District.

This inconsistency of SP11 and SP12 with the Plan's objectives means that their implementation, through SP11 & SP12, is unsound because it is not consistent with national policy:

9. These objectives should be delivered through the preparation and implementation of plans and the application of the policies in this Framework;

....

the implementation fails the test of soundness.

Furthermore, the Regulation 19 Local Plan, where it considers local traffic, only considers that from new development (paragraph 10.7): there is no consideration either of traffic now and how this is expected to develop (and so what needs this generates) or of the extra traffic both from construction vehicles and then traffic from newly constructed buildings before improvements are made.

As an example of the former (see representation submitted on REGULATION 19 TRANSPORT MODELLING FORECASTING REPORT), traffic on the (relatively) main road between the A2 and A256, through Shepherdswell and Eyethorne, is projected to grow at 15-19% on the DM (do minimum) scenario.

For the latter, it is the consistent assumption in both the report and its supporting evidence on infrastructure that road improvements will be paid for by developer contributions, but these are not normally made until a proportion of the houses are built (because by then the developer should have made sufficient money to do so). However, there would be a considerable amount of additional traffic to and from the new buildings in

	<p>the initial phase of development and then before any improvements could be completed; much of this additional traffic would be heavy construction vehicles (for which most local roads are unsuitable).</p> <p>The Government 'Guidance on plan-making', in paragraph 059, states</p> <p>A plan is an opportunity for the strategic policy-making authority to set out a positive vision for the area, but the plan should also be realistic about what can be achieved and when. This means paying careful attention to ... identifying what infrastructure is required and how it can be funded and brought forward.</p> <p>At an early stage in the plan-making process strategic policy-making authorities will need to work alongside infrastructure providers, service delivery organisations, other strategic bodies such as Local Enterprise Partnerships, developers, landowners and site promoters. A collaborative approach is expected to be taken to identifying infrastructure deficits and requirements, and opportunities for addressing them. In doing so they will need to:</p> <p>assess the quality and capacity of infrastructure, and its ability to meet forecast demands. Where deficiencies are identified, policies should set out how those deficiencies will be addressed; ...</p> <p>This Guidance, which amplifies paragraph 16c) of the NPPF, has clearly not been followed: the Plan fails to consider growth of traffic on local roads in any of the DM scenario, from construction traffic or, in the initial phase of development, to and from new buildings.</p> <p>Both this and not complying with paragraph 104 of the NPPF make the plan unsound.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>A full assessment of traffic (of all varieties) on local roads, taking into account an up-to-date assessment of traffic now and of likely growth in the scenarios of minimal, some and maximum planned building growth should be made; in co-operation with KCC plans should then be developed for the appropriate infrastructure enhancements and the planned growth reassessed in the light of this (an iterative process). These plans should not only consider the consequences of traffic growth when building is completed but also take into account</p> <p>a) traffic during construction & b) traffic from what construction is completed before the enhancements from S106 contributions are made.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>to provide any necessary clarification to the above.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We note that SP11 formed Strategic Policy 13 of the Regulation 18 consultation. We previously stated that Strategic Policy 13 was satisfactory. We note that SP11 has now been updated to reference that appropriate phasing for the provision of infrastructure will be determined on a case-by-case basis with reference to the most up to date Infrastructure Delivery Plan and the priority classification along with other relevant evidence, and in consultation with the relevant providers. It also now sets out that in exceptional circumstances, should independently verified viability evidence funded by the applicant establish that it is not possible to deliver the infrastructure requirements set out in this Plan and the viability position is agreed by the Council, the Council will consider flexibility through a reduction in contributions and/or a deferred payments mechanism. Infrastructure and Developer Contributions are discussed further below in relation to mitigation requirements and the Infrastructure Delivery Plan.</p> <p>We appreciate that circumstances may change over time. However, development must always be accompanied by the appropriate, agreed SRN mitigation. It may, therefore, be necessary, based on a case-by-case assessment, to recommend Grampian conditions to ensure that development fully mitigates its SRN impacts. Equally, it may be appropriate to agree a Monitor and Manage approach encompassing both aspired to changes in sustainable travel etc but with a fall-back position of more traditional mitigation in the event the aspirations are not successful.</p> <p><i>(Note - This is an extract of the Full National Highways representation which can be located at SDLP1152)</i></p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP11
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><u>Highways and Transportation</u>: The Local Plan could be more succinct in its approach to transport infrastructure, by providing a level of traffic/trip impact assessment and a subsequent mitigation strategy to inform site by site policy and specifically commit linked development sites to related infrastructure.</p> <p>Whilst an element of overarching policy is required to encompass any windfall or opportunity sites that might be identified throughout the lifetime of the Local Plan, the wording of the policy does not provide sufficient indication of when infrastructure will be sought. Reference to site-by-site viability is noted, however it is essential that sufficient detail is included within the whole plan viability assessment, to ensure that the final site selection provides a realistic picture of the prospects of the county council receiving infrastructure contributions in the future. This also includes a realistic indication as to the level of affordable housing likely to be secured to assist in speeding up the development planning process at planning application stage.</p> <p>KCC would welcome further constructive dialogue with Dover District Council in identifying these requirements as the process moves forward and as further highway related evidence is produced.</p> <p><u>Development Investment</u>: The County Council welcomes the inclusion of County Council infrastructure and services as <i>Types of Infrastructure</i> within the explanatory paragraphs for this policy.</p> <p>Where viability evidence is presented by the applicant which may have a subsequent impact on mitigation for necessary county infrastructure, KCC requests that it is consulted by the District Council at the earliest opportunity.</p> <p>The County Council operates a network of 19 Household Waste and Recycling Centres, this should be corrected within paragraph 3.215.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Paragraph 9.26 highlights the need for infrastructure, particularly transport infrastructure, and paragraphs 9.27 to 9.29 point out the difficulties of establishing what infrastructure is required to support each potential new development. Paragraph 9.30 concludes that infrastructure is best provided by Section 106 agreements rather than by a Community Infrastructure Levy (CIL). This underpins Strategic Policy 11 which concludes by stating that "In determining the nature and scale of any provision, the Council will have regard to viability considerations and site-specific circumstances."</p> <p>This statement, in effect and in practice, has allowed developers to reduce progressively the Section 106 payments and other conditions imposed on developments at the time of granting permission by suggesting that their potential developments are not financially viable once all the constraints have been factored in.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>A CIL would provide developers, planners and residents with the certainty of knowing what the community costs would be.</p> <p>It is not the Council's role to have regard to any planning application's financial viability. It is the responsibility of the applicant to have in place sufficient funding or access to sufficient funding in order to realise the project. It is the Council's responsibility to determine the use of the land and the conditions which make that use appropriate, and answer for its decisions before the electorate. The plan would become more sound and effective if it included Council intention to implement a CIL before the Plan has run a quarter of its projected course, and a further sentence should be added to SP11 stating that: "The Council intends to introduce a Community Infrastructure Levy as soon as possible but before 2025 so that the council, developers and residents can more clearly understand the financial requirements of any agreed planning permission."</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We consider that the plan is sound, but object to elements of Policy SAP15 - Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002) and Policy SP3 - Housing Growth. These objections are set out in the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359).</p> <p>1 Introduction</p> <p>1.1 Purpose of this Representation</p> <p>1.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited in response to the Dover District Council 'DDC' Local Plan (Regulation 19) consultation which runs until 9th December 2022.</p> <p>1.1.2 We understand that DDC is in the process of preparing a new Local Plan to set out a strategy for development for the period to 2040 and that the Council are presently seeking comments on the pre-submission Plan prior to its submission for examination in early 2023.</p> <p>1.1.3 Our client is promoting 'Land at Rays Bottom, Walmer, Deal' (hereafter referred to as 'Land at Rays Bottom' or 'the site') for the residential allocation of the site as part of the new Dover District Local Plan preparation process. The site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 75 dwellings under policy reference 'SAP15'.</p> <p>1.1.4 It is highlighted that as part of the Regulation 18 Local Plan, the Site was allocated under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' for approximately 100 dwellings (reference WAL 002).</p> <p>1.1.5 The purpose of the representation is to support the allocation of Land at Rays Bottom as a suitable and deliverable location for residential development and provide comment on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan but to object to the indicative capacity set out in the policy.</p> <p>1.1.6 In this regard, we remain wholly supportive of the principle of the residential allocation of Land at Rays Bottom and agree that the Site represents a logical and sustainable location to direct growth in Deal consistent with the growth strategy of the Plan as a whole.</p> <p>1.1.7 Accordingly, we say that the allocation of Land at Rays Bottom is necessary in order for the Council in meeting the growing need for new homes in the district and help to ensure the DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan.</p> <p>1.1.8 It is submitted that the SAP15 policy wording should be amended to reflect the capability of the Site to accommodate approximately 80 dwellings, deliverable early in the Plan period.</p> <p>1.1.9 Based on the current national and local planning context, we consider the Site to be a highly suitable edge-of-settlement location to allocate land for housing to help meet the need for new homes in the district and its effective use should be appropriately maximised in accordance with national policy objectives.</p> <p>1.1.10 Further details regarding the Site and commentary on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan are set out in the following sections of this document.</p> <p>1.2 About Fernham Homes</p> <p>1.2.1 Fernham Homes Ltd are a local award winning small and medium sized (SME) housebuilder, established in 1997 and has a strong track record of delivering high quality residential and mixed use developments in Kent over the last 25 years. This has been acknowledged through the receipt of nationally recognised awards, including the gold Evening Standard Awards best family home 2022 and 2019 bronze WhatHouse Best Small Housebuilder.</p>

1.2.2 SME housebuilders are recognised in the National Planning Policy Framework ('NPPF') at paragraph 69 as making an important contribution to meeting the housing requirements of an area, and being able to build out relatively quickly. Similarly, this has also been recognised by the Planning Inspectorate. This is particularly the case with Fernham Homes, which is privately owned with access to significant resources. This provides significantly more flexibility than national and other regional housebuilders, and allows Fernham Homes to deliver housing rapidly and to a high quality, beautiful and sustainable standard (para 126 of the NPPF).

1.2.3 Fernham Homes has embarked on a sustained period of growth, with an adopted and robust business plan to deliver around 300 houses per year in five years time.

1.2.4 A key element of Fernham Homes' operations is to take a careful approach to site selection: a huge amount of due diligence is undertaken as part of this, and therefore Fernham Homes only invests in those sites which meet the NPPF requirements of being available, suitable, and deliverable. As set out below land at Rays Bottom, Walmer ('SAP15') is firmly considered to be such a site.

1.2.5 Similarly, a key feature of Fernham Homes' approach is to work positively and proactively with local planning authorities (LPAs), both during the preparation of local plans and at planning application stage. Fernham Homes are fully committed to engaging with DDC in the preparation of its Local Plan, and firmly subscribe to the national policy approach set out in paragraphs 15 and 16 c) of the NPPF that "the planning system should be genuinely plan-led" and should be shaped by early, proportionate and effective engagement between LPAs and others, including businesses and developers. Accordingly, Fernham Homes would welcome the opportunity to discuss the matters contained in this representation, including the availability, suitability, deliverability and capacity of land Rays Bottom, Walmer ('SAP15') directly with DDC members and officers, ahead of the submission of the Local Plan for examination.

1.3 Representation Structure

1.3.1 The representation structure is outlined below for ease of reference:

Chapter 2 (Consultation Background) – Sets out the context of the Dover District new Local Plan preparation, relevant national planning requirements and a summary of our current position.

Please refer to paragraph 52 of Appeal Decisions: APP/M2270/W/21/3283924 & APP/M2270/W/21/3288645

Chapter 3 (Legal Tests of Soundness) - Assessing whether the plan is sound, having regard to the tests of soundness outlined by paragraph 35 of the NPPF.

Chapter 4 (Duty to Co-operate) - Assessing whether the plan is sound, having regard to the duty to cooperate outlined by paragraph 24 of the NPPF.

Chapter 5 (Housing Need) - Consideration of market and affordable housing need and assessment of proposed housing allocations and supply sources.

Chapter 6 (Assessment of Suitability) - Re-introduces our client's Site and provides a summary of planning constraints and opportunities, including the quantum of development that could be accommodated, why the Site is suitable for development and why the principle of the draft allocation for residential development is both justified and consistent with the DDC's strategy for growth in the district.

Chapter 7 (Conclusion) - Summarises the key points raised throughout the representation and re-affirms our client's support for the principle of the Site's allocation and the principle of proposed strategy ahead of the submission of the Plan for examination, and the objections in terms of capacity.

2 DDC – Draft for Submission Local Plan (Regulation 19)

2.1 Consultation Background

2.1.1 DDC are required to prepare a new Local Plan, as the current suite of development plan documents were adopted in 2002, 2010 and 2015. The Core Strategy (CS) (adopted 2010) in particular has a time horizon up to 2026. The plans, and the policies contained within, pre-date current national policy, practice guidance and local evidence and consequently require updating.

2.1.2 The new Local Plan will set out the vision, strategic objectives and overarching development strategy for the growth of the District over the period to 2040. It provides the planning policy framework to guide the future development of the area, addressing needs and opportunities for housing, the economy, community facilities and infrastructure, as well as the basis for conserving and enhancing the natural and historic environments, mitigating and adapting to climate change, and achieving well designed places.

2.1.3 For the avoidance of doubt, the new Local Plan, on adoption, will replace the CS 2010 and the Land Allocations Plan 2015, as well as saved policies from the 2002 Local Plan.

2.1.4 DDC's Regulation 19 Local Plan outlines the key issues that need to be addressed between now and 2040. In particular, the Plan sets out the following key planning issues for the District:

- Ensuring that new development in the District contributes to the mitigation of, and adaptation to, climate change.
- Supporting DDC to deliver its intention to be a carbon neutral district by 2050.
- Managing flood risk and coastal change.
- Ensuring that a sufficient amount and variety of land is identified to deliver a continuous supply of housing across the Plan period and that DDC maintains a five-year housing land supply.
- Delivering growth in a way that focuses development in the least sensitive areas of the District in order to conserve and enhance the District's rich natural and historic environments.
- Supporting sustainable development in rural areas to enhance the vitality of rural communities.
- Working with partners to facilitate the delivery of the Whitfield Urban Expansion. Ensuring a range of housing tenures, types and sizes are provided across the District to meet the needs of the local community and provide choice and flexibility in the housing market.
- Promoting economic growth, tourism, and investment in the District's Town Centres in line with DDC's Economic Growth Strategy.
- To address the impact of the COVID-19 pandemic.
- Delivering strategic transport improvements, including upgrades to the Duke of York and Whitfield roundabouts to support the scale of housing and economic growth identified in the Plan.
- Promoting sustainable transport initiatives to encourage a modal shift to more sustainable forms of transport like walking and cycling.
- Ensuring that infrastructure is delivered, in the right place, at the right time, to meet the needs of the District and support the levels of development identified in the Local Plan.
- Supporting the delivery of attractive, high-quality, design led developments and the creation of healthy, inclusive and safe communities, that are well served by good quality services and facilities to support people's lives.
- Conserving and enhancing the District's rich and diverse natural landscape, including the five international sites within the district, the Kent Downs Area of Outstanding Natural Beauty (AONB), five Sites of Special Scientific Interest (SSSIs), two National Nature Reserves (NNRs), two stretches of Heritage Coasts and two Marine Conservation Zones.
- Delivering a net gain in biodiversity in the District over the plan period.
- To promote the conservation, restoration and where appropriate the enhancement of the District's heritage assets, in order to protect their significance and to ensure that they can be best appreciated and enjoyed by current and future generations.

2.1.5 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'.

2.1.6 This submission will comment on each of the above, highlighting where we believe any areas of concern lie or where modifications may be required.

2.2 DDC's Local Development Scheme

2.2.1 The District Council has a duty to review the policies contained within the development plan every five years. The 2014/2015 Authority Monitoring Report signalled the need to review key parts of DDC's adopted CS evidence base.

2.2.2 DDC's Local Development Scheme (LDS) first outlined the delivery timetable for the Local Plan Review (LPR) in the March 2017 publication. Since then, the LDS has been updated on an annual basis. The most recent September 2022 LDS summarises that following the preparation of the principal evidence base documents, the Local Plan Review Regulation 18 consultation took place for 8 weeks in January 2021. The Regulation 19 consultation was scheduled for 7 weeks during Q4 of 2022 and is the subject of this representation.

2.2.3 Moving forward, submission of the Plan is anticipated in Q1-2 2023 with the Examination in Public in Q3-4 2023. The new Local Plan is currently scheduled for adoption in 2024.

2.2.4 As planned, DDC are now undertaking the Regulation 19 Draft Local Plan Consultation, for which this submission is made

3 Legal Test of Soundness

3.1 Legislation and Guidance

3.1.1 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. It is a statutory requirement that every development plan document must be submitted for independent examination to assess when it is "sound", as well as whether other statutory requirements have been satisfied (s.20(5) of the 2004 Act). By s.19 of the 2004 Act, in preparing a development plan document a local planning authority must have regard to several matters including national policies and advice contained in guidance issued by the Secretary of State. Such guidance currently exists in the form of the NPPF and is summarised below. This states that Plans must be:

(a) Positively Prepared: based on a strategy which seeks to meet objectively assessed development and infrastructure requirements

3.1.2 This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The NPPF set out principles through which the Government expects sustainable development can be achieved.

(b) Justified: an appropriate strategy when considered against the reasonable alternatives, based on proportionate evidence

3.1.3 This sets out the requirement that the Local Plan should be based on a robust and credible evidence base involving:

I. Research/fact finding: the choices made in the plan are backed up by facts.

II. Evidence of participation of the local community and others having a stake in the area.

3.1.4 The Local Plan should demonstrate an appropriate strategy, taking into account reasonable alternatives and based on proportionate evidence. These alternatives should be realistic and subject to sustainability appraisal. The Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.

(c) Effective: deliverable over its period based on effective joint working on cross-boundary strategic priorities

3.1.5 This makes clear that the Local Plan should be deliverable, requiring evidence of:

- Sound infrastructure delivery planning;
- Having no regulatory or national planning barriers to delivery;
- Delivery partners who are signed up to it; and
- Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.
- The new Local Plan should be flexible and able to be monitored.

3.1.6 The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the Local Plan should make clear that major changes may require a formal review including public consultation. Any measures which DDC has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.

d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national policy.

3.1.7 This submission comments on each of the above in further detailing, highlighting areas of support and where modifications are required as appropriate.

3.2 Legal Compliance

3.2.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

3.2.2 In addition to the above, the NPPF states² that: "Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that:

a) All plans should promote a sustainable pattern of development that seeks to: meet the development needs of the area; align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effect.

b) Strategic policies should as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

(i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or

Paragraph 11, National Planning Policy Framework 2021

(ii) Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.”

3.2.3 In addition, to the above, the NPPF states³ that Plans should:

a) be prepared with the objective of contributing to the achievement of sustainable development;

b) be prepared positively, in a way that is aspirational but deliverable;

c) be shaped by early, proportionate and effective engagement between planmakers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;

d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;

e) be accessible through the use of digital tools to assist public involvement and policy presentation; and

f) serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).

3.2.4 It is important to note that the NPPF⁴ requires strategic policies to set out an overall strategy for the pattern, scale, and design quality of places, and make sufficient provision for:

a) housing (including affordable housing), employment, retail, leisure and other commercial development;

b) infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat);

c) community facilities (such as health, education and cultural infrastructure); and;

d) conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation.

3.2.5 It is clear from the above, that any local plan should set out a comprehensive and cohesive approach to future development.

Paragraph 16, NPPF 2021

Paragraph 20, NPPF 2021

4 Duty to Co-Operate

4.1 Legal and NPPF Requirements

4.1.1 Section 33A of the Planning and Compulsory Purchase Act 2004 sets out a statutory ‘Duty to Cooperate’ (DtC) – i.e. a legal obligation - to all bodies as prescribed by Regulation 4 of the Town and Country Planning (Local Planning) England Regulations 2012 (the Regulations).

4.1.2 The duty requires DDC to cooperate with other persons to ‘maximise the effectiveness’ with which named activities are undertaken. Those activities include the preparation of development plan documents (such as this local plan) and activities that support that activity ‘so far as relating to a strategic matter’.

4.1.3 A strategic matter is defined by S33A(4) in summary as: (a) ‘sustainable development or use of land that has or would have a significant impact on at least two planning areas’ (a planning area in this case is the area of a borough or district council); and (b) ‘sustainable development or use of land in a two tier area’ (as this is) ‘if the development or use (i) is a county matter, or (ii) has or would have a significant impact on a county matter’. County matters broadly relate to minerals and waste and associated developments as defined by Paragraph 1 of schedule 1 to the Town and Country Planning Act 1990 (as amended).

4.1.4 Section 33A (7) requires DDC (and persons subject to the DtC) to have regard to any guidance issued by the Secretary of State about how the duty is to be complied with. In that regard Paragraph ID 9-004-29140306 of the Government's Planning Practice Guidance (PPG) confirms amongst other things that the DtC is not a duty to agree (albeit that local planning authorities should make every effort to secure the necessary cooperation on strategic cross border matters before they submit local plans for examination).

4.1.5 The NPPF establishes that effective and on-going joint working is an integral part of the plan making process that will, amongst other things, determine whether development needs that cannot be met wholly within a plan can be met elsewhere. The NPPF goes on to state at paragraph 27 that in order to demonstrate effective and on-going joint working strategic policy making authorities should: "... prepare and maintain one or more statements of common ground documenting the cross-boundary matters being addressed".

4.1.6 In addition to the District's own housing pressures, part of the DtC involves considering whether neighbouring authorities' unmet housing need can be accommodated. It is worth highlighting that recent amendments to the London Plan have identified that the City's housing need has become increasingly more difficult to deliver and therefore areas outside London will be faced with having to absorb more of London's housing need. Consequently, DDC has a duty to explore whether it can accommodate some of this overspill of London's unmet need.

4.2 Assessment of DDC's discharging of the Duty to Co-operate

4.2.1 It is recognised that work to discharge the DtC remains ongoing by DDC and will continue prior to submission as part of the preparation of the Local Plan evidence base.

4.2.2 Notwithstanding the above, at this stage it is understood that DDC have engaged with the members of the East Kent Regeneration Board including neighbouring East Kent planning authorities, Kent County Council (KCC) and its subsidiary departments:

- Folkestone and Hythe District Council
- Canterbury City Council
- Thanet District Council
- KCC
 - KCC Highways & Transportation
 - KCC Minerals & Waste
 - KCC Heritage Conservation
 - KCC Flood & Water Management
 - KCC Natural Environment & Coast
 - KCC Infrastructure including Education

4.2.3 In February 2016, DDC adopted a Memorandum of Understanding (MOU) in respect of the DtC between the East Kent Regeneration Board members. A review of the MOU took place and was agreed in January 2021.

4.2.4 The East Kent MOU sets out the framework in which the authorities will work together on strategic issues and will actively engage. It forms the overarching framework and context within which Statements of Common Ground (SoCG) will be agreed between individual authorities.

4.2.5 Further engagement is also confirmed to have taken place between the following prescribed bodies and other relevant bodies:

- Environment Agency
- National Highways
- Historic England
- Natural England
- Network Rail
- NHS Kent and Medway Clinical Commissioning Group (CCG) – now known as Integrated Care Board (ICB) since July 2022
- Kent Downs AONB Unit
- Other infrastructure providers

4.2.6 Whilst work remains ongoing, at this stage it is understood that SoCGs have been agreed and signed between the following parties:

- DDC and Folkestone & Hythe District Council
- DDC and Canterbury City Council
- DDC and Thanet District Council

DDC and Kent County Council

DDC and National Highways

4.2.7 As part of the DtC Evidence Base documents, DDC prepared a detailed DtC Statement (dated September 2022) which sets out a summary of the engagement that has taken place, firstly by organisation, and then by issue. Whilst the statement focuses on strategic issues and duty to co-operate bodies it also includes information relating to engagement on non-strategic issues and co-operation with other bodies that are not prescribed by the regulations. In addition, Appendices 1, 3 and 4 identify the main meetings and other correspondence that has taken place throughout the plan making process.

4.3 Summary

4.3.1 On account of the above and the documents published within the DDC's Local Plan Evidence Base, we are satisfied that DDC as the strategic policy making authority has demonstrated effective and on-going joint working with neighbouring authorities, the county council, prescribed bodies and other relevant bodies. Further, we agree that DDC has prepared and maintained SoCG documenting the cross-boundary matters being addressed in accordance with the Framework and the DtC may be discharged by the Planning Inspector under Section 20(5) (c) of the Planning and Compulsory Purchase Act 2004.

4.3.2 Without prejudice to the above, should ongoing work by DDC result in significant changes in circumstances such that the signed SoCGs may be amended or withdrawn, our client reserves the right to alter their consultation response accordingly and be present at the examination of the Plan to discuss further.

5 Housing Need

5.1 Context

5.1.1 Paragraph 11 of the NPPF is explicit in its requirement for strategic policy-making authorities to promote a sustainable pattern of development that seeks to meet the need in full.

5.1.2 Paragraph 20 of the Framework is equally clear that strategic policies should set out an overall strategy for the pattern, scale and design quality of places. Policies should make sufficient provision for the development that is required as well as associated infrastructure, community facilities and should set out a strategy for the conservation and enhancement of the natural, built and historic environment.

5.1.3 Given this national planning context, the emerging Local Plan should provide a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic environment.

5.1.4 National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate.

5.1.5 In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.

5.1.6 Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.

5.2 DDC's Housing Need

5.2.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover District of 596 dwellings per annum. However, the affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total housing need of 10,998 dwellings for the Plan period to 2040. We understand that the Regulation 19 Local Plan seeks to meet this need in full and in addition to the minimum figures, DDC have set an appropriate contingency buffer of 926 dwellings of the Plan period, equating to 8.4% of the total Plan period figure.

5.2.2 For context, the current adopted CS requirement is 700 dwellings per annum. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.

5.2.3 For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate sufficient land to accommodate a minimum of 6,642 new homes over the remaining plan period to 2040. It is understood that this will be derived from the following sources:

- Whitfield Urban Expansion Allocation: 2,200 dwellings

- Local Plan Allocations (excluding Whitfield): 3,392 dwellings

- Windfall Allowance (70 a year from year 4): 1,050 dwellings

5.2.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target. Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs AONB, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, meeting Dover's housing needs inevitably will require the release of significant greenfield land.

5.2.5 In our view, sustainable and accessible sites logically located adjacent to existing higher-order urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan Period, to deliver the significant number of new homes that are required and are most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the District.

6 Site Specific Assessment

6.1 Overview

6.1.1 The previous chapters of this representation (Chapter 3-5) outline our client's position relating to the soundness of the Plan in which our client is confirmed to be supportive of the Local Plan as a sound strategy for the growth of the district to 2040.

6.1.2 Paragraph 4.146 of the Local Plan states that the urban area of Deal encompasses the built-up areas of the parishes of Walmer and Sholden. Deal is identified in the Settlement Hierarchy and Confines Topic Paper (2022) as a 'District Centre', where there is a secondary focus for development. This position is reinforced by draft policy SP3 which states that development in Deal will be at a more limited scale than Dover Town, compatible with the more limited range of job opportunities, shops, services, and other facilities available in these locations.

6.1.3 As introduced in the preceding sections, Fernham Homes Limited are supporting the residential allocation of the Site 'Land at Rays Bottom, Walmer' and. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan with an indicative capacity of 75 dwellings under policy reference 'SAP15' (WAL002).

6.1.4 Appendix 1a of the Housing and Economic Land Availability Assessment (HELAA) 2022 provides the following summary:

- No heritage concerns other than archaeology.
- Site will need to reflect character of surrounding area – low density, generous landscaping, well designed.
- Potential site for executive homes.
- Risk of surface water flooding.
- Transport Assessment required.

6.1.5 The Site was considered 'Green' in the red/amber/green (RAG) rating in terms of suitability, availability and achievability, with an anticipated timescale for delivery in the medium term (2027-2031). The information contained in the summary could be addressed as part of any future planning application.

6.1.6 We agree that the Site represents a logical and sustainable location to direct the growth required within Deal and consider that the land promoted at Rays Bottom, Walmer must remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered to be wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040.

6.1.7 We are firmly of the view that the allocation of Land at Rays Bottom is a necessary component of the balanced growth strategy put forward within the Pre-submission

DDC Settlement hierarchy (2022): <https://www.doverdistrictlocalplan.co.uk/uploads/pdfs/settlement-hierarchy-and-confines-topic-paper-aug-2022.pdf>

Dover District Local Plan, comprising an appropriate mix of small, medium and strategic-scale sites deliverable across the Plan period. The allocation of well-located, reliable, greenfield sites such as our client's at Land at Rays Bottom is necessary in order for DDC to meet the growing need for new homes in the district and ensure that DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan.

6.1.8 Notwithstanding our client's support of the draft allocation within the Regulation

19 Plan in principle, we suggest that the policy text be re-visited prior to submission, to allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential. It is submitted that the SAP15 policy wording should be amended to more accurately reflect the capability

of the Site to accommodate approximately 80 dwellings deliverable early in the Plan period. Further commentary on this point is provided below in section 6.3.

6.2 Site and Surroundings

6.2.1 The Site is situated to the south of Walmer, Deal between Liverpool Road to the east and Hawksdown to the west immediately adjacent to existing residential development.

6.2.2 The Site comprises an undeveloped regular parcel of land in arable use totalling approximately 4.43 hectares, forming part of a larger arable unit to the south. The Site is bound primarily by hedgerow vegetation to the east along Liverpool Road with dense woodland and mid-storey vegetation to the north. The west boundary comprises a mix of hedgerows and trees set along the perimeter abutting residential development on Hawksdown.

Figure 6.1: Approximate Site Location (courtesy of Google Earth)

6.2.3 The wider surroundings are characterised by its edge-of-settlement location with low density existing residential development along Hawksdown to the north and west and undeveloped agricultural land to the east and south. The landscape assessment which informed the HELAA recognises that the site is:

“...relatively discrete, having housing on two sides and being located on the side of a dry valley. The sensitivity of the site is moderate as views in are limited and the flow of housing down the slope would not detract. The impact of development on the wider landscape would be minimal and this could be reduced further by providing additional buffer of landscaping along the southern boundary”.

6.2.4 The Site enjoys access to a number of day-to-day facilities and services which are within a reasonable walk distance, including primary and secondary schools, local shops, healthcare, employment, and public transport links within Walmer and Deal including Walmer mainline station and frequent buses along Dover Road between Dover, Deal, Sandwich and Canterbury.

6.2.5 In terms of overarching planning constraints, the site is not subject to any overarching landscape or ecological designations and is not itself subject to any heritage constraints.

6.2.6 To the north east of the site – with intervening land - is the grade II Registered Park and Garden of Walmer Castle which is a scheduled monument, and nearby to the east is an undesignated historic First World War Aerodrome and Second World War radar station within an area of Archaeological Potential.

6.2.7 There is a low risk of a surface water flow path through the non-wooded area of the site, and along the western boundary – both of which can be easily accommodated in a residential layout.

6.3 Development Capacity

6.3.1 As set out above, the proposed allocation is for 75 dwellings, reduced from 100 dwellings at the Regulation 18 stage. The reasoning set out in the “selection of Site Allocations” (September 2022) supporting document for the reduction in capacity is “To enable a scheme to come forward which reflects the character of the surrounding area, and enable sufficient landscaping to be provided”. Excluding the wooded area to the north of the site, the provision of 75 dwellings would equate to a density of 21 dwellings per hectare, with 100 dwellings equating to 28 dwellings per hectare. For the reasons set out subsequently, we consider that sites located in sustainable locations such as Land at Rays Bottom, adjacent to Deal, should take opportunities to maximise the potential for housing – whilst respecting the context and character of the area. For this reason we consider that the appropriate capacity is a little greater at approximately 80 dwellings, as part of a high-quality, landscape-led residential scheme capable of delivery within the early phase of the Plan period.

6.3.2 At this early stage, detailed proposals have not yet been advanced, however it is anticipated that any future development of the site – at 80 dwellings - will be of appropriate density, reflecting local patterns of development and sensitively designed to respect the existing character of the area, the topography of the site and to allow transition to the rural landscape and respond to its coastal location.

6.3.3 Particular care will be taken with regard to the low-risk surface flow route, impact on nearby heritage assets and ecologically sensitive sites with a particular emphasis on opportunities for biodiversity habitat creation and enhancement. Fernham Homes have a strong track record of delivering high quality housing whilst respecting such characteristics and constraints.

6.3.4 In terms of access, primary vehicular, pedestrian and cycle access to the site shall be provided from Liverpool Road. Road widening and traffic management should be provided to Liverpool Road along the frontage of the site and where possible up to the junction with Gram's Road; along with an extension to the 30mph speed limit zone. Appendix 1 indicates how this can be achieved, with the provision of a footway and suitable carriage width which meets relevant highways requirements. Alternatively, the footway could not be provided, and instead a wider carriage way could be provided. Appendix 1 also clearly shows how the required visibility splays can be achieved on land either within the site, or within the public highway.

6.4 Draft Policy Allocation ‘Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer’ (SAP15)

6.4.1 As introduced in the preceding sections, our client's Site at Land at Rays Bottom is allocated for residential development within the Dover Pre-submission (Regulation 19) Local Plan. For ease of reference, the draft policy wording is as follows:

"SAP15 - Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002)

The site, Land at Rays Bottom between Liverpool Road and Hawksdown, as shown on the policies map is allocated for an indicative capacity of 75 dwellings.

Development proposals for the site shall include the following:

- a) Development should be low density and sensitively designed to respect the existing character of the area, the topography of the site and to allow transition to the rural landscape;
- b) A sensitive landscaping scheme and appropriate landscape buffer to the south, determined by a Landscape Visual Impact Assessment is required to mitigate the impact of development on the wider countryside and to provide opportunities for biodiversity habitat creation and enhancement responding to the nearby BOA and local wildlife site;
- c) The existing wooded area to the north of the site and the tree and shrub line along the western boundary, shall be maintained and enhanced as areas for biodiversity habitat creation.
- d) Primary vehicular, pedestrian and cycle access to the site shall be provided from Liverpool Road. Road widening and traffic management should be provided to Liverpool Road along the frontage of the site and where possible up to the junction with Gram's Road; along with an extension to the 30mph speed limit zone;
- e) The Transport Assessment that is required to be carried out in accordance with Policy TI2, must consider and identify mitigation (potential widening/traffic management measures/junction improvements) for the surrounding local road network, taking into account the cumulative impact of this and other sites allocated in this Plan, including (but not limited to) Liverpool Road and Gram's Road up to and including the Gram's Road/Dover Road junction.
- f) A site-specific Flood Risk Assessment must be carried out in accordance with Policy CC5. This shall also inform the application of the Sequential Approach to the layout of the site by locating the most vulnerable elements in the lowest risk areas;
- g) In accordance with Policy SP13, a wintering bird survey must be undertaken in advance of a planning application on the site. If the bird survey identifies that the development will exceed the threshold of significance, mitigation will be required. A suitable scheme of mitigation will need to be submitted with the planning application for the site;
- h) An Archaeological Assessment for the site must be carried out in accordance with Policy HE3 Archaeology, the results of which should inform the layout and design of the development which is necessary to avoid harm to any archaeological assets identified through the assessment;
- i) A Heritage Assessment carried out in accordance with Policy HE1 is required to identify any necessary measures to avoid or minimise harm to the nearby heritage assets; and
- j) The occupation of the development should be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider. Development should provide a connection to the sewerage system at the nearest point of adequate capacity and ensure future access to the existing sewerage infrastructure for maintenance and upsizing purposes."

6.4.2 To be clear, our client remains wholly supportive of the principle of the allocation of the Site for residential development. Fernham Homes has a strong track record of swift delivery, and commits to being able to deliver the Site within the early phase of the Plan period. We agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client's Site can be made – and therefore object to the capacity identified.

6.4.3 Accordingly, we say that the allocation of Land at Rays Bottom is necessary in order for DDC deliver proportionate and high-quality sustainable growth within Deal, meet the growing need for new homes in the district and ensure that DDC can have greater confidence in meeting its market and affordable housing targets in full.

6.4.4 It is submitted that the SAP15 policy wording is sound and appropriately reflects the capability of the site to deliver a sensitive, landscape-led residential development but the wording should be amended to reflect the capability of the Site to accommodate approximately 80 dwellings, deliverable with the early phase of the forthcoming Plan period.

6.4.5

6.5 Strategic Justification for Development

Spatial Strategy

6.5.1 The proposed Housing Distribution for the district across the Plan period is established within Policy SP3 'Housing Growth' which sets out that the distribution

of housing growth in the district is primarily based on the settlement hierarchy and influenced by site availability, environmental constraints and factors of delivery.

6.5.2 Rightly, a key aim of the growth strategy is to focus development in the least sensitive areas of the district in order to conserve and enhance the Dover's rich natural and historical environment.

6.5.3 A retained theme from the adopted Plan, is that DDC's settlement strategy continues to focus on the development and regeneration of Dover Town and Whitfield (3381 dwellings). Approximately half of the district's planned housing is in this location, the majority of which again is to come forward as part of the strategic urban expansion of Whitfield 'SAP1' (2200 minimum dwellings).

6.5.4 Development will then be focused in the District Centre of Deal (223 dwellings), and the Rural Service Centres of Sandwich (227 dwellings) and Aylesham (649 dwellings). Following the settlement hierarchy rigidly would distribute housing in the preceding order, however the Plan recognises that housing delivery in Deal and Sandwich continues to be constrained by a number of factors including flood risk, ecological designations, heritage and highways. Further, Deal has experienced generally high levels of windfall development across the previous Plan period and accordingly there is now a dwindling supply of available, suitable sites in both settlements. On account of this context, DDC have sought to direct the majority of the remaining higher order settlement growth (outside of Dover & Whitfield) to Aylesham, through the strategic expansion to the town.

6.5.5 Outside of the four principal district settlements, the Rural Settlement Hierarchy (August 2022) identified that the majority of lower-order settlements in the district emerge as having a low level of facilities within the hierarchy and six settlements having none of the key indicators of sustainable services. Plainly, these settlements offer very limited opportunities for growth and it is evident that the forthcoming Plan will remain reliant on the settlements of Dover (including Whitfield), Deal, Sandwich and Aylesham to deliver the housing growth that is required.

6.5.6 Given this context, it is clear that where available and suitable opportunities for residential development do exist within the district's higher order settlements, including our client's Site at Land at Rays Bottom, Walmer which can provide a policy compliant level of much-needed affordable housing, it is imperative that the effective use of these sites are appropriately maximised in accordance with national policy objectives.

6.5.7 Notwithstanding our client's in principle support of the proposed strategy, we are concerned that highly sustainable, edge-of-settlement sites, particularly in higher tier settlements such as Deal have not been fully maximised to reflect their accessible location and capability to accommodate a greater quantum of development. On this basis, we are concerned that the strategic objectives underlying draft policy SP3 'Housing Growth' may not be fully realised, to the detriment of market and affordable housing delivery and the wider policies seeking to conserve and enhance the district's natural and historic environment.

6.5.8 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Deal (whilst ensuring that sensitive characteristics are reflected), and this has not been undertaken – for example at Rays Bottom, Liverpool Road. It is our view that the site has sufficient capacity to deliver approximately 5 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

6.5.9

Greenfield Development and Consistency with Housing Trajectory

6.5.10 Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs Area of Outstanding Natural Beauty, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, greenfield development will inevitably be required if DDC is to meet its housing and development commitments in full moving forward.

6.5.11 In our view, sustainable and accessible unconstrained sites logically located adjacent to existing urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan period, to support the role and timescales of strategic urban extensions and to deliver the significant number of new homes that are required within the forthcoming Plan period.

6.5.12 Within Deal itself, meaningful housing growth is inherently constrained on three sides due to the restrictive effect of the coast to the east and Flood Zone 2/3 land and ecologically sensitive sites including SSSIs to the north and west. Alongside overarching objectives to minimise the incursion of widespread development into the rural countryside, the scope for significant Plan-led development in Deal is becoming increasingly limited. Accordingly, we firmly agree that sites to the south of Deal, including that of our clients in Walmer, represent the least sensitive and most logical locations for future Plan-led growth, making effective use of the availability of sites in close proximity to the Urban Area and key infrastructure including Walmer train station.

6.5.13 In terms of housing delivery in Deal, the development of Land at Rays Bottom (75 dwellings) is anticipated to deliver completions with Years 9-11 of the Plan period, although as detailed above our clients have a strong track record of swift delivery, and consider that it could be

delivered ahead of this. When combined with extant permissions within Deal and nearby allocations at Land off Cross Road, Deal (SAP14) and Deal Small Housing Sites (SAP16) totalling 100 dwellings and 48 dwellings respectively, our client's site will assist in delivering a steady supply of new homes within Deal across the majority of the early and middle phases of the Plan period and contribute to providing genuine choice in the market.

6.5.14 Moreover, in our experience, greenfield edge-of-settlement sites are typically most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that are urgently needed in the district.

6.5.15 The Sustainability Appraisal Scoping Report (2018) sets out that over the course of the adopted Plan period, the key sustainability issues facing Dover District in relation to housing are as follows:

Population growth, household growth and demographic change will place additional demand on key services and facilities such as housing, health, education and social care. The Local Plan offers a new opportunity to manage these pressures, encouraging mixed communities;

There is a need for affordable housing across the District. At present, the mean price of dwellings is higher than the national average. The Local Plan will help to expedite its delivery; and,

There is the need for a mix of housing types that cater for the needs of a range of people, including the growing number of single person and elderly households. Without an up-to date Local Plan, the required housing is less likely to be delivered.

6.5.16 It is evident that the new Dover Local Plan must allocate a mix of reliable sites capable of steadily delivering not only the quantum of housing that is required, but also the associated public infrastructure, affordable housing and a mix of unit types and tenures suitable for a wide range of future occupants.

6.5.17 The Housing Topic Paper (September 2022) provides further context and summarises under Chapter 7 'Historical Housing Delivery' that Dover has historically placed significant reliance on windfall development over the current adopted Plan period, with windfall sites accounting for 44% of all completed dwellings over the preceding 10-year period.

Figure 1: DDC Brownfield / Greenfield Completions 2010/11 to 2020/21
(source: Housing Topic Paper September 2022)

6.5.18 Moreover, it is highlighted that at the beginning of the 10 year period, the majority of new dwellings were being built on brownfield land. However, from the monitoring year 2013-14 onward development on greenfield land began to play a much greater part in the location for new development as show in figure 1 above. This trend of increased housing development on greenfield land is a result of the allocations within the CS and Land Allocation DPD being built out and is associated with an approximate doubling of completions in the district. From 2013-14 onwards the average number of completed dwellings per annum has doubled to that of the early years of the CS, as the strong delivery rates of greenfield sites formed the predominant source of housing. This is despite an overall declining trend of brownfield completions towards the latter half of the Plan period. This is not an uncommon trend whereby in the majority of local planning authorities areas, opportunities for available and suitable sites in urban centres typically dwindle throughout the Plan period.

6.5.19 In light of the above context, it is clear that the adopted Dover Local Plan suffered from an initial under delivery of Plan-led housing growth in which windfall development sources were largely required to take up the slack in the early phases of the Plan period, as major allocated sites failed to deliver at the rates initially expected.

6.5.20 It is equally apparent that initial slow completions rates were quickly renewed once greenfield allocations commenced development, feeding into strong completions in the latter half of the Plan period. In our experience, greenfield sites are typically associated with stronger delivery rates and provide a reliable source of housing growth. The allocation of an appropriate mix of sites and scales is required in order to ensure steady and sustained Plan-led housing delivery across the Plan period and to avoid a reliance on windfall development to address the shortfall.

6.5.21 Consequently, given all of the above, it is imperative that the new Local Plan allocates a sufficient variety and scales of site capable of both ensuring steady and sustained housing completions and capable of making necessary contributions to public infrastructure and services, affordable housing and mix of unit types to address the key issue raised in the Sustainability Appraisal.

6.5.22 In our view, edge-of-settlement greenfield sites such as our client's Site Land at Rays Bottom, Walmer represents the most reliable and sustainable source of housing delivery for the Plan period. Such sites are typically less constrained by wider factors and less affected by unforeseen delays such as land contamination. Moreover, greenfield sites typically are more capable of delivering the policy compliant affordable housing, unit mix and developer contributions that are urgently needed.

6.5.23 It is understood that the Plan is predicated on the delivery of strategic scale development at Whitfield comprising the development of circa 2,200 new homes. Consequently, in order to avoid a repetition of the previous Plan, DDC have sought to ensure that a pool of reliable

greenfield allocation, including that of our client's are included within the Plan, capable of delivering the early and middle phase growth that is required within the housing trajectory prior to the commencement of stronger delivery from major allocations later in the Plan period.

6.5.24 We note that within the Housing Trajectory 'Appendix D', DDC have included allocated units from Years 4 onwards, with extant permissions (accounting for 5% non-implementation) demonstrated to be solely capable of delivering the growth required in Years 1-3. Notwithstanding our client's considerations that it can deliver at Land at Rays Bottom early in the plan period, we support this pragmatic approach and suggest this represents a sound basis on which to set the district's housing trajectory. We note also the inclusion of an appropriate windfall allowance and the included contingency buffer to further ensure reasonably flexibility in the housing supply.

6.5.25 On account of all of the above, we submit that the allocation of Land at Rays Bottom, Walmer forms part of a sound strategy for growth in the district for the forthcoming Plan period. The Site is capable of delivery within the early phase of the Plan period. The Site represents a reliable source of housing growth in a highly sustainable and accessible location adjacent to the existing settlement boundary of Deal and Walmer mainline station, consistent with DDC's preferred settlement strategy. Proposals remain at an early stage, however the Site is unconstrained and is considered capable of providing a high-quality landscape-led residential development including a mix of unit types and tenures, a meaningful contribution to the supply of affordable housing and contributions to public services and infrastructure, benefiting both existing residents and future occupiers. However, we object on the submission that the Site is capable of making a greater contribution to the district's housing need and suggest an amended wording of the policy to allocate the Site for approximately 80 dwellings.
Policy SP4 'Windfall Development'

6.5.26 Separately, we note the provisions of policy SP4 windfall development. Proposals at Rays Bottom, Walmer would likely be acceptable in principle under this policy and we support the inclusion within the Plan for appropriate, proportionate windfall development.

6.5.27 Our client is fully committed to the delivery of the Site which is available and anticipated for delivery in the early phase of the Plan period. Notwithstanding the provisions of SP4, it is reiterated that our client fully supports the allocation of the Site under SAP15 as the most appropriate mechanism for delivery of the Site and the opportunity for genuinely Plan-led development in Deal, the provision of associated benefits to public services and infrastructure, contribution to affordable housing supply and the delivering of a mix of house types and tenures.

Infrastructure Delivery

6.5.28 Paragraph 11 of the Framework is clear that all plans should promote a sustainable pattern of development. This includes aligning growth and infrastructure. Paragraph 20 goes on to confirm that strategic polices will be expected to make sufficient provision for associated development infrastructure.

6.5.29 In this regard, draft policies SP11 'Infrastructure and Developer Contributions' and SP12 'Strategic Transport Infrastructure' of the emerging Plan form the key strategic polices for infrastructure delivery. We agree that where development would create a need, or would have an impact, or would exacerbate an existing deficiency in infrastructure provision, appropriate developer contributions may be sought.

6.5.30 It is however emphasised that in all developments, infrastructure requirements must be demonstrated to be necessary through assessment during determination of the application on a case-by-case basis. Where new development is proposed, it does not automatically follow that major infrastructure contributions are always required or contribution to strategic infrastructure proposals are appropriate. For instance, it is our client's view that any infrastructure requirements must be demonstrated through a robust and transparent assessment at application stage, taking into account the submission of detailed supporting evidence, for example following consideration of the Transport Assessment in the case of highway infrastructure contributions.

Alignment with Sustainability Appraisal Findings

6.5.31 As part of the preparation of the Local Plan, the Council has identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA) which provides an assessment of how different options perform in environmental, social and economic terms, to help inform which option should be taken forward and combined with wider evidence documents, have been used to determine the growth and spatial strategy set out in the Plan.

6.5.32 Five potential distributions of growth were identified during preparation of the draft Regulation 18 Local Plan:

- Spatial Option A: Distributing growth to the District's suitable and potentially suitable housing and employment site options (as needed to deliver the scale of growth required).
- Spatial Option B: Distributing growth proportionately amongst the District's existing settlements based on their population.

- Spatial Option C: Distributing growth proportionately amongst the District's existing settlements based on the District's defined settlement hierarchy.
- Spatial Option D: Distributing growth in the same way as the adopted Local Plan, focussing most growth in and around Dover town.
- Spatial Option E: Distributing growth more equally across the District's settlements: Dover, Deal, Sandwich and Aylesham, as well as the rural villages.

6.5.33 The conclusion of the SA was that Spatial Options C (settlement hierarchy) and D (adopted Core Strategy with Dover focus) generally perform the most strongly against the SA objectives, particularly when delivering the baseline growth scenario. However, given the environmental constraints that exist around Deal and Sandwich, very few suitable and potentially suitable sites have been identified in these towns. Given this, the Council's preferred option for the distribution of housing and economic growth comprises a combination of options A (HELAA sites), C (settlement hierarchy) and D (Dover focus). The distribution of housing and economic growth in the District is therefore primarily based on the settlement hierarchy, and influenced by site availability, environmental constraints and factors of delivery.

6.5.34 On account of the above, our client agrees that the proposed growth strategy, and by extension, policy SP3 in principle represents a sound and evidence-led strategy for growth. However, given the clear acknowledgement of the dwindling supply of available sites in the higher order settlements of Deal and Sandwich, which has necessitated a minor deviation from the strongest performing spatial options, we submit that where sites are available and suitable for development in Deal and Sandwich, these must be fully maximised, reflecting their accessible location and their ability to reduce the need to develop into less accessible and more sensitive sites elsewhere in the district to accommodate the growth that is required.

Site Specific Sustainability Appraisal

6.5.35 Land at Rays Bottom between Liverpool Road and Hawksdown is included under HELAA reference 'WAL002' within the SA Site Assessment (Appendix F). The site generally performs strongly, with particular positives identified with regards to SA Objectives related to housing and the economy.

6.5.36 We contest the assessment of 'minor negative' in regard to sustainable transport. To the contrary, the site is well-located adjacent to the settlement boundary of Deal with access to a range of high-quality day-to-day services and access to Walmer train station for convenient access to larger settlements. In what is otherwise a largely rural district, we strongly disagree with the suggestion that an edge-of-settlement site represents a less than preferable location in respect of sustainable travel and day-to-day access to amenities.

6.5.37 We also note negatives associated with the development of a greenfield site, including loss of agricultural land, however this would be true of the majority of greenfield sites and it is abundantly clear that Dover's housing need cannot be met solely on brownfield sites. We note also minor negatives / uncertain associated with biodiversity, the historic environment and landscape, however it is not clear whether these take into account the potential for high-quality design, biodiversity enhancement and landscape mitigation. Irrespective, these are not considered to outweigh the clear and tangible sustainability benefits associated with edge-of-settlement development, the site's consistency with the preferred spatial options and the wider benefits associated with reducing the need to develop into lesser accessible, more sensitive sites to otherwise deliver the housing growth that is required.

Summary

6.5.38 Taking all of the above into consideration, our client is wholly supportive of the inclusion of land promoted at Rays Bottom, Walmer as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040.

6.6 Deliverability

6.6.1 Prior to the current appeal proposal, the Site has had no recent planning history of a residential nature or a history of unimplemented permissions. There are not considered to be any impediments to the Site being allocated for development commencing within the early (or mid) phase of the Plan period.

6.6.2 Fernham Homes – a local SME with a strong history and track record of delivery, together with an adopted and robust business plan for growth – is promoting the site, and are poised to commence work on its residential development promptly after the adoption of the Local Plan.

6.6.3 Combined with the delivery of extant permissions, an appropriate number and scale of wider allocations within Deal (including SAP 14 and SAP 16) and elsewhere across the district, this would ensure the steady delivery of housing both in Deal and in Dover district across the majority of the Plan period and support the role and timescales of strategic housing delivery at Whitfield towards the latter half of the Plan period.

6.6.4 For the reasons set out in this representation, the Site is considered suitable for the residential development of approximately 80 dwellings. The Site is adjacent to the overarching urban area of Deal, one of the four higher order settlements in the district and DDC's preferred locations for Plan-led growth within the district. Development at land at Rays Bottom would form a natural and logical development south of Walmer, Deal

with excellent accessibility to day-to-day services and amenities via active travel modes within Deal itself and convenient access to public transport infrastructure including Walmer train station for onward travel to key neighbouring settlements including Dover, Ramsgate, Canterbury and Ashford.

6.6.5 Finally, in respect of suitability there are no physical limitations or problems such as access, infrastructure, flood risk, hazardous risks, pollution or contamination.

6.6.6 On behalf of the landowner, we submit that there are no known financial restrictions that would impact upon the viability of a future housing scheme or that would prohibit development coming forward within the mid-stages of the Plan period. To the contrary, we consider there to be an opportunity to deliver a high-quality, sustainably located residential development scheme consistent with DDC's proposed growth strategy comprising an appropriate mix of market and affordable housing and capable of contributing to a range of community facilities, public infrastructure and services locally.

6.6.7 At the time of writing, proposals at Rays Bottom, Walmer remain at an early stage, however our clients are firmly committed to progressing the delivery of the Site on adoption of the Plan. The project team therefore does not anticipate any absolute constraints to the commencement of delivery on-site early in the plan period (potentially 2025-26) and completion by 2028/9).

6.6.8 The Site is in single ownership and there are no complicated legal agreements or covenants that would prohibit the ability to bring forward the Site in line with DDC's housing trajectory within the mid-phase of the Plan period. The Site is therefore considered available and achievable for the purposes of the tests of deliverability.

7 Conclusion

7.1 Summary

7.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited in response to the DDC Local Plan (Regulation 19) consultation which runs until 9th December 2022.

7.1.2 Our client is promoting 'Land at Rays Bottom, Walmer, Deal' for the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan within an indicative capacity of 75 dwellings under policy reference 'SAP15'.

7.1.3 Taking the above representation contents into consideration, we remain wholly supportive of the principle of the allocation of Land at Rays Bottom and agree that the Site represents a logical and sustainable location to direct necessary growth within Deal.

7.1.4 Accordingly, we consider that the land promoted at Rays Bottom, Walmer must remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered to be wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040. However, it is imperative that the effective use of these higher-order settlement sites are appropriately maximised in accordance with draft policy SP3 of the emerging Plan, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and object solely on this basis.

7.1.5 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Deal, and this has not been undertaken – for example at Land at Rays Bottom, where it is considered that the site has sufficient capacity to deliver approximately 5 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

7.1.6 Outside of the point regarding capacity, it is submitted that the SAP15 policy wording is sound and appropriately reflects the capability of the site to deliver a sensitive, landscape-led residential development with an indicative capacity of 80 dwellings, deliverable with the early phase of the forthcoming Plan period. Without prejudice to our client's support in principle of the proposed allocation, we would urge the Council to re-visit the allocation policy text and allow a higher dwelling capacity.

7.1.7 Accordingly, we say that the allocation of Land at Rays Bottom forms part of a balanced growth strategy comprising an appropriate mix of small, medium and strategic-scale sites deliverable across the Plan period. The allocation of well-located, reliable, greenfield sites such as our client's at Land at Rays Bottom is necessary in order for DDC to meet the growing need for new homes in the district and ensure that DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan.

7.1.8 In addition to being a highly sustainable and logical edge-of-settlement allocation, the Site is deliverable in a single land ownership with no viability issues, legal or third-party constraints present. Our client is fully committed to the delivery of land at Rays Bottom Farm and there are no impediments to the Site being capable of delivery within the mid-phase of the Plan period.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	For the reasons set out in the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359), the capacity of Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002) and Policy SP3 - Housing Growth should be increased to approximately 80 dwellings.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Please refer to the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359).

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Policy SAP22 - Land at Archers Low Farm, St Georges Road Sandwich (SAN023) Policy SP3 - Housing Growth Policy SP4 - Windfall Development Policy SP11 - Infrastructure and Developer Contributions Policy SP12 - Strategic Transport Infrastructure
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	We consider that the plan is sound, but object to elements of Policy SAP22 - Land at Archers Low Farm, St Georges Road Sandwich (SAN023) and Policy SP3 - Housing Growth. These objections are set out in the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245).

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

1 Introduction

1.1 Purpose of this Representation

1.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited and Walker Residential Limited in response to the Dover District Council 'DDC' Local Plan (Regulation 19) consultation which runs until 9th December 2022.

1.1.2 We understand that DDC is in the process of preparing a new Local Plan to set out a strategy for development for the period to 2040 and that the Council are presently seeking comments on the pre-submission Plan prior to its submission for examination in early 2023.

1.1.3 Our client controls 'Land at Archers Low Farm, Sandown Road, St Georges Road, Sandwich' (hereafter referred to as 'Land at Archers Low' or 'the Site') and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.

1.1.4 It is highlighted that as part of the Regulation 18 Local Plan, the Site was allocated under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' for approximately 40 dwellings (reference SAN023).

1.1.5 The purpose of the representation is to support the allocation of 'Land at Archers Low' for a greater quantum of development and provide comment on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan, but to object to the indicative capacity set out in the policy.

1.1.6 In this regard, we remain wholly supportive of the principle of the residential allocation of the Site and agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client's Site can be made – and object (solely) to this element of the policy.

1.1.7 Accordingly, we say that Land at Archers Low can further assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.

1.1.8 Based on the current national and local planning context, we consider the Site to be a highly suitable edge-of-settlement location to allocate land for housing to help meet the need for new homes in the district and its effective use should be appropriately maximised in accordance with national policy objectives.

1.1.9 Further details regarding the Site and commentary on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan are set out in the following sections of this document.

1.2 About Fernham Homes

1.2.1 Fernham Homes Limited are a local award winning small and medium sized (SME) housebuilder, established in 1997 and has a strong track record of delivering high quality residential and mixed use developments in Kent over the last 25 years. This has been acknowledged through the receipt of nationally recognised awards, including the gold Evening Standard Awards best family home 2022 and 2019 bronze WhatHouse Best Small Housebuilder.

1.2.2 SME housebuilders are recognised in the National Planning Policy Framework ('NPPF') at paragraph 69 as making an important contribution to meeting the housing requirements of an area, and being able to build out relatively quickly. Similarly, this has also been recognised by the Planning Inspectorate. This is particularly the case with Fernham Homes, which is privately owned with access to significant resources. This provides significantly more flexibility than national and other regional housebuilders, and allows Fernham Homes to deliver housing rapidly and to a high quality, beautiful and sustainable standard (para 126 of the NPPF).

1.2.3 Fernham Homes Limited has embarked on a sustained period of growth, with an adopted and robust business plan to deliver around 300 houses per year in five years time.

1.2.4 A key element of Fernham Homes' operations is to take a very careful approach to site selection: a huge amount of due diligence is undertaken as part of this, and therefore Fernham Homes Limited only invests in those sites which meet the NPPF requirements of being available, suitable, and deliverable. As set out below land at Archers Low Farm, Sandwich ('SAP22') is firmly considered to be such a site.

1.2.5 Similarly, a key feature of Fernham Homes' approach is to work positively and proactively with local planning authorities (LPAs), both during the preparation of local plans and at planning application stage. Fernham Homes Limited are fully committed to engaging with Dover District Council in the preparation of its Local Plan, and firmly subscribe to the national policy approach set out in paragraphs 15 and 16 c) of the NPPF that "the planning system should be genuinely plan-led" and should be shaped by early, proportionate and effective engagement between LPAs and others, including businesses and developers. Accordingly, Fernham Homes Limited would welcome the opportunity to discuss the matters contained in this representation, including the availability, suitability, deliverability and capacity of land at Archers Low Farm, Sandwich ('SAP22') directly with Dover District Council members and officers, ahead of the submission of the Local Plan for examination.

1.3 Representation Structure

1.3.1 The representation structure is outlined below for ease of reference:

Chapter 2 (Consultation Background) – Sets out the context of the Dover District new Local Plan preparation, relevant national planning requirements and a summary of our current position.

Please refer to paragraph 52 of appeal decisions: APP/M2270/W/21/3283924 and APP/M2270/W/21/3288645

Chapter 3 (Legal Tests of Soundness) - Assessing whether the plan is sound, having regard to the tests of soundness outlined by paragraph 35 of the NPPF.

Chapter 4 (Duty to Co-operate) - Assessing whether the plan is sound, having regard to the duty to cooperate outlined by paragraph 24 of the NPPF.

Chapter 5 (Housing Need) - Consideration of market and affordable housing need and assessment of proposed housing allocations and supply sources.

Chapter 6 (Assessment of Suitability) - Re-introduces our client's Site and provides a summary of planning constraints and opportunities, including the quantum of development that could be accommodated, why the Site is suitable for development and why the principle of the draft allocation for residential development is both justified and consistent with the Council's strategy for growth in the district. It also sets out why we consider there is scope for a higher number of dwellings at the site. This consideration amounts to an objection to one element of the strategy – namely that those sites around the most sustainable settlements should be maximised.

Chapter 7 (Conclusion) - Summarises the key points raised throughout the representation and re-affirms our client's support for the principle of the Site's allocation and the principle of the proposed strategy ahead of the submission of the Plan for examination, and the objections in terms of capacity.

2 Dover District Council – Draft for Submission Local Plan (Regulation 19)

2.1 Consultation Background

2.1.1 DDC are required to prepare a new Local Plan, as the current suite of development plan documents were adopted in 2002, 2010 and 2015. The Core Strategy (CS) (adopted 2010) in particular has a time horizon up to 2026 and requires updating.

2.1.2 The new Local Plan will set out the vision, strategic objectives and overarching development strategy for the growth of the District over the period to 2040. It provides the planning policy framework to guide the future development of the area, addressing needs and opportunities for housing, the economy, community facilities and infrastructure, as well as the basis for conserving and enhancing the natural and historic environments, mitigating and adapting to climate change, and achieving well designed places.

2.1.3 For the avoidance of doubt, the new Local Plan, on adoption, will replace the CS 2010 and the Land Allocations Plan 2015, as well as saved policies from the 2002 Local Plan.

2.1.4 DDC's Regulation 19 Local Plan outlines the key issues that need to be addressed between now and 2040. In particular, the Plan sets out the following key planning issues for the District:

- Ensuring that new development in the District contributes to the mitigation of, and adaptation to, climate change.
- Supporting the Council to deliver its intention to be a carbon neutral district by 2050.
- Managing flood risk and coastal change.
- Ensuring that a sufficient amount and variety of land is identified to deliver a continuous supply of housing across the Plan period and that the Council maintains a five-year housing land supply.
- Delivering growth in a way that focuses development in the least sensitive areas of the District in order to conserve and enhance the District's rich natural and historic environments.
- Supporting sustainable development in rural areas to enhance the vitality of rural communities.
- Working with partners to facilitate the delivery of the Whitfield Urban Expansion.
- Ensuring a range of housing tenures, types and sizes are provided across the District to meet the needs of the local community and provide choice and flexibility in the housing market.
- Promoting economic growth, tourism, and investment in the District's Town Centres in line with the Council's Economic Growth Strategy.
- To address the impact of the COVID-19 pandemic.
- Delivering strategic transport improvements, including upgrades to the Duke of York and Whitfield roundabouts to support the scale of housing and economic growth identified in the Plan.

- Promoting sustainable transport initiatives to encourage a modal shift to more sustainable forms of transport like walking and cycling.
- Ensuring that infrastructure is delivered, in the right place, at the right time, to meet the needs of the District and support the levels of development identified in the Local Plan.
- Supporting the delivery of attractive, high-quality, design led developments and the creation of healthy, inclusive and safe communities, that are well served by good quality services and facilities to support people's lives.
- Conserving and enhancing the District's rich and diverse natural landscape, including the five international sites within the district, the Kent Downs Area of Outstanding Natural Beauty (AONB), five Sites of Special Scientific Interest (SSSIs), two National Nature Reserves (NNRs), two stretches of Heritage Coasts and two Marine Conservation Zones.
- Delivering a net gain in biodiversity in the District over the plan period.
- To promote the conservation, restoration and where appropriate the enhancement of the District's heritage assets, in order to protect their significance and to ensure that they can be best appreciated and enjoyed by current and future generations.

2.1.5 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. This submission will comment on each of the above, highlighting where we believe any areas of concern lie or where modifications may be required.

2.2 DDC's Local Development Scheme

2.2.1 The District Council has a duty to review the policies contained within the development plan every five years. The 2014/2015 Authority Monitoring Report signalled the need to review key parts of the Council's adopted CS evidence base.

2.2.2 The Council's Local Development Scheme (LDS) first outlined the delivery timetable for the Local Plan Review (LPR) in the March 2017 publication. Since then, the LDS has been updated on an annual basis. The most recent September 2022 LDS summarises that following the preparation of the principal evidence base documents, the Local Plan Review Regulation 18 consultation took place for 8 weeks in January 2021. The Regulation 19 consultation was scheduled for 7 weeks during Q4 of 2022 and is the subject of this representation.

2.2.3 Moving forward, submission of the Plan is anticipated in Q1-2 2023 with the Examination in Public in Q3-4 2023. The new Local Plan is currently scheduled for adoption in 2024.

2.2.4 As planned, DDC are now undertaking the Regulation 19 Draft Local Plan Consultation, for which this submission is made

3 Legal Test of Soundness

3.1 Legislation and Guidance

3.1.1 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. It is a statutory requirement that every development plan document must be submitted for independent examination to assess when it is "sound", as well as whether other statutory requirements have been satisfied (s.20(5) of the 2004 Act). By s.19 of the 2004 Act, in preparing a development plan document a local planning authority must have regard to several matters including national policies and advice contained in guidance issued by the Secretary of State. Such guidance currently exists in the form of the NPPF and is summarised below. This states that Plans must be:

(a) Positively Prepared: based on a strategy which seeks to meet objectively assessed development and infrastructure requirements

3.1.2 This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The NPPF set out principles through which the Government expects sustainable development can be achieved.

(b) Justified: an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence

3.1.3 This sets out the requirement that the Local Plan should be based on a robust and credible evidence base involving:

I. Research/fact finding: the choices made in the plan are backed up by facts.

II. Evidence of participation of the local community and others having a stake in the area.

3.1.4 The Local Plan should demonstrate an appropriate strategy, taking into account reasonable alternatives and based on proportionate evidence. These alternatives should be realistic and subject to sustainability appraisal. The Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.

(c) Effective: deliverable over its period based on effective joint working on cross-boundary strategic priorities

3.1.5 This makes clear that the Local Plan should be deliverable, requiring evidence of:

- Sound infrastructure delivery planning;
 - Having no regulatory or national planning barriers to delivery;
 - Delivery partners who are signed up to it; and
 - Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.
- The new Local Plan should be flexible and able to be monitored.

3.1.6 The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the Local Plan should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.

d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national policy.

3.1.7 This submission comments on each of the above in further detailing, highlighting areas of support and where modifications are required as appropriate.

3.2 Legal Compliance

3.2.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

3.2.2 In addition to the above, the NPPF states² that: "Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that:

a) all plans should promote a sustainable pattern of development that seeks to: meet the development needs of their area; align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects;

b) Strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

(i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or

Paragraph 11, NPPF 2021

(ii) Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole."

3.2.3 In addition, to the above, the NPPF states³ that Plans should:

a) be prepared with the objective of contributing to the achievement of sustainable development;

b) be prepared positively, in a way that is aspirational but deliverable;

c) be shaped by early, proportionate and effective engagement between plan- makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;

d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;

e) be accessible through the use of digital tools to assist public involvement and policy presentation; and

f) serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).

3.2.4 It is important to note that the NPPF⁴ requires strategic policies to set out an overall strategy for the pattern, scale, and design quality of places, and make sufficient provision for:

- a) housing (including affordable housing), employment, retail, leisure and other commercial development;
- b) infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat);
- c) community facilities (such as health, education and cultural infrastructure); and;
- d) conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation.

3.2.5 It is clear from the above, that any local plan should set out a comprehensive and cohesive approach to future development.

Paragraph 16, NPPF 2021

Paragraph 20, NPPF 2021

4 Duty to Co-Operate

4.1 Legal and NPPF Requirements

4.1.1 Section 33A of the Planning and Compulsory Purchase Act 2004 sets out a statutory 'Duty to Cooperate' (DtC) – i.e. a legal obligation - to all bodies as prescribed by Regulation 4 of the Town and Country Planning (Local Planning) England Regulations 2012 (the Regulations).

4.1.2 The duty requires DDC to cooperate with other persons to 'maximise the effectiveness' with which named activities are undertaken. Those activities include the preparation of development plan documents (such as this Local Plan document) and activities that support that activity 'so far as relating to a strategic matter'.

4.1.3 A strategic matter is defined by S33A(4) in summary as: (a) 'sustainable development or use of land that has or would have a significant impact on at least two planning areas' (a planning area in this case is the area of a borough or district council); and (b) 'sustainable development or use of land in a two tier area' (as this is) 'if the development or use (i) is a county matter, or (ii) has or would have a significant impact on a county matter'. County matters broadly relate to minerals and waste and associated developments as defined by Paragraph 1 of schedule 1 to the Town and Country Planning Act 1990 (as amended).

4.1.4 Section 33A (7) requires DDC (and persons subject to the DtC) to have regard to any guidance issued by the Secretary of State about how the duty is to be complied with. In that regard Paragraph ID 9-004-29140306 of the Government's Planning Practice Guidance (PPG) confirms amongst other things that the DtC is not a duty to agree (albeit that local planning authorities should make every effort to secure the necessary cooperation on strategic cross border matters before they submit local plans for examination).

4.1.5 The NPPF establishes that effective and on-going joint working is an integral part of the plan making process that will, amongst other things, determine whether development needs that cannot be met wholly within a plan can be met elsewhere. The NPPF goes on to state at paragraph 27 that in order to demonstrate effective and on-going joint working strategic policy making authorities should: "... prepare and maintain one or more statements of common ground documenting the cross-boundary matters being addressed".

4.1.6 In addition to the District's own housing pressures, part of the DtC involves considering whether neighbouring authorities' unmet housing need can be accommodated. It is worth highlighting that recent amendments to the London Plan have identified that the City's housing need has become increasingly more difficult to deliver and therefore areas outside London will be faced with having to absorb more of London's housing need. Consequently, DDC has a duty to explore whether it can accommodate some of this overspill of London's unmet need.

4.2 Assessment of DDC's discharging of the Duty to Co-operate

4.2.1 It is recognised that work to discharge the DtC remains ongoing by DDC and will continue prior to submission as part of the preparation of the Local Plan evidence base.

4.2.2 Notwithstanding the above, at this stage it is understood that DDC have engaged with the members of the East Kent Regeneration Board including neighbouring East Kent planning authorities, Kent County Council (KCC) and its subsidiary departments:

- Folkestone and Hythe District Council
- Canterbury City Council
- Thanet District Council

- KCC

- KCC Highways & Transportation
- KCC Minerals & Waste
- KCC Heritage Conservation
- KCC Flood & Water Management
- KCC Natural Environment & Coast
- KCC Infrastructure including Education

4.2.3 In February 2016, the Council adopted a Memorandum of Understanding (MOU) in respect of the DtC between the East Kent Regeneration Board members. A review of the MOU took place and was agreed in January 2021.

4.2.4 The East Kent MOU sets out the framework in which the authorities will work together on strategic issues and will actively engage. It forms the overarching framework and context within which Statements of Common Ground (SoCG) will be agreed between individual authorities.

4.2.5 Further engagement is also confirmed to have taken place between the following prescribed bodies and other relevant bodies:

- Environment Agency
- National Highways
- Historic England
- Natural England
- Network Rail
- NHS Kent and Medway Clinical Commissioning Group (CCG) – now known as Integrated Care Board (ICB) since July 2022
- Kent Downs AONB Unit
- Other infrastructure providers

4.2.6 Whilst work remains ongoing, at this stage it is understood that SoCGs have been agreed and signed between the following parties:

- DDC and Folkestone & Hythe District Council
- DDC and Canterbury City Council
- DDC and Thanet District Council
- DDC and Kent County Council
- Dover District Council and National Highways

4.2.7 As part of the DtC Evidence Base documents, DDC prepared a detailed DtC Statement (dated September 2022) which sets out a summary of the engagement that has taken place, firstly by organisation, and then by issue. Whilst the statement focuses on strategic issues and duty to co-operate bodies it also includes information relating to engagement on non-strategic issues and co-operation with other bodies that are not prescribed by the regulations. In addition, Appendices 1, 3 and 4 identify the main meetings and other correspondence that has taken place throughout the plan making process.

4.3 Summary

4.3.1 On account of the above and the documents published within the Council's Local Plan Evidence Base, we are satisfied that the Council as the strategic policy making authority has demonstrated effective and on-going joint working with neighbouring authorities, the county council, prescribed bodies and other relevant bodies. Further, we agree that DDC has prepared and maintained SoCG documenting the cross-boundary matters being addressed in accordance with the Framework and the DtC may be discharged by the Planning Inspector under Section 20(5) (c) of the Planning and Compulsory Purchase Act 2004.

4.3.2 Without prejudice to the above, should ongoing work by the Council result in significant changes in circumstances such that the signed SoCGs may be amended or withdrawn, our client reserves the right to alter their consultation response accordingly and be present at the examination of the Plan to discuss further.

5 Housing Need

5.1 Context

5.1.1 Paragraph 11 of the NPPF is explicit in its requirement for strategic policy-making authorities to promote a sustainable pattern of development that seeks to meet the need in full.

5.1.2 Paragraph 20 of the Framework is equally clear that strategic policies should set out an overall strategy for the pattern, scale and design quality of places. Policies should make sufficient provision for the development that is required as well as associated infrastructure, community facilities and should set out a strategy for the conservation and enhancement of the natural, built and historic environment.

5.1.3 Given this national planning context, the emerging Local Plan should provide a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic environment.

5.1.4 National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate.

5.1.5 In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.

5.1.6 Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.

5.2 DDC's Housing Need

5.2.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover District of 596 dwellings per annum. However, the affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total housing need of 10,998 dwellings for the Plan period to 2040. We understand that the Regulation 19 Local Plan seeks to meet this need in full and in addition to the minimum figures, DDC have set an appropriate contingency buffer of 926 dwellings of the Plan period, equating to 8.4% of the total Plan period figure.

5.2.2 For context, the current adopted CS requirement is 700 dwellings per annum. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.

5.2.3 For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate sufficient land to accommodate a minimum of 6,642 new homes over the remaining plan period to 2040. It is understood that this will be derived from the following sources:

- Whitfield Urban Expansion Allocation: 2,200 dwellings
- Local Plan Allocations (excluding Whitfield): 3,392 dwellings
- Windfall Allowance (70 a year from year 4): 1,050 dwellings

5.2.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target. Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs AONB, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, meeting Dover's housing needs inevitably will require the release of significant greenfield land.

5.2.5 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Sandwich, represent the most sustainable and reliable sources of growth for the Plan period, consistent with the overarching strategic objectives of draft policy SP3 within the emerging Plan. Such sites are best placed to deliver the significant number of new homes that are required and are most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the District as well as further balancing the role of strategic-scale development at Whitfield within the emerging Plan's proposed growth pattern.

6 Site Specific Assessment

6.1 Overview

6.1.1 The previous chapters of this representation (Chapter 3-5) outline our client's position relating to the soundness of the Plan in which our client is confirmed to be supportive in principle of the Local Plan as a sound strategy for the growth of the district to 2040. It is clear that Sandwich must continue to form a principal location for focusing sustainable housing delivery in Dover district and will assist in ensuring an appropriate balance of sites are identified, capable of supporting the strategic role of Whitfield within the forthcoming Plan Period.

6.1.2 As introduced in the preceding sections, Fernham Homes Limited and Walker Residential Limited control 'Land at Archers Low, Sandwich' and are continuing to promote the residential allocation of the Site. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.

6.1.3 As aforementioned, the Site was allocated in the Regulation 18 Local Plan for approximately 40 dwellings under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' (reference SAN023).

6.1.4 Notwithstanding our client's support of the draft allocation within the Regulation 19 Plan in principle, we suggest that the policy text be re-visited prior to submission, to allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential. It is submitted that the SAP22 policy wording should be amended to more accurately reflect the capability of the Site to accommodate approximately 40 - 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.

6.1.5 Fernham Homes Limited and Walker Residential Limited are fully committed to the delivery of the Site within the next five years, and subject to a grant of planning permission in Spring 2023 – please see below – anticipate starting developing on site in 2023. Indeed, for the avoidance of doubt it is confirmed that Fernham Homes Limited and Walker Residential Limited have previously submitted a planning application ('ref: 22/00274') for the residential development of the Site for 44no. dwellings with associated access, parking, open space, landscaping, drainage, and infrastructure. (Amended plans and details).

6.1.6 Following a positive recommendation to grant planning permission by Officers at the DDC Planning Committee, the application was refused following consideration at Planning Committee on 31st March 2022. The application is now the subject of an appeal with a date confirmed for a two day hearing on the 17th - 18th January 2023. The site layout is shown in Figure 6.2.

6.1.7 For the avoidance of doubt, our client's support of the proposed allocation, subject to their objection to the capacity and considerations that it can accommodate an increased capacity of approximately 40 – 45 dwellings, is made without prejudice to the ongoing appeal. Should the appeal be allowed, this would realise the delivery of the residential allocation in accordance with the policy requirement (albeit more dwellings), which is consistent in its key elements with the submitted appeal scheme.

6.2 Site and Surroundings

6.2.1 The Site is situated to the southeast of St. George's Road and southwest of Sandown Road, on the southern edge of Sandwich.

6.2.2 The Site is a predominately undeveloped parcel of land totalling approximately 2.37 hectares, with tall and dense hedge and tree planting around the perimeter of the Site and an existing agricultural access point off St Georges Road to the north-west of the Site

6.2.3 The Site comprises a level enclosed field mainly formed of uniform improved grassland bounded on all sides by trees mixed in age, species, condition and character. There are also semi-derelict agricultural buildings in the southwest corner.

Figure 6.1: Site Location Plan (Drawing no. 29923A/01)

6.2.4 The Site comprises a level enclosed field mainly formed of grassland bounded on all sides by trees mixed in age, species, condition and character. There are also semi derelict agricultural buildings in the southwest corner.

6.2.5 The Site is bounded by existing residential development along St Georges Road to the north and west, undeveloped land to the east and south, Sandown Road to the north-east and a small area of residential development fronting Sandown Road further to the east of the Site.

6.2.6 The Site enjoys access to a number of local facilities and services which are within a reasonable walking distance, including schools, local shops, healthcare, employment, and public transport links. The Sir Roger Manwood Secondary School, Sandwich railway station and the historic town centre (including convenience stores) are all located within 800m of the Site. Sandwich Junior School and the local supermarket are located just over 800m from the Site. Larger shops and supermarkets are available in the local area, including Westwood Cross 8 miles to the north and Deal, 6 miles to the south. In terms of planning constraints, a Tree Preservation Order (TPO) protects trees on the northwest boundary of the Site and the belt of trees bounding the northeast and southeast.

6.3 Development Capacity

6.3.1 For the purposes of this representation, Land at Archers Low Farm, Sandwich is submitted with capacity for approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), as part of a high- quality, landscape-led residential scheme capable of delivery early in the Plan period.

6.3.2 Significant work has already been advanced by the project team as part of the submitted planning application and the subsequent appeal in which the proposed development has been informed following a thorough analysis of the Site opportunities, constraints and surroundings.

The key design principles have been to create an attractive, permeable and legible layout set with a strong landscape framework, utilising existing landscape features, to accommodate a mixture of high-quality and attractive homes, of a scale and design that reflect its setting and surroundings.

6.3.3 In summary the vision for the Site is to create a high quality residential development which includes:

Circa 40 – 45 no. residential dwellings, comprising 30% Affordable Housing and a mixture of 2, 3 and 4 bedroom properties.

A series of open spaces that perform multiple functions including informal space, a local area of play (LAP), ecological mitigation areas and incorporation of native and wildflower meadow planting.

Retention of trees on the northern and southern boundaries and the provision of new woodland planting. This will include proactive management of the retained and proposed woodland belts to encourage structural and species diversity and improve the overall health and longevity of these assets. The provision of significant biodiversity net gain is envisaged, and has been demonstrated can be delivered through the application and appeal.

Low key principle vehicular access point onto Sandown Road through landscaped entrance with trees and vegetation maintained, introduction of wildflower planting.

Footpath connectivity onto St Georges Road.

Tree lined connecting avenue creating strong legibility and navigation throughout the layout.

Figure 6.2: Proposed Site Plan as amended in December 2021 (Produced by Clague Architects – Drawing no. 29923A/11)

6.3.4 For context, at the time of determination of application ref: '22/00274', full planning permission was sought for the erection of 44 dwellings, together with associated access to Sandown Road, a pedestrian crossing point on St Georges Road, parking, open space, landscaping, drainage, and infrastructure works.

6.3.5 It is highlighted that draft policy PM1 seeks to provide a density typically between 30-50 net dwellings per hectare (dph). In this respect, it is highlighted that at 45 dwellings, the Site would provide a density of approximately 22.5 dph. Whilst it is acknowledged that lower density development may be more appropriate in edge of settlement locations, this demonstrates that even at a capacity 45 dwellings, the density is relatively low. Furthermore, as part of the previous application 22/00274, DDC confirmed at paragraph 2.23 of the Committee Report that subject to a detailed assessment of visual impacts, a proposed scheme of 44 dwellings on the Site is considered appropriate.

6.3.6 The above proposed Site plan submitted during the determination of the application demonstrates the capability of the Site to comfortably accommodate circa 40 – 45 residential units, together with significant boundary and internal landscaping elements.

Draft Allocation in the Regulation 18 Local Plan:

6.3.7 As aforementioned, the Site was proposed to be allocated for a capacity of approximately 40 dwellings in the Regulation 18 Local Plan under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' (reference SAN023).

6.3.8 The Site was considered as part of DDC's Housing and Economic Land Availability Assessment (HELAA) (December 2020) for the development of approximately 40 dwellings. The summary of suitability as provided by DDC is summarised as follows:

- The Site is in an Area of Archaeological potential and a Heritage Assessment will be required.
- The Site clips Flood Zone 2 and 4, along the boundary and an FRA would need to be undertaken.
- The Site was removed from the LALP (Local Allocations Local Plan) by the Inspector on landscape grounds, however, with the provision of an enhanced landscape buffer to the east, south and west of the site to provide year-round screening, it is considered that the impact on the landscape can be mitigated. The housing number on the site has also been reduced to address landscape concerns.
- Access to this site would be possible via Sandown Road, however vehicle access onto St Georges Road is likely to be challenging due to limited footway width and subsequent sightline requirements, so would need to be restricted to emergency/pedestrian access only.
- The provision of 40 dwellings is unlikely to create a severe impact on the surrounding highway network, however St Georges Road and Sandown Road (including Knightrider Street and the route to the High Street/Quay) are subject to constrained geometry due to on street parking, as such, a review on-street parking controls may be required to manage any increase in traffic-flow.
- There is a general concern over the potential cumulative impact of development in and around Sandwich and on routes within the town, which should be considered as part of future traffic modelling exercises.

- A Transport Assessment is required.
- Further information should be provided to demonstrate that access is achievable. However, cumulative impact on the highways network needs to be assessed.

6.3.9 At the time, owing to the matters set out above the Site was considered 'Amber' in the reg/amber/green (RAG) rating. However the clients have since demonstrated within the planning application and subsequent appeal submission that the proposed development for 44 dwellings would address the queries above.

6.4 Draft Policy Allocation 'Land at Archers Low Farm, Sandwich Road, Sandwich' (SAP22)

6.4.1 As introduced in the preceding sections, our client's Site at Archers Low is allocated for residential development within the Dover Pre-submission (Regulation 19) Local Plan. For ease of reference, the draft policy wording is as follows:

"SAP22 – Land at Archers Low Farm, St Georges Road, Sandwich (SAN023)

The Site, Land at Archers Low Farm, St Georges Road, Sandwich, as shown on the policies map is allocated for an indicative capacity of 35 dwellings.

Development proposals for the Site shall include the following:

- a) Development should be laid out to protect the residential amenity of the existing residential properties to the north-east and designed to take account of the character of the Sandwich Walled Town Conservation Area;
- b) The existing trees on the boundaries of the site should be retained and enhanced to mitigate the impact of development on the landscape and provide opportunities for biodiversity habitat creation and enhancement;
- c) Trees which need to be removed to enable an access to be provided to the site, shall be kept to the minimum needed to provide necessary visibility, and will be required to be replaced on-site;
- d) The layout of the scheme should provide a sufficient buffer between the existing mature trees on the site and residential properties, to ensure appropriate residential amenity for future residents and the protection of existing trees once the site is developed;
- e) A site-specific Flood Risk Assessment must be carried out in accordance with Policy CC5, including a comprehensive investigation into surface water flood risk. This shall also inform the application of the Sequential Approach to the layout of the site by locating the most vulnerable elements in the lowest risk areas;
- f) Primary vehicular, pedestrian and cycle access to the site shall be provided from Sandown Road;
- g) In accordance with Policy SP13 a wintering bird survey must be undertaken in advance of a planning application on the site. If the bird survey identifies that the development will exceed the threshold of significance, mitigation will be required. A suitable scheme of mitigation will need to be submitted with the planning application for the site;
- h) Environment assessment study required to address any potential impact on the Sandwich Bay SPA and Ramsar;
- i) A Heritage Assessment, to include appropriate archaeological investigations must be carried out in accordance with Policy HE1 and Policy HE3, the results of which should inform the layout and design of the development which is necessary to avoid harm to any heritage assets identified through the assessment; and
- j) The occupation of the development should be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider. Development should provide a connection to the sewerage system at the nearest point of adequate capacity."

6.4.2 To be clear, our client remains wholly supportive of the allocation of the Site for residential development and is committed to delivering the Site early in the Plan period (start on site in 2023). We agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client's Site can be made – and therefore object to the capacity identified.

6.4.3 Accordingly, we say that Land at Archers Low can further assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.

6.4.4 It is submitted that the SAP22 policy wording should be amended to reflect the capability of the Site to accommodate approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.

6.5 Strategic Justification for Development

Spatial Strategy

6.5.1 The proposed Housing Distribution for the district across the Plan period is established within Policy SP3 'Housing Growth' which sets out that the distribution of housing growth in the district is primarily based on the settlement hierarchy and influenced by site availability, environmental constraints and factors of delivery.

6.5.2 Rightly, a key aim of the growth strategy is to focus development in the least sensitive areas of the district in order to conserve and enhance the Dover's rich natural and historical environment.

6.5.3 A retained theme from the adopted Plan, is that the Council's settlement strategy continues to focus on the development and regeneration of Dover Town and Whitfield (3381 dwellings). Approximately half of the district's planned housing is in this location, the majority of which again is to come forward as part of the strategic urban expansion of Whitfield 'SAP1' (2200 minimum dwellings).

6.5.4 Development will then be focused in the District Centre of Deal (223 dwellings), and the Rural Service Centres of Sandwich (227 dwellings) and Aylesham (649 dwellings). Following the settlement hierarchy rigidly would distribute housing in the preceding order, however the Plan recognises that housing delivery in Deal and Sandwich continues to be constrained by a number of factors including flood risk, ecological designations, heritage and highways. Further, Deal has experienced generally high levels of windfall development across the previous Plan period and accordingly there is now a dwindling supply of available, suitable sites in both settlements. On account of this context, the Council have sought to direct the majority of the remaining higher order settlement growth (outside of Dover & Whitfield) to Aylesham, through the strategic expansion to the town.

6.5.5 Outside of the four principal district settlements, the Rural Settlement Hierarchy (August 2022) identified that the majority of lower-order settlements in the district emerge as having a low level of facilities within the hierarchy and six settlements having none of the key indicators of sustainable services. Plainly, these settlements offer very limited opportunities for growth and it is evident that the forthcoming Plan will be reliant on the settlements of Dover (including Whitfield), Deal, Sandwich and Aylesham to deliver the housing growth that is required.

6.5.6 We further note the findings of the Strategic Housing Market Assessment (2017) which identified that Sandwich and the north is the most expensive part of district with median property prices for all sizes of homes significant in excess of prices in Deal and Dover town and the south. It is suggested that issues of unaffordability are most likely to effect entry-level properties and result in existing residents being forced to seek more affordable properties elsewhere in Dover district or neighbouring authority areas.

6.5.7 Given this context, it is clear that where available and suitable opportunities for residential development do exist within the district's higher order settlements, including our client's Site at Land at Archers Low which can provide a policy compliant level of affordable housing, it is imperative that the effective use of these sites are appropriately maximised in accordance with draft policy SP3 of the emerging Plan and national policy objectives.

6.5.8 Notwithstanding our client's in principle support or the proposed strategy, we are concerned that highly sustainable, edge-of-settlement sites, particularly in higher tier settlements such as Sandwich have not been fully maximised to reflect their accessible location and capability to accommodate a greater quantum of development. On this basis, we are concerned that the strategic objectives underlying draft policy SP3 'Housing Growth' may not be fully realised, to the detriment of market and affordable housing delivery and the wider policies seeking to conserve and enhance the district's natural and historic environment.

6.5.9 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Sandwich, and this has not been undertaken – for example at Land at Archers Low, where it has previously been demonstrated that the site has sufficient capacity to deliver approximately 5-10 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

Greenfield Development and Consistency with Housing Trajectory

6.5.10 Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs Area of Outstanding Natural Beauty, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, release will be required if the Council is to meet its housing and development commitments moving forward.

6.5.11 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Sandwich, represent the most sustainable and reliable sources of growth for the Plan period, to support the role and timescales of strategic urban extensions and to deliver the significant number of new homes that are required within the forthcoming Plan period.

6.5.12 Moreover, greenfield edge-of-settlement sites are, in our experience, typically most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the district.

6.5.13 The Sustainability Appraisal Scoping Report (2018) sets out that over the course of the adopted Plan period, the key sustainability issues facing Dover District in relation to housing are as follows:

Population growth, household growth and demographic change will place additional demand on key services and facilities such as housing, health, education and social care. The Local Plan offers a new opportunity to manage these pressures, encouraging mixed communities;

There is a need for affordable housing across the District. At present, the mean price of dwellings is higher than the national average. The Local Plan will help to expedite its delivery; and,

There is the need for a mix of housing types that cater for the needs of a range of people, including the growing number of single person and elderly households. Without an up-to date Local Plan, the required housing is less likely to be delivered.

6.5.14 It is evident that the new Dover Local Plan must allocate a mix of reliable sites capable of steadily delivering not only the quantum of housing that is required, but also the associated public infrastructure, affordable housing and a mix of unit types and tenures suitable for a wide range of future occupants.

6.5.15 The Housing Topic Paper (September 2022) provides further context and summarises under Chapter 7 'Historical Housing Delivery' that Dover has historically placed significant reliance on windfall development over the current adopted Plan period, with windfall sites accounting for 44% of all completed dwellings over the preceding 10-year period.

6.5.16 Moreover, it is highlighted that at the beginning of the 10 year period, the majority of new dwellings were being built on brownfield land. However, from the monitoring year 2013-14 onward development on greenfield land began to play a much greater part in the location for new development as show in figure 1 below. This trend of increased housing development on greenfield land is a result of the allocations within the CS and Land Allocation DPD being built out and is associated with an approximate doubling of completions in the district. From 2013-14 onwards the average number of completed dwellings per annum has doubled to that of the early years of the CS, as the strong delivery rates of greenfield sites form the predominant source of housing. This is despite an overall declining trend of brownfield completions towards the latter half of the Plan period. This is generally not an uncommon trend in the majority of local planning authorities areas, where opportunities for available and suitable sites in urban centres dwindle throughout the Plan period.

Figure 1: DDC Brownfield / Greenfield Completions 2010/11 to 2020/21 (source: Housing Topic Paper September 2022)

6.5.17 In light of the above context, it is clear that the adopted Dover Local Plan suffered from an initial under delivery of Plan-led housing growth in which windfall development sources were largely required to take up the slack in the early phases of the Plan period, as major allocated sites failed to deliver at the rates initially expected.

6.5.18 It is equally apparent that initial slow completion rates were quickly addressed once greenfield allocations commenced development, feeding into strong completions in the latter half of the Plan period. In our experience, greenfield sites are typically associated with stronger delivery rates and provide a reliable source of housing growth. The allocation of an appropriate mix of sites and scales is required in order to ensure steady and sustained Plan-led housing delivery across the Plan period and to avoid a reliance on windfall development to address the shortfall.

6.5.19 Consequently, given all of the above, it is imperative that the new Local Plan allocates a sufficient variety and scales of site capable of both ensuring steady and sustained housing completions and capable of making necessary contributions to public infrastructure and services, affordable housing and mix of unit types to address the key issues raised in the Sustainability Appraisal.

6.5.20 In our view, edge-of-settlement greenfield sites such as our client's Site Land at Archers Low represents the most reliable and sustainable source of housing delivery for the Plan period. Such sites are typically less constrained by wider factors and less affected by unforeseen delays such as land contamination. Moreover, greenfield sites typically are more capable of delivering the policy compliant affordable housing, unit mix and developer contributions that are urgently needed and in the case of our client's Site, have already been demonstrated within the present planning application and appeal submission.

6.5.21 It is understood that the Plan is predicated on the delivery of strategic scale development at Whitfield comprising the development of circa 2,200 new homes. Consequently, in order to avoid a repetition of the previous Plan, the Council have sought to ensure that a pool of reliable greenfield allocation, including that of our client's are included within the Plan, capable of delivering the early growth that is required within the housing trajectory prior to the commencement of major allocations later in the Plan period.

6.5.22 We note that within the Housing Trajectory 'Appendix D', the Council have included allocated units from Years 4 onwards, with extant permissions (accounting for 5% non-implementation) demonstrated to be solely capable of delivering the growth required in Years 1-3. Notwithstanding our client's commitment to commencement on site in 2023 and the initial delivery of units at Land at Archers Low in 2024 (subject to successful appeal), we support this pragmatic approach and suggest this represents a sound basis on which to set the district's

housing trajectory. We note also the inclusion of an appropriate windfall allowance and the included contingency buffer to further ensure reasonably flexibility in the housing supply.

6.5.23 On account of all of the above, we submit that the allocation of Land at Archers Low forms part of a sound strategy for growth in the district for the forthcoming Plan period. Land at Archers Low is capable of delivery early in the Plan period, representing a reliable source of housing growth in a highly sustainable and accessible location adjacent to the existing settlement boundary of Sandwich, consistent with the Council's preferred settlement strategy. However, we object on the submission that the Site is capable of making a greater contribution to the district's housing need and suggest an amended wording of the policy to allocate the Site for approximately 40-45 dwellings. Nonetheless, the Site is unconstrained and capable of providing a high-quality residential development including a mix of unit types and tenures, a meaningful contribution to the supply of affordable housing and contributions to public services and infrastructure, benefiting both existing residents and future occupiers.

Policy SP4 'Windfall Development'

6.5.24 Separately, we note the provisions of policy SP4 windfall development. Proposals at Land at Archers Low would likely be acceptable in principle under this provision and we support the policy inclusion for appropriate, proportionate windfall development.

6.5.25 Our client is fully committed to the delivery of the Site which is available and suitable for delivery early in the Plan period and is presently pursuing an appeal on the Site for a greater quantum of units than the allocation in the Regulation 19 Plan. There is consequently little to be gained from potentially delaying delivery of the Site by withdrawing the allocation. Notwithstanding the provisions of SP4, it is reiterated that our client fully supports the allocation of the Site under SAP22 for residential development as the most appropriate mechanism for delivery of the Site and the opportunity for genuinely Plan-led development in Sandwich and the provision of associated benefits to public services and infrastructure, contribution to affordable housing supply and the delivering of a mix of house types and tenures.

Infrastructure Delivery

6.5.26 Paragraph 11 of the Framework is clear that all plans should promote a sustainable pattern of development. This includes aligning growth and infrastructure. Paragraph 20 goes on to confirm that strategic polices will be expected to make sufficient provision for associated development infrastructure.

6.5.27 In this regard, draft policies SP11 'Infrastructure and Developer Contributions' and SP12 'Strategic Transport Infrastructure' of the emerging Plan form the key strategic polices for infrastructure delivery. We agree that where development would create a need, or would have an impact, or would exacerbate an existing deficiency in infrastructure provision, appropriate developer contributions may be sought.

6.5.28 It is however emphasised that in all developments, infrastructure requirements must be demonstrated to be necessary through assessment during determination of the application on a case-by-case basis. Where new development is proposed, it does not automatically follow that major infrastructure contributions are always required or contribution to strategic infrastructure proposals are appropriate. For instance, it is our client's view that any infrastructure requirements must be demonstrated through a robust and transparent assessment at application stage, taking into account the submission of detailed supporting evidence, for example following consideration of the Transport Assessment in the case of highway infrastructure contributions.

Alignment with Sustainability Appraisal Findings

6.5.29 As part of the preparation of the Local Plan, the Council has identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA) which provides an assessment of how different options perform in environmental, social and economic terms, to help inform which option should be taken forward and combined with wider evidence documents, have been used to determine the growth and spatial strategy set out in the Plan.

6.5.30 Five potential distributions of growth were identified during preparation of the draft Regulation 18 Local Plan:

- Spatial Option A: Distributing growth to the District's suitable and potentially suitable housing and employment site options (as needed to deliver the scale of growth required).
- Spatial Option B: Distributing growth proportionately amongst the District's existing settlements based on their population.
- Spatial Option C: Distributing growth proportionately amongst the District's existing settlements based on the District's defined settlement hierarchy.
- Spatial Option D: Distributing growth in the same way as the adopted Local Plan, focussing most growth in and around Dover town.

- Spatial Option E: Distributing growth more equally across the District's settlements: Dover, Deal, Sandwich and Aylesham, as well as the rural villages.

6.5.31 The conclusion of the SA was that Spatial Options C (settlement hierarchy) and D (adopted Core Strategy with Dover focus) generally perform the most strongly against the SA objectives, particularly when delivering the baseline growth scenario. However, given the environmental constraints that exist around Deal and Sandwich, very few suitable and potentially suitable sites have been identified in these towns. Given this, the Council's preferred option for the distribution of housing and economic growth comprises a combination of options A (HELAA sites), C (settlement hierarchy) and D (Dover focus). The distribution of housing and economic growth in the District is therefore primarily based on the settlement hierarchy, and influenced by site availability, environmental constraints and factors of delivery.

6.5.32 On account of the above, our client agrees that the proposed growth strategy, and by extension, policy SP3 in principle represents a sound and evidence-led strategy for growth. However, given the clear acknowledgement of the dwindling supply of available sites in the higher order settlements of Deal and Sandwich, which has necessitated a minor deviation from the strongest performing spatial options, we submit that where sites are available and suitable for development in Deal and Sandwich, these must be fully maximised, reflecting their accessible location and their ability to reduce the need to develop into less accessible and more sensitive sites elsewhere in the district to accommodate the growth that is required.

Site Specific Sustainability Appraisal

6.5.33 Land at Archers Low Farm, St George's Road, Sandwich is included under HELAA reference 'SAN23' within the SA Site Assessment (Appendix F). The site performs strongly, with particular positives identified with regards to SA Objectives related to housing, accessibility, the economy, sustainable transport and climate change mitigation, in large parts due to the edge-of-settlement location and proximity of the site to key services in Sandwich.

6.5.34 We note negatives associated with the development of a greenfield site, including loss of agricultural land, however this would be true of the majority of greenfield sites and it is abundantly clear that Dover's housing need cannot be met solely on brownfield sites. We note also minor negatives / uncertain associated with biodiversity, the historic environment and landscape, however it is not clear whether these take into account the high-quality design, biodiversity enhancement and landscape mitigation proposed under the application/appeal. Irrespective, these are not considered to outweigh the clear and tangible sustainability benefits associated with edge-of-settlement development and the site's consistency with the preferred spatial options.

Summary

6.5.35 Taking all of the above into consideration, our client is wholly supportive of the inclusion of land promoted at Archers Low, as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered wholly consistent with the objectives of the Plan and forms part of a sound evidence-led growth strategy consistent with the recommendations of the Sustainability Appraisal for the district to 2040, subject to the sole objection in relation to capacity.

6.6 Deliverability

6.6.1 Prior to the current appeal proposal, the Site has had no planning history of a residential nature or a history of unimplemented permissions. There are not considered to be any impediments to the Site being allocated for development commencing within the first five years of the Plan period. Combined with an appropriate number and scale of wider allocations in Sandwich and elsewhere across the district, this would ensure steady delivery of housing in Dover district across the majority of the Plan period and support the role and timescales of strategic housing delivery at Whitfield towards the latter half of the Plan period.

6.6.2 Fernham Homes Limited – a local SME with a strong history and track record of delivery, together with an adopted and robust business plan for growth – has control over the site, and are poised to commence work on its residential development very promptly after the receipt of planning permission, potentially (subject to the successful outcome of the current appeal) in 2023. Delivery of housing is expected from 2024.

6.6.3 For the reasons set out in this representation, the Site is considered suitable for the residential development of approximately 40 – 45 dwellings. The Site is adjacent to the urban area of Sandwich, one of the four higher order settlements in the district and the Council's preferred locations for Plan-led growth within the district. Development at Land at Archers Low would form a natural and logical development east of Sandwich with excellent accessibility to day-to-day services and amenities via active travel modes within Sandwich itself and convenient access to public transport infrastructure (including Sandwich train station) for onward travel to key neighbouring settlements including Dover, Ramsgate, Canterbury and Ashford.

6.6.4 Finally, in respect of suitability, there are no physical limitations or problems such as access, infrastructure, flood risk, hazardous risks, pollution or contamination.

6.6.5 On behalf of the landowner, we submit that there are no known financial restrictions that would impact upon the viability of a future housing scheme or that would prohibit development coming forward within the early stages of the Plan period. To the contrary, we consider there to be

an opportunity to deliver a high-quality, sustainably located residential development scheme consistent with the Council's proposed growth strategy comprising an appropriate mix of market and affordable housing and capable of contributing to a range of community facilities, public infrastructure and services locally.

6.6.6 Given the advanced nature of the proposals by virtue of the submitted planning application, in terms of specific timescales, should the ongoing appeal be allowed, we understand that Fernham Homes Limited and Walker Residential Limited are capable of commencing work on-site in early 2023, with delivery in 2024 and completion of the Site anticipated in 2025.

6.6.7 The Site is in single ownership and there are no complicated legal agreements or covenants that would prohibit the ability to bring forward the Site early in the Plan period. The Site is therefore considered available and achievable for the purposes of the tests of deliverability.

7 Conclusion
7.1 Summary

7.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited and Walker Residential Limited, in response to the Dover District Council Local Plan (Regulation 19) consultation which runs until 9th December 2022.

7.1.2 Our client controls 'Land at Archers Low Farm, Sandown Road, St Georges Road, Sandwich' and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.

7.1.3 Taking all of the above into consideration, we consider that the Site promoted at Land at Archers Low should remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered, in principle, wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040. However, it is imperative that the effective use of these higher-order settlement sites are appropriately maximised in accordance with draft policy SP3 of the emerging Plan, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and object solely on this basis.

7.1.4 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Sandwich, and this has not been undertaken – for example at Land at Archers Low, where it has previously been demonstrated that the site has sufficient capacity to deliver approximately 5-10 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

7.1.5 Without prejudice to our client's support in principle of the proposed allocation at Land at Archers Low, we would urge the Council to re-visit the allocation policy text and allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential and the objectives of draft policy SP3 are most effectively realised. It is submitted that the SAP22 policy wording should be amended to more accurately reflect the capability of the Site to accommodate approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.

7.1.6 In addition to being a highly sustainable and logical edge-of-settlement allocation, the Site is deliverable in a single land ownership with no viability issues, legal or third-party constraints present. Our client is fully committed to the delivery of Land at Archers Low and there are no impediments to the Site being capable of delivery within the initial 0-5 years of the Plan period.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

For the reasons set out in the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245), the capacity of Land at Archers Low Farm, St Georges Road Sandwich (SAN023) should be increased to 40 - 45 dwellings.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Please refer to the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245).

Agent Full Name	Klaire Lander
Agent Company / Organisation	Lander Planning
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP11
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Lander Planning sent a PDF document which has been split across the relevant sections of the Plan. See Original Attachment on SDLP1346) The provision of infrastructure and developer contributions is consistent with national policy and this policy is 'effective' and 'justified'. This policy is supported.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP11
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note <i>The text below is an extract from the original representation which is attached to SDLP1438.</i></p> <p>SP11 Infrastructure and Developer Contributions</p> <p>Paragraph 9.26 highlights the need for infrastructure, particularly transport infrastructure, and paragraphs 9.27 to 9.29 point out the difficulties of establishing what infrastructure is required to support each potential new development. Paragraph 9.30 concludes that infrastructure is best provided by Section 106 agreements rather than by a Community Infrastructure Levy (CIL). This underpins Strategic Policy 11 which concludes by stating that "In determining the nature and scale of any provision, the Council will have regard to viability considerations and site-specific circumstances."</p> <p>This statement, in effect and in practice, has allowed developers to reduce progressively the Section 106 payments and other conditions imposed on developments at the time of granting permission by suggesting that their potential developments are not financially viable once all the constraints have been factored in. A CIL would provide developers, planners and residents with the certainty of knowing what the community costs would be.</p>

	It is not the Council's role to have regard to any planning application's financial viability. It is the responsibility of the applicant to have in place sufficient funding or access to sufficient funding in order to realise the project. It is the Council's responsibility to determine the use of the land and the conditions which make that use appropriate, and answer for its decisions before the electorate.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The plan would become more sound and effective if it included Council intention to implement a CIL before the Plan has run a quarter of its projected course, and a further sentence should be added to SP11 stating that: "The Council intends to introduce a Community Infrastructure Levy as soon as possible but before 2025 so that the council, developers and residents can more clearly understand the financial requirements of any agreed planning permission."
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP11
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Comments refer to the whole plan but I have particular concerns about the Walmer area plans When new housing is built it requires infrastructure: more and new roads, GP surgeries, schools, sewers, shops, etc. Dover District Council is not effectively seeking contributions from developers under section 106 agreements and the community infrastructure levy. DDC and local councilors are too cosy with the local developers and not setting the right level of infrastructure developed.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Proper cost contributions from developers and proper investments in existing and new infrastructure, legally enforceable obligations between DDC and developers. More supervision and inspection of developments and infrastructure by DDC
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I expect councillors and planners to do their job and enforce the obligations of developers to develop safely and to upgrade and future proof infrastructure.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note: Please see detailed representation (attached at 1770) which has been divided against numerous consultation points. The representation has images within the text. The text below is an extract from the detailed representation 'by an Alkham resident'.</p> <p>4 Planning for Climate Change</p> <p>The Plan identifies several measures , including sustainable design, reduction of NOX emissions, modal transport shifts etc</p> <p>Comment 4: I support the broad principles of low carbon design , incorporating low carbon technologies , maximising green infrastructure and consideration of sustainable transport modes and will return to this latter point later in the transport section</p> <p>No comment is made on the introduction of wind turbine development nor on the potential for solar hillside panels on the south facing sides of the valley, as I am not aware of any locally planned development in this respect.</p> <p>I welcome the steps being made which relate to water efficiency and would advise that through local action, the Water Authorities, the Parish Council and local landowners have tried to mitigate risk of flooding as the aquifer fills and manage surface water problems as they arise in Alkham. However I have concerns that as sewage regularly backs up in the base of the valley in winter, this possibly indicates a lack of capacity for housing expansion, an infrastructure problem which requires addressing.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Deal/Walmer road system will not cope if permission is given for anymore developments; SAP14, SAP15, SAP34 are unsound Congestion caused by over-development along the Dover Road from Ringwoud into Deal will result in traffic queues more frequently than at present making walking and cycling irresistible. June 2020 Deal Town Council report requires pavements, cycle lanes, wide roads and detailed junction plans. Traffic in Kingsdown would be gridlocked winter and summer
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	In an ideal world- Ringwoud Road in and out of Kingsdown to have cycle lanes and walking paths. Park and pedal scheme I Borrowpit Carpark to be activated Glen Road / Liverpool Road to have cycle lanes and walking paths St James Road / Upper Street junction to be redesigned and made safe to take all the construction traffic. Alexander Road / Upper Street junction to be redesigned and made safe to take construction / extra traffic
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>3.227 references KCC's Growth Without Gridlock which include a North Deal access road. This Local Plan doesn't mention it.</p> <p>The latest iteration of the Dover & Deal Transport Model Forecast acknowledges that the London Road/Manor Road junction operates, and will operate, above capacity in the am & pm peak hours and that there is no scope or space for mitigation. Even so it fails to evaluate or address the nearby Middle Deal Road/London Road junction which only operates with the goodwill of drivers in the Manor Road/London Road tailback when, as it frequently does during peak hours, stretches beyond Middle Deal Road blocking free egress. There is also no mention of the length of queues in Mongeham Road for drivers trying to join London Road, because of the volume on traffic thereon during peak hours.</p> <p>No attempt has been made to evaluate the impact of a North Deal Access Road, if it were built, on the level of traffic on London Road, without which it will be impractical to know how to assess windfall sites or other applications in and around Deal that might add to peak hour traffic on London Road.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>3.227 should be extended with: Growth Without Gridlock includes a North Deal Access Road which the Council will actively support. Any approved development that will add to the level of traffic on London Road will be required to make contributions under s106 towards the construction costs of this road.</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To provide any clarifications and answer any questions not anticipated by the written response.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Over the past few years, Aylesham has seen a vast amount of development. This has put considerable strain on local amenities such as local shops and medical services.</p> <p>Any possible future developments, whatever size, must provide Aylesham with additional facilities, in particular for young people, local shopping facilities and the infrastructure that will allow more people to move freely around the village.</p> <p>Aylesham Parish Council believes that any future development must improve amenities and provisions for young people.</p> <p>In terms of transport, all future developments must focus on pedestrian and cycle traffic. With emphasis on the improvements of train and bus services appropriate to the size of the Parish, rather than road users to both combat road traffic and assist with the climate emergency.</p> <p>Aylesham and Snowdown only have a regular bus service to Canterbury, and more recently there have been attempts to end school bus services to Dover. New development should bring a net increase in public transport, not a steady decline.</p> <p>In addition, there is considerable strain on local roads and any future development must be accompanied with a plan to make significant upgrades to key routes such as Spinney Lane and B2046 (Adisham Road).</p> <p>Any chances of alleviating road traffic are severely hampered in Aylesham. Both the bus services and train service to Aylesham and Snowdown are completely substandard. Aylesham Train Station and Snowdown Train Station are both inaccessible for many residents.</p>

	<p>Aylesham Parish Council would welcome the opportunity to work with Network Rail and Southeastern to address the ongoing issues with train access to both Stations.</p> <p>Aylesham Parish Council believes that any further development can only happen after improvements to both the bus and train services to and from both Aylesham and Snowdown. Ensuring provisions are sustainable, accessible and appropriate for the size of the whole Parish.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. <p>2 - Do you consider this part of the Plan sound?</p>	No
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	Positively prepared Justified Effective Consistent with National Policy

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan as it stands is unsound as bus services have been cut leaving rural communities with very poor connectivity to larger settlements and rail links. For SP1 and SP12 to be linked up and for the DDC to meet its carbon zero commitments, bus services should be reinstated and better integrated with the rail service timetables on the line running from Sandwich and Deal through Dover to Ashford, and the line running from Dover to Canterbury and Faversham and Victoria.</p> <p>DDC are on record 2021 'proposals generating levels and types of traffic movement resulting in severe cumulative residual impacts in terms of capacity and road safety will not be permitted'. The current plan has failed in effectiveness and to be effective and justified the new plan must cut the number of housing allocations particularly in rural areas to reflect the struggling roads and public transport network.</p> <p>The constraints of the East Kent road system (A258, A2, A256,) mean little can be done to ameliorate the situation, without long term road closures needed to dual the A2 from Jubilee Way to Lydden Hill. Neglect by DfT and Highways England means that with biometric passport checks in 2023, residents can expect gridlock again and again.</p> <p>Road improvements to separate local traffic from through freight traffic must be done to save lives; road improvements that central govt must pay for. The separation needed must include flyovers and underpasses and foot bridges, including under / over the A20 route through Dover town. It should be noted that Dover has too much experience of the gridlock and chaos caused by cross-channel delays. With more extreme weather events expected, and with 'frictionless freight flow' now a thing of the past, holding areas for freight OUTSIDE THIS DISTRICT, near the M25, are needed more now than they were before.</p> <p>Dualling of the A2 is needed from Eastern Docks to Lydden Hill. The separation of local traffic from through freight traffic by means of flyovers and underpasses at the Duke of York, and Whitfield roundabouts must be done at the expense of central govt, Dept for Transport/ Highways England. Residents of the garden of England should not suffer because national traffic flows on our roads, given the failure of implementing freight to rail policies.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Dual the A2</p> <p>Improve access across the district to rail networks.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Agent Full Name	
Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP12
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	In response to the updated traffic figures in the evidence base Kent Highways have accepted at last that the London Road/Manor Road operates well above capacity during peak hours and no further development can be considered that would add to traffic flows though that junction. It is accepted that there is no possible mitigation to increase capacity at that junction. That judgement indicates that there can be no more economic development in Deal during the plan period at least. KCC's Growth Without Gridlock document supports a north Deal access road which would resolve the issue but there is no indication that there has been any co-operation between DDC & KCC to pursue this issue.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	SP12 requires an additional clause committing to pursue a north Deal access road in co-operation with KCC and supporting development that would contribute to the cost of its construction including employment land, none of which has been allocated to Deal in this plan
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To clarify what is required if there is any uncertainty from the written response and to rebut any argument against its inclusion.

(Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Include the current and projected bus service levels which would encourage a sustainable use by residents, thus reducing unnecessary car usage into local town centres and business parks work work and shopping purposes.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	3.233
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	There are unintended side effects to the plan forcing traffic because of the widespread use of sat navs into inappropriate single lane roads within areas of the Alkham valley ANOB endangering walkers cyclists, horse riders, wildlife and the biodiversity of the area
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Alkham Valley road is an unclassified local road unsuitable for expansion and already operating near capacity as well as being unsuitable for heavy or fast traffic. Any major road upgrades should be planned in conjunction with traffic calming measures to avoid unintended adverse consequences.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>While we agree that the A2 at Dover needs dualling urgently and the roundabouts at Whitfield and Duke of York also need upgrading, but how can residents be ensured the A256 to Deal and Walmer will not be impacted severely as a result? The A256 finds it difficult to cope with heavy traffic as it is, and drivers increasingly take to rat runs through the local villages to avoid it.</p> <p>Other local villages will also be impacted by the proposed upgrading of key junctions along the A256, in particular at the junctions with the A257 and A258. We accept this is needed, but this will impact on villages nearby. What mitigation is planned for this?</p> <p>Also concerned how the A250 to Folkestone particularly through Denton and Wingham is going to cope with the increased traffic (car, bus & HGV) which will be created by the new residential development proposed at Aylesham. The A250 at Denton is not wide enough for two HGVs or buses to pass each other as it is, and the road cannot be widened as homes are located right on the road. What mitigation is planned for Denton and Wingham?</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan is unsound as it does not comply with the legally binding commitment made by DDC when they declared a climate emergency in 2020 and prepared their climate change strategy. The plan will not do enough to meet the target of the district being net zero by 2050. DDC should be much more ambitious about the green credentials of new housing. If new homes generated their own power, were insulated to the highest standards, and collected rain water, it would greatly help stretched local services and go a long way towards making the housing stock fit for the coming decades.</p> <p>The regulation 19 stage of the consultation is not fit for purpose as it is overly complicated and very difficult to use. The process has left many members of the public including me and my wife feeling overwhelmed and confused as to how to make a representation. For those who are working full time this has been a task for which they do not have enough time. As a result those who may have wanted to make a submission have not been able to. The format of the submission form is also difficult to navigate. Without prior experience of planning law it is difficult to say whether a part of the plan is legal or not. As to the duty to cooperate it is impossible to know. The unsound plan needs updating after the government announcement on 5/12/22 that mandatory housing targets are not to be imposed. The figure of nearly 11,000 is unsustainable and should now be reviewed, particularly with respect to allocated land around Station Rd Walmer and proposed developments around villages.</p> <p>The character and landscape value of the district is being rapidly eroded under the current plan and this must not continue as it is contrary to NPPF 21. It is not sustainable to build on agricultural land which is in short supply as we are only 50% self sufficient in producing food in the UK. The CPRE has found that almost 14,500 hectares of farmland has been permanently lost to development since 2010. The contribution from the districts agricultural land is of vital importance. Much of the agricultural land is also vital for flood protection, and field margins are important for wildlife and biodiversity, forming corridors between habitats for vertebrates and nesting and roosting sites for birds. Dover District also has a wealth of character landscapes, AONB, heritage coast, nature reserves, internationally rare chalk grassland and rewilded areas such as Betteshanger Park. Overdevelopment under the last weak plan has meant that these areas are under pressure and being denuded as their boundaries are eroded and wildlife corridors between sites are cut off. The new plan does not do enough to protect these areas, wildlife and</p>

	<p>biodiversity. Developments should not be allowed to remove ancient woodlands and trees and biodiverse rich habitats even if it is argued that this is for the greater good. This is not sustainable as all nature is interconnected and if it fails then we all fail. The UK is one of the worst countries in the world for biodiversity loss, we have lost half of our biodiversity since the 1970's.</p> <p>Development has been at such a pace that infrastructure cannot keep up. Buses have been cut recently, cycle and pedestrian routes have not been upgraded sufficiently to connect some developments to main bus and train routes without car dependence. Aylesham has not had a secondary school which would mean children could walk to school. Many rural communities are entirely car dependent due to lack of buses and the roads not being safe to use their bikes. Not enough emphasis is put on renovating existing housing stock to provide greener, insulated, fuel efficient homes. Each new build generates around 56 tonnes of embedded carbon. The NPPF states that we should prioritise brownfield sites over greenfield but although there are many opportunities to develop brownfield sites in Dover, this has not been prioritised. Many developments have been for larger houses in villages and there is not enough provision for affordable housing.</p> <p>The wording of the local plan is not definitive, it leaves too many loop holes and vague preferences which enable large developers to argue and get what they want, to maximise profits, not what the people of the Dover area need.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Better mapping and understanding of the Dover District, taking into account internationally rare areas of chalk grassland, woodland and trees wherever they occur.</p> <p>Large buffers around the AONB to protect its character from the built environment. Stronger protection for the AONB and the Ripple LCA F3.</p> <p>Tighter protections on our remaining biodiversity.</p> <p>Tighter definitions in the local plan so that developers have no room to argue what has been specified in the local plan.</p> <p>Hire several biodiversity officers to monitor closely and prevent loss of ancient woodland, chalk grassland, veteran trees, protected wildlife and rich habitats and to actively go out into the community, looking for ways to improve biodiversity by such things as accessing grants for hedge planting and the creation of ponds where ever possible in our district.</p> <p>Employ experts to liaise with farmers in our area to encourage the most environmentally friendly farming and land management practices which will encourage maximum biodiversity in the countryside and maximum sequestration of carbon in soils and biomass.</p> <p>Stop the use of agricultural land for development.</p> <p>Renovate and insulate rather than build new houses, brownfield not greenfield.</p> <p>Turn attention away from destroying village communities with unsustainable housing estates outside their village boundaries.</p> <p>Do not give developers the get out clause of financial mitigation for destruction of wildlife and habitat. No development should further deplete our critically low levels of biodiversity.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>These representations to the Regulation 19 stage local plan consultation are made by Dover Harbour Board. The Harbour Board is responsible for the administration, maintenance and improvement of the harbour at the Port of Dover, which itself is the busiest international roll-on roll-off ferry port in the UK.</p> <p>The Port of Dover is one of the UK's most important strategic economic assets. The Port of Dover is the UK's busiest international ferry port, handling more lorries than all other UK ports. Its operation is capable of facilitating 120 ferry movements and 110 miles of freight per day. £144bn worth of UK trade and 33% of all trade with the EU is handled by the Port of Dover.</p> <p>Further, Dover is the UK's second busiest cruise port. Over 200,000 cruise passengers visit the Port of Dover, a number The Harbour Board is actively looking to grow. Embarkations on day trips and excursions directly boost the local and regional economy, with an average passenger spend equivalent to £322 pre-embarkation, and £84 during a port visit. The benefits to the local Dover economy are significant; it is estimated that this generates circa £47m of direct passenger spending annually in the local economy. The Port of Dover indirectly supports over 5,000 jobs, many of them in the local area, many of which would be affected by any reduction in cruise calls.</p> <p>The Port of Dover therefore is a significant stakeholder in Dover District with a large influence on the local economy, both directly in terms of visitors, passenger throughput and employment, and indirectly by its impact on the highway network. The Harbour Board considers that the emerging Dover Local Plan needs to appropriately consider and account for the aspirations of The Harbour Board to improve operations more widely and plan for a low carbon future.</p> <p><u>Port Operations</u></p> <p>Port activity and operations can have a wide impact on the District and County. This is particularly the case in terms of highways given the volume of freight and passenger traffic experienced each year. This results in logistical challenges to ensure effective port operations which safeguard the economic benefits delivered by the Port, whilst also ensuring any adverse impacts on the locality are limited.</p> <p>In recent years the Port of Dover has experienced more periods of travel disruption (outside of The Harbour Board's control) than has previously been the case, resulting in national and international media coverage. This has had an adverse impact on the Port itself and Dover District. The Harbour Board is therefore committed to reducing wider impacts on both the highway network and the amenity of local residents from future disruptions to channel crossings.</p>

Draft Policy T14 – Overnight Lorry Parking Facilities

Paragraph 109 of the National Planning Policy Framework (NPPF) notes that “*Planning policies and decisions should recognise the importance of providing adequate overnight lorry parking facilities, taking into account any local shortages, to reduce the risk of parking in locations that lack proper facilities or could cause a nuisance.*”

A lack of overnight parking in Dover District has been identified by Kent County Council and Draft Policy T14 seeks to address this issue through a criteria-based policy for a lorry park and associated facilities. The Harbour Board supports the principle of such provision to remove HGVs from the highway, but the provision of a truck stop alone deals with only part of the identified problem, especially at times of channel crossing disruption.

Dover District Council are aware of the Harbour Board’s intention to deliver an Inland Terminal. This is considered a vital piece of Port infrastructure which will need to come online during the plan period (see below for further detail). Lorry parking facilities and the Inland Terminal are compatible and complementary land uses (as evidenced by the facilities provided at Sevington in Ashford) and The Harbour Board considers that there are significant benefits of co-joining these facilities.

Inland Terminal

Dover Harbour Board needs to deliver an Inland Terminal Facility. This is required to ease pressure on the Port of Dover by supplementing existing facilities or, in some cases, relocating them entirely to the inland site. There are a number of reasons why the Port needs this facility.

EU Entry/Exit System (EES)

The Council will be very aware of the Dover Traffic Assessment Project (TAP) and the associated Brexit Operations Across Kent, otherwise known as Operation Brock. These are measures put in place to deal with HGV traffic when Port operations have been disrupted, for example as a result of delays to channel crossings. The aim is to regulate the flow of HGVs into Dover along the A20 and M20 to ease congestion and allow residents and other users of the strategic road network to access Dover and go about their business.

The measures include left hand lane only use of the A20 by HGVs, queuing on the A20, contraflows on the M20, separation of traffic between Euro Tunnel and the Port, and the use of Manston Airport as a temporary lorry park.

TAP and Operation Brock are emergency measures to keep non-freight traffic moving and allow HGVs and their drivers to be safely located whilst the problems causing issues at the Port are dealt with, and until such time as crossings and travel return to normal. However, events in the past 12 months have demonstrated that significant disruption can still occur, particularly at times of prolonged delays. This results in an economic cost in terms of time lost by both freight business and other road users, and also a social cost given the number of lorry drivers held for long periods on motorway and trunk road verges with no welfare facilities.

The Harbour Board have been looking at more permanent solutions. However, the pending introduction of the EU Entry/Exit System (EES) is a further driver to pursue this goal. EES is a large-scale IT system that is being implemented as part of the European Union’s ‘Smart Borders Package’, and is due to launch in May 2023. It will enable automatic monitoring of border crossings by ‘third-country nationals’ into and out of the EU. This includes UK nationals in addition to all members of non-EU states outside the Schengen Area.

The system will register a person’s name, type of travel document, biometric data (fingerprints and captured facial images) and the date and place of entry and exit, and will fully replace the system of manually stamping passports. The Port of Dover has undertaken an assessment of the impacts of EES and has concluded it is very likely to have a profound effect on its operations if undertaken within the bounds of the Port itself. In a worst case scenario this would include excessive queues outside the Port for up to 365 days per year, necessitating the permanent operation of TAP and Operation Brock.

The provision of an appropriately located Inland Terminal facility would help to alleviate pressure on the Port and A20 given it would allow certain checks to be undertaken prior to entry to the main Port facility, speeding up operations whilst also removing large numbers of HGVs off the road and allowing drivers to rest and use welfare facilities.

Facilities/Welfare

An Inland Terminal facility would allow provision of significant improvements to HGV driver facilities in the District. This would enable the Port of Dover to contribute toward the wider government objective of improving conditions for HGV drivers and logistics workers more generally.

The Government’s Road Freight Supply Chain Transport Committee¹ noted the difficulties the sector has had with recruitment and retention of staff, both of which contributed to the wider supply chain shocks experienced since the start of the pandemic. The committee heard evidence that one of the key reasons drivers do not stay in the sector is the lack of high-quality rest facilities, especially on key road freight routes.

Therefore improving the working conditions of HGV drivers is an important element of both retaining staff and encouraging others to choose transport logistics as a career.

This issue is also raised in the Department for Transport's publication "Future of Freight: a long-term plan" (June 2022)² which includes 'People and Skills' as one of its priority areas. One strategic goal is to ensure "*the freight and logistics sector will be seen as an industry of choice for a diverse group of talented and skilled people at all stages of their career and will have the people and skills that it needs to thrive*". Improving general working conditions through the provision of better facilities for drivers will be an important part of the wider strategy to improve the UK's freight and logistics sector.

Sustainability

The Inland Terminal would also be an important element of The Harbour Board plans to decarbonise Port of Dover activity and respond to wider changes in logistics such as the predicted increase in electric vehicles. This is explored more generally later in this representation, but the Inland Terminal would provide opportunities for on-site microgeneration of power and opportunities for electric vehicles to recharge where necessary before proceeding to the port.

Co-location of Inland Terminal and Overnight Lorry Park

An overnight lorry park and the Inland Terminal facility share a common set of site search criteria. They both require a large, level site which can be appropriately accessed from the Strategic Highway Network without causing disruption for other road users. They should also be located in close proximity to the Port, provide opportunities for landscaping to limit visual impact, be able to deliver biodiversity net gains and be located an appropriate distance from sensitive receptors such as residential properties.

There is a need to deliver the Inland Terminal and overnight Lorry Parking in Dover, but the very specific site criteria noted above reduces the amount of suitable sites in the District. The Local Plan should therefore seek to co-locate these facilities in order to increase the chances of delivery of both pieces of important infrastructure.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Recommended Policy

The Harbour Board proposes amendments to Policy TI4 so that it includes an area of search for the co-joined Inland Terminal and Lorry Park.

The most appropriate location for an Inland Terminal would be to the east of the Roundhill Tunnels. This would ensure the facility is located wholly within Dover District and reduces the potential for conflict with Eurotunnel traffic and operations. It would also allow The Harbour Board to manage Port traffic more efficiently (through use of traffic cameras etc).

Land within the Kent Downs Area of Outstanding Natural Beauty (AONB) should not be excluded from the Area of Search. The NPPF provides a high degree of protection against inappropriate development in AONBs. Paragraph 177 notes applications for major development (such as an Inland Terminal/Lorry Park) should only be allowed in "*exceptional circumstances*" and where it can be demonstrated that "*the development is in the public interest*".

The need for the Inland Terminal within the area of search suggested by The Harbour Board is significant and could meet these tests, which set a high bar for development proposals. This should be tested at Planning Application stage rather than excluded by Local Plan Policy.

The Harbour Board is therefore proposing an area of search along the A20 corridor, east of the Roundhill Tunnels.

An amended criteria-based policy should then be applied to potential development sites which come forward. The following amended Policy text is recommended:

TI4 – Inland Terminal and Overnight Lorry Parking Facilities

Inland Terminal Facilities to serve the Port of Dover to include overnight lorry parking facilities will be supported, subject to other policies in the Local Plan, within the following areas of search:

- *A20 corridor east of the Roundhill Tunnels*
- *A2/M2 Corridor*

Development will be subject to the following criteria:

- 1 *The site must be accessed from the Strategic Road Network (A20);*
- 2 *Applications must be supported by a Landscape and Visual Impact Assessment which informs the site layout, capacity and mitigation requirements;*
- 3 *A comprehensive landscape scheme should be provided to conserve and enhance the AONB and/or its setting;*
- 4 *Proposals for the mitigation of noise and air quality impacts from lorry movements and any associated commercial, welfare and support services will need to be provided as part of any application;*
- 5 *A lighting strategy must be submitted with any application and suitable mitigation will be required to deal with artificial lighting, to restrict the impact of the development on neighbouring residential properties or vulnerable uses;*

	<p>6 Adequate space for access, sight lines, turning and manoeuvring must be provided in addition to the required parking spaces</p> <p>The inclusion of a Policy which seeks to deliver inland terminal facilities will ensure Dover District Council retains control over the provision and location of these facilities.</p> <p><i>Summary</i></p> <p>The NPPF sets out that the purpose of the planning system is to contribute to the achievement of sustainable development. Achieving sustainable development includes an economic objective – to help build a strong responsive competitive economy. Local planning policies and decisions are expected to help create the conditions in which businesses can invest, expand and adapt.</p> <p>The NPPF makes clear that planning policies and decisions should recognise and address the specific locational requirements of different sectors and that planning policies should also provide for large scale transport facilities, located in areas of need, taking into account any local shortages.</p> <p>The 'Future of Freight' document notes that <i>"In 2021, the Department for Transport made a Written Ministerial Statement with the Department for Levelling Up, Housing and Communities, which made clear that in preparing local plans and deciding planning applications, the specific locational requirements of different industrial sectors should be recognised and addressed by local planning authorities."</i></p> <p>The Inland Terminal will be needed by Dover Harbour Board during the life of the plan. It is a key piece of infrastructure required to support The Port of Dover and its continued substantial contribution to the local and national economy. There is a need to provide significantly improved driver welfare facilities as part of the wider government strategy to create attractive working conditions within the transport and logistics sector. Further, there is an identified local need for a facility to take HGVs off local roads.</p> <p>Delivery of a site that can provide a co-located facility would represent a positively prepared, justified and effective strategy consistent with national policy. The plan would be unsound without these proposed amendments to the policy.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	The Port of Dover is a significant stakeholder within Dover District. Matters relating to its effective operation have a direct impact on the wider district with implications to the national economy. Therefore it would benefit the Inspector to have Dover Harbour Board present at the examination in public.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SP12 uses as part of the evidence base Transport for the South-East Transportation Strategy for the South East 2020 report which acknowledges bus services have come under significant pressure in rural areas limiting public transport service provision and increasing car dependency. The report recommends government funding to protect services to vulnerable populations and enhance socially necessary bus services in rural areas.</p> <p>In 2022/23 KCC transport authority budget and service provider cuts have radically reduced the rural bus network in Shepherdswell, Coldred, Elvington, Eythorne as well as other surrounding villages, leaving vulnerable parishioners isolated and unable to access key services. Currently Elvington and Eythorne resident main access to public transport is through Shepherdswell Train Station involving a 2 mile walk along an unlit rural road without pavements representing a significant road safety concern. Shepherdswell residents seeking employment in the Eythorne trading estate face a similar dilemma.</p> <p>SP12 states that consultation with Network Rail will seek to increase rail service frequency from hourly to every 30 minutes from Shepherdswell Station however disabled access and first and last mile improvements (car parking, cycling parking, pedestrian access improvements) should be implemented. Additional community run for hire bus services should be made available to improve the availability of public bus services to Shepherdswell, Coldred Elvington and Eythorne. SP12 does not address required future funding to support improvement of public transportation services to Shepherdswell and Coldred, Elvington and Eythorne or surrounding villages so the feasibility of implementing these requirements is in question.</p> <p>The Dover Local Plan SAP36 and SAP37 has proposed 70 new houses are built in Shepherdswell and SAP 51 Coldred 5 new houses: SAP36 access to public transportation involves pedestrian or cyclist travel to Shepherdswell train station along largely unlit roads without pavements a public road safety concern. SAP37 transport statement specifies that the development must account for the cumulative impact of all developments allocated in this Plan on common road links. The Dover Local Plan for Eythorne and Elvington, SAP 28, 29 and 30 proposes 355 new houses (where public transportation services were withdrawn in Sept 2022).</p> <p>If all developments were to move ahead Shepherdswell will be the nearest centre to access train services and the main route by car to the A2 road network. SAP 36,37, 28, 29 and 30 will place significant pressure on Shepherdswell local transportation routes & amenities however there is no material consideration to address funding and improvement of services in the Dover Local Plan or SP12. Additionally there are no substantive measures to ensure a variety of transportation alternatives required within the Dover Local Plan (ref: Transportation Plan Section 29 T11 - Sustainable Transport and Travel page 301).</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	To implement the Dover Local Plan critical public transportation support gaps must be addressed and appropriate funding for infra-structure improvements allocated.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Dear Sir/Madam, Dover District Council Local Plan Publication Stage (Regulation 19) Consultation Comments in relation to Policy T14 Strutt and Parker's planning team has been instructed by HW Snape and son to make representations to the Regulation 19 Dover District Council Local Plan consultation. Our clients are farmers in the District with land holdings located to the west of Dover town. Our clients are aware that the Regulation 19 Stage Consultation is seeking comment on whether the Plan is 'Sound' in planning terms, meaning that it has been positively prepared, is justified, effective and consistent with national policy. We are instructed to respond to the consultation

in relation to Draft Policy T14 in relation to two matters; firstly the soundness of the policy as written; and secondly as to how our clients could facility its delivery during the plan period.

Draft Policy T14 – Overnight Lorry Parking Facilities

Soundness

Our clients have noted Draft Policy T14 – Overnight Lorry Parking Facilities with interest given their own experiences with HGV movements associated with the Port of Dover. There is no doubt that poorly parked HGVs causes problems in and around Dover. This issues worsens considerably when ferry crossings are delayed or cancelled (as has happened numerous times in the past 12 months). Problems with HGVs generally exacerbates when Operation Stack is implemented with HGVs backed up out of the town along all major routes into Dover.

The supporting text for the Policy notes at Paragraph 10.31 that “*KCC surveys of overnight lorry parking have determined that the Dover area and A2/M2 corridor has significant numbers of HGVs parked inappropriately overnight, and that there are local shortages in parking provision to address this.*” Our clients are concerned that the A20 has not been specifically referenced in this work.

Our clients land interests are to the west of Dover predominantly adjacent to and accessed by the A20 which also suffers from the same problems identified by Kent County Council surveys of the A2/M2 corridor. An appropriate site to deliver facilities which could offer HGVs a place to park overnight, or indeed to provide additional welfare for drivers as they approach Dover, should also be considered along the A20 corridor.

Our clients consider that Policy T14 (a) should therefore be amended as follows in order to make it properly effective:

*“The site must be accessed from the Strategic Road Network (A2/M2 corridor or **A20**). **Sites along the A2/M2 corridor should also be complimentary to the A2 Improvements.***

The A20 passes through the Kent Downs Area of Outstanding Natural Beauty (AONB) and our clients support policies which seek to protect its special character and landscape value. However, the problems associated with HGV movements along the A20 corridor are acute and have wider impacts than just within the boundaries of Dover District. The national and international news stories earlier this year in respect of HGV queues into the port, for example, resulted in significant reputational damage for Dover.

Protection is offered to the AONB by way of the National Planning Policy Framework (NPPF) which states at Paragraph 177 that applications for major development should only be allowed in “*exceptional circumstances*” and where it can be demonstrated that “*the development is in the public interest*”. It is possible that the development of a facility for HGV parking could meet these tests provided a site could be delivered together with all appropriate measures to address and mitigate potential harm to the landscape.

Our clients consider that the NPPF provides significant protection against harmful development in the AONB, and therefore the policy should not specifically exclude such sites from consideration.

Our clients consider that Policy T14 (b) should therefore be amended as follows in order for it to align with National Policy related to major developments in the AONB:

Planning applications must be supported by a Landscape and Visual Impact Assessment which in turn should support the proposed layout of the site and its capacity. Development with the AONB will be supported where it complies with the provisions of the NPPF relating to major development in the AONB.

Our clients consider that the above proposed changes to Policy T14 are necessary in order to make it effective, justified and consistent with National Policy.

Delivery

As noted above, our clients have first-hand experience of the problems associated with HGV movements to and from the Port of Dover. They support the delivery of facilities which would help to alleviate these problems, subject to the amendments proposed in this representation.

Our clients feel that they could contribute directly to delivering such a facility given their land ownership interests along the A20 corridor. Our client owns land within the area shown in the image attached:

The land is located immediately adjacent to the A20 and, significantly, a short distance from the Court Wood Interchange. The location adjacent to the interchange means the Site is uniquely able to provide access to both east and westbound HGVs using the A20 via upgrades of the existing junction rather than the provision of new highways infrastructure. This would therefore significantly reduce the costs of developing a facility in this location.

Furthermore, the site itself is relatively flat with screening provided by existing trees on its southern and western boundaries. The site topography provides opportunities for further landscaping which could appropriately screen the facility from longer range views. The site is not in close proximity with receptors who would be sensitive to noise impacts.

	<p>Our clients are keen to put this site forward into the local plan process to help facilitate delivery of this important piece of infrastructure. Our client would be keen to take part in the oral examination of the plan if it would help the Inspector consider the deliverability of the facility.</p> <p>Yours sincerely, Paul Carnell BA (Hons) MA MRTPI Associate Director</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><u>Highways and Transportation</u>: The A2 corridor is a key consideration within the proposed growth aspirations, it is important that this is reflected in policy, however this could equally form part of a future Transport Strategy for the district, which is absent from this round of consultation. Given the wide-ranging traffic challenges within the district, there would be merit in encompassing highway and transportation matters into a single supporting document. As the Dover Access Project is potentially several years away from being completed/clarified in full, it is accepted that mitigation proposals in relation to the A2 corridor will need to be suitably fluid in nature.</p> <p>Modelling forecasts indicate that infrastructure improvements are required on the A256 corridor. Given that this road corridor forms part of the Major Road Network, it would be prudent to consider policy to safeguard future upgrading opportunities on this road corridor.</p> <p>The policy should also specifically allow for the provision and maintenance of bus shelters under the heading of Bus Infrastructure.</p> <p><u>PRoW</u>: The County Council requests that this policy includes consideration for how walking and cycling opportunities, including the PRoW network, can be improved and how this investment in Active Travel will complement the road, rail and bus networks. The County Council is in discussion with National Highways for designated funding and funding through section 106 agreements should also be explored.</p>

2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We note that SP12 formed Strategic Policy 14 of the Regulation 18 response. As you will be aware, our Regulation 18 response noted that there was a scheme waiting to be implemented at the Whitfield roundabout arising from Condition 10 attached to the application DOV/10/01010 which has a trigger of 800 dwellings to be implemented, but it is unlikely to be reached for some time. Given the nature of development surrounding the Urban Extension, we had taken the approach of requiring all planning applications coming forward in this area, or which will have an impact on the Duke of York roundabout and Whitfield roundabout to consider a cumulative impact assessment in the Transport Assessment.</p> <p>This trigger is yet to be reached and therefore mitigation has therefore not been delivered when it was originally envisaged. Considering the amount of lapsed time, we subsequently modelled the mitigation scheme and found that it does not create any meaningful capacity at the junction to mitigate impacts by the consented schemes and advised DDC that they could not support entering into a S278 agreement. It has therefore been necessary to identify an alternative scheme which could mitigate this development and Local Plan growth.</p> <p>The mitigation schemes at both roundabouts have now been agreed and are outlined in detail in the accompanying Infrastructure Delivery Plan and the Infrastructure Delivery Schedule.</p> <p>As a result of the above, we recognise that paragraph 233 of the Policy supporting text notes that the A2 Whitfield roundabout and the A2 Duke of York roundabout require upgrading to enable Local Plan growth to come forward. The supporting text also notes that DDC has worked with us and KCC to identify improvement schemes for these junctions which would mitigate Local Plan growth and that these schemes would provide interim improvements in advance of any RIS scheme being brought forward.</p> <p>The policy now notes that we will work with DDC and KCC to deliver transport improvements to mitigate the impacts of development or remove impediment to future growth. Key strategic transport schemes are stated as being:</p> <ul style="list-style-type: none"> • A2 Dover Access – states that promoters of sites impacted by improvements to the A2 will need to take account of emerging proposals by us or other licensed strategic highway authority appointed by the Secretary of State under the Infrastructure Act 2015 • Strategic Highway Improvements / Mitigation at A2 junctions: <ul style="list-style-type: none"> - Whitfield roundabout - Duke of York roundabout - A257 / A256 junction - A258 / A256 junction <p>We welcome that the policy identifies that that these improvements are required as a result of the cumulative impact from a number of allocations in this Plan as identified in the transport modelling and it will therefore be expected that proportionate financial contributions will be made from developments which impact upon the junctions. We support the fact that readers are directed to the Infrastructure Delivery Plan for further information.</p>

	<p>Representation: National Highways are content with Policy SP12 and its supporting text, subject to the following additional representations:</p> <p>We note that the policy states that further guidance will be produced which sets out how the proportionate contributions towards these junction improvements will be calculated, which is also referenced in the Infrastructure Delivery Plan. We require that we are consulted on this guidance note at the earliest opportunity to ensure that the guidance is in place for when development starts to come forward and the opportunity to gain developer contributions for essential infrastructure is not missed.</p> <p>Representation: DDC to consult with us on the proportional financial development contributions guidance note at the earliest opportunity.</p> <p>As per the SoCG, further work has been agreed to be required to support the mitigation schemes at the A2 Whitfield roundabout and the A2 Duke of York roundabout. It is noted that a Stage 1 Road Safety Audit is required to support both of these mitigation schemes, and we would suggest reference is made to this requirement in SP12. We would also suggest that the requirement for third party land to be identified to support the A2 Duke of York roundabout scheme is included. These changes should also be made to the relevant sections of the Infrastructure Delivery Plan.</p> <p>Representation: Policy SP12 to reference the need for a Stage 1 Safety Audit to be undertaken to support the mitigation schemes at the A2 Whitfield roundabout and the A2 Duke of York roundabout. SP12 should also reference the requirement for third party land to be identified to support the A2 Duke of York roundabout scheme is included. These changes should also be made to the relevant sections of the Infrastructure Delivery Plan.</p> <p><i>(Note - This is an extract of the Full National Highways representation which can be located at SDLP1152)</i></p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Policy SP12 to reference the need for a Stage 1 Safety Audit to be undertaken to support the mitigation schemes at the A2 Whitfield roundabout and the A2 Duke of York roundabout. SP12 should also reference the requirement for third party land to be identified to support the A2 Duke of York roundabout scheme is included. These changes should also be made to the relevant sections of the Infrastructure Delivery Plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP12
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Historic England understands the unique strategic transport infrastructure challenges that face the district and in particular Dover town and also the way that infrastructure upgrades could benefit heritage, e.g. by enhancing permeability between Dover town centre and the waterfront. However, strategic infrastructure work also has the potential to cause harm to the historic environment and we would expect any proposals to demonstrate that the harm to heritage significance has been avoided or minimised, and where possible heritage significance is enhanced. We note that in some cases, strategic infrastructure upgrades have the greatest potential to impact non-designated archaeological remains, for example along the A2 corridor, and we would encourage the Council and their partners to seek early engagement with the Council's own archaeological advisor as proposals come forward.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We have identified that only policy details of SAP1 and SAP2 suggest that developers of these allocations will be required to fund the Local Plan mitigation schemes at the A2 Whitfield roundabout and the A2 Duke of York roundabout. However, when reviewing the Infrastructure Delivery Plan, Table 1 sets out proportionate contributions (per dwelling rate £) for the A2 Whitfield roundabout and the A2 Duke of York roundabout mitigation schemes in relation to the wider Dover and Deal area.</p> <p>We note that the total contributions expected from the developer obligations cannot be confirmed at this stage and that the expected funding is an indicative starting point only. The Infrastructure Delivery Plan notes that DDC, KCC and National Highways are working together to develop a delivery plan for the implementation of the mitigation measures and any further schemes which are required to mitigate the Local Plan growth. This is acknowledged in the SoCG which states that proportionality assessment for contributions from development, the identification of forward funding and the delivery mechanism is still required to be agreed.</p> <p>As stated above, it is understood that a more detailed guidance note on developer contributions will be produced in liaison with the delivery partners in due course. We would reiterate the request to be consulted on this document at the earliest opportunity.</p> <p>Notwithstanding the above, it is clear that Local Plan allocations over and above SAP1 and SAP2 will be required to contribute to the mitigation schemes at these two junctions and this should be referenced in the Local Plan. We would suggest that SP12 be updated to note that developments in "certain zones" (as per Infrastructure Delivery Schedule wording) will be subject to proportionate contributions to the A2 Whitfield roundabout and the A2 Duke of York roundabout Local Plan mitigation schemes in line with the upcoming developer contribution guidance note. However, additional sites can only be added and contribute where the capacity of the mitigations can accommodate them. It will be for DDC to monitor take up of capacity, and as necessary, to start to require additional mitigation from developments where capacity will be exceeded.</p> <p>Representation: SP12 should be updated to note that developments in "certain zones" (as per Infrastructure Delivery Schedule wording) will be subject to proportionate contributions to the A2 Whitfield roundabout and the A2 Duke of York roundabout Local Plan mitigation schemes in line with the upcoming developer contribution guidance note. It should also note that if and when LP mitigation capacity is used up, developments will then need to bring forward further mitigations.</p> <p>We would also request clarification from DDC on whether the mitigation schemes at the A2 Whitfield roundabout and the A2 Duke of York roundabout will be fully funded by developers, or whether public monies will be sought alongside developer contributions (for example from the Levelling up Fund)</p>

	<p>Representation: DDC to provide clarification on whether the mitigation schemes at the A2 Whitfield roundabout and the A2 Duke of York roundabout will be fully funded by developers, or whether public monies will be sought alongside developer contributions.</p> <p>(Note - This is an extract of the Full National Highways representation which can be located at SDLP1152)</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? <p>2 - Do you consider this part of the Plan sound?</p>	Yes
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	Yes

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Yes</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>We consider that the plan is sound, but object to elements of Policy SAP22 - Land at Archers Low Farm, St Georges Road Sandwich (SAN023) and Policy SP3 - Housing Growth. These objections are set out in the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245).</p> <p>1 Introduction</p> <p>1.1 Purpose of this Representation</p> <p>1.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited and Walker Residential Limited in response to the Dover District Council 'DDC' Local Plan (Regulation 19) consultation which runs until 9th December 2022.</p> <p>1.1.2 We understand that DDC is in the process of preparing a new Local Plan to set out a strategy for development for the period to 2040 and that the Council are presently seeking comments on the pre-submission Plan prior to its submission for examination in early 2023.</p> <p>1.1.3 Our client controls 'Land at Archers Low Farm, Sandown Road, St Georges Road, Sandwich' (hereafter referred to as 'Land at Archers Low' or 'the Site') and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.</p> <p>1.1.4 It is highlighted that as part of the Regulation 18 Local Plan, the Site was allocated under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' for approximately 40 dwellings (reference SAN023).</p> <p>1.1.5 The purpose of the representation is to support the allocation of 'Land at Archers Low' for a greater quantum of development and provide comment on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan, but to object to the indicative capacity set out in the policy.</p> <p>1.1.6 In this regard, we remain wholly supportive of the principle of the residential allocation of the Site and agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client's Site can be made – and object (solely) to this element of the policy.</p> <p>1.1.7 Accordingly, we say that Land at Archers Low can further assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.</p> <p>1.1.8 Based on the current national and local planning context, we consider the Site to be a highly suitable edge-of-settlement location to allocate land for housing to help meet the need for new homes in the district and its effective use should be appropriately maximised in accordance with national policy objectives.</p> <p>1.1.9 Further details regarding the Site and commentary on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan are set out in the following sections of this document.</p> <p>1.2 About Fernham Homes</p> <p>1.2.1 Fernham Homes Limited are a local award winning small and medium sized (SME) housebuilder, established in 1997 and has a strong track record of delivering high quality residential and mixed use developments in Kent over the last 25 years. This has been acknowledged through the receipt of nationally recognised awards, including the gold Evening Standard Awards best family home 2022 and 2019 bronze WhatHouse Best Small Housebuilder.</p> <p>1.2.2 SME housebuilders are recognised in the National Planning Policy Framework ('NPPF') at paragraph 69 as making an important contribution to meeting the housing requirements of an area, and being able to build out relatively quickly. Similarly, this has also been recognised by the Planning Inspectorate . This is particularly the case with Fernham Homes, which is privately owned with access to significant resources. This provides significantly more flexibility than national and other regional housebuilders, and allows Fernham Homes to deliver housing rapidly and to a high quality, beautiful and sustainable standard (para 126 of the NPPF).</p> <p>1.2.3 Fernham Homes Limited has embarked on a sustained period of growth, with an adopted and robust business plan to deliver around 300 houses per year in five years time.</p> <p>1.2.4 A key element of Fernham Homes' operations is to take a very careful approach to site selection: a huge amount of due diligence is undertaken as part of this, and therefore Fernham Homes Limited only invests in those sites which meet the NPPF requirements of being available, suitable, and deliverable. As set out below land at Archers Low Farm, Sandwich ('SAP22') is firmly considered to be such a site.</p>

1.2.5 Similarly, a key feature of Fernham Homes' approach is to work positively and proactively with local planning authorities (LPAs), both during the preparation of local plans and at planning application stage. Fernham Homes Limited are fully committed to engaging with Dover District Council in the preparation of its Local Plan, and firmly subscribe to the national policy approach set out in paragraphs 15 and 16 c) of the NPPF that "the planning system should be genuinely plan-led" and should be shaped by early, proportionate and effective engagement between LPAs and others, including businesses and developers. Accordingly, Fernham Homes Limited would welcome the opportunity to discuss the matters contained in this representation, including the availability, suitability, deliverability and capacity of land at Archers Low Farm, Sandwich ('SAP22') directly with Dover District Council members and officers, ahead of the submission of the Local Plan for examination.

1.3 Representation Structure

1.3.1 The representation structure is outlined below for ease of reference:

Chapter 2 (Consultation Background) – Sets out the context of the Dover District new Local Plan preparation, relevant national planning requirements and a summary of our current position.

Please refer to paragraph 52 of appeal decisions: APP/M2270/W/21/3283924 and APP/M2270/W/21/3288645

Chapter 3 (Legal Tests of Soundness) - Assessing whether the plan is sound, having regard to the tests of soundness outlined by paragraph 35 of the NPPF.

Chapter 4 (Duty to Co-operate) - Assessing whether the plan is sound, having regard to the duty to cooperate outlined by paragraph 24 of the NPPF.

Chapter 5 (Housing Need) - Consideration of market and affordable housing need and assessment of proposed housing allocations and supply sources.

Chapter 6 (Assessment of Suitability) - Re-introduces our client's Site and provides a summary of planning constraints and opportunities, including the quantum of development that could be accommodated, why the Site is suitable for development and why the principle of the draft allocation for residential development is both justified and consistent with the Council's strategy for growth in the district. It also sets out why we consider there is scope for a higher number of dwellings at the site. This consideration amounts to an objection to one element of the strategy – namely that those sites around the most sustainable settlements should be maximised.

Chapter 7 (Conclusion) - Summarises the key points raised throughout the representation and re-affirms our client's support for the principle of the Site's allocation and the principle of the proposed strategy ahead of the submission of the Plan for examination, and the objections in terms of capacity.

2 Dover District Council – Draft for Submission Local Plan (Regulation 19)

2.1 Consultation Background

2.1.1 DDC are required to prepare a new Local Plan, as the current suite of development plan documents were adopted in 2002, 2010 and 2015. The Core Strategy (CS) (adopted 2010) in particular has a time horizon up to 2026 and requires updating.

2.1.2 The new Local Plan will set out the vision, strategic objectives and overarching development strategy for the growth of the District over the period to 2040. It provides the planning policy framework to guide the future development of the area, addressing needs and opportunities for housing, the economy, community facilities and infrastructure, as well as the basis for conserving and enhancing the natural and historic environments, mitigating and adapting to climate change, and achieving well designed places.

2.1.3 For the avoidance of doubt, the new Local Plan, on adoption, will replace the CS 2010 and the Land Allocations Plan 2015, as well as saved policies from the 2002 Local Plan.

2.1.4 DDC's Regulation 19 Local Plan outlines the key issues that need to be addressed between now and 2040. In particular, the Plan sets out the following key planning issues for the District:

- Ensuring that new development in the District contributes to the mitigation of, and adaptation to, climate change.
- Supporting the Council to deliver its intention to be a carbon neutral district by 2050.
- Managing flood risk and coastal change.
- Ensuring that a sufficient amount and variety of land is identified to deliver a continuous supply of housing across the Plan period and that the Council maintains a five-year housing land supply.
- Delivering growth in a way that focuses development in the least sensitive areas of the District in order to conserve and enhance the District's rich natural and historic environments.
- Supporting sustainable development in rural areas to enhance the vitality of rural communities.

- Working with partners to facilitate the delivery of the Whitfield Urban Expansion.
 - Ensuring a range of housing tenures, types and sizes are provided across the District to meet the needs of the local community and provide choice and flexibility in the housing market.
 - Promoting economic growth, tourism, and investment in the District's Town Centres in line with the Council's Economic Growth Strategy.
 - To address the impact of the COVID-19 pandemic.
 - Delivering strategic transport improvements, including upgrades to the Duke of York and Whitfield roundabouts to support the scale of housing and economic growth identified in the Plan.
 - Promoting sustainable transport initiatives to encourage a modal shift to more sustainable forms of transport like walking and cycling.
 - Ensuring that infrastructure is delivered, in the right place, at the right time, to meet the needs of the District and support the levels of development identified in the Local Plan.
 - Supporting the delivery of attractive, high-quality, design led developments and the creation of healthy, inclusive and safe communities, that are well served by good quality services and facilities to support people's lives.
 - Conserving and enhancing the District's rich and diverse natural landscape, including the five international sites within the district, the Kent Downs Area of Outstanding Natural Beauty (AONB), five Sites of Special Scientific Interest (SSSIs), two National Nature Reserves (NNRs), two stretches of Heritage Coasts and two Marine Conservation Zones.
 - Delivering a net gain in biodiversity in the District over the plan period.
 - To promote the conservation, restoration and where appropriate the enhancement of the District's heritage assets, in order to protect their significance and to ensure that they can be best appreciated and enjoyed by current and future generations.
- 2.1.5 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. This submission will comment on each of the above, highlighting where we believe any areas of concern lie or where modifications may be required.

2.2 DDC's Local Development Scheme

2.2.1 The District Council has a duty to review the policies contained within the development plan every five years. The 2014/2015 Authority Monitoring Report signalled the need to review key parts of the Council's adopted CS evidence base.

2.2.2 The Council's Local Development Scheme (LDS) first outlined the delivery timetable for the Local Plan Review (LPR) in the March 2017 publication. Since then, the LDS has been updated on an annual basis. The most recent September 2022 LDS summarises that following the preparation of the principal evidence base documents, the Local Plan Review Regulation 18 consultation took place for 8 weeks in January 2021. The Regulation 19 consultation was scheduled for 7 weeks during Q4 of 2022 and is the subject of this representation.

2.2.3 Moving forward, submission of the Plan is anticipated in Q1-2 2023 with the Examination in Public in Q3-4 2023. The new Local Plan is currently scheduled for adoption in 2024.

2.2.4 As planned, DDC are now undertaking the Regulation 19 Draft Local Plan Consultation, for which this submission is made

3 Legal Test of Soundness

3.1 Legislation and Guidance

3.1.1 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. It is a statutory requirement that every development plan document must be submitted for independent examination to assess when it is "sound", as well as whether other statutory requirements have been satisfied (s.20(5) of the 2004 Act). By s.19 of the 2004 Act, in preparing a development plan document a local planning authority must have regard to several matters including national policies and advice contained in guidance issued by the Secretary of State. Such guidance currently exists in the form of the NPPF and is summarised below. This states that Plans must be:

(a) Positively Prepared: based on a strategy which seeks to meet objectively assessed development and infrastructure requirements

3.1.2 This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The NPPF set out principles through which the Government expects sustainable development can be achieved.

(b) Justified: an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence

3.1.3 This sets out the requirement that the Local Plan should be based on a robust and credible evidence base involving:

I. Research/fact finding: the choices made in the plan are backed up by facts.

II. Evidence of participation of the local community and others having a stake in the area.

3.1.4 The Local Plan should demonstrate an appropriate strategy, taking into account reasonable alternatives and based on proportionate evidence. These alternatives should be realistic and subject to sustainability appraisal. The Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.

(c) Effective: deliverable over its period based on effective joint working on cross-boundary strategic priorities

3.1.5 This makes clear that the Local Plan should be deliverable, requiring evidence of:

- Sound infrastructure delivery planning;
- Having no regulatory or national planning barriers to delivery;
- Delivery partners who are signed up to it; and
- Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.
- The new Local Plan should be flexible and able to be monitored.

3.1.6 The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the Local Plan should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.

d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national policy.

3.1.7 This submission comments on each of the above in further detailing, highlighting areas of support and where modifications are required as appropriate.

3.2 Legal Compliance

3.2.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

3.2.2 In addition to the above, the NPPF states² that: "Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that:

- a) all plans should promote a sustainable pattern of development that seeks to: meet the development needs of their area; align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects;
- b) Strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:
 - (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or

Paragraph 11, NPPF 2021

(ii) Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole."

3.2.3 In addition, to the above, the NPPF states³ that Plans should:

- a) be prepared with the objective of contributing to the achievement of sustainable development;
- b) be prepared positively, in a way that is aspirational but deliverable;
- c) be shaped by early, proportionate and effective engagement between plan- makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;

- d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;
- e) be accessible through the use of digital tools to assist public involvement and policy presentation; and
- f) serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).

3.2.4 It is important to note that the NPPF4 requires strategic policies to set out an overall strategy for the pattern, scale, and design quality of places, and make sufficient provision for:

- a) housing (including affordable housing), employment, retail, leisure and other commercial development;
- b) infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat);
- c) community facilities (such as health, education and cultural infrastructure); and;
- d) conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation.

3.2.5 It is clear from the above, that any local plan should set out a comprehensive and cohesive approach to future development.

Paragraph 16, NPPF 2021

Paragraph 20, NPPF 2021

4 Duty to Co-Operate

4.1 Legal and NPPF Requirements

4.1.1 Section 33A of the Planning and Compulsory Purchase Act 2004 sets out a statutory 'Duty to Cooperate' (DtC) – i.e. a legal obligation - to all bodies as prescribed by Regulation 4 of the Town and Country Planning (Local Planning) England Regulations 2012 (the Regulations).

4.1.2 The duty requires DDC to cooperate with other persons to 'maximise the effectiveness' with which named activities are undertaken. Those activities include the preparation of development plan documents (such as this Local Plan document) and activities that support that activity 'so far as relating to a strategic matter'.

4.1.3 A strategic matter is defined by S33A(4) in summary as: (a) 'sustainable development or use of land that has or would have a significant impact on at least two planning areas' (a planning area in this case is the area of a borough or district council); and (b) 'sustainable development or use of land in a two tier area' (as this is) 'if the development or use (i) is a county matter, or (ii) has or would have a significant impact on a county matter'. County matters broadly relate to minerals and waste and associated developments as defined by Paragraph 1 of schedule 1 to the Town and Country Planning Act 1990 (as amended).

4.1.4 Section 33A (7) requires DDC (and persons subject to the DtC) to have regard to any guidance issued by the Secretary of State about how the duty is to be complied with. In that regard Paragraph ID 9-004-29140306 of the Government's Planning Practice Guidance (PPG) confirms amongst other things that the DtC is not a duty to agree (albeit that local planning authorities should make every effort to secure the necessary cooperation on strategic cross border matters before they submit local plans for examination).

4.1.5 The NPPF establishes that effective and on-going joint working is an integral part of the plan making process that will, amongst other things, determine whether development needs that cannot be met wholly within a plan can be met elsewhere. The NPPF goes on to state at paragraph 27 that in order to demonstrate effective and on-going joint working strategic policy making authorities should: "... prepare and maintain one or more statements of common ground documenting the cross-boundary matters being addressed".

4.1.6 In addition to the District's own housing pressures, part of the DtC involves considering whether neighbouring authorities' unmet housing need can be accommodated. It is worth highlighting that recent amendments to the London Plan have identified that the City's housing need has become increasingly more difficult to deliver and therefore areas outside London will be faced with having to absorb more of London's housing need. Consequently, DDC has a duty to explore whether it can accommodate some of this overspill of London's unmet need.

4.2 Assessment of DDC's discharging of the Duty to Co-operate

4.2.1 It is recognised that work to discharge the DtC remains ongoing by DDC and will continue prior to submission as part of the preparation of the Local Plan evidence base.

4.2.2 Notwithstanding the above, at this stage it is understood that DDC have engaged with the members of the East Kent Regeneration Board including neighbouring East Kent planning authorities, Kent County Council (KCC) and its subsidiary departments:

- Folkestone and Hythe District Council
- Canterbury City Council
- Thanet District Council
- KCC
 - KCC Highways & Transportation
 - KCC Minerals & Waste
 - KCC Heritage Conservation
 - KCC Flood & Water Management
 - KCC Natural Environment & Coast
 - KCC Infrastructure including Education

4.2.3 In February 2016, the Council adopted a Memorandum of Understanding (MOU) in respect of the DtC between the East Kent Regeneration Board members. A review of the MOU took place and was agreed in January 2021.

4.2.4 The East Kent MOU sets out the framework in which the authorities will work together on strategic issues and will actively engage. It forms the overarching framework and context within which Statements of Common Ground (SoCG) will be agreed between individual authorities.

4.2.5 Further engagement is also confirmed to have taken place between the following prescribed bodies and other relevant bodies:

- Environment Agency
- National Highways
- Historic England
- Natural England
- Network Rail
- NHS Kent and Medway Clinical Commissioning Group (CCG) – now known as Integrated Care Board (ICB) since July 2022
- Kent Downs AONB Unit
- Other infrastructure providers

4.2.6 Whilst work remains ongoing, at this stage it is understood that SoCGs have been agreed and signed between the following parties:

- DDC and Folkestone & Hythe District Council
- DDC and Canterbury City Council
- DDC and Thanet District Council
- DDC and Kent County Council
- Dover District Council and National Highways

4.2.7 As part of the DtC Evidence Base documents, DDC prepared a detailed DtC Statement (dated September 2022) which sets out a summary of the engagement that has taken place, firstly by organisation, and then by issue. Whilst the statement focuses on strategic issues and duty to co-operate bodies it also includes information relating to engagement on non-strategic issues and co-operation with other bodies that are not prescribed by the regulations. In addition, Appendices 1, 3 and 4 identify the main meetings and other correspondence that has taken place throughout the plan making process.

4.3 Summary

4.3.1 On account of the above and the documents published within the Council's Local Plan Evidence Base, we are satisfied that the Council as the strategic policy making authority has demonstrated effective and on-going joint working with neighbouring authorities, the county council, prescribed bodies and other relevant bodies. Further, we agree that DDC has prepared and maintained SoCG documenting the cross-boundary matters being addressed in accordance with the Framework and the DtC may be discharged by the Planning Inspector under Section 20(5) (c) of the Planning and Compulsory Purchase Act 2004.

4.3.2 Without prejudice to the above, should ongoing work by the Council result in significant changes in circumstances such that the signed SoCGs may be amended or withdrawn, our client reserves the right to alter their consultation response accordingly and be present at the examination of the Plan to discuss further.

5 Housing Need

5.1 Context

5.1.1 Paragraph 11 of the NPPF is explicit in its requirement for strategic policy-making authorities to promote a sustainable pattern of development that seeks to meet the need in full.

5.1.2 Paragraph 20 of the Framework is equally clear that strategic policies should set out an overall strategy for the pattern, scale and design quality of places. Policies should make sufficient provision for the development that is required as well as associated infrastructure, community facilities and should set out a strategy for the conservation and enhancement of the natural, built and historic environment.

5.1.3 Given this national planning context, the emerging Local Plan should provide a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic environment.

5.1.4 National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate.

5.1.5 In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.

5.1.6 Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.

5.2 DDC's Housing Need

5.2.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover District of 596 dwellings per annum. However, the affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total housing need of 10,998 dwellings for the Plan period to 2040. We understand that the Regulation 19 Local Plan seeks to meet this need in full and in addition to the minimum figures, DDC have set an appropriate contingency buffer of 926 dwellings of the Plan period, equating to 8.4% of the total Plan period figure.

5.2.2 For context, the current adopted CS requirement is 700 dwellings per annum. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.

5.2.3 For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate sufficient land to accommodate a minimum of 6,642 new homes over the remaining plan period to 2040. It is understood that this will be derived from the following sources:

- Whitfield Urban Expansion Allocation: 2,200 dwellings
- Local Plan Allocations (excluding Whitfield): 3,392 dwellings
- Windfall Allowance (70 a year from year 4): 1,050 dwellings

5.2.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target. Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs AONB, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, meeting Dover's housing needs inevitably will require the release of significant greenfield land.

5.2.5 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Sandwich, represent the most sustainable and reliable sources of growth for the Plan period, consistent with the overarching strategic objectives of draft policy SP3 within the emerging Plan. Such sites are best placed to deliver the significant number of new homes that are required and are most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the District as well as further balancing the role of strategic-scale development at Whitfield within the emerging Plan's proposed growth pattern.

6 Site Specific Assessment

6.1 Overview

6.1.1 The previous chapters of this representation (Chapter 3-5) outline our client's position relating to the soundness of the Plan in which our client is confirmed to be supportive in principle of the Local Plan as a sound strategy for the growth of the district to 2040. It is clear that Sandwich must continue to form a principal location for focusing sustainable housing delivery in Dover district and will assist in ensuring an appropriate balance of sites are identified, capable of supporting the strategic role of Whitfield within the forthcoming Plan Period.

6.1.2 As introduced in the preceding sections, Fernham Homes Limited and Walker Residential Limited control 'Land at Archers Low, Sandwich' and are continuing to promote the residential allocation of the Site. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.

6.1.3 As aforementioned, the Site was allocated in the Regulation 18 Local Plan for approximately 40 dwellings under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' (reference SAN023).

6.1.4 Notwithstanding our client's support of the draft allocation within the Regulation 19 Plan in principle, we suggest that the policy text be re-visited prior to submission, to allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential. It is submitted that the SAP22 policy wording should be amended to more accurately reflect the capability of the Site to accommodate approximately 40 - 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.

6.1.5 Fernham Homes Limited and Walker Residential Limited are fully committed to the delivery of the Site within the next five years, and subject to a grant of planning permission in Spring 2023 – please see below – anticipate starting developing on site in 2023. Indeed, for the avoidance of doubt it is confirmed that Fernham Homes Limited and Walker Residential Limited have previously submitted a planning application ('ref: 22/00274') for the residential development of the Site for 44no. dwellings with associated access, parking, open space, landscaping, drainage, and infrastructure. (Amended plans and details).

6.1.6 Following a positive recommendation to grant planning permission by Officers at the DDC Planning Committee, the application was refused following consideration at Planning Committee on 31st March 2022. The application is now the subject of an appeal with a date confirmed for a two day hearing on the 17th - 18th January 2023. The site layout is shown in Figure 6.2.

6.1.7 For the avoidance of doubt, our client's support of the proposed allocation, subject to their objection to the capacity and considerations that it can accommodate an increased capacity of approximately 40 – 45 dwellings, is made without prejudice to the ongoing appeal. Should the appeal be allowed, this would realise the delivery of the residential allocation in accordance with the policy requirement (albeit more dwellings), which is consistent in its key elements with the submitted appeal scheme.

6.2 Site and Surroundings

6.2.1 The Site is situated to the southeast of St. George's Road and southwest of Sandown Road, on the southern edge of Sandwich.

6.2.2 The Site is a predominately undeveloped parcel of land totalling approximately 2.37 hectares, with tall and dense hedge and tree planting around the perimeter of the Site and an existing agricultural access point off St Georges Road to the north-west of the Site

6.2.3 The Site comprises a level enclosed field mainly formed of uniform improved grassland bounded on all sides by trees mixed in age, species, condition and character. There are also semi-derelict agricultural buildings in the southwest corner.

Figure 6.1: Site Location Plan (Drawing no. 29923A/01)

6.2.4 The Site comprises a level enclosed field mainly formed of grassland bounded on all sides by trees mixed in age, species, condition and character. There are also semi derelict agricultural buildings in the southwest corner.

6.2.5 The Site is bounded by existing residential development along St Georges Road to the north and west, undeveloped land to the east and south, Sandown Road to the north-east and a small area of residential development fronting Sandown Road further to the east of the Site.

6.2.6 The Site enjoys access to a number of local facilities and services which are within a reasonable walking distance, including schools, local shops, healthcare, employment, and public transport links. The Sir Roger Manwood Secondary School, Sandwich railway station and the historic town centre (including convenience stores) are all located within 800m of the Site. Sandwich Junior School and the local supermarket are located just over 800m from the Site. Larger shops and supermarkets are available in the local area, including Westwood Cross 8 miles to the north and Deal, 6 miles to the south. In terms of planning constraints, a Tree Preservation Order (TPO) protects trees on the northwest boundary of the Site and the belt of trees bounding the northeast and southeast.

6.3 Development Capacity

6.3.1 For the purposes of this representation, Land at Archers Low Farm, Sandwich is submitted with capacity for approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), as part of a high- quality, landscape-led residential scheme capable of delivery early in the Plan period.

6.3.2 Significant work has already been advanced by the project team as part of the submitted planning application and the subsequent appeal in which the proposed development has been informed following a thorough analysis of the Site opportunities, constraints and surroundings. The key design principles have been to create an attractive, permeable and legible layout set with a strong landscape framework, utilising existing landscape features, to accommodate a mixture of high-quality and attractive homes, of a scale and design that reflect its setting and surroundings.

6.3.3 In summary the vision for the Site is to create a high quality residential development which includes:

Circa 40 – 45 no. residential dwellings, comprising 30% Affordable Housing and a mixture of 2, 3 and 4 bedroom properties.

A series of open spaces that perform multiple functions including informal space, a local area of play (LAP), ecological mitigation areas and incorporation of native and wildflower meadow planting.

Retention of trees on the northern and southern boundaries and the provision of new woodland planting. This will include proactive management of the retained and proposed woodland belts to encourage structural and species diversity and improve the overall health and longevity of these assets. The provision of significant biodiversity net gain is envisaged, and has been demonstrated can be delivered through the application and appeal.

Low key principle vehicular access point onto Sandown Road through landscaped entrance with trees and vegetation maintained, introduction of wildflower planting.

Footpath connectivity onto St Georges Road.

Tree lined connecting avenue creating strong legibility and navigation throughout the layout.

Figure 6.2: Proposed Site Plan as amended in December 2021 (Produced by Clague Architects – Drawing no. 29923A/11)

6.3.4 For context, at the time of determination of application ref: '22/00274', full planning permission was sought for the erection of 44 dwellings, together with associated access to Sandown Road, a pedestrian crossing point on St Georges Road, parking, open space, landscaping, drainage, and infrastructure works.

6.3.5 It is highlighted that draft policy PM1 seeks to provide a density typically between 30-50 net dwellings per hectare (dph). In this respect, it is highlighted that at 45 dwellings, the Site would provide a density of approximately 22.5 dph. Whilst it is acknowledged that lower density development may be more appropriate in edge of settlement locations, this demonstrates that even at a capacity 45 dwellings, the density is relatively low. Furthermore, as part of the previous application 22/00274, DDC confirmed at paragraph 2.23 of the Committee Report that subject to a detailed assessment of visual impacts, a proposed scheme of 44 dwellings on the Site is considered appropriate.

6.3.6 The above proposed Site plan submitted during the determination of the application demonstrates the capability of the Site to comfortably accommodate circa 40 – 45 residential units, together with significant boundary and internal landscaping elements.

Draft Allocation in the Regulation 18 Local Plan:

6.3.7 As aforementioned, the Site was proposed to be allocated for a capacity of approximately 40 dwellings in the Regulation 18 Local Plan under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' (reference SAN023).

6.3.8 The Site was considered as part of DDC's Housing and Economic Land Availability Assessment (HELAA) (December 2020) for the development of approximately 40 dwellings. The summary of suitability as provided by DDC is summarised as follows:

- The Site is in an Area of Archaeological potential and a Heritage Assessment will be required.
- The Site clips Flood Zone 2 and 4, along the boundary and an FRA would need to be undertaken.
- The Site was removed from the LALP (Local Allocations Local Plan) by the Inspector on landscape grounds, however, with the provision of an enhanced landscape buffer to the east, south and west of the site to provide year-round screening, it is considered that the impact on the landscape can be mitigated. The housing number on the site has also been reduced to address landscape concerns.
- Access to this site would be possible via Sandown Road, however vehicle access onto St Georges Road is likely to be challenging due to limited footway width and subsequent sightline requirements, so would need to be restricted to emergency/pedestrian access only.

- The provision of 40 dwellings is unlikely to create a severe impact on the surrounding highway network, however St Georges Road and Sandown Road (including Knightrider Street and the route to the High Street/Quay) are subject to constrained geometry due to on street parking, as such, a review on-street parking controls may be required to manage any increase in traffic-flow.
- There is a general concern over the potential cumulative impact of development in and around Sandwich and on routes within the town, which should be considered as part of future traffic modelling exercises.
- A Transport Assessment is required.

• Further information should be provided to demonstrate that access is achievable. However, cumulative impact on the highways network needs to be assessed.

6.3.9 At the time, owing to the matters set out above the Site was considered 'Amber' in the reg/amber/green (RAG) rating. However the clients have since demonstrated within the planning application and subsequent appeal submission that the proposed development for 44 dwellings would address the queries above.

6.4 Draft Policy Allocation 'Land at Archers Low Farm, Sandwich Road, Sandwich' (SAP22)

6.4.1 As introduced in the preceding sections, our client's Site at Archers Low is allocated for residential development within the Dover Pre-submission (Regulation 19) Local Plan. For ease of reference, the draft policy wording is as follows:
"SAP22 – Land at Archers Low Farm, St Georges Road, Sandwich (SAN023)

The Site, Land at Archers Low Farm, St Georges Road, Sandwich, as shown on the policies map is allocated for an indicative capacity of 35 dwellings.

Development proposals for the Site shall include the following:

- a) Development should be laid out to protect the residential amenity of the existing residential properties to the north-east and designed to take account of the character of the Sandwich Walled Town Conservation Area;
- b) The existing trees on the boundaries of the site should be retained and enhanced to mitigate the impact of development on the landscape and provide opportunities for biodiversity habitat creation and enhancement;
- c) Trees which need to be removed to enable an access to be provided to the site, shall be kept to the minimum needed to provide necessary visibility, and will be required to be replaced on-site;
- d) The layout of the scheme should provide a sufficient buffer between the existing mature trees on the site and residential properties, to ensure appropriate residential amenity for future residents and the protection of existing trees once the site is developed;
- e) A site-specific Flood Risk Assessment must be carried out in accordance with Policy CC5, including a comprehensive investigation into surface water flood risk. This shall also inform the application of the Sequential Approach to the layout of the site by locating the most vulnerable elements in the lowest risk areas;
- f) Primary vehicular, pedestrian and cycle access to the site shall be provided from Sandown Road;
- g) In accordance with Policy SP13 a wintering bird survey must be undertaken in advance of a planning application on the site. If the bird survey identifies that the development will exceed the threshold of significance, mitigation will be required. A suitable scheme of mitigation will need to be submitted with the planning application for the site;
- h) Environment assessment study required to address any potential impact on the Sandwich Bay SPA and Ramsar;
- i) A Heritage Assessment, to include appropriate archaeological investigations must be carried out in accordance with Policy HE1 and Policy HE3, the results of which should inform the layout and design of the development which is necessary to avoid harm to any heritage assets identified through the assessment; and
- j) The occupation of the development should be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider. Development should provide a connection to the sewerage system at the nearest point of adequate capacity."

6.4.2 To be clear, our client remains wholly supportive of the allocation of the Site for residential development and is committed to delivering the Site early in the Plan period (start on site in 2023). We agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client's Site can be made – and therefore object to the capacity identified.

6.4.3 Accordingly, we say that Land at Archers Low can further assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.

6.4.4 It is submitted that the SAP22 policy wording should be amended to reflect the capability of the Site to accommodate approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.

6.5 Strategic Justification for Development

Spatial Strategy

6.5.1 The proposed Housing Distribution for the district across the Plan period is established within Policy SP3 'Housing Growth' which sets out that the distribution of housing growth in the district is primarily based on the settlement hierarchy and influenced by site availability, environmental constraints and factors of delivery.

6.5.2 Rightly, a key aim of the growth strategy is to focus development in the least sensitive areas of the district in order to conserve and enhance the Dover's rich natural and historical environment.

6.5.3 A retained theme from the adopted Plan, is that the Council's settlement strategy continues to focus on the development and regeneration of Dover Town and Whitfield (3381 dwellings). Approximately half of the district's planned housing is in this location, the majority of which again is to come forward as part of the strategic urban expansion of Whitfield 'SAP1' (2200 minimum dwellings).

6.5.4 Development will then be focused in the District Centre of Deal (223 dwellings), and the Rural Service Centres of Sandwich (227 dwellings) and Aylesham (649 dwellings). Following the settlement hierarchy rigidly would distribute housing in the preceding order, however the Plan recognises that housing delivery in Deal and Sandwich continues to be constrained by a number of factors including flood risk, ecological designations, heritage and highways. Further, Deal has experienced generally high levels of windfall development across the previous Plan period and accordingly there is now a dwindling supply of available, suitable sites in both settlements. On account of this context, the Council have sought to direct the majority of the remaining higher order settlement growth (outside of Dover & Whitfield) to Aylesham, through the strategic expansion to the town.

6.5.5 Outside of the four principal district settlements, the Rural Settlement Hierarchy (August 2022) identified that the majority of lower-order settlements in the district emerge as having a low level of facilities within the hierarchy and six settlements having none of the key indicators of sustainable services. Plainly, these settlements offer very limited opportunities for growth and it is evident that the forthcoming Plan will be reliant on the settlements of Dover (including Whitfield), Deal, Sandwich and Aylesham to deliver the housing growth that is required.

6.5.6 We further note the findings of the Strategic Housing Market Assessment (2017) which identified that Sandwich and the north is the most expensive part of district with median property prices for all sizes of homes significant in excess of prices in Deal and Dover town and the south. It is suggested that issues of unaffordability are most likely to effect entry-level properties and result in existing residents being forced to seek more affordable properties elsewhere in Dover district or neighbouring authority areas.

6.5.7 Given this context, it is clear that where available and suitable opportunities for residential development do exist within the district's higher order settlements, including our client's Site at Land at Archers Low which can provide a policy compliant level of affordable housing, it is imperative that the effective use of these sites are appropriately maximised in accordance with draft policy SP3 of the emerging Plan and national policy objectives.

6.5.8 Notwithstanding our client's in principle support or the proposed strategy, we are concerned that highly sustainable, edge-of-settlement sites, particularly in higher tier settlements such as Sandwich have not been fully maximised to reflect their accessible location and capability to accommodate a greater quantum of development. On this basis, we are concerned that the strategic objectives underlying draft policy SP3 'Housing Growth' may not be fully realised, to the detriment of market and affordable housing delivery and the wider policies seeking to conserve and enhance the district's natural and historic environment.

6.5.9 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Sandwich, and this has not been undertaken – for example at Land at Archers Low, where it has previously been demonstrated that the site has sufficient capacity to deliver approximately 5-10 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

Greenfield Development and Consistency with Housing Trajectory

6.5.10 Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs Area of Outstanding Natural Beauty, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, release will be required if the Council is to meet its housing and development commitments moving forward.

6.5.11 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Sandwich, represent the most sustainable and reliable sources of growth for the Plan period, to support the role and timescales of strategic urban extensions and to deliver the significant number of new homes that are required within the forthcoming Plan period.

6.5.12 Moreover, greenfield edge-of-settlement sites are, in our experience, typically most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the district.

6.5.13 The Sustainability Appraisal Scoping Report (2018) sets out that over the course of the adopted Plan period, the key sustainability issues facing Dover District in relation to housing are as follows:

Population growth, household growth and demographic change will place additional demand on key services and facilities such as housing, health, education and social care. The Local Plan offers a new opportunity to manage these pressures, encouraging mixed communities;

There is a need for affordable housing across the District. At present, the mean price of dwellings is higher than the national average. The Local Plan will help to expedite its delivery; and,

There is the need for a mix of housing types that cater for the needs of a range of people, including the growing number of single person and elderly households. Without an up-to date Local Plan, the required housing is less likely to be delivered.

6.5.14 It is evident that the new Dover Local Plan must allocate a mix of reliable sites capable of steadily delivering not only the quantum of housing that is required, but also the associated public infrastructure, affordable housing and a mix of unit types and tenures suitable for a wide range of future occupants.

6.5.15 The Housing Topic Paper (September 2022) provides further context and summarises under Chapter 7 'Historical Housing Delivery' that Dover has historically placed significant reliance on windfall development over the current adopted Plan period, with windfall sites accounting for 44% of all completed dwellings over the preceding 10-year period.

6.5.16 Moreover, it is highlighted that at the beginning of the 10 year period, the majority of new dwellings were being built on brownfield land. However, from the monitoring year 2013-14 onward development on greenfield land began to play a much greater part in the location for new development as show in figure 1 below. This trend of increased housing development on greenfield land is a result of the allocations within the CS and Land Allocation DPD being built out and is associated with an approximate doubling of completions in the district. From 2013-14 onwards the average number of completed dwellings per annum has doubled to that of the early years of the CS, as the strong delivery rates of greenfield sites form the predominant source of housing. This is despite an overall declining trend of brownfield completions towards the latter half of the Plan period. This is generally not an uncommon trend in the majority of local planning authorities areas, where opportunities for available and suitable sites in urban centres dwindle throughout the Plan period.

Figure 1: DDC Brownfield / Greenfield Completions 2010/11 to 2020/21 (source: Housing Topic Paper September 2022)

6.5.17 In light of the above context, it is clear that the adopted Dover Local Plan suffered from an initial under delivery of Plan-led housing growth in which windfall development sources were largely required to take up the slack in the early phases of the Plan period, as major allocated sites failed to deliver at the rates initially expected.

6.5.18 It is equally apparent that initial slow completion rates were quickly addressed once greenfield allocations commenced development, feeding into strong completions in the latter half of the Plan period. In our experience, greenfield sites are typically associated with stronger delivery rates and provide a reliable source of housing growth. The allocation of an appropriate mix of sites and scales is required in order to ensure steady and sustained Plan-led housing delivery across the Plan period and to avoid a reliance on windfall development to address the shortfall.

6.5.19 Consequently, given all of the above, it is imperative that the new Local Plan allocates a sufficient variety and scales of site capable of both ensuring steady and sustained housing completions and capable of making necessary contributions to public infrastructure and services, affordable housing and mix of unit types to address the key issues raised in the Sustainability Appraisal.

6.5.20 In our view, edge-of-settlement greenfield sites such as our client's Site Land at Archers Low represents the most reliable and sustainable source of housing delivery for the Plan period. Such sites are typically less constrained by wider factors and less affected by unforeseen delays such as land contamination. Moreover, greenfield sites typically are more capable of delivering the policy compliant affordable housing, unit mix and developer contributions that are urgently needed and in the case of our client's Site, have already been demonstrated within the present planning application and appeal submission.

6.5.21 It is understood that the Plan is predicated on the delivery of strategic scale development at Whitfield comprising the development of circa 2,200 new homes. Consequently, in order to avoid a repetition of the previous Plan, the Council have sought to ensure that a pool of

reliable greenfield allocation, including that of our client's are included within the Plan, capable of delivering the early growth that is required within the housing trajectory prior to the commencement of major allocations later in the Plan period.

6.5.22 We note that within the Housing Trajectory 'Appendix D', the Council have included allocated units from Years 4 onwards, with extant permissions (accounting for 5% non-implementation) demonstrated to be solely capable of delivering the growth required in Years 1-3. Notwithstanding our client's commitment to commencement on site in 2023 and the initial delivery of units at Land at Archers Low in 2024 (subject to successful appeal), we support this pragmatic approach and suggest this represents a sound basis on which to set the district's housing trajectory. We note also the inclusion of an appropriate windfall allowance and the included contingency buffer to further ensure reasonable flexibility in the housing supply.

6.5.23 On account of all of the above, we submit that the allocation of Land at Archers Low forms part of a sound strategy for growth in the district for the forthcoming Plan period. Land at Archers Low is capable of delivery early in the Plan period, representing a reliable source of housing growth in a highly sustainable and accessible location adjacent to the existing settlement boundary of Sandwich, consistent with the Council's preferred settlement strategy. However, we object on the submission that the Site is capable of making a greater contribution to the district's housing need and suggest an amended wording of the policy to allocate the Site for approximately 40-45 dwellings. Nonetheless, the Site is unconstrained and capable of providing a high-quality residential development including a mix of unit types and tenures, a meaningful contribution to the supply of affordable housing and contributions to public services and infrastructure, benefiting both existing residents and future occupiers.

Policy SP4 'Windfall Development'

6.5.24 Separately, we note the provisions of policy SP4 windfall development. Proposals at Land at Archers Low would likely be acceptable in principle under this provision and we support the policy inclusion for appropriate, proportionate windfall development.

6.5.25 Our client is fully committed to the delivery of the Site which is available and suitable for delivery early in the Plan period and is presently pursuing an appeal on the Site for a greater quantum of units than the allocation in the Regulation 19 Plan. There is consequently little to be gained from potentially delaying delivery of the Site by withdrawing the allocation. Notwithstanding the provisions of SP4, it is reiterated that our client fully supports the allocation of the Site under SAP22 for residential development as the most appropriate mechanism for delivery of the Site and the opportunity for genuinely Plan-led development in Sandwich and the provision of associated benefits to public services and infrastructure, contribution to affordable housing supply and the delivering of a mix of house types and tenures.

Infrastructure Delivery

6.5.26 Paragraph 11 of the Framework is clear that all plans should promote a sustainable pattern of development. This includes aligning growth and infrastructure. Paragraph 20 goes on to confirm that strategic polices will be expected to make sufficient provision for associated development infrastructure.

6.5.27 In this regard, draft policies SP11 'Infrastructure and Developer Contributions' and SP12 'Strategic Transport Infrastructure' of the emerging Plan form the key strategic polices for infrastructure delivery. We agree that where development would create a need, or would have an impact, or would exacerbate an existing deficiency in infrastructure provision, appropriate developer contributions may be sought.

6.5.28 It is however emphasised that in all developments, infrastructure requirements must be demonstrated to be necessary through assessment during determination of the application on a case-by-case basis. Where new development is proposed, it does not automatically follow that major infrastructure contributions are always required or contribution to strategic infrastructure proposals are appropriate. For instance, it is our client's view that any infrastructure requirements must be demonstrated through a robust and transparent assessment at application stage, taking into account the submission of detailed supporting evidence, for example following consideration of the Transport Assessment in the case of highway infrastructure contributions.

Alignment with Sustainability Appraisal Findings

6.5.29 As part of the preparation of the Local Plan, the Council has identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA) which provides an assessment of how different options perform in environmental, social and economic terms, to help inform which option should be taken forward and combined with wider evidence documents, have been used to determine the growth and spatial strategy set out in the Plan.

6.5.30 Five potential distributions of growth were identified during preparation of the draft Regulation 18 Local Plan:

- Spatial Option A: Distributing growth to the District's suitable and potentially suitable housing and employment site options (as needed to deliver the scale of growth required).
- Spatial Option B: Distributing growth proportionately amongst the District's

existing settlements based on their population.

- Spatial Option C: Distributing growth proportionately amongst the District's existing settlements based on the District's defined settlement hierarchy.
- Spatial Option D: Distributing growth in the same way as the adopted Local Plan, focussing most growth in and around Dover town.
- Spatial Option E: Distributing growth more equally across the District's settlements: Dover, Deal, Sandwich and Aylesham, as well as the rural villages.

6.5.31 The conclusion of the SA was that Spatial Options C (settlement hierarchy) and D (adopted Core Strategy with Dover focus) generally perform the most strongly against the SA objectives, particularly when delivering the baseline growth scenario. However, given the environmental constraints that exist around Deal and Sandwich, very few suitable and potentially suitable sites have been identified in these towns. Given this, the Council's preferred option for the distribution of housing and economic growth comprises a combination of options A (HELAA sites), C (settlement hierarchy) and D (Dover focus). The distribution of housing and economic growth in the District is therefore primarily based on the settlement hierarchy, and influenced by site availability, environmental constraints and factors of delivery.

6.5.32 On account of the above, our client agrees that the proposed growth strategy, and by extension, policy SP3 in principle represents a sound and evidence-led strategy for growth. However, given the clear acknowledgement of the dwindling supply of available sites in the higher order settlements of Deal and Sandwich, which has necessitated a minor deviation from the strongest performing spatial options, we submit that where sites are available and suitable for development in Deal and Sandwich, these must be fully maximised, reflecting their accessible location and their ability to reduce the need to develop into less accessible and more sensitive sites elsewhere in the district to accommodate the growth that is required.

Site Specific Sustainability Appraisal

6.5.33 Land at Archers Low Farm, St George's Road, Sandwich is included under HELAA reference 'SAN23' within the SA Site Assessment (Appendix F). The site performs strongly, with particular positives identified with regards to SA Objectives related to housing, accessibility, the economy, sustainable transport and climate change mitigation, in large parts due to the edge-of-settlement location and proximity of the site to key services in Sandwich.

6.5.34 We note negatives associated with the development of a greenfield site, including loss of agricultural land, however this would be true of the majority of greenfield sites and it is abundantly clear that Dover's housing need cannot be met solely on brownfield sites. We note also minor negatives / uncertain associated with biodiversity, the historic environment and landscape, however it is not clear whether these take into account the high-quality design, biodiversity enhancement and landscape mitigation proposed under the application/appeal. Irrespective, these are not considered to outweigh the clear and tangible sustainability benefits associated with edge-of-settlement development and the site's consistency with the preferred spatial options.

Summary

6.5.35 Taking all of the above into consideration, our client is wholly supportive of the inclusion of land promoted at Archers Low, as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered wholly consistent with the objectives of the Plan and forms part of a sound evidence-led growth strategy consistent with the recommendations of the Sustainability Appraisal for the district to 2040, subject to the sole objection in relation to capacity.

6.6 Deliverability

6.6.1 Prior to the current appeal proposal, the Site has had no planning history of a residential nature or a history of unimplemented permissions. There are not considered to be any impediments to the Site being allocated for development commencing within the first five years of the Plan period. Combined with an appropriate number and scale of wider allocations in Sandwich and elsewhere across the district, this would ensure steady delivery of housing in Dover district across the majority of the Plan period and support the role and timescales of strategic housing delivery at Whitfield towards the latter half of the Plan period.

6.6.2 Fernham Homes Limited – a local SME with a strong history and track record of delivery, together with an adopted and robust business plan for growth – has control over the site, and are poised to commence work on its residential development very promptly after the receipt of planning permission, potentially (subject to the successful outcome of the current appeal) in 2023. Delivery of housing is expected from 2024.

6.6.3 For the reasons set out in this representation, the Site is considered suitable for the residential development of approximately 40 – 45 dwellings. The Site is adjacent to the urban area of Sandwich, one of the four higher order settlements in the district and the Council's preferred locations for Plan-led growth within the district. Development at Land at Archers Low would form a natural and logical development east of Sandwich with excellent accessibility to day-to-day services and amenities via active travel modes within Sandwich itself and convenient access

to public transport infrastructure (including Sandwich train station) for onward travel to key neighbouring settlements including Dover, Ramsgate, Canterbury and Ashford.

6.6.4 Finally, in respect of suitability, there are no physical limitations or problems such as access, infrastructure, flood risk, hazardous risks, pollution or contamination.

6.6.5 On behalf of the landowner, we submit that there are no known financial restrictions that would impact upon the viability of a future housing scheme or that would prohibit development coming forward within the early stages of the Plan period. To the contrary, we consider there to be an opportunity to deliver a high-quality, sustainably located residential development scheme consistent with the Council's proposed growth strategy comprising an appropriate mix of market and affordable housing and capable of contributing to a range of community facilities, public infrastructure and services locally.

6.6.6 Given the advanced nature of the proposals by virtue of the submitted planning application, in terms of specific timescales, should the ongoing appeal be allowed, we understand that Fernham Homes Limited and Walker Residential Limited are capable of commencing work on-site in early 2023, with delivery in 2024 and completion of the Site anticipated in 2025.

6.6.7 The Site is in single ownership and there are no complicated legal agreements or covenants that would prohibit the ability to bring forward the Site early in the Plan period. The Site is therefore considered available and achievable for the purposes of the tests of deliverability.

7 Conclusion

7.1 Summary

7.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited and Walker Residential Limited, in response to the Dover District Council Local Plan (Regulation 19) consultation which runs until 9th December 2022.

7.1.2 Our client controls 'Land at Archers Low Farm, Sandown Road, St Georges Road, Sandwich' and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.

7.1.3 Taking all of the above into consideration, we consider that the Site promoted at Land at Archers Low should remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered, in principle, wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040. However, it is imperative that the effective use of these higher-order settlement sites are appropriately maximised in accordance with draft policy SP3 of the emerging Plan, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and object solely on this basis.

7.1.4 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Sandwich, and this has not been undertaken – for example at Land at Archers Low, where it has previously been demonstrated that the site has sufficient capacity to deliver approximately 5-10 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

7.1.5 Without prejudice to our client's support in principle of the proposed allocation at Land at Archers Low, we would urge the Council to re-visit the allocation policy text and allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential and the objectives of draft policy SP3 are most effectively realised. It is submitted that the SAP22 policy wording should be amended to more accurately reflect the capability of the Site to accommodate approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.

7.1.6 In addition to being a highly sustainable and logical edge-of-settlement allocation, the Site is deliverable in a single land ownership with no viability issues, legal or third-party constraints present. Our client is fully committed to the delivery of Land at Archers Low and there are no impediments to the Site being capable of delivery within the initial 0-5 years of the Plan period.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will

For the reasons set out in the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245), the capacity of Land at Archers Low Farm, St Georges Road Sandwich (SAN023) should be increased to 40 - 45 dwellings.

make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Please refer to the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245).

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC are on record 2021 <i>proposals generating levels and types of traffic movement resulting in severe cumulative residual impacts in terms of capacity and road safety will not be permitted</i> . The real-world constraints of the EK road system (A258, A2, A256,) mean little can be done to ameliorate the situation, without long term road closures needed to dual the A2 from Jubilee Way to Lydden Hill. Neglect by DfT and Highways England means that with biometric passport checks in 2023, residents can expect gridlock again and again.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	For SP1 and SP12 to be linked up, Bus services should be better integrated with the rail service timetables on the line running from Sandwich and Deal through Dover to Ashford, and the line running from Dover to Canterbury and Faversham and Victoria. See comments in SP1, on the many engineered cycle routes needed.

<p>and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Road improvements to separate <u>local traffic</u> from <u>through freight traffic</u> must be done to save lives; road improvements that central govt must pay for. The separation needed must include flyovers and underpasses and foot bridges, including under / over the A20 route through Dover town. It should be noted that Dover has too much experience of the gridlock and chaos caused by cross-channel delays, especially the community of Aycliffe, (and Guston may suffer similar blight). With more extreme weather events expected, and with 'frictionless freight flow' now a thing of the past, holding areas for freight OUTSIDE THIS DISTRICT, near the M25, are needed more now than they were before.</p> <p>The Council's 'commitment to work with HE on long term improvements to A2' must be more than pious lip-service reiterated to political friends in central government. It must result in the complete dualling of the A2 and Jubilee Way from Eastern Docks to Lydden Hill. The separation of local traffic from through freight traffic by means of flyovers and underpasses at the Duke of York, and Whitfield roundabouts must be done at the expense of central govt, Dept for Transport/ Highways England. Residents of the garden of England should not suffer because national traffic flows on our roads, given the failure of implement freight to rail policies. <i>SP12 would become more sound with the following: "Proposals which assist in the provision of alternative transport modes across a dualled A2 will be encouraged. The Council will work with Highways England and Kent County Council to improve accessibility elsewhere in Kent between the two principal access routes to the Port of Dover, the M20 and the A2. The Council will work with partners to improve access to the local and High Speed rail network."</i></p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.</p>

2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>HS1 Ltd holds the 30 year concession from the Government to operate, manage and maintain High Speed 1 (HS1), the 109 kilometre high speed rail line connecting St Pancras International to the Channel Tunnel. The line is used for high speed domestic services throughout Kent; international passenger services to destinations in continental Europe including Paris and Brussels; as well as for freight traffic. The concession includes the stations along the route: St Pancras International, Stratford International, Ebbsfleet International and Ashford International.</p> <p>HS1 welcomes the commitment in the Regulation 19 submission to the development of Strategic Transport Infrastructure included within Policy SP12.</p> <p>Dover in 60</p> <p>HS1 has been a major advocate of improving journey times from Eastern Kent to London, and has already investigated proposals for a new connection at Dollands Moor. This new infrastructure would enable High Speed trains to cross onto HS1 tracks before the existing connection at Ashford, thus allowing some services to use the Ashford flyover and save up to 7 mins off the travel time to London. This would result in the realistic prospect of passengers from Dover arriving into St Pancras or Stratford International Stations in under an hour.</p> <p>Network Rail Infrastructure Limited (NRIL) business case analysis of the socio-economic benefits of the Dollands Moor crossover submitted to the Department for Transport demonstrates that the scheme has the potential to deliver £301m of socio-economic benefits. A significant proportion of these benefits would accrue to the communities of Dover and the surrounding areas. NRIL rated the scheme 'high' in terms of its value for money as Web-Tag analysis (the HM Treasury standard for examining the cost/benefit ratio of new infrastructure) shows the scheme has a potential Benefits Cost Ratio (BCR) of over 3, i.e. for every pound spent on the scheme, it would deliver £3+ in socio-economic benefit.</p> <p>It is clear that a broad pool of funding options will need to be investigated and therefore the recognition in the Reg 19 document of the need for developer contributions is fully supported. HS1 would be happy to work closely with Dover District Council in potentially setting tariffs for proportional developer contributions towards improving journey times and we would be keen to understand more about how the Council intends to bring forward further policy/guidance on developer contributions.</p> <p>The proposed site for the crossing is located within Folkestone and Hythe District Council boundary and it would therefore also require cross Borough working and the potential pooling of developer contributions to bring this proposal forward.</p> <p>Infrastructure Delivery Plan (IDP)</p> <p>It is welcomed that "Dover in 60" is clearly referenced in the draft IDP, however we consider that HS1 Ltd should be referenced as a key delivery partner. Likewise, our 2019 publication 'Delivering for Kent: The Economic Impact of HS1' (Steer, September 2019) should be listed as part of</p>

	<p>the evidence base. The document should also clearly set out the proposed Dollands Moor Crossing as a “future need to deliver growth from the Local Plan” so that there is a clear link between the need and ability to raise developer contributions.</p> <p>Indicative Fasttrack Route</p> <p>HS1 supports the proposal for a sustainable fast track bus service from the major growth area of Whitfield to Dover Priory Station, this will help to provide a fast and sustainable door to door experience for passengers. The proposed route appears to show a rather restricted loop through existing housing areas, we presume that a much expanded route throughout the future site allocation has been reserved for future delivery and if so it would be useful to indicate this on the Proposals Map.</p> <p>We look forward to working with you further on the development of the Strategic Transport Infrastructure within Dover District Council and beyond.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We consider that the plan is sound, but object to elements of Policy SAP15 - Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002) and Policy SP3 - Housing Growth. These objections are set out in the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359).</p> <p>1 Introduction</p> <p>1.1 Purpose of this Representation</p> <p>1.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited in response to the Dover District Council 'DDC' Local Plan (Regulation 19) consultation which runs until 9th December 2022.</p> <p>1.1.2 We understand that DDC is in the process of preparing a new Local Plan to set out a strategy for development for the period to 2040 and that the Council are presently seeking comments on the pre-submission Plan prior to its submission for examination in early 2023.</p> <p>1.1.3 Our client is promoting 'Land at Rays Bottom, Walmer, Deal' (hereafter referred to as 'Land at Rays Bottom' or 'the site') for the residential allocation of the site as part of the new Dover District Local Plan preparation process. The site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 75 dwellings under policy reference 'SAP15'.</p> <p>1.1.4 It is highlighted that as part of the Regulation 18 Local Plan, the Site was allocated under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' for approximately 100 dwellings (reference WAL 002).</p> <p>1.1.5 The purpose of the representation is to support the allocation of Land at Rays Bottom as a suitable and deliverable location for residential development and provide comment on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan but to object to the indicative capacity set out in the policy.</p> <p>1.1.6 In this regard, we remain wholly supportive of the principle of the residential allocation of Land at Rays Bottom and agree that the Site represents a logical and sustainable location to direct growth in Deal consistent with the growth strategy of the Plan as a whole.</p> <p>1.1.7 Accordingly, we say that the allocation of Land at Rays Bottom is necessary in order for the Council in meeting the growing need for new homes in the district and help to ensure the DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan.</p> <p>1.1.8 It is submitted that the SAP15 policy wording should be amended to reflect the capability of the Site to accommodate approximately 80 dwellings, deliverable early in the Plan period.</p> <p>1.1.9 Based on the current national and local planning context, we consider the Site to be a highly suitable edge-of-settlement location to allocate land for housing to help meet the need for new homes in the district and its effective use should be appropriately maximised in accordance with national policy objectives.</p> <p>1.1.10 Further details regarding the Site and commentary on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan are set out in the following sections of this document.</p> <p>1.2 About Fernham Homes</p> <p>1.2.1 Fernham Homes Ltd are a local award winning small and medium sized (SME) housebuilder, established in 1997 and has a strong track record of delivering high quality residential and mixed use developments in Kent over the last 25 years. This has been acknowledged through the receipt of nationally recognised awards, including the gold Evening Standard Awards best family home 2022 and 2019 bronze WhatHouse Best Small Housebuilder.</p>

1.2.2 SME housebuilders are recognised in the National Planning Policy Framework ('NPPF') at paragraph 69 as making an important contribution to meeting the housing requirements of an area, and being able to build out relatively quickly. Similarly, this has also been recognised by the Planning Inspectorate. This is particularly the case with Fernham Homes, which is privately owned with access to significant resources. This provides significantly more flexibility than national and other regional housebuilders, and allows Fernham Homes to deliver housing rapidly and to a high quality, beautiful and sustainable standard (para 126 of the NPPF).

1.2.3 Fernham Homes has embarked on a sustained period of growth, with an adopted and robust business plan to deliver around 300 houses per year in five years time.

1.2.4 A key element of Fernham Homes' operations is to take a careful approach to site selection: a huge amount of due diligence is undertaken as part of this, and therefore Fernham Homes only invests in those sites which meet the NPPF requirements of being available, suitable, and deliverable. As set out below land at Rays Bottom, Walmer ('SAP15') is firmly considered to be such a site.

1.2.5 Similarly, a key feature of Fernham Homes' approach is to work positively and proactively with local planning authorities (LPAs), both during the preparation of local plans and at planning application stage. Fernham Homes are fully committed to engaging with DDC in the preparation of its Local Plan, and firmly subscribe to the national policy approach set out in paragraphs 15 and 16 c) of the NPPF that "the planning system should be genuinely plan-led" and should be shaped by early, proportionate and effective engagement between LPAs and others, including businesses and developers. Accordingly, Fernham Homes would welcome the opportunity to discuss the matters contained in this representation, including the availability, suitability, deliverability and capacity of land Rays Bottom, Walmer ('SAP15') directly with DDC members and officers, ahead of the submission of the Local Plan for examination.

1.3 Representation Structure

1.3.1 The representation structure is outlined below for ease of reference:

Chapter 2 (Consultation Background) – Sets out the context of the Dover District new Local Plan preparation, relevant national planning requirements and a summary of our current position.

Please refer to paragraph 52 of Appeal Decisions: APP/M2270/W/21/3283924 & APP/M2270/W/21/3288645

Chapter 3 (Legal Tests of Soundness) - Assessing whether the plan is sound, having regard to the tests of soundness outlined by paragraph 35 of the NPPF.

Chapter 4 (Duty to Co-operate) - Assessing whether the plan is sound, having regard to the duty to cooperate outlined by paragraph 24 of the NPPF.

Chapter 5 (Housing Need) - Consideration of market and affordable housing need and assessment of proposed housing allocations and supply sources.

Chapter 6 (Assessment of Suitability) - Re-introduces our client's Site and provides a summary of planning constraints and opportunities, including the quantum of development that could be accommodated, why the Site is suitable for development and why the principle of the draft allocation for residential development is both justified and consistent with the DDC's strategy for growth in the district.

Chapter 7 (Conclusion) - Summarises the key points raised throughout the representation and re-affirms our client's support for the principle of the Site's allocation and the principle of proposed strategy ahead of the submission of the Plan for examination, and the objections in terms of capacity.

2 DDC – Draft for Submission Local Plan (Regulation 19)

2.1 Consultation Background

2.1.1 DDC are required to prepare a new Local Plan, as the current suite of development plan documents were adopted in 2002, 2010 and 2015. The Core Strategy (CS) (adopted 2010) in particular has a time horizon up to 2026. The plans, and the policies contained within, pre-date current national policy, practice guidance and local evidence and consequently require updating.

2.1.2 The new Local Plan will set out the vision, strategic objectives and overarching development strategy for the growth of the District over the period to 2040. It provides the planning policy framework to guide the future development of the area, addressing needs and opportunities for housing, the economy, community facilities and infrastructure, as well as the basis for conserving and enhancing the natural and historic environments, mitigating and adapting to climate change, and achieving well designed places.

2.1.3 For the avoidance of doubt, the new Local Plan, on adoption, will replace the CS 2010 and the Land Allocations Plan 2015, as well as saved policies from the 2002 Local Plan.

2.1.4 DDC's Regulation 19 Local Plan outlines the key issues that need to be addressed between now and 2040. In particular, the Plan sets out the following key planning issues for the District:

- Ensuring that new development in the District contributes to the mitigation of, and adaptation to, climate change.
- Supporting DDC to deliver its intention to be a carbon neutral district by 2050.
- Managing flood risk and coastal change.
- Ensuring that a sufficient amount and variety of land is identified to deliver a continuous supply of housing across the Plan period and that DDC maintains a five-year housing land supply.
- Delivering growth in a way that focuses development in the least sensitive areas of the District in order to conserve and enhance the District's rich natural and historic environments.
- Supporting sustainable development in rural areas to enhance the vitality of rural communities.
- Working with partners to facilitate the delivery of the Whitfield Urban Expansion. Ensuring a range of housing tenures, types and sizes are provided across the District to meet the needs of the local community and provide choice and flexibility in the housing market.
- Promoting economic growth, tourism, and investment in the District's Town Centres in line with DDC's Economic Growth Strategy.
- To address the impact of the COVID-19 pandemic.
- Delivering strategic transport improvements, including upgrades to the Duke of York and Whitfield roundabouts to support the scale of housing and economic growth identified in the Plan.
- Promoting sustainable transport initiatives to encourage a modal shift to more sustainable forms of transport like walking and cycling.
- Ensuring that infrastructure is delivered, in the right place, at the right time, to meet the needs of the District and support the levels of development identified in the Local Plan.
- Supporting the delivery of attractive, high-quality, design led developments and the creation of healthy, inclusive and safe communities, that are well served by good quality services and facilities to support people's lives.
- Conserving and enhancing the District's rich and diverse natural landscape, including the five international sites within the district, the Kent Downs Area of Outstanding Natural Beauty (AONB), five Sites of Special Scientific Interest (SSSIs), two National Nature Reserves (NNRs), two stretches of Heritage Coasts and two Marine Conservation Zones.
- Delivering a net gain in biodiversity in the District over the plan period.
- To promote the conservation, restoration and where appropriate the enhancement of the District's heritage assets, in order to protect their significance and to ensure that they can be best appreciated and enjoyed by current and future generations.

2.1.5 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'.

2.1.6 This submission will comment on each of the above, highlighting where we believe any areas of concern lie or where modifications may be required.

2.2 DDC's Local Development Scheme

2.2.1 The District Council has a duty to review the policies contained within the development plan every five years. The 2014/2015 Authority Monitoring Report signalled the need to review key parts of DDC's adopted CS evidence base.

2.2.2 DDC's Local Development Scheme (LDS) first outlined the delivery timetable for the Local Plan Review (LPR) in the March 2017 publication. Since then, the LDS has been updated on an annual basis. The most recent September 2022 LDS summarises that following the preparation of the principal evidence base documents, the Local Plan Review Regulation 18 consultation took place for 8 weeks in January 2021. The Regulation 19 consultation was scheduled for 7 weeks during Q4 of 2022 and is the subject of this representation.

2.2.3 Moving forward, submission of the Plan is anticipated in Q1-2 2023 with the Examination in Public in Q3-4 2023. The new Local Plan is currently scheduled for adoption in 2024.

2.2.4 As planned, DDC are now undertaking the Regulation 19 Draft Local Plan Consultation, for which this submission is made

3 Legal Test of Soundness

3.1 Legislation and Guidance

3.1.1 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. It is a statutory requirement that every development plan document must be submitted for independent examination to assess when it is "sound", as well as whether other statutory requirements have been satisfied (s.20(5) of the 2004 Act). By s.19 of the 2004 Act, in preparing a development plan document a local planning authority must have regard to several matters including national policies and advice contained in guidance issued by the Secretary of State. Such guidance currently exists in the form of the NPPF and is summarised below. This states that Plans must be:

(a) Positively Prepared: based on a strategy which seeks to meet objectively assessed development and infrastructure requirements

3.1.2 This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The NPPF set out principles through which the Government expects sustainable development can be achieved.

(b) Justified: an appropriate strategy when considered against the reasonable alternatives, based on proportionate evidence

3.1.3 This sets out the requirement that the Local Plan should be based on a robust and credible evidence base involving:

I. Research/fact finding: the choices made in the plan are backed up by facts.

II. Evidence of participation of the local community and others having a stake in the area.

3.1.4 The Local Plan should demonstrate an appropriate strategy, taking into account reasonable alternatives and based on proportionate evidence. These alternatives should be realistic and subject to sustainability appraisal. The Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.

(c) Effective: deliverable over its period based on effective joint working on cross-boundary strategic priorities

3.1.5 This makes clear that the Local Plan should be deliverable, requiring evidence of:

- Sound infrastructure delivery planning;
- Having no regulatory or national planning barriers to delivery;
- Delivery partners who are signed up to it; and
- Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.
- The new Local Plan should be flexible and able to be monitored.

3.1.6 The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the Local Plan should make clear that major changes may require a formal review including public consultation. Any measures which DDC has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.

d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national policy.

3.1.7 This submission comments on each of the above in further detailing, highlighting areas of support and where modifications are required as appropriate.

3.2 Legal Compliance

3.2.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

3.2.2 In addition to the above, the NPPF states² that: "Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that:

a) All plans should promote a sustainable pattern of development that seeks to: meet the development needs of the area; align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effect.

b) Strategic policies should as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

(i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or

Paragraph 11, National Planning Policy Framework 2021

(ii) Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.”

3.2.3 In addition, to the above, the NPPF states³ that Plans should:

a) be prepared with the objective of contributing to the achievement of sustainable development;

b) be prepared positively, in a way that is aspirational but deliverable;

c) be shaped by early, proportionate and effective engagement between planmakers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;

d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;

e) be accessible through the use of digital tools to assist public involvement and policy presentation; and

f) serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).

3.2.4 It is important to note that the NPPF⁴ requires strategic policies to set out an overall strategy for the pattern, scale, and design quality of places, and make sufficient provision for:

a) housing (including affordable housing), employment, retail, leisure and other commercial development;

b) infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat);

c) community facilities (such as health, education and cultural infrastructure); and;

d) conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation.

3.2.5 It is clear from the above, that any local plan should set out a comprehensive and cohesive approach to future development.

Paragraph 16, NPPF 2021

Paragraph 20, NPPF 2021

4 Duty to Co-Operate

4.1 Legal and NPPF Requirements

4.1.1 Section 33A of the Planning and Compulsory Purchase Act 2004 sets out a statutory ‘Duty to Cooperate’ (DtC) – i.e. a legal obligation - to all bodies as prescribed by Regulation 4 of the Town and Country Planning (Local Planning) England Regulations 2012 (the Regulations).

4.1.2 The duty requires DDC to cooperate with other persons to ‘maximise the effectiveness’ with which named activities are undertaken. Those activities include the preparation of development plan documents (such as this local plan) and activities that support that activity ‘so far as relating to a strategic matter’.

4.1.3 A strategic matter is defined by S33A(4) in summary as: (a) ‘sustainable development or use of land that has or would have a significant impact on at least two planning areas’ (a planning area in this case is the area of a borough or district council); and (b) ‘sustainable development or use of land in a two tier area’ (as this is) ‘if the development or use (i) is a county matter, or (ii) has or would have a significant impact on a county matter’. County matters broadly relate to minerals and waste and associated developments as defined by Paragraph 1 of schedule 1 to the Town and Country Planning Act 1990 (as amended).

4.1.4 Section 33A (7) requires DDC (and persons subject to the DtC) to have regard to any guidance issued by the Secretary of State about how the duty is to be complied with. In that regard Paragraph ID 9-004-29140306 of the Government's Planning Practice Guidance (PPG) confirms amongst other things that the DtC is not a duty to agree (albeit that local planning authorities should make every effort to secure the necessary cooperation on strategic cross border matters before they submit local plans for examination).

4.1.5 The NPPF establishes that effective and on-going joint working is an integral part of the plan making process that will, amongst other things, determine whether development needs that cannot be met wholly within a plan can be met elsewhere. The NPPF goes on to state at paragraph 27 that in order to demonstrate effective and on-going joint working strategic policy making authorities should: "... prepare and maintain one or more statements of common ground documenting the cross-boundary matters being addressed".

4.1.6 In addition to the District's own housing pressures, part of the DtC involves considering whether neighbouring authorities' unmet housing need can be accommodated. It is worth highlighting that recent amendments to the London Plan have identified that the City's housing need has become increasingly more difficult to deliver and therefore areas outside London will be faced with having to absorb more of London's housing need. Consequently, DDC has a duty to explore whether it can accommodate some of this overspill of London's unmet need.

4.2 Assessment of DDC's discharging of the Duty to Co-operate

4.2.1 It is recognised that work to discharge the DtC remains ongoing by DDC and will continue prior to submission as part of the preparation of the Local Plan evidence base.

4.2.2 Notwithstanding the above, at this stage it is understood that DDC have engaged with the members of the East Kent Regeneration Board including neighbouring East Kent planning authorities, Kent County Council (KCC) and its subsidiary departments:

- Folkestone and Hythe District Council
- Canterbury City Council
- Thanet District Council
- KCC
 - KCC Highways & Transportation
 - KCC Minerals & Waste
 - KCC Heritage Conservation
 - KCC Flood & Water Management
 - KCC Natural Environment & Coast
 - KCC Infrastructure including Education

4.2.3 In February 2016, DDC adopted a Memorandum of Understanding (MOU) in respect of the DtC between the East Kent Regeneration Board members. A review of the MOU took place and was agreed in January 2021.

4.2.4 The East Kent MOU sets out the framework in which the authorities will work together on strategic issues and will actively engage. It forms the overarching framework and context within which Statements of Common Ground (SoCG) will be agreed between individual authorities.

4.2.5 Further engagement is also confirmed to have taken place between the following prescribed bodies and other relevant bodies:

- Environment Agency
- National Highways
- Historic England
- Natural England
- Network Rail
- NHS Kent and Medway Clinical Commissioning Group (CCG) – now known as Integrated Care Board (ICB) since July 2022
- Kent Downs AONB Unit
- Other infrastructure providers

4.2.6 Whilst work remains ongoing, at this stage it is understood that SoCGs have been agreed and signed between the following parties:

- DDC and Folkestone & Hythe District Council
- DDC and Canterbury City Council
- DDC and Thanet District Council

DDC and Kent County Council

DDC and National Highways

4.2.7 As part of the DtC Evidence Base documents, DDC prepared a detailed DtC Statement (dated September 2022) which sets out a summary of the engagement that has taken place, firstly by organisation, and then by issue. Whilst the statement focuses on strategic issues and duty to co-operate bodies it also includes information relating to engagement on non-strategic issues and co-operation with other bodies that are not prescribed by the regulations. In addition, Appendices 1, 3 and 4 identify the main meetings and other correspondence that has taken place throughout the plan making process.

4.3 Summary

4.3.1 On account of the above and the documents published within the DDC's Local Plan Evidence Base, we are satisfied that DDC as the strategic policy making authority has demonstrated effective and on-going joint working with neighbouring authorities, the county council, prescribed bodies and other relevant bodies. Further, we agree that DDC has prepared and maintained SoCG documenting the cross-boundary matters being addressed in accordance with the Framework and the DtC may be discharged by the Planning Inspector under Section 20(5) (c) of the Planning and Compulsory Purchase Act 2004.

4.3.2 Without prejudice to the above, should ongoing work by DDC result in significant changes in circumstances such that the signed SoCGs may be amended or withdrawn, our client reserves the right to alter their consultation response accordingly and be present at the examination of the Plan to discuss further.

5 Housing Need

5.1 Context

5.1.1 Paragraph 11 of the NPPF is explicit in its requirement for strategic policy-making authorities to promote a sustainable pattern of development that seeks to meet the need in full.

5.1.2 Paragraph 20 of the Framework is equally clear that strategic policies should set out an overall strategy for the pattern, scale and design quality of places. Policies should make sufficient provision for the development that is required as well as associated infrastructure, community facilities and should set out a strategy for the conservation and enhancement of the natural, built and historic environment.

5.1.3 Given this national planning context, the emerging Local Plan should provide a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic environment.

5.1.4 National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate.

5.1.5 In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.

5.1.6 Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.

5.2 DDC's Housing Need

5.2.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover District of 596 dwellings per annum. However, the affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total housing need of 10,998 dwellings for the Plan period to 2040. We understand that the Regulation 19 Local Plan seeks to meet this need in full and in addition to the minimum figures, DDC have set an appropriate contingency buffer of 926 dwellings of the Plan period, equating to 8.4% of the total Plan period figure.

5.2.2 For context, the current adopted CS requirement is 700 dwellings per annum. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.

5.2.3 For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate sufficient land to accommodate a minimum of 6,642 new homes over the remaining plan period to 2040. It is understood that this will be derived from the following sources:

- Whitfield Urban Expansion Allocation: 2,200 dwellings

- Local Plan Allocations (excluding Whitfield): 3,392 dwellings

- Windfall Allowance (70 a year from year 4): 1,050 dwellings

5.2.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target. Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs AONB, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, meeting Dover's housing needs inevitably will require the release of significant greenfield land.

5.2.5 In our view, sustainable and accessible sites logically located adjacent to existing higher-order urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan Period, to deliver the significant number of new homes that are required and are most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the District.

6 Site Specific Assessment

6.1 Overview

6.1.1 The previous chapters of this representation (Chapter 3-5) outline our client's position relating to the soundness of the Plan in which our client is confirmed to be supportive of the Local Plan as a sound strategy for the growth of the district to 2040.

6.1.2 Paragraph 4.146 of the Local Plan states that the urban area of Deal encompasses the built-up areas of the parishes of Walmer and Sholden. Deal is identified in the Settlement Hierarchy and Confines Topic Paper (2022) as a 'District Centre', where there is a secondary focus for development. This position is reinforced by draft policy SP3 which states that development in Deal will be at a more limited scale than Dover Town, compatible with the more limited range of job opportunities, shops, services, and other facilities available in these locations.

6.1.3 As introduced in the preceding sections, Fernham Homes Limited are supporting the residential allocation of the Site 'Land at Rays Bottom, Walmer' and. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan with an indicative capacity of 75 dwellings under policy reference 'SAP15' (WAL002).

6.1.4 Appendix 1a of the Housing and Economic Land Availability Assessment (HELAA) 2022 provides the following summary:

- No heritage concerns other than archaeology.
- Site will need to reflect character of surrounding area – low density, generous landscaping, well designed.
- Potential site for executive homes.
- Risk of surface water flooding.
- Transport Assessment required.

6.1.5 The Site was considered 'Green' in the red/amber/green (RAG) rating in terms of suitability, availability and achievability, with an anticipated timescale for delivery in the medium term (2027-2031). The information contained in the summary could be addressed as part of any future planning application.

6.1.6 We agree that the Site represents a logical and sustainable location to direct the growth required within Deal and consider that the land promoted at Rays Bottom, Walmer must remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered to be wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040.

6.1.7 We are firmly of the view that the allocation of Land at Rays Bottom is a necessary component of the balanced growth strategy put forward within the Pre-submission

DDC Settlement hierarchy (2022): <https://www.doverdistrictlocalplan.co.uk/uploads/pdfs/settlement-hierarchy-and-confines-topic-paper-aug-2022.pdf>

Dover District Local Plan, comprising an appropriate mix of small, medium and strategic-scale sites deliverable across the Plan period. The allocation of well-located, reliable, greenfield sites such as our client's at Land at Rays Bottom is necessary in order for DDC to meet the growing need for new homes in the district and ensure that DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan.

6.1.8 Notwithstanding our client's support of the draft allocation within the Regulation

19 Plan in principle, we suggest that the policy text be re-visited prior to submission, to allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential. It is submitted that the SAP15 policy wording should be amended to more accurately reflect the capability

of the Site to accommodate approximately 80 dwellings deliverable early in the Plan period. Further commentary on this point is provided below in section 6.3.

6.2 Site and Surroundings

6.2.1 The Site is situated to the south of Walmer, Deal between Liverpool Road to the east and Hawksdown to the west immediately adjacent to existing residential development.

6.2.2 The Site comprises an undeveloped regular parcel of land in arable use totalling approximately 4.43 hectares, forming part of a larger arable unit to the south. The Site is bound primarily by hedgerow vegetation to the east along Liverpool Road with dense woodland and mid-storey vegetation to the north. The west boundary comprises a mix of hedgerows and trees set along the perimeter abutting residential development on Hawksdown.

Figure 6.1: Approximate Site Location (courtesy of Google Earth)

6.2.3 The wider surroundings are characterised by its edge-of-settlement location with low density existing residential development along Hawksdown to the north and west and undeveloped agricultural land to the east and south. The landscape assessment which informed the HELAA recognises that the site is:

“...relatively discrete, having housing on two sides and being located on the side of a dry valley. The sensitivity of the site is moderate as views in are limited and the flow of housing down the slope would not detract. The impact of development on the wider landscape would be minimal and this could be reduced further by providing additional buffer of landscaping along the southern boundary”.

6.2.4 The Site enjoys access to a number of day-to-day facilities and services which are within a reasonable walk distance, including primary and secondary schools, local shops, healthcare, employment, and public transport links within Walmer and Deal including Walmer mainline station and frequent buses along Dover Road between Dover, Deal, Sandwich and Canterbury.

6.2.5 In terms of overarching planning constraints, the site is not subject to any overarching landscape or ecological designations and is not itself subject to any heritage constraints.

6.2.6 To the north east of the site – with intervening land - is the grade II Registered Park and Garden of Walmer Castle which is a scheduled monument, and nearby to the east is an undesignated historic First World War Aerodrome and Second World War radar station within an area of Archaeological Potential.

6.2.7 There is a low risk of a surface water flow path through the non-wooded area of the site, and along the western boundary – both of which can be easily accommodated in a residential layout.

6.3 Development Capacity

6.3.1 As set out above, the proposed allocation is for 75 dwellings, reduced from 100 dwellings at the Regulation 18 stage. The reasoning set out in the “selection of Site Allocations” (September 2022) supporting document for the reduction in capacity is “To enable a scheme to come forward which reflects the character of the surrounding area, and enable sufficient landscaping to be provided”. Excluding the wooded area to the north of the site, the provision of 75 dwellings would equate to a density of 21 dwellings per hectare, with 100 dwellings equating to 28 dwellings per hectare. For the reasons set out subsequently, we consider that sites located in sustainable locations such as Land at Rays Bottom, adjacent to Deal, should take opportunities to maximise the potential for housing – whilst respecting the context and character of the area. For this reason we consider that the appropriate capacity is a little greater at approximately 80 dwellings, as part of a high-quality, landscape-led residential scheme capable of delivery within the early phase of the Plan period.

6.3.2 At this early stage, detailed proposals have not yet been advanced, however it is anticipated that any future development of the site – at 80 dwellings - will be of appropriate density, reflecting local patterns of development and sensitively designed to respect the existing character of the area, the topography of the site and to allow transition to the rural landscape and respond to its coastal location.

6.3.3 Particular care will be taken with regard to the low-risk surface flow route, impact on nearby heritage assets and ecologically sensitive sites with a particular emphasis on opportunities for biodiversity habitat creation and enhancement. Fernham Homes have a strong track record of delivering high quality housing whilst respecting such characteristics and constraints.

6.3.4 In terms of access, primary vehicular, pedestrian and cycle access to the site shall be provided from Liverpool Road. Road widening and traffic management should be provided to Liverpool Road along the frontage of the site and where possible up to the junction with Gram's Road; along with an extension to the 30mph speed limit zone. Appendix 1 indicates how this can be achieved, with the provision of a footway and suitable carriage width which meets relevant highways requirements. Alternatively, the footway could not be provided, and instead a wider carriage way could be provided. Appendix 1 also clearly shows how the required visibility splays can be achieved on land either within the site, or within the public highway.

6.4 Draft Policy Allocation ‘Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer’ (SAP15)

6.4.1 As introduced in the preceding sections, our client's Site at Land at Rays Bottom is allocated for residential development within the Dover Pre-submission (Regulation 19) Local Plan. For ease of reference, the draft policy wording is as follows:

"SAP15 - Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002)

The site, Land at Rays Bottom between Liverpool Road and Hawksdown, as shown on the policies map is allocated for an indicative capacity of 75 dwellings.

Development proposals for the site shall include the following:

- a) Development should be low density and sensitively designed to respect the existing character of the area, the topography of the site and to allow transition to the rural landscape;
- b) A sensitive landscaping scheme and appropriate landscape buffer to the south, determined by a Landscape Visual Impact Assessment is required to mitigate the impact of development on the wider countryside and to provide opportunities for biodiversity habitat creation and enhancement responding to the nearby BOA and local wildlife site;
- c) The existing wooded area to the north of the site and the tree and shrub line along the western boundary, shall be maintained and enhanced as areas for biodiversity habitat creation.
- d) Primary vehicular, pedestrian and cycle access to the site shall be provided from Liverpool Road. Road widening and traffic management should be provided to Liverpool Road along the frontage of the site and where possible up to the junction with Gram's Road; along with an extension to the 30mph speed limit zone;
- e) The Transport Assessment that is required to be carried out in accordance with Policy TI2, must consider and identify mitigation (potential widening/traffic management measures/junction improvements) for the surrounding local road network, taking into account the cumulative impact of this and other sites allocated in this Plan, including (but not limited to) Liverpool Road and Gram's Road up to and including the Gram's Road/Dover Road junction.
- f) A site-specific Flood Risk Assessment must be carried out in accordance with Policy CC5. This shall also inform the application of the Sequential Approach to the layout of the site by locating the most vulnerable elements in the lowest risk areas;
- g) In accordance with Policy SP13, a wintering bird survey must be undertaken in advance of a planning application on the site. If the bird survey identifies that the development will exceed the threshold of significance, mitigation will be required. A suitable scheme of mitigation will need to be submitted with the planning application for the site;
- h) An Archaeological Assessment for the site must be carried out in accordance with Policy HE3 Archaeology, the results of which should inform the layout and design of the development which is necessary to avoid harm to any archaeological assets identified through the assessment;
- i) A Heritage Assessment carried out in accordance with Policy HE1 is required to identify any necessary measures to avoid or minimise harm to the nearby heritage assets; and
- j) The occupation of the development should be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider. Development should provide a connection to the sewerage system at the nearest point of adequate capacity and ensure future access to the existing sewerage infrastructure for maintenance and upsizing purposes."

6.4.2 To be clear, our client remains wholly supportive of the principle of the allocation of the Site for residential development. Fernham Homes has a strong track record of swift delivery, and commits to being able to deliver the Site within the early phase of the Plan period. We agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client's Site can be made – and therefore object to the capacity identified.

6.4.3 Accordingly, we say that the allocation of Land at Rays Bottom is necessary in order for DDC deliver proportionate and high-quality sustainable growth within Deal, meet the growing need for new homes in the district and ensure that DDC can have greater confidence in meeting its market and affordable housing targets in full.

6.4.4 It is submitted that the SAP15 policy wording is sound and appropriately reflects the capability of the site to deliver a sensitive, landscape-led residential development but the wording should be amended to reflect the capability of the Site to accommodate approximately 80 dwellings, deliverable with the early phase of the forthcoming Plan period.

6.4.5

6.5 Strategic Justification for Development

Spatial Strategy

6.5.1 The proposed Housing Distribution for the district across the Plan period is established within Policy SP3 'Housing Growth' which sets out that the distribution

of housing growth in the district is primarily based on the settlement hierarchy and influenced by site availability, environmental constraints and factors of delivery.

6.5.2 Rightly, a key aim of the growth strategy is to focus development in the least sensitive areas of the district in order to conserve and enhance the Dover's rich natural and historical environment.

6.5.3 A retained theme from the adopted Plan, is that DDC's settlement strategy continues to focus on the development and regeneration of Dover Town and Whitfield (3381 dwellings). Approximately half of the district's planned housing is in this location, the majority of which again is to come forward as part of the strategic urban expansion of Whitfield 'SAP1' (2200 minimum dwellings).

6.5.4 Development will then be focused in the District Centre of Deal (223 dwellings), and the Rural Service Centres of Sandwich (227 dwellings) and Aylesham (649 dwellings). Following the settlement hierarchy rigidly would distribute housing in the preceding order, however the Plan recognises that housing delivery in Deal and Sandwich continues to be constrained by a number of factors including flood risk, ecological designations, heritage and highways. Further, Deal has experienced generally high levels of windfall development across the previous Plan period and accordingly there is now a dwindling supply of available, suitable sites in both settlements. On account of this context, DDC have sought to direct the majority of the remaining higher order settlement growth (outside of Dover & Whitfield) to Aylesham, through the strategic expansion to the town.

6.5.5 Outside of the four principal district settlements, the Rural Settlement Hierarchy (August 2022) identified that the majority of lower-order settlements in the district emerge as having a low level of facilities within the hierarchy and six settlements having none of the key indicators of sustainable services. Plainly, these settlements offer very limited opportunities for growth and it is evident that the forthcoming Plan will remain reliant on the settlements of Dover (including Whitfield), Deal, Sandwich and Aylesham to deliver the housing growth that is required.

6.5.6 Given this context, it is clear that where available and suitable opportunities for residential development do exist within the district's higher order settlements, including our client's Site at Land at Rays Bottom, Walmer which can provide a policy compliant level of much-needed affordable housing, it is imperative that the effective use of these sites are appropriately maximised in accordance with national policy objectives.

6.5.7 Notwithstanding our client's in principle support of the proposed strategy, we are concerned that highly sustainable, edge-of-settlement sites, particularly in higher tier settlements such as Deal have not been fully maximised to reflect their accessible location and capability to accommodate a greater quantum of development. On this basis, we are concerned that the strategic objectives underlying draft policy SP3 'Housing Growth' may not be fully realised, to the detriment of market and affordable housing delivery and the wider policies seeking to conserve and enhance the district's natural and historic environment.

6.5.8 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Deal (whilst ensuring that sensitive characteristics are reflected), and this has not been undertaken – for example at Rays Bottom, Liverpool Road. It is our view that the site has sufficient capacity to deliver approximately 5 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

6.5.9

Greenfield Development and Consistency with Housing Trajectory

6.5.10 Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs Area of Outstanding Natural Beauty, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, greenfield development will inevitably be required if DDC is to meet its housing and development commitments in full moving forward.

6.5.11 In our view, sustainable and accessible unconstrained sites logically located adjacent to existing urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan period, to support the role and timescales of strategic urban extensions and to deliver the significant number of new homes that are required within the forthcoming Plan period.

6.5.12 Within Deal itself, meaningful housing growth is inherently constrained on three sides due to the restrictive effect of the coast to the east and Flood Zone 2/3 land and ecologically sensitive sites including SSSIs to the north and west. Alongside overarching objectives to minimise the incursion of widespread development into the rural countryside, the scope for significant Plan-led development in Deal is becoming increasingly limited. Accordingly, we firmly agree that sites to the south of Deal, including that of our clients in Walmer, represent the least sensitive and most logical locations for future Plan-led growth, making effective use of the availability of sites in close proximity to the Urban Area and key infrastructure including Walmer train station.

6.5.13 In terms of housing delivery in Deal, the development of Land at Rays Bottom (75 dwellings) is anticipated to deliver completions with Years 9-11 of the Plan period, although as detailed above our clients have a strong track record of swift delivery, and consider that it could be

delivered ahead of this. When combined with extant permissions within Deal and nearby allocations at Land off Cross Road, Deal (SAP14) and Deal Small Housing Sites (SAP16) totalling 100 dwellings and 48 dwellings respectively, our client's site will assist in delivering a steady supply of new homes within Deal across the majority of the early and middle phases of the Plan period and contribute to providing genuine choice in the market.

6.5.14 Moreover, in our experience, greenfield edge-of-settlement sites are typically most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that are urgently needed in the district.

6.5.15 The Sustainability Appraisal Scoping Report (2018) sets out that over the course of the adopted Plan period, the key sustainability issues facing Dover District in relation to housing are as follows:

Population growth, household growth and demographic change will place additional demand on key services and facilities such as housing, health, education and social care. The Local Plan offers a new opportunity to manage these pressures, encouraging mixed communities;

There is a need for affordable housing across the District. At present, the mean price of dwellings is higher than the national average. The Local Plan will help to expedite its delivery; and,

There is the need for a mix of housing types that cater for the needs of a range of people, including the growing number of single person and elderly households. Without an up-to date Local Plan, the required housing is less likely to be delivered.

6.5.16 It is evident that the new Dover Local Plan must allocate a mix of reliable sites capable of steadily delivering not only the quantum of housing that is required, but also the associated public infrastructure, affordable housing and a mix of unit types and tenures suitable for a wide range of future occupants.

6.5.17 The Housing Topic Paper (September 2022) provides further context and summarises under Chapter 7 'Historical Housing Delivery' that Dover has historically placed significant reliance on windfall development over the current adopted Plan period, with windfall sites accounting for 44% of all completed dwellings over the preceding 10-year period.

Figure 1: DDC Brownfield / Greenfield Completions 2010/11 to 2020/21
(source: Housing Topic Paper September 2022)

6.5.18 Moreover, it is highlighted that at the beginning of the 10 year period, the majority of new dwellings were being built on brownfield land. However, from the monitoring year 2013-14 onward development on greenfield land began to play a much greater part in the location for new development as show in figure 1 above. This trend of increased housing development on greenfield land is a result of the allocations within the CS and Land Allocation DPD being built out and is associated with an approximate doubling of completions in the district. From 2013-14 onwards the average number of completed dwellings per annum has doubled to that of the early years of the CS, as the strong delivery rates of greenfield sites formed the predominant source of housing. This is despite an overall declining trend of brownfield completions towards the latter half of the Plan period. This is not an uncommon trend whereby in the majority of local planning authorities areas, opportunities for available and suitable sites in urban centres typically dwindle throughout the Plan period.

6.5.19 In light of the above context, it is clear that the adopted Dover Local Plan suffered from an initial under delivery of Plan-led housing growth in which windfall development sources were largely required to take up the slack in the early phases of the Plan period, as major allocated sites failed to deliver at the rates initially expected.

6.5.20 It is equally apparent that initial slow completions rates were quickly renewed once greenfield allocations commenced development, feeding into strong completions in the latter half of the Plan period. In our experience, greenfield sites are typically associated with stronger delivery rates and provide a reliable source of housing growth. The allocation of an appropriate mix of sites and scales is required in order to ensure steady and sustained Plan-led housing delivery across the Plan period and to avoid a reliance on windfall development to address the shortfall.

6.5.21 Consequently, given all of the above, it is imperative that the new Local Plan allocates a sufficient variety and scales of site capable of both ensuring steady and sustained housing completions and capable of making necessary contributions to public infrastructure and services, affordable housing and mix of unit types to address the key issue raised in the Sustainability Appraisal.

6.5.22 In our view, edge-of-settlement greenfield sites such as our client's Site Land at Rays Bottom, Walmer represents the most reliable and sustainable source of housing delivery for the Plan period. Such sites are typically less constrained by wider factors and less affected by unforeseen delays such as land contamination. Moreover, greenfield sites typically are more capable of delivering the policy compliant affordable housing, unit mix and developer contributions that are urgently needed.

6.5.23 It is understood that the Plan is predicated on the delivery of strategic scale development at Whitfield comprising the development of circa 2,200 new homes. Consequently, in order to avoid a repetition of the previous Plan, DDC have sought to ensure that a pool of reliable

greenfield allocation, including that of our client's are included within the Plan, capable of delivering the early and middle phase growth that is required within the housing trajectory prior to the commencement of stronger delivery from major allocations later in the Plan period.

6.5.24 We note that within the Housing Trajectory 'Appendix D', DDC have included allocated units from Years 4 onwards, with extant permissions (accounting for 5% non-implementation) demonstrated to be solely capable of delivering the growth required in Years 1-3. Notwithstanding our client's considerations that it can deliver at Land at Rays Bottom early in the plan period, we support this pragmatic approach and suggest this represents a sound basis on which to set the district's housing trajectory. We note also the inclusion of an appropriate windfall allowance and the included contingency buffer to further ensure reasonably flexibility in the housing supply.

6.5.25 On account of all of the above, we submit that the allocation of Land at Rays Bottom, Walmer forms part of a sound strategy for growth in the district for the forthcoming Plan period. The Site is capable of delivery within the early phase of the Plan period. The Site represents a reliable source of housing growth in a highly sustainable and accessible location adjacent to the existing settlement boundary of Deal and Walmer mainline station, consistent with DDC's preferred settlement strategy. Proposals remain at an early stage, however the Site is unconstrained and is considered capable of providing a high-quality landscape-led residential development including a mix of unit types and tenures, a meaningful contribution to the supply of affordable housing and contributions to public services and infrastructure, benefiting both existing residents and future occupiers. However, we object on the submission that the Site is capable of making a greater contribution to the district's housing need and suggest an amended wording of the policy to allocate the Site for approximately 80 dwellings.
Policy SP4 'Windfall Development'

6.5.26 Separately, we note the provisions of policy SP4 windfall development. Proposals at Rays Bottom, Walmer would likely be acceptable in principle under this policy and we support the inclusion within the Plan for appropriate, proportionate windfall development.

6.5.27 Our client is fully committed to the delivery of the Site which is available and anticipated for delivery in the early phase of the Plan period. Notwithstanding the provisions of SP4, it is reiterated that our client fully supports the allocation of the Site under SAP15 as the most appropriate mechanism for delivery of the Site and the opportunity for genuinely Plan-led development in Deal, the provision of associated benefits to public services and infrastructure, contribution to affordable housing supply and the delivering of a mix of house types and tenures.

Infrastructure Delivery

6.5.28 Paragraph 11 of the Framework is clear that all plans should promote a sustainable pattern of development. This includes aligning growth and infrastructure. Paragraph 20 goes on to confirm that strategic polices will be expected to make sufficient provision for associated development infrastructure.

6.5.29 In this regard, draft policies SP11 'Infrastructure and Developer Contributions' and SP12 'Strategic Transport Infrastructure' of the emerging Plan form the key strategic polices for infrastructure delivery. We agree that where development would create a need, or would have an impact, or would exacerbate an existing deficiency in infrastructure provision, appropriate developer contributions may be sought.

6.5.30 It is however emphasised that in all developments, infrastructure requirements must be demonstrated to be necessary through assessment during determination of the application on a case-by-case basis. Where new development is proposed, it does not automatically follow that major infrastructure contributions are always required or contribution to strategic infrastructure proposals are appropriate. For instance, it is our client's view that any infrastructure requirements must be demonstrated through a robust and transparent assessment at application stage, taking into account the submission of detailed supporting evidence, for example following consideration of the Transport Assessment in the case of highway infrastructure contributions.

Alignment with Sustainability Appraisal Findings

6.5.31 As part of the preparation of the Local Plan, the Council has identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA) which provides an assessment of how different options perform in environmental, social and economic terms, to help inform which option should be taken forward and combined with wider evidence documents, have been used to determine the growth and spatial strategy set out in the Plan.

6.5.32 Five potential distributions of growth were identified during preparation of the draft Regulation 18 Local Plan:

- Spatial Option A: Distributing growth to the District's suitable and potentially suitable housing and employment site options (as needed to deliver the scale of growth required).
- Spatial Option B: Distributing growth proportionately amongst the District's existing settlements based on their population.

- Spatial Option C: Distributing growth proportionately amongst the District's existing settlements based on the District's defined settlement hierarchy.
- Spatial Option D: Distributing growth in the same way as the adopted Local Plan, focussing most growth in and around Dover town.
- Spatial Option E: Distributing growth more equally across the District's settlements: Dover, Deal, Sandwich and Aylesham, as well as the rural villages.

6.5.33 The conclusion of the SA was that Spatial Options C (settlement hierarchy) and D (adopted Core Strategy with Dover focus) generally perform the most strongly against the SA objectives, particularly when delivering the baseline growth scenario. However, given the environmental constraints that exist around Deal and Sandwich, very few suitable and potentially suitable sites have been identified in these towns. Given this, the Council's preferred option for the distribution of housing and economic growth comprises a combination of options A (HELAA sites), C (settlement hierarchy) and D (Dover focus). The distribution of housing and economic growth in the District is therefore primarily based on the settlement hierarchy, and influenced by site availability, environmental constraints and factors of delivery.

6.5.34 On account of the above, our client agrees that the proposed growth strategy, and by extension, policy SP3 in principle represents a sound and evidence-led strategy for growth. However, given the clear acknowledgement of the dwindling supply of available sites in the higher order settlements of Deal and Sandwich, which has necessitated a minor deviation from the strongest performing spatial options, we submit that where sites are available and suitable for development in Deal and Sandwich, these must be fully maximised, reflecting their accessible location and their ability to reduce the need to develop into less accessible and more sensitive sites elsewhere in the district to accommodate the growth that is required.

Site Specific Sustainability Appraisal

6.5.35 Land at Rays Bottom between Liverpool Road and Hawksdown is included under HELAA reference 'WAL002' within the SA Site Assessment (Appendix F). The site generally performs strongly, with particular positives identified with regards to SA Objectives related to housing and the economy.

6.5.36 We contest the assessment of 'minor negative' in regard to sustainable transport. To the contrary, the site is well-located adjacent to the settlement boundary of Deal with access to a range of high-quality day-to-day services and access to Walmer train station for convenient access to larger settlements. In what is otherwise a largely rural district, we strongly disagree with the suggestion that an edge-of-settlement site represents a less than preferable location in respect of sustainable travel and day-to-day access to amenities.

6.5.37 We also note negatives associated with the development of a greenfield site, including loss of agricultural land, however this would be true of the majority of greenfield sites and it is abundantly clear that Dover's housing need cannot be met solely on brownfield sites. We note also minor negatives / uncertain associated with biodiversity, the historic environment and landscape, however it is not clear whether these take into account the potential for high-quality design, biodiversity enhancement and landscape mitigation. Irrespective, these are not considered to outweigh the clear and tangible sustainability benefits associated with edge-of-settlement development, the site's consistency with the preferred spatial options and the wider benefits associated with reducing the need to develop into lesser accessible, more sensitive sites to otherwise deliver the housing growth that is required.

Summary

6.5.38 Taking all of the above into consideration, our client is wholly supportive of the inclusion of land promoted at Rays Bottom, Walmer as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040.

6.6 Deliverability

6.6.1 Prior to the current appeal proposal, the Site has had no recent planning history of a residential nature or a history of unimplemented permissions. There are not considered to be any impediments to the Site being allocated for development commencing within the early (or mid) phase of the Plan period.

6.6.2 Fernham Homes – a local SME with a strong history and track record of delivery, together with an adopted and robust business plan for growth – is promoting the site, and are poised to commence work on its residential development promptly after the adoption of the Local Plan.

6.6.3 Combined with the delivery of extant permissions, an appropriate number and scale of wider allocations within Deal (including SAP 14 and SAP 16) and elsewhere across the district, this would ensure the steady delivery of housing both in Deal and in Dover district across the majority of the Plan period and support the role and timescales of strategic housing delivery at Whitfield towards the latter half of the Plan period.

6.6.4 For the reasons set out in this representation, the Site is considered suitable for the residential development of approximately 80 dwellings. The Site is adjacent to the overarching urban area of Deal, one of the four higher order settlements in the district and DDC's preferred locations for Plan-led growth within the district. Development at land at Rays Bottom would form a natural and logical development south of Walmer, Deal

with excellent accessibility to day-to-day services and amenities via active travel modes within Deal itself and convenient access to public transport infrastructure including Walmer train station for onward travel to key neighbouring settlements including Dover, Ramsgate, Canterbury and Ashford.

6.6.5 Finally, in respect of suitability there are no physical limitations or problems such as access, infrastructure, flood risk, hazardous risks, pollution or contamination.

6.6.6 On behalf of the landowner, we submit that there are no known financial restrictions that would impact upon the viability of a future housing scheme or that would prohibit development coming forward within the mid-stages of the Plan period. To the contrary, we consider there to be an opportunity to deliver a high-quality, sustainably located residential development scheme consistent with DDC's proposed growth strategy comprising an appropriate mix of market and affordable housing and capable of contributing to a range of community facilities, public infrastructure and services locally.

6.6.7 At the time of writing, proposals at Rays Bottom, Walmer remain at an early stage, however our clients are firmly committed to progressing the delivery of the Site on adoption of the Plan. The project team therefore does not anticipate any absolute constraints to the commencement of delivery on-site early in the plan period (potentially 2025-26) and completion by 2028/9).

6.6.8 The Site is in single ownership and there are no complicated legal agreements or covenants that would prohibit the ability to bring forward the Site in line with DDC's housing trajectory within the mid-phase of the Plan period. The Site is therefore considered available and achievable for the purposes of the tests of deliverability.

7 Conclusion

7.1 Summary

7.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited in response to the DDC Local Plan (Regulation 19) consultation which runs until 9th December 2022.

7.1.2 Our client is promoting 'Land at Rays Bottom, Walmer, Deal' for the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan within an indicative capacity of 75 dwellings under policy reference 'SAP15'.

7.1.3 Taking the above representation contents into consideration, we remain wholly supportive of the principle of the allocation of Land at Rays Bottom and agree that the Site represents a logical and sustainable location to direct necessary growth within Deal.

7.1.4 Accordingly, we consider that the land promoted at Rays Bottom, Walmer must remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered to be wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040. However, it is imperative that the effective use of these higher-order settlement sites are appropriately maximised in accordance with draft policy SP3 of the emerging Plan, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and object solely on this basis.

7.1.5 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Deal, and this has not been undertaken – for example at Land at Rays Bottom, where it is considered that the site has sufficient capacity to deliver approximately 5 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

7.1.6 Outside of the point regarding capacity, it is submitted that the SAP15 policy wording is sound and appropriately reflects the capability of the site to deliver a sensitive, landscape-led residential development with an indicative capacity of 80 dwellings, deliverable with the early phase of the forthcoming Plan period. Without prejudice to our client's support in principle of the proposed allocation, we would urge the Council to re-visit the allocation policy text and allow a higher dwelling capacity.

7.1.7 Accordingly, we say that the allocation of Land at Rays Bottom forms part of a balanced growth strategy comprising an appropriate mix of small, medium and strategic-scale sites deliverable across the Plan period. The allocation of well-located, reliable, greenfield sites such as our client's at Land at Rays Bottom is necessary in order for DDC to meet the growing need for new homes in the district and ensure that DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan.

7.1.8 In addition to being a highly sustainable and logical edge-of-settlement allocation, the Site is deliverable in a single land ownership with no viability issues, legal or third-party constraints present. Our client is fully committed to the delivery of land at Rays Bottom Farm and there are no impediments to the Site being capable of delivery within the mid-phase of the Plan period.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	For the reasons set out in the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359), the capacity of Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002) and Policy SP3 - Housing Growth should be increased to approximately 80 dwellings.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Please refer to the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359).

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP12
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>DDC Note <i>The text below is an extract from the original representation which is attached to SDLP1438.</i></p> <p>SP12 Strategic Transport Infrastructure</p> <p>For SP1 and SP12 to be linked up, Bus services should be better integrated with the rail service timetables on the line running from Sandwich and Deal through Dover to Ashford, and the line running from Dover to Canterbury and Faversham and Victoria. See comments in SP1, on the many engineered cycle routes needed.</p> <p>DDC are on record 2021 proposals generating levels and types of traffic movement resulting in severe cumulative residual impacts in terms of capacity and road safety will not be permitted'. The real-world constraints of the EK road system (A258, A2, A256,) mean little can be done to ameliorate the situation, without long term road closures needed to dual the A2 from Jubilee Way to Lydden Hill. Neglect by DfT and Highways England means that with biometric passport checks in 2023, residents can expect gridlock again and again.</p> <p>Road improvements to separate local traffic from through freight traffic must be done to save lives; road improvements that central govt must pay for. The separation needed must include flyovers and underpasses and foot bridges, including under / over the A20 route through Dover town. It should be noted that Dover has too much experience of the gridlock and chaos caused by cross-channel delays, especially the community of Aycliffe, (and Guston may suffer similar blight). With more extreme weather events expected, and with 'frictionless freight flow' now a thing of the past, holding areas for freight OUTSIDE THIS DISTRICT, near the M25, are needed more now than they were before.</p> <p>The Council's 'commitment to work with HE on long term improvements to A2' must be more than pious lip-service reiterated to political friends in central government. It must result in the complete dualling of the A2 and Jubilee Way from Eastern Docks to Lydden Hill. The separation of local traffic from through freight traffic by means of flyovers and underpasses at the Duke of York, and Whitfield roundabouts must be done at the expense of central govt, Dept for Transport/ Highways England. Residents of the garden of England should not suffer because national traffic flows on our roads, given the failure of implement freight to rail policies. SP12 would become sounder with the following: "Proposals which assist in the provision of alternative transport modes across a dualled A2 will be encouraged. The Council will work with Highways England and Kent County Council to improve accessibility elsewhere in Kent between the two principal access routes to the Port of Dover, the M20 and the A2. The Council will work with partners to improve access to the local and High Speed rail network."</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>DDC note: text below extracted from the SP1 section of the original representation.</p> <p>'Mitigation' should include the following in order to become effective and sound. ' All new developments of over 40 dwellings must contribute to a Community Infrastructure Levy so that engineered kerbed cycle routes can enhance cycle paths 1, 2, 15, 16, 17, and new engineered cycle tracks must be made safe in winter dark afternoons, new engineered cycle routes must link Whitfield Urban Development with Kearsney and Martin Mill stations and Elvington with Snowdown and Aylesham and Shepherdswell Stations, especially given the rural bus cuts implemented in these villages in 2022. Also trains and buses on the key commuter routes should be equipped to carry (electric + cargo) bikes. Cross referenced with DM policy TI1. CIL is also needed to pay for other infrastructure essential for the local plan to be sound which is referred to below.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP12
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>9 Transport Links Roads</p> <p>9.1 The village itself sits on an unclassified road along which there are a series of steep arterial lanes to access other parts of the parish. Figure 2 shows a map indicating road transport links (<i>See attached document for map</i>)</p> <p>9.2 The road was downgraded from a B road upon completion of the A20 link in the mid 1990s. Unfortunately, unlike many recent KCC developments at Lamberhurst, Bells Yew Green, Manston Northern Links Road and Pegwell Bay, no traffic calming measures were put in place to encourage use of the recognised A20 route and the valley became a 'rat run' for commuters place heading out from the new developments at Whitfield and the East Kent coast.</p> <p>9.3 The volume of traffic along the main road has developed over recent times as it has become a through route for residents of Whitfield and River wishing to access the M20 from the Alkham Valley road.</p> <p>9.4 The increase in traffic noise, pollution and fear for residents' safety led to a traffic action group being formed in the village to monitor the situation and bring forward proposals for traffic calming as part of the defined actions within the neighbourhood plan.</p> <p>9.5 That traffic action group reported in 2017 that there were approximately 7000 to 10000 traffic movements per day passing through the village as shown in the graphs below :</p> <p><i>(see attachment for graphs and images)</i></p> <p>9.6 The housing development plan for the District and The Transport Plan 2015-2030 took no account of this problem .</p> <p>9.7 The current KCC and Dover Transport strategic priorities concentrate on the bifurcation of traffic from and to the port of Dover along the M20/A20 and M2/A2 routes, increased provision for lorry parking and access to Ashford and Thanet Parkway stations.</p> <p>9.8 In terms of Dover the current transport priorities are identified as the Sandwich coach and car park, a study of the A257, Whitfield Bus Rapid Transit system, projects to develop a Park and Ride to Whitfield, the A2 Dover to Lydden improvement, A260 upgrade, Dover waterfront link to the town centre, Dover Priory Car Park, Dover Western Docks Revival, Improvement of Sandwich Station, North Deal A258 Easter connecting road, Deal improvements and alternative access routes to compliment the A258 corridor, the A258 study review improved strategic network to manage the port traffic and improvements to the A2/A258 roundabout.</p> <p>9.9 Since 2017 the Covid pandemic reduced the amount of traffic along the Alkham Valley but that is now believed to have reached pre-pandemic levels. This is further exacerbated by the increase in the number of speeding vehicles. Speedwatch have regularly reported vehicles driven in excess of 54mph and one driver was recently prosecuted for approaching the 30mph limit at 70mph. On average a Speedwatch session delivers about 40 vehicles per hour exceeding 35mph in the 30mph limit</p>

	<p>9.10 The new plan being proposed by Dover District states that improvements must be made to the roundabouts at Whitfield , the Duke of York and assessments should be made of local infrastructure including the Alkham Valley Road. For information although a historic document I have attached a link of the Traffic Action Report which indicates traffic levels 5 years ago. Traffic is now back to those levels following covid and will only increase with the new proposals.</p> <p>9.11 As can be seen above many assessments have been carried out, this data and analysis is available from local Speedwatch Groups</p> <p>9.12 A Highway Improvement Plan was developed and yet nothing has been done.</p> <p>Comment 9</p> <p>Transport and Infrastructure – (DDC Plan –TI1 - 10.1-10.6) (DDC note - assigned to SP12)</p> <p>I believe serious consideration must be given immediately to put in place management actions to ensure the safety of the Alkham Valley Road and to mitigate the effects of the Whitfield Urban Expansion.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Traffic measurement flows were taken just post pandemic and clearly show a flow much lower than the parish's normal traffic volume. If development is to be permitted it should be linked to a S106 agreements to improve the facilities within the parish, parishioners have mentioned that they "have a bus pass, but have no buses to use it on" The Parish Council should be consulted on allocation of funding to provide Road improvements to Barville Road. Greater consideration to prevent ad hoc use of 'windfall sites' which do not meet specified road safety or other material standards.</p> <p>Proposed developments will put additional strain on the current drainage system and inevitably cause traffic congestion with resulting increase in pollution levels.</p> <p>Whilst we acknowledge that the parish must grow, future developments should not put additional strain on the current infrastructure.</p> <p><i>(DDC note - this is an extract from full representation SDLP1639)</i></p>

<p>1 - Which Part of the Local Plan does this comment relate to?Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	<p>Eythorne</p>
<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	You have plans for Whitfield and Dover that Eythorne will be helping to fund, but no plans to allow safe travel for cyclists leaving Eythorne via Kennel hill or Barville rd. Both of these roads are too dangerous for safe cycling or walking. Barville road is also unsuitable for the number and size of trucks currently using it. Those of us using it regularly find trucks crossing the centre line whilst trying to negotiate the bends on this narrow road. Do we need to block it like the idiots from the eco groups do to get something done?
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Strategic vision re Transport SP Policy 12 Pages 73-79 SAP36 St Andrew//Mill Lane</p> <p>It is feared that the increase in additional traffic would be unacceptable from a proposed site increase of 50+ houses . This is simply too big and there are few, if any improvements that could be made to alleviate this . Allowing for an additional of a minimum vehicle use of , 4 journeys household per day x57 = 228 additional vehicle movements. More than the suggested 20% increase predicted . Existing traffic movements recorded in and out of St Andrews Gdns recorded 246 vehicles movements during a period 6am -9pm, Speedwatch have recorded a total of 130 vehicles coming into and exiting the village along Mill Laned during the period 7,30am-9.30am See photos attached of the issues of congestion along Mill Lane where the road is at points single track. This being the suggested exit proposed to Eythorne/Sandwich /256 . Should vehicles go in the opposite direction to Church Hill the road allows for single traffic at most times of the day. There is no footpath and pedestrian access is dangerous. Traffic would then enter on to Coxhill (see further details under Sec SAP37) KCC report states The development of this site for residential use would place additional pressure on the surrounding highway network, in particular St Andrews Gardens, Mill Lane and Church Hill. KCC Highways advice should therefore be sought as part of any development proposals to ensure that any cumulative impacts can be mitigated The local bus has recently been given a short term reprieve after Stagecoach decided the route was not viable and as yet no plans have been formulated to offer residents a viable alternative. Unless this is forthcoming current and any future residents will use their cars DDC acknowledge climate change issues do need to be tackled in a holistic manner There are no suitable cycle paths and in addition being a rural community we have many horse riders using the lanes which adds to the worry that more cars equals more dangerous conditions. The Transport Report whilst acknowledging the issues does not provide the necessary solutions.</p> <p>SAP37 SHE006 Land at Botolph Street Farm Coxhill and the lower end of the village do not have access to a bus service ,without a walk up Church Hill ,with no pavements , to pick up the bus at Mill Lane, which as has been said is under threat , Whilst this part of the village is nearer to Railway Station is via a non-existent pavement from Whittington Terrace , the nearest houses to the proposed development, to the junction of Westcourt Lane. See photos of pedestrians having to go into residents gardens to avoid traffic. This is not only the major route out of the village for our residents but also those from our neighbouring villages ,</p>

	<p>SAP28/29/30 at Eythorne and Elvington face even larger scale developments . These will undoubtedly have the effect of increasing traffic going through Shepherdswell making a dangerous situation even worse. Allowing for 50% of their homes coming through our village twice a day that is a further 350 traffic movements.</p> <p>Speedwatch , authorised and run in association with Kent Police, have undertaken sessions along Coxhill when in a period from 7.30am-9am 255 vehicles were observed going out of the village , and on another occasion between 4,30pm-6pm 211 coming back into the village.</p> <p>DDCs own document highlights potential issues with this site such as :States the cumulative impact on of this AND OTHER developments on common road use.</p> <p>.</p> <p>Some widening works may be required at the access point Coxhill Road is narrow, and is particularly constrained to the east of the site by on-street parking. Any proposals coming forward on the site should seek the views of KCC Highways at an early stage to ensure that the cumulative impacts of development can be accommodated by the surrounding roads.</p> <p>No footway serving site.</p> <p>Concern regarding cumulative impact from potential allocation sites on wider highway network, particularly routes through to A2/A256 (issues with width, on-street parking and significant increase in use of junctions)</p> <p>. More than recommended 400 metre walking distance to nearest bus stops in Mill Lane, but limited services and no footway.</p> <p>It would be wise to note a recently agreed and yet to be built Community Land Trust development of 13 dwellings is about to start construction within 50 metres of the proposed site at Botolph Farm The effect of this has yet to be assessed . The impact of additional vehicle movements and the removal of on road parking for existing residents may well increase the speeds of traffic heading for the A2.</p> <p>Speedwatch group carried out an observation this morning (25/11/22) on Coxhill Rd by Oast House . between 07:30-09:00</p> <p>A total of 336 vehicles were counted heading SW towards the A2. A similar number travelled into the village. This indicates about 200 vehicle movements an hour in each direction. There was considerable congestion, due to a number of lorries, which slowed traffic, but 69 vehicles (1 in 5 - 20%) was exceeding 30mph, of which 7 will be reported for travelling in excess of 34mph (3 at 40/41 mph)</p> <p><i>(DDC note: This representation was made on the IDP consultation and has been duplicated in sections of the Local Plan as referenced by the representor)</i></p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP13 and 3.271
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	In the 2010 Core Strategy, it was recognised that the Lydden and Temple Ewell SAC suffered from poor air quality. At that stage the proposed expansion of Whitfield was considerably less than what is now proposed. This expansion is contrary to Section 2 of the NPPF which requires protection of the environment. The Whitfield development has been extended beyond what was previously proposed, so that it now covers arable land up to the boundaries of 3 ancient woodlands, Captains Wood, Singledge Wood and Waddling Wood. This is contrary to Section 20 and 180 of the NPPF
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Protect the environment by building on brownfield or vacant sites and only where jobs are available nearby or accessible by public transport. We must bear in mind that Dover is currently a net exporter of labour. Bring back the boundaries of the Whitfield expansion to previous plans to ensure the protection of ancient historic woodlands.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Strategic policy 13 - protecting the districts hierarchy of designated environmental sites and biodiversity assets
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	To be sound and effective, SP13 must be underpinned by a requirement that nothing is done without 'robust auditing' (as Wildlife Trusts insisted on in Environment Act 2021). This means that honest, objective, before-and-after evaluations / baseline measurements must be used. Reports paid for by developer applicants are deceptive in the extreme. Developers are ill-placed to self-certify their own work in this area, and DDC need a DM policy requiring Environmental Impact Assessments on all planning applications for developments of over 15 dwellings on greenfield or rewilded brownfield sites. SP13 Policy on International sites includes the very unsound and ineffective and non compliant with Environmental Act 2021 statement d. Wintering bird surveys . . . <i>That when impacts cannot be avoided, appropriate mitigation in the form of new habitat creation / management in perpetuity or provision of sites for these species elsewhere .</i> When wild bird habitats are taken, they fail to thrive, fail to breed and die out. Hence the 6th mass extinction of species. And the species evidenced on just one typical section of East Kent include : breeding Mute Swan, Moorhen, Collared Dove, Cuckoo, Skylark, Meadow Pipit, Blackbird, Cetti's, Reed and Sedge Warblers, Wren, Linnnet and Reed Bunting. It is also a partial feeding area for a number of species such as Heron, Little Grebe, Grey Partridge, Kestrel, Buzzard, Black-headed and Herring Gulls, Woodpigeon, Stock Dove, Barn Owl, Swift, Swallow,

	<p>House Martin, Yellow Wagtail, Dunnock, Song Thrush, Carrion Crow, Rook, Starling, House Sparrow and Chaffinch. Historically Redshank, Lapwing, Snipe and Yellow Wagtail used to nest here. Many species of native plant and habitat for invertebrates, mammals such as bats, Hedgehogs, Harvest Mice and Water Voles will also be lost. Losing these species will be a considerable biodiversity loss and contrary to the requirement for the unsatisfactory 10% biodiversity gain and KCC requirement for 20% biodiversity net gain. The Kent recorder is also concerned about the area because of rare flora, bats, fungal species which need protecting.</p> <p>The UK has lost 50% of its biodiversity, we are in the middle of a crisis. All nature is precious. Each site must be carefully assessed on its merits, all trees should be retained and developments fit around and protect them. Each mature tree has a great value in terms of amenity value and to sequester carbon.</p> <p>The AONB is very important to the character of Dover district and along with the heritage coast underpins the tourist industry. A clear buffer should be maintained between the built environment of settlements and the AONB boundary.</p> <p>Irreplaceable habitats g - not sound - not compliant with NPPF 21 - a line must be drawn where development will not happen. Ancient trees and woodland CAN NOT be replaced and there should not be a get out clause where compensation can be made as they are priceless.</p> <p>Locally designated environmental sites -SP13 h- should also have full protection and there should not be the get out clause for developers that clever lawyers can argue a case for their destruction if the right money is offered.</p> <p>The mitigation hierarchy is too weak and offers developers too many options. We are in the midst of a climate and nature crisis. NPPF 21 requires that all development be sustainable - legally this must surely require that nature and biodiversity are left intact for future generations. As all of our survival is intrinsically linked with nature then what could be more sustainable but to put nature first?</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>More robust auditing when assessments are made of biodiversity in areas ie developers cannot self certify.</p> <p><i>That when impacts cannot be avoided, appropriate mitigation in the form of new habitat creation / management in perpetuity or provision of sites for these species elsewhere .</i></p> <p>....should be changed to <i>That when a proposed development is deemed to cause potential adverse impacts to habitat of qualifying bird species, permission should not be granted.</i></p> <p>The same should be applied to other protected species.</p> <p>Protect all trees with TPO's, this will do far more for meeting the zero carbon commitments than anything else.</p> <p>SP13 e - add to this <i>A clear buffer must be maintained between the AONB and the built environment of settlements.</i></p> <p>SP13 g - There should not be a line drawn where development cannot take place if it will harm ancient trees or woodland. Chalk grassland should also be included in this as it is internationally rare.</p> <p>SP13 - h - locally designated environmental sites should have full protection and there should not be the option to mitigate for their damage or destruction.</p> <p>The mitigation hierarchy needs to be scrapped. All nature is vital if we are to survive as a species - the very definition of sustainability - the cornerstone of the NPPF 21. Sustainable development has been defined as development that meets the needs of the present without compromising the ability of future generations to meet their own needs. The current LDP has left us a lot worse off in terms of biodiversity, the next LDP needs to do a lot better.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP13. Locally designated environmental sites.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I consider this section of the Local Plan to be unsound. The Government has set a target of halting species decline by 2030. Unless a greater effort is made through the planning system to protect all wildlife sites, including Local Nature Reserves and Local Wildlife sites, both of which support some of our most important habitats and species, then it will be impossible to reach this target. It should be noted that in the Dover District Betteshanger Country Park (formerly Fowlmead) was the subject of a S106 agreement attached to planning permission 02/00905 in 2004 which obliged the Council to designate the whole Park as a Local Nature Reserve. Dover District Council is unable to explain why it was never designated. The Park is now the subject of development proposals.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Suggested wording. In order to contribute to the Government target of halting species decline by 2030 all Local Wildlife sites, Local Nature Reserves and sites with identified high biodiversity value, in the Dover District will be protected from development.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I consider it to be necessary as the current planning system is failing wildlife.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP13
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>There is no mention in this policy of the Rich Biodiversity asset of Betteshanger Country Park, formerly called Foulmead Park, and before that Foulmead Marsh. As noted by CPRE, <i>this is an unusual and valuable, elevated openspace consisting of scrub, slag, priority habitat and mature trees and grassland supporting an array of protected species such as the Lizard Orchid, (a schedule 8 plant protected under the Wildlife and countryside Act), intermingled local ecology, biodiversity and Priority Habitats .</i> When created with funding by SEEDA, 130,000 trees and bushes were planted here. it is a foraging ground for the threatened species of turtle Dove (<i>Streptopelia turtur</i>), There is at present very limited light pollution, and noise pollution, which makes it a good area for a variety of bats. There are a number of surveys and reports on the wildlife that can be seen in the 2 planning applications mentioned below. In addition, local naturalists have been photographing and logging the fungi species at Betteshanger Country Park this Autumn. They have shown that the Park is a fungi hotspot and has several nationally rare species. (see details in objection dated 23 November, by Sue Sullivan) .</p> <p>The original intentions of this site was for it to be preserved for nature, as can be seen in the original planning application to create this park. Dov/02/00905. Looking historically at this site, when it was created by SEEDA with special funding, after the Betteshanger Pit was closed, one of the S106 conditions on the 2002 planning application, approved in 2004, was that Dover District Council would make this site into a local Nature Reserve, with Natural England's support " within the meaning of section 15 of the National Parks and access to countryside Act 1949, and that it shall be managed as such" . But this did not happen... DDC says they don't know why, and it's too long ago to sort this out. I disagree and suggest this be investigated further.</p> <p>This site should be designated as an area of high biodiversity and therefore protected from building, both a 120bed hotel and a large wave pool which it is now threatened by. (see planning applications 22/01152 and 22/01156) . The wave pool would concrete over a significant area of diverse land, and kill of the many lizard orchids growing here.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP13 - Protecting the District's Hierarchy of Designated Environmental Sites and Biodiversity Assets
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SP13 - Protecting the District's Hierarchy of Designated Environmental Sites and Biodiversity Assets. We appreciate the inclusion of Local Wildlife Sites (LWS) within Figure 3.5 and dedicating paragraph 3.268 to LWS. However, we are incredibly concerned that the Plan does not state there should be no loss of priority habitats. In line with the Council's duty under the NERC Act to conserve biodiversity, the Plan should ensure that there is no loss of priority habitats, with the biodiversity policies updated to reflect these requirements. We do not feel paragraph 3.275 provides enough evidence that priority habitats and species are protected.

	<p>Further, clarity on the definition of “locally important habitat” is required in the context of Dover. Habitats such as chalk grasslands, rough-grazed grassland and semi-improved grasslands are a vital part of the ecological network within Dover and should be incorporated within a strategic Local Nature Recovery Strategy.</p> <p>We would advise that policy SP13 be accompanied by a detailed evidence base of locally important habitats, including unimproved grassland, identifying key areas for the creation, restoration and enhancement as part of the Local Nature Recovery Strategy.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>An assessment of impacts to Stodmarsh Special Area of Conservation (SAC) should be undertaken as part of your Habitats Regulations assessment. Proposals that fall within the Stour catchment, including the Little Stour catchment, have potential to adversely impact the condition of the SAC due to increased nutrients. Based on the outcome of your hydrological advice, we would advise that a specific policy is included for implementing suitable mitigation measures. We are happy to engage with you in developing a suitable strategy for achieving nutrient neutrality. Such a strategy could identify a clear set of principles for on-site habitat mitigation, upgrades to waste water treatment plants and appropriate locations for off-site habitat creation to mitigate for nutrient inputs.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We welcome the explicit inclusion of ancient woodland and ancient & veteran trees in section g) on irreplaceable habitats, and the supporting commentary in paragraph 3.271.</p> <p>We welcome the guidance on buffers for ancient woodland in paragraph 3.284, in particular that the 15m buffer is a minimum requirement, and that wider buffers will be sought when appropriate.</p> <p>Where development sites are adjacent to ancient woodland, we recommend that as a precautionary principle, a minimum 50 metre buffer should be maintained between a development and the ancient woodland, including through the construction phase, unless the applicant can demonstrate very clearly how a smaller buffer would suffice. A larger buffer may be required for particularly significant engineering operations, or for after-uses that generate significant disturbance.</p> <p>The preferred approach is to create new habitat, including native woodland, around existing ancient woodland. This will help reverse the historic fragmentation of this important habitat, contribute to biodiversity net gain, and can also provide accessible green space for nearby residents.</p> <p>Further information is available in the Trust's <i>Planners' Manual for ancient woodland</i> (2019).</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	<p>1. Why is the fact that Kent Downs AONB is working to secure Cross-Channel UNESCO Global Geopark status?</p> <p>2. There does not appear to be any reference to light pollution in this section. Kent Downs AONB has some of the darkest night skies in the UK - according to research by the CPRE. Light pollution is having a serious impact on insect die-off worldwide. About half of insect species are nocturnal, requiring darkness to feed and find a mate. DDC could be ahead of the curve on this, especially as the AONB and night skies are attracting more tourists.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	3.260 / 3.262 / 3.271 / 3.277
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Alkham Valley is an opportunity for an easy net biodiversity gain with some simple traffic controls immediately reducing wildlife carnage particularly of badgers, reducing air and noise pollution and the pollution of priority habitat and a vital aquifer.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Redirecting through traffic to the intended major routes whilst reducing and slowing local traffic through the ANOB.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	The AVS is a local association (since 1977) containing local expertise and landowners that supports and advises on the development of an important local ANOB / environmental asset and currently advocates for becoming a Local Conservation area.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	1 Introduction
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan is unsound as it does not comply with the legally binding commitment made by DDC when they declared a climate emergency in 2020 and prepared their climate change strategy. The plan will not do enough to meet the target of the district being net zero by 2050. DDC should be much more ambitious about the green credentials of new housing. If new homes generated their own power, were insulated to the highest standards, and collected rain water, it would greatly help stretched local services and go a long way towards making the housing stock fit for the coming decades.</p> <p>The regulation 19 stage of the consultation is not fit for purpose as it is overly complicated and very difficult to use. The process has left many members of the public including me and my wife feeling overwhelmed and confused as to how to make a representation. For those who are working full time this has been a task for which they do not have enough time. As a result those who may have wanted to make a submission have not been able to. The format of the submission form is also difficult to navigate. Without prior experience of planning law it is difficult to say whether a part of the plan is legal or not. As to the duty to cooperate it is impossible to know. The unsound plan needs updating after the government announcement on 5/12/22 that mandatory housing targets are not to be imposed. The figure of nearly 11,000 is unsustainable and should now be reviewed, particularly with respect to allocated land around Station Rd Walmer and proposed developments around villages.</p> <p>The character and landscape value of the district is being rapidly eroded under the current plan and this must not continue as it is contrary to NPPF 21. It is not sustainable to build on agricultural land which is in short supply as we are only 50% self sufficient in producing food in the UK. The CPRE has found that almost 14,500 hectares of farmland has been permanently lost to development since 2010. The contribution from the districts agricultural land is of vital importance. Much of the agricultural land is also vital for flood protection, and field margins are important for wildlife and biodiversity, forming corridors between habitats for vertebrates and nesting and roosting sites for birds. Dover District also has a wealth of character landscapes, AONB, heritage coast, nature reserves, internationally rare chalk grassland and rewilded areas such as Betteshanger Park. Overdevelopment under the last weak plan has meant that these areas are under pressure and being denuded as their boundaries are eroded and wildlife corridors between sites are cut off. The new plan does not do enough to protect these areas, wildlife and biodiversity. Developments should not be allowed to remove ancient woodlands and trees and biodiverse rich habitats even if it is argued that this is for the greater good. This is not sustainable as all nature is interconnected and if it fails then we all fail. The UK is one of the worst countries in the world for biodiversity loss, we have lost half of our biodiversity since the 1970's.</p> <p>Development has been at such a pace that infrastructure cannot keep up. Buses have been cut recently, cycle and pedestrian routes have not been upgraded sufficiently to connect some developments to main bus and train routes without car dependence. Aylesham has not had a secondary school which would mean children could walk to school. Many rural communities are entirely car dependent due to lack of buses</p>

	<p>and the roads not being safe to use their bikes. Not enough emphasis is put on renovating existing housing stock to provide greener, insulated, fuel efficient homes. Each new build generates around 56 tonnes of embedded carbon. The NPPF states that we should prioritise brownfield sites over greenfield but although there are many opportunities to develop brownfield sites in Dover, this has not been prioritised. Many developments have been for larger houses in villages and there is not enough provision for affordable housing.</p> <p>The wording of the local plan is not definitive, it leaves too many loop holes and vague preferences which enable large developers to argue and get what they want, to maximise profits, not what the people of the Dover area need.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Better mapping and understanding of the Dover District, taking into account internationally rare areas of chalk grassland, woodland and trees wherever they occur.</p> <p>Large buffers around the AONB to protect its character from the built environment. Stronger protection for the AONB and the Ripple LCA F3.</p> <p>Tighter protections on our remaining biodiversity.</p> <p>Tighter definitions in the local plan so that developers have no room to argue what has been specified in the local plan.</p> <p>Hire several biodiversity officers to monitor closely and prevent loss of ancient woodland, chalk grassland, veteran trees, protected wildlife and rich habitats and to actively go out into the community, looking for ways to improve biodiversity by such things as accessing grants for hedge planting and the creation of ponds where ever possible in our district.</p> <p>Employ experts to liaise with farmers in our area to encourage the most environmentally friendly farming and land management practices which will encourage maximum biodiversity in the countryside and maximum sequestration of carbon in soils and biomass.</p> <p>Stop the use of agricultural land for development.</p> <p>Renovate and insulate rather than build new houses, brownfield not greenfield.</p> <p>Turn attention away from destroying village communities with unsustainable housing estates outside their village boundaries.</p> <p>Do not give developers the get out clause of financial mitigation for destruction of wildlife and habitat. No development should further deplete our critically low levels of biodiversity.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><u>Biodiversity</u>: Section D of this policy states: <i>Wintering bird surveys will be required for all sites with high or moderate suitability (as identified in the HRA or subsequent habitat assessment) for qualifying bird species of Thanet Coast and Sandwich Bay SPA and Ramsar Site, Stodmarsh SPA and Ramsar Site and Dungeness, Romney Marsh and Rye Bay SPA, in order to determine their individual and cumulative importance for these species and whether the thresholds of significance are exceeded (greater than 1% of the associated European or international site). In such circumstances, when impacts cannot be avoided, appropriate mitigation in the form of habitat creation and management in perpetuity on-site in the first instance, or through provision of strategic sites for these species elsewhere within Dover District, will be required. Permission will only be granted when proposals for appropriate, adequate and achievable mitigation measures have been agreed. All such necessary mitigation will need to be fully functional prior to any development which would affect significant numbers of SPA or Ramsar Site birds.</i></p> <p>Some of the allocated sites are close to the border of other districts (such as PRE017 Site north-west of Appletree Farm, Stourmouth Road) therefore it might not be appropriate for the habitat creation and management to be carried in the Dover district. For example for site PRE017 Site north-west of Appletree Farm, Stourmouth Road it may be more appropriate for habitat creation/management works to be carried out in Canterbury. It is therefore recommended that the policy allows for flexibility for works to be carried out outside there district where it may be appropriate.</p> <p>The County Council recommends that Section H requires details of compensation for loss or damage to locally identified biodiversity assets to be submitted as part of planning applications.</p> <p>The County Council recommends reference to Kent's Plan Bee, a pollinator action plan developed by the County Council that seeks to improve the food sources and general habitat for pollinators.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Representation 2 Local Plan FOB SP13 Priority Habitats and Species 3.274-3.275 These sections should specify that Dover District Council supports the Kent Biodiversity Strategy 2020 and is committed to implementing the target species that are important in the Dover District, as set out in the Green and Blue Infrastructure Evidence Report. The Turtle Dove target is of particular concern. Dover District contains 4 of the RSPB's Turtle Dove Friendly Zones where efforts are being made to stem the decline of a species that is threatened with extinction. Numbers of Turtle Doves have declined by 98% since the 1970's but they are still clinging on in East Kent. Recent Dover planning applications indicate that any serious intention to contribute to stemming their decline in the District, is lacking. This year, for example, planning permission was granted for application 20/00419 at Betteshanger Grove. This will result in the removal of known Turtle Dove territory. The mitigation set up to compensate for this loss is at Betteshanger Country Park, a sister site to Betteshanger Grove and part of the old Betteshanger Colliery site. The mitigation scheme is now threatened by two planning applications, at the Park - one for a Hotel (DOV22/01152) and one for a Surf Lagoon (DOV22/01158). When the mitigation sites were allocated the ecologists employed by the developer, it was claimed that the areas chosen were

	<p>in relatively undisturbed parts of the Park and gave the birds the best chance of thriving. Now we find that both the proposed sites for the Hotel and Surf Lagoon are immediately adjacent to the Turtle Dove mitigation areas. The noise, light and human disturbance caused by the very large numbers of expected visitors (perhaps 500,000 per annum) now threaten to jeopardise the mitigation scheme and meeting condition 54 of application 20/00419 now looks doubtful.</p> <p>Turtle Doves are a target species in the Kent Biodiversity Strategy so these issues are significant and there is nothing in SP13 which convinces us that Turtle Doves will be properly protected by Dover District Council.</p> <p>3.276. This states 'protection for priority habitats and species is afforded through the Local Plan.'</p> <p>I think this statement is unjustified. A more accurate statement would be 'mitigation for priority species and habitats is afforded through the Local Plan.'</p> <p>There is no evidence from recent planning applications in the Dover District that protection will be given to priority habitats and species. For example planning permission relating to application 20/00419, will see the removal of the priority habitat Open Mosaic Habitat on Previously Developed Land and significant damage to a wide range of priority species. There is no protection for many of the priority species and not even mitigation or compensation. For this application the only compensation provided was for Turtle Doves (now under threat) and Grass Poly.</p> <p>There is nothing under the terms of the Local Plan that convinces us that priority habitats and species will be adequately protected in the future. Unless the word 'protection' really means 'protection' and not mitigation, we will continue to see species declining. This is particularly significant at a time when COP 15 is urging the world to take action to address the global biodiversity crisis.</p> <p>In this Local Plan Dover District Council does not show the necessary ambition to contribute to this aim and this is indicated by the fact that SP13 does not even contain separate sections on priority habitats and species and protected species, especially when these occur outside designated sites.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>We think that SP 13 should have separate sections on a: priority habitats and priority species and b) protected species with a detailed explanation as to how this will be achieved through the planning system especially on undesignated sites.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>We consider it to be necessary as we are not convinced that the Council will deliver on the stated protections for priority species and habitats and protected species.</p>

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SP13 Priority Habitats and Species 3.274-3.275 SP 13 Protected species 3.278 3.274-3.275. The following relates to these sections of the Local Plan These sections should specify that Dover District Council supports the Kent Biodiversity Strategy 2020 and is committed to implementing the targets for species that are important in the Dover area, such as Turtle Doves. The Dover District contains four of the RSPB Turtle Dove Friendly Zones, where efforts are being made, by working with landowners, to stem the decline of a species threatened with extinction, but clinging on in East Kent. Recent planning applications indicate that any serious intentions to contribute to the Strategy and assist in stemming this decline are lacking. This year for example, planning permission was granted for Betteshanger Grove, planning application 20/00419 and a site situated within a Turtle Dove Friendly Zone. The permission will result in the removal of known Turtle Dove territory. Mitigation for this loss involved setting up designated areas for nesting and foraging at Betteshanger Country Park, a sister site to Betteshanger Grove and part of the old Betteshanger Colliery site. This mitigation scheme is now threatened by two planning applications at the Park (also in a Turtle Dove Friendly Zone) one for a Hotel (22/01152) and a second for a Surf Lagoon (22/01158) When the mitigation sites were allocated the ecologists employed by the developer, claimed that they were in relatively undisturbed areas of the Park and gave the birds the best chance of thriving. Now we find that both of the proposed sites for the Hotel and the Surf Lagoon, are immediately adjacent to the mitigation areas. The noise, light and human disturbance, caused by the very large number of expected visitors (perhaps 500,000 per annum) now threatens to jeopardise the mitigation scheme and the ability to meet condition 54 of the planning application 20/00419. Turtle Doves are a target species in the Kent Biodiversity Strategy, which Dover District Council supports, so these issues are significant and there is nothing in SP13 which convinces me that Dover District Council will be taking the necessary steps to secure the future of Turtle Doves in the future. 3.276 says: 'Protection for priority habitats and species is afforded through the Local Plan.' There is no evidence from recent planning applications in this part of the Dover District that protection will be given to priority habitats and priority species. For example planning permission relating to 20/00419 will see the removal of the priority habitat , Open Mosaic Habitat on Previously Developed Land and significant damage to a wide range of priority species; for example, 18 Red listed birds, 12 plants on the Kent rare Plant Register, invertebrates of County importance ,slow worms and common lizards. There was no apparent mitigation or compensation for the loss /damage to these species. This is contrary to the NPPF 179b) which says Plans should promote 'the restoration and enhancement of priority habitats and the protection and recovery of priority species.' There is nothing in the Local Plan that convinces me that things will be different in the future. There is no explanation as to how priority habitats and species will be protected and recovered. Unless the word 'protection' really means protection and not 'mitigation' then we will continue to see species declining in the Dover District. This is particularly significant at the time of COP 15 when the head of the UN is saying that 'humanity has become a weapon of mass extinction' such is the damage we are wreaking on the natural world.</p> <p>SP 13. 3.278</p>

	This states that ecological surveys will need to be undertaken on sites with protected species to inform approaches to mitigation. Again the implication here is that mitigation rather than protection is the solution. It is of great concern that the avoidance part of the mitigation hierarchy appears to be entirely voluntary. In planning application 20/00419 the effects on Turtle Dove territory could have been avoided by a change in design but mitigation was, instead, seen as the solution. This avoiding of the 'avoidance' principle is I believe, facilitated by wording in the NPPF which states in 180b) that if significant harm cannot be avoided 'through locating on an alternative site with less harmful impacts) It appears from this that the only avoidance that needs to be heeded is location to a different site and if this is not possible then mitigation is the answer. What about avoidance through site and landscape design? What about avoiding the most important undesignated sites for biodiversity?
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I think that within SP 13 there should be additional sections on a) priority habitats and species and b) protected species. there should be a detailed explanation as to how these will be protected i the case of species, and how they will be protected and restored in the case of habitats.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Because I am concerned that the planning system is failing priority habitats and priority and protected species

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SP13 Policy on International sites includes the very unsound and ineffective and non compliant with Environmental Act 2021 statement d. <i>Wintering bird surveys . . . That when impacts cannot be avoided, appropriate mitigation in the form of new habitat creation / management in perpetuity or provision of sites for these species elsewhere .</i></p> <p>Wild fauna, wild birds in particular, are very disinclined to read and heed the instructions of DDC / or developers. When their habitats are taken, they fail to thrive, fail to breed and die out. Hence the 6th mass extinction of species. And the species evidenced on just one typical section of East Kent include : breeding Mute Swan, Moorhen, Collared Dove, Cuckoo, Skylark, Meadow Pipit, Blackbird, Cetti's, Reed and Sedge Warblers, Wren, Linnet and Reed Bunting. It is also a partial feeding area for a number of species such as Heron, Little Grebe, Grey Partridge, Kestrel, Buzzard, Black-headed and Herring Gulls, Woodpigeon, Stock Dove, Barn Owl, Swift, Swallow, House Martin, Yellow Wagtail, Dunnock, Song Thrush, Carrion Crow, Rook, Starling, House Sparrow and Chaffinch. Historically Redshank, Lapwing, Snipe and Yellow Wagtail used to nest here. Many species of native plant and habitat for invertebrates, mammals such as bats, Hedgehogs, Harvest Mice and Water Voles will also be lost. Losing these species will be a considerable biodiversity loss and contrary to the requirement for the unsatisfactory 10% biodiversity gain DDC commitment, and very contrary to the KCC requirement for 20% biodiversity net gain. The Kent recorder is also concerned about the area because of rare flora, bats, fungal species need protecting.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>To be sound and effective, the SP13 must be underpinned by a requirement that nothing is done without 'robust auditing' (as Wildlife Trusts insisted on in Environment Act 2021). This means that honest, objective-because-independent, before-and-after evaluations / baseline measurements must be used. Sketchy, google-map-based ecology reports paid for by developer applicants are deceptive in the extreme. Developers are ill-placed to self-certify their own work in this area, and DDC need a DM policy requiring Environmental Impact Assessments on all planning applications for developments of over 15 dwellings on greenfield or rewilded brownfield sites.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>7 THE NATURAL ENVIRONMENT</p> <p>7.1 The plan has a clear vision for the future in terms of measuring biodiversity net gain, protection of Kent's AONB and landscape character and I believe Alkham Parish could assist the District Council in achieving these aims.</p> <p>7.2 The Valley has been recognised as an Area of Outstanding Natural Beauty (AONB). It contains Ancient Woodland, Special Landscape areas, Sites of Special Scientific Interest (SSSIs) and a Conservation Area.</p> <p><i>(DDC note - for Figure 1 map - see attachment)</i></p> <p>7.3 ALKHAM, LYDDEN AND SWINGFIELD WOODS are one of the areas declared a Site of Special Scientific Interest (SSSI) notified under Section 28 of the Wildlife and Countryside Act 1981 as amended. This site was formerly two SSSIs: Alkham Valley Woods and Lydden to Swingfield Downs. The former is included in 'A Nature Conservation Review'. There have been a few minor deletions.</p> <p>7.4 This site comprises several woodlands situated on the steep slopes of dry chalk valleys. The soils vary from calcareous loams on the slopes to acid-neutral clays on the plateaux. Ash-hazel is the main woodland type with field maple on the more calcareous soils and hornbeam on the heavier clay. There is some unimproved chalk grassland in the site near Lydden. A number of uncommon plants occur including lady orchid <i>Orchis purpurea</i> in the woods and burnt orchid <i>Orchis ustulata</i> in the grassland.</p> <p>7.5 Until recently these woods have been managed by coppicing. Ash and hazel are the common coppiced species with some field maple, hornbeam and sweet chestnut under pedunculate oak standards. Other trees and shrubs include wild cherry, birch, hawthorn, blackthorn and also wayfaring-tree and dogwood on the calcareous soils. There is some dense hawthorn scrub in places.</p> <p>7.6 The ground flora is varied but generally dominated by dog's mercury <i>Mercurialis perennis</i>, bluebell <i>Hyacinthoides non-scripta</i> and brambles <i>Rubus fruticosus</i>. Among more abundant flowering plants are wood anemone <i>Anemone nemorosa</i>, yellow archangel <i>Lamium galeobdolon</i> and wood spurge <i>Euphorbia amygdaloides</i>. Some uncommon plants also occur, particularly on the chalk soils. These include green hellebore</p>

	<p>Helleborus viridis, herb paris Paris quadrifolia, fly orchid Ophrys insectifera, greater butterfly orchid Platanthera chlorantha and lady orchid. The latter is restricted in Britain to Kent.</p> <p>7.7 The chalk grassland is dominated by sheep's fescue Festuca ovina, tor-grass Brachypodium pinnatum and glaucous sedge Carex flacca. Many flowering plants typical of improved chalk grassland occur such as dropwort Filipendula vulgaris, salad burnet Sanguisorba minor, small scabious Scabiosa columbaria and several orchids including burnt orchid.'</p> <p>7.8 The previous Dover District Plan recognised the importance of the aims of conserving and enhancing the biodiversity of the area, stated the importance of managing such areas and stressed that they should not be developed as recreational areas without quantitative or qualitative assessments prior to development.</p> <p>7.9 The Dover District Green Infrastructure Strategy 2014 described the environment which provides essential natural resources for life and a pleasant healthy place for people of all ages and considered the importance of multi functionality of an area.</p> <p>7.10 The National Planning Policy Framework defines Green Infrastructure as 'a network of multi-functional green space, urban and rural which is capable of delivering a wide range of environmental and quality of life benefits to local communities'</p> <p>Comment 7</p> <p>The Natural environment (DDC Plan – 11) I believe Dover District Council has an opportunity to consider the potential offered by the Alkham Valley the AONB, the SSSI and the means by which the delicate balance of conservation and recreation can be utilised and maintained as a major rural asset within a planned housing growth area, potentially recognising it as a designated Conservation Area and bringing huge benefit to an area about to experience huge growth at either end of the said valley.</p> <p><i>(DDC note - The full representation from Alkham PC is attached. However, specific comments from the full representation document have been extracted into separate consultation points/policy areas, relevant to the comments made)</i></p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	DDC Note: Please see detailed representation (attached at 1770) which has been divided against numerous consultation points. The representation has images within the text. The text below is an extract from the detailed representation 'by an Alkham resident'. 7 THE NATURAL ENVIRONMENT

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

7.1 The plan has a clear vision for the future in terms of measuring biodiversity net gain , protection of Kent's AONB and landscape character and I believe Alkham Parish could assist the District Council in achieving these aims.

7.2 The Valley has been recognised as an Area of Outstanding Natural Beauty (AONB). It contains Ancient Woodland, Special Landscape areas, Sites of Special Scientific Interest (SSSIs) and a Conservation Area.

7.3 ALKHAM, LYDDEN AND SWINGFIELD WOODS are one of the areas declared a Site of Special Scientific Interest (SSSI) notified under Section 28 of the Wildlife and Countryside Act 1981 as amended. 'This site was formerly two SSSIs: Alkham Valley Woods and Lydden to Swingfield Downs. The former is included in 'A Nature Conservation Review'. There have been a few minor deletions.

7.4 This site comprises several woodlands situated on the steep slopes of dry chalk valleys. The soils vary from calcareous loams on the slopes to acid-neutral clays on the plateaux. Ash-hazel is the main woodland type with field maple on the more calcareous soils and hornbeam on the heavier clay. There is some unimproved chalk grassland in the site near Lydden. A number of uncommon plants occur including lady orchid *Orchis purpurea* in the woods and burnt orchid *Orchis ustulata* in the grassland.

7.5 Until recently these woods have been managed by coppicing. Ash and hazel are the common coppiced species with some field maple, hornbeam and sweet chestnut under pedunculate oak standards. Other trees and shrubs include wild cherry, birch, hawthorn, blackthorn and also wayfaring-tree and dogwood on the calcareous soils. There is some dense hawthorn scrub in places.

7.6 The ground flora is varied but generally dominated by dog's mercury *Mercurialis perennis*, bluebell *Hyacinthoides non-scripta* and brambles *Rubus fruticosus*. Among more abundant flowering plants are wood anemone *Anemone nemorosa*, yellow archangel *Lamium galeobdolon* and wood spurge *Euphorbia amygdaloides*. Some uncommon plants also occur, particularly on the chalk soils. These include green hellebore *Helleborus viridis*, herb paris *Paris quadrifolia*, fly orchid *Ophrys insectifera*, greater butterfly orchid *Platanthera chlorantha* and lady orchid. The latter is restricted in Britain to Kent.

7.7 The chalk grassland is dominated by sheep's fescue *Festuca ovina*, tor-grass *Brachypodium pinnatum* and glaucous sedge *Carex flacca*. Many flowering plants typical of improved chalk grassland occur such as dropwort *Filipendula vulgaris*, salad burnet *Sanguisorba minor*, small scabious *Scabiosa columbaria* and several orchids including burnt orchid.'

7.8 The previous Dover District Plan recognised the importance of the aims of conserving and enhancing the biodiversity of the area, stated the importance of managing such areas and stressed that they should not be developed as recreational areas without quantitative or qualitative assessments prior to development.

7.9 The Dover District Green Infrastructure Strategy 2014 described the environment which provides essential natural resources for life and a pleasant healthy place for people of all ages and considered the importance of multi functionality of an area.

7.10 The National Planning Policy Framework defines Green Infrastructure as 'a network of multi-functional green space, urban and rural which is capable of delivering a wide range of environmental and quality of life benefits to local communities'

Comment 7

I believe Dover District Council has an opportunity to consider the potential offered by the Alkham Valley the AONB, the SSSI and the means by which the delicate balance of conservation and recreation can be utilised and maintained as a major asset within a planned housing growth area potentially recognising it as a designated Conservation Area and bringing huge benefit to an area about to experience huge growth at either end of the said valley.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see appended report

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I can speak to any of the points raised in the attached document

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP22
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I believe this draft plan is "unsound". It may well place climate change at top of the agenda under Strategic Policy 1 but then contradicts itself seeking to destroy legally protected and extremely rare woodland by attempting to secure a quick housing allocation gain (SAP22, SAN023). We must not dilute how important this issue is not only for our district but the entire planet.</p> <p>The HELAA was both out of step with environmental protection issues and inconsistent in its reasoning. It did not place sufficient importance on protection of our environment over short-term housing gain.</p> <p>Within this proposed draft plan Policy SP14 needs a firm and unambiguous statement to ensure all brown field and redevelopment options are fully exhausted before any green field areas can be exploited.</p> <p>In particular, the site (SAP22, SAN023) Land at Archers Low Farm, Sandwich, should clearly be deleted. It is environmentally a sensitive site with officially protected woodland and trees. It has been rejected for development by our elected Councillors who recognised its' very important contribution to our rural landscape. The small proposed reduction (within this Regulation 19 Draft) in number of proposed housing units suggested for this site is nonsense! Any size of development would inevitably destroy this area and have catastrophic effect on the well-established natural eco systems and cause an unnecessary release of large amounts of stored carbon with removal of mature woodland and trees.</p> <p>Unfortunately, I suspect you will desperately cling to your plan as drafted and take no notice of my words or the many hundreds of other people and local town council who have objected to this site being developed or the district councillors who rejected the planning application with sound</p>

	reasoning or the previous independent planning inspector who said the last draft local plan could only be considered as “sound” with removal of the allocation for land at Archers Low Farm Incidentally the only site he singled out in the entire district!
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Deletion of SAP22 will contribute towards making this plan sound.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is ‘unsound’, on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Yes</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>SP14 is unsound for the following reasons:</p> <p>The Environment Act of 2021 has a legally binding 2030 species abundance target, whose professed aim is to help reverse the drastic decline in wildlife and put the nation on track to protecting 30% of land and sea for nature by 2030; also there is a new requirement for planning applications to provide Biodiversity net gain and for Local Nature Recovery Strategies to create a framework for a national system of interconnected sites for nature. In SP14 the words about Local Nature Recovery Strategy and the Kent Biodiversity Strategy are impressive and reassuring. But the very restricted BOAs (Biodiversity Opportunity Areas), to which they are applied renders them less than effective. Residents' local knowledge (members of Sandwich Bay Bird Observatory, Kent Wildlife Trust, local members British Trust for Ornithology, etc, etc), could increase DDC's awareness of more potential BOAs by approx. ten times at a conservative estimate.</p> <p>Net Gain should be measured using the latest DEFRA measurement tool The Biodiversity Metric 3.1 - JP039 - GOV.UK and also an additional metric should also be used consisting of a list of all species to be established in consultation with Kent nature-concerned NGOs, (Kent Wildlife Trusts and others). The DEFRA metric favours the developer as it only takes into consideration protected species and habitats. In the proposed Local Plan, the Appendices give an Evidence Base.</p> <p>This predominantly deals with species and habitats protected in Law and ignores all the other species in the District which are in decline. To be sound and effective, any and all Biodiversity net gain policies must join up the living dots.</p> <p>The UK is one of the world's most nature-depleted countries, in the bottom 10% globally and last among the G7 group of nations, new data shows. It has an average of about half its biodiversity left, far below the global average of 75%, a study has found. In contrast, a figure of 90% is considered the "safe limit" to prevent the world from tipping into an "ecological meltdown", according to researchers.</p> <p>Planning policies which single out building development for "improvement" and avoid the other causes of this dramatic biodiversity loss, are inadequate and need strengthening to become effective. In a report entitled "The state of nature: 41 percent of UK species have declined since 1970s" (NHM 2019) the main drivers of decline are as follows –</p> <ul style="list-style-type: none"> • Changing agricultural management • Habitat fragmentation • Pollution • Urbanisation • Woodland management • Invasive non-native species • Fisheries degradation <p>All of these areas should be considered in any Plan including the DDC one.</p> <p>Examples of wildlife needing protection from loss of habitat around the boundaries to the north, west and south of Deal (e.g. SAP 16 sites Ground Water source protection 2 or Flood Zone 3), which is itself representative of the larger district.</p> <p>Evidence (BTO Initial Sites Review recorded as accepted) shows: Much of the area is in Flood Zone 3, farmland and has an extensive biodiversity value – briefly, to name a few, breeding Mute Swan, Moorhen, Collared Dove, Cuckoo, Skylark, Meadow Pipit, Blackbird, Cetti's, Reed and Sedge Warblers, Wren, Linnet and Reed Bunting. It is also a partial feeding area for a number of species such as Heron, Little Grebe, Grey Partridge, Kestrel, Buzzard, Black-headed and Herring Gulls, Woodpigeon, Stock Dove, Barn Owl, Swift, Swallow, House Martin, Yellow Wagtail, Dunnock, Song Thrush, Carrion Crow, Rook, Starling, House Sparrow and Chaffinch. Historically Redshank, Lapwing, Snipe and Yellow Wagtail used to nest here. Many species of native plant and habitat for invertebrates, mammals such as bats, Hedgehogs, Harvest Mice and Water Voles will also be lost. Losing these species will be a considerable biodiversity loss and contrary to the requirement for a minimum of 10% biodiversity gain. How will this loss be calculated? There are two other plots in this designation - Sholden to Betteshanger roundabout surrounding Cottington Court Farm and Betteshanger Country Park access road to Foulmead Cottages behind farm shop which are both deemed unsuitable, which is correct – they are both farmland and would create chaos on the A258 in addition to the loss of biodiversity, open space, increase in light pollution, disturbance, etc.</p> <p>The statement SP14 b must be made real and effective, and rendered sound by robust auditing and independent baseline assessments and recruitment of a much larger planning enforcement team. Then 'Every development will be required to connect to and improve the wider ecological networks'. would become effective and sound instead of token.</p> <p>SP14 3.290 Kent County Council requires 20% biodiversity net gain, and it is unsound for DDC to undermine this commitment. DDC local plan will only be sound if 20% biodiversity net gain replaces the 10% specified. The Kent Nature Partnership commits to 20% biodiversity enhancement. An addition to the Plan is therefore needed: 'Enhance biodiversity in line with Kent Nature Partnership's commitment to 20% enhancement to restore Kent's depleted natural capital and to mitigate 6th mass extinction. Natural Capital is the world's stocks of natural assets including soil,</p>

minerals, air, water and biodiversity. These provide a range of ecosystem services' that enable us all to survive and thrive. The most obvious services include the food we eat, the water we drink and timber we use for building. Less visible ecosystem services include climate regulation, carbon sequestration, natural flood defence, water filtration, species habitat, health and wellbeing. The Goodwin Sands nurture marine fauna and flora and provide a natural protection from coastal erosion. As such the Goodwin Sands are part of the district's natural capital and need protection too.

To become sound and effective and legally compliant bird boxes , bat boxes, swift bricks, street trees, garden trees should be required on all new builds.

If existing mature trees of a good size to capture carbon now, are replaced in 'urban expansion' areas (SAP 1, SAP 24, SAP 28) by young saplings that will not be able to capture a similar amount of carbon for 40 to 50 years, then the plan will not be legally compatible with Environment Act 2021. Therefore to become sound and legally compliant SP14 should require that for every 10,000m2 (roughly 50 dwellings of 200m2 per dwelling) of housing, one open space of 150m2 and another woodland area of 150m2 should be provided, these allocations to be non-transferable between 10,000m2 sections. Moreover development should only be permitted if all existing mature trees are retained (These retained trees will account for the woodland areas referred to above, and will provide pockets of mature green infrastructure of amenity value to legally binding UK Net zero strategy 2019 and to new residents at little cost or inconvenience to the developer). Trees sequester the most carbon in the last half of their lives. Any new trees planted must tended with a guarantee to ensure survival 4 years after development completed.

Moreover to become more sound and effective, we recommend adding, Retain all trees on the perimeter of large developments and pockets of existing trees within developments. Work with Kent Nature Partnership to evaluate, and match protection of all natural capital. Work to retain and enhance natural capital generally, mindful of the KCC commitment to establish the growth of 1.5 million new planted trees across the county. Similarly, this policy would become more sound if the recommendations of KCC report 'Natural Solutions to Climate Change in Kent' of March 2021 paid for from the public purse, on the need for our district's (chalk) grasslands, wetlands, and woodlands to be retained and enhanced were adopted as a planning guideline.

As with SP 13, to become sound and effective, SP 14 must be underpinned with a requirement for robust auditing, and honesty, otherwise extracting promises from developers all too often results merely in employment for public relations practitioners, and developers later apply for conditions to be removed. 'Where permission is given subject to conditions regarding tree retention, tree planting and / or biodiversity enhancement, applicants will need to agree to abide by 'robust auditing' (as Wildlife Trusts insisted was in Environmental Act 2021). This means that honest, objective because independent, before-and-after evaluations / baseline measurements must be used. Reports paid for by developer applicants are deceptive. Developers are ill-placed to self-certify their own work in this area, and DDC need a policy requiring Environmental Impact Assessments on all planning applications for developments of over 15 dwellings on greenfield or rewilded brownfield sites.'

I agree that its a good thing that every development connect to and improve the wider ecological networks in which it is located. To police this a whole team of biodiversity officers should be employed. This is too big a job for one person.

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Biodiversity net gain must be increased to 20%.</p> <p>Several biodiversity officers need to be employed to map and police existing biodiversity and gains made to ensure that district wide we are on track to reverse the national decline.</p> <p>Developers must not be allowed to self-certify biodiversity on sites and the biodiversity officers must appoint an independent body to do surveys.</p> <p>All mature trees must be retained as part of development, not just those with TPO's.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Figure 3.6 Dover District Biodiversity Assets
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I think the map of the District's biodiversity assets is unsound because it omits the priority habitat Open Mosaic Habitat on Previously Developed Land that is evident at Betteshanger Country Park. In fact the whole Park has been shown to be is a biodiversity asset through surveys and local records, and should be recognised as such. This biodiversity value was recognised when the Park was first set up when it was meant to be designated as a Local Nature Reserve under the S106 attached to the permission (02/00905) The Council failed to instigate the designation. (see 106 attached)</p> <p>I believe the map does not conform to national planning policy as the NPPF states that Local Authorities should identify, map and safeguard components of local wildlife rich habitats. Why has Betteshanger Country Park not been identified as such? There is evidence such as : it supports the second most important colony of the nationally rare and protected Lizard Orchid in the Country. The Open Mosaic habitat supports rare invertebrates of County Importance. It supports Turtle Doves the UK's fastest declining bird species.etc etc</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Suggested changes. That a new map should be produced with the clear indication that Betteshanger Country Park is included as a biodiversity asset.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Because there is a need in the Dover District to improve the protection of wildlife through the planning system.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SP14 - Enhancing Green Infrastructure and Biodiversity. We welcome the inclusion of biodiversity net gain within policy SP14. Kent Wildlife Trust is currently working as part of the Kent Nature Partnership (KNP), of which it is acknowledged that Dover is a member. The KNP is developing a countywide strategic approach to Biodiversity Net Gain and Local Nature Recovery Strategies, in anticipation of the requirements of the Environment Bill. As part of these strategies, we are promoting a countywide commitment to delivering 20% measurable biodiversity net gain and commitments that any offsite biodiversity net gain is delivered strategically in order to meet the priorities and targets of existing and future landscape scale biodiversity strategies. Please refer to the Kent Nature and Partnerships statement of principles for further details. We advise that the BNG policy (NE1) aligns with these principles. The inclusion of requiring 20% net gain would be consistent within the approach being taken by other Local Authorities in Kent.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Strategic Policies - Introduction
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We are concerned that a Local Nature Recovery Strategy has not yet been provided, with paragraph 3.290 saying: <i>"As part of the of the Environment Act 2021 a national network of Local Nature Recovery Strategies is planned. Strategic Policy 14 provides support for the management, restoration and creation of habitats in accordance with the Kent Local Nature Recovery Strategy that will come forward"</i>. We strongly urge that a Nature Recovery Strategy is put forward as soon as possible and should include the recommendations set out in our comments.</p> <p>Kent Wildlife Trust support Dover District Council in their declaration of a climate emergency, and the goal of delivering a carbon neutral district by 2050. Further, we support the commitment for the Council to become a net zero carbon emitter by 2030 at the latest. The creation of a Climate Change Strategy and Action Plan will be essential in achieving these goals. In assessing the carbon emissions of the district, this plan must account for decisions taken by the council, including planning decisions, and on their impact to climate change. Clear policies and principles should seek to reduce emissions and increase absorption. At present we do not feel that the proposed policies will not be sufficient to meet the borough's commitments to achieve carbon neutrality.</p> <p>Regarding public health and wellbeing, Dover District Council should focus on connection with nature in the formation of all policies relating to health and communities.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Strategic Policy 14 - Enhancing Green Infrastructure and Biodiversity
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	We welcome this policy, including in particular that it should be informed by the Local Nature Recovery Strategy and related plans, and that the 10% Biodiversity Net Gain requirement should be a minimum.

to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	While a statutory target of at least 10% biodiversity net gain for all development has been introduced, the Kent Nature Partnership expects at least 20% to be achieved. This higher aspiration has been noted in other Kent local plan consultations, for example the recent Kent Minerals and Waste Local Plan (KMWLP section 7.2.4) and could usefully be reference here also.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP 14 Enhancing Green infrastructure and Biodiversity Section 3.288
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>It is very concerning given the Government target of stemming species decline by 2030 that SP 14 does not even mention species. The following is a paragraph that I would like to see added to this policy</p> <p>'Planning proposals will not be supported that would damage the green infrastructure of the district and/or harm sites supporting any of the following:priority habitats, priority species, protected habitats and protected species.'</p> <p>PLEASE NOTE THERE IS A FAULT WITH THE REPRESENTATION FORM WHICH MEANS COMMENTS SUGGESTING ALTERNATIVE WORDING TO THE PLAN CANNOT EASILY BE TYPED IN THE REQUIRED BOX.</p> <p>3.288 This section appears to be suggesting that Dover District Council will only be committing to the aims of the Kent Biodiversity Strategy as they relate to BOA's. This is inadequate and shows a lack of ambition when it comes to protecting biodiversity. For example there is the issue of Turtle Doves in the Dover District, a Kent Biodiversity Strategy target species. Already we have seen permission granted for Turtle Dove territory to be removed under planning application 20/00419 and now they are under threat from planning applications 22/01152 and 22/01158. The Council needs a policy that shows that there is a clear intention to protect Turtle Doves and other target species.</p> <p>PLEASE NOTE THERE IS A FAULT WITH THE REPRESENTATION FORM WHICH MEANS COMMENTS SUGGESTING ALTERNATIVE WORDING TO THE PLAN CANNOT EASILY BE TYPED IN THE REQUIRED BOX.</p> <p>The following is a paragraph I would like to see in this section of the Local Plan</p> <p>"Dover District Council is committed to securing the aims and objectives of the Kent Biodiversity Strategy 2020-2046 and intends to protect all target species and habitats wherever they are found".</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The following is a paragraph that I would like to see added to this policy"Planning proposals will not be supported that would damage the green infrastructure of the district and/or harm sites supporting any of the following:priority habitats, priority species, protected habitats and protected species."The following is a paragraph I would like to see in this section of the Local Plan" Dover District Council is committed to securing the aims and objectives of the Kent Biodiversity Strategy 2020-2046 and intends to protect all target species and habitats wherever they are found".
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Because the Local Plan as it stands does not convincingly explain how priority habitats and species and protected habitats and species will be protected in the face of proposed developments/

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>PRoW: The PRoW network should be included as part of the aim to protect the landscape, and against significant visual impact, and loss of air quality which is a significant part of user enjoyment and the wider natural environment. Historical routes are part of the rural heritage and the "landscape character and distinctiveness of the coastline" – reference should be made to the National Trails North Downs Way and the England Coast Path and other historic routes across the District.</p> <p>Heritage Conservation: If properly designed, green infrastructure has the potential to help new development be better integrated into the existing rural and urban landscape by ensuring that it fits into the grain of what is already there. The pattern of roads, tracks and lanes in Dover has been used for centuries to link Dover's towns, villages, hamlets and countryside. By taking advantage of these existing and historic routeways people will be able to move through the District while retaining the historic geography of the region, but also following routes more likely to be accompanied by historic hedgerows and planting. This has the potential to unite heritage and ecology to help people access and enjoy green infrastructure features more easily and naturally.</p> <p>Using historic routeways also allows Green Infrastructure (GI) designers to incorporate heritage assets to provide features of interest. In turn this will help people accessing the GI to become more aware of and value Dover's heritage which will in turn assist their conservation and re-use. For example, along the cliffs east of Dover town there is an internationally significant group of fortifications. If the GI were to feature these it would help raise their profile to assist with conservation whilst supporting tourism.</p> <p>To fully appreciate Dover's landscape character and incorporate it into green infrastructure effectively, it is first important to understand it. The main method for investigation historic landscape character is by historic landscape characterisation. This is a method of assessing the pattern of tracks, lanes, field boundaries and other features that comprise the historic character of the modern landscape.</p> <p>The Kent Historic Landscape Characterisation (2001) has identified the broad historic character of the landscape of Kent but more detailed refinement is needed to bring the baseline data for Dover up to the standard of areas such as the High Weald and the Hoo Peninsula which have more detailed and relevant data. The County Council would welcome further discussion with the District Council on this.</p> <p>The text rightly highlights the contribution of green infrastructure to health. Historic England has released research that demonstrates how heritage actively supports health and well-being through contributing to a generally more attractive environment, allowing activities that encourage participation and inclusion and by encouraging outdoors activities which could be referred to within the Local Plan.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	As set out in 6.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Figure 3.6 Dover District Biodiversity assets. SP 14
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Figure 3.6 Dover Biodiversity assets SP14 197 of the NPPF states: Plans should identify, map and safeguard components of local wildlife habitats...including areas identified by national and local partnerships for habitat management, enhancement, restoration or creation. Figure 3.6 does not comply with this requirement as Betteshanger Country Park is not highlighted as a biodiversity asset despite its known biodiversity interest and the fact that it is within the Lower Stour Wetlands Biodiversity Opportunity Area as identified by Kent Nature Partnerships. The fact that it contains the second most important colony of the rare and protected (wildlife and Countryside Act) Lizard Orchid should, on its

	own, be enough for it to be listed as a biodiversity asset. That and the fact that when the Country Park was first created as Fowlmead (planning application 02/00905) an S106 attached to the application obliged the Council and owner to designate the Park as a Local Nature Reserve. It should also be noted that Plantlife and the recorders in Kent for the BSBI are both of the opinion that the Park would qualify as a SSSI.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Betteshanger Country Park should be identified on Figure 3.6 as a biodiversity asset and recognised as being part of the Lower Stour wetlands Biodiversity Opportunity Area.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Because Dover District Council has not acknowledged the biodiversity value of Betteshanger Country Park

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Thank you for consulting us on the Dover Local Plan. We unfortunately were not able to respond to the regulations 18 consultation. Please see below comments which have been focused mainly on Turtle Doves and include BNG opportunities.</p> <p>Introduction</p> <p>Turtle Dove (<i>Streptopelia turtur</i>) is a RSPB priority species due to the significant population decline both in the UK and across its breeding range. The Turtle Dove is the UK's fastest declining breeding bird and is threatened with global as well as national extinction (IUCN Red List of Endangered Species and UK Red List of Conservation Concern). Turtle Doves have declined by 98% between 1967 and 2018.</p> <p>RSPB is a lead partner on the Operation Turtle Dove partnership which seeks to offer practical evidence-based solutions to halt the decline of Turtle Doves across England. The foundation of this work is based on working with landowners and communities in areas that still support breeding populations of Turtle Doves, which are known as Turtle Dove Friendly Zones (TDFZs). There are 29 zones across England, 12 of which are in Kent and 3 of those are in Dover; Ash, Wingham and Lydden. (See figure 1) (<i>DDC note - see attachment for images</i>)</p> <p>In addition to this project, we are seeking out opportunities to work with local authorities to ensure that strong consideration is given to protecting and enhancing Turtle Dove habitat in development planning. We therefore welcome the inclusion of TDFZs within the Dover Green and Blue Infrastructure Strategy, May 2022. Dover is an extremely important area for Turtle Doves, containing a high number of TDFZs. Protecting and enhancing turtle doves through development planning is essential across their remaining range, and in key landscapes from which they have recently disappeared. Adults are known to be site faithful. Development pressures can lead to encroachment on existing breeding and foraging habitats and can restrict potential for recovering the species.</p> <p>Results of National Turtle Dove Survey</p> <p>Last year the RSPB and partners organised the first national Turtle Dove survey for England which further helps to focus our work. In Kent this was run by the Kent Ornithological Society in partnership with the RSPB. The results of the survey have further highlighted the importance of Kent for Turtle Doves, showing that Kent supports approximately a third of the total England population with approx. 700 territories recorded in Kent. Within Kent itself, East Kent is the stronghold for Turtle Doves within the county.</p> <p>While the data gives a good indication of known Turtle Dove territories it does not offer a complete picture. We would therefore advice that a breeding bird survey is carried out on any development that is proposed within a TDFZ or an area with known Turtle Doves or containing good quality Turtle Dove nesting habitat, to ensure the plan is consistent with national policy (NPPF).</p> <p>Sites in close proximity to Turtle Dove territories</p> <p>We have overlaid Turtle Dove territory data with the proposed sites in the Dover Draft Local Plan (using data from the 2021 National Turtle Dove survey and supporting data from BTO BirdTrack), to see if any developments pose a risk to known Turtle Dove territories.</p> <p>Two proposed sites for development contain recent records of Turtle Dove territories within a 1km area; SAP28 - Land between Eythorne and Elvington and Elvington and SAP52 - Prima Windows, Nonington. While we welcome the consideration of protecting trees and hedgerows within the site, further consideration needs to be provided for Turtle Doves, see below mitigation guidance.</p> <p><i>(DDC note - this section has been extracted to consultation points for both site policies mentioned above)</i></p> <p>Turtle Dove Mitigation Guidance</p> <ol style="list-style-type: none"> Detailed proposals should aim to protect areas of scrub and mature hedgerows suitable for nesting habitat. If destroyed, this habitat can take up to 20 years to establish and become suitable for nesting. Detailed proposals should aim to ensure foraging habitat is available and managed correctly (food shortage is the main factor triggering it's decline on their breeding grounds). Alongside this, fresh water sources should be retained and managed sympathetically. Where known breeding birds occur, detailed proposals should feature; nesting habitat, foraging areas and a freshwater source within 350 metres. Studies have shown that recently fledged turtle doves will rarely venture more 350 metres from the nest site (Dunn et al. 2016) and at this stage are likely to: <ol style="list-style-type: none"> be very vulnerable to predation. With increased human habitation it is possible there may be adverse effects from generalist predators (e.g. cats) that tend to congregate near to human habitat. (Dunn et al. 2016) and incur poor body condition if there is insufficient food nearby in the form of natural arable plant species (as opposed to anthropogenic food resources such as garden bird seed mixes and brassicas) (Dunn et al. 2018)

As well as maintaining what habitat is already present for Turtle Doves within the Dover TDFZs, we recommend looking at opportunities to further expand/create areas of suitable habitat to ensure the long-term preservation and prosperity of this species within the Dover district. Further information can be found; www.operationturtledove.org ('helping your turtle doves'). The RSPB can assist with this advice on a case-by-case basis.

Betteshanger Country Park

We would further like to highlight an important area within the Dover District that supports high biodiversity interest, Betteshanger Country Park. We have made comment and objected to recent planning applications for a Hotel and SeaHive at Betteshanger Country Park. We welcome the need for recreational space for local people but believe this should not be to the detriment of wildlife. The site is important for Turtle Dove and other priority species, and we believe it should be managed in a way that does not jeopardise the sites biodiversity. The RSPB looks forward to working with Dover DC to assist in conserving and enhancing the District's important habitat and species to ensure these assets can continue to be enjoyed and valued by all and are protected from inappropriate development.

BNG Opportunities – RSPB Lydden Valley potential BNG sites

We have been advised that you are not formally requesting BNG sites at present, but that it would be useful to include them within our representation. Please see below map detailing these sites, please let us know if you require further information. *(DDC note - see attachment to view map image).*

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Environment Act of 2021 has a legally binding 2030 species abundance target, whose professed aim is to help reverse the drastic decline in wildlife and put the nation on track to protecting 30% of land and sea for nature by 2030; also there is a new requirement for planning applications to provide Biodiversity net gain and for Local Nature Recovery Strategies to create a framework for a national system of interconnected sites for nature.</p> <p>In SP14 the words about Local Nature Recovery Strategy and the Kent Biodiversity Strategy are impressive and reassuring. But the very restricted BOAs (Biodiversity Opportunity Areas), to which they are applied renders them less than effective. Residents' local knowledge (members of Sandwich Bay Bird Observatory, Kent Wildlife Trust, local members British Trust for Ornithology, etc, etc), could increase DDC's awareness of more potential BOAs by approx. ten times at a conservative estimate.</p> <p>The UK is one of the world's most nature-depleted countries, in the bottom 10% globally and last among the G7 group of nations, new data shows. It has an average of about half its biodiversity left, far below the global average of 75%, a study has found. In contrast, a figure of 90% is considered the "safe limit" to prevent the world from tipping into an "ecological meltdown", according to researchers.</p> <p>Examples of wildlife needing protection from loss of habitat around the boundaries to the north, west and south of Deal (e.g. SAP 16 sites Ground Water source protection 2 or Flood Zone 3), which is itself representative of the larger district. Evidence (BTO Initial Sites Review recorded as accepted) shows: Much of the area is in Flood Zone 3, farmland and has an extensive biodiversity value – briefly, to name a few, breeding Mute Swan, Moorhen, Collared Dove, Cuckoo, Skylark, Meadow Pipit, Blackbird, Cetti's, Reed and Sedge Warblers, Wren, Linnet and Reed Bunting. It is also a partial feeding area for a number of species such as Heron, Little Grebe, Grey Partridge, Kestrel, Buzzard, Black-headed and Herring Gulls, Woodpigeon, Stock Dove, Barn Owl, Swift, Swallow, House Martin, Yellow Wagtail, Dunnock, Song Thrush, Carrion Crow, Rook, Starling, House Sparrow and Chaffinch. Historically Redshank, Lapwing, Snipe and Yellow Wagtail used to nest here. Many species of native plant and habitat for invertebrates, mammals such as bats, Hedgehogs, Harvest Mice and Water Voles will also be lost. Losing these species will be a considerable biodiversity loss and contrary to the requirement for a minimum of 10% biodiversity gain. How will this loss be calculated? There two other plots in this designation - Sholden to Betteshanger roundabout surrounding Cottington Court Farm and Betteshanger Country Park access road to Foulmead Cottages behind farm shop which are both deemed unsuitable, which is correct – they are both farmland and would create chaos on the A258 in addition to the loss of biodiversity, open space, increase in light pollution, disturbance, etc.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Net Gain should be measured using the latest DEFRA measurement tool The Biodiversity Metric 3.1 - JP039 - GOV.UK and also an additional metric should also be used consisting of a list of all species to be established in consultation with Kent nature-concerned NGOs, (Kent Wildlife Trusts and others). The DEFRA metric favours the developer as it only takes into consideration protected species and habitats. In the proposed Local Plan, the Appendices give an Evidence Base. This predominantly deals with species and habitats protected in Law and ignores all the other species in the District which are in decline. To be sound and effective, any and all Biodiversity net gain policies must join up the living dots.</p> <p>Planning policies which single out building development for "improvement" and avoid the other causes of this dramatic biodiversity loss, are inadequate and need strengthening to become effective. In a report entitled "The state of nature: 41 percent of UK species have declined since 1970s" (NHM 2019) the main drivers of decline are as follows –</p> <ul style="list-style-type: none"> • Changing agricultural management

- Habitat fragmentation
- Pollution
- Urbanisation
- Woodland management
- Invasive non-native species
- Fisheries degradation

All of these areas should be considered in any Plan including the DDC one.

SP 14 Under the Hunting Act 2004 foxhunting became illegal, DDC should include in its SP14 encouragement for the rural Police to uphold the law in this respect and discourage any drag-hunting which results in the 'accidental' tearing apart of wild animals.

The statement SP14 **b** must be made real and effective, and rendered sound by robust auditing and independent baseline assessments and recruitment of a much larger planning enforcement team. Then *'Every development will be required to connect to and improve the wider ecological networks'*. would become effective and sound instead of token.

SP14 3.290 Kent County Council requires 20% biodiversity net gain, and it is unsound for DDC to undermine this commitment. DDC local plan will only be sound if 20% biodiversity net gain replaces the 10% specified. The Kent Nature Partnership commits to 20% biodiversity enhancement. An addition to the Plan is therefore needed: *'Enhance biodiversity in line with Kent Nature Partnership's commitment to 20% enhancement to restore Kent's depleted natural capital and to mitigate 6th mass extinction. Natural Capital is the world's stocks of natural assets including soil, minerals, air, water and biodiversity. These provide a range of ecosystem services' that enable us all to survive and thrive. The most obvious services include the food we eat, the water we drink and timber we use for building. Less visible ecosystem services include climate regulation, carbon sequestration, natural flood defence, water filtration, species habitat, health and wellbeing. The Goodwin Sands nurture marine fauna and flora and provide a natural protection from coastal erosion. As such the Goodwin Sands are part of the district's natural capital and need protection too.*

To become sound and effective and legally compliant bird boxes , bat boxes, swift bricks, street trees, garden trees should be required on all new builds.

If existing mature trees of a good size to capture carbon now, are replaced in 'urban expansion' areas (SAP 1, SAP 24, SAP 28) by young saplings that will not be able to capture a similar amount of carbon for 40 to 50 years, then the plan will not be legally compatible with Environment Act 2021. Therefore to become sound and legally compliant SP14 should require that *for every 10,000m2 (roughly 50 dwellings of 200m2 per dwelling) of housing, one open space of 150m2 and another woodland area of 150m2 should be provided, these allocations to be non-transferable between 10,000m2 sections. Moreover development should only be permitted if 90% of existing trees are retained (These retained trees will account for the woodland areas referred to above, and will provide pockets of mature green infrastructure of amenity value to legally binding UK Net zero strategy 2019 and to new residents at little cost or inconvenience to the developer). Any new trees planted must tended with a guarantee to ensure survival 4 years after development completed.*

Moreover to become more sound and effective, we recommend adding, *Retain all trees on the perimeter of large developments and pockets of existing trees within developments. Work with Kent Nature Partnership to evaluate, and match protection of all natural capital. Work to retain and enhance natural capital generally, mindful of the KCC commitment to establish the growth of 1.5 million new planted trees across the county. Similarly, this policy would become more sound if the recommendations of KCC report 'Natural Solutions to Climate Change in Kent' of March 2021 paid for from the public purse, on the need for our district's (chalk) grasslands, wetlands, and woodlands to be retained and enhanced were adopted as a planning guideline.*

As with SP 13, to become sound and effective, SP 14 must be underpinned with a requirement for robust auditing, and honesty, otherwise extracting promises from developers all too often results merely in employment for public relations practitioners, and developers later apply for conditions to be removed. 'Where permission is given subject to conditions regarding tree retention, tree planting and / or biodiversity enhancement, applicants will need to agree to abide by 'robust auditing' (as Wildlife Trusts insisted was in Environmental Act 2021). This means that honest, objective because independent, before-and-after evaluations / baseline measurements must be used. Sketchy, google-map-based ecology reports paid for by developer applicants are deceptive. Developers are ill-placed to self-certify their own work in this area, and DDC need a policy requiring Environmental Impact Assessments on all planning applications for developments of over 15 dwellings on greenfield or rewilded brownfield sites.'

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Gladman are supportive of the principle of Policy SP14, however note the reference to Policy NE1 at criterion d. Gladman's response to NE1 will be given in detail at 4.4.13 of this representation, however whilst the Environment Act 2021 introduces a mandatory requirement for development to deliver a net gain for biodiversity of at least 10%, the secondary legislation to enact this is yet to come into force. Therefore, until such time as the mandatory provisions of the Environment Act come into force, the Council cannot require developments to achieve at least a 10% net gain, and certainly could not withhold planning permission if a proposal did not achieve a 10% gain. Gladman would therefore suggest that any requirement for a 10% net gain should be tempered with to make clear the 10% target is aspirational and not an absolute target and that "a net gain" is more appropriate.</p> <p>(DDC Note - Text Extracted from Document sent from Gladman Developments Ltd. 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC Note <i>The text below is an extract from the original representation which is attached to SDLP1438.</i> SP14 Enhancing Green Infrastructure & Biodiversity The Environment Act of 2021 has a legally binding 2030 species abundance target, whose professed aim is to help reverse the drastic decline in wildlife and put the nation on track to protecting 30% of land and sea for nature by 2030; also, there is a new requirement for planning applications to provide Biodiversity net gain and for Local Nature Recovery Strategies to create a framework for a national system of interconnected sites for nature.

In SP14 the words about Local Nature Recovery Strategy and the Kent Biodiversity Strategy are impressive and reassuring. But the very restricted BOAs (Biodiversity Opportunity Areas), to which they are applied, render them less than effective. Residents' local knowledge (members of Sandwich Bay Bird Observatory, Kent Wildlife Trust, local members British Trust for Ornithology, etc, etc), could increase DDC's awareness of more potential BOAs by approx. ten times at a conservative estimate.

Net Gain should be measured using the latest DEFRA measurement tool The Biodiversity Metric 3.1 - JP039 - GOV.UK and also an additional metric should also be used consisting of a list of all species to be established in consultation with Kent nature concerned NGOs, (Kent Wildlife Trusts and others). The DEFRA metric favour the developer as it only takes into consideration protected species and habitats. In the proposed Local Plan, the Appendices give an Evidence Base. This predominantly deals with species and habitats protected in Law and ignores all the other species in the district which are in decline. To be sound and effective, all Biodiversity net gain policies must join up the living dots.

The UK is one of the world's most nature-depleted countries, in the bottom 10% globally and last among the G7 group of nations, new data shows. It has an average of about half its biodiversity left, far below the global average of 75%, a study has found. In contrast, a figure of 90% is considered the "safe limit" to prevent the world from tipping into an "ecological meltdown", according to researchers.

Planning policies which single out building development for "improvement" and avoid the other causes of this dramatic biodiversity loss, are inadequate and need strengthening to become effective. In a report entitled "The state of nature: 41 percent of UK species have declined since 1970s" (NHM 2019) the main drivers of decline are as follows –

Changing agricultural management , Habitat fragmentation , Pollution , Urbanisation , Woodland management , Invasive non-native species , Fisheries degradation

All of these areas should be considered in any Plan including the DDC one.

SP 14 Under the Hunting Act 2004 foxhunting became illegal, DDC should include in its SP14 encouragement for the rural Police to uphold the law in this respect and discourage any drag-hunting which results in the 'accidental' tearing apart of wild animals.

Examples of wildlife needing protection from loss of habitat around the boundaries to the north, west and south of Deal (e.g. SAP 16 sites Ground Water source protection 2 or Flood Zone 3), which is itself representative of the larger district. Evidence (BTO Initial Sites Review recorded as accepted) shows: Much of the area is in Flood Zone 3, farmland and has an extensive biodiversity value – briefly, to name a few, breeding Mute Swan, Moorhen, Collared Dove, Cuckoo, Skylark, Meadow Pipit, Blackbird, Cetti's, Reed and Sedge Warblers, Wren, Linnet and Reed Bunting. It is also a partial feeding area for a number of species such as Heron, Little Grebe, Grey Partridge, Kestrel, Buzzard, Black-headed and Herring Gulls, Woodpigeon, Stock Dove, Barn Owl, Swift, Swallow, House Martin, Yellow Wagtail, Dunnock, Song Thrush, Carrion Crow, Rook, Starling, House Sparrow and Chaffinch. Historically Redshank, Lapwing, Snipe and Yellow Wagtail used to nest here. Many species of native plant and habitat for invertebrates, mammals such as bats, Hedgehogs, Harvest Mice and Water Voles will also be lost. Losing these species will be a considerable biodiversity loss and contrary to the requirement for a minimum of 10% biodiversity gain. How will this loss be calculated? There two other plots in this designation - Sholden to Betteshanger roundabout surrounding Cottington Court Farm and Betteshanger Country Park access road to Foulmead Cottages behind farm shop which are both deemed unsuitable, which is correct – they are both farmland and would create chaos on the A258 in addition to the loss of biodiversity, open space, increase in light pollution, disturbance, etc.

The statement SP14 b must be made real and effective, and rendered sound by robust auditing and independent baseline assessments and recruitment of a much larger planning enforcement team. Only then will 'Every development will be required to connect to and improve the wider ecological networks'. would become effective and sound instead of token.

SP14 3.290 Kent County Council requires 20% biodiversity net gain, and it is unsound for DDC to undermine this commitment. DDC local plan will only be sound if 20% biodiversity net gain replaces the 10% specified. The Kent Nature Partnership commits to 20% biodiversity enhancement. An addition to the Plan is therefore needed: 'Enhance biodiversity in line with Kent Nature Partnership's commitment to 20% enhancement to restore Kent's depleted natural capital and to mitigate 6th mass extinction. Natural Capital is the world's stocks of natural assets including soil, minerals, air, water and biodiversity. These provide a range of ecosystem services' that enable us all to survive and thrive. The most obvious services include the food we eat, the water we drink and timber we use for building. Less visible ecosystem services include climate regulation, carbon sequestration, natural flood defence, water filtration, species habitat, health and wellbeing. The Goodwin Sands nurture marine fauna and flora and provide a natural protection from coastal erosion. As such the Goodwin Sands are part of the district's natural capital and need protection too.

To become sound and effective and legally compliant bird boxes, bat boxes, swift bricks, street trees, garden trees should be required on all new builds.

If existing mature trees of a good size to capture carbon now, are replaced in 'urban expansion' areas (SAP 1, SAP 24, SAP 28) by young saplings that will not be able to capture a similar amount of carbon for 40 to 50 years, then the plan will not be legally compatible with Environment Act 2021. Therefore, to become sound and legally compliant SP14 should require that for every 10,000m2 (roughly 50 dwellings of 200m2 per dwelling) of housing, one open space of 150m2 and another woodland area of 150m2 should be provided, these allocations to be non-transferable between 10,000m2 sections. Moreover, development should only be permitted if 90% of existing trees are retained (These retained trees will account for the woodland areas referred to above, and will provide pockets of mature green infrastructure of amenity value to legally binding UK Net zero strategy 2019 and to new residents at little cost or inconvenience to the developer). Any new trees planted must be tended with a guarantee to ensure survival 4 years after development completed.

Moreover, to become more sound and effective, we recommend adding, Retain all trees on the perimeter of large developments and pockets of existing trees within developments. Work with Kent Nature Partnership to evaluate, and match protection of all-natural capital. Work to retain and enhance natural capital generally, mindful of the KCC commitment to establish the growth of 1.5 million new planted trees across the county. Similarly, this policy would become sounder if the recommendations of KCC report 'Natural Solutions to Climate Change in Kent' of March 2021 paid for from the public purse, on the need for our district's (chalk) grasslands, wetlands, and woodlands to be retained and enhanced were adopted as a planning guideline.

As with SP 13, to become sound and effective, SP 14 must be underpinned with a requirement for robust auditing, and honesty, otherwise extracting promises from developers all too often results merely in employment for public relations practitioners, and developers later apply for conditions to be removed. 'Where permission is given subject to conditions regarding tree retention, tree planting and / or biodiversity enhancement, applicants will need to agree to abide by 'robust auditing' (as Wildlife Trusts insisted was in Environmental Act 2021). This means that honest, objective because independent, before-and-after evaluations / baseline measurements must be used. Sketchy, google-map-based ecology reports paid for by developer applicants are deceptive. Developers are ill-placed to self-certify their own work in this area, and DDC need a policy requiring Environmental Impact Assessments on all planning applications for developments of over 15 dwellings on greenfield or rewilded brownfield sites.'

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The importance of ecological networks of linked habitat corridors (both within the District and linking to adjacent District) to allow the movement of species between suitable habitats, and to promote the expansion of biodiversity is defined in the NPPF and the Local Nature Recovery Strategy commitment of the government's 25-year Environment Plan and enacted by the Environment Act 2021.</p> <p>The connectivity of Local Wildlife Sites and other designated sites should not be disrupted through the allocation of sites for development and should aim to promote further connectivity of the ecological blue and green network through habitat creation and improvement. A numerical commitment to biodiversity net gain is required in order to be in line with the Environment Act 2021 and should be realised equally in both terrestrial and aquatic habitats using the Natural England Biodiversity and Rivers Metrics.</p> <p>Allocated sites should not encroach on any watercourse, and we urge a minimum 10m buffer zone to development proposals that contain or are adjacent to watercourses.</p> <p>Where there is opportunity for river restoration, such as habitat enhancement/creation, re-meandering, improved fish/Eel passage and the restoration of culverted watercourses to open channels, we would like to see a commitment to actively pursue these aims.</p> <p>Special focus could be aimed at culverted sections of any watercourse. If/where the watercourse is toe-boarded site allocations should consider opportunities for removal.</p>

	<p>With reference to Paragraph 185 of the NPPF (2021) which states that planning policies and decisions should “limit the impact of light pollution from artificial light on ... dark landscapes and nature conservation.” We would urge appropriate lighting design in line with best practice guidance set out by the Bat Conservation Trust as riparian corridors are essential for many migrating and nocturnal species.</p> <p>As an informative point, allocations should take into consideration the use of sustainable urban drainage systems (SuDS) and Natural Flood Management (NFM) measures for flow attenuation, filtration, and water conservation.</p> <p>We welcome engagement at the earliest opportunity to identify opportunities through development proposals for securing measurable gains for biodiversity.</p> <p>Local Plan to 2040 The government’s 25 year plan to improve the environment should possibly be referenced in the Local Plan (25-year-environment-plan.pdf (publishing.service.gov.uk). Although many items mentioned in the 25 year plan are covered in the Local Plan, it makes sense to align government plans with local plans.</p> <p><i>(DDC note - This is an extract from the full Environment Agency representation SDLP1458)</i></p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Local Plan Consultation Point	Strategic Policy 15 - Protecting the Districts Historic Environment
Rep ID	SDLP44
Rep Status	Processed
Consultee ID	1254085
Consultee Full Name	Mrs Sue Ward
Consultee Company / Organisation	
Agent Full Name	
Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP15, 3.299
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The proposed Whitfield Urban expansion to the northwest not only threatens the natural environment, as commented on previously, it seriously damages the historic environment by surrounding three historic listed buildings by housing estates. These three buildings were all working farms, which had fallen into disrepair, but have in recent years been restored by their private owners at great expense. These buildings' natural environment is as it is at present, arable farmland, where their significance can be properly appreciated by residents and users of adjacent public rights of way. This will be lost by the proposal to surround them with houses and is contrary to Sections 190 and 195 of the NPPF.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Allow these buildings and the adjacent rights of way to be properly conserved and enhanced by pulling back the proposed boundaries of the Whitfield Urban expansion. This was previously covered in Section 4.50 of the 2010 Core Strategy and it is not explained why it has been deemed appropriate to go against this commitment in the current plan, contrary to Sections 190 and 195 of the NPPF.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Because the comments and arguments accepted by the Council in 2010 have now been ignored. These buildings are just as worthy of consideration now as they were then

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The village of Alkham is blessed with a number of listed buildings which are under threat from vibration, subsidence and pollution due to excessive traffic. Some of these buildings and historic structures are so close to the road as to be extremely vulnerable and at least 3 have suffered impacts recently.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	Redirecting unnecessary through traffic to the intended primary routes. Slowing and reducing local traffic on unclassified local roads. Restricting HGVs to access only and greatly reducing their speed.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The County Council welcomes the commitment to developing a Local List which is also one of the recommendations of the Heritage Strategy. KCC would encourage the District Council to ensure that the list is eligible to the full range of heritage assets including buildings, archaeological sites and monuments, green spaces and landscapes so that all aspects of Dover's past can be recognised. This was also a recommendation of the Dover Heritage Strategy (R14). In addition to the Local List, however, the Heritage Strategy recommended that the District Council develops a Register of Heritage Assets at Risk (R15). This would complement a Local List and allow assets at most risk to be highlighted and to potentially receive more focused attention. The County Council recommends that such a register be created in addition to the Local List.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Heritage-At-Risk - with the exception of a specific reference in policy SAP4 for the Western Heights, there is no policy to describe how the wider district will develop and implement a positive strategy to reduce risk for its vulnerable heritage assets and sites, of which there are a number; e.g. the Grade I Listed Belvedere Springs. Our view is there should be a separate policy to ensure that proactive actions for dealing with Heritage-At-Risk cases would flow from such a policy in accordance with paragraph 190, NPPF - <i>Plans should set out a positive strategy for the conservation and enjoyment of the historic environment, including heritage assets most at risk through neglect, decay or other threats.</i> <i>(DDC Note - This is an extract of the full Historic England representation which can be located at SDLP1169)</i>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Welcome the preamble's acknowledgement of Dover's exceptional historic environment and the role it can play in enriching the social and economic wellbeing of the district. We also welcome reference to the creation of a local list, especially because Dover has a wealth of non-designated heritage related to its important role in both World Wars and an extensive range of historic buildings and places that do not meet the criteria for statutory designation. We also think the creation of a local list can be a useful way to engage with local populations and understand what they value in their area. We therefore hope the Council can commit to the creation of a local list within the early part of the delivery of the updated local plan.</p> <p>(DDC Note - This is an extract of the full Historic England representation which can be located at SDLP1169)</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>HERITAGE 8.1 The plan contains a whole section on heritage and references the Dover Heritage strategy but no reference is made to the village Alkham.</p> <p>8.2 The parish contains several sites of historical interest :-</p> <ul style="list-style-type: none"> • In 1990 an Iron Age burial site was discovered. As well as cremation urns this contained two rare wooden buckets covered with bronze sheeting and handle mounts in the form of human figures known locally as the Saxon Man • A previous archaeological dig uncovered part of a Roman settlement which was then re- covered for protective purposes. • As shown below the valley is criss-crossed by many ancient bridle and footpaths including a path known as the Priests walk which leads from the church in the village to the ruins of St Radigund's Abbey which was founded in 1192. • Alkham village has a number of ancient buildings including several medieval hall houses, the Church of St Anthony the Martyr, a grade 1 listed building, the Old Rectory which dates back to the 18th Century, the Marquis built in 1810, Forstal Cottage and Malmains Manor to name but a few. • In total there are seventeen Grade 11 listed buildings and the churchyard contains 25 Grade 11 listed headstones. <p>8.3 There is also great pride in the village's contribution to the First and Second World Wars, the names of the fallen appear on the village war memorial and a page of the village web site is dedicated to them</p> <p>Comment 8 Designated and Non Designated Heritage Assets (DDC Plan –HE1 - 12.1-12.8 &12.11-12.12) Conservation Areas (DDC Plan –HE2 - 12.13-12.22) (DDC note - comment assigned to SP15 as strategic policy rather than HE1 and HE2)</p> <p>If Dover District Council is working with English Heritage to develop funding bids to preserve the heritage of the district, as Alkham has a plethora of discovered and yet unearthed settlements and sites and historic buildings dating back to the bronze age and some of the artifacts are housed in the British museum archives, then the Alkham Valley wishes to be part of this process and consider how it can maximise its heritage opportunities</p> <p><i>(DDC note - The full representation from Alkham PC is attached to representation SDLP1653. However, specific comments from the full representation document have been extracted into separate consultation points/policy areas, relevant to the comments made)</i></p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 14 Cross Road, SAP16 TC4S008 Bridleway Riding School, RIP001
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>RIP 001. I support the exclusion of this site from development. A development here would be entirely incongruous in this rural location. Road links to the site are very poor. The development would increase use of the nearby Coldblow user worked railway level crossing which is highly undesirable. So I support the exclusion of this site from the sites of housing allocation.</p> <p>SAP16 and TC4S008. Both represent a spread of the built up area into the surrounding countryside, the Bridleway development in particular being the first south of Cross Road on that side of the railway line. This is regrettable. I am very concerned about the increase in traffic under the railway over bridge on Cross Road. This bridge is narrow and contains wrought iron elements that are highly vulnerable to vehicle collision. I could not determine if the council has consulted the rail authority on this but some specific contact would be a responsible thing to do.</p> <p>By way of illustration attached a photo of the rail bridge at Ripple Court less than a mile from Cross Road, and of the same construction on the same rail line after collision from a modest sized vehicle in March 2020. The vulnerability of the bridge is clear to see.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Alkham Parish Council challenges the classification as a "Larger Village" as defined in the Local Plan. "Each of these villages has a good range of services and facilities which serve their own residents and those of nearby hamlets. Capel-le-Ferne, Lydden, Preston, Worth and East Langdon have primary schools and Capel-le-Ferne, Lydden, Worth, Alkham are served by frequent regular bus routes. Retail facilities are not as available however as at the Local Centres, with only Preston and Capel-le-Ferne having a village shop, and only East Langdon having Post Office facilities"</p> <p>Alkham does not have a frequent or regular bus service, there are no shops, no school, no GP surgery therefore we do not have a good range of facilities which serve our own residents and those of nearby hamlets. The parish council requests that Alkham is reclassified as a smaller village.</p> <p>The parish council again to raises concerns with Dover District Council's wanton disregard for the protection of the AONB. We note with interest that none of the other Non Strategic Housing Allocation sites are within the AONB. We consider it a fundamental duty of DDC to protect the AONB , not to encourage and actively promote its erosion.</p>

The parish council are astonished to see this site included in the local plan when in January 2017 outline planning permissions for six homes on this site was refused by DDC. The grounds given were:

TAKE NOTICE that Dover District Council, the Local Planning Authority, HAS REFUSED Outline Planning Permission for the proposal in accordance with the application and accompanying plans received on 21/10/2016

The reasoning underlying such refusal is as follows:-

1 The proposed development would result in an obtrusive urban form of development in the open countryside, beyond the settlement confines, which would detract from the unspoiled rural character of the area and the setting of the village of Alkham and the character and appearance of the Area of Outstanding Natural Beauty within which the site lies. In particular, the proposal would be contrary to Dover District Core Strategy Policies DM1, DM15 and DM16, paragraphs 109 and 115 of the National Planning Policy Framework and Policies SD1, SD2 and SD03 of the Kent Downs Area of Outstanding Natural Beauty Management Plan

2014-2019

In accordance with paragraphs 186 and 187 of the NPPF, Dover District Council (DDC) takes a positive and proactive approach to development proposals focused on solutions.

DDC works with applicants/agents in a positive and proactive manner by: Offering a

pre-application advice service; where possible, suggesting solutions to secure a successful outcome; and, as appropriate, updating applicants/agents of any issues that may arise in the processing of their application. In this instance:

1 The application does not accord with the development plan and no material considerations are apparent to outweigh these matters.

Alkham parish council asserts that the AONB remains unchanged and that this 'development' of 10 houses would result in an obtrusive urban form of development in the open countryside, beyond the settlement confines, which would detract from the unspoiled rural character of the area and the setting of the village of Alkham and the character and appearance of the Area of Outstanding Natural Beauty within which the site lies. In particular, the proposal would be contrary to Dover District Core Strategy Policies DM1, DM15 and DM16, paragraphs 109 and 115 of the National Planning Policy Framework and Policies SD1, SD2 and SD03 of the Kent Downs Area of Outstanding Natural Beauty Management Plan 2014-2019

A subsequent appeal to the Planning Inspectorate was unsuccessful.

Appeal Decision

Site visit made on 21 November 2017

by Grahame Gould BA MPhil MRTPI

an Inspector appointed by the Secretary of State for Communities and Local Government

Decision date: 11th December 2017

Appeal Ref: APP/X2220/W/17/3180321 Land at Short Lane, Alkham CT15 7BZ

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.*
- The appeal is made by Mr S Barnes against the decision of Dover District Council.*
- The application Ref DOV/16/01216, dated 20 October 2016, was refused by notice dated 25 January 2017.*
- The development proposed is the erection of up to 6 dwellings with garaging.*

1 The appeal is

1 The application was made in outline form and sought permission for up to six dwellings, with matters relating to access, appearance, landscaping, layout and scale all being reserved for future consideration.

1 The main issue is the effect of the development on the character and appearance of the Kent Downs Area of Outstanding Natural Beauty (the AONB).

1 The dwellings would occupy part of a field, currently used as grazing land, which slopes gently from north to south. To the west, on the opposite side of Short Lane, there is housing, while to the east and south there are gently rolling open fields. Immediately to the north of

the site there are four pairs of semi-detached houses, 1 to 8 Short Lane (Nos 1 to 8) granted planning permission in 1993. A little to the south of the site there is a public right of way (PROW) extending eastwards from Short Alkham is a small village mainly characterised by housing, with very few local services and facilities being available within it.

2 *Given that the site is situated in the AONB there is a general duty to have regard to the purpose of conserving and enhancing the AONB's natural beauty¹.*

Alkham parish council asserts that none of the above reasons for refusal have changed. Further that Policy DM16 of the Core Strategy states that development that would harm the character of the landscape will only be permitted if: it accords with a development plan allocation and incorporates any necessary avoidance or mitigation measures; or it can be sited to avoid or reduce the harm and/or its design would incorporate measures to mitigate the impact to an acceptable level. The parish council asserts that this development does not incorporate any necessary avoidance of mitigation measures and its siting will harm the nature of the AONB.

We would refer you to point 10 of the Inspectors response:

1 *While the site's roadside boundary is marked by an established hedgerow it would only provide limited screening for the development, not least because an opening or openings would be needed for access purposes. I recognise that there would be scope to undertake soft landscaping along the eastern boundary and immediately to the south of the site. However, it would take a considerable period of time before any new planting would provide any meaningful mitigation for the development when it was viewed from Short Lane or the PROW.*

Alkham parish council asserts that the observations of the Inspector are still valid and there will not be suitable screening of this development.

The parish council concurs and supports the inspectors decisions point 12:

1 *I consider that the development would neither conserve nor enhance the AONB's natural beauty and I therefore conclude that it would be harmful to the character and appearance of the AONB. There would therefore unacceptable conflict with Policies DM1, DM15 and DM16 of the Core Strategy and paragraphs 109 and 115 of the Framework. In relation to Policy DM15 I consider that the development would not come within any of this policy's stated exceptions. I also consider that the Kent Downs Area of Outstanding Natural Beauty Management Plan 2014 to 2019 does not provide support for this development.*

Alkham parish council fully supports all reason given by the Inspector in his refusal of the appeal for six houses on the site in November 2017.

We are therefore astounded that Dover District Council has completely ignored not only the Planning Inspectorates Decision (November 2017) but its own refusal (December 2017)for six properties and now suggests that ten houses on the same site would be acceptable.

Further DDC have identified that the site is liable to flood and that a flood risk assessment is required. The constraints of the existing infrastructure with regards sewage and flooding is insufficient for a development of this size.

The parish council would urge Dover District Council to reconsider this site and act in a manner that is both consistent and to protect the AONB.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

This development will have a significant impact on the residents of Alkham and is damaging to the AONB. The Parish Council would wish to make the voice of our residents known to the Inspector. The Parish Council is passionate in its resolve to maintain the character of the AONB.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	There are several draft allocation sites that are relatively remote from good quality sustainable walking, cycling and public transport options. Therefore, site specific public transport and sustainable transport strategies should be considered at this stage. This will encourage a coordinated approach to public transport provision (and secured through the Infrastructure Delivery Plan), subsequently assisting strategic development planning decisions in the future

(Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Site specific public transport and sustainable transport strategies should be considered at this stage. This will encourage a coordinated approach to public transport provision (and secured through the Infrastructure Delivery Plan), subsequently assisting strategic development planning decisions in the future.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	To ensure that settlements of the 'garden village' scale do not appear to be dropped into the landscape with no real reference to what is already there, it is essential that such new development works with the grain of the existing landscape and settlements so that they appear to be a natural expansion rather than an entirely new construct. To that end, it is important that any heritage assets, in the form of historic buildings or archaeological monuments, and the historic landscape, in the form of the pattern of tracks, lanes and field boundaries, are integrated into the masterplans for the new villages. At present this is not reflected in the text and KCC would recommend that the text needs to be strengthened so that the heritage of the new settlement is fully integrated into the new design.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We welcome much of the supporting text in the 'Requirements for Planning Applications' section, particularly those parts relating to Landscape and Biodiversity, Ecology, Flood Risk and Water Supply and Wastewater. However, please see our advice below regarding the need to review the requirement for wintering bird surveys. We will also be providing further advice on the requirement for all sites falling within 500m of the Thanet Coast and Sandwich Bay SPA to undergo project-level HRA. We note that a number of strategic, non-strategic and small housing site allocations currently include a policy requirement to undertake wintering bird surveys. This is linked to an overarching requirement in Strategic Policy SP13 (informed by the Local Plan HRA) and relates to concerns around the loss of undesignated land that is nonetheless important in supporting the bird populations of Habitats Sites (otherwise known as functionally-linked land). Our previous advice notwithstanding, the current approach feels quite precautionary and potentially places an unreasonable expectation on future developers of smaller or more distant sites. We are currently seeking further advice on this matter from our national ornithology specialists and will work with your Authority to ensure that the final list of site allocations containing this policy requirement strikes an appropriate balance between precaution and pragmatism. We would

	also like to explore with your Authority the evidence behind the requirement for certain site allocations to carry out “appropriate species and habitat surveys prior to determination”. We would like to better understand the rationale behind this as it is only included as a policy requirement for a minority of sites and we are concerned that a lack of this wording for other sites could be taken by future developers to mean that such surveys are not required when this may not be the case.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>RE: Omission Site- Land on the South West side of Hillside Road, Dover Proposed for residential development - Indicative capacity 10-15 units. Previous Reference Numbers: DOV011; TC4S100</p> <p>I've been instructed by my client, Mr Virtue, to provide representation against the non-inclusion of a site in his ownership in the final Local Plan Regulation 19 document.</p> <p>I did not act as agent in the previous submissions of the site but following correspondence with the Planning Policy Team at Dover District Council, it is my understanding that the site was originally put forward for housing development and assessed as part of the Housing and Employment Land Availability Assessment (HELAA) under site reference DOV011. The site was also submitted for potential employment use, my client thought this to be a care home, during the 2021 Call for Sites. At this stage, the site was given the reference number TC4S100. Despite the submission of the site to the Council, the site was not included as an allocation in the Regulation 19 Local Plan or a 'reasonable alternative', and therefore, the site has not undergone a Sustainability Appraisal.</p> <p>On the basis of lack of sustainability assessment and in accurate HELAA assessment, we object to the non-inclusion of the site and request that the site is reconsidered as an omission site. It is the intention of this submission to reduce the size of the site and the housing numbers proposed to an indicative capacity of 10-15 units. The site is no longer promoted for employment use.</p> <p>1.Sustainability of the Site:</p>

	<p>The site should be reconsidered for inclusion in the Local Plan as it is sustainable.</p> <p>Firstly, the site is in one of the most sustainable locations in the built-up area of Dover. It has access to sustainable transport links, health services and community and shopping facilities all within walking distance.</p> <p>Further to this, and reflecting its sustainable location, the site previously had outline planning permission for 28 dwellings approved under application 87/00081. This scheme was for outline consent and included 8 x semi-detached, 19 x terraced and one detached dwelling with associated.</p> <p>This submission would reduce the number of proposed dwellings to an indicative number of 10-15. Any future scheme would be low-density and provide green links and access for people to enjoy the wider green spaces and the setting of the AONB and the neighbouring local wildlife site.</p> <p>2.Inaccuracies in the DDC Assessments:</p> <p>The site was dismissed as 'unsuitable' in the HELAA. This assessment has inaccuracies which should be reconsidered.</p> <p>The reasons for being deemed unsuitable are summarised below:</p> <ul style="list-style-type: none"> • The site is dense wood and scrubland. This includes the access point to the site in the northeast. Any development of the site would require the removal of this dense woodland. • Unacceptable impact on biodiversity. • The site is on a slope that raises away from the access point to the highway. • The raised position of the site would create development at a higher elevation than the existing residential to the east and would likely impact on the AONB immediately adjacent to the west AONB setting. • Potentially development of the scale proposed could have an impact on nearby roads in terms of vehicular traffic. <p>The above assessment is inaccurate as the site is only self-seeded woodland, with the historic use of the site being allotment gardens, which served the properties on Hillside Road. Discussions with long-standing residents of these properties, and historic photography, has identified that the site was still being utilised as allotment gardens as late as in the 1980s. On this basis the woodland identified on site is self-seeded with many saplings and very few mature specimens. By virtue of the habitat created in this nature, the site does not have any biodiversity of ecological designations.</p> <p>The site being on a slope should not have been a reason for non-inclusion. The town of Dover, including large areas of development, is built on a slope and the design of any future scheme could reflect the topography of the land and take into consideration the existing development on Hillside Road. For example, future design proposals could ensure that there is no impact on the residential amenity, by designing layout and the massing and scale of any new dwellings to acknowledge and respect the existing development.</p> <p>Any concern raised regarding the potential of the scheme impacting on neighbouring roads will be rectified by reducing the number of dwellings proposed on the site.</p> <p>3.Deliverability of the site:</p> <p>In accordance with the definition of the National Planning Policy Framework, the site is available for immediate delivery and would be a positive contribution to Dover District Council's Housing Land Supply, it could be delivered in the first 1-5 years of the Dover District Local Plan period. In consideration of this, the NPPF acknowledges the positive contributions that smaller sites can make to the supply of housing in the local area.</p> <p>It is for the above reasons that the site should be reconsidered for inclusion in the Local Plan. Should you require any further information do not hesitate to contact me.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I wish to attend any future hearings relating to omission sites. Specifically regarding the potential for their inclusion in the Local Plan.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP3 Housing growth
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Due to the governments announcement 5/12/22 the plan is not positively prepared as the development needs must be reassessed. This means it is no longer justified as there now is the room without central government pressure to find reasonable alternatives. It is also not effective as the pressure put on local communities and existing infrastructure is unreasonable and means that it is not deliverable. The plan is also not consistent with NPPF 2021 as the many landscape and heritage assets in Dover District are being compromised by the level of unsustainable overdevelopment which the current plan has allowed.</p> <p>The Housing Growth statement that the aim is to , “provide a greater choice of high-quality housing to meet the needs of Dover districts’s growing population and changing demographic and address affordability issues”, does not seem internally consistent with the details provided in the plan which underestimates the evidence showing a large part of district population growth is due to aging. The details thus render SP 3 and SP 5 less effective and less sound.</p> <p>Under the current LDP developers have shied away from the badly needed regeneration of Dover and concentrated on building maximum profit, minimum affordability developments of large homes around the more desirable town of Deal and out in Whitfield. The supposed regeneration of Dover has resulted in another generic shopping centre and a more depressed high street and has not lifted the rest of Dover. The promenade area is uplifted but there seems to be little connectivity to the rest of Dover.</p> <p>The government department (DLUHC) decision that Dover needs 611 new dwellings a year and a minimum of 10,998 new homes between now and 2040 we find very incompatible with legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008, and unsound. We should be transforming existing housing stock into zero carbon homes as is happening in East Sussex, led by Lewes DC. Combining these numbers with 3.51 and the statement ‘76.7% of the new homes are on greenfield sites, while 23.3% are on brownfield sites’ is unsound and unacceptable to the public.</p> <p>We feel that our communities are being harvested by developers and our worries are not being heard or needs met in terms of infrastructure. Thanks to certain national newspaper Sunday supplements, Deal is desired as a 2nd home location by the wealthy from London and elsewhere. Holiday homes which spend most of the year empty in Deal, Dover and coastal villages of Kingsdown and St Margarets are stopping locals from buying affordable homes in their own area from existing housing stock.</p> <p>It must also be pointed out that at least one of the sites included in the 23.3% of brownfield sites is actually a site intended by SEEDA as local nature reserve having rewilded on unstable slag (only rendered stable by tree-planting, a site which DDC forgot to make a local nature reserve in 2004, and it has become a biodiversity hotspot well known to genuine ecologists nationally; Betteshanger Park.</p> <p>Central government in London, according to Housing Today is imposing a disproportionate amount of housing growth on Kent and the SE. There is a grievous lack of democratic accountability across Kent. So the chances of protecting Kent, of achieving a Growth Strategy that creates</p>

climate-friendly jobs and suitably sized, suitably-priced zero-carbon homes for the next generation of local families, are not good. The space available for infrastructure, functions well for compact coastal towns of the size that Deal / Walmer and Sandwich were 5 years ago. The level of greenfield overdevelopment which has been disastrous under the current weak LDP is putting Deal infrastructure under strain now, so in-fill should make up the majority of the allocations for Deal and that the housing growth specified for District Centre of Deal and around its boundaries needs to be stopped or radically reduced. Either or both of SAP 15 / SAP 34 would destroy the only road access alternative for diverted traffic. (See detailed comments under SAP 15/ SAP 34 below). Housing Growth that threatens gridlock, blocking off a conurbation of 30,000 from access by emergency vehicles, commuters, school buses is not sustainable housing growth and is very unsound.

3.29 I note and welcome a degree of shift from the Reg 18 draft, in that more sites have been selected with a view to using 'existing infrastructure, facilities and services, with a greater professed purpose to ensure development contributes to the sustainability of local communities and services'.

I note with appreciation both the increase in the number of sites in Dover town SAP 6 – SAP 13, and the SAP 26 Former Snowdown Colliery, Aylesham near a rail station for example. It should be possible to state a determination to 'make best use of brownfield – non-rewilded – land) without giving developers the opt-out qualification 'wherever possible'.

On Five Year Housing Land Supply. 3.39 Having stated the Council had 6.03 years land supply plus a 5% buffer; it is not sound, effective or legally compliant to then state 'the provision of additional sites within the first 5 years of plan period is needed to ensure resilience and promote flexibility;'. Instead of ensuring resilience, it will create exactly the destructive suburbanisation of a rural district that many, many of the resident electorate are most worried about.

3.46 It is the conspicuous lack of a secondary school in Aylesham that prevents Aylesham becoming the small garden town planners aspire to. The provision of a secondary school by 2028 should be a condition of SAP 23. There seems to be a complete lack of planning in the statement that now

3.48 Many, many of the current residents of ex mining village Elvington were / are dependent on buses that have recently (2022) been cut, (following KCC cut to bus subsidies) to get to work in Canterbury, Folkestone, Sandwich, Thanet or Dover, or to get to secondary school, or to get to doctors, or to shop. These people had environmentally sustainable public transport service that has been cut. KCC is saying it is looking at potential bankruptcy in 2023, so promises of new services and facilities are met with some disbelief. The selection of this site is ONLY sound with cast-iron conditions to provide all of the services we mention below, including new drainage infrastructure. Council housing in Elvington has been subject to flooding from the sewage system, long overdue for replacement. As in Dover deprived wards, there are unhealthy EPC EFG homes in Elvington that need to be transformed into zero carbon home to lift residents out of fuel and therefore food poverty.

3.68 Windfall. Unless existing settlement boundaries are respected, there is suburban ribbon development creep from field to field to field. To render the plan sound it should contain a statement 'Previously existing settlement boundaries will be respected, until such time as town and parish councils may have agreed changes with Dover District Council, in accordance with the principles of Localism Act 2011.' In the current economic climate, it seems very naïve to hope that 'new housing in villages can help them retain existing services such as public transport, retail (many pubs are going under because lack of staff and sky high energy bills) and schools'. Indeed we have lost a large proportion of our bus services in the district.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Push back to central government and demand a reduction in the housing allocation of 10,998 new homes. Now possible after announcements 5/12/22 from Prime Minister.

Regenerate Dover as a priority, retrofitting existing housing stock to provide well insulated renewable energy powered homes. Windfall development only should be allowed in Deal, Sandwich and surrounding villages. Create a self sufficient sustainable garden village at Aylesham with secondary school and green infrastructure and homes far beyond future homes standard.

Provide better facilities and transport links for Whitfield to ensure that homeowners are not car dependent.

Lobby central government for changes to the rules for ownership of second homes. Priority should be given to locals.

Make the wording in the plan stronger in favour of brownfield sites eg 3.32 *sufficient amount and variety of land* should also state that brownfield must be used before greenfield as per stated in NPPF 21.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I will keep my comments short but this does not reduce my hard feelings on the matters stated.</p> <p><u>DOVER TOWN AREA</u></p> <p>Generally a difficult area to develop possibly due to the amount of historically protected and listed buildings that are costly to maintain.</p> <p>The idea to offer the main central car parks as potential development sites is ridiculous and ill thought by people who do not live in Dover or have first hand experience of some of the pressures that Dover Town has compared with other parts of the District.</p> <p>While appreciating that the Bench Street Car Park only had a restricted time as a car park through the planning process, it will still mean the loss of 48 local car parking spaces for public use.</p> <p>Add to this the utterly unacceptable and ridiculous suggestion that Stembrook Car park should be offered as a development site, the most used and popular car park in the town, would reduce the town parking capacity by a further 89 spaces. This area has already lost a number of on-street parking spaces due to the Market Square Project.</p>

	<p>There is no mention of alternative nearby parking being introduced to replace the possible loss of 137 central town parking spaces and please don't suggest a multi-story answer as we demolished one to build the St James Development – closed as it wasn't used like the multi-story in Dour Street that is hardly used – people do not like using M-S Car Parks unless they are right in the centre of the retail area – like at White Friars in Canterbury. People want to park as near as possible to where they require to go. During my 18 years of being the DDC Portfolio Holder covering parking I went to a number of seminars and courses on parking attitudes of motorists and at one the tutor said that people would take their cars to bed with them if they could to save walking down stairs in the morning. Deal Town Centre is busy and popular as the well used Middle Street Car Park is centrally located – please learn from an example in another part of our District. Summed up, and don't get me wrong, as a born and bred Doverian I fully support redevelopment and regeneration in my home town but it must be undertaken with the needs of local residents in mind, if both Bench Street and Stembrook Car Parks are swallowed up by so called Town Centre Development it may well lead to the death of Dover Town Centre.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>(DDC Note - Full Representation attached to SDLP1731. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1731.)</p> <p>REPRESENTATIONS TO THE DOVER DISTRICT LOCAL PLAN REGULATION 19 CONSULTATION IN RESPECT OF LAND TO THE NORTH OF ASTLEY AVENUE, DOVER</p> <p>Iceni Projects, on behalf of Quinn Homes, wishes to submit further representations to the Dover District Local Plan (Regulation 19 Consultation) in respect of land to the north of Astley Avenue, Dover (hereafter referred to as 'the Site').</p> <p>Quinn Homes, the leading provider of self and custom-build housing in the south-east, is disappointed to see that the Site has not been included as a housing allocation at this stage in the plan making process. The Site could offer Dover a unique opportunity for the provision of much-needed self-build executive housing at the town's edge, facilitated by an award-winning local developer.</p> <p>It is submitted that a modest residential scheme of circa 45 high-quality Self and Custom Build Homes would not only provide an extremely attractive addition at the border of the urban area, it would also relocate the current industrial use – a large scaffolders' yard – to a more suitable location in the Dover district. As a result, this site offers a chance to address unmet self-build housing need in the district with larger bespoke executive homes, while achieving environmental betterment in the form of reduced landscape and highways impacts associated with the current use. In short, this is a unique opportunity for Dover to secure high quality Self and Custom Build Homes, in a highly sustainable location, at a brownfield site currently accommodating an industrial use.</p> <p>Policy accordance</p> <p>The Site borders the Dover settlement boundary and includes Previously Developed Land (PDL) in active commercial/industrial use. Therefore, the development of the Site would represent an opportunity to make the best use of land in accordance with Chapter 11 and Paragraph 120 of the National Planning Policy Framework (NPPF). The Site would make a notable contribution to the District's short term housing targets and Self and Custom Build needs (discussed below), while helping to secure the achievement of annual housing targets through a broadened scope of deliverable housing sites over the plan period. The redevelopment would also significantly improve neighbouring amenity, provide economic benefits, and create an attractive and unique addition to the local development profile.</p> <p>The site represents a unique opportunity for a bespoke, high-quality development of a form and type distinctive to the housing expected to be delivered across the town and will make a meaningful contribution to housing needs. This will include new-build detached executive housing in the largest town in the District which has historically struggled to deliver housing due to viability. This aligns with the evidence set out in the SHMA (2017, and Update 2019) which identifies a considerable need for 3-bed and 4+bed homes. In particular, it is noted that for self-build housing, those that registered their interest most commonly sought to build three- and four-bedroom detached houses. The draft Local Plan makes a number of references to the provision of high-quality dwellings to meet local needs identified in DDC.</p> <p>It is Quinn Homes' view that the current suite of allocations in the draft Plan will fail to provide a sufficient level of growth in and around the main settlement of Dover, and that it is over reliant upon a single urban extension to meet local housing needs, which is considered too far from the town to create</p>

noticeable positive impacts for the settlement's existing residents. Moreover, there is a locally identified need for larger executive homes and it is considered that the plan should allocate more sites for Self and Custom Build Housing. These should be in sustainable locations, where they can make effective use of land and address the needs of those seeking to own innovative homes in an urban setting. Quinn Homes, who would be the developer, is an acclaimed builder of Self and Custom Build Housing and considers that the site would be an exemplary addition to Dover and a prime opportunity to address this need. To ensure the soundness of the plan, further Sites, such as the one advocated in this representation, should therefore be allocated to ensure that the Plan's ambitions for Dover are delivered.

a. Land North of Astley Avenue ('The Site')

The Site comprises approximately 8ha of land, which includes previously developed land in the form of warehouse buildings and storage space to the east and south of the Site currently in use by a scaffolding company and demolition company respectively.

The Site is located on the northern edge of Dover town, lying adjacent to Astley Avenue Allotments. The Site adjoins Dover town to the south and west. The Site is bound by open fields to the north and east, with Long Hill Playing Field also adjoining the Site to the north and Roman Road adjoining the Site to the east. To the south, the Site is bound by a railway line with residential properties of Dover beyond this. To the west the Site is bound by further residential properties.

The topography of the Site slopes from the north to the south of the Site, as well as in the eastern part of the Site from west to east towards Roman Road, with the lowest point of the Site in the most southerly point beyond the allotments. The Site does not contain any Public Right of Ways (PRoWs). Existing access to the Site is from a road which crosses under the trainline from Astley Avenue to the south. Dover Priory train station is c.1.5km walking distance to the south of the Site and provides regular services to Ramsgate, Sandwich, Faversham and a number of London stations including Charing Cross, Victoria and St Pancras stations. The closest bus stop is approximately 400m from the Site on Barton Road and includes services into Dover town centre, Folkestone and Aycliffe. The Site is considered to be a sustainable location for residential development.

The Site is wholly within Flood Zone 1. It is located within the Dover & Folkestone Cliffs & Downs Biodiversity Opportunity Area and a Groundwater Source Protection area. Kent Wildlife Trust mapping also identifies that the northern part of the Site is in a Local Wildlife Site. The Site is not subject to any ecological designations, although it is noted in the HELAA that the Site is partly covered by the deciduous woodland priority habitat. There are no heritage assets on or adjoining the Site, with the closest asset located to the south-west of the Site comprising the Old Charlton Cemetery Chapels (Grade II listed) separated from the Site by dwellings and the train line. It is considered that with the development, a net biodiversity gain could also be demonstrated.

b. Objection to Table 4.1, Draft Dover District Local Plan

Quinn Homes considers that the approach taken to the delivery of housing in Dover as set out within Table 4.1 of the Regulation 19 Submission Version of the Draft Local Plan is not a result of sound plan-making. It is considered that further sites, including the Site subject of this representation, should be allocated to secure steady growth in Dover town as a key regional centre, and diversify the type of housing that will be delivered across a wider range of Sites. The Site is a prime example, as it is deliverable within the short term and would help secure key societal improvements and urban renewal which the draft plan recognises that Dover is in urgent need of. It is also considered that the plan does not make sufficient provisions for Self and Custom Build Housing, particularly in urban areas where residents could utilise established services and sources of work. As outlined below, the development strategy in its current form raises several issues, the vast majority of which could be addressed through the allocation of additional sites near the centre of Dover, including the Site.

The proposed development pattern for Dover

The draft Development Strategy for Dover recognises the importance of Dover town as a key regional centre with prime positioning and excellent strategic transport connections, yet also as a settlement which is subject to high levels of multiple deprivation and poor-quality housing. The strategy in its current form seeks to address this issue by presenting growth in and around the town centre through a number of small site allocations. However, whilst opportunities for urban regeneration are identified,

the vast majority of growth for the town is planned to be delivered through the Whitfield Urban Expansion (SAP1); a significant urban extension for at least 5,750 homes in the north of the town. SAP1 is over 2 miles away from the town centre and will therefore require the employment of garden city principles and infrastructure to support the new residents. As a consequence, the draft Plan directs a disproportionate amount of growth, investment and infrastructure provision away from the areas and residents which are identified within the plan to need it the most. Due to the distance of the proposed extension from the town centre, it is unlikely to result in any societal benefits for Dover due to poor sustainable transport connections and the delivery of the Whitfield Urban Extension is therefore unlikely to due to its disconnection from Dover town centre.

The focus of the NPPF is to achieve social, economic and environmental sustainability (Paragraph 8). In terms of housing delivery, the Council should seek to encourage housing growth in the most sustainable locations, especially when they can ensure the achievement of societal improvements, economic benefits and positive environmental outcomes. In choosing sites, the Council should ensure that new residents can reach established nearby town centres using sustainable modes of transport, to limit pollution arising from motor travel and to support the vitality of the existing community and local economy, without creating environmental harm.

Given the proportion of housing that is proposed to be allocated at Whitfield, it is considered that the Council have not given due consideration towards the value of allocating Sites close to the heart of Dover, which are considered to be a more sustainable and suitable option for the expansion of settlements. It is considered that the current suite of allocations listed in Table 4.1 is not a sustainable approach to the future expansion of Dover, and therefore, is considered that it would fail the soundness test, as it does not conform with the above considerations, as set out within the NPPF.

Despite its promotion throughout the plan-making process, Land to the north of Astley Avenue is an example of a Site which is not allocated in the plan, yet, through its allocation, could positively influence the regeneration of Dover in a sustainable and logical way. The site includes previously developed land in commercial/industrial use, currently being operated scaffolding company and demolition company respectively. The Site is suited for residential development, as it neighbours residential properties to the east and an allotment to the south. The Site would also accord with the development pattern of Dover, whereby built development extends out along the valleys from the main linear development in line with the A256 towards the sea. Given the positioning of the site on the settlement boundary of Dover, the site would therefore be in accordance with Draft Policy SP4 'Residential Windfall Development' of the Local Plan, which further supports the case for the allocation of this site. The positioning of the site, overlooking the town, is considered to provide an excellent opportunity for the delivery of a high quality development in the form of Self and Custom Build Housing, which would make an exemplary addition to the town. Overall, the Site is in a sustainable location and benefits from good access to amenities in Dover and that the proposed access arrangements would be appropriate to support the development given the number of trips anticipated for the proposed dwellings. As such, it is Quinn's view that the site would be a suitable allocation in the Draft Plan. Achieving Urban Regeneration and Delivering Social Infrastructure

Another key objective of the NPPF is to 'make effective use of land'. Paragraph 120 states that this can be achieved by encouraging the redevelopment of brownfield land and avoiding the development of greenfield land. As noted in the above section, the vast majority of growth for the town is planned to be delivered through the Whitfield Urban Expansion (SAP1); a significant urban extension beyond the settlement boundary for at least 5,750 homes in the north of the town. Quinn Homes considers that a disproportionate amount of the housing proposed for Dover is on greenfield land, and that the plan does not present enough opportunities for the redevelopment of brownfield land, and as a result, the allocations proposed in Table 4.1 is not considered to comply with this objective of the NPPF.

Land north of Astley Avenue is predominantly brownfield land, and within close proximity to the centre of Dover. The Site is currently in commercial/industrial uses, is in poor condition, and occupies uses which result in pollution, noise and traffic impacts. The existing use generates HGV traffic through residential areas, which can be rectified through a sensitively designed redevelopment of the Site. The redevelopment of the Site would minimise the loss of greenfield land and bolster brownfield delivery, and is considered to be a significant opportunity for urban regeneration. The replacement of

the current uses with new dwellings will enhance the amenity of neighbouring residents to the south, as well as the users of the allotments and open space, and provide a more attractive and positive use that is more in-keeping with the surrounding residential areas. The unique characteristics of the Site would also help to create a more diverse range and type of new homes to be delivered across the town, and would also enable the provision of affordable homes.

Moreover, the high dependence upon Whitfield Urban Extension (SAP1) will reduce the benefits of development to the wider town and lead to the same type and location of housing, which reduces choice and potentially stymies delivery. Overall, it is considered that the allocations proposed in Table 4.1 are unsound in their current form, when opportunities to redevelop previously developed land are not selected, contrary to Paragraph 120 and 121 of the NPPF.

Economic Growth Distribution in Dover

In terms of the distribution of economic land allocations, we support the approach taken in the plan to distribute economic allocations at the outskirts of the settlement area and away from key residential areas. By virtue of their operation, commercial and industrial Sites constitute bad neighbour uses which produces traffic, noise, and pollution, and should therefore be in locations where they will not impact neighbouring residential amenity. Dover is recognised to be a settlement with poor transport connections and therefore HGV traffic should be diverted away from key residential areas yet within reach of key strategic routes, whilst remaining in close enough reach for locals to be able to reach their place of work in a sustainable fashion.

Ensuring the delivery of new homes

For a plan to be considered effective, the objectives and identified requirements must be deliverable and achievable. It is considered that, in its current form, the plan fails to accord with this part of the soundness test, due to over reliance on the Whitfield (SAP1) Strategic Allocation to provide the District's projected housing needs over the plan period. Therefore, to ensure the balanced and steady delivery of housing over the plan period, further Sites should be allocated to ensure that the needs of the district are met.

Whitfield Urban Extension (SAP1) is the largest allocation in the plan and it is expected to deliver over 5,750 dwellings. Of the 5,750 dwellings proposed for the Site, 3,483 dwellings are considered deliverable in the emerging Plan period. The Council acknowledges that the 2010 Core Strategy included provision for the Site to deliver 5,750 dwellings. Phase 1 of the SAP1 allocation (Dover ref. 10/01010) is underway and as of the 2020/2021 monitoring year, 185 dwellings had been completed with a delivery rate of approximately 50dpa for the past three years. Given this slow progress, it seems likely that although the existing outline planning permission should be completed over the Plan period, a more cautious approach should be taken in terms of the remaining dwellings allocated for the Site given its proven issues in delivering housing to date. Without clear evidence by way of a planning application for these additional dwellings, it is questioned whether Whitfield will ramp up to delivery of 120dpa from 2023/24 and then up to 200dpa from 2026/27 for the remainder of the Plan period. More consideration should therefore be made to the current planning position of the Site and the length of time it has taken so far to deliver housing. Paragraph 73D of the NPPF recommends the inclusion of realistic delivery rates within Local Plans, and DDC should therefore review those proposed for Whitfield and consider building more flexibility and more volume into the pipeline to be able to respond to delivery issues.

Self and Custom build

Policy H5 of the Draft Local Plan states that the Council will support Self and Custom House Building schemes on housing sites allocated in the Local Plan and on non-allocated windfall developments subject to compliance with the other Policies in the Local Plan, and where overall this would not result in an over-provision of this type of housebuilding when compared to the Council's supply/demand evidence.

The Self-Build and Custom Housebuilding Act 2015 requires relevant authorities, including District Councils, to keep a register of individuals and associations of individuals who are seeking to acquire serviced plots of land for Self-build and Custom Housebuilding. Council's are also required under

sections 2 and 2A of the Act to have regard to this and to give enough suitable development permissions to meet the identified demand. The benefits of Self and Custom Build Housing are recognised as diversifying the housing market and increasing customer choice. The NPPF supports the delivery of a variety of land coming forward to meet the needs of groups with specific housing requirements including for those wishing to commission to build their own homes.

The Self-Build and Custom House building need as identified from the Council's register is reported annually through the Authority Monitoring Report. The latest Authority Monitoring Report (2019-20) states that since the introduction of the Self-Build and Custom House Building requirements in 2015, there has been 1 plot allowed at appeal, where at appeal it was identified as Self-Build (planning ref. DOV/16/01101). There have also been 18 plots marketed as Self-Build since April 2020 by the developer from planning application 16/01026, however these were not identified as Self-Build on the planning application. On 31st October 2020, there has only been one approved planning application identified as including Self-Build and customhouse building, reference 20/00419, which is also a Quinn site, for which a reserved matters application (ref: 22/01379) is currently pending determination. The Self-Build Need Assessment submitted as part of the application (22/01379), points towards a very strong relative demand for self-build plots in Dover and also identifies Dover as being one of the authorities with the highest demand per capita in the country. Moreover, it is important to highlight that when considering demand in the context of the Local Authority's Self-build register; an Ipsos Mori poll undertaken for NaCSBA in 2016 found that only one in eight people interested in Self-Build were aware of the introduction of Right to Build Registers in England. As a result, the number of expressions of interest on a Local Authority's Self-Build register may substantially underestimate demand. Crucially, the Council's method of updating the Self and Custom Build Register, and resultant understanding of demand within the District, is flawed. The Council reviewed and updated its register in March 2020. All persons and organisations on the first (2016) version of the register were invited to re-register in February 2020, with reminders sent out in March 2020. Those who re-registered and passed the local connectivity and financial solvency tests, had their interest back dated to their original registration date and were placed on part 1 of the register. Those who did not pass the tests but still wished to register their interest in Self and Custom House Building were placed on part 2 of the register.

It is not clear from the Council's Authority Monitoring Report and evidence base for the draft Local Plan whether additional independent survey work has been undertaken to fully understand the demand for Self and Custom Build housing in the District. As mentioned previously, public knowledge and understanding of Right to Build in England is generally low. The method of the Council to understand demand has wholly relied upon people who had joined the register in 2016 and has not sought to further publicise Right to Build or develop a clearer understanding of demand in the District through additional surveys. This results in an incomplete picture of demand in the local area and resultant lack of allocations for Self-Build or Custom Build sites within the draft Local Plan. Quinn Homes are the leading provider of Self-build in Kent and have assembled their own database

of interested Self and Custom Builders. Having facilitated Self and Custom Build development in East Kent, the company is ideally positioned to understand the market requirements and best placed to assist the District in meeting its growing demand for plots. Quinn Homes propose the land subject to this representation as suitable for a Self-build site of 16 dwellings which would assist with addressing the Council's underestimated demand for this housing type. c. Conclusion

Quinn Homes wishes to support Dover in bringing forward a successful, effective and sound Local Plan that can serve the District across the Plan period. In its current form, it is considered that improvements can be made and that the allocation of land north of Astley Avenue (the land subject of this representation) for residential Self and Custom Build redevelopment will strengthen the soundness of the Plan and the sustainability of the spatial strategy in the following ways:

- Prioritising development of previously developed land to reduce the need for greenfield development;
- Enhancing the environmental quality of this part of Dover by relocating within the district an industrial use by virtue of its traffic movements through residential streets;

	<ul style="list-style-type: none"> • Realising a significant opportunity to provide for the District's unmet need of large executive homes in a highly sustainable urban location; • Improving the diversity and quality of housing at Dover by delivering Self and Custom Build homes whilst reducing the dependence upon a single location to deliver the majority of the town's growth; and • Boosting the delivery of housing at Dover and reducing the dependence upon a single location to ensure that the benefits of growth and regeneration are delivered across the town. <p>Quinn Homes would welcome the opportunity to participate in the forthcoming Examination-in-Public into the Plan and contribute to the debate to ensure that the best strategy for the District is found.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	4.52, SAP1 t.iv
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	4.52 talks of the need for development and regeneration of Dover Town and Whitfield, which is incorrect as only Dover Town needs regeneration. The development of Whitfield in fact greatly hinders the regeneration of Dover Town, by encouraging both residents and businesses to move to Whitfield, leaving Dover Town ever more derelict. This is contrary to Section 86 of the NPPF. SAP1 t.iv before valid comment can be made on this section, it is essential to know at what point it is proposed to block up Singledge Lane, as this has serious implications for access by local residents, the businesses on Singledge Lane, emergency services and agricultural traffic. This lane is part of National Cycle Route 16 and also provides the only safe access via Bridleway ER128 to the PROW network west of the A2 into Temple Ewell, the Alkham Valley and beyond via the underpass under the A2 at Temple Farm.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	4.52 To properly consider the regeneration of Dover Town and reduce the development of Whitfield in order to achieve this key aim SAP1 t.iv. Clarity is required on the proposed stopping up of Singledge Lane in order to make any valid comment on this very important issue..

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	4.52 Dover Town is consistently ignored in favour of Whitfield and as a result the policies are seriously flawed. Despite this point being made by me and many others, it continues to be ignored. SAP1 t.iv. Clarity is required on the proposed stopping up of Singledge Lane in order to make any valid comment on this very important issue.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 1 Whitfield Urban Expansion, additional land allocation to the north-west of Whitfield.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The National Planning Policy Framework states that development will not be permitted where it will cause total loss or substantial harm to the significance of a designated heritage asset or its setting. The boundary of the proposed additional land allocation to the north-west of Whitfield wraps around the three listed buildings in the area, namely Temple Farm, Singledge Farm and Singledge Manor. Any development in this sensitive area will inevitably have a significant adverse impact on these heritage assets.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	In order to be compliant with the National Planning Policy Framework, the boundaries of the land allocation should revert to those set down within the Adopted Core Strategy 2010. This document recognised the need to protect the open setting of the listed buildings and the boundaries were carefully selected to be consistent with National Planning Policy.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	4.78
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	It is stated that the development of Whitfield should be complementary to and not in competition with Dover Town centre, as if this is a future possibility. However, Whitfield has been in direct competition with Dover for many years and is now well ahead in the race. The development of Whitfield has sent the regeneration of Dover Town into a downward spiral, with residents and businesses moving from Dover Town to Whitfield or in the case of Dover Town, businesses closing altogether. Dover Town is unattractive and unwelcoming, which is very sad to see, in view of its historic value and current wasted potential.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	To prioritise Dover Town above Whitfield until the regeneration of Dover Town can be achieved.

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Dover District Council are ignoring the needs of Dover Town. The fine words in the plan are just that, with no substance and they achieve nothing.

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	8.33 The focus of building so many houses and large retail outlets at Whitfield has resulted in the degeneration of the historic town centre. It is unattractive and unwelcoming and the resulting footfall is much lower than it should be. E4 There are 3 Certificated Locations for touring caravans on Singledge Lane and several others to the East of the proposed Whitfield Urban Expansion. Many users of these sites merely stay overnight before travelling through the port of Dover. Others stay much longer to visit local historic sites, walking in the countryside or just to enjoy a peaceful countryside location. All will be seriously affected by the urban expansion by either the loss of easy access to the port or the loss of peaceful enjoyment of the countryside. This will result in a loss of sustainable rural tourism, contrary to Section 84 of the NPPF.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Focus the building and development on Dover Town Centre and reduce the focus of development at Whitfield.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	HE1
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	It is proposed to increase the size of the development for the Whitfield Urban expansion. The development proposed to the north west of Nursery Lane will include 3 Grade 11 listed buildings, about 3 ancient woodlands and also the Historic Park and Gardens of Waldershare. The land proposed for development is high grade arable land currently used for food production. The 3 Grade II buildings were ancient farmsteads, whose setting was always and should be retained as farmland. To surround these historic assets with a housing development will harm their setting contrary to Sections 20, 190 and 195 of the NPPF.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	To reduce the scale of the Whitfield Urban expansion to protect these historic assets and comply with the NPPF.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	It was agreed in Section 4.50 of the Core Strategy 2010 that the setting of listed buildings should not be harmed (in accordance with the requirements of Section 20 of the NPPF) and the current plan countermands this. This has to be challenged at every level.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Whitfield urban expansion - the proposal to extend the existing land allocation to the north-west of Whitfield.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I believe the proposal to extend the existing land allocation for new housing to the north-west of Whitfield is unsound, as it is inconsistent with the National Planning Policy Framework. The proposed additional land allocation encircles three listed buildings and would inevitably have a significant adverse impact on the open setting of the historic assets. National Policy states that development should not be permitted where it would cause harm to historic assets or their setting.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The conflict with National Policy could be avoided by not extending the existing land allocation to the north-west of Whitfield.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 1 Whitfield Urban Expansion, additional land allocation to the north-west of Whitfield.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The proposed additional land allocation to the north-west of Whitfield borders an area of ancient woodland, which is required to be protected under the National Planning Policy Framework. Any development in this area is likely to have a significant adverse effect on the ancient woodland through increased recreational pressures and pollution. .
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Removal of the additional land allocation to the north-west of Whitfield from the Plan.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	In our response to the Reg 18 consultation we expressed concern about the proximity of the Whitfield sites to ancient woodland at Lenancre Wood (Grid reference: TR29624552), Captains/Singledge Wood (Grid reference: TR28944634) and Waddling Wood ASNW (Grid reference: TR29434694). We are glad to see that a 30m minimum buffer for the ancient woodland is specified in para f) of policy SAP1. We generally welcome the approach to protecting the site taken in paragraphs d)-h). We reserve the right to comment on and if necessary to object to future planning guidance or applications that do not offer such protections in practice.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP3 Housing growth
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Due to the governments announcement 5/12/22 the plan is not positively prepared as the development needs must be reassessed. This means it is no longer justified as there now is the room without central government pressure to find reasonable alternatives. It is also not effective as the pressure put on local communities and existing infrastructure is unreasonable and means that it is not deliverable. The plan is also not consistent with NPPF 2021 as the many landscape and heritage assets in Dover District are being compromised by the level of unsustainable overdevelopment which the current plan has allowed.</p> <p>The Housing Growth statement that the aim is to , "provide a greater choice of high-quality housing to meet the needs of Dover districts's growing population and changing demographic and address affordability issues", does not seem internally consistent with the details provided in the plan which underestimates the evidence showing a large part of district population growth is due to aging. The details thus render SP 3 and SP 5 less effective and less sound.</p> <p>Under the current LDP developers have shied away from the badly needed regeneration of Dover and concentrated on building maximum profit, minimum affordability developments of large homes around the more desirable town of Deal and out in Whitfield. The supposed regeneration</p>

of Dover has resulted in another generic shopping centre and a more depressed high street and has not lifted the rest of Dover. The promenade area is uplifted but there seems to be little connectivity to the rest of Dover.

The government department (DLUHC) decision that Dover needs 611 new dwellings a year and a minimum of 10,998 new homes between now and 2040 we find very incompatible with legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008, and unsound. We should be transforming existing housing stock into zero carbon homes as is happening in East Sussex, led by Lewes DC. Combining these numbers with 3.51 and the statement '76.7% of the new homes are on greenfield sites, while 23.3% are on brownfield sites' is unsound and unacceptable to the public.

We feel that our communities are being harvested by developers and our worries are not being heard or needs met in terms of infrastructure. Thanks to certain national newspaper Sunday supplements, Deal is desired as a 2nd home location by the wealthy from London and elsewhere. Holiday homes which spend most of the year empty in Deal, Dover and coastal villages of Kingsdown and St Margarets are stopping locals from buying affordable homes in their own area from existing housing stock.

It must also be pointed out that at least one of the sites included in the 23.3% of brownfield sites is actually a site intended by SEEDA as local nature reserve having rewilded on unstable slag (only rendered stable by tree-planting, a site which DDC forgot to make a local nature reserve in 2004, and it has become a biodiversity hotspot well known to genuine ecologists nationally; Betteshanger Park.

Central government in London, according to Housing Today is imposing a disproportionate amount of housing growth on Kent and the SE. There is a grievous lack of democratic accountability across Kent. So the chances of protecting Kent, of achieving a Growth Strategy that creates climate-friendly jobs and suitably sized, suitably-priced zero-carbon homes for the next generation of local families, are not good. The space available for infrastructure, functions well for compact coastal towns of the size that Deal / Walmer and Sandwich were 5 years ago.

The level of greenfield overdevelopment which has been disastrous under the current weak LDP is putting Deal infrastructure under strain now, so in-fill should make up the majority of the allocations for Deal and that the housing growth specified for District Centre of Deal and around its boundaries needs to be stopped or radically reduced. Either or both of SAP 15 / SAP 34 would destroy the only road access alternative for diverted traffic. (See detailed comments under SAP 15/ SAP 34 below). Housing Growth that threatens gridlock, blocking off a conurbation of 30,000 from access by emergency vehicles, commuters, school buses is not sustainable housing growth and is very unsound.

3.29 I note and welcome a degree of shift from the Reg 18 draft, in that more sites have been selected with a view to using 'existing infrastructure, facilities and services, with a greater professed purpose to ensure development contributes to the sustainability of local communities and services'.

I note with appreciation both the increase in the number of sites in Dover town SAP 6 – SAP 13, and the SAP 26 Former Snowdown Colliery, Aylesham near a rail station for example. It should be possible to state a determination to 'make best use of brownfield – non-rewilded – land) without giving developers the opt-out qualification 'wherever possible'.

On Five Year Housing Land Supply. 3.39 Having stated the Council had 6.03 years land supply plus a 5% buffer; it is not sound, effective or legally compliant to then state 'the provision of additional sites within the first 5 years of plan period is needed to ensure resilience and promote flexibility;'. Instead of ensuring resilience, it will create exactly the

destructive suburbanisation of a rural district that many, many of the resident electorate are most worried about.

3.46 It is the conspicuous lack of a secondary school in Aylesham that prevents Aylesham becoming the small garden town planners aspire to. The provision of a secondary school by 2028 should be a condition of SAP 23. There seems to be a complete lack of planning in the statement that now

3.48 Many, many of the current residents of ex mining village Elvington were / are dependent on buses that have recently (2022) been cut, (following KCC cut to bus subsidies) to get to work in Canterbury, Folkestone, Sandwich, Thanet or Dover, or to get to secondary school, or to get to doctors, or to shop. These people had environmentally sustainable public transport service that has been cut. KCC is saying it is looking at potential bankruptcy in 2023, so promises of new services and facilities are met with some disbelief. The selection of this site is ONLY sound with cast-iron conditions to provide all of the services we mention below, including new drainage infrastructure. Council housing in Elvington has been subject to flooding from the sewage system, long overdue for replacement. As in Dover deprived wards, there are unhealthy EPC EFG homes in Elvington that need to be transformed into zero carbon home to lift residents out of fuel and therefore food poverty.

3.68 Windfall. Unless existing settlement boundaries are respected, there is suburban ribbon development creep from field to field to field. To render the plan sound it should contain a statement 'Previously existing settlement boundaries will be respected, until such time as town and parish councils may have agreed changes with Dover District Council, in

accordance with the principles of Localism Act 2011.' In the current economic climate, it seems very naïve to hope that 'new housing in villages can help them retain existing services such as public transport, retail (many pubs are going under because lack of staff and sky high energy bills) and schools'. Indeed we have lost a large proportion of our bus services in the district.

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Push back to central government and demand a reduction in the housing allocation of 10,998 new homes. Now possible after announcements 5/12/22 from Prime Minister.</p> <p>Regenerate Dover as a priority, retrofitting existing housing stock to provide well insulated renewable energy powered homes. Windfall development only should be allowed in Deal, Sandwich and surrounding villages. Create a self sufficient sustainable garden village at Aylesham with secondary school and green infrastructure and homes far beyond future homes standard.</p> <p>Provide better facilities and transport links for Whitfield to ensure that homeowners are not car dependent.</p> <p>Lobby central government for changes to the rules for ownership of second homes. Priority should be given to locals.</p> <p>Make the wording in the plan stronger in favour of brownfield sites eg 3.32 <i>sufficient amount and variety of land</i> should also state that brownfield must be used before greenfield as per stated in NPPF 21.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The site is shown on the Post Agricultural Land Classification (England) on MAGIC as grades 2 and 3a (best and most versatile) and 3B in roughly equal amounts. It will result in the loss of a significant area of best and most versatile agricultural land.</p> <p>The CPRE Dark Skies Map shows that land in WHI001 is in an area of darker skies</p> <p>Paragraph 4.5 refers to the garden village principles and sets out that development of the strategic allocations should follow these principles. However, whilst SAP1 requires a revised SPD/masterplan there is no requirement within the policy for them to adhere to garden village principles.</p> <p>This is at odds with the two other strategic allocations where garden village principles are imbedded in SAP24 (land to the South of Aylesham) and SAP28 (land between Eythorne and Elvington).</p> <p>Our concern is that too much reliance has been placed on development that is purported to be deliverable (and may not be suitably located in terms of sustainability and environmental constraints) – such that the Council's stated vision with the aim of a "spectacular and sustainable environment" may well be undermined.</p> <p>Instead, the Council should be working with landowners to bring forward development in the most sustainable locations.</p> <p>While strategic development is welcomed, in principle, at Whitfield (being a regional centre), it is not clear whether the previous delivery issues have been resolved. Allocating almost half of the required dwellings to meet housing need at Whitfield will place the Council's strategy at huge risk.</p> <p>Since Whitfield was originally allocated for development (2010 Core Strategy – 5,570 dwellings), the SPD approved (2011) and planning permissions granted, only 363 homes have been delivered to date. Carrying forward the original allocation, plus an additional 2,200 dwellings (6,350 total) in the current local plan means that Council's spatial strategy is being underpinned by a site that has a proven record of failure in terms of delivery. Issues around fragmented land ownership, ransom strips and the resolution of highways issues will need to be resolved before this strategy can be considered sound.</p> <p>As the Council is placing its housing delivery in a basket of three strategic allocations, if one fails to deliver this will impact on the strategy as a whole and place the Council at the whim of the unintended consequences of speculative development to fill the housing need gap.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Housing and Development Site Allocations - SAP1 - Whitfield Urban Expansion
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>To ensure that Alkham is included in the KCC RaFat programme, going forward. Currently no part of the Alkham Valley Road (AVR) sits on the forwards works programme although KCC recognises that the road is a heavily used unclassified rural route that does suffer with extra wear and tear from those choosing to use it. KCC Highways Inspection Team, via their Highways Stewards, do undertake routine safety inspections of the AVR coupled with ad hoc inspections to reports from member of the public via the KCC portal. The team also work in conjunction with their Road and Footway Asset Team who commission road condition surveys which are primarily intended to identify asset deterioration, which if untreated, are likely to adversely affect long term performance, serviceably and safety of the highway.</p> <p>The planned urban development at Hawkinge and Whitfield is predicted to impact on the traffic usage of the AVR. Post pandemic has seen an increasing number of cars using the AVR at peak times, and it is estimated that the hourly flow rate will increase to 1000 vehicles per hour in each direction – the actual road capacity rising accordingly to 70% plus. Given these predictions, adequate maintenance to tackle wear and tear (low road grip or texture and structural deterioration of road) is essential to manage the potential risk of more collisions and injuries/fatalities, and decline in road conditions and defects.</p> <p>Therefore, we consider that the current status of the AVR should be elevated and included in the current Forward Works Programme 2022/23 and continue to be so going forward.</p> <p>Supplementary to the foregoing, there is a real concern that the Alkham Vallry Road (AVR) may well be near capacity during peak times from the estimated extra traffic generated by the urban development at Whitfield. This extra traffic will have an impact on all users of the AVR, as well as the local residents and public leisure facilities (Kearsney Abbey, Russell Gardens) – but more so on the village of Alkham where the AVR cuts through the centre. Residents will have difficulty exiting from hidden driveways as well as essential feeder and residential roadway junctions.</p> <p>Therefore, Under Reg 19, we request that the modelling forecast report on the easement of the Alkham Valley Road junction with London Road remit is broadened to take into consideration the predicted increased traffic, which will have a deleterious impact on the whole length of the AVR (6.5 miles). And serious consideration be given to putting in place a viable traffic management scheme, to help mitigate against this likely impact outcome on the residents/ businesses and regular users of the AVR that the extra traffic will brin</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We consider that the plan is sound, for the reasons set out in the consultation response submitted on behalf of Danescroft Land Ltd and Pentland Homes Ltd (ref DHA/30242).

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	For the reasons set out in the consultation response submitted on behalf of Danescroft Land Ltd and Pentland Homes Ltd ref DHA/302 42, no modifications are proposed.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	On account of the scale of the allocation proposed at Whitfield, we consider it necessary for our clients to participate in the oral part of the examination. Please refer to the consultation response submitted on behalf of Danescroft Land Ltd and Pentland Homes Ltd (ref DHA/30242).

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP1 (Whitfield Urban Expansion)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

On behalf on Halsbury Homes we set out below representations to the Regulation 19 Local Plan. Halsbury Homes control a substantial landholding in the Whitfield Urban Expansion (WUE) area and have been instrumental in delivering early phases. WUE is most significant housing allocation in the District and crucial for housing delivery, with the Regulation 19 draft plan proposing to increase the Core Strategy allocation from 5,750 to 6,350 homes.

As section 9 of the Council's September 2022 Housing Topic Paper notes, guided by the WUE 2011 Supplementary Planning Document (SPD), permission to date has been granted for over 1,483 dwellings (along with a health centre, primary school and new pumping station). The Topic Paper also notes that, whilst the development has not come forward as originally envisaged, there is now significant interest from a number of local and national housebuilders with the potential to significantly increase the delivery of housing. Halsbury Homes (through agents Framptons) made representations to the Regulation 18 Local Plan (Strategic Policy 4 Whitfield Urban Expansion). Disappointingly, no substantive changes have been made to the plan to respond to the concerns raised. These representations again focus on the WUE allocation (now allocation SAP1).

Government Planning Reform

Before commenting on the detail of the WUE allocation, we note that on 7 December 2022 the Government announced that it intends to consult on removing the obligation to maintain a rolling 5 year land supply including any buffer. Furthermore, it intends to consult on transitional arrangements such that Council's who are well advanced in the producing a new plan are given a two year period to revise their plans to take into account changes to the system.

We trust the Council will carefully consider the content and timing of the Local Plan given these fundamentally important potential changes.

SAP1 Whitfield Urban Expansion

Halsbury Homes remain very concerned about the Council's approach to the WUE site allocation and specifically the requirement for a revised SPD to be prepared by the landowners. This approach is flawed and unsound for a number of reasons:

1. It fails to recognise that the delivery of WUE is underway with permissions and completions limiting the scope and effectiveness of any revised SPD. The phasing of the current development is largely fixed with, for instance, an access strategy and special areas of conservation (SAC) mitigation package which is embedded within the masterplan consistent with the current SPD.
2. A revised SPD will take significant time and resources to prepare. It will need to follow the adoption of the current draft local plan to ensure consistency with it and preparing a revised SPD is a significant undertaking in itself. Halsbury Homes were closely involved with the preparation of the 2011 SPD which took over 16 months to prepare and included a considerable body of supporting material including a Sustainability Appraisal, Habitats Regulation Assessment and Transport Assessment. Taking into account the timing of the Local Plan (which supplementary guidance must follow) it could take 3 years to prepare and adopt a revised SPD with the required robust evidence base.
3. It fails to recognise that WUE is now being delivered by a number of developers. As currently drafted the policy refers to the revised SPD being prepared by 'the landowner'. In the past Halsbury undertook this role. However, there are now multiple landowners/housebuilders and it is unclear how funding for its preparation and inputs would be co-ordinated.
4. No justification has been provided to underpin the proposed requirement for a revised SPD for the whole site. The draft supporting text to the policy makes reference to reviewing transport and community provision. However, these do not require a wholesale review of the SPD. As paragraph 4.67 of the draft supporting text notes: 'The developers/landowners should continue to liaise with the relevant service providers to ensure that sufficient provision is made for on-site facilities, or financial contributions towards off-site facilities. Provision will be secured through S106 agreement.'

Halsbury Homes consider that the current WUE 2011 SPD remains sound and notes how, in the context of more up to date national policy in respect of design and other matters, Council Officers continue to give it significant weight in the determination of applications at WUE (see for instance the officers report for the Phase 1D reserved matters application, ref. DOC/20/00718).

The adopted masterplan has informed not only completed and consented development but also delivery assumptions and investment decisions for the remainder the current WUE site allocation. Any uncertainty about the status of the masterplan and the spectre of a significant change will only serve to slow housing delivery.

Required Changes

Policy SAP1

Taking into account these fundamental concerns, policy SAP1 needs to be modified so the focus of a revised SPD is solely on the additional 600 homes proposed in the modified housing allocation. That revised SPD needs to build on the principles of the current masterplan rather than seek to modify what is already in place.

SAP1 should be redrafted so that it is clear that the 2011 SPD applies to existing phases of WUE (along with national guidance and development management policies) and the supplementary SPD will apply to the additional 600 home phase/s.

In doing so, the long list of requirements for a revised masterplan (a to aa of SAP1) must be reviewed to ensure that they are focussed on the additional 600 homes not the whole site. Additional infrastructure requirements for the 600 additional homes and other housing and employment requirements in the district should be factored in to ensure that there is a deliverable strategy.

Summary

It is disappointing that the Council has not sought to make significant changes to the overarching policy for WUE. Despite representations to the Regulation 18 plan setting out significant concerns, no changes have been made. WUE is fundamental to the delivery of Housing in Dover and momentum is building. Halsbury Homes are very concerned that the Council's approach to add more policy in the form of a new site wide SPD has not been justified with no proper consideration to practical difficulties. There is a real risk that imposing unnecessary and onerous requirements for a site wide revised SPD will slow housing delivery and deter future investment. It is vital that the Council change the approach to WUE so that policy facilitates rather than complicates delivery of much needed housing in Dover.

We trust the enclosed is clear and you will give due consideration to Halsbury Homes' representations. We would be grateful if you could keep us informed on the progress of the Local Plan.

(DDC Note - Text Extracted from Document sent from Quod. Representation has been split across relevant areas of the Local Plan. Full attachment can be found under reference SDLP1232.)

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><u>Highways and Transportation</u>: A revised SPD document is essential to the consideration for the Whitfield Urban Expansion (WUE), however this needs to be produced as soon as possible to avoid a potential policy vacuum occurring for any emerging development proposals. There should be a clearer definition over which infrastructure and phasing requirements will be encompassed within the Local Plan Policy and which will be addressed within the future SPD, as this could have a direct impact on modelling forecasts. It is essential that a specific policy is included to secure the future route of the Fastrack service.</p> <p>It is stated that the SPD should be prepared by the landowner, however there are several stakeholders that have land interests within the WUE, therefore, it is essential that they are all involved in the process where possible. A Statement of Common Ground should be encouraged with relevant land stakeholders to ensure that a joined-up approach to the SPD review is achieved. This may require the use of equalisation agreements and mechanisms to ensure that ransom situations between development land parcels are avoided.</p> <p>Travel Plans for any portion of development should include community engagement with new residents for the Fastrack service, with service updates, opportunities for feedback and incentives for use.</p> <p><u>PRoW</u>: The County Council welcomes reference to upgrades as well as improvements to existing routes to address network fragmentation.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SAP1 – Whitfield Urban Expansion (Existing strategic site – uplift in this Plan of 600 new homes)</p> <p>Taken as a whole this is by far your Authority's largest strategic housing allocation, making provision for a total of 6,350 new homes. However, we note that the bulk of the allocation was agreed as part of your 2010 Core Strategy with an additional uplift through this new Plan of just 600 homes. We understand that the area of land identified to support this uplift (WH1001) will see extremely limited built development being mainly used to provide additional open space, biodiversity and landscape mitigation to enable increased capacity for the rest of the site.</p> <p>Natural England will provide further, detailed advice on this site in due course due to the greater complexity of natural environment issues. This advice is likely to cover the following topics: • Air quality • Mitigation for impacts on the Lydden and Temple Ewell Special Area of Conservation (SAC) through provision of Suitable Alternative Natural Greenspace (SANGs) • Update of the 2011 Supplementary Planning Document (SPD) and Masterplan • Potential for impact on the Thanet Coast and Sandwich Bay Special Protection Area (SPA) and Ramsar site in light of the further developed Thanet Coast SAMP. • Potential for impact on the setting of the Kent Downs AONB • Potential for impacts on ancient woodland • Green Infrastructure • Access – including the North Downs Way National Trail and other Public Rights of Way</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Our previous Regulation 18 response set out that additional mitigation will need to be discussed and implemented for the later phases of the development at Whitfield and land to the north-west to ensure the performance of the A2 Duke of York roundabout and the A2 Whitfield roundabout.</p> <p>The policy supporting text now acknowledges that a new road network is required to serve the development and that, of relevance to the SRN, a new junction from the A2 is required to the west of the site. We note that transport modelling and assessment work will be required to determine the precise trigger points for the delivery of the access. The policy goes on to state that in addition to site-specific transport infrastructure, development phasing will need to be informed by the delivery of upgrades to the A2 Whitfield roundabout and the A2 Duke of York roundabout. Of note, the supporting text states that the Urban Expansion is supported by the Infrastructure Delivery Plan and Schedule.</p>

	<p>With regards to the specific SAP1 policy wording, the need for suitable new access arrangements to be provided via the A2 and the A256 is acknowledged. As above, the need for financial contributions towards upgrades to the A2 Whitfield roundabout and the A2 Duke of York roundabout in accordance with SP12 is recognised and this is welcomed.</p> <p>Representation: National Highways concurs. The need for the delivery of a new junction on the A2 should be referenced in the Infrastructure Delivery Plan and Delivery Schedule</p> <p>We see that the specific SAP1 policy wording notes that a masterplan and revised Supplementary Planning Document (SPD) will be required and should be prepared by the landowner, jointly working with the Council and key stakeholders. We require that we are consulted on this document when available.</p> <p>Representation: DDC to consult National Highways on SAP1 masterplan and SPD when available.</p> <p>With regards to sustainable transport, the SAP1 policy wording states that the travel plan for the site should include targets and policy measures to achieve a modal shift of between 10 and 20%. We would suggest that this wording needs to be more specific and outline exactly which modes will be targeted for reduction and uplift.</p> <p>Representation: SAP1 policy wording should be more specific about the modes which should be reduced and those which should increase.</p> <p><i>(Note - This is an extract of the Full National Highways representation which can be located at SDLP1152)</i></p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>SAP1 policy wording should be more specific about the modes which should be reduced and those which should increase.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP1
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The proposal to extend the land allocation to the north-west of Whitfield is inconsistent with the National Planning Policy Framework (NPPF), which requires the protection of heritage assets and their setting. The proposed boundary wraps around three listed buildings and any development in this area would cause significant harm to the open setting of these historic assets.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The conflict with the NPPF could be avoided by holding the boundaries previously agreed in the 2010 Core Strategy.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC EDIT: Detailed representation attached to SDLP0447 with figures and maps. Representation reproduced in box 7 below (as originally done by the agent).
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>1. Introduction</p> <p>1.1. Following the publication of the Dover District Council Local Plan (Regulation 18 Draft) and the Targeted Call for Sites on the 20th of January 2021, the Land Trust submitted representations in relation to the development of their own appropriate strategy for the possible future use and regeneration of Fort Burgoyne, Fort Burgoyne Road, Guston, Dover, CT15 5LP. These representations are included as Appendix A of this Statement, however, can be summarised as follows:</p> <ul style="list-style-type: none"> · The site at Fort Burgoyne extends across an area of approximately 42 hectares and includes a recreation ground, a substantial area of chalk grassland and the main buildings and immediate surrounding grounds (including the Parade Ground). Fort Burgoyne is also a designated Schedule Monument, confirming that the site is of national importance. · Fort Burgoyne was built in the 1860s to protect Dover Castle and was used to defend the South Coast of England as one of the "Palmerston Forts" built to defend against invasion. The polygonal system on which the building is built was used to defend and watch from the highest strategic point in Dover. After the First World War, Fort Burgoyne was used a military depot/store for Connaught Barracks before it ceased to be used for military purposes in 2006. In 2014 the Land Trust, a national charity, acquired the site from Homes England and since then has been considering a variety of options for the future development of Fort Burgoyne. This includes the submission of two pre-application enquiries relating to the future use of the site to DDC in July 2019 (DDC Ref: PE/19/00127) and July 2020 (DDC Ref: PE/20/00234), which serve to demonstrate that the Land Trust has a clear commitment to bringing Fort Burgoyne back into use for public benefit at the earliest opportunity. · DDC's adopted Core Strategy 2010, recognised the importance of Fort Burgoyne within the criterion vii of "Strategic Allocation" policy CP10 (Former Connaught Barracks Complex), which stated that alongside the allocation for around 500 dwellinghouses, <i>"the condition of Fort Burgoyne is stabilised, if possible new uses are accommodated, a public access strategy is agreed and a management arrangement is incorporated that secures a sustainable future for the Fort"</i>. The Dover District Local Plan Regulation 18 Draft appeared to "down-grade" of the Former Connaught Barracks site from a "Strategic Allocation" to a "Non-Strategic Housing Allocation". The Regulation 18 draft no longer made any specific reference to Fort Burgoyne with no strategic policy objective to deliver the future of the Fort, a Scheduled Monument of national historic interest that is included on the Historic England at risk register. · The representation therefore sought to raise that the Draft Local Plan needed to provide clarification as to how the regeneration of the two separate elements (being the residential development of Connaught Barracks and the regeneration of Fort Burgoyne) will be delivered to allow for proposals for Fort Burgoyne to be brought forward under a set of key objectives, independent of the Connaught Barracks housing development. It was subsequently suggested within the representation that the Fort's future is secured through other means within the new Local Plan, either through its own strategic policy in other sections of the plan (such as the Employment and the Local Economy section), or through the re-wording of Site GUS002 or through other Development Management policies.

· Finally, given that, in a “Strategic Futures” Report (included as part of **Appendix A**) prepared by WYG and commissioned by the Land Trust, it was identified that there is circa 3,000 square metres of floorspace within existing buildings at Fort Burgoyne that would be potentially suitable for a wide variety of uses. It was also suggested that in order to secure a long-term future use for Fort Burgoyne and secure its regeneration, it would be wholly appropriate for it to be allocated within Strategic Policy 9 for business and employment purposes, in order for more flexibility to be given to the types of uses that might be permissible at the site.

1.2. Dover District Council (DDC) has subsequently published the Regulation 19 Submission of the Dover District Council Local Plan which sets out the vision, strategic objectives and overarching development strategy for future growth in the district over the period to 2040. The Land Trust have therefore instructed Bloomfields Chartered Town Planners to prepare further representations in relation to the Regulation 19 submission and the regeneration and future use of the Scheduled Monument, Fort Burgoyne.

2. Regulation 19 Submission of the Dover District Council Local Plan

2.1. It is welcomed that the aforementioned representations have been taken into account within the Regulation 19 Submission of the Dover District Council Local Plan.

SAP5 - Fort Burgoyne, Dover

2.2. In particular, the Trust is pleased to see the inclusion of Fort Burgoyne for Mixed Employment Use in table 4.1 and a positive site-specific policy to support site regeneration at Fort Burgoyne within Chapter 4: Housing and Employment Site Allocations at Strategic Allocation Policy SAP5 which states the following:

Figure 1: SAP 5- Fort Burgoyne, Dover as of Regulation 19 Submission, DDC Local Plan

2.3. The Land Trust also notes the pre-amble to Policy SAP5 which, at 4.109, recognises that Fort Burgoyne has the potential to accommodate new uses, provided that they are compatible with its status as a scheduled monument. The Trust continues to explore suitable uses for the reuse of the Fort, as evidenced by the grant of planning permission 21/01000 on the 7th July 2022 for the change of use of 4no. casemates to Use Class E with associated ancillary works.

2.4. The Land Trust remains committed to attracting uses for the Fort that will fit in with the long-term sustainable vision for investment in its re-use, as required by the preamble to Policy SAP5. The uses being explored, as evidenced in the previous Regulation 18 representations, are all being considered with the aim of supporting local business growth and ensuring at the same time that any mixture of uses at the site are compatible in respect of access, servicing, general amenity and crucially with the aims of conserving the Scheduled Monument.

2.5. While the inclusion of this policy is largely supported, The Trust has a number of comments in respect of the criteria:

2.6. Criterion h sets out that a Surface Water Management strategy should be produced for the site. The Trust recognises the importance of surface water management; however, it is highlighted that the Fort already benefits from an existing surface water drainage system which was built in the 1860s as part of the construction of the site. This system has always discharged directly to the ditch of the Fort where it soaks into the ground.

2.7. Given the Scheduled Ancient Monument status of the site, establishing an alternative strategy for managing surface water may not be practical and could result in harm. As such it is suggested that this criterion should be removed.

2.8. Notwithstanding this, where relevant, any future planning applications for uses or development at the Fort can demonstrate if required how it would be compatible with the existing surface water drainage system and not require any alternative arrangements for its disposal.

2.9. In respect of criterion j which suggests that “*development within the boundary of Fort Burgoyne which would have a detrimental impact on the heritage significance, setting, views, biodiversity, character of coherence of the components and elements of the complex will not be permitted*”.

2.10. While the Trust acknowledges the need to avoid development which will have a detrimental impact on the range of criteria identified in this policy, any development within Fort Burgoyne would be restricted by the requirement for Scheduled Monument Consent approved by Historic England which is considered to negate the need for this criterion. Draft Local Plan policies in respect of landscape (NE2), ecological (SP13) and historic environment (HE1, SP15) further negate the need for this criterion.

2.11. It is therefore respectfully suggested that criteria h and j are removed from policy SAP 5.

Chapter 2 - Vision and Objectives

2.12. Chapter 2 sets out the overarching vision for Dover District, including that *“through careful stewardship of its world class landscapes, thriving natural environments and wealth of historic sites, Dover District will be a destination of choice for people of all ages to make their home, for businesses to invest in and for visitors to explore and experience.”*

2.13. It is appreciated that the vision highlights the *“Sensitive restoration of elements of its rich built heritage, will enhance the attractiveness of the town, while improved connections to its seafront will have been delivered by high quality design and investment in place making.”* Together with the strategic objective (echoed in Strategic Policy 15) to conserve and enhance heritage assets in the district *“in a manner appropriate to their significance, recognising their intrinsic value as a finite resource as well as their contribution to the character of the District and the positive role they can play in the regeneration of the District.”*

2.14. The Trust also welcomes the identification of Fort Burgoyne on the Local Plan key diagram (Figure 2 below) alongside other Regeneration Sites covered by policy SP6 as set out further over the page.

Figure 2: Figure 2.1, Local Plan Key Diagram

Chapter 3 - Strategic Policies

2.15. Chapter 3 sets out the districts strategic policies to achieve the aforementioned strategic objectives.

SP6 Economic Growth

2.16. Strategic Policy 6 seeks to grow and diversify the Dover District economy by providing additional employment floorspace through the regeneration of brownfield sites in key locations in the district, such as Fort Burgoyne, to deliver flexible employment uses, achieve a higher level of job growth, and help provide additional flexibility and choice to the market over the Plan period.

Figure 3: SP6- Economic Growth, Dover as of Regulation 19 Submission, DDC Local Plan

2.17. The Trust welcomes the inclusion of Fort Burgoyne at criterion 2 of policy SP6 as site where regeneration for a mix of uses to secure their future will be supported by Dover District Council.

2.18. It is noted that paragraph 3.117 sets out that no floorspace allowance has been included for Fort Burgoyne (and other sites allocated under criterion 2) as they are *“brownfield sites allocated for regeneration, and the mix of development and floorspace requirements will need to be determined through the planning application process in accordance with the policies in the Local Plan.”*

2.19. Given the complexities of the site we support this position but anticipate that employment floorspace will amount to circa 3,000 sqm.

Policy NE1 Biodiversity Net Gain

2.20. The Trust agrees with the requirements of Natural Environment Policy 1 for development proposals to provide a minimum of 10% biodiversity net gain above the ecological baseline within the development boundary. And notes criterion (a) which states that where it can be demonstrated that ecologically meaningful biodiversity net gain cannot be achieved within the site boundary, the Council will consider off-site alternatives in line with the mitigation hierarchy approach.

2.21. Given that a large portion of the 42 hectares at Fort Burgoyne has the potential to provide for significant biodiversity offering, in responding to this consultation The Trust wishes to record interest in working with the Council in developing its Dover District Biodiversity Net Gain Strategy with a view to Coombe Hole providing opportunity for off-site net gain whilst maximising the value of this Local Wildlife Site.

Figure 4: NE1- Biodiversity Net Gain, Dover as of Regulation 19 Submission, DDC Local Plan

2.22. In a similar vein to the BNG potential at Fort Burgoyne, the Land Trust has extensive experience of working with developers to create and provide in perpetuity management of Suitable Alternative Natural Greenspace (SANG), areas of greenspace that are of a quality and type that are suitable to divert recreational activities associated with new residential development away from protected sites (such as Special Protection Areas or Special Areas of Conservation).

2.23. In noting the requirement of Draft Policy SAP1(I) (Whitfield Urban Expansion) which requires a need for SANG to mitigate potential impacts upon the Lydden and Temple Ewell SAC, the Trust wishes to express interest in discussions with the Council and/or the developers of this site with a potential view to assisting them with meeting the policy requirements.

	<p>3. Summary</p> <p>3.1. The overall objective of the Trust remains to seek to deliver a strong, sustainable future for the Fort, that secures its long-term status as a nationally and locally important historic site that will make a vital contribution to the district. The Land Trust supports the Regulation 19 Submission Version of the Dover District Local Plan and welcomes the inclusion of Fort Burgoyne as a strategic allocation site for regeneration subject to the comments set out in this representation.</p> <p>4. Appendices</p> <p>Appendix A- Representations on the Regulation 18 Draft Dover District Local Plan 2021 and Targeted Call for Sites</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We believe that the total number of new homes is inflated to suit property developer partners of the DDC planning department and the property development lobby who donate large sums to the party currently in government, (See comments SP3 above) This is relevant to the size of SAP 1.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	As well as the SAP1 and 2 protection of the Dover Fast Track bus route and service, there need to be more measures to reinstate local bus routes cut in 2022; to make this sound measure to enable active travel are needed. To become sound, developers should contribute to a Community Infrastructure Levy so that engineered kerbed cycle routes can enhance cycle paths 1, 2,15,16,17, and new engineered cycle tracks, and pavements must be made safe in winter dark afternoons. New engineered cycle routes must link Whitfield Urban Development with Kearsney and Martin Mill rail stations (these being on different lines) and must link Whitfield with Elvington. <i>Also trains and buses on the key commuter routes must be equipped to carry (electric + cargo) bikes.</i> Cross referenced with DM policy T11
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note: Please see detailed representation (attached at 1770) which has been divided against numerous consultation points. The representation has images within the text. The text below is an extract from the detailed representation 'by an Alkham resident'.</p> <p>5 Housing Growth</p> <p>5.1 The Green Integration Plan and the local housing plan originally identified considerable growth for Dover District with land initially to be allocated for 14,000 new homes with a target to complete 10,100 homes by 2026. This target now appears to have been reduced and the new plan identifies the broad areas where the growth of the additional homes will be located; notably sites within the Dover urban area, Whitfield, Deal, Sholden and Sandwich.</p> <p>5.2 The Dover District Council Plan justifies its housing allocation growth on the grounds of identified need in line with NPPF and the Department of Levelling Up Housing and Communities criteria and as such has identified a number of choices for housing based on supply, demand, windfall sites etc. As a result a number of small development sites have been identified throughout the District including one in Alkham as well as a plan for a major Urban expansion site at Whitfield.</p> <p>5.3 The District Plan identifies a requirement for an additional 42 traveller pitches throughout the district and identifies two such pitches in Alkham and three others elsewhere.</p> <p>Comment 5</p> <p>a) I welcome the fact that the Plan wishes to increase the types of housing built, encouraging designs to maximise climate benefits and I take no issue with the site for ten houses identified within Alkham and would welcome the development of more affordable housing to encourage more families into the village.</p> <p>b) Alkham has many traveller residents who partake in village life I but would query where the other 37 sites will be accommodated as windfall proposals sites have not been identified. Information on this would be welcome .</p> <p>c) However I must raise severe concerns re the planned development at Whitfield</p> <ul style="list-style-type: none"> • The DDC highlights the requirement for 6350 homes at Whitfield stating that this will be supported by education, primary health and social care , utility services retail and leisure provision as well as the development of the Whitecliff Business Park area at Whitfield which will not only have retail but also light industrial and haulage uses. • The Plan talks at length on the landscaping and it highlights transport networks and in particular references the upgrades required for the Whitfield and the Duke of York Roundabouts It also says that consideration must be given to the local transport links , the Alkham road , the A256 and Whitfield Hill • This matter was raised in 2014 when the Transport Plan for 2015 -2030 was adopted and no action was taken. • Since that time traffic along the Alkham Valley has hugely increased. Representations have been made to the local MP, KCC and a Highway improvement plan submitted all to no avail. • The current plan makes a flawed assumption that householders and businesses will access routes to London via the A20/M20 or A2/M2 whereas in reality they use the Alkham Valley Road , a DECLASSIFIED Road to access the M20. This matter is the subject of more detailed comment later in the report under transport

	D) As housing increases traffic will continue to expand and radical options to consider the Valley a green space in the middle of urban development with road only open for business residents leisure use and emergency vehicles offering a range of bridleways, walks, cycle routes should be explored. This type of scheme has been successfully carried out in other areas such as the Goyt Valley Derbyshire and can lead to vibrant rural community improved air quality and improved traffic management
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1731.)</p> <p>Ensuring the delivery of new homes</p> <p>For a plan to be considered effective, the objectives and identified requirements must be deliverable and achievable. It is considered that, in its current form, the plan fails to accord with this part of the soundness test, due to over reliance on the Whitfield (SAP1) Strategic Allocation to provide the District's projected housing needs over the plan period. Therefore, to ensure the balanced and steady delivery of housing over the plan period, further Sites should be allocated to ensure that the needs of the district are met.</p> <p>Whitfield Urban Extension (SAP1) is the largest allocation in the plan and it is expected to deliver over 5,750 dwellings. Of the 5,750 dwellings proposed for the Site, 3,483 dwellings are considered deliverable in the emerging Plan period. The Council acknowledges that the 2010 Core Strategy included provision for the Site to deliver 5,750 dwellings. Phase 1 of the SAP1 allocation (Dover ref. 10/01010) is underway and as of the 2020/2021 monitoring year, 185 dwellings had been completed with a delivery rate of approximately 50dpa for the past three years. Given this slow progress, it seems likely that although the existing outline planning permission should be completed over the Plan period, a more cautious approach should be taken in terms of the remaining dwellings allocated for the Site given its proven issues in delivering housing to date. Without clear evidence by way of a planning application for these additional dwellings, it is questioned whether Whitfield will ramp up to delivery of 120dpa from 2023/24 and then up to 200dpa from 2026/27 for the remainder of the Plan period. More consideration should therefore be made to the current planning position of the Site and the length of time it has taken so far to deliver housing. Paragraph 73D of the NPPF recommends the inclusion of realistic delivery rates within Local Plans, and DDC should therefore review those proposed for Whitfield and consider building more flexibility and more volume into the pipeline to be able to respond to delivery issues.</p> <p>It is considered that, particularly with the deliverability issues of the Whitfield Urban Extension to date, additional Sites should be allocated for housing to ensure that there is sufficient choice and flexibility in the supply so that DDC can meet its housing requirement throughout the Plan period, as well as to meet the Government's objective to significantly boost the supply of housing as set out in</p>

	Paragraph 60 of the NPPF. Land to the north of Astley Avenue would be an appropriate allocation which would assist in ensuring a variety of housing Sites are allocated in accordance with NPPF Paragraph 68. The provision of around 45 dwellings here would be suitable for Dover as a regional centre and could support the delivery of housing to meet local needs.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Full Representation attached to SDLP1740. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1740.)</p> <p>Ensuring the delivery of new homes</p> <p>For a plan to be considered effective, the objectives and identified requirements must be deliverable and achievable. It is considered that, in its current form, the plan fails to accord with this part of the soundness test, due to over reliance on the Whitfield (SAP1) Strategic Allocation to provide the District's projected housing needs over the plan period. Therefore, to ensure the balanced and steady delivery of housing over the plan period, further Sites should be allocated to ensure that the needs of the district are met.</p> <p>Whitfield Urban Extension (SAP1) is the largest allocation in the plan and it is expected to deliver over 5,750 dwellings. Of the 5,750 dwellings proposed for the Site, 3,483 dwellings are considered deliverable in the emerging Plan period. The Council acknowledges that the 2010 Core Strategy included provision for the Site to deliver 5,750 dwellings. Phase 1 of the SAP1 allocation (Dover ref. 10/01010) is underway and as of the 2020/2021 monitoring year, 185 dwellings had been completed with a delivery rate of approximately 50dpa for the past three years. Given this slow progress, it seems likely that although the existing outline planning permission should be completed over the Plan period, a more cautious approach should be taken in terms of the remaining dwellings allocated for the Site given its proven issues in delivering housing to date. Without clear evidence by way of a planning application for these additional dwellings, it is questioned whether Whitfield will ramp up to delivery of 120dpa from 2023/24 and then up to 200dpa from 2026/27 for the remainder of the Plan period. More consideration should therefore be made to the current planning position of the Site and the length of time it has taken so far to deliver housing. Paragraph 73D of the NPPF recommends the inclusion of realistic delivery rates within Local Plans, and DDC should therefore review those proposed for Whitfield and consider building more flexibility and more volume into the pipeline to be able to respond to delivery issues.</p> <p>It is considered that, particularly with the deliverability issues of the Whitfield Urban Extension to date, additional Sites should be allocated for housing to ensure that there is sufficient choice and flexibility in the supply so that DDC can meet its housing requirement throughout the Plan period, as well as to meet the Government's objective to significantly boost the supply of housing as set out in Paragraph 60 of the NPPF. Land at Shooters Hill, Eythorne would be an appropriate allocation which would assist in ensuring a variety of housing Sites are allocated in accordance with NPPF Paragraph 68.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP2
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The current Local Plan includes the following iii. the integrity and setting of the North Downs Way is preserved and enhanced by retaining the existing hedgerow, strengthening by additional planting of three metres either side of the North Downs Way, and setting back development 10 metres from the new planting, or a new 'green bridge' pedestrian connection is delivered across the A2 to improve the setting and directness of the North Downs Way; No justification for removal of the bridge option is given.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	SAP2c should be amended to read: the integrity and setting of the North Downs Way is preserved and enhanced by retaining the existing hedgerow, strengthening by additional planting of three metres either side of the North Downs Way, and setting back development 10 metres from the new planting, or a new bridleway bridge is delivered across the A2 to improve the setting and directness of the North Downs Way;

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To elaborate on the reason why the bridge option has previously been policy and answer any questions not anticipated in the written response,

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	As recognised in the policy wording and its supporting text, the location of the site, and its proposed use as a Business Park has potential to impact on the Kent Downs AONB due to intervisibility, and due to the proposed scale and form of commercial buildings that can be difficult to mitigate in views from the AONB. However, it is considered that appropriate safeguards are included in the policy wording to appropriately manage potential AONB impacts. The proposed safeguards to the North Downs Way as it passes through the site are also supported.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>As well as the SAP1 and 2 protection of the Dover Fast Track bus route and service, there need to be more measures to reinstate local bus routes cut in 2022; to make this sound measure to enable active travel are needed. To become sound, developers should contribute to a Community Infrastructure Levy so that engineered kerbed cycle routes can enhance cycle paths 1, 2,15,16,17, and new engineered cycle tracks, and pavements must be made safe in winter dark afternoons. New engineered cycle routes must link Whitfield Urban Development with Kearsney and Martin Mill rail stations (these being on different lines) and must link Whitfield with Elvington. <i>Also trains and buses on the key commuter routes must be equipped to carry (electric + cargo) bikes.</i> Cross referenced with DM policy T11</p> <p>SAP 2 – 4.82. This will be more sound and compliant with Localism Act 2011 if the following is added, 'All proposals for the development of Phase 3, with or without, by DfT or DDC or a combination, should be subject to full and early disclosure to and consultation with, Guston Parish Council'.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Iceni Projects, on behalf of Quinn Estates, welcomes the opportunity to submit representations to the Dover District Council Local Plan Regulation 19 Consultation in respect of land to the north-east of Southwall Road, Deal (the 'Site'). This representation should be considered alongside and with regard to the following appended documents which comprise:</p> <ul style="list-style-type: none"> • Appendix 1 – Site Location Plan <p>The vision for the Draft Local Plan reflects the growing importance of new challenges facing local communities in regard to climate and ecological emergency, and greater emphasis on the protection and enhancement of retail, leisure, cultural and commercial development across the district area, and promoting the health and social wellbeing of communities. The corresponding objectives strive for a more prosperous economy, as well as vibrant new communities. Quinn Estates considers that there is much to welcome in the new Plan, however, the company considers the opportunity to deliver an appropriate and badly needed quantum of growth at Deal has not been positively planned for, and that the Plan would be strengthened by promoting additional growth at Deal.</p> <p>Quinn Estates considers that the proposal at Southwall Road presents a suitable site for locating employment growth for Deal adjacent to an existing and successful employment site, which would be easily accessible by public transport and be commensurate with the size of the settlement. Given the unique characteristics of the site, it is considered that it would logically lend itself to development of approximately 130,000 sq. ft of employment uses compatible with those alongside. As such, the site would in particular suit smaller light industrial occupiers (Use Class E(g)) benefiting from the sustainable town centre location. This would provide logical and tempered expansion of the town's employment provision thereby helping address the district's needs, at a location where demand for such uses is proven.</p> <p>Quinn Estates has a proven track record of providing purpose-built employment space for wide range of end users, from smaller artisanal start-ups to larger established operators; and it is considered that this site would provide opportunities for end users from across that range.</p> <p><u>a. The site and surroundings</u></p> <p>The Site comprises approximately 3.3 acres of land lying to the north-east of Southwall Road, Deal. The Site is bound to the south-east by Minters Industrial Estate and Deal Business Park on Court Marsh Road and to the south-west by residential properties. The Southwall Industrial Estate encloses the Site to the north-west, separated by an open field; and to the north-east, Hutchings Timber lies beyond a wooded field. The land adjoins the Deal settlement boundary along its southern edge and is located on the north-western edge of the town.</p> <p>The Site does not contain any Public Right of Ways (PRoWs). Existing access to the Site is via a gate on Southwall Road. Deal train station is located approximately 0.6 miles walking/cycling distance to the east within Deal town centre.</p> <p>The Site is neither within or near a designated Conservation Area, nor are there any listed buildings or other heritage assets nearby. The land is classified as Flood Zone 2/3. The Kent Habitat Survey 2012 identifies the entirety of the Site as Neutral grassland. There are no significant ecological designations affecting the Site or in the vicinity which would restrict development at this location.</p> <p>The Site has an uncertain history with regard to assessment under previous Local Plan work. The HELAA 2020 Appendix 1 'Housing Long list' references the site; however, it does not state whether it was proposed for housing or employment as it does with other sites. Appendix 3b 'Housing Sites Highways Assessment' references the DEA049 code as the previous code for another site in Walmer. Appendix 3e 'Initial</p>

Assessment Housing Sites Eliminated' notes the site, however, states it is for employment and will be assessed separately. Appendix 3f 'Initial Assessment – Employment Sites Eliminated' has no reference to the site under the DEA049 code, the postcode, or any of the site addresses.

b. Objection to Tables 4.2 of the Draft Local Plan

Quinn Estates considers that the economic growth strategy for Dover, as detailed in Table 3.5 of the Regulation 19 Submission Version of the Draft Local Plan cannot be considered sound plan-making. In its current form, the Plan fails to positively plan for economic growth in Deal under Policies SP6 and E1. Quinn Estates considers that the Plan should proactively support employment growth in Deal through the allocation of additional sites.

Sustainable patterns of growth

Sustainability lies at the heart of good strategic planning and is a core tenet of the National Planning Policy Framework at Paragraph 8. When determining the spatial strategy for employment growth, the Council should direct employment land to the most sustainable locations, namely those which reduce the need for access via private vehicle and are near key population centres.

Deal is the second largest town within the District and is home to approximately 30,000 people. Deal is recognised in the Draft Local Plan as the second largest settlement in the District, benefitting from a vibrant town centre, which benefits from a good level of accessibility and an attractive environment. It's well used by residents and visitors and has a low vacancy rate, as a result of the diverse retail offer. In addition, the town is highly sustainable in regard to public transport accessibility, being served by mainline rail, the high-speed train service to London and numerous bus routes.

Quinn Estates posit that the amount of employment land allocated to Deal within the draft Local Plan is wholly inconsistent with relation to its position as the second most sustainable location in the District for future growth. No new employment land is allocated to the town. The Deal Business Park is offered policy protection through draft Policy E2. Employment allocations have instead been directed to Dover, Aylesham and Eastry, a principal town, rural service centre and local centre within the Settlement Hierarchy, respectively. Table 3.1 of 2021 EDNA update (copied below) succinctly summarises the spatial distribution of employment land across the district, and outlines the strange situation the District faces, where rural areas and smaller settlements hold more employment space than the second largest settlement within the District.

[See attachment]

Evidently, successive Local Plans have failed to plan proactively for employment in Deal, resulting in the picture painted above. Similar to the spatial approach to housing within the Draft Local Plan, the Council's proposed strategy looks to further cement this position, skewing economic growth away from one of the most sustainable locations in the District to areas that are far less sustainable and would require employees to largely arrive by private vehicle to work. The justification for channelling so little growth to Deal is not considered to be justified by evidence, when all the evidence points to the settlement being such a logical and sustainable location to channel growth to. The principles of sustainability and sound plan making appear to have been absent in key decision taking over spatial choices at the heart of the spatial strategy presented in the Draft Plan.

Ensuring the delivery of employment land

For a plan to be considered effective, the objectives and identified requirements must be deliverable and achievable. It is considered that, in its current form, the plan fails to accord with this part of the soundness test, in part due to over reliance on the White Cliffs Business Park to provide the majority of the District's employment land requirement across the Plan period. Therefore, to ensure the balanced and steady delivery of employment floorspace, further Sites should be allocated to meet the needs of the District, and in particular, the previously identified need of Deal.

The EDNA 2017, and the 2022 update, both highlight how the District has not been able to deliver, to date, the level of growth identified in the 2010 Core Strategy and there is a great deal of 'catching up' to do over the next ten years if there is any prospect that the overall job growth target of 6,500 is to be reached.

Policy CP2 of the existing Core Strategy (2010) seeks to provide approximately 200,000 sqm of employment floorspace and 35,000 sqm of retail floorspace between 2006-2026. The Authority Monitoring Report 2020-21 scores progress against Policy CP2 as amber – where 'progress has been made towards meeting the target however further work is required'. Over the monitoring period (2020-21), the following net-gains in employment floorspace are found:

[See attachment]

To address this difficulty with delivery of employment land, the Draft Local Plan proposed the White Cliffs Business Park to deliver the bulk of the employment floorspace requirement in the plan and is expected to deliver a total of 120,000 sqm across four phases. However, there is uncertainty regarding the availability of part of Phase 2 and Phase 3 of White Cliffs Business Park which was proposed to be used as an Inland Border Facility, subject to a Special

Development Order which is in place. In addition, the Council's own EDNA 2017 assesses the issues with the site, stating that 'the site has struggled to come forward for new B class development over recent years, in part due to viability issues limiting interest by investors to promote B class uses within the site. Retail development has started to erode the longer-term employment potential of parts of the site.' Given the uncertain nature of this site, the Council should seek to broaden the employment base through additional allocations across the District where there is an identified need, in the most sustainable settlements i.e., Deal.

Addressing Flood Zone constraint

The site lies within Flood Zone 3, as shown on the Environment Agency's flood zone map and as such, has the potential to be at risk of flooding from the sea. In partnership with the Environment Agency, the Council completed the Deal Coastal Defence Scheme, which provides a 1 in 300-year (0.33%) standard of protection to this area from coastal flooding and only at risk in the extremely unlikely event that the flood defence infrastructure was to fail (i.e. a breach).

Notwithstanding the unlikelihood of a breach, the NPPF requires a site-specific FRA to be submitted for all development located within Flood Zone 3. The NPPF states that development in areas at risk of flooding should be avoided by directing it in the first instance away from areas of highest risk. Where development within areas at risk of flooding is proposed, Para 161 of the NPPF requires that the Sequential Test is applied and, if necessary, that the Exception Test is applied (Para 163-165).

The Council's Strategic-Flood-Risk-Assessment (2019) provides an up-to-date appraisal of the flood risk in Deal, prepared in conjunction with the Environment Agency, Lead Local Flood Authority, Internal Drainage Board and Southern Water. One of the aims of this report is to provide sufficient data and information to enable the Council to apply the Sequential Test to land use allocations and to identify whether the application of the Exception Test is likely to be necessary. It is significant to note that the Site proposes to develop employment floorspace, which is considered to be a less vulnerable use.

A live application (ref: 22/00916) on an adjacent site 64-66 Southwall Road) is currently seeking permission in principle for up to 7 dwellings, along with a replacement place of worship with a community hub and nursery. The application site also lies within Flood Zone 3 and therefore faces the same constraint as the Site subject to these representations. As of 24th November 2022, the Environment Agency have responded to consultation with no objection to the scheme following clarification of residual flood risk on site. This demonstrates that the designation of land as Flood Zone 3 should not be considered as an absolute constraint affecting the principle of development in this location, and that suitable growth for Deal can be supported subject to the necessary technical work being undertaken through site specific FRA's, and the Sequential and Exception Tests in accordance with NPPF guidance.

c. Conclusion

Quinn Estates wishes to support Dover in bringing forward a successful, effective and sound Local Plan that can serve the District across the Plan period. However, Quinn Estates considers that the current approach to the spatial strategy in the Draft Local Plan requires amendment to address a significant soundness issue concerning the level of growth identified for Deal, the District's second largest settlement. It is considered that the Plan currently fails to positively plan for a commensurate level of housing and employment at the settlement, as expressed in Policy SP3 and that the available evidence does not support or justify this approach. Moreover, the evidence does support channelling a greater quantum of growth to Deal.

The Council has struggled with delivery of employment floorspace across the District within the last plan period, and there is a recognised need for additional employment in Deal within the evidence base for the Draft Local Plan. To combat the current over reliance on the White Cliffs Business Park, which is facing delivery issues, the Council should seek to explore additional avenues for employment growth, through identifying suitable sites in Deal, such as the Site subject to this representation.

We trust that the above amendments is acceptable to the Council and that these representations will be taken into account in consideration of the current consultation. We also confirm that Quinn Estates would welcome the opportunity to be involved in the forthcoming Examination-in-Public and contribute to the debate to ensure that the best strategy for the District is found.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful

Allocate land at Northwall Road for employment uses

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

My concern is expansion of WCBP will obviously lead to more people passing to and from. Most will need to access WCBP via Whitfield A2 roundabout, already congested. Other access (direct from A2 will get heavy use when the customs clearance control centre is open (near B and Q) What is required (at least informed) is taking A2 round the back of Whitfield, re-joining the existing A2 (to be re-numbered). Can anyone inform me how many are estimated to be employed at WCBP now? Last 'official' DDC estimate 3,000! Someone should know. And how many of phases 3 and 4 reach fruition. Thanks

If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<u>Minerals and Waste</u> : To deliver economic growth in the district, this may have an impact on mineral safeguarding facilities. Paragraph 3.117 states: <i>3.117 Furthermore, to achieve the aspirations set out in the Council's Growth Strategy and deliver a step change in the delivery of economic growth in the District, over and above the level of employment need identified in the EDNA, further allocations are required. Sites are therefore allocated at Dover Waterfront, Fort Burgoyne and the Citadel, Western Heights in Dover, in addition to the former Snowdown Colliery in Aylesham, in accordance with this strategy. These sites offer significant opportunity to regenerate brownfield sites in key locations in the District and deliver</i>

flexible employment uses, to achieve a higher level of job growth and help provide additional flexibility and choice to the market over the Plan period. No floorspace allowance has been included for The Citadel, Fort Burgoyne and Snowdown Colliery as these are brownfield sites allocated for regeneration, and the mix of development and floorspace requirements will need to be determined through the planning application process in accordance with the policies in the Local Plan.

The 'Dover Waterfront' is a major element of the Local Plan's regenerative growth area. The relevant Policy for this area being SAP3-Dover Waterfront.

The area has two safeguarded mineral facilities, in close association with each other, the Dunkirk Jetty marine aggregates importation wharf and a concrete batching plant to its immediate west. The extract from Google maps below shows the mineral importation wharf in operation and the 'Gallagher Aggregates Dover Concrete Plant'. Both are safeguarded by virtue of policies CSM:6 Safeguarded Wharves and Rail Depots and CSM 7: Safeguarding Other Mineral Plant Infrastructure of the Kent Minerals and Waste Local Plan 2013-30 (as Early Partially Reviewed and adopted in 2020).

Policy SAP3 - Dover Waterfront lists the regenerative objectives for the area, and the assessments that will be required in bringing forward these developments. Including such assessments for archaeology, air quality, noise etc but it omits any assessment of the safeguarding status of these facilities. It is assumed that they would not be retained as part of the Western Docks regeneration. This matter is also not mentioned in the policy's explanatory paragraphs 4.92 to 4.100 – however, it is assumed, in the absence of any information to the contrary, that these safeguarded mineral facilities would be threatened with direct loss by the Plan's regenerative objectives, as their retention would be incompatible with the Plan's regeneration objectives outlined in the policy.

An Infrastructure Assessment (IA) is required to assess whether the loss of these safeguarded facilities is justified against the exemption criteria of Policy DM 8 of the KMWLP. As a general matter, wharf capacity, once lost, is very unlikely to be able to be replaced at another location, of equal or superior operational capacity. Therefore, the County Council, as Minerals and Waste Planning Authority default position is to seek to retain these facilities and ensure regenerative development allows for this. The IA's should demonstrate that the proposed development will meet the requirements of Policy DM 8 and allow the lawful and viable operation of these facilities to be able to be continued.

PRoW: It is requested that this development does not affect the route of the National Trail.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We welcome acknowledgement of heritage, including the setting of the Western Heights, Dover Castle and the site's archaeological potential in the preamble to the policy and within the policy itself. However, we note the policy is for 263 units which on this site could mean higher buildings. We therefore stress again the need for detailed proposals to be genuinely character led and informed by a detailed assessment of the contribution of setting to the significance of designated heritage, so that the response actively seeks to avoid and minimise harm and where possible enhances significance.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	We note the policy itself does not reference the need for high quality design and this might be a useful addition given the site's general sensitivity and visible location. As with other town centre sites, this site would also benefit from a detailed design brief to provide a greater level of certainty to developers and as a way for the Council to be clear about what is achievable on the site without causing unacceptable levels of harm to important heritage.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The south western edge of the site adjoins the boundary of the Kent Downs AONB and due to the site's prominent position on top of a ridge of chalk, there is intervisibility between parts of the site and the adjacent AONB and the site is therefore considered to lie in the setting of the AONB. While there is no specific requirement proposed within the policy wording for mitigation of potential AONB impacts, it is considered that other criterion within the policy wording including that proposed within criterion (a) in combination with safeguards for AONB setting included within policy NE2, provide appropriate measures to address potential AONB impacts.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Dover District Council's Investment, Growth & Tourism Service (Place, Economic Development & Regeneration) supports 'SAP4 – Dover Western Heights'. SAP4 is in support of DDC's current Corporate Plan, Economic Growth Strategy and Tourism & Visitor Economy Strategy.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<u>Heritage Conservation</u> : As the text notes, a master plan for the Western Heights was adopted into policy by Dover District Council in 2015. An action plan was contained in the document but almost no progress has been made since that time. In the discussions that took place during the preparation of the master plan, it was understood that the action plan needs to be resourced if it is to be delivered and that a designated officer would need to be given responsibility for delivery. The County Council would urge the District Council to re-engage with the action plan so that it can be taken forward and the future of the monument be secured. The County Council recommends the policy includes reference to PROW network and sustainable access improvements as outlined in ROWIP The County Council supports this policy in respect of heritage conservation matters.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP4
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We question if there is a need for 'Citadel' in the policy title given the clear focus of the policy on the Western Heights as a whole.</p> <p>We welcome the Council's considered approach to the policy for the Western Heights and agree that this important site could and should be one of Dover's key regeneration sites (para 4.101).</p> <p>We also agree that solutions which provide for the long-term sustainable use of the site are likely to involve a degree of harm to the monument and we think it is right that this is acknowledged within the preamble, with the clear caveat that any harm would need to be outweighed by public benefits (which could be heritage benefits for the monument).</p> <p>We support the Council's aim for development proposals to deliver benefits to the Western Heights which combine conservation works with enhanced access and enjoyment of the site. We acknowledge and accept that delivery of meaningful change to the fortunes of the site is likely</p>

	<p>to be dependent and linked to the development of parts of the site for housing, and that 100 houses is outlined for the site as a whole (not just the Citadel as may be inferred from the title).</p> <p>In reference to para 4.105 (below) we wonder whether there should be a stronger emphasis on development which provides it with a sustainable use? That might for example be in the form of better landscape management in some parts of the site, while in others it could be finding ways to introduce community facilities (e.g. a cafe and WC) which supports enhanced access to and enjoyment of the heritage asset.</p> <p>We also think the Council should consider how heritage benefits would be tied to the granting of any planning consent for housing and request that the specific mechanisms be referred to in either preamble or within the policy itself.</p> <p><i>(DDC Note - This is an extract of the full Historic England representation which can be located at SDLP1169)</i></p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>In respect of, we suggest the following minor amendments to the detailed wording of the policy (underlined):</p> <p>b. <i>Make a positive contribution to the character and distinctiveness of this significant heritage asset and capitalise on opportunities to reduce risk across the whole site <u>and opportunities to enhance the significance of the heritage asset:</u></i></p> <p>g. <i>Enhance awareness and accessibility <u>and understanding</u> of this asset for residents and visitors</i></p> <p>h. <i>Improve connectivity between the fortifications and the town, including, where possible, the delivery of links with the town centre, Dover Priory railway station and the Dover waterfront including <u>by utilising the Grand Shaft as an important connector between the waterfront and Western Heights</u></i></p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Regarding SP6 - Economic Growth, we are concerned about the inclusion of Fort Burgoyne as a site allocation for economic growth. This is due to the importance of the site as a hibernation site for hundreds/thousands of bats, which are a protected species. The redevelopment of Fort Burgoyne could have a significant detrimental effect on Dover's local bat population, and therefore go against the Spectacular and Sustainable Environment Strategic Objective, which states "to conserve and enhance the District's biodiversity [...] priority habitats and species". There are seven species of bat listed as UK BAP Priority Species.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The site adjoins the boundary of the Kent Downs AONB and is therefore considered to lie in the setting of the AONB. While there is no specific requirement proposed within the policy wording for mitigation of potential AONB impacts, it is considered that other criterion within the policy wording including proposed criterion (j), in combination with safeguards for AONB setting included within policy NE2, provide sufficient measures to address potential AONB impacts.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC EDIT: Detailed representation attached with figures and maps. Representation reproduced in box 7 below.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at	1. Introduction 1.1. Following the publication of the Dover District Council Local Plan (Regulation 18 Draft) and the Targeted Call for Sites on the 20th of January 2021, the Land Trust submitted representations in relation to the development of their own appropriate strategy for the possible future use and regeneration of Fort Burgoyne, Fort Burgoyne Road, Guston, Dover, CT15 5LP . These representations are included as Appendix A of this Statement, however, can be summarised as follows:

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- The site at Fort Burgoyne extends across an area of approximately 42 hectares and includes a recreation ground, a substantial area of chalk grassland and the main buildings and immediate surrounding grounds (including the Parade Ground). Fort Burgoyne is also a designated Schedule Monument, confirming that the site is of national importance.

- Fort Burgoyne was built in the 1860s to protect Dover Castle and was used to defend the South Coast of England as one of the “Palmerston Forts” built to defend against invasion. The polygonal system on which the building is built was used to defend and watch from the highest strategic point in Dover. After the First World War, Fort Burgoyne was used a military depot/store for Connaught Barracks before it ceased to be used for military purposes in 2006. In 2014 the Land Trust, a national charity, acquired the site from Homes England and since then has been considering a variety of options for the future development of Fort Burgoyne. This includes the submission of two pre-application enquiries relating to the future use of the site to DDC in July 2019 (DDC Ref: PE/19/00127) and July 2020 (DDC Ref: PE/20/00234), which serve to demonstrate that the Land Trust has a clear commitment to bringing Fort Burgoyne back into use for public benefit at the earliest opportunity.

- DDC’s adopted Core Strategy 2010, recognised the importance of Fort Burgoyne within the criterion vii of “Strategic Allocation” policy CP10 (Former Connaught Barracks Complex), which stated that alongside the allocation for around 500 dwellinghouses, *“the condition of Fort Burgoyne is stabilised, if possible new uses are accommodated, a public access strategy is agreed and a management arrangement is incorporated that secures a sustainable future for the Fort”*. The Dover District Local Plan Regulation 18 Draft appeared to “down-grade” of the Former Connaught Barracks site from a “Strategic Allocation” to a “Non-Strategic Housing Allocation”. The Regulation 18 draft no longer made any specific reference to Fort Burgoyne with no strategic policy objective to deliver the future of the Fort, a Scheduled Monument of national historic interest that is included on the Historic England at risk register.

- The representation therefore sought to raise that the Draft Local Plan needed to provide clarification as to how the regeneration of the two separate elements (being the residential development of Connaught Barracks and the regeneration of Fort Burgoyne) will be delivered to allow for proposals for Fort Burgoyne to be brought forward under a set of key objectives, independent of the Connaught Barracks housing development. It was subsequently suggested within the representation that the Fort’s future is secured through other means within the new Local Plan, either through its own strategic policy in other sections of the plan (such as the Employment and the Local Economy section), or through the re-wording of Site GUS002 or through other Development Management policies.

- Finally, given that, in a “Strategic Futures” Report (included as part of **Appendix A**) prepared by WYG and commissioned by the Land Trust, it was identified that there is circa 3,000 square metres of floorspace within existing buildings at Fort Burgoyne that would be potentially suitable for a wide variety of uses. It was also suggested that in order to secure a long-term future use for Fort Burgoyne and secure its regeneration, it would be wholly appropriate for it to be allocated within Strategic Policy 9 for business and employment purposes, in order for more flexibility to be given to the types of uses that might be permissible at the site.

1.2. Dover District Council (DDC) has subsequently published the Regulation 19 Submission of the Dover District Council Local Plan which sets out the vision, strategic objectives and overarching development strategy for future growth in the district over the period to 2040. The Land Trust have therefore instructed Bloomfields Chartered Town Planners to prepare further representations in relation to the Regulation 19 submission and the regeneration and future use of the Scheduled Monument, Fort Burgoyne.

2. Regulation 19 Submission of the Dover District Council Local Plan

2.1. It is welcomed that the aforementioned representations have been taken into account within the Regulation 19 Submission of the Dover District Council Local Plan.

SAP5 - Fort Burgoyne, Dover

2.2. In particular, the Trust is pleased to see the inclusion of Fort Burgoyne for Mixed Employment Use in table 4.1 and a positive site-specific policy to support site regeneration at Fort Burgoyne within Chapter 4: Housing and Employment Site Allocations at Strategic Allocation Policy SAP5 which states the following:

Figure 1: SAP 5- Fort Burgoyne, Dover as of Regulation 19 Submission, DDC Local Plan

2.3. The Land Trust also notes the pre-amble to Policy SAP5 which, at 4.109, recognises that Fort Burgoyne has the potential to accommodate new uses, provided that they are compatible with its status as a scheduled monument. The Trust continues to explore suitable uses for the reuse of the Fort, as evidenced by the grant of planning permission 21/01000 on the 7th July 2022 for the change of use of 4no. casemates to Use Class E with associated ancillary works.

2.4. The Land Trust remains committed to attracting uses for the Fort that will fit in with the long-term sustainable vision for investment in its re-use, as required by the preamble to Policy SAP5. The uses being explored, as evidenced in the previous Regulation 18 representations,

are all being considered with the aim of supporting local business growth and ensuring at the same time that any mixture of uses at the site are compatible in respect of access, servicing, general amenity and crucially with the aims of conserving the Scheduled Monument.

2.5. While the inclusion of this policy is largely supported, The Trust has a number of comments in respect of the criteria:

2.6. Criterion h sets out that a Surface Water Management strategy should be produced for the site. The Trust recognises the importance of surface water management; however, it is highlighted that the Fort already benefits from an existing surface water drainage system which was built in the 1860s as part of the construction of the site. This system has always discharged directly to the ditch of the Fort where it soaks into the ground.

2.7. Given the Scheduled Ancient Monument status of the site, establishing an alternative strategy for managing surface water may not be practical and could result in harm. As such it is suggested that this criterion should be removed.

2.8. Notwithstanding this, where relevant, any future planning applications for uses or development at the Fort can demonstrate if required how it would be compatible with the existing surface water drainage system and not require any alternative arrangements for its disposal.

2.9. In respect of criterion j which suggests that *“development within the boundary of Fort Burgoyne which would have a detrimental impact on the heritage significance, setting, views, biodiversity, character of coherence of the components and elements of the complex will not be permitted”*.

2.10. While the Trust acknowledges the need to avoid development which will have a detrimental impact on the range of criteria identified in this policy, any development within Fort Burgoyne would be restricted by the requirement for Scheduled Monument Consent approved by Historic England which is considered to negate the need for this criterion. Draft Local Plan policies in respect of landscape (NE2), ecological (SP13) and historic environment (HE1, SP15) further negate the need for this criterion.

2.11. It is therefore respectfully suggested that criteria h and j are removed from policy SAP 5.

Chapter 2 - Vision and Objectives

2.12. Chapter 2 sets out the overarching vision for Dover District, including that *“through careful stewardship of its world class landscapes, thriving natural environments and wealth of historic sites, Dover District will be a destination of choice for people of all ages to make their home, for businesses to invest in and for visitors to explore and experience.”*

2.13. It is appreciated that the vision highlights the *“Sensitive restoration of elements of its rich built heritage, will enhance the attractiveness of the town, while improved connections to its seafront will have been delivered by high quality design and investment in place making.”* Together with the strategic objective (echoed in Strategic Policy 15) to conserve and enhance heritage assets in the district *“in a manner appropriate to their significance, recognising their intrinsic value as a finite resource as well as their contribution to the character of the District and the positive role they can play in the regeneration of the District.”*

2.14. The Trust also welcomes the identification of Fort Burgoyne on the Local Plan key diagram (Figure 2 below) alongside other Regeneration Sites covered by policy SP6 as set out further over the page.

Figure 2: Figure 2.1, Local Plan Key Diagram

Chapter 3 - Strategic Policies

2.15. Chapter 3 sets out the districts strategic policies to achieve the aforementioned strategic objectives.

SP6 Economic Growth

2.16. Strategic Policy 6 seeks to grow and diversify the Dover District economy by providing additional employment floorspace through the regeneration of brownfield sites in key locations in the district, such as Fort Burgoyne, to deliver flexible employment uses, achieve a higher level of job growth, and help provide additional flexibility and choice to the market over the Plan period.

Figure 3: SP6- Economic Growth, Dover as of Regulation 19 Submission, DDC Local Plan

2.17. The Trust welcomes the inclusion of Fort Burgoyne at criterion 2 of policy SP6 as site where regeneration for a mix of uses to secure their future will be supported by Dover District Council.

2.18. It is noted that paragraph 3.117 sets out that no floorspace allowance has been included for Fort Burgoyne (and other sites allocated under criterion 2) as they are *“brownfield sites allocated for regeneration, and the mix of development and floorspace requirements will need to be determined through the planning application process in accordance with the policies in the Local Plan.”*

2.19. Given the complexities of the site we support this position but anticipate that employment floorspace will amount to circa 3,000 sqm.

Chapter 11 - The Natural Environment

Policy NE1 Biodiversity Net Gain

2.20. The Trust agrees with the requirements of Natural Environment Policy 1 for development proposals to provide a minimum of 10% biodiversity net gain above the ecological baseline within the development boundary. And notes criterion (a) which states that where it can be demonstrated that ecologically meaningful biodiversity net gain cannot be achieved within the site boundary, the Council will consider off-site alternatives in line with the mitigation hierarchy approach.

2.21. Given that a large portion of the 42 hectares at Fort Burgoyne has the potential to provide for significant biodiversity offering, in responding to this consultation The Trust wishes to record interest in working with the Council in developing its Dover District Biodiversity Net Gain Strategy with a view to Coombe Hole providing opportunity for off-site net gain whilst maximising the value of this Local Wildlife Site.

Figure 4: NE1- Biodiversity Net Gain, Dover as of Regulation 19 Submission, DDC Local Plan

2.22. In a similar vein to the BNG potential at Fort Burgoyne, the Land Trust has extensive experience of working with developers to create and provide in perpetuity management of Suitable Alternative Natural Greenspace (SANG), areas of greenspace that are of a quality and type that are suitable to divert recreational activities associated with new residential development away from protected sites (such as Special Protection Areas or Special Areas of Conservation).

2.23. In noting the requirement of Draft Policy SAP1(I) (Whitfield Urban Expansion) which requires a need for SANG to mitigate potential impacts upon the Lydden and Temple Ewell SAC, the Trust wishes to express interest in discussions with the Council and/or the developers of this site with a potential view to assisting them with meeting the policy requirements.

3. Summary

3.1. The overall objective of the Trust remains to seek to deliver a strong, sustainable future for the Fort, that secures its long-term status as a nationally and locally important historic site that will make a vital contribution to the district. The Land Trust supports the Regulation 19 Submission Version of the Dover District Local Plan and welcomes the inclusion of Fort Burgoyne as a strategic allocation site for regeneration subject to the comments set out in this representation.

4. Appendices

Appendix A- Representations on the Regulation 18 Draft Dover District Local Plan 2021 and Targeted Call for Sites

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	N/A

Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP5
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We welcome acknowledgement that the fort is capable of accommodating new uses and that these must be compatible with the site's significance as a scheduled monument. We also welcome the site's identification as one of Dover's four key regeneration sites.</p> <p>We suggest that the pre-amble should place greater emphasis on the desirability of delivering heritage benefits within reuse proposals, and propose that the definition of mixed uses should be wider; i.e. to include cultural activities (which have previously been tested on the site via a grant aided project and proved to be very successful).</p> <p>We also suggest that the preamble should acknowledge the inherent challenge of accommodating new uses within the scheduled structures, and that providing sufficient levels of parking to support those uses will be critical to secure the site's long-term beneficial use unless more sustainable travel options to the site can be planned for and secured.</p> <p><i>(DDC Note - This is an extract of the full Historic England representation which can be located at SDLP1169)</i></p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>We suggest that the pre-amble should place greater emphasis on the desirability of delivering heritage benefits within reuse proposals, and propose that the definition of mixed uses should be wider; i.e. to include cultural activities (which have previously been tested on the site via a grant aided project and proved to be very successful).</p> <p>We also suggest that the preamble should acknowledge the inherent challenge of accommodating new uses within the scheduled structures, and that providing sufficient levels of parking to support those uses will be critical to secure the site's long-term beneficial use unless more sustainable travel options to the site can be planned for and secured.</p>

If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This site is in a key town centre location, but its historic environment has been eroded over time; we therefore welcome in principle its identification for redevelopment. The preamble highlights the proximity of the scheduled monument and grade I listed Dover Town Hall, however, we think more should be made of the site's heritage; i.e. that part of the site is within the Dover College and Dover Town Centre Conservation Areas and that it is also within the setting of the Dover Dour Street and Dover Castle Conservation Areas.</p> <p>Understanding impacts on heritage should also include a detailed views analysis, especially where new development could, through scale, impact on heritage assets some distance from the site. We suggest reference should be made to the potential need for views analysis in the policy.</p> <p>We also think this site may benefit from a development brief, which gives greater certainty to a developer and allows the Council to explore and test different solutions for the site so that they can be confident about achieving the right balance between competing planning considerations, and set a high bar for design which will be essential in order to maximise the potential of this site.</p> <p><i>(DDC Note - This is an extract of the full Historic England representation which can be located at SDLP1169)</i></p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	There are a number of key considerations for the site, including Transport Assessment, assessment of air quality, noise, vibration and light pollution. There will need to evidence that the key considerations can be satisfactorily addressed before allocating the site.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP7
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Bench St Site is key to Dover's regeneration, is in a prominent location and within the settings of many designated heritage assets, including conservation areas. We therefore welcome focus on this important site, but we think that the positive role that it could play by celebrating heritage within the site, be reinforcing and revealing the wider town's historic character, is underplayed in the preamble and the policy.</p> <p>For example, the site contains a number of good quality unlisted buildings of the 19th century which may be candidates for the Council's local list (ref Policy SP15). While we acknowledge many are in poor condition, we do not agree that the site as a whole is of low architectural quality as noted in paragraph 4.124.</p> <p>We very much welcome acknowledgment of the site's location in the setting of important heritage assets, including Dover castle, which forms the backdrop in views of the site from the A20 and the Western heights. We think there are other heritage assets, setting of which could be affected and should be considered within proposals to redevelop this site, and these include the grade II Unitarian Church and Vestry, directly to the west of the site, and the grade II The Market Hall directly to its north. We also note the scheduled monument Saxon Shore Fort Bastion lies directly to the north of the site and its setting of this asset should also be considered in proposals to redevelop the site. We also very strongly welcome the acknowledgement in the preamble of the site's high archaeological potential.</p> <p>The policy could include reference to the requirement for high quality design, and greater emphasis on retaining and converting non-designated historic buildings (unless they are in such poor condition that their nature prevents all reasonable uses).</p>

	The Bench Street Site would benefit from production of a development brief which could be informed by detailed analysis of existing buildings, opportunities and issues (including condition) and could explore archaeology within the site to inform the brief. (DDC Note - This is an extract of the full Historic England representation which can be located at SDLP1169)
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	See response to 6 for suggested modifications.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC Note (1) The text below is an extract from the original representation which is attached to SDLP1438. SAP 3 – 13 Dover (see comments in SP5 re affordable housing) The brownfield sites added since Reg 18 consultation render the Plan more sound and effective. DDC note (2) - extract from SP5 comment Text: We believe it is both unsound and possibly not legally compliant for DDC dept of Planning to say 'for Dover urban area it is not viable to require affordable housing including the minimum requirement in the NPPF 2021 for 10% affordable homeownership.

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP13 - DOV030
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	It is submitted that the plan is 'unsound' in respect of site SAP13 - DOV030, Land at Durham Hill, Dover. The site is proposed for residential development as a 'Dover Small Housing Site' with an estimated capacity of 10 dwellings. However, 'pre-application' advice, attached, relates to alternative proposals for 9 x 3 storey dwellings, 27 x 3 storey flats and 45 x 5 storey flats. The pre-application advice was positive in respect of the alternative proposals and stated that the LPA "...considers this site to be a prime location for a proposal demonstrating outstanding or innovative design." It is submitted that this site policy should reflect the pre-application advice and identify the site as being suitable for alternative residential development proposals.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	It is requested that the site policy be revised to enable residential development, comprising houses or flats, demonstrating outstanding or innovative design.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	It is submitted that attendance at the examination will assist the Inspector to assess the merits of the site and opportunities for an outstanding or innovative design for the site.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP13 Land adjoining 455 Folkestone Road, Dover (DOV008) – Outline planning permission was granted on 18th November 2022 for the erection of up to five residential dwellings (all matters reserved except for access). The site is now being offered on the market to enable a developer to take the site forward at Reserved Matters stage and develop out. The site itself has no ownership or infrastructure constraints or extraordinary development costs, the site is considered by the current owner to be viable to develop. It is anticipated that a subsequent owner will make a Reserved Matters application within three years.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 13
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	See comments made by same agent in relation to SP3 which sets out the background and details of why this policy is not sound through omission of sites for allocation. DDC Edit: Below extracted from Rep SDLP0841 <i>Mr Moore's reg 18 representation set out that the LPA must attempt to meet a higher growth figure to ensure a robust housing supply available in the event of strategic allocation delays and to ensure that opportunities for speculative development are restricted to suitable and sustainable windfall sites. This could be achieved by utilising suitable sites identified in the HELAA, particularly those within existing settlement boundaries or immediately adjacent to them. More sites should be allocated for development.</i>

	<i>WHI009 is a clear example of where allocation is a suitable approach given its location. The Site has outline planning permission for up to 28 units with reserved matters currently under consideration. It is already accepted that the site is suitable for development and there is an opportunity to positively reinforce that through allocation. A suggested change is proposed to policy SAP 13 to reflect the above</i>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Add Site WHI009 to the table of allocated sites as follows: Site Estimated Dwelling Number Site-specific Issues and Requirements WHI009 Land to the rear of Archers Court Road 28 Existing boundary trees to be retained and enhanced Primary access from Archers Court Road (number 14) Provision of formal and informal open space
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This site is wide open to views from public footpaths across the valley and will cause severe adverse landscape impact. At the moment Deal is mainly seen as a line of building on the top of the ridge from up to 2 miles away. Development here will be seen as urban sprawl down an open slope for which no adequate mitigation is possible.</p> <p>Access is proposed from a single track road with passing places which connects to other single track roads with passing places leading to junctions at Station Road/Dover Road or Manor Road London Road which are operating at or above capacity with minimal or no mitigation possible.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>In the valuable views of this side of the valley are to be foregone, development needs to be in line with a masterplan that would provide a new access to Dover Road without using Station Road. That would require a spine road through this site which would be prejudiced by development of it now.</p> <p>This site should be substituted with DEA009 which was rejected at the HELA stage because of landscape impact, accessibility. DEA009 is hidden from the long views that SAP14 is exposed to and can be made more accessible if developed in conjunction with TC4S008.</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To answer questions not anticipated by the written response and provide additional explanations and clarifications.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Table 4.2 within the Regulation 19 Local Development Plan (LDP) identifies the Site Allocations for Deal which will contribute to meeting the overall housing requirement.</p> <p>The Regulation 18 LDP included Site 'SHO002 - Land at South West of Sandwich Road' as a draft allocation with an estimated capacity of 100 dwellings. An outline application (Ref: 21/00402) was subsequently approved for up to 110 dwellings in March 2022. The Regulation 19 LDP has removed draft allocations that have subsequently been granted planning permission, including this site (hereafter referred to as 'Phase 1'). The Phase 1 site is listed in the HELAA Main Report with an amended capacity of 110 dwellings. A reserved matters application (Ref: 22/01409) submitted by David Wilson Homes is currently pending determination.</p> <p>However, as noted within representation on Housing Supply (Regulation 19 LDP paragraphs 3.36 to 3.40), the delivery of the overall housing requirement is reliant on the Extant Supply, as noted in Table 3.2. The sites which make up the extant supply are not listed anywhere within the evidence base and isn't broken down sufficiently within the Housing Trajectory provided at Appendix D of the Regulation 19 LDP. This should be sufficiently evidenced. Furthermore, where these sites comprised former allocations within the Regulation 18 LDP, the draft Policies Map should indicate that the Settlement Confines of the Urban Boundary include these extant sites. It is also noted that the Settlement Confines do not include the proposed emerging allocations listed in Chapter 4 of the Regulation 19 LDP. Richborough is of the view that the Settlement Confines should be amended to include proposed allocations and extant sites which are relied upon to meet the overall housing requirement.</p>

This is a common approach adopted most recently through the Site Allocations and Development Policies Document for Cheshire East Council (CEC). Settlement boundaries were also reviewed through the preparation of Part 2 of the Waverly Local Plan and a Topic Paper was produced, similar to CEC, which set certain criteria, including the following:

“A settlement boundary should... Include planning permissions and site allocations which physically relate to the settlement boundary.”

Land South West of Sandwich Road

Richborough consider it necessary to include additional land to the south (hereafter referred to as ‘Phase 2’) as a Housing Site Allocation which can be accessed through Phase 1 in order that there is a deliverable supply of land that accords with the proposed settlement hierarchy. The parcel of land being promoted as a suitable residential allocation adjoins the rear of properties on London Road and Sandwich Road to the north east and Mongeham Road to the south east.

Richborough submitted an outline application for the Phase 2 site in May 2022 (Ref: 22/00652) which is currently pending determination. The application seeks outline permission for 155 dwellings with associated parking and means of access.

The Site extends to approximately 11.48 hectares (28.36 acres) and comprises an arable field bounded by hedgerows and some improved grassland. Excluding the land required for access through Phase 1, the Site extends to 8.52 hectares (21.05 acres).

Topographically, the majority of the Site occupies a local plateau of 23m AOD, which is typical of the character of the area. There is a more evident break from ridge to brow at 18m AOD, where the land slopes west towards North Stream.

The northern boundary adjoins the consented development for up to 110 dwellings (21/00402), for which David Wilson Homes have erected boundary hoardings now that a reserved matters application has been submitted.

The eastern boundary of the Site includes the rear of existing residential development fronting the A528, including Sholden C of E Primary School and Hall Crescent. The Site’s southern boundary adjoins semi-detached and terraced properties along Mongeham Road, with post-war housing estates of Upper Deal beyond this, as well as Hornbeam Primary School. The Site’s western boundary adjoins other arable fields.

The relatively recent residential development of Sholden Fields is located on the eastern side of the A258, with further residential properties plus the Hull Park Sports grounds forming the remainder of Sholden to the east.

The DDC Core Strategy was adopted in 2010, followed by the Land Allocation LP in 2015. A Strategic Housing Land Availability Assessment (SHLAA) was prepared in 2009 by GVA Grimley to quantify the potential housing capacity and to identify individual sites for a 5, 10 and 15 year supply of housing in order to aid policy decisions.

The land north of Mongeham Road forms part of a wider parcel (PHS011) and is identified as being deliverable in the 0-5 year period.

The SHLAA assessment concluded that the parcel was deliverable within 0-10 years and in a location with good access to local services, children’s play space, education and that there are “no obvious physical constraints”.

As highlighted elsewhere in these representations, the HELAA was initially published in 2020 and updated in 2022 and seeks to identify a future supply of land which is suitable, available and achievable up to 2040.

The HELAA 2020 assessed both phases of the site promoted by Richborough as a single parcel (SHO002) and the assessment concluded that it was ‘part suitable / part unsuitable’. The suitability assessment in the HELAA 2020 included the following comments:

Suitable site (in part):

- To be taken forward with SHO004
- The development of the part of the site that fronts the Sandwich Road would be appropriate, to mirror the recent development opposite, however the development of the whole site would have an adverse impact on the wider landscape.
- Development here should be sensitively designed and a generous landscaping scheme should be agreed to screen the development.
- Access likely to be achievable from Sandwich Road, however this would lead to the loss of a number of established highway trees which should be balanced when considering the merits of the potential allocation.
- There is concern over the ability of the local road network (particularly at Manor Road and Mongeham Road) to cope with increases in traffic resulting from Local Plan allocations. It is suggested that these junctions/links are assessed in more detail to ascertain the potential for positive mitigation in these locations, which will largely dictate the level of growth that can be accommodated from this or other sites in the locality.
- A Transport Assessment will be required.

The site was re-assessed prior to the publication of the Regulation 18 LDP and the requirement to provide a ‘contaminated land survey’ was also added.

The site assessment in the HELAA 2022 confirmed that a further assessment of the Parcel was undertaken following the Regulation 18 consultation and Richborough's submission of a Vision Document showing a scheme of 250 dwellings. The conclusion remains that the parcel without planning permission is *"still considered to be unsuitable due to landscape impact, potential coalescence with Great Mongeham and highways impact. Here, especially there is concern over the ability of the local road network (particularly at Manor Road and Mongeham Road) to cope with increases in traffic resulting from Local Plan allocations, due to the limited potential for mitigation."*

Whilst it is accepted that the HELAA has considered SHO002 as two parcels and at a reduced capacity of 250 dwellings, there are no maps associated with the 2022 HELAA and therefore it is unclear what development boundaries were used in the assessment.

A finer grained assessment where the southern half of SHO002 was broken into two and the overall yield reduced from 300-400 should have been considered. The submitted application for the Phase 2 site (Ref: 22/00652) shows how a reduced development envelope for the site would include only the eastern portion of the southern half of SHO002 and this in turn eliminates any risk of coalescence with Great Mongeham and reduces potential landscape impacts.

The outstanding issues in regard to highways and landscape are addressed in turn in the context of a scheme for 155 dwellings on the Phase 2 site.

Highways

The application was supported by a TA prepared by Hub Transport Planning. The TA confirmed that strategic traffic modelling has been provided by WSP on behalf of DDC using the Dover and Deal Strategic Traffic Model Do-Minimum Scenario. These forecasts were used to provide strategic traffic impact forecasts for the development proposal. They are supplemented within the TA by traffic turning count data used to consider the operation of junctions on the local network.

The overall traffic generation forecast for the additional (up to) 155 dwellings is 80 two-way trips in the AM peak hour and 81 trips in the PM peak hour - no more than 1.35 additional vehicle trips per minute on the network in any peak hour. Combining the approved development to the north would mean 136 two-way additional trips on the network in the AM peak hour and 138 in the PM peak hour. This is no more than 2.3 additional vehicles per minute in any peak hour which represents a minimal or modest increase given the level of traffic currently carried on the network at these times.

The Dover and Deal Strategic Traffic Model outputs confirm the minimal or modest impacts by junction indicating an AM traffic impact of the Phase 2 development against the Do-Minimum plus Phase 1 scenario at the nearby London Road/Mongeham Road junction of just 2.3% on forecast 2040 traffic flows, and a PM impact of just 2.1%. The Phase 2 traffic impact at the London Road/Manor Road junction is forecast at 2.9% in the AM peak hour and 1.7% in the PM peak hour. The heavy vehicle content of residential traffic movements is typically very low at less than 1% and must be regarded as negligible. The analysis within the TA, which has also considered the strategic traffic modelling study undertaken to support the Local Plan, concluded that a development of 155 dwellings on the application site would have a negligible transport impact and certainly no worse than a minimal transport impact.

Any suggestion of an unacceptable or severe traffic impact resulting from the Phase 2 development should be viewed in the context of previous permissions. Phase 1 of the Whitfield Urban Extension has been the subject of consents to date totalling 1483 dwellings. The Dover and Deal Traffic Model, as set out in WSP Regulation 19 Transport Modelling Forecasting Report, provides details of the forecast operation of the 'Do-Minimum' scenario that includes the Phase 1 Whitfield Urban Extension development and any associated network improvements associated with that phase. The Whitfield roundabout was indicated as an area of concern that required more detailed junction modelling. The results of the forecast 2040 'Do-Minimum' analysis indicated residual delays for traffic on the A256 Whitfield Hill arm of over 19 minutes in the PM peak hour, with nearly seven minutes delay on this arm in the AM peak hour. Such levels of delay are not forecast for junctions in Sholden/Deal with Phase 2 Sholden development in place.

Sholden forms part of the settlement of Deal; a secondary focus for development within the District. As such, Sholden clearly ranks highly in terms of available facilities and active/sustainable travel opportunities, including education facilities close to the proposal site. The planning application is supported by a Travel Plan as well as a Transport Assessment, and the Travel Plan sets out a series of measures that would work towards reducing peak car travel. The dwellings will all be equipped with high-speed broadband connections and the necessity of home working during the COVID19 pandemic appears to have accelerated a shift towards home working and online shopping which will reduce the need to travel by car and thereby reduce traffic impacts on the highway network.

Landscape and Biodiversity Gain

The outline application submitted for the Phase 2 site is supported by a Landscape and Visual Impact Assessment (LVIA) prepared by Tyler Grange. The assessment established the current baseline conditions and considered the sensitivity of the landscape as well as visual receptors to understand the nature of the changes that will arise as a result of the proposed development.

The assessment confirms that the established settlement edge of Sholden is open in nature (through the lack of evident features) and not of recognised quality. The site overall contains no rare, notable or unique landscape features and would not be considered to represent a 'Valued Landscape' in terms of paragraph 174 of the NPPF. Neither is it covered by any local or national qualitative landscape designations. Consistent with the judgements for the adjoining Phase 1 development, which was endorsed by DDC, the effects upon the landscape are considered to be minor adverse. The proposals would not introduce uncharacteristic features, nor would they change the perception and understanding of the wider character area.

The LVIA confirms that the visual receptors affected by the development would be localised and limited principally to the local footpaths. The visual context would remain intact, where the proposed development would sit as a narrow band adjacent to the Phase 1 development site within the local context of scattered settlements occupying plateau locations. The change will not introduce elements that are prominent, visually uncharacteristic nor does it result in the loss of identified important views or vistas. The effects are also experienced over comparatively short distances and the change represents a small component of a much wider view.

In response to the opportunities and constraints that have been identified through the assessment work, a landscape strategy has been developed which has incorporated a substantial landscaped buffer, which can function as open space and provide linkages to the established footpaths. Richborough consider there to be clear opportunities to improve the structure, condition, variety and the contribution that the site makes to the local landscape.

As confirmed in the submitted Ecological Assessment, a Bio-diversity Net Gain calculation using the DEFRA Biodiversity Metric 2.0 was undertaken to assess the measurable gains and losses for biodiversity for the proposed development. The metric returned a significant gain of 11.72% habitat units and a gain of 175.75% hedgerow units post-development.

It is also important to note that the Council published an updated Landscape Character Assessment in October 2022 (produced by LUC). It described the wider landscape as being rural and tranquil, but clearly acknowledged that there is some light pollution, urban influence and reduced tranquillity to the east towards Sholden and by the A258 Sandwich Road. That is relevant to the consideration of this site and its suitability for development.

At the time of writing these representations to the Regulation 19 LDP consultation, an independent review of the submitted LVIA had been completed on behalf of DDC. The independent review by HDA Landscape Architecture has not undertaken its own assessment but has concluded that the Illustrative Layout would result in visual harm and the layout is not considered to respond positively to the sensitivity of the site. It also asserts that the proposed development would breach the local ridgeline and encroach unacceptably down slope.

The response included a number of suggested amendments to reduce the visual harm, including an increased landscape buffer, pulling built development north so it aligns with the boundary for phase 1 and some additional mitigation planting on the western boundary.

Whilst Richborough disagree with the general conclusions of the independent review, in particularly the accuracy of the comments regarding the breach of the local ridgeline, it is still pursuing dialogue with the Council to discuss alternative development parameters.

Other Matters

There has been no objection, subject to financial contributions and/or suggested conditions, from other technical consultees as part of the application process, this includes the following matters:

- Flood risk and drainage from Lead Local Flood Authority (Kent County Council)
- Ecology from Natural England and Environment Agency
- Confirmation that foul water can be disposed of from Southern Water.
- Contaminated land, air quality and noise from DDC Environmental Health Officer
- Public Rights of Way, Education and Minerals and Waste from Kent County Council
- Contribution to secondary education requested by Education Authority
- Contribution to GP services requested from NHS Kent and Medway Group
- Designing out crime by Kent Constabulary.

Richborough are committed to bringing this sustainable site forward and have demonstrated the site's suitability and deliverability through the preparation and submission of an outline planning application, as well as through these representations. The site can deliver 155 dwellings and contribute to DDC's five year housing land supply to ensure needs are met. Representations made to Policy SP3 have demonstrated that Spatial Option C, which seeks to direct more development towards Deal is the most sustainable way of distributing development across the District. Significantly more development should be directed towards Deal where it can be accommodated sustainably.

The detail provided on the capacity of the local highway network and the landscape strategy devised for the Phase 2 site have demonstrated that the issues highlighted in the HELAA are capable of being overcome. Richborough is of the view that the HELAA should be amended to

	<p>acknowledge that a larger area of HELAA Parcel SHO002 is suitable for development and the Phase 2 site should be allocated within Table 2 of the Regulation 19 LDP for 155 dwellings.</p> <p>Benefits arising from the development of land can be summarised as:</p> <ul style="list-style-type: none"> • The provision of new high quality market housing in a sustainable location; • The provision of a policy compliant level of affordable housing in an area where there is unmet need; • The scheme would deliver formal/informal greenspace and play space for use by new and existing residents with its long-term management secured; • The development will improve connectivity and access to PRoWs; • The ecology of the site will be improved through the provision of new green infrastructure which will achieve a net gain in biodiversity; • Creation of employment opportunities through the construction phase of the development; • The proposed development will significantly increase the number of economically active residents, boosting income and local expenditure; • Increase in revenue for DDC through the New Homes Bonus and increased Council Tax receipts.
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The HELAA should be amended to acknowledge that a larger area of HELAA Parcel SHO002 is suitable for development and the Phase 2 site should be allocated within Table 4.2 of the Regulation 19 LDP for 155 dwellings.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>Richborough have a strong track record of promoting sites through the local plan system and believe they can assist the Inspector in exploring the issues with the most up to date information and therefore wish to participate orally in the EiP.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	In response to the updated traffic figures in the evidence base Kent Highways have accepted at last that the London Road/Manor Road operates well above capacity during peak hours and no further development can be considered that would add to traffic flows though that junction. It is accepted that there is no possible mitigation to increase capacity at that junction. That judgement indicates that there can be no more economic development in Deal during the plan period at least. KCC's Growth Without Gridlock document supports a north Deal access road which would resolve the issue but there is no indication that there has been any co-operation between DDC & KCC to pursue this issue.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	SP12 requires an additional clause committing to pursue a north Deal access road in co-operation with KCC and supporting development that would contribute to the cost of its construction including employment land, none of which has been allocated to Deal in this plan
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To clarify what is required if there is any uncertainty from the written response and to rebut any argument against its inclusion.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Housing Site WAL002 Ray's Bottom Site</p> <p><i>DDC Note: Names and addresses (10) redacted from representation, including the name and address of the local Hawkesdown person who instructed Kingsley Smith Solicitors, and 9 neighbours who have all seen and previously approved the letter. The list will be available for the Inspector to view.</i></p> <p><u>Introduction</u></p> <p>Our client's made representations in 2021. The Regulation 22 report ['R22OR'] was devoid of any engagement with their analysis or concerns.</p> <p>The R22OR nevertheless proposed the allocation WAL002 claiming it is 'suitable', with 75 units. It is impossible to find any proper reasoning justifying that conclusion, despite it running to 2557 pages.</p> <p>This is to be contrasted with the deletion of far more appropriate alternative sites with fewer restrictions, GTM008 DEA017 DEA010 DEA011 DEA002 at Ellens Road ['Ellens Road'], which at the first consultation stage, the council had identified.</p> <p>The council's approach is unsound because it has not been positively prepared, it is unjustified and lacks consistency. To conclude that WAL002 is now "suitable" when it was concluded to be the opposite in 2013 raises further concerns. In 2013 there was express concern from environmental and highway safety perspectives. It is irrational to conclude that the previous highways and environmental harm is solved by dint of reducing</p>

the number of theoretical units, slightly. Such would not make any measurable difference to either of those highly material considerations that weighed against it in 2013.

When one compares the above with the Ellens Road sites (see attached map), where there is a notable lack of environmental or highway safety harm, the motive of the council and its reasoning must be political (at best), not based on sound planning assessment required by NPPF.

The essential requirements for soundness remained unchanged throughout the period described above, 2013-2022. The facts and circumstances on the ground for both sites are unchanged.

Our clients wish to take part in the hearing (oral) session(s) because they wish the inspector to hear their case why there must be investigation/reconsideration regarding the above concerns. They will instruct an expert to attend those sessions to assist the inspector and put their case.

-

As matters stand, the assertion that WAL002 is suitable is unjustified, impossible to square with what the public see or have read in the past analysis from the council. They would not consider it plausible for the council to say it is "brown field". It cannot be described as that; the Site is part of a very large arable field in this beautiful rolling Down landscape, with nothing but an imaginary line on a map to demark it from/within that wide open landscape.

However, there is far more to this Site in planning terms which discounts it from being a new housing allocation than the flawed Brown Field Register.

Site function/NPPF key aims

From any public standpoint, it is a crucial part of a "green wedge". The Freedown on the opposite side of Liverpool Road is well used open space, designated on the town map, plus it is a non-designated heritage asset. The council recognises The Freedown's importance to public amenity. Its setting is crucial to its significance.

The Freedown forms the East side of this narrow Down valley, the Site forming the West side.

To compromise The Freedown will cause serious heritage, ecological and landscape harm as follows:

In heritage terms The Freedown incorporates the WW1 Walmer airfield. The Council commemorates the fallen here, a marvellous elevated place with commanding views not just over the Channel, but with Walmer Castle below and the Down to the West principally formed by the Site.

Visually the Site is also an integral part of a beautiful rolling Down landscape, in marked contrast to the urban confines that are found to its North and West. The homes to the West are beyond the ridge, not within this unspoilt small Down valley, with Liverpool Road at the bottom, rising up to the WW1 Walmer airfield on The Freedown to the East. The narrowness of this Down valley at this point is acute. It demarks a gateway to Walmer/Deal. Its qualities delight the senses. Its **beauty** must be protected, key to the **social objectives** of the planning system and "**fundamental**" to what the planning and development process should achieve (see NPPF consultation draft).

The Site also performs a key **environmental** function separating Deal (of which Walmer is part) from Kingsdown, which if eroded, on the council's current approach, would signal the council is encouraging intrusion into this beautiful landscape. NPPF until 2019 from its inception, and PPG

	<p>prior to that, gave significant weight to protection of the countryside for its own sake (see for example paragraph 170b NPPF 2019). The Ministerial error of its omission is being addressed now, with the Ministry consulting upon, and set to introduce, a far higher policy test than existed up to 2019, thanks to the January 2020 Building Better, Building Beautiful Commission “<i>Living with Beauty</i>” report. This tells us to “<i>ask for beauty</i>” and “<i>refuse ugliness</i>”. Our clients ask that now. It not merely chimes with the findings of the Walmer Design Statement of 2006, nor is Beauty being merely reinstated from the previous NPPF position - it will be fundamental to sustainable development as defined before the Plan is adopted.</p> <p>The KWT comment underestimated the ornithological foraging value of the Site in contrast to the low value of the farmland to the south. The previously submitted reports were ignored in the R22OR. In this narrow valley the tree covered hillside of The Freedown provides protective cover for foraging birds on the Site that are absent from the more open farmland to the South of the Site. This confirms it is irreplaceable ecological value in planning terms, functionally linked to the adjoining SPA, copper-bottoming its importance in NPPF terms. The unexplained serious flooding of the adjacent homes north of the Site is believed to be sourced to it being the edge of a dry riverbed from Guston to Walmer Castle water meadow.</p> <p>Accordingly, the Site must not be allocated, but protected from development, the discounted Ellens Road sites reallocated. DEA010 had been previously deemed suitable with no logical difference. It has the same highway demarcation, similar distance to St Richards Road, all that area lying between them partly built up already and be consistent with what is now site SAP14 on the R22OR map and in the text. It and Ellens Road would bring a comparable, indeed larger supply of homes compared to the WAL002/Site, without any material harm - no heritage harm, no ecological harm, limited landscape harm (see past analysis, extract attached). Moreover, it can be phased, resulting in a logical urban extension rather than the current piecemeal position shown on the consultation map and avoid the ‘floodgate’ risk presented by releasing the Site.</p> <p>Accordingly, in terms of the remaining Framework dimension, the economic case firmly tips against the Site as less harmful and much better alternatives exists. It would be “Unsound” to leave the Site shown as an allocation – it is as clear as that in ‘place’ and ‘plan’ making terms, Ellens Road should be substituted.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Housing Site WAL002 Ray's Bottom Site</p> <p>DDC Note: Names and addresses (10) redacted from representation, including the name and address of the local Hawkesdown person who instructed Kingsley Smith Solicitors, and 9 neighbours who have all seen and previously approved the letter. The list will be available for the Inspector to view.</p> <p><u>Introduction</u></p> <p>Our client's made representations in 2021. The Regulation 22 report ['R22OR'] was devoid of any engagement with their analysis or concerns.</p> <p>The R22OR nevertheless proposed the allocation WAL002 claiming it is 'suitable', with 75 units. It is impossible to find any proper reasoning justifying that conclusion, despite it running to 2557 pages.</p> <p>This is to be contrasted with the deletion of far more appropriate alternative sites with fewer restrictions, GTM008 DEA017 DEA010 DEA011 DEA002 at Ellens Road ['Ellens Road'], which at the first consultation stage, the council had identified.</p> <p>The council's approach is unsound because it has not been positively prepared, it is unjustified and lacks consistency. To conclude that WAL002 is now "suitable" when it was concluded to be the opposite in 2013 raises further concerns. In 2013 there was express concern from environmental and highway safety perspectives. It is irrational to conclude that the previous highways and environmental harm is solved by dint of reducing the number of theoretical units, slightly. Such would not make any measurable difference to either of those highly material considerations that weighed against it in 2013.</p> <p>When one compares the above with the Ellens Road sites (see attached map), where there is a notable lack of environmental or highway safety harm, the motive of the council and its reasoning must be political (at best), not based on sound planning assessment required by NPPF.</p>

The essential requirements for soundness remained unchanged throughout the period described above, 2013-2022. The facts and circumstances on the ground for both sites are unchanged.

Our clients wish to take part in the hearing (oral) session(s) because they wish the inspector to hear their case why there must be investigation/reconsideration regarding the above concerns. They will instruct an expert to attend those sessions to assist the inspector and put their case.

-

As matters stand, the assertion that WAL002 is suitable is unjustified, impossible to square with what the public see or have read in the past analysis from the council. They would not consider it plausible for the council to say it is "brown field". It cannot be described as that; the Site is part of a very large arable field in this beautiful rolling Down landscape, with nothing but an imaginary line on a map to demark it from/within that wide open landscape.

However, there is far more to this Site in planning terms which discounts it from being a new housing allocation than the flawed Brown Field Register.

Site function/NPPF key aims

From any public standpoint, it is a crucial part of a "green wedge". The Freedown on the opposite side of Liverpool Road is well used open space, designated on the town map, plus it is a non-designated heritage asset. The council recognises The Freedown's importance to public amenity. Its setting is crucial to its significance.

The Freedown forms the East side of this narrow Down valley, the Site forming the West side.

To compromise The Freedown will cause serious heritage, ecological and landscape harm as follows:

In heritage terms The Freedown incorporates the WW1 Walmer airfield. The Council commemorates the fallen here, a marvellous elevated place with commanding views not just over the Channel, but with Walmer Castle below and the Down to the West principally formed by the Site.

Visually the Site is also an integral part of a beautiful rolling Down landscape, in marked contrast to the urban confines that are found to its North and West. The homes to the West are beyond the ridge, not within this unspoilt small Down valley, with Liverpool Road at the bottom, rising up to the WW1 Walmer airfield on The Freedown to the East. The narrowness of this Down valley at this point is acute. It demarks a gateway to Walmer/Deal. Its qualities delight the senses. Its **beauty** must be protected, key to the **social objectives** of the planning system and "**fundamental**" to what the planning and development process should achieve (see NPPF consultation draft).

The Site also performs a key **environmental** function separating Deal (of which Walmer is part) from Kingsdown, which if eroded, on the council's current approach, would signal the council is encouraging intrusion into this beautiful landscape. NPPF until 2019 from its inception, and PPG prior to that, gave significant weight to protection of the countryside for its own sake (see for example paragraph 170b NPPF 2019). The Ministerial error of its omission is being addressed now, with the Ministry consulting upon, and set to introduce, a far higher policy test than existed up to 2019, thanks to the January 2020 Building Better, Building Beautiful Commission "*Living with Beauty*" report. This tells us to "*ask for beauty*" and "*refuse ugliness*". Our clients ask that now. It not merely chimes with the findings of the Walmer Design Statement of 2006, nor is Beauty being merely reinstated from the previous NPPF position - it will be fundamental to sustainable development as defined before the Plan is adopted.

	<p>The KWT comment underestimated the ornithological foraging value of the Site in contrast to the low value of the farmland to the south. The previously submitted reports were ignored in the R22OR. In this narrow valley the tree covered hillside of The Freedom provides protective cover for foraging birds on the Site that are absent from the more open farmland to the South of the Site. This confirms it is irreplaceable ecological value in planning terms, functionally linked to the adjoining SPA, copper-bottoming its importance in NPPF terms. The unexplained serious flooding of the adjacent homes north of the Site is believed to be sourced to it being the edge of a dry riverbed from Guston to Walmer Castle water meadow.</p> <p>Accordingly, the Site must not be allocated, but protected from development, the discounted Ellens Road sites reallocated. DEA010 had been previously deemed suitable with no logical difference. It has the same highway demarcation, similar distance to St Richards Road, all that area lying between them partly built up already and be consistent with what is now site SAP14 on the R22OR map and in the text. It and Ellens Road would bring a comparable, indeed larger supply of homes compared to the WAL002/Site, without any material harm - no heritage harm, no ecological harm, limited landscape harm (see past analysis, extract attached). Moreover, it can be phased, resulting in a logical urban extension rather than the current piecemeal position shown on the consultation map and avoid the 'floodgate' risk presented by releasing the Site.</p> <p>Accordingly, in terms of the remaining Framework dimension, the economic case firmly tips against the Site as less harmful and much better alternatives exists. It would be "Unsound" to leave the Site shown as an allocation – it is as clear as that in 'place' and 'plan' making terms, Ellens Road should be substituted.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Housing Site WAL002 Ray's Bottom Site should not be allocated and instead GTM008 DEA017 DEA010 DEA011 DEA002 at Ellens Road should be substituted.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>Our clients wish to take part in the hearing (oral) session(s) because they wish the inspector to hear their case why there must be investigation/reconsideration regarding the above concerns. They will instruct an expert to attend those sessions to assist the inspector and put their case.</p>

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>(DDC Note - Text has been extracted from PFD document sent by Kent Planning Consultancy. Images that accompany this text can be seen within the Full Document Attached to on SDLP1240 Text has also been extracted and split across relevant places within the Local Plan and SDLP 1240 will be referenced.) New Site: Land at the junction of the Street and Broad Lane, Finglesham, Kent, CT14 0LZ</p> <p>1.0 INTRODUCTION</p> <p>This submission has been prepared and made by Kent Planning Consultancy with a view to highlighting and promoting the development potential for a residential development at 'Land at The Street/Broad Street, Finglesham, Kent, CT14 0LZ' hereon referred to as 'the site'.</p> <p>The site forms the land formally occupied by the White Horse Beer House, prior to its being destroyed by fire in 1982.</p> <p>It is accepted that the Call for Sites period has passed with regards to the Local Plan, however, with the wider strategy for the Regulation 19 document including a limited amount of sustainable growth within and abutting existing settlements, Kent Planning Consultancy wish to take this opportunity to highlight the above site as a potential small addition to the Local Plan.</p> <p>This response also considers and takes into account the relevant draft policies within the Local Plan Regulation 19 document, to identify how the site would comply with the Plan.</p> <p>In all, the site is considered to be in a sustainable location, offers the opportunity to re-utilise an existing area of brownfield land, and crucially, offers the potential benefit of enhancing and strengthening the village entrance to Finglesham.</p> <p>With an estimated capacity, with good quality design, to provide 8-10 units, Kent Planning Consultancy recommend that the site provides a good opportunity for the Council to re-enforce its proposed housing supply with a small, sustainable site allocation.</p> <p>Included within this submission is commentary of draft Policy SP4 - Residential Windfall Development, and our suggested amendments.</p> <p>2.0. SITE LOCATION AND DESCRIPTION</p>

The site subject to this submission is located on the corner of The Street and Broad Street, Finglesham.

The site is located at the southern village entrance to Finglesham, on The Street, although it is considered to be outside of the village envelop in its current form.

Broad Lane, heading east-west, is accessed by the Sandwich Road to the north, and heads west towards the settlement of Betteshanger.

The site forms, therefore, a potential entrance point for both settlements, most substantially Finglesham.

The site was once the site of a local Beer House, likely used by miners and villagers. The Beer House was destroyed by fire in 1982, and the site has remained in a vacant state ever since.

The site currently contains a large area of handstanding, overgrowth, and a handful of trees.

4.0 DEVELOPMENT POTENTIAL

Kent Planning Consultancy have made this submission with a view to promoting the site for residential development.

The site has an area of approximately 0.4ha, and Kent Planning Consultancy are of the view that the site could accommodate in the region of **8-10 dwellings (~20dph)**, open space, and landscape buffers.

Alongside this submission a plan has been developed to identify key aspects of any future allocation including a guide on the provision of open space, building densities, parcels and heights.

Any future proposal would seek to provide well spaced dwellings at an appropriate density to reflect their relatively rural location, and enable a greater sense of place and arrival at the junction.

Prior to, or alongside, any future application there could be a Landscape Visual Impact Assessment produced to identify the suitability of key views into and out of the site, and detail levels of additional planting required to soften any perceived visual impact where necessary.

5.0 PLANNING REVIEW

Key Planning Constraints

The site is located partially within Flood Zones 2 and 3 within its north-western edge, whilst the remainder of the site is situated outside of these designations.

The site is however raised above the surrounding land and road level, and as such, it is considered unlikely to flood. Further evidence could be provided in the future.

Otherwise, the site is outside of the existing defined settlements boundaries of Finglesham and Betteshanger.

Site History

The site is currently an area of mixed shrub and scrub planting, with the remnants of an existing building, bar a few foundations and the driveway, largely removed or reclaimed.

Reviewing the information available, it would appear that the building on the site was a Beer

House, known as the White House:

[http://www.dover-kent.com/2015-project/](http://www.dover-kent.com/2015-project/White-Horse-Broad-Lane-Finglesham.html)

White-Horse-Broad-Lane-Finglesham.html which closed in 1982, following a disastrous fire. Imagery from Google Earth provides evidence of the sites historic built form. Aerial Images

are provided below:

Image unavailable please see attachment.

1940 Google Earth (KCC)

Image unavailable please see attachment.

1960 Google Earth (KCC)

Image unavailable please see attachment.

The below map from between 1929 and 1952 identifies the building:

Image unavailable please see attachment.

1929-1955 (KCC Heritage)

Aerial imagery also identifies that the building had been removed towards the end of the Century, and by 1990 the site was entirely cleared:

Image unavailable please see attachment.

1990 Google Earth (KCC)

Since then, the site has been through a series of overgrowth and clearance, although no development has taken place since.

The site now contains a number of trees, although they appear to be of little value.

Otherwise, hardstanding remains.

The below Google Street View imagery shows the site remains a picture of abandonment:

Image unavailable please see attachment.

Google Street View 2016

Principle of Development

The site is currently located outside of a defined settlement boundary, and thus would likely be considered countryside.

The new Draft Local Plan Reg 19 identifies Finglesham as:

Small settlements with few facilities where windfall infill development would be acceptable in principle.

The Local Plan also accepts that Finglesham has few local services.

Part 3 of the Draft policy SP4 reads:

1 *New dwellings (both isolated and non-isolated) elsewhere in the countryside outside of settlement boundaries will only be permitted in exceptional circumstances under one or more of the criteria i) to v), and subject to meeting criteria a) to k) above (Not included by KPC):*

1 *i) there is an essential need for a rural worker, including those taking majority control of a farm business, to live permanently at or near their place of work in the countryside;*

1 ii) the development would represent the optimal viable use of a heritage asset or would be appropriate enabling development to secure the future of heritage assets;
iii) the development would re-use redundant or disused buildings and enhance its immediate setting;

1 iv) the development would involve the subdivision of an existing residential building;
or

1 v) the design is of exceptional quality, in that it: - is truly outstanding, reflecting the highest standards in architecture, and would help to raise standards of design more generally in rural areas; and - would significantly enhance its immediate setting, and be sensitive to the defining characteristics of the local area.

This is broadly in line with the NPPF, which permits development in the countryside in these circumstances.

It is our view that the site represents a brownfield site which still acts as a source of visual detraction from the local environment, and is prominently located at the entrance to Finglesham.

Reviewing the other initial tests of draft policy SP4, the site is considered as being broadly in accordance with the policy, in the following ways:

1 a) It is of a scale that is appropriate to the size of the settlement and the range of services and community facilities that serve it, taking account of the cumulative impact of any allocated sites and committed development;

A ten unit development in this location would be proportionate to the settlement on Finglesham.

1 b) It is compatible with the layout, density, fabric and appearance of the existing settlement and individually or cumulatively, would not result in the coalescence or merging of two (or more) separate settlements, or the significant erosion of a gap between settlements, so as to result in the loss of individual settlement identity or character;

The site would not. The site could act as a feature entrance to Finglesham, whilst retaining a substantial gap between Finglesham and Betteshanger.

1 c) In the case of settlements in, adjoining or surrounded by, the Kent Downs AONB or Heritage Coasts, that the proposal complies in the first instance with the primary requirement of conserving and enhancing landscape and scenic beauty, and, where this is demonstrated, that the scale and extent of development is limited, sensitively located and designed to avoid or minimise adverse impacts on these designated landscapes;

The site is not considered to be within a sensitive landscape.

1 d) It would conserve and enhance landscape character and biodiversity and not result in an unacceptable intrusion into the open countryside or the loss of, important green spaces within the confines that contribute positively to the existing character of that

settlement;

Any development on the site would not be of a detriment to the overall character of the area, which is to act as the entrance to Finglesham village. The site does not contribute significantly to a broader sense of openness within the area. Any new development on the site could act to enhance sense of place.

- 1 e) It would preserve or enhance any heritage assets within its setting; No heritage assets would be impacted.
- 2 f) It would not result in the significant loss of best and most versatile agricultural land

currently used for agriculture;

It would not.

- 1 g) Where the site adjoins open countryside, an appropriately designed landscape buffer is included;

Existing trees on the southern and western boundaries could screen the site from the more open landscape; these could be substantially reinforced.

- 1 h) It would not have an adverse impact on the living conditions of existing adjoining residents;

Suitable design could avoid this.

- 1 i) Where development would result in the loss of active employment, open space, sport or community facilities within the settlement that such development is consistent with the requirements of policies EN2, PM5 and PM6 of this Plan;

The proposal would not.

- 1 j) Traffic movements generated from the development do not result in severe impacts to the highway network that cannot be mitigated. This should be considered through transport assessments carried out in accordance with Policy T12 which must take account of the cumulative impact of sites allocated for development. Proposals must not prejudice the ability of sites allocated for development to come forward due to limited highway capacity; and

The addition of ten units in this area would not have an impact on any known highway traffic spots. However, of substantial benefit is the sites location next to the Bus Route 81 and 81X stop at the junction of Broad Lane and The Street (Ref. 68MX+7P Deal).

- 1 k) It would be in accordance with all other relevant policies in the Plan

It is considered there the proposal would be in accordance with other aspects of the plan, or could be designed so as to be, in matters such as landscape impact, biodiversity, highways, parking, etc.

Given that the site is considered to meet the tests of the proposed local policy, Kent Planning Consultancy advance that the site could assist the Council in meeting local housing need in a sustainable manner, through a minor expansion of an existing settlement.

6.0 POLICY REVIEW

SP4 - Residential Windfall Development

Kent Planning Consultancy broadly support the provision of policy SP4 'Residential Windfall

Development' with regards to windfall development, but consider that the policy should also include a broader provision for brownfield, or previously developed land where this may not fall inside existing settlement boundaries.

Dover District, particularly around Deal and its hinterlands, have a number of small, brownfield sites, often associated with historic mining activity, that should not be excluded from the opportunity to re-development on the basis of their location within the countryside.

There will, on occasion, be sites suitable for redevelopment that may not always have substantial remnants of development, such as the one subject to this submission, but where their redevelopment would represent a benefit to the wider sense of place, and, where they are of little other value to the countryside (in that they are not agricultural land), and offer little to a sense of place, or even a detraction.

Given such examples, we recommend that policy be amended to be sufficiently flexible to allow for the delivery of historically developed sites outside of development boundaries, where this would not otherwise conflict with the aims of the preservation of the countryside. We believe our site represents a perfect example of this.

To aid, we consider that the most appropriate amendment should be to SP4 3iii) to read:

*iii) the development would re-use redundant, disused buildings, **previously developed land, or land subject to historic development** and enhance its immediate setting;*

7.0 CONCLUSION

This submission has been prepared and made by Kent Planning Consultancy with a view to highlighting and promoting the development potential for a residential development at **'Land at The Street/Broad Street, Finglesham, Kent, CT14 0LZ'**

The site is considered to be in a sustainable location, offers the opportunity to re-utilise an existing area of brownfield land, and crucially, offers the potential benefit of enhancing and strengthening the village entrance to Finglesham.

The site is broadly in accordance with the requirements of emerging policy SP4, identifying clear that the site follows the broad plans and parameters for growth the Council has identified.

With an estimated capacity, with good quality design, to provide **8-10 units**, Kent Planning Consultancy recommend that the site provides a good opportunity for the Council to re-enforce its proposed housing supply with a small, sustainable site allocation.

Kent Planning Consultancy thus request that the Council consider this late submission for the Local Plan as a potential opportunity to provide a small, sustainable, site within the Local Plan.

Further, KPC believe that, in light of sites such as that subject to this submission, policy SP4 should be amended to include a greater flexibility, particularly with regards to land subject to a historic use, and previously developed land, where this is outside of the defined settlement boundaries but would not undermine the general aims of protecting the

	countryside.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>1.1.4 Gladman Developments have land interests in Dover and support the inclusion of SAP 14 - Land off Cross Road (DEA008) and Policy SAP46 - Land adjacent Langdon Court Bungalow, The Street, East Langdon (LAN003) as allocations for residential development. This representation provides additional information regarding the suitability and deliverability of these sites to support their continued inclusion.</p> <p>1.1.5 However, Land at Cross Road (DEA020) has been removed from the plan, with the only explanation offered being that the site already has permission (Dover DC Application reference: 20/01125). Gladman disagree with this approach and consider that the site should be recognised in the Local Plan as either an allocation or committed development. The site is not currently included on the Policies Map as either committed or future development, nor through the redrawing of the settlement boundary.</p> <p>Land off Cross Road, Deal (DEA020)</p> <p>4.3.12 Land off Cross Road, Deal (DEA020) has been removed from the draft Local Plan as it already has outline planning permission. The site was granted outline planning permission on the 17th February 2021 under application number 20/01125 for the erection of up to 100 dwellings (with landscaping, appearance, layout, and scale to be reserved).</p> <p>4.3.13 While Gladman welcome the acknowledgement of the site's planning status, we consider that the site should still be included as an allocation or referenced clearly as a committed development site. The Policies Map as drafted does not identify that any development in this area is permitted, committed, or allocated and this is misleading. The settlement boundary has also not been amended to reflect this planning permission.</p> <p>4.3.14 Gladman contend that the site should be included as an allocation to safeguard the site's ability to deliver sustainable development. At minimum, the committed development sites should be clearly listed within the Local Plan and illustrated on the Policies Map so that the spatial strategy and locations for development are robust, clear and provide an accurate portrayal of expected land use.</p> <p>(DDC Note - Text Extracted from Document sent from Gladman Developments Ltd. Full attachment can be found under the introduction comment reference SDLP1192)</p>

REPRESENTATIONS TO THE DOVER DISTRICT LOCAL PLAN REGULATION 19

CONSULTATION IN RESPECT OF BETTESHANGER COUNTRY PARK: THE SEAHIVE, DEAL

This representation to the Dover District Local Plan (Regulation 19 Consultation) is made on behalf of our client, The SEAHIVE, who have submitted a planning application for The SEAHIVE, Holiday Pods and Hub at Betteshanger Country Park, Deal, (hereafter referred to as 'the site') validated 28th September 2022 and at the time of this submitted representation, awaiting decision from the Council (LPA Application Ref: 22/01158). A location plan is provided at Appendices 1 of this representation accordingly.

The SEAHIVE are delighted that the Draft Local Plan supports the tourism and visitor economy with proposed Policy E4 – Tourist Accommodation and Attractions. Support for visitor attractions across the District should be strongly supported, particularly of the high quality and unique nature of the SEAHIVE proposal, which would boost visitors to both the local and wider area and help to boost the number of overnight stays in the District, which is very low in relation to the numbers of people passing through the District. SEAHIVE considers that the Local Plan should be even more proactive than the position outlined in the draft Plan, through a corresponding development allocation for a visitor attraction on the Betteshanger Country Park.

The submitted planning application for this proposal (LPA Ref: 22/01158) sets out how the proposal is in total compliance and sync with the tourism objectives of the 'Destination White Cliffs Country – A Growth Strategy for Tourism and the Visitor Economy 2020 to 2030' as well as the Dover District Economic Growth Strategy. There is a clear demonstrated need for a unique tourism offering in Dover that can improve and diversify existing attractions in the District, support longer stays, dwell time and spending. Betteshanger Country Park is designated as Open Space and has already established itself as a destination offering visitor amenities and attractions in the form of a café/restaurant, Mining Museum, meeting space, cycle and pedestrian paths as well as holding large entertainment events throughout the year. The SEAHIVE would enable the site's community value, as well as tourism value, to be realised.

a. The SEAHIVE, Holiday Pods and Hub ('The site')

The SEAHIVE submitted a planning application for The SEAHIVE, Holiday Pods and Hub at Betteshanger Country Park, Deal ('the site') under the local planning authority reference 22/01158, which is currently awaiting decision from the Council. The application was submitted in 'full' and seeks permission for:

'Erection of a surfing lagoon and pools, hub building (to include café/restaurant/bar lounge, shop, hiring and changing facilities and multi-use space), 15 overnight holiday pods, learning hive, yoga studio, fitness/health and wellbeing facilities, bike/pumptrack and associated roads, paths, car and cycle parking, together with landscaping and necessary access works and associated site infrastructure'.

The site is located to the west of Deal at Betteshanger Country Park on the site of a former spoil tip of the former Betteshanger Colliery. The site is in a well located and sustainable location, with Deal situated approximately c 3 km south of the site where Deal station provides connections into London via Ashford International or Folkestone Central. Bus services into the town centre operate twice an hour, taking 10-15 minutes.

There are footpaths and cycle paths directly from the site leading onto Sandwich Road.

The planning application was informed by a series of technical reports and assessments covering matters including air quality and noise, arboriculture, archaeology, ecology, economic benefits, flood risk and drainage, geotechnical, heritage, land contamination, landscape and visual impact, and transport.

The proposals for the design of the buildings and lagoon will be unique and set a precedent for the highest quality rural architecture for a sports and recreational facility and have been informed by contextual analysis and environmental considerations. The proposals have set out to meet the aspirations of paragraph 126 of the NPPF in achieving the creation of high quality, beautiful and sustainable development, that will be acceptable to the community and a place they will enjoy.

The Economic Benefits Statement submitted as part of the application highlights the declining number of holiday trips to the District as well as the falling value of holiday trips. Both the 'Destination White Cliffs Country – A Growth Strategy for Tourism and the Visitor Economy 2020 to 2030' and the Dover Economic Growth Strategy target growth, investment and development in the District's tourism industry so that visitor experiences are improved and longer stays and higher spend are encouraged. The development proposal offers the opportunity to significantly boost the number of visitors to Deal and Dover, supporting the growing surf community in Kent, as well as attracting visitors from further afield.

There is a unique selling point to this sporting-led tourist attraction that will allow it to compete and differentiate itself from other destinations and complement the tourism offer both in the District and wider County.

The benefits associated with the delivery of the proposed development identify with the three dimensions of sustainable development, comprising economic, social and environmental, as set out in paragraph 8 of the NPPF. The proposed development will create employment opportunities of around 153 direct and a further 194 indirect construction jobs, 100 direct jobs on site during the peak season and support of around 45 to 74 net additional jobs across the South East. Around £14.2 million will be generated in construction GVA across the construction period and at the development site itself, £6 million could be generated in visitor spending with an additional £2 million from those overnight visits at the holiday pods.

Socially, there is an opportunity to engage people in outdoor physical activity that has proven to have positive health and well-being benefits. Working with local businesses, schools and communities, particularly directing efforts at those social groups who are disadvantaged will be possible under this proposal. The proposed development would enhance the existing open space and recreational offering of Betteshanger Country Park with a high quality sport activity that should be of significant community benefit to existing residents, as well as economic benefit in providing a valuable attraction to the District to encourage greater numbers of visitors to visit and stay in the District.

b. Amendment to Draft Policy E4 – Tourist Accommodation and Attractions to include an allocation for tourist attractions at Betteshanger Country Park

The Dover District Local Plan Regulation 19 supports the provision of new, improved, upgraded or extended accommodation and attractions in the District. The SEAHIVE is therefore supportive of the Draft Local Plan's positive approach to supporting new tourism accommodation and attractions in the District. However, it is considered that the Plan could and should be more positively prepared and more specific in its support for the SEAHIVE development at Betteshanger Country Park.

A site-specific allocation for SEAHIVE at Betteshanger Country Park would provide public support to the principle of SEAHIVE being located within the District in a highly suitable, accessible and sustainable location for the infrastructure. Betteshanger Country Park is best placed to accommodate the proposed development of this scale and type within the District, not only because of its proximity to Deal, but also because the land lies in Flood Zone 1, which is rare within the coastal parts of the District. The setting of the site within a 200-acre Country Park offers an opportunity for the management and enhancement of habitats.

Betteshanger Country Park already attracts people from the local area who are looking to use the existing cycle paths, walk the many trails or visit the recently delivered Mining Museum. The Country Park has also built a reputation for hosting a variety of public events such as shows, markets, competitions and sporting events, amongst many others. The addition of the surfing lagoon with a pump track, yoga hub, education hub and holiday pods would accentuate the value of the Country Park as a visitor destination however, as well as a recreational resource of high community value.

Chapter 6 of the NPPF concerns building a strong, competitive economy and Para 81 outlines how planning policies should help build strong and competitive economies where businesses can invest. The allocation of the SEAHIVE at Betteshanger Country Park would create a more positive and proactive Plan that supports innovative and unique proposals such as SEAHIVE and increases the likelihood of important new tourism infrastructure being delivered through a Plan allocation.

c. Conclusion

The SEAHIVE supports in principle a positively prepared, justified, effective, consistent and sound Dover Local Plan and considers there to be much to commend with the existing draft Plan. While SEAHIVE supports the inclusion of a policy that directly targets tourism accommodation and attractions in the District, the Plan could and should be more positively prepared through the allocation of the subject site of Betteshanger Country Park for the SEAHIVE visitor attraction, to cement the Country Park as a unique visitor destination for the District and support the District's economy in the following ways:

- Deliver a unique, innovative and inspiring visitor attraction, setting the precedence for the highest quality rural architecture seen anywhere for a sports and recreational facility;*
- Generate significant economic benefits for the local and regional area, supporting the aspirations established in the 'Destination White Cliffs Country – A Growth Strategy for Tourism and the Visitor Economy 2020 to 2030' and the Dover District Economic Growth Strategy for longer stays, dwell time and spending;*
- Engage people in outdoor physical activity that has proven health and wellbeing benefits.*

The SEAHIVE would welcome the opportunity to participate in the forthcoming Examination-in-Public into the Plan and contribute to the debate to ensure a sound and high quality Local Plan for the District to be delivered.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	The SEAHIVE is a developer with land interest in the District, who has an important role in delivering the Plan strategy

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Deal
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

Background and Main Issue

The land was rejected by DDC in 2013 as “unsuitable for housing development,”

This being principally due to the lack of “...transports assessments and Plans..” as required by NPPF (National Planning Policy Framework) 2012 regulations, prior to Allocation status being considered.

Consequently the site was not carried through to the 2014 Draft Plan

This stipulation is repeated in the NPPF July 2021 version.

Notwithstanding the same environmental issues remain as those of 2013, DDC intentions in 2022

are to forward this land into the Draft Local Plan. This rejects the NPPF policies for assessments and reports being available, prior to consideration being given to the classification of suitable development land.

The contradiction and/or an omission of a previously established doubt of suitable development status, is of significant material consideration within the NPPF criteria for defining land availability.

Reasons for Objection

Material supporting facts

*The 2012 March version of the NPPF, Item 17 Core Planning Proposals required that:- “Plans shouldset out a clear strategy for allocating sufficient land which is suitable for development...”

*The 2021 July version of the NPPF in “Identifying land for homes” –item 68 requires that:-

“Strategic policy-making authorities should have a clear understanding of the land available

and

, “...planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely viability.....”

Submission 1

1.1 The similarity and purpose of the two NPPF versions is unquestionable.

Environmental assessment reports and plans have to be available to Local Authorities before consideration of allocation for suitable development.

1

DDC SAP15 requirements for development gives clear indication that none exist at the present time.

1.2 Without these assessment reports and plans, DDC SAP 15 proposals are speculative.

1.3 There is an undeniable doubt that this site may not be suitable for development.

There is no “...clear understanding of the land being available,” nor of its “... suitability or viability.” .

1.4 In 2021 WAL002 was, with caution, classified as being “potentially suitable” for development, but none the less in 2022 “available” without evidence of assessments or plans

NPPF policies do not permit DDC to speculate for the purpose of meeting development targets.

Submission 2

Traffic impacts –matters of fact

The DDC conformed with the 2012 NPPF requirements for assessments and plans to be available before consideration being given to allocation.

DDC Allocation report 2013, page 129 Appendix A

The DDC categorised this site in the unequivocal statements whereby “The site analysis form demonstrates that in principle, the site is not suitable for residential development due to the possible traffic impacts on the wider road network”

And

“The site is considered to be unsuitable for residential development and should not be allocated in the pre-submission local plan”

And

DDC Allocation report 2013 page 192 conclusion Appendix B

“Without the relevant transports assessments and plans it would not be possible to allocate this land”

*SAP 15 Item (d)Road wideningshould be providedto Liverpool Road.....and where possible to Grams Road”

This uncertainty is unacceptable in terms of the NPPF requirement for “the need of a clear strategy”, “...a clear understanding, or “suitability or viability”..

DDC'S proposals are short on issues of implementation:-

a)A site visit reveals that no footpaths exist along this single track road.

For the road to be widened, to provide pedestrian and cycle interests, to the east there will be conflict with the established environmental restraints surrounding the castle, while that to the west may well involve compulsory appropriation of private property.

b)It is unacceptable to ignore, as does SAP15 (d):-

That whether traffic proceeds up the single track roads of Grams Road for 150m, or continues along Liverpool Road for 400m; road widening will either involve environmental issues to the east or those of compulsory purchase to the west.

2.1 DDC's compliance with NPPF 2012 item 17, negated development due to lack of Assessments and Plans

2.2 DDC is “Putting the cart before the horse”!

Without Assessments and Plans, DDC proposal SAP 15 does not comply with NPPF 2021 item 68.

Environmental status

Submission 3

No evidence of environmental difference, to that which existed in 2013, has been defined within the site’s location, or surrounding environs. While the environment may remain the same, the 40% increase in traffic over the last ten years, has inevitably increased the detrimental impact on the wider road network.

2

Housing density

Submission 4

Reference Appendix C, DDC Selection of the Site Allocation for the Regulation 19 Submission Local Plan, page 11.

The proposed reduction in housing numbers, so as to permit development:-

a)Is not a standalone issue-as is inferred.

b)Has no assessment reports and plans, as required in NPPF68, to displace the lack of “suitability” as DDC defined in 2013.

c)Ignores the necessity of the “...clear understanding of the site’s availability” as demanded of NPPF 68.

4.1 DDC may not dissemble NPPF 68 policies by the one issue of the site’s housing density.

Additionally the proposed area:-

d) Does not reflect the character of the surrounding area.

i)By overlaying the proposed area of development over that to the west, it will be seen that the comparable housing density of the latter is 25 units to that of the proposed 75 housing units.

ii)The character of the “surrounding area” is predominately one of open country.

4.2 The accredited impact of the proposed development is incorrect and misleading

Alternative sites

Submission 5

The Eastern side of Ellens Road offers far greater opportunity for development to conform to NPPF requirements of suitability; more especially access to the wider road network.

Site DEA010 was excluded from consideration as being “unsuitable” namely because:-

***Detrimental impact on the landscape**

Whereas:- WAL002 landscape exceeds this. It has a wooded boundary and open countryside.

***Limited accessibility**

Whereas:-DEA010 has access to two roads, compared to WAL002 DDC’s 2013 description, which has only a “narrow country lane”.

***Highways concern over cumulative impact of development in this location**

Ref:- WAL002 2013 see Appendix B, DDC conclusion “..without the relevant transports assessments and plans it would not be possible to allocate this land.”

This statement of fact far outweighs DEA010 “concern “

***Heritage concerns**

Likewise, the WAL002 site borders Henry V111 Castle land and the Freedown, significantly outweighing the undefined “concern” for that of DEA010.

Insufficient comparison has been given in allocating WAL002 and not DEAL010

Legal obligation

Submission6

Version 2021 NPPF Section 5 defines the legal obligation of Planning Authorities delivering a sufficient supply of suitable and sustainable housing.

This poses considerable pressure on those Authorities where suitable housing land targets are virtually unattainable.

Be that as it may, it does not excuse or permit DDC to breach NPPF policies in order to meet Government targets within the Draft Local Plan .

3

*Appendix A is evidence of the absence of assessments and plans in 2013.

*Appendix B details the 2013 existence of the unacceptable use of the road for further housing in the absence of such plans.

*Appendix D details the DDC meeting of 3rd January 2013 with Mr & Mrs Ellis of (DDC note - address redacted), whereby DDC “...no longer favoured..” this site’s development due to the “...narrow country lane...” and withdrew it prior to the Examination of the Local Plan in August 2013.(Mr Ellis died in 2020 and Mrs Ellis has moved away)

	<p>The exclusion/absence of the above and significant, negative information in SAP15, SA Objective 4 is indicative of a breach of DDC's legal obligation to provide purposeful consideration and comparison with other sites.</p> <p>Other matters Public objections It should be noted that in March 2021, 260 people submitted individual objections to this site being passed through to the Draft phase of the Local Plan.</p> <p>Conclusions 1)The DDC of 2022 has reneged on the commitment of 2013, which was not to consider a planning allocation of this site without the necessary Assessments and Plans. 2)The SAP15 conditions of approving the proposed development are fundamentally flawed by the 2013 DDC established restraint on development approval. 3) The 2021 NPPF item 68 requirement of "... a clear understanding of available land" is not achieved by DDC's speculation as to "possibilities". 4) DDS's SAP 15 reliance on speculation contravenes NPPF Section 5 which cites the Planning Obligations of "..... being able to deliver a sufficient supply of homes" within the period of the immerging Plan. 5)SAP 15 items d) and e) lack the realty of the financial restraints in achieving implementation and resolution of environmental issues. 6) The relevant legal obligation for factual information as to site comparisons in SA Objective 4(e-Transport assessments)has not been registered.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>*This is the omission site rep, SDLP1290 contains comments on SP4 and SDLP886 contains comments on SP3*</p> <p>Our client supports DDC's new Local Plan in principle, however our client objects to a component of the Plan, such that the Plan should be considered 'unsound'. It is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound'. These objections are set out in the consultation response submitted on behalf of Persimmon Homes South East (ref DHA/30289)</p> <p>1 Introduction</p> <p>1.1 Context</p> <p>1.1.1 This representation has been prepared by DHA Planning on behalf of Persimmon Homes South East in response to the Dover District Council 'DDC' Local Plan (Regulation 19) consultation which runs until 9th December 2022.</p> <p>1.1.2 We understand that DDC is in the process of preparing a new Local Plan to set out a strategy for development for the period to 2040 and that the Council are presently seeking comments on the pre-submission Plan prior to its submission for examination in early 2023.</p> <p>1.1.3 The new Local Plan will set out the vision, strategic objectives and overarching development strategy for the growth of the District over the period to 2040. It provides the planning policy framework to guide the future development of the area, addressing needs and opportunities for housing, the economy, community facilities and infrastructure, as well as the basis for conserving and enhancing the natural and historic environments, mitigating and adapting to climate change, and achieving well designed places.</p> <p>1.1.4 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. This submission will comment with reference to the above, highlighting where we believe any areas of concern lie or where modifications may be required.</p> <p>1.2 Purpose of this Representation</p> <p>1.2.1 Our client controls 'Land Golf Road, Deal' (hereafter referred to as 'Land at Golf Road' or 'the Site') and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site was submitted as an available, suitable and deliverable location for residential development with capacity for approximately 60 dwellings as part of the new Local Plan preparation, however the Site has not been taken forward within the Regulation 19 Pre- submission Plan.</p> <p>1.2.2 The purpose of this representation is to support DDC's new Local Plan in principle, however our client objects to a component of the Plan, such that the Plan should be considered 'unsound'. It is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound', in which the quantum of Plan-led housing delivery within Deal should be increased to accurately reflect its second tier settlement status. Our client considers that given historic strategic under delivery in the district and wider uncertainties in the planning system, the Council should sensibly demonstrate an oversupply of reliable, deliverable sites early in the Plan period to ensure sufficient flexibility in housing delivery, should extant permissions or larger allocated sites not come forward or deliver as anticipated.</p> <p>1.2.3 To be clear, Persimmon Homes South East support the premise of DDC's growth strategy, which includes further Plan-led development within Deal in line with its higher-order settlement status. However, we are concerned that DDC have planned at a significantly reduced level of growth in Deal, citing a dwindling supply of available land within and around the settlement. Consequently, the Plan fails to appropriately maximise the sustainable credentials of Deal and has resulted in a marginal supply of</p>

available, deliverable small and medium sites, insufficient to provide the flexibility in housing delivery that is required in accordance with national planning policy.

1.2.4 The Plan is predicated on the delivery of a major urban extension at Whitfield, Dover comprising a new community and a minimum of 2,200 homes within the Plan period. It is anticipated that Whitfield will deliver a significant quantum of new homes primarily towards the latter half of the forthcoming Plan period. Consequently, DDC must demonstrate a sufficient supply of reliable small and medium sizes sites capable of delivery early in the Plan period to ensure consistent housing delivery in accordance with national planning policy and Plan-making guidance.

1.2.5 This representation provides comment on the consistency of our client's proposed allocation site with the proposed strategy, draft policies and sets out our client's position in respect of the 'soundness' of the Plan. To reiterate, whilst our client is supportive of DDC's new Local Plan in principle, Persimmon Homes South East object to a component of the Plan, such that the Plan is considered 'unsound'. Our client is concerned that the growth strategy as drafted fails to fully maximise available sites within the higher order settlement of Deal and by extension, our client objects to the exclusion of Land at Golf Road within the Regulation 19 Local Plan.

1.2.6 Our client is also concerned that given the recent constraints to housing delivery associated with nutrient neutrality in East Kent, the historic under delivery previously experienced at Whitfield and the wider uncertainty within the planning system more generally, the growth strategy as drafted may not include sufficient small and medium sites to demonstrate the necessary flexibility should allocated sites not come forward or deliver as anticipated.

1.2.7 In this regard, our client remains wholly supportive of the premise of further residential development within Deal and agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole. However, it is submitted that Deal is capable of making a far greater contribution to the delivery of new homes within the forthcoming Plan period than drafted. In line with its higher-order status within the settlement hierarchy and excellent access to day-to-day services and amenities, it is put forward that Deal is wholly capable of delivery significantly greater than the 223 dwellings allocated.

1.2.8 For the reasons set out within this representation, we say that available and suitable sites do exist, including that of our client's Land at Golf Road, Deal capable of delivering logically located, highly sustainable new homes in accessible location early in the Plan period, sufficient to provide greater flexibility and assurance of steady and sustained housing delivery across the Plan period, balance the scale of delivery from strategic urban extensions and further assist in reducing the need to develop into more rural, typically less accessible and more sensitive locations within the district to otherwise deliver the growth that is required.

1.2.9 The inclusion of Golf Road, Deal would provide a medium sized site for the Council that could come forward quickly, complying with the Framework's requirement to provide a mix of sites and include specific sites for years 1-5 of the Plan period. Accordingly, we say that Land at Golf Road, Deal can further assist the Council in meeting the growing need for new homes in the district and is necessary to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full as well as delivering wider public benefits to the local community within Deal.

1.2.10 Based on the current national and local planning context, we consider the Site to be a highly suitable edge-of-settlement location to allocate land for housing to help meet the need for new homes in the district. Its effective use should therefore be appropriately maximised in accordance with national policy objectives.

1.2.11 Further details regarding the Site and commentary on the consistency of the Site with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan are set out in the following sections of this document.

1.3 About Persimmon Homes

1.3.1 Building over 13,500 beautifully-designed new homes a year in more than 350 prime locations nationwide, Persimmon is proud to be one of the UK's most successful housebuilders, committed to the highest standards of design, construction and service. As a reflection of their commitment to delivering excellence always and delivering great customer care, the Home Builder's Federation (HBF) have awarded Persimmon 5 stars. Persimmon have a track record of delivery, and have been building new homes for over 50 years. Local Authorities up and down the country rely on national-scale housebuilders to deliver significant quantities of new homes each year, to meet the ever growing demand for new housing. Persimmon Homes remains committed to building new houses in the Dover District area and has over the last few years been developing two sites in the district, one in Aylesham which is a joint venture with Barratt Homes and one in Deal.

1.3.2 Persimmon's approach is to work positively and proactively with local planning authorities (LPAs), both during the preparation of local plans and at planning application stage. Persimmon Homes South East are fully committed to engaging with Dover District Council in the preparation of its Local Plan, and firmly subscribe to the national policy approach set out in paragraphs 15 and 16 c) of the NPPF that "the planning system should be genuinely plan-led" and should be shaped by early, proportionate and effective engagement between LPAs and

others, including businesses and developers. Accordingly, Persimmon Homes South East would welcome the opportunity to discuss the matters contained in this representation, including the availability, suitability, deliverability and capacity of Land at Golf Road, Deal directly with Dover District Council members and officers, ahead of the submission of the Local Plan for examination.

1.4 Representation Structure

1.4.1 The representation structure is outlined below for ease of reference:

Chapter 2 (Housing Need) - Consideration of market and affordable housing need and assessment of proposed housing allocations and supply sources.

Chapter 3 (Assessment of Suitability) - Re-introduces our client's Site and provides a summary of planning constraints and opportunities, including the quantum of development that could be accommodated, why the Site is suitable for development and why the principle of the draft allocation for residential development is both justified and consistent with the Council's strategy for growth in the district. It also sets out why we consider there is scope for a higher number of dwellings at the site. This consideration amounts to an objection to one element of the strategy – namely that those sites around the most sustainable settlements should be maximised.

Chapter 4 (Conclusion) - Summarises the key points raised throughout the representation and re-affirms our client's support for the Site's allocation and proposed strategy ahead of the submission of the Plan for examination.

2 Housing Need

2.1 Context

2.1.1 Paragraph 11 of the NPPF is explicit in its requirement for strategic policy-making authorities to promote a sustainable pattern of development that seeks to meet the need in full.

2.1.2 Paragraph 20 of the Framework is equally clear that strategic policies should set out an overall strategy for the pattern, scale and design quality of places. Policies should make sufficient provision for the development that is required as well as associated infrastructure, community facilities and should set out a strategy for the conservation and enhancement of the natural, built and historic environment.

2.1.3 Given this national planning context, the emerging Local Plan should provide a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic environment.

2.1.4 National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate.

2.1.5 In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.

2.1.6 Paragraph 68 is clear in its requirement that strategic policy-making authorities should have a clear understanding of the land available in their area and should ensure that planning policies identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability. Planning policies should identify a supply of:

a) specific, deliverable sites for years one to five of the plan period

b) specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15 of the plan.

2.1.7 In this vein, paragraph 69 of the Framework goes on to stress that small and medium sized sites (such as that of our client's land at Golf Road) can make an important contribution to meeting the housing requirement of an area, and are often built-out relatively quickly.

2.1.8 Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.

2.2 DDC's Housing Need

2.2.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover

District of 596 dwellings per annum. However, the affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total minimum housing need of 10,998 dwellings for the Plan period to 2040. We understand that the Regulation 19 Local Plan seeks to meet this need in full and in addition to the minimum figures, DDC have a set a contingency buffer of 926 dwellings for the Plan period, equating to 8.4% of the total Plan period figure.

2.2.2 For context, the current adopted CS requirement is 700 dwellings per annum. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.

2.2.3 For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate sufficient land to accommodate a minimum of 6,642 new homes over the remaining plan period to 2040. It is understood that this will be derived from the following sources:

- Whitfield Urban Expansion Allocation: 2,200 dwellings
- Local Plan Allocations (excluding Whitfield): 3,392 dwellings
- Windfall Allowance (70 a year from year 4): 1,050 dwellings

2.2.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target. Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs AONB, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, meeting Dover's housing needs inevitably will require the release of significant greenfield land.

2.2.5 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan period, consistent with the overarching strategic objectives of draft policy SP3 within the emerging Plan.

2.2.6 Such sites are best placed to deliver the significant number of new homes that are required and are most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the District as well as further balancing the role of strategic- scale development at Whitfield within the emerging Plan's proposed growth pattern in the event that Whitfield or indeed any of the major allocations upon which DDC seek to rely to not come forward or do not deliver as anticipated.

2.2.7 On this basis, we set out below why our client's site Land at Golf Road, Deal is suitable to be included within the submission Dover Local Plan and is necessary for inclusion in order for DDC to demonstrate sufficient supply and flexibility within the early phase of the housing trajectory as required by national planning policy, such that the Plan may be considered 'sound'.

3 Site Specific Assessment

3.1 Overview

3.1.1 The previous chapters of this representation outline our client's position relating to the soundness of the Plan in which our client is confirmed to be supportive in principle of the Local Plan as a strategy for the growth of the district to 2040, however our client objects to a component of the Plan, such that the Plan should be considered 'unsound'. It is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound', in which the quantum of Plan-led housing delivery within Deal should be increased to accurately reflect its second tier settlement status.

3.1.2 Paragraph 4.146 of the Local Plan states that the urban area of Deal encompasses the built-up areas of the parishes of Walmer and Sholden. Deal is identified in the Settlement Hierarchy and Confines Topic Paper (2022) as a 'District Centre', where there is a secondary focus for development.

3.1.3 It is clear that Deal must continue to form a principal location for focusing sustainable housing delivery in Dover district and will assist in ensuring an appropriate balance of sites are identified, capable of supporting the strategic role of Whitfield within the forthcoming Plan Period and minimising the need for housing growth in typically less accessible and more sensitive rural settlement with limited development capacity.

3.1.4 As introduced in the preceding sections, our client controls 'Land Golf Road, Deal' and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site was submitted for residential development with capacity for approximately 60 units as part of the new Local Plan preparation, however the Site has not been taken forward within the Regulation 19 Pre-submission Plan.

3.1.5 Land at Golf Road represents an excellent opportunity for the delivery of approximately 60 high-quality new homes in a logical, highly accessible location in north Deal with capability to deliver a policy compliant quantum of much- needed affordable housing, a mix of house types, sizes and tenures and ability to make a significant contribution to wider public infrastructure through developer contributions. The land itself is of no particular ecological value and is in private ownership, offering limited public benefit. The Site is capable of delivering strong biodiversity net gain, attractive internal and boundary landscaping, open space, play facilities and a development pattern which facilitates pedestrian permeability and encourages active travel in north Deal.

3.1.6 Given the dwindling supply of available sites within the District and the growing housing need, it is imperative that the sustainable credentials of these higher- order settlement sites are appropriately maximised to deliver the housing that is required in accordance with the underlying

objectives of draft policy SP3, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and our client objects solely on the basis that the growth strategy component of the Plan as drafted is 'unsound'.

3.1.7 Consequently, our clients object to policy SP3 as drafted. On the basis that there is a clear need to maximise the delivery of housing sites within Deal, our clients consider the Plan 'unsound'. Our site, Land at Golf Road, Deal, has been excluded from the Plan primarily on flood risk grounds, without further consideration or detailed evidence; without acknowledging the presence of high-quality 1 in 200 year flood defences and without any regard to the prevalence of recent residential developments permitted nearby (having passed the Sequential and Exception test with Environment Agency support on flood risk). Additionally, we submit that the Site is capable of providing a residential development which would be safe for its lifetime, owing to the high-quality flood defences and on site mitigation measures.

3.1.8 The consequent omission of potentially circa 60 units, in our view fails to make effective use of Dover's second tier settlement and will otherwise require further new homes to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

3.1.9 Without prejudice to our client's support to the premise of the growth strategy, which primarily directs growth at higher order settlements, we would urge the Council to re-visit its growth strategy and proposed allocations to allow a greater quantum of development within Deal, by including suitable sites such as Land at Golf Road to fully reflect its excellent sustainability credentials and provide a pragmatic oversupply of reliable, deliverable small and medium sites capable of delivery early in the Plan period.

3.1.10 We submit that Deal is wholly capable of delivering significantly greater than the 223 dwellings allocated. We say that available and suitable sites do exist, including that of our client's Land at Golf Road, Deal which is being promoted by a national housebuilder fully committed to the Site and with an excellent track record of delivery.

3.1.11 It is put forward that Deal is capable of delivering further logically located, highly sustainable new homes in accessible locations early in the Plan period. An additional supply would; provide greater assurance of steady and sustained housing delivery across the Plan period, balance the scale of delivery from strategic urban extensions and, further assist in reducing the need to develop into more rural, less accessible and sensitive locations within the district to otherwise deliver the growth that is required.

3.1.12 We agree that Deal represents a logical and sustainable location to direct the growth required within the district and consider that the land promoted at Golf Road, Deal should be included as a future housing allocation within the Dover District emerging Local Plan. The Site is considered to be wholly consistent with the objectives of the Plan and would form part of a sound growth strategy for the district to 2040 whilst delivering policy compliant affordable homes, a mix of house types and tenures and wider ecological, landscape and public benefits.

3.1.13 Our client is firmly of the view that the allocation of additional housing sites is necessary to ensure that balanced growth strategy put forward within the Pre- submission Dover District Local Plan is 'sound', comprising an appropriate balance of small, medium and strategic-scale sites deliverable across the Plan period. The allocation of well-located, reliable, greenfield sites such as our client's at Land at Golf Road is necessary for DDC to meet the growing housing need. The Site is being promoted by Persimmon, a firmly committed national housebuilder with an excellent track record for delivery, and the inclusion of the Site would ensure that DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan in the event that identified sources of housing do not come forward or fail to deliver as anticipated.

3.2 Site and Surroundings

3.2.1 The Site is situated to the west of Golf Road, north of West Lea and west of the Fairway on the north-western edge of Deal.

Figure 3.1: Approximate Site Location (courtesy of Google Earth)

3.2.2 The Site comprises an undeveloped regular parcel of land in agricultural use totalling approximately 1.9 hectares. The site is bound by residential development on three sides which detached the site from the wider open countryside to the west. The Site is consequently characterised by its edge-of-settlement location with typical suburban residential development the predominant development pattern in the area.

3.2.3 In terms of overarching planning constraints, the site is not subject to any overarching landscape or ecological designations and is not itself subject to any heritage constraints. The site is located within defended Flood Zone 3, albeit this covers the majority of this part of north Deal which is subject to coastal flood defences.

3.2.4 In terms of accessibility, the Site enjoys excellent access to a number of day-to-day facilities and services which are within a reasonable walk distance, including primary and secondary schools, local shops, healthcare, employment, and public transport links within Deal and Walmer including Deal mainline station and frequent buses along Dover Road between Dover, Deal, Sandwich and Canterbury.

Consideration of Flood Risk

3.2.5 The site is located entirely within Flood Zone 3a as defined by the Environment Agency Flood Risk mapping.

3.2.6 Owing to its strategic nature, Deal is subject to significant coastal defences. These defences provide protection from coastal erosion as much as they do flooding, and are actively maintained, as part of a 'hold the line' policy in this Shoreline Management Plan area (SMP).

3.2.7 As part of the Deal Coastal Flood Defence Scheme (completed in 2013), a recurved concrete sea wall was constructed from Sandown Castle to Deal Castle. Beach renourishment provides an additional level of protection to this frontage.

3.2.8 The NPPF requires the actual risk of flooding to a development to be appraised. The actual risk considers the likelihood of flooding under extreme conditions (e.g. the design flood event), whilst considering the influence of any defence infrastructure, or drainage systems, which may provide a level of protection to the site. Given the presence of high-quality defences at Deal, it is evident that the actual risk of flooding under the design event is reduced, leaving only the residual risk, which falls outside of the scope of the NPPF and relates to extreme circumstances in the event the defences, or drainage system were to fail (i.e. due to a breach or a blockage), or if an event greater than the design flood event was to occur and overtop the defences.

3.2.9 The Strategic Flood Risk Assessment (2019) prepared by Herringtons Consulting is included within the DDC Local Plan Evidence Base and has identified that the coastal towns of Deal and Dover are protected from sea flooding under an extreme storm event with a 1 in 200 year return period (0.5% AEP) and the construction of the defence infrastructure has significantly reduced the actual risk of flooding at these coastal locations. The risk of coastal flooding to these two towns is therefore limited to a residual risk event only, which would require a catastrophic failure of the new defence infrastructure (e.g. a failure in the seawall).

3.2.10 On account of the above, we do not consider it appropriate for the Plan-led growth of north Deal to be automatically excluded on account of flood risk. DDC acknowledge that following high-levels of windfall development within the previous (adopted) Plan period, there are limited available and suitable sites for development within Deal and consequently have sought to reduce the level of Plan-led growth within the forthcoming Plan period, with a greater reliance on strategic development at Whitfield and alternative third tier settlements in response. Our client's disagree with this approach and object to the proposed growth strategy as an unsound basis on which to reliably deliver the growth that is required in the district.

3.2.11 Our client's site, Land at Golf Road, Deal is evidence that suitable small and medium sites are available in Deal and are being promoted for delivery early in the Plan period. It is accepted that sites such as that of our client's will be subject to Flood Risk Assessment and be required to pass both the Sequential and Exception tests.

3.2.12 Taking each test in turn, the Sequential Test is a risk-based test which aims to steer development to areas at the lowest risk of flooding. DDC already acknowledge that there is a dwindling supply of available sites in Deal. Moreover, we emphasise that two small sites within Deal have been allocated for residential development under policy SAP16 'Deal Small Housing Sites' (Ethelbert Road

Garages (5 units) and 104 Northwall Road, Deal (8 units). Both sites as shown in figure 3.2 below are in close proximity to our client's site. Both sites are in Flood Zone 3a and protected by the Deal coastal defences. Land at 104 Northwall Road is plainly highly comparable to our client's site and there appears no sound justification for the exclusion of Land at Golf Road on this basis. For the purposes of the Sequential Test, the allocation of sites within Flood Zone 3a is clear acknowledgment that sequentially preferable sites do not exist in Deal and some development within the defended flood zone is required in order to deliver the growth that is required.

Figure 3.2: Extract of Reg 19 Policies Map showing our client's site (red line) and proposed residential allocations (green shading). Flood Zone 3 shown in blue.

3.2.13 In addition to the Sequential Test, the Exception Test must also be passed which requires proposals to demonstrate

- a) the development would provide wider sustainability benefits to the community that outweigh the flood risk; and
- b) the development will be safe for its lifetime taking account of the vulnerability of its users, without increasing flood risk elsewhere, and, where possible, will reduce flood risk overall.

3.2.14 In this regard, the provision of the housing that is required, in addition to wider biodiversity, accessibility, open space and public infrastructure benefits is considered sufficient to outweigh the flood risk. With respect to (b), exact details would be provided as part of a detailed planning application, however in combination with the existing flood defences, it is anticipated that any future development could be subject to land level raising and all living and sleeping accommodation is proposed above the ground floor level, above the predicted design flood level. Further early flood warning systems, evacuation plans and a raised area of safe refuge could be included to ensure the development would be safe for its lifetime.

3.2.15 Further to the above, we note the following planning applications for residential development have also been permitted recently in north Deal, within Flood Zone

3a and without Environment Agency objection having passed both the Sequential and Exception tests without issue. Examples of granted planning applications within Flood Zone 3a include:

- 21/01233 – 17 Godwyn Road, Deal (1no. dwelling)
- 20/00341 – 269 Sandown Road, Deal (1no. dwelling)
- 20/00787 – Land adjacent 56 Golf Road, Deal (1no. dwelling)
- 19/00425 – Land rear of 92 & 94 Northwall Road, Deal (1no. dwelling)
- 15/00176 – Site at 90 Golf Road, Deal (2no. dwellings)
- 14/01211 – Land off Ark Lane, Deal (14no. dwellings)
- 14/00852 - 22 Harold Road, Deal (1no. dwelling)
- 13/00522 – Bede and Dunstan Houses, College Road, Deal (16no. dwellings)

3.3 Development Capacity

3.3.1 At this early stage, significant design work has not yet progressed. However, for the purposes of this representation, Land at Golf Road, Deal is submitted with capacity for approximately 60 residential dwellings (subject to detailed design and flood risk assessment) deliverable early in the Plan period.

3.3.2 The scale and nature of the Site is considered highly conducive to the delivery of a high-quality, landscape-led scheme capable of making a significant contribution to the delivery of market and affordable housing in a logically contained location that would assimilate with the existing pattern of development.

3.3.3 Land at Golf Road represents an excellent opportunity for the delivery of approximately 60 high-quality new homes in a logical, highly accessible location in north Deal with capability to deliver a policy compliant quantum of much-needed affordable housing, a mix of house types, sizes and tenures and ability to make significant developer contributions to support existing and future public infrastructure.

3.3.4 The land itself is of no particular ecological value and is in private ownership, offering limited public benefit. To the contrary, the Site is capable of delivering strong biodiversity net gain, attractive internal and boundary landscaping, opening up public access to open space, play facilities and a development pattern that facilitates pedestrian permeability and encourages active travel in north Deal.

3.3.5 Detailed proposals have not yet been advanced, however it is anticipated that any future development of the site will be of an appropriate density, reflecting the local character of development and responding to local needs for housing. Any future development will be sensitively designed to respect the existing character and materiality of the area, the topography of the site and to allow a positive transition to the rural landscape and respond to its coastal location.

3.3.6 It is acknowledged that the site is located within Flood Zone 3a, however this is true of the majority of north Deal which is nonetheless protected by coastal flood defences. Subject to detailed flood risk assessment and site layout design, for the reasons set out above, flood risk is not considered to represent an absolute constraint preventing the future development of the site.

3.3.7 Exact flood risk design details would be provided as part of a detailed planning application, however in combination with the existing flood defences, it is anticipated that any future development could be subject to land level raising and all living and sleeping accommodation is proposed above the ground floor level, above the predicted design flood level. Further early flood warning systems, evacuation plans and a raised area of safe refuge could be included to ensure the development would be safe for its lifetime.

3.3.8 Particular care will also be taken with regard to opportunities for biodiversity habitat creation and enhancement, publicly accessible open space and high-quality play space to serve the local community.

3.3.9 In terms of access, opportunities for safe, direct and convenient primary vehicular, pedestrian and cycle access are achievable onto the adopted highway. The Site will be capable of facilitating a permeable pattern of development in northwest Deal, providing convenient access for future and existing residents to a range of day-to-day facilities including grocery stores, medical facilities and Deal train station.

3.3.10 To be clear, our client agrees that Deal represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of available land within Deal can be made – and therefore object to policy SP3 'housing growth strategy' and the exclusion of Land at Golf Road on this basis.

3.3.11 Accordingly, we say that Land at Golf Road is not subject to any absolute development constraints and can further assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.

3.4 Strategic Justification for Development

Spatial Strategy

3.4.1 The proposed Housing Distribution for the district across the Plan period is established within Policy SP3 'Housing Growth' which sets out that the distribution of housing growth in the district is primarily based on the settlement hierarchy and influenced by site availability, environmental constraints and factors of delivery.

3.4.2 Rightly, a key aim of the growth strategy is to focus development in the least sensitive areas of the district in order to conserve and enhance the Dover's rich natural and historical environment.

3.4.3 A retained theme from the adopted Plan, is that DDC's settlement strategy continues to focus on the development and regeneration of Dover Town and Whitfield (3381 dwellings). Approximately half of the district's planned housing is in this location, the majority of which again is to come forward as part of the strategic urban expansion of Whitfield 'SAP1' (2200 minimum dwellings).

3.4.4 Development will then be focused in the District Centre of Deal (223 dwellings), and the Rural Service Centres of Sandwich (227 dwellings) and Aylesham (649 dwellings). Following the settlement hierarchy rigidly would distribute housing in the preceding order, however the Plan recognises that housing delivery in Deal and Sandwich continues to be constrained by a number of factors including flood risk, ecological designations, heritage and highways. Further, Deal has experienced generally high levels of windfall development across the previous Plan period and accordingly there is now a dwindling supply of available, suitable sites in both settlements. On account of this context, DDC have sought to direct the majority of the remaining higher order settlement growth (outside of Dover & Whitfield) to Aylesham, through the strategic expansion to the town.

3.4.5 Outside of the four principal district settlements, the Rural Settlement Hierarchy (August 2022) identified that the majority of lower-order settlements in the district emerge as having a low level of facilities within the hierarchy and six settlements having none of the key indicators of sustainable services. Plainly, these settlements offer very limited opportunities for growth and it is evident that the forthcoming Plan will be reliant on the settlements of Dover (including Whitfield), Deal, Sandwich and Aylesham to deliver the housing growth that is required.

3.4.6 Given this context, it is clear that where available and suitable opportunities for residential development do exist within the district's higher order settlements, such as our client's site Land at Golf Road, which can provide a policy compliant level of affordable housing, it is imperative that the effective use of these sites are secured and appropriately maximised consistent with draft policy SP3 of the emerging Plan and national policy objectives.

3.4.7 Notwithstanding our client's in support of the premise of the proposed strategy, we are concerned that highly sustainable, edge-of-settlement sites, particularly in higher tier settlements such as Deal have been omitted to reflect their accessible location and capability to accommodate a significant quantum of high-quality development. On this basis, our client is concerned that the strategic objectives underlying draft policy SP3 'Housing Growth' may not be fully realised, to the detriment of market and affordable housing delivery and the wider policies seeking to conserve and enhance the district's natural and historic environment.

3.4.8 Consequently, our client objects to policy SP3 which is considered 'unsound' as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Deal, and this has not been undertaken – for example at Land at Golf Road, where the Site has the site has been omitted despite clear justification for the suitability of development in Flood Zone 3a and indeed site allocations being included for residential development in the immediate vicinity. The Site has sufficient capacity to deliver approximately 60 additional units over the draft allocations for Deal, which will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

Greenfield Development and Consistency with Housing Trajectory

3.4.9 Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs Area of Outstanding Natural Beauty, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, release will be required if DDC is to meet its housing and development commitments moving forward.

3.4.10 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan period, to support the role and timescales of strategic urban extensions and to deliver the significant number of new homes that are required within the forthcoming Plan period.

3.4.11 In terms of housing delivery within Deal, just 223 new dwellings are proposed to be delivered, the fourth most number of dwellings despite Deal's secondary status within the settlement hierarchy. We understand this reflects the previously high levels of growth seen within the previous (adopted) Plan period and the reduced supply of sites now available in the town. However, our client's site is testament to the continuing availability of sites and in our view, delivery within the previous Plan period does not preclude further development within the following Plan period, particularly where a settlement has proven to provide a reliable and sustainable source of much-needed new housing in a highly accessible location.

3.4.12 Moreover, greenfield edge-of-settlement sites are, in our experience, typically most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the district.

3.4.13 The Sustainability Appraisal Scoping Report (2018) sets out that over the course of the adopted Plan period, the key sustainability issues facing Dover District in relation to housing are as follows:

Population growth, household growth and demographic change will place additional demand on key services and facilities such as housing, health, education and social care. The Local Plan offers a new opportunity to manage these pressures, encouraging mixed communities;

There is a need for affordable housing across the District. At present, the mean price of dwellings is higher than the national average. The Local Plan will help to expedite its delivery; and,

There is the need for a mix of housing types that cater for the needs of a range of people, including the growing number of single person and elderly households. Without an up-to date Local Plan, the required housing is less likely to be delivered.

3.4.14 It is evident that the new Dover Local Plan must allocate a mix of reliable sites capable of steadily delivering not only the quantum of housing that is required, but also the associated public infrastructure, affordable housing and a mix of unit types and tenures suitable for a wide range of future occupants.

3.4.15 The Housing Topic Paper (September 2022) provides further context and summarises under Chapter 7 'Historical Housing Delivery' that Dover has historically placed significant reliance on windfall development over the current adopted Plan period, with windfall sites accounting for 44% of all completed dwellings over the preceding 10-year period.

3.4.16 Moreover, it is highlighted that at the beginning of the 10 year period, the majority of new dwellings were being built on brownfield land. However, from the monitoring year 2013-14 onward development on greenfield land began to play a much greater part in the location for new development as shown in figure 1 below. This trend of increased housing development on greenfield land is a result of the allocations within the CS and Land Allocation DPD being built out and is associated with an approximate doubling of completions in the district. From 2013-14 onwards the average number of completed dwellings per annum has doubled to that of the early years of the CS, as the strong delivery rates of greenfield sites form the predominant source of housing. This is despite an overall declining trend of brownfield completions towards the latter half of the Plan period. This is generally not an uncommon trend in the majority of local planning authority areas, where opportunities for available and suitable sites in urban centres dwindle throughout the Plan period.

Figure 1: DDC Brownfield / Greenfield Completions 2010/11 to 2020/21 (source: Housing Topic Paper September 2022)

3.4.17 In light of the above context, it is clear that the adopted Dover Local Plan suffered from an initial under delivery of Plan-led housing growth in which windfall development sources were largely required to take up the slack in the early phases of the Plan period, as major allocated sites failed to deliver at the rates initially expected.

3.4.18 It is equally apparent that initial slow completion rates were quickly addressed once greenfield allocations commenced development, feeding into strong completions in the latter half of the Plan period. In our experience, greenfield sites are typically associated with stronger delivery rates and provide a reliable source of housing growth. The allocation of an appropriate mix of sites and scales is required in order to ensure steady and sustained Plan-led housing delivery across the Plan period and to avoid a reliance on windfall development to address the shortfall.

3.4.19 Consequently, given all of the above, it is imperative that the new Local Plan allocates a sufficient variety and scales of site capable of both ensuring steady and sustained housing completions and capable of making necessary contributions to public infrastructure and services, affordable housing and mix of unit types to address the key issues raised in the Sustainability Appraisal.

3.4.20 In our view, edge-of-settlement greenfield sites such as our client's Site, Land at Golf Road, represents one of the most reliable and sustainable source of housing delivery for the Plan period. Such sites are typically less constrained by wider factors and less affected by unforeseen delays such as land contamination. Moreover, greenfield sites typically are more capable of delivering the policy compliant affordable housing, unit mix and developer contributions that are urgently needed.

3.4.21 It is understood that the Plan is predicated on the delivery of strategic scale development at Whitfield comprising the development of circa 2,200 new homes. Consequently, in order to avoid a repetition of the previous Plan, the Council have sought to ensure that a pool of reliable greenfield allocation, including sites not dissimilar to that of our client are included within the Plan, capable of delivering the early growth that is required within the housing trajectory prior to the commencement of major allocations later in the Plan period.

3.4.22 We note that within the Housing Trajectory 'Appendix D', the Council have included allocated units from Years 4 onwards, with extant permissions (accounting for 5% non-implementation) demonstrated to be solely capable of delivering the growth required in Years 1-3. Notwithstanding our client's commitment to the Site, we support this pragmatic approach and suggest this represents a sound basis on which to set the district's housing trajectory. We note also the inclusion of an appropriate windfall allowance and the included contingency buffer to further ensure reasonably flexibility in the housing supply.

3.4.23 On account of all of the above, we submit that Land at Golf Road, Deal is required as a minor modification to form part of a sound strategy for growth in the district for the forthcoming Plan period. Land at Golf Road is capable of delivery early in the Plan period, representing a reliable source of housing growth in a highly sustainable and accessible location adjacent to the existing settlement boundary of Deal, consistent with the Council's preferred settlement strategy.

3.4.24 Our client objects to the omission of the Site and objects to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites within Deal, and this has not been undertaken – for example at Land at Golf Road, Deal.

3.4.25 Without prejudice to our client's support in for the premise of the proposed growth strategy which primarily directs growth at higher order settlements, we would urge the Council to re-visit its growth strategy and proposed allocations through a minor modification to allow a greater quantum of development within Deal to fully reflect its excellent sustainability credentials.

Policy SP4 'Windfall Development'

3.4.26 Separately, we note the provisions of policy SP4 windfall development. Proposals at Land at Golf Road would likely be acceptable in principle under this provision and we support the policy inclusion for appropriate, proportionate windfall development.

3.4.27 Our client is fully committed to the delivery of the Site which is available and suitable for delivery early in the Plan period. Notwithstanding the provisions of SP4, it is reiterated that our client fully supports the promotion of the Site for allocation as the most appropriate mechanism for delivery of the Site. The inclusion of Land at Golf Road would provide the opportunity for genuinely Plan- led development in Deal and the provision of associated benefits to public services and infrastructure, contribution to affordable housing supply and the delivering of a mix of house types and tenures.

Alignment with Sustainability Appraisal Findings

3.4.28 As part of the preparation of the Local Plan, the Council has identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA) which provides an assessment of how different options perform in environmental, social and economic terms, to help inform which option should be taken forward and combined with wider evidence documents, have been used to determine the growth and spatial strategy set out in the Plan.

3.4.29 Five potential distributions of growth were identified during preparation of the draft Regulation 18 Local Plan:

- Spatial Option A: Distributing growth to the District's suitable and potentially suitable housing and employment site options (as needed to deliver the scale of growth required).
- Spatial Option B: Distributing growth proportionately amongst the District's existing settlements based on their population.
- Spatial Option C: Distributing growth proportionately amongst the District's existing settlements based on the District's defined settlement hierarchy.
- Spatial Option D: Distributing growth in the same way as the adopted Local Plan, focussing most growth in and around Dover town.
- Spatial Option E: Distributing growth more equally across the District's settlements: Dover, Deal, Sandwich and Aylesham, as well as the rural villages.

3.4.30 The conclusion of the SA was that Spatial Options C (settlement hierarchy) and D (adopted Core Strategy with Dover focus) generally perform the most strongly against the SA objectives, particularly when delivering the baseline growth scenario. However, given the environmental constraints that exist around Deal and Sandwich, very few suitable and potentially suitable sites have been identified in these towns. Given this, the Council's preferred option for the distribution of housing and economic growth comprises a combination of options A (HELAA sites), C (settlement hierarchy) and D (Dover focus). The distribution of housing and economic growth in the District is therefore primarily based on the settlement hierarchy, and influenced by site availability, environmental constraints and factors of delivery.

3.4.31 On account of the above, our client agrees that the proposed growth strategy, and by extension, policy SP3 in principle represents a sound and evidence-led strategy for growth. However, given the clear acknowledgement of the dwindling supply of available sites in the higher order settlements of Deal and Sandwich, which has necessitated a minor deviation from the strongest performing spatial options, we submit that where sites are available and suitable for development in Deal and Sandwich, these must be fully maximised, reflecting their accessible location and their ability to reduce the need to develop into less accessible and more sensitive sites elsewhere in the district to accommodate the growth that is required.

3.5 Site Specific Justification for Allocation

3.5.1 Land at Golf Road is considered highly conducive to the delivery of a high-quality, landscape-led scheme capable of making a significant contribution to the delivery of market and affordable housing in a logically contained location that would assimilate with existing patterns of development and is demonstrated to be acceptable in terms of flood risk.

3.5.2 Land at Golf Road represents an excellent opportunity for the delivery of approximately 60 high-quality new homes in a logical, highly accessible location in north Deal with capability to deliver a policy compliant quantum of much-needed affordable housing, a mix of house types, sizes and tenures and ability to make significant developer contributions to support existing and future public infrastructure.

3.5.3 The land itself is of no particular ecological value and is in private ownership, offering limited public benefit. To the contrary, the Site is capable of delivering strong biodiversity net gain, attractive internal and boundary landscaping, opening up public access to open space, play facilities and a development pattern that facilitates pedestrian permeability and encourages active travel in north Deal.

3.5.4 In terms of flood risk, it is apparent that no sequentially preferable sites are available and the allocation of sites in this location is justified. We note that two other sites in north Deal have been allocated under policy SAP16 'Deal Small Housing Sites'. However, neither of these sites meet the threshold of 'major development' and are highly unlikely to deliver affordable housing or meaningful developer contributions and are not of a scale conducive to delivering a genuine mix of house types, tenures and sizes. Moreover, neither site is anticipated to deliver any further public benefit beyond housing, with no capacity for open space, play space and limited scope of significant biodiversity or landscape enhancement. To the contrary, our client's site is capable of delivering significant benefits in all of the above areas and can assist in achieving the government's objectives of creating mixed and balanced communities as set out within the Framework and is the only site capable of delivering direct benefits to existing and future residents of north Deal.

Site Specific Sustainability Appraisal

3.5.5 Land at Golf Road, Deal was removed from consideration following the 2022 HELAA assessment (ref: DEA004) which defined the site 'unsuitable' primarily due to flood risk. The Site consequently was not considered against the SA objectives, however for the purposes of this representation, we consider the Site in the context of the SA objectives below.

3.5.6 We consider that the Site would generally perform strongly, with particular positives associated with SA Objectives related to housing, accessibility, the economy, sustainable transport and climate change mitigation, in large parts due to the edge-of-settlement location and proximity of the site to key services in Deal.

3.5.7 We accept likely disbenefits associated with the development of a greenfield site, including loss of agricultural land, however this would be true of the majority of greenfield sites and it is abundantly clear that Dover's housing need cannot be met solely on brownfield sites. We suggest that potential minor negatives / uncertainty associated with biodiversity and landscape, however these could be overcome via high-quality design, biodiversity enhancement and landscape mitigation proposed under a future planning application. Irrespective, these would not be considered to outweigh the clear and tangible sustainability benefits associated with edge-of-settlement development and the site's consistency with the preferred spatial options.

Summary

3.5.8 Taking all of the above into consideration, our client is supportive of the premise of the growth strategy, however objects to the quantum of allocations within Deal, which in our view fails to fully maximise the sustainability credentials of the settlement and the capacity for growth, such that the Plan is unsound as drafted and requires minor modification to the growth strategy component. Land at Golf Road is considered wholly consistent with the objectives of the Plan and would form part of a sound evidence-led growth strategy consistent with the recommendations of the Sustainability Appraisal for the district to 2040, sufficient to ensure the Plan is found sound.

3.6 Deliverability

3.6.1 There are not considered to be any impediments to the Site being allocated for development commencing within the first five years of the Plan period. Combined with an appropriate number and scale of wider allocations in Deal and elsewhere across the district, this would ensure steady delivery of housing in Dover district across the majority of the Plan period and support the role and timescales of strategic housing delivery at Whitfield towards the latter half of the Plan period.

3.6.2 Persimmon Homes South East – a national housebuilder with a strong history and track record of delivery, together with an adopted and robust business plan for growth – has control over the site, and are committed to delivery of the site for residential development early in the Plan period.

3.6.3 For the reasons set out in this representation, the Site is considered suitable for the residential development of approximately 60 dwellings. The Site is adjacent and well contained by the urban area of Deal, one of the four higher order settlements in the district and the Council's preferred locations for Plan-led growth within the district. Development at Land at Golf Road would form a natural and logical development in Deal with excellent accessibility to day-to-day services and amenities via active travel modes within Deal itself and convenient access to public transport infrastructure (including Deal train station) for onward travel to key neighbouring settlements including Dover, Ramsgate, Canterbury and Ashford.

3.6.4 Finally, in respect of suitability, there are no physical limitations or problems such as access, infrastructure, hazardous risks, pollution, flood risk or contamination that would prevent development coming forward. It is acknowledged that the site is located within Flood Zone 3a, however this is true of the majority of north Deal which is protected by coastal flood defences. For the reasons set out within this representation, flood risk is not considered to represent an absolute constraint preventing the future development of the site, subject to detailed flood risk assessment and site layout design.

3.6.5 On behalf of our client, we submit that there are no known financial restrictions that would impact upon the viability of a future housing scheme or that would prohibit development coming forward within the early stages of the Plan period. To the contrary, we consider there to be an opportunity to deliver a high-quality, sustainably located residential development scheme consistent with the Council's proposed growth strategy comprising an appropriate mix of market and affordable housing and capable of contributing to a range of community facilities, public infrastructure and services locally.

3.6.6 At the time of writing, proposals at Land at Golf Road, Deal remain at an early stage, however our clients are firmly committed to progressing work on a future planning application in the short term and have a strong record of steady and sustained housing delivery once permission is secured.

3.6.7 The Site is in single ownership and there are no complicated legal agreements or covenants that would prohibit the ability to bring forward the Site early in the Plan period. The Site is therefore considered available and achievable for the purposes of the tests of deliverability.

4 Conclusion

4.1 Summary

4.1.1 This representation has been prepared by DHA Planning on behalf of Persimmon Homes South East in response to the Dover District Council Local Plan (Regulation 19) consultation which runs until 9th December 2022.

4.1.2 Our client controls 'Land Golf Road, Deal' and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site was submitted for residential development with capacity for approximately 60 units as part of the new Local Plan preparation, however the Site has not been taken forward within the Regulation 19 Pre-submission Plan.

4.1.3 Taking all of the above into consideration, we consider that the Site promoted at Land at Golf Road should have been included as a future housing allocation within the Dover District emerging Local Plan. The Site is considered, in principle, wholly consistent with the objectives of the Plan and would form part of a sound growth strategy for the district to 2040.

4.1.4 Our client is supportive of DDC's new Local Plan in principle, however our client objects to a component of the Plan, such that the Plan should be considered 'unsound'. It is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound', in which the quantum of Plan-led housing delivery within Deal should be increased to accurately reflect its second tier settlement status. Our client considers that given historic strategic under delivery in the district and wider uncertainties in the planning system, the Council should sensibly demonstrate an oversupply of reliable, deliverable sites early in the Plan period to ensure sufficient flexibility in housing delivery, should extant permissions or larger allocated sites not come forward or deliver as anticipated.

4.1.5 To be clear, Persimmon Homes South East support the premise of DDC's growth strategy, which includes further Plan-led development within Deal in line with its higher-order settlement status. However, we are concerned that DDC have planned at a significantly reduced level of growth in Deal, citing a dwindling supply of available land within and around the settlement. Consequently, the Plan fails to appropriately maximise the sustainable credentials of Deal and has resulted in a marginal supply of available, deliverable small and medium sites, insufficient to provide the flexibility in housing delivery that is required in accordance with national planning policy.

	<p>4.1.6 Given the dwindling supply of available sites within the District and the growing housing need, it is imperative that the sustainable credentials of these higher- order settlement sites are appropriately maximised to deliver the housing that is require in accordance with draft policy SP3 of the emerging Plan, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and object solely on this basis.</p> <p>4.1.7 Consequently, our clients object to the growth strategy component as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites within Deal, and this has not been undertaken – for example at Land at Golf Road, Deal, where it the Site has been excluded primarily on flood risk ground without further consideration of detailed evidence or the capability of suitable mitigation to be put in place. The consequent omission of potentially circa 60 units, will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.</p> <p>4.1.8 Without prejudice to our client's support in principle of the proposed growth strategy which primarily directs growth at higher order settlements, we would urge the Council to re-visit its growth strategy and proposed allocations to allow a greater quantum of development within Deal to fully reflect its excellent sustainability credentials.</p> <p>4.1.9 We submit that Deal is wholly capable of delivery significantly greater than the 223 dwellings allocated. We say that available and suitable sites exist, including that of our client's at Land at Golf Road, Deal capable of delivering logically located, highly sustainable new homes in accessible location early in the Plan period, sufficient to provide greater assurance of steady and sustained housing delivery across the Plan period, balance the scale of delivery from strategic urban extensions and further assist in reducing the need to develop into more rural, typically less accessible and more sensitive locations within the district to otherwise deliver the growth that is required.</p> <p>4.1.10 Accordingly, we submit that the inclusion of Golf Road, Deal would provide a medium sized site for the Council that could come forward quickly, complying with the Framework's requirement to provide a mix of sites and include specific sites for years 1-5 of the Plan period. Accordingly, we say that Land at Golf Road, Deal can further assist the Council in meeting the growing need for new homes in the district and is necessary to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full as well as delivering wider public benefits to the local community within Deal.</p> <p>4.1.11 In addition to being a highly sustainable and logical edge-of-settlement allocation, the Site is deliverable in a single land ownership with no viability issues, legal or third-party constraints present. Our client is fully committed to the delivery of Land at Golf Road and there are no impediments to the Site being capable of delivery within the initial 0-5 years of the Plan period.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>For the reasons set out in the consultation response submitted on behalf of Persimmon Homes South East, it is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound'. These suggest modifications are set out in the consultation response submitted on behalf of Persimmon Homes South East (ref DHA/30289).</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>Please refer to the consultation response submitted on behalf of Persimmon Homes South East (ref DHA/30289).</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Hume Planning. Full Representation attached to SDLP1587. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1587.)</p> <p>We write to you on behalf of our client, Sunningdale House Ltd ('Sunningdale'), in relation to the Dover District Council Regulation 19 consultation on its Local Plan</p> <p>Our client owns the site to the south of Station Road, Walmer. The extent of the site is shown on the plan below: Part of this site is currently being redeveloped for housing, pursuant to planning permission ref. 14/00361, to deliver 223 dwellings (including 66 affordable). This permission has been implemented, and the first homes on site are in occupation.</p> <p>This site is not included as an allocation within the Pre-Submission version of the Local Plan, we understand, due to the fact it benefits from planning permission. However, we consider the developable area of the site can be intensified and extended slightly for reasons set out below to accommodate additional housing units. We are therefore writing to highlight this for consideration in the Plan. For the reasons set out below, we consider it is a suitable and available site to help deliver housing to Walmer. Walmer forms part of Deal, a popular district centre and recognised as one of the most sustainable locations in the district which is reflected in its elevated position in the settlement hierarchy, where the spatial strategy directs that development opportunities should be maximised.</p> <p>Site Description</p> <p>The existing development site largely sits within the settlement confines of Deal. Access is provided into the site direct from Station Road. Station Road connects with Dover Road, the main route through the town linking Deal with Dover and the M2 motorway.</p> <p>The site is not located within flood zone 1 or 2, nor in an area at risk of surface water flooding. The site is not located in a conservation area, nor are there any listed buildings on or adjacent to the site. The southern part of the site is in an area of archaeological potential.</p> <p>The area to the north and northeast of the site is mainly residential in character and is undistinguished in design terms. The majority of the built development to the north of the site is two storeys in height and comprises predominantly semi-detached and terraced houses.</p> <p>To the east is a caravan park and to the south, a woodland belt with farmland beyond. The land here rises more steeply with Ripple Windmill on the skyline some distance to the south. To the west is the railway line with farmland beyond.</p> <p>Suitability of the Site</p> <p>The overall principle of residential development has been accepted on the site through the grant of planning permission for 223 houses (LPA ref. 14/00361). The originally approved site layout plan is below:</p>

The scheme which has been granted planning permission, retained the eastern and southern parts of the site as open landscaping, as required through the Site Allocations DPD Policy.

Sunningdale has implemented the northern phase of this permission but considers the southern and western phases could be intensified in terms of density and layout from that approved, to provide additional unit numbers in this location. Some additional units could also be provided to essentially round off this southern layout, whilst retaining a strong and robust landscape buffer as approved. With this combined approach of intensification within the approved development area and its moderate extension, a net increase of some 75 units could be provided at the site (beyond the originally approved 223 consented scheme), contributing significantly to the housing numbers for Deal. South Deal is far less constrained in heritage and flood risk terms and it would be appropriate to direct more development to this location in preference to the selection of new greenfield site releases to meet housing need. Deal is a popular and vibrant place and this site has the proven ability to provide affordable housing (unlike sites in Dover, as established through the Councils Plan Viability Assessment) and it is considered appropriate to maximise development opportunities where possible.

Access to the site would be as approved, and initial transport work (following engagement with KCC), has confirmed to Sunningdale that the junction from Station Road to Dover Road has sufficient capacity to accommodate the additional units in this location.

We note this site has not been considered as part of the Council's Landscape Sensitivity Assessment which underpins the Local Plan, which instead focuses only on the Council's proposed allocations. However, we note the greenfield site proposed to be allocated in Walmer, located to the west of this site on the western side of the railway track which measures as "medium sensitivity" in landscape terms and this Reg 19 allocation has progressed accordingly for around 75 units. It is considered that the intensification and moderate enlargement of the development area, whilst maintaining a strong landscaped buffer to the periphery, is a less impactful way of contributing to meeting the housing needs of Deal than the greenfield allocation identified in the Reg 19 document. We conclude that logically, and as part of a sequential approach to site selection, housing numbers should be met in part through the intensification of existing development sites in the first instance, especially where this could yield circa 75 added dwellings. The land which remains undeveloped as part of this site, lies adjacent to the settlement confines of Deal. Deal is a second-tier settlement within the borough and additional housing should be focused here. The site is comparatively unconstrained and subject to the retention of a strong landscaping buffer to the southern and western boundary (the latter already clearly defined by the elevated railway line), it is considered further units can be accommodated on this site in an appropriate manner.

SP3: Housing Growth

Whilst we welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period, it is considered additional sites, if suitable and available, should be included within the Plan. A large proportion of growth is being directed towards Dover with further units at Whitfield (over 2,000) and with large strategic sites, delivery rates can easily slow down during the plan period and under-deliver. Whilst there is a buffer within the Plan, it is considered appropriate not to use this as a limit and allocate other suitable sites in sustainable locations where available.

In this respect, it is noted that Deal sits towards the top of the settlement hierarchy, as the district's only District Centre. Yet, due to the perceived constraints in Deal, only 223 units are being allocated in this settlement compared to over 600 in Aylesham, which is a settlement located lower down the settlement hierarchy.

As detailed above, land off Station Road is considered suitable for residential development for some 75 dwellings which would help to slightly rebalance the spatial strategy more toward Deal which is considered to be justified. It is also available and can be delivered by Sunningdale within the short term (as an extension to the early phases that are already under construction) and, in our view, this site should be allocated within the Plan.

Concluding Remarks

Hume Planning Consultancy welcomes the opportunity to comment on this stage of the Council's Pre-Submission Local Plan and would like to reserve the right to attend the Examination in Public in due course to discuss potential development sites in Deal.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	(DDC Note: Comment Duplicated from Comment on E4 as site has been Omitted for Allocation in the plan) REPRESENTATIONS TO THE DOVER DISTRICT LOCAL PLAN REGULATION 19 CONSULTATION IN RESPECT OF BETTESHANGER COUNTRY PARK HOTEL AND SPA, DEAL This representation to the Dover District Local Plan (Regulation 19 Consultation) is made on behalf of our client, Betteshanger Country Park, who have submitted a planning application for a luxury hotel and spa at the Betteshanger Country Park site (LPA Ref: 22/01152) and is currently awaiting determination. A site location plan of the site and a layout plan are attached at Appendices 1 and 2 of this representation. Betteshanger Country Park objects to Policy E4 – Tourist Accommodation and Attractions in its current form, which seeks to boost the tourism and visitor economy of Dover District, but in respect of serviced visitor accommodation, only on sites within or adjoining existing designated settlement confines. This approach constitutes a significant deviation from the Regulation 18 Local Plan Policy E4, which

to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

supported tourism proposals where they are located within or adjacent to an existing visitor attraction or accommodation site. There has been no justified or evidenced reason for the deviation in policy between Regulation 18 and Regulation 19. Support for tourist accommodations and visitor attractions across the District should be strongly supported, particularly of the high quality and unique nature of our proposal, which would boost visitors to both the local and wider area. The District currently has a high proportion of day trips. Providing accommodation to convert these into overnight stays will significantly boost the local economy, highlighted in Paragraph 7.14 of the Regulation 18 Local Plan which stated that 'overnight trips are worth seven times more to the local economy than that of a day tripper'.

a. Betteshanger Country Park Hotel and Spa ('The site')

Betteshanger Country Park submitted a planning application for a luxury Hotel and Spa at Betteshanger Country Park, Deal ('the site') under the local planning authority reference 22/01152, which is currently awaiting decision from the Council.

The application was submitted in 'full' and seeks permission for the following development:

'Erection of a 120 bed hotel (C1) building with associated spa facilities, gym, restaurant/bar, access, landscaping and parking.'

The site is located to the west of Deal at Betteshanger Country Park on the site of a former spoil tip of the former Betteshanger Colliery. The site is in a well located and sustainable location, with Deal situated approximately c 3 km south of the site where Deal station provides connections into London via Ashford International or Folkestone Central. Bus services into the town centre operate twice an hour, taking 10-15 minutes. There are footpaths and cycle paths directly from the site leading onto Sandwich Road.

The planning application was informed by a series of technical reports and assessments covering matters including air quality and noise, arboriculture, archaeology, ecology, economic benefits, flood risk and drainage, heritage, land contamination, landscape and visual impact, a sequential test and transport.

The proposals for the design of the hotel and spa have been locally inspired, of sustainable and modern design that respectfully sits within a unique landscape environment surrounded by open green space. The proposals have set out to meet the aspirations of paragraph 126 of the NPPF in achieving the creation of high quality, beautiful and sustainable development, that will be acceptable to the community and a place of enjoyment.

A compelling planning case exists to support the planning application being approved and at the heart of this is a strong quantitative and qualitative need for additional visitor accommodation in the District, especially for a luxury hotel at the higher end of the market. This is justified by the declining number of holiday trips to the District as well as the falling value of holiday trips. Both the 'Destination White Cliffs Country – A Growth Strategy for Tourism and the Visitor Economy 2020 to 2030' and the Dover Economic Growth Strategy target growth, investment and development in the District's tourism industry so that the range of visitor accommodation stock is improved and longer stays and higher spend are encouraged. There is a demonstrated need to increase the number of high-quality 4- and 5-star visitor accommodation in Dover District. This type of accommodation has not been delivered within settlement confines, as currently supported in adopted policy, due to the absence of a signature setting within which to site a hotel of this nature. However, there is a market opportunity for a luxury hotel at Betteshanger Country Park, given the unique selling point of it being sited within a Country Park with growing recreation and leisure appeal for both visitors and existing residents.

The benefits associated with the delivery of the proposed development identify with the three dimensions of sustainable development, comprising economic, social and environmental, as set out in paragraph 8 of the NPPF. The proposed development, as set out in the Economic Benefits Statement will create employment opportunities of around 243 direct and a further 77 indirect construction jobs, 75 direct jobs on site during the peak season and support of around 111 net additional jobs across the South East. Around £22.6 million will be generated in construction GVA across the construction period. The development will significantly boost the number of visitors to Betteshanger Country Park, helping to provide the investment the Country Park needs to thrive and fulfil its potential as an education, sport and tourism destination.

There is an opportunity to improve social interaction between families and friends, connect people to nature and open space and educate visitors on the ecology and history of the Country Park. Job opportunities and training will improve livelihoods and the proposed green and blue infrastructure's connection with nature will provide positive benefits for the health and welfare of visitors. The proposed development would enhance the existing open space and recreational offering of Betteshanger Country Park and increase investment into the landscaping in and around the site to deliver a highly attractive environment that can achieve a biodiversity net gain and ensure maintenance and stewardship of the Country Park for the long-term.

Amendment to Draft Policy E4 – Tourist Accommodation and Attractions to include support for tourism proposals that are located within or adjacent to an existing visitor attraction or accommodation site

Betteshanger Country Park aspires to be able to support the Dover District Local Plan and is supportive of the Plan's objective to support new tourism accommodation and attractions in the District. However, an objection is raised to the policy deviation made from the last Draft Local Plan iteration, which supported tourism proposals located within or adjacent to existing visitor attractions or accommodation sites. The proposed retrogressive policy removes positive policy support for visitor accommodation at existing visitor attractions that happen to lie outside of settlement confines. This policy change is considered to result in significant harm to the tourism strategy for the District, by creating a policy conflict to proposals for luxury hotels, which can only come forward at a signature setting site such as Betteshanger Country Park, which happens to lie beyond a settlement boundary.

To be able to deliver the much-needed high quality tourist accommodation, it is recommended that Policy E4 – Tourist Accommodation and Attractions be amended back to the Regulation 18 draft, which supported visitor accommodation proposals that are located within or adjacent to an existing visitor attraction or accommodation site. For clarity, the policy has reduced the ability to deliver serviced visitor accommodation from its previous text which stated 'within or adjacent to an existing visitor attraction or accommodation site' to the revised text which only states 'within or adjoining designated settlement confines'.

The 'Destination White Cliffs Country – A Growth Strategy for Tourism and the Visitor Economy 2020 to 2030' published in May 2021 and the 'Dover District Economic Growth Strategy' published in November 2021 make it clear that despite NPPF policy support, there has not been enough high-quality visitor accommodation delivered in the District to support its tourism objectives. It is therefore vital to allow for serviced visitor accommodation in appropriate locations such as adjacent to visitor attractions to enhance and diversify the visitor economy and harness the potential of the District to grow the economy. Not doing so would be disastrous for the District's visitor economy.

There is no evidence to justify the deviation from the Regulation 18 Plan, but there are considerable real-world implications associated with this change in policy wording. The planning application that is awaiting determination by the Council is unnecessarily brought into conflict with the proposed new policy, despite the clear direction of the Regulation 18 Plan and the supporting evidence for the Local Plan clearly highlighting the need for high quality visitor accommodation at existing visitor attractions.

Betteshanger Country Park already attracts people from the local area who are looking to use the existing cycle paths, walk the many trails or visit the recently delivered Visitor Centre, including The Lamp Room restaurant and The Kent Mining Museum. The Country Park has also built a reputation for hosting a variety of public events such as shows, markets, competitions and sporting events, amongst others. A separate Application for a surfing lagoon with a pump track, yoga hub, education hub and holiday pods (LPA Ref: 22/01158) is also awaiting a decision from the Authority that would enhance the role of the Country Park as a unique visitor destination with direct and indirect economic benefits for the District and wider County. The sister applications complement each other and would deliver for Dover District an exciting and distinctive tourism destination unlike anything that currently exists in the District, County or wider Region.

In order to remedy the soundness deficiency with Policy E4, which is considered unsound on the basis of it being ineffective and not positively prepared, the following amendment is requested to section 1 b), which if agreed, would render the policy sound:

"1 Provision of new, improved, upgraded or extended accommodation and attractions

a Proposals for visitor attractions will be supported in appropriate locations across the District where it increases the range and/or quality of tourist facilities and accords with criteria i) to x) below.

b Proposals for serviced visitor accommodation (hotels and B&B development) will be supported within and adjoining designated settlement confines (as defined in Policy SP4) and within or adjacent to an existing visitor attraction or accommodation site subject to criteria i) to x) below..."

c. Conclusion

Betteshanger Country Park aspires to support the District in delivering a sound, justified and effective Local Plan. However, Betteshanger Country Park objects to Policy E4 in its current form, which in respect of serviced visitor accommodation, only supports developments on sites within or adjoining existing designated settlement confines. This approach constitutes a significant deviation from the Regulation 18 Local Plan Policy E4, which supported tourism proposals where they are located within or adjacent to an existing visitor attraction or accommodation site. There has been no justified or evidenced reason for the deviation in policy between Regulation 18 and Regulation 19. Support for tourist accommodation and visitor attractions across the District should be strongly supported, particularly of the high quality and unique nature of our proposal, which would boost visitors to both the local and wider area and make the average overnight visitor worth seven times more to the local economy compared to that of a day tripper. Not amending the policy wording will make it incredibly difficult for the District to meet its tourism and economic objectives for the future, as top-of-the-market hotels cannot be delivered within settlement boundaries, as evidenced through their longstanding non-delivery in the District. However, a luxury hotel can be delivered at the Betteshanger Park existing visitor attraction, due to its signature setting, and the resultant effects of a policy that enables this form of development are as follows:

- Deliver a unique, locally inspired, sustainably designed modern hotel of the highest quality;
- Generate significant direct and indirect economic benefits for the local and regional area, supporting the aspirations established in the 'Destination White Cliffs Country – A Growth Strategy for Tourism and the Visitor Economy 2020 to 2030' and the Dover District Economic Growth Strategy for longer stays, dwell time and spending;

	<ul style="list-style-type: none"> • Connect people with nature, open space and allow the opportunity to educate visitors on the ecology and history of Betteshanger Country Park while enjoying the recreational amenities that are currently provided. <p>In addition to amending Policy E4 as requested, Betteshanger Country Park also respectfully requests that the Plan formally allocates Betteshanger Country Park for a luxury hotel.</p> <p>Betteshanger Country Park would welcome the opportunity to participate in the forthcoming Examination-in-Public into the plan and contribute to the debate to ensure the best strategy for the District is found.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Betteshanger Country Park has land interests in the District and has an important role in delivering the Plan strategy

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Comments refer to the whole plan but I have particular concerns about the Walmer area plans When new housing is built it requires infrastructure: more and new roads, GP surgeries, schools, sewers, shops, etc. Dover District Council is not effectively seeking contributions from developers under section 106 agreements and the community infrastructure levy. DDC and local councilors are too cosy with the local developers and not setting the right level of infrastructure developed.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Proper cost contributions from developers and proper investments in existing and new infrastructure, legally enforceable obligations between DDC and developers. More supervision and inspection of developments and infrastructure by DDC
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I expect councillors and planners to do their job and enforce the obligations of developers to develop safely and to upgrade and future proof infrastructure.

	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Iceni Projects, on behalf of Quinn Estates, welcomes the opportunity to submit representations to the Dover District Council Local Plan Regulation 19 Consultation in respect of land at St Edmunds Road, Deal. These representations should be considered alongside the following documents appended to this letter:</p> <ul style="list-style-type: none"> • Appendix 1 – Site Layout Plan <p>The land subject to this representation was previously assessed through the Call for Sites process as part of a significantly larger land parcel (GTM008 – Land North of Ellens Hill). Quinn Estates consider that the revised, smaller site makes a logical extension to Deal in this area, and that site specific constraints can be overcome to deliver housing in Deal. The Site borders the Deal settlement boundary and presents a logical extension to the town in this area. Quinn Estates considers that the land should be allocated for residential development of approximately 16 self-build and 7 affordable homes with associated access and parking, within a landscaped setting. It is considered that the scheme presents an opportunity to provide high-quality family homes, in a highly sustainable location and that the resultant effect of this redevelopment will lead to societal benefits for the local community and a more sustainable development strategy</p> <p>It is Quinn Estate's view that the current suite of allocations in the draft Plan will fail to provide a sufficient level of growth in and around Deal, and that it is over reliant upon a single urban extension to Dover to meet local housing needs, which does nothing to address local affordability issues in Deal. To ensure the soundness of the plan, further Sites, such as the one advocated in this representation, should be allocated to ensure that the Plan's ambitions for the District are delivered.</p> <p>a. Land at St Edmunds Road, Deal (the 'Site')</p> <p>The Site comprises approximately 1.83ha of land adjoining the Deal settlement boundary. The Site is located on the south-western edge of Deal, bound to the north-east and north-west by residential properties, and to the south-east and south-west by open farmland. The southern boundaries of the site comprise existing hedge and trees. The site is currently in use as grazing land for horses.</p> <p>A public right of way (ref: 0340/ED38/12) bisects the north-eastern corner of the site from northwest to south-east. Access to the site is via an existing gate in the hedgerow joining St Edmunds Road. The closest bus stop is approximately 180m from the Site on St Richards Road and includes services to Deal town centre, Walmer, Sandwich, and Kingsdown. St Richard's Road GP Surgery, Payden Pharmacy, St Mary's primary School and the Betteshanger Sports and Social Club are also within approximately 500m of the Site on St Richards Road. The Site is considered to be a sustainable location for residential development.</p> <p>The north-western boundary of the Site adjoins the southern edge of the Mongeham Road Conservation Area. Within the Conservation area are several Grade II listed buildings including 110 and 112 Mongeham Road, Manor Farmhouse and Brewer's Farmhouse. The Site is within Flood Zone 1. Wildlife Trust mapping identifies the Lower Stour Wetlands to the north-west of the Site beyond Mongeham Road, overlain with the Sandwich Bay to Hacklinge Marshes SSSI. There are no other wildlife designations either in the Site or in proximity.</p> <p>b. Objection to Tables 3.3 and 4.2 (under the auspices of Policy SP3)</p> <p>Quinn Estates suggest that the emerging spatial strategy for the District, as detailed in Tables 3.3 and 4.2 of the Regulation 19 Submission Version of the Draft Local Plan is not based on sound plan-making. The current approach does not acknowledge the sustainability of the town nor its position within the settlement hierarchy. As such, additional sites should be allocated to the town in Table 4.2. Quinn considers that the Site subject to this representation presents an ideal housing site within Deal which is able to overcome the identified constraints to contribute to sustainable housing growth within the settlement.</p> <p>Sustainable distribution of growth</p> <p>Sustainable development is a key aim of the National Planning Policy Framework at Paragraph 8. In terms of housing delivery, the Council should seek to encourage housing growth in the most sustainable locations, especially when they can ensure the achievement of societal improvements, economic benefits and positive environmental outcomes. In choosing sites, the Council should ensure that new residents can reach established nearby town centres using sustainable modes of transport, to limit pollution arising from motor travel and to support the vitality of the existing community and local economy, without creating environmental harm.</p>

Deal is vibrant coastal town which benefits from access to a wide range of local services within a relatively contained urban environment. The vast majority of the town's facilities lie within walk, cycle and public transport distances. Services include a range of education provision, including primary, secondary and tertiary education. The town benefits from ample leisure opportunities at the sports centre and swimming pool, along with less formal outdoor activities on the seafront and at the Betteshanger Country Park. In addition, the town is highly sustainable in regard to public transport accessibility, being served by mainline rail, the high-speed train service to London and numerous bus routes.

Throughout the evolution of the draft Local Plan, Deal has failed to be allocated sufficient levels of growth commensurate with the sustainable nature of the town. The justification for channelling so little growth to Deal is not considered to be justified by evidence, when all the evidence points to the settlement being such a logical and sustainable location to channel growth to. The principles of sustainability and sound plan making appear to have been absent in key decision taking over spatial choices at the heart of the spatial strategy presented in the draft Plan.

Market and affordable housing delivery

Paragraph 35 of the NPPF outlines how plans are effective where they are found to be deliverable over the plan period. The disproportionately high dependence on Whitfield Strategic Allocation (SAP1) results in a plan which raises considerably uncertainty as to this key soundness test.

Quinn Estates has no objection to large-scale housing development at strategic sites playing an important role in meeting housing need. However, what looks good on paper needs to deliver in practice. However, in a District like Dover where there is a need for the benefits of growth to translate across the District, the spatial strategy should be seeking to unlock growth and inward investment at other key settlements, such as Deal, and this is a significant weakness of the Plan in its current form.

Spatial strategies should reflect that building homes is a complex and risky business. Stronger local markets have higher annual delivery rates, and where there are variations within districts, this should be factored into spatial strategy choices. Further, although large sites can deliver more homes per year over a longer time period, they also have longer lead-in times. Research by Lichfield¹ found the average lead in time for large sites prior to the submission of the first planning application is 3.9 years

This issue with delivery is found to be the case with Whitfield. Of the 5,750 dwellings proposed for the allocation, 3,483 dwellings are considered deliverable in the emerging Plan period. The Council acknowledges that the 2010 Core Strategy included provision for the Site to deliver 5,750 dwellings. Phase 1 of the SAP1 allocation (Dover ref. 10/01010) is underway and as of the 2020/2021 monitoring year, 185 dwellings had been completed with a delivery rate of approximately 50dpa for the past three years. Given this slow progress, it seems likely that although the existing outline planning permission should be completed over the Plan period, a more cautious approach should be taken in terms of the remaining dwellings allocated for the site given its proven issues in delivering housing to date.

Without clear evidence by way of a planning application for these additional dwellings, it is questioned whether Whitfield will ramp up to delivery of 120dpa from 2023/24 and then up to 200dpa from 2026/27 for the remainder of the Plan period. More consideration should therefore be made to the current planning position of the Site and the length of time it has taken so far to deliver housing. Paragraph 73D of the NPPF recommends the inclusion of realistic delivery rates within Local Plans, and the Council should therefore review those proposed for Whitfield and consider building more flexibility and more volume into the pipeline to be able to respond to delivery issues.

It is considered that, particularly with the deliverability issues of the Whitfield Urban Extension to date, additional sites should be allocated for housing to ensure that there is sufficient choice and flexibility in the supply so that the Council can meet its housing requirement throughout the Plan period, as well as to meet the Government's objective to significantly boost the supply of housing as set out in Paragraph 60 of the NPPF.

The delivery of affordable housing also paints a bleak picture within the District. The Council's existing policy on affordable housing, DM5 of the Core Strategy (2010), requires residential development of 15 or more dwellings to provide 30% of the total homes as affordable homes and the Council's affordable housing strategy remains unchanged, save for reducing the requirement to deliver affordable housing within Dover town.

The latest Authority Monitoring Report (2020-2021) profiles how the affordable housing policy has consistently struggled to deliver sufficient levels of affordable housing, with the average being 20%. The failure to deliver sufficient affordable housing is set against a backdrop of worsening affordability in the District. Affordability ratios for Deal show a continued trend of worsening to 9.25 in 2021, with year-on-year worsening from 2012-2018. For the lowest earners, this reaches 9.62 in 2021. The District is less affordable than the national average of 9.05. Median house prices in the District have soared to £285,000, compared to the UK average of £278,000.² In addition, statutory homelessness within the District sits at 137 people and 136 households, 68 with children, are in temporary accommodation within the District as of 2021.³ Whilst there may be a number of factors contributing to these outcomes, a new spatial strategy that identifies limited housing at Deal is going to deliver limited affordable housing at Deal and the absence of housing will only exacerbate local affordability pressures.

The proposed allocation at Land at St Edmunds Road would therefore assist with relieving local affordability pressures with the proposed 7 affordable units.

Self and custom build

Policy H5 of the Draft Local Plan states that the Council will support self-build and custom house building schemes on housing sites allocated in the Local Plan and on non-allocated windfall developments subject to compliance with the other Policies in the Local Plan, and where overall this would not result in an over-provision of this type of housebuilding when compared to the Council's supply/demand evidence.

The Self-Build and Custom Housebuilding Act 2015 requires relevant authorities, including District Councils, to keep a register of individuals and associations of individuals who are seeking to acquire serviced plots of land for self-build and custom housebuilding. Councils are also required under sections 2 and 2A of the Act to have regard to this and to give enough suitable development permissions to meet the identified demand. The benefits of self and custom build housing are recognised as diversifying the housing market and increasing customer choice. The NPPF supports the delivery of a variety of land coming forward to meet the needs of groups with specific housing requirements including for those wishing to commission to build their own homes.

The Self-Build and Custom House building need as identified from the Council's register is reported annually through the Authority Monitoring Report. The latest Authority Monitoring Report (2019-20) states that since the introduction of the self-build and custom house building requirements in 2015, there has been 1 plot allowed at appeal, where at appeal it was identified as self-build (planning reference 16/01101). There have also been 18 plots marketed as self-build since April 2020 by the developer from planning application 16/01026, however these were not identified as self-build on the planning application. On 31st October 2020, there has only been one planning application identified as including self-build and customhouse building, reference 20/00419, which is also a Quinn site, for which a reserved matters application (ref: 22/01379) is currently pending determination.

The Self-Build Need Assessment submitted as part of the application (22/01379), points towards a very strong relative demand for self-build plots in Dover and also identifies Dover as being one of the authorities with the highest demand per capita in the country. Moreover, it is important to highlight that when considering demand in the context of the Local Authority's self-build register; an Ipsos Mori poll undertaken for NaCSBA in 2016 found that only one in eight people interested in self-build were aware of the introduction of Right to Build Registers in England. As a result, the number of expressions of interest on a Local Authority's self-build register may substantially underestimate demand.

Crucially, the Council's method of updating the self and custom build register, and resultant understanding of demand within the District, is flawed. The Council reviewed and updated its register in March 2020. All persons and organisations on the first (2016) version of the register were invited to re-register in February 2020, with reminders sent out in March 2020. Those who re-registered and passed the local connectivity and financial solvency tests, had their interest back dated to their original registration date and were placed on part 1 of the register. Those who did not pass the tests but still wished to register their interest in self-build customhouse building were placed on part 2 of the register.

It is not clear from the Council's Authority Monitoring Report and evidence base for the draft Local Plan whether additional independent survey work has been undertaken to fully understand the demand for self and custom build housing in the District. As mentioned previously, public knowledge and understanding of Right to Build in England is generally low. The method of the Council to understand demand has wholly relied upon people who had joined the register in 2016 and has not sought to further publicise Right to Build or develop a clearer understanding of demand in the District through additional surveys. This results in an incomplete picture of demand in the local area and resultant lack of allocations for self-build sites within the draft Local Plan.

Quinn Estates are the leading provider of self-build in Kent and have assembled their own database of interested self-builders. Having facilitated self-build development in East Kent, the company is ideally positioned to understand the market requirements and best placed to assist the District in meeting its growing demand for plots. Quinn Estates propose the land subject to this representation as suitable for a self-build site of 16 dwellings which would assist with addressing the Council's underestimated demand for this housing type.

Land at St Edmunds Road

The land subject to this representation was previously assessed through the Call for Sites process as part of a significantly larger land parcel (GTM008 – Land North of Ellens Hill). The Call for Sites Submission proposed 450 dwellings across a 10.74ha land parcel, and was assessed to be unsuitable due to heritage and landscape impact.

Quinn Estates are pleased to submit for consideration a revised proposal for the smaller land parcel which would deliver much needed new homes, including self-build and affordable homes, for Deal, whilst respecting and responding to the site constraints, namely the sensitive historic setting of the surrounding area to the north-west.

Vehicular and pedestrian access to the Site is proposed from the end of St Edmunds Road, utilising the existing gap in the hedgerow serving the field. The indicative site layout plan submitted with this representation details the proposed scheme which would comprise 16 self and custom build plots and 7 affordable units, set within a landscaped setting. The public right of way to the eastern edge of the site is retained, forming part of the landscaped, spacious entrance to the Site. In addition, the existing hedgerows are retained and enhanced, along with an enhanced tree buffer to the north-western boundary of the site where it adjoins the Mongeham Road Conservation Area. Overall, the proposal represents a

	<p>c. Conclusion</p> <p>On behalf of Quinn Estates, we thank you for the opportunity to contribute to the Dover District Local Plan Regulation 19 Consultation.</p> <p>The current approach to the spatial strategy in the Draft Local Plan requires amendment to address a significant soundness issue concerning the level of growth identified for Deal, the District's second largest settlement. It is considered that the Plan currently fails to positively plan for a commensurate level of housing and employment at the settlement, as expressed in Policy SP3 and that the available evidence does not support or justify this approach. Moreover, the evidence does support channelling a greater quantum of growth to Deal.</p> <p>Quinn's proposal at the Land at St Edmunds Road presents a sustainable location for growth due to its existing connections to the public transport network and close proximity to a range of services on St Richards Road. The small nature of the site would provide early and accelerated delivery and would assist with reducing the current over reliance on the Whitfield Urban Expansion to provide housing growth for the District. In addition, the site would deliver self-build and affordable housing to address local affordability issues, which the current Plan fails to address.</p> <p>I trust that these comments are of assistance and that these representations will be taken into account in consideration of the current consultation. Quinn would also welcome the opportunity to participate in the forthcoming Examination-in-Public into the Plan and contribute to the debate to ensure that the best strategy for the District is found.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Include GTM008 in the Local Plan for approx 16 self-build and 7 affordable dwellings</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I note from your local plan submission that you are hoping to protect both the character and the commercial; activity in central Deal. This is commendable. The major problem that faces residents in Deal now is the effective collapse of the local bus services between the "outlying" parts of the town such as Walmer, Deal town centre and Dover. Available bus service do not become available until nearly 09:45 each day - if they are running. There are fewer at weekends. 3 services per hour from the town centre to Walmer are now reduced to 1 sporadic bus that starts late and finishes early. The useful 83 circular route has been cancelled. There are every few buses to St Magraet's or Kingsdown. I imagine the problem is financial. A different approach is needed. The service should be provided as social infrastructure not as a commercial enterprise. Mini buses or even people carriers could be used to cut costs. As it stands, inhabitants are being forced into their cars which can only be bad for the environment. Worse still, many elderly people now find it difficult to get out and about. Trips into town for shopping require a car. Trips to hospitals at Dover and Canterbury are no longer possible by public transport. Perhaps you could give some consideration to this serious social problem?
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? REPRESENTATIONS TO THE DOVER DISTRICT LOCAL PLAN REGULATION 19 CONSULTATION
IN RESPECT OF LAND FORMERLY KNOWN AS KENT SALADS

Clague Architects welcomes the opportunity to submit further representations to the Dover District Local Plan (Regulation 19 Consultation) in respect of Land formerly known as Kent Salads (hereafter referred to as 'the Site'). A Site location plan showing the extent of the Site is contained at Appendix 1 of this representation.

Clague is disappointed to see that the Site has not been included as a housing allocation at this stage in the plan making process. The company believes that the Site presents an excellent opportunity to deliver sustainable residential development of significant value to the District in accordance with national planning policy. For the reasons set out as follows, we believe that this site should be allocated for a residential development of approximately 30 units in the new Local Plan, thereby contributing towards meeting Dover District's housing needs over the Local Plan period to 2040. The Site would therefore make a notable contribution to the District's short term housing targets, while helping to secure the achievement of annual housing targets through a broadened scope of deliverable housing Sites over the plan period.

It is Clague Architects' view that the current suite of allocations in the draft Plan would fail to provide a sufficient level of growth in and around the main settlements within the Dover district, and that the draft plan is over reliant upon a single urban extension to meet local housing needs. To ensure the soundness of the plan, further Sites, such as the one advocated in this representation, should be allocated to enable the Plan's ambitions for Dover to be delivered.

a. Land formerly known as Kent Salads ('The Site')

The site comprises approximately 1.5ha of land formerly used by a commercial operator, Kent Salads Ltd. The site is previously developed land and is therefore a brownfield site. In principle, national planning policy supports the re-use of brownfield sites subject to other planning considerations.

The Land formerly known as Kent Salads site is located to the west of Deal, off the south-western tip of the former Betteshanger Colliery site. To the north of the colliery site is a small residential cluster of former colliery workers' dwellings at Circular Road, and adjacent to this residential cluster is a large agri-employment site consisting of greenhouses, processing facilities, offices and agricultural buildings. The land is accessed off The Drove, which leads east to a junction with Northbourne Road and Deal Road which in turn provides access into Deal to the south, and to the A256 to the north, which runs into Sandwich. To the east of the site, beyond the former Betteshanger Colliery site, is Betteshanger Country Park. The park was approved through SEEDA's 2002 planning application for the regeneration of the former colliery lands. It provides a variety of activities including walking, cycling and orienteering, as well as a play area, partially completed visitor centre and road and mountain biking circuits. The park is readily accessible from the proposed application site. The site is not located within the Green Belt, nor is it located within the AONB or local landscaping designation. The southern portion of the site is a designated Historic Park, though it is not proposed to develop on this element. The site is not in a Flood Zone.

b. Objection to Table 4.1, Draft Dover District Local Plan

Clague Architects considers that the approach taken to the delivery of housing in the Dover district as set out within Table 4.1 of the Regulation 19 Submission Version of the Draft Local Plan is not a result of sound plan-making. It is considered that further Sites, including the Site subject of this representation, should be allocated to secure steady growth in the district, and diversify the type of housing that will be delivered across a wider range of Sites. The Site subject of this representation is a prime example of that, as it is deliverable within the short term, and would help secure key societal improvements and urban renewal, which the draft plan recognises that Dover is in urgent need of. As outlined below, the development strategy in its current form raises several issues, the vast majority of which could be addressed through the allocation of additional Sites across the district, including the Site.

Reg 19 Response

An earlier Call for Sites submission for 60 units on the site was considered by Dover District Council during its initial HELAA process. The site [HELAA105] was considered a potentially suitable site, but DDC concluded that the trip generations from 60 dwellings would be likely to be significantly above that which could be generated by the permitted use of the site. However, DDC noted that a smaller scheme may be acceptable in highways terms.

Clague Architects considers that a revised and scaled down scheme on the site could therefore deliver sustainable development of benefit to the wider district without impacting unacceptably on the local road network. We would therefore endorse allocation of the Land formerly known

as Kent Salads for sustainable residential development for approximately 30 dwellings. This would make best use of a brownfield site and reduce residual pressure for the release of greenfield sites to meet the District's housing need.

The site is considered to be in a sustainable location for the proposed development. Deal is situated approximately 3km south of the site. The town provides a wide variety of services, leisure facilities and infrastructure including Deal railway station which offers train services to London St Pancras via Folkestone Central or Ashford; three trains every hour during peak times, and two trains every hour off-peak, taking only 1.5 hours to 2 hours. The Historic town of Sandwich is located approximately 5km to the north, which offers further services, leisure facilities and infrastructure.

Sandwich station is one train station stop north of Deal railway station. There are a number of further facilities of relevance to the site in close proximity. These include Northbourne CEP School (located approximately 1.25 km west of the site), Sholden C of E School (located approximately 2.5 km south of the site), a sports pitch to the north of the former Betteshanger colliery site, and Betteshanger Country Park to the east.

The site can be easily accessed by bus. The Stagecoach no.81 bus offers services from Deal through to Sandwich and stops along Broad Lane which is approximately five mins walk to the north of the site; the site is directly connected to Broad Lane by Public Right of Way EE367; while the Stagecoach no.80 bus stops along Sandwich Road approximately 7 mins walk to the east of the site. The no.80 and no.81 operate twice an hour, taking only 10-15 minutes from Deal town centre. Deal can be accessed from the site by both foot and bicycle. Beyond the former colliery site adjacent to this site, there are footpaths and cycle paths extending east along Betteshanger Road, joining to Sandwich Road (A258), and also linking directly to Betteshanger Country Park.

The site is also directly linked to the A258 and onward connections by PRoW EE368 and EE369 (see Appendix 1). Foot and cycle paths also extend north along Sandwich Road (A258). The footpath network extends through to Sandwich and beyond, connecting the site to other nearby settlements. The network of footpaths and cycle paths are considered to be safe for users, as they are mostly separate from the road and are also separate from each other allowing cyclists and walkers to avoid conflict/collision. Access to the wider road network is also easily achievable. The site is well connected to the motorways (M20 and M2) and the local road network (A2 and A256) which provides access to many of Kent's main town centres for example Canterbury, Sandwich, Ramsgate and Deal.

In short, the site's location between Deal and Sandwich means it is in close proximity to two significant town centres providing an excellent range of services, facilities and employment opportunities, as well as having good connections to day-to-day services nearby; while also being in commuting distance of London.

Land formerly known as Kent Salads therefore presents an opportunity to deliver development in accordance with the Council's spatial strategy which is deliverable and can accommodate around 30 dwellings, which is proportionate to Deal's status in the settlement hierarchy. We would therefore endorse allocation for residential development in the emerging Local Plan to meet DDC's housing needs.

Achieving Urban Regeneration and Delivering Social Infrastructure

Another key objective of the NPPF is to 'make effective use of land'. Paragraph 120 states that this can be achieved by encouraging the redevelopment of brownfield land and avoiding the development of greenfield land. As noted in the above section, the vast majority of growth for the town is planned to be delivered through the Whitfield Urban Expansion (SAP1); a significant urban extension beyond the settlement boundary for at least 5,750 homes in the north of the town. Clague Architects considers that the draft plan does not present enough opportunities for the redevelopment of brownfield land. Land formerly known as Kent Salads is predominantly brownfield land. The redevelopment of the Site would minimise the loss of greenfield land and bolster brownfield delivery, and is considered to be a significant opportunity for urban regeneration.

Ensuring the delivery of new homes

For a plan to be considered effective, the objectives and identified requirements must be deliverable and achievable. It is considered that, in its current form, the plan fails to accord with this part of the soundness test, due to over reliance on the Whitfield (SAP1) Strategic Allocation to provide the District's projected housing needs over the plan period. Therefore, to ensure the balanced and steady delivery of housing over the plan period, further Sites should be allocated to ensure that the needs of the district are met.

Whitfield Urban Extension (SAP1) is the largest allocation in the plan and it is expected to deliver over 5,750 dwellings. Of the 5,750 dwellings proposed for the Site, 3,483 dwellings are considered deliverable in the emerging Plan period. The Council acknowledges that the 2010 Core Strategy included provision for the Site to deliver 5,750 dwellings. Phase 1 of the SAP1 allocation (Dover ref. 10/01010) is underway and as of the 2020/2021 monitoring year, 185 dwellings had been completed with a delivery rate of approximately 50dpa for the past three years. Given this slow progress, it seems likely that although the existing outline planning permission should be completed over the Plan period, a more cautious approach should be taken in terms of the remaining dwellings allocated for the Site given its proven issues in delivering housing to date. Without clear evidence by way of a planning application for these additional dwellings, it is questioned whether Whitfield will ramp up to delivery of 120dpa from 2023/24 and then up to 200dpa from 2026/27 for the remainder of the Plan period. More consideration should therefore be made to the current planning position of the Site and the length of time it has taken so far to deliver housing. Paragraph 73D of the NPPF recommends the inclusion of realistic delivery rates within Local Plans, and DDC should therefore review those proposed for Whitfield and consider building more flexibility and more volume into the pipeline to be able to respond to delivery issues.

	<p>It is considered that, particularly with the deliverability issues of the Whitfield Urban Extension to date, additional Sites should be allocated for housing to ensure that there is sufficient choice and flexibility in the supply so that DDC can meet its housing requirement throughout the Plan period, as well as to meet the Government's objective to significantly boost the supply of housing as set out in Paragraph 60 of the NPPF. Land formerly known as Kent Salads would be an appropriate allocation which would assist in ensuring a variety of housing Sites are allocated in accordance with NPPF Paragraph 68. The provision of around 30 dwellings here would be suitable for the Dover district could support the delivery of housing to meet local needs.</p> <p>c. Conclusion</p> <p>Clague Architects wishes to support Dover District Council in bringing forward a successful, effective and sound Local Plan that can serve the District across the Plan period. In its current form, it is considered that the allocation of land formerly known as Kent Salads (the land subject of this representation) for residential redevelopment will strengthen the soundness of the Plan and the sustainability of the spatial strategy in the following ways:</p> <ul style="list-style-type: none"> • Making effective use of a brownfield site and thereby reducing reliance on greenfield site delivery • Improving the diversity and quality of housing in the Dover district by reducing the dependence upon a single location to deliver the majority of the town's growth; and • Boosting the delivery of housing in the Dover district and reducing the dependence upon a single location to ensure that the benefits of growth and regeneration are delivered across the town. <p>The site provides a unique opportunity to do so with the provision of around 30 dwellings. The site should therefore be considered for allocation for residential development.</p> <p>There are no significant constraints to the use coming forward.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>REPRESENTATIONS TO THE DOVER DISTRICT LOCAL PLAN REGULATION 19 CONSULTATION IN RESPECT OF LAND NORTH AND SOUTH OF KENNELS FARM, DEAL</p> <p>Clague Architects, on behalf of Quinn Estates, welcomes the opportunity to submit further representations to the Dover District Local Plan (Regulation 19 Consultation) in respect of Land South of Kennels Farm, Deal (hereafter referred to as 'the Site'). A Site location plan showing the extent of the Site is contained at Appendix 1 of this representation.</p> <p>Quinn Estates is disappointed to see that the Site has not been included as a housing allocation at this stage in the plan making process. The company believes that the Site offers an excellent opportunity for tempered expansion of the northern part of Deal town. The site lends itself to a housing scheme that can dovetail with the existing pattern of development without resulting in sporadic encroachment of the built form into the countryside. The result would be measured and contained expansion of the urban area providing much-needed family housing of significant value to the district in accordance with national planning policy. As such, a proposal of around 120 dwellings, if allocated in the new Local Plan, could be contributing towards meeting Dover District's housing need over the Local Plan period to 2040. The Site would therefore make a notable contribution to the District's short term housing targets, while helping to secure the achievement of annual housing targets through a broadened scope of deliverable housing Sites over the plan period.</p> <p>It is Quinn Estate's view that the current suite of allocations in the draft Plan would fail to provide a sufficient level of growth in and around the main settlements within the Dover district, and that the draft plan is over reliant upon a single urban extension to meet local housing needs. To ensure the soundness of the plan, further Sites, such as the one advocated in this representation, should be allocated to enable the Plan's ambitions for Dover to be delivered.</p> <p>a. Land South of Kennels Farm, Deal ('The Site')</p> <p>The site comprises approximately 3.3ha of land accessed via a track off Golf Road. It is located to the west of existing housing accommodation comprising Vlissingen Drive. It is within walking distance of Deal seafront and town centre. The site is not located within the Green Belt, nor is it located within the AONB or local landscaping designation. The site is located in Flood Zones 2 and 3.</p> <p>Deal sea front is situated less than 1km to the east of the site, with the town centre providing a wide variety of infrastructure including Deal railway station which offers train services to St Pancras via Folkestone Central or Ashford; three trains every hour during peak times, and two trains every hour off-peak taking only 1.5 hours to 2 hours. Historic Sandwich town is one train station stop north of Deal railway station.</p> <p>The site can be easily accessed by bus. It is approximately 250m from the Courtenay Rd bus stop on Golf Road which provides a no84 service between Deal and Sandown. Deal can be accessed from the site by both foot and bicycle. Access to the wider road network is also easily achievable. The site is well connected to the motorways (M20 and M2) and the local road network (A2 and A256) which provides access to many of Kent's main town centres for example Canterbury, Sandwich, Ramsgate and Deal.</p> <p>The public transport connectivity in the locality and easy access by a range of modes to local centres, villages and beyond adds to the attractiveness of this location and presents an opportunity to meet housing need identified in the District's Core Strategy.</p> <p>b. Reg 19 response</p>

Quinn Estates considers that the approach taken to the delivery of housing in the Dover district as set out within Table 4.1 of the Regulation 19 Submission Version of the Draft Local Plan is not a result of sound plan-making. It is considered that further Sites, including the Site subject of this representation, should be allocated to secure steady growth in the district, and diversify the type of housing that will be delivered across a wider range of Sites. The Site subject of this representation is a prime example of that, as it is deliverable within the short term, and would help secure key societal improvements and urban renewal, which the draft plan recognises that Dover is in urgent need of. As outlined below, the development strategy in its current form raises several issues, the vast majority of which could be addressed through the allocation of additional Sites across the district, including the Site.

Sustainability

The site is located partly within 'Land between the A256 and North Deal' (site ref. DEA012) as assessed in the HELAA (2020). The HELAA deems this wider site unsuitable primarily due to highways and access, but also identifies a number of other constraints including flooding, drainage, ecology, heritage and archaeology. It should be noted that the site would comprise a significantly smaller area of development than that originally put forward in the HELAA.

Notwithstanding the earlier HELAA assessment, Quinn Estates considers that this small element of DEA012 presents a unique opportunity for the provision of dwellings that could contribute to the district's housing needs. Draft Strategic Policy 2 (Housing Growth) projects a need of at least 11,920 net additional dwellings between 2020 and 2040. These are to be met through a combination of committed schemes, site allocations and windfall sites. The inclusion of this housing need figure in the draft Local Plan, alongside a 10% buffer, is accepted. It is crucial that the housing supply that is identified to meet and exceed this requirement in the emerging Local Plan is suitably varied in size and location, and is clearly supported with technical evidence that the allocated sites are deliverable and developable over the Plan period.

Draft Strategic Policy 2 sets out that the majority of development will be focused in Dover, then in Deal, followed by Sandwich and Aylesham. Development in remaining areas will be of a scale consistent with its position in the settlement hierarchy. The draft LP sets out further detail on the growth proposed for each settlement, with Dover identified as a Secondary Regional Centre that will accommodate 47.82% (3,592 dwellings) of the proposed housing allocations in the draft Plan (a total of 7,511 dwellings) with Deal (District Centre) following this, accommodating 7.38% (554 dwellings).

Land to the north and south of Kennels Farm, Deal therefore presents an opportunity to deliver development in accordance with the Council's spatial strategy which is deliverable and can accommodate around 120 dwellings, which is proportionate to Deal's status in the settlement hierarchy. It should therefore be allocated for residential development in the emerging Local Plan to meet DDC's housing needs.

Flood Risk

While the site is located in Flood zones 2 and 3, it is considered that in light of its locational benefits, the site would be at a sequentially preferable location for the nature and scale of development proposed as there will be no reasonably available sites of the same or similar capacity at lower risk of flooding that could provide the same benefits. As such, the proposal could meet the requirements of the Sequential Test as set out in Planning Practice Guidance.

The proposed residential scheme would be designed to be flood resilient with living accommodation at first floor level, and would incorporate a sustainable drainage scheme. As such the scheme would be designed such that it would be safe for its lifetime to both life and property and without increasing flood risk elsewhere. In light of this, Quinn Estates believes the proposal would provide wider sustainability.

benefits to the community that would outweigh the flood risk. The scheme could therefore meet the requirements of the Exception Test as set out in Planning Practice Guidance.

Ensuring the delivery of new homes

For a plan to be considered effective, the objectives and identified requirements must be deliverable and achievable. It is considered that, in its current form, the plan fails to accord with this part of the soundness test, due to over reliance on the Whitfield (SAP1) Strategic Allocation to provide the District's projected housing needs over the plan period. Therefore, to ensure the balanced and steady delivery of housing over the plan period, further Sites should be allocated to ensure that the needs of the district are met.

Whitfield Urban Extension (SAP1) is the largest allocation in the plan and it is expected to deliver over 5,750 dwellings. Of the 5,750 dwellings proposed for the Site, 3,483 dwellings are considered deliverable in the emerging Plan period. The Council acknowledges that the 2010 Core Strategy included provision for the Site to deliver 5,750 dwellings. Phase 1 of the SAP1 allocation (Dover ref. 10/01010) is underway and as of the 2020/2021 monitoring year, 185 dwellings had been completed with a delivery rate of approximately 50dpa for the past three years. Given this slow progress, it seems likely that although the existing outline planning permission should be completed over the Plan period, a more cautious approach should be taken in terms of the remaining dwellings allocated for the Site given its proven issues in delivering housing to date. Without clear evidence by way of a planning application for these additional dwellings, it is questioned whether Whitfield will ramp up to delivery of 120dpa from 2023/24 and then up to 200dpa from 2026/27 for the remainder of the Plan period. More consideration should therefore be made to the current planning position of the Site and the length of time it has taken so far to deliver housing. Paragraph 73D of the NPPF recommends the inclusion of realistic delivery rates within Local Plans, and DDC should therefore review those proposed for Whitfield and consider building more flexibility and more volume into the pipeline to be able to respond to delivery issues.

	<p>It is considered that, particularly with the deliverability issues of the Whitfield Urban Extension to date, additional Sites should be allocated for housing to ensure that there is sufficient choice and flexibility in the supply so that DDC can meet its housing requirement throughout the Plan period, as well as to meet the Government's objective to significantly boost the supply of housing as set out in Paragraph 60 of the NPPF. Land south of Kennels Farm, Deal would be an appropriate allocation which would assist in ensuring a variety of housing Sites are allocated in accordance with NPPF Paragraph 68. The provision of around 50 dwellings here would be suitable for the Dover district could support the delivery of housing to meet local needs.</p> <p>c. Conclusion</p> <p>Quinn Estates wishes to support Dover District Council in bringing forward a successful, effective and sound Local Plan that can serve the District across the Plan period. In its current form, it is considered that improvements can be made and that the allocation of land south of Kennels Farm, Deal (the land subject of this representation) for residential redevelopment will strengthen the soundness of the Plan and the sustainability of the spatial strategy in the following ways:</p> <ul style="list-style-type: none"> • Providing measured and contained expansion of the northern part of Deal town at a highly sustainable location • Creating a logical expansion of the urban area without resulting in unchecked encroachment of the built form into the countryside • Improving the diversity and quality of housing in the Dover district by reducing the dependence upon a single location to deliver the majority of the town's growth; and • Boosting the delivery of housing in the Dover district and reducing the dependence upon a single location to ensure that the benefits of growth and regeneration are delivered across the town. <p>The site provides a unique opportunity to do so with the provision of up to 120 dwellings. The site therefore should be allocated for the use proposed. Quinn Estates is the south east's foremost mixed-use developer with numerous development interests within Dover District, Kent and the wider South East area. The company has delivered both successful community extension schemes and stand-alone development sites both within rural and urban locations within the District. In addition, they are the largest provider of self and custom-build serviced plots in Kent. There are no significant constraints to the use coming forward. As such the site should be re-assessed against the new development proposal. Quinn Estates would welcome the opportunity to participate in the forthcoming Examination-in-Public into the Plan and to contribute to the debate to ensure that the best strategy for the District is found.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Iceni Projects, on behalf of Quinn Estates, welcomes the opportunity to submit representations to the Dover District Council Local Plan Regulation 19 Consultation in respect of a strategic proposal at Cottington (herein referenced as 'the Site'). This representation should be considered alongside and with regard to supporting technical appendices to this letter which comprise:</p> <ul style="list-style-type: none"> • Appendix 1 – Sketch Site Plan • Appendix 2 – Local Connectivity Plan • Appendix 3 – Transport Appraisal • Appendix 4 – Actual and Residual Flood Risk Plans <p>Collectively, these documents demonstrate that high quality growth of a scale commensurate to Deal's position within the settlement hierarchy can be suitably and successfully delivered at Deal. The proposals are a revision of the site previously put forward as part of the original Call for Sites and subsequent Regulation 18 Consultation, which included land within Flood Zone 3. The revised Masterplan is for a reduced level of growth that could be delivered in a way that successfully adapts to and mitigates against environmental issues at Deal. The scale of the proposal has been revised significantly throughout the Local Plan process, initially proposing 975 dwellings, the current submission now proposes up to 585 dwellings and addresses all constraints previously identified, including flood risk, wildlife designations and transport.</p> <p>The vision for the Draft Local Plan reflects the growing importance of new challenges facing local communities in regard to climate and ecological emergency, and greater emphasis on the protection and enhancement of retail, leisure, cultural and commercial development across the district area, and promoting the health and social wellbeing of communities. The corresponding objectives strive for a more prosperous economy, as well as vibrant new communities. Quinn Estates considers that there is much to welcome in the new Plan, however, the company considers the opportunity to deliver an appropriate and badly needed quantum of growth at Deal has not been positively planned for, and that the Plan would be strengthened by promoting additional growth at Deal.</p> <p>Quinn Estates considers that its proposal at Cottington presents a unique opportunity to deliver a transformative development of value to the District and that it should accordingly be allocated within the new Local Plan for residential led mixed-use development to contribute towards meeting Dover District's housing and employment needs over the Local Plan period to 2040.</p> <p><u>a. The Site and Surroundings</u></p> <p>The wider Site comprises approximately 200ha of land in various uses including agricultural fields, and fishing lakes and a country park (Betteshanger Park). The Site adjoins Sholden and Deal to the south, beyond the settlement boundary. The Site is bound by Sandwich Road (A258) and agricultural fields to the west and by agricultural fields and Fowlmead Farm to the north, with further fields</p>

and the HS1 rail line also located further to the east. To the south it is bound by the existing residential dwellings at Sholden and Deal. The land immediately to the south-east of the Site is currently being constructed for 230 dwellings by Persimmon Homes (planning permission ref. DOV/10/1012 and DOV/13/00945).

The Site is relatively flat, with the exception of Betteshanger Country Park which includes undulating landscaped areas of the former colliery spoil tip. The Site boundary excludes Cottington Court Farm and its curtilage. A Public Right of Way (PRoW) cuts across the Site from west to east around the edge of the residential dwellings at Sholden and along the bottom of the fishing lakes. The Country Park also includes a number of walking routes alongside mountain biking trails and a road cycling track. Existing access to the Site is from Sandwich Road to the west of the Site. Deal train station is located 1.5km walking/cycling distance to the east of the Site.

Most of Betteshanger Country Park and the fields fronting onto Sandwich Road are in Flood Zone 1. Whilst the land to the rear of Cottington Court Farm and the fishing lakes across to South Wall are located within Flood Zone 2 and 3, this land is mostly benefitting from flood defences. The Site is wholly within the Lower Stour Wetlands Biodiversity Opportunity Area, whilst the fishing lakes are located within the Sandwich Bay to Hacklinge Marshes SSSI and the Thanet Coast & Sandwich Bay Ramsar. These designations also incorporate land to the north-east and north-west beyond the site boundaries. The Thanet Coast & Sandwich Bay SPA is also located to the north-east of the site

b. The refined Site proposal

The Site was previously promoted in a different and larger form in the earlier stages of the Local Plan development but was not progressed due to matters of flood risk and drainage. Detailed work has been undertaken to demonstrate that Cottington is deliverable and that the potential constraints identified can be overcome.

The refined Masterplan for Cottington proposes the delivery of up to 585 new homes for Deal, and 2,030sqm of commercial floorspace in the northernmost parcel of the scheme. Cottington will also provide new premises to support the work of The Dover Outreach Centre charity to help rough sleepers, the homeless and those threatened with homelessness. Securing premises will be a crucial step for the charity to support their existing work. Cottington would also deliver new facilities for Deal and Betteshanger Rugby Club and secure funding for new facilities for Deal Town Football Club at their current location ensuring that both clubs can grow and expand their sporting offer, community use and outreach programmes. In addition, the Cottington proposal would also fund improvements for Deal Rowing Club at their current premises on Deal seafront.

Crucially, Cottington will have a fully independent drainage network adopted by a statutory undertaker to the point of discharge including environmental permits. Quinn Estates are in advanced discussions with Severn Trent Connect on this deliverable solution which would enable housing growth around Deal town to be unlocked without increasing the flow and burden on the Southern Water network in Deal and relieving residual pressure for higher levels of development in close proximity to smaller settlements within the district. It is also proposed that the Site delivers a primary school, complimentary commercial floorspace and an electric bus park and ride facility alongside a network of pedestrian and cycle infrastructure to stimulate sustainable travel patterns and strengthen connectivity between the settlement of Deal and the natural environment that adjoins it, including an expanded Betteshanger Country Park. The concept of creating a new community on the subject land is an intrinsic component of a wider strategy to establish Betteshanger Country Park as a thriving and successful health and community asset for the District.

c. Objection to Tables 3.3 and 4.2 (under the auspices of Policy SP3)

Quinn Estates considers that the spatial approach to the allocation of housing in Deal, as detailed in Tables 3.3 and 4.2 of the Regulation 19 Submission Version of the Draft Local Plan is not a result of sound plan-making. Quinn Estates consider that additional growth should be directed to Deal to reflect its position in the settlement hierarchy, deliver badly needed growth at the settlement and a more sustainable pattern of development. Accordingly, additional sites must be allocated to Deal in Table

4.2. The current approach to the development strategy raises several issues which can be addressed through the allocation of additional housing and employment growth to Deal, including the Site subject to this representation.

Sustainable distribution of growth

Sustainability is defined as 'meeting the needs of the present without compromising the ability of future generations to meet their own needs', and functions as a confluence of social, economic, and environmental factors. The vision for the District outlined in Paragraph 3.29 requires new development to be focused at accessible and sustainable locations which can utilise existing infrastructure, facilities, and services and to ensure that development contributes to the sustainability of local communities and services. When translating sustainability into site allocations, the Council should therefore ensure that new residents can reach established nearby town centres using sustainable modes of transport, to limit pollution arising from motor travel and to support the vitality of the existing community and local economy, without creating environmental harm.

Deal is recognised in the Draft Local Plan as the second largest settlement in the District, benefitting from a vibrant town centre, which benefits from a good level of accessibility and an attractive environment. It's well used by residents and visitors and has a low vacancy rate, as a result of the diverse retail offer. In addition, the town is highly sustainable in regard to public transport accessibility, being served by mainline rail, the high-speed train service to London and numerous bus routes. As the Transport Assessment appended to this letter notes, Deal has good connectivity within the town, as well as with wider areas in Kent and London.

Despite the sustainability of Deal, the Draft Local Plan approaches development for the town with caution. A total of 7 sites are allocated for development with a combined housing number of just 218 dwellings. This growth quantum is completely inconsistent with Deal's position in the settlement hierarchy and constitutes a disproportionately small increase in the town's size, given its population of circa 30,000. Moreover, the growth quantum assigned is more akin to that of a rural settlement with limited services, population and potential to achieve sustainable development.

It is our contention that the level of growth identified for Deal is insufficient for its position as the second most sustainable location in the District, and that the Council's strategy has skewed large amounts of growth away from one of the most sustainable locations to areas that are far less sustainable, with rural areas with lesser sustainability taking a higher housing number than the second largest settlement. The justification for channelling so little growth to Deal is not considered to be justified by evidence, when all the evidence points to the settlement being such a logical and sustainable location to channel growth to. The principles of sustainability and sound plan making appear to have been absent in key decision taking over spatial choices at the heart of the spatial strategy presented in the draft Plan.

Deal's connectivity to public transport and strategic highway infrastructure means that the settlement clearly offers greater scope to sustainably accommodate growth than has been identified in the Plan.

Quinn Estates recognises that there is land with environmental constraints at Deal, but the land at Cottington represents a significant strategic site that can sustainably and successfully deliver a vibrant mixed-use community in a manner that respects and mitigates environmental constraints and this opportunity has been overlooked in the preparation of the Plan.

Addressing identified constraints

Paragraph 4.153 of the Draft Local Plan states that 'limited site allocations have been identified in Deal due to the constraints that exist including: flood risk, wildlife sites, heritage and highways. In accordance with SP3, development in Deal should be compatible with the level and range of job opportunities, shops, services and other facilities available.' We contend that the constraints identified by the Council as the cause for the lack of site allocations to Deal are typical constraints facing any seaside town, namely flood risk, wildlife sites, heritage and highways. These constraints should not be considered insurmountable as to rule out housing growth for Deal.

The suite of technical assessments submitted with this representation letter outline how constraints at Cottington can be appropriately addressed to deliver a sustainable mixed-use scheme. The proposals for the Site have been refined to remove land from areas of residual flood risk, as detailed in the plans appended to this letter. The Transport Appraisal outlines how highways and traffic do not represent a significant constraint for Deal, stating:-

The modelling confirms earlier assertions that the traffic network in Deal is not currently, nor is forecast in the future, to be subject to significant capacity constraints. Furthermore, it is anticipated that the current and reduced development quantum on the site would result in a slight improvement in the operation of the surrounding network compared with the higher quantum incorporated within the model assessment. Although the development proposal focuses on supporting and encouraging a wide- spread shift of travel patterns to sustainable modes, it will also seek to have a minimal impact on the highway network.'

Moreover, the Transport Appraisal finds that the proposed development would not result in severe impact on the local highway network. The development would deliver an extensive and innovative package of sustainable travel measures, including a car-free Sustainable Movement Corridor linking the development directly to the centre of Deal, prioritising movement for walking, cycling and by electric bus, supporting a wider shift in transport patterns to active modes, as well as relieving pressure on the A258 movement corridor into and out of Deal town as stated in the extract from the Transport Appraisal below:-

'The development would deliver an extensive and innovative package of sustainable travel measures, including a car-free Sustainable Movement Corridor linking the development directly to the centre of Deal, prioritising movement for walking, cycling and by bus. This will be supported by a Sustainable Movement Hub allowing the benefits of the new corridor to be used by others travelling to the centre of Deal and allow such trips to be intercepted and mode shifted before entering the town – reducing car travel and improving connectivity on the A258 corridor.'

The scheme proposes substantial open space and ecology habitat provision, including new semi- natural open space within existing arable land whilst securing long-term ecological management of the existing Betteshanger Country Park and Cottington Lakes.

Approximately 13ha of natural open space is proposed in association with the residential development parcels, forming areas for new habitat creation including wildflower grassland, mixed scrub and woodland planting and pond creation. Based on habitat creation within these areas, it is considered that a biodiversity net gain of up to 20% can be achieved within the development parcels alone. Cottington Lakes, totalling around 50ha, is to be established as a dedicated area for wildlife and ecological enhancement, with measures such as naturalising existing fishing lakes and sensitive grassland and woodland management providing substantial wildlife benefits. The development would enable enhanced management of the existing Betteshanger Country Park in accordance with its various open space, cultural and wildlife interests, allowing for a site-wide ecological management plan, additional wardening and habitat enhancement projects.

Together, these measures will provide in the region of 150ha of open space, forming a substantial green infrastructure resource linking to existing wildlife habitats within the surrounding Sandwich Bay ecological designations.

The key site constraints referenced by the Council when discounting the site at Regulation 18 stage have therefore been addressed, and we respectfully request that the reduced and revised scheme is re-assessed.

The Council's assessment of land at Cottington

As part of the preparation of the Local Plan the Council identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA), which provides an assessment of how different options perform in environmental, social, and economic terms, to help inform which option should be taken forward. The Council's Sustainability Appraisal scores the principle of housing at the wider proposal for this site positively across effects on housing, access to services and facilities, economy, sustainable transport and climate change mitigation (site ref: DEA012A). The employment proposals for the Site similarly score well.

The sustainability of the Site is clearly demonstrated in the Transport Appraisal submitted with this representation, which concludes that development of the Site represents a 'forward-thinking proposal, bound into a strong sustainable ethos with the inclusion of a package of sustainable transport measures.' The sustainable movement corridor proposed for walkers, cyclists and buses will provide an attractive, purpose built, shorter alternative route to Deal town centre. This will benefit both new and existing residents at Deal, as well as opening up options for current users of the A258, potentially relieving pressure on this corridor into the town.

Whilst the site scored poorly on flood risk, the assessment considered a land area to accommodate in the region of 1,200 homes, with no consideration given as to whether a lower level of growth could be accommodated outside of areas of actual and residual flood risk, as currently embodied by the Cottington proposal.

New market and affordable housing delivery

Paragraph 35 of the NPPF outlines how plans are effective where they are found to be deliverable over the plan period. The disproportionately high dependence on Whitfield Strategic Allocation (SAP1) results in a plan which raises considerably uncertainty as to this key soundness test.

Quinn Estates has no objection to large-scale housing development at strategic sites playing an important role in meeting housing need. However, what looks good on paper needs to deliver in practice. However, in a District like Dover where there is a need for the benefits of growth to translate across the District, the spatial strategy should be seeking to unlock growth and inward investment at other key settlements, such as Deal, and this is a significant weakness of the Plan in its current form.

Spatial strategies should reflect that building homes is a complex and risky business. Stronger local markets have higher annual delivery rates, and where there are variations within districts, this should be factored into spatial strategy choices. Further, although large sites can deliver more homes per year over a longer time period, they also have longer lead-in times. Research by Lichfield1 found the average lead in time for large sites prior to the submission of the first planning application is 3.9 years

This issue with delivery is found to be the case with Whitfield. The delivery of Whitfield is hampered by its reasonably isolated location away from existing services and facilities. The allocation of this site has not been based on a demand for houses in this area, and has resulted in slow delivery, a need for huge infrastructure investment and public intervention for the new FastTrack rapid transit bus service to facilitate the site's sustainability.

Of the 5,750 dwellings proposed for the allocation, 3,483 dwellings are considered deliverable in the emerging Plan period. The Council acknowledges that the 2010 Core Strategy included provision for the Site to deliver 5,750 dwellings. Phase 1 of the SAP1 allocation (Dover ref. 10/01010) is underway and as of the 2020/2021 monitoring year, 185 dwellings had been completed with a delivery rate of approximately 50dpa for the past three years. Given this slow progress, it seems likely that although the existing outline planning permission should be completed over the Plan period, a more cautious approach should be taken in terms of the remaining dwellings allocated for the site given its proven issues in delivering housing to date.

Without clear evidence by way of a planning application for these additional dwellings, it is questioned whether Whitfield will ramp up to delivery of 120dpa from 2023/24 and then up to 200dpa from 2026/27 for the remainder of the Plan period. More consideration should therefore be made to the current planning position of the Site and the length of time it has taken so far to deliver housing. Paragraph 73D of the NPPF recommends the inclusion of realistic delivery rates within Local Plans, and the Council should therefore review those proposed for Whitfield and consider building more flexibility and more volume into the pipeline to be able to respond to delivery issues.

It is considered that, particularly with the deliverability issues of the Whitfield Urban Extension to date, additional sites should be allocated for housing to ensure that there is sufficient choice and flexibility in the supply so that the Council can meet its housing requirement throughout the Plan period, as well as to meet the Government's objective to significantly boost the supply of housing as set out in Paragraph 60 of the NPPF.

The delivery of affordable housing also paints a bleak picture within the District. The Council's existing policy on affordable housing, DM5 of the Core Strategy (2010), requires residential development of 15 or more dwellings to provide 30% of the total homes as affordable homes and the Council's affordable housing strategy remains unchanged, save for reducing the requirement to deliver affordable housing within Dover town. The latest Authority Monitoring Report (2020-2021) profiles how the affordable housing policy has consistently struggled to deliver sufficient levels of affordable housing, with the average being 20%. The failure to deliver sufficient affordable housing is set against a backdrop of worsening affordability in the District. Affordability ratios for Deal show a continued trend of worsening to 9.25 in 2021, with year-on-year worsening from 2012-2018. For the lowest earners, this reaches 9.62 in 2021. The District is less affordable than the national average of 9.05. Median house prices in the District have soared to £285,000, compared to the UK average of £278,000.2 In addition, statutory homelessness within the District sits at 137 people and 136 households, 68 with children, are in temporary accommodation within the District as of 2021.3 Whilst there may be a number of factors contributing to these outcomes, a new spatial strategy that identifies limited housing at Deal is going to deliver limited affordable housing at Deal and the absence of housing will only exacerbate local affordability pressures.

A compelling case can therefore be made for additional sites to be allocated for housing both at Deal and in the wider District to assist with alleviating the affordability issues facing the town and wider District. The development of Cottington would assist in ensuring a variety of housing sites are allocated in accordance with Paragraph 68 of the NPPF, the provision of circa 585 homes would be proportionate to the size of the town, and the provision of circa 176 affordable homes at Deal would likely have a significant beneficial effect in addressing local affordability needs.

d. Conclusion

On behalf of Quinn Estates, we thank you for the opportunity to contribute to the Dover District Local Plan Regulation 19 Consultation.

The current approach to the spatial strategy in the Draft Local Plan requires amendment to address a significant soundness issue concerning the level of growth identified for Deal, the District's second largest settlement. It is considered that the Plan currently fails to positively plan for a commensurate level of housing and employment at the settlement, as expressed in Policy SP3 and that the available evidence does not support or justify this approach. Moreover, the evidence does support channelling greater quantum of growth to Deal.

Quinn's proposal at Cottington constitutes a sustainable location for growth owing to its existing connections to public transport, proposed electric bus route, mixed use village centre, network of pedestrian and cycle infrastructure, relocated primary school and commercial floorspace to deliver a truly mixed-use scheme which would bring economic, social and environmental benefits to existing and future residents. The latest Masterplan can deliver a holistic development of significant benefit that addresses and sufficiently mitigates identified environmental issues at the settlement and the evidence profiling this opportunity enables the authority to evolve the Plan to provide a more commensurate level of growth to this important town.

Cottington represents the only sustainable and deliverable option at Deal to reflect the settlement's position in the hierarchy and for the settlement to play its proportionate role in meeting the District's growth requirement. The proposed development would provide early and accelerated delivery through multiple outlets, including affordable housing to address local affordability pressures, which the current draft Plan fails to address.

Finally, as set out above and detailed in the appended documents, there are no significant constraints to the development coming forward as proposed. As such the site should be re-assessed against the new development proposal and using the updated evidence base provided. It is considered that if the Council undertake this work and consider the potential of Cottington to help Deal play a more proportionate role in meeting the District's growth in line with its position in the settlement hierarchy and status as a main town, a compelling case will exist for allocating the land for development in the emerging Local Plan.

I trust that these comments are of assistance and that these representations will be taken into account in consideration of the current consultation. Quinn would also welcome the opportunity to participate in the forthcoming Examination-in-Public into the Plan and contribute to the debate to ensure that the best strategy for the District is found.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Include Cottington, Deal site in the Local Plan
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

REPRESENTATIONS TO THE DOVER DISTRICT LOCAL PLAN REGULATION 19 CONSULTATION IN RESPECT OF LAND NORTH OF BETTESHANGER COUNTRY PARK

Iceni Projects welcomes the opportunity to submit further representations to the Dover District Local Plan (Regulation 19 Consultation) on behalf of the landowner in respect of land to the north of Betteshanger Country Park (hereafter referred to as 'the Site'). A Site location plan showing the extent of the Site is contained at Appendix 1 of this representation.

We were disappointed to see that the Site has not been included as a housing allocation at this stage in the plan making process. We consider that the Land to the north of Betteshanger Country Park site presents a unique opportunity to deliver a sustainable development of rural holiday accommodation which would be of significant value to the district in accordance with national planning policy. We believe the site should be allocated within the new Local Plan for approximately 68 holiday units to contribute towards meeting Dover District's tourism accommodation need over the Local Plan period to 2040.

The current suite of allocations in the draft Plan would fail to provide a sufficient level of growth in and around the main settlements within the Dover district, and that the draft plan is over reliant upon a single urban extension to meet local housing needs. To ensure the soundness of the plan, further Sites, such as the one advocated in this representation, should be allocated to enable the Plan's ambitions for Dover to be delivered.

a. Land North of Betteshanger Country Park ('The Site')

The site comprises approximately 7.8ha of land. It is located to the north-west of Deal, bordering the northern fringe of Betteshanger Country Park. Creation of the country park was approved through SEEDA's 2002 planning application for the regeneration of the former colliery lands. The country park provides a variety of activities including walking, cycling and orienteering, as well as a play area, partially completed visitor centre and road and mountain biking circuits.

It is envisaged that access would be provided through the country park. It lies immediately north of the car parking area and visitor centre serving the country park. South west of the country park is the A258 Sandwich Road running roughly north to south, beyond which lies the former Betteshanger Colliery site. Betteshanger Country Park site is accessed via a lane which has excellent access links to the A258. The A258 in turn provides access into Deal to the south and Sandwich to the north.

The site is not located within the Green Belt, nor is it located within the AONB or local landscaping designation. The site is located in Flood Zones 2 and 3.

b. Reg 19 Response

Dover's Adopted Core Strategy acknowledges that the tourism sector in the district is underdeveloped, and that the rural area has an important role to play in providing choice in the housing and business markets. It sets out that opportunities to improve tourism revolve around making better use of historic and natural assets such as Betteshanger Country Park and Sandwich and Deal town centres. The strategy notes that many of these assets are spread apart and new ways of connecting them to encourage visits to a network of attractions rather than a single one, as at present, need to be developed.

The National Planning Policy Framework (NPPF) promotes the supporting of a prosperous rural economy. It states that planning policies should enable sustainable growth and expansion of all types of businesses in rural areas through conversion of existing buildings and well-designed new buildings; and should enable sustainable rural tourism and leisure developments which respect the character of the countryside.

The site is located partly within 'Land between the A256 and North Deal' (site ref. DEA012) as assessed in the HELAA (2020). The HELAA deems this wider site unsuitable primarily due to highways and access, but also identifies a number of other constraints including flooding, drainage, ecology, heritage and archaeology. It should be noted that the site would comprise a significantly smaller area of development than that originally put forward in the HELAA.

Notwithstanding the earlier HELAA assessment, Iceni Projects considers that this small element of DEA012 presents a unique opportunity for the provision of a scheme of appropriately-designed and landscaped rural holiday accommodation that could complement the leisure offering of the neighbouring Betteshanger Country Park. The scheme would afford visitors to this part of the district

the opportunity to benefit directly from the facilities of the country park – popular in particular with cyclists, hikers and families – as well as excellent access to the many attractions of Deal, Sandwich and the surrounding villages.

The site is considered to be located sustainably for the nature and scale of development proposed. Deal is situated approximately 2.7km south of the site, which provides a wide variety of infrastructure including Deal railway station which offers train services to St Pancras via Folkestone Central or Ashford; three trains every hour during peak times, and two trains every hour off-peak taking only 1.5 hours to 2 hours. Historic Sandwich town is located approximately 4km to the north. Sandwich station is also located to the north of the site which is one train station stop north of Deal railway station. The site can be easily accessed by bus. The Stagecoach no. 80 bus stops along Sandwich Road 7mins walk to the east of the site. The no.80 operates twice an hour taking only 10-15 minutes from Deal town centre. Deal can be accessed from the site by both foot and bicycle. There are footpaths and cycle-paths extending west along the country park access roads, joining to Sandwich Road (A258), which has foot and cycle paths extending north. The footpath network extends through to Sandwich and beyond, connecting the site to other nearby settlements. The extensive network of footpaths and cycle-paths are considered to be safe for users, as they are mostly separate from the road and are also separate from each other allowing cyclists and walkers to avoid conflict/collision. Access to the wider road network is also easily achievable. The site is well connected to the motorways (M20 and M2) and the local road network (A2 and A256) which provides access to many of Kent's main town centres for example Canterbury, Sandwich, Ramsgate and Deal. The site's unique location between Deal and Sandwich means it is in close proximity to two significant town centres providing an excellent range of services and facilities, as well as having good connections to London via Deal or Sandwich railway stations.

The public transport connectivity in the locality and easy access by a range of modes to local centres, villages and beyond adds to the attractiveness of this location for a bespoke rural tourism offer and presents an opportunity to meet under-provision identified in the District's Core Strategy.

Flood Risk

As set out above, the site has direct access to the visitor centre and the wider Betteshanger Country Park. It also has excellent access to the A258 which, in turn, provides access to Deal and Sandwich. While the site is located in Flood zones 2 and 3, it is considered that in light of its locational benefits, the site would be at a sequentially preferable location for the nature and scale of development proposed as there will be no reasonably available sites at lower risk of flooding that could provide the same benefits. As such, the proposal could meet the requirements of the Sequential Test as set out in Planning Practice Guidance.

The proposed holiday homes would be designed to be flood resilient with living accommodation at first floor level and above, and would incorporate a sustainable drainage scheme. As such the scheme would be designed such that it would be safe for its lifetime to both life and property and without increasing flood risk elsewhere. In light of this, Icen Projects believes the proposal would provide wider sustainability benefits to the community that would outweigh the flood risk. The scheme could therefore meet the requirements of the Exception Test as set out in Planning Practice Guidance.

c. Conclusion

In order to ensure that a sound Local Plan can be adopted, it is key that Dover District Council identifies sufficient sites to meet its housing needs throughout the entire Plan period, while promoting its underdeveloped tourism sector. Its emerging policy should enable sustainable growth and expansion of all types of business in rural areas, both through conversion of existing buildings and well-designed new buildings; and should encourage sustainable rural tourism and leisure developments which respect the character of the countryside.

Land to the north of Betteshanger Country Park provides a unique opportunity to do so with delivery of approximately 68 holiday homes adjacent to the existing tourism facility and with excellent access to both Deal and Sandwich town centres. The site therefore should be allocated for the development proposed. Icen Projects has extensive experience in bringing forward sustainable and high-quality schemes in the District and would seek to bring forward an application at the earliest opportunity to

	<p>assist in meeting an undersupply of tourism accommodation as identified in the District Core Strategy. There are no significant constraints to the development coming forward. As such the site should be re-assessed against the new development proposal. Icen projects would therefore urge Dover District Council to undertake this work and consider the potential of Land north of Betteshanger Country Park to help contribute to the district's under-developed tourism provision.</p> <p>We hope that these comments are of assistance and that these representations will be taken into account in consideration of the current consultation. We also confirm that we would like to be involved in future stages of the plan-making process.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Extracted from Rep form)</p> <p>HELAA site DEA009 has been omitted whilst SAP16 has been included. No objection to SAP16. Analysis and representations on attached sheets as to why DEA009 should be included.</p> <p>(DDC Note - Extracted form Attachment. This representation may include maps and images which have not been copied across and can be seen in the attachment)</p> <p>1. Introduction.</p> <p>1.1 EnergyArk Development Limited act on behalf of Ripple Farms Ltd the owners of the land subject to this submission.</p> <p>1.2 The land at Coldblow, identified on the plan below, is to the south of the junction of Station Road and Coldblow Lane leading south from the crossroads to the level crossing. It is bounded on the eastern side by Bridleway Riding School and the Deal-London high speed railway line. At the southern end is a Network Rail transformer installation in an area of woodland. It is open agricultural land of two connected parts. The northern section has an area of 0.9ha (2.23acres) and the southern triangle is 1.58ha (3.9 acres).</p> <p>1.3 Following the call for land through the Local Plan process a HELAA form was submitted putting the land forward for housing development. It was identified in the "DDC Housing & Economic Land Availability Assessment December 2020" in Appendix 1 as site DEA 009.</p> <p>1.4 In Appendix 2 of that document, it was excluded from further consideration for the reasons that there was "unacceptable landscape impact, limited accessibility, poorly related to Deal".</p> <p>1.5 We considered that the assessment did not take into account wider issues that impacted on the site and the area. These included the proposal for 100 houses granted under reference DOV/20/01125 to the north of Station Road, which did not raise objections on landscape impact, although being a higher, elevated and more open site.</p> <p>1.6 Consequently, we submitted a comprehensive Pre-Application Enquiry, which is Appendix 1, your reference PE/21/00011. The enquiry was being dealt with by Benazir but appeared to have been taken over by Lucinda Roach. We held a meeting with Lucinda which highlighted several issues which we responded to by letter dated 22/02/2020, Appendix 2.</p> <p>1.7 During this period, we had informal talks with the owner of Bridleway Riding Stables as it appeared good planning to look at a comprehensive solution to the access issues of Station Road. These were not however fruitful.</p> <p>1.8 An exchange of e-mails took place with Stewart Watson regarding both the inclusion of Coldblow in the Regulation 18 document and holding a site meeting, which could have occurred as part of the Pre-Application procedure. Neither of these happened.</p> <p>2. Regulation 19.</p> <p>2.1 The publication of the Regulation 19 Submission includes two sites in the vicinity of Coldblow one of which had not been identified in the Regulation 18 submission, these are sites SAP14 and SAP16.</p> <p>2.2 SAP14 comprises land off Cross Road/Ellens Road, with an estimated capacity for 100 dwellings. It is recognised in Policy SAP14 that it would have a landscape impact and would significantly extend the built-up area of Deal, and that significant highway improvements would be required to both Cross Road and Station Road.</p> <p>2.3 SAP 16 includes Bridleway Riding School at TC4S008 with an indicative capacity of 25 dwellings. It is recognised that a Traffic Assessment would be required and that a pedestrian footway would be required along the Station Road frontage.</p> <p>3. Analysis.</p> <p>3.1 As set out in 1.4 above, the Coldblow site was excluded from consideration for the three reasons of landscape impact, limited accessibility and being poorly related to Deal. Taking these three issues individually, the potential landscape impact must be seen in the context of SAP 14 and the Bridleway Riding School (BRS) and their potential landscape impact. SAP 14 is an extremely open site which will require extensive mitigation to reduce landscape to an acceptable level. BRS largely relies on the Coldblow site protection. The pre-application documentation contained an extensive Landscape Strategy which included owned land to the west of the lane to provide intensive tree planting. This would also be to the benefit of BRS site.</p> <p>3.2 Limited Accessibility. It is recognised in the Regulation 19 submission that both identified sites have access issues which require comprehensive solutions. This is no different to Coldblow which can deliver both pedestrian and cycle access along the northern frontage. A combined solution to the Station Road frontage would be good planning.</p> <p>3.3 Relationship with Deal. It is hard to give substantial credence to this objection when the urban boundary is proposed to be extended for the first time to the west of Cross Road. Coldblow as a site is constrained by the railway line and level crossing and both Station Road and Coldblow lane. It could not lead to further leakage of urban growth into the countryside. SAP14 opens the door for further growth to the west.</p>

	<p>4. Conclusions and Submissions.</p> <p>4.1 The Regulation 19 Submission has taken forward future development in this part of Walmer. In doing so it has demonstrated that the previous objections to the proposed development of Coldblow, as set out in the pre-application documents, not only can be overcome but have been demonstrated that they have been overcome.</p> <p>4.2 It is an appropriate time for the site to be formally recognised as being able to make a significant contribution to affordable housing in Deal and Walmer for which reference to the pre-application documentation should be made.</p> <p>4.3 It is submitted therefore that the land at Coldblow, originally identified as site DEA 009 be included as a formal allocation in the Plan before it is placed before an Inspector.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>addition of the land at Coldblow DA009 as an allocated residential site.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>to examine why the site has not been included</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP14
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	This site is wide open to views from public footpaths across the valley and will cause severe adverse landscape impact. At the moment Deal is mainly seen as a line of building on the top of the ridge from up to 2 miles away. Development here will be seen as urban sprawl down an open slope for which no adequate mitigation is possible. Acces is proposed from a single track road with passing places which connects to other single track roads with passing places leading to junctions at Station Road/Dover Road or Manor Road London Road which are operating at or above capacity with minimal or no mitigation possible.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	In the valuable views of this side of the valley are to be foregone, development needs to be in line with a masterplan that would provide a new access to Dover Road without using Station Road. That would require a spine road through this site which would be prejudiced by development of it now.

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	This site should be substituted with DEA009 which was rejected at the HELA stage because of landscape impact, accessibility. DEA009 is hidden from the long views that SAP14 is exposed to and can be made more accessible if developed in conjunction with TC4S008.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To answer questions not anticipated by the written response and provide additional explanations and clarifications.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Ray's Bottom SAP15 (WAL002)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	This site was rejected for building purposes in 2012 on the grounds of the current discharge system quickly over flows and the proposed Development would have an impact on local properties. Road is subject to flooding by storm water. See file #1. This site was deemed in 2012, see (SHL072), unsuitable for residential development due to traffic impacts on the wider road network. The road is single track with high verges not permitting construction of pavements, and inadequate highway access in all directions to this site. Local amenities could not be accessed safely on foot by school children, pushchairs, or users of mobility vehicles.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	A complete overhaul of the drainage system from Ray's bottom down to Beach Road Deal. Widen the single tracked road for two lanes, this would mean purchase of farm land and considerable construction from Ray's Bottom to Osborne Road, Kingsdown.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Gladman is promoting land west of Cross Road, Deal (DEA008) for residential development. The site measures 8.6ha and is currently subject to planning application 21/01822: "Outline planning application for the erection of up to 140 dwellings including affordable housing, with public open space, landscaping, and vehicular access (all matters reserved except for access)." The site can be sustainably developed without any unacceptable impacts on the natural or built environment. Any proposals will be set within a comprehensive framework of new and retained green infrastructure, helping to assimilate the new built development into its setting.</p> <p>Landscape</p> <p>Landscape The site is not subject to any landscape quality designations and lies outside of the National Park, AONB and locally designated landscape areas. The site, nor the immediate landscape contains any rare or unusual landscape features and the LVIA submitted as part of the planning application confirms that the site and local landscape have the capacity to accommodate the development proposed. The scheme will be suitably designed to compliment the settlement's edge and will not give rise to any unacceptable landscape and/or visual harm.</p> <p>Ecology</p> <p>The ecological appraisal prepared by FPCR and submitted with the planning application confirms that the proposal will not lead to a likely significant effect on the integrity of the nearby SPA, SAC and Ramsar sites, subject to the provision of on-site green infrastructure including drainage swales, tree and hedgerow planting and a dedicated habitat area. The scheme will also be developed to secure an overall net gain in biodiversity.</p> <p>Heritage</p> <p>The Heritage Assessment undertaken by Pegasus confirms that there are no archaeological remains of concern within the site and that no harm will be caused to any heritage assets within the vicinity of the proposed development.</p> <p>Flooding and Drainage</p> <p>The site falls within the EA Flood Risk Zone 1 (i.e. land assessed as having a less than 1 in 1,000 annual probability, or <0.1% chance of flooding). The FRA submitted in support of the application details how the scheme incorporates SUDS that will manage to outfall of water from the site to the 1 in 100 year flood event with additional allowance for climate change.</p> <p>Benefits</p> <p>The proposal offers the opportunity to deliver multiple benefits to the area. It will deliver much needed, new, quality family homes in a community where people wish to live, in a sustainable location close to a variety of services and facilities. The site will also provide new areas of public open space and a children's play area. The provision of 30% affordable housing in an area where there is an existing unmet need that is unlikely to be delivered through alternative means is also a significant benefit of this scheme. The build cost of the development is expected to be around £13,325,935, and the build phase of the development is expected to support 311 full time equivalent jobs. Longer term, expenditure of the new residents is estimated to be upwards of £5 million per year to support local services and facilities. The new residents will increase demand for, and use of local services and businesses and increased spending will help to protect and maintain their vitality. A range of environmental impacts will result from development at this location as the scheme will provide a 10% net gain in biodiversity through the creation of a specific wildlife habitat area, on site mitigation strategies and enhancements including additional planting of native species and hedgerows. On site SuDS will improve the surface water flood risk whilst contributing to biodiversity enhancements.</p> <p>(DDC Note - Text Extracted from Document sent from Gladman Developments Ltd. Full attachment can be found under the introduction comment reference SDLP1192)</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	for clarity and to acknowledge the permitted development to the east of Cross Road, Gladman consider Land West of Cross Road, Deal a more suitable allocation title.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Gladman are actively promoting land to the west of Cross Road, Deal and would therefore request a seat at the table to have detailed discussions regarding the suitability of the sites allocation.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Gladman strongly support the inclusion of Land off Cross Road, Deal as an allocation for residential development. Gladman consider this is a suitable and deliverable location for development.</p> <p>The site is subject to a current application: 21/01822. Many of the technical considerations for the site are evidenced in the accompanying suite of reports and Gladman are working proactively with the Council, County Council and other statutory consultees to resolve any outstanding issues.</p> <p>Gladman have previously discussed the site with the Council and identified a number of issues that would need to be addressed, as far as possible, before this consultation. These issues are centred around land contamination, flood risk and highways and are also being addressed with the planning officer as the application progresses.</p> <p>Land Contamination</p>

	<p>Land Contamination A report by RSK has confirmed that there is a moderate/low risk of potential contamination across the site. The report noted that standard investigation works should be undertaken as part of a Phase II intrusive ground investigation to address the potential contaminant linkages identified within the desk study and to provide further geotechnical information.</p> <p>Flood Risk</p> <p>consultants RSK have been commissioned to undertake a Flood Risk Assessment and Outline Drainage Strategy for proposed residential development at this site. The report (October 2021) concludes that the developable area of the site is wholly within Flood Zone 1 and therefore the proposed development passes the Sequential Test and does not require the Exception Test. In general the developable areas of the site are at low risk of flooding from all sources of flooding and will not increase the risk of flooding elsewhere as a result of development. The SuDS strategy for the site includes the use of a SuDS treatment train. Run off from impermeable surfaces will be directed to swales within the site which will carry water to an attenuation pond. When the pond is at capacity, surface water runoff will discharge to an infiltration basin. With these mechanisms in place, Gladman consider that the allocation west of Cross Road is acceptable with regard to flooding and drainage.</p> <p>Highways</p> <p>Gladman previously submitted comments regarding highways at this location and secured highways improvement schemes through the consented application to the east of Cross Road, Deal. The site access junction will be similar to that of the consented vehicular access point on the permitted site east of Cross Road. This will accord with current design guidance, and it was concluded that the vehicular access strategy was appropriate. The traffic generated by the site can be accommodated on the local highway network and will have minimal impact on the safety and operation of the network. With regard to pedestrian routes from the site, the report outlines that safe and suitable routes are provided for pedestrians to access the site. These routes are fully addressed in the application associated with this site. Gladman are working closely with the Council and Kent County Highways to resolve any outstanding highways concerns and negotiate appropriate contributions towards any required highways works.</p> <p>(DDC Note - Text Extracted from Document sent from Gladman Developments Ltd. Full attachment can be found under the introduction comment reference SDLP1192)</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	WAL002
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	There have been no changes to the site between this site as SAP15 in the 2012 version and the current one. The 2012 version was rejected on the grounds of drainage and road access and therefore DDC is deying thier own categorisation of the site unsuitability and contradictory to the NPPF.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	DDC must properly reconsider the recommendations made in 2012 which deem this site unsuitable.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	It is incompatible with SP4;S371 Separation of Settlements and the need to prevent villages coalescing to protect landscape character. Secondly it is unsound as its selection is incompatible with the statements in SP14 relating to biodiversity connectivity as this valley bottom is already functioning as a vital point of biodiversity connectivity as referred to in SAP15, the northern and western boundaries, close to BOA Hawkshill Freedown, are key to biodiversity connectivity. 4.158 mis-names Hawkshill Freedown, which in fact it is an SSSI because it is globally rare, chalk-downland habitat (not just the open field in the DDC text). For decades volunteers with Walmer Council have lovingly protected this rare habitat, its justification as a BOA totally justified. Also it is very valuable as a flood sponge, so SAP15 is unsound. Thirdly due to this Ray's Bottom drains in a northerly direction to the whole area immediately north of Walmer Castle which is well-known to flooding. Lastly, the Highways assesment of this site is unsound because S4.160 fails to note that Liverpool Road is a single lane road (changing its name to Glen Road) with passing places which become gridlocked with traffic from Kingsdown Primary School twice a day.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	As noted above, I am totally opposed to this proposal so would not wish to suggest any modifications.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>To treat this site as being suitable for housing is not consistent with the Council's decision in 2012/13 that it was not suitable when nothing has changed since then. There is no explanation of this despite objections to the first draft of the Plan. Other objections of "unsoundness" are set out in the attached letter.</p> <p>DDC Note: Mr Stickles supports Kingsley Smith Solicitors Comments (SDLP 3321379, 1380, 1381, 1382, 1383). He attached a letter stating the following:</p> <p><i>After consulting our 55 neighbours on the estate we have been asked to oppose the inclusion of land at Ray's Bottom as suitable for housing development and we wish to make it clear that we fully endorse the objections put to the Council by the neighbours most directly affected in the letters dated 9 th March 2021 and 1 st December 2022 from Kingsley Smith, Solicitors. We simply do not understand how this farmland can be regarded as a brownfield site or how the land is now considered suitable for residential development when the Council declared otherwise 12 years ago and nothing has changed. Flooding along that part of Liverpool Road is a cause for concern and the roads and junctions to and from the site are completely inadequate for development on such a scale. We are also concerned about the damaging environmental impact of such development, in ecological, scenic and heritage terms,</i></p>

	<i>given the site's proximity to Hawkshill Freedown and the inter-related importance of the Freedown and the woodland hanger and farmland along the valley below. We are not persuaded that this is a suitable site for housing by reducing the number of properties to 75 and requiring various impact assessments.</i>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Removal of the site from the Plan.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Housing Site WAL002 Ray's Bottom Site</p> <p><i>DDC Note: Names and addresses (10) redacted from representation, including the name and address of the local Hawkesdown person who instructed Kingsley Smith Solicitors, and 9 neighbours who have all seen and previously approved the letter. The list will be available for the Inspector to view.</i></p> <p><u>Introduction</u></p> <p>Our client's made representations in 2021. The Regulation 22 report ['R22OR'] was devoid of any engagement with their analysis or concerns.</p> <p>The R22OR nevertheless proposed the allocation WAL002 claiming it is 'suitable', with 75 units. It is impossible to find any proper reasoning justifying that conclusion, despite it running to 2557 pages.</p> <p>This is to be contrasted with the deletion of far more appropriate alternative sites with fewer restrictions, GTM008 DEA017 DEA010 DEA011 DEA002 at Ellens Road ['Ellens Road'], which at the first consultation stage, the council had identified.</p> <p>The council's approach is unsound because it has not been positively prepared, it is unjustified and lacks consistency. To conclude that WAL002 is now "suitable" when it was concluded to be the opposite in 2013 raises further concerns. In 2013 there was express concern from environmental and highway safety perspectives. It is irrational to conclude that the previous highways and environmental harm is solved by dint of reducing the number of theoretical units, slightly. Such would not make any measurable difference to either of those highly material considerations that weighed against it in 2013.</p> <p>When one compares the above with the Ellens Road sites (see attached map), where there is a notable lack of environmental or highway safety harm, the motive of the council and its reasoning must be political (at best), not based on sound planning assessment required by NPPF.</p> <p>The essential requirements for soundness remained unchanged throughout the period described above, 2013-2022. The facts and circumstances on the ground for both sites are unchanged.</p> <p>Our clients wish to take part in the hearing (oral) session(s) because they wish the inspector to hear their case why there must be investigation/reconsideration regarding the above concerns. They will instruct an expert to attend those sessions to assist the inspector and put their case.</p> <p>-</p> <p>As matters stand, the assertion that WAL002 is suitable is unjustified, impossible to square with what the public see or have read in the past analysis from the council. They would not consider it plausible for the council to say it is "brown field". It cannot be described as that; the Site is part of a very large arable field in this beautiful rolling Down landscape, with nothing but an imaginary line on a map to demark it from/within that wide open landscape.</p> <p>However, there is far more to this Site in planning terms which discounts it from being a new housing allocation than the flawed Brown Field Register.</p> <p><u>Site function/NPPF key aims</u></p>

From any public standpoint, it is a crucial part of a “green wedge”. The Freedown on the opposite side of Liverpool Road is well used open space, designated on the town map, plus it is a non-designated heritage asset. The council recognises The Freedown’s importance to public amenity. Its setting is crucial to its significance.

The Freedown forms the East side of this narrow Down valley, the Site forming the West side.

To compromise The Freedown will cause serious heritage, ecological and landscape harm as follows:

In heritage terms The Freedown incorporates the WW1 Walmer airfield. The Council commemorates the fallen here, a marvellous elevated place with commanding views not just over the Channel, but with Walmer Castle below and the Down to the West principally formed by the Site.

Visually the Site is also an integral part of a beautiful rolling Down landscape, in marked contrast to the urban confines that are found to its North and West. The homes to the West are beyond the ridge, not within this unspoilt small Down valley, with Liverpool Road at the bottom, rising up to the WW1 Walmer airfield on The Freedown to the East. The narrowness of this Down valley at this point is acute. It demarks a gateway to Walmer/Deal. Its qualities delight the senses. Its **beauty** must be protected, key to the **social objectives** of the planning system and “**fundamental**” to what the planning and development process should achieve (see NPPF consultation draft).

The Site also performs a key **environmental** function separating Deal (of which Walmer is part) from Kingsdown, which if eroded, on the council’s current approach, would signal the council is encouraging intrusion into this beautiful landscape. NPPF until 2019 from its inception, and PPG prior to that, gave significant weight to protection of the countryside for its own sake (see for example paragraph 170b NPPF 2019). The Ministerial error of its omission is being addressed now, with the Ministry consulting upon, and set to introduce, a far higher policy test than existed up to 2019, thanks to the January 2020 Building Better, Building Beautiful Commission “*Living with Beauty*” report. This tells us to “*ask for beauty*” and “*refuse ugliness*”. Our clients ask that now. It not merely chimes with the findings of the Walmer Design Statement of 2006, nor is Beauty being merely reinstated from the previous NPPF position - it will be fundamental to sustainable development as defined before the Plan is adopted.

The KWT comment underestimated the ornithological foraging value of the Site in contrast to the low value of the farmland to the south. The previously submitted reports were ignored in the R22OR. In this narrow valley the tree covered hillside of The Freedown provides protective cover for foraging birds on the Site that are absent from the more open farmland to the South of the Site. This confirms it is irreplaceable ecological value in planning terms, functionally linked to the adjoining SPA, copper-bottoming its importance in NPPF terms. The unexplained serious flooding of the adjacent homes north of the Site is believed to be sourced to it being the edge of a dry riverbed from Guston to Walmer Castle water meadow.

Accordingly, the Site must not be allocated, but protected from development, the discounted Ellens Road sites reallocated. DEA010 had been previously deemed suitable with no logical difference. It has the same highway demarcation, similar distance to St Richards Road, all that area lying between them partly built up already and be consistent with what is now site SAP14 on the R22OR map and in the text. It and Ellens Road would bring a comparable, indeed larger supply of homes compared to the WAL002/Site, without any material harm - no heritage harm, no ecological harm, limited landscape harm (see past analysis, extract attached). Moreover, it can be phased, resulting in a logical urban extension rather than the current piecemeal position shown on the consultation map and avoid the ‘floodgate’ risk presented by releasing the Site.

Accordingly, in terms of the remaining Framework dimension, the **economic** case firmly tips against the Site as less harmful and much better alternatives exists. It would be “**Unsound**” to leave the Site shown as an allocation – it is as clear as that in ‘place’ and ‘plan’ making terms, Ellens Road should be substituted.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Housing Site WAL002 Ray's Bottom Site should not be allocated and instead GTM008 DEA017 DEA010 DEA011 DEA002 at Ellens Road should be substituted.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Our clients wish to take part in the hearing (oral) session(s) because they wish the inspector to hear their case why there must be investigation/reconsideration regarding the above concerns. They will instruct an expert to attend those sessions to assist the inspector and put their case.

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

Sustainability Concerns.

Transport. This site is on a bus route into Deal. But this site is not well served by public transport into and from Deal. The service is limited, infrequent, does not operate throughout the day, and Stagecoach recently threatened to cut the service completely, as it is not profitable, but then has ended up reducing the service, and may reduce it further. It is a slow service as well, visiting many roads around Deal.

There is a poor bus service for children going to secondary schools, and many parents from this area drive their children there, adding to the road congestion in the narrow country lanes. E.g. to get to Walmer station, to catch a train to Sandwich schools, have to cross the busy junction at station road/A258, which is currently undergoing road works to improve access. No traffic lights there, so there will be long waits to cross the road. The nearest secondary school, Goodwin Academy, is likely to be full as there are many hundreds of houses being planned in this and the Mill Hill area. If it is full, what then? There is a general lack of infrastructure, with local schools being nearly full, and GP surgeries with closed waiting lists, and no local NHS dentists.

The Kingsdown primary school is fairly nearby, but it is far too dangerous to walk along the single lane Glen road to get to the school. No footpath. Glen road is very busy at school start and end. (I happened to go along here at school close times and had to wait for 23 cars and mini vans coming away from Kingsdown on the road). If SAP 34 is permitted and built on, it is likely that this primary school will get full, and children living at Rays Bottom would have a longer journey to school, also by car, as the next nearest primary school (if there is room) is over 1,200 m away.

The site is not within 1,200 m of an NHS GP surgery

The site is not within 2,000 m of a further/higher education facility

The site is not within 2,000 m of a strategic employment site.

The site is not within 1,200 m of a town centre.

The site has been judged by council officers to have the potential to moderately affect the district's historic environment. (a WW1 Site of an airfield)

The site is very near, and overlooks the Hawks Hill free down. An area managed for its biodiversity by Walmer Town council and is surrounded on 2 sides by trees. The trees are full of birds, some migratory, and many bats can be seen there. It is an area with low level of light disturbance at night, which would be disturbed by the light coming from an estate of 75 houses, affecting bats roosting and feeding. (bats are a protected species).

Highways Concerns

The highways assessment says that concerns have been identified in relation to access and/or highway impact and further assessment is required to demonstrate whether this can be mitigated. (Hella Appendix 3b Highways Assessments).

The main problem is that it would increase the traffic along the narrow Liverpool road, Grams Road, and single lane Glen road, which the irregular bus service uses. As already mentioned, Glen road has no space or accommodation for people on foot. Any access to the site would need localised road widening, and a reduction in the speed limit from Liverpool rd.

The residents of these proposed houses will need to have cars, (2 per family, so an extra 150 cars on local roads and they would join the stream of traffic on the overcrowded Deal to Dover road, which has problems at the Duke of York's Roundabout.

Landscape Concerns

Quoting from HELLA Appendix 2d Landscape Assessments. The development of this site would have an impact on the landscape and further assessment is required to demonstrate whether this can be mitigated.

The valley that the site is in at the bottom is subject to flooding. It drains in a northerly direction to an area north of Walmer Castle, which also floods in wet weather.

As mentioned already, the site is opposite Hawks Hill, an area of Priority habitat. The site is directly open to the neighbouring agricultural field on one side. One concern is the separation of Walmer from Kingsdown, as building here would reduce the separation of these settlements contrary to the SP4 policy.

This site is also in the LCA F3 Ripple area defined in the district *Landscape Character Assessment 2020* which defines on page 118 under Development Management that (developments should) **Conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB.**

	<p><u>Environmental Concerns</u></p> <p>The Environmental Assessment notes that "on site environmental constraints are present, which would need to be suitably mitigated to enable development. See HELLA Appendix 3d Environmental Assessments</p> <p>This assessment mentions it is a brownfield site and has contaminated land. Not sure why it is being used for agricultural purposes with this. Risk of surface water flooding... already mentioned above.</p> <p>Overall, I consider this site unsuitable for building on, for the reasons above.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? <p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	Justified

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object to the development proposals reference SAP15 - Land at Rays Bottom, Walmer (WAL002).</p> <p>Strategic Policy 14 - Enhancing Green Infrastructure and Biodiversity</p> <p>3.285 states "To conserve and enhance the District's biodiversity and green infrastructure, including natural and semi-natural rural and urban green spaces, nature conservation sites, green corridors, parks and gardens, amenity green spaces, and to enhance ecological connectivity between them, delivering a net gain in biodiversity."</p> <p>in addition</p> <p>3.286 states that Recent years have seen an increased recognition of the important role that access to nature can play in improving physical and mental health, wellbeing and happiness.</p> <p>The area of SAP 15 is an important area for residents to engage in nature. There are footpaths into the countryside from urban Walmer which is an incredibly important resource for locals. The area is also adjacent to an important habitat. Hawkshill Freedown is a Site of Nature Conservation Interest designated by Kent Wildlife Trust.</p> <p>Ecological consultant work has confirmed this area is important for wildlife. In particular the area has identified the presence of many important species such as Pallid Cockroach, Rose Beetle, Lesser Stag Beetle, Slow worm, Viviparous Lizard, Spotted Flycatcher, Tree Sparrow Turtle Dove and a number of plant species typical of ancient chalk grassland.</p> <p>There is a clear "Physical Damage and Loss" potential related to increased recreational impacts that would be caused by further housing development in this area (SAP15 - Land at Rays Bottom, Walmer (WAL002)). The grassland habitat is likely to be particularly susceptible to impacts from recreational activities, such as walking and dog walking, which can result in physical disturbance through trampling and erosion and nutrient enrichment, which can alter the soil chemistry and alter the prevalence of competitive species.</p> <p>In additional noise and light pollution from the development (WAL002) and increased traffic will result in disturbance to local wildlife, particularly bats and birds.</p> <p>In addition, the plan advises of widening roads in the Liverpool Road area to accommodate increased traffic. This is not possible without removing established hedgerows and trees in the area to accommodate footpaths and a wider road.</p> <p>The increased traffic will also cause problems with traffic flow in Walmer. In particular Walmer Castle Road, a road unsuitable for large vehicles, but already subject to heavy traffic as a cut-through from Dover Road.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Reconsider SAP 15
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The selection of this site is unsound as it is incompatible with SP\$ 3.71 - Separation of Settlements - and the need to prevent villages coalescing to protect landscape character.</p> <p>Secondly, it is unsound as its selection is incompatible with the statements in SP14 relating to biodiversity connectivity, as this valley bottom is already functioning as a vital point of biodiversity connectivity as referenced in SAP15, the northern and western boundaries of the site, close to BOA Hawkshill Freedown, are key to biodiversity connectivity.</p> <p>The valley bottom is also valuable as a flood sponge, so SAP15 is unsound for this reason too. Ray's Bottom drains in a northerly direction to the whole area immediately north of Walmer Castle, which is well-known to be subject to flooding.</p> <p>The highways assessment of this site is unsound and inadequate. SAP15 4.160 fails to note that Liverpool Road is a single lane road (which changes it's name to Glen Road) with passing places, which become gridlocked with traffic from Kingsdown Primary School twice a day. It also serves as an arterial road for diverted traffic when the A258 is blocked. So SAP15 is unsound on the ground of danger to life from road accidents. The transport assessment makes no reference to Liverpool Road becoming Glen Road at the Kingsdown parish boundary, and carrying diverted A road traffic.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Nothing would make SAP15 sound, effective, safe or compliant with Strategic Policy 12.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Please see Green Party full 24 page submission flags up non-legal-compliance with Localism Act 2011, Environment Act 2021. NPPF 2021 version and previous version, the legally binding UK Climate Emergency declaration of 2019 (commitment to net zero 2050) and Climate Change Act 2008.</p> <p>SAP 15 Walmer Liverpool Road Ray's Bottom. The selection of this site is unsound firstly as it incompatible with SP4 ; 3.71 Separation of Settlements and the need to prevent villages coalescing to protect landscape character. Secondly it is unsound as its selection is incompatible with the statements in SP14 relating to biodiversity connectivity as this valley bottom is already functioning as vital point of biodiversity connectivity as referred to in SAP15, the northern and Western boundaries of the site, close to BOA Hawkshill Freedown, are key to biodiversity connectivity. 4.158 mis-names Hawkshill Freedown, which in fact it is an SSSI because it is globally rare, chalk-downland habitat, (not just the 'open field' in the DDC text). For decades volunteers with Walmer Council have lovingly protected this rare habitat, a very justified BOA. The geography indicates that the valley bottom is also valuable as a flood sponge, so SAP15 is unsound thirdly for this reason too. Ray's Bottom drains in a northerly direction to the whole area immediately north of Walmer Castle which is well-known to be subject to flooding.</p> <p>And fourthly the Highways assessment of this site is unsound and inadequate, SAP 15 is unsound because 4.160 fails to note that Liverpool Road is a single lane road (changing its name to Glen Rd) with passing places which is becomes gridlock with traffic from Kingsdown Primary school 2x a day. It become an arterial road attempting to provide access to 30,000 conurbation of Deal / Walmer for diverted traffic when the A258 is blocked. (Cross reference SAP 34 in Kingsdown). So the selection is unsound on the grounds of danger to life from RTAs. The Transport Assessment requirement referred to in e makes no reference whatsoever to Liverpool Road becoming Glen Road at the Kingsdown parish boundary, and carrying diverted A road traffic.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Discard this plan</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>no applicable</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP15 - Land at Rays Bottom, Walmer (WAL002)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I consider the inclusion of site WAL002 in the local plan to be unsound because it fails to comply with the NPPF and Dover District Council's Strategic policies. In particular:</p> <ul style="list-style-type: none"> • SP4 Separation of Settlements and the need to prevent villages coalescing to protect landscape character. • SP14 relating to biodiversity connectivity as this valley bottom is already functioning as vital point of biodiversity connectivity. The northern and Western boundaries of the site, close to BOA Hawkshill Freedown, are key to biodiverse connectivity. • Paragraph 111 of the NPPF states "Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe". Development at site WAL002 is unsound because the highways are inadequate for this development, indeed struggle to cope with existing levels of traffic. The highways assessment fails to note that: Liverpool Road is a single lane road; changes its name to Glen Road at the Kingsdown parish boundary; is single lane with passing places; becomes gridlock with traffic from Kingsdown Primary school twice a day; becomes an arterial road attempting to provide access to 30,000 conurbation of Deal / Walmer for diverted traffic when the A258 is blocked. <p>So the selection of site WAL002 is unsound on the grounds of danger to life from road traffic accidents.</p> <p>I consider the Dover Local Plan fails to comply with the Duty to Cooperate because it fails to respect the safety of the community.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Removal of site WAL002 from the DLP.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SEE BELOW ATTACHED LETTER</p> <p>DDC Note: Text from letter added below, but refer to letter for photographs.</p> <p>"Specifically referring to Site WAL002 (SAP 15) Land at Rays Bottom between Liverpool Road and Hawksdown Walmer.</p> <p>IT IS IMPERATIVE THAT THE INDEPENDENT PLANNING INSPECTORATE MAKE A SITE VISIT BEFORE ANY DECISIONS ARE MADE TO DEVELOP THIS SITE 260 LOCAL WALKERS AND ROAD USERS OBJECTED TO THIS PROPOSAL.</p> <p>This site was rejected as unsuitable in the previous local plan which was drawn up in 2010. The DDC outcomes stated that; "The site analysis form demonstrates that, in principle, the site is not suitable for residential development due to the possible traffic impacts on the wider road network and should not be allocated in the pre-submission plan." There have not been any physical changes to this area which could possibly result in development now being suitable. Site WAL002 has very poor access from all directions. Local shops, amenities and schools could not be accessed safely on foot especially by school children, pushchair users, wheelchair users and users of mobility vehicles . Development at</p>

	<p>WAL002 would be inherently unsafe.(See attached photographs) Grams Road adjoining Liverpool Road with blind corner from both directions. Liverpool Road looking North Grams Road looking West towards A258- no room for pavement. SAP 15 Page 127 states that:</p> <p>d) Primary vehicular, pedestrian and cycle access to the site shall be provided to Liverpool Road along the frontage of the site and where possible to the junction with Grams Road along with an extension to the 30mph speed limit zone.</p> <p>However, Grams Road is a very narrow, steep road with no pavement between a section which has steeply banked sides which would prevent the widening of the road or the provision of a pavement. Indeed this road which is accessed from the Dover Road A258 is designated Unsuitable for Heavy Goods vehicles. This also applies to Walmer Castle Road which also feeds from the A258 down to Liverpool Road further to the North. Therefore lorries needed to serve the development would be precluded from reaching the site! The junction where Grams Road meets Liverpool Road is a blind corner. It is necessary to go beyond the white lines in order to see if the road is clear. (see photo)</p> <p>e) The Transport Assessment that is required to be carried out in accordance with Policy T12 must consider and identify mitigation (potential widening/traffic management measures/junction improvements) for the surrounding local road network, taking into account the cumulative impact of this and other sites allocated in this Plan, including (but not limited to) Liverpool Road and Grams Road up to and including the Grams Road/Dover Road junction.</p> <p>CLEARLY IF THIS TRANSPORT ASSESSMENT HAD ALREADY BEEN MADE SITE WAL002 WOULD NEVER HAVE BEEN INCLUDED IN THE CURRENT LOCAL PLAN REGULATION 19 SUBMISSION</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP15 - Land at Rays Bottom, Walmer (WAL002)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I believe the development of 75 houses in Rays Bottom contravenes the guidance set out in: NPPF, Section 2, 11b; Section 9, para 111; Section 15, para 174, 176, 177.</p> <p>Section 2: 11b. Sustainable development: or ii. any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole</p> <p>Rays Bottom is within a unspoilt valley bounded by trees and hedge lines, It is also in close proximity to Walmer Caste and the Free Down</p> <p>Section 9: 111: The development should “be prevented or refused on highway grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impact on the road network would be severe”. The road to Ray’s bottom is single track and has passing places. It is unsuitable for heavy traffic that would be increased by this development’s residents and need to serve them with refuse collection etc</p> <p>Section 15: 174-177. Planning policies and decisions should contribute to and enhance the natural and local environment by:</p> <p>174a: protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan). The field is chalk downland and the construction of over 75 homes would destrioy this. It is surrounded by hedge lines and woods and this landscape would not be enhanced by this development. The biodiversity associated with these woods and this field including bats would be disturbed</p> <p>1 c) maintaining the character of the undeveloped coast, while improving public access to it where appropriate. The 72 homes would significant urbanise the coast and absoulutely change an undeveloped combe valley</p> <p>175: Allocate land with the least environmental amenity and 176: The conservation and enhancement of wildlife and cultural heritage are also important considerations in these areas.</p> <p>177: Permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest The site is located near sensitive areas including Walmer Castle and the Free Down. Building a dense development of 75 homes on a sloping site with the resulting run-off and increase in traffic is harmful to the public good</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	This an oppottunistic development that seeks to cram 75 homes into a remote part of the community with no regard for access, the environment or the landscape. It should be dismissed
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>To treat this site as being suitable for housing is not consistent with the Council's decision in 2012/13 that it was not suitable when nothing has changed since then. There is no explanation of this despite objections to the first draft of the Plan. Other objections of "unsoundness" are set out in the attached letter.</p> <p>DDC Note: Mr Stickle supports Kingsley Smith Solicitors Comments (SDLP 3321379, 1380, 1381, 1382, 1383). He attached a detailed list of bird species and observations, and his letter states the following:</p> <p><i>"I am an experienced and enthusiastic birdwatcher and have lived about 50 metres from Ray's Bottom for 36 years. During that time I have kept the attached list of birds seen in and from the garden, giving a good indication of bird activity close to the site and the importance of this corridor in Walmer for bird migration, being as close as we are to the coast and the continent. I attach my list in full rather than a précis to underline the richness and diversity of the natural world which would be threatened by a sizeable housing development. I understand you evaluate whether the impact of planning proposals on biodiversity exceeds a threshold for it to be a major consideration, but in the case of birdlife your assessment involves a one-off wintering bird survey with the possibility of mitigation. My bird records show a much more complete picture, year-round over many years, and I fail to see how any proposed scheme of mitigation on a housing estate can adequately compensate for the loss of farmland habitat."</i></p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 15 Land at Rays Bottom Walmer
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The selection of this site is unsound:</p> <ol style="list-style-type: none"> 1. It is incompatible with SP4 ; 3.71 Separation of Settlements and the need to prevent villages coalescing to protect landscape character. A Ribbon development along this valley bottom would be disastrous for the landscape and would cause coalescence with Kingsdown. 2. it is unsound as its selection is incompatible with the statements in SP14 relating to biodiversity connectivity as this valley bottom is already functioning as a vital point of biodiversity connectivity as referred to in SAP15, the northern and Western boundaries of the site, close to BOA Hawkshill Freedown, are key to biodiversity connectivity. 4.158 mis-names Hawkshill Freedown, which is in fact globally rare, chalk-downland habitat, (not just the 'open field' in the DDC text). For decades volunteers with Walmer Council have lovingly protected this rare habitat, a very justified BOA. 3. The geography indicates that the valley bottom is also valuable as a flood sponge, so site selection of SAP15 is unsound on this basis. Ray's Bottom drains in a northerly direction to the whole area immediately north of Walmer Castle which is well-known to be subject to flooding. The NPPF 21 Section 2 - 11. presumption in favour of sustainable development <i>objectively assessed needs for housing and other uses,...</i> unless: <i>any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.</i> Building in a flood risk area is contrary to NPPF 21. Also there is a development of the Dover Rd, Walmer above this proposed site which could result in run off down to this site. 4. The Highways assessment of this site is unsound and inadequate, SAP 15 is unsound because 4.160 fails to note that Liverpool Road is a single lane road (changing its name to Glen Rd) with passing places which becomes gridlocked with traffic from Kingsdown Primary school 2x a day. It becomes an arterial road attempting to provide access to 30,000 conurbation of Deal / Walmer for diverted traffic when the A258 is blocked. (Cross reference SAP 34 in Kingsdown). So the selection is unsound on the grounds of danger to life from RTAs. The Transport Assessment requirement referred to in e makes no reference whatsoever to Liverpool Road becoming Glen Road at the Kingsdown parish boundary, and carrying diverted A road traffic. Ref SAP34 there are only 3 routes into Kingsdown, all are inadequate for lorries as Kingsdown has narrow streets and a conservation area. It would be difficult and dangerous to develop this site as lorries would struggle to gain access through Walmer. If SAP 34 and 15 were to go ahead at the same time it would create a dangerous situation where emergency vehicles may struggle to gain access to Kingsdown. 5. The selection of SAP 15 is unsound as it lies within the F3 Ripple area identified in the DDC's LCA (2020). This means it forms a landscape buffer between the conurbation of Deal and Walmer and the AONB. The situation of the plot is also important as it is highly visible as it is adjacent to open country. 6. Walmer has already been overdeveloped and has more to come under the current weak plan. I would argue that due to its inability to cope with current levels of traffic, congestion, pollution and windfall development only should be allowed. 7. Contrary to T11 the development would not be able to link up to Walmer station safely for cyclists and pedestrians as there are no footpaths along Liverpool Road, no streetlighting and the road is very narrow. Residents would be dependent on their cars contrary to SP1. 8. The site selection is also unsound and contrary to NPPF 21 as it uses agricultural land necessary for growing food - the loss of this land is unsustainable as it stops future generations from growing food.

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>After prolonged overdevelopment in Walmer causing traffic problems, increased pollution and congestion under the current weak plan, windfall development only should be allowed.</p> <p>More attention needs to be paid to the potential flood risks of over development higher up the valley and the cumulative effect which this will have.</p> <p>Consideration needs to be paid to the landscape area and potential loss of biodiversity at neighbouring Hawkshill by the interruption of a wildlife corridor.</p> <p>The Highways assessment needs to be more thorough, taking into account the potential problems caused by lorries needing access to the site, local traffic interruption and access for emergency services.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>

Dover District Council
DOVER, CT16 3PJ

8th December 2022

Dear Sirs

**Regulation 19 Submission – Dover District Local Plan
SAP15 - Land at Rays Bottom, Walmer (WAL002)**

We have read the revised development proposals and would like to comment on the following paragraphs published in relation to SAP15:-

Para (b) –In a recent planning application in St Margaret's, one of the reasons the officer gave for refusal of the application was that relying on screening was not satisfactory protection of the environmental amenities. It was difficult to maintain screening longterm in order to protect the visual transition. The sensitive landscaping scheme and landscape buffer to the south proposed for SAP15 is, therefore not a workable way of mitigating the impact of the development **longterm**. Any planting could not be considered as a permanent screening. The proposal is, therefore, not sound.

Neither would the proposed buffer to the south do anything to protect and preserve the visual amenity enjoyed by both residents and visitors from Hawkshill Down. The current uninterrupted view from the Common across the proposed site and to the countryside beyond would be lost and, therefore, the proposed southern buffer is not a sound way to mitigate the impact of the development on the wider countryside. This is all the more important as the proposed site is adjacent to a unique environment, comprising Hawkshill Down, WW1 and WW2 memorials, and the Grade II listed Walmer Castle Park and Gardens. Together with the historic importance of these areas, they are a haven for wildlife, which is inextricably linked to the proposed site.

Para (c) –We are pleased to see that retention and enhancement of the wooded area to the northern boundary has been recommended. However, this is only effective if it is enforced at the planning stage. Too often developers find ways round restrictions or negotiate to have them lifted. This wooded area is a valuable wildlife habitat and once lost, would be gone for ever. This proposal is, therefore, not guaranteed to be effective.

Paras (d) and (e) –The proposed road widening would only affect a small section of Liverpool Road. Together with another proposed site in Kindsdown, the increased traffic would still for the most part be using a country lane, most of which is single track, thus creating an unacceptable hazard, which cannot be justified.

Para (g) –As with my comment on Para (c), mitigation is not always enforced or effective and is therefore not a sound or effective proposal.

Para (h) –Again, these requirements seem sound but are not always enforced. On a neighbouring development, the need for an archaeological survey had been agreed but the planning officer forgot to include it when the planning permission was printed. Nothing could be done to rectify the mistake and hence any archaeology will be lost.

We are including below our original letter of 12th March 2021 submitted at the Regulation 18 stage, which covers these points in more detail.

The number of house builds required by the Government often changes and we consider that the area to the north of Ellens Road, which already has some sporadic development, is far more suited to future development. Sections of this area could be released over time to suit the number of dwellings required and would provide a continuous supply of sites over a long period as and when required.

In the Regulation 19 version of the Local Plan, some attempts have been made to mitigate the detrimental effects of building on this site but as outlined above not all of these are sound or effective and we continue to maintain that SAP15 should be designated as **not suitable** for development and should be removed from the Site Allocations list. Destroying this small but valuable part of Walmer, when there are other more suitable sites available, cannot be justified.

Yours faithfully

Janice and Roger Garrett

Please read our previous letter below:

Previous letter sent in response to Regulation 18 on 12th March 2021

District Local Plan Team
Dover District Council
White Cliffs Business Park
DOVER CT16 3PJ

12th March 2021

Dear Sirs

Draft Local Plan - WAL002 – Ray's Bottom, Walmer

We should like to submit the following arguments as to why we consider the above site unsuitable for housing development.

- 1 Ray's Bottom is a Greenfield site. The proposed development of 100/120 houses would have an unacceptable impact on the landscape.
- 2 Under the Housing & Employment Land Availability Assessment (HELAA) available online, sites WAL003 and WAL005 have been designated by the Council as "unsuitable" for development as it would have an unacceptable impact on: (a) the Heritage of the area; (b) the landscape and local wildlife sites; and (c) the character of the settlement. Together with WAL002, these three sites are adjacent to Hawkshill Freedown and the neighbouring grounds of Walmer Castle. If WAL003 and WAL005 have been rejected as unsuitable, the same should apply to WAL002 at Ray's Bottom, as they are all inextricably linked.
- 3 Ray's Bottom is an area frequented by walkers and in the absence of any pavements, there is a well-worn path along the edge of the field for those walking to Kingsdown. All those using the area currently enjoy the open views towards Kingsdown and Ringwould, as well as to the neighbouring Hawkshill Freedown. The Freedown is a conservation area managed by Walmer Parish Council and has been designated a Site of Nature Conservation Interest (SNCI). It is an area of chalk grassland of national importance for flora and fauna, and views from the Freedown include Ray's Bottom and beyond. The Freedown was a World War I aerodrome and is now the site of two memorials to the pilots who flew from there and were killed fighting in France. Extensive views overlook open farmland and across the sea to the distant French coast. The proposed development at Ray's Bottom would be immediately adjacent to this SNCI and would have an immense impact on the views currently enjoyed by the huge numbers of local residents and tourists who visit the Freedown for its wildlife, its tranquillity, its heritage and its beautiful views. It would also have a damaging impact on the wildlife which shares both the Freedown and the neighbouring farmland at Ray's Bottom, including the area of fallow land. In so many ways, any development in this area would have a detrimental impact on the amenities of the area.
- 4 The exit for vehicles from WAL002 would be onto a country lane, the majority of which is single-track with no pavements, and therefore totally unsuitable for the amount of traffic that would be generated. Most modern developments under-estimate the number of parking spaces that would be required. It is, therefore, likely that visitors and/or residents will at times park on Liverpool Road. As stated, this is a narrow lane that is also a bus route and even if efforts were made to widen the road adjacent to the proposed site, any parking would still present serious problems. The small car park at the foot of Hawkshill Camp Road is already used to capacity.

Liverpool Road/Glen Road is also used by the children who attend Kingsdown Primary School. Any increase in traffic along this country lane would have a serious impact on the safety of these children.

Any development at WAL002 would, therefore, have an unacceptable impact on highway safety and severe impact on the single-track road. (Please see photograph and note attached of recent incident on the road.)

- 1 If you look at the lie of the land, it all drains down from both Kingsdown and the Dover Road into the valley, which was formed by a river that originally flowed down across the fields and into the valley bottom (now Liverpool Road). This river went underground many years

ago but still flows at depth and when the water table is high enough can be seen at its end where it emerges and flows across Walmer Castle Paddock towards the sea. Southern Water have a monitoring point outside the Walmer Centre in Liverpool Road which constantly monitors the levels of water underground along the course of the old river.

Serious surface water flooding has affected the area in the past when heavy rain washed the topsoil from the farmland and swamped the neighbouring houses. Since this flooding, an area of land has been left fallow at the northern end of Ray's Bottom to try to absorb any run-off from the farmland and so protect the houses in Liverpool Road. Any new houses built on WAL002 would simply move the problem further up the valley, as they would be next to the remaining farmland and vulnerable to flooding from the fields, just as the houses were in 1981.

- 1 From the investigations we have made, it would appear that the current sewer serving Grams Road and Liverpool Road is already at capacity. In all probability, any new development at Ray's Bottom would require the building of a complete new sewer run.
- 2 The following are excerpts from the Walmer Design Statement (WDS) published in 2006. Dover District Council agreed to adopt the WDS as a material planning consideration in the assessment and determination of planning applications.
 - Under the section on the history of Liverpool Road area (Page 20) it states: "*At the beginning of the 20th century, development began on the perimeter of these estates reflecting the gradual change to manageable sized properties in reasonable grounds. These developments were sensitively sited to retain the spacious character and appearance of the area, using the landscape features to their full advantage.*" The same cannot be said for the proposed building of 100/120 houses on WAL002.
 - On Page 35 of the WDS it states: "*The southern boundary of the parish marks the transition to open countryside, much of which lies within the North Downs Special Landscape Area (SLA). This rural edge is an important element of the visual character and setting of Walmer and the community therefore supports policy CO3 of the Local Plan (2002) in seeking to ensure that priority is given to the conservation and enhancement of the natural beauty of the landscape over other planning considerations in this SLA.*"

This led to the creation of Design Principle WDS8 – "*The layout and design of any development affecting the southern edge of Walmer should demonstrate a suitable, carefully landscaped transition with the adjacent open countryside and the North Downs Special Landscape Area. **Development that would have an adverse effect on the rural setting of the parish and the landscape character of the North Downs Special Landscape Area should not be permitted.** Development on or adjacent to the southern boundary of Walmer parish must be appropriate in location, and incorporate design and associated features and measures to minimise visual impact.*"

- 1 At a Planning Committee meeting on 25th February 2021, consideration was given to planning application DOV20/00541, which was for the erection of four detached dwellings, car ports, new vehicular access and associated parking on land on the west Side of Station Road, St Margaret's at Cliffe. The application was refused on the following grounds:

"The proposed development would result in an unjustified intrusion of built development into an undeveloped countryside location, which would harm the prevailing rural character at this point and result in significant and demonstrable harm to the character and appearance of the AONB and the setting of St Margaret's within its rural context. The proposal would therefore conflict with policies DM15 and DM16 of Dover District Local Plan that seeks to protect the character of the countryside and paragraphs 170 and 172 of the NPPF as well as policies SD1, SD2, SD3 and SD9 of the Kent Downs AONB Management Plan."

We appreciate that this site is designated as being in an Area of Outstanding Natural Beauty (AONB) but we would suggest that the settings are very similar to WAL002, ie on the edge of the settlement and forming the transition between the settlement and the rural character of the countryside. In giving his report at the meeting, the Planning Officer made comments such as:

- It is an inappropriate development and would damage the sylvan character of the countryside as you approach the settlement confines.
- Relying on screening is not satisfactory protection of the environmental amenities. It is difficult to maintain screening longterm in order to protect the visual transition.
- Sensitivity of the landscape – would change the character of the countryside.
- It is outside the settlement confines.
- The farmland has a strong rural character and distinct countryside nature. The visual transition from settlement to countryside would be damaged.

ALL OF THE ABOVE COMMENTS COULD EQUALLY APPLY TO RAY'S BOTTOM. The St Margaret's application was for only 4 houses; how much more damage would be caused by 100/120 houses on WAL002? Any development in this sensitive area would result in significant and demonstrable harm to the character and appearance of the setting adjacent to Hawkshill Freedown and the approaches to Walmer along the country lane from Kingsdown.

- 1 Development sites obviously need to be found but we feel that there are more suitable sites in the District and ones which would provide a longer term solution to the problem. Planning permission has already been given to some of the land on the north side of Ellens Road. This area could provide a supply of suitable sites for some considerable time. There is already housing on both sides of this area of

	<p>farmland (along St Richard's Road on one side and along Ellens Road on the other). By restricting any development to the north of Ellens Road, damage to the landscape would be limited and views across the farmland to Ripple, etc, would be retained.</p> <p>2 Ray's Bottom may not be a large area but it has an amazing diversity of wildlife, largely due to its proximity to Hawkshill Freedown, as the areas complement each other. The open farmland supports feeding birds, both on the ground and in the air, with the wooded slopes of the Freedown providing cover and shelter when needed. The area of fallow land at the northern end of WAL002 is not only a valuable source of food for birds, mammals, reptiles and insects but provides homes for a wide variety of wildlife. We feel that this valuable habitat should be preserved. We will attach a list of the wildlife we have seen in the area.</p> <p>In conclusion we urge that every effort should be made to protect the character of the settlement and its surrounding countryside. Ray's Bottom is a greenfield site outside the current boundaries for housing and any development would be an encroachment into the countryside with consequent loss of farmland and wildlife habitat.</p> <p>Thank you for considering our submission and we hope you will agree that the land at Ray's Bottom is not suitable for development and should be retained for the enjoyment of residents, visitors and wildlife long into the future.</p> <p>Yours faithfully</p> <p>Janice Garrett Roger Garrett</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>The only effective solution is to designate site SAP15 as unsuitable for development and remove it from the Site Allocations List, as was done with the two neighbouring sites WAL003 and WAL005. Although some suggestions for mitigation have been made, none of them will effectively protect this small but valuable part of Walmer. A housing estate will destroy most of the wildlife habitat and take away the amenity of countryside views currently enjoyed from Hawkshill Down, as well as creating traffic problems. However hard you try, no mitigation will resolve these issues; the proposals are fundamentally unsound and unjustified and SAP15 should therefore be deleted from the list.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The selection of SAP 34 is totally unsound, The Highways Assessment of Ringwoud Road is inadequate. The facts are that Ringwoud Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes and unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are Dover and Deal Green Party: submission to Reg 19 consultation on Dover DC new Local Plan, deadline 9 Dec 2022. 14 4 sections where the road narrows to single lane passing. The 1400 voters in Kingsdown village (population 2000 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwoud road traffic flowing freely. We have seen an RTA fatality on the road, and many near misses. It is a disgrace that KCC for years have refused to listen to requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwoud Road. The economy of the village depends on visitors walking, cycling and horse-riding on the Ringwoud Road and any development of SAP 34 would increase the likelihood of fatalities exponentially. The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'. Any development at SAP 34 is unsound firstly on the grounds of highways inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. Secondly The selection of SAP 34 is unsound on the grounds that the Deal / Walmer conurbation of 30,000 depends on the narrow – single lane in places - Ringwoud road, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. It is part of the transport infrastructure of the whole district. The A258 is the only southern entrance to the 30,000 conurbation starting in Upper Walmer. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Rd / Liverpool road selected as site for SAP 15 Ray's Bottom in Walmer, this site too if developed is likely to mean diverted traffic cannot get in / out of Deal / Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. Thirdly on the grounds of landscape character, the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character and falls within LCT F3, Open Arable Chalk farmland with woodland, needed for national food security. The selection of SAP 34 is unsound fourthly on the grounds that it borders the AONB. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch / and Freedown woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwoud w/ Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital to be protected on the boundary of this site. The selection of SAP 34 is unsound fifthly on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP 15, so development here could contribute to flooding (see CC5). (cross referenced SAP 15 Walmer Rays Bottom).</p>

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Not Legally compliant - The local plan specifically related to Kingsdown (SAP 34 and SAP 35) and the immediate boundary area (SAP 15 and SAP 53) is not legally compliant with the new and legal Highway Code changes which came into place in January 2022 i.e. after the evidence review and call for sites. The Highway Code states that a car must allow a minimum of 1.5 metres to overtake a cyclist (car travelling at under 30 MPH) or pedestrian (2 metres) when there is no pavement. All of the access roads into Kingsdown and the main roads used within Kingsdown (Upper St, The Rise, Undercliffe) do not allow the Highway code to be followed currently but therefore In the Local plan cannot by definition follow the guidance to be legally compliant or to support sustainable infrastructure (encourage

walking and cycling) or to works towards climate neutral. The danger to cyclists and walkers will be enhanced when the A258 is blocked after an accident and traffic is diverted via the Ringwould Road.

Unsound - the local plan is unsound with reference to SAP34 as the Ringwould Road is already signposted as unsuitable for long vehicles, vehicles over 7.5 tonnes, wide vehicles, narrowing to single lane passing. The proposed SAP34 development would cause dangerous gridlock particularly with the added traffic in summer months.

The developments of SAP34, SAP35 and SAP 15 would compromise the 'individual identity of Kingsdown Village' and contradiction to Policy 4 statement.

the SAP34 development is unsound on the grounds that it would remove a flood sponge.

the Local plan is also unsound in that it has not taken into account reasonable alternatives for Kingsdown or even considered these. There is no mention or even any attempt to assess the number of 2nd (or indeed 3rd, 4th) homes in Kingsdown/Walmer/Deal which are not lived in for most of the year. There is an increasing number of AirBnBs which provide multiple occupants (and multiple cars to travel) for family houses. As there is no attempt to assess these I will provide one road number as an example - Of the 34 houses in North Road, Kingsdown only 7 are lived in as a 1st home. The last house to sell in North/South Road was in the region of £600,000 for a 2nd home. This is in direct contrast to the statement of the local plan (7.11, page 268) 'to support the delivery of rural local needs homes to enable local people to remain in the village where they live or work and not to be forced to move away because of high house prices and high rents'. The plan only allocates 30% of new homes as affordable housing and so there is no demonstration for a local need for more housing. The other 70% of houses being built on greenfield could all be bought as 2nd/3rd/4th homes or run as AirBnBs.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I suggest a review of housing need in specific areas of DDC and build houses in areas of housing need. This need has not be demonstrated in Kingsdown and surrounding areas unless DDC council want an area largely lived in by 2nd home owners.
I suggest a 20 MPH limit throughout Kingsdown and the access roads with designated pedestrian and cycling lanes.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 15 & SAP 34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The inclusion of SAP 15 is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'.</p> <p>DM Policies NE2 (Natural Environment) p.285: We submit that the area inland from Kingsdown, west to Ringwoud, Ripple, Sutton, Studdal and Little Mongeham is included as LFT F Open Arable Chalk Farmland with Woodland, as an extension to F3 Ripple. The designation is sound and effective, But it is unsound and contradictory and ineffective to then include this arable chalk farmland of SAP 15 as a suitable site.</p> <p>SAP 15 Walmer Liverpool Road Ray's Bottom. The selection of this site is unsound firstly as it incompatible with SP4 ; 3.71 Separation of Settlements and the need to prevent villages coalescing to protect landscape character. Secondly it is unsound as its selection is incompatible with the statements in SP14 relating to biodiversity connectivity as this valley bottom is already functioning as vital point of biodiversity connectivity as referred to in SAP15, the northern and Western boundaries of the site, close to BOA Hawkshill Freedown, are key to biodiversity connectivity. 4.158 mis-names Hawkshill Freedown, which in fact it is an SSSI because it is globally rare, chalk-downland habitat, (not just the 'open field' in the DDC text). For decades volunteers with Walmer Council have lovingly protected this rare habitat, a very justified BOA. The geography indicates that the valley bottom is also valuable as a flood sponge, so SAP15 is unsound thirdly for this reason too. Ray's Bottom drains in a northerly direction to the whole area immediately north of Walmer Castle which is well-known to be subject to flooding, being at or below sea level.</p> <p>And fourthly the Highways assessment of this site is unsound and inadequate, SAP 15 is unsound because 4.160 fails to note that Liverpool Road is a single lane road (changing its name to Glen Rd) with passing places which is becomes gridlock with traffic from Kingsdown Primary school 2x a day. It becomes an arterial road attempting to provide access to 30,000 conurbation of Deal / Walmer for diverted traffic when the A258 is blocked. (Cross reference SAP 34 in Kingsdown). So the selection is unsound on the grounds of danger to life from RTAs. The Transport Assessment requirement referred to in e makes no reference whatsoever to Liverpool Road becoming Glen Road at the Kingsdown parish boundary, and carrying diverted A258 road traffic.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Nothing can be done to mitigate putting any development on either site SAP 34 or SAP 15. They should both be excluded as sites for development.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Glen/Liverpool Road were not built for the proposed amount of traffic that would be generated by a large building plot of houses on Ray's Bottom. The development of houses not local to Doctor's surgery and would have a devastating effect on local traffic trying to access Kingsdown and beyond. It would also take away beautiful views on the approach to Kingsdown and cause havoc at peak times/school run/rush hour in the evening. It would also take away arable land.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan to build on this site is flawed even though there appears to be adequate provision for assessment still to be done. I will respond to assessment paragraphs by their letter:</p> <p>a. Any development here will cause harm, to suggest otherwise is false. Reducing the number of houses from 100+ in the original plan, to 75, will make no appreciable difference to impact on infrastructure, bio-diversity, traffic and noise. The term low density is used yet is not defined. 75 new dwellings doesn't sound low density.</p> <p>b/c The quantity and quality of bio-diversity that would be destroyed cannot be replaced by keeping some small wooded areas and planting a few additional trees. The brown field is in itself an important habitat for wildlife and would be completely urbanised. The need to widen roads would also cause important woodland habitat to vanish. In addition the noise pollution, chemical pollution and huge increase in human traffic would discourage wildlife from this area.</p> <p>d/e The road widening would have to include Liverpool Road either side of Grams Road rather than just the area of Liverpool Road in front of the proposed site. This would destroy a significant portion of woodland and wildlife habitat as well as encroach on land bordering current housing. Liverpool Road is the quickest route into Deal from this site, it is very narrow and would be subject to a significant increase in traffic. Even Grams road is unsuitable for such a large increase in traffic given it too, is quite narrow.</p>

	f. I understand this site has already been identified as a flood risk when assessed previously, so what has changed that another assessment is necessary?
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The building of houses on Ray's Bottom would severely damage the already fragile transport system between Walmer & Kingsdown. The increase in traffic from the housing development would cause terrible jams particularly at peak times School run/Rush hour morning and evening. The beautiful views would disappear as one approaches Kingsdown for Walmer on Glenn Road. Much needed arable land would be lost by such a development and any AONB would be destroyed in the process. The infrastructure could not sustain the development as Kingsdown has no Doctor's surgery also.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The development of SAP15 Walmer Liverpool Road Ray's Bottom is unsound as it conflicts with National Planning Policy Framework requirements for conserving and enhancing the natural environment. It contradicts NPPF 174 due to the loss of landscape character. DDC's Dover District Landscape Character Assessment 2020 p114-9 identifies LCA F3 Ripple as a valuable landscape where development should conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown. The proposed development at Liverpool Road Ray's Bottom SAP15 is within LCA F3 area and contradicts the requirement to conserve the characteristic pattern of historic villages maintaining their tight knit enclosed built character.</p> <p>The development of SAP15 Walmer is unsound as it conflicts with NPPF requirements for promoting sustainable transport. The development does not meet the requirements on NPPF 104 and 105 as it is on the edge of Walmer with limited opportunities for walking and cycling with particular challenges of walking or cycling along Liverpool Road/Glen Road which is a busy, single-track road with passing places, with no footpath. Public transport options are limited with an infrequent bus service from Kingsdown to Deal that has recently been significantly reduced. This will result in most journeys to and from this development by car along Glen Road which is a very busy single-track road with passing places. However, improvements to Glen Road would be challenging without adverse effects on the rural character of the area. The location of a site for housing development is the key factor in the use of sustainable transport throughout the lifetime of the housing so it is critical that this accurately assessed before approving development within the local plan. The NPPF requirements for considering development proposals, NPPF 111 in my view should be refused on highways grounds because the additional estimated 110 movement of cars at peak times along the already busy Glen Road which would be unsafe to pedestrians, cyclists and motorists.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	SAP15 should be removed from the proposed housing allocation in the Dover Local Plan as it would result in the loss of landscape character and would be unsafe for pedestrian, cyclists and motorists. Sites in Walmer should be selected for housing with walking and cycling routes to key local amenities and the railway station to meet the planning requirements for sustainable transport.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP15
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Rays Bottom is a greenfield site not brownfield</p> <p>I strongly object to the proposal to develop land at Rays Bottom.</p> <p>It is important to note that it this is a Greenfield site, not Brownfield as now stated. This site has never had any previous development. I believe development should be limited to Brownfield/PDL land in the borough.</p> <p>Rays Bottom is also adjacent to the valuable wildlife and amenity land of Hawkshill Freedown. It provides an important wildlife corridor for fox, badgers, mice, squirrels, hedgehogs, toads, frogs, blackbirds, thrush, tits, kestrels, woodcock, linnets, firecrest, little blue butterflies and bees. Any development here would be hugely detrimental to the local ecology.</p> <p>I am also concerned by the risk of land instability and subsidence along the western boundary where there is a steep drop of approximately 15-20 feet. The vibrations of construction vehicles and digging of foundations could lead to significant land slippage.</p> <p>I am concerned by the level of pollution produced by 75 homes and the 100 (approx) cars that will be carried by the onshore breeze over existing properties to the west.</p> <p>Any potential development will also have issues with privacy given the additional height of the Hawksdown Estate that will overlook the new homes.</p> <p>There is also the issue of potential flooding in the valley, which has an underground stream flowing along its length. Since the flood of 1981 Southern Water have installed monitoring devices.</p> <p>Rays Bottom is a semi rural area, only 150m away from Walmer Castle and directly opposite Hawkshill Freedown. The existing lane is narrow, and the additional traffic will be a risk to walkers, school children and the disabled at the nearby Glendale Residential Home. In summary there is a plethora of reasons why WAL002 is not appropriate for development and I urge the council to reject this plot</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)	Redesignate Rays Bottom as greenfield

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	WAL002
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	The selection of this site is unsound: 1.It is incompatible with SP4 ; 3.71 Separation of Settlements and the need to prevent villages coalescing to protect landscape character. A Ribbon development along this valley bottom would be disastrous for the landscape and would cause coalescence with Kingsdown.

<p>possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<ol style="list-style-type: none"> 1 it is unsound as its selection is incompatible with the statements in SP14 relating to biodiversity connectivity as this valley bottom is already functioning as a vital point of biodiversity connectivity as referred to in SAP15, the northern and Western boundaries of the site, close to BOA Hawkshill Freedown, are key to biodiversity connectivity. 4.158 mis-names Hawkshill Freedown, which is in fact globally rare, chalk-downland habitat, (not just the 'open field' in the DDC text). For decades volunteers with Walmer Council have lovingly protected this rare habitat, a very justified BOA. 2 The geography indicates that the valley bottom is also valuable as a flood sponge, so site selection of SAP15 is unsound on this basis. Ray's Bottom drains in a northerly direction to the whole area immediately north of Walmer Castle which is well-known to be subject to flooding. The NPPF 21 Section 2 - 11. presumption in favour of sustainable development objectively assessed needs for housing and other uses,... unless: any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole. Building in a flood risk area is contrary to NPPF 21. Also there is a development of the Dover Rd, Walmer above this proposed site which could result in run off down to this site. 3 The Highways assessment of this site is unsound and inadequate, SAP 15 is unsound because 4.160 fails to note that Liverpool Road is a single lane road (changing its name to Glen Rd) with passing places which becomes gridlocked with traffic from Kingsdown Primary school 2x a day. It becomes an arterial road attempting to provide access to 30,000 conurbation of Deal / Walmer for diverted traffic when the A258 is blocked. (Cross reference SAP 34 in Kingsdown). So the selection is unsound on the grounds of danger to life from RTAs. The Transport Assessment requirement referred to in e, makes no reference whatsoever to Liverpool Road becoming Glen Road at the Kingsdown parish boundary, and carrying diverted A road traffic. Ref SAP34 there are only 3 routes into Kingsdown, all are inadequate for lorries as Kingsdown has narrow streets and a conservation area. It would be difficult and dangerous to develop this site as lorries would struggle to gain access through Walmer. If SAP 34 and 15 were to go ahead at the same time it would create a dangerous situation where emergency vehicles may struggle to gain access to Kingsdown. 4 The selection of SAP 15 is unsound as it lies within the F3 Ripple area identified in the DDC's LCA (2020). This means it forms a landscape buffer between the conurbation of Deal and Walmer and the AONB. The situation of the plot is also important as it is highly visible as it is adjacent to open country. 5 Walmer has already been overdeveloped and has more to come under the current weak plan. I would argue that due to its inability to cope with current levels of traffice, congestion, pollution and windfall development only should be allowed. 6 Contrary to T11 the development would not be able to link up to Walmer station safely for cyclists and pedestrians as there are no footpaths along Liverpool Road, no streetlighting and the road is very narrow. Residents would be dependent on their cars contrary to SP1. 7 The site selection is also unsound and contrary to NPPF 21 as it uses agricultural land necessary for growing food - the loss of this land is unsustainable as it stops future generations from growing food.
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>After prolonged overdevelopment in Walmer causing traffic problems, increased pollution and congestion under the current weak plan, windfall development only should be allowed.</p> <p>More attention needs to be paid to the potential flood risks of over development higher up the valley and the cumulative effect which this will have.</p> <p>Consideration needs to be paid to the landscape area and potential loss of biodiversity at neighbouring Hawkshill by the interruption of a wildlife corridor.</p> <p>The Highways assessment needs to be more thorough, taking into account the potential problems caused by lorries needing access to the site, local traffic interruption and access for emergency services.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	WAL002
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The selection of this site is unsound:</p> <ol style="list-style-type: none"> 1. It is incompatible with SP4 ; 3.71 Separation of Settlements and the need to prevent villages coalescing to protect landscape character. A Ribbon development along this valley bottom would be disastrous for the landscape and would cause coalescence with Kingsdown. 1 it is unsound as its selection is incompatible with the statements in SP14 relating to biodiversity connectivity as this valley bottom is already functioning as a vital point of biodiversity connectivity as referred to in SAP15, the northern and Western boundaries of the site, close to BOA Hawkshill Freedown, are key to biodiversity connectivity. 4.158 mis-names Hawkshill Freedown, which is in fact globally rare, chalk-downland habitat, (not just the 'open field' in the DDC text). For decades volunteers with Walmer Council have lovingly protected this rare habitat, a very justified BOA. 2 The geography indicates that the valley bottom is also valuable as a flood sponge, so site selection of SAP15 is unsound on this basis. Ray's Bottom drains in a northerly direction to the whole area immediately north of Walmer Castle which is well-known to be subject to flooding. The NPPF 21 Section 2 - 11. presumption in favour of sustainable development objectively assessed needs for housing and other uses,... unless: any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole. Building in a flood risk area is contrary to NPPF 21. Also there is a development of the Dover Rd, Walmer above this proposed site which could result in run off down to this site. 3 The Highways assessment of this site is unsound and inadequate, SAP 15 is unsound because 4.160 fails to note that Liverpool Road is a single lane road (changing its name to Glen Rd) with passing places which becomes gridlocked with traffic from Kingsdown Primary school 2x a day. It becomes an arterial road attempting to provide access to 30,000 conurbation of Deal / Walmer for diverted traffic when the A258 is blocked. (Cross reference SAP 34 in Kingsdown). So the selection is unsound on the grounds of danger to life from RTAs. The Transport Assessment requirement referred to in e, makes no reference whatsoever to Liverpool Road becoming Glen Road at the Kingsdown parish boundary, and carrying diverted A road traffic. Ref SAP34 there are only 3 routes into Kingsdown, all are inadequate for lorries as Kingsdown has narrow streets and a conservation area. It would be difficult and dangerous to develop this site as lorries would struggle to gain access through Walmer. If SAP 34 and 15 were to go ahead at the same time it would create a dangerous situation where emergency vehicles may struggle to gain access to Kingsdown.

	<p>4 The selection of SAP 15 is unsound as it lies within the F3 Ripple area identified in the DDC's LCA (2020). This means it forms a landscape buffer between the conurbation of Deal and Walmer and the AONB. The situation of the plot is also important as it is highly visible as it is adjacent to open country.</p> <p>5 Walmer has already been overdeveloped and has more to come under the current weak plan. I would argue that due to its inability to cope with current levels of traffic, congestion, pollution and windfall development only should be allowed.</p> <p>6 Contrary to T11 the development would not be able to link up to Walmer station safely for cyclists and pedestrians as there are no footpaths along Liverpool Road, no streetlighting and the road is very narrow. Residents would be dependent on their cars contrary to SP1.</p> <p>7 The site selection is also unsound and contrary to NPPF 21 as it uses agricultural land necessary for growing food - the loss of this land is unsustainable as it stops future generations from growing food.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Failure to protect life. The proposed development will send a dangerous amount of traffic up Glen road, particularly at school times. This road is single carrageway, in poor repair, with few passing places. This road is already very busy at peak times and known by locals to be dangerous. It is reasonable to assume familys in the proposed estate would use Kingsdown primary.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This is nonsensical, to identify the area as prone to flood risk and then to propose to develop it.</p> <p>Liverpool Road is already vulnerable to surface flooding after heavy rain. Development of this hillside will inevitably result in greater run-off and increasing flood risk.</p> <p>Liverpool Road is a frequently used road by Parents whose children are driven from Deal and Walmer to attend the Local School at Kingsdown. It is single lane with some passing points.</p> <p>The impact of those people coming into the village already is SIGNIFICANT with incidents of abuse reported due to lack of adequate parking, and cars running whilst parents wait to collect children, exacerbating pollution. There is inadequate consideration in the plan for the education of the inevitable children whilst considering the detrimental impact on existing education facilities.</p> <p>To widen the road would necessitate cutting into the upper bank, which would likely result in the loss of trees and impact the natural environment currently enjoyed. The land is adjacent to Hawkesdown hill which is a site of significant remembrance. The development would significantly impact upon the amenity from the Hawkesdown Hill highpoint and will likely create noise disturbance to those who are enjoying that space. Hawkesdown Hill is a significant area of recreation and adjoins the Walmer Castle Grounds which are of significant historical value to the area. Further development of new housing in this area is inconsistent with the existing housing styles and ages and will therefore be of significant detriment to the amenity of lower Walmer. This will also lead to slow encroachment towards Kingsdown, which will over time deprive Kingsdown of its own identity. (SP4 P37 3.71)</p> <p>This is turn will impact Kingsdown's economy (which significantly benefits from Tourism, as noted elsewhere in the Plan, see notations regarding the unsuitability of KIN06, KIN07)</p> <p>The traffic whether directed to either the Dover Road or to Liverpool Road will have a significant impact on traffic flow and on businesses which has been evidenced in the problems already observed since the creation of additional houses to Richards Road and Station Road, with Local Papers reporting of the impact upon Local Businesses resulting in loss of income and occasional closure (Walmer's Butcher). The Dover road is the main road from Deal, with only one lane per direction. Slowed or stationary cars will exacerbate pollution and increased traffic will adversely impact the occupants of Dover Road and adjoining roads even further.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. <p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Rays Bottom is a greenfield site not brownfield. See attached.</p> <p>I strongly object to the proposal to develop land at Rays Bottom.</p> <p>It is important to note that it this is a Greenfield site, not Brownfield as now stated. This site has never had any previous development. I believe development should be limited to Brownfield/PDL land in the borough.</p> <p>Rays Bottom is also adjacent to the valuable wildlife and amenity land of Hawkshill Freedown. It provides an important wildlife corridor for fox, badgers, mice, squirrels, hedgehogs, toads, frogs, blackbirds, thrush, tits, kestrels, woodcock, linnets, firecrest, little blue butterflies and bees. Any development here would be hugely detrimental to the local ecology.</p> <p>I am also concerned by the risk of land instability and subsidence along the western boundary where there is a steep drop of approximately 15-20 feet. The vibrations of construction vehicles and digging of foundations could lead to significant land slippage.</p> <p>I am concerned by the level of pollution produced by 75 homes and the 100 (approx) cars that will be carried by the onshore breeze over existing properties to the west.</p> <p>Any potential development will also have issues with privacy given the additional height of the Hawksdown Estate that will overlook the new homes.</p> <p>There is also the issue of potential flooding in the valley, which has an underground stream flowing along its length. Since the flood of 1981 Southern Water have installed monitoring devices.</p> <p>Rays Bottom is a semi rural area, only 150m away from Walmer Castle and directly opposite Hawkshill Freedown. The existing lane is narrow, and the additional traffic will be a risk to walkers, school children and the disabled at the nearby Glendale Residential Home. In summary there is a plethora of reasons why WAL002 is not appropriate for development and I urge the council to reject this plot</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Regarding the traffic mitigation consideration has been made to traffic moving through Liverpool road to Grams road. There has been no reference to consideration being made to the fact that some traffic will move up Glen road, specifically towards the primary school. Glen road is single carrageway with few passing points, the traffic on this road is already excessive and dangerous, especially at school run times. It seems obvious to me that as Kingsdown primary will be the closest school to the proposed estate it would take a reasonable proportion of the resident children and traffic would significantly increase.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SAP 15 Walmer Liverpool Road Ray's Bottom. The selection of this site is unsound firstly as it incompatible with SP4 ; 3.71 Separation of Settlements and the need to prevent villages coalescing to protect landscape character. Secondly it is unsound as its selection is incompatible with the statements in SP14 relating to biodiversity connectivity as this valley bottom is already functioning as vital point of biodiversity connectivity as referred to in SAP15, the northern and Western boundaries of the site, close to BOA Hawkshill Freedown, are key to biodiversity connectivity. 4.158 mis-names Hawkshill Freedown, which in fact it is an SSSI because it is globally rare, chalk-downland habitat, (not just the 'open field' in the DDC text). For decades volunteers with Walmer Council have lovingly protected this rare habitat, a very justified BOA. The geography indicates that the valley bottom is also valuable as a flood sponge, so SAP15 is unsound thirdly for this reason too. Ray's Bottom drains in a northerly direction to the whole area immediately north of Walmer Castle which is well-known to be subject to flooding.</p> <p>And fourthly the Highways assessment of this site is unsound and inadequate, SAP 15 is unsound because 4.160 fails to note that Liverpool Road is a single lane road (changing its name to Glen Rd) with passing places which is becomes gridlock with traffic from Kingsdown Primary</p>

	school 2x a day. It become an arterial road attempting to provide access to 30,000 conurbation of Deal / Walmer for diverted traffic when the A258 is blocked. (Cross reference SAP 34 in Kingsdown). So the selection is unsound on the grounds of danger to life from RTAs. The Transport Assessment requirement referred to in e makes no reference whatsoever to Liverpool Road becoming Glen Road at the Kingsdown parish boundary, and carrying diverted A road traffic.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Please please do not destroy this site with housing
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Local Plan Consultation Point	SAP15 - Land at Rays Bottom, Walmer (WAL002)
Rep ID	SDLP851
Rep Status	Processed
Consultee ID	1331928
Consultee Full Name	Matthew Porter
Consultee Company / Organisation	Fernham Homes Ltd
Agent Full Name	Matt Porter
Agent Company / Organisation	DHA Planning
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Policy SAP15 - Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002) Policy SP3 - Housing Growth Policy SP4 - Windfall Development Policy SP11 - Infrastructure and Developer Contributions Policy SP12 - Strategic Transport Infrastructure
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

We consider that the plan is sound, but object to elements of Policy SAP15 - Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002) and Policy SP3 - Housing Growth. These objections are set out in the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359).

1 Introduction

1.1 Purpose of this Representation

1.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited in response to the Dover District Council 'DDC' Local Plan (Regulation 19) consultation which runs until 9th December 2022.

1.1.2 We understand that DDC is in the process of preparing a new Local Plan to set out a strategy for development for the period to 2040 and that the Council are presently seeking comments on the pre-submission Plan prior to its submission for examination in early 2023.

1.1.3 Our client is promoting 'Land at Rays Bottom, Walmer, Deal' (hereafter referred to as 'Land at Rays Bottom' or 'the site') for the residential allocation of the site as part of the new Dover District Local Plan preparation process. The site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 75 dwellings under policy reference 'SAP15'.

1.1.4 It is highlighted that as part of the Regulation 18 Local Plan, the Site was allocated under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' for approximately 100 dwellings (reference WAL 002).

1.1.5 The purpose of the representation is to support the allocation of Land at Rays Bottom as a suitable and deliverable location for residential development and provide comment on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan but to object to the indicative capacity set out in the policy.

1.1.6 In this regard, we remain wholly supportive of the principle of the residential allocation of Land at Rays Bottom and agree that the Site represents a logical and sustainable location to direct growth in Deal consistent with the growth strategy of the Plan as a whole.

1.1.7 Accordingly, we say that the allocation of Land at Rays Bottom is necessary in order for the Council in meeting the growing need for new homes in the district and help to ensure the DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan.

1.1.8 It is submitted that the SAP15 policy wording should be amended to reflect the capability of the Site to accommodate approximately 80 dwellings, deliverable early in the Plan period.

1.1.9 Based on the current national and local planning context, we consider the Site to be a highly suitable edge-of-settlement location to allocate land for housing to help meet the need for new homes in the district and its effective use should be appropriately maximised in accordance with national policy objectives.

1.1.10 Further details regarding the Site and commentary on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan are set out in the following sections of this document.

1.2 About Fernham Homes

1.2.1 Fernham Homes Ltd are a local award winning small and medium sized (SME) housebuilder, established in 1997 and has a strong track record of delivering high quality residential and mixed use developments in Kent over the last 25 years. This has been acknowledged through the receipt of nationally recognised awards, including the gold Evening Standard Awards best family home 2022 and 2019 bronze WhatHouse Best Small Housebuilder.

1.2.2 SME housebuilders are recognised in the National Planning Policy Framework ('NPPF') at paragraph 69 as making an important contribution to meeting the housing requirements of an area, and being able to build out relatively quickly. Similarly, this has also been recognised by the Planning Inspectorate. This is particularly the case with Fernham Homes, which is privately owned with access to significant resources. This provides significantly more flexibility than national and other regional housebuilders, and allows Fernham Homes to deliver housing rapidly and to a high quality, beautiful and sustainable standard (para 126 of the NPPF).

1.2.3 Fernham Homes has embarked on a sustained period of growth, with an adopted and robust business plan to deliver around 300 houses per year in five years time.

1.2.4 A key element of Fernham Homes' operations is to take a careful approach to site selection: a huge amount of due diligence is undertaken as part of this, and therefore Fernham Homes only invests in those sites which meet the NPPF requirements of being available, suitable, and deliverable. As set out below land at Rays Bottom, Walmer ('SAP15') is firmly considered to be such a site.

1.2.5 Similarly, a key feature of Fernham Homes' approach is to work positively and proactively with local planning authorities (LPAs), both during the preparation of local plans and at planning application stage. Fernham Homes are fully committed to engaging with DDC in the preparation of its Local Plan, and firmly subscribe to the national policy approach set out in paragraphs 15 and 16 c) of the NPPF that "the planning system should be genuinely plan-led" and should be shaped by early, proportionate and effective engagement between LPAs and others, including businesses and developers. Accordingly, Fernham Homes would welcome the opportunity to discuss the matters contained in this representation, including the availability, suitability, deliverability and capacity of land Rays Bottom, Walmer ('SAP15') directly with DDC members and officers, ahead of the submission of the Local Plan for examination.

1.3 Representation Structure

1.3.1 The representation structure is outlined below for ease of reference:

Chapter 2 (Consultation Background) – Sets out the context of the Dover District new Local Plan preparation, relevant national planning requirements and a summary of our current position.

Please refer to paragraph 52 of Appeal Decisions: APP/M2270/W/21/3283924 & APP/M2270/W/21/3288645

Chapter 3 (Legal Tests of Soundness) - Assessing whether the plan is sound, having regard to the tests of soundness outlined by paragraph 35 of the NPPF.

Chapter 4 (Duty to Co-operate) - Assessing whether the plan is sound, having regard to the duty to cooperate outlined by paragraph 24 of the NPPF.

Chapter 5 (Housing Need) - Consideration of market and affordable housing need and assessment of proposed housing allocations and supply sources.

Chapter 6 (Assessment of Suitability) - Re-introduces our client's Site and provides a summary of planning constraints and opportunities, including the quantum of development that could be accommodated, why the Site is suitable for development and why the principle of the draft allocation for residential development is both justified and consistent with the DDC's strategy for growth in the district.

Chapter 7 (Conclusion) - Summarises the key points raised throughout the representation and re-affirms our client's support for the principle of the Site's allocation and the principle of proposed strategy ahead of the submission of the Plan for examination, and the objections in terms of capacity.

2 DDC – Draft for Submission Local Plan (Regulation 19)

2.1 Consultation Background

2.1.1 DDC are required to prepare a new Local Plan, as the current suite of development plan documents were adopted in 2002, 2010 and 2015. The Core Strategy (CS) (adopted 2010) in particular has a time horizon up to 2026. The plans, and the policies contained within, pre-date current national policy, practice guidance and local evidence and consequently require updating.

2.1.2 The new Local Plan will set out the vision, strategic objectives and overarching development strategy for the growth of the District over the period to 2040. It provides the planning policy framework to guide the future development of the area, addressing needs and opportunities for housing, the economy, community facilities and infrastructure, as well as the basis for conserving and enhancing the natural and historic environments, mitigating and adapting to climate change, and achieving well designed places.

2.1.3 For the avoidance of doubt, the new Local Plan, on adoption, will replace the CS 2010 and the Land Allocations Plan 2015, as well as saved policies from the 2002 Local Plan.

2.1.4 DDC's Regulation 19 Local Plan outlines the key issues that need to be addressed between now and 2040. In particular, the Plan sets out the following key planning issues for the District:

- Ensuring that new development in the District contributes to the mitigation of, and adaptation to, climate change.
- Supporting DDC to deliver its intention to be a carbon neutral district by 2050.
- Managing flood risk and coastal change.
- Ensuring that a sufficient amount and variety of land is identified to deliver a continuous supply of housing across the Plan period and that DDC maintains a five-year housing land supply.
- Delivering growth in a way that focuses development in the least sensitive areas of the District in order to conserve and enhance the District's rich natural and historic environments.

- Supporting sustainable development in rural areas to enhance the vitality of rural communities.
- Working with partners to facilitate the delivery of the Whitfield Urban Expansion. Ensuring a range of housing tenures, types and sizes are provided across the District to meet the needs of the local community and provide choice and flexibility in the housing market.
- Promoting economic growth, tourism, and investment in the District's Town Centres in line with DDC's Economic Growth Strategy.
- To address the impact of the COVID-19 pandemic.
- Delivering strategic transport improvements, including upgrades to the Duke of York and Whitfield roundabouts to support the scale of housing and economic growth identified in the Plan.
- Promoting sustainable transport initiatives to encourage a modal shift to more sustainable forms of transport like walking and cycling.
- Ensuring that infrastructure is delivered, in the right place, at the right time, to meet the needs of the District and support the levels of development identified in the Local Plan.
- Supporting the delivery of attractive, high-quality, design led developments and the creation of healthy, inclusive and safe communities, that are well served by good quality services and facilities to support people's lives.
- Conserving and enhancing the District's rich and diverse natural landscape, including the five international sites within the district, the Kent Downs Area of Outstanding Natural Beauty (AONB), five Sites of Special Scientific Interest (SSSIs), two National Nature Reserves (NNRs), two stretches of Heritage Coasts and two Marine Conservation Zones.
- Delivering a net gain in biodiversity in the District over the plan period.
- To promote the conservation, restoration and where appropriate the enhancement of the District's heritage assets, in order to protect their significance and to ensure that they can be best appreciated and enjoyed by current and future generations.

2.1.5 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'.

2.1.6 This submission will comment on each of the above, highlighting where we believe any areas of concern lie or where modifications may be required.

2.2 DDC's Local Development Scheme

2.2.1 The District Council has a duty to review the policies contained within the development plan every five years. The 2014/2015 Authority Monitoring Report signalled the need to review key parts of DDC's adopted CS evidence base.

2.2.2 DDC's Local Development Scheme (LDS) first outlined the delivery timetable for the Local Plan Review (LPR) in the March 2017 publication. Since then, the LDS has been updated on an annual basis. The most recent September 2022 LDS summarises that following the preparation of the principal evidence base documents, the Local Plan Review Regulation 18 consultation took place for 8 weeks in January 2021. The Regulation 19 consultation was scheduled for 7 weeks during Q4 of 2022 and is the subject of this representation.

2.2.3 Moving forward, submission of the Plan is anticipated in Q1-2 2023 with the Examination in Public in Q3-4 2023. The new Local Plan is currently scheduled for adoption in 2024.

2.2.4 As planned, DDC are now undertaking the Regulation 19 Draft Local Plan Consultation, for which this submission is made

3 Legal Test of Soundness

3.1 Legislation and Guidance

3.1.1 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. It is a statutory requirement that every development plan document must be submitted for independent examination to assess when it is "sound", as well as whether other statutory requirements have been satisfied (s.20(5) of the 2004 Act). By s.19 of the 2004 Act, in preparing a development plan document a local planning authority must have regard to several matters including national policies and advice contained in guidance issued by the Secretary of State. Such guidance currently exists in the form of the NPPF and is summarised below. This states that Plans must be:

(a) Positively Prepared: based on a strategy which seeks to meet objectively assessed development and infrastructure requirements

3.1.2 This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The NPPF set out principles through which the Government expects sustainable development can be achieved.

(b) Justified: an appropriate strategy when considered against the reasonable alternatives, based on proportionate evidence

3.1.3 This sets out the requirement that the Local Plan should be based on a robust and credible evidence base involving:

I. Research/fact finding: the choices made in the plan are backed up by facts.

II. Evidence of participation of the local community and others having a stake in the area.

3.1.4 The Local Plan should demonstrate an appropriate strategy, taking into account reasonable alternatives and based on proportionate evidence. These alternatives should be realistic and subject to sustainability appraisal. The Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.

(c) Effective: deliverable over its period based on effective joint working on cross-boundary strategic priorities

3.1.5 This makes clear that the Local Plan should be deliverable, requiring evidence of:

- Sound infrastructure delivery planning;
- Having no regulatory or national planning barriers to delivery;
- Delivery partners who are signed up to it; and
- Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.
- The new Local Plan should be flexible and able to be monitored.

3.1.6 The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the Local Plan should make clear that major changes may require a formal review including public consultation. Any measures which DDC has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.

d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national policy.

3.1.7 This submission comments on each of the above in further detailing, highlighting areas of support and where modifications are required as appropriate.

3.2 Legal Compliance

3.2.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

3.2.2 In addition to the above, the NPPF states² that: "Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that:

a) All plans should promote a sustainable pattern of development that seeks to: meet the development needs of the area; align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effect.

b) Strategic policies should as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

(i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or

Paragraph 11, National Planning Policy Framework 2021

(ii) Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.”

3.2.3 In addition, to the above, the NPPF states³ that Plans should:

- a) be prepared with the objective of contributing to the achievement of sustainable development;
- b) be prepared positively, in a way that is aspirational but deliverable;
- c) be shaped by early, proportionate and effective engagement between planmakers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;
- d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;
- e) be accessible through the use of digital tools to assist public involvement and policy presentation; and
- f) serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).

3.2.4 It is important to note that the NPPF⁴ requires strategic policies to set out an overall strategy for the pattern, scale, and design quality of places, and make sufficient provision for:

- a) housing (including affordable housing), employment, retail, leisure and other commercial development;
- b) infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat);
- c) community facilities (such as health, education and cultural infrastructure); and;
- d) conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation.

3.2.5 It is clear from the above, that any local plan should set out a comprehensive and cohesive approach to future development.

Paragraph 16, NPPF 2021

Paragraph 20, NPPF 2021

4 Duty to Co-Operate

4.1 Legal and NPPF Requirements

4.1.1 Section 33A of the Planning and Compulsory Purchase Act 2004 sets out a statutory ‘Duty to Cooperate’ (DtC) – i.e. a legal obligation - to all bodies as prescribed by Regulation 4 of the Town and Country Planning (Local Planning) England Regulations 2012 (the Regulations).

4.1.2 The duty requires DDC to cooperate with other persons to ‘maximise the effectiveness’ with which named activities are undertaken. Those activities include the preparation of development plan documents (such as this local plan) and activities that support that activity ‘so far as relating to a strategic matter’.

4.1.3 A strategic matter is defined by S33A(4) in summary as: (a) ‘sustainable development or use of land that has or would have a significant impact on at least two planning areas’ (a planning area in this case is the area of a borough or district council); and (b) ‘sustainable development or use of land in a two tier area’ (as this is) ‘if the development or use (i) is a county matter, or (ii) has or would have a significant impact on a county matter’. County matters broadly relate to minerals and waste and associated developments as defined by Paragraph 1 of schedule 1 to the Town and Country Planning Act 1990 (as amended).

4.1.4 Section 33A (7) requires DDC (and persons subject to the DtC) to have regard to any guidance issued by the Secretary of State about how the duty is to be complied with. In that regard Paragraph ID 9-004-29140306 of the Government’s Planning Practice Guidance (PPG) confirms amongst other things that the DtC is not a duty to agree (albeit that local planning authorities should make every effort to secure the necessary cooperation on strategic cross border matters before they submit local plans for examination).

4.1.5 The NPPF establishes that effective and on-going joint working is an integral part of the plan making process that will, amongst other things, determine whether development needs that cannot be met wholly within a plan can be met elsewhere. The NPPF goes on to state at paragraph 27 that in order to demonstrate effective and on-going joint working strategic policy making authorities should: "... prepare and maintain one or more statements of common ground documenting the cross-boundary matters being addressed".

4.1.6 In addition to the District's own housing pressures, part of the DtC involves considering whether neighbouring authorities' unmet housing need can be accommodated. It is worth highlighting that recent amendments to the London Plan have identified that the City's housing need has become increasingly more difficult to deliver and therefore areas outside London will be faced with having to absorb more of London's housing need. Consequently, DDC has a duty to explore whether it can accommodate some of this overspill of London's unmet need.

4.2 Assessment of DDC's discharging of the Duty to Co-operate

4.2.1 It is recognised that work to discharge the DtC remains ongoing by DDC and will continue prior to submission as part of the preparation of the Local Plan evidence base.

4.2.2 Notwithstanding the above, at this stage it is understood that DDC have engaged with the members of the East Kent Regeneration Board including neighbouring East Kent planning authorities, Kent County Council (KCC) and its subsidiary departments:

- Folkestone and Hythe District Council
- Canterbury City Council
- Thanet District Council
- KCC
 - KCC Highways & Transportation
 - KCC Minerals & Waste
 - KCC Heritage Conservation
 - KCC Flood & Water Management
 - KCC Natural Environment & Coast
 - KCC Infrastructure including Education

4.2.3 In February 2016, DDC adopted a Memorandum of Understanding (MOU) in respect of the DtC between the East Kent Regeneration Board members. A review of the MOU took place and was agreed in January 2021.

4.2.4 The East Kent MOU sets out the framework in which the authorities will work together on strategic issues and will actively engage. It forms the overarching framework and context within which Statements of Common Ground (SoCG) will be agreed between individual authorities.

4.2.5 Further engagement is also confirmed to have taken place between the following prescribed bodies and other relevant bodies:
