- Kent Downs AONB Unit
- Other infrastructure providers

4.2.6 Whilst work remains ongoing, at this stage it is understood that SoCGs have been agreed and signed between the following parties:

- DDC and Folkestone & Hythe District Council
- DDC and Canterbury City Council
- DDC and Thanet District Council
- DDC and Kent County Council

DDC and National Highways

4.2.7 As part of the DtC Evidence Base documents, DDC prepared a detailed DtC Statement (dated September 2022) which sets out a summary of the engagement that has taken place, firstly by organisation, and then by issue. Whilst the statement focuses on strategic issues and duty to co-operate bodies it also includes information relating to engagement on non-strategic issues and co-operation with other bodies that are not prescribed by the regulations. In addition, Appendices 1, 3 and 4 identify the main meetings and other correspondence that has taken place throughout the plan making process.

4.3 Summary

4.3.1 On account of the above and the documents published within the DDC's Local Plan Evidence Base, we are satisfied that DDC as the strategic policy making authority has demonstrated effective and on-going joint working with neighbouring authorities, the county council, prescribed bodies and other relevant bodies. Further, we agree that DDC has prepared and maintained SoCG documenting the cross-boundary matters being addressed in accordance with the Framework and the DtC may be discharged by the Planning Inspector under Section 20(5) (c) of the Planning and Compulsory Purchase Act 2004.

4.3.2 Without prejudice to the above, should ongoing work by DDC result in significant changes in circumstances such that the signed SoCGs may be amended or withdrawn, our client reserves the right to alter their consultation response accordingly and be present at the examination of the Plan to discuss further.

5 Housing Need

5.1 Context

5.1.1 Paragraph 11 of the NPPF is explicit in its requirement for strategic policy-making authorities to promote a sustainable pattern of development that seeks to meet the need in full.

5.1.2 Paragraph 20 of the Framework is equally clear that strategic policies should set out an overall strategy for the pattern, scale and design quality of places. Policies should make sufficient provision for the development that is required as well as associated infrastructure, community facilities and should set out a strategy for the conservation and enhancement of the natural, built and historic environment.

5.1.3 Given this national planning context, the emerging Local Plan should provide a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic environment.

5.1.4 National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate.

5.1.5 In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.

5.1.6 Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.

5.2 DDC's Housing Need

5.2.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover District of 596 dwellings per annum. However, the affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total housing need of 10,998 dwellings for the Plan period to 2040. We understand that the Regulation 19 Local Plan seeks to meet this need in full and in addition to the minimum figures, DDC have set an appropriate contingency buffer of 926 dwellings of the Plan period, equating to 8.4% of the total Plan period figure.

5.2.2 For context, the current adopted CS requirement is 700 dwellings per annum. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.

5.2.3 For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate sufficient land to accommodate a minimum of 6,642 new homes over the remaining plan period to 2040. It is understood that this will be derived from the following sources:

- Whitfield Urban Expansion Allocation: 2,200 dwellings
- Local Plan Allocations (excluding Whitfield): 3,392 dwellings

- Windfall Allowance (70 a year from year 4): 1,050 dwellings

5.2.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target. Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs AONB, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, meeting Dover's housing needs inevitably will require the release of significant greenfield land.

5.2.5 In our view, sustainable and accessible sites logically located adjacent to existing higher-order urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan Period, to deliver the significant number of new homes that are required and are most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the District.

6 Site Specific Assessment

6.1 Overview

6.1.1 The previous chapters of this representation (Chapter 3-5) outline our client's position relating to the soundness of the Plan in which our client is confirmed to be supportive of the Local Plan as a sound strategy for the growth of the district to 2040.

6.1.2 Paragraph 4.146 of the Local Plan states that the urban area of Deal encompasses the built-up areas of the parishes of Walmer and Sholden. Deal is identified in the Settlement Hierarchy and Confines Topic Paper (2022) as a 'District Centre', where there is a secondary focus for development. This position is reinforced by draft policy SP3 which states that development in Deal will be at a more limited scale than Dover Town, compatible with the more limited range of job opportunities, shops, services, and other facilities available in these locations.

6.1.3 As introduced in the preceding sections, Fernham Homes Limited are supporting the residential allocation of the Site 'Land at Rays Bottom, Walmer' and. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan with an indicative capacity of 75 dwellings under policy reference 'SAP15' (WAL002).

6.1.4 Appendix 1a of the Housing and Economic Land Availability Assessment (HELAA) 2022 provides the following summary:

- No heritage concerns other than archaeology.
- Site will need to reflect character of surrounding area – low density, generous landscaping, well designed.
- Potential site for executive homes.
- Risk of surface water flooding.
- Transport Assessment required.

6.1.5 The Site was considered 'Green' in the red/amber/green (RAG) rating in terms of suitability, availability and achievability, with an anticipated timescale for delivery in the medium term (2027-2031). The information contained in the summary could be addressed as part of any future planning application.

6.1.6 We agree that the Site represents a logical and sustainable location to direct the growth required within Deal and consider that the land promoted at Rays Bottom, Walmer must remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered to be wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040.

6.1.7 We are firmly of the view that the allocation of Land at Rays Bottom is a necessary component of the balanced growth strategy put forward within the Pre-submission

DDC Settlement hierarchy (2022): <https://www.doverdistrictlocalplan.co.uk/uploads/pdfs/settlement-hierarchy-and-confines-topic-paper-aug-2022.pdf>

Dover District Local Plan, comprising an appropriate mix of small, medium and strategic-scale sites deliverable across the Plan period. The allocation of well- located, reliable, greenfield sites such as our client's at Land at Rays Bottom is necessary in order for DDC to meet the growing need for new homes in the district and ensure that DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan.

6.1.8 Notwithstanding our client's support of the draft allocation within the Regulation 19 Plan in principle, we suggest that the policy text be re-visited prior to submission, to allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential. It is submitted that the SAP15 policy wording should be amended to more accurately

reflect the capability of the Site to accommodate approximately 80 dwellings deliverable early in the Plan period. Further commentary on this point is provided below in section 6.3.

6.2 Site and Surroundings

6.2.1 The Site is situated to the south of Walmer, Deal between Liverpool Road to the east and Hawksdown to the west immediately adjacent to existing residential development.

6.2.2 The Site comprises an undeveloped regular parcel of land in arable use totalling approximately 4.43 hectares, forming part of a larger arable unit to the south. The Site is bound primarily by hedgerow vegetation to the east along Liverpool Road with dense woodland and mid-storey vegetation to the north. The west boundary comprises a mix of hedgerows and trees set along the perimeter abutting residential development on Hawksdown.

Figure 6.1: Approximate Site Location (courtesy of Google Earth)

6.2.3 The wider surroundings are characterised by its edge-of-settlement location with low density existing residential development along Hawksdown to the north and west and undeveloped agricultural land to the east and south. The landscape assessment which informed the HELAA recognises that the site is:

“...relatively discrete, having housing on two sides and being located on the side of a dry valley. The sensitivity of the site is moderate as views in are limited and the flow of housing down the slope would not detract. The impact of development on the wider landscape would be minimal and this could be reduced further by providing additional buffer of landscaping along the southern boundary”.

6.2.4 The Site enjoys access to a number of day-to-day facilities and services which are within a reasonable walk distance, including primary and secondary schools, local shops, healthcare, employment, and public transport links within Walmer and Deal including Walmer mainline station and frequent buses along Dover Road between Dover, Deal, Sandwich and Canterbury.

6.2.5 In terms of overarching planning constraints, the site is not subject to any overarching landscape or ecological designations and is not itself subject to any heritage constraints.

6.2.6 To the north east of the site – with intervening land - is the grade II Registered Park and Garden of Walmer Castle which is a scheduled monument, and nearby to the east is an undesignated historic First World War Aerodrome and Second World War radar station within an area of Archaeological Potential.

6.2.7 There is a low risk of a surface water flow path through the non-wooded area of the site, and along the western boundary – both of which can be easily accommodated in a residential layout.

6.3 Development Capacity

6.3.1 As set out above, the proposed allocation is for 75 dwellings, reduced from 100 dwellings at the Regulation 18 stage. The reasoning set out in the “selection of Site Allocations” (September 2022) supporting document for the reduction in capacity is “To enable a scheme to come forward which reflects the character of the surrounding area, and enable sufficient landscaping to be provided”. Excluding the wooded area to the north of the site, the provision of 75 dwellings would equate to a density of 21 dwellings per hectare, with 100 dwellings equating to 28 dwellings per hectare. For the reasons set out subsequently, we consider that sites located in sustainable locations such as Land at Rays Bottom, adjacent to Deal, should take opportunities to maximise the potential for housing – whilst respecting the context and character of the area. For this reason we consider that the appropriate capacity is a little greater at approximately 80 dwellings, as part of a high-quality, landscape-led residential scheme capable of delivery within the early phase of the Plan period.

6.3.2 At this early stage, detailed proposals have not yet been advanced, however it is anticipated that any future development of the site – at 80 dwellings - will be of appropriate density, reflecting local patterns of development and sensitively designed to respect the existing character of the area, the topography of the site and to allow transition to the rural landscape and respond to its coastal location.

6.3.3 Particular care will be taken with regard to the low-risk surface flow route, impact on nearby heritage assets and ecologically sensitive sites with a particular emphasis on opportunities for biodiversity habitat creation and enhancement. Fernham Homes have a strong track record of delivering high quality housing whilst respecting such characteristics and constraints.

6.3.4 In terms of access, primary vehicular, pedestrian and cycle access to the site shall be provided from Liverpool Road. Road widening and traffic management should be provided to Liverpool Road along the frontage of the site and where possible up to the junction with Gram's Road; along with an extension to the 30mph speed limit zone. Appendix 1 indicates how this can be achieved, with the provision of a footway and suitable carriage width which meets relevant highways requirements. Alternatively, the footway

could not be provided, and instead a wider carriage way could be provided. Appendix 1 also clearly shows how the required visibility splays can be achieved on land either within the site, or within the public highway.

6.4 Draft Policy Allocation 'Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer' (SAP15)

6.4.1 As introduced in the preceding sections, our client's Site at Land at Rays Bottom is allocated for residential development within the Dover Pre-submission (Regulation 19) Local Plan. For ease of reference, the draft policy wording is as follows:

"SAP15 - Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002)

The site, Land at Rays Bottom between Liverpool Road and Hawksdown, as shown on the policies map is allocated for an indicative capacity of 75 dwellings.

Development proposals for the site shall include the following:

- a) Development should be low density and sensitively designed to respect the existing character of the area, the topography of the site and to allow transition to the rural landscape;
- b) A sensitive landscaping scheme and appropriate landscape buffer to the south, determined by a Landscape Visual Impact Assessment is required to mitigate the impact of development on the wider countryside and to provide opportunities for biodiversity habitat creation and enhancement responding to the nearby BOA and local wildlife site;
- c) The existing wooded area to the north of the site and the tree and shrub line along the western boundary, shall be maintained and enhanced as areas for biodiversity habitat creation.
- d) Primary vehicular, pedestrian and cycle access to the site shall be provided from Liverpool Road. Road widening and traffic management should be provided to Liverpool Road along the frontage of the site and where possible up to the junction with Gram's Road; along with an extension to the 30mph speed limit zone;
- e) The Transport Assessment that is required to be carried out in accordance with Policy TI2, must consider and identify mitigation (potential widening/traffic management measures/junction improvements) for the surrounding local road network, taking into account the cumulative impact of this and other sites allocated in this Plan, including (but not limited to) Liverpool Road and Gram's Road up to and including the Gram's Road/Dover Road junction.
- f) A site-specific Flood Risk Assessment must be carried out in accordance with Policy CC5. This shall also inform the application of the Sequential Approach to the layout of the site by locating the most vulnerable elements in the lowest risk areas;
- g) In accordance with Policy SP13, a wintering bird survey must be undertaken in advance of a planning application on the site. If the bird survey identifies that the development will exceed the threshold of significance, mitigation will be required. A suitable scheme of mitigation will need to be submitted with the planning application for the site;
- h) An Archaeological Assessment for the site must be carried out in accordance with Policy HE3 Archaeology, the results of which should inform the layout and design of the development which is necessary to avoid harm to any archaeological assets identified through the assessment;
- i) A Heritage Assessment carried out in accordance with Policy HE1 is required to identify any necessary measures to avoid or minimise harm to the nearby heritage assets; and
- j) The occupation of the development should be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider. Development should provide a connection to the sewerage system at the nearest point of adequate capacity and ensure future access to the existing sewerage infrastructure for maintenance and upsizing purposes."

6.4.2 To be clear, our client remains wholly supportive of the principle of the allocation of the Site for residential development. Fernham Homes has a strong track record of swift delivery, and commits to being able to deliver the Site within the early phase of the Plan period. We agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client's Site can be made – and therefore object to the capacity identified.

6.4.3 Accordingly, we say that the allocation of Land at Rays Bottom is necessary in order for DDC deliver proportionate and high-quality sustainable growth within Deal, meet the growing need for new homes in the district and ensure that DDC can have greater confidence in meeting its market and affordable housing targets in full.

6.4.4 It is submitted that the SAP15 policy wording is sound and appropriately reflects the capability of the site to deliver a sensitive, landscape-led residential development but the wording should be amended to reflect the capability of the Site to accommodate approximately 80 dwellings, deliverable with the early phase of the forthcoming Plan period.

6.4.5

6.5 Strategic Justification for Development

Spatial Strategy

6.5.1 The proposed Housing Distribution for the district across the Plan period is established within Policy SP3 'Housing Growth' which sets out that the distribution of housing growth in the district is primarily based on the settlement hierarchy and influenced by site availability, environmental constraints and factors of delivery.

6.5.2 Rightly, a key aim of the growth strategy is to focus development in the least sensitive areas of the district in order to conserve and enhance the Dover's rich natural and historical environment.

6.5.3 A retained theme from the adopted Plan, is that DDC's settlement strategy continues to focus on the development and regeneration of Dover Town and Whitfield (3381 dwellings). Approximately half of the district's planned housing is in this location, the majority of which again is to come forward as part of the strategic urban expansion of Whitfield 'SAP1' (2200 minimum dwellings).

6.5.4 Development will then be focused in the District Centre of Deal (223 dwellings), and the Rural Service Centres of Sandwich (227 dwellings) and Aylesham (649 dwellings). Following the settlement hierarchy rigidly would distribute housing in the preceding order, however the Plan recognises that housing delivery in Deal and Sandwich continues to be constrained by a number of factors including flood risk, ecological designations, heritage and highways. Further, Deal has experienced generally high levels of windfall development across the previous Plan period and accordingly there is now a dwindling supply of available, suitable sites in both settlements. On account of this context, DDC have sought to direct the majority of the remaining higher order settlement growth (outside of Dover & Whitfield) to Aylesham, through the strategic expansion to the town.

6.5.5 Outside of the four principal district settlements, the Rural Settlement Hierarchy (August 2022) identified that the majority of lower-order settlements in the district emerge as having a low level of facilities within the hierarchy and six settlements having none of the key indicators of sustainable services. Plainly, these settlements offer very limited opportunities for growth and it is evident that the forthcoming Plan will remain reliant on the settlements of Dover (including Whitfield), Deal, Sandwich and Aylesham to deliver the housing growth that is required.

6.5.6 Given this context, it is clear that where available and suitable opportunities for residential development do exist within the district's higher order settlements, including our client's Site at Land at Rays Bottom, Walmer which can provide a policy compliant level of much-needed affordable housing, it is imperative that the effective use of these sites are appropriately maximised in accordance with national policy objectives.

6.5.7 Notwithstanding our client's in principle support of the proposed strategy, we are concerned that highly sustainable, edge-of-settlement sites, particularly in higher tier settlements such as Deal have not been fully maximised to reflect their accessible location and capability to accommodate a greater quantum of development. On this basis, we are concerned that the strategic objectives underlying draft policy SP3 'Housing Growth' may not be fully realised, to the detriment of market and affordable housing delivery and the wider policies seeking to conserve and enhance the district's natural and historic environment.

6.5.8 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Deal (whilst ensuring that sensitive characteristics are reflected), and this has not been undertaken – for example at Rays Bottom, Liverpool Road. It is our view that the site has sufficient capacity to deliver approximately 5 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

6.5.9

Greenfield Development and Consistency with Housing Trajectory

6.5.10 Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs Area of Outstanding Natural Beauty, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, greenfield development will inevitably be required if DDC is to meet its housing and development commitments in full moving forward.

6.5.11 In our view, sustainable and accessible unconstrained sites logically located adjacent to existing urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan period, to support the role and timescales of strategic urban extensions and to deliver the significant number of new homes that are required within the forthcoming Plan period.

6.5.12 Within Deal itself, meaningful housing growth is inherently constrained on three sides due to the restrictive effect of the coast to the east and Flood Zone 2/3 land and ecologically sensitive sites including SSSIs to the north and west. Alongside overarching objectives to minimise the incursion of widespread development into the rural countryside, the scope for significant Plan-led development in Deal is becoming increasingly

limited. Accordingly, we firmly agree that sites to the south of Deal, including that of our clients in Walmer, represent the least sensitive and most logical locations for future Plan-led growth, making effective use of the availability of sites in close proximity to the Urban Area and key infrastructure including Walmer train station.

6.5.13 In terms of housing delivery in Deal, the development of Land at Rays Bottom (75 dwellings) is anticipated to deliver completions with Years 9-11 of the Plan period, although as detailed above our clients have a strong track record of swift delivery, and consider that it could be delivered ahead of this. When combined with extant permissions within Deal and nearby allocations at Land off Cross Road, Deal (SAP14) and Deal Small Housing Sites (SAP16) totalling 100 dwellings and 48 dwellings respectively, our client's site will assist in delivering a steady supply of new homes within Deal across the majority of the early and middle phases of the Plan period and contribute to providing genuine choice in the market.

6.5.14 Moreover, in our experience, greenfield edge-of-settlement sites are typically most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that are urgently needed in the district.

6.5.15 The Sustainability Appraisal Scoping Report (2018) sets out that over the course of the adopted Plan period, the key sustainability issues facing Dover District in relation to housing are as follows:

Population growth, household growth and demographic change will place additional demand on key services and facilities such as housing, health, education and social care. The Local Plan offers a new opportunity to manage these pressures, encouraging mixed communities;

There is a need for affordable housing across the District. At present, the mean price of dwellings is higher than the national average. The Local Plan will help to expedite its delivery; and,

There is the need for a mix of housing types that cater for the needs of a range of people, including the growing number of single person and elderly households. Without an up-to date Local Plan, the required housing is less likely to be delivered.

6.5.16 It is evident that the new Dover Local Plan must allocate a mix of reliable sites capable of steadily delivering not only the quantum of housing that is required, but also the associated public infrastructure, affordable housing and a mix of unit types and tenures suitable for a wide range of future occupants.

6.5.17 The Housing Topic Paper (September 2022) provides further context and summarises under Chapter 7 'Historical Housing Delivery' that Dover has historically placed significant reliance on windfall development over the current adopted Plan period, with windfall sites accounting for 44% of all completed dwellings over the preceding 10-year period.

Figure 1: DDC Brownfield / Greenfield Completions 2010/11 to 2020/21
(source: Housing Topic Paper September 2022)

6.5.18 Moreover, it is highlighted that at the beginning of the 10 year period, the majority of new dwellings were being built on brownfield land. However, from the monitoring year 2013-14 onward development on greenfield land began to play a much greater part in the location for new development as show in figure 1 above. This trend of increased housing development on greenfield land is a result of the allocations within the CS and Land Allocation DPD being built out and is associated with an approximate doubling of completions in the district. From 2013-14 onwards the average number of completed dwellings per annum has doubled to that of the early years of the CS, as the strong delivery rates of greenfield sites formed the predominant source of housing. This is despite an overall declining trend of brownfield completions towards the latter half of the Plan period. This is not an uncommon trend whereby in the majority of local planning authorities areas, opportunities for available and suitable sites in urban centres typically dwindle throughout the Plan period.

6.5.19 In light of the above context, it is clear that the adopted Dover Local Plan suffered from an initial under delivery of Plan-led housing growth in which windfall development sources were largely required to take up the slack in the early phases of the Plan period, as major allocated sites failed to deliver at the rates initially expected.

6.5.20 It is equally apparent that initial slow completions rates were quickly renewed once greenfield allocations commenced development, feeding into strong completions in the latter half of the Plan period. In our experience, greenfield sites are typically associated with stronger delivery rates and provide a reliable source of housing growth. The allocation of an appropriate mix of sites and scales is required in order to ensure steady and sustained Plan-led housing delivery across the Plan period and to avoid a reliance on windfall development to address the shortfall.

6.5.21 Consequently, given all of the above, it is imperative that the new Local Plan allocates a sufficient variety and scales of site capable of both ensuring steady and sustained housing completions and capable of making necessary contributions to public infrastructure and services, affordable housing and mix of unit types to address the key issue raised in the Sustainability Appraisal.

6.5.22 In our view, edge-of-settlement greenfield sites such as our client's Site Land at Rays Bottom, Walmer represents the most reliable and sustainable source of housing delivery for the Plan period. Such sites are typically less constrained by wider factors and less affected by

unforeseen delays such as land contamination. Moreover, greenfield sites typically are more capable of delivering the policy compliant affordable housing, unit mix and developer contributions that are urgently needed.

6.5.23 It is understood that the Plan is predicated on the delivery of strategic scale development at Whitfield comprising the development of circa 2,200 new homes. Consequently, in order to avoid a repetition of the previous Plan, DDC have sought to ensure that a pool of reliable greenfield allocation, including that of our client's are included within the Plan, capable of delivering the early and middle phase growth that is required within the housing trajectory prior to the commencement of stronger delivery from major allocations later in the Plan period.

6.5.24 We note that within the Housing Trajectory 'Appendix D', DDC have included allocated units from Years 4 onwards, with extant permissions (accounting for 5% non-implementation) demonstrated to be solely capable of delivering the growth required in Years 1-3. Notwithstanding our client's considerations that it can deliver at Land at Rays Bottom early in the plan period, we support this pragmatic approach and suggest this represents a sound basis on which to set the district's housing trajectory. We note also the inclusion of an appropriate windfall allowance and the included contingency buffer to further ensure reasonably flexibility in the housing supply.

6.5.25 On account of all of the above, we submit that the allocation of Land at Rays Bottom, Walmer forms part of a sound strategy for growth in the district for the forthcoming Plan period. The Site is capable of delivery within the early phase of the Plan period. The Site represents a reliable source of housing growth in a highly sustainable and accessible location adjacent to the existing settlement boundary of Deal and Walmer mainline station, consistent with DDC's preferred settlement strategy. Proposals remain at an early stage, however the Site is unconstrained and is considered capable of providing a high-quality landscape-led residential development including a mix of unit types and tenures, a meaningful contribution to the supply of affordable housing and contributions to public services and infrastructure, benefiting both existing residents and future occupiers. However, we object on the submission that the Site is capable of making a greater contribution to the district's housing need and suggest an amended wording of the policy to allocate the Site for approximately 80 dwellings.

Policy SP4 'Windfall Development'

6.5.26 Separately, we note the provisions of policy SP4 windfall development. Proposals at Rays Bottom, Walmer would likely be acceptable in principle under this policy and we support the inclusion within the Plan for appropriate, proportionate windfall development.

6.5.27 Our client is fully committed to the delivery of the Site which is available and anticipated for delivery in the early phase of the Plan period. Notwithstanding the provisions of SP4, it is reiterated that our client fully supports the allocation of the Site under SAP15 as the most appropriate mechanism for delivery of the Site and the opportunity for genuinely Plan-led development in Deal, the provision of associated benefits to public services and infrastructure, contribution to affordable housing supply and the delivering of a mix of house types and tenures.

Infrastructure Delivery

6.5.28 Paragraph 11 of the Framework is clear that all plans should promote a sustainable pattern of development. This includes aligning growth and infrastructure. Paragraph 20 goes on to confirm that strategic policies will be expected to make sufficient provision for associated development infrastructure.

6.5.29 In this regard, draft policies SP11 'Infrastructure and Developer Contributions' and SP12 'Strategic Transport Infrastructure' of the emerging Plan form the key strategic policies for infrastructure delivery. We agree that where development would create a need, or would have an impact, or would exacerbate an existing deficiency in infrastructure provision, appropriate developer contributions may be sought.

6.5.30 It is however emphasised that in all developments, infrastructure requirements must be demonstrated to be necessary through assessment during determination of the application on a case-by-case basis. Where new development is proposed, it does not automatically follow that major infrastructure contributions are always required or contribution to strategic infrastructure proposals are appropriate. For instance, it is our client's view that any infrastructure requirements must be demonstrated through a robust and transparent assessment at application stage, taking into account the submission of detailed supporting evidence, for example following consideration of the Transport Assessment in the case of highway infrastructure contributions.

Alignment with Sustainability Appraisal Findings

6.5.31 As part of the preparation of the Local Plan, the Council has identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA) which provides an assessment of how different options perform in environmental, social and economic terms, to help inform which option should be taken forward and combined with wider evidence documents, have been used to determine the growth and spatial strategy set out in the Plan.

6.5.32 Five potential distributions of growth were identified during preparation of the draft Regulation 18 Local Plan:

- Spatial Option A: Distributing growth to the District's suitable and potentially suitable housing and employment site options (as needed to deliver the scale of growth required).

- Spatial Option B: Distributing growth proportionately amongst the District's existing settlements based on their population.
- Spatial Option C: Distributing growth proportionately amongst the District's existing settlements based on the District's defined settlement hierarchy.
- Spatial Option D: Distributing growth in the same way as the adopted Local Plan, focussing most growth in and around Dover town.
- Spatial Option E: Distributing growth more equally across the District's settlements: Dover, Deal, Sandwich and Aylesham, as well as the rural villages.

6.5.33 The conclusion of the SA was that Spatial Options C (settlement hierarchy) and D (adopted Core Strategy with Dover focus) generally perform the most strongly against the SA objectives, particularly when delivering the baseline growth scenario. However, given the environmental constraints that exist around Deal and Sandwich, very few suitable and potentially suitable sites have been identified in these towns. Given this, the Council's preferred option for the distribution of housing and economic growth comprises a combination of options A (HELAA sites), C (settlement hierarchy) and D (Dover focus). The distribution of housing and economic growth in the District is therefore primarily based on the settlement hierarchy, and influenced by site availability, environmental constraints and factors of delivery.

6.5.34 On account of the above, our client agrees that the proposed growth strategy, and by extension, policy SP3 in principle represents a sound and evidence-led strategy for growth. However, given the clear acknowledgement of the dwindling supply of available sites in the higher order settlements of Deal and Sandwich, which has necessitated a minor deviation from the strongest performing spatial options, we submit that where sites are available and suitable for development in Deal and Sandwich, these must be fully maximised, reflecting their accessible location and their ability to reduce the need to develop into less accessible and more sensitive sites elsewhere in the district to accommodate the growth that is required.

Site Specific Sustainability Appraisal

6.5.35 Land at Rays Bottom between Liverpool Road and Hawksdown is included under HELAA reference 'WAL002' within the SA Site Assessment (Appendix F). The site generally performs strongly, with particular positives identified with regards to SA Objectives related to housing and the economy.

6.5.36 We contest the assessment of 'minor negative' in regard to sustainable transport. To the contrary, the site is well-located adjacent to the settlement boundary of Deal with access to a range of high-quality day-to-day services and access to Walmer train station for convenient access to larger settlements. In what is otherwise a largely rural district, we strongly disagree with the suggestion that an edge-of-settlement site represents a less than preferable location in respect of sustainable travel and day-to-day access to amenities.

6.5.37 We also note negatives associated with the development of a greenfield site, including loss of agricultural land, however this would be true of the majority of greenfield sites and it is abundantly clear that Dover's housing need cannot be met solely on brownfield sites. We note also minor negatives / uncertain associated with biodiversity, the historic environment and landscape, however it is not clear whether these take into account the potential for high-quality design, biodiversity enhancement and landscape mitigation. Irrespective, these are not considered to outweigh the clear and tangible sustainability benefits associated with edge-of-settlement development, the site's consistency with the preferred spatial options and the wider benefits associated with reducing the need to develop into lesser accessible, more sensitive sites to otherwise deliver the housing growth that is required.

Summary

6.5.38 Taking all of the above into consideration, our client is wholly supportive of the inclusion of land promoted at Rays Bottom, Walmer as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040.

6.6 Deliverability

6.6.1 Prior to the current appeal proposal, the Site has had no recent planning history of a residential nature or a history of unimplemented permissions. There are not considered to be any impediments to the Site being allocated for development commencing within the early (or mid) phase of the Plan period.

6.6.2 Fernham Homes – a local SME with a strong history and track record of delivery, together with an adopted and robust business plan for growth – is promoting the site, and are poised to commence work on its residential development promptly after the adoption of the Local Plan.

6.6.3 Combined with the delivery of extant permissions, an appropriate number and scale of wider allocations within Deal (including SAP 14 and SAP 16) and elsewhere across the district, this would ensure the steady delivery of housing both in Deal and in Dover

district across the majority of the Plan period and support the role and timescales of strategic housing delivery at Whitfield towards the latter half of the Plan period.

6.6.4 For the reasons set out in this representation, the Site is considered suitable for the residential development of approximately 80 dwellings. The Site is adjacent to the overarching urban area of Deal, one of the four higher order settlements in the district and DDC's preferred locations for Plan-led growth within the district. Development at land at Rays Bottom would form a natural and logical development south of Walmer, Deal with excellent accessibility to day-to-day services and amenities via active travel modes within Deal itself and convenient access to public transport infrastructure including Walmer train station for onward travel to key neighbouring settlements including Dover, Ramsgate, Canterbury and Ashford.

6.6.5 Finally, in respect of suitability there are no physical limitations or problems such as access, infrastructure, flood risk, hazardous risks, pollution or contamination.

6.6.6 On behalf of the landowner, we submit that there are no known financial restrictions that would impact upon the viability of a future housing scheme or that would prohibit development coming forward within the mid-stages of the Plan period. To the contrary, we consider there to be an opportunity to deliver a high-quality, sustainably located residential development scheme consistent with DDC's proposed growth strategy comprising an appropriate mix of market and affordable housing and capable of contributing to a range of community facilities, public infrastructure and services locally.

6.6.7 At the time of writing, proposals at Rays Bottom, Walmer remain at an early stage, however our clients are firmly committed to progressing the delivery of the Site on adoption of the Plan. The project team therefore does not anticipate any absolute constraints to the commencement of delivery on-site early in the plan period (potentially 2025-26) and completion by 2028/9).

6.6.8 The Site is in single ownership and there are no complicated legal agreements or covenants that would prohibit the ability to bring forward the Site in line with DDC's housing trajectory within the mid-phase of the Plan period. The Site is therefore considered available and achievable for the purposes of the tests of deliverability.

7 Conclusion

7.1 Summary

7.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited in response to the DDC Local Plan (Regulation 19) consultation which runs until 9th December 2022.

7.1.2 Our client is promoting 'Land at Rays Bottom, Walmer, Deal' for the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan within an indicative capacity of 75 dwellings under policy reference 'SAP15'.

7.1.3 Taking the above representation contents into consideration, we remain wholly supportive of the principle of the allocation of Land at Rays Bottom and agree that the Site represents a logical and sustainable location to direct necessary growth within Deal.

7.1.4 Accordingly, we consider that the land promoted at Rays Bottom, Walmer must remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered to be wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040. However, it is imperative that the effective use of these higher-order settlement sites are appropriately maximised in accordance with draft policy SP3 of the emerging Plan, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and object solely on this basis.

7.1.5 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Deal, and this has not been undertaken – for example at Land at Rays Bottom, where it is considered that the site has sufficient capacity to deliver approximately 5 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

7.1.6 Outside of the point regarding capacity, it is submitted that the SAP15 policy wording is sound and appropriately reflects the capability of the site to deliver a sensitive, landscape-led residential development with an indicative capacity of 80 dwellings, deliverable with the early phase of the forthcoming Plan period. Without prejudice to our client's support in principle of the proposed allocation, we would urge the Council to re-visit the allocation policy text and allow a higher dwelling capacity.

7.1.7 Accordingly, we say that the allocation of Land at Rays Bottom forms part of a balanced growth strategy comprising an appropriate mix of small, medium and strategic-scale sites deliverable across the Plan period. The allocation of well-located, reliable, greenfield sites such as our client's at Land at Rays Bottom is necessary in order for DDC to meet the growing need for new homes in the district and ensure that DDC can have confidence in consistently meeting its market and

	<p>affordable housing targets in full throughout the life of the new Dover District Plan.</p> <p>7.1.8 In addition to being a highly sustainable and logical edge-of-settlement allocation, the Site is deliverable in a single land ownership with no viability issues, legal or third-party constraints present. Our client is fully committed to the delivery of land at Rays Bottom Farm and there are no impediments to the Site being capable of delivery within the mid-phase of the Plan period.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>For the reasons set out in the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359), the capacity of Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002) and Policy SP3 - Housing Growth should be increased to approximately 80 dwellings.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>Please refer to the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359).</p>

<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>Not Applicable</p>

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Please find below listed reasons for opposing this proposed development followed by my personal impact statement. The plan identifies many various policies, but WAL002 does not seem to be subject to the policies correctly and I believe there has been clear errors in bring this land forward within the plan, this site should be protected and should have already been dismissed as it was previously.</p> <p>I also believe the sequential testing of this site has failed to deliver the correct information and an error of the area meeting requirements is incorrect.</p> <p><u>Objection to site SAP15/WAL002 Rays Bottom Walmer Deal</u></p> <ul style="list-style-type: none"> • Environmental impact, Pollution, Residents Health risk, Site location does not fit within the plan This site would increase the areas carbon footprint dramatically and have an irreversible impact on the wildlife and environment it would set a new president for further development on the Kent downs and beautiful countryside. • Emissions from cars, vans, motorcycles or mopeds and the effects of added gas, electric, noise, on any scale let alone 75 homes at 5 cars averaged per home will impact the local area, residents and wildlife and does not follow the plan policies or guidance. • Lack of Public transport and pathways this site would increase the amount of car use due to location and have substantial impact on the road, traffic emissions, noise, all having a huge impact on the quality of air for both residents and wildlife and especially the on the Freedown conservation. • Safety for the local community on the lanes and the children living within the area especially school travelling times. <p>The below comments and pictures demonstrate why I consider this site to be of a semi-rural location although Walmer forms part of Deal the location of WAL002 is clearly rural and the site itself forms part of the freedown area.</p> <p>The site lies in the countryside for policy purposes and Policies DM1 and DM15 apply which restrict new development to that which functionally requires such a location. Policy DM1 of the core strategy identifies that development on land outside rural settlement confines will not be permitted unless specifically justified by, amongst other things, other development plan policies or it functionally require such a location. The proposed number of dwellings would be located outside the confines. The proposal does not meet any of the circumstances where development outside of the settlement confines would exceptionally accord with Policy DM1 and, therefore, the development is contrary to this policy. Policy DM15 also seeks to resist development which would result in the loss of, or adversely affect the character or appearance of the countryside, except in certain circumstances. This policy reflects the NPPF's aim of, inter alia, having regard</p> <p>for the intrinsic character and beauty of the countryside and focusing development on sustainable locations.</p> <p>Policy DM11 seeks to resist development outside of the settlement confines if it would generate a need to travel unless it is justified by other development plan policies. As stated above, the site is located outside of the settlement confines in the means of public transport and is not justified by other development plan policies.</p> <p>Outlines achieving sustainable development means that the planning system has three overarching objectives which are economic, social, and environmental. Paragraph 79 sets out that in order to promote sustainable development in rural areas, housing should be located where it will enhance or maintain rural communities this proposal of WAL002 does not meet these objectives it's the complete opposite.</p> <p>The proposed development through its location and lack of access to safe walking and cycling routes or public transport to provide for day-to-day needs is therefore considered to be located in an unsustainable location, contrary to Policy DM11 of the Core Strategy, and the emerging Policy T11 (which attracts significant weight) and the aims and objectives of the National Planning Policy Framework. In addition, given the limited and lack of facilities in the vicinity, the addition of 75 dwellings in this location would neither enhance or maintain the vitality of the rural community and be contrary to the aims and objectives of the National Planning Policy Framework in particular paragraph 79. The emerging Draft Local Plan has been devised in line with up-to-date housing figures, and the objectives of the current NPPF, with the applicable policies holding significant weight in the planning balance. The proposal conflicts with Draft Policies T11 and SP4, which weighs against the proposal of such a scheme. In determining whether housing on the site would be acceptable, the social and economic benefits of the housing need to be balanced against the environmental issues, including impact upon the countryside. Character and Appearance Paragraph 130 of the National Planning Policy Framework sets out that planning decisions should ensure that developments establish or maintain a strong sense of place and development should be visually attractive because of good architecture, layout and effective landscaping and be sympathetic to local character and history,</p>

including the surrounding built and landscape setting the proposal of WAL002 going ahead in the plan drastically effects the protected Freedown connected to the history of the location.

Paragraph 174 of the NPPF seeks for development to contribute to and enhance the intrinsic character and beauty of the countryside. Policy DM15 states that any development which would result in the loss of, or adversely affect the character and appearance of the countryside will only be permitted if it is: I) in accordance with allocations made in Development Plan Documents. II) or justified by the needs of agriculture, III) or justified by a need to sustain the rural economy IV) or a rural community, it cannot be accommodated elsewhere, and it does not result in the loss of ecological habitats, provided that measures are incorporated to reduce, as far as practicable, any harmful effects on countryside character. The proposed development of WAL002 do not meet any of this exception criteria. Regard must also be had for whether the development would harm the landscape character of the area, in accordance with Policy DM16 Impact on Residential Amenity Section (f) of Paragraph 130 of the NPPF requires development to provide a high standard of amenity for existing and future users. The proposed development through its location and lack of access to safe walking and cycling routes or public transport to provide for day to day needs is therefore considered to be located in an unsustainable location, contrary to Policy DM11 of the Core

Strategy, and the emerging Policy T11 (which attracts significant weight) and the aims and objectives of the National Planning Policy Framework. In addition, given the limited and lack of facilities in the vicinity, the addition of 75 dwellings in this location would neither enhance or maintain the vitality of the rural community and be contrary to the aims and objectives of the National Planning Policy Framework in particular paragraph 79.

- The preferred approach is to include a policy on sustainable transport. WAL002 being given the go ahead to progress in the plan completely goes against this policy. The importance of the natural environment is recognised in the National Planning Policy framework but seems to be ignored for this site. The plan states that Local Planning Authorities should set out the Local Plan policies against which proposals affecting protected wildlife or geodiversity sites or landscape areas will be judged (Paragraph 113) and that great weight should be given to conserving landscape and scenic beauty. (Paragraph 115). When determining planning applications, the Local Planning Authority will aim to conserve and enhance biodiversity by applying the principles in paragraph 118 of the NPPF. WAL002 Should be one of the sites that is protected as it falls within just about every category to be put forward in the current draft seems to completely dismiss all policies and plan objectives.
- Kent Downs Area of Outstanding Natural Beauty, which has the highest status of protection in relation to landscape and scenic beauty (Paragraph 115 and 116). The NPPF requires positive planning for the creation, protection, enhancement, and management of networks of biodiversity and green infrastructure should be sought yet, WAL002 has been deemed suitable. Internationally and nationally important sites for biodiversity and geodiversity are protected from harmful development by law, while policies CP7 and DM25 in the Dover District Core Strategy protect non-statutory sites and the wider green infrastructure
- **Waste and sewage system** - Current system would not be adequate and will not sustain additional strain and pressure as is already stressed under current population and
- **Impact of wildlife settlement and the Birds** - The area has an abundant amount of wildlife and upon further inspection more than likely protected species. Tree lines from the Freedown the bee's, butterflies and birds PLUS Slow worms.
- **Flooding and Surface flooding** - The area especially leading down out of the valley to Walmer castle already has issues with flooding and surface flooding any development on this would only cause further impact.
- **Buffer zones** – WAL002 site separates Hawkshill Freedown and Hawkesdown estate, the Freedown conservation area would have no buffer zone and the conservation area would be at risk if WAL002 progresses further and sets a new president in the area allowing the protected areas of Kent to be at future risk, when will enough be enough.
- **Greenfield site** - Although the site was originally submitted by the landowners as Brownfield it is farming land and currently used as agricultural land.

- **Access and Roads** – The local road network already struggles; this site would cause further traffic and cause higher impacting emissions and carbon footprint for the local area.
- **The Visual impact for visitors, tourists, and residents** – The Rays bottom land is part of the beautiful landscape and extends to the conservation area opposite and inadvertently forms part of the beautiful Many people visit this area, it is frequented by dog walkers,

families, bird watchers and wildlife enthusiasts the view from the freedown is part of the beautiful scenery it would be dramatically affected as this land forms part of a main view points from the conservation area.

- **Privacy** – On this site, properties of any kind would be viewed upon from every angle the site forms part of a valley and would be looked upon from visitors to the conservation area and the local residents living locally that this provides buffer zones for the neighbouring properties within the community, and all would lose the privacy and scenery they have come to love.
- **Risk of creating future president and impact on the current location as a whole** - Allowing this site to progress in the DDC plan will set a new president locally that these beautiful locations can be developed the close proximity to the conservation area would be at risk from such a development and how many other local areas would then also be at the same risk there has already been a large number of large developments locally please review in detail as I hope common sense will prevail.
- **Employment** – Deal and Walmer have not had an increase in available jobs and there are already large developments like Station Road, the impact for the local community of further large development would mean more applicants applying for jobs in an already lacking area of available opportunity. The fact is more people living in this area would cause further needing to travel by car to further destinations for work outside of Deal and Walmer.
- **Water shortages in Kent** – Kent is already in the highest category for water shortage and putting pressure on sustainable resources adding further development in such a small area which has already sustained considerable development and already has further sites with planning seems to dismiss the factual figures being presented.
- **The Cross roads** – On the Dover road please see my pictures of the width of these footpaths these are a walk from the site but the closest shops, it is already a dangerous place and I fear for my daughters walking these paths especially how busy it is already.
- **Dover road developments just started** – There are a number of developments which have already obtained planning this has already impacted the traffic in the area, it does not take a lot to look at adding even further local large development will impact the Cross Roads The school kids in the morning will be at further risk especially adding more to the minimal public transport areas currently situated please note these as I hope this is on someone's conscience should the unthinkable happen, allowing this overdevelopment is putting people in danger.

Me and my family choose **(DDC Redacted)** as our forever home in July 2019 and there was no information provided on our searches that the Rays Bottom land was indicated for possible planning or being put forward in the DDC plan although DDC was aware of the land being put forward by the land owners, if we were aware we would not have purchased and used life savings on the risk of losing significant value on such a property and the loss of the beautiful location it sits on maybe its name will have to change from South Meadow a reflection of its location to, House or Estate View....

We are devastated that we have spent such a large sum of money and planned our life at this property with our children, and now it's at risk of being destroyed and could financially irradicate the years of hard work and savings we have put into this move.

We understand the need for housing, but this location is wrong on so many counts there are many better suited locations that would not have such devastating effects on people's lives or the beautiful locations as WAL002.

The Beautiful Valley View to the Hawkshill Freedown which holds significant history connections to world war memorial.

Picture demonstrating the narrow buffer zone form Hawkesdown estate and the Freedown and the thriving tree lines of wildlife in such close proximity to Rays Bottom.

You can here the owls of an evening and see the other birds of pray throughout the day this will be lost forever should development go ahead.

The area does not support such a size of development it can just about cope with the current people living within the area and the traffic the footpaths surrounding the area cannot be increased sufficiently to allow safe mobility to public areas or transport links.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant

Remove SAP15 from the Local Plan

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

Background and Main Issue

The land was rejected by DDC in 2013 as “unsuitable for housing development,” This being principally due to the lack of “...transports assessments and Plans..,” as required by NPPF (National Planning Policy Framework) 2012 regulations, prior to Allocation status being considered.

Consequently the site was not carried through to the 2014 Draft Plan

This stipulation is repeated in the NPPF July 2021 version.

Notwithstanding the same environmental issues remain as those of 2013, DDC intentions in 2022

are to forward this land into the Draft Local Plan. This rejects the NPPF policies for assessments and reports being available, prior to consideration being given to the classification of suitable development land.

The contradiction and/or an omission of a previously established doubt of suitable development status, is of significant material consideration within the NPPF criteria for defining land availability.

Reasons for Objection

Material supporting facts

*The 2012 March version of the NPPF, Item 17 Core Planning Proposals required that:- “Plans shouldset out a clear strategy for allocating sufficient land which is suitable for development...”

*The 2021 July version of the NPPF in “Identifying land for homes” –item 68 requires that:-

“Strategic policy-making authorities should have a clear understanding of the land available

and

, “...planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely viability.....”

Submission 1

1.1 The similarity and purpose of the two NPPF versions is unquestionable.

Environmental assessment reports and plans have to be available to Local Authorities before consideration of allocation for suitable development.

1

DDC SAP15 requirements for development gives clear indication that none exist at the present time.

1.2 Without these assessment reports and plans, DDC SAP 15 proposals are speculative.

1.3 There is an undeniable doubt that this site may not be suitable for development.

There is no “...clear understanding of the land being available,” nor of its “... suitability or viability.” .

1.4 In 2021 WAL002 was, with caution, classified as being “potentially suitable” for development, but none the less in 2022 “available” without evidence of assessments or plans

NPPF policies do not permit DDC to speculate for the purpose of meeting development targets.

Submission 2

Traffic impacts –matters of fact

The DDC conformed with the 2012 NPPF requirements for assessments and plans to be available before consideration being given to allocation.

DDC Allocation report 2013, page 129 Appendix A

The DDC categorised this site in the unequivocal statements whereby “The site analysis form demonstrates that in principle, the site is not suitable for residential development due to the possible traffic impacts on the wider road network”

And

“The site is considered to be unsuitable for residential development and should not be allocated in the pre-submission local plan”

And

DDC Allocation report 2013 page 192 conclusion Appendix B

“Without the relevant transports assessments and plans it would not be possible to allocate this land”

*SAP 15 Item (d)Road wideningshould be providedto Liverpool Road.....and where possible to Grams Road”

This uncertainty is unacceptable in terms of the NPPF requirement for “the need of a clear strategy”, “...a clear understanding, or “suitability or viability”..

DDC'S proposals are short on issues of implementation:-

a)A site visit reveals that no footpaths exist along this single track road.

For the road to be widened, to provide pedestrian and cycle interests, to the east there will be conflict with the established environmental restraints surrounding the castle, while that to the west may well involve compulsory appropriation of private property.

b)It is unacceptable to ignore, as does SAP15 (d):-

That whether traffic proceeds up the single track roads of Grams Road for 150m, or continues along Liverpool Road for 400m; road widening will either involve environmental issues to the east or those of compulsory purchase to the west.

2.1 DDC's compliance with NPPF 2012 item 17, negated development due to lack of Assessments and Plans

2.2 DDC is "Putting the cart before the horse"!

Without Assessments and Plans, DDC proposal SAP 15 does not comply with NPPF 2021 item 68.

Environmental status

Submission 3

No evidence of environmental difference, to that which existed in 2013, has been defined within the site's location, or surrounding environs. While the environment may remain the same, the 40% increase in traffic over the last ten years, has inevitably increased the detrimental impact on the wider road network.

2

Housing density

Submission 4

Reference Appendix C, DDC Selection of the Site Allocation for the Regulation 19 Submission Local Plan, page 11.

The proposed reduction in housing numbers, so as to permit development:-

a)Is not a standalone issue-as is inferred.

b)Has no assessment reports and plans, as required in NPPF68, to displace the lack of "suitability" as DDC defined in 2013.

c)Ignores the necessity of the "...clear understanding of the site's availability" as demanded of NPPF 68.

4.1 DDC may not disassemble NPPF 68 policies by the one issue of the site's housing density.

Additionally the proposed area:-

d) Does not reflect the character of the surrounding area.

i)By overlaying the proposed area of development over that to the west, it will be seen that the comparable housing density of the latter is 25 units to that of the proposed 75 housing units.

ii)The character of the "surrounding area" is predominately one of open country.

4.2 The accredited impact of the proposed development is incorrect and misleading

Alternative sites

Submission 5

The Eastern side of Ellens Road offers far greater opportunity for development to conform to NPPF requirements of suitability; more especially access to the wider road network.

Site DEA010 was excluded from consideration as being "unsuitable" namely because:-

*Detrimental impact on the landscape

Whereas:- WAL002 landscape exceeds this. It has a wooded boundary and open countryside.

*Limited accessibility

Whereas:-DEA010 has access to two roads, compared to WAL002 DDC's 2013 description, which has only a "narrow country lane".

*Highways concern over cumulative impact of development in this location

Ref:- WAL002 2013 see Appendix B, DDC conclusion "...without the relevant transports assessments and plans it would not be possible to allocate this land."

This statement of fact far outweighs DEA010 "concern "

*Heritage concerns

Likewise, the WAL002 site borders Henry V111 Castle land and the Freedown, significantly outweighing the undefined "concern" for that of DEA010.

Insufficient comparison has been given in allocating WAL002 and not DEAL010

Legal obligation

Submission6

Version 2021 NPPF Section 5 defines the legal obligation of Planning Authorities delivering a sufficient supply of suitable and sustainable housing.

This poses considerable pressure on those Authorities where suitable housing land targets are virtually unattainable.

Be that as it may, it does not excuse or permit DDC to breach NPPF policies in order to meet Government targets within the Draft Local Plan .

3

*Appendix A is evidence of the absence of assessments and plans in 2013.

*Appendix B details the 2013 existence of the unacceptable use of the road for further housing in the absence of such plans.

*Appendix D details the DDC meeting of 3rd January 2013 with Mr & Mrs Ellis of (DDC Redacted), Walmer, whereby DDC "...no longer favoured.." this site's development due to the "...narrow country lane..." and withdrew it prior to the Examination of the Local Plan in August 2013.(Mr Ellis died in 2020 and Mrs Ellis has moved away)

	<p>The exclusion/absence of the above and significant, negative information in SAP15, SA Objective 4 is indicative of a breach of DDC's legal obligation to provide purposeful consideration and comparison with other sites.</p> <p>Other matters</p> <p>Public objections</p> <p>It should be noted that in March 2021, 260 people submitted individual objections to this site being passed through to the Draft phase of the Local Plan.</p> <p>Conclusions</p> <p>1)The DDC of 2022 has reneged on the commitment of 2013, which was not to consider a planning allocation of this site without the necessary Assessments and Plans.</p> <p>2)The SAP15 conditions of approving the proposed development are fundamentally flawed by the 2013 DDC established restraint on development approval.</p> <p>3) The 2021 NPPF item 68 requirement of "... a clear understanding of available land" is not achieved by DDC's speculation as to "possibilities".</p> <p>4) DDS's SAP 15 reliance on speculation contravenes NPPF Section 5 which cites the Planning Obligations of "... being able to deliver a sufficient supply of homes" within the period of the immerging Plan.</p> <p>5)SAP 15 items d) and e) lack the realty of the financial restraints in achieving implementation and resolution of environmental issues.</p> <p>6) The relevant legal obligation for factual information as to site comparisons in SA Objective 4(e-Transport assessments)has not been registered.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Developments at SAP 14 and 15 Walmer and Sholden will impact on surface water management and flood risk in North Deal, and Walmer.</p> <p>SAP 15 . The selection of this site is unsound firstly as it incompatible with SP4 ; 3.71 Separation of Settlements and the need to prevent villages coalescing to protect landscape character.</p> <p>Secondly it is unsound as its selection is incompatible with the statements in SP14 relating to biodiversity connectivity as this valley bottom is already functioning as vital point of biodiversity connectivity as referred to in SAP15, the northern and Western boundaries of the site, close to BOA Hawkshill Freedown, are key to biodiverse connectivity. 4.158 mis-names Hawkshill Freedown, which in fact is an SSSI because it is globally rare, chalk-downland habitat, (not just the 'open field' in the DDC text). For decades volunteers with Walmer council have lovingly protected this rare habitat, a very justified BOA.</p> <p>The geography indicates that the valley bottom is also valuable as a flood sponge, so SAP15 is unsound thirdly for this reason too. Ray's Bottom drains in a northerly direction to the whole area immediately north of Walmer Castle which is well-known to be subject to flooding.</p> <p>And fourthly the Highways assessment of this site is inadequate, SAP 15 is unsound because 4.160 fails to note that Liverpool Road is a single lane road (changing its name to Glen Rd) with passing places which is becomes gridlock with traffic from Kingsdown Primary school 2x a day. It become an arterial road attempting to provide access to 30,000 conurbation of Deal / Walmer for diverted traffic when the A258 is blocked. (Cross reference SAP 34 in Kingsdown). So the selection is unsound on the grounds of danger to life from RTAs. The Transport Assessment requirement referred to in e makes no reference whatsoever to Liverpool Road becoming Glen Road at the Kingsdown parish boundary, and carrying diverted A road traffic. The inclusion of SAP 15 is not legally compliant with NPPF 2021 item 11. (b)ii '<i>SPs should provide for objectively assessed needs for housing & other uses, . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole</i>'.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	See above
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Glen/Liverpool Road were not built for the proposed amount of traffic that would be generated by a large building plot of houses on Ray's Bottom. The development of houses not local to Doctor's surgery and would have a devastating effect on local traffic trying to access Kingsdown and beyond. It would also take away beautiful views on the approach to Kingsdown and cause havoc at peak times/school run/rush hour in the evening. It would also take away arable land.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP15
2 - Do you consider this part of the Plan sound?	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>1. The format of the consultation and requirement for on line comment is overly complex for the ordinary citizen to comment. Hence this representation being made via PSF rather than on line. Many people would already have given up there comment!</p> <p>2.Representation has already been made with regard to this site by many local residents in the first round of consultation. Despite very considerable opposition from local residents I cannot see any material change in the policy for this site. What is the point of local consultation if residents comments are totally ignored?</p> <p>3.The main objections to use of this site for residential use are numerous:-</p> <p>* The land is Grade 3 agricultural land- this is defined as good/moderate quality agricultural land with moderate limitations. Food security in the UK has been highlighted articularly since the war in Ukraine and has recently been highlighted by none other than th eHead of MI5 as a matter of national security. There is no present justification for th eLoss of prime agricultural land.</p> <p>*Although on the OS map the site forms a completion of a development block between Dover Road and Liverpool Road, the topograhly of the siteis such that it forms an important part of the Glen Road valley, on steep ground with areas to the bottom liable to flooding.</p> <p>*The site is devoid of any local services, the nearest being in Woolmer village which is a walk up the steep Grams Road which doe not even have a continuous pavement. The nearest Primary school at Kingsdown is over subscribed. Most of the Local GP surgeries are over subscribed and not taking on new patients. Downs Cof E School may well be within 1200m as the crow flies but more than 1.5miles by road. Note that Castle Community College is now Walmer Beacon.</p> <p>*We would question whether the site is within 1000m of Walmer Station- even as the Crow flies. The site is served by a single track road – Liverpool Rd /Glen Rd which themselves are served off a network of very narrow roads with no or limited footpaths. A walk to the main bus stop at Walmer Village is up the steep Grams Road with only partial footpathing.</p> <ul style="list-style-type: none"> • Almost without doubt all movements to and from this site will be by car – hardly Climate Change Mitigation even with electric cars whose embodied carbon is higher than conventional combustion engines. • Little mention is made of the adjacent Hawkshill Down site which is and important public open space which will be undoubtedly adversely affected by a development at Rays Bottom.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	We believe that the Rays Bottom site should be removed from the Local Plan for all the reasons stated above. We do not believe that the views of the local community have been adequately taken into account nor have the Objectives listed under this proposal been properly and adequately assessed.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I would be happy to partake in the oral part of the examination to help put across the above reasoning and the feelings of the local community.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SP15 – totally unsounds as accessed by narrow lane (Glen Road) incompatible with separation of settlements vis a vis biodiversity and destroying border between Walmer and Kingsdown and liable to flooding. Most of all, it's a very precious location for biodiversity. Concreting it over would be a tragedy
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Rule out the sites SP34 and SP15 due to access issues, biodiversity issues and congestion issues. Build new houses in brownfield sites near to local services. Don't concrete over our lovely local fields
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We are writing to register our objection to the above proposal for the construction of 75 houses on land known as Rays Bottom field, fronting Liverpool Road and Glen Road, Walmer. The reasons for our objection are listed below:</p> <ol style="list-style-type: none"> 1 Any development on this land would have an unacceptable impact on the landscape and be detrimental to the amenities of the area. This proposal conflicts with the pious but essentially meaningless comments in the Daft District Plan, such as quote 'these landscapes are rich in biodiversity, priority habitats and protected species and, importantly, provide significant environmental, social, and economical benefits for our district and residents'. 1 There is inadequate highways access along Liverpool Road/Glen Road. A considerable stretch of these roads is single track without pavements are, as such, is already inadequate for the traffic carried including a regular bus route. The proposed development will add at least 100 and more likely 200 cars to this route. A totally unacceptable overload. 1 The area has previously been subject to flooding. 1 Encroachment into the countryside with consequent loss of farmland and wildlife habitat

	<p>1 Close proximity to Hawkshill Common conservation land.</p> <p>1 Any proper inspection will surely demonstrate the inadequacy of services such as surface and foul water drainage, foul sewage disposal, water, gas and electricity supply;</p> <p>1 Impact on services such as local doctors' surgeries and hospitals</p> <p>1 Over development of Walmer, as there are currently 83 houses proposed opposite 423 and 459 Dover Road, Walmer; 223 houses currently being built in Station Road, Walmer and a proposal for a further housing development at Court Road/Station Road.</p> <p>1 Seven detached properties are about to start construction on the site of Tonkers in Hawksdown Road (to be renamed Apple Tree Gardens), which will increase traffic on the following roads – Grams, Liverpool and Glen.</p> <p>Overall we perceive that there appears to be a determined intent within the proposed Plan to overdevelop and completely ruin the area around Walmer.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>We respectfully request that the proposal to allow 75 house o be constructed in such a fragile environment be rejected and removed from the Dover District Council Local Plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Application Plan number WAL002 Proposal I wish to register with you my objection to any proposed buildings on the agricultural land know as Ray's Bottom adjoining Liverpool Road, Walmer, CT14 7PS. The reason for my objection is this land part of a very old river running from Guston to Walmer, this river is still active and flowing. I am severely concerned that any building work will increase the flooding risk to my property. As you are fully aware our property has been flooded in the past and Kent County Council have undertaken remedial work to avert future flooding as far as they can. Please be fully aware that If this proposal goes ahead and contributes to any future flooding of my grounds and property I will hold you responsible and this could result in very considerable costs.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP15 is unsound in that: There is a need to prevent villages coalescing to protect the character of the area SAP15 is incompatible with SP4: 71 Separation of Settlements. Is incompatible with statements in SAP14 about biodiversity connectivity as referred to in SAP15 Hawkshill Freedown is a SSSI not an open field as described in DDL text The bottom of the valley acts as a sponge that helps to prevent flooding near Walmer Castle new buildings would have an adverse effect. 4.160 does not note that Liverpool/Glen road is a single lane road that is already unable to accommodate traffic during the "school run" that happens twice a day and also is a bus route for the Stagecoach and Regent Kingsdown routes. Without a profound widening of the road any increase shall cause a risk to all. Loss of agricultural land would be a blow to the need to grow food in these troubled times.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP15
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Application Plan number WAL002 Proposal I wish to register with you my objection to any proposed buildings on the agricultural land know as Ray's Bottom adjoining Liverpool Road, Walmer, CT14 7PS. The reason for my objection is this land part of a very old river running from Guston to Walmer, this river is still active and flowing. I am severely concerned that any building work will increase the flooding risk to my property. As you are fully aware our property has been flooded in the past and Kent County Council have undertaken remedial work to advert future flooding as far as they can. Please be fully aware that If this proposal goes ahead and contributes to any future flooding of my grounds and property I will hold you responsible and this could result in very considerable costs.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	To whom it may concern, (Without prejudice) I would like to object to SAP 34 for the reasons as specified below. These reasons also apply to SAP 35, 53 and 15 . The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'. SAP 34 Kingsdown p. 163: The selection of SAP 34 is totally unsound, on 5 different grounds,. Firstly the Highways Assessment of Ringwoud Road is inadequate and unsound as regards this site. The facts are that Ringwoud Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows to single lane passing. The 1400 voters in Kingsdown village (population 2000 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwoud Road traffic flowing

freely. So the selection of SAP 34 for any development is unsound firstly on the grounds of highways assessment unsoundness / inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. It is a disgrace that KCC for years have refused to listen to requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwoud Road. The economy of the village depends on visitors and residents walking, cycling and horse-riding on the Ringwoud Road and any development of SAP 34 would increase the likelihood of fatalities exponentially.

The selection of SAP 34 is unsound secondly on the grounds of landscape character, being incompatible with criteria described above in SP 4. the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character. DM Policies NE2 (Natural Environment) p.285: It is 'sound' to designate the area inland from Kingsdown, west to Ringwoud, Ripple, Sutton, Studdal and Little Mongeham, south to Guston, as LCT F Open Arable Chalk Farmland with Woodland, F3 Ripple. But it is unsound, ineffective and contradictory to then ignore the designation when selecting the dangerously located chalk farmland of SAP 34 for development.

The selection of SAP 34 is unsound thirdly on the grounds that the Deal / Walmer conurbation of 30,000 depends on the narrow – single lane in places - Ringwoud Rd, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. The A258 is the only southern entrance to the 30,000 conurbation starting in Upper Walmer stretching to North Deal and Sholden. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Rd / Liverpool road selected as site for SAP 15 Ray's Bottom in Walmer. This site too, if developed is likely to mean diverted traffic cannot get in / out of Deal /Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. Unsound due to being incompatible with SP12, because its lanes periodically become part of the district Strategic Transport Infrastructure. Selection of these sites is completely unsound and non-compliant with all laws / planning regs relating to the prevention of accidents and protection of human life. SAP 34 would result in 'Traffic movements from the development resulting in severe impacts to the highway network that it would not be possible to mitigate', and as such contrary to SP4 2 j within the plan, thus unsound and highly ineffective.

The selection of SAP 34 is unsound fourthly on the grounds that it borders the AONB and is valuable arable farmland, needed in times when national food security is of concern. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch / and Freedown woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwoud w/ Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital within the boundary of the AONB to be protected on the boundary of this site.

The selection of SAP 34 is unsound fifthly on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP 15, so development here could contribute to flooding (see CC5 p. Flood Risk).

Any development of SAP 34 is not legally compliant with emerging government policy, see Mr Sunak statement 5 Dec 2022 announcing dropping of compulsory housing targets for LPAs (Local Planning Authorities such as DDC)'.
I would also like to object to SAP 35, 53 and 15 for the same reasons as above.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP15
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Extracts from the 24-page submission on DDC Reg 19 Local Plan Consultation, Dover and Deal Green Party. Focused on sites affecting Ringwoud with Kingsdown Parish:</p> <p>SAP15 Walmer Liverpool Road Ray's Bottom. The selection of this site is unsound firstly as it is incompatible with SP4; 3.71 Separation of Settlements and the need to prevent villages coalescing to protect landscape character. Secondly it is unsound as its selection is incompatible with the statements in SP14 relating to biodiversity connectivity as this valley bottom is already functioning as vital point of biodiversity connectivity as referred to in SAP15, the northern and western boundaries of the site, close to BOA Hawkshill Freedown, are key to biodiversity connectivity. 4.158 mis-names Hawkshill Freedown, which in fact it is an SSSI because it is globally rare, chalk-downland habitat, (not just the 'open field' in the DDC text). For decades volunteers with Walmer Council have lovingly protected this rare habitat, a very justified BOA. The geography indicates that the valley bottom is also valuable as a flood sponge, so SAP15 is unsound thirdly for this reason too. Ray's Bottom drains in a northerly direction to the whole area immediately north of Walmer Castle which is well-known to be subject to flooding.</p>

	And fourthly the Highways Assessment of this site is unsound and inadequate, SAP15 is unsound because 4.160 fails to note that Liverpool Road is a single lane road (changing its name to Glen Road) with passing places which is becomes gridlocked with traffic from Kingsdown Primary School 2 x a day. It becomes an arterial road attempting to provide access to 30,000 conurbation of Deal/Walmer for diverted traffic when the A258 is blocked. (Cross reference SAP34 in Kingsdown). So, the selection is unsound on the grounds of danger to life from RTA's. The Transport Assessment requirement referred to in e makes no reference whatsoever to Liverpool Road becoming Glen Road at Kingsdown parish boundary and carrying diverted A Road traffic.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I consider changes to the Plan to be the responsibility of DDC
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	to ensure the voice of residents are heard

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP15
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I consider the plan not legally compliant, is unsound and fails to comply with the duty to co-operate because there has been little or inadequate consultation with local Council's and community groups.</p> <p>I believe the plan is not complaint with the Climate Change Act 2009 regulations to protect the climate and with National Planning Policy Framework 2021 item 11 in relation to designation of the area in land for Kingsdown to Ringwoud, Ripple, Sutton, Studdal and Little Mongeham chalk farmland.</p> <p>SAP15 is also unsound because 4.160 does not state that Liverpool Road is a single lane.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I believe it is vital that the plan should take into account and proactively protect against unplanned erosion of countryside between confines of settlements and should proactively protect the individual identity of these villages and important elements of their setting – i.e. farmland and coastal landscape of unequalled beauty in the UK. The plans in SAP34 and 15 are unsound and would significantly damage and negatively impact the village
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note: The text below was extracted from the attached representation</p> <p>The inclusion of SAP 34 and SAP 15 especially, (but also SAP 53 and SAP 35) is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'. Also it is not compliant with the emerging govt policy announced 5 Dec 2022 by Mr Sunak on stopping compulsory housing targets on LPAs, and empowering LPAs to decide on local needs. DM Policies NE2 (Natural Environment) p.285: It is sound to designate the area inland from Kingsdown, west to Ringwould, Ripple, Sutton, Studdal and Little Mongeham, south to Guston, as LCT F Open Arable Chalk Farmland with Woodland, F3 Ripple. But it is unsound, ineffective and contradictory to then ignore the designation when selecting the dangerously located, chalk farmland of SAP 34 for development. It is unsound and ineffective to a damaging extent, to list Kingsdown as being a 'Local Centre ; a village providing services for a local rural area and a secondary focus for development in the rural area' Any development at SAP 34 would do the opposite of 'reinforcing the role of the village'; it would in fact choke off the existing parish economy, reducing its attractiveness to tourists, a key location on the Deal Welcomes Walkers initiative. The number of 2nd homes and airB&B in the village proves that dwellings outnumber homes required, so there is NOT an 'objectively assessed need for housing a la NPPF 11' within the Parish'. (Gladman did a landgrab in 2017 in the parish 17/00487 An application rejected by DDC that Gladman took to Planning Inspectorate and won. Currently being built by Taylor Wimpey on A258 as 85 executive homes on land opposition 423-459 Dover Road to the endangerment of all road users of arterial A258 with refusal to put in pavements).</p> <p>SAP 15 Walmer Liverpool Road Ray's Bottom.</p> <ol style="list-style-type: none"> 1. The Highways assessment of this site SAP 15 is unsound and inadequate, because 4.160 fails to note that Liverpool Road is a single lane road (changing its name to Glen Rd) with passing places which becomes gridlock with traffic from Kingsdown Primary school 2x a day. It becomes a diversion to arterial road A258 attempting to provide access to 30,000 population conurbation of Deal / Walmer for diverted traffic when the A258 is blocked. (Cross reference SAP 34 in Kingsdown). So the selection is unsound and not legally compliant on the grounds of danger to life from RTAs. The Transport Assessment requirement referred to in e makes no reference whatsoever to Liverpool Road becoming Glen Road at the Kingsdown parish boundary, and carrying diverted A road traffic and is thus completely inadequate. No mitigation 2. Unsound because incompatible with SP4 ; 3.71 Separation of Settlements and the need to prevent villages coalescing to protect landscape character. 3. Unsound as its selection is incompatible with the statements in SP14 relating to biodiversity connectivity as this valley bottom is already functioning as vital point of biodiversity connectivity as referred to in SAP15, the northern and Western boundaries of the site, close to BOA Hawkshill Freedown, are key to biodiversity connectivity. 4.158 mis-names Hawkshill Freedown, which is an SSSI because it is globally rare, chalk-downland habitat, (not just the 'open field' in the DDC text). For decades volunteers with Walmer Council have lovingly protected this rare habitat, a very justified BOA. 4. Unsound because the geography shows that the valley bottom is also valuable as a flood sponge, for this reason too. SAP 15 Ray's Bottom drains in a northerly direction to the whole Granville Rd area, immediately north of Walmer Castle which is well-known to be subject to flooding, Many photos exist. 5. Not compliant NPPF, or the Environment Act 2020 or the legally binding UK Climate Emergency declaration of 2019 (commitment to net zero 2050) and Climate Change Act 2008.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am a resident of Kingsdown. My concern is with the consequences of the housing developments at Woodhill Farm (SAP 34 - 50 dwellings) and Courtlands (SAP 35 - 5 dwellings), also adjacent developments at Ringwoud Alpines (SAP 53 - 10 dwellings) and at Rays Bottom, Walmer (SAP 15 - 75 dwellings). These are connected by Ringwoud Road between Kingsdown and Ringwoud, by Glen Road between Kingsdown and Walmer (inland) and by Kingsdown Road between Kingsdown and Walmer (along the seafront). The first two, in particular, are narrow roads with inadequate width at many/most locations for passing traffic. Kingsdown Road is less restrictive. The number of dwellings will inevitably lead to increased car usage for Kingsdown village access, for school access, for work/employment access, for shopping and for general leisure access. There is no meaningful bus service to accommodate all these needs. Kingsdown Primary School will likely be the primary school of choice for the developments I have noted, putting particular strain on these roads. Children at secondary school (and those attending primary schools elsewhere) will all need to use these roads to move out of the referenced development areas. The whole village road network is generally narrow and unsuited for heavy traffic volumes. When discussing these aspects with DDC Planning representatives at the Deal open-day for the Plan, I was advised that the plan does not address these transport needs (and I have not found any text to contradict them.)</p> <p>My main comment therefore is that a full traffic analysis must be made to ensure adequate provision for the daily needs of the developments. Access for construction traffic will be an immediate concern. While not directly related to the quoted paragraphs of the Infrastructure Plan, the village primary school is probably too small to accommodate the likely increase in demand. Road access around it does fall within the reference and is similarly restrictive already.</p> <p>Additionally, for Ringwoud Road between Kingsdown and Ringwoud there should be pavement(s) (or alternative footpaths) to provide a safe pedestrian route to access the main bus route along the A258 (the Dover-Deal road). The current road is unsafe for pedestrians and cyclists. The junction of Ringwoud Road with the A258 will need to be enhanced to accommodate the increased traffic. Similar safe access will be required for Glen Road.</p> <p>It is not clear to me how the narrow road network in Kingsdown can be modified to suit an increased volume of traffic. This might in itself be good reason to object to the developments, but a more positive attitude by the planners and developers is surely required?</p> <p><i>(DDC note: This representation was originally made against the Infrastructure Delivery Plan consultation document but has been duplicated in relevant places against the Local Plan due to the specific site allocation references made)</i></p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<ol style="list-style-type: none"> 1 Very obtuse and confusing for people to understand 2 Appears to be a fait accompli rather than seeking local opinion. Also new government guidelines show cutting back on unsuitable developments 3 Unsound due to a very already congested village with poor road structure. Primary school in the middle 4 Very disappointing due to lack of safety issue especially with an elderly local population 5 The Dover-Deal A258 is constantly challenged blocked with traffic diversions through Kingsdown. It can't cope with more traffic. 6 There is no potential for a pavement/cycle path for the local residents, both elderly and young.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	As a move elderly resident I feel the local plan and how it is structured make it very difficult for my age ground to properly represent our opinions. It is designed to be battling to make the development plans SAP35 and 15 more sound I strongly suggest it is an over intense treatment of an already congested area. Inadequate narrow lanes, a busy primary school and elderly population and young families and overwhelmed by an ever-growing holiday population. The various limited approaches to the village are unable to cope with the traffic burden.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<ul style="list-style-type: none"> • I believe the plans to be unsound for reasons of safety. The increased pressure on the roads (esp at Glen Road) will cause inevitable traffic jams so emergency services will not be able to get through • The plans do not fully take account of the 'landscape assessment'. Bird and animal habitats will be destroyed, and alternative sites will not be joined up. • The sloping nature of both sites means it would be a flood risk for the lower lying properties and agriculture. • The infrastructure (bus services, schools, doctors) could not sustain the proposed swelling • The narrowness of the roads (esp the Ringwould Kingsdown Road) is already too dangerous to walk or cycle along and with extra traffic there's a high risk of pedestrian or cyclist's lives being lost • Risk of surface water contamination. The aquafier is inside the development zone
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP34 not legally compliant with NPPF 20-21 items 11 DM policies NE2 (natural environment) P285 The chalk farmland of SAP34 is unsound/unsuitable for development. SAP34 is unsound on the grounds of landscape character being incompatible with criteria in SP4. SAP34 is unsound on the grounds that it borders the AONB and is valuable arable farmland. SAP34 – any development would remove a flood sponge on the top slop of the hill which drains toward Ray Bottom SAP15, so development here would contribute to flooding. SAP35 is unsound in that it involves loss of food producing farmland; destructive of the landscape character and it is in a BOA. SAP53 is unsounds as being incompatible with LSA falling within the AOB. SAP15 is unsounds as incompatible with SP4; 3.71 separation of settlements. Also, it is incompatible with statements in SP14 relating to biodiversity connectivity.

	The highways assessment of this site is unsound and inadequate. SAP15 4.160 fails to note that Liverpool Road, is a single lane road which becomes gridlocked with traffic from Kingsdown primary school twice a day
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Extracts from the 24-page submission on DDC Reg 19 Local Plan Consultation, Dover and Deal Green Party. Focused on sites affecting Ringwould with Kingsdown Parish:</p> <p>SAP15 Walmer Liverpool Road Ray's Bottom. The selection of this site is unsound firstly as it is incompatible with SP4; 3.71 Separation of Settlements and the need to prevent villages coalescing to protect landscape character. Secondly it is unsound as its selection is incompatible with the statements in SP14 relating to biodiversity connectivity as this valley bottom is already functioning as vital point of biodiversity connectivity as referred to in SAP15, the northern and western boundaries of the site, close to BOA Hawkshill Freedown, are key to biodiversity connectivity. 4.158 mis-names Hawkshill Freedown, which in fact it is an SSSI because it is globally rare, chalk-downland habitat, (not just the 'open field' in the DDC text). For decades volunteers with Walmer Council have lovingly protected this rare habitat, a very justified BOA. The geography indicates that the valley bottom is also valuable as a flood sponge, so SAP15 is unsound thirdly for this reason too. Ray's Bottom drains in a northerly direction to the whole area immediately north of Walmer Castle which is well-known to be subject to flooding.</p> <p>And fourthly the Highways Assessment of this site is unsound and inadequate, SAP15 is unsound because 4.160 fails to note that Liverpool Road is a single lane road (changing its name to Glen Road) with passing places which is becomes gridlocked with traffic from Kingsdown Primary School 2 x a day. It becomes an arterial road attempting to provide access to 30,000 conurbation of Deal/Walmer for diverted traffic when the A258 is blocked. (Cross reference SAP34 in Kingsdown). So, the selection is unsound on the grounds of danger to life from RTA's. The Transport Assessment requirement referred to in e makes no reference whatsoever to Liverpool Road becoming Glen Road at Kingsdown parish boundary and carrying diverted A Road traffic.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I consider changes to the Plan to be the responsibility of DDC
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	to ensure the voice of residents is heard

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The opportunity should be taken to enable the widening of Station Road to allow free two-way traffic flow and the provision of a full width pavement on at least one side by requiring this site to be developed in conjunction with the surrounding land which was unjustifiably rejected at the initial HELAA stage to properly provide for the additional traffic generated by the development to the north.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The site specific requirements should be strengthened to require the site to be developed in conjunction with the surrounding field by providing a single access point. The width of Station Road between Cross Road and Sydney Road should be widened to at least 6m and a full width pavement provided on at least one side.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	To answer any questions unanticipated by the written response and elaborate on the proposal if required.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	This site is undeliverable as proposed. No reasonable proposer would proceed as described as it would land lock the rest of the site submitted for inclusion in the local plan with no prospect of future productive purpose. The original HELAA landscape assessment is at odds with other landscape assessments asserting greater harm here than other sites where it is patently more severe. From the 1259309 public footpath viewpoint at Beacon Hill the houses on the other side of Northbourne Road are seen partially screened by trees at a distance of 850 yards. The proposed development would be seen partially screened by trees at a distance of 750 yards. Allowing the development of the whole site would result in dwelling being seen partially screened by trees at a distance of 700 yards. That is insufficient difference to say partial development is acceptable when development of the whole is not. It has been asserted that Great Mongeham is characterised by linear development when it clearly isn't. The site is opposite Mongeham Church Close, there's Ashton Close, Dairy Mews, the permitted Stalco site any many instances of individual properties set back from what could possibly be called linear development.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The extent of GTM003 should be reinstated to that originally submitted and the indicative capacity shown as 38. Site specific requirements should be amended to read "... individual vehicle access ...". Individual pedestrian access for each frontage property is desirable and appropriate. Site specific requirements should be further amended to read "... street frontage without a parallel vehicle access between houses and Northbourne Road, parking being provided from the rear." Additionally the internal road layout should provide access to GTM011 to avoid traffic from that site which now has Part Q permission to convert the ugly concrete barn on site to residential use. Although that permission has been improved GTM011 should be included in the Local Plan with an indicative capacity of 5 because demolition of the barn and replacement with lower height dwellings would enhance the setting of the nearby listed farmhouse.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To answer any question unanticipated by the written submission and rebut contrary arguments.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	G - Local Plan Site Allocations
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	This objection refers to the site allocation SAP16 Bridleway Riding School TC4S008. On a previous draft of the local plan, this site was not included as the site had not been put forward for development. The fields surrounding this site were put forward but were deemed by DDC to be "not suitable for housing development" (no reason given). On this current local plan submission, Bridleway Riding School has been included as suitable for housing development (but not the surrounding fields). The decision to include TC4S008 is inconsistent and therefore not positively prepared nor justified.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	This site needs to be removed from the local plan to ensure consistency.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 14 Cross Road, SAP16 TC4S008 Bridleway Riding School, RIP001
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>RIP 001. I support the exclusion of this site from development. A development here would be entirely incongruous in this rural location. Road links to the site are very poor. The development would increase use of the nearby Coldblow user worked railway level crossing which is highly undesirable. So I support the exclusion of this site from the sites of housing allocation.</p> <p>SAP16 and TC4S008. Both represent a spread of the built up area into the surrounding countryside, the Bridleway development in particular being the first south of Cross Road on that side of the railway line. This is regrettable. I am very concerned about the increase in traffic under the railway over bridge on Cross Road. This bridge is narrow and contains wrought iron elements that are highly vulnerable to vehicle collision. I could not determine if the council has consulted the rail authority on this but some specific contact would be a responsible thing to do.</p> <p>By way of illustration attached a photo of the rail bridge at Ripple Court less than a mile from Cross Road, and of the same construction on the same rail line after collision from a modest sized vehicle in March 2020. The vulnerability of the bridge is clear to see.</p>

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Review and/or delete SAP14 and TC4S008 from housing allocation. If retained establish any specific requirements of the rail authority wrt the underline bridge and use as planning conditions.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 16 - Deal Small Housing Sites, Site GTM003
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	No

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I believe the Site-specific Issues and Requirements for site GTM003 are lacking and incomplete. I live adjacent to the site; lizards and slow worms are present in my garden. It is therefore reasonable to assume the same species are present in the proposed site. Both species appear on the list of UK Biodiversity Action Plan Priority Herpetile Species (2007) and are protected under Section 41 of the Natural Environment and Rural Communities Act (2006). Regard for their conservation must be considered as part of the planning decision. Currently the plan does not suggest a wildlife/herpetile assessment of the site.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The Dover Local Plan should modified in regards to site GTM003 to ensure an appropriate herpetile and/or biodiversity survey is carried out before the site is disturbed.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Introduction</p> <p>1.1. These representations have been prepared on behalf of William Hickson ('our Client'), in relation to Land to the East of Northbourne Road, Great Mongeham and are submitted in response to the consultation on the Dover Borough Council (DBC) Regulation 19 (R19) Local Plan Review (LPR) and Sustainability Appraisal (SA). The consultation on the Local Plan commenced on 21st October 2022 and closes on the 9th of December 2022.</p> <p>1.2. The current consultation comprises the following documents: The Local Plan Review – Draft Plan for Submission (Regulation 19) The Local Plan Review – Sustainability Appraisal (September 2022). The Local Plan Review -</p> <p>1.3. Evidence base documents have also been updated and are published as part of the consultation.</p> <p>1.4. The existing Local Plan was adopted by DDC in February 2010. Policy CP1 states that the settlement Hierarchy the location and scale of development in the District must comply with the Settlement Hierarchy.</p> <p>1.5. Land to the East of Northbourne Road has been actively promoted to DDC through the 'Call for Sites' and Regulation 18 consultations for a residential development. The Site is considered suitable, available, achievable and deliverable for a minimum of 10 dwellings.</p> <p>1.6. The Site has been allocated within the R19 LPR under draft Policy 16 for the construction of a minimum of 10 dwellings under ref. Policy 16: Residential Extensions and Annexes (Reg 19 Policy H6). Our client strongly supports the existing draft allocation.</p> <p>1.7. This representation focuses on our Client's Land to the East of Northbourne Road, which has been allocated within Policy SAP1 of the emerging Plan (ref. GT003). In addition to this draft allocation, this representation seeks to promote a wider area within our Client's landownership, comprising the entirety of the promoted site and demonstrating its capacity to sensitively increase the quantum of housing available in this area.</p> <p>1.8. The following documents are included as part of this representation:</p> <ul style="list-style-type: none"> • Sketch design Document - Holloway Architects (Appendix 1) • Illustrative Master Plans - Holloway Architects (Appendix 2) • Landscape Appraisal - Huskisson Brown Associates (Appendix 3) • Initial Access Appraisal - (incl. plan of the proposed site access) – Pell Frischmann (Appendix 4) <p>Structure of the Representation</p> <p>1.9. The structure of this representation is as follows:</p> <ul style="list-style-type: none"> • Section 2: The Site and Surrounding Context: Sets out a broad outline of Northbourne Road and its surroundings • Section 3: Illustrative proposals: Summarises the proposal and details of the Illustrative Master Plan • Section 4: Comments on the Evidence Base: Reviews relevant evidence base documents. • Section 5: Representations on the Draft Local Plan: Provides comments and recommendations on key elements of the Draft Local Plan. • Section 6: Conclusion: Summarises the observations within the representations and outlines the next steps in the draft Local Plan process. <p>The Site and Surrounding Context</p> <p>2.1. The Site comprises 3.3Ha of greenfield land adjacent to the settlement boundary, to the south west of Great Mongeham.</p> <p>2.2. The Site falls within an area identified as open countryside. However, it is bordered by dwellings to the north, east and west, with agricultural land to the south of the Site. As such, the surrounding environment</p>

provides this area with an 'edge of settlement' character.

2.3. The Site itself is located to the south west of Mongeham and suitable access can be achieved via Northbourne Road, as demonstrated in the appended Access Appraisal (appendix 4). Northbourne Road is a two-way single carriageway road, and is subject to a speed limit of 30mph within the village of Great Mongeham. Pedestrian Facilities are already available on Northbourne Road making the proposed sites reasonably well connected to local facilities and public transport network.

2.4. The closest bus stops to the Site are located at Northbourne Road junction with Mongeham Church Close, directly at the north of the Site. These stops are served by 541 and Sandwich Connect bus routes. There are two additional bus stops along Northbourne Road located approximately 125m from the Site, which are served by bus routes 542 and 554 connecting to Walmer.

The nearest railway station to the Site is Walmer, which is located approximately 2.5km (9 minutes cycling distance) south of the Site. The station is managed by Southeastern train operating company (TOC) and typically provides one service per hour to London Charing Cross via Tonbridge and Ramsgate. Given the rural context of the Site, the public transport connections are considered to be good and offer a viable alternative to driving.

Site Designations

The Site is not within: the Green Belt, an Area of Outstanding Natural Beauty (AONB) or a Conservation Area. The Site is also Flood Zone 1, with a low risk of fluvial, surface water and reservoir flooding. The Great Mongeham 'Church Area' Conservation Area is situated approximately 50m north of the Site and there are five Listed Buildings in close proximity to the Site, including Great Mongeham Farmhouse (UID: 1069855); Great Mongeham House (UID: 1343714); Church of Martin (UID: 1069782); Cross immediately south west of St Martin (UID: 1069755); the Old Rectory (UID: 1261552); and Church House (UID: 1261551). All of which are Grade II Listed, bar the Church which is Grade II* Listed. In addition, the Site is within the Groundwater Source Protection Area.

Planning history

2.7. There is no planning history available on the DDC planning portal.

Illustrative Proposal

(DDC Note: Please note that images can not be copied into the portal however the full representation including images is attached)

Allocated Site

3.1. The northern parcel of the Site which has an area of 0.77ha has been allocated for approximately 10 dwellings within the DDCLP under GTM003 (SAP16). This representation proposes to increase the size of the allocation to include the area to the south of the Site for the provision of approximately 30 new dwellings set across a plot with a size of 3.3Ha.

Figure 3.1: Approximate Red Line Boundary of the Site – dashed outline denotes allocated parcel north of the Site.

The Illustrative Masterplans and an accompanying Sketch Design Document has been prepared to demonstrate the capacity for this site to provide a landscape-led development of 10-33 homes at the Land East of Northbourne Road.

3.3. The Sketch Design Document assesses the opportunities and constraints on the Site, identifying the potential layouts for residential development across the allocated area and the wider site. These designs are not intended to be how the scheme will ultimately be delivered, they are intended to show a possible layout for accommodating the draft allocation emerging Site Allocations Policy 1, and an alternative layout to sensitively incorporate additional housing on the Site.

3.4. Utilising the Site entrance identified in the Access Appraisal, this scheme introduces a new spur road that runs parallel to Northbourne Road, and down through the Site to provide access to accommodate 31 new dwellings.

3.5. The through road sits perpendicular to the access road, providing a vista to safeguard views from St Martin's Church and the wider conservation area to the agricultural land to the south of the Site. The scheme also provides new routes through the Site to the church to encourage walkability throughout. In addition to the 31 dwellings accessed from the central block, the proposal contains a pair of detached dwellings to the

north east corner, which can act as a standalone infill opportunity. This would help create a sense of continuity along the street scene.

3.6. The scheme has been carefully considered to safeguard the rural character of the Site. To achieve this, the architects have maintained an organic layout, ensuring that it will have limited urbanising impacts on the wider environment.

3.7. In addition, the proposal has also sought to retain and enhance the field boundaries – providing an additional buffer to the Grade II Listed Great Mongeham Farmhouse, whilst incorporating two new agricultural looking dwellings to the west of the Site to complement the wider agricultural setting.

Comments on the Evidence Base

As part of the Draft Local Plan consultation, DDC has published a number of Evidence Base documents. These are listed below. Comments are provided on those which are shown in bold in this representation.

- Sustainability Appraisal Reg 19 Local Plan (September 2022)
- Habitats Regulation Assessment (September 2022)
- HELAA 2022 – Housing Site Assessments

(DDC Note: The comments on the Evidence Base and been EXTRACTED and copied onto the relevant places within the Local Plan and its accompanying Consultation Documents (HIA, SA and IDP)

Representations on the Local Plan

5.1. The policy comments in this section of the representation relate to the Land East of Northbourne Road, which is being promoted for circa 33 dwellings. This section focuses primarily on the draft Local Plan, providing commentary on the key aspects of the Plan.

(DDC Note: The comments on specific Policies within the Local Plan have been extracted and DUPLICATED against SP3 and SAP1)

Strategic Policy 3: Planning for Housing growth

5.2. Table 6.1 sets out the Council's current housing supply position and shows that in order to meet the Local Housing Need for the District, the Council will need to allocate housing sites in the Local Plan to deliver 5,288 homes over the Plan period.

5.3. DDC has outlined that their proposed growth strategy will focus on the development and regeneration of Dover Town, with further development concentrated towards Aylesham. The remainder of the housing growth will then be distributed across Local Centres and Villages in the rural area. In accordance with this, c. 0.84% of the housing growth will be distributed to smaller villages and hamlets.

5.4. Whilst our Client broadly agrees with the proposed housing strategy set out in the Local Plan, it is pertinent that it is very similar to the adopted Local Plan.

5.5. While this does not amount to the current strategy being flawed, the adopted growth strategy has been ineffective in delivering the requisite housing in the past, establishing a precedent of under delivery within the District – as highlighted in paragraph 3.67 of the Regulation 19 Draft Plan which states the following of windfall permissions:

“Over this period, the spatial distribution of windfall development has largely followed the settlement hierarchy, with 39% of windfall permissions being located at Dover, 31% at Deal and 12% within the defined settlement confines of rural villages.”

5.6. The Council should consider the influence of market signals on housing in the relevant plan policies – as set out in policy 31 of the National Planning Policy Framework (NPPF) – and increase the proportion of housing growth allocated within the rural areas to reflect this.

5.7. This representation highlights the capacity to deliver additional dwellings at the Site in a sympathetic manner, demonstrating that there is scope to increase housing provision across the Site and improve its contribution to the requisite growth in the District.

Site Allocations Policy 1: Non-Strategic Housing Allocations

Our Client fully supports the allocation of the Site in the emerging Local Plan. However, it is considered that there is an opportunity to increase the area allocated on the Site and facilitate the development of additional housing provision in the District. This is supported in paragraph 68 of the NPPF which outlines the important contribution that small and medium sized sites can make to the housing requirement,

highlighting their capacity to be built out quickly in the Local Plan period.

Section 3 of this representation clearly demonstrates that the wider site is capable of delivering approximately 30 dwellings sympathetically to wider environment. The appended Sketch Design Document highlights that the proposal can be accommodated within the existing field boundaries to enhance its surroundings.

5.10. Significantly, paragraph 67 of the NPPF outlines that:

“Strategic policy-making authorities should have a clear understanding of the land available in their area through the preparation of a strategic housing land availability assessment. From this, planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability.”

5.11. This is supported by paragraph 122b of the NPPF which states that:

“[Planning policies and decisions should support development that makes efficient use of land, taking into account] local market conditions and viability.”

5.12. In accordance with this, there is a clear emphasis in national policy to produce an effective plan that is deliverable over the Plan Period. It is considered that the allocation of the entirety of the Land to the East of Northbourne Road is available, suitable and deliverable, and will make a positive contribution to the development of an effective Local Plan.

Recommendation: Whilst we generally support the Draft Local Plan, we urge Dover District Council to increase the area of the allocated area to include the parcel of the Site to the south of the Site, with an uplift from 10 dwellings to approximately 30 dwellings.

Conclusion

6.1. This representation has been prepared by Savills, on behalf of our client, William Hickson, in response to the Draft Dover District Local Plan Regulation 19 Consultation. The land currently being promoted and the subject of these representations comprises the Land to the east of Northbourne Road (Ref: GTM003).

6.2. This representation outlines our Client’s support for the allocation of the Site within Policy SA1 as a nonstrategic housing allocation. However, it is considered that there is greater scope for development across the wider site, as illustrated within the Sketch Design Document (Appendix 1) which includes two Illustrative Masterplans (Appendix 2), demonstrating that a landscape-led scheme of approximately 30 homes can be accommodated on the Site, providing a sympathetic and considered addition to Great Mongeham.

6.3. Various other technical reports related to Transport and Landscape have been submitted to the Council (Appendices 3-4), which have been used to inform the commentary on the evidence base in Section 4, and representations on the draft Policies in Section 5.

6.4. The appended reports highlight that the identified constraints set out within the Sustainability Appraisal can be overcome, including an initial access appraisal that demonstrates that the wider development can be accessed through a single point of entry off of Northbourne Road.

6.5. This representation clearly demonstrates that there is scope to increase housing provision across the Site and improve its contribution to the requisite growth in the District. This is supported by national policy, specifically in its emphasis on the capacity for small to medium development sites to contribute to housing requirement in the District, highlighting their potential contribution to enhancing rural communities.

(DDC Note: Attachment includes the Following Appendices:

- Appendix 1.0 Sketch Design Document
- Appendix 2.0 Illustrative Masterplan
- Appendix 3.0 Landscape Appraisal
- Appendix 4.0 Initial Access Appraisal

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Introduction

- 1.1. These representations have been prepared on behalf of William Hickson ('our Client'), in relation to Land to the East of Northbourne Road, Great Mongeham and are submitted in response to the consultation on the Dover Borough Council (DBC) Regulation 19 (R19) Local Plan Review (LPR) and Sustainability Appraisal (SA). The consultation on the Local Plan commenced on 21st October 2022 and closes on the 9th of December 2022.
- 1.2. The current consultation comprises the following documents:
The Local Plan Review – Draft Plan for Submission (Regulation 19)
The Local Plan Review – Sustainability Appraisal (September 2022).
The Local Plan Review -
- 1.3. Evidence base documents have also been updated and are published as part of the consultation.
- 1.4. The existing Local Plan was adopted by DDC in February 2010. Policy CP1 states that the settlement Hierarchy the location and scale of development in the District must comply with the Settlement Hierarchy.
- 1.5. Land to the East of Northbourne Road has been actively promoted to DDC through the 'Call for Sites' and Regulation 18 consultations for a residential development. The Site is considered suitable, available, achievable and deliverable for a minimum of 10 dwellings.
- 1.6. The Site has been allocated within the R19 LPR under draft Policy 16 for the construction of a minimum of 10 dwellings under ref. Policy 16: Residential Extensions and Annexes (Reg 19 Policy H6). Our client strongly supports the existing draft allocation.
- 1.7. This representation focuses on our Client's Land to the East of Northbourne Road, which has been allocated within Policy SAP1 of the emerging Plan (ref. GT003). **In addition to this draft allocation, this representation seeks to promote a wider area within our Client's landownership, comprising the entirety of the promoted site and demonstrating its capacity to sensitively increase the quantum of housing available in this area.**
- 1.8. The following documents are included as part of this representation:
- Sketch design Document - Holloway Architects (Appendix 1)
 - Illustrative Master Plans - Holloway Architects (Appendix 2)
 - Landscape Appraisal - Huskisson Brown Associates (Appendix 3)
 - Initial Access Appraisal - (incl. plan of the proposed site access) – Pell Frischmann (Appendix 4)

Structure of the Representation

- 1.9. The structure of this representation is as follows:
- Section 2: The Site and Surrounding Context: Sets out a broad outline of Northbourne Road and its surroundings
 - Section 3: Illustrative proposals: Summarises the proposal and details of the Illustrative Master Plan
 - Section 4: Comments on the Evidence Base: Reviews relevant evidence base documents.
 - Section 5: Representations on the Draft Local Plan: Provides comments and recommendations on key elements of the Draft Local Plan.
 - Section 6: Conclusion: Summarises the observations within the representations and outlines the next steps in the draft Local Plan process.

The Site and Surrounding Context

- 2.1. The Site comprises 3.3Ha of greenfield land adjacent to the settlement boundary, to the south west of Great Mongeham.
- 2.2. The Site falls within an area identified as open countryside. However, it is bordered by dwellings to the north, east and west, with agricultural land to the south of the Site. As such, the surrounding environment provides this area with an 'edge of settlement' character.
- 2.3. The Site itself is located to the south west of Mongeham and suitable access can be achieved via Northbourne Road, as demonstrated in the appended Access Appraisal (appendix 4). Northbourne Road is a two-way single carriageway road, and is subject to a speed limit of 30mph within the village of Great Mongeham. Pedestrian Facilities are already available on Northbourne Road making the proposed sites reasonably well connected to local facilities and public transport network.
- 2.4. The closest bus stops to the Site are located at Northbourne Road junction with Mongeham Church Close,

directly at the north of the Site. These stops are served by 541 and Sandwich Connect bus routes. There are two additional bus stops along Northbourne Road located approximately 125m from the Site, which are served by bus routes 542 and 554 connecting to Walmer.

The nearest railway station to the Site is Walmer, which is located approximately 2.5km (9 minutes cycling distance) south of the Site. The station is managed by Southeastern train operating company (TOC) and typically provides one service per hour to London Charing Cross via Tonbridge and Ramsgate. Given the rural context of the Site, the public transport connections are considered to be good and offer a viable alternative to driving.

Site Designations

The Site is not within: the Green Belt, an Area of Outstanding Natural Beauty (AONB) or a Conservation Area. The Site is also Flood Zone 1, with a low risk of fluvial, surface water and reservoir flooding. The Great Mongeham 'Church Area' Conservation Area is situated approximately 50m north of the Site and there are five Listed Buildings in close proximity to the Site, including Great Mongeham Farmhouse (UID: 1069855); Great Mongeham House (UID: 1343714); Church of Martin (UID: 1069782); Cross immediately south west of St Martin (UID: 1069755); the Old Rectory (UID: 1261552); and Church House (UID:1261551). All of which are Grade II Listed, bar the Church which is Grade II* Listed. In addition, the Site is within the Groundwater Source Protection Area.

Planning history

2.7. There is no planning history available on the DDC planning portal.

Illustrative Proposal

(DDC Note: Please note that images can not be copied into the portal however the full representation including images is attached)

Allocated Site

3.1. The northern parcel of the Site which has an area of 0.77ha has been allocated for approximately 10 dwellings within the DDCLP under GTM003 (SAP16). **This representation proposes to increase the size of the allocation to include the area to the south of the Site for the provision of approximately 30 new dwellings set across a plot with a size of 3.3Ha.**

Figure 3.1: Approximate Red Line Boundary of the Site – dashed outline denotes allocated parcel north of the Site.

The Illustrative Masterplans and an accompanying Sketch Design Document has been prepared to demonstrate the capacity for this site to provide a landscape-led development of 10-33 homes at the Land East of Northbourne Road.

3.3. The Sketch Design Document assesses the opportunities and constraints on the Site, identifying the potential layouts for residential development across the allocated area and the wider site. These designs are not intended to be how the scheme will ultimately be delivered, they are intended to show a possible layout for accommodating the draft allocation emerging Site Allocations Policy 1, and an alternative layout to sensitively incorporate additional housing on the Site.

3.4. Utilising the Site entrance identified in the Access Appraisal, this scheme introduces a new spur road that runs parallel to Northbourne Road, and down through the Site to provide access to accommodate 31 new dwellings.

3.5. The through road sits perpendicular to the access road, providing a vista to safeguard views from St Martin's Church and the wider conservation area to the agricultural land to the south of the Site. The scheme also provides new routes through the Site to the church to encourage walkability throughout. In addition to the 31 dwellings accessed from the central block, the proposal contains a pair of detached dwellings to the north east corner, which can act as a standalone infill opportunity. This would help create a sense of continuity along the street scene.

3.6. The scheme has been carefully considered to safeguard the rural character of the Site. To achieve this, the architects have maintained an organic layout, ensuring that it will have limited urbanising impacts on the wider environment.

3.7. In addition, the proposal has also sought to retain and enhance the field boundaries – providing an additional buffer to the Grade II Listed Great Mongeham Farmhouse, whilst incorporating two new

agricultural looking dwellings to the west of the Site to complement the wider agricultural setting.

Comments on the Evidence Base

As part of the Draft Local Plan consultation, DDC has published a number of Evidence Base documents. These are listed below. Comments are provided on those which are shown in bold in this representation.

- Sustainability Appraisal Reg 19 Local Plan (September 2022)
- Habitats Regulation Assessment (September 2022)
- HELAA 2022 – Housing Site Assessments

(DDC Note: The comments on the Evidence Base and been EXTRACTED and copied onto the relevant places within the Local Plan and its accompanying Consultation Documents (HIA, SA and IDP)

Representations on the Local Plan

5.1. The policy comments in this section of the representation relate to the Land East of Northbourne Road, which is being promoted for circa 33 dwellings. This section focuses primarily on the draft Local Plan, providing commentary on the key aspects of the Plan.

(DDC Note: The comments on specific Policies within the Local Plan have been extracted and DUPLICATED against SP3 and SAP1)

Strategic Policy 3: Planning for Housing growth

5.2. Table 6.1 sets out the Council's current housing supply position and shows that in order to meet the Local Housing Need for the District, the Council will need to allocate housing sites in the Local Plan to deliver 5,288 homes over the Plan period.

5.3. DDC has outlined that their proposed growth strategy will focus on the development and regeneration of Dover Town, with further development concentrated towards Aylesham. The remainder of the housing growth will then be distributed across Local Centres and Villages in the rural area. In accordance with this, c. 0.84% of the housing growth will be distributed to smaller villages and hamlets.

5.4. Whilst our Client broadly agrees with the proposed housing strategy set out in the Local Plan, it is pertinent that it is very similar to the adopted Local Plan.

5.5. While this does not amount to the current strategy being flawed, the adopted growth strategy has been ineffective in delivering the requisite housing in the past, establishing a precedent of under delivery within the District – as highlighted in paragraph 3.67 of the Regulation 19 Draft Plan which states the following of windfall permissions:

“Over this period, the spatial distribution of windfall development has largely followed the settlement hierarchy, with 39% of windfall permissions being located at Dover, 31% at Deal and 12% within the defined settlement confines of rural villages.”

5.6. The Council should consider the influence of market signals on housing in the relevant plan policies – as set out in policy 31 of the National Planning Policy Framework (NPPF) – and increase the proportion of housing growth allocated within the rural areas to reflect this.

5.7. This representation highlights the capacity to deliver additional dwellings at the Site in a sympathetic manner, demonstrating that there is scope to increase housing provision across the Site and improve its contribution to the requisite growth in the District.

Site Allocations Policy 1: Non-Strategic Housing Allocations

Our Client fully supports the allocation of the Site in the emerging Local Plan. However, it is considered that there is an opportunity to increase the area allocated on the Site and facilitate the development of additional housing provision in the District. This is supported in paragraph 68 of the NPPF which outlines the important contribution that small and medium sized sites can make to the housing requirement, highlighting their capacity to be built out quickly in the Local Plan period.

Section 3 of this representation clearly demonstrates that the wider site is capable of delivering approximately 30 dwellings sympathetically to wider environment. The appended Sketch Design Document highlights that the proposal can be accommodated within the existing field boundaries to enhance its surroundings.

5.10. Significantly, paragraph 67 of the NPPF outlines that:

“Strategic policy-making authorities should have a clear understanding of the land available in their area

through the preparation of a strategic housing land availability assessment. From this, planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability.”

5.11. This is supported by paragraph 122b of the NPPF which states that:

“[Planning policies and decisions should support development that makes efficient use of land, taking into account] local market conditions and viability.”

5.12. In accordance with this, there is a clear emphasis in national policy to produce an effective plan that is deliverable over the Plan Period. It is considered that the allocation of the entirety of the Land to the East of Northbourne Road is available, suitable and deliverable, and will make a positive contribution to the development of an effective Local Plan.

Recommendation: Whilst we generally support the Draft Local Plan, we urge Dover District Council to increase the area of the allocated area to include the parcel of the Site to the south of the Site, with an uplift from 10 dwellings to approximately 30 dwellings.

Conclusion

6.1. This representation has been prepared by Savills, on behalf of our client, William Hickson, in response to the Draft Dover District Local Plan Regulation 19 Consultation. The land currently being promoted and the subject of these representations comprises the Land to the east of Northbourne Road (Ref: GTM003).

6.2. This representation outlines our Client's support for the allocation of the Site within Policy SA1 as a nonstrategic housing allocation. However, it is considered that there is greater scope for development across the wider site, as illustrated within the Sketch Design Document (Appendix 1) which includes two Illustrative Masterplans (Appendix 2), demonstrating that a landscape-led scheme of approximately 30 homes can be accommodated on the Site, providing a sympathetic and considered addition to Great Mongeham.

6.3. Various other technical reports related to Transport and Landscape have been submitted to the Council (Appendices 3-4), which have been used to inform the commentary on the evidence base in Section 4, and representations on the draft Policies in Section 5.

6.4. The appended reports highlight that the identified constraints set out within the Sustainability Appraisal can be overcome, including an initial access appraisal that demonstrates that the wider development can be accessed through a single point of entry off of Northbourne Road.

6.5. This representation clearly demonstrates that there is scope to increase housing provision across the Site and improve its contribution to the requisite growth in the District. This is supported by national policy, specifically in its emphasis on the capacity for small to medium development sites to contribute to housing requirement in the District, highlighting their potential contribution to enhancing rural communities.

This document has been split across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1387.)

4. POLICY SAP16 – ‘DEAL SMALL HOUSING SITES’

4.1 Policy SAP16 identifies three sites under the heading ‘Deal Small Housing Sites’. Site ‘TC4S008 25 – 115 Station Road, Bridleway Riding School, Station Road, Deal’ (the Site) is identified alongside a series of site-specific criteria.

Estimated Dwelling Number

4.2 As an overall matter, the Site is assigned an indicative capacity of 25 dwellings under the heading ‘estimated dwelling number’. This is noted and agreed as a minimum quantum of development, recognising that site yield may ultimately be higher subject to site specific opportunities.

4.3 The supporting material appended to this representation demonstrate a scheme of at least 25 dwellings could be accommodated on site. On behalf of the Promoter and Landowners, we request a site specific figure is not ‘capped’ or otherwise seen as a maximum level of growth. Site specific opportunities and constraints may lead to a figure ultimately larger than 25 dwellings, maximising site efficiencies in line with the aspirations of the Plan.

Criteria-based Policies

4.4 Policy SAP16 is criteria-based, with two criterion – A and B.

4.5 Criterion A are noted in respect of accordance with the wider policies of the Plan.

4.6 Criterion B is site specific; commentary is provided below with cross-reference to supporting technical inputs which accompany this submission:
Primary access to the site shall be provided from Station Road.

A supporting Technical Note prepared by Transport Planning Associates accompanies this representation. This Technical Note reviews the accessibility of the site and identifies with confidence that a preliminary access strategy that supports an allocation for residential development in this location in accordance with the wording of SAP16 as drafted.

Supporting plans demonstrate that access to the allocation will be taken from Station Road with ample frontage, facilitating a new and safer pedestrian footway and vehicular access, or to amend the proposed highway scheme proposed as part of the neighbouring scheme.

In all events, the primary access to the Site will be achieved from Station Road with acceptable technical specification.

This proposed criterion to Policy SAP16 is supported as a sound and deliverable policy requirement.

Speed survey required to determine whether the 30mph zone should be extended along the frontage of the site;

As outlined in the supporting Technical note, the proposed allocation would support the speed limit reduction should this not be implemented through the scheme opposite.

It is noted that the detailed enforcement of such could be secured through the planning application process and related conditions and legal agreement where required.

This proposed criterion to Policy SAP16 is supported as a sound and deliverable policy requirement.

A pedestrian footway is required along the full length of northern boundary of the site, to connect to the existing footways, provide an off-carriageway pedestrian route to Walmer station and link to adjoining new developments to the north.

As evidenced in the supporting Technical Note – and as evidenced on supporting Plan 2210-046 TN01 – this Site will enhance the pedestrian connectivity which will be safer for existing and new residents along Station Road. The Site is well-placed to provide an enhanced level of interconnectivity to Walmer Station and adjoining developments to the north via an off-carriageway route.

This proposed criterion to Policy SAP16 is supported as a sound and deliverable policy requirement.

Transport Assessment must consider and identify mitigation (potential widening/traffic management measures/junction improvements) for the surrounding local road network, taking into account the cumulative impact of this and other sites allocated in this Plan, including (but not limited to) Station Road and the junctions along it, up to and including the Station Road/Dover Road/Gram’s Road junction;

The supporting Technical Note has reviewed the neighbouring committed development. It identifies the key aspects of highways mitigation agreed in relation to that scheme. It considers the opportunities for the proposed Site Allocation at 115 Station Road, Bridleway Riding School, Deal to effectively accord with or otherwise ‘plug in’ to this consented highway scheme, specifically along Station Road.

Whilst a detailed Transport Assessment (and Travel Plan) would accompany any future application, there is considered to be no insurmountable highways impacts that would suggest undue difficulty in the Site delivering the necessary mitigation required in maximising highways safety and transport efficiency.

This proposed criterion to Policy SAP16 is supported as a sound and deliverable policy requirement.

Existing trees and hedgerows along the boundary of the site should be retained and enhanced to provide an appropriate landscape buffer;

The supporting Indicative Site Layout establishes that the existing trees and hedgerows along the boundary can be reasonably retained and enhanced, subject to a detailed arboricultural review of their condition (to be undertaken to inform a submission in Q2 2023).

An appropriate landscape buffer can be provided; the details of which would be refined in the context of any future application.

Site is within Groundwater Source Protection Zone 2;

The forthcoming planning application will be supported by a Flood Risk Assessment and Drainage Strategy which appropriately reflects the Site's location within a Groundwater Source Protection Zone. It is noted that large parts of the District fall within this drainage area; it will not preclude development of the Site in the early part of the Plan.

A supporting technical note has been prepared by MEC to identify the Site's current baseline conditions, and should be referred to by the Inspector.

Flood Risk Assessment required, due to risk of surface water flooding. As part of this the Sequential Approach should be applied to the layout of the site;

The Promoter and the Landowners agree to provide a site-specific Flood Risk Assessment, incorporating a site-wide sequential approach to housing delivery, as part of the forthcoming planning application. The supporting technical note prepared by MEC confirms that the Site is not constrained by flood risk and drainage matters, with the site wholly located in Flood Zone 1 and surface water drainage likely to discharge to soakaway. The technical note confirms that further investigation of surface water flood extents will be undertaken as part of a Flood Risk Assessment, however high risk areas appear to be located off site. In any event development will be avoided in high risk areas and wider surface water flooding will be managed as required.

The Indicative Site Layout as prepared identifies a broad layout to reflect site-specific surface water conditions, demonstrating the capability of the Site to deliver at least 25 dwellings in this location.

SuD's should be provided.

An appropriate Sustainable Drainage System (SuDS) will be provided as part of the forthcoming planning application. The Site's drainage regime will be assessed as part of a detailed drainage strategy which will inform the site's detailed design layout.

The detail of such will be presented as part of the forthcoming planning application, with treatment measures incorporated to protect groundwater in line with the technical note prepared by MEC.

The Promoter and the Landowners agree to provide SuDs as a criteria underpinning the implementation of this site allocation.

Soundness

4.7 Overall, it is clear that SAP16 – as it pertains to the Site – is of sound basis.

4.8 Development of the Site would be in keeping with, and at a scale proportionate to, the size and form of the existing settlement, all the while fully cognisant of the sustainable growth of Deal at nearby sites and the proposed allocation of such underscoring the sustainability credentials of Deal.

4.9 Its inclusion is considered to roundly accord with the thrust of the Vision and Strategic Objectives set out in the Plan.

4.10 Its allocation is considered to be made on the basis of a sound evidence base undertaken by the LPA, but also as reflected in the ongoing work of the Promoter in the preparation of an Outline Planning Application. Due regard has been had to the findings of the Call for Sites, Sustainability Appraisal, and other topic papers as prepared by the LPA in its pursuit of sustainable development.

4.11 The Housing Employment Land Availability Assessment (September 2022) is clear that the Site – which came forward under a targeted call for sites exercise in 2021 – is:

- well contained and screened to the wider countryside;
- would form a logical extension to the settlement area;
- has suitable access; and

- would require a footway along the northern boundary of the site connecting to adjacent existing footway to the north east

4.12 The HELAA went on to confirm the availability and achievability of the Site in the short to medium term. The Promoter agrees with this position, and that outlined above. Further LPA-led assessment under the Sustainability Appraisal confirms a range of benefits and consequences of the allocation. The Site performs well in most areas, and this higher level

assessment is agreed. It should be noted that where significant negative effects have been identified, these relate to wider scale matters of the Site's location in a groundwater protection areas and the presence of agricultural land, which impact a number of greenfield sites in the district. It should be noted that none of this land is agricultural. These matters are not considered insurmountable in the context of a planning application.

The Site otherwise scores consistently across all other matters, hence its proposed allocation for residential development. The Promoter and Landowners will deliver on the aspirations of this Site from the HELAA wording.

4.13 The findings of the LPA's 'Selection of the Site Allocations' paper are supported, which for this Site are clear that:

"The Site accords with the Local Plan growth strategy and will contribute to meeting the District's housing need over the plan period. Where key considerations are set out in the site allocations policies these will need to be addressed as part of the planning application process. There is considered to be sufficient scope to avoid or significantly mitigate the significant adverse effects identified through the Sustainability Appraisal" [page 15, Selection of the Site Allocations – Supporting Document, Dover District Council, Sep 2022]

4.14 The policy wording of SAP16 – specifically as it relates to this Site – is considered both positively prepared and justified, reflecting an appropriate level of guidance to ensure the deliverability of the Site for at least 25 dwellings.

	<p>4.15 No amendment is proposed to Policy SAP16, nor to the inclusion of 115 Station Road, Bridleway Riding School, Deal which is considered an 'oven ready' site capable of delivering an appropriate quantum of development in the earlier plan period.</p> <p>4.16 Having regard to the above, it is emphasised that the Site is available and is deliverable in the short-medium term, in line with the LPA's assessment informing this Regulation 19 Plan.</p> <p>4.17 It should be emphasised that – as a direct measure of its deliverability – the Promoter is currently undertaking the necessary technical inputs to inform the preparation of a planning application in Q2 2023.</p> <p>SITE DELIVERABILITY</p> <p>4.18 At the specific request of Dover District Council per its email of 18 November 2022, the Promoter and Landowner further wish to confirm the following information to assist in the progression of the Plan towards adoption:</p> <p>1. Current planning status It should be noted that the Promoter is currently preparing an Outline Planning Application for submission in Q2 2023, evidencing the overarching deliverability of the Site in line with the aspirations of the Plan as drafted. Technical work has been instructed to underpin the detailed inputs to a future planning application. These representations are supported at this stage by some of this early-stage technical work emphasising the deliverability of the Site. 2. Firm progress being made towards the submission of an application; As above, an Outline Planning Application is targeted for submission in Q2 2023, with work underway to support such. 3. Firm progress with site assessment work; As above, an Outline Planning Application is targeted for submission in Q2 2023, with work underway to support such. 4. Clear relevant information about site viability, ownership constraints or infrastructure provision, such as successful participation in bids for large-scale infrastructure funding or other similar projects: The Promoter is engaged in an Promotion Agreement with the Landowners; both parties are engaged in the submission of these representations to the Regulation 19 consultation. The Site is held in single ownership and no third parties are required in the delivery of housing in this location. The Site is considered available, suitable and deliverable.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP16 (Intro, Conclusion and Attachments)
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Lee Evans On behalf of Mr and Mrs Laffin and Rubix Estates. Full Representation attached to SDLP1387. This document has been split across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment.)</p> <p>REGULATION 19 LOCAL PLAN CONSULTATION DOVER DISTRICT COUNCIL REPRESENTATIONS MADE IN RESPECT OF LAND AT 115 STATION ROAD, BRIDLEWAY RIDING SCHOOL, STATION ROAD, DEAL DOVER DISTRICT COUNCIL REFERENCE TC4S008 ON BEHALF OF RUBIX ESTATES LTD AND MR P LAFLIN AND MRS S LAFLIN</p> <p>INTRODUCTION</p> <p>1.1 Lee Evans Partnership LLP is instructed by Rubix Estates Ltd. (hereafter, the Promoter) and Mr P Laffin and Mrs S Laffin (hereafter, the Landowners) to submit representations to the Regulation 19 Submission Draft of the Dover District Local Plan 2040.</p> <p>1.2 The Plan outlines the scale and distribution of new development which is required to meet Dover District's needs to 2040. It further identifies the planning principles and policies to guide decisions on all new developments, including through a series of site allocations and detailed development management policies against which development proposals will be assessed during the plan period to 2040.</p> <p>1.3 This response offers the Promoter's view on whether the Plan satisfactorily meets the requirements relating to Legal Compliance, Soundness (and whether the Plan has been positively prepared, justified, effective and consistent with national policy), and whether it has satisfied the Duty to Cooperate.</p> <p>1.4 It makes specific reference to the Promoter's land interests at 115 Station Road, Bridleway Riding School, Station Road, Deal which benefits at this stage from a proposed allocation under emerging Policy SAP16 for development of 25 dwellings. This response advocates for the continued inclusion of Policy SAP16, and provides the Inspector with a series of technical documents to provide reassurance of the availability, suitability, and deliverability of the site for residential development including: This Representation and its contents; A Site Analysis and Design Package, prepared by Lee Evans Partnership LLP Indicative Site Layout, prepared by Lee Evans Partnership LLP Site Access Arrangement Plan, prepared by TPA Site Drainage Strategy Plan, prepared by MEC</p> <p>1.5 It should be noted that the Promoter is currently preparing an Outline Planning Application for submission in Q2 2023, evidencing the overarching deliverability of the Site in line with the aspirations of the Plan as drafted.</p> <p>1.6 The following comments are therefore set out in a positive and constructive manner intended to aid the clarity and implementation of the Plan, structured around the following sections: Section 2 of this Statement describes the representation site and its surroundings. Section 3 sets out commentary on the Plan as drafted, with reference to its Vision, Objectives, and key policies; Section 4 provides detailed commentary of SAP16 – Deal Small Housing Sites', alongside an indicative layout and initial technical assessment supporting the allocation of the Site; Section 5 summarises the case in support of the adoption of the Plan</p>

1.7 On behalf of Rubix Estates Ltd and the Landowners we strongly advocate for the continued inclusion of land at 115 Station Road, Bridleway Riding School for residential development, as prescribed under emerging Policy SAP16. Overall, these representations conclude that the Plan is legally compliant, and provides a sound evidence-based approach to planning in the District over the plan period. It finds further that the Local Planning Authority (LPA) has sufficiently met the Duty to Cooperate.

1.8 We welcome the opportunity to further assist or provide comment on the preparation of the Plan which will help shape future development in the area; and we welcome look forward to the opportunity to participate at later hearing sessions where appropriate.

SITE DESCRIPTION AND PLANNING CONTEXT

The Site comprises an existing residential property, hardstanding, stables, paddocks, riding school, and arena.

2.2 The site is well-related to adjacent, two-storey residential development, and falls adjacent to existing 'urban confines' for Deal, and these confines are proposed for expansion to include the Site. The site is situated in close proximity to existing services, facilities and employment opportunities allowing easy access by foot and bicycle.

2.3 The site is in close proximity to public transport links, connecting it with Deal town centre and other large employment centres such as Canterbury, Dover and Ramsgate. Walmer Station is 140 metres away or two minute walk which provides regular direct services to London St Pancras International, London Charing Cross, London Bridge and London Waterloo East in journey times of less than 1 hour and 20 minutes. Services from Walmer Station also directly provide people with services to Dover (13 minutes), Folkestone (24 minutes), Ashford (44 minutes), Canterbury (47 minutes) and Ebbsfleet (60 minutes).

2.4 Nearby residential development is of a mixed appearance and vernacular, rising generally two storeys in height. Topography in this part of Deal is varied, with Station Road appearing to fall within a valley when viewed from within the Site. Topography within the site rises due west, with land rising to the upper extent of the Site's demise.

2.5 Within the Site, its current configuration is largely characterised by the existing residential property with associated hard standing and parking, large barn, stable buildings and riding area. The rearmost parts of the Site are laid to pasture. Existing stable buildings fall to the Site's eastern boundary with the barns being as large as the property on site. Built development is then concentrated at present to the northern and eastern elements of the Site. The Site benefits from extensive boundary treatment, including existing trees and hedges which are established and offer year-round screening to the wider countryside.

2.7 The Site benefits from an existing access to Station Road via a private gated access with bellmouth to the highways network, providing wider connectivity thereafter.

2.8 It is noted that the Site sits within the immediate context of a number of major applications, including a consented development of up to 100 dwellings (ref. 20/01125), for which a Reserved Matters application is currently 'live' (ref. 21/01683). It is noted that a further proposed allocation at land west of Cross Road (for an estimated 140 dwellings) falls within the Site's context.

Figure 1. Site location plan (red shading), in the context of a multiple consented residential developments and existing high speed rail connections from Walmer Station.

Planning Policy Context

2.9 As above, the Site falls adjacent to existing 'urban confines' for Deal, albeit these confines are proposed for expansion to include the Site under Policy SAP16 where it benefits from a proposed allocation for residential development of a minimum of 25 dwellings.

2.10 As a settlement, Deal is considered a suitable location for development. The town is identified as the sole "District Centre" in the adopted settlement hierarchy. It is second in the hierarchy only to the town of Dover

2.11 The Site was identified through a targeted Call for Sites exercise in 2021, and positively assessed by Dover District Council as an available, suitable and deliverable site for residential development.

2.12 A proposed indicative site layout – duly informed by technical inputs and the emerging policy wording of SAP16 is appended to this response, and discussed at Section 4 of this report.

REPRESENTATIONS TO REGULATION 19 LOCAL PLAN CONSULTATION

3.1 As above the Dover District Local Plan to 2040 Regulation 19 Submission (The Plan) establishes the scale and distribution of new development which is required to meet Dover District's needs to 2040, identifying a series of site allocations and detailed development management policies against which development proposals will be assessed during the plan period.

3.2 This follows a period of extensive evidence-gathering, and previous consultation on the Regulation 18 Draft Local Plan in 2020.

3.3 Detailed commentary is provided herein on the Vision, Objectives, and Policies of the Plan. Commentary is not provided for all policies, and is instead reserved for those considered of most relevance to the Promoter's land interests at 115 Station Road, Bridleway Riding School, Deal.

3.4 Commentary is therefore primarily focused on SAP16 – Deal Small Housing Sites as outlined at Section 4 of this document.

However, supplementary commentary is provided elsewhere, namely on emerging policies as follows:

SP3 – Housing Growth

	<p>SP5 – Affordable Housing CC8 – Tree Planting and Protection PM1 - Achieving High Quality Design, Place Making and the provision of Design Codes PM2 – Quality of Residential Development H1 – Type and Mix of Housing TI1 – Sustainable Travel and Infrastructure TI3 – Parking on New Developments</p> <p>3.6 Commentary is provided using the references above and, where relevant, the paragraph numbers as used in the Regulation 19 Draft. 3.7 Due regard has been had to the wider evidence, and where necessary cross-reference has been made to the LPA's evidence as available as part of this consultation process.</p> <p>Conclusion</p> <p>5.1 On behalf of Rubix Estates Ltd. we strongly advocate for the continued inclusion of 115 Station Road, Bridleway Riding School, Station Road, Deal for residential development, as prescribed under emerging Policy SAP16. 5.2 Overall, these representations conclude that the Plan is legally compliant, and provides a sound evidence-based approach to planning in the District over the plan period. It finds further that the LPA has sufficiently met the Duty to Cooperate. 5.3 Specific to the Promoter's interests at 115 Station Road, Bridleway Riding School, Deal the allocation of the Site under SAP16 is considered a sound basis for the delivery of housing in this location, noting that: The Site is well-related to the existing settlement – and committed development- and is contained within the landscape and important trees and landscape features will be retained and, enhanced; The local highway network has capacity to accommodate the additional traffic associated with the development, without adverse impact and in fact provide a betterment to the existing conditions and toto be explored in greater detail in the context of a planning application as currently being prepared; The Sites falls within the EA Flood Risk Zone 1 (i.e. land assessed as having a less than 1 in 1,000 annual probability, or <0.1% chance of flooding); There are no designated heritage assets within or immediately adjacent to the site, and the development is not considered to affect the setting of any Listed Buildings. 5.4 We welcome the opportunity to further assist or provide comment on the preparation of the Plan which will help shape future development in the area; and we welcome look forward to the opportunity to participate at later hearing sessions where appropriate.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP16
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We have reviewed the new sites for housing allocation included in the Reg 19 Submission Summary of Site Allocations and would draw your attention to 3 of these sites that lie within FZ3: Northwall Road & Ethelbert Road, Deal Stonar Close, Sandwich</p> <p>These site lie within Flood Zone 3a; this is an area considered to be at 'high risk' from flooding in the absence of tidal defences. Whilst we appreciate that both Sandwich and Deal are well defended from tidal flooding, there is always a 'residual' risk from inundation in such areas. Accordingly, we would request that your Authority initially considers whether these sites suitably address the requirements of the flood risk Sequential Test before allocating them in the local plan.</p> <p>The updated PPG to the NPPF places more emphasis on residual risk; therefore when considering these allocations it should be understood that in order for development to be made safe, it is likely that the ground floor would not be suitable for any form of living accommodation. Detailed design would be subject to a site-specific FRA but given the potential depths of flooding in the event of failure or breach of defences, development is unlikely to meet the requirements of Policy CC5 or the Exception Test, unless all living and sleeping accommodation is set at first floor or above. If this is would be unacceptable to the LPA, then these sites should not be allocated.</p> <p><i>(DDC note - This is an extract from the full Environment Agency representation SDLP1458)</i></p>

Full Representation attached to SDLP1568. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1568.)</p> <p>Dover Local Plan Regulation 19 Consultation: Land off West Lea, Deal We write to you on behalf of our client, Kentish Projects in relation to the Dover District Council Regulation 19 consultation on its Local Plan Our client controls the site off West Lea, Deal. The extent of the site is shown on the enclosed plan. This area of Deal is predominantly residential in character. The site itself is brownfield and a ground works company known as Crushingtons has operated from the site for a number of years. There is a significant bund of sorted hardcore on site as well as a number of buildings</p>

and the use of the site gives rise to noise and heavy goods vehicle movements along Northwall Road that has been the cause of residential complaints. The site therefore represents a nonconforming use within a residential area and is a visual detractor on the character of the surrounding area, which could be enhanced through an allocation for residential development. It was not included as a separate site within the Call for Sites. Accordingly, it hasn't been included as an allocation within the Pre-Submission version of the Local Plan unlike the SAP16 site nearby referenced below.

The site is available, and for the reasons set out below we consider it is a suitable and available site to help deliver housing to North Deal and should be included as an additional site under Policy SAP 16- 'Deal Small Housing Sites'. Deal is one of the largest settlements in the district, sitting only below Dover/Whitfield in the settlement hierarchy.

Site Description

The site comprises a roughly rectangular shaped parcel of land of. It is bound by residential properties on West Lea to the southeast, the railway line to the south west, and open grassland on all remaining sides. It is noted that land to the southeast is allocated for 8 units under Policy SAP 16 (104 Northwall Road, Deal).

The site is currently operated intensively by a ground works contractor known as Crushingtons. It shares similar characteristics to the SAP 16 site that was allocated with respect to local landscape character area designation and siting within Flood Zone 3. For this reason, it is asserted that the conclusions relating to SAP16 which have resulted in its allocation equally apply to the current omission site and in fact more so given the level of activity, clear brownfield status and untidy appearance of the site.

Suitability of the Site

The site is a sustainable, brownfield, site. It is well related to the existing residential properties of North Deal, which is a second-tier settlement in the district providing a large range of facilities and services commensurate with its role in the settlement hierarchy.

Access can be provided from Northwall Road, and on the basis that 104 Northwall Road immediately adjoining the site has been allocated it would be sensible for this site to form an extension of that allocation and be allocated for residential which would secure an enhancement for both the character of the area and the residential amenity of residential properties nearby. It is concluded that the cessation of commercial activity and residential allocation of the site would provide for a more suitable land use in this established residential area, and a more friendly neighbour use.

With regard to flood risk, we note the site is located within Flood Zone 3; this is the case for a large swathe of the settlement in this location. The methodology applied to the HEELA confirms that sites for residential development are only considered when in flood Zone 3 if they are highly sustainable. For the reasons set out above, this site, which is located immediately adjacent to the settlement confines of a second-tier settlement. 104 Northwall Road (SAP 16) is also located in Flood Zone 3 and was considered acceptable in the HEELA because it was concluded that flood risk can be appropriately mitigated. It is our view that the same principles apply here and it would be inconsistent where this same conclusion not to be drawn for this site especially given the identified enhancements housing redevelopment could deliver.

Availability of the Site

We confirm on behalf of our client, Kentish Projects, that the site is available and can be brought forward for residential development over the plan period.

SP3: Housing Growth

Whilst we welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period, it is considered additional sites if suitable and available should be included within the Plan. A large proportion of growth is being directed towards the expansion of Dover/Whitfield (over 2,000), and with large strategic sites delivery rates can easily slow down during the plan period and

	<p>under-deliver. Whilst there is a buffer within the Plan, it is considered appropriate not use this as a limit, and allocate other suitable sites in sustainable locations where available.</p> <p>In this respect, it is noted that Deal sits towards at the top of the settlement hierarchy, as the district's only District Centre. Only Dover/ Whitfield sit above Deal. Deal is also an area that has attracted strong market demand which is a relevant factor to the delivery of the district's housing requirement. The emerging Plan due to the perceived constraints in Deal, only allocates 223 units in this settlement compared to over 600 in Aylesham which is a settlement located lower down the settlement hierarchy and the provision of a greater number of small sites such as this will inbuild choice and assist with the planned delivery trajectory.</p> <p>As detailed above, land off West Lea, is considered suitable for residential development. It is also available and can be delivered within the short to medium term, and in our view this site should be allocated within the Plan.</p> <p>Concluding Remarks</p> <p>Hume Planning Consultancy welcomes the opportunity to comment on this stage of the Council's Pre-Submission Local Plan and would like to reserve the right to attend the Examination in Public in due course to discuss potential development sites in Deal.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	CC5 5.33 DDC seems to have forgotten the NPPF guidance when choosing sites for Sandwich. One could be forgiven for concluding that Sites SAN010 and SAN019, which are outside of the flood Zones, have been purposely removed from the plan in order to allow the development of the sites closer to the town, without them being subjected to sequential flood risk assessments.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Reconsider sites SAN010 and SAN019. taking cognisance of the new information available through the successful planning application on part of SAN010

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Council have failed to consider these new sites put forward in the 2021 Call for Sites
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Finn's, on behalf of Mr Barry Mottershead, submitted two sites to Dover District Council in response to the additional Call for Sites 2021 event. One site proposed 20 market houses whilst the other provided 30 Self Build housing plots. These two areas of land fell within a larger area the Council had previously labelled SAN016 during their initial Call for Sites and therefore the Council decided not to reconsider these sites submitted in 2021. We object to the lack of allocation of these sites without due consideration to the sites submitted within the 2021 Call for Sites process. Whilst the larger site area in the original Call for Sites was found by the Council to be potentially suitable, available and achievable, the Council noted concerns over access, landscape and that part of the land was within the breach area. They noted the site would be well-connected to local amenities.</p> <p>The smaller areas of land submitted in the 2021 Call for Sites (Council references your references TC4S062 and 063) do not have the same issues affecting them as the larger site area SAN016 was disregarded for. They comprise two distinct parcels of land that benefit from defined well landscaped boundaries, site access is in the Clients control. Neither the land nor access are within an area of concern for flooding, all matters used to disregard the larger SAN016 parcel. If a separate assessment of the two sites we submitted had been carried out as expected, these differences could have been picked up and the sites assessed as suitable for development. Additionally, one of the sites was submitted as meeting the 1 hectare requirement for which the Plan must provide 10% of sites for allocation, again subject of different criteria than the larger SAN016 site.</p> <p>Table 3.3 identifies Sandwich as a Rural Service Centre. Paragraph 3.45 states that 'it has been a challenge to identify suitable and available sites in Deal and Sandwich', yet these sites have been dismissed without due consideration as part of the Local Plan process. Paragraph 4.170 states that limited sites have been identified in Sandwich due to constraints, however these sites offer 50 units between them, are on land in a</p>

	<p>single ownership, well screened and landscaped from the wider countryside, lie adjacent to the existing built area of Sandwich and close to a good range of amenities with good site access and have been entirely disregarded without consideration by the Council.</p> <p>The land is well located to the existing built area of Sandwich, with long established high boundary screening resulting in defined site boundaries and it is situated within easy walking distance of the station, primary and secondary schools and shops and other services and is a very logical location for new housing in Sandwich. We consider that in dismissing it under SAN016, the sites have not been appropriately considered as part of the Call for Sites process.</p> <p>A Technical Note by Stantec, accompanying this Representation has considered the access to the site and found suitable access can be provided and is very achievable along with secondary emergency/cycle/pedestrian access through Sunnyside Gardens (over which our client has an existing legal right of access).</p> <p>A Technical Note by Herrington Consulting Limited (copy attached), confirms the site can be delivered in compliance with the requirements set out within the NPPF in terms of flood risk.</p> <p>In terms of delivery, it is noted that the Plan's trajectory for the 7 sites proposed to be allocated within Sandwich, does not expect any delivery to commence until Year 4 after Adoption of the Plan, with 1 commencing delivery in Year 6, one site in Year 7, one site in Year 8, two sites in Year 9 and one site not until year 13. These sites are available to be delivered within the first 5 years of the Plan and will avoid a delay in delivery of housing in Sandwich. These sites should be allocated for housing within the Local Plan.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	These sites were not considered by the Council after being submitted in the Council's 2021 Call for Sites. This omission, based on the fact the Council had previously considered a larger site area that was previously submitted and dismissed as suitable for a number of reasons, resulted in the Council failing to review the new smaller sites which could meet the requirements for allocation in this Plan. The Council have highlighted the fact they have found it difficult to find sites in Sandwich yet here are two suitable and available sites that have not been assessed even though submitted in the Call for Sites process.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Sandwich
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>A document cannot be considered sound, safe, or legally compliant if it contains information that is incorrect or false. This is particularly so if the incorrect or false information leads to changes to the policies, procedures, and outcomes detailed in the document.</p> <p>A document of this nature should be compiled objectively and dispassionately. This is clearly not the case with this document. It contains many minor omissions or additions which seem small in nature when viewed individually but collectively result in significant changes to the overall conclusion and result. It contains language that is clearly designed to sway opinion and influence a decision one way or another. But more importantly, it contains information that is clearly inaccurate.</p> <p>I can only speak to the sample of sites that I have examined in Sandwich, but in that small sample I have identified statements made within the document and indeed proceeding documents, that have caused fundamental changes to the allocations there, and in doing so have caused a knock-on effect in allocations in other parts of the district.</p> <p>It is likely that some of these mistakes are down to bureaucratic failings but this cannot be the case in all circumstances.</p> <p>If this is the case with Sandwich sites, it clearly must be true of other sites in the district.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>It is very hard to make the document legally compliant at this stage given that due to inaccurate statements, two of the sites SAN010 and SAN019 have been removed or partially removed from the local plan. It is particularly disappointing to see these sites removed when much of the evidence to refute the reasons for rejection is already in the hands of DDC, DDC was asked to revisit these two sites by Sandwich Town Council at the regulation 18 stage, and at that time DDC had the relevant information, via a successful planning application on part of SAN010 to show that the main reasons for rejecting these two sites were no longer valid. SAN010 planning reference 21/01309</p> <p>Statements related to Site SAP21 are, it would appear, also untrue. The Head Teacher at the school has informed local councilors that she had not been consulted on the expansion of the school. The manner in which the allocation was changed between the Regulation 18 and Regulation 19 stages, without consultation with the majority of the stakeholders being consulted or made aware is questionable, to say the least.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I wish to speak with the inspector to give oral evidence regarding the exclusion of site SAN010 and allow them to ask questions of me that might help them in the deliberations on this site

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>It would appear that the statements at 4.165 and 4.170 are incompatible.</p> <p>How can Sandwich have the biggest employment site within walking distance of the town centre and yet development in Sandwich should be compatible with the more limited range of job opportunities, shops, services, and other facilities available?</p> <p>It's almost as if DDC is doing its level best to prevent Sandwich from benefitting from Discovery Park, by limiting housing development in and around the town.</p> <p>Under the proposed plan for Sandwich, Dover District Council (DDC) appears not to be meeting its obligations as defined by local and national planning policies and also its own Strategic Rural Service Centres should be the main focus for development in the rural area.</p> <p>The proposed plan for Sandwich lacks adequate housing provision to enable the town to maintain and develop its position in the settlement hierarchy.</p> <p>The policy states:- the distribution of housing growth will therefore primarily be based on settlement hierarchy and influenced by site availability, environmental constraints and factors of delivery;. Growth should be proportionate to access to services, facilities and job opportunities, reducing the need to travel by car.</p> <p>The District plan relies heavily on developments within the outlying villages that Sandwich serves both as a Rural Service Centre and as an educational hub. In doing so, its actions are contrary to the National Planning Policy Framework (NPPF) and DDC policy DM 29</p> <p>The currently proposed development areas in Sandwich represent a piecemeal approach to town planning. They appear to be born from a misapplication of the sequential planning process and therefore present (continuously revisit) options that are less than ideal and that will have a detrimental impact on local residents and the environment within the town of Sandwich. This plan for Sandwich has the appearance of a box-ticking exercise on the part of DDC and the unfortunate residents of Sandwich will be left to deal with the consequences.</p> <p>The sites in close proximity to the town centre were rejected in the previous HELAA process and subsequent appeals process. There have been no significant changes that would alter the previous reasons for rejecting these sites. The reasons for rejection remain the same.</p> <p>The plan in its current form relies heavily on unsuitable plots that are either in close proximity to a monument (town walls) or are low-lying, suffer from poor drainage and are covered in standing water in the winter months (SAP20/SAN008, SAN023). Development of these two sites, in particular, would appear to go against policy DM6 and policy DM29</p> <p>The majority of the proposed sites impact heavily on the restricted road network within the town.</p> <p>Their development will increase the traffic load on specific, dangerous junctions and seriously reducing parking available to local residents. Contrary to policy DM29</p> <p>DDC states; A number of key considerations have been identified in relation to the proposed site allocations in Sandwich and these will need to be addressed by the relevant land owners as part of</p>

the planning process. Furthermore, there is considered to be sufficient scope to avoid or significantly mitigate the significant adverse effects identified through the SA on the sites here. However, It is likely that the mitigation will simply amount to the installation of permanent parking restrictions along the access routes as has been the case with SAN015 DDC appear not to have used the information gleaned from the previous HELAA (2010) process and as a consequence, some of the viewpoints are in complete contradiction to those previously stated.

The plan ignores the potential to develop SAN010 and SAN019, thus failing to ensure sufficient sustainable, housing provision for the future growth and success of the town of Sandwich and its residents.

The development of SAN010 and SAN019 may also encourage part of the adjacent fields to come forward at a later date, thus providing a continuous land supply for the future and ensuring that Sandwich maintains and develops its role within the district as a Rural Service Centre. Development of SAN019 SAN010 would also help reduce the continued pressure to develop unsuitable, detrimental sites within the confines of the town.

The reasons DDC have given for the exclusion of SAN010 and the majority of SAN019 are poorly evidenced, lacking in merit and often contrary to the opinions stated during the previous HELAA process. and at times contrary to the evidence available to DDC. Particularly that evidence which has become available for a successful planning application for housing on a portion of SAN010. DDC appear to have purposely overlooked the potential for SAN019 to open up access to future sites and instead presumed upon the future development of SAN024 when that land is unavailable and likely to remain so. In doing so DDC has restricted future housing provision and prejudiced the role of Sandwich as a Rural Service Centre within the district.

DDC appear to have misapplied the sequential planning process by considering sites that are closer to the town centre but not suitable and by rejecting the development of sites beyond those that are most desirable, but not available (SAN024).

DDC has tied in the development of SAN010 to SAN024 on the erroneous assumption that the future development of SAN024 cannot be facilitated without SAN010.

DDC has also sought to remove land previously allocated for the development of community, sports and leisure use and to change the allocation to an expansion of the adjacent school in order to accommodate children from areas of high housing growth. The residents of Sandwich should not have to lose this amenity in order to accommodate a need that occurs elsewhere

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Consider expanding housing provision on land to the S.W. of the town, which is outside areas of flood risk, thus allowing the town's shops and businesses to benefit from the extra footfall created by such developments. Sites SAN010 and SAN019

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Refer to supporting statement attached Text below (copied from attached statement) added by DDC <i>Alternative Options to Deliver the School Expansion</i> <i>3.5.8 Allied to the above, flexibility is also sought with regards to where the school extension land could be located, to optimise options for the school. For example, from discussions with the local land Agent, Catesby Estates is aware that the land to the south-east of the Site, could potentially be available. This land is visually contained by woodland and residential development. Residential development also continues to the west until it meets the playing fields of the school.</i> <i>3.5.9 As already mentioned, the school site is already constrained where it meets the Site boundary (SAP21) to the east because of the current building arrangements. Allowing the potential for the school to extend further to the south-west, could provide greater flexibility for the school expansion. For example, facilitating building on the associated sports pitches, which could then move further southwest.</i> <i>3.5.10 Greater flexibility should therefore be introduced to the policy to allow for alternative options for delivering the school extension, which could improve deliverability as well as potentially delivering better design outcomes for the school.</i>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Plan has not adequately considered all available sites within Sandwich
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance	This representation is submitted by Finn's on behalf of Mr A Binskin with regard to site reference SAN031. Paragraph 4.170 states that limited sites have been identified in Sandwich due to constraints, however this site on the edge of Sandwich lies close to the Secondary School and all services and facilities within Sandwich. Paragraph 3.45 states that 'it has been a challenge to identify suitable and available sites in Deal and Sandwich', yet this larger site has been dismissed with limited consideration as to its benefits.

<p>with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The site is in mixed use, with the majority of the site last used as a wildlife park and with 4 existing residential units on site. Much of the site is considered 'brownfield'. The site benefits from existing established access onto the A256 Dover Road at the Junction with Deal Road and currently the site benefits from 57 marked out parking spaces.</p> <p>A draft site layout has shown 45 units as an indicative layout with an area of retained open space provision, however it is considered that the site is capable of accommodating 50 well designed units with suitable gardens, parking and open space provision.</p> <p>Direct access from Dover Road via foot or cycle allows easy access into Sandwich core. Pavements can be provided to both sides of Dover Road to the west of the site's entrance and improvement to the existing traffic island to provide a safe crossing point and additional work would be undertaken on this matter.</p> <p>This site offers the provision of some 50 units, on land in a single ownership with existing commercial access, well screened and landscaped and lying at the edge of Sandwich, close to a good range of amenities.</p> <p>In terms of delivery of the area proposed to be allocated under SAN031, this site is available and in single ownership and would be delivered within the first 5 years of the Plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. <p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	<p>SAP18</p>
<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Positively prepared Justified Effective Consistent with National Policy</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>Not Applicable</p>

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We object to the allocation of the site:</p> <ul style="list-style-type: none"> • The NPPF 155 states that 'Inappropriate development in areas at risk of flooding should be avoided ...'. The site is in flood zones 2 and 3. The site is subject to flooding and would therefore pose a considerable risk. A key consideration set out in the policy is that a sequential test and flood risk assessment is required. This should be undertaken before taking the decision to allocate the site. • The site is given orange status and the overall landscape summary in HELAA Appendix 3A and the overall landscape summary is: The development of this site would have an impact on the landscape and further assessment is required to demonstrate whether this can be mitigated. • HELAA Appendix 3B gives the site orange status as 'Highways concerns have been identified in relation to access and/or highway impact and further assessment is required to demonstrate whether this can be mitigated.' • Concerned that the scale of development proposed for Sandwich will have a detrimental impact on the Historic town with its narrow roads. • There is insufficient infrastructure to support the scale of development proposed for Sandwich.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	CPRE Kent would wish to participate at the examination hearings to explore these issues further.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Hume Planning. Full Representation attached to SDLP1502. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1502.)</p> <p>Dover Regulation 19 Consultation: Whitefriars, Sandwich: HEELA Ref. SAN014 We write to you on behalf of our client, Easton Builders Ltd, in relation to the Dover District Council Regulation 19 consultation on its Local Plan. Our client owns the site at Whitefriars in Sandwich town centre, HEELA site ref. 014. The extent of the site is shown on the plan below and at Appendix 3:</p> <p>This site is not included as an allocation within the Pre-Submission version of the Local Plan. We are writing to object to its omission. For the reasons set out below we consider it is a suitable and available site to help deliver housing to Sandwich, one of two rural service centres in the district.</p> <p>Site Description The site comprises a roughly triangular shaped, grass and scrub parcel of land of approximately 0.29 hectares. The topography is generally flat, with slightly sloping terrain along the southern boundary. The site is fenced and not open to public use and represents an underutilised are currently overgrown parcel of land directly adjoining the central marketplace car park of Sandwich where there has been recent expansion of the surgery.</p> <p>The site is bounded by two footpaths, The Ropewalk to the south and Fellowship Walk to the west of the Site. Whilst there are trees and landscaping to the north and north easterly boundaries, the rear elevations of 1980's housing fronting Whitefriars Meadow provides a sense of enclosure, separates the site from the surrounding development and limits views into the site. This view from the south could be improved with the siting of high-quality built form on part of the site and the landscaping of public open space that could be created over a significant proportion of the site as outlined in the currently undetermined application before Dover DC (LPA Ref DOV/21/1604). It is relevant that from the consultation response of Historic England to this application that it is accepted that such a proposal could deliver a heritage benefit (please refer to Appendix 2). To the south the site is bounded by tall, evenly spaced trees along The Ropewalk many of which are elevated in relation to the site. A wooden fence sits at the northern boundary, separating the Site with the gardens of houses along Whitefriars Meadow. The site adjoins the largest public car park in Sandwich and is one of the closest land development opportunities to central Sandwich and therefore offers the opportunity for a car free development including specialist age related housing.</p> <p>It is recognised that there are a number of heritage designations which affect the site. The site is located within Sandwich Walled Town Conservation Area and a small section of the listed Town Wall is located along the south-eastern boundary of the site (Boundary walling midway along the rope walk between Woodnesborough Road and New Street, Rope Walk (Grade II). The New Gate to Woodnesborough Gate Town Wall (Scheduled Monument) runs to the south of the site. In addition, there are a large number of designated heritage assets along Moat Sole, New Street and The Chain and the surrounding area.</p> <p>Historically, the site formed the south-western part of the Priory of White Friars. There are no extant remains of the priory. It is noteworthy that Historic England acknowledge the potential for the sensitive development of the site to deliver heritage benefits.</p> <p>Suitability of the Site</p>

The site is a highly sustainable site. is located within the settlement confines of Sandwich, and is located on the edge of Sandwich town centre as defined by the NPPF (i.e. within 300 metres of the primary shopping area). Sandwich railway station, providing regular services to London and Dover, Ramsgate and Canterbury is within 500 metres from the site.

We note the HEELA assesses the suitability of this site for 9 residential units and concludes that the site is not suitable for allocation. Reasons for this include heritage impacts (although this directly conflicts with the statutory consultee comments of Historic England attached at Appendix 1), flood risk issues, landscape impact and access. We deal with each in turn. Heritage considerations

First, referring to heritage impacts. It is recognised that there are heritage considerations in terms of redeveloping the site and these would need to be considered carefully. However, it is not considered that this precludes the site from being suitable for residential development. Our client has considered this matter carefully, and has appointed Icen Heritage to prepare a Heritage and Visual Impact Assessment (October 2021) which looks at the potential impact on the heritage assets through the redevelopment of an indicative scheme providing ten apartments (Please refer to Appendix 2). The assessment concludes that the overall effect of the proposed development is considered to make a positive contribution to the local character; in part due to the fact that the existing site detracts from the character of the conservation area. The assessed scheme promotes high quality design and sustainable development at this location, finding the optimal viable use for the site and in heritage terms should be considered appropriate. The proposed development is judged to comply with the policies set out in the NPPF and as, the development is considered wholly acceptable in heritage terms. In fact, it would help deliver the council's objectives for Sandwich, which is to, amongst other things, conserve and enhance the town's rich historic environment (LP Para. 4.169).

The consultation response of Historic England at Appendix 2 confirms it is happy with the conclusions of the assessment, and that subject to a well-designed scheme, the redevelopment of this site could make a positive contribution to the local area.

Accordingly, we think it is incorrect to not include the site on heritage grounds.

Flood Risk

With regard to flood risk, we note the site is located within Flood Zone 3; this is the case for a large swathe of the settlement in this location. The methodology applied to the HEELA confirms that sites for residential development are only considered acceptable for development when in flood Zone 3 if they are highly sustainable. For the reasons set out above, this site, which is located in the centre of the settlement confines and within easy walking distance from the town centre and railway station, is one of the most sustainable land use opportunities that is readily available and can deliver heritage benefits, a conclusion that has been independently accepted by Historic England. It does not appear consistent therefore that this site has been ruled out from the HEELA process on flood risk grounds. Two sites within Sandwich are currently allocated within the Plan (SAP 18 and SAP 20) and are both located within Flood Zone 3 and these are not considered more sustainable than this site. It is considered a site allocation policy can be appropriately worded to ensure the development is acceptable in flood risk terms.

Access

We confirm that access can be provided into the site from Whitefriars Meadow. Our client owns sufficient land to facilitate and deliver this, although given the central location and the sites sustainable credentials it is also considered a car free development is appropriate.

SP3: Housing Growth

(DDC Note: Please note this section has been DUPLICATED against SP3)

Whilst we welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period, it is considered additional sites if suitable and available should be included within the Plan. A large proportion of growth is being directed towards the new settlement at Whitfield (over 2,000), and with large strategic sites delivery rates can easily slow down during the plan period and under-deliver. Whilst there is a buffer within the Plan, it is considered appropriate not use this as a limit, and allocate other suitable sites in sustainable locations where available.

In this respect, it is noted that Sandwich sits towards the top of the settlement hierarchy, alongside Aylesham, as a rural service centre. Only Deal, Dover/ Whitfield sit above. Yet, due to the constraints in Sandwich, only 227 units are being allocated in this settlement compared to over 600 in Aylesham.

As detailed above, land at Whitefriars, HEELA site SAN014 is considered suitable for residential development. It is also available and can be delivered within the short to medium term, and in our view this site should be allocated within the Plan.

Concluding Remarks

Hume Planning Consultancy welcomes the opportunity to comment on this stage of the Council's Pre-Submission Local Plan and would like to reserve the right to attend the Examination in Public in due course to discuss potential development sites in Sandwich.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP17 Land South of Stonar Lake (SAN004)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This site SAP 17 - Land south of Stonar Lake and to north and east of Stonar Gardens, Stonar Road, Sandwich (SAN004)</p> <p>This is a new application on land that is currently designated employment land. DDC has already highlighted the lack of employment opportunities within the town (Pg141. 4.170) and a housing development on this site will serve to further erode those employment opportunities. Development of this site would appear to go against The National Planning Policy Framework (NPPF) and DDC policies DM6 and DM29</p> <p>The NPPF states that inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at the highest risk (whether existing or future).</p> <p>Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere. Given this, there is a need to reduce the risk from coastal change by avoiding inappropriate development in vulnerable areas.</p> <p>This site should be retained and developed for employment use. The desire to tidy up a site; (Pg 143 4.176), should not be used as an excuse to convert a site to housing use. If designed correctly, a new development for employment purposes could achieve that aim just as easily.</p> <p>Employment use would be much less susceptible to flood damage.</p> <p>The statement at 4.174. appears to be deliberately misleading. The majority of the site cannot be in flood zone 2 if half is in flood zone 3.</p>

	<p>These extracts from the SFRA are particularly relevant to this site. Strategic flood risk assesment 1.5.5. Impacts of Climate Change on the District</p> <p>The Environment Agency Flood Zone maps are based on current-day sea levels and climate conditions. However, these maps do not take into consideration the impact of climate change. The majority of the district to the south is located on higher ground and therefore, for the coastal areas the impact of climate change will be comparatively small. However, in the northeast of the district, the impact will be more pronounced due to the relatively flat topography of the low-lying land.</p> <p>Furthermore, the River Stour is tidally influenced throughout the entire district and thus, an increase in sea level would also result in a larger area further inland being at risk of flooding.</p> <p>Policy SP1j would seem to suggest that if land outside of areas at risk of flooding is available, then that land should be developed in preference (sequentially) to land risk from flooding, and only when risk free land is unavailable, should land at risk from flooding be developed.</p> <p>Given that this site falls entirely within flood zones 2 and 3 and it is very close to areas of previous flooding (2013) and close to the River Stour, which the SFA has identified as a major risk to flooding it would appear likely that unless the local authority has very strong evidence to support the exclusion of SAN019 together with SAN 010 it would appear the site will fail the sequential test for flood risk</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Exclude this site from housing development. Retain its use for employment which is much less susceptible to flood risk.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP24, SAP25, SAP26, SAP27, SAP17, SAP18
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Road infrastructure will not sustain the extra housing in the area. B2046 already had a fatality in 2022, and several big accidents where it is joined by Spinney Lane, Dorman Avenue North, and the Industrial Estate. B2046 regularly closed at Wingham end causing tailbacks with queues of traffic polluting the atmosphere. Diversions through country lanes happen several times a year and cause damage to local flora and fauna on the one track country lanes leading to local towns.</p> <p>B2046 already being used by heavier lorries which are causing crumbling to the verges.</p> <p>There is no secondary school in the area so children have to travel to Dover, Sandwich and Canterbury. Bus services have recently been curtailed resulting in overcrowding, and young vulnerable children being left stranded waiting an hour or more for the next bus, or having to be collected when parents finish work.</p> <p>Train services are sporadic and the current amount of secondary school age children in the area cannot be allocated local school places.</p> <p>Sewerage, gas, broadband are nearing capacity, with regular broadband outages and lack of any FFTP in the area with the current number of houses.</p> <p>Dorman Avenue building work is still not complete, and within that plan there was provision for extra shops. Current shops are high cost and low volume, thus travel 10-15 miles to nearest superstore means more vehicles on inadequate roads.</p> <p>Local doctor's surgeries are also at capacity and many wait weeks for appointments. The local hospitals have been at bed capacity for months, with people waiting in A&E for beds overnight, sometimes for 48 hours before being treated, or going for surgery.</p> <p>The Ukraine war has shown that greenfield areas are much needed for crops so that the UK can be self-sufficient rather than relying on imports. Many local farmers have increased crop harvesting already.</p> <p>The Covid-19 pandemic has resulted in increased mental health issues, and the spread of the virus has been shown to increase in more densely housed areas, where there are limited garden spaces to breathe fresh air and exercise. Along with limited parking causing problems in the recent estates at Dorman Avenue, and assuming an extra minimum of 1 car per household the increase of cars especially at peak times on the B2046 will cause more accidents and hold ups.</p> <p>For those travelling to Sandwich or Thanet, the A257 is inadequate in terms of the junctions leading onto it. Already fatalities and severe accidents involving the use of air ambulances this year deem this road unsuitable for the current traffic levels. The Sandwich area developments will cause more disruption on these junctions, and the increase to delays on this road will cause more traffic pollution.</p> <p>The new Canterbury City Council plan has not been discussed with DDC and thus contravenes the Duty To Co-operate with both councils. Together with 640 houses in Aylesham, 3200 in the adjoining Cooting Farm Town, and another 500-800 also in close proximity, the infrastructure and the amenities cannot cope with these plans.</p> <p>The Government has recently abolished the 300,000 new homes for the next year and that was the figure on which this plan was based</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	<p>Government has just rescinded the 300,000 new housing level, and the levels in these plans need to be modified, meaning an urgent review of this plan should be commenced.</p> <p>Lack of consultation with CCC on their forthcoming plan including Cooting Farm Town which abuts the B2046 shows failure in Duty to Co-operate with neighbouring areas, and thus this plan should be put on hold with both councils meeting to discuss both plans and redesign a way forward</p>

<p>matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>that benefits both councils. The area cannot sustain either at present and with no discussions both plans have been launched at similar times without knowledge.</p> <p>Highways involvement in terms of upgrading the B2046, straightening the blind bends, installing roundabouts at dangerous junctions, plus the dualling of the A257 before the Sandwich housing areas are finalised, must take place. Both roads have had fatalities this year, and with a doubling of housing in the surrounding area, the road state must be revisited.</p> <p>Local fauna relies on corridors away from businesses and housing and these have already been narrowed by previous recent housing in Dorman Avenue. Rare red kites, bats, and more nest and live in the area and these must be preserved, not eradicated by housing.</p> <p>A secondary school is required in the area, travel to and from other schools with inadequate/extortionate price bus and train services has to be revisited before considering the increase in housing.</p> <p>Local shops need to be varied and increased before any more housing. With only one Post Office in five local villages, the post office in Aylesham is already over-used and other village amenities and infrastructure must be revisited.</p> <p>FFTP broadband is essential now with over-use and will be impossible with new housing levels, The Government agrees to supply broadband to low income households, instead this will get worse.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP17
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Yes</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The following should be considered:</p> <p>Access via Ramsgate Road or Stonar Road requires highway audit and consideration.</p> <p>As this site has been vacant for some time consideration and potential relocation must be given to wildlife who may have taken up residence.</p> <p>Where a site adjoins a watercourse, the watercourse is maintained in its entirety and that only one access/egress can be made across it.</p> <p>Where a site contains mature, healthy trees or hedging that these are to be retained in all cases.</p> <p>Heavy traffic usage requires consideration as this is main access from Thanet and Discovery Park across the Toll Bridge into the town.</p> <p>Consideration must be given to pedestrians crossing the Toll Bridge into the town.</p> <p>Consideration must be given to the temporary impact of construction noise and vibrations on wildlife at Monks Wall Nature Reserve.</p> <p>Full archaeological surveys (not desktop ones done in Maidstone) are carried out on all sites and buildings within or the surrounding area.</p> <p>All new residential properties must have vehicle electrical charging points which will be necessary by law from 2030.</p> <p>Where a site removes or displaces any on street parking that the loss of parking is made up by additional parking spaces on the site.</p> <p>All properties are to be 50-year flood risk compliant as recommended in the NPPF.</p> <p>All access roads are to be adopted by the County's Highway Authority, so that they are maintained accordingly and there are no rights of dispute.</p> <p>All sites to accommodate full fibre communications cabling to allow for super speed internet access to support economic and home working applications.</p> <p>All sites to include drop down curbing allowing adequate accessibility for persons with disabilities or limited lack of mobility.</p> <p>Any additional street lighting shall be unobtrusive, set so as not to cause irritation to neighbouring properties and in the town centre should be of a heritage style to match existing light standards.</p> <p>Sites over 40 units should provide adequate road junction improvements to allow large scale traffic flows to move into and out of the sites without impacting on existing traffic flows.</p> <p>All sites must have adequate accessibility made for pedestrian and cyclist travel preference to protect and support alternative travel to motorised vehicles.</p> <p>Suitable screening provision should be introduced to shield all new development from existing neighbouring residents and in particular where a site is adjacent to an AONB or historic recognition.</p> <p>Section 106 funding should be directed towards improving and updating existing essential services such as doctors, dentists, schools, libraries, toilets, play areas and public recreation. A master plan of Sandwich must be undertaken to ensure that there isn't a cumulative detrimental impact on the town resulting from piecemeal developments.</p> <p>Of the requirement for affordable housing, 65% of this should be rental accommodation, social or council houses. And this should be monitored for compliance. A Design Code for Sandwich should be undertaken.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The following should be considered: Access via Ramsgate Road or Stonar Road requires highway audit and consideration. As this site has been vacant for some time consideration and potential relocation must be given to wildlife who may have taken up residence. Where a site adjoins a watercourse, the watercourse is maintained in its entirety and that only one access/egress can be made across it. Where a site contains mature, healthy trees or hedging that these are to be retained in all cases. Heavy traffic usage requires consideration as this is main access from Thanet and Discovery Park across the Toll Bridge into the town. Consideration must be given to pedestrians crossing the Toll Bridge into the town. Consideration must be given to the temporary impact of construction noise and vibrations on wildlife at Monks Wall Nature Reserve. Full archaeological surveys (not desktop ones done in Maidstone) are carried out on all sites and buildings within or the surrounding area. All new residential properties must have vehicle electrical charging points which will be necessary by law from 2030. Where a site removes or displaces any on street parking that the loss of parking is made up by additional parking spaces on the site. All properties are to be 50-year flood risk compliant as recommended in the NPPF. All access roads are to be adopted by the County's Highway Authority, so that they are maintained accordingly and there are no rights of dispute. All sites to accommodate full fibre communications cabling to allow for super speed internet access to support economic and home working applications. All sites to include drop down curbing allowing adequate accessibility for persons with disabilities or limited lack of mobility</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP17
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We have reviewed the new sites for housing allocation included in the Reg 19 Submission Summary of Site Allocations and would draw your attention to 3 of these sites that lie within FZ3: Northwall Road & Ethelbert Road, Deal Stonar Close, Sandwich</p> <p>These site lie within Flood Zone 3a; this is an area considered to be at 'high risk' from flooding in the absence of tidal defences. Whilst we appreciate that both Sandwich and Deal are well defended from tidal flooding, there is always a 'residual' risk from inundation in such areas. Accordingly, we would request that your Authority initially considers whether these sites suitably address the requirements of the flood risk Sequential Test before allocating them in the local plan.</p> <p>The updated PPG to the NPPF places more emphasis on residual risk; therefore when considering these allocations it should be understood that in order for development to be made safe, it is likely that the ground floor would not be suitable for any form of living accommodation. Detailed design would be subject to a site-specific FRA but given the potential depths of flooding in the event of failure or breach of defences, development is unlikely to meet the requirements of Policy CC5 or the Exception Test, unless all living and sleeping accommodation is set at first floor or above. If this is would be unacceptable to the LPA, then these sites should not be allocated.</p> <p><i>(DDC note - This is an extract from the full Environment Agency representation SDLP1458)</i></p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Full Representation attached to SDLP1851. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1851.) Dover District Local Plan to 2040: Regulation 19 Submission October 2022 Representations on behalf of Ramac Holdings (Trading) Ltd 1. These representations are made on behalf of Ramac Holdings (Trading) Ltd to Dover District

Council's consultation on its draft Local Plan ("the LP") under Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012.

2. Ramac Holdings is the owner of land south of Stonar Lake and to the north and east of Stonar Gardens, Stonar Road, Sandwich ("the Stonar Site"), which is allocated for residential development by Policy SAP17 of the LP.

3. Ramac Holdings is supportive of Policy SAP17 as a sound basis to enable the sensitive heritage and recreation led regeneration of the Stonar Site, which would make use of previously developed land and deliver major public benefits.

The Stonar Site

4. The Stonar Site comprises approximately 3.5 hectares of previously developed land, located adjacent to Stonar Lake (also owned by Ramac Holdings) – a highly accessible location within walking and cycling distance of many services and facilities in Sandwich town centre. The Stonar Site is identified by the proposals map of the LP with a relevant extract at Appendix A; and a detailed aerial photo is provided at Appendix B.

5. Part of the Stonar Site is also designated a scheduled monument, which may or may not contain buried archaeology relating to the lost medieval town and port of Stonar. The extent of the scheduled monument is shown on the drawing at Appendix C, which covers the central and eastern part of the Stonar Site but not the western part adjacent to Ramsgate Road.

6. The scheduled monument is unusual as its designation encompasses an existing industrial area comprising numerous buildings and extensive areas of hardstanding, accommodating a range of commercial uses.

7. These buildings require investment and renewal to prevent further deterioration, as the industrial area is already detracting from the character / amenities of Sandwich and the wider area.

Archaeological Assessment

8. Much is known about the scheduled monument at Stonar through archaeological assessment work carried out by Canterbury Archaeological Trust for Ramac Holdings. This work comprises two parts – 'Part 1: Overview and Proposals for Archaeological Evaluation Work' (Appendix D) and 'Part 2: Detailed Evidence Base' (Appendix E).

9. The archaeological assessment has been provided to Historic England through its formal 'extended pre-application service' with this engagement ongoing.

10. The 'Part 1: Overview and Proposals for Archaeological Evaluation Work' presents that:

- it is recognised the archaeological site of Stonar is an important heritage asset both locally and nationally. Accordingly, any development on the site is being carefully considered to have minimal impact on any buried archaeology and to enhance the amenity value of the site more generally;

- to have a minimal impact on any buried archaeology, the footprint of existing buildings and hardstandings would be utilised and / or development would be located outside the scheduled monument in the western part of the site adjacent to Ramsgate Road;

- development would deliver very significant public benefits including to enhance the amenity value of the site. These benefits include:

- the above ground clearance of about three quarters of the scheduled monument and the creation of an open grassed landscape with public access;

- this open landscape would allow a far greater understanding and interpretation of the scheduled monument compared to its current industrial use;

- heritage focused improvements would be provided, including a heritage trail; a series of noticeboards informing visitors about various aspects of the history of the area; and a landscape design that could reflect and interpret what may have historically stood on the site;

- opening up the scheduled monument in this way would provide new lake-side

public greenspace with amenity, health and wellbeing benefits for existing and future residents alike. It would also help reconnect the existing historic centre of Sandwich with Stonar Lake and the scheduled monument, helping increase general awareness and understanding of the town's ancient heritage;

- without seizing this sensitive development opportunity, the Stonar Site will continue to decline as an aging industrial estate and increasingly detract from the northern setting of Sandwich;

- for an even greater understanding of the heritage impacts of the development proposals, a programme of archaeological investigation work is identified – with an area shown at Figure 2 for evaluation trenching along with a borehole transect and test pitting at the location of existing buildings.

11. An illustrative arrangement of how replacement development across the Stonar Site could be sensitively achieved is contained in the 'Part 1: Overview and Proposals for Archaeological Evaluation Work' and provided at Appendix F. This shows the sensitive replacement of buildings on the Stonar Site, with replacement development on four parcels:

- the site of Stonar House (Parcel A)
- the site of buildings fronting Stonar Road (Parcel B)
- the site of a large industrial building to the east (Parcel C)
- the buildings and yard to the north of Parcel B (Parcel D)

12. The site of nineteenth century Stonar House (Parcel A) is now a ruin that incorporates a cellar or basement. The building on Parcel B is a late twentieth century industrial block partially terraced into the rising ground to the north. The building on Parcel C is another late twentieth century warehouse block, covering about 60 metres x 35 metres. At Parcel D, a concrete yard area supports a number of buildings.

13. The archaeological assessment considers that all these structures may have caused some damage to any below-ground archaeology.

14. For the replacement buildings, foundation design is being carefully considered so as to cause minimal below-ground disturbance. Limited piles supporting shallow concrete rafts would be utilised (see detail at Appendix G). The general approach is for the replacement buildings to not have a materially greater impact than that of the existing development within the scheduled area.

15. The 'Part 2: Detailed Evidence Base' is a very detailed document presenting a comprehensive evidence base of what is known about the Stonar Scheduled Monument, which has informed the approach in Part 1.

16. Ramac Holdings is committed to continuing engagement with Historic England to investigate what archaeological remains may or may not exist on the Stonar Site and to understand what any impact of redeveloping the existing buildings would be.

17. It is important to note that a significant part of the Stonar Site, closest to Ramsgate Road, lies outside the scheduled monument. Therefore even if further archaeological assessment rules out the replacement of existing buildings within the scheduled monument, other development is still deliverable, as the illustrative layout at Appendix F highlights.

Flood Risk

18. The central part of the Stonar Site is in flood zone 1, whilst other areas benefit from flood defence infrastructure that was constructed as part of the Sandwich Tidal Defence Scheme. This was recently completed in 2018 and is capable of being maintained and upgraded as necessary in the future.

19. The Council is satisfied that the Stonar Site passes a sequential, risk based approach (as per paragraph 161 of the National Planning Policy Framework "the Framework") in the LP allocating it for residential development. This is unsurprising given its accessibility to services and facilities in Sandwich and the extent of other constraint across the District that severely limit other locations for development.

20. In respect of the Framework Exceptions Test (paragraph 160), a Technical Flood Risk Scoping

Assessment (March 2021) ("the FRSA") has been prepared by Herrington Consulting (Appendix H).

21. The FRSA sets out that for the Exceptions Test to be passed, it should be demonstrated (in accordance with paragraph 164 of the Framework) that:

- "a) the development would provide wider sustainability benefits to the community that outweigh the flood risk; and
- b) the development will be safe for its lifetime taking account of the vulnerability of its users, without increasing flood risk elsewhere, and, where possible, will reduce flood risk overall."

22. For a) above, the wider sustainability benefits are those identified by these representations at paragraph 10 above and 25 below, and present a clear balance in support of the regeneration of the Stonar Site.

23. For b), the FRSA explains how the identified flood risk would be mitigated based on a worst case scenario should the existing flood defences not be upgraded in the future. These mitigation measures include:

- locating more vulnerable functions of each building (i.e. bedrooms) on upper floors;
- raising the floor level of each building above the modelled flood level;
- raising the land level on all or part of the Stonar Site, as has been successfully incorporated for the Willowbank development (which is feasible as the source of flooding is tidal, so the displacement of floodwater by land raising is not an issue); and
- incorporating flood resilience measures.

24. This would ensure that development on the Stonar Site would be safe for its lifetime, would not increase flood risk elsewhere, and where possible would reduce flood risk overall. The FRSA concludes (paragraph 6.7) that:

"the findings of this report provide evidence to demonstrate that if the site is allocated for heritage and recreation led residential development in the DDC Local Plan, it is possible to design a scheme which is compliant with the requirements of the NPPF and Part B of the Exceptions Test."

Benefits and Sustainable Objectives

25. The heritage and recreation led regeneration of the Stonar Site would help deliver a number of important objectives set out at paragraph 2.2 of the LP as well as those promoted by the Framework. Development would:

- enhance the heritage value of the Stonar Site, to positively promote the former medieval port of Stonar as a part of the heritage offer of the District, working with Historic England for this to be achieved in a manner that is appropriate to its significance;
- enhance the asset of Stonar Lake, as part of the District's waterside environment, through the provision of new public open space to allow it to be experienced and valued by residents and visitors, whilst currently there is only private access;
- be focussed in an accessible and sustainable location, which would utilise existing infrastructure and facilities and services, and contribute to the sustainability of local communities;
- support the regeneration and reuse of previously developed land, working with its heritage constraints;
- create an attractive, inclusive and healthy place which would promote the distinctive character and history of Sandwich;
- provide new and improved community infrastructure as open space to help meet the needs of local communities; and
- provide market and affordable homes to meet local need and boost supply.

26. The regeneration of the Stonar Site would accord with specific policies of the emerging Local Plan, including:

	<ul style="list-style-type: none"> • Policy SP3 (Housing Growth), which identifies Sandwich as a sustainable location of development; and • Policy PM3 (Providing Open Space), which supports development that would provide new public open space. <p>27. Against the heritage policies in the LP, the objectives of Policy HE1 (Designated and Non-Designated Heritage Assets) including to encourage an appropriate and viable use of redundant or under-used buildings or areas, and Policy HE3 (Archaeology) to protect and where possible enhance the integrity of scheduled monuments, are noted. Allocation Policy SAP17 is consistent with this positive approach to preserving the district's heritage whilst recognising the policy and legislative protection afforded to the Stonar Site.</p> <p>Conclusions</p> <p>28. In order to facilitate to the regeneration of a deteriorating industrial site, Policy SAP17 is an appropriate and justified approach. Alongside new homes, such development would deliver a significant area of public open space in a waterside location and measures to better interpret the heritage significance of the Stonar Site, as substantial public benefits.</p> <p>29. Importantly Policy SAP17 is also justified and consistent with national policy in respect of ensuring the heritage designation and constraints of the Stonar Site are fully understood and inform the extent / arrangement of a future scheme. Policy SAP17 correctly puts the heritage of the Stonar Site first, but making positive provision to allow its regeneration and associated benefits.</p> <p>30. Delivery on the Stonar Site would happen in the next five to 10 years - there are no leases to existing businesses beyond 2027 that do not include redevelopment clauses to enable premises to be vacated.</p> <p>31. Overall Policy SAP17 is considered sound against the tests of the Framework. Without such sensitive development to seize this opportunity, the Stonar Site will continue to decline as an aging industrial estate and continue to detract from the northern setting of Sandwich.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP18 (SAN006)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Whilst this policy may be legally sound it does not take account of the opportunity that this site represents. Reference is made to the type of nearby housing suggesting that more of the same will do.</p> <p>The site is located close to the conservation area with its high housing density.</p> <p>It is visible from an important entrance road into the town and is therefore an opportunity to make a statement about the town.</p> <p>It is close to an infant school making it suitable especially for young families.</p> <p>It is close to ample safe green spaces</p> <p>Public transport links are good.</p> <p>The nature of its current use means that there are many vehicle movements in and out of the site on a daily basis.</p> <p>There is an opportunity to include public parking on this site to relieve pressure elsewhere or to allow alternative use to be made of some of the existing parking on the Quayside.</p> <p>It appears to be owned by KCC and the type of development could be dictated when it is sold.</p> <p>Whilst the development description refers to relevant local policies etc etc there is no positive approach looking at the unique opportunities this site has to accommodate more than 'cookie cutter', pseudo 'vernacular' housing in an estate development. Sandwich needs an exemplary development of national significance. Sandwich is renowned because in its hey day it was a town of national and international importance and this is reflected in the style of its (albeit ancient) architecture. A positive policy preparation would take these things into account and I have suggested some changes below, though probably not in the language which would be appropriate to the document.</p>

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The 32 dwellings provided shall be principally one and two bedroom 'starter' homes for rent or part buy, part rent.</p> <p>The density of habitable rooms per acre shall not be less than that achieved in 3 or 4 storey buildings of medieval Sandwich. Dwellings should be arranged in blocks with shared access to communal space (which may include part of the cricket pitch surround).</p> <p>Private outdoor space should be the minimum to comply with local codes.</p> <p>The development should achieve the highest standards in terms of contemporary and sustainable design.</p> <p>Pedestrian links to the town centre must be reinforced.</p> <p>Other than disabled spaces, allocated parking should not be provided. Parking on the site should be public parking with permits obtainable as elsewhere in Sandwich.</p> <p>Landscaping of the site should focus on combining communal and parking spaces to provide an attractive open area well connected to the adjoining green spaces.</p> <p>These suggestions tackle some issues faced in Sandwich ie lack of suitable affordable housing lack of public parking and poor connectivity between new developments,existing residential and parking areas and the town centre. This represents a more sound policy than the regulation 19 draft which takes account of none of these.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I would welcome the opportunity to present the proposed changes in more detail. I am not a planning professional but feel that as drafted the plan does not invite anything other than a fenced-in dead end estate of executive homes with cars parked over the gardens . I live close by, hence my particular interest.</p>

<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Justified Effective Consistent with National Policy</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>No</p>

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>There have been no significant changes that would alter the reasons for rejecting this site in the previous Land Allocation exercise (2013) exercise and the subsequent appeals process. The reasons for rejection remain the same.</p> <p>This site is situated on land at potential risk of flooding in the future</p> <p>.Policy SP1j would seem to suggest that if land outside of areas at risk of flooding is available, then that land should be developed in preference (sequentially) to land risk from flooding, and only when risk free land is unavailable, should land at risk from flooding be developed.</p> <p>Given that this site falls entirely within flood zones 2 and 3 and it is very close to areas of previous flooding (2013) and close to the River Stour, which the SFA has identified as a major risk to flooding it would appear likely that unless the local authority has very strong evidence to support the exclusion of SAN019 together with SAN 010 it would appear the site will fail the sequential test.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Reconsider sites SAN010 and SAN019. taking cognisance of the new information available through the successful planning application on part of SAN010
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Road infrastructure will not sustain the extra housing in the area. B2046 already had a fatality in 2022, and several big accidents where it is joined by Spinney Lane, Dorman Avenue North, and the Industrial Estate. B2046 regularly closed at Wingham end causing tailbacks with queues of traffic polluting the atmosphere. Diversions through country lanes happen several times a year and cause damage to local flora and fauna on the one track country lanes leading to local towns.</p> <p>B2046 already being used by heavier lorries which are causing crumbling to the verges.</p> <p>There is no secondary school in the area so children have to travel to Dover, Sandwich and Canterbury. Bus services have recently been curtailed resulting in overcrowding, and young vulnerable children being left stranded waiting an hour or more for the next bus, or having to be collected when parents finish work.</p> <p>Train services are sporadic and the current amount of secondary school age children in the area cannot be allocated local school places.</p> <p>Sewerage, gas, broadband are nearing capacity, with regular broadband outages and lack of any FFTP in the area with the current number of houses.</p> <p>Dorman Avenue building work is still not complete, and within that plan there was provision for extra shops. Current shops are high cost and low volume, thus travel 10-15 miles to nearest superstore means more vehicles on inadequate roads.</p> <p>Local doctor's surgeries are also at capacity and many wait weeks for appointments. The local hospitals have been at bed capacity for months, with people waiting in A&E for beds overnight, sometimes for 48 hours before being treated, or going for surgery.</p> <p>The Ukraine war has shown that greenfield areas are much needed for crops so that the UK can be self-sufficient rather than relying on imports. Many local farmers have increased crop harvesting already.</p> <p>The Covid-19 pandemic has resulted in increased mental health issues, and the spread of the virus has been shown to increase in more densely housed areas, where there are limited garden spaces to breathe fresh air and exercise. Along with limited parking causing problems in the recent estates at Dorman Avenue, and assuming an extra minimum of 1 car per household the increase of cars especially at peak times on the B2046 will cause more accidents and hold ups.</p> <p>For those travelling to Sandwich or Thanet, the A257 is inadequate in terms of the junctions leading onto it. Already fatalities and severe accidents involving the use of air ambulances this year deem this road unsuitable for the current traffic levels. The Sandwich area developments will cause more disruption on these junctions, and the increase to delays on this road will cause more traffic pollution.</p> <p>The new Canterbury City Council plan has not been discussed with DDC and thus contravenes the Duty To Co-operate with both councils. Together with 640 houses in Aylesham, 3200 in the adjoining Cooting Farm Town, and another 500-800 also in close proximity, the infrastructure and the amenities cannot cope with these plans.</p> <p>The Government has recently abolished the 300,000 new homes for the next year and that was the figure on which this plan was based</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	<p>Government has just rescinded the 300,000 new housing level, and the levels in these plans need to be modified, meaning an urgent review of this plan should be commenced.</p> <p>Lack of consultation with CCC on their forthcoming plan including Cooting Farm Town which abuts the B2046 shows failure in Duty to Co-operate with neighbouring areas, and thus this plan should be put on hold with both councils meeting to discuss both plans and redesign a way forward that benefits both councils. The area cannot sustain either at present and with no discussions both plans have been launched at similar times without knowledge.</p> <p>Highways involvement in terms of upgrading the B2046, straightening the blind bends, installing roundabouts at dangerous junctions, plus the dualing of the A257 before the Sandwich housing areas are finalised, must take place. Both roads have had fatalities this year, and with a doubling of housing in the surrounding area, the road state must be revisited.</p>

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Local fauna relies on corridors away from businesses and housing and these have already been narrowed by previous recent housing in Dorman Avenue. Rare red kites, bats, and more nest and live in the area and these must be preserved, not eradicated by housing. A secondary school is required in the area, travel to and from other schools with inadequate/extortionate price bus and train services has to be revisited before considering the increase in housing. Local shops need to be varied and increased before any more housing. With only one Post Office in five local villages, the post office in Aylesham is already over-used and other village amenities and infrastructure must be revisited. FFTP broadband is essential now with over-use and will be impossible with new housing levels, The Government agrees to supply broadband to low income households, instead this will get worse.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP19 - Land at Poplar Meadow, Adjacent to Delfbridge House, Sandwich (SAN007)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><u>Introduction</u></p> <p>Walsingham Planning is submitting this representation on behalf of Lidl Great Britain, who has an existing store at Honeywood Parkway in Dover, and who also hopes to deliver additional investment in the District over the course of the new plan period.</p> <p><u>Context – The Need to Improve Convenience Retail Provision in Sandwich</u></p> <p>It is important to note from the outset that the existing, adopted Dover Land Allocations Local Plan identifies a clear need to improve convenience retail provision within the Deal / Sandwich trade area. Indeed, paragraph 3.237 of the Land Allocations Local Plan states that there is an identified quantitative need over the Plan period for around <u>2,400 sq.m gross</u> additional convenience goods floorspace within the area. Moreover, the adopted Plan explains that:</p> <p><i>“The Council considers that there is potential to increase the <u>quantity and quality</u> of convenience floorspace provision in Sandwich to help broaden the range and choice to the benefit of its local catchment population, whilst also helping to strengthen the role of Sandwich in the settlement hierarchy. New floorspace of an appropriate scale in a location that is well connected to the town centre would help to increase the ‘claw back’ and retention of shoppers and expenditure from the 2012 position” [our emphasis].</i></p> <p>The adopted Local Plan goes on to explain that the tight historic grain of Sandwich town centre does not readily provide opportunities for larger retail provision. The adopted Local Plan could not identify any suitable or viable sites within or on the edge of Sandwich town centre to accommodate such a scheme, and so the Plan sets out a criteria-based policy, against which any future retail applications can be assessed. Policy LA19 relates directly to ‘new convenience retail provision in Sandwich’, and states that planning permission for new convenience provision in Sandwich <u>will be permitted</u>, provided that the scheme meets the six specified criteria.</p>

We understand that Policy LA19 of the adopted Local Plan was framed by an evidence base that is now considered to be out-of-date. Notwithstanding this, it is clear that the current Local Plan identifies a very clear quantitative and qualitative need for additional food and grocery provision within the settlement of Sandwich, and this need remains unmet. Indeed, no new foodstores have been delivered within the town, and thus residents continue to have to travel further afield to undertake their main food shop.

The evidence base that informs the Regulation 19 Draft Local Plan includes an updated Dover Retail and Town Centre Needs Assessment (2021). The updated Needs Assessment shows that there is no District-wide capacity for new convenience goods floorspace in the period up to 2040, after taking into account commitments. However, when the specific towns are considered, the Study identifies that there remains some capacity for additional floorspace in Deal and Sandwich, equating to between 256 and 458 sq.m net convenience floorspace by 2040. It should be noted, however, that the 2021 Study is based on the very conservative assumptions that the retail market is in 'equilibrium' (i.e. that no stores are over-trading) and that market shares will remain constant over the study period.

Moreover, whilst the calculated quantitative need may have reduced based on the latest data assumptions, there has been no change in practice to the very real qualitative need that continues to exist for additional foodstore provision within Sandwich.

It is relevant to note that the evidence base (the 2021 Retail and Town Centre Needs Assessment) records that there were 104 retail and leisure units within Sandwich, as of 2021. Out of this total, 37% of the units comprised non-food retail stores, 23% of units provided leisure services, and 14% of units offered retail services. However, only 8% of the units (7 units in total) accommodated convenience retail shopping facilities. This is lower than the national average representation, and also represents a decline since 2015, when there were 10 food and grocery outlets within the centre.

Sandwich has limited representation from convenience retailers. Whilst the centre benefits from some independent food stores (bakers, butchers and greengrocers), there are limited 'main food' shopping opportunities. The only medium-sized foodstore is the Co-op at Moat Sole Road.

As a result, it is evident that many residents need to travel further afield – to Dover, Deal and out-of-centre destinations – to undertake their main food shopping. The household survey shopping results, reported in the Retail and Town Centre Needs Assessment, confirm that only 3% of convenience goods expenditure from the District is spent in Sandwich Town Centre, which is a very low level of expenditure retention. Within the more localised Sandwich study zone (Zone 6), less than a quarter of convenience goods expenditure is retained by local stores, which represents significant leakage of local expenditure to destinations located further afield.

Indeed, the market share analysis for main food shopping (Table 2, Appendix 2, Volume 4 of the 2021 Needs Assessment) shows that only 14% of main food expenditure within Zone 6 is retained within Sandwich. Instead, residents are travelling to Tesco Extra at White Cliffs Business Park (29%), Aldi at Cherry Tree Avenue, Dover (13%), Sainsbury's in Deal (11%), as well as destinations further afield (to Ramsgate, Margate and Canterbury) to undertake their weekly 'main food' shop. This is not a sustainable pattern of shopping, and the results highlight the clear deficiency in main food shopping provision within Sandwich that continues to exist.

We note that further growth is earmarked for Sandwich within the draft Local Plan. The identified disparity will continue to grow, as more residents move into the town, and the lack of local access to main food shopping opportunities becomes more apparent.

Policy SAP19 – Land at Poplar Meadow, Adjacent to Delfbridge House

Draft Policy SAP19 proposes to allocate land at Poplar Meadow, Sandwich, for residential development (35 units). We do not disagree with this allocation, as the site represents a sustainable development opportunity, and one that is highly accessible, being within easy walking distance of Sandwich Town Centre and also Sandwich railway station.

However, it is our view that the site would be equally suitable for retail development, as it is the most centrally-located, suitable and available site for such a use. We note also that the site lies partly within Flood Zones 2 and 3. Whilst residential development would represent a 'more vulnerable' use (where the exception test is required within Flood Zone 3a), retail is a 'less vulnerable' use that would be more suitable within the environmental constraints of the site.

We have explained above that there is strong evidence to indicate that there is a qualitative need for a new foodstore within Sandwich, to provide better local opportunities for 'main food' shopping, and to curtail the leakage of expenditure to destinations located further afield. We have also explained that – as acknowledged in the draft Local Plan – there are limited opportunities to provide sites for development within the town centre, due to its historic street layout. Thus, serious consideration should be given to the opportunity presented by the land at Poplar Meadow to provide the additional retail development the town needs, since it represents a sustainable and accessible site within walking distance of the town centre.

Moreover, we note that the site has benefitted from planning consent for retail development in the recent past. Planning permission was granted in November 2014 for a new foodstore, doctor's surgery and pharmacy on the site, together with associated car parking, landscaping, and

	<p>service yard (ref. DOV/13/00867). There have been no recent changes to the status of the site or its surroundings, or the policy context, which would alter the view that the site is suitable and available for retail use.</p> <p>Given the deficiencies that we have identified in the retail offer of Sandwich, specifically its provision for 'main food' shopping, we consider that the merits offered by the Poplar Meadow site for retail development should be fully and properly examined. We reiterate that the NPPF stipulates that planning policies should allocate a range of suitable sites in town centres to meet the scale and type of development likely to be needed, looking at least ten years ahead. Furthermore, where suitable and viable town centre sites are not available, the Council should allocate appropriate edge of centre sites, or should identify how needs can be met in other accessible locations that are well connected to the town centre.</p> <p>The draft Local Plan is unsound because the Council does not propose to make any retail allocations, despite the fact that needs identified in the adopted Local Plan remain unmet. This is not consistent with the advice provided in national policy, and does not reflect a positive and effective approach to plan-making. In particular, it is our case that full consideration should be given to the potential offered by the Land at Poplar Meadow as a suitable site for retail use. The strategy currently put forward in the Local Plan is not justified or sound because it does not take into account reasonable alternatives. Retail is a reasonable alternative use of this site, as borne out by its planning history.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>It is our view that the retail and town centre strategy put forward in the draft Local Plan is flawed and unsound. The strategy places an over-reliance on the quantitative need figures derived from 2021 Retail and Town Centre Needs Assessment, and does not take into account evidence of qualitative need. In particular, it is of great concern that the draft Local Plan does not consider the clear need that exists for additional convenience provision within Sandwich, which is identified in the adopted Local Plan, and which remains unaddressed.</p> <p>Whilst the adopted Local Plan contains a positive and proactive policy to support new retail development within Sandwich (Policy LA19), this strategy has not been carried through to the draft Local Plan.</p> <p>In the absence of an appropriate strategy to support new convenience provision within Sandwich, local residents will need to continue to travel to Deal, Dover and destinations further afield to undertake their food and grocery shopping. This is not a sustainable strategy.</p> <p>We believe that there is a need to allocate a site for foodstore development within the town, and that the Land at Poplar Meadow represents the most suitable and centrally-located site for such a use. The wording of the draft allocation should be amended and should reference the potential for foodstore development on the site.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>We would like to participate because we have recommended that modifications are required to Policy SAP19 (as well as other policies within the draft Local Plan).</p> <p>Our client also has a direct interest in the land that is proposed for allocation, and would like to participate fully in the process.</p> <p>Given the technical nature of the retail evidence base, it would be useful to participate directly in the oral examination in order to have the opportunity to discuss the proposed retail and town centre strategy for Sandwich in detail (and any potential retail allocations) and answer questions directly.</p>

And this should be monitored for compliance.</p> <p>A Design Code for Sandwich should be undertaken.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>This site was approved for a much-needed supermarket and due to the fact that Sandwich greatly needs an alternative supermarket, this should be retained as a commercial site. Should DDC determine that this should be considered for housing, STC's comments are as follows. The road alterations that were previously agreed (when the site was approved for a supermarket) should be integrated into the plan, and the proposed dwellings must be of a visual appearance and finishing materials in keeping with the surroundings. Where a site adjoins a watercourse, the watercourse is maintained in its entirety and that only one access/egress can be made across it.</p> <p>Where a site contains mature, healthy trees or hedging that these are to be retained in all cases. All sites that come onto highways that service a school have twenty mile per hour limits as part of the Highways scheme. 20mph speed restriction should begin at Sandwich Technology School affording greater safety outside educational and residential establishments and access roads. Full archaeological surveys (not desktop ones done in Maidstone) should be carried out on all sites within or the surroundings of Sandwich town. All new residential properties must have vehicle electrical charging points which will be necessary by law from 2030. Where a site removes or displaces any on street parking that the loss of parking is made up by additional parking spaces on the site. All properties are to be 50-year flood risk compliant as recommended in the NPPF. All access roads are to be adopted by the County's Highway Authority, so that they are maintained accordingly and there are no rights of dispute. 20mph speed restriction should begin at Sandwich Technology School affording greater safety outside educational and residential establishments and access roads. Consideration must be given to the temporary bridge and conditions across The Delf to ensure access is compliant and adopted by County's Highways Authority. All sites to accommodate full fibre communications cabling to allow for super speed internet access to support economic and home working applications. All sites to include drop down curbing allowing adequate accessibility for persons with disabilities or limited lack of mobility. Any additional street lighting shall be unobtrusive, set so as not to cause irritation to neighbouring properties and in the town centre, should be of a heritage style to match existing light standards. This site as well as sites over 40 units should provide adequate road junction improvements to allow large scale traffic flows to move into and out of the site without impacting on existing traffic flows. Further consideration must be given to traverse the pavement, proximity to bus stop, road junction and railway crossing and onto a busy main road. All sites must have adequate accessibility made for pedestrian and cyclist travel preference to protect and support alternative travel to motorised vehicles. Suitable screening provision should be introduced to shield all new development from existing neighbouring residents and in particular, where a site is adjacent to an AONB or historic recognition. Section 106 funding should be directed towards improving and updating existing essential services such as doctors, dentists, schools, libraries, toilets, play areas and public recreation. A master plan of Sandwich must be undertaken to ensure that there isn't a cumulative detrimental impact on the town resulting from piecemeal developments. Of the requirement for affordable housing, 65% of this should be rental accommodation, social or council houses. And this should be monitored for compliance. A Design Code for Sandwich should be undertaken.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Policy SAP20
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	At Appendix D(ii), the Local Plan estimates this site being developed in Years 9 and 10 of the plan period. However, the landowner has already received numerous expressions of interest in the site from land agents and prospective developers. As such, and on the assumption that this allocation forms part of the adopted Local Plan, the site will be marketed forthwith, and it should be possible for development, once consented, to take place during Years 3 and 4, or Years 4 and 5. Planning consent has previously been granted for a widened access road, leading from Woodnesborough Road, which confirms that satisfactory vehicle and pedestrian access arrangements are achievable.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP20 Woods Yard (SAN008)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Development of this site would result in a loss of employment land that does not seem to be considered or catered for in the Local Plan. The type of businesses that currently use the site would appear not to have been considered in what could be deemed an exclusionary policy.</p> <p>The desire to tidy up a site should not be given as a reason to grant permission for housing.</p> <p>The site is at risk of surface water flooding and is partially under water every winter season. The desktop survey result for flood risk of a 1 in 100 years chance would be considered laughable for anyone familiar with the site.</p> <p>The sites inclusion would appear also to be contrary to:</p> <p>The National Planning Policy Framework (NPPF) and DDC policies DM6 and DM29</p> <p>The NPPF states that inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at the highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere. Given this, there is a need to reduce the risk from coastal change by avoiding inappropriate development in vulnerable areas.</p> <p>Given that this site falls entirely within the flood zones, it would appear likely that unless the local authority has very strong evidence to support the exclusion of SAN019 together with SAN 010 the site would fail the sequential test. for flood risk.</p>

	There have been no significant changes that would alter the reasons for rejecting this site in the previous HELAA exercise and the subsequent appeals process; the reasons for rejection remain the same.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We object to the allocation of the site:</p> <ul style="list-style-type: none"> • The NPPF 155 states that 'Inappropriate development in areas at risk of flooding should be avoided ...'. Is in flood zone 2 and 3. The site is subject to flooding and would therefore pose a considerable risk. A key consideration set out in the policy is that a sequential test and flood risk assessment is required. This should be undertaken before taking the decision to allocate the site. • The site is given orange status and the overall landscape summary in HELAA Appendix 3A and the overall landscape summary is: • The development of this site would have an impact on the landscape and further assessment is required to demonstrate whether this can be mitigated. • HELAA Appendix 3B gives the site orange status as 'Highways concerns have been identified in relation to access and/or highway impact and further assessment is required to demonstrate whether this can be mitigated.' • Concerned that the scale of development proposed for Sandwich will have a detrimental impact on the Historic town with its narrow roads. • There is insufficient infrastructure to support the scale of development proposed for Sandwich.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The inclusion of this site is supported, as it will improve the appearance of this land. However, the proposal is too dense and should be reduced to 25 homes. Disputed ownership of the access road must be resolved and KCC highways adopt access road. Consideration must be given to the proximity to the railway crossing and tracks. Where a site adjoins a watercourse, the watercourse is maintained in its entirety and that only one access/egress can be made across it. Where a site contains mature, healthy trees or hedging, these are to be retained in all cases. All sites that come onto highways that service a school have twenty mile per hour limits as part of the Highways scheme. Road junction improvements should be considered and evaluated due to being on a bend, close proximity of rail crossing and large vehicles accessing the adjacent leisure park and large vehicles making deliveries to the town (i.e., Co-Op) Proximity to the town wall (Rope Walk to The Butts) should be considered as one of the main travel routes for children attending the Infant School. Full archaeological surveys (not desktop ones done in Maidstone) are carried out on all sites within or the surroundings of Sandwich town. All new residential properties must have vehicle electrical charging points which will be necessary by law from 2030. Where a site removes or displaces any on street parking that the loss of parking is made up by additional parking spaces on the site. All properties are to be 50-year flood risk compliant as recommended in the NPPF. All access roads are to be adopted by the County's Highway Authority, so that they are maintained accordingly and there are no rights of dispute. All sites to accommodate full fibre communications cabling to allow for super speed internet access to support economic and home working applications. All sites to include drop down curbing allowing adequate accessibility for persons with disabilities or limited lack of mobility. Any additional street lighting shall be unobtrusive, set so as not to cause irritation to neighbouring properties and in the town centre, should be of a heritage style to match existing light standards.</p> <p>Sites over 40 units should provide adequate road junction improvements to allow large scale traffic flows to move into and out of the sites without impacting on existing traffic flows. All sites must have adequate accessibility made for pedestrian and cyclist travel preference to protect and support alternative travel to motorised vehicles. Suitable screening provision should be introduced to shield all new development from existing neighbouring residents and in particular, where a site is adjacent to an AONB or historic recognition. Section 106 funding should be directed towards improving and updating existing essential services such as doctors, dentists, schools, libraries, toilets, play areas and public recreation. A master plan of Sandwich must be undertaken to ensure that there isn't a cumulative detrimental impact on the town resulting from piecemeal developments. Of the requirement for affordable housing, 65% of this should be rental accommodation, social or council houses. And this should be monitored for compliance.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 21 land adjacent to Sandwich Technology School
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>For this site, the justification has changed from being related to a charity (the leisure centre) which was intended to provide local facilities, to being related to a private company (an academy school) whose expansion proposals are not primarily orientated towards Sandwich Ward, but towards a wider East Kent area. There has been no consultation nor local discussion about this, and to a lay person appears to be an opportunistic attempt to exploit a previous proposal related to the charity, and acquire assets by opaque manoeuvres.</p> <p>The School, nor DDC nor KCC have given any public indication of their reasoning or justification for this change, nor of its utility to Sandwich Ward.</p> <p>This is certainly unsound, may not be legally compliant and shows no attempt to invoke the neither the spirit nor letter of the duty to cooperate with local residents.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	<p>The proposal is also unsound because it continues to burden the South Ward of Sandwich with the largest potential development site: this ward has already had the Woodnesborough Road and Kumar Nursery sites: there are 3 other additional proposed sites in the South Ward. I welcome the proposed development in North Ward, if it is really necessary to burden this town with 227 houses, whereas Deal, a far larger settlement will only get 223 dwellings under these proposals.</p> <p>Looking at the site specifics:</p> <p>It is high quality arable land, continuously used for food production. Strategy SP1 h is being ignored here, at a time of increasing need for UK food security improvements due to climate change, Brexit, and a need to produce more food locally.</p> <p>It is at increasing risk from flooding, especially adjacent to any site entrance/exit onto Deal road. Policy SP1 j applies.</p> <p>The approach to Sandwich from the A258 roundabout is currently one of good, open arable farmland in constant use on the right hand side, and a screen of trees and a high long established hedge on the left, interrupted by a large school and car park already out of keeping with the rest of the landscape. There is currently a large field between the hedge and the houses along Dover Road, 3 of which are listed. These proposals would worsen the approach to Sandwich with a mass of new houses towering over the hedge and making an abrupt transition from rural to urban environments.</p> <p>A number of mature trees form the boundaries between existing Dover Road houses and the arable land.</p> <p>The SP 22 entry has the comment "Development should be laid out to protect the residential amenity of the existing residential properties to the north-east and designed to take account of the character of the Sandwich Walled Town Conservation Area;" No such comment is made for SP21: are Dover Road properties not worthy of such consideration? Surely the same consideration must apply to both sites.</p> <p>Both SAP 22 and SAP 23 propose buffer zones between the developments and other parts of the site. No buffer zone is proposed on this site, whether between the school, existing residencies or Deal road. What makes this site less worthy of such consideration?</p> <p>The school will need between 1 and 2 ha.....seems a pretty large area variation. It is not as if the school does not have access to extensive land to the west of its current buildings, and this is not land in agricultural use, nor use as recreational land with unimpeded public access. The absence of any discussion and consultation makes this aspect completely unacceptable. Basically local residents are being asked to write a blank cheque for a private company, and to rip up good quality farmland to pay for it. This is unacceptable.</p> <p>Finally, this proposed development seems part of a long term strategy to create "Sandwich New Town"....add this to Kumar, SP 23, Woodnesborough Road and the next step is to justify more infill to the north of Dover Road on yet more good agricultural land....and this was part of an older land use strategy proposed by DDC.</p> <p>DDC already has enough sites to satisfy the 5 year housing need: SP 21 does not need to be sacrificed on this altar.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>A document cannot be considered sound, safe, or legally compliant if it contains information that is incorrect or false. This is particularly so if the incorrect or false information leads to changes to the policies, procedures, and outcomes detailed in the document.</p> <p>A document of this nature should be compiled objectively and dispassionately. This is clearly not the case with this document. It contains many minor omissions or additions which seem small in nature when viewed individually but collectively result in significant changes to the overall conclusion and result. It contains language that is clearly designed to sway opinion and influence a decision one way or another. But more importantly, it contains information that is clearly inaccurate.</p> <p>I can only speak to the sample of sites that I have examined in Sandwich, but in that small sample I have identified statements made within the document and indeed proceeding documents, that have caused fundamental changes to the allocations there, and in doing so have caused a knock-on effect in allocations in other parts of the district.</p> <p>It is likely that some of these mistakes are down to bureaucratic failings but this cannot be the case in all circumstances.</p> <p>If this is the case with Sandwich sites, it clearly must be true of other sites in the district.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>It is very hard to make the document legally compliant at this stage given that due to inaccurate statements, two of the sites SAN010 and SAN019 have been removed or partially removed from the local plan. It is particularly disappointing to see these sites removed when much of the evidence to refute the reasons for rejection is already in the hands of DDC, DDC was asked to revisit these two sites by Sandwich Town Council at the regulation 18 stage, and at that time DDC had the relevant information, via a successful planning application on part of SAN010 to show that the main reasons for rejecting these two sites were no longer valid. SAN010 planning reference 21/01309</p> <p>Statements related to Site SAP21 are, it would appear, also untrue. The Head Teacher at the school has informed local councilors that she had not been consulted on the expansion of the school. The manner in which the allocation was changed between the Regulation 18 and Regulation 19 stages, without consultation with the majority of the stakeholders being consulted or made aware is questionable, to say the least.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I wish to speak with the inspector to give oral evidence regarding the exclusion of site SAN010 and allow them to ask questions of me that might help them in the deliberations on this site

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object to the change to the site allocation policy for this site SAP021</p> <p>The proposed changes to the sites original allocation appear to be contrary to: PM4, PM5, PM6, SP1(f), SP2, DM1, DM4, CC1, Localism Act 2011.</p> <p>The reallocation of this site appears not to have been informed by stakeholder and community engagement and so it is possible that DDC may not have acted as required by the NPPF guidance.</p> <p>The document appears to contain statements regarding this site that are misleading and possibly false. This could call into question the legality and justification for the changes to the allocation for this site and by extension, the legality and justification of the Regulation 19 document as a whole.</p> <p><i>How has it been prepared? 1.4 The preparation of the Local Plan has been informed by stakeholder and community engagement,</i></p> <p>The plan states</p> <p><i>4.191 The previous site allocation policy for this site safeguarded an area of land within this site for the expansion of Sandwich Sports and Leisure Centre. However, the council has recently updated the Indoor Sport and Leisure Facility Strategy (2022) which does not identify a need for expansion of this facility, and the site is now under management of the school. KCC education, and the school themselves have identified a need for school expansion.</i></p> <p>This statement is blatantly false and completely contrary to the findings of the plans sports and leisure assessments. as detailed in PM4 6.55 and PM4 6.56</p> <p>PM4 6.55</p> <p><i>6.55 However, the main priorities emerging from the Strategy in relation to meeting future needs are: There is a deficit in swimming pool water space of a 6 lane 25m pool.</i></p> <p><i>the latent demand reports completed for Tides Leisure Centre show that a significant level of latent demand exists for that site.</i></p>

Other potential areas for improved health and fitness facilities are in the settlements of Aylesham and Sandwich. There is a requirement to increase the level of provision of dedicated multi-purpose studio space within the District. This is linked to the potential latent demand for health and fitness facilities, which also support the need for increased studio space for group exercise.

There is unmet demand in the district for boxing and martial arts facilities, with strong growth in club membership in recent years. Boxing and martial arts clubs looking for dedicated facilities will be supported in doing so.

Outdoor Sports and Playing Pitches

6.56 To inform the provision of outdoor playing pitches in the District, the Council produced a Playing Pitch Strategy (PPS) in 2019. The primary purpose of the PPS is to provide a strategic framework which ensures that the provision of outdoor playing pitches meets local and community needs for existing and future residents, and visitors to the district.

there are both current and future localised shortfalls in specific analysis areas. 3G pitches - Supply and demand analysis highlight that Dover District has insufficient supply of 3G pitches to meet current and future demand for football training, based on the FA training model. This shortfall equates to two full size 3G pitches.

DDC has indicated that there is no further need for extra sports facilities in the district, this is blatantly untrue as evidenced above. Furthermore; the bulk of these facilities are concentrated in the South of the district, in Dover and Deal, remote from Sandwich and its residents. That may not prove particularly problematic for those that have the means and the ability to access these facilities, but completely excludes those who don't. The socially disadvantaged and those that might need to be encouraged to take more exercise are precisely the people within our communities that we should be aiming to facilitate. The planned changes to the site appear to exclude the very people most at risk and as such, the loss of our site to accommodate school expansion or housing would appear to be contrary to strategic policy **SP2 Planning For a Healthy and Inclusive Community. Together with PM4 Sports Provision**

Strategic Policy 2 - Planning for Healthy and Inclusive Communities.

What are we trying to achieve?

3.16 To support improvements in the health and well-being of residents, improve quality of life for all and reduce health inequalities through high-quality place-making, including the provision of high-quality green infrastructure and access to attractive areas of public open spaces in the built-up areas of the District.

PM4 - Sports Provision What are we trying to achieve?

6.52 To improve the provision of good quality sports facilities, to meet the District's needs and increase participation in sports and physical activity, particularly among children and young people, to tackle obesity and improve health and well-being. Justification for approach

6.53 One of the core planning principles of the NPPF (2021) is to improve health, social and cultural well-being for all, and deliver sufficient community and cultural facilities and services to meet local needs. It establishes the importance of access to high quality open spaces and opportunities for sport and recreation that can make an important contribution to the health and well-being of communities. Indoor Sports

The statement from DDC that there is no need for an expansion of the current sports facility is purposely misleading. DDC has been made well aware that rather than an expansion to the current facility, there was to be a new community facility built on this land. The plans have been appraised and agreed upon by DDC planning officers through the normal pre-application process, for which the trustees paid £1,200

Copy of plans and email conversations with DDC planning officers inc pre app request/advice

Furthermore:

It would appear that the Head Teacher at Sandwich Technology School was not consulted on the changes to this document either by KCC or DDC and is not in favour of the expansion of the school. You will note that the school has academy status and is therefore pretty much in control of its own destiny.

This would appear to be contrary to obligations to make proper consultation and brings into question whether or not the plan itself is legal and/or justified.

Copy of letter from the school to Sandwich Town Council attached.

An extract from the HELAA on this site states

HELAA Main Report September 2022

SAN013 Land adjacent to Sandwich Technology School, Deal Road, Sandwich 60 40 To take into account the area of the site at risk from surface water flooding

This comment was extracted from the HELAA main report and designed one would assume to help support the proposed changes at the regulation 19 stage. It would appear to be, at the very least, disingenuous, given that this is one of the sites in Sandwich at least at risk from flooding.

It would appear therefore that the reasons given by DDC for the changes in the plan for SAP021 between the Regulation 18 and Regulation 19 stages are not well evidenced, contain false or misleading statements and lacked the desired level of consultation between the interested parties (Sandwich Technology School, Sandwich Town Council, The trustees to whom the land was originally promised etc). It would appear that the change was effected by some rather opaque deal between the KCC and DDC. and there should be serious concerns about how this proposed change to the original allocation came about.

Expansion of the school will be almost entirely to provide for children in Deal, Dover and Thanet where the provision of educational facilities has not kept pace with the rapid expansion of housing. There will be little benefit to the town of Sandwich, its shops and businesses or its residents. And the loss of a community space combined with extra traffic and parking issues will have a long-term detrimental impact on Sandwich residents.

Deal and Walmer have recently experienced high levels of housing development and yet I noticed that DDC has not offered the spare land it has at Tides Leisure Centre, in order to facilitate an expansion of the adjacent Goodwin academy in Deal.

In fact, the plans infrastructure delivery plan appendix 1. infrastructure delivery schedule IDS indicates there are no plans to expand provision at any other secondary school in the district, despite the substantial housing increase in both Dover and Deal. I very much suspect it is likely the same for Thanet District Council.

The decision to change the allocation in the Reg 19 document would therefore appear to be contrary to the aims of the local plan. Specifically policy DM4 sustainable Travel and SP1 (f) Reducing The Need To Travel

In order to fit with the aims of the Local Plan; 'to reduce the carbon footprint of the district and to promote sustainable travel, the provision of facilities such as schooling should take place where the need occurs/ is highest. Expansion of the school would appear to be contrary to policies DM1, DM4 and SP1(f)

DM1 Reduce Carbon Emissions

Sustainable travel and SP1 (f. Reducing the need to travel and maximising opportunities for 'smarter' sustainable transport options to deliver the highest possible share of trips by the most sustainable travel modes. and

Expansion of the school will be detrimental to the town in terms of the loss of potential community assets and an increase in traffic and verge-side parking outside the entrance and along Dover Road which has already been blighted by the housing development there.

The proposal to expand the school represents such an onerous contribution by the land owner/developers that it is possible that the site will not be put forward for development. We will then lose the opportunity of gaining land for the community.

This action by DDC has the likely result that Sandwich will lose any chance to build what will undoubtedly be a valuable asset for the future of our community

The current proposal to expand the school and that made in the representations by the land owner, to allocate all of the land for housing, will result in the loss of what has the potential to be a significant asset for the future of Sandwich, both in terms of amenity and of the future physical and mental well being of the communities residents.

DDC seem to have developed a planning strategy that will require people in Sandwich and surrounding areas to travel to Dover and Deal for leisure facilities and for children from Dover and Deal to travel to Sandwich for educational needs. This would appear contrary to policy DM4 Sustainable Travel and SP1 (f) reducing the need to travel

SP1 (f). *Reducing the need to travel and maximising opportunities for 'smarter' sustainable transport options to deliver the highest possible share of trips by the most sustainable travel modes.*

Surely it would be more beneficial for the children of Sandwich and those in the surrounding areas, to have easy access to sports and recreational facilities, and the educational need of the children in the expanding communities of Dover, Deal and Thanet, be facilitated in those communities?

It is well recognised that there is a current problem nationally with children not being able to swim and not having the facilities to be able to learn to swim. DDC should look to ensure that the children of the people it represents have easy access to the appropriate facilities.

Local schools and Sandwich Technology School in particular would benefit from having the expanded sports and leisure facilities in close proximity.

However, the proposed facility should not be thought of as just a gym and a pool, it would be a community space.

And, as per the findings of the Neighbourhood Plan Steering committee, set up by STC in response to the 2010 process. *'The Sports Centre could form the focal point for future housing development in the town'*

It should be noted that the trustees to whom the land is to be passed have the support of a large developer with local connections, who wishes to give something back to the Town.

DDC has highlighted the difficulty in finding suitable housing sites within the town and recognises in the document that the quantity of housing planned for Sandwich is less than would normally be expected for a rural service centre, because of this difficulty. And yet it proposes a change to the allocation on this site that will not only unnecessarily rob its residents of a valuable piece of community land, but also reduce the housing provision within the town by twenty units.

The previous allocation of a mixed development on this site appears to be the most viable option, providing a reasonable level of housing development, while also providing potential for a facility that will be of great value to the community of Sandwich.

The original allocation would also help ensure that the contributions for developing sports and leisure facilities made by the developers of the various sites in Sandwich are used to develop facilities that benefit the town itself, rather than being spread/ spent in other communities within the district which finds favour with DDC.

Improve community involvement.

The development of a community facility on this site. As allocated in the previous plan, has the potential to greatly increase community involvement and will help to change the perception amongst many of the town's residents, that is only that part of the town within and around the walls that are generally considered of importance by the Town and District Councils.

The school has adequate land on which to build new structures, close to the most recent build and the caretaker's house.

This is a speculative land grab by the school and the KCC. it will not benefit the community of Sandwich.

Removal of the site for sports and leisure use would appear to be contrary to PM4. PM5. and PM6.

PM4 - *Sports Provision What are we trying to achieve?*

6.52 *To improve the provision of good quality sports facilities, to meet the District's needs and increase participation in sports and physical activity, particularly among children and young people, to tackle obesity and improve health and well-being. Justification for approach*

6.53 *One of the core planning principles of the NPPF (2021) is to improve health, social and cultural well-being for all, and deliver sufficient community and cultural facilities and services to meet local needs. It establishes the importance of access to high quality open spaces and opportunities for sport and recreation that can make an important contribution to the health and well-being of communities. Indoor Sports*

6.55 *However, the main priorities emerging from the Strategy in relation to meeting future needs are: There is a deficit in swimming pool water space of a 6 lane 25m pool.*

the latent demand reports completed for Tides Leisure Centre show that a significant level of latent demand exists for that site. Which would imply there is further need for sports facilities that are not being met

Other potential areas for improved health and fitness facilities are in the settlements of Aylesham and Sandwich. There is a requirement to increase the level of provision of dedicated multi-purpose studio space within the District. This is linked to the potential latent demand for health and fitness facilities, which also support the need for increased studio space for group exercise.

There is unmet demand in the district for boxing and martial arts facilities, with strong growth in club membership in recent years. Boxing and martial arts clubs looking for dedicated facilities will be supported in doing so.

PM5 - Protection of Open Space, Sports Facilities and Local Green Space

What are we trying to achieve?

6.69 To ensure that valued open spaces within the District are retained and protected for all to access and enjoy, to promote active lifestyles and healthy and inclusive communities. To ensure that existing deficiencies in open space are not increased and that the future needs of communities

6.72 The NPPF states that existing open space, sports and recreational buildings and land (including playing fields) should not be built on unless it can be demonstrated that they are surplus to requirements, the loss would be replaced by equivalent or better provision or the development is for alternative sports and recreation provision.

PM6 - Community Facilities and Services *What are we trying to achieve?*

6.85 To ensure that all the District's communities are well served by a range of public, private, community and voluntary services and facilities that are appropriate to meet people's everyday needs, and are affordable and accessible.

Justification for approach

6.86 The NPPF (2021) states that planning policies and decisions should plan positively for the provision and use of community facilities and other local services to enhance the sustainability of communities and residential environments and guard against the unnecessary loss of valued facilities and services, particularly where this would reduce the community's ability to meet its day-to-day needs.

6.87 The provision of healthy and sustainable communities is central to the vision of this Local Plan. For neighbourhoods and villages to function effectively as communities with a high quality of life, minimising social exclusion and promoting integration and healthy lifestyles, it is important that the people living in them have easy access to a good range of community facilities and services. Having things to do and places to go underpins people's physical and mental health for all sections of the community.

6.88 Some community facilities need to be provided at the level of the neighbourhood or village, whereas others are more likely to be of a scale that means they should be provided at strategic locations such as town centres (for example museums and arts facilities). All community facilities should however be inclusive and easily accessible on foot or by public transport.

6.89 Given the provision of community services and facilities is an important part of the Council's vision for maintaining sustainable communities within Strategic Policy SP2 – Planning for Healthy and Inclusive Communities, and that they are recorded within the Settlement Hierarchy Matrix which supports this Local Plan, it is very important that they are not lost, particularly in the rural areas. This policy ensures that they can only be lost if they are no longer needed, or if they are satisfactorily replaced with an alternative provision.

6.90 The Council recognises that local communities are often best placed to identify buildings or land that furthers their social well-being, or social interests, as well as neighbourhood infrastructure needs. It is also recognised however that there may be challenges relating to ensuring sufficient funding for ongoing operational costs associated with a community facility. It is therefore important to ensure that existing land and facilities for community purpose is not lost to other uses without careful consideration of local needs and options for retaining the opportunity in community use. Assets of Community Value (ACV) as designated under the Localism Act 2011 by local communities cannot be considered for loss or redevelopment.

Assets of Community Value (ACV) as designated under the Localism Act 2011 by local communities cannot be considered for loss or redevelopment.

Although this land had yet to be passed to the community it had been allocated for community use and could arguably be considered to be an Asset Of Community Value (AVC) and therefore under the provisions of the Localism Act, 2011 cannot be considered for loss or development.

The owners of this land made the offer of donating land for community use, directly to the government inspector, at the public examination of the previous local plan. It was made in order to secure the development of 60 houses on the remaining land.

	<p>The stalling of the development of this land and the subsequent changes to the allocation proposed by the land owners are simply undertaken to avoid the obligation placed upon them by the previous plan allocation. Under these circumstances, they should not be considered. and their application to change the allocation should therefore be excluded under the provisions of the Localism Act 2011.</p> <p>The application by KCC would appear not to be supported by the school itself, which has academy status and therefore changes to the previous allocation for the land, that would cause loss of community land should also be excluded under the provisions of the Localism Act 2011</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Revisit the plan and re assess the current planned allocation</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I am one of the trustees to whom the designated community land was to be passed. I would like to speak directly to the inspector to explain our aims to develop a sports, leisure, and community centre for the people of Sandwich, and how we intend to achieve it. I may be able to give answers to the inspector to help them in their deliberations on this site.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I object to the change to the site allocation policy for this site SAP021 The proposed changes to the site's original allocation appear to be contrary to: PM4, PM5, PM6, SP1(f), SP2, DM1, DM4, CC1, Localism Act 2011.

The reallocation of this site appears not to have been informed by stakeholder and community engagement and so it is possible that DDC may not have acted as required by the NPPF guidance.

The document appears to contain statements regarding this site that is misleading and possibly false. This could call into question the legality and justification for the changes to the allocation for this site and by extension, the legality and justification of the Regulation 19 document as a whole.

How has it been prepared? 1.4 The preparation of the Local Plan has been informed by stakeholder and community engagement,

The plan states

4.191 The previous site allocation policy for this site safeguarded an area of land within this site for the expansion of Sandwich Sports and Leisure Centre. However, the council has recently updated the Indoor Sport and Leisure Facility Strategy (2022) which does not identify a need for expansion of this facility, and the site is now under management of the school. KCC education, and the school themselves have identified a need for school expansion.

This statement is blatantly false and completely contrary to the findings of the plans sports and leisure assessments. as detailed in **PM4 6.55** and **PM4 6.56**

PM4 6.55

6.55 However, the main priorities emerging from the Strategy in relation to meeting future needs are: There is a deficit in swimming pool water space of a 6 lane 25m pool.

the latent demand reports completed for Tides Leisure Centre show that a significant level of latent demand exists for that site.

Other potential areas for improved health and fitness facilities are in the settlements of Aylesham and Sandwich. There is a requirement to increase the level of provision of dedicated multi-purpose studio space within the District. This is linked to the potential latent demand for health and fitness facilities, which also support the need for increased studio space for group exercise.

There is unmet demand in the district for boxing and martial arts facilities, with strong growth in club membership in recent years. Boxing and martial arts clubs looking for dedicated facilities will be supported in doing so.

Outdoor Sports and Playing Pitches

6.56 To inform the provision of outdoor playing pitches in the District, the Council produced a Playing Pitch Strategy (PPS) in 2019. The primary purpose of the PPS is to provide a strategic framework which ensures that the provision of outdoor playing pitches meets local and community needs for existing and future residents, and visitors to the district.

there are both current and future localised shortfalls in specific analysis areas. 3G pitches - Supply and demand analysis highlight that Dover District has insufficient supply of 3G pitches to meet current and future demand for football training, based on the FA training model. This shortfall equates to two full size 3G pitches.

DDC has indicated that there is no further need for extra sports facilities in the district, this is blatantly untrue as evidenced above. Furthermore; the bulk of these facilities are concentrated in the South of the district, in Dover and Deal, remote from Sandwich and its residents. That may not prove particularly problematic for those that have the means and the ability to access these facilities, but completely excludes those who don't. The socially disadvantaged and those that might need to be encouraged to take more exercise are precisely the people within our communities that we should be aiming to facilitate. The planned changes to the site appear to exclude the very people most at risk and as such, the loss of our site to accommodate school expansion or housing would appear to be contrary to strategic policy **SP2 Planning For a Healthy and Inclusive Community. Together with PM4 Sports Provision**

Strategic Policy 2 - Planning for Healthy and Inclusive Communities.

What are we trying to achieve?

3.16 To support improvements in the health and wellbeing of residents, improve quality of life for all and reduce health inequalities through high quality place making, including the provision of high quality green infrastructure and access to attractive areas of public open spaces in the built up areas of the District.

PM4 - Sports Provision What are we trying to achieve?

6.52 To improve the provision of good quality sports facilities, to meet the District's needs and increase participation in sports and physical activity, particularly among children and young people, to tackle obesity and improve health and well-being. Justification for approach

6.53 One of the core planning principles of the NPPF (2021) is to improve health, social and cultural well-being for all, and deliver sufficient community and cultural facilities and services to meet local needs. It establishes the importance of access to high quality open spaces and opportunities for sport and recreation that can make an important contribution to the health and well-being of communities. Indoor Sports

The statement from DDC that there is no need for an expansion of the current sports facility is purposely misleading. DDC has been made well aware that rather than an expansion to the current facility, there was to be a new community facility built on this land. The plans have been appraised and agreed upon by DDC planning officers through the normal pre-application process, for which the trustees paid £1,200

Copy of plans and email conversations with DDC planning officers inc pre app request/advice

Furthermore:

It would appear that the Head Teacher at Sandwich Technology School was not consulted on the changes to this document either by KCC or DDC and is not in favour of the expansion of the school. You will note that the school has academy status and is therefore pretty much in control of its own destiny.

This would appear to be contrary to obligations to make proper consultation and brings into question whether or not the plan itself is legal and/or justified.

Copy of letter from school to Sandwich Town Council attached.

An extract from the HELAA on this site states

HELAA Main Report September 2022

SAN013 Land adjacent to Sandwich Technology School, Deal Road, Sandwich 60 40 To take into account the area of site at risk from surface water flooding

This comment was extracted from the HELAA main report and designed one would assume to help support the proposed changes at the regulation 19 stage. It would appear to be, at the very least, disingenuous, given that this is one of the sites in Sandwich at least at risk from flooding.

It would appear therefore that the reasons given by DDC for the changes in the plan for SAP021 between the Regulation 18 and Regulation 19 stages are not well evidenced, contain false or misleading statements and lacked the desired level of consultation between the interested parties (Sandwich Technology School, Sandwich Town Council, The trustees to whom the land was originally promised etc). It would appear that the change was effected by some rather opaque deal between the KCC and DDC. and there should be serious concerns about how this proposed change to the original allocation came about.

Expansion of the school will be almost entirely to provide for children in Deal, Dover and Thanet where the provision of educational facilities has not kept pace with the rapid expansion of housing. There will be little benefit to the town of Sandwich, its shops and businesses or its residents. And the loss of a community space combined with extra traffic and parking issues will have a long-term detrimental impact on Sandwich residents.

Deal and Walmer have recently experienced high levels of housing development and yet I noticed that DDC has not offered the spare land it has at Tides Leisure Centre, in order to facilitate an expansion of the adjacent Goodwin academy in Deal.

In fact, the plans infrastructure delivery plan appendix 1. infrastructure delivery schedule IDS indicates there are no plans to expand provision at any other secondary school in the district, despite the substantial housing increase in both Dover and Deal. I very much suspect it is likely the same for Thanet District Council.

The decision to change the allocation in the Reg 19 document would therefore appear to be contrary to the aims of the local plan. Specifically policy DM4 sustainable Travel and SP1 (f) Reducing The Need To Travel

In order to fit with the aims of the Local Plan; 'to reduce the carbon footprint of the district and to promote sustainable travel, the provision of facilities such as schooling should take place where the need occurs/ is highest. Expansion of the school would appear to be contrary to policies DM1, DM4 and SP1(f)

DM1 Reduce Carbon Emissions

Sustainable travel and SP1 (f. *Reducing the need to travel and maximising opportunities for 'smarter' sustainable transport options to deliver the highest possible share of trips by the most sustainable travel modes.* and

Expansion of the school will be detrimental to the town in terms of the loss of potential community assets and an increase in traffic and verge-side parking outside the entrance and along Dover Road which has already been blighted by the housing development there.

The proposal to expand the school represents such an onerous contribution by the land owner/developers that it is possible that the site will not be put forward for development. We will then lose the opportunity of gaining land for the community.

This action by DDC has the likely result that Sandwich will lose any chance to build what will undoubtedly be a valuable asset for the future of our community

The current proposal to expand the school and that made in the representations by the land owner, to allocate all of the lands for housing, will result in the loss of what has the potential to be a significant asset for the future of Sandwich, both in terms of amenity and of the future physical and mental well being of the communities residents.

DDC seem to have developed a planning strategy that will require people in Sandwich and surrounding areas to travel to Dover and Deal for leisure facilities and for children from Dover and Deal to travel to Sandwich for educational needs. This would appear contrary to policy DM4 Sustainable Travel and SP1 (f) reducing the need to travel

SP1 (f). *Reducing the need to travel and maximising opportunities for 'smarter' sustainable transport options to deliver the highest possible share of trips by the most sustainable travel modes.*

Surely it would be more beneficial for the children of Sandwich and those in the surrounding areas, to have easy access to sports and recreational facilities, and the educational need of the children in the expanding communities of Dover, Deal and Thanet, be facilitated in those communities?

It is well recognised that there is a there is a current problem nationally with children not being able to swim and not having the facilities to be able to learn to swim. DDC should look to ensure that the children of the people it represents have easy access to the appropriate facilities.

Local schools and Sandwich Technology School in particular would benefit from having the expanded sports and leisure facilities in close proximity.

However, the proposed facility should not be thought of as just a gym and a pool, it would be a community space.

And, as per the findings of the Neighbourhood Plan Steering committee, set up by STC in response to the 2010 process. *'The Sports Centre could form the focal point for future housing development in the town'*

It should be noted that the trustees to whom the land is to be passed have the support of a large developer with local connections, who wishes to give something back to the Town.

DDC has highlighted the difficulty in finding suitable housing sites within the town and recognises in the document that the quantity of housing planned for Sandwich is less than would normally be expected for a rural service centre, because of this difficulty. And yet it proposes a change to the allocation on this site that will not only unnecessarily rob its residents of a valuable piece of community land, but also reduce the housing provision within the town by twenty units.

The previous allocation of a mixed development on this site appears to be the most viable option, providing a reasonable level of housing development, while also providing potential for a facility that will be of great value to the community of Sandwich.

The original allocation would also help ensure that the contributions for developing sports and leisure facilities made by the developers of the various sites in Sandwich are used to develop facilities that benefit the town itself, rather than being spread/ spent in other communities within the district which finds favour with DDC.

Improve community involvement.

The development of a community facility on this site. As allocated in the previous plan, has the potential to greatly increase community involvement and will help to change the perception amongst many of the town's residents, that is only that part of the town within and around the walls that are generally considered important by the Town and District Councils.

The school has adequate land on which to build new structures, close to the most recent build and the caretaker's house.

This is a speculative land grab by the school and the KCC. it will not benefit the community of Sandwich.

Removal of the site for sports and leisure use would appear to be contrary to PM4. PM5. and PM6.

PM4 - Sports Provision What are we trying to achieve?

6.52 To improve the provision of good quality sports facilities, to meet the District's needs and increase participation in sports and physical activity, particularly among children and young people, to tackle obesity and improve health and well-being. Justification for approach

6.53 One of the core planning principles of the NPPF (2021) is to improve health, social and cultural well-being for all, and deliver sufficient community and cultural facilities and services to meet local needs. It establishes the importance of access to high quality open spaces and opportunities for sport and recreation that can make an important contribution to the health and well-being of communities. Indoor Sports

6.55 However, the main priorities emerging from the Strategy in relation to meeting future needs are: There is a deficit in swimming pool water space of a 6 lane 25m pool.

the latent demand reports completed for Tides Leisure Centre show that a significant level of latent demand exists for that site. Which would imply there is further need for sports facilities that are not being met

Other potential areas for improved health and fitness facilities are in the settlements of Aylesham and Sandwich. There is a requirement to increase the level of provision of dedicated multi-purpose studio space within the District. This is linked to the potential latent demand for health and fitness facilities, which also support the need for increased studio space for group exercise.

There is unmet demand in the district for boxing and martial arts facilities, with strong growth in club membership in recent years. Boxing and martial arts clubs looking for dedicated facilities will be supported in doing so.

PM5 - Protection of Open Space, Sports Facilities and Local Green Space

What are we trying to achieve?

6.69 To ensure that valued open spaces within the District are retained and protected for all to access and enjoy, to promote active lifestyles and healthy and inclusive communities. To ensure that existing deficiencies in open space are not increased and that that the future needs of communities

6.72 The NPPF states that existing open space, sports and recreational buildings and land (including playing fields) should not be built on unless it can be demonstrated that they are surplus to requirements, the loss would be replaced by equivalent or better provision or the development is for alternative sports and recreation provision.

PM6 - Community Facilities and Services What are we trying to achieve?

6.85 To ensure that all the District's communities are well served by a range of public, private, community and voluntary services and facilities that are appropriate to meet people's everyday needs ,and are affordable and accessible.

Justification for approach

6.86 The NPPF (2021) states that planning policies and decisions should plan positively for the provision and use of community facilities and other local services to enhance the sustainability of communities and residential environments and guard against the unnecessary loss of valued facilities and services, particularly where this would reduce the community's ability to meet its day-to-day needs.

6.87 The provision of healthy and sustainable communities is central to the vision of this Local Plan. For neighbourhoods and villages to function effectively as communities with a high quality of life, minimising social exclusion and promoting integration and healthy lifestyles, it is important that the people living in them have easy access to a good range of community facilities and services. Having things to do and places to go underpins people's physical and mental health for all sections of the community.

6.88 Some community facilities need to be provided at the level of the neighbourhood or village, whereas others are more likely to be of a scale that means they should be provided at strategic locations such as town centres (for example museums and arts facilities). All community facilities should however be inclusive and easily accessible on foot or by public transport.

6.89 Given the provision of community services and facilities is an important part of the Council's vision for maintaining sustainable communities within Strategic Policy SP2 – Planning for Healthy and Inclusive Communities, and that they are recorded within the Settlement Hierarchy Matrix which supports this Local Plan, it is very important that they are not lost, particularly in the rural areas. This policy ensures that they can only be lost if they are no longer needed, or if they are satisfactorily replaced with an alternative provision.

6.90 The Council recognises that local communities are often best placed to identify buildings or land that furthers their social well-being, or social interests, as well as neighbourhood infrastructure needs. It is also recognised however that there may be challenges relating to ensuring sufficient funding for ongoing operational costs associated with a community facility. It is therefore important to ensure that existing land and facilities for community purpose is not lost to other uses without careful consideration of local needs and options for retaining the opportunity in community use. Assets of Community Value (ACV) as designated under the Localism Act 2011 by local communities cannot be considered for loss or redevelopment.

Assets of Community Value (ACV) as designated under the Localism Act 2011 by local communities cannot be considered for loss or redevelopment.

Although this land had yet to be passed to the community it had been allocated for community use and could arguably be considered to be an Asset Of Community Value (AVC). Therefore under the provisions of the Localism Act, 2011 cannot be considered for loss or development.

The owners of this land made the offer of donating land for community use, directly to the government inspector, at the public examination of the previous local plan. It was made in order to secure the development of 60 houses on the remaining land.

The stalling of the development of this land and the subsequent changes to the allocation proposed by the land owners are simply undertaken to avoid the obligation placed upon them by the previous plan allocation. Under these circumstances, they should not be considered. and their application to change the allocation should therefore be excluded under the provisions of the Localism Act 2011.

The application by KCC would appear not to be supported by the school itself, which has academy status and therefore changes to the previous allocation for the land, that would cause loss of community land should also be excluded under the provisions of the Localism Act 2011

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Return the proposal for this site to the original allocation of the previous plan (2013). and perhaps include a degree of certainty so that we may work toward this community project.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

I am one of the trustees in whose custody the land allocated for sports, leisure, and community use was to be passed. I would like to be able to speak directly to the inspector in order to tell them what we envisage for the site and how we plan to achieve it. It might also be beneficial for the inspector to be able to ask questions of me in order to assist in their deliberations on the site

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>STC rejects Regulation 19 for this site and endorses Regulation 18 which outlines the community use of the application which was previously designated / safeguarded for community use. As per Regulation 18 half of the site should be retained for community use. If this was reinstated this site would be supported if the following caveats were included:</p> <p>The hedge along Deal Road should be retained to screen the site. The entrance/exit should be on DEAL ROAD, and DEAL ROAD should be reduced to a 30mph speed limit (currently 40mph), this reduction should also continue outside Sandwich Technology School.</p> <p>Mini roundabout should be introduced to manage traffic speed due to heavy traffic use entering the town and accessing the schools.</p> <p>The site should also include a temporary parking provision that could be for school traffic for drop off/pick up times to discourage parking on Dover Road.</p> <p>STC requests confirmation from DDC and the landowner that part of this land is designated / safeguarded for community use.</p> <p>Biodiversity sensitivity must be considered.</p>

Impact of increased traffic & concern for highway safety, particularly for students should be mitigated, including consideration of problems associated with school drop off/pick up times must be addressed and resolved before the development progresses.

The heritage data is wrong, there are 3 listed properties directly adjacent, and so the heritage arguments against other local sites should apply here as well. There have been major concerns about water supply and in 2015 concerns about sewage were raised.

There is an existing irrigation main across the site that needs to be investigated and considered.

Where a site adjoins a watercourse, the watercourse is maintained in its entirety and that only one access/egress can be made across it.

Where a site contains mature, healthy trees or hedging that these are to be retained in all cases. The hedge along Deal Road should be retained to screen the site.

All sites that come onto highways that service a school have twenty mile per hour limits as part of the Highways scheme. Full archaeological surveys (not desktop ones done in Maidstone) are carried out on all sites within or the surroundings of Sandwich town.

All new residential properties must have vehicle electrical charging points which will be necessary by law from 2030. Where a site removes or displaces any on street parking that the loss of parking is made up by additional parking spaces on the site.

All properties are to be 50-year flood risk compliant as recommended in the NPPF.

All access roads are to be adopted by the County's Highway Authority, so that they are maintained accordingly and there are no rights of dispute.

All sites to accommodate full fibre communications cabling to allow for super speed internet access to support economic and home working applications.

All sites to include drop down curbing allowing adequate accessibility for persons with disabilities or limited lack of mobility.

Any additional street lighting shall be unobtrusive, set so as not to cause irritation to neighbouring properties and in the town centre, should be of a heritage style to match existing light standards. Sites over 40 units should provide adequate road junction improvements to allow large scale traffic flows to move into and out of the sites without impacting on existing traffic flows.

All sites must have adequate accessibility made for pedestrian and cyclist travel preference to protect and support alternative travel to motorised vehicles.

Suitable screening provision should be introduced to shield all new development from existing neighbouring residents and in particular where a site is adjacent to an AONB or historic recognition.

Section 106 funding should be directed towards improving and updating existing essential services such as doctors, dentists, schools, libraries, toilets, play areas and public recreation. A master plan of Sandwich must be undertaken to ensure that there isn't a cumulative detrimental impact on the town resulting from piecemeal developments.

Of the requirement for 30% affordable housing, 65% of this should be rental accommodation, social or council houses. And this should be monitored for compliance.

A Design Code for Sandwich should be undertaken.

Of the requirement for 30% affordable housing, 65% of this should be rental accommodation, social or council houses. And this should be monitored for compliance. A Design Code for Sandwich should be undertaken.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP21
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Dear Sirs, It is with regret I note the change in the 2020 from 2010 local plan with regards to the community sports use at Sandwich Technology School. I therefore disagree with DDC planning Department changing the designation of land next to Sandwich Technology School in the proposed Local Plan. We will lose important community sports land.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>I am amazed that this project looks to be going ahead with out the involvement of the local community. In the forty years that I have lived in Sandwich , I have been a member of the leisure club and helped to raise funds in the past. I cannot believe that the school have taken this facility away from the public. I do not agree with the proposal to change the land use. Sandwich is a growing town and the community needs access to the proposals by the Trust.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Dear Sir, My wife and I are writing to object to the DDC's plans to open the land mentioned above for housing development. It is against the existing long term plans for the continuing development of this site for the benefit of community sports and leisure amenities. These plans will both complement and enhance those amenities already existing on the secondary school fields, the result of a previous community initiative. The plans include a lapping pool and adjoining learner pool, much desired by local Junior School Head Teachers as learning to swim is part of their school curriculum, plus other sporting and parking amenities. The support for this development is wide spread in the local community and the gains in terms of health in the community over generations will be immense. Support this proposal, do not prevent it.

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	I believe this draft plan is "unsound". It may well place climate change at top of the agenda under Strategic Policy 1 but then contradicts itself seeking to destroy legally protected and extremely rare woodland by attempting to secure a quick housing allocation gain (SAP22, SAN023). We must not dilute how important this issue is not only for our district but the entire planet.

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

The HELAA was both out of step with environmental protection issues and inconsistent in its reasoning. It did not place sufficient importance on protection of our environment over short-term housing gain.

Within this proposed draft plan Policy SP14 needs a firm and unambiguous statement to ensure all brown field and redevelopment options are fully exhausted before any green field areas can be exploited.

In particular, the site (SAP22, SAN023) Land at Archers Low Farm, Sandwich, should clearly be deleted. It is environmentally a sensitive site with officially protected woodland and trees. It has been rejected for development by our elected Councillors who recognised its' very important contribution to our rural landscape. The small proposed reduction (within this Regulation 19 Draft) in number of proposed housing units suggested for this site is nonsense! Any size of development would inevitably destroy this area and have catastrophic effect on the well-established natural eco systems and cause an unnecessary release of large amounts of stored carbon with removal of mature woodland and trees.

Unfortunately, I suspect you will desperately cling to your plan as drafted and take no notice of my words or the many hundreds of other people and local town council who have objected to this site being developed or the district councillors who rejected the planning application with sound reasoning or the previous independent planning inspector who said the last draft local plan could only be considered as "sound" with removal of the allocation for land at Archers Low Farm Incidentally the only site he singled out in the entire district!

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Deletion of SAP22 will contribute towards making this plan sound.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible.	SAP22 - Land at Archers Low Farm, St Georges Road, Sandwich (SAN023) I object to the development of this site in its current form Development of this site would appear to go against The National Planning Policy Framework (NPPF) and DDC policies DM6 and DM29 NPPF states that inappropriate development in areas at risk of flooding should be avoided by directing development away from areas of highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

without increasing flood risk elsewhere. Given this, there is a need to reduce the risk from coastal change by avoiding inappropriate development in vulnerable areas.

SAP22/SAN023 suffers from being low lying, close to or within flood areas. It also, according to testimony given to the government inspector during the previous HELLA process, suffers from localised flooding during the winter months. . One wonders how this will be dealt with if the land were to be developed and where the surface run-off from hard surfaces would go.

Road access is via Sandwood Road and St George's road.

Both of these routes suffer from issues relating to constrictions of flow, caused by the narrowness of the road, multiple blind bends and vehicles parked outside the local residents' homes. One assumes that measures to improve the traffic flow along these routes will result in the loss of parking along their length, and subsequent loss of this amenity to local residents, as has proved to be the case with the development at SAN015. (Kumor Nursery).

NB The development at SAN015 (Kumor Nursery) mitigated the loss of parking spaces to local residents by including some on-site parking provision. Given the length of Sandown Road and in particular St George's Road, I cannot see how such a method can be employed to reduce the loss of amenity to local residents.

Both Sandown and St Georges Road pass the entrances to Sir Roger Manwood's school and further traffic flowing from this site would increase the hazards at peak times. Of particular concern is the area at the junction of Manwood Road and St Georges Road and the proximity of the narrow, blind, bend to this junction. A further blind bend is situated within 100 metres of the junction and navigation of this is complicated by the access to the railway station being in the same location. In total, there are three blind bends on St George's Road). A little further on, the junction with St George's Road and New Street suffers from poor sight lines, particularly when school children are waiting for or boarding buses. This junction has opposing bus stops in close proximity. It is not unknown, particularly at peak times, for buses to be parked on both sides of the road. There is also an entrance to a petrol station opposite this junction. The junction also suffers from being in close proximity to the level crossings.

Development of this site in the proposed density would cause unacceptable pressures on the local highways network, increase the hazards at junctions, bends and school entrances, particularly at peak times and adversely impact parking for residents living along the routes to the site. This would appear to be contrary to policy DM29

There have been no significant changes that would alter the reasons for rejecting this site in the previous HELAA exercise and the subsequent appeals process.

This site has also been through the normal planning process more recently and been refused.

The inclusion of this site by DDC Appears to confirm the general belief amongst the district's residents, that much of this process and indeed the planning processes within the district as a whole are a farse and that many of the decisions are cut and dried before the process even begins.

A development of perhaps ten executive houses would be more in keeping. with the surroundings have a lower impact on the local environment and present an insignificant impact on the highways network.

However, DDC has a track record that shows them to be incapable or unwilling to prevent an intensification in the housing density once a site has been accepted onto the local Plan.

A site that is currently being developed on the Woodnesborough Rd in Sandwich as a result of the last Local Plan, saw the density rise from a promised 100 (due to residents' concerns regarding the impact on the highways network to 140 plus. DDC has shown itself to be untrustworthy in cases such as this, and I would therefore reject this site's inclusion in the local plan, and then expect the owners to apply for a lower housing density through the normal process, where more control can be exercised.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? The spreadsheet was prepared following guidelines provided by the Dover Local Plan Consultation Team. Their email of 21 Nov refers. 1037 people completed a paper or electronic form agreeing with the following statements. 965 of these people are local residents and 72 are regular

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

visitors. 7 disagreed. Source documentation can be provided if required. There is extremely strong local opposition to this site reappearing in the Local Plan.

This is a beautiful English meadow providing a rural feel to the edge of Sandwich. It is not at all suitable for development for the following reasons:

- It is part of a vital green belt around the Town
- Any development would significantly change the character of the area
- Providing vehicular access to the site requires an access road to be driven through the small forest on the eastern edge of the site adjoining Sandown Road
- Development would lead to an enormous loss of bio-diversity
- Plus damage to resident and migratory wild and birdlife habitats
- This would be destruction of green (not brown) Grade 1 farmland
- Development of the site will require the destruction of many listed trees
- Any remaining trees will be at risk especially if they are in back gardens as proposed in the recent planning application
- A recent planning application was declined and is now under appeal. A decision will have been made by the time this Local Plan is considered by the Inspectorate. Please refer to all the objections made to the application and the appeal.
<https://publicaccess.dover.gov.uk/online-applications/applicationDetails.do?activeTab=summary&keyVal=QOXTWMFZN5300> and Appeal Case #3303230 at the Planning Inspectorate
- We are not opposed to all development in Sandwich and understand the need for there to be some. A number of other suitable sites have been approved or are available.
- We have been here before. When reviewing the last local plan in 2014, the inspector recommended that this site was removed from the plan (please see below). It has crept back in due to the recent planning application.
- The planning criteria suggested in the draft Local Plan do not provide sufficient mitigation.

This site is not suitable for any development and should be removed to make the plan sound.

For reference: The Inspector's ruling last time regarding this site - the Local Plan review in 2014 refers:

1. This site is allocated in the LALP for residential development with an estimated capacity of 50 dwellings. This allocation is not justified because of the harmful visual impact on the character and appearance of the local area that would result.
2. The site is an integral part of the unspoilt countryside that wraps around this part of Sandwich and as a result makes a significant contribution to the town's setting. At present the trees and the open cultivated land on the site provide a soft and attractive edge to the town. The construction of dwellings on the site and the formation of a new access on to Sandown Road would constitute an unwarranted intrusion into the countryside to the detriment of the sensitive landscape setting of this part of Sandwich. Other allocations in Sandwich endorsed in this report, including Sites LA14 and LA16, do not share the same landscape value.
3. The retention of the trees on the site, even if associated with a buffer area, and coupled with the retention of farming and woodland uses nearby, would not be able to mitigate the visual harm to an acceptable extent. The development would be particularly apparent from Sandown Road during the winter months when the existing deciduous vegetation is not in leaf. The standard of road likely to be required and the necessary sight-lines along Sandown Road would also open up views of the site and would be likely to involve tree loss. Although Sandown Road may not be heavily used by vehicles and pedestrians, and some existing housing development in the area may not be of the highest quality, this does not obviate the need to assess the visual implications of this particular allocation. Taking account of all these factors the allocation of this site is not justified. Main Modification MM24 deletes this site from the LALP and is required to make the plan sound.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful

The allocation of this site is not justified. The modification is that the site should be deleted from the Dover Local Plan to make the plan sound.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP22 - Land at Archers Low Farm, Sandwich (SAN023)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The biodiversity issue is not taken seriously enough. Local Traffic issues are seriously misjudged. Infrastructure not sufficient.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance	SAP22 should be removed from the current local plan as it was from the previous one. Full support to the local residents the want this site to be removed from the current Local Plan.

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Policy SAP22 - Land at Archers Low Farm, St Georges Road Sandwich (SAN023) Policy SP3 - Housing Growth Policy SP4 - Windfall Development Policy SP11 - Infrastructure and Developer Contributions Policy SP12 - Strategic Transport Infrastructure
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We consider that the plan is sound, but object to elements of Policy SAP22 - Land at Archers Low Farm, St Georges Road Sandwich (SAN023) and Policy SP3 - Housing Growth. These objections are set out in the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245).</p> <p>1 Introduction</p> <p>1.1 Purpose of this Representation</p> <p>1.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited and Walker Residential Limited in response to the Dover District Council 'DDC' Local Plan (Regulation 19) consultation which runs until 9th December 2022.</p>

1.1.2 We understand that DDC is in the process of preparing a new Local Plan to set out a strategy for development for the period to 2040 and that the Council are presently seeking comments on the pre-submission Plan prior to its submission for examination in early 2023.

1.1.3 Our client controls 'Land at Archers Low Farm, Sandown Road, St Georges Road, Sandwich' (hereafter referred to as 'Land at Archers Low' or 'the Site') and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.

1.1.4 It is highlighted that as part of the Regulation 18 Local Plan, the Site was allocated under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' for approximately 40 dwellings (reference SAN023).

1.1.5 The purpose of the representation is to support the allocation of 'Land at Archers Low' for a greater quantum of development and provide comment on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan, but to object to the indicative capacity set out in the policy.

1.1.6 In this regard, we remain wholly supportive of the principle of the residential allocation of the Site and agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client's Site can be made – and object (solely) to this element of the policy.

1.1.7 Accordingly, we say that Land at Archers Low can further assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.

1.1.8 Based on the current national and local planning context, we consider the Site to be a highly suitable edge-of-settlement location to allocate land for housing to help meet the need for new homes in the district and its effective use should be appropriately maximised in accordance with national policy objectives.

1.1.9 Further details regarding the Site and commentary on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan are set out in the following sections of this document.

1.2 About Fernham Homes

1.2.1 Fernham Homes Limited are a local award winning small and medium sized (SME) housebuilder, established in 1997 and has a strong track record of delivering high quality residential and mixed use developments in Kent over the last 25 years. This has been acknowledged through the receipt of nationally recognised awards, including the gold Evening Standard Awards best family home 2022 and 2019 bronze WhatHouse Best Small Housebuilder.

1.2.2 SME housebuilders are recognised in the National Planning Policy Framework ('NPPF') at paragraph 69 as making an important contribution to meeting the housing requirements of an area, and being able to build out relatively quickly. Similarly, this has also been recognised by the Planning Inspectorate. This is particularly the case with Fernham Homes, which is privately owned with access to significant resources. This provides significantly more flexibility than national and other regional housebuilders, and allows Fernham Homes to deliver housing rapidly and to a high quality, beautiful and sustainable standard (para 126 of the NPPF).

1.2.3 Fernham Homes Limited has embarked on a sustained period of growth, with an adopted and robust business plan to deliver around 300 houses per year in five years time.

1.2.4 A key element of Fernham Homes' operations is to take a very careful approach to site selection: a huge amount of due diligence is undertaken as part of this, and therefore Fernham Homes Limited only invests in those sites which meet the NPPF requirements of being available, suitable, and deliverable. As set out below land at Archers Low Farm, Sandwich ('SAP22') is firmly considered to be such a site.

1.2.5 Similarly, a key feature of Fernham Homes' approach is to work positively and proactively with local planning authorities (LPAs), both during the preparation of local plans and at planning application stage. Fernham Homes Limited are fully committed to engaging with Dover District Council in the preparation of its Local Plan, and firmly subscribe to the national policy approach set out in paragraphs 15 and 16 c) of the NPPF that "the planning system should be genuinely plan-led" and should be shaped by early, proportionate and effective engagement between LPAs and others, including businesses and developers. Accordingly, Fernham Homes Limited would welcome the opportunity to discuss the matters contained in this representation, including the availability, suitability, deliverability and capacity of land at Archers Low Farm, Sandwich ('SAP22') directly with Dover District Council members and officers, ahead of the submission of the Local Plan for examination.

1.3 Representation Structure

1.3.1 The representation structure is outlined below for ease of reference:

Chapter 2 (Consultation Background) – Sets out the context of the Dover District new Local Plan preparation, relevant national planning requirements and a summary of our current position.

Please refer to paragraph 52 of appeal decisions: APP/M2270/W/21/3283924 and APP/M2270/W/21/3288645

Chapter 3 (Legal Tests of Soundness) - Assessing whether the plan is sound, having regard to the tests of soundness outlined by paragraph 35 of the NPPF.

Chapter 4 (Duty to Co-operate) - Assessing whether the plan is sound, having regard to the duty to cooperate outlined by paragraph 24 of the NPPF.

Chapter 5 (Housing Need) - Consideration of market and affordable housing need and assessment of proposed housing allocations and supply sources.

Chapter 6 (Assessment of Suitability) - Re-introduces our client's Site and provides a summary of planning constraints and opportunities, including the quantum of development that could be accommodated, why the Site is suitable for development and why the principle of the draft allocation for residential development is both justified and consistent with the Council's strategy for growth in the district. It also sets out why we consider there is scope for a higher number of dwellings at the site. This consideration amounts to an objection to one element of the strategy – namely that those sites around the most sustainable settlements should be maximised.

Chapter 7 (Conclusion) - Summarises the key points raised throughout the representation and re-affirms our client's support for the principle of the Site's allocation and the principle of the proposed strategy ahead of the submission of the Plan for examination, and the objections in terms of capacity.

2 Dover District Council – Draft for Submission Local Plan (Regulation 19)

2.1 Consultation Background

2.1.1 DDC are required to prepare a new Local Plan, as the current suite of development plan documents were adopted in 2002, 2010 and 2015. The Core Strategy (CS) (adopted 2010) in particular has a time horizon up to 2026 and requires updating.

2.1.2 The new Local Plan will set out the vision, strategic objectives and overarching development strategy for the growth of the District over the period to 2040. It provides the planning policy framework to guide the future development of the area, addressing needs and opportunities for housing, the economy, community facilities and infrastructure, as well as the basis for conserving and enhancing the natural and historic environments, mitigating and adapting to climate change, and achieving well designed places.

2.1.3 For the avoidance of doubt, the new Local Plan, on adoption, will replace the CS 2010 and the Land Allocations Plan 2015, as well as saved policies from the 2002 Local Plan.

2.1.4 DDC's Regulation 19 Local Plan outlines the key issues that need to be addressed between now and 2040. In particular, the Plan sets out the following key planning issues for the District:

- Ensuring that new development in the District contributes to the mitigation of, and adaptation to, climate change.
- Supporting the Council to deliver its intention to be a carbon neutral district by 2050.
- Managing flood risk and coastal change.
- Ensuring that a sufficient amount and variety of land is identified to deliver a continuous supply of housing across the Plan period and that the Council maintains a five-year housing land supply.
- Delivering growth in a way that focuses development in the least sensitive areas of the District in order to conserve and enhance the District's rich natural and historic environments.
- Supporting sustainable development in rural areas to enhance the vitality of rural communities.
- Working with partners to facilitate the delivery of the Whitfield Urban Expansion.
- Ensuring a range of housing tenures, types and sizes are provided across the District to meet the needs of the local community and provide choice and flexibility in the housing market.
- Promoting economic growth, tourism, and investment in the District's Town Centres in line with the Council's Economic Growth Strategy.
- To address the impact of the COVID-19 pandemic.
- Delivering strategic transport improvements, including upgrades to the Duke of York and Whitfield roundabouts to support the scale of housing and economic growth identified in the Plan.

- Promoting sustainable transport initiatives to encourage a modal shift to more sustainable forms of transport like walking and cycling.
- Ensuring that infrastructure is delivered, in the right place, at the right time, to meet the needs of the District and support the levels of development identified in the Local Plan.
- Supporting the delivery of attractive, high-quality, design led developments and the creation of healthy, inclusive and safe communities, that are well served by good quality services and facilities to support people's lives.
- Conserving and enhancing the District's rich and diverse natural landscape, including the five international sites within the district, the Kent Downs Area of Outstanding Natural Beauty (AONB), five Sites of Special Scientific Interest (SSSIs), two National Nature Reserves (NNRs), two stretches of Heritage Coasts and two Marine Conservation Zones.
- Delivering a net gain in biodiversity in the District over the plan period.

• To promote the conservation, restoration and where appropriate the enhancement of the District's heritage assets, in order to protect their significance and to ensure that they can be best appreciated and enjoyed by current and future generations.

2.1.5 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. This submission will comment on each of the above, highlighting where we believe any areas of concern lie or where modifications may be required.

2.2 DDC's Local Development Scheme

2.2.1 The District Council has a duty to review the policies contained within the development plan every five years. The 2014/2015 Authority Monitoring Report signalled the need to review key parts of the Council's adopted CS evidence base.

2.2.2 The Council's Local Development Scheme (LDS) first outlined the delivery timetable for the Local Plan Review (LPR) in the March 2017 publication. Since then, the LDS has been updated on an annual basis. The most recent September 2022 LDS summarises that following the preparation of the principal evidence base documents, the Local Plan Review Regulation 18 consultation took place for 8 weeks in January 2021. The Regulation 19 consultation was scheduled for 7 weeks during Q4 of 2022 and is the subject of this representation.

2.2.3 Moving forward, submission of the Plan is anticipated in Q1-2 2023 with the Examination in Public in Q3-4 2023. The new Local Plan is currently scheduled for adoption in 2024.

2.2.4 As planned, DDC are now undertaking the Regulation 19 Draft Local Plan Consultation, for which this submission is made

3 Legal Test of Soundness

3.1 Legislation and Guidance

3.1.1 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. It is a statutory requirement that every development plan document must be submitted for independent examination to assess when it is "sound", as well as whether other statutory requirements have been satisfied (s.20(5) of the 2004 Act). By s.19 of the 2004 Act, in preparing a development plan document a local planning authority must have regard to several matters including national policies and advice contained in guidance issued by the Secretary of State. Such guidance currently exists in the form of the NPPF and is summarised below. This states that Plans must be:

(a) Positively Prepared: based on a strategy which seeks to meet objectively assessed development and infrastructure requirements

3.1.2 This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The NPPF set out principles through which the Government expects sustainable development can be achieved.

(b) Justified: an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence

3.1.3 This sets out the requirement that the Local Plan should be based on a robust and credible evidence base involving:

I. Research/fact finding: the choices made in the plan are backed up by facts.

II. Evidence of participation of the local community and others having a stake in the area.

3.1.4 The Local Plan should demonstrate an appropriate strategy, taking into account reasonable alternatives and based on proportionate evidence. These alternatives should be realistic and subject to sustainability appraisal. The Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.

(c) Effective: deliverable over its period based on effective joint working on cross-boundary strategic priorities

3.1.5 This makes clear that the Local Plan should be deliverable, requiring evidence of:

- Sound infrastructure delivery planning;
- Having no regulatory or national planning barriers to delivery;
- Delivery partners who are signed up to it; and
- Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.
- The new Local Plan should be flexible and able to be monitored.

3.1.6 The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the Local Plan should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.

d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national policy.

3.1.7 This submission comments on each of the above in further detailing, highlighting areas of support and where modifications are required as appropriate.

3.2 Legal Compliance

3.2.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

3.2.2 In addition to the above, the NPPF states² that: "Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that:

a) all plans should promote a sustainable pattern of development that seeks to: meet the development needs of their area; align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects;

b) Strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

(i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or

Paragraph 11, NPPF 2021

(ii) Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole."

3.2.3 In addition, to the above, the NPPF states³ that Plans should:

a) be prepared with the objective of contributing to the achievement of sustainable development;

b) be prepared positively, in a way that is aspirational but deliverable;

c) be shaped by early, proportionate and effective engagement between plan-makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;

d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;

e) be accessible through the use of digital tools to assist public involvement and policy presentation; and

f) serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).

3.2.4 It is important to note that the NPPF4 requires strategic policies to set out an overall strategy for the pattern, scale, and design quality of places, and make sufficient provision for:

a) housing (including affordable housing), employment, retail, leisure and other commercial development;

b) infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat);

c) community facilities (such as health, education and cultural infrastructure); and;

d) conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation.

3.2.5 It is clear from the above, that any local plan should set out a comprehensive and cohesive approach to future development.

Paragraph 16, NPPF 2021

Paragraph 20, NPPF 2021

4 Duty to Co-Operate

4.1 Legal and NPPF Requirements

4.1.1 Section 33A of the Planning and Compulsory Purchase Act 2004 sets out a statutory 'Duty to Cooperate' (DtC) – i.e. a legal obligation - to all bodies as prescribed by Regulation 4 of the Town and Country Planning (Local Planning) England Regulations 2012 (the Regulations).

4.1.2 The duty requires DDC to cooperate with other persons to 'maximise the effectiveness' with which named activities are undertaken. Those activities include the preparation of development plan documents (such as this Local Plan document) and activities that support that activity 'so far as relating to a strategic matter'.

4.1.3 A strategic matter is defined by S33A(4) in summary as: (a) 'sustainable development or use of land that has or would have a significant impact on at least two planning areas' (a planning area in this case is the area of a borough or district council); and (b) 'sustainable development or use of land in a two tier area' (as this is) 'if the development or use (i) is a county matter, or (ii) has or would have a significant impact on a county matter'. County matters broadly relate to minerals and waste and associated developments as defined by Paragraph 1 of schedule 1 to the Town and Country Planning Act 1990 (as amended).

4.1.4 Section 33A (7) requires DDC (and persons subject to the DtC) to have regard to any guidance issued by the Secretary of State about how the duty is to be complied with. In that regard Paragraph ID 9-004-29140306 of the Government's Planning Practice Guidance (PPG) confirms amongst other things that the DtC is not a duty to agree (albeit that local planning authorities should make every effort to secure the necessary cooperation on strategic cross border matters before they submit local plans for examination).

4.1.5 The NPPF establishes that effective and on-going joint working is an integral part of the plan making process that will, amongst other things, determine whether development needs that cannot be met wholly within a plan can be met elsewhere. The NPPF goes on to state at paragraph 27 that in order to demonstrate effective and on-going joint working strategic policy making authorities should: "... prepare and maintain one or more statements of common ground documenting the cross-boundary matters being addressed".

4.1.6 In addition to the District's own housing pressures, part of the DtC involves considering whether neighbouring authorities' unmet housing need can be accommodated. It is worth highlighting that recent amendments to the London Plan have identified that the City's housing need has become increasingly more difficult to deliver and therefore areas outside London will be faced with

having to absorb more of London's housing need. Consequently, DDC has a duty to explore whether it can accommodate some of this overspill of London's unmet need.

4.2 Assessment of DDC's discharging of the Duty to Co-operate

4.2.1 It is recognised that work to discharge the DtC remains ongoing by DDC and will continue prior to submission as part of the preparation of the Local Plan evidence base.

4.2.2 Notwithstanding the above, at this stage it is understood that DDC have engaged with the members of the East Kent Regeneration Board including neighbouring East Kent planning authorities, Kent County Council (KCC) and its subsidiary departments:

- Folkestone and Hythe District Council
- Canterbury City Council
- Thanet District Council
- KCC
 - KCC Highways & Transportation
 - KCC Minerals & Waste
 - KCC Heritage Conservation
 - KCC Flood & Water Management
 - KCC Natural Environment & Coast
 - KCC Infrastructure including Education

4.2.3 In February 2016, the Council adopted a Memorandum of Understanding (MOU) in respect of the DtC between the East Kent Regeneration Board members. A review of the MOU took place and was agreed in January 2021.

4.2.4 The East Kent MOU sets out the framework in which the authorities will work together on strategic issues and will actively engage. It forms the overarching framework and context within which Statements of Common Ground (SoCG) will be agreed between individual authorities.

4.2.5 Further engagement is also confirmed to have taken place between the following prescribed bodies and other relevant bodies:

- Environment Agency
- National Highways
- Historic England
- Natural England
- Network Rail
- NHS Kent and Medway Clinical Commissioning Group (CCG) – now known as Integrated Care Board (ICB) since July 2022
- Kent Downs AONB Unit
- Other infrastructure providers

4.2.6 Whilst work remains ongoing, at this stage it is understood that SoCGs have been agreed and signed between the following parties:

- DDC and Folkestone & Hythe District Council
- DDC and Canterbury City Council
- DDC and Thanet District Council
- DDC and Kent County Council
- Dover District Council and National Highways

4.2.7 As part of the DtC Evidence Base documents, DDC prepared a detailed DtC Statement (dated September 2022) which sets out a summary of the engagement that has taken place, firstly by organisation, and then by issue. Whilst the statement focuses on strategic issues and duty to co-operate bodies it also includes information relating to engagement on non-strategic issues and co-operation with other bodies that are not prescribed by the regulations. In addition, Appendices 1, 3 and 4 identify the main meetings and other correspondence that has taken place throughout the plan making process.

4.3 Summary

4.3.1 On account of the above and the documents published within the Council's Local Plan Evidence Base, we are satisfied that the Council as the strategic policy making authority has demonstrated effective and on-going joint working with neighbouring authorities, the county council, prescribed bodies and other relevant bodies. Further, we agree that DDC has prepared and maintained SoCG documenting the cross-boundary matters being addressed in accordance with the Framework and the DtC may be discharged by the Planning Inspector under Section 20(5) (c) of the Planning and Compulsory Purchase Act 2004.

4.3.2 Without prejudice to the above, should ongoing work by the Council result in significant changes in circumstances such that the signed SoCGs may be amended or withdrawn, our client reserves the right to alter their consultation response accordingly and be present at the examination of the Plan to discuss further.

5 Housing Need

5.1 Context

5.1.1 Paragraph 11 of the NPPF is explicit in its requirement for strategic policy-making authorities to promote a sustainable pattern of development that seeks to meet the need in full.

5.1.2 Paragraph 20 of the Framework is equally clear that strategic policies should set out an overall strategy for the pattern, scale and design quality of places. Policies should make sufficient provision for the development that is required as well as associated infrastructure, community facilities and should set out a strategy for the conservation and enhancement of the natural, built and historic environment.

5.1.3 Given this national planning context, the emerging Local Plan should provide a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic environment.

5.1.4 National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate.

5.1.5 In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.

5.1.6 Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.

5.2 DDC's Housing Need

5.2.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover District of 596 dwellings per annum. However, the affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total housing need of 10,998 dwellings for the Plan period to 2040. We understand that the Regulation 19 Local Plan seeks to meet this need in full and in addition to the minimum figures, DDC have set an appropriate contingency buffer of 926 dwellings of the Plan period, equating to 8.4% of the total Plan period figure.

5.2.2 For context, the current adopted CS requirement is 700 dwellings per annum. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.

5.2.3 For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate sufficient land to accommodate a minimum of 6,642 new homes over the remaining plan period to 2040. It is understood that this will be derived from the following sources:

- Whitfield Urban Expansion Allocation: 2,200 dwellings
- Local Plan Allocations (excluding Whitfield): 3,392 dwellings
- Windfall Allowance (70 a year from year 4): 1,050 dwellings

5.2.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target. Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs AONB, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, meeting Dover's housing needs inevitably will require the release of significant greenfield land.

5.2.5 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Sandwich, represent the most sustainable and reliable sources of growth for the Plan period, consistent with the overarching strategic objectives of draft policy SP3 within the emerging Plan. Such sites are best placed to deliver the significant number of new homes that are required and are most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the District as well as further balancing the role of strategic-scale development at Whitfield within the emerging Plan's proposed growth pattern.

6 Site Specific Assessment

6.1 Overview

6.1.1 The previous chapters of this representation (Chapter 3-5) outline our client's position relating to the soundness of the Plan in which our client is confirmed to be supportive in principle of the Local Plan as a sound strategy for the growth of the district to 2040. It is clear that Sandwich must continue to form a principal location for focusing sustainable housing delivery in Dover district and will assist in ensuring an appropriate balance of sites are identified, capable of supporting the strategic role of Whitfield within the forthcoming Plan Period.

6.1.2 As introduced in the preceding sections, Fernham Homes Limited and Walker Residential Limited control 'Land at Archers Low, Sandwich' and are continuing to promote the residential allocation of the Site. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.

6.1.3 As aforementioned, the Site was allocated in the Regulation 18 Local Plan for approximately 40 dwellings under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' (reference SAN023).

6.1.4 Notwithstanding our client's support of the draft allocation within the Regulation

19 Plan in principle, we suggest that the policy text be re-visited prior to submission, to allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential. It is submitted that the SAP22 policy wording should be amended to more accurately reflect the capability of the Site to accommodate approximately 40 - 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.

6.1.5 Fernham Homes Limited and Walker Residential Limited are fully committed to the delivery of the Site within the next five years, and subject to a grant of planning permission in Spring 2023 – please see below – anticipate starting developing on site in 2023. Indeed, for the avoidance of doubt it is confirmed that Fernham Homes Limited and Walker Residential Limited have previously submitted a planning application ('ref: 22/00274') for the residential development of the Site for 44no. dwellings with associated access, parking, open space, landscaping, drainage, and infrastructure. (Amended plans and details).

6.1.6 Following a positive recommendation to grant planning permission by Officers at the DDC Planning Committee, the application was refused following consideration at Planning Committee on 31st March 2022. The application is now the subject of an appeal with a date confirmed for a two day hearing on the 17th - 18th January 2023. The site layout is shown in Figure 6.2.

6.1.7 For the avoidance of doubt, our client's support of the proposed allocation, subject to their objection to the capacity and considerations that it can accommodate an increased capacity of approximately 40 – 45 dwellings, is made without prejudice to the ongoing appeal. Should the appeal be allowed, this would realise the delivery of the residential allocation in accordance with the policy requirement (albeit more dwellings), which is consistent in its key elements with the submitted appeal scheme.

6.2 Site and Surroundings

6.2.1 The Site is situated to the southeast of St. George's Road and southwest of Sandown Road, on the southern edge of Sandwich.

6.2.2 The Site is a predominately undeveloped parcel of land totalling approximately

2.37 hectares, with tall and dense hedge and tree planting around the perimeter of the Site and an existing agricultural access point off St Georges Road to the north-west of the Site

6.2.3 The Site comprises a level enclosed field mainly formed of uniform improved grassland bounded on all sides by trees mixed in age, species, condition and character. There are also semi-derelict agricultural buildings in the southwest corner.

Figure 6.1: Site Location Plan (Drawing no. 29923A/01)

6.2.4 The Site comprises a level enclosed field mainly formed of grassland bounded on all sides by trees mixed in age, species, condition and character. There are also semi derelict agricultural buildings in the southwest corner.

6.2.5 The Site is bounded by existing residential development along St Georges Road to the north and west, undeveloped land to the east and south, Sandown Road to the north-east and a small area of residential development fronting Sandown Road further to the east of the Site.

6.2.6 The Site enjoys access to a number of local facilities and services which are within a reasonable walking distance, including schools, local shops, healthcare, employment, and public transport links. The Sir Roger Manwood Secondary School, Sandwich railway station and the historic town centre (including convenience stores) are all located within 800m of the Site. Sandwich Junior School and the local supermarket are located just over 800m from the Site. Larger shops and supermarkets are available in the local area, including Westwood Cross

8 miles to the north and Deal, 6 miles to the south. In terms of planning constraints, a Tree Preservation Order (TPO) protects trees on the northwest boundary of the Site and the belt of trees bounding the northeast and southeast.

6.3 Development Capacity

6.3.1 For the purposes of this representation, Land at Archers Low Farm, Sandwich is submitted with capacity for approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), as part of a high- quality, landscape-led residential scheme capable of delivery early in the Plan period.

6.3.2 Significant work has already been advanced by the project team as part of the submitted planning application and the subsequent appeal in which the proposed development has been informed following a thorough analysis of the Site opportunities, constraints and surroundings. The key design principles have been to create an attractive, permeable and legible layout set with a strong landscape framework, utilising existing landscape features, to accommodate a mixture of high-quality and attractive homes, of a scale and design that reflect its setting and surroundings.

6.3.3 In summary the vision for the Site is to create a high quality residential development which includes:

Circa 40 – 45 no. residential dwellings, comprising 30% Affordable Housing and a mixture of 2, 3 and 4 bedroom properties.

A series of open spaces that perform multiple functions including informal space, a local area of play (LAP), ecological mitigation areas and incorporation of native and wildflower meadow planting.

Retention of trees on the northern and southern boundaries and the provision of new woodland planting. This will include proactive management of the retained and proposed woodland belts to encourage structural and species diversity and improve the overall health and longevity of these assets. The provision of significant biodiversity net gain is envisaged, and has been demonstrated can be delivered through the application and appeal.

Low key principle vehicular access point onto Sandown Road through landscaped entrance with trees and vegetation maintained, introduction of wildflower planting.

Footpath connectivity onto St Georges Road.

Tree lined connecting avenue creating strong legibility and navigation throughout the layout.

Figure 6.2: Proposed Site Plan as amended in December 2021 (Produced by Clague Architects – Drawing no. 29923A/11)

6.3.4 For context, at the time of determination of application ref: '22/00274', full planning permission was sought for the erection of 44 dwellings, together with associated access to Sandown Road, a pedestrian crossing point on St Georges Road, parking, open space, landscaping, drainage, and infrastructure works.

6.3.5 It is highlighted that draft policy PM1 seeks to provide a density typically between 30-50 net dwellings per hectare (dph). In this respect, it is highlighted that at 45 dwellings, the Site would provide a density of approximately 22.5 dph. Whilst it is acknowledged that lower density development may be more appropriate in edge of settlement locations, this demonstrates that even at a capacity 45 dwellings, the density is relatively low. Furthermore, as part of the previous application 22/00274, DDC confirmed at paragraph 2.23 of the Committee Report that subject to a detailed assessment of visual impacts, a proposed scheme of 44 dwellings on the Site is considered appropriate.

6.3.6 The above proposed Site plan submitted during the determination of the application demonstrates the capability of the Site to comfortably accommodate circa 40 – 45 residential units, together with significant boundary and internal landscaping elements.

Draft Allocation in the Regulation 18 Local Plan:

6.3.7 As aforementioned, the Site was proposed to be allocated for a capacity of approximately 40 dwellings in the Regulation 18 Local Plan under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' (reference SAN023).

6.3.8 The Site was considered as part of DDC's Housing and Economic Land Availability Assessment (HELAA) (December 2020) for the development of approximately 40 dwellings. The summary of suitability as provided by DDC is summarised as follows:

- The Site is in an Area of Archaeological potential and a Heritage Assessment will be required.
- The Site clips Flood Zone 2 and 4, along the boundary and an FRA would need to be undertaken.
- The Site was removed from the LALP (Local Allocations Local Plan) by the Inspector on landscape grounds, however, with the provision of an enhanced landscape buffer to the east, south and west of the site to provide year-round screening, it is considered that the impact on the landscape can be mitigated. The housing number on the site has also been reduced to address landscape concerns.
- Access to this site would be possible via Sandown Road, however vehicle access onto St Georges Road is likely to be challenging due to limited footway width and subsequent sightline requirements, so would need to be restricted to emergency/pedestrian access only.
- The provision of 40 dwellings is unlikely to create a severe impact on the surrounding highway network, however St Georges Road and Sandown Road (including Knightrider Street and the route to the High Street/Quay) are subject to constrained geometry due to on street parking, as such, a review on-street parking controls may be required to manage any increase in traffic-flow.
- There is a general concern over the potential cumulative impact of development in and around Sandwich and on routes within the town, which should be considered as part of future traffic modelling exercises.
- A Transport Assessment is required.
- Further information should be provided to demonstrate that access is achievable. However, cumulative impact on the highways network needs to be assessed.

6.3.9 At the time, owing to the matters set out above the Site was considered 'Amber' in the reg/amber/green (RAG) rating. However the clients have since demonstrated within the planning application and subsequent appeal submission that the proposed development for 44 dwellings would address the queries above.

6.4 Draft Policy Allocation 'Land at Archers Low Farm, Sandwich Road, Sandwich' (SAP22)

6.4.1 As introduced in the preceding sections, our client's Site at Archers Low is allocated for residential development within the Dover Pre-submission (Regulation 19) Local Plan. For ease of reference, the draft policy wording is as follows:
 "SAP22 – Land at Archers Low Farm, St Georges Road, Sandwich (SAN023)

The Site, Land at Archers Low Farm, St Georges Road, Sandwich, as shown on the policies map is allocated for an indicative capacity of 35 dwellings.

Development proposals for the Site shall include the following:

- a) Development should be laid out to protect the residential amenity of the existing residential properties to the north-east and designed to take account of the character of the Sandwich Walled Town Conservation Area;
- b) The existing trees on the boundaries of the site should be retained and enhanced to mitigate the impact of development on the landscape and provide opportunities for biodiversity habitat creation and enhancement;
- c) Trees which need to be removed to enable an access to be provided to the site, shall be kept to the minimum needed to provide necessary visibility, and will be required to be replaced on-site;
- d) The layout of the scheme should provide a sufficient buffer between the existing mature trees on the site and residential properties, to ensure appropriate residential amenity for future residents and the protection of existing trees once the site is developed;
- e) A site-specific Flood Risk Assessment must be carried out in accordance with Policy CC5, including a comprehensive investigation into surface water flood risk. This shall also inform the application of the Sequential Approach to the layout of the site by locating the most vulnerable elements in the lowest risk areas;
- f) Primary vehicular, pedestrian and cycle access to the site shall be provided from Sandown Road;
- g) In accordance with Policy SP13 a wintering bird survey must be undertaken in advance of a planning application on the site. If the bird survey identifies that the development will exceed the threshold of significance, mitigation will be required. A suitable scheme of mitigation will need to be submitted with the planning application for the site;
- h) Environment assessment study required to address any potential impact on the Sandwich Bay SPA and Ramsar;

i) A Heritage Assessment, to include appropriate archaeological investigations must be carried out in accordance with Policy HE1 and Policy HE3, the results of which should inform the layout and design of the development which is necessary to avoid harm to any heritage assets identified through the assessment; and

j) The occupation of the development should be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider. Development should provide a connection to the sewerage system at the nearest point of adequate capacity.”

6.4.2 To be clear, our client remains wholly supportive of the allocation of the Site for residential development and is committed to delivering the Site early in the Plan period (start on site in 2023). We agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client’s Site can be made – and therefore object to the capacity identified.

6.4.3 Accordingly, we say that Land at Archers Low can further assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.

6.4.4 It is submitted that the SAP22 policy wording should be amended to reflect the capability of the Site to accommodate approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.

6.5 Strategic Justification for Development

Spatial Strategy

6.5.1 The proposed Housing Distribution for the district across the Plan period is established within Policy SP3 ‘Housing Growth’ which sets out that the distribution of housing growth in the district is primarily based on the settlement hierarchy and influenced by site availability, environmental constraints and factors of delivery.

6.5.2 Rightly, a key aim of the growth strategy is to focus development in the least sensitive areas of the district in order to conserve and enhance the Dover’s rich natural and historical environment.

6.5.3 A retained theme from the adopted Plan, is that the Council’s settlement strategy continues to focus on the development and regeneration of Dover Town and Whitfield (3381 dwellings). Approximately half of the district’s planned housing is in this location, the majority of which again is to come forward as part of the strategic urban expansion of Whitfield ‘SAP1’ (2200 minimum dwellings).

6.5.4 Development will then be focused in the District Centre of Deal (223 dwellings), and the Rural Service Centres of Sandwich (227 dwellings) and Aylesham (649 dwellings). Following the settlement hierarchy rigidly would distribute housing in the preceding order, however the Plan recognises that housing delivery in Deal and Sandwich continues to be constrained by a number of factors including flood risk, ecological designations, heritage and highways. Further, Deal has experienced generally high levels of windfall development across the previous Plan period and accordingly there is now a dwindling supply of available, suitable sites in both settlements. On account of this context, the Council have sought to direct the majority of the remaining higher order settlement growth (outside of Dover & Whitfield) to Aylesham, through the strategic expansion to the town.

6.5.5 Outside of the four principal district settlements, the Rural Settlement Hierarchy (August 2022) identified that the majority of lower-order settlements in the district emerge as having a low level of facilities within the hierarchy and six settlements having none of the key indicators of sustainable services. Plainly, these settlements offer very limited opportunities for growth and it is evident that the forthcoming Plan will be reliant on the settlements of Dover (including Whitfield), Deal, Sandwich and Aylesham to deliver the housing growth that is required.

6.5.6 We further note the findings of the Strategic Housing Market Assessment (2017) which identified that Sandwich and the north is the most expensive part of district with median property prices for all sizes of homes significant in excess of prices in Deal and Dover town and the south. It is suggested that issues of unaffordability are most likely to effect entry-level properties and result in existing residents being forced to seek more affordable properties elsewhere in Dover district or neighbouring authority areas.

6.5.7 Given this context, it is clear that where available and suitable opportunities for residential development do exist within the district’s higher order settlements, including our client’s Site at Land at Archers Low which can provide a policy compliant level of affordable housing, it is imperative that the effective use of these sites are appropriately maximised in accordance with draft policy SP3 of the emerging Plan and national policy objectives.

6.5.8 Notwithstanding our client’s in principle support or the proposed strategy, we are concerned that highly sustainable, edge-of-settlement sites, particularly in higher tier settlements such as Sandwich have not been fully maximised to reflect their accessible location and capability to accommodate a greater quantum of development. On this basis, we are concerned that the strategic objectives underlying draft policy SP3 ‘Housing Growth’ may not be fully realised, to the detriment of market and affordable housing delivery and the wider policies seeking to conserve and enhance the district’s natural and historic environment.

6.5.9 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Sandwich, and this has not been undertaken – for example at Land at Archers Low, where it has previously been demonstrated that the site has sufficient capacity to deliver approximately 5-10 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

Greenfield Development and Consistency with Housing Trajectory

6.5.10 Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs Area of Outstanding Natural Beauty, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, release will be required if the Council is to meet its housing and development commitments moving forward.

6.5.11 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Sandwich, represent the most sustainable and reliable sources of growth for the Plan period, to support the role and timescales of strategic urban extensions and to deliver the significant number of new homes that are required within the forthcoming Plan period.

6.5.12 Moreover, greenfield edge-of-settlement sites are, in our experience, typically most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the district.

6.5.13 The Sustainability Appraisal Scoping Report (2018) sets out that over the course of the adopted Plan period, the key sustainability issues facing Dover District in relation to housing are as follows:

Population growth, household growth and demographic change will place additional demand on key services and facilities such as housing, health, education and social care. The Local Plan offers a new opportunity to manage these pressures, encouraging mixed communities;

There is a need for affordable housing across the District. At present, the mean price of dwellings is higher than the national average. The Local Plan will help to expedite its delivery; and,

There is the need for a mix of housing types that cater for the needs of a range of people, including the growing number of single person and elderly households. Without an up-to date Local Plan, the required housing is less likely to be delivered.

6.5.14 It is evident that the new Dover Local Plan must allocate a mix of reliable sites capable of steadily delivering not only the quantum of housing that is required, but also the associated public infrastructure, affordable housing and a mix of unit types and tenures suitable for a wide range of future occupants.

6.5.15 The Housing Topic Paper (September 2022) provides further context and summarises under Chapter 7 'Historical Housing Delivery' that Dover has historically placed significant reliance on windfall development over the current adopted Plan period, with windfall sites accounting for 44% of all completed dwellings over the preceding 10-year period.

6.5.16 Moreover, it is highlighted that at the beginning of the 10 year period, the majority of new dwellings were being built on brownfield land. However, from the monitoring year 2013-14 onward development on greenfield land began to play a much greater part in the location for new development as show in figure 1 below. This trend of increased housing development on greenfield land is a result of the allocations within the CS and Land Allocation DPD being built out and is associated with an approximate doubling of completions in the district. From 2013-14 onwards the average number of completed dwellings per annum has doubled to that of the early years of the CS, as the strong delivery rates of greenfield sites form the predominant source of housing. This is despite an overall declining trend of brownfield completions towards the latter half of the Plan period. This is generally not an uncommon trend in the majority of local planning authorities areas, where opportunities for available and suitable sites in urban centres dwindle throughout the Plan period.

Figure 1: DDC Brownfield / Greenfield Completions 2010/11 to 2020/21 (source: Housing Topic Paper September 2022)

6.5.17 In light of the above context, it is clear that the adopted Dover Local Plan suffered from an initial under delivery of Plan-led housing growth in which windfall development sources were largely required to take up the slack in the early phases of the Plan period, as major allocated sites failed to deliver at the rates initially expected.

6.5.18 It is equally apparent that initial slow completion rates were quickly addressed once greenfield allocations commenced development, feeding into strong completions in the latter half of the Plan period. In our experience, greenfield sites are typically associated with stronger delivery rates and provide a reliable source of housing growth. The allocation of an appropriate mix of sites and scales is required in order to ensure steady and sustained Plan-led housing delivery across the Plan period and to avoid a reliance on windfall development to address the shortfall.

6.5.19 Consequently, given all of the above, it is imperative that the new Local Plan allocates a sufficient variety and scales of site capable of both ensuring steady and sustained housing completions and capable of making necessary contributions to public infrastructure and services, affordable housing and mix of unit types to address the key issues raised in the Sustainability Appraisal.

6.5.20 In our view, edge-of-settlement greenfield sites such as our client's Site Land at Archers Low represents the most reliable and sustainable source of housing delivery for the Plan period. Such sites are typically less constrained by wider factors and less affected by unforeseen delays such as land contamination. Moreover, greenfield sites typically are more capable of delivering the policy compliant affordable housing, unit mix and developer contributions that are urgently needed and in the case of our client's Site, have already been demonstrated within the present planning application and appeal submission.

6.5.21 It is understood that the Plan is predicated on the delivery of strategic scale development at Whitfield comprising the development of circa 2,200 new homes. Consequently, in order to avoid a repetition of the previous Plan, the Council have sought to ensure that a pool of reliable greenfield allocation, including that of our client's are included within the Plan, capable of delivering the early growth that is required within the housing trajectory prior to the commencement of major allocations later in the Plan period.

6.5.22 We note that within the Housing Trajectory 'Appendix D', the Council have included allocated units from Years 4 onwards, with extant permissions (accounting for 5% non-implementation) demonstrated to be solely capable of delivering the growth required in Years 1-3. Notwithstanding our client's commitment to commencement on site in 2023 and the initial delivery of units at Land at Archers Low in 2024 (subject to successful appeal), we support this pragmatic approach and suggest this represents a sound basis on which to set the district's housing trajectory. We note also the inclusion of an appropriate windfall allowance and the included contingency buffer to further ensure reasonably flexibility in the housing supply.

6.5.23 On account of all of the above, we submit that the allocation of Land at Archers Low forms part of a sound strategy for growth in the district for the forthcoming Plan period. Land at Archers Low is capable of delivery early in the Plan period, representing a reliable source of housing growth in a highly sustainable and accessible location adjacent to the existing settlement boundary of Sandwich, consistent with the Council's preferred settlement strategy. However, we object on the submission that the Site is capable of making a greater contribution to the district's housing need and suggest an amended wording of the policy to allocate the Site for approximately 40-45 dwellings. Nonetheless, the Site is unconstrained and capable of providing a high-quality residential development including a mix of unit types and tenures, a meaningful contribution to the supply of affordable housing and contributions to public services and infrastructure, benefiting both existing residents and future occupiers.

Policy SP4 'Windfall Development'

6.5.24 Separately, we note the provisions of policy SP4 windfall development. Proposals at Land at Archers Low would likely be acceptable in principle under this provision and we support the policy inclusion for appropriate, proportionate windfall development.

6.5.25 Our client is fully committed to the delivery of the Site which is available and suitable for delivery early in the Plan period and is presently pursuing an appeal on the Site for a greater quantum of units than the allocation in the Regulation 19 Plan. There is consequently little to be gained from potentially delaying delivery of the Site by withdrawing the allocation. Notwithstanding the provisions of SP4, it is reiterated that our client fully supports the allocation of the Site under SAP22 for residential development as the most appropriate mechanism for delivery of the Site and the opportunity for genuinely Plan-led development in Sandwich and the provision of associated benefits to public services and infrastructure, contribution to affordable housing supply and the delivering of a mix of house types and tenures.

Infrastructure Delivery

6.5.26 Paragraph 11 of the Framework is clear that all plans should promote a sustainable pattern of development. This includes aligning growth and infrastructure. Paragraph 20 goes on to confirm that strategic polices will be expected to make sufficient provision for associated development infrastructure.

6.5.27 In this regard, draft policies SP11 'Infrastructure and Developer Contributions' and SP12 'Strategic Transport Infrastructure' of the emerging Plan form the key strategic polices for infrastructure delivery. We agree that where development would create a need, or would have an impact, or would exacerbate an existing deficiency in infrastructure provision, appropriate developer contributions may be sought.

6.5.28 It is however emphasised that in all developments, infrastructure requirements must be demonstrated to be necessary through assessment during determination of the application on a case-by-case basis. Where new development is proposed, it does not automatically follow that major infrastructure contributions are always required or contribution to strategic infrastructure proposals are appropriate. For instance, it is our client's view that any infrastructure requirements must be demonstrated through a robust and transparent assessment at application stage, taking into account the submission of detailed supporting evidence, for example following consideration of the Transport Assessment in the case of highway infrastructure contributions.

Alignment with Sustainability Appraisal Findings

6.5.29 As part of the preparation of the Local Plan, the Council has identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA) which provides an assessment of how different options perform in environmental, social and economic terms, to help inform which option should be taken forward and combined with wider evidence documents, have been used to determine the growth and spatial strategy set out in the Plan.

6.5.30 Five potential distributions of growth were identified during preparation of the draft Regulation 18 Local Plan:

- Spatial Option A: Distributing growth to the District's suitable and potentially suitable housing and employment site options (as needed to deliver the scale of growth required).
- Spatial Option B: Distributing growth proportionately amongst the District's existing settlements based on their population.
- Spatial Option C: Distributing growth proportionately amongst the District's existing settlements based on the District's defined settlement hierarchy.
- Spatial Option D: Distributing growth in the same way as the adopted Local Plan, focussing most growth in and around Dover town.
- Spatial Option E: Distributing growth more equally across the District's settlements: Dover, Deal, Sandwich and Aylesham, as well as the rural villages.

6.5.31 The conclusion of the SA was that Spatial Options C (settlement hierarchy) and D (adopted Core Strategy with Dover focus) generally perform the most strongly against the SA objectives, particularly when delivering the baseline growth scenario. However, given the environmental constraints that exist around Deal and Sandwich, very few suitable and potentially suitable sites have been identified in these towns. Given this, the Council's preferred option for the distribution of housing and economic growth comprises a combination of options A (HELAA sites), C (settlement hierarchy) and D (Dover focus). The distribution of housing and economic growth in the District is therefore primarily based on the settlement hierarchy, and influenced by site availability, environmental constraints and factors of delivery.

6.5.32 On account of the above, our client agrees that the proposed growth strategy, and by extension, policy SP3 in principle represents a sound and evidence-led strategy for growth. However, given the clear acknowledgement of the dwindling supply of available sites in the higher order settlements of Deal and Sandwich, which has necessitated a minor deviation from the strongest performing spatial options, we submit that where sites are available and suitable for development in Deal and Sandwich, these must be fully maximised, reflecting their accessible location and their ability to reduce the need to develop into less accessible and more sensitive sites elsewhere in the district to accommodate the growth that is required.

Site Specific Sustainability Appraisal

6.5.33 Land at Archers Low Farm, St George's Road, Sandwich is included under HELAA reference 'SAN23' within the SA Site Assessment (Appendix F). The site performs strongly, with particular positives identified with regards to SA Objectives related to housing, accessibility, the economy, sustainable transport and climate change mitigation, in large parts due to the edge-of-settlement location and proximity of the site to key services in Sandwich.

6.5.34 We note negatives associated with the development of a greenfield site, including loss of agricultural land, however this would be true of the majority of greenfield sites and it is abundantly clear that Dover's housing need cannot be met solely on brownfield sites. We note also minor negatives / uncertain associated with biodiversity, the historic environment and landscape, however it is not clear whether these take into account the high-quality design, biodiversity enhancement and landscape mitigation proposed under the application/appeal. Irrespective, these are not considered to outweigh the clear and tangible sustainability benefits associated with edge-of-settlement development and the site's consistency with the preferred spatial options.

Summary

6.5.35 Taking all of the above into consideration, our client is wholly supportive of the inclusion of land promoted at Archers Low, as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered wholly consistent with the objectives of the Plan and forms part of a sound evidence-led growth strategy consistent with the recommendations of the Sustainability Appraisal for the district to 2040, subject to the sole objection in relation to capacity.

6.6 Deliverability

6.6.1 Prior to the current appeal proposal, the Site has had no planning history of a residential nature or a history of unimplemented permissions. There are not considered to be any impediments to the Site being allocated for development commencing within the first five years of the Plan period. Combined with an appropriate number and scale of wider allocations in Sandwich and elsewhere across the district, this would ensure steady delivery of housing in Dover district across the majority of the Plan period and support the role and timescales of strategic housing delivery at Whitfield towards the latter half of the Plan period.

6.6.2 Fernham Homes Limited – a local SME with a strong history and track record of delivery, together with an adopted and robust business plan for growth – has control over the site, and are poised to commence work on its residential development very promptly after the receipt of planning permission, potentially (subject to the successful outcome of the current appeal) in 2023. Delivery of housing is expected from 2024.

6.6.3 For the reasons set out in this representation, the Site is considered suitable for the residential development of approximately 40 – 45 dwellings. The Site is adjacent to the urban area of Sandwich, one of the four higher order settlements in the district and the Council's preferred locations for Plan-led growth within the district. Development at Land at Archers Low would form a natural and logical development east of Sandwich with excellent accessibility to day-to-day services and amenities via active travel modes within Sandwich itself and convenient access to public transport infrastructure (including Sandwich train station) for onward travel to key neighbouring settlements including Dover, Ramsgate, Canterbury and Ashford.

6.6.4 Finally, in respect of suitability, there are no physical limitations or problems such as access, infrastructure, flood risk, hazardous risks, pollution or contamination.

6.6.5 On behalf of the landowner, we submit that there are no known financial restrictions that would impact upon the viability of a future housing scheme or that would prohibit development coming forward within the early stages of the Plan period. To the contrary, we consider there to be an opportunity to deliver a high-quality, sustainably located residential development scheme consistent with the Council's proposed growth strategy comprising an appropriate mix of market and affordable housing and capable of contributing to a range of community facilities, public infrastructure and services locally.

6.6.6 Given the advanced nature of the proposals by virtue of the submitted planning application, in terms of specific timescales, should the ongoing appeal be allowed, we understand that Fernham Homes Limited and Walker Residential Limited are capable of commencing work on-site in early 2023, with delivery in 2024 and completion of the Site anticipated in 2025.

6.6.7 The Site is in single ownership and there are no complicated legal agreements or covenants that would prohibit the ability to bring forward the Site early in the Plan period. The Site is therefore considered available and achievable for the purposes of the tests of deliverability.

7 Conclusion

7.1 Summary

7.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited and Walker Residential Limited, in response to the Dover District Council Local Plan (Regulation 19) consultation which runs until 9th December 2022.

7.1.2 Our client controls 'Land at Archers Low Farm, Sandown Road, St Georges Road, Sandwich' and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.

7.1.3 Taking all of the above into consideration, we consider that the Site promoted at Land at Archers Low should remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered, in principle, wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040. However, it is imperative that the effective use of these higher-order settlement sites are appropriately maximised in accordance with draft policy SP3 of the emerging Plan, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and object solely on this basis.

7.1.4 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Sandwich, and this has not been undertaken – for example at Land at Archers Low, where it has previously been demonstrated that the site has sufficient capacity to deliver approximately 5-10 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

7.1.5 Without prejudice to our client's support in principle of the proposed allocation at Land at Archers Low, we would urge the Council to re-visit the allocation policy text and allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential and the objectives of draft policy SP3 are most effectively realised. It is submitted that the SAP22 policy wording should be amended to more accurately reflect the capability of the Site to accommodate approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.

7.1.6 In addition to being a highly sustainable and logical edge-of-settlement allocation, the Site is deliverable in a single land ownership with no viability issues, legal or third-party constraints present. Our client is fully committed to the delivery of Land at Archers Low and there are no impediments to the Site being capable of delivery within the initial 0-5 years of the Plan period.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	For the reasons set out in the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245), the capacity of Land at Archers Low Farm, St Georges Road Sandwich (SAN023) should be increased to 40 - 45 dwellings.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Please refer to the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245).

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP22
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

STC feel very strongly that this site should be excluded from the proposed LALP following a robust response objecting to this application submitted recently to DDC in support of over 450 negatives responses to this proposal, highlighting the following issues: traffic generation, vehicular access, traffic and safety concerns.

The proposed housing, access road and associated infrastructure would: Be visible from Sandown Road and constitute an unwarranted visual intrusion into the countryside.

Be amplified by the loss of, and impact on, ancient trees and woodland on the site. Would cause the loss of a significant number of trees and considerable encroachment into Root Protection Areas of retained trees. These trees, many of which are the subject of TPOs, contribute significantly to the area's character, the unrivalled beauty of the countryside and the sensitive landscape setting of this part of Sandwich.

Be outside of the settlement confines of Sandwich. Would severely harm the landscape and beauty of the countryside, contrary to Policies DM1, DM15 and DM16 of the Dover District Council Core Strategy and paragraphs 130, 131 and 174 of the NPPF.

This would significantly and demonstrably outweigh the benefits of the application.

The Planning Inspector's previous objections to the site should also be re-iterated: This site is allocated in the LALP for residential development with a new estimated capacity of 50 dwellings.

This allocation is not justified because of the harmful visual impact on the character and appearance of the local area that would result. The site is an integral part of the unspoilt countryside that wraps around this part of Sandwich and as a result makes a significant contribution to the town's setting. At present the trees and the open cultivated land on the site provide a soft and attractive edge to the town.

The construction of dwellings on the site and the formation of a new access on to Sandown Road would constitute an unwarranted intrusion into the countryside to the detriment of the sensitive landscape setting of this part of Sandwich.

Other allocations in Sandwich endorsed in this report, including Sites LA14 and LA16, do not share the same landscape. The retention of the trees on the site, even if associated with a buffer area, and coupled with the retention of farming and woodland uses nearby, would not be able to mitigate the visual harm to an acceptable extent. The development would be particularly apparent from Sandown Road during the winter months when the existing deciduous vegetation is not in leaf.

The standard of road likely to be required and the necessary sightlines along Sandown Road would also open up views of the site and would be likely to involve tree loss. Although Sandown Road may not be heavily used by vehicles and pedestrians, and some existing housing development in the area may not be of the highest quality, this does not obviate the need to assess the visual implications of this particular allocation. Taking account of all these factors the allocation of this site is not justified.

Main Modification MM24 deletes this site from the LALP and is required to make the plan sound." (from Inspectors-Report-Complete.pdf (dover.gov.uk)) Nothing has changed since 2013 that makes this site now suitable for the proposed development.

If the site was to remain in the Local Plan, the following would be necessary: • Consideration must be given to tree preservation and impact greatly on the natural vista. • There are already significant traffic problems on St. George's Road and Sandown Road that cause obstructions and gridlock. • Special consideration should be given to the issues covered by Policies DM1, DM15 and DM16 of the Dover District Council Core Strategy and paragraphs 130, 131 and 174 of the NPPF.

- Where a site adjoins a watercourse, the watercourse is maintained in its entirety and that only one access/egress can be made across it.
- Where a site contains mature trees or hedging that these are to be retained in all cases.
- All sites that come onto highways that service a school have twenty mile per hour limits as part of the Highways scheme.
- Full archaeological surveys (not desktop ones done in Maidstone) are carried out on all sites within or the surroundings of Sandwich town.
- All new residential properties must have vehicle electrical charging points which will be necessary by law from 2030. • Where a site removes or displaces any on street parking that the loss of parking is made up by additional parking spaces on the site.
- All properties are to be 50-year flood risk compliant as recommended in the NPPF.
- All access roads are to be adopted by the County's Highway Authority, so that they are maintained accordingly and there are no rights of dispute.
- All sites to accommodate full fibre communications cabling to allow for super speed internet access to support economic and home working applications.
- All sites to include drop down curbing allowing adequate accessibility for persons with disabilities or limited lack of mobility.

- Any additional street lighting shall be unobtrusive, set so as not to cause irritation to neighbouring properties and in the town centre should be of a heritage style to match existing light standards.

- Sites over 40 units should provide adequate road junction improvements to allow large scale traffic flows to move into and out of the sites without impacting on existing traffic flows. • All sites must have adequate accessibility made for pedestrian and cyclist travel preference to protect and support alternative travel to motorised vehicles.

- Suitable screening provision should be introduced to shield all new development from existing neighbouring residents and in particular where a site is adjacent to an AONB or historic recognition.

Section 106 funding should be directed towards improving and updating existing essential services such as doctors, dentists, schools, libraries, toilets, play areas and public recreation.

- A master plan of Sandwich must be undertaken to ensure that there isn't a cumulative detrimental impact on the town resulting from piecemeal developments.

- Of the requirement for affordable housing, 65% of this should be rental accommodation, social or council houses. And this should be monitored for compliance.

- A Design Code for Sandwich should be undertaken.

Where a site contains mature trees or hedging these should be retained in all cases. All healthy trees should be retained. Suitable screening provision should be introduced to shield all new development from existing neighbouring residents and in particular where a site is adjacent to an AONB or historic recognition.

Be amplified by the loss of, and impact on, ancient trees and woodland on the site. Would cause the loss of a significant number of trees and considerable encroachment into Root Protection Areas of retained trees. 9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This site was included in the previous draft Local Plan in 2013 but on examination by the Government Planning Inspector was considered unsuitable for development . His reason was that construction of houses on this site and a new access onto Sandown Road would result in an unwanted intrusion into the countryside to the detriment of the sensitive setting of this part of Sandwich. The situation remains the same today and I do not understand why the site was reintroduced into the draft local plan in 2021. I note that the original plan in 2021 was for 40 houses but this has now been reduced to 35 houses "to mitigate the effect on ancient trees" DDC planning department will be well aware of the strong local opposition to the planning application by Fernham Homes which was rejected by DDC planning committee and is now waiting appeal. A major reason for residents concern was the harm that development will have on the environment ; biodiversity and habitat for wildlife . There are about 80 trees on the site, some of which are old and very tall and it is inevitable that those trees which survive the original development will eventually be lost as the gardens would be so small. Reduction of 40 houses to 35 will have a minimal effect to say the least Considering the looming climate crisis should we be considering destroying so many trees? This site was recognised as unsuitable for development in 2014 and the same applies today. I also have a major concern regarding the flooding potential that might result from developing this site. The top corner of the field can flood during heavy rain in the Winter and the floods spread into the rear gardens of 152 and 154 St, Georges Rd. Pictorial evidence of this has been submitted to DDC This is of course ground water flooding and we have a high water table in this area. The corner of Sandown Rd. and St. Georges Rd. can also flood after heavy rain with the flood sometimes extending 40 or 50 yds. along St. Georges Rd.. What would the effect be of concreting over of half he site together with the loss of the sponge effect of all the trees which will inevitably be destroyed? Surely this can only exacerbate the flooding problem which already exists along St.Georges Rd. I strongly oppose the inclusion of this site in the local plan and would be grateful if you could consider my comments.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am writing to object to the proposal to build 44 houses on the meadow at Archers Low Farm, Sandwich Kent.</p> <p>On 31st March 2022, Dover District Council turned down this application, mainly on environmental grounds. 450 objections were received from residents of Sandwich, and extraordinary response from a small community.</p> <p>Plans for building on this established farmland have previously been turned down. The Dover District Local Plan has never included this site as suitable for a housing development. Nothing has happened over the years which could possibly change this decision.</p> <p>One could say that the trees, natural habitat and wildlife have become more established over this time and therefore more crucial to the precious environmental in this area of Sandwich.</p> <p>Other important factors regarding the infrastructure of a mall town like Sandwich needs to be addressed –</p> <ol style="list-style-type: none"> 1 Local medical services are under extreme pressure, both at GP and Hospital level. 2 Local schools are running at full capacity

	<p>3 The roads leading to the proposed building site are already blocked by parked cars. The traffic survey undertaken by the developer was done in lockdown when the school was closed (Sir Roger Manwoods School). It is completely inaccurate and should not be acknowledged when considering the application.</p> <p>4 There are two right angled bends joining Sandown Road with St George's Road. These are prone to flooding, the water table here being very high. Also, rather dangerous for pedestrians: a friend was recently run over by a car on this junction, sustaining fractures to his shoulder.</p> <p>Please listen to our heartfelt objections. Fernham Homes also need to listen. These are brownfield sites in and around Sandwich where they could build without destroying farmland, established trees and wildlife.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>In respect of Housing, the NPPF states;</p> <p>"To support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, that the needs of groups with specific housing requirements are addressed and that land with permission is developed without unnecessary delay."</p> <p>The Strategic Housing requirement is a 'minimum' target and in order to 'boost significantly' the supply of homes, it is important that Local Plans maximise the potential of suitable sites for the delivery of dwelling completions.</p> <p>The NPPF recognises that;</p> <p>Small and medium sized sites can make an important contribution to meeting the housing requirement of an area, and are often built-out relatively quickly.</p> <p>Policy SAP23 proposes an allocation of c.10 dwellings on land at Sydney Nursery, Dover Road, Sandwich. The site allocated is part of a larger area, edged red on the attached plan, fronting Dover Road to the North and bounded to the South by the A258, Deal Road. There is existing residential development to the East and West of the site and the site is 'contained' by mature boundary planting. Safe and satisfactory vehicular and pedestrian access can be delivered from the Dover Road and there are no constraints to the site's development. The development would comprise 'Sustainable Development' and represent a 'small or medium' sized site capable of early delivery.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)	<p>It is requested that Policy SAP23 be reworded as follows;</p> <p>SAP23 - Land at Sydney Nursery, Dover Road, Sandwich (SAN019)</p> <p>The site, Land at Sydney Nursery, Dover Road, Sandwich, as shown on the policies map is allocated for an indicative capacity of 35 dwellings.</p>

You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Development proposals for the site shall include the following: a Development should be laid out to protect the residential amenity of the existing residential properties to the North-East and South West b The existing trees on the boundaries of the site should be retained and enhanced to mitigate the impact of development on the landscape and provide opportunities for biodiversity habitat creation and enhancement; c The layout should retain and enhance boundary planting and incorporate a 'landscape buffer' along the Southern boundary. The layout of the scheme should provide a sufficient buffer between the existing mature trees on the site and residential properties, to ensure appropriate residential amenity for future residents and the protection of existing trees once the site is developed; e Primary vehicular, pedestrian and cycle access to the site shall be provided from Dover Road; f The development should incorporate a SUDs;g A Contamination Assessment should be undertaken.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	It is submitted that the proposed draft allocation does not represent the best use of the site and to restrict the extent and capacity of draft allocation SAP23 was arbitrary and unjustified. There is no evidence to support the sites restriction. It is submitted that attendance at the examination allow a detailed consideration of the merits of the site and will assist the inspector in his/her deliberations.

SAP23 - Sydney Nursery, Dover Road, Sandwich (SAN019)

The development of the whole site of Sydney Nursery has been excluded from the plan.

The reasons for rejecting this site and the site SAN010 are poorly evidenced and in some cases contrary to the evidence to hand.

By removing these sites on unsupportable grounds, DDC has been unable to follow the settlement hierarchy. SP3 3.43 and SP3.3.45. Therefore the document is rendered unsound and unjustified.

Rejecting these two sites on this basis would be contrary to the following policies:-

SP1 (f) and (j), SP1 - Planning for Climate Change / The Climate Change Act 2008

SP2, Planning for healthy and Inclusive Communities

SP6 Economic Growth,

SP7 Retail and Town Centre,

SP10 Sandwich Town Centre

DM Policy 1: Reducing Carbon Emissions. n

DM Policy 4: Sustainable Travel.

DM Policy 6: Flood Risk.

The rejection of these two sites has had a major impact on the whole plan and is likely to have rendered it unsound and unjustified.

Contrary to the representations made by Sandwich Town Council in its reply to the Regulation 18 Draft Plan Document, that *the development of the whole of this site, with SAN010 should be considered in tandem*, SAN010 and SAN019 have been removed from the plan.

Both sites appear to have negative comments attached to them that are neither justified nor supported by the evidence to hand.

The reasons for rejecting SAN010 from the Local Plan appear to change from document to document.

Perhaps this may be to prevent sequential tests for flood risk from coming into play for the majority of the planned sites for Sandwich.

SP1 j) j Ensuring that development does not increase flood risk, including by taking a sequential approach to avoid development in flood risk areas, and where possible reduces the risk of flooding.

Certainly, the reasons for rejecting the two sites are not well supported, particularly given that a portion of the site SAN010, Rose Nursery (closest to the roundabout), and arguably that portion of the two sites most at risk from traffic noise, gained outline planning permission on April 6th 2022. for seven, self and custom-built homes. under DDC planning reference 21/01309.

DDC has in its possession the Noise Assessment Survey and Coal Mining Report, received as part of the normal planning process and these documents prove that the main reasons given for excluding this site from the Land Allocation are unfounded and unjust. DDC was asked to revisit this site together with SAN019 by Sandwich Town Council, in its response to the Regulation 18 Draft Plan.

It should be noted that the residents of The Crescent, a residential area situated between the two sites of SAN019 and SAN010, appear not to find the traffic noise too much of a problem and a great many of them have decided upon extending their homes rather than being driven away by traffic noise as one might expect if the findings of the plan were accurate.

It should be noted that the sites are also shown as being at a 1 to 30-year risk of surface water flooding. This conclusion is most likely the result of a desktop, geological assessment and bears no resemblance to the facts. A soil survey conducted prior to building works on the adjacent

property at 173, Dover Rd revealed the water table to be at 7 metres and the well at the same property and recently measured at 6.75 metres, remains permanently dry, despite it being used as a soak-away for rainwater from the properties roof.

A further reason for the site's (SAN010) rejection was that its development could prejudice future access to SAN024. Given that SAN024 has ample frontage with the A256. Sandwich Bypass. using SAN10 would not make economic sense and is therefore unjustifiable.

Furthermore, it cannot be justifiable for SAN010 to be rejected in order to protect the future financial interests of the owner of SAN024. It also seems somewhat disingenuous to recognise that SAN010 may provide future highway access to SAN024 and at the same time mark SAN010 down in the HELAA for lacking highway access.

It may be that DDC had hoped to prevent the inclusion of SAN010 in order to use some of the land to meet the Strategic Transport Improvements Objective of making improvements to the junction of A256 and A258 on the Sandwich Bypass, but as stated that portion of the land now has planning permission for housing and it would now be nonsensical to use this land for that purpose rather than the orchard land to the S.W., outside the bypass.

The owners of SAN010 have taken on comments from the planning committee and will be designing access arrangements for the seven plots that are of sufficient proportions to allow for the future development of SAN010 in its entirety. It is possible in this case, for a connection to be made with SAN024. Although I suspect that the nature of SAN024 will mean that it is not required.

The exclusion of these sites on this basis seems to be particularly unsound, given that the council has in its possession an acoustic survey taken on the portion of the Site SAN010 that has planning permission, it would not be justified to reject the inclusion of SAN010 on these grounds. It would also seem likely that to exclude SAN019/SAP23 on similar grounds would be equally unjustified.

To reject either of these two sites on the grounds of traffic noise is contrary to the evidence to hand and therefore not justified.

It then follows that the plan itself is not justified. For in precluding these two sites there follows a knock-on effect that renders the plan itself unsound.

The exclusion of sites SAN 019 and SAN 010, both of which are outside flood zones 2 and 3 Has meant that in order to find the required number of housing sites in the area of Sandwich, DDC has to revisit sites that have been rejected from the previous Land Allocation process. **The reasons for rejecting these sites remain the same as in the previous Land Allocation Exercise.**

The majority of those revisited sites fall within flood zones 2 and three and as such are at significant risk of flooding in the future.

Because these sites have been rejected, DDC have to look at sites that are further afield from the recognised settlement hierarchy and therefore more likely to have a greater impact on carbon emissions due to the increased need to travel by car. **SP1, The Climate Change Act 2008**

Housing situated farther afield and outside the normal settlement hierarchy is also less likely to use sustainable means of transport to access shops and services. impact **SP2**

SP2 - Planning for Healthy and Inclusive Communities

1 Ensuring that new development is well served by services and facilities (for example education, health care, community, cultural facilities, play, youth, recreation, sports, faith and emergency facilities) and that a mix of uses are provided in new development that support daily life. facilities) and that a mix of uses are provided in new development that support daily life.

2 Creating opportunities for better active travel, to promote physical health, including provision for safe cycle and pedestrian routes.

It is recognised that the demand for housing in Sandwich outstrips the supply and therefore many young Sandwich residents find themselves unable to afford a house in their home town. This results in a much older demographic and impacts the cohesiveness of family units and reduces the level of support that families can give to one another, particularly the young and the old. Family life can be a cohesive force in society. **SP2**

The two sites SAN019 and SAN010 would provide a significant boost to the housing supply in Sandwich. Impact **SP3, SP2, SP10**

By removing these sites on unsupportable grounds, DDC has been unable to follow the settlement hierarchy. SP3 3.43 and SP3.3.45. Therefore the document is rendered unsound and unjustified

Strategic Policy 3 - Housing Growth What are we trying to achieve?

3.28 To provide greater choice of high-quality housing to meet the needs of Dover District's growing population and changing demographic, and address affordability issues.

3.29 To focus new development at accessible and sustainable locations which can utilise existing infrastructure, facilities and services, and to ensure development contributes to the sustainability of local communities and services, supporting regeneration and wherever possible make the best use of brownfield land. Justification for approach

3.43 If the distribution of housing growth in the district were to purely follow the settlement hierarchy (as set out in Appendix E) the secondary focus for development should be the District Centre of Deal, followed by the Rural Service Centres of Sandwich and Aylesham.

3.44 However, Deal has seen high levels of windfall development over the past ten years, due to market demand, which has resulted in a limited supply of suitable housing sites.

3.45 Housing delivery in Deal and Sandwich also continues to be constrained by a number of factors including flood risk, wildlife sites, heritage and highways. Given this, it has been a challenge to identify suitable and available sites in Deal and Sandwich and the growth potential of these settlements is therefore currently considered to be relatively limited.

It is well evidenced that the centre of Sandwich is in danger of losing its vitality and there has been a continuous decrease in the number of shops and businesses in the town over many years. The town requires more footfall. one of the most positive methods of increasing footfall in the town would be to increase housing. The two sites SAN019 and SAN010 would help achieve this. **Impact SP6, SP7, SP10**

Strategic Policy 6 - Economic Growth

What are we trying to achieve? 3.99 To grow and diversify the Dover District economy by providing additional employment floor space, making it an attractive and competitive place to start, grow and invest in a broad range of businesses, attracting more and better jobs and attracting and retaining working age people.

Strategic Policy 7 -

Retail and Town Centres

What are we trying to achieve? 3.126 To support and strengthen the role of the District's town, local and village centres through their diversification, enhancement, and improvements to public realm, while maintaining their distinctive characters. Justification for approach 3.127 The District's town, local and village centres are a focus for activity and community life providing shopping, leisure, employment, culture as well as other services. This is particularly the case for Dover, Deal and Sandwich town centres.

Strategic Policy 10 - Sandwich Town Centre

What are we trying to achieve?

3.179 To protect the vitality and viability of Sandwich Town Centre and enhance the role that the centre plays in providing accessible shops and services for the community it serves ,and as a destination for visitors. Justification for approach

3.180 Sandwich is renowned for its medieval street pattern and high concentration of listed buildings. The town centre serves the daily needs of its local residents and is a key tourist attraction. The centre benefits from its proximity to the internationally significant golf course - The Royal St George's Golf Club which is one of the courses on The Open Championship rotation. Sandwich is also relatively well-connected in terms of road and rail links.

3.181 The retail profile of the centre is dominated by independent traders who contribute to the overall diversity, vitality and viability of the centre. In terms of representation by multiples this includes Boots, Costa, and the Co-op. The update to the Retail and Town Centre Needs Assessment found that vacant units have increased by 8 outlets, resulting in a vacancy rate of 13.5%, which is more than double that of 5.4% in 2018. The current vacancy rate is now approaching the national average of 14%. Over the same period, the proportion of comparison goods outlets has decreased marginally to 36.5% from 35.1% in 2018, with convenience goods outlets also having decreased to 7.6% from 8.2% previously and leisure services outlets having decreased to 23.1% from 25.2% in 2018. This is likely due to the impact of the pandemic on the town centre, meaning it may see a recovery in the future, however proactive monitoring over the Plan period will be required to assess the health of the town centre

SP10 - Sandwich Town Centre The Council will support in principle proposals which enhance the vitality and viability of Sandwich Town Centre and enable it to maintain its role as a vibrant town centre offering a range of compatible uses reflecting its individual character and economy

One could be forgiven for concluding that DDC has rejected SAN019 and SAN010 in order to prevent those other sites from being subjected to a sequential test for flood risk.

DDC have then been unable to follow the settlement hierarchy and therefore national planning guidance or indeed their own policy guidance. In order to meet the housing need in the district DDC has then suggested the Garden Village Principles, which aims to justify the building of large numbers of houses in remote village locations. This policy appears to be based more on idealism and hope than sound reasoning, pragmatism and common sense.

Such actions call into question DDCs commitment to Strategic Policy SP10 and its resolve to meet the aims and objectives of the plan itself. Despite the mental gymnastics DDC have used to justify the development of large-scale housing in village locations, it is likely that these developments will end up as remote housing estates from which residents will need to travel for the majority of their needs; employment, services, education etc.

It then follows that DDC has been unable to follow the national guidance on sustainable development and transport

DDC has introduced a plan that does not adhere to its stated objectives to reduce the overall carbon footprint of the district and to reduce the need to travel or to encourage sustainable travel

It has embarked on a plan that does not make sufficient use of the recognised settlement hierarchy calling into question its commitment to the stated aims and objectives: Reducing the need to Travel.

Promoting sustainable Travel, Reducing the overall carbon footprint of the District and protecting and promoting the vitality of Sandwich. Policies SP1, SP2, SP3, SP6, SP10. DM5, CC1, CC5, TI1 would seem to apply

It has not made the best use of the means to achieve those aims.

The proposed, small scale, development at SAN019/SAP23, of ten houses would appear to be contrary to policy DM 29

SAN019 is, one of the more suitable sites, but only if the whole of this site was to be developed. Access should be via both Dover Road and A258. DDC has suggested that only a small portion of the land, which fronts Dover Road, should be developed and that the majority of the land is unsuitable. The reasons for reaching this conclusion are not well supported.

Not developing the whole of the SAN019 site, would discard an opportunity to significantly increase housing provision within Sandwich and enable the development of further sites on Dover Road while simultaneously reducing traffic flow at the Sandwich end of Dover Road.

SAN 019 is outside the flood zone and if the whole site was to be developed, traffic to and from it would neither adversely impact traffic flow within the town nor deny local residents parking amenity (as is the case with other sites closer to the town).

The site has the potential to significantly reduce the highways impact caused by the development of SAN 015 Kumor Nursery, reducing traffic flows at the lower, Sandwich end of Dover Road and also along the Deal Road, outside the main entrance to Sandwich Technical School.

Development of the whole site has the potential to open up other sites situated along Dover Road, In particular, SAN010 and perhaps, at a later time, parts of SAN024

In the current proposal for this site DDC Has stated that the traffic caused by the proposed development of ten houses would be countered by the reduction of traffic caused by its current use. This is a somewhat disingenuous statement, given that the land identified as suitable is currently occupied by one horse and therefore probably responsible for somewhere in the region of two to four traffic movements along Dover Road per day.

DDC has expressed concerns regarding the visual impact and the ability to screen the site at SAN019. However, in terms of visual impact, this site differs very little from SAN 007 and would be more easily screened than the approved development at SAN 013.

The current viewpoint from DDC on the ability to screen this site would seem to be at odds with that which they expressed in the previous HELAA (copy attached marked APP A. SAN019 pg 1-2).

Comments on SAN019 from the previous SHLAA under SHL065 include:- Landscape impact. The site is reasonably well contained, visually although there are glimpses through to the A258. With sufficient buffer landscaping on this frontage, including that boundary with the intervening field to the SE, the landscape impact would be acceptable. The boundary screening to the Technical College and the land to the SW would need to be retained.

Analysis. Although the development of the site would not have a detrimental impact on the wider landscape or setting of the historic town (which would include mitigation) and the site is located within walking distance of the local college and public transport, there is a KCC Highways objection to any development that would increase traffic movements through the Dover Road/Deal Road junction where there are known problems.

NB, It is to be noted that a little later on when SAN015 (Kumor Nursery), situated on the same road, was put forward for the development of 67 houses, KCC Highways expressed few issues with traffic movements and supported the application.

The development of SAN019 in its entirety would reduce the impact of noise from the A256, Sandwich bypass, on local residents. The proximity of the site to the bypass would likely include the implementation of some noise of mitigating measures. These measures could possibly take the form of a continuation of the tree-covered, earth mound, which runs from the site to the Dover Road roundabout, and shields the houses situated on The Crescent.

Given the sums of money involved in a development of this size, (particularly if SAN010 is also developed), it would not be unfeasible for an earth bund to be installed and mature trees to be transplanted in order to provide an instant acoustic and visual screen.

DDC has also expressed concern about the limited frontage with the A258. However, A plan of the site (see appendix a) appears to indicate the frontage with the A258 is not as small as suggested by DDC. Additionally, the owner of an adjoining triangle of land to the West (former donkey paddock) (see appendix b) and shaded red), is willing to sell his land. This would increase the frontage considerably and allow suitable access arrangements to be made.

KCC highways have previously indicated that they would not be against a left in, left out junction in order to gain access to SAN019 from the A258 (See attached email from KCC highways appendix c)) as long as measures were taken to prevent traffic leaving the site turning right. If this were to take the form of a central reservation, then the concerns regarding the hazard to pedestrians seeking to access the bus stop on the opposite side of the road would also be addressed. A left in left out junction would also severely restrict Dover Road from becoming a 'rat run'

It would seem that the concerns DDC have expressed regarding the development have been offered reasonable solutions or, as is the case for visual impact, countered by previous, opposing statements made by DDC themselves. Development of this site in its entirety would fit with the aims and objectives of the neighbourhood steering group and Sandwich Town Council at the time of the previous HELAA (2013). 'To Make Sandwich Technical School and the adjacent Sports Centre the focal point for future development in Sandwich'. Those involved with the process at the time will recall that, due to an administrative error, the proposals were not submitted in time and were therefore not accepted for consideration by the government inspector.

See attached appendices a) DDC comments on the site from previous HELAA, marked SAN019 (previously SHL065) pages 1-2 b) Adjacent land (former donkey paddock) available to increase frontage with A258 Sandwich bypass c) Communication from KCC highways indicating that access to SAN from A258 (Sandwich bypass) is achievable via a left in left out junction.

Incidentally, Other potential housing sites in the vicinity, SAN010 and SAN019 have been removed from the plan (contrary to the representations made by STC at the Draft Regulation 18 stage).

I suspect that this was because their inclusion would have brought into play the sequential test for flood risk for the majority of the planned sites for Sandwich.

SP1 j) *Ensuring that development does not increase flood risk, including by taking a sequential approach to avoid development in flood risk areas, and where possible reduces the risk of flooding.*

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful

Re-evaluate the complete development of SAN019 and include SAN010 in the Local Plan.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I wish to be able to speak directly to the inspector in order to convey the benefit of including these two sites and allow them to question ask questions of me in order to make a more informed judgment on the sites.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	4.170 and Table 4.3
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Council has identified in paragraph 3.45 a difficulty in finding sites in Sandwich however have dismissed this site which is appropriate, available and in single ownership and can be delivered within the first 5 years of the Plan.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance	Land at Sydney Nursery, Dover Road, Sandwich This representation is submitted by Finn's on behalf of the Roses Beneficiaries Association, as sole owners of the site reference SAN019. Part of the site fronting Dover Road is proposed to be allocated under Policy SAP23 for residential development for 10 units and this allocation is fully supported.

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

However, we object to the failure to allocate the remainder of the site to Deal Road and are still seeking the allocation of the whole site put forwards under the Call for Sites with the larger area of the Nursery site to the south of the area proposed to be allocated, identified in red in the HELAA maps. The total number of units sought was 61. There is also an option to provide a care home facility on the land.

Initial highway access work has been carried out and access to this land was also considered. The frontage site was found to be available and achievable, with access from Dover Road. On the wider site, the Council raised concerns over access from A258 Deal Road and stated that it does not appear to be achievable. Initial transport scoping on access has been carried out along with pre-application advice from Kent Highways. This work, referred to as Access 2 in the attached documentation, shows that provision of an access from Deal Road is indeed possible and achievable, likely with a left hand turn only, directing traffic towards the western Deal Road roundabout.

This would enable a new access road linking through the site with Dover Road, to relieve the traffic on Dover Road and enable easier access to the bypass without negotiating the school frontage and the junction of Dover Road with Deal Road at its western end. It would also enable the provision of new housing adjacent to the Secondary School and in close proximity to Delf Farm Shop and a wide range of facilities offered in Sandwich as a Rural Service Centre.

Paragraph 3.45 states that 'it has been a challenge to identify suitable and available sites in Deal and Sandwich', yet this larger site has been dismissed with only the site frontage being found suitable over concern suitable access could not be provided from Deal Road. However, suitable access can be provided to the A258 Deal Road.

Paragraph 4.170 states that limited sites have been identified in Sandwich due to constraints, however this site offers some 60 units, on land in a single ownership, well screened and landscaped and lying adjacent to the existing built area of Sandwich, close to a good range of amenities.

The land is well located to the existing built area of Sandwich, with long established high boundary screening resulting in defined site boundaries and it is situated within easy walking distance of the station, junior and secondary schools and shops and other services and is a very logical location for new housing in Sandwich. We consider that the whole of SAN019 should be allocated for residential development either in the form of residential dwellings or mixed residential dwellings and care home facility.

In terms of delivery of the area proposed to be allocated under SAN019, it is noted that the Plan's trajectory for the sites proposed to be allocated within Sandwich, does not expect any delivery to commence until Year 4 after Adoption of the Plan, with 1 commencing delivery in Year 6, one site in Year 7, one site in Year 8, two sites in Year 9 and one site not until year 13. This site is noted for delivery in years 12 and 13 however for such a small site which is available and in single ownership, it would be delivered within the first 5 years of the Plan and will avoid a delay in delivery of housing in Sandwich. Therefore the trajectory should be amended to reflect this.

In terms of delivery should the whole area submitted for SAN019 be allocated, commencement of delivery would be within the first 5 years of the plan starting in Year 3 with build out at a rate of 12 units per year over 5 years. This larger site should be allocated for housing within the Local Plan.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

The Council have highlighted at paragraph 4.170 that limited site allocations have been identified in Sandwich due to the constraints that exist. However this site is available for development, located adjacent to the Secondary School and close to the Junior School and the range of facilities offered within Sandwich, yet has been dismissed over access concerns. Access to the site from the A256 Deal Road has been assessed and suitable access can be provided. The site offers an opportunity to significantly improve traffic flow and access to Dover Road in a managed way and offers highway benefits to this end of Sandwich. The whole site should be allocated for development.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP23
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Sandwich Town Council agrees in principle to this ten home development but strongly opposes opening up of the access to the bypass as the residents are against this and it is not appropriate, measurable or achievable.</p> <p>No other objections raised to what is a small 'infill' self-build site, however the following mitigation should take place: The following should be considered:</p> <p>KCC highways have previously indicated that they would not be against a left in, left out junction in order to gain access from the A256, as long as measures were taken to prevent traffic leaving the site turning right. If this were to take the form of a central reservation, then the concerns about the hazard to pedestrians seeking to access the bus stop on the opposite side of the road would also be addressed.</p> <p>In the case of both SAP21 and SAP23, the roundabout at the junction of the Dover / Deal Road should be reconstructed to allow direct access to the by-pass, thus pre-emptively relieving the inevitable extra pressure on the narrow streets in Sandwich itself.</p> <p>There would need to be full consideration made on the impact on the protected woods behind the houses in what used to be The Crescent. In particular the wildlife (rabbits/foxes/owls/woodpeckers to name a few), which I think would be disturbed and, in all probability, have to migrate elsewhere. Mitigation of site planning. Earth bund to be installed and mature trees to be transplanted, in order to provide an instant screen.</p> <p>Where a site adjoins a watercourse, the watercourse is maintained in its entirety and that only one access/egress can be made across it.</p> <p>Where a site contains mature, healthy trees or hedging that these are to be retained in all cases.</p> <p>Speed limit should be reduced to 20mph due to heavy traffic use and residential and school access as all sites that come onto highways that service a school have twenty mile per hour limits as part of the Highways scheme.</p> <p>Full archaeological surveys (not desktop ones done in Maidstone) are carried out on all sites within or the surroundings of Sandwich town.</p> <p>All new residential properties must have vehicle electrical charging points which will be necessary by law from 2030. Where a site removes or displaces any on street parking that the loss of parking is made up by additional parking spaces on the site.</p> <p>All properties are to be 50-year flood risk compliant as recommended in the NPPF.</p> <p>All access roads are to be adopted by the County's Highway Authority, so that they are maintained accordingly and there are no rights of dispute.</p> <p>All sites to accommodate full fibre communications cabling to allow for super speed internet access to support economic and home working applications.</p> <p>All sites to include drop down curbing allowing adequate accessibility for persons with disabilities or limited lack of mobility.</p>

Any additional street lighting shall be unobtrusive, set so as not to cause irritation to neighbouring properties and in the town centre should be of a heritage style to match existing light standards.

Sites over 40 units should provide adequate road junction improvements to allow large scale traffic flows to move into and out of the sites without impacting on existing traffic flows.

All sites must have adequate accessibility made for pedestrian and cyclist travel preference to protect and support alternative travel to motorised vehicles.

Suitable screening provision should be introduced to shield all new development from existing neighbouring residents and in particular where a site is adjacent to an AONB or historic recognition.

Section 106 funding should be directed towards improving and updating existing essential services such as doctors, dentists, schools, libraries, toilets, play areas and public recreation. A master plan of Sandwich must be undertaken to ensure that there isn't a cumulative detrimental impact on the town resulting from piecemeal developments.

Of the requirement for affordable housing, 65% of this should be rental accommodation, social or council houses. And this should be monitored for compliance.

A Design Code for Sandwich should be undertaken. There would need to be full consideration made on the impact on the protected woods behind the houses in what used to be The Crescent.

In particular the wildlife (rabbits/foxes/owls/woodpeckers to name a few), which I think would be disturbed and, in all probability, have to migrate elsewhere.

Earth bund to be installed and mature trees to be transplanted, in order to provide an instant screen. Where a site contains mature trees or hedging that these are to be retained in all cases.

Suitable screening provision should be introduced to shield all new development from existing neighbouring residents and in particular where a site is adjacent to an AONB or historic recognition.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Sandwich Town Council agrees in principle to this ten home development but strongly opposes opening up of the access to the bypass as the residents are against this and it is not appropriate, measurable or achievable. No other objections raised to what is a small 'infill' self-build site, however the following mitigation should take place: The following should be considered: KCC highways have previously indicated that they would not be against a left in, left out junction in order to gain access from the A256, as long as measures were taken to prevent traffic leaving the site turning right. If this were to take the form of a central reservation, then the concerns about the hazard to pedestrians seeking to access the bus stop on the opposite side of the road would also be addressed. In the case of both SAP21 and SAP23, the roundabout at the junction of the Dover / Deal Road should be reconstructed to allow direct access to the by-pass, thus pre-emptively relieving the inevitable extra pressure on the narrow streets in Sandwich itself. There would need to be full consideration made on the impact on the protected woods behind the houses in what used to be The Crescent. In particular the wildlife (rabbits/foxes/owls/woodpeckers to name a few), which I think would be disturbed and, in all probability, have to migrate elsewhere. Mitigation of site planning. Earth bund to be installed and mature trees to be transplanted, in order to provide an instant screen. Where a site adjoins a watercourse, the watercourse is maintained in its entirety and that only one access/egress can be made across it. Where a site contains mature, healthy trees or hedging that these are to be retained in all cases. Speed limit should be reduced to 20mph due to heavy traffic use and residential and school access as all sites that come onto highways that service a school have twenty mile per hour limits as part of the Highways scheme. Full archaeological surveys (not desktop ones done in Maidstone) are carried out on all sites within or the surroundings of Sandwich town. All new residential properties must have vehicle electrical charging points which will be necessary by law from 2030. Where a site removes or displaces any on street parking that the loss of parking is made up by additional parking spaces on the site. All properties are to be 50-year flood risk compliant as recommended in the NPPF. All access roads are to be adopted by the County's Highway Authority, so that they are maintained accordingly and there are no rights of dispute.

All sites to accommodate full fibre communications cabling to allow for super speed internet access to support economic and home working applications. All sites to include drop down curbing allowing adequate accessibility for persons with disabilities or limited lack of mobility. Any additional street lighting shall be unobtrusive, set so as not to cause irritation to neighbouring properties and in the town centre should be of a heritage style to match existing light standards. Sites over 40 units should provide adequate road junction improvements to allow large scale traffic flows to move into and out of the sites without impacting on existing traffic flows. All sites must have adequate accessibility made for pedestrian and cyclist travel preference to protect and support alternative travel to motorised vehicles. Suitable screening provision should be introduced to shield all new development from existing neighbouring residents and in particular where a site is adjacent to an AONB or historic recognition. Section 106 funding should be directed towards improving and updating existing essential services such as doctors, dentists, schools, libraries, toilets, play areas and public recreation. A master plan of Sandwich must be undertaken to ensure that there isn't a cumulative

	detrimental impact on the town resulting from piecemeal developments. Of the requirement for affordable housing, 65% of this should be rental accommodation, social or council houses. And this should be monitored for compliance. A Design Code for Sandwich should be undertaken. There would need to be full consideration made on the impact on the protected woods behind the houses in what used to be The Crescent. In particular the wildlife (rabbits/foxes/owls/woodpeckers to name a few), which I think would be disturbed and, in all probability, have to migrate elsewhere. Earth bund to be installed and mature trees to be transplanted, in order to provide an instant screen. Where a site contains mature trees or hedging that these are to be retained in all cases. Suitable screening provision should be introduced to shield all new development from existing neighbouring residents and in particular where a site is adjacent to an AONB or historic recognition.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible.	(DDC Note - This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1923.) A proposal for mixed use development that includes a circa 70 bed care home, 0.8 acre of open space, sound buffer, 30/35 houses, improved

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

footpath and a crossing on Deal Road

Sydney Nursey, Dover Road, Sandwich, CT13 0DB – SAN019

A proposal for a mixed used development
Sydney Nursey, Dover Road, Sandwich, CT13 0DB
09/12/2022

1.0 Indicative Site Plan

2.0 Introduction

The whole site of Sydney Nursey (SAN019) was submitted in the call for sites for the new Dover Local Plan. Only the front acre has been put forward into the regulation 19 draft Local Plan. In the sustainability appraisal the reason why the whole site was not put forward was that the site was in a relatively inaccessible location and exposed to noise pollution from Deal Road. The cover letter explains how the proposal will make the site more accessible for low carbon means and reduce the noise the pollution for the residents. It also highlights that there is a substantial borough wide need for care homes and a local need.

3.0 Improving the Sustainability of the Site

The public footpath that runs to the west of the site, allows for easy access to a very regular bus service of at least two buses an hour. At present the footpath would be considered inadequate for regular use. After speaking with a highway consultant, we propose an improvement to the footpath, to make it accessible all year round. This will improve access not only for the residents of the proposed development, but the wider community. The bus stop is located on a busy road, crossing over to access the bus routes heading west would be extremely dangerous. An improvement to allow safe crossing of the road will be implemented and will obviously need to be accepted by Kent County Council Highway Authority. All of these improvements will make the location a lot more accessible by low carbon means for the whole community.

4.0 Reducing the Noise Pollution From Deal Road

We have been in contact with a noise consultant about how we can reduce the noise pollution from Deal Road. They believe that with the strategy below it will significantly reduce the noise. There will be an exclusion area where residential housing will be not built. This will have a three positive affects for the future residents. The first is increasing the distance the houses are from the A258. Secondly, it allows for substantial screening, planting of trees, and acoustic fencing to reduce the noise impact of the road. It will also provide just under an acre of public space for walks and it will have space to provide a much needed children's playground for the local community to use.

5.0 Need Case for a Care Home

There is a demonstrable local and borough wide need for care beds. The Dover SHMA (2017) identified an undersupply across the Borough at the time of publication of 270 beds over the next 23 years. That is to say, some 12 beds are needed in the Borough every year. These figures do not accurately account for the need. The Kent County Council's (KCC) Kent Social Care Accommodation Strategy 'Better Homes: Greater Choice (July 2014) notes that the average size care home in Dover is 31 Beds. In the KCC strategy it states that there are high number of converted Victorian properties or older smaller care homes that are unable to accommodate the more complex needs of individuals. It is considered that many care homes that are under 40 beds will be considered unviable to operate, as they do not benefit from the economies of scale of larger care homes and do not have the facilities for the changing needs of an ageing population. According to the Care Quality Commission (CQC) the average size home, is de-registering is 27 beds. It is expected that larger Victorian properties and or older smaller care homes that have so far supported residential care in the district will become too costly to reconfigure to modern standards, and these will be

brought forward for conversion or redevelopment into other uses.

The CQC state that market standard for care home provision is that every room should have ensuite provision. Many of the older care homes will either have zero ensuite provision or minimal. According to Carterwood Analytics there are 30 operational/planned care homes within the Borough of Dover. Out of these 30 care homes there are only 6 that are considered to be future proof, these are homes with over 40 beds and have full ensuite provision. Out of the 1212 beds that are operational or planned only 419 beds are considered future proof by the Kent County Council's Kent Social Care Accommodation Strategy and CQC.

Carterwood Analytics have provided a more localised assessment of need. Within a catchment of 3 miles of the site, there is a current undersupply of 123 market standard beds and 143 wetroom beds. There is one operational care home in the 3-mile radius that only has 20 beds and was opened in 1986. This is not considered future proof, plus it has a CQC rating of red, which classes it as inadequate. There have been two closures of care homes in the last four years, one was 32 beds and other was 34 beds. One of these closures was a KCC care home Wayfarers, it was shut down as it no longer conforms to CQC requirements of ensuite provision and the unit cost of Wayfarers was about three times higher than the average unit cost in Dover (Kent Online, 2019). This is clear evidence that many smaller homes are closing increasing the demand for care beds.

There have been two recent applications for new care homes in the Dover Borough, 17/01345 and 18/00079. In both of these there has been evidence of a need in the Borough. In the application, 18/00079 the KCC Strategic Commissioning responded to the application stating that "the profile of existing care home accommodation needs to change to more modern fit for purpose accommodation and as a result could see the closure or remodeling of older, smaller provision", they also go to say that by 2021, the Dover district requires an additional capacity of 270 care units. In the other application 17/01345 that was won at appeal (3213086), the inspector makes reference to the demographic changes in the Dover Borough, which will see people living over 65 increase 72% between 2011 and 2031. The inspector concludes that due to this demographic change "a planning objection to the principle of the further care home proposed cannot be adequately substantiated."

6.0 The Need for an Allocation of a Care Home

The regulation 19 Dover Local Plan 2040 has not allocated any care home beds. Therefore, the evident need of care homes will have to come from windfall sites over the planned period. Windfall sites that are larger enough to accommodate a care home in sustainable locations are extremely rare. To make sure that there is adequate provision of care homes Dover Council need to start allocating sites, otherwise not enough care homes will come forward to meet the identified need in the Dover Borough.

7.0 Conclusion

The improvements to the public footpath, the improved crossing, noise mitigation, public space and the evident need for a care home result in a very compelling case for the Council to accept this allocation on the site.

It is therefore respectfully requested that this proposal be adopted into the New Dover Local Plan.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP12 Strategic Transport Infrastructure
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Over the past few years, Aylesham has seen a vast amount of development. This has put considerable strain on local amenities such as local shops and medical services.</p> <p>Any possible future developments, whatever size, must provide Aylesham with additional facilities, in particular for young people, local shopping facilities and the infrastructure that will allow more people to move freely around the village.</p> <p>Aylesham Parish Council believes that any future development must improve amenities and provisions for young people.</p> <p>In terms of transport, all future developments must focus on pedestrian and cycle traffic. With emphasis on the improvements of train and bus services appropriate to the size of the Parish, rather than road users to both combat road traffic and assist with the climate emergency.</p>

	<p>Aylesham and Snowdown only have a regular bus service to Canterbury, and more recently there have been attempts to end school bus services to Dover. New development should bring a net increase in public transport, not a steady decline.</p> <p>In addition, there is considerable strain on local roads and any future development must be accompanied with a plan to make significant upgrades to key routes such as Spinney Lane and B2046 (Adisham Road).</p> <p>Any chances of alleviating road traffic are severely hampered in Aylesham. Both the bus services and train service to Aylesham and Snowdown are completely substandard. Aylesham Train Station and Snowdown Train Station are both inaccessible for many residents.</p> <p>Aylesham Parish Council would welcome the opportunity to work with Network Rail and Southeastern to address the ongoing issues with train access to both Stations.</p> <p>Aylesham Parish Council believes that any further development can only happen after improvements to both the bus and train services to and from both Aylesham and Snowdown. Ensuring provisions are sustainable, accessible and appropriate for the size of the whole Parish.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? In particular, the B2046 is already extremely busy. There have been many accidents at the junction to the entrance to Womenswold Parish. In addition the slip road on the A2 (London Bound) is far too short. The increase in traffic created by these developments will only make this worse. The roundabout on the A260 by the A2 was built to deal with the huge increase in traffic coming from Aylesham under the current Aylesham expansion. It does not take into account the further proposed increases. <p><u>Infrastructure</u></p> <ul style="list-style-type: none"> Currently there is a major shortage of facilities which contribute to facilitate supporting the community:- <ul style="list-style-type: none"> Doctor surgeries. There are no secondary schools in the area. The nearest schools are in Canterbury, Sandwich and Dover. This necessitates a bus ride on overcrowded and unreliable buses. This also contributes to increased Greenhouse gasses and increased traffic congestion. The addition of so many houses will seriously exacerbate the problem.

- There is only one small Coop in Aylesham which hardly copes with current levels of business.

Public Transport

- Buses: The bus service is already poor with little sight of improvement
- Trains: There is a station at Snowdown but the service is slow, once an hour to London for a 2 hour journey. The stations at Snowdown and Aylesham also do not cope with current levels of use. Parking is an issue and walking is difficult along narrow country lanes with no footway.

Summation

Womenswold Parish Council objects to the proposed Housing Estate SAP 24.

It is too large, and when the adjacent Canterbury City Council plans (R20 and R1) are taken into account, it effectively creates an Aylesham/Womenswold Conurbation in a very rural area of Outstanding Natural Beauty.

There is currently little infrastructure to support existing communities. The proposal would seriously impact on this.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Comments on the Dover District Draft Local Plan from

Womenswold Parish Council

Womenswold Parish Council is submitting comments based on discussion at the Parish Council meeting on 8th November 2022.

The Council wishes to comment as follows on the proposed housing estate SAP 24 of 640 houses on land between Aylesham and Snowdown:-

Rural Nature

- The proposed site of the housing estate is on a greenfield site in a rural community. This proposal would severely impact on the rural nature of the area. In addition, valuable farm land will be lost to the production of food. This is clearly much needed in these difficult times

Water

- The area in question lies in a drought stricken part of the South East. This summer and most summers we have water shortages. This development can only exacerbate the problem. In addition, Canterbury City Council is planning a total of 3620 (minimum) houses in the adjacent area, adding to the burden of water shortage.

Sewage

- The whole of the South East suffers from extremely poor infrastructure for the disposal of raw sewage. There have been many recent instances whereby Water Companies have pumped raw sewage into the sea which has resulted in large fines. Clearly the addition of nearly 4000 home will only add to this problem.

Traffic

- The proposal, together with Canterbury City Council's proposal will increase the strain on the rural road infrastructure. In particular, the B2046 is already extremely busy. There have been many accidents at the junction to the entrance to Womenswold Parish. In addition the slip road on the A2 (London Bound) is far too short. The increase in traffic created by these developments will only make this worse.
- The roundabout on the A260 by the A2 was built to deal with the huge increase in traffic coming from Aylesham under the current Aylesham expansion. It does not take into account the further proposed increases.

Infrastructure

- Currently there is a major shortage of facilities which contribute to facilitate supporting the community:-
 - Doctor surgeries.
 -
 - There are no secondary schools in the area. The nearest schools are in Canterbury, Sandwich and Dover. This necessitates a bus ride on overcrowded and unreliable buses. This also contributes to increased Greenhouse gasses and increased traffic congestion. The addition of so many houses will seriously exacerbate the problem.
 - There is only one small Coop in Aylesham which hardly copes with current levels of business.

	<p>Public Transport</p> <ul style="list-style-type: none"> • Buses: The bus service is already poor with little sight of improvement • Trains: There is a station at Snowdown but the service is slow, once an hour to London for a 2 hour journey. The stations at Snowdown and Aylesham also do not cope with current levels of use. Parking is an issue and walking is difficult along narrow country lanes with no footway. <p>Summation</p> <p>Womenswold Parish Council objects to the proposed Housing Estate SAP 24.</p> <p>It is too large, and when the adjacent Canterbury City Council plans (R20 and R1) are taken into account, it effectively creates an Aylesham/Womenswold Conurbation in a very rural area of Outstanding Natural Beauty.</p> <p>There is currently little infrastructure to support existing communities. The proposal would seriously impact on this.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Monitoring & Review
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The plan was compliant until the day before the Regulation 19 consultation was authorised Canterbury City Council published their Regulation 18 consultation including significant development adjacent to the authority boundary at Aylesham.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	If this proceeds it makes some of the conditions proposed for SAP24 irrelevant and the reasons for not including proposed development north of Aylesham outdated . There needs to be significant consultation with Canterbury City Council on the future of Aylesham to ensure the provision of employment land, retail etc. in line with a masterplan that provides effective local planning.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	By the time Public Examination takes place, Canterbury's local plan will have progressed to the point that comments need to be updated/

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Developments of land around Aylesham, Nonington and Elvington
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>What planning discussions have happened with Nonington Parish Council and equivalents for Aylesham and Elvington? Exhibitions and requests for comments but not proper conversations and discussions. You cannot call this cooperation. The Duty to Cooperate has not been fulfilled - also evidenced by the councils' objections and surprise at these plans.</p> <p>Despite the plan strategically saying that most development is needed in Dover and that it has an imbalance of housing and is unattractive, DDC has decided to inappropriately "promote" Aylesham now a large village, isolated with few amenities, to the status equivalent to Sandwich, a town that has developed over centuries and has many facilities and bus routes based on it. This is not justified and so the plan is not positively prepared.</p> <p>Roads around Aylesham, Nonington and Elvington have already too much traffic. Where are the assessments? The attached map shows how poor the road infrastructure is. the roads are narrow, bendy and almost all without pavements. There are v few bus services - none in Nonington. The plan is not sound as there would be far too much new traffic. So the plan is ineffective, not positively prepared and not justified.</p> <p>Where is the employment to come from? We do not need more space - there are empty units. Snowdown Colliery site is going to remain leased to the NCB Residuary Body and not developed - as confirmed by the owner. Even if it were to be released, the costs of development, whilst preserving key buildings and on this brownfield site, would not be economic. In the plan, this is a pillar of justifying the developments and the need for more housing but it is very tenuous to say the least - so the plan is unjustified and unsound.</p> <p>The population of Dover District and surrounding districts is pretty static. There is not the robust evidence to justify the degree of planned housing expansion. The plan is not justified or positively prepared. Large developments in East Kent provide housing which looks cheap to London boroughs which can place people they are responsible for into East Kent. We have seen this already in several places. Those placed are unlikely to bring prosperity to the region given their dependence on local authorities for housing. This is not serving the needs or wishes of the existing local population so on these two counts the plan is not positively prepared, evidenced or has there been cooperation with locally elected bodies like parish councils who are only too aware of relatively large influxes from London into new developments. It is also not effective as many of these people will not have the skills to fill employment needs.</p>

	<p>The description of one of the areas as a "Country Park' yet it has 420 houses allocated is disingenuous. It this an attempt to allay concerns? The areas around Aylesham are also earmarked by Canterbury City Council for major development. It would turn the whole area into an isolated housing estate, most people commuting for work elsewhere. The lack of facilities risks widening inequalities as it would be not be attractive to people with the resources to live elsewhere.</p> <p>Given the lack of soundness of this plan, I doubt that it is legally compliant.</p> <p>This is not just nimbyism - we should be planning something that we ourselves could well imagine being keen to move into. I really doubt many DDC planners or councillors or plan inspectors would wish to move into the new estates in the proposed locations and with he lack of facilities that this plan envisages. From the heart - do you really think that this is what you want to do? Create a big housing estate of poorer people? Almost an East Kent ghetto? Large housing estates carefully and optimistically planned and built elsewhere have gone quite wrong for similar reasons - poverty and isolation.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I cannot see how the current plans can go ahead. There needs to be a rethink, ideally abandoning plans to turn this area predominantly into a large housing estate.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	<p>SP3 Housing growth</p>
<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Due to the governments announcement 5/12/22 the plan is not positively prepared as the development needs must be reassessed. This means it is no longer justified as there now is the room without central government pressure to find reasonable alternatives. It is also not effective as the pressure put on local communities and existing infrastructure is unreasonable and means that it is not deliverable. The plan is also not consistent with NPPF 2021 as the many landscape and heritage assets in Dover District are being compromised by the level of unsustainable overdevelopment which the current plan has allowed.</p> <p>The Housing Growth statement that the aim is to , "provide a greater choice of high-quality housing to meet the needs of Dover districts's growing population and changing demographic and address affordability issues", does not seem internally consistent with the details provided in the plan which underestimates the evidence showing a large part of district population growth is due to aging. The details thus render SP 3 and SP 5 less effective and less sound.</p> <p>Under the current LDP developers have shied away from the badly needed regeneration of Dover and concentrated on building maximum profit, minimum affordability developments of large homes around the more desirable town of Deal and out in Whitfield. The supposed regeneration of Dover has resulted in another generic shopping centre and a more depressed high street and has not lifted the rest of Dover. The promenade area is uplifted but there seems to be little connectivity to the rest of Dover.</p> <p>The government department (DLUHC) decision that Dover needs 611 new dwellings a year and a minimum of 10,998 new homes between now and 2040 we find very incompatible with legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008, and unsound. We should be transforming existing housing stock into zero carbon homes as is happening in East Sussex, led by Lewes DC. Combining these numbers with 3.51 and the statement '76.7% of the new homes are on greenfield sites, while 23.3% are on brownfield sites' is unsound and unacceptable to the public.</p> <p>We feel that our communities are being harvested by developers and our worries are not being heard or needs met in terms of infrastructure. Thanks to certain national newspaper Sunday supplements, Deal is desired as a 2nd home location by the wealthy from London and elsewhere. Holiday homes which spend most of the year empty in Deal, Dover and coastal villages of Kingsdown and St Margarets are stopping locals from buying affordable homes in their own area from existing housing stock.</p> <p>It must also be pointed out that at least one of the sites included in the 23.3% of brownfield sites is actually a site intended by SEEDA as local nature reserve having rewilded on unstable slag (only rendered stable by tree-planting, a site which DDC forgot to make a local nature reserve in 2004, and it has become a biodiversity hotspot well known to genuine ecologists nationally; Betteshanger Park.</p> <p>Central government in London, according to Housing Today is imposing a disproportionate amount of housing growth on Kent and the SE. There is a grievous lack of democratic accountability across Kent. So the chances of protecting Kent, of achieving a Growth Strategy that creates climate-friendly jobs and suitably sized, suitably-priced zero-carbon homes for the next generation of local families, are not good. The space available for infrastructure, functions well for compact coastal towns of the size that Deal / Walmer and Sandwich were 5 years ago.</p> <p>The level of greenfield overdevelopment which has been disastrous under the current weak LDP is putting Deal infrastructure under strain now, so in-fill should make up the majority of the allocations for Deal and that the housing growth specified for District Centre of Deal and around its boundaries needs to be stopped or radically reduced. Either or both of SAP 15 / SAP 34 would destroy the only road access alternative for diverted traffic. (See detailed comments under SAP 15/ SAP 34 below). Housing Growth that threatens gridlock, blocking off a conurbation of 30,000 from access by emergency vehicles, commuters, school buses is not sustainable housing growth and is very unsound.</p> <p>3.29 I note and welcome a degree of shift from the Reg 18 draft, in that more sites have been selected with a view to using 'existing infrastructure, facilities and services, with a greater professed purpose to ensure development contributes to the sustainability of local communities and services'.</p> <p>I note with appreciation both the increase in the number of sites in Dover town SAP 6 – SAP 13, and the SAP 26 Former Snowdown Colliery, Aylesham near a rail station for example. It should be possible to state a determination to 'make best use of brownfield – non-rewilded – land) without giving developers the opt-out qualification 'wherever possible'.</p>

	<p>On Five Year Housing Land Supply. 3.39 Having stated the Council had 6.03 years land supply plus a 5% buffer; it is not sound, effective or legally compliant to then state 'the provision of additional sites within the first 5 years of plan period is needed to ensure resilience and promote flexibility;'. Instead of ensuring resilience, it will create exactly the destructive suburbanisation of a rural district that many, many of the resident electorate are most worried about.</p> <p>3.46 It is the conspicuous lack of a secondary school in Aylesham that prevents Aylesham becoming the small garden town planners aspire to. The provision of a secondary school by 2028 should be a condition of SAP 23. There seems to be a complete lack of planning in the statement that now</p> <p>3.48 Many, many of the current residents of ex mining village Elvington were / are dependent on buses that have recently (2022) been cut, (following KCC cut to bus subsidies) to get to work in Canterbury, Folkestone, Sandwich, Thanet or Dover, or to get to secondary school, or to get to doctors, or to shop. These people had environmentally sustainable public transport service that has been cut. KCC is saying it is looking at potential bankruptcy in 2023, so promises of new services and facilities are met with some disbelief. The selection of this site is ONLY sound with cast-iron conditions to provide all of the services we mention below, including new drainage infrastructure. Council housing in Elvington has been subject to flooding from the sewage system, long overdue for replacement. As in Dover deprived wards, there are unhealthy EPC EFG homes in Elvington that need to be transformed into zero carbon home to lift residents out of fuel and therefore food poverty.</p> <p>3.68 Windfall. Unless existing settlement boundaries are respected, there is suburban ribbon development creep from field to field to field. To render the plan sound it should contain a statement 'Previously existing settlement boundaries will be respected, until such time as town and parish councils may have agreed changes with Dover District Council, in accordance with the principles of Localism Act 2011.' In the current economic climate, it seems very naïve to hope that 'new housing in villages can help them retain existing services such as public transport, retail (many pubs are going under because lack of staff and sky high energy bills) and schools'. Indeed we have lost a large proportion of our bus services in the district.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Push back to central government and demand a reduction in the housing allocation of 10,998 new homes. Now possible after announcements 5/12/22 from Prime Minister.</p> <p>Regenerate Dover as a priority, retrofitting existing housing stock to provide well insulated renewable energy powered homes. Windfall development only should be allowed in Deal, Sandwich and surrounding villages. Create a self sufficient sustainable garden village at Aylesham with secondary school and green infrastructure and homes far beyond future homes standard.</p> <p>Provide better facilities and transport links for Whitfield to ensure that homeowners are not car dependent.</p> <p>Lobby central government for changes to the rules for ownership of second homes. Priority should be given to locals.</p> <p>Make the wording in the plan stronger in favour of brownfield sites eg 3.32 <i>sufficient amount and variety of land</i> should also state that brownfield must be used before greenfield as per stated in NPPF 21.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>These comments are relevant to AYL003 the questions around legality and soundness seem to relate to the whole plan. The comment below focuses on this Aylesham.</p> <p>1.0 Summary</p> <p>Top down housing targets, geography and an historic underinvestment in the strategic road network have created genuine constraints in the Dover District. Nevertheless, an LDP where 76% of all proposed housing is on greenfield sites is inherently unsustainable.</p> <p>From the loss of irreplaceable agricultural land and habitat, to reinforcing the district's car dependency by creating greenfield sprawl that will significantly change the rural character of the north west of Dover District, DDC's Reg 19 LDP DDC's will deliver the wrong houses in the wrong locations. It won't improve the environment or mitigate climate change. If the purpose of the planning system is (as set out in the NPPF) to ensure that sustainable development is pursued in a positive way, we believe this plan cannot be considered to be justified and it will not enable the delivery of sustainable development.</p> <p>1.1 Objective</p> <p>Overarching concerns about the sustainability of the adopted land allocation strategy were raised in our Reg 18 comments (see attached). Our Reg 19 response is focuses on mitigating the traffic impacts from the proposed development that (as a small village located on one of the 2 main rural routes between the A256 / 7 and the A2) will have a direct, severe and devastating impact on our community. These impacts are outlined in Section 2.0 below.</p> <p>Based on our experience on Aylesham (DOV/07/01081 and DOV/13/0120), Nonington Parish Council believe that the site-specific impact focus of S106 means it is not an effective framework for mitigating cumulative impacts from multiple spatially distributed developments on a rural road network. It is impossible to disaggregate traffic flow to attribute the increase to specific site.</p> <p>We note that Reg 19 Housing Policy 4.21 states that cumulative impact all sites allocated in this Plan on common road links must be considered. However, in judging how this might work in practice, we reviewed how the cumulative traffic impacts from the current plan period developments (in Aylesham, Sholden, Woodnesborough, Sandwich, Sholden, Eastry, Betteshanger, Discovery Park) have been considered in relation to the C195 route on which the village is located. To date only Aylesham has been required to measure traffic impacts (DOV/13/0120 – Variation of Conditions 76 of Planning Permission DOV/07/01081) to identify the traffic impact arising from the cumulative occupation'. Conducted in April 2018 with 380 of 447 units occupied, the traffic consultants, MLM, concluded that no impact could be attributed to the development because the identified increases were in line with ONS data showing road traffic increased by 29% from 1990 to 2018. It is noteworthy that greenfield housing, like that Aylesham, with unrealistic assumptions of self- containment were – in turn – identified as a key driver national car use increases.</p> <p>Combined with our concerns about the robustness of the employment, sustainability and traffic baseline evidence (outlined below), we are seeking effective mitigation enshrined in a Local Plan policy rather than deferring this to a S106 negotiation at the planning application stage.</p> <p>1.2 Basis for Objecting</p>

1.2.1 Inconsistent and Insufficient Traffic Evidence undermining Plan Soundness and Sustainability

MHCLG's guidance states that an LDP should be based on robust transport evidence base collected in advance that should encompass: the cumulative impacts of existing and proposed development on transport networks, a review journey purpose and accident records as well contextual data such as travel to work areas in order to measure the impact on the locality in economic, social and environmental terms.

I. Detailed traffic evidence has been collected for the DDTM area in the REGULATION 19 TRANSPORT MODELLING FORECASTING REPORT but the strategic housing and employment sites outside the DDTM area have only been modelled 'in significantly less detail'.

The result is that the area bounded by A2, B2046, A256 and A257 has significantly less robust traffic evidence, undermining the scope for an effective analysis of cumulative impacts of existing and proposed development on transport networks in this area. This area includes Sandwich, Aylesham, Elvington, Eythorne, Eastry, Wingham, Shepherdswell and Ash and has 1554 of the Reg 19 plan new dwellings allocated within it (Source: Distribution of Housing Site Allocations by Settlement). This accounts for 78% of all Dover District's Reg 19 housing allocations outside Dover and Whitfield. This area also encompasses the strategic employment sites at Discovery Park and the Aylesham Development Area. Detailed Analysis of Traffic Evidence is set out in Section 4.1

II. The sustainability evidence base uses 'unrealistic assumptions about self-containment' and unfounded onsite employment assumptions that are not supported by contextual travel and commuting pattern data. For example in SA 7.51 LUC incorrectly include Snowdown Colliery as a strategic site inflating site employment sustainability and under estimating outbound commuting from Aylesham.

III. There are inconsistencies in the sustainability evidence base. For example SA Section 6.207 states that Eythorne (and Elvington) has 'relatively good access to existing local rail...services'. Eythorne railway station closed to passenger traffic in 1948.

IV. The Office of Road and Rail passenger data for Aylesham between 01/01/2016 – 01/01/2020 show rail journeys per head of population in Aylesham fell as the first phases of the 'garden village' were occupied. Transport in Aylesham has actually become less, not more sustainable.

1.2.2 The Duty to Co-operate

DDC were only made aware of Canterbury City Council's (CCC's) Reg 18 plan for 3200 houses north of B2046 and the 420 dwellings on land contiguous to SW Aylesham in September 2022, shortly before the publication of their Reg 19 plan.

We haven't seen a statement of common ground or any evidence of the active ongoing constructive engagement and co-operation required to maximise the effectiveness of local plan in the context of strategic cross boundary matters or of any coherent strategy based on agreements between them.

As all authorities are required to reach agreement on strategic matters before submission we expect this is under review but – based on the absence of co-operation evident to date – we question whether the legal duty to co-operate can be complied with in a meaningful way.

1.2.3 Scale of Cross Boundary Development Impact on DDC Reg 19 Evidence Base and Plan Soundness

Although DOV/07/01081 and DOV/13/0120 promoted Aylesham as a 'Garden Village', in their Reg 19 plan Dover District Council propose that Aylesham becomes a small Garden Town of 15,000 (LDP 4.196 and 4.199). Canterbury City Council propose another 3,620 dwelling adjoining Aylesham to create a single 'new town' or Freestanding Garden City with a population of 25-30,000 people. A development of this scale requires realistic assumptions about self-containment, a strong foundation of employment and appropriate infrastructure to avoid creating an unacceptable severe cumulative impact on adjacent road network.

The consideration and mitigation of transport impacts is an essential part of Government's wider policy objectives for sustainable development. The objectives set out in NPPF para 111, DDC's Reg 19 Policy T12

10.8 can only be effectively delivered against a robust evidence base that provides the clear benchmarks and thresholds that a planning application can be measured against.

Canterbury City Council's stated Reg 18 position is that the traffic impacts of their proposed new town joining Adisham to Aylesham are mitigated by the planned south Canterbury bypass which, they claim, will reduce traffic impacts as measured across their district. No evidence has been provided to establish how this will mitigate the impact of 3,620 additional dwellings on the rural road network in Dover District.

As highlighted in 1.2.1 (i) above, in relation to DDC's Reg 19 plan, we have existing concerns regarding the absence of a robust transport evidence base for the area bounded by A2, B2046, A256 and A257, collected in advance and benchmarking existing traffic levels so the cumulative impacts of proposed developments on transport networks can be subsequently measured.

The additional scale of Canterbury's proposed development and proximity to Aylesham and the District's boundary, means that DDC's Reg 19 plans is not positively prepared as it is not informed by agreements with other authorities or consistent with achieving sustainable development.

It is not justified as it is clearly not based on proportionate traffic or sustainability evidence.

We would argue that this also compromises plan efficacy given the absence of effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.

2.0 Location - Background

Nonington is set along a 1.2 mile stretch of a rural road with constrained widths, a number of single lane pinch points and long stretches (including in the heart of the Easole Conservation area) with no pavements. This route connects Sandwich and the A257 to the A2. A 'rat run', the C195 is badly impacted by the cumulative impact of traffic from Sandwich, Deal, Eastry, Woodnesborough, Sholden (via Drainless Road, Heronden Rd and Thornton Road), Elvington and Aylesham, with pre-pandemic baseline traffic of 90,800 vehicles a month. (MLM / K & M SURVEYS 2018 - 7 day total (East and West) = 20,888 traffic movements)

KCC Highways confirm Holt Street, Easole Street and Sandwich Road route (Linking B2046 and Sandwich) is classified as the C195 and is "not a secondary route, as defined in our road hierarchy, and "for reasons of various highway constraints along the corridor". It should, therefore, be protected from the cumulative or inappropriate traffic impacts. However, as detailed in item 1.1 above, in the current plan period no actual measures have been put in place to mitigate development traffic impacts on the C195 route.

We have had several accidents, 6 road accident deaths on the C195 since 2014 and multiple crashes in the village mostly unrecorded by the police.

Multiple single lane pinch points with no pavements. On street parking and private driveways used as passing points

We have a problem with speeding in excess of the speed limit of 30mph. MLM's s106 surveys 2014 and 2018 showed Holt Street Nonington speeds heading SE 38 mph and NW 37 mph.

Applications directly increasing C195 local traffic in the current LDP:

Aylesham 1320 dwellings (DOV/07/01081), Sholden 230 residential dwellings (DOV/10/01065), Sandwich 120 residential dwellings (DOV/19/00243), Hammil 29 residential dwellings (DOV/16/01026). Woodnesborough 24 residential dwellings (DOV/11/00965) with a number of application to be decided including a 120 bedroom hotel and 210 residential dwellings in Betteshanger Country Park.

3.0 TI1 - Sustainable Transport and Travel

Item 10.1 seeks to 'facilitate a shift away from petrol and diesel powered vehicles over the lifetime of the Plan and promote sustainable forms of transport and travel'.

The evidence doesn't support the deliverability of this goal on a Reg 19 housing allocation with over 76% of all new dwellings on greenfield sites. These are known to have significantly higher car dependency than brownfield sites. If we take Aylesham as an example, DOV/07/01081 and DOV/13/0120 committed to the expansion of Aylesham Garden Village and promoting sustainable transport predicated on the rail service. Yet, the Office of Road and Rail passenger data show rail journeys per head of population in Aylesham dropped between 01/01/2016 – 01/01/2020. Despite the 'garden village' aspirations, transport in Aylesham has actually become less, not more sustainable.

Public transport, cycling and walking uptake is highest in metropolitan and dense urban areas where use of public transport is typically 35%-50%. This falls dramatically in greenfield developments in ex-urban and rural sites. Research also shows significant sustainable transport adoption variations exist within settlement types driven by socio-economic and topographical factors. (Source - Bennett Institute for Public Policy at the University of Cambridge 2020.) None of this appears to be considered.

KEY FACTS

- Elvington and Whitfield don't have rail connections. Stagecoach have cancelled the 38 bus service.
- ONS Travel to Work Census data for Elvington showing 95.8% of journeys were made in cars, vans and motorbikes while only 2.7% were by bus.
- ONS Travel to Work Census data for Whitfield, Elvington and Aylesham combined: 82.5% of all journeys were in a Car. Only 5.8% on public transport.
- The 'Dover Fast Track' represents the largest infrastructural investment in the district. At £50-£70 million, is it an effective use of scarce capital investment or a white elephant?

ORR Passenger entries and exits for Aylesham data shows passenger numbers per head of population dropping Jan 2016- Dec 2020.

o Passenger entries and exits increased by 19.6%. 2016-17 to 2019-20.

o Aylesham Population increased by 30% over the same period.

NOTE _ 20-21 data discounted because of Covid. 2016 Population=4,980. By March 2018, 493 new dwellings had been completed. Estimated mean new dwelling occupied by 2019- 2020 = 500. Estimated population increase = 1,500.

Aylesham Elvington Whitfield Combined

Train 74 (4.1%) 60 (3.06%) 29 (1.4%) 2.3%
 Bus 66 (3.6) 49 (2.5) 86 (4.3) 3.5%
 Car/Van 1130 (62.0) 1544 (84.9) 1411 (69.7) 72.2%
 Passenger in car/van 163 (8.9) 141 (7.8) 182 (9.0) 8.6%
 Motorcycle 18 (1.0) 45 (2.5) 30 (1.5) 1.7%
 Bicycle 29 (1.6) 19 (1.0) 34 (1.7) 1.4%
 Taxi 0 (0) 9 (0.5) 6 (0.3) 0.26%
 On foot 201 (11.0) 89 (4.9) 110 (5.4) 7.1%
 Source ONS Census Data Travel to Work 2001

Conclusion

This policy cannot be said to be 'positively prepared' when the evidence shows it is not consistent with achieving sustainable development;

This policy cannot be said to be 'justified' as it is not based on proportionate evidence if we accept the PAS definition as 'evidence obtained with an understanding of the way in which issues arise within a plan area to enable an understanding of the issue/topic in question thereby leading to clear analysis and a consequential strategic or policy position within the plan'.

- As non-planners, we are struck by the fact that plan making appears to focus on assigning 'sustainability' labels to plan policies without evaluating the evidence for how well these deliver in the real world. What is the local evidence that garden villages or towns actually deliver improvements in sustainable travel? Has the 900 house garden village expansion of Aylesham delivered the expected uptake of cycling and public transport use? Has the provision of employment space delivered the expected expansion in the local employment base, in shops, services, and local business employment (within new office space) capable of accommodating supporting 40% of the population? Or does the evidence show that it is a dormitory commuter suburbs – the antithesis of the Garden City idea.

Failure to assess the performance of policies risk creating confirmation bias and recycle poor policies that deliver poor outcomes. So is this plan policy 'consistent with national policy'? Does it enable 'the delivery of sustainable development in accordance with the policies in this Framework? Based on the evidence and judged against the policies set out in NPPF para 7,8, 9 and 10 then the answer is no.

The absence of evidence is not evidence of absence. PAS state good evidence should contain reliable, objectively collected recent data and will not contain unjustified assumptions. If the evidence shows assumptions about 'self-containment' are unrealistic and that the offer of plentiful land for industry has not delivered the expected employment, then these are unjustified assumptions.

4.0 Reg 19 T12 - Transport Statements, Assessments and Travel Plans

In item 10.7 set out their goal of 'promoting the delivery of sustainable development' stating that 'Traffic generated by development should normally be targeted towards the primary and secondary route network in the District. Other routes should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements'.

Although KCC Highways consulted with DDC on policy (T12) they haven't published benchmark traffic levels or defined 'inappropriate' or 'unsuitable' traffic impacts because 'baseline conditions vary considerably from location to location'. Nor does NPPF para 111 provide a definition of 'severe' or 'unacceptable'. DDC also seek discretionary power over:

- When or whether Transport Assessments and Travel Plans are required.
- And to decide what constitutes a severe residual cumulative impact on the local highway on a case by case basis.

Without the robust benchmark data on existing traffic (as required by MHCLG and DDC's Sustainability Appraisal of Growth Options), it unclear how this will work in practice. Especially given the pressure to deliver on housing targets and the local government financial incentives to facilitate housing inherent the New Homes Bonus which we understand paid £1,728,587 to DDC in 2019.

- The Reg 19 proposed Aylesham South and Snowdown sites are accessed directly from the C195 / Holt Street, which is also the direct route to the A2 from Elvington. This will increase our traffic issues.
- While recognising the 'porosity' of the contiguous rural road network the traffic impacts from the proposed Aylesham site on to Holt Street, WSP data and modelling is restricted to the observation that 'Holt Street is not modelled but anticipated trips for Aylesham Development will leave the network here'.
- No ACT data has been collected or for traffic heading North on Adelaide Road from Elvington to the A2 or from Aylesham heading south east to Sandwich, Discovery Park and South Thanet

PAS state good evidence should contain reliable, objectively collected recent data and will not contain unjustified assumptions. For the area bounded by the A2, B2046, A256 and A257, we believe the patchy 2018 ACT traffic evidence fails this test as it does not include:

1. Disaggregated SERTM data.
2. Node Impedance Calculation (ICA)
3. VISUM Network Map of existing and proposed roads
4. Detailed benchmark capacity PCU per Lane per lane data for Links types including for Rural Roads and Minor Road Rural Village (30mph).
5. Education Cat Trips prior matrices .

In assessing whether the Reg 19 sites in Aylesham and Elvington likely to result in inappropriate levels of traffic generation or unsuitable traffic movements' on the C195 route, we reviewed the following data to establish the likely impact:

- 2011 ONS Census data,
- ONS - Nomos data, labor market statistics and DataShine ESRC BODMAS conclusions in the Sustainability Assessment,
- WSP's DDTM and Reg 19 traffic data,
- the Office of rail and Road Estimates of station usage and
- Onsite employment assumptions
- Education commuting data.
- AA Route Planner

The key findings are itemised in Section 4.1 below.

Reg 19 TI2 - Conclusions

Reg 19 SA Appendix B confirms the District's residents 'rely heavily on cars to...access employment, education, amenities and services' and predicts an increase of commuting from Aylesham to Sandwich (the district's 2nd commuting hub) as well as to Thanet and Deal. In addition to reduced onsite employment at Aylesham (reduced in WSP modelling from 1013 in Reg 18 to 263 in Reg 19) and the absence of any direct public transport links to Discovery Park, Deal or Thanet; the absence of Secondary education facilities and the primary education capacity issues in Aylesham will also continue to drive increases in commuting road traffic on the C195.

The conclusions are clear, Aylesham will increase traffic on the surrounding rural road network but what is not clear is how DDC propose to deliver their goal of 'promoting the delivery of sustainable development' or ensure 'Other routes should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements'.

DDC have failed to engage with the conclusions from existing evidence base or commission a sufficiently robust traffic data for the area bounded by A2, B2046, A256 and A257 containing >78% of all Dover Districts Reg 19 housing allocations outside Dover and Whitfield. Consequently there are no clear thresholds against which future applications can be measured. If, as a result, unsound policies are included in the LDP, then no subsequent s106 developer contribution led mitigation will be achievable.

Therefore, we conclude the policy is unsound because:

1. This plan is not consistent with achieving sustainable development and therefore cannot be called positively prepared.
2. Ignoring the area-specific evidence itemized in 4.0 and below, this policy cannot claim to be based on proportionate evidence and., so, cannot be considered justified.

4.1 Traffic Evidence Summary

1. Despite the Ministry of Housing, Communities & Local Government 2020 LDP guidance stressing the importance of contextual data such as travel to work areas (and that evidence needs to inform what is in the plan and shape its development rather than being collected retrospectively). Although referenced at a District level in the Sustainability Assessment, none of this contextual or empirical evidence has been considered in the LDP strategic site allocation process in relation to the impact of Aylesham and Elvington on the road network.

2. From ONS data to SA commuter patterns and to SHMA 2017 all highlight a strong trend of out-commuting. ONS data shows high car reliance in all major strategic site locations.

3. WSP's DDTM (Reg 18 Traffic Plan Assessment 2020 / Regulation 19 Transport Modelling Forecast Main Report or Appendices) report conducted detailed modelling of the Dover and Deal traffic. Other areas were 'modelled in significantly less detail'.

4. Despite recognising the LDP will 'lead to large increases in flow' in Aylesham, WSP's analysis is limited to a handful of ATC's (automatic traffic counters) on the B2046 1n 2019. WSP's report offered no conclusions on the area north of the A256 as it was outside the DDTM area. Although concerns were raised at Reg 18 no new traffic data or modelling has been introduced at Reg19.

We understand KCC Highways have 'requested projected development flows leaving the currently modelled areas in that direction to sense check on any need to extend the models'. However, given the site-specific impact focus of S106 means it is not an effective framework for

mitigating cumulative impacts from multiple spatially distributed developments on a rural road network, we believe an specific LDP policy is required.

5. 'Critical locations on the road network with poor accident records should be identified in order to determine if the proposed land allocations will exacerbate existing problems and whether highway mitigation works or traffic management measures will be required to alleviate such problems. The accident records should be compared with accident rates on similar local roads'. (MHCGL guidance on traffic evidence for LDP)

There have been 4 deaths on Holt / Easole Street within 1.5 miles of the Aylesham Road junction. How many deaths are required in order for Holt Street to qualify as having a poor accident record and to be included in the detailed traffic modelling?

6. The Elvington data consists of ATC and manual data counts. By citing proximity to A256, the implicit study assumption is that the A256 is the primary route used. No empirical data collected on the traffic heading to the A2 / M2 / M26 or M25 from Elvington.

7. WSP recognised the porosity between the B2046 and the adjacent rural road network, yet provided no analysis of (1) the rural road capacity restrictions or (2) of baseline cumulative traffic from development to date or (3) the projected increase on the road network from the LDP.

8. According to WSP, Highways England approved matrix information from the South East Regional Transport Model (SERTM) used by WSP in Deal was only disaggregated using the 2011 Census data for the DDTM area. As noted in 2.2.13 of WSP's 2018 DDTM the SERTM data is very coarse and with no disaggregation would provide little insight into Elvington and Aylesham commuting patterns via the rural road network

9. There is an extensive resource of rural road network ATC data from Aylesham's s106 TA's (2007/ 2014/2018 etc.) that could have been consulted. KCC Highways confirm the ACT data used for Phase 2b of the Aylesham Village Expansion has not been considered.

10. WSP's observation on likely traffic impacts of proposed Aylesham Development on the rural road network is restricted to 'Holt Street is not modelled but anticipated trips for Aylesham Development will leave the network here'. WSP implicitly assumed all traffic for Aylesham will access and leave the site form Dorman Ave North. ATC and modelling evidence shows this assumption to be unsound.

11. In their Reg 18 comments on Aylesham KCC raised concerns over 'the impact of the development on the highway network, particularly as Aylesham has no secondary education provision so the need for travel by private vehicle for secondary school age children may be higher than in other areas of the district'. No modelling of the associated traffic impacts has been provided.

Note - During the development of the 2015 DTM and 2018 DDTM car trips which are made to schools were modelled by WSP. Despite the absence of a Secondary School no similar exercise has been conducted on

12. By highlighting the need to expand St Joseph's primary, KCC's Reg 19 comment identify the shortfall of primary places in Aylesham. Unlike in the DDTM area WSP has not modelled car trips which are made to schools for Aylesham or Elvington. There are 378 primary places in Aylesham for a current population of 6,000 with a further 630 houses proposed in this LDP. This is below the national average. As a result the pupils attend schools across the area. For example at Goodnestone & Nonington CE Primary School 43% of pupils come from Aylesham and 30% Elvington creating up to 4 car trips of 1-3 miles each per day.

13. KCC Highways informs us that education commuting will be dealt in a Transport Assessment. We have been unable to locate any education commuting evidence in the Transport Assessment evidence for (App no 07/01081) for either Phase 1 or 2 in Aylesham or a School Travel Plan as recommended in Managing Our Roads (DfT, 2003) and The Future of Transport – a Network for 2030 (DfT) White Paper, 2004.

14. In Reg 18 comments, KCC raised concerns regarding the additional flow anticipated on Shepherdswell Road due to the narrow, rural nature of the road. Holt Street / Easole St / Sandwich Rd are similar in terms of their physical constraints and traffic levels. Both are 'rat runs' between the A2 A256 and significant coastal settlements. In relation to application 19/00381, Richard Smith (Senior Development Planner - KCC Highways) accepted a reduced vision splay from 45m to 25 metres on Easole Street based on an independent highways report describing Easole Street as being a narrow road, 'in a rural location with a tight bend to the west and a junction to the east. The road has no footways, with high hedges bordering each side of the road, creating an extremely constrained environment. There is evidence of vehicles crossing the centre line; the markings are very worn and hardly visible'.

15. ORR Passenger entries and exits for Aylesham data shows passenger numbers per head of population dropping Jan 2016- Dec 2020.

o Passenger entries and exits increased by 19.6%. 2016-17 to 2019-20.

o Aylesham Population increased by 30% over the same period.

NOTE _ 20-21 data discounted because of Covid. 2016 Population=4,980. By March 2018, 493 new dwellings had been completed. Estimated mean new dwelling occupied by 2019- 2020 = 500. Estimated population increase = 1,500.

16. WSP's Reg 19 Traffic Report is based on the 2018 DDTM study which undertook a detailed analysis of the rural road network the other (western) side of the A256 using disaggregated SERTM data, Node Impedance Calculation (ICA), mapped out on a VISUM Network map. This

established benchmark capacity PCU per Lane data for a range of defined link types including 'Rural Roads' and 'Minor Road Rural Village (30mph)'.

17. In their Sustainability Appraisal of Growth Options in the Dover District Council Local Plan Topic Paper: Overarching Strategy (Part 1) point 1.5. DDC undertook to 'assess growth options in terms its likely effects on environmental...using available evidence including commuting patterns, transport infrastructure, traffic congestion (and related air quality and carbon emissions issues)'. Although some data was considered, the detailed data was not considered when evaluating the impact of the Aylesham or Elvington sites

18. In the SA LUC use ONS - Nomos data, labor market statistics and DataShine ESRC BODMAS (using 2011 ONS Census data) to establish commuter patterns. Based on this the Reg 19 SA Appendix B confirms the District's residents 'rely heavily on cars to...access employment, education, amenities and services' and predicts an increase of commuting from Aylesham to Sandwich (the district's 2nd commuting hub) as well as Thanet and Deal.

19. DDC's LDP Sustainability Appraisal identifies Sandwich as the District's key centre for inbound commuting. The Reg 19 provision of employment sites in Aylesham have been reduced by 85% from 1013 jobs in Reg 18 to 263 jobs in Reg 19. (source WSP main Report (i) Reg 18 and (ii) Reg 19. Reduced onsite employment will increase site generated commuting traffic.

(NOTE The Reg 19 Sustainability Assessment has not been revised to reflect the 85% reduction of onsite jobs, calling its conclusion about Aylesham site sustainability into question).

20. The Local Plan (Reg 18 and Reg 19) Sustainability Appraisal for the proposed sites in Aylesham and Elvington is – for traffic purposes - limited to recording the proximity of proposed dwellings to a bus stop and / or train station. The ONS - Nomos data, labor market statistics and DataShine ESRC BODMAS conclusions in the Sustainability Assessment, analysis of car dependency and commuting patterns or journey to work data was considered on the site assessments. This appears to limit real world applicability.

21. None of the evidence base on car dependency in Greenfield ex-urban developments nor car-dependency and the commuting pattern evidence appears to have been considered.

22. SA Section 6.207 states that Eythorne and Elvington already have 'relatively good access to existing local rail and bus services'. However Eythorne railway station closed to passenger traffic in 1948. In response to our Reg 18 RFI DDC stated that the SA did not claim Elvington 'already have relatively good access to existing local rail and bus services'. However, this is a direct quote from the SA - 6.207. This claim is factually false but is a base assumption used to justify Aylesham and Elvington's compliance with SA 4: To reduce the need to travel and encourage sustainable and active alternatives to road vehicles.

23. MHCGL guidance on traffic evidence for LDP states 'Critical locations on the road network with poor accident records should be identified in order to determine if the proposed land allocations will exacerbate existing problems and whether highway mitigation works or traffic management measures will be required to alleviate such problems. The accident records should be compared with accident rates on similar local roads'. There have been 4 deaths on Holt / Easole Street within 1.5 miles of the Aylesham Road junction. How many deaths are required in order for Holt Street to qualify as having a poor accident record?

4.2 Base Data Availability

One problem we encountered is availability of the granular base data that forms the building blocks for the LDP traffic and commuting evidence. We can't find base data. For example

- The Dover Transport Model (DTM) Local Model Validation Report November 2016 is not available. So we have to rely on DDTM for the base modelling data for additional trips zonal distribution.

- In the SA LUC use ONS - Nomis data, labour market statistics and DataShine ESRC BODMAS (using 2011 ONS Census data) to establish commuter patterns. However, this data set is not available for review.

The SA conclusions suggest a data granularity (e.g. the availability of Aylesham to Deal commuting numbers), that is absent from the methodology employed in LUC's site-specific sustainability assessments. This would matter less were LUC's Reg 19 report not used inflated employment assumptions for Aylesham creating unsound sustainability conclusions.

4.3 Employment Evidence Driving Commuting

1. The Reg 19 SA 7.51 (Reg 19 Strategic employment allocation policies) and Table 7.6 include former Snowdown Colliery as a strategic site. This incorrect. Aylesham site employment has been reduced from 1,013 onsite jobs in Reg 18 to 267. The sustainability conclusions have not been reassessed. This clearly undermines the deliverability NPPF para 72 b.

	<p>2. DDC provided site employment estimates to both LUC and WSP for SA and Traffic modelling purposes. Aylesham's employment modelling conclusions in the 2022 SA are contradictory and misleading. They don't align with the WSP's modelling numbers, which reduced by 84% from 1,013 onsite jobs in Reg 18 to 267 on site jobs in Reg 19.</p> <p>3. In the Reg 19 SA main report (3: 4.75, SA 3 - 7.160 and table Table 7.6) still cite Aylesham as a 2nd largest employment hub with Land off Holt Street identified as ++ positive effect against. Also true for Reg 19 Appendix B growth and spatial options findings by SA objective, which offer conclusions based on inflated on site employment numbers numbers In Appendix F Snowdown employment drops to a 'Minor positive (+)'. This looks like a revised assessment that hasn't then been added into the main report.</p> <p>4. Trip generation for employment sites (approach agreed with NH and KCC) the potential jobs were calculated using the SQM area of the site and dependant on the land use type an employment number was provided have not been used in the SA. As onsite employment is a key indices of sustainability:</p> <p>a. Why is the discrepancy in Aylesham employment number in the SA?</p> <p>b. Has the South Aylesham site's sustainability been reassessed by LUC to reflect the reduction in onsite employment?</p> <p>c. Why is WSP using a different employment assumption to LUC?</p> <p>5. Has the council assessed the financial viability of the development proposal for Snowdown Colliery? The land owner informs us their existing tenant has a substantial remediation liability and is unaware of any ongoing discussions about reassigning this not have they aware of any detailed financial backing that would fund the redevelopment of this site. Obviously a site needs to be deliverable. Has it passed deliverability benchmarking test to justify the site's continued inclusion in the LDP?</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Use robust evidence that is reliable, objectively collected recent data based on an understanding of the data collected and the characteristics of the plan area without relying on unjustified assumptions or unsupported assertions. This should include an assessment and evaluation of projected 2014 outcomes based on the sustainability transport assumptions and on site employment assumptions.</p> <p>Engage with the significant body of evidence that clearly shows that an LDP with 76% of all proposed housing is on Greenfield sites is inherently unsustainable. From the loss of irreplaceable agricultural land and habitat, to reinforcing the district's car dependency by creating greenfield sprawl that will significantly change the rural character of the north west of Dover District, DDC's Reg 19 LDP DDC's will deliver the wrong houses in the wrong locations. It won't improve the environment or mitigate climate change.</p> <p>If the purpose of the planning system is (as set out in the NPPF) to ensure that sustainable development is pursued in a positive way, we believe this plan cannot be considered to be justified and it will not enable the delivery of sustainable development.</p> <p>Initiate active ongoing constructive engagement with Canterbury City Council to maximise the effectiveness of local plan in the context of strategic cross boundary matters and generate a coherent evidence-based strategy that deliverable plan that is not predicated on nebulous or unsupported claims of sustainability enabled by a failure to engage with a robust, impartial and objective evidence base.</p> <p>Base the plan on a properly resourced and deliverable employment strategy that engages with local businesses to ensure that the plan can deliver the right employment, community facilities to make the Garden City label actually signify a sustainable community rather than just sustainability washing to gerrymander an environmentally harmful planning outcome that will lead to a loss of irreplaceable agricultural land and habitat, reinforce the district's car dependency by creating greenfield sprawl that will significantly change the rural character of the north west of Dover District, DDC's Reg 19 LDP DDC's and deliver the wrong houses in the wrong locations. It won't improve the environment or mitigate climate change. If the purpose of the planning system is (as set out in the NPPF) to ensure that sustainable development is pursued in a positive way, we believe this plan cannot be considered to be justified and it will not enable the delivery of sustainable development.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>This has been outlined in detail in other policy submissions.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Aylesham
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Education</p> <p>There are too few places in the primary schools we have already, Aylesham Primary school has already been enlarged to accommodate the original build at Dorman Avenue North. It cannot realistically be made larger. Another new primary school will be needed.</p> <p>There is no secondary school provision mentioned! Do they no longer need education after the age of 11?</p> <p>There is very little adult education, there seems to be very little recommendation, support or finance</p> <p>Green Infrastructure</p> <p>The provision of open space has been overlooked.</p> <p>There is a mention to the field at the side of St. Peter's Church, which is church land, not council or developer owned. This is already in regular use for various church clubs, activities including infant, youth and disabled programmes.</p> <p>Spinney lane is already an open space and as it is ancient woodland should not be altered in any way.</p> <p>Nonnignton areas that are mentioned will not benefit Aylesham residents.</p> <p>The plan is inaccurate as the crescent play area is in Snowdown and not Dorman Avenue as stated.</p> <p>The skate park is already in place. It is not in the right situation as it encourages anti social behavior. Children/youth should be included in the heart of society not tucked away in hopes they are not seen!</p> <p>Where is the consultation from the youth as to the facilities they would use rather than the ones the council/developers decide they will have? What is the point of building something they already have?</p>

	<p>There used to be a youth club that was funded by KCC Youth, but due to funding cuts was shut and subsequently burnt. As KCC are short of funds, how do they propose to fund a youth club and a youth worker. Even if DDC and the developers help for the short term, what long term plan is in place?</p> <p>The community need a large supermarket, not just another convenience shop as the plan suggests. The Co-Op and the three convenience stores that are already in situ are unable/incapable of meeting the demand of the growing community. This is supposed to be the 4th most deprived area in Kent, so why should the community have to be faced with the escalated costs these smaller shops charge?</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><u>Dover Local Plan – Section 19 Consultation</u> SAP 44</p> <p>SOUNDNESS</p> <p>The revised Local Plan is not sound for the following reasons:</p> <p>It has not been justified and is not effective. It has not been positively prepared to meet ‘objectively assessed’ needs and for this reason is not consistent with National Policy.</p> <p>Why have the reasonable, sustainable alternatives for additional housing previously suggested in larger development centres such as North Aylesham, Elvington and Ethorne and Farthingloe and included within the original plan have now been removed? At the same time the proposed allowance for housing has been increased in Capel-le-Ferne and will not be deliverable.</p> <p>The original draft Local Plan has been changed so that 900 fewer houses are proposed overall and yet the number of houses proposed in Capel-le-Ferne has increased to 95.</p> <p>This is on top of recent planning permission for 34 houses off Capel Street, 15 dwellings at Longships on Cauldham Lane and 40 new dwellings in a recently completed development at Grasslands.</p> <p>Why is Dover District Council spreading development across numerous small sites which is uneconomic and unsustainable rather than concentrating in larger developments where existing services, facilities and infrastructure are already available?</p> <p>Why Dover District Council persist with this policy in relation to Capel-le-Ferne when it clearly is not in keeping with the council's stated objectives?</p> <p>SP2 - Planning for Healthy and Inclusive Communities and SP3 – Housing growth</p> <p>SP2 - Planning for Healthy and Inclusive Communities and SP3 – Housing growth</p> <p>SP2 states that <i>‘The Council will support the creation of healthy, inclusive and safe communities in the District by ensuring that new development is well served by services and facilities (for example education, health care, community, cultural facilities, play, youth, recreation, sports, faith and emergency facilities) and that a mix of uses are provided in new development that support daily life.’</i></p> <p>SP3 states that what they are trying to achieve is <i>‘To focus new development at accessible and sustainable locations which can utilise existing infrastructure, facilities and services, and to ensure development contributes to the sustainability of local communities and services, supporting regeneration and wherever possible make the best use of brownfield land’.</i></p> <p>But the proposals for Capel-le-Ferne do not meet any of the objectives in the above Strategic Policies as follows:</p> <ol style="list-style-type: none"> 1 The location of the proposed development in SAP 44 will connect to existing overloaded roads using Capel Street as its primary access point. 2 The proposed development is on arable land, currently in use and not brownfield land. 3 The development of the village is clearly not sustainable – Capel-le-Ferne has little or no facilities and services – only one small shop, no post office, no health care facilities, no doctor, no dentist, no pubs within the village confines and only a primary school. Therefore, in order to access services, residents need to drive to either Folkestone or Dover which is clearly at odds with SP1 – Planning for Climate Change. 4 The addition of 40 dwellings recently completed at Grasslands has not led to any benefit to the community in terms of new services or facilities. 5 Trying to ‘grow the villages’ by increasing the number of houses, but not having any plans to help develop services and facilities is unsustainable, uneconomic and unethical. It will only lead to more unnecessary travel. 6 There is only a single bus service and no train service at all. 7 The strategic policy SP6 – Economic Growth identifies areas distant from Capel-le-Ferne for economic development. Capel-le-Ferne has little opportunity for employment generation so cannot be seen to contribute to SP6.

8 The agreed number of number of houses for the site was originally set at 100, then reduced to 50 to allow a single point of access to the site. It has now been increased to 70 and is deemed achievable. This is not realistic and undeliverable. It would appear that the increase in the number of houses is being driven by economic needs to cover developer contributions which are likely to be substantial rather than by any need by Dover District Council to provide more housing. The development at Longships under SAP45, which has been granted planning permission, exceeds the allocated housing number by 5 dwellings on the basis that sticking to the SAP45 allocation of 10 houses would be uneconomic. The development of SAP44 is likely to encounter similar cost problems and is unlikely to be achievable in the proposed timetable (2021-2026)

Consultation With Statutory Consultees (Reg 22)

Dover Council **has not fully consulted with statutory consultees** to ensure that the existing facilities where present are sufficient or that plans are in place for future development of infrastructure.

SP11 – Infrastructure and Developer Contributions states: *Supporting infrastructure should be provided in advance of, or alongside, the development, unless there is sufficient existing capacity. The appropriate phasing for the provision of infrastructure will be determined on a case-by-case basis with reference to the most up to date Infrastructure Delivery Plan (IDP) and the priority classification along with other relevant evidence, and in consultation with the relevant providers.*

It is noted that the site at Aylesham North (AYL004) has been removed for transport reasons – essentially Kent County Council objected on transport grounds. However, given 500 homes in a sustainable location (two rail stations, large settlement), that would seem to be the obvious logical focus for development and the Council has failed its Duty to Cooperate with Kent County Council by failing to ensure the relevant transport assessments are undertaken and potential mitigation identified and agreed; rather than simply removing the large site from the plan and increasing allocations on the edge of villages (such as Capel-le-Ferne) that they hope are small enough to slip under the radar at Examination. This is not ethical.

The existing infrastructure in Capel-Le-Ferne is already struggling to cope with the existing level of housing. Water supply is weak throughout the village, power outages are common, and drainage has insufficient capacity and frequently blocks.

The addition of 90 houses along with the 49 already given planning permission will make this worse. Access to the site is proposed via Capel Street, an already congested road (little off street parking, busy cut through, primary school).

Note also the checkered history of road traffic accidents and injuries caused at the congested at the junction of Capel Street/Cauldham Lane from New Dover Road.

Looking through the supporting Infrastructure Delivery Plan (IDP), no mention is made of any suggested improvements to facilities/services or for any proposed improvements to be carried out by Kent Highways, Southern Water (drainage) or Affinity Water (water supply) in Capel-le-Ferne.

Incremental development such as extensions to villages are more difficult to plan for with respect to infrastructure as they are too fragmented and should therefore be avoided.

Transport modelling has been carried out for developments in other areas, but nothing has been done for Capel-le-Ferne where there will be over 100 new houses accessing Capel Street, a narrow congested road. This was highlighted as a significant problem during the long drawn out process of granting planning permission for 34 dwellings off Capel Street. The revised Local Plan is proposing to add a further 70 houses along with 20 dwellings on Cauldham Lane. All the traffic from these developments will exit onto the New Dover Road at the junction of Capel Street/Cauldham Lane –a poorly designed junction which has been identified in numerous surveys as a real problem for development in the area. **The Local Plan does not include any transport modelling for this area.**

Kent County Council have reservations about access to the site SAP44 indicating that it is not ideal. Given the current frequent traffic congestion in the area, this is not surprising. Particular concern was raised regarding emergency vehicle access, hence the requirement for a secondary access to SAP44 and further consultation with the emergency services. However, it should be noted that this secondary access is via a single track lane. Clearly insufficient consultation has been carried out at this stage.

Although Dover District Council have consulted with Capel-le-Ferne Parish Council as required, they have not engaged fully with the parish council as the objections raised by the council to overdevelopment of the village have been ignored both in this local plan and in planning permissions granted in the past. If the purpose of consultation is to incorporate the views of the local population, Dover District Council have clearly failed in this regard.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Changes I would make:</p> <p>Take SAP 44 out of the plan completely as it is not following the policies that the council say they are trying to Achieve and not following their own policies.</p> <p>Choose one of the alternative sites for additional housing in larger development centres such as North Aylesham, Elvington and Ethorne and Farthingloe and included within the original plan. In particular, Aylesham North (AYL004) is far more appropriate, given 500 homes in a sustainable location (two rail stations, large settlement), that would seem to be the obvious logical focus for development</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I would like to participate as I represented the Village Council in recent Planning Committee meetings.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I have tried to use the website and failed. I am a resident of Womenswold and the expansion of Aylesham will affect the area greatly. I would like to raise the following objections. 1. Aylesham has struggled to absorb the latest development into its community and a further development of this size would destroy the character of a village and the community. 2 There are no references to infrastructure in the plan i) there are very few shops at the moment, the co-op which we use is very busy and would not cope with the extra custom. There is only a mention of a small general shop in the plans ii) There is only one doctors, this is very efficient but could not cope with the extra patients as it is difficult to get appointments at the moment. iii) There is no plan to expand the B2046. This is a narrow road which is very busy with traffic at the moment, It is incredibly difficult to get out at the beacon junction with the Snowdown road at present and people become frustrated causing accidents and near misses. There is only a 60 mile restriction on that road. iv) There are no plans for extra schools and there is no secondary school at present. v) There is a very limited bus service and the trains are only once an hour. 3 The area for development is adjacent to Kent Downs AONB. There is ancient woodland and agricultural land that provides a wonderful habitat for wildlife. 4 The Government are planning that we should be self sufficient in food which will be difficult to achieve if we build over prime agricultural land
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Representation has been split across relevant areas of the Local Plan. Full attachment can be found below.)</i></p> <p>1 INTRODUCTION 1.1 Context 1.1.1 Dean Lewis Estates (from hereon referred to as DLE) is a professional strategic land promotion company specialising in the delivery of sustainable development. 1.1.2 This submission provides DLE's response to and representations in respect of the emerging Dover District Local Plan, Regulation 19 Submission version consultation document. This submission focuses on the strategic policies in relation to housing growth and also site allocations with respect of Aylesham. 1.1.3 This representation includes a site submission for land north of Aylesham and is supported by a vision document for the site included as Append 1. and a Highways and Sustainable Travel report included as Appendix 2. DLE are keen to work with the landowners and the Council to bring forward a high-quality residential development in this sustainable location.</p> <p>CONCLUSIONS 6.1.1 DLE has considered the Regulation 19 version of the Local Plan and welcome the opportunity to provide comments on this. DLE hope that the comments provided within this submission are helpful and look forward to getting involved at later stages of the plan preparation. 6.1.2 DLE has land interests at Aylesham, and through this submission have provided details regarding the potential for this site to deliver housing through an allocation in the emerging Local Plan. DLE are keen to work with the landowners and the Council to bring forward high-quality residential developments in this sustainable location.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	(DDC Note - Text Extracted from Document sent from Nicole Burnett on Behalf of Dean Lewis Estates. Representation has been split across relevant areas of the Local Plan. Full attachment can be found under reference SDLP1254.) Aylesham 4.1.1 As outlined above, the proposed allocation for 500 dwellings to the north of Aylesham that was identified in the Regulation 18 consultation document has been removed from the Regulation 19 version of the Local Plan. 4.1.2 The indicative number of dwellings which the Local Plan identifies to be delivered in Aylesham is 649 dwellings (as set out in table 3.3). DLE note that the delivery of these dwellings is expected though the delivery of SAP24, land to the south of Aylesham. 4.1.3 As the Council are aware, DLE are promoting land to the north of Aylesham for a mixed-use scheme which could deliver in the region of 500 dwellings. Further site specific details are provided in section 5 of this submission. 4.1.4 Whilst DLE do not dispute the inclusion of Aylesham south within the Local Plan, it is questioned why the Council have selected this site over the site to the north of Aylesham. When reviewing the HELAA commentary for the two sites this raises a number of queries regarding the Council's justification.

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

4.1.5 DLE note that within the 2020 version of the HELAA, both AYL003 (south of Aylesham) and AYL004 (north of Aylesham) are considered part potentially suitable / part unsuitable. The commentary regarding the two sites at this stage was very similar with both including the same commentary regarding Aylesham as a growth location, risk of surface water flooding and KCC Highways concerns.

4.1.6 The site to the south is considered to have High landscape sensitivity, whereas the site to the north is identified as Medium-High.

4.1.7 The 2020 HELAA with regards to anticipated delivery identified the site to the north (AYL004) as short term and the site to the south (AYL003) as medium term.

4.1.8 DLE note that with regards to the assessment of these two sites, the conclusions of the 2022 version of the HELAA differs from the earlier iteration. With respect to both sites the wider highways implications are identical but there is no proper justification to demonstrate that the northern site is any less capable of satisfactorily mitigating the highways issues that are identified as being equally applicable to both sites. Therefore, the evidence before the council does not justify the deletion of this allocation on this basis.

4.1.9 DLE do not believe, in this respect, that the Council have followed the evidence and that the right site has been selected for inclusion in the Regulation 19 version of the plan. In fact, it seems somewhat illogical to favour the site to the south of Aylesham over the land to the north, where the Highways issues stated are the same, and would need addressing for both sites, however the landscape sensitivity is identified as greater for the site to the south and it also faces added complexities of being a cross boundary site, with part of the site falling in Canterbury District. Whilst DLE note that the HELAA outlines that the housing development is only proposed on land in Dover District, DLE believe that the cross-boundary nature of the site may result in some added complexities which could impact on the timescale of delivery.

4.1.10 Given the points raised above, and the fact that the land to the north of Aylesham was considered suitable for inclusion within the Regulation 18 version of the Plan, DLE are unclear of any justified and logical reason for its exclusion at this stage of the plan. Whilst it is noted that the overall scale of housing delivery has reduced through this iteration of the plan, retaining the site to the north of Aylesham would only help ensure delivery of the necessary scale of housing within the plan period and provide flexibility for any delivery issues with other allocations. As such DLE make the recommendation that the site to the north of Aylesham be reinstated as an allocation in the emerging plan.

SITE SUBMISSION – LAND AT ADISHAM ROAD, AYLESHAM

5.1 The Settlement and Site Location

5.1.1 Figure 2 below shows the site, land at Adisham Road, Aylesham. DLE are promoting this site for residential development on behalf of the landowners. A vision document for the site is included as Appendix 1 to this submission.

DDC Note - Image not included, see attachment.

site lies on the northern edge of Aylesham, with access to be taken off Adisham Road. To the south of the site lies Aylesham Garden Village. It is intended to continue to use Garden City principles at the Adisham Road site, which will encourage wide tree lined streets, with good walking, cycling and sustainable links, and useable green space and community facilities at the heart of the scheme.

5.1.3 The site comprises approximately 36 hectares of land, which is currently in agricultural use. Approximately 20 ha of the site is developable for residential use and the residual will be used for green and blue infrastructure and supporting community uses.

5.1.4 The site does not lie within the Conservation Area, is not susceptible to flood risk and is in a sustainable location with access to a range of local amenities and services. The site provides the opportunity to deliver a logical extension to the north of the village. The scale of the site also means that significant community benefits could be included within a scheme following consultation with the local community.

Services and Facilities

5.2.1 Aylesham is identified as one of two Rural Service Centres in the Local Plan, and whilst the majority of new housing is to be directed to Dover Town and at Whitfield Urban Expansion, policy SP3 of the emerging plan outlines that following this development will be focussed in the District Centre of Deal and the Rural Service Centres of Sandwich and Aylesham. In particular paragraph 3.71 of the Local Plan notes how Aylesham has been identified as a Rural Service Centre for over 30 years and continues to play an important role.

5.2.2 DLE consider Aylesham to offer a highly sustainable location, offering a wide range of facilities and services including a train station, primary school, health centre, industrial estate and range of additional shops and services.

5.2.3 Given the scale of services and facilities in Aylesham, it offers a logical location to provide additional housing land. DLE believe that as per the previous iteration of the plan, an allocation to the north of Aylesham is appropriate and would assist in delivering the overall scale of housing across the district within the plan period.

Highways Constraints

5.3.1 DLE note the Highways issues raised by Kent County Council (KCC) in relation to this site, in particular the capacity constraints at Wingham Junction and the strategic capacity issues on the A2.

5.3.2 Earlier this year DLE commissioned Prime Transport Planning to prepare a Highways and Sustainable Transport representation in relation to this site. The full report has been included as Appendix 2 to this submission.

5.3.3 This Highways representation notes that access to the site from Adisham Road is largely unconstrained due to the circa 1km frontage within the public highway. Primary access can be provided from Adisham Road and there is the potential opportunity to provide connection, if required, to Ratling Road be it full vehicular or restricted emergency vehicles or buses. Pedestrian and cycle connection can be provided to Drift Road and/or Blue Flame Road via the existing PRoW. The access strategy will provide safe and convenient access for pedestrians, cyclists and public transport users.

5.3.4 The highways representation acknowledges concerns regarding traffic impact. A detailed junction capacity assessment of recent changes to the A2/A260 junction will be undertaken and mitigation considered if necessary.

5.3.5 The constraints at the B2046 High Street/A257 Canterbury Road junction in Wingham are recognised. Whilst opportunities to change the form of the junction appear limited, the existing highway and public realm materials are of poor aesthetic value and there is certainly scope to design and construct a high quality public realm scheme using a more modern palette of materials which will enhance the setting, encourage slower traffic speeds through the junction and create a more pleasance and safer environment for pedestrians and cyclists. Any such scheme will involve consultation with DDC, KCC and Historic England.

5.3.6 DLE and its consultant team will be happy to work with the developers behind the other emerging allocations as well as statutory authorities to design and deliver any mitigation schemes to ensure that they can accommodate planned levels of growth and do not restrict further development.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Hume Planning. Full Representation attached to SDLP1522. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1522.)</p> <p>Dover Local Plan Regulation 19 Consultation: Land at Ratling Road, Aylesham We write to you on behalf of our client, Kavanagh Motor Services Ltd in relation to the Dover District Council Regulation 19 consultation on its Local Plan Our client owns land off Ratling Road, Aylesham, which is currently in employment use. The extent of the site is shown on the enclosed plan. This site is not included as an allocation within the Pre-Submission version of the Local Plan. We are writing to object to its omission. For the reasons set out below we consider it is a suitable and available site to help deliver housing to Aylesham, one of two rural service centres in the district.</p> <p>Site Description The broadly rectangular site is bound by Ratling Road to the east, the railway line to the west and the Yodel distribution centre to the south. The site is a brownfield site that adjoins the existing Aylesham settlement confines. Aylesham railway station is located in close proximity, c. 200 metres by foot. The site is currently in use for employment uses; it is therefore a previously developed brownfield site. The site is not located within an area at risk of flooding.</p>

Suitability of the Site

The site is a sustainable, brownfield, site. It is located in close proximity to the settlement confines of Aylesham, which is a third-tier settlement in the district providing a large range of facilities and services commensurate with its role. It is also located within easy walking distance to the railway station and is therefore a sustainable site.

There is an existing access from Ratling Road.

There are limited environmental or historical constraints which would prevent this site from being redeveloped. It is located within flood zone 1 which is sequentially preferable for development.

The site is assessed as part of the Council's HEELA (Site TC4S114). It was dismissed on the basis that the site is suitable for employment and there is a need for employment land in the borough. However, there is significant employment land allocated in Aylesham to meet the need over the plan period including land within the South of Aylesham allocation for 640 units (SAP 25) and at the former Snowdon Colliery (SAP26). There are positive place shaping, and transport arguments, to locate the employment floorspace in certain locations and this relatively small employment site could be relocated.

It is also noted that through the HEELA the site is dismissed on the grounds that it is an isolated site in the countryside. With its proximity to Aylesham railway station and the built-up area we would dispute this assessment particularly given the site is previously developed land. It will positively enhance the landscape and provide a strong, permanent edge to settlement plus. Further, it would have positive highway implications on the settlement by removing heavier vehicle movements across the two constrained /narrow railway bridges.

Availability of the Site

We confirm on behalf of our client, Kavanagh Motor Services Ltd that the site is available and can be brought forward for residential development over the plan period.

SP3: Housing Growth

(DDC Note - Section DUPLICATED against SP3)

Whilst we welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period, it is considered additional sites if suitable and available should be included within the Plan. A large proportion of growth is being directed towards the expansion of Dover/Whitfield (over 2,000), and a large proportion to land to the south of Aylesham (640). Large strategic sites delivery rates can easily slow down during the plan period and under-deliver. Whilst there is a buffer within the Plan, it is considered appropriate not use this as a limit and allocate other suitable sites in sustainable locations where available.

As detailed above, the employment site at Ratling Road, is considered suitable for residential development. It is also available and can be delivered within the short to medium term, and in our view this site should be allocated within the Plan.

Concluding Remarks

Hume Planning Consultancy welcomes the opportunity to comment on this stage of the Council's Pre-Submission Local Plan and would like to reserve the right to attend the Examination in Public in due course to discuss potential development sites in Aylesham.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	AYL002
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	As Aylesham has already had hundreds of houses built since 2016 in our village, it no longer has the village 'feel', surrounded by houses on all sides. AYL002 is the last remaining green area within the village where children run and play, and walkers / dog walkers can enjoy a safe walk, where they can be seen, so will not be attacked or accosted. I don't think it is too much to ask to leave this space, we as an area have, and are having so many houses built, it is changing the ethos, with no infrastructure being put in the builders plans - yes, done? No!! where AYL004 has 500 homes removed, thank you, but we desperately need a secondary school, a proper supermarket, and another doctors surgery. Persimmons and Barratts should be putting a proper sum in to accomplish this, that 500 homes space could be used for this with their financial help.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I don't think it is sound planning or justified to take the last green space away from the village. It is not effective for mental health, exercise space for children to run or play or adults to walk. Your local plan does not even state how many houses, so I cant state what modification is needed, none is the preferred amount.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	For over 30 years, Aylesham has had permission to greatly expand their boundaries. They have built some new homes that seem to enhance their village and give the new and old dwellers good access to the A2 and a very large village green with excellent shops and space for many more. The roads within the village are wide and spacious,

Full Representation attached to SDLP1565. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1565.)</p> <p>Dover Local Plan Regulation 19 Consultation: Former Youth Centre, Aylesham We write to you on behalf of our client, Kent County Council in relation to the Dover District Council Regulation 19 consultation on its Local Plan Our client owns the former Youth Centre site on Ackholt Road, Aylesham. The extent of the site is shown on the plan below:</p>

This site was not included within the Call for Sites. Accordingly, it hasn't been included as an allocation within the Pre-Submission version of the Local Plan. However, this site is available, and for the reasons set out below we consider it is a suitable and available site to help deliver housing to Aylesham and should be included as an allocation for development.

Aylesham is one of the largest settlements in the district, sitting alongside Sandwich as a Rural Service Centre, only below Dover, Whitfield and Deal in the settlement hierarchy.

Site Description

The site is bound by Ackholt Road to the north, the railway line to the east and existing employment and commercial units to the south. Land to the south is located for employment purposes (SAP 25 'Aylesham Development Area'). Beyond that is a significant new housing allocation for around 640 new homes at land to the south of Aylesham (SAP 24).

The site is a long-standing vacant, brownfield site. The Aylesham Youth Centre formally occupied the building on the site, but this has been vacant for over ten years following fire damage and later demolition. The site over recent years has been the subject of vandalism and anti-social behaviour. There are large amounts of hardstanding on the site beyond these areas the site is untidy and overgrown. There are TPO trees on the site but these lie to the perimeter and would not constrain development.

The site is located within the settlement confines of Aylesham and is located opposite the railway station. It is therefore a highly sustainable site.

The site is not located within an area at risk of flooding.

Suitability of the Site

The site is a sustainable, brownfield, site. It is located within the settlement confines in the Pre-Submission Local Plan of Aylesham, which is a third-tier settlement in the district providing a large range of facilities and services commensurate with its role. It is also located directly opposite the railway station and is therefore a highly sustainable site.

Access can be provided from Ackholt Road. The redevelopment of this site would facilitate the provision of pedestrian and cycle links from the railway station through to the employment allocation (SAP 25) and the significant residential allocation and should form an important linking component of the wider strategic allocations that are already supported in the emerging local plan.

There are limited environmental or historical constraints which would prevent this site from being redeveloped. It is located within flood zone 1 which is sequentially preferable for development. The Policies Map identified trees covered by a TPO which will need to be considered as part of any scheme, but given the site includes an existing building and hardstanding this will not prohibit redevelopment.

Availability of the Site

We confirm on behalf of our client, Kent County Council, that the site is available and can be brought forward for residential development over the plan period.

SP3: Housing Growth

Whilst we welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period, it is considered additional sites if suitable and available should be included within the Plan especially brownfield opportunities in central locations that are so close to the rail station. A large proportion of growth is being directed towards the further expansion of Whitfield (over 2,000), and a large proportion to land to the south of Aylesham (640). Large strategic sites delivery rates can easily slow down during the plan period and under-deliver. Whilst there is a buffer within the Plan, it is considered appropriate not to use this as a limit, and allocate other suitable sites in sustainable locations where available.

As detailed above, the former Youth Centre in Aylesham, as a brownfield site is considered suitable for residential development. It is also available and can be delivered within the short to medium term, and in our view this site should be allocated within the Plan.

Concluding Remarks

Hume Planning Consultancy welcomes the opportunity to comment on this stage of the Council's Pre-Submission Local Plan and would like to reserve the right to attend the Examination in Public in due course to discuss potential development sites in Aylesham.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP24
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The indicative masterplan is flawed regarding the expectations for landscaping. The south east edge is already heavily wooded and the nearest building that might receive any benefit is a water works. The eastern end of Ackholt Wood and the western corner of Snowdown recreation ground provide a natural point beyond which taking land out of productive agricultural use to provide landscape mitigation for views which are of trees is entirely inappropriate. Ackholt wood as a whole might be ancient but the trees of which it is comprised are not particularly old. Providing a landscape buffer around its north eastern edge raises questions of the nature of the buffer, its management, amenity value and access. If its purpose is to protect the wood then it would be better designated as garden land to avoid encroachment by playing children and dog walkers. Following publication of Canterbury's Local Plan consultation, any landscaping along the district boundary is likely to be superfluous in mitigating views from the AONB as the other side will become a development site.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The extent of SAP24 needs to be redrawn to not extend beyond a line between the eastern end of Ackholt Wood and the western corner of Snowdown recreation ground. Landscaping buffers should be removed from the indicative plan other than along the aforementioned line. The policy wording should explicitly reference joint working with Canterbury City Council regarding the masterplan.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To answer any questions not anticipated by the written response.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP24
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan fails to see the loss of acres of beautiful countryside and local awareness of the wishes of the community who use this land visually and recreation.</p> <p>The plan indicates a line through Ackholt Wood. This cannot be so, it is sacrilege to carve up this ancient woodland. Red kites live in this wood as well as many other species. If housing is deemed to be absolutely necessary, which I believe is not, then more than 15 metres should be between this wood and any housing development.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The land between the railway line and Aylesham Road could be used for housing purposes as it is not visually attractive and it is between the existing business park and the Gipsy site. This will not have as such a dramatic and damaged effect on the countryside which locals value .

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Sap24
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The facilities and amenities being offered are insufficient for the scale of development and there is insufficient upgrades to infrastructure to make this deliverable.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	Open space provision must be provided in a timely fashion as this has not happened in the current development. Many residents have lived in new homes for 6 or 7 years and now moved on without seeing new parks, allotments, new sports hall or new bus service. Allotments should be provided on-site and not added to the on going site on Ratling Road as that location is inappropriate. Aylesham and Snowdown train stations are not accessible and so do not meet the needs of current residents, let alone any new users and so there should be provisions to improve these stations.

<p>if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Bus services are still substandard, with DDC only recently recognising that there is no regular service to Dover. This makes life difficult for anyone without a car and makes it difficult to meet sustainable travel targets.</p> <p>Spinney Lane needs significant upgrades to cope with the volumes of traffic that will inevitably come from additional development.</p> <p>Whilst there is mention of contributions to off-site pre-school, there is already a deficit of nursery places in Aylesham and so a firmer commitment to improve provisions should be included to mitigate the impact of this development.</p> <p>Even after repeated calls, there are no plans for a pub-restaurant or improvements to medical facilities (although CCC have mentioned this in their local plan). Facilities are currently stretched and any further development will stretch them further make life worse for current residents.</p> <p>There must be suitable SUDs designed into this development. The current development in Aylesham has led to increased surface flooding of roads due to inadequate design which cannot continue to happen.</p> <p>Tree planting is welcomed, but this must come with a medium to long term plan to inspect and maintain these trees to ensure that they survive to a point when they start to sequester carbon.</p> <p>The IDP suggests a community hall or similar but this is not in the local plan document. It would be good to see this as a more certain commitment so this definitely happens, with land put aside within the SAP24 area.</p> <p>It would be welcomed for traffic assessments to be completed before these sites are given the green light to fully assess the impact on the B2046 as mentioned, rather than doing this after the sites have been approved.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Insufficient infrastructure at present to accommodate additional homes. Aylesham has undergone massive development in the last three years that I have noticed and even more prior to that. I believe it to have doubled in size without any increase in facilities. The development is on farmed land which King Charles 111 has said he is against this type of housing. Aylesham is recognised as a deprived area already without additional burden on its already stretched public services. The main access to the A2 is via the B2046. Dover council withdrew a development of 500 homes in North Aylesham as the B2046 was not able to support the additional traffic that would arise
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 24
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>There is very little evidence that Dover has cooperated with Canterbury. SAP 24 lies adjacent to R20 (420 (minimum) houses. This makes almost 1000 houses in a rural area.</p> <p>When I visited the exhibition at Aylesham. The view outside the window was very rural and attractive. The 2 plans are to submerge the area under housing</p> <p>I asked one of the officers why the Canterbury plan did not appear on the Dover plan. His reply was "We didn't know anything about it till it was published. Clearly no cooperation!!!</p> <p>Traffic in the area will be extremely difficult, especially with regard to Canterbury's R20 and R1. All of this would create almost 5000 houses with a narrow B road to cater for the traffic.</p> <p>Rural Area. This is fine agricultural land which is badly needed</p> <p>Water and waste. This area cannot cope with current levels (pumping sewage into the sea) never mind additional housing estates.</p> <p>Services. Shops dentists, doctors - all stretched at the moment with one small coop serving the area.</p> <p>Transport. Very little, people will be forced onto the roads (see above)</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP24 - Land to the south of Aylesham (AYL003)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>These representations are submitted on behalf of Axis Land Partnerships ('Axis') to the Regulation 19 Submission Local Plan ('the Draft Plan'). Since the Regulation 18 stage, Axis have been appointed by the landowners of the site to promote the site through the remaining stages of the Local Plan. As a land promotion and development company, Axis is experienced in delivering large strategic housing sites.</p> <p>We confirm that Axis considers the Draft Plan to be legally compliant. However, in order for draft policy reference SAP24 to be considered sound, Axis request that the following comments and/or amendments are taken into account.</p> <p>Figure 4.6 Land to the South of Aylesham- Indicative Development Strategy (Policy SAP24), Page 157: This figure illustrates the Land to the South of Aylesham strategic site allocation area. However, we note that there is an error as the site known as the 'Aylesham Development Area' which is allocated for employment use under draft Policy SAP25 has been included within this figure. As this site does not form part of draft Policy SAP24, in order for this policy to be considered sound, Axis request that the area shaded in purple labelled 'Employment Allocation' is removed from Figure 4.6 so that this accurately reflects the strategic site allocation policy area. Accordingly, it would not be effective to include this employment site within the SAP24 policy area as it would be undeliverable as part of this allocation.</p> <p>As part of the submitted Dover Local Plan Regulation 18 representations, we successfully demonstrated that the site is able to accommodate circa 640 new dwellings. We therefore support draft Policy SAP24's allocation to deliver an estimated 640 new homes over the Plan period to 2040. The Government's objective to significantly boost the supply of new homes is supported by the National Planning Policy Framework (NPPF). The NPPF notes that a sufficient amount and variety of land should come forward where it is needed and that this should be underpinned by the local housing need assessment. An allocation for 640 new homes on this site would significantly contribute to the District's need for 10,998 dwellings over the new Local Plan period to 2040. Axis's Masterplan for the site demonstrates that the 640 homes can be accommodated on the site and the Vision Document has been submitted in support of these representations.</p> <p>The provision of 10 permanent gypsy and traveller pitches on the land to the north of Snowdown Caravan Site has been removed from the Draft Plan. The landowners submitted Dover Local Plan Regulation 18 representations did not support this element of the proposed draft allocation due to the potential impacts on the amenity of the residents of the adjacent property and the Draft Plan supporting evidence base confirms that this site is in fact unsuitable to be taken forward to the next stage of assessment.</p>

In terms of the detailed requirements of draft Policy SAP24:

- a) The provision of a wide mix of housing on this site has been carried forward from the Dover Local Plan Regulation 18 document and this is supported.
- b) The NPPF supports the preparation of design codes by landowners and developers in support of a planning application for sites that they wish to develop and that states that these documents should be used to guide decisions on applications in the absence of locally produced design guides or design codes. We support the use of design codes to be developed as part of, or to supplement, the masterplan for the site.
- c) Part C refers to 'employment opportunities' to be provided as part of the strategic site allocation. In error, accompanying Figure 4.6 which shows the 'Land to South of Aylesham' area has been drawn to also include the site boundary for draft Policy SAP25 (Aylesham Development Area) which is allocated for employment uses. This should be removed from Figure 4.6 as this does not accurately represent the SAP24 site allocation area. Draft Policy SAP25 refers to the "potential for this site to come forward in conjunction with the additional homes planned to the south of Aylesham to create sustainable employment opportunities". Given this proposed employment site is situated directly to the northeast of the site, the indicative development area for SAP24 is not allocated for employment uses as shown within Figure 4.6 or Table 4.4, and the 39.94 ha former Snowdown Colliery site to the southwest of the site is allocated for employment and tourism uses under draft Policy SAP26, we request that reference to "employment opportunities" is removed.

As set out in the landowners submitted Dover Local Plan Regulation 18 representations, given its size, the parcel of land to the east of Aylesham Road which sits within the developable area for Policy SAP24 could accommodate a community facility and a small convenience food store. Therefore, there would be incidental employment opportunities created by the non-residential uses associated with the site, rather than a designated employment area providing direct employment opportunities. Accordingly, it would not be justified to allocate this site for specific employment opportunities which would impact upon the deliverability of the site, and rather incidental employment opportunities created by any non-residential uses only will be provided, and for that reason draft Policy SAP24, Part C is unsound.
- d) The provision of open and informal open spaces for leisure and recreation across the site is supported.
- e) The development of the site to be well related to the existing settlement of Aylesham and respect the residential amenity of adjoining properties is supported. The location of future development within the District boundary, to the north and east of Ackholt Wood, along the Aylesham Road towards Snowdown Village and on the parcel of land to the east of Aylesham Road is also supported. Plan Ref: Site Location Plan (001) has been submitted alongside these representations. This plan shows the accurate site boundary for Land to the South of Aylesham and shows the precise location of the District boundary which runs along the west of the site.
- f) We support the provision of suitable access arrangements from Spinney Lane and Aylesham Road.
- g) We support points i-iv in relation to the wider strategic and local highway mitigation measures to be informed by a Transport Assessment. In terms of point iv, an assessment of the impact of the scheme on the A2/B2046 has been completed and this identified that the impacts were not significant. However, National Highways, who have responsibility for the junction, have not yet been consulted but will be in due course.
- h) On and off-site sustainable transport measures including new and improved pedestrian links and cycle paths to connect the site with Snowdown Station and the services and facilities in Aylesham as well as public transport provision informed by a Travel Plan is supported.
- i) Improvements to the Public Right of Way network to increase connectivity in the area is supported.
- j) We support the protection and enhancement of heritage assets and their settings through appropriate mitigation measures and the submission of a Heritage Assessment and Archaeological Assessment.
- k) We support the protection and enhancement of the area of ancient woodland as well as the submission of a tree survey and ecological survey in advance of a planning application being submitted for the site.
- l) We support the use of a Landscape and Visual Impact Assessment to inform both the layout of the development and the detailed provision of the landscape buffer.
- m) A Preliminary Ecological Assessment has already been carried out on site and this will be used to inform any development proposals coming forward on the site. We therefore support the instruction of appropriate species and habitat surveys to be carried out prior to the determination of a planning application and to help inform the proposed layout and design of future proposals.
- n) We support the submission of a Flood Risk Assessment to inform the application of the sequential approach to the layout of the site.
- o) We support the carrying out of a wintering bird survey in advance of a planning application being submitted for the site.

	<p>p) We support the integration of communications infrastructure to facilitate home working, the phased occupation of the development to align with the delivery of sewage infrastructure and the planning of the site layout to ensure future access to existing water and wastewater infrastructure for maintenance and upsizing purposes.</p> <p>q) Part Q refers to financial contributions towards the required off-site infrastructure and provides a non-exhaustive list of potential contributions. The NPPF notes that planning obligations must only be sought where they meet all of the following three tests: a) necessary to make the development acceptable in planning terms; b) directly related to the development; and c) fairly and reasonable related in scale and kind to the development. We consider that any requested contributions need to be specific, relevant and appropriate to the proposed development therefore Part Q of Policy SAP24 is not justified and is considered to be unsound.</p> <p>We also note that Part Q refers to the delivery of required off-site infrastructure “in accordance with Strategic Policy 8”. However, this policy relates to ‘Dover Town Centre’ rather than infrastructure contributions. We consider than Strategic Policy 8 has been referred to in error, and the correct policy reference here is ‘Strategic Policy 11- Infrastructure and Developer Contributions’.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Figure 4.6 Land to the South of Aylesham- Indicative Development Strategy (Policy SAP24), Page 157: This figure illustrates the Land to the South of Aylesham strategic site allocation area. However, we note that there is an error as the site known as the ‘Aylesham Development Area’ which is allocated for employment use under draft Policy SAP25 has been included within this figure. As this site does not form part of draft Policy SAP24, in order for this policy to be considered sound, Axis request that the area shaded in purple labelled ‘Employment Allocation’ is removed from Figure 4.6 so that this accurately reflects the strategic site allocation policy area. Accordingly, it would not be effective to include this employment site within the SAP24 policy area as it would be undeliverable as part of this allocation.</p> <p>Part C of draft Policy SAP24 refers to ‘employment opportunities’ to be provided as part of the strategic site allocation. In error, accompanying Figure 4.6 which shows the ‘Land to South of Aylesham’ area has been drawn to also include the site boundary for draft Policy SAP25 (Aylesham Development Area) which is allocated for employment uses. This should be removed from Figure 4.6 as this does not accurately represent the SAP24 site allocation area. Draft Policy SAP25 refers to the “potential for this site to come forward in conjunction with the additional homes planned to the south of Aylesham to create sustainable employment opportunities”. Given this proposed employment site is situated directly to the to the northeast of the site, the indicative development area for SAP24 is not allocated for employment uses as shown within Figure 4.6 or Table 4.4, and the 39.94 ha former Snowdown Colliery site to the southwest of the site is allocated for employment and tourism uses under draft Policy SAP26, we request that reference to “employment opportunities” is removed.</p> <p>As set out in the landowners submitted Dover Local Plan Regulation 18 representations, given its size, the parcel of land to the east of Aylesham Road which sits within the developable area for Policy SAP24 could accommodate a community facility and a small convenience food store. Therefore, there would be incidental employment opportunities created by the non-residential uses associated with the site, rather than a designated employment area providing direct employment opportunities. Accordingly, it would not be justified to allocate this site for specific employment opportunities which would impact upon the deliverability of the site, and rather incidental employment opportunities created by any non-residential uses only will be provided, and for that reason draft Policy SAP24, Part C is unsound.</p> <p>Suggested wording: Removal of “<i>Employment opportunities</i>”</p> <p>Part Q refers to financial contributions towards the required off-site infrastructure and provides a non-exhaustive list of potential contributions. The NPPF notes that planning obligations must only be sought where they meet all of the following three tests: a) necessary to make the development acceptable in planning terms; b) directly related to the development; and c) fairly and reasonable related in scale and kind to the development. We consider that any requested contributions need to be specific, relevant and appropriate to the proposed development therefore Part Q of Policy SAP24 is not justified and is considered to be unsound.</p> <p>Suggested wording: The addition of the following sentence to the end of Part Q “<i>It is acknowledged that such contributions will not always be suitable and where this is demonstrated through the submission of viability evidence, the Council will consider flexibility to ensure the viability and deliverability of the site.</i>”</p> <p>We also note that Part Q refers to the delivery of required off-site infrastructure “in accordance with Strategic Policy 8”. However, this policy relates to ‘Dover Town Centre’ rather than infrastructure contributions. We consider than Strategic Policy 8 has been referred to in error, and the correct policy reference here is ‘Strategic Policy 11- Infrastructure and Developer Contributions’.</p> <p>Suggested wording: Replace “<i>Strategic Policy 8</i>” with “<i>Strategic Policy 11</i>”</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Policy SAP24 is one of the draft Plan's major strategic housing allocations, with up to 640 new homes to be delivered on this site. Given the importance of this allocation in contributing to the District meeting its need for 10,998 dwellings over the new Local Plan period we consider it necessary to participate in the oral part of the examination in order to present key evidence in support of this allocation.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP24- Land to the South of Aylesham (AYL003)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Aylesham North (500 homes) has now been removed from the Draft Local Plan. Aylesham Parish Council welcomes this decision.</p> <p>In the south, site AYL003 runs from Spinney Lane (with Aylesham Road to the East and Ackholt Wood to the West) all the way to housing in the village of Snowdown. This site has a proposed development of 640 homes. The site map has been amended (as per SA[1]) to properly reflect land ownership and remove a private property from the proposed area.</p> <p>This relates to SAP24 South Aylesham.</p> <p>In addition, there is 1 smaller site (AYL001 policy SAP27) located on land on Dorman Avenue North. Initially this land was due to be windfall housing but is now allocated for 9 houses.</p> <p>Aylesham Parish Council opposes the uses of AYL001 for the development of 9 houses as this would result in the loss of registered native woodland.</p> <p>Aylesham Parish Council believes this level of development is over-bearing on the village and risks altering the character of the community. This is far beyond the original master-plan.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<u>Comments on the Dover District Draft Local Plan from Womenswold Parish Council</u> Womenswold Parish Council is submitting comments based on discussion at the Parish Council meeting on 8th November 2022. The Council wishes to comment as follows on the proposed housing estate SAP 24 of 640 houses on land between Aylesham and Snowdown:-

Rural Nature

- The proposed site of the housing estate is on a greenfield site in a rural community. This proposal would severely impact on the rural nature of the area. In addition, valuable farm land will be lost to the production of food. This is clearly much needed in these difficult times

Water

- The area in question lies in a drought stricken part of the South East. This summer and most summers we have water shortages. This development can only exacerbate the problem. In addition, Canterbury City Council is planning a total of 3620 (minimum) houses in the adjacent area, adding to the burden of water shortage.

Sewage

- The whole of the South East suffers from extremely poor infrastructure for the disposal of raw sewage. There have been many recent instances whereby Water Companies have pumped raw sewage into the sea which has resulted in large fines. Clearly the addition of nearly 4000 home will only add to this problem.

Traffic

- The proposal, together with Canterbury City Council's proposal will increase the strain on the rural road infrastructure. In particular, the B2046 is already extremely busy. There have been many accidents at the junction to the entrance to Womenswold Parish. In addition the slip road on the A2 (London Bound) is far too short. The increase in traffic created by these developments will only make this worse.
- The roundabout on the A260 by the A2 was built to deal with the huge increase in traffic coming from Aylesham under the current Aylesham expansion. It does not take into account the further proposed increases.

Infrastructure

- Currently there is a major shortage of facilities which contribute to facilitate supporting the community:-
 - Doctor surgeries.
 -
 - There are no secondary schools in the area. The nearest schools are in Canterbury, Sandwich and Dover. This necessitates a bus ride on overcrowded and unreliable buses. This also contributes to increased Greenhouse gasses and increased traffic congestion. The addition of so many houses will seriously exacerbate the problem.
 - There is only one small Coop in Aylesham which hardly copes with current levels of business.

Public Transport

- Buses: The bus service is already poor with little sight of improvement
- Trains: There is a station at Snowdown but the service is slow, once an hour to London for a 2 hour journey. The stations at Snowdown and Aylesham also do not cope with current levels of use. Parking is an issue and walking is difficult along narrow country lanes with no footway.

Summation

Womenswold Parish Council objects to the proposed Housing Estate SAP 24.

It is too large, and when the adjacent Canterbury City Council plans (R20 and R1) are taken into account, it effectively creates an Aylesham/Womenswold Conurbation in a very rural area of Outstanding Natural Beauty.

There is currently little infrastructure to support existing communities. The proposal would seriously impact on this.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	There is very little evidence that Dover has cooperated with Canterbury. SAP 24 lies adjacent to R20 (420 (minimum) houses. This makes almost 1000 houses in a rural area. When I visited the exhibition at Aylesham. The view outside the window was very rural and attractive. The 2 plans are to submerge the are under housing I asked one of the officers why the Canterbury plan did not appear on the Dover plan. His reply was "We didnt know anything about it till it was published. Clearly no cooperation!!!
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)	Cooperate with Canterbury to at least reduce the housing levels

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Comments on the Regulation 19 Submission Local Plan</p> <p>A considered approach to the Natural environment has been adequately presented in DM Policy 39 but there is a lack of research and presentation of the current role of the farmland, looking at rural employment food production, and current carbon capture. Farmland forms the greater part of the district's green areas although a photo of arable fields is used to introduce the section there has been no analysis of the impact on the local farming industry if farmland is continued to be developed.</p>

	<p>Although the district has below-average rainfall and water resources the rainwater is badly managed around Aylesham.</p> <p>The B2046 is a dangerous road with a high number of accidents, Dover district has above-average accident rates. https://www.crashmap.co.uk/Search shows a high number of accidents on the B2046, particularly at the Spinney Lane junction with numerous fatalities and serious injuries recorded along the length of the road. The B2046 is in poor condition with vehicles frequently leaving the road and ending up in our hedgerows and fields. The road surface is folding into ruts increasing its camber to the Canterbury side under the current impact, particularly on the stretch between Aylesham and Adisham junctions.</p> <p>Dover district has below-average job opportunities, we have seen London boroughs buying up batches of the new builds in Aylesham. London currently has over 87,000 empty houses. There are shortages of appointments for doctors dentists, vets and secondary school places. There is a lack of adequate buses and the local shops run low on some food daily. In Aylesham to date, 785 units have been delivered with 575 remaining.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Show a convincing argument for housing needs and employment opportunities in the District , in-depth study of B2046 ,study of flood water from Aylesham Northside development onto road and farmland
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	As local farmers of the land opposite the current new development, we have an understanding of the impact of new developments and how they could be improved to have less of an impact on the rural environment.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP3 Housing growth
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Aylesham Parish Council agrees that there is a need to increase housing stock both nationally and within the Dover district.</p> <p>Over recent years, Aylesham has greatly assisted in helping to increase the numbers of homes within the local community (having delivered 917 homes so far with a further 443 to come). However, it is felt that any future development should be kept to a minimum.</p> <p>This relates to SP3 – Housing Growth.</p> <p>South Aylesham (SAP24) includes a large number of positives (such as inclusion of play parks, open spaces, cycle links and protecting and enhancing wildlife) but there is a lack of firm commitments to facilities. The development makes reference to “a new small convenience shop” which is wholly insufficient for the proposed number of new homes.</p> <p>Dover District Council is looking at updating its parking policy for future developments. Currently the Kent Design Guide and the Kent Design Guide Review: Interim Guidance Note 3 to apply planning constraints. It is welcome to see this referenced in the Draft Local Plan. It is important that future developments allow for independently accessible parking spaces (as opposed to tandem spaces) and that car ports or garages are not included as parking.</p> <p>This will greatly improve parking, especially in rural developments.</p> <p>More considerate parking will greatly improve access for pedestrians as well as safety for pedestrians and cyclists.</p> <p>Aylesham Parish Council believes that a new small convenience shop in any new development would be wholly insufficient. Dover District Council should also look to adopt more stringent parking policy reform.</p> <p>It has been noted on previous planning applications that the sewerage pipes in the village may be at their capacity, so any further developments could push them past their breaking point.</p> <p>This should be addressed before any further development can be considered.</p> <p>Current plans for housing development do not go far enough in providing homes that are suitable for disabled people or homes that can be easily adapted in the future to meet the needs of home owners. An increase in the number of dwellings built to an accessible standard would be welcomed</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>In October 2021, Aylesham Parish Council supported the Climate and Ecological Emergency (CEE) Bill which address the full extent of the climate and nature crisis in the UK. As a result, any local plan should use up-to-date science to make sound recommendations.</p> <p>As the district is extremely water scarce, all possible measures should be implemented to help mitigate water scarcity. The use of Sustainable Urban Drainage systems (SUDs) is required to be prominent in all future developments. This will help to deal with surface water flooding. We welcome the Draft Local Plan's hierarchy of methods of discharge, with the use of combined sewers coming last.</p> <p>This relates to CC6 of SP1 – Surface Water Management.</p> <p>There are a number of options to ensure new homes produce the least possible carbon emissions. Aylesham Parish Council would like to see Dover District Council require the full 2025 Future Homes Standard to be delivered now (this will reduce emissions by between 75-80% compared to current standards), not at some point during the Local Plan's lifetime.</p> <p>This relates to CC1 of SP1 – Reducing Carbon Emissions.</p>

We welcome the commitment to planting trees within new developments that are native to Kent. This will help to keep the rural feel of Aylesham alive. Currently we often see newly planted trees dying within the first few years of their lives. There must be a comprehensive plan to ensure that these trees reach maturity (part d) and how this will be enforced by the local authority.

This relates to CC8 of SP1 – Tree Planting and Protection.

Aylesham Parish Council welcomes the commitment to planting larger numbers of trees but feels this must come with a long-term solution to maintaining the trees. Dover District Council must also commit to the full 2025 future homes standard now.

Aylesham Parish Council welcomes the addition and enhancement of open spaces and play areas. However, there are two points to note in the IDP: why would S106 monies from Aylesham be spent upgrading play areas in Nonington?; and play areas and open spaces are last to be delivered in developments – this must not happen in the future.

Aylesham Parish Council is identified as “Delivery Partners” on a number of projects due to be delivered: we have not been consulted on this prior to the Regulation 19 document being released.

The HRA[1] suggests that AYL003 – Land South of Aylesham is “high” suitability for the European Golden Plover, and so all measures must be taken to ensure this SPA protected bird species is still able to migrate and flourish in the area. SAP 25 (mixed use employment) is considered “moderate”.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Land to the South of Aylesham - SAP 24 - 640 Houses
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I believe these plans are not compliant as there seems to be no agreement with the neighbouring Canterbury City Council who are also planning 420 houses on land adjoining the area where Dover District Council have planned their 640 houses ! This will be completely unsustainable.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I believe Dover DC needs to consider the sustainability of increasing the size of Aylesham further when the new development has already put a strain on existing public services, road infrastructure & our rural environment.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I believe that people who have lived in this area all of their lives & who's lives will be hugely effected by these developments have a right to have their voices heard.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	As recognised in the policy, the proximity of the site and scale of proposals means the allocation has the potential to impact on the setting of the Kent Downs AONB to the west, which, at its closest, would be approximately 500m from the AONB boundary. The inclusion of criterion (I) to manage impacts on the AONB is therefore supported.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Woodland Trust objects to ancient woodland areas being included in sites allocated as suitable for development. This site allocation includes Ackholt Wood ASNW (Grid reference: TR23725145),</p> <p>The National Planning Policy Framework (NPPF) (paragraph 180c) states: "When determining planning applications, local planning authorities should apply the following principles: c) development resulting in the loss or deterioration of irreplaceable habitats (such as ancient woodland and ancient or veteran trees) should be refused, unless there are wholly exceptional reasons and a suitable compensation strategy exists".</p> <p>We recognise the intense pressure to identify and bring forward new sites for housing and employment uses. This pressure makes it all the more important that vital protections for ancient woodland and veteran trees are upheld.</p> <p>Areas of natural woodland, in particular ancient woodland, are vulnerable to pollution, encroachment from development, and habitat fragmentation. It is important that any development is located and designed to avoid damaging ancient woodland, providing buffers for designated sites and protecting connectivity between wildlife habitats.</p> <p>Further information is available in the Trust's <i>Planners' Manual for ancient woodland</i> (2019).</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>We recommend removing this site allocation from the plan unless Ackholt Wood ASNW (Grid reference: TR23725145) can be excluded and/or a substantial buffer provided, in order to comply with the NPPF protection for ancient woodland.</p> <p>We note the proposal for a minimum 15m buffer in para k) but would ask for at least a 20m buffer.</p> <p>Where development sites are adjacent to ancient woodland, we recommend that as a precautionary principle, a minimum 50 metre buffer should be maintained between a development and the ancient woodland, including through the construction phase, unless the applicant can demonstrate very clearly how a smaller buffer would suffice. A larger buffer may be required for particularly significant engineering operations, or for after-uses that generate significant disturbance.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Monitoring & Review
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The plan was compliant until the day before the Regulation 19 consultation was authorised Canterbury City Council published their Regulation 18 consultation including significant development adjacent to the authority boundary at Aylesham.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	If this proceeds it makes some of the conditions proposed for SAP24 irrelevant and the reasons for not including proposed development north of Aylesham outdated. There needs to be significant consultation with Canterbury City Council on the future of Aylesham to ensure the provision of employment land, retail etc. in line with a masterplan that provides effective local planning.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	By the time Public Examination takes place, Canterbury's local plan will have progressed to the point that comments need to be updated/

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Comments</p> <p>I would like to object to the Dover District Council Local Plan SAP24 Aylesham on the basis that it is not "Sound".</p> <p>The Local Plan has made a considerable number of statements. SP3 Page 36 for instance regarding Aylesham states that <i>Developments will be at a more limited scale, compatible with the more limited job opportunities, shops and services. It goes on to say that - Development which results in disproportionate growth to any of the Districts settlements which cannot be supported by the necessary infrastructure and or services or which would result in a loss of services and facilities which are considered to be key to supporting local communities will be resisted.</i></p> <p>Yet looking at the Local Plan for the area where I live it is proposed to increase the size of the village of Aylesham with proposal to build a further 650 house in addition to the 1340 already approved. This is disproportionate growth for Aylesham and cannot be supported by the infrastructure yet Dover District Council is doing the opposite of resisting this development.</p>

Dover District Council states that it is the policy to provide sustainable employment in the area where people live in order to minimise travel. In the plans the area of Snowdown Colliery is given as a potential site for employment of up to 500 people. It is stated Dover District Council intend to “*Work with local partners to enable and explore all opportunities for the redevelopment of the vacant Snowdown Colliery site. Ideas include the potential delivery of Snowdown Park to create an environmentally-friendly hub for start-up businesses and artisan producers, as well as an international centre for research and development into the health and welfare of the honey bee*”.

In fact this site is private property in private ownership, whose owner who has only one tenant - the British Coal Board. It is not a “vacant site”. It is not owned by Dover District Council.

We have been informed there are no plans by the owner to change the tenant so there is no evidence that Dover District Council can claim this is a “vacant site”. There are no plans for any employment opportunities on this site, and no financial backing for development of employment.

The plans for an International centre for research into bee health seems to have been an aspiration rather than a commitment to a tangible reality. The current owner has no plans to change the tenant. If this situation were to change, and it is not expected to do so in the foreseeable future, there are also the potential downsides to developing a former coal mine which will present considerable challenges due to the continued presence of existing underground mine workings and Grade 2 listed buildings.

For any developer this will add considerably to the cost of any redevelopment. For any potential business owner, in addition to the higher cost of rental space as the developer seeks to maximise their profits, the cost of running a business in a rural location will be heavily impacted by transport costs which will add to the carbon footprint of the business.

Therefore the inclusion of Snowdown Colliery in the list of potential areas for employment is an attempt to conflate the number of employment opportunity sites and job numbers rather than a true picture of what is available or will be available in the future. It is not a true picture of employment opportunities available in the Aylesham area at present or in the future.

The consequences of the additional housing proposed at Aylesham will be the unofficial formation of a mini town at Aylesham village, without any consideration for increased infrastructure or facilities. The in progress and planned housing will potentially grow the population from 5,000 in 2018 to 25,000 by 2030. The current expanding population has already stretched the existing infrastructure beyond what can be sustained.

The current medical centre is already working at maximum capacity and yet there does not appear to be any provision to increase capacity for medical care.

There is a lack of provision of nursery places and amenities for young people. Cultural amenities are also lacking. Despite the large number of houses already built and sold by the developers, the people of Aylesham have not seen significant enhancement of the amenities, services, retail or entertainment opportunities.

There is no secondary school in Aylesham with the result that there will be increased traffic on roads to Canterbury, Sandwich, Ramsgate, Deal and Dover with children being taken to school by car. Kent County Council has already announced it is cutting funding for almost all of its bus services and this will impact public and school bus services. In consequence more journeys will be by car. Dover District Council's stated aim is to *build houses where the need for travel for employment and education are reduced*. The plan does not meet this stated aim.

The Garden Village design model includes the statement “*should be designed to provide affordable homes close to employment*”. The number of houses proposed vastly exceeds the realistic potential for increase in employment in Aylesham.

The NPPF SECTION 9 paragraph 106 states Planning policies should

a) support an appropriate mix of uses across an area, and within larger scale sites, to minimise the number and length of journeys needed for employment, shopping, leisure, education and other activities;

So how does Dover District Council show the proportionate evidence of where the extra 20,000 people in Aylesham will work and how they will travel to this work or where their children will be educated, where they will shop and where they will participate in leisure activities. No evidence has been produced on scenarios for potential travel routes and the numbers likely to be travelling by different modes and routes. We may speculate that some may choose to travel by train. It should be noted that there is only one accessible platform at Aylesham rail station. The platform for any return journeys from Canterbury or onward travel to Dover is inaccessible for anyone unable to climb the stairs. However the

vast majority will most probably choose to travel by car daily to and from Canterbury, Dover, Ramsgate, Deal or Sandwich with additional journeys to collect school children where the bus service does not exist or is not funded. The report by Sustrans on the cycling and walking opportunities for Aylesham, whilst welcomed, does not reflect the reality of most peoples daily lives, where the speed of travel to and from work, and the safety of their children's journey to and from school takes priority. On the small country roads in this area of Kent, cyclists contend with blind corners and speeding car motorists for most of their journeys, not to mention the small army of delivery drivers and tradesmens vans aiming to meet their latest deadline and of necessity travelling as fast as possible. How does this Local Plan meet the Dover District Council stated aim that *new developments should reduce the dominance of cars*? The answer is that it does not meet the aim.

In the plans we see no evidence that the Dover District Council has assessed the impact of the additional housing on our area with regard to the increase in traffic from Aylesham due to the lack of employment and secondary education in Aylesham. We see no evidence that there is any proposed increase in infrastructure and support services such as schools, hospitals and doctors surgeries to meet the requirements of an additional 20,000 people. We see no evidence that the Dover District Council Local Plan will address the lack of facilities, infrastructure and amenities in Aylesham for the current residents and the 20,000 new residents

In addition to the houses proposed at Aylesham there are also proposals by Canterbury City Council to allow the building of 420 houses on land near Womenswold, south of Aylesham. This development would adjoin the proposed extra 650 houses proposed by Dover District Council. The plan does not seem to meet the requirement for co-operation with other authorities if you consider the extent of the housing proposed by Canterbury City Council right up to their boundary with 3200 houses between Adisham and Aylesham. This is a total of 3620 houses proposed by Canterbury City Council almost adjacent to the Dover District Council's proposed and existing new developments for Aylesham. Where is the co-operation between these councils concerning the area on the boundary of Canterbury City Council and Dover District Council at Aylesham. There is no evidence in the local plan that Dover District Council has taken account of the impact of Canterbury City Council's Local plan, on the existing communities in this area. Their plans seem to overlap but the Local Plans do not include sufficient information on how they will work together effectively to mitigate the massive impact of the combined numbers of additional houses in such a rural area.

This is not a plan that will meet the requirements for sustainability and the social, economic and environmental costs of this unsustainable plan will fall predominantly on the residents of Aylesham and the surrounding villages.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	This land has had some work on pipes for the sewage system. It is not effective for the current number of houses as there is a regular sewage stench coming from the corner in your development plan for morehousing. There are no places for any children who would move in to this development locally in primary schools. There will be no transport by the time this is built for children to be able to go to secondary schools . None of this housing will be financially achievable by local people or their extended families. The prospective buyers for these homes can only be the cash rich or business purchasers who can avoid many taxes to create income from rents that are unaffordable to local people. There is no infrastructure proposed for this section of the New Dormitory Town encompassing and extending both Aylesham and Adisham. No supermarket, no youth centre, no police, no focal point where communities can meet. No accomodation whatsoever for safeguarding the community. The ability of the land to absorb heavy rainfall is compromised, the ability of the land to absorb CO2 emmissions is compromised, the ability of the land to grow food for our local people is removed entirely. We are in a cost of living and coming into an availability of purchasing food for our whole population crisis

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Build on brownfield sites. build to a good sustainable standard ie passive solar heating, heat pumps etc so that the tenants of the landlords the houses are sold to are warm without draughts and with a low carbon cost to heat. Properly update the water and sewage systems to cope with the massive extra load on systems that are failing with the current load. Put in protections so that our rivers and our seas are no longer discharging fecal matter into our local rivers and the channel where so many like to swim. build a school for our teenagers so poor families don't have to struggle to pay £450 for each child each year for the privilege of going to a secular state school, then being terrified that your children can't get transport to the school anyway. Your planning has a role in the educational and health comprehensive failure for SEND children and along with them secondary school children in your villages, but all this (8k in total) extra housing without any of the vital infrastructure, will make this place like a ghetto.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	This would make the consultation process more accessible as a reasonable adjustment.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Policy SAP24- Land to the South of Aylesham (AYL003)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	These representations are submitted on behalf of Axis Land Partnerships ('Axis') to the Regulation 19 Submission Local Plan ('the Draft Plan'). Since the Regulation 18 stage, Axis have been appointed by the landowners of the site to promote the site through the remaining stages of the Local Plan. As a land promotion and development company, Axis is experienced in delivering large strategic housing sites.

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

We confirm that Axis considers the Draft Plan to be legally compliant. However, in order for draft policy reference SAP24 to be considered sound, Axis request that the following comments and/or amendments are taken into account.

Figure 4.6 Land to the South of Aylesham- Indicative Development Strategy (Policy SAP24), Page 157: This figure illustrates the Land to the South of Aylesham strategic site allocation area. However, we note that there is an error as the site known as the 'Aylesham Development Area' which is allocated for employment use under draft Policy SAP25 has been included within this figure. As this site does not form part of draft Policy SAP24, in order for this policy to be considered sound, Axis request that the area shaded in purple labelled 'Employment Allocation' is removed from Figure 4.6 so that this accurately reflects the strategic site allocation policy area. Accordingly, it would not be effective to include this employment site within the SAP24 policy area as it would be undeliverable as part of this allocation.

As part of the submitted Dover Local Plan Regulation 18 representations, we successfully demonstrated that the site is able to accommodate circa 640 new dwellings. We therefore support draft Policy SAP24's allocation to deliver an estimated 640 new homes over the Plan period to 2040. The Government's objective to significantly boost the supply of new homes is supported by the National Planning Policy Framework (NPPF). The NPPF notes that a sufficient amount and variety of land should come forward where it is needed and that this should be underpinned by the local housing need assessment. An allocation for 640 new homes on this site would significantly contribute to the District's need for 10,998 dwellings over the new Local Plan period to 2040. Axis's Masterplan for the site demonstrates that the 640 homes can be accommodated on the site and the Vision Document has been submitted in support of these representations.

The provision of 10 permanent gypsy and traveller pitches on the land to the north of Snowdown Caravan Site has been removed from the Draft Plan. The landowners submitted Dover Local Plan Regulation 18 representations did not support this element of the proposed draft allocation due to the potential impacts on the amenity of the residents of the adjacent property and the Draft Plan supporting evidence base confirms that this site is in fact unsuitable to be taken forward to the next stage of assessment.

In terms of the detailed requirements of draft Policy SAP24:

- a) The provision of a wide mix of housing on this site has been carried forward from the Dover Local Plan Regulation 18 document and this is supported.
- b) The NPPF supports the preparation of design codes by landowners and developers in support of a planning application for sites that they wish to develop and that states that these documents should be used to guide decisions on applications in the absence of locally produced design guides or design codes. We support the use of design codes to be developed as part of, or to supplement, the masterplan for the site.
- c) Part C refers to 'employment opportunities' to be provided as part of the strategic site allocation. In error, accompanying Figure 4.6 which shows the 'Land to South of Aylesham' area has been drawn to also include the site boundary for draft Policy SAP25 (Aylesham Development Area) which is allocated for employment uses. This should be removed from Figure 4.6 as this does not accurately represent the SAP24 site allocation area. Draft Policy SAP25 refers to the "potential for this site to come forward in conjunction with the additional homes planned to the south of Aylesham to create sustainable employment opportunities". Given this proposed employment site is situated directly to the northeast of the site, the indicative development area for SAP24 is not allocated for employment uses as shown within Figure 4.6 or Table 4.4, and the 39.94 ha former Snowdown Colliery site to the southwest of the site is allocated for employment and tourism uses under draft Policy SAP26, we request that reference to "employment opportunities" is removed.

As set out in the landowners submitted Dover Local Plan Regulation 18 representations, given its size, the parcel of land to the east of Aylesham Road which sits within the developable area for Policy SAP24 could accommodate a community facility and a small convenience food store. Therefore, there would be incidental employment opportunities created by the non-residential uses associated with the site, rather than a designated employment area providing direct employment opportunities. Accordingly, it would not be justified to allocate this site for specific employment opportunities which would impact upon the deliverability of the site, and rather incidental employment opportunities created by any non-residential uses only will be provided, and for that reason draft Policy SAP24, Part C is unsound.

- d) The provision of open and informal open spaces for leisure and recreation across the site is supported.
- e) The development of the site to be well related to the existing settlement of Aylesham and respect the residential amenity of adjoining properties is supported. The location of future development within the District boundary, to the north and east of Ackholt Wood, along the Aylesham Road towards Snowdown Village and on the parcel of land to the east of Aylesham Road is also supported. Plan Ref: Site Location Plan (001) has been submitted alongside these representations. This plan shows the accurate site boundary for Land to the South of Aylesham and shows the precise location of the District boundary which runs along the west of the site.
- f) We support the provision of suitable access arrangements from Spinney Lane and Aylesham Road.

- g) We support points i-iv in relation to the wider strategic and local highway mitigation measures to be informed by a Transport Assessment. In terms of point iv, an assessment of the impact of the scheme on the A2/B2046 has been completed and this identified that the impacts were not significant. However, National Highways, who have responsibility for the junction, have not yet been consulted but will be in due course.
- h) On and off-site sustainable transport measures including new and improved pedestrian links and cycle paths to connect the site with Snowdown Station and the services and facilities in Aylesham as well as public transport provision informed by a Travel Plan is supported.
- i) Improvements to the Public Right of Way network to increase connectivity in the area is supported.
- j) We support the protection and enhancement of heritage assets and their settings through appropriate mitigation measures and the submission of a Heritage Assessment and Archaeological Assessment.
- k) We support the protection and enhancement of the area of ancient woodland as well as the submission of a tree survey and ecological survey in advance of a planning application being submitted for the site.
- l) We support the use of a Landscape and Visual Impact Assessment to inform both the layout of the development and the detailed provision of the landscape buffer.
- m) A Preliminary Ecological Assessment has already been carried out on site and this will be used to inform any development proposals coming forward on the site. We therefore support the instruction of appropriate species and habitat surveys to be carried out prior to the determination of a planning application and to help inform the proposed layout and design of future proposals.
- n) We support the submission of a Flood Risk Assessment to inform the application of the sequential approach to the layout of the site.
- o) We support the carrying out of a wintering bird survey in advance of a planning application being submitted for the site.
- p) We support the integration of communications infrastructure to facilitate home working, the phased occupation of the development to align with the delivery of sewage infrastructure and the planning of the site layout to ensure future access to existing water and wastewater infrastructure for maintenance and upsizing purposes.
- q) Part Q refers to financial contributions towards the required off-site infrastructure and provides a non-exhaustive list of potential contributions. The NPPF notes that planning obligations must only be sought where they meet all of the following three tests: a) necessary to make the development acceptable in planning terms; b) directly related to the development; and c) fairly and reasonable related in scale and kind to the development. We consider that any requested contributions need to be specific, relevant and appropriate to the proposed development therefore Part Q of Policy SAP24 is not justified and is considered to be unsound.

We also note that Part Q refers to the delivery of required off-site infrastructure "in accordance with Strategic Policy 8". However, this policy relates to 'Dover Town Centre' rather than infrastructure contributions. We consider that Strategic Policy 8 has been referred to in error, and the correct policy reference here is 'Strategic Policy 11- Infrastructure and Developer Contributions'.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Figure 4.6 Land to the South of Aylesham- Indicative Development Strategy (Policy SAP24), Page 157: This figure illustrates the Land to the South of Aylesham strategic site allocation area. However, we note that there is an error as the site known as the 'Aylesham Development Area' which is allocated for employment use under draft Policy SAP25 has been included within this figure. As this site does not form part of draft Policy SAP24, in order for this policy to be considered sound, Axis request that the area shaded in purple labelled 'Employment Allocation' is removed from Figure 4.6 so that this accurately reflects the strategic site allocation policy area. Accordingly, it would not be effective to include this employment site within the SAP24 policy area as it would be undeliverable as part of this allocation.

Part C of draft Policy SAP24 refers to 'employment opportunities' to be provided as part of the strategic site allocation. In error, accompanying Figure 4.6 which shows the 'Land to South of Aylesham' area has been drawn to also include the site boundary for draft Policy SAP25 (Aylesham Development Area) which is allocated for employment uses. This should be removed from Figure 4.6 as this does not accurately represent the SAP24 site allocation area. Draft Policy SAP25 refers to the "potential for this site to come forward in conjunction with the additional homes planned to the south of Aylesham to create sustainable employment opportunities". Given this proposed employment site is situated directly to the northeast of the site, the indicative development area for SAP24 is not allocated for employment uses as shown within Figure 4.6 or Table 4.4, and the 39.94 ha former Snowdown Colliery site to the southwest of the site is allocated for employment and tourism uses under draft Policy SAP26, we request that reference to "employment opportunities" is removed.

As set out in the landowners submitted Dover Local Plan Regulation 18 representations, given its size, the parcel of land to the east of Aylesham Road which sits within the developable area for Policy SAP24 could accommodate a community facility and a small convenience food store. Therefore, there would be incidental employment opportunities created by the non-residential uses associated with the site, rather than a designated employment area providing direct employment opportunities. Accordingly, it would not be justified to allocate this site for specific

	<p>employment opportunities which would impact upon the deliverability of the site, and rather incidental employment opportunities created by any non-residential uses only will be provided, and for that reason draft Policy SAP24, Part C is unsound.</p> <p>Suggested wording: Removal of “<i>Employment opportunities</i>”</p> <p>Part Q refers to financial contributions towards the required off-site infrastructure and provides a non-exhaustive list of potential contributions. The NPPF notes that planning obligations must only be sought where they meet all of the following three tests: a) necessary to make the development acceptable in planning terms; b) directly related to the development; and c) fairly and reasonable related in scale and kind to the development. We consider that any requested contributions need to be specific, relevant and appropriate to the proposed development therefore Part Q of Policy SAP24 is not justified and is considered to be unsound.</p> <p>Suggested wording: The addition of the following sentence to the end of Part Q “<i>It is acknowledged that such contributions will not always be suitable and where this is demonstrated through the submission of viability evidence, the Council will consider flexibility to ensure the viability and deliverability of the site</i>”.</p> <p>We also note that Part Q refers to the delivery of required off-site infrastructure “in accordance with Strategic Policy 8”. However, this policy relates to ‘Dover Town Centre’ rather than infrastructure contributions. We consider that Strategic Policy 8 has been referred to in error, and the correct policy reference here is ‘Strategic Policy 11- Infrastructure and Developer Contributions’.</p> <p>Suggested wording: Replace “<i>Strategic Policy 8</i>” with “<i>Strategic Policy 11</i>”</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected “yes” to the question above.	Policy SAP24 is one of the draft Plan's major strategic housing allocations, with up to 640 new homes to be delivered on this site. Given the importance of this allocation in contributing to the District meeting its need for 10,998 dwellings over the new Local Plan period we consider it necessary to participate in the oral part of the examination in order to present key evidence in support of this allocation.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP24-Land to the South of Aylesham (AYL003)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is ‘unsound’, on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The proposed development is on the boundary of Canterbury where Canterbury are also planning to build housing along with another development to the east of Aylesham, making a combined new 4600 homes. A proposed site for 500 houses was dropped because of the effect on existing road infrastructure, namely the B2046.</p> <p>The B2046 which separates the two councils is the main road that AYL003 will need to be used to access any new housing and it is inconsistent to say that it can't support 500 houses but can 4600. The road has had many serious accidents in the past and bottlenecks at the Wingham end. Lorries are constantly having to mount the pavement to continue their journey. There is housing on both sides of the road at Wingham and not capable of widening.</p> <p>All the sites are greenfield and any development would materially change the nature of the downs.</p> <p>The development does not have the support of the local community.</p> <p>Aylesham is amongst the most deprived villages, with lack of facilities for the existing residents. It has seen substantial new developments without any meaningful increase in facilities.</p> <p>The local Parish Councillor advised that consultation between the two councils had not to his knowledge taken place.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Either remove this from the plan entirely or provide improved travel, health and welfare, education, and environment improvements prior to the start of development. The council do have some allocated funding already available for these purposes.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Policy SAP24 (Land to south of Aylesham)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We object to an over-reliance of the Plan to deliver dwellings in the medium and long term parts of the Plan (including at Aylesham). There appears to be little delivery of dwellings in the early part of the Plan period and this will not make a positive contribution to the Council's housing land supply. The strategic, urban extensions will take time to deliver due to the requirement for a masterplan and prolonged planning process. This will not aid 'upfront' delivery for dwellings in the district. Please see representations for further information
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The lack of housing delivery in the early part of the Plan period should be rectified by allocating new, smaller sites for development in appropriate locations in the district. This includes development at Ash, for which we have promoted a site which is cognisant with its classification as a 'Local Centre'. Please see representations for further information
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To contribute to the assessment of housing demand and potential requirement to assess when housing across the deistrict would be delivered.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP24 - Land to the South of Aylesham (AYL003) All of this plan
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Rewilding: The government has stated that rewilding is essential for preserving Wildlife and their Habitat especially in Rural areas and these additional 640+ Houses would have a devastating effect on this type of conservation.</p> <p>Waste & Sewage: The additional Sewage & Waste from this development will over whelm the existing Infrastructure which has seen the Water Company that own and run them fined for releasing current already high volumes of waste into the local Rivers and Coastline causing long term damage to Local Shellfish industry as well as all other Marine as well as the Health implications to people using the Sea and Waterways.</p> <p>Sustainable & Self sufficient Farming: If the Current War in the Ukraine has taught Us anything, it is that We must become less reliant on Food Imports and the need to rely on more Home grown produce and not to be held to Ransom by other Countries and to that end We need to preserve as much Farm and Countryside Land as possible and stop Building massive Housing developments over them. Brownfill sites MUST take priority over Countryside because once its gone its gone forever and our options for feeding Ourselves will be gone with it.</p> <p>Additional Traffic & Air Pollution: The Roads and Country Lanes in this area are not designed to cope with the huge additional volume of Traffic a development of this size will bring, as well as the lanes being very narrow and difficult for Vehicles to pass they will often freeze in Winter and because the trees shield the road from any Sunlight stopping them from Thawing out and they stay Icy for Days which has led to many accidents also the roads and lanes are very potholed which will only increase with additional wear and tear. Air pollution from all these extra cars will also have a negative effect on the local Environment.</p> <p>Job Opportunities: Aylesham already has high unemployment so by over populating the area with another Large Housing development would not only make getting a job for locals impossible but also for anybody moving into the area.</p> <p>Strain on the Power Grid: The Government is telling us to cut back on Electricity consumption so as to prevent potential necessary Power Cuts because of the current Energy crisis so a development of this scale would put a massive strain on what is already a Power Grid at breaking point and when You factor in EVs being charged 24/7 at Home and at allocated Charging points then We are absolutely Guaranteed to have Power Cuts.</p> <p>Light Pollution: Our Area is an "Dark Sky Zone" and according to the The International Dark Sky Association these areas should have very little to No light Pollution so as to be able to see Star Systems however this development would add a massive amount of light pollution negating the existing "Dark Sky Zone" status We currently have.</p> <p>Public Transport: There is very Pulic Transport Infrastructure in this Area, other than the Regular Trains to London and Dover there is also a very few Buses and they are infrequent.</p> <p>Healthcare: Aylesham Medical Practice is the only Doctors Surgery in the Area and getting an appointment now is difficult enough at present but with a massive influx of extra residents this will have a detrimental effect on those needing to see a Doctor quickly</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	I suggest that Aylesham plan not go ahead as it's detrimental to the local area there no sound logic to building this amount of house in this area it's not needed or wanted by local people.

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 24 - Land to the South of Aylsham (AYL003)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The plan seems vague and uncertain on vital and necessary infrastructural improvements which would be required in order for the proposed housing expansion to be both sustainable and operable given current infrastructural limitations. We object most strongly to the above proposed further expansion of housing in the Aylsham area for the following reasons: <ul style="list-style-type: none"> • The area is needed for higher priority agricultural use given the lack of such valuable land at a local and national level; • There is insufficient water supply in the Esat Kent area which has already been categorised as 'water stressed';

	<ul style="list-style-type: none"> • The resulting traffic increase will be reach dangerous levels on the local roads, especially the B2046 which already has a poor accident record; • The increase in traffic and service provision will further increase local pollution; • The sewage system is insufficient already to cope with current demand evidenced by the regular and increasing overflows/releases into the sea; • The current infrastructure (doctors/schools/dentists/shops/etc) is already unable to cope with demand and any further increase can only exacerbate the current difficulties; • Given the poor provision of public transport car usage would inevitably be increased at a time which would clearly be in clear contradiction with national policy.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The proposed new expansion should be abandoned given the extent that the area has already been developed which has already placed an unacceptable strain and deficiency in road, school, medical and other services which are unable to cope with the additional traffic and footfall.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The plan does not support local opinion and lives. The road structures are not able to support the level of vehicles associated with such a large development. Utilities, such as water, sewage and drainage are insufficient. This land is greenfield, and government has agreed that building on greenfield sites should be readdressed. Living locally I can advise that the level of new builds is very detrimental to heritage villages and roads which cannot cope with current levels of traffic. Land should be kept for food production.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The admission of secondary schools, local transport and other essential services such as doctors, shops.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Road infrastructure will not sustain the extra housing in the area. B2046 already had a fatality in 2022, and several big accidents where it is joined by Spinney Lane, Dorman Avenue North, and the Industrial Estate. B2046 regularly closed at Wingham end causing tailbacks with queues of traffic polluting the atmosphere. Diversions through country lanes happen several times a year and cause damage to local flora and fauna on the one track country lanes leading to local towns.</p> <p>B2046 already being used by heavier lorries which are causing crumbling to the verges.</p> <p>There is no secondary school in the area so children have to travel to Dover, Sandwich and Canterbury. Bus services have recently been curtailed resulting in overcrowding, and young vulnerable children being left stranded waiting an hour or more for the next bus, or having to be collected when parents finish work.</p> <p>Train services are sporadic and the current amount of secondary school age children in the area cannot be allocated local school places.</p> <p>Sewerage, gas, broadband are nearing capacity, with regular broadband outages and lack of any FFTP in the area with the current number of houses.</p> <p>Dorman Avenue building work is still not complete, and within that plan there was provision for extra shops. Current shops are high cost and low volume, thus travel 10-15 miles to nearest superstore means more vehicles on inadequate roads.</p> <p>Local doctor's surgeries are also at capacity and many wait weeks for appointments. The local hospitals have been at bed capacity for months, with people waiting in A&E for beds overnight, sometimes for 48 hours before being treated, or going for surgery.</p> <p>The Ukraine war has shown that greenfield areas are much needed for crops so that the UK can be self-sufficient rather than relying on imports. Many local farmers have increased crop harvesting already.</p> <p>The Covid-19 pandemic has resulted in increased mental health issues, and the spread of the virus has been shown to increase in more densely housed areas, where there are limited garden spaces to breathe fresh air and exercise. Along with limited parking causing problems in the recent estates at Dorman Avenue, and assuming an extra minimum of 1 car per household the increase of cars especially at peak times on the B2046 will cause more accidents and hold ups.</p> <p>For those travelling to Sandwich or Thanet, the A257 is inadequate in terms of the junctions leading onto it. Already fatalities and severe accidents involving the use of air ambulances this year deem this road unsuitable for the current traffic levels. The Sandwich area developments will cause more disruption on these junctions, and the increase to delays on this road will cause more traffic pollution.</p> <p>The new Canterbury City Council plan has not been discussed with DDC and thus contravenes the Duty To Co-operate with both councils. Together with 640 houses in Aylesham, 3200 in the adjoining Cooting Farm Town, and another 500-800 also in close proximity, the infrastructure and the amenities cannot cope with these plans.</p> <p>The Government has recently abolished the 300,000 new homes for the next year and that was the figure on which this plan was based</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	<p>Government has just rescinded the 300,000 new housing level, and the levels in these plans need to be modified, meaning an urgent review of this plan should be commenced.</p> <p>Lack of consultation with CCC on their forthcoming plan including Cooting Farm Town which abutts the B2046 shows failure in Duty to Co-operate with neighbouring areas, and thus this plan should be put on hold with both councils meeting to discuss both plans and redesign a way forward that benefits both councils. The area cannot sustain either at present and with no discussions both plans have been launched at similar times without knowledge.</p> <p>Highways involvement in terms of upgrading the B2046, straightening the blind bends, installing roundabouts at dangerous junctions, plus the dualling of the A257 before the Sandwich housing areas are finalised, must take place. Both roads have had fatalities this year, and with a doubling of housing in the surrounding area, the road state must be revisited.</p>

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Local fauna relies on corridors away from businesses and housing and these have already been narrowed by previous recent housing in Dorman Avenue. Rare red kites, bats, and more nest and live in the area and these must be preserved, not eradicated by housing. A secondary school is required in the area, travel to and from other schools with inadequate/extortionate price bus and train services has to be revisited before considering the increase in housing. Local shops need to be varied and increased before any more housing. With only one Post Office in five local villages, the post office in Aylesham is already over-used and other village amenities and infrastructure must be revisited. FFTP broadband is essential now with over-use and will be impossible with new housing levels, The Government agrees to supply broadband to low income households, instead this will get worse.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible.	We have reservations about the allocation: <ul style="list-style-type: none"> We are concerned that the proposed allocation represents overdevelopment at odds with the original 2005 masterplan for Aylesham. Specifically, we consider the expansion south of the village - beyond the established natural boundary purposely created along Spinney Road - will lead to the coalescence between the settlements of Aylesham and Snowdown, that had previously been resisted.

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

- We also share the concern of local residents and Aylesham parish council that, despite the significant growth of Aylesham over recent years, the public transport offering continues to fall woefully short of what should be being provided to such a sizable rural community. We therefore consider any further allocation at Aylesham can only occur after the long-promised improvements to Aylesham's bus and rail services have been provided. Significantly, this includes the promised regular and reliable service to Dover town, which still does not exist.
- We also note and share the local community's concerns regarding the need for further social infrastructure to be included as part of this development's offering. This includes improved healthcare, supermarket provision and a pub/restaurant, all of which Aylesham continues to lack. Failure to provide such, at an early stage of the development, risks car-dependency becoming ingrained as future residents are forced to rely on the private vehicles to reach these services elsewhere.
- The site is shown on the Post Agricultural Land Classification (England) on MAGIC as approximately 50% best and most versatile agricultural land (grades 1,2, and 3a) and the remainder grade 3b. We do not believe this significant constraint has been given the due regard necessary within the site selection process. As set out within CPRE's recent report "Building on our food security" in the past 12 years England has lost over 14,000 hectares of Grade 1 and 2 agricultural land to development, the equivalent to the productive loss of around 250,000 tonnes of vegetables. It also appears that this figure is increasing, with there being a 100-fold increase in 2022 from that built on in 2010. This loss cannot continue to be ignored which is why it remains our view the selection of this site is at odds with NPPF paragraph 174(b).
- There is an ancient woodland on the western edge. Ancient woodlands are a finite national resource and once an ancient woodland has been lost it cannot be immediately replaced as any new tree planting would not provide the range and variety of habitat that has grown up in association with the woodland over a 400-year period. Every effort needs to be made to avoid any loss of ancient woodland and we are concerned that by placing such a significant new population near the woodland clearly risks there being an adverse impact. Likewise, it is also recognised that domestic pets such as cats are predators and reduce wildlife populations.
- HELAA Appendix 3A: The site is given orange status and the overall landscape summary is: 'The development of this site would have an impact on the landscape and further assessment is required to demonstrate whether this can be mitigated.'
- HELAA Appendix 3B: The site is given orange status as 'Highways concerns have been identified in relation to access and/or highway impact and further assessment is required to demonstrate whether this can be mitigated.'

Until the further assessment of whether the impact on the landscape, including dark skies, and concerns about access and highway impact can be mitigated, the site should not be included as an allocation.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

CPRE Kent would wish to participate at the examination hearings to explore these issues further.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP24 640 HOUSE PROPOSED LAND SOUTH OF AYLESHAM
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Your appoveing to many houses be built you going above what central goverments figure asked for across the Dover area. Your going against the goverments rewilding by building over valuable farm land and countryside and destroying wildlife habitats your also allowing additional sewage pollution into local rivers and the sea . you do not have the infrastructure ie roads , schools, doctors, dentist and hospital.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Policy SAP24 in the Regulation 19 Dover District Local Plan allocates Land to the South of Aylesham for approximately 640 new homes together with employment opportunities and community facilities. The site borders the Canterbury District boundary and the draft Canterbury District Local Plan to 2045 (Regulation 18) allocates land adjacent to SAP24 for approximately 420 new homes and a new Country Park (Policy R20). It is critical that the site allocation policies in both Local Plans enable appropriate connectivity between the two sites, particularly in terms of sustainable transport and ecology. We consider that an amendment is required to Policy SAP24 to provide a basis to secure these connections, and that this is necessary to ensure the policy is effective and consistent with national policy, and is therefore sound.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan to build houses in this area has not taken sufficient consideration of the area and its ability to support such an expansion. This is a greenfield area of outstanding natural beauty, and will destroy habitats and farmland. As we see prices rise in the shops, surely it would be better to consider farmland to be a very valuable resource and it should be protected as such.</p> <p>Kent is one of the driest areas of the country, and adding more housing to an area which is already suffering every summer with drought conditions, will only exacerbate the issue. Unless there are plans to include a water treatment plan or reservoir for the area, the burden will create a water shortage. The neighbouring village of Aylesham has already doubled in size, and there are further plans (Canterbury City Council) to create further extensions right next to this proposal. The provision of water supplies and capacity to deal with sewage will not be sustainable.</p> <p>The proposal, together with the Canterbury City Council one will create more traffic than the rural roads can cope with, both in the building phase and once the houses are occupied. Many of the roads in the area are single track or so narrow that only cars can pass safely. Are all the local roads going to be upgraded to be suitable, i.e. widened, streetlights, potholes filled, appropriate speed restrictions? No? Thought not. When the first expansions to Aylesham were commenced, part of the plan was to add the roundabout at the junction of the A260 to join the A2. This didn't happen until a couple of years later. It created chaos with the road system at the time - this development will make things worse. It will also create pollution and the production of greenhouse gasses at a time when the pressure is on to reduce global warming is counter intuitive.</p> <p>The local area of this proposed development already suffers from a shortage of available GP surgeries, dentists, secondary schools, buses, trains, supermarkets, and leisure facilities. I used to work in the GP surgery, so I speak from experience. I now work in the Kent & Canterbury Hospital. I can't stress enough how much the health services are overstretched in this area. The nearest secondary schools are in Dover, Sandwich and Canterbury, all of which are a bus ride away, and Stagecoach have recently reduced the bus services to the area. There are no buses at all through our village.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance	<p>This proposal (and the one by Canterbury City Council right next to it) should be substantially downsized or scrapped altogether.</p> <p>See text above in point 6 for the justification of why this level of development is unsustainable.</p>

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We have chosen to live in a rural area rather than an urban one and the proposed size of the new developments will totally change the character of our villages.</p> <p>In recent years the amount of traffic travelling through our village, including HGVs is incessant and is not related to the actual community but as a short cut between Aylesham through to Thanet. There are no footpaths through a significant part of the village with areas extremely narrow and there does not appear to be any consideration to control traffic flow through these areas. I understand a survey was carried out but this was done during lockdown and did not reflect the actual reality.</p> <p>There is already flooding on large areas of the roads through the village</p>

	We have no local services except for a primary school. There are no shops, buses, doctors etc in the village and traffic will increase to access these facilities in nearby towns

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Not Applicable</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>SAP24 - Land to the South of Aylesham (AYL003)</p> <p>4.201. The SAP 24 area towards Snowdown is already widely used as an informal open space by a large proportion of Snowdown residents. This is because there are no formal open spaces within the Snowdown area. As a resident of Snowdown, I know that it is preferred to keep the open space informal so I would like to suggest that the strip of landscape buffer be extended down to the bridleway crossroad junction (Figure 4.6).</p> <p>AYL003 (e, f, j) Development on the site should be well related to the existing settlement of Aylesham and respect the residential amenity of adjoining properties.</p> <p>Does this development intend to join the village of Aylesham to the hamlet of Snowdown? This development needs to state whether SAP 24 intends to join the two as, to do so, has a great impact upon the residential amenity of adjoining properties in Snowdown. This intention not only affects day to day life of Snowdown residents such as myself but also impacts roads and access. More importantly, to join the village of Aylesham to Snowdown impacts the history and heritage of Snowdown itself.</p> <p>If it is not intended to join Aylesham to Snowdown, then some adjustments are necessary to ensure that Snowdown can continue with its separate identity. Again, the extension of the buffer zone between SAP 24 and Snowdown would allow this.</p> <p>From a transport access point of view, I understand the Spinney Lane access but am uncertain about Aylesham Road access. Thinking from an exit point of view, where would the Aylesham Road access be going to? I'm assuming this would be towards shops in Aylesham or towards the A2. If yes, can I suggest that Aylesham Road access points, if required at all, are not close to Snowdown. Then it will be clear for the transport user that travel towards Aylesham is the sensible route.</p> <p>Walking access to train stations could be towards Aylesham or Snowdown so can I suggest good walking paths to both.</p> <p>AYL003 (g) I would like to enquire about the improvements to the Holt Street/Aylesham Road Junction. It is well known that this spot regularly floods and any increase in traffic would need to provide a long term solution to the flooding. Having previously communicated with officials on the need to fix the flooding, I am interested to hear the proposed solution. Until now, it has always been a temporary clearing on silt build-up without a long term solution ever being suggested.</p> <p>Additionally, any work done in the area of the Holt Street/Aylesham Road Junction results in a traffic light system outside of my house. This is acceptable only for necessary repair and maintenance but any traffic initiatives resulting in idling traffic would not work on a permanent basis.</p> <p>On the subject of the Railway bridge at Snowdown. This spot is narrow and without a walkway on a road where cars travel at significant speeds. It is also a blind junction. This site is already dangerous for both my mother, who is blind, and my son, who has special needs when accessing the station to and from Dover. The increase of traffic to this spot would be hazardous. Similarly, I would need to see how pedestrian and cycle access is going to be improved without traffic idling measures.</p> <p>If you are to develop SAP 24 and wish for current residents to be satisfied, my personal conclusion is as follows.</p> <ul style="list-style-type: none"> • Widen the landscape buffer between Snowdown and SAP 24 so that Snowdown can retain its hamlet heritage and history. • Ensure walkways allow easy access to Snowdown but roads are designed so that Aylesham is the preferred access option for motorised vehicles. • The Holt Street/Aylesham Road spot, including the railway bridge, must address the following: <ul style="list-style-type: none"> • Pedestrian access • Cycle routes • The current hazardous railway station access • The regular flooding in this area • The Holt Street/Aylesham Road needs a solution that does not include a transport scheme that produces long-term traffic idleness. <p>Finally, using my knowledge, and assessment of the levels of deprivation, of the Aylesham area, can I suggest a significant proportion of the development be allocated to social housing. This will allow the families of the local population to stay in the area. Successful developments create happy communities.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)</p>	<p>If you are to develop SAP 24 and wish for current residents to be satisfied, my personal conclusion is as follows.</p> <ul style="list-style-type: none"> • Widen the landscape buffer between Snowdown and SAP 24 so that Snowdown can retain its hamlet heritage and history.

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Not Applicable</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>1. SAP24, AYL003 South Aylesham, 640 houses – I support the Parish Council's objection that this level of development is overbearing on the village (for reasons given below) and risks altering the nature of the community here, which has already seen approval for some 1300 houses. It goes far beyond the original master plan.</p> <p>2. SAP 27 (AYL001 policy SAP27), 9 houses – I support the opposition of the Parish Council to this because it would result in the loss of registered native woodland.</p> <p>3. Over the past few years, Aylesham has seen a vast amount of development, which has put considerable strain on local amenities such as local shops, local community and leisure facilities, highways infra-structure and medical services, which are currently inadequate, as outlined below.</p> <p>4. Transport and Highways infrastructure Bus services are totally inadequate – there is no evening service to anywhere, and no bus to Dover or Whitfield, despite a recent service showing that this is what most people want, and a promise from the local bus privatised company and Kent Council that it will provide a minibus dial-up service. There is no sign of the latter so far, despite many promises – and it will be inadequate for the numbers of existing and new houses. This means over reliance on cars, and isolation from those without their own transport. The train service does not cater for people with disabilities who cannot cross between the different platforms at both Aylesham and Snowdown Stations. The IDP identifies that “passenger numbers have risen significantly” and that Network Rail are looking to increase to half-hourly services – but there are no firm commitments. There is a need for second station entrances and DDA3 compliant access; improvements to car and cycle parking; improvements to pedestrian access; and more waiting bus shelters. There are no cycle tracks – and these are badly needed to other villages, Dover and Canterbury.</p> <p>Local roads are increasingly congested – there is a knock-on effect for Nonington and Wingham where increased traffic from Aylesham through the narrow road to Sandwich through Nonington and the B2046 to Wingham will make much worse already bad problems with speeding, and long queues at the B2046 junction at Wingham. Short of a new bypass for which there is no funding, nothing can be done to significantly improve these problems. Any future developments must include a plan to make significant upgrades to key routes such as Spinney Lane and B2046 (Adisham Road). Although this is mentioned in the IDP2, there are no firm commitments to immediate improvements.</p> <p>5. Local amenities – as the Parish Council explains in detail, given the recent and ongoing development of 1300 odd houses – are already grossly inadequate, with no local supermarket, insufficient community/leisure facilities, highways infra-structure and insufficient medical services. There is no coherent youth service provision, very poor shopping facilities, no local pub or restaurant, and limited sports and community facilities which have received only a limited amount of developer contributions so far, and which have resulted in little real addition to such facilities in the village. There is a lack of pre-school education provision, excessive demand on the local medical centre, no dentist, all of which contravenes 3.8 SP2 statement that ‘ new development is well served by services and facilities. The IDP identifies a need for increased sports hall facility for which the developers’ funds allocation has still not been spent. The IDP also mention a proposed community facility/ which has yet to materialise and on which the Parish Council says it has not been consulted. Moreover KCC closed the Youth club some years ago, and, despite the tremendous increase in families and young people already happening as a result of the existing new builds, there is no coherent strategy of funds for much greater youth service provision in the village.</p> <p>6. Rural Service Centre - this is Aylesham's official designation in the Dover Council Settlement hierarchy, level with the town of Sandwich. But, although both communities have equal weighting in the settlement hierarchy, they are not getting an equal weighting in housing development or in terms of investment. The Site Allocations refer to the district's “existing larger settlements of Dover, Deal and Sandwich” but in reality Aylesham is now likely to have a larger population than Sandwich. Aylesham is receiving 649 new homes (SAP24 and SAP27), whilst Sandwich has a proposed development of just over 200 homes.</p> <p>The Draft Local Plan proposes investment in Sandwich to improve the town and protect its heritage, plus a culture investment plan. THIS IS NOT HAPPENING IN AYLESHAM. This relates to SP3 – Housing Growth and SP10 – Sandwich Town Centre. The residents of Aylesham should also see their cultural capital widened and enriched in a similar extensive Draft Local Plan. Funding should be provided for organisations such as cinemas, museums, galleries etc that will help to enrich people's lives. In addition, funding should be made to include a substantial mining heritage centre to the site at SP26 which will provide much welcome additional employment on the old Colliery site. Only two of these buildings are currently listed – more should be listed, and adapted to new cultural uses, plus the provision of shops and other leisure/cultural facilities..</p> <p>7. According to Kent County Council's childcare sufficiency analysis, Aylesham currently has a significant deficit of 0-4 yr old childcare places, 5-11 yr old breakfast club places and 3 & 4 yr old extended entitlement places in nurseries. There needs to be FIRM commitment to SPECIFIC</p>

	<p>sites and PLANS to provide these increases in this vital early years service area. As the Parish Council says, the plan must go further than listing a whole host of possible “off-site” provisions to safeguard this vital sector.</p> <p>8. In relation to secondary school provision, Secondary school age children have to travel by bus or train to Dover, Deal and Sandwich schools. Often, these buses are overcrowded or full and so do not stop at all designated stops to pick up school children leaving them stranded before school. Recently, the 96A to Dover Christ Church Academy was planned to be cut from Stagecoach’s timetable. There should be a properly funded and specific commitment to improve school transport as the numbers of children increase, and the possible need for a new Secondary School in the Dover District should be located in Aylesham.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>For a rural settlement, a further 640 houses, on top of a recent development of 1,360, is too much.</p> <p>Whatever the final number approved, the following changes should be made</p> <ul style="list-style-type: none"> • The 9 houses (AYL001) should not be built, for the reasons given above, and the further 640 houses should be reduced in number – nothing in reality can be done about the problems of significantly increased traffic on the B2046 especially.. • Buses – funding MUST be provided for adequate bus services – new ones to Dover and the local villages, and also in the evenings, to reduce car use, and avoid isolation amongst the large numbers of residents without cars. • Both train stations should be immediately upgraded to ensure DDA3 compliance, with second entrances, and train services should be increased in frequency. • Cycle track provision - there is nothing at the moment at all. • Upgrades to Spinney Lane and the B2046, and more parking provision and better traffic management in the village itself. • Guaranteed investment in local services, including generic dentist provision (not just the special dentistry service provided at the moment), enhancements to the medical centre, identification of specific sites for additional community facilities such as shops, pubs/restaurants, a sports/leisure/community Centre (for which some funding already exists which should be spent immediately, and there should be more developer funding), - and museum, cinema, library (far too small) – and a new Youth Centre with a coherent programme of events and activities. • Equal provision on the same level as Sandwich (Aylesham will be bigger in terms of population) in relation to heritage and cultural resources, and other community facilities. • Education – specifically identified funds and plans to meet the needs identified above for early years education provision, more school buses, and the building of a new secondary school in Aylesham. <p>OTHERWISE, Aylesham will be reduced from a thriving community to nothing more than an enormous housing estate.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP24
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am writing to OBJECT to further development around Aylesham, in particular the area between Aylesham and Snowdown (ie South Aylesham).</p> <p>I apologise for not using the approved planning portal, but I had problems engaging with it.</p> <p>My grounds for OBJECTING to proposed development in the South Aylesham area are:</p> <ol style="list-style-type: none"> 1. Destruction of productive farmland. This is a finite national resource required for food security. 2. Destruction of natural habitats. Field boundaries, hedges etc support wildlife. 3. Disturbance of wildlife. Habitat destruction will endanger wild animals, birds etc. 4. Effect on infrastructure in the area in particular roads: The local roads, especially the B2046, at certain times of the day are already at capacity. The South Aylesham area is served by narrow rural roads entirely unsuited to the traffic demands likely to be imposed by the development proposed. 5. Effect on services in Aylesham: Aylesham village centre is already busy for much of the day. It will not comfortably cope with extra traffic / people that will be generated by the proposed South Aylesham development. 6. Is there a genuine LOCAL NEED for all these extra houses? Or will it just draw people out of London? Those are my thoughts. There are probably many more reasons to OBJECT to further development around Aylesham which others will tell you about.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Adisham Parish council welcome the removal of 500 homes from DDC Draft Local Plan, however we have concerns over the proposal to build 640 houses linking Aylesham to Snowdown.</p> <p>Particular concerns: Traffic- There is already a considerable strain on local roads particularly on the B2046 Adisham to Aylesham and further on as it joins the A257 at Wingham. Further development in the area would see a significant increase to traffic. This applies to the minor roads and lanes that connect Adisham and Aylesham. It is very likely that Adisham will be used to bypass the major routes into cant A2. The B2046 has had an increase in traffic incidents some fatal.</p> <p>Public transport - Bus and train services are limited. There are no firm proposals to improve these services. Currently one school bus, 89b, operates. The bus travels from Aylesham to Adisham, by the time it gets to Adisham there is standing room only. Children from Adisham and Bekesbourne are not provided with a safe form transport at present, with more development assurances of safe transport must be in place.</p> <p>Adisham village has limited facilities/amenities and relies on Aylesham's local facilities. Recent building has increased the demand for these amenities. Medical services, leisure facilities and early years amenities need to be increased and improved to support further development.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

I live in Woolage Village, which is inside the jurisdiction of Canterbury City Council, but I do all my shopping in Aylesham, my doctor's surgery is in Aylesham Medical Centre and Aylesham is my transport hub for both trains and buses. I also regularly walk on the public footpaths across the fields where the proposed development is intended to take place. Prime Minister Rishi Sunak has just announced that Central Government will not be enforcing house building targets on local councils if they are likely to have a detrimental effect on the character of a local area. He has also said that the Tory Government will prioritise building on Brownfield Sites and the preservation of Greenfield Sites. In light of these announcements, I would like to address the sustainability, viability and deliverability of the proposal to build 640 homes on the agricultural land adjacent to Aylesham Road and Spinney Lane in Aylesham South.

Rural Character of the Area.

Aylesham sits in a rural area, a farming district which makes a significant contribution to food production locally and nationally. The proposed site is prime productive fertile agricultural land. At a time when the NFU is warning that we are 'sleepwalking' into food insecurity, and advocating that the UK aim for more self-sufficiency in food production, it is completely inappropriate to be targeting agricultural land for housing development. The development of Greenfield sites such as this should be put on hold and Brownfield sites, like the Snowdown Colliery site, utilised for urban development, reusing land that has been previously developed.

The proposed site, which is adjacent to Ackholt Wood, is a haven for a variety of wildlife, including buzzards, Little, Tawney and Barn owls, ravens, sparrow hawks, skylarks and kestrels; hedgehogs, hares, foxes, badgers, butterflies and bats. Wood anemones, bluebells and wild garlic in Ackholt Wood all indicate that this is an ancient woodland and a vital ecosystem, already at risk from the climate emergency and extreme weather events, such as Storm Eunice. Ancient woodland must be protected at all costs and a fifteen-metre buffer zone around the wood really does not meet cut it.

This area is also part of a Dark Skies zone. Any development of this land for housing will result in light pollution from domestic lighting, street lighting and outdoor lighting. As well as affecting the view of the sky at night, which is exceptional in this area, this will disturb wildlife, especially bats and song birds, who are confused by urban lighting.

Infrastructure

Aylesham has already expanded to double its original size, in the last ten years, but during that time there has been little or no improvements to local infrastructure which has placed increased stress on local services, including primary schools, the GP surgery and even the local Co-op, which frequently runs out of staple foods and cannot restock quickly enough to cope with the increased demand. Since the new houses were built and occupied, it has been significantly more difficult to get a doctor's appointment. There is a minimum three week wait even for a telephone appointment and even longer for a face-to-face consultation. I recently underwent some medical tests and received a text today (7th Dec 2022) advising me to make a telephone appointment to discuss the results. The first appointment available is on 4th Jan 2023. And this isn't even for a face-to-face consultation. This started long before March 2020, well before the Pandemic.

Public Transport and Increased Traffic

Public transport in the area is very poor, with only one bus an hour into Canterbury and no direct bus service to Dover. The last bus from Canterbury to Aylesham leaves at 7 pm. Trains to Canterbury and Dover are only one an hour during the day so local people are heavily dependent on the use of cars. Every new home is potentially adding two or more cars to the local environment. The Aylesham North development has already significantly increased the volume of traffic on the B2046, between Aylesham and the A2, making it virtually impossible to turn right at the beacon, towards Wingham, during busy times, with queues frequently stretching all the way to Spinney Lane and beyond.

The Aylesham North development has direct access to the B2046 and, from there, to the A2. DDC has already discounted further development of Aylesham North because of the potential increase in traffic on the B2046. The proposed Aylesham South development has access to the B2046 and the A2 also, but via narrow, winding rural roads, including Spinney Lane, Aylesham Road, Holt Street, Forstal Road, Firs Road and Wick Lane. The unsuitability of these roads for high-density traffic is graphically demonstrated whenever there is a blockage or hold-up on the A2 and traffic is diverted onto these country lanes. It causes chaos. Holt Street, in particular, is very prone to Black Ice in the Winter and can remain frozen for weeks. These narrow lanes are lined with ancient hedgerows and mature trees so any proposal to widen or straighten them would entail the destruction of these essential habitats, which goes against the Council's declared commitment to the preservation of wildlife corridors in the area.

Water Supply

East Kent is already a water stressed area, due to over-emphasis on the South East region for house building and the failure of local water companies to invest in developing new water sources. This leaves the area hugely dependent on underground aquifers, which are a finite resource and which feed the River Stour, which changes its character to become an extremely rare Chalk Stream, one of only around 200 in the world, as it flows through the Kent Downs. Our river habitats are placed under extreme stress when water is diverted from their sources and courses for domestic consumption.

Sewage

Southern Water has made the national news headlines repeatedly over the last few years due to its frequent discharge of raw sewage into our rivers and coastal waters, even when there are no extreme weather events. The sewage system can not cope with the volume of sewage already, without adding to it with even more house-building in the South East. And that assumes that the type of housing being built meets the needs and aspirations of local people but even the statutory 30% Social or Affordable housing can not be guaranteed, putting the cost of most of these planned homes beyond the reach of local people.

The village of Aylesham, which has enjoyed the benefits of a very stable community for over a hundred years, has already changed considerably in character due to the huge amount of housing development that has taken place there over the last decade. The sense of community and local identity in Aylesham is hanging by a thread. I fear that any further expansion will be the final nail in the coffin for this former mining village as it is overwhelmed by a deluge of new-builds

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC NOTE: representation refers to AYL004. However, consultee subsequently has confirmed that this representation refers to AYL003 (SAP24) Introduction and Summary. I wish to put on record my strong objection to the proposed development at Aylesham (AYL004), included in the draft Dover Plan, and outline my rationale below. In accordance with the required framework for comments I have made remarks under the following headings: 1. Legal compliance, soundness and duty to cooperate; and 2. Sustainability report; In large part my comments are specific to the proposed Aylesham development referred to above but do cover more general topics.

Legal compliance, soundness and duty to cooperate

I provide comments on two specific items in this area (with specific reference to the Aylesham development); 1a.Soundness of proposals; and 1b. Meets the duty to cooperate. Effective joint working on cross boundary issues.

1.a.Soundness. i.e. does the Plan meet the “soundness” criteria required by the Inspectorate. I do not believe that it does. You state that the Plan has been devised to “provide a strategy which as a minimum seeks to meet Dover’s objectively assessed needs...and is consistent with achievable sustainable development”. But

Planned houses far exceed objectively assessed local needs

The Sustainability Appraisal Document Dec 2020 points out that a minimum of 11920 new homes are to be delivered over the plan period which equates to a 22% increase in the total number of homes in Dover District. It is encouraging to note that proposed housing numbers have been decreased by 900, but it still represents a 20% increase. Given that Central government, top down, targets are currently being challenged the question remains whether Dover DC need to build so many houses, and whether these houses meet the true needs of the district. The existing development at Aylesham is a case in point. Dover District Council’s intentions in developing Aylesham were to provide housing “To meet the needs of the community.” Despite this the local community resisted this development. I quote Kent Live 24th March 2021 “Aylesham. The Kent Village with an undeserved reputation that Londoners are flocking to.” Properties are sold to people from Sittingbourne, Medway and South London. At least 40% of purchasers are not local buyers. The Aylesham developments are far from being examples of “sustainable development”. For example- the road network is poor. Although the AYL005 proposal has been shelved I believe that AYL003 and in particular AYL004 with its 640 houses should also be dropped. These sites are identified in the Plan as “Strategic sites to deliver the Council’s housing growth”. While constraints do exist on these sites, primarily in relation to highways, work is going on to address this and develop an appropriate mitigation scheme.” All well and good but it should be noted that the AYL004 site is shown on planning documents as marginal in deliverability. Development at the nearby Snowdown Colliery (land off Holt Street) is also considered in the Plan to be questionable as access is unsuitable for HGVs. You say that a mitigation scheme could be put in place, but I would challenge that. Residents in the AYL004 development would have to use the B2064 to join the A2 to Canterbury and Dover. The B2064 is a narrow, winding and potentially dangerous road. KCC has no plans (or finance) to make improvements, other than possibly increasing signage. Access to the Dover bound A2 for many of the new residents is more likely to be via Firs Road leading to Wick Lane, a country road on which it is difficult for two cars to pass. The alternative via Woolage Village will mean using a link road which has a 6’6” width restriction. Lack of suitable water supplies. Although the Dover plan states that the Stodmarsh situation is no longer an issue for Dover District Council it remains a considerable problem for residents of the adjacent Canterbury district. It seems illogical to ignore existing problems with provision of water and disposal of sewage when the developments are so close. It would be negligent not to take this into consideration. Loss of agricultural land. AYL004 in particular will cover excellent agricultural land – Grade 3 with some Grade 2 at a time when we should be considering food security. In addition to loss of valuable arable land it will encroach on the landscape; the nearby AONB must be protected. This development will lead to loss of habitat, considerable increase in traffic, poorer air quality and light pollution. The proximity of AYL004 to Canterbury Council’s lamentable proposal for developments at Adisham and Womenswold would see the destruction of woodland and encroach on the North Downs AONB. 1b. Meets the Duty to Cooperate. “There should be evidence of effective joint working on cross boundary strategic issues” Aylesham and its hinterland straddles two Council areas. Canterbury is proposing further development directly adjacent to Aylesham in Adisham and Womenswold which would create a town with almost 4000 houses. Combined with Aylesham this would create a conurbation of some 10000 houses: all built on agricultural land, with limited local services and serviced by an extremely poor and dangerous road network. One hopes that this is not the result of “effective joint working on cross boundary issues.” 2.Sustainability Report issues The sustainability report raises a series of issues which are relevant to the Aylesham development and adversely affect it (some of which have been covered by the above comments). A1 Population Growth. “Population growth places additional demand on key services and facilities” Where are e.g. the medical facilities and road transport network to support a conurbation of over 10000 homes in Aylesham/Adisham? While the plan refers to providing infrastructure past experience suggests this does not get built or is delayed e.g. the construction of the B2046/A2 roundabout. B1. Job density in Dover district is low. Where are the job opportunities in Aylesham/Adisham, or will the residents have to make unsustainable and CO2 emitting car journeys to Canterbury and/or Dover? C1. Transport connections. “Additional traffic creating delays on the local network”. An issue which will be exacerbated by the Aylesham development. D1. Land use. “Plan is an opportunity to ensure that agricultural land is not lost or compromised by future growth”. How does this sit with the proposed Aylesham/ Adisham development particularly in light of the growing needs for food self -sufficiency? D4. And D5. Water. “Highlights water quality and quantity issues which need addressing”. Critical in this location given that the Stodmarsh/Stour water quality issues are not yet resolved. E1. “Climate change”. Given that tackling this issue is a priority for both Dover and Canterbury Councils (indeed both have declared a climate crisis) how can this be squared with massive, unsustainable housing developments on green field sites? H1. “Landscape Protection”. The proposed Aylesham/Adisham developments are in attractive countryside which borders the AONB. It is hard to believe that Dover is committed to protecting (quote from the Plan) the “wonderful world class countryside”in its area. The Dover DC V China Gateway Developments fiasco also comes to mind.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	I have tried to use your portal to lodge my comments and OPPOSITION to the above development but your website may have crashed with the number of objections or it simply is not working. I got as far as the SAP24 and it would not take me to the next page to comment.

to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

My objections are as follows:- Aylesham has already been developed to its capacity with huge increases of houses and few or no improvements to infrastructure or facilities. Even those promised by developers have not been completed.

These proposed houses will, if completed, join up to further housing been suggested at Womenswold by Canterbury City Council. This will create a completely unacceptable area of urban sprawl in an AONB. The proposed development is on prime agricultural land - we need the land to produce food. This is a greenfield site in the heart of small rural communities linked by small, narrow unlit lanes and completely unsuitable for more development.

The expanded Doctors surgery at Aylesham is already too small for the expanded Aylesham and the surrounding villages it serves. There is no dentist in Aylesham that can be accessed by residents.

The water infrastructure and pressure is already woefully inadequate to say nothing of the additional sewage problems that a development of this size will cause.

The main access road, B2046 is unlit with no footpath, cycle lane, pavement or even verge and is already congested, with 2 narrow lanes which can hardly accommodate 2 lorries passing each other. There have been numerous accidents where lorries have even been forced off the road.

Further proposed development from Aylesham to Wingham have already been abandoned due to inadequacies of the B2046. The roundabout on the A260 joining with the A2 was built to service the additional houses in Aylesham that have already been built and with more yet to come. It is already congested and with a narrow bridge over the motorway cannot be improved. The access and exit routes to and from the A2 onto the A260 are too short and already backup with local traffic at peak time making them dangerous.

There are no secondary schools in the local area and the primary schools are already at capacity and there are no plans to build new schools so children will add to the roads problem as they will have to be bussed around on buses that currently do not exit so parents will be in cars to get the children to school.

There are already inadequate shops to serve the local community with only a convenience co-op in Aylesham with very small parking area. The surrounding villages have no provision and have to drive to Aylesham or further afield. The Co-op used to be within walking distance for most people in Aylesham but with the expanded housing area this is no longer the case so yet more cars on the road.

Public Transport - Everyone wants a cleaner environment but without increases in public transport and improved local facilities residents will have to use their cars. There are no pavements or safe footpaths or cycle paths from the surrounding villages who have to access facilities in Aylesham where there is already inadequate parking.

There are no rural buses in the surrounding villages and no bus at all on Sundays even in Aylesham.

Housing - many if not most of any new housing will not be sold to local residents but to outsiders looking for cheaper housing and they will still need to commute. Aylesham train station has no disabled facilities to access all platforms, The parking is already full on a daily basis and the edges of Aylesham are so far from the station that it is already to far to walk to for many people. The trains that stop at other stations are infrequent and on a slow route so will not work for any commuters to London so they will still get in their cars to get to Canterbury to connect to fast services.

There is also the risk, as has happened in Canterbury, that the new houses will not even benefit local residents as they may simply be bought up by richer London boroughs to house those on their waiting lists adding to more cost and problems for the local authority.

There are no public leisure facilities in Aylesham - not even a pub or restaurant. The youngsters especially, have no where to go and consequently hang around the streets, especially Market Square and drive noisy off road motor cycles and quad bikes around residential streets for entertainment.

For all these reasons the proposal is inappropriate but most importantly a distinctive rural area in an AONB should not be allowed to become just another urban sprawl. Especially as there is already inadequate provision of facilities and infrastructure for the existing communities.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Unfortunately I have been unable to register my comments on your website. I therefore wish to give my objections as follows : Use of a greenfield site This will create a area of urban sprawl in a greenfield site which is prime agricultural land, which is needed to grow produce. Roads I understand it was originally proposed for a large development of houses to be build alongside the B2046 opposite Adisham but this was refused due to the current traffic on the B2046. The site will be on Spinney Lane, and therefore most properties when leaving Aylesham would join the B2046. As you are no doubt aware the roundabout on the A260 was built be the developers to deal with the huge increase with the current development of Aylesham, as traffic was constantly backed up to Spinney Lane during rush hours This road is totally unsuitable for such an increase in traffic and Womemenswold parish council have had meetings with KCC due to the number of traffic accidents at the junction the the B2046 an Snowdown Road. Snowdown Road has a width restriction and all the minor roads in the area are narrow unlit lanes, totally unsuitable for more development.

	<p>Trains & Buses</p> <p>The trains from Aylesham and Snowdown are the slow hourly trains. Parking at Aylesham, although improved, is usually full in the mornings and Snowdown has no parking & is dangerous in crossing the narrow bridge to the Dover bound trains. The only buses in the area are from Aylesham to Canterbury and there is currently no service on Sundays.</p> <p>Facilities in Aylesham</p> <p>Currently there are several shops around the market square in Aylesham. The small Co-op currently is unable to cope the existing number of houses in the village. There is limited parking in the area. The primary schools are at capacity and there is no secondary school provision in the area. There is one small GP practice which would not cope with the additional houses. There are no public leisure facilities or even a restaurant or pub, meaning that residents will use their cars for any entertainment</p> <p>Water supply and sewage</p> <p>East Kent is already a water stressed area. The sewage system cannot cope at the moment with regular outflows to the sea.</p> <p>For the above reasons, I consider this proposal is totally inappropriate in an rural area in an AONB.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object for the following reasons: 1. The proposed sites are the other side of Spinney road to Aylesham village. Why does Aylesham need to extend beyond where it currently is? 2. Aylesham has recently increased hugely in size and population. Where is the infrastructure to support this? a) The B2046 main route from the A2 or A257 to Aylesham is dangerous and will not be able to support the development as it is. b) There are not enough doctors even if another medical centre were to be built. c) Currently there are no dental practices in Aylesham. The huge population will need their teeth looked after to help maintain general good health. d) There are not enough teachers even if more Schools are built. e) There are not enough nurseries and pre Schools to support the existing local population of pre School Children 3. The proposed sites would destroy good agricultural land. We need to be able to grow our own food. Food security is now becoming a problem in this country. 4. The proposed sites would destroy natural habitat and biodiversity which are very important in combating climate change. 5. Where would all the new inhabitants come from? Is there really a need for all the houses suggested? How many local people have been able to buy and live in the recent Aylesham expansion? From my local knowledge a lot of the properties have been purchased as 'buy to let' and the prices in Aylesham have gone up disproportionately to the village which has traditionally been more affordable. There are a lot of people from London and outside of the area. I cannot blame anyone for wanting to move out of the city but any proposed new houses really ought to be affordable and for local people. 6. Where would all the water come from for all the homes and where is the waste water and sewage infrastructure? Water is becoming a scarce resource and the proposed development would create a far greater demand for water and sewerage. I have no doubt that there will be many more objections and many of them may well be through the official portal but I have looked at the portal and find I cannot easily use it. Therefore I am using a democratic right to communicate by email and trust that my comments will be added to the official site which will list everyones comments</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I am a resident of Womenswold and the expansion of Aylesham will affect the area greatly. I would like to raise the following objections. 1. Aylesham has struggled to absorb the latest development into its community and a further development of this size would destroy the character of a village and the community. 2 There are no references to infrastructure in the plan i) there are very few shops at the moment, the co-op which we use is very busy and would not cope with the extra custom. There is only a mention of a small general shop in the plans ii) There is only one doctors, this is very efficient but could not cope with the extra patients as it is difficult to get appointments at the moment. iii) There is no plan to expand the B2046. This is a narrow road which is very busy with traffic at the moment, It is incredibly difficult to get out at the beacon junction with the Snowdown road at present and people become frustrated causing accidents and near misses. There is only a 60 mile restriction on that road. iv) There are no plans for extra schools and there is no secondary school at present. v) There is a very limited bus service and the trains are only once an hour. 3 The area for development is adjacent to Kent Downs AONB. There is ancient woodland and agricultural land that provides a wonderful habitat for wildlife. 4 The Government are planning that we should be self sufficient in food which will be difficult to achieve if we build over prime agricultural land.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Not justifiable or consistent with National Policy that you take away the Gypsy and Traveller provision, and do not give them a new site. They have lived there 50 years, having been moved from the north of the village in the 60's / 70's. They have never been any trouble, keep themselves to themselves, and deserve their homes. Sites have, and are being set up around the country for permanent sites, which this one is. You can't make a group of longstanding people homeless to build houses on the land to house others. They have family / children / grandchildren etc living in the village, which are part of our community, as they are. Has anyone from the council discussed this with them? It cannot be legal to make an established community homeless.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	If you can remove 500 homes from north Aylesham, you can leave the Gypsy site alone. It is surrounded by trees, can hardly be seen from the road. The new houses could be built around from the outer perimeter of the site. Their way of life and ethos has steadily been eroded over the last 60/70 years, the right to travel taken away, these people have complied and are stationary. Like everyone else they deserve a roof

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	over their head. Many in the village are related to them, to turf them off land they have lived on for over half a century, and having newcomers in, will cause much bad feeling and negativity. To make this situation compliant / sound you would have to allot another section of land as their site, if you insist on moving them, of the same size.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I would like to place on record my objection to the proposed development of "Land to the south of Spinney Lane". Policy reference: SAP 24, and site Reference AYL003b of the DDC draft Local Plan refers. The reason for my objection is: The serious effects that this development, of up to 640 new homes, will have on both Aylesham, the surrounding villages and the rural environment within which it is proposed, would be profound. This development alone would have the following irreversible effects on the area:

1. The loss of around 67 hectares of valuable high grade farming land: With the population growth experienced in the last two decades, this country will need every square inch of high grade farm land to feed our rapidly expanding population. Building on farm land should be avoided. Only after all other less productive parcels of land have been built on should farm land be considered. This farm land could be helping to feed people for centuries to come, but not if it's built on.
2. The disruption to local wild life: Building 640 new homes along with the associated infrastructure will have a seriously detrimental effect on both the native wild life and the flora/fauna. Apart from the irreversible destruction of the natural rural habitat, such effects as: a. increased light pollution at night from this new development, b. increased air pollution through out the day and night from both the homes and the many vehicles, that this development would attract. c. increased noise pollution, I moved my family to nearby Adisham over 38 years ago so that we could live and bring up our family in the country. Some of the highly valued benefits of country living are the peace, quiet and darkness at night. The recent housing developments at Aylesham along with its 24 hour floodlit industrial site has already partially ruined that idyll.
3. The reduction in the quality of life for those already living in Aylesham and it's environs: The increased light, air and noise pollution, mentioned in point 2 above, will also have a detrimental effect on the quality of life for those human residents already living in and around Aylesham. To compound matters, there would also be the effect that such a large number of new residents (1300 plus), would have on local services. As an example, it is already virtually impossible to see a doctor face to face at the Aylesham Medical Centre. Getting an appointment involves telephoning the health centre, even though you are standing in front of the receptionist! Even then, you will likely be offered a telephone appointment in two weeks time! So having, 1300 plus new residents from this development alone, won't improve matters any. Unless serious investment is made in providing better services and facilities, such a development will only serve to reduce the quality of life for all local residents. Unfortunately, it seems that the common denominator with many new housing developments, up and down the country, often seems to be, that existing residents are promised the much needed infrastructure and facilities to support the new development, but they very often don't materialise.
4. The pressure on local water supplies: In this part of Kent our water is drawn from underground aquifers. It is not unusual to have hose pipe bans during the summer months due presumably, to falling levels and dwindling supplies. Which makes me question if this and other large local housing developments across East Kent, will be putting the local water supply under too much pressure? Yes, there is a planned new reservoir in the Canterbury area but that has been planned for the last four decades! Given their recent history, I have no confidence in our local water supplier coming through on that project.
5. The large increase in vehicle movements: At present, Aylesham is a growing community that is surrounded by open rural countryside. Just like Canterbury City Council's new draft local plan, the DDC's DLP mentions the term "garden town principles" or something similar in relation to this development's design. The thrust of which seems to be to enable residents to access everything they need from within the village/town, thereby cutting down vehicle movements and pollution. The emphasis seems to be on encouraging walking and cycling, which is as it should be. However, this is basically a country community and therefore bears little relationship to an urban environment. The reality is that, as is frequently the case these days, most homes will need two incomes to support both their families and their mortgage/rent payments. Since employment within Aylesham will always be fairly limited, they will have to travel for work. Again, the reality is that living in the country actually means that a car or van becomes a necessity and not a luxury. Yes, Aylesham does have both train and bus services but they are unlikely to suit most residents. The trains and buses don't run as often as they do in cities and have limited destinations. Could 640 new homes mean nearly 600 new vehicles to the area? A ratio of 1.5 cars per household would mean nearly 1000 extra vehicles. So, how many extra daily vehicle movements will this development create? And how much air pollution? These extra vehicle movements will substantially add to the daily local congestion on our already busy local roads. It also has to be remembered that this development (SAP24), cannot be looked at in isolation. As well as the other proposed developments within Aylesham and Snowdon, Canterbury City Council's proposed Draft Local Plan - 2045, details proposed developments at neighbouring Womenswold, (420 homes), and another ridiculously large "Garden Town" development at Adisham (3210 homes). Further house building is also proposed in just about every other village in the area. With every one of these developments, people would still need vehicles to get about. If each household in each of the three above mentioned developments has one vehicle, then that would be another 4270 vehicles in the immediate area. At a ratio of 1.5 per household the figure would be circa 6300 extra vehicles! And all in addition to those already attached to the 700 new homes recently built in Dorman Avenue North.
6. The long term merger of several local village communities: Whether by design or accident, when this proposed development, along with several other Aylesham situated draft planning proposals, are looked at in conjunction with the neighbouring Canterbury City Council's Draft Local Plan for 2045, the effect, will be to engulf several separate, close knit communities into one vast misplaced, urban sprawl. In doing so, those communities will lose both their identity and their geographic independence. In the case of Womenswold and Adisham they are ancient villages with history going back centuries. Adisham was even mentioned in the Dooms Day book. Aylesham is barely a hundred years old and has both a separate character and origin. This proposed Spinney lane development will fill in yet another gap on the way to turning the area into one huge sprawling housing estate. I can only speak for myself, but it saddens me that there is far too much proposed development, way more, its seems than anywhere else, and all concentrated in this immediate area, which will cause untold harm to our glorious rural environment

	and ruin current residents' quality of life. I do understand that new homes are needed but do we really need to swamp one location, more than any other in East Kent, with so many so quickly?
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Comments on the Regulation 19 Submission Local Plan</p> <p>A considered approach to the Natural environment has been adequately presented in DM Policy 39 but there is a lack of research and presentation of the current role of the farmland, looking at rural employment food production, and current carbon capture. Farmland forms the greater part of the district's green areas although a photo of arable fields is used to introduce the section there has been no analysis of the impact on the local farming industry if farmland is continued to be developed.</p> <p>Although the district has below-average rainfall and water resources the rainwater is badly managed around Aylesham.</p>

	<p>The B2046 is a dangerous road with a high number of accidents, Dover district has above-average accident rates. https://www.crashmap.co.uk/Search shows a high number of accidents on the B2046, particularly at the Spinney Lane junction with numerous fatalities and serious injuries recorded along the length of the road. The B2046 is in poor condition with vehicles frequently leaving the road and ending up in our hedgerows and fields. The road surface is folding into ruts increasing its camber to the Canterbury side under the current impact, particularly on the stretch between Aylesham and Adisham junctions.</p> <p>Dover district has below-average job opportunities, we have seen London boroughs buying up batches of the new builds in Aylesham. London currently has over 87,000 empty houses. There are shortages of appointments for doctors dentists, vets and secondary school places. There is a lack of adequate buses and the local shops run low on some food daily. In Aylesham to date, 785 units have been delivered with 575 remaining.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 2 - Do you consider this part of the Plan sound?	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This land has had some work on pipes for the sewage system. It is not effective for the current number of houses as there is a regular sewage stench coming from the corner in your development plan for more housing.</p> <p>There are no places for any children who would move in to this development locally in primary schools. There will be no transport by the time this is built for children to be able to go to secondary schools . None of this housing will be financially achievable by local people or their extended families. The prospective buyers for these homes can only be the cash rich or business purchasers who can avoid many taxes to create income from rents that are unaffordable to local people. There is no infrastructure proposed for this section of the New Dormitory Town encompassing and extending both Aylesham and Adisham. No supermarket, no youth centre, no police, no doctors, no dentist, no focal point where communities can meet. No accomodation whatsoever for safeguarding the community. The ability of the land to absorb heavy rainfall is compromised, the ability of the land to absorb CO2 emmissions is compromised, the ability of the land to grow food for our local people is removed entirely. We are in a cost of living and coming into an availability of purchasing food for our whole population crisis.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Upgrade the housing stock you have and that housing association has to be of a decent human habitable standard. You have a lot of homes that are damp and mouldy, your relevant departments do not respond adequately nor timely to emergencies such as boiler breakdowns or water leaking through houses. You could just as easily as another authority, have been sued for harm to babies from mould and damp as another local authority was. Build on brownfield sites. build to a good sustainable standard ie passive solar heating, heat pumps etc so that the tenants of the landlords the houses are sold to are warm without draughts and with a low carbon cost to heat. Properly update the water and sewage systems to cope with the massive extra load on systems that are failing with the current load. Put in protections so that our rivers and our seas are no longer discharging fecal matter into our local rivers and the channel where so many like to swim. build a school for our teenagers so poor families don't have to struggle to pay £450 for each child each year for the privelege of going to a secular state school, then being terrified that your children can't get transport to the school anyway. Your planning has a role in the educational and health comprehensive failure for SEND children and along with them secondary school children in your villages, but all this (8k in total) extra housing without any of the vital infrastructure, will make this place like a ghetto.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I consider that this would be a reasonable adjustment to make the consultation process accessible

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Road infrastructure will not sustain the extra housing in the area. B2046 already had a fatality in 2022, and several big accidents where it is joined by Spinney Lane, Dorman Avenue North, and the Industrial Estate. B2046 regularly closed at Wingham end causing tailbacks with queues of traffic polluting the atmosphere. Diversions through country lanes happen several times a year and cause damage to local flora and fauna on the one track country lanes leading to local towns.</p> <p>B2046 already being used by heavier lorries which are causing crumbling to the verges.</p> <p>There is no secondary school in the area so children have to travel to Dover, Sandwich and Canterbury. Bus services have recently been curtailed resulting in overcrowding, and young vulnerable children being left stranded waiting an hour or more for the next bus, or having to be collected when parents finish work.</p> <p>Train services are sporadic and the current amount of secondary school age children in the area cannot be allocated local school places.</p> <p>Sewerage, gas, broadband are nearing capacity, with regular broadband outages and lack of any FFTP in the area with the current number of houses.</p> <p>Dorman Avenue building work is still not complete, and within that plan there was provision for extra shops. Current shops are high cost and low volume, thus travel 10-15 miles to nearest superstore means more vehicles on inadequate roads.</p> <p>Local doctor's surgeries are also at capacity and many wait weeks for appointments. The local hospitals have been at bed capacity for months, with people waiting in A&E for beds overnight, sometimes for 48 hours before being treated, or going for surgery.</p> <p>The Ukraine war has shown that greenfield areas are much needed for crops so that the UK can be self-sufficient rather than relying on imports. Many local farmers have increased crop harvesting already.</p> <p>The Covid-19 pandemic has resulted in increased mental health issues, and the spread of the virus has been shown to increase in more densely housed areas, where there are limited garden spaces to breathe fresh air and exercise. Along with limited parking causing problems in the recent estates at Dorman Avenue, and assuming an extra minimum of 1 car per household the increase of cars especially at peak times on the B2046 will cause more accidents and hold ups.</p> <p>For those travelling to Sandwich or Thanet, the A257 is inadequate in terms of the junctions leading onto it. Already fatalities and severe accidents involving the use of air ambulances this year deem this road unsuitable for the current traffic levels. The Sandwich area developments will cause more disruption on these junctions, and the increase to delays on this road will cause more traffic pollution.</p> <p>The new Canterbury City Council plan has not been discussed with DDC and thus contravenes the Duty To Co-operate with both councils. Together with 640 houses in Aylesham, 3200 in the adjoining Cooting Farm Town, and another 500-800 also in close proximity, the infrastructure and the amenities cannot cope with these plans.</p> <p>The Government has recently abolished the 300,000 new homes for the next year and that was the figure on which this plan was based</p>

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Government has ust rescinded the 300,000 hew housing level, and the levels in these plans need to be modified, meaning an urgent review of this plan should be commenced.</p> <p>Lack of consultation with CCC on their forthcoming plan including Cooting Farm Town which abutts the B2046 shows failure in Duty to Co-operate with neighbouring areas, and thus this plan should be put on hold with both councils meeting to discuss both plans and redesign a way forward that benefits both councils. The area cannot sustain either at present and with no discussionsl both plans have been launched at similar times withour knowledge.</p> <p>Highways involvement in terms of upgrading the B2046, straigtening the blind bends, isntalling roundabouts at dangerous junctions, plus the dualling of the A257 before the Sandwich housing areas are finalised, must take place. Both roads have had fatalities this year, and with a doubling of housing in the surrounding area, the road state must be revisited.</p> <p>Local fauna relies on corridors away from businesses and housing and these have already been narrowed by previous recent housing in Dorman Avenue. Rare red kites, bats, and more nest and live in the area and these must be preserved, not eradicated by housing.</p> <p>A secondary school is required in the area, travel to and from other schools with inadequate/extortionate price bus and train services has to be revisited before considering the increase in housing.</p> <p>Local shops need to be varied and increased before any more housing. With only one Post Office in five local villages, the post office in Aylesham is already over-used and other village ameneties and infrastructure must be revisited.</p> <p>FFTP broadband is essential now with over-use and will be impossible with new housing levels, The Government agrees to supply broadband to low income households, instead this will get worse.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Due to the governments announcement 5/12/22 the plan is not positively prepared as the development needs must be reassessed. This means it is no longer justified as there now is the room without central government pressure to find reasonable alternatives. It is also not effective as the pressure put on local communities and existing infrastructure is unreasonable and means that it is not deliverable. The plan is also not consistent with NPPF 2021 as the many landscape and heritage assets in Dover District are being compromised by the level of unsustainable overdevelopment which the current plan has allowed.</p> <p>The Housing Growth statement that the aim is to , "provide a greater choice of high-quality housing to meet the needs of Dover districts's growing population and changing demographic and address affordability issues", does not seem internally consistent with the details provided in the plan which underestimates the evidence showing a large part of district population growth is due to aging. The details thus render SP 3 and SP 5 less effective and less sound.</p>

Under the current LDP developers have shied away from the badly needed regeneration of Dover and concentrated on building maximum profit, minimum affordability developments of large homes around the more desirable town of Deal and out in Whitfield. The supposed regeneration of Dover has resulted in another generic shopping centre and a more depressed high street and has not lifted the rest of Dover. The promenade area is uplifted but there seems to be little connectivity to the rest of Dover.

The government department (DLUHC) decision that Dover needs 611 new dwellings a year and a minimum of 10,998 new homes between now and 2040 we find very incompatible with legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008, and unsound. We should be transforming existing housing stock into zero carbon homes as is happening in East Sussex, led by Lewes DC. Combining these numbers with 3.51 and the statement '76.7% of the new homes are on greenfield sites, while 23.3% are on brownfield sites' is unsound and unacceptable to the public.

We feel that our communities are being harvested by developers and our worries are not being heard or needs met in terms of infrastructure. Thanks to certain national newspaper Sunday supplements, Deal is desired as a 2nd home location by the wealthy from London and elsewhere. Holiday homes which spend most of the year empty in Deal, Dover and coastal villages of Kingsdown and St Margarets are stopping locals from buying affordable homes in their own area from existing housing stock.

It must also be pointed out that at least one of the sites included in the 23.3% of brownfield sites is actually a site intended by SEEDA as local nature reserve having rewilded on unstable slag (only rendered stable by tree-planting, a site which DDC forgot to make a local nature reserve in 2004, and it has become a biodiversity hotspot well known to genuine ecologists nationally; Betteshanger Park.

Central government in London, according to Housing Today is imposing a disproportionate amount of housing growth on Kent and the SE.

There is a grievous lack of democratic accountability across Kent. So the chances of protecting Kent, of achieving a Growth Strategy that creates climate-friendly jobs and suitably sized, suitably-priced zero-carbon homes for the next generation of local families, are not good. The space available for infrastructure, functions well for compact coastal towns of the size that Deal / Walmer and Sandwich were 5 years ago.

The level of greenfield overdevelopment which has been disastrous under the current weak LDP is putting Deal infrastructure under strain now, so in-fill should make up the majority of the allocations for Deal and that the housing growth specified for District Centre of Deal and around its boundaries needs to be stopped or radically reduced. Either or both of SAP 15 / SAP 34 would destroy the only road access alternative for diverted traffic. (See detailed comments under SAP 15/ SAP 34 below). Housing Growth that threatens gridlock, blocking off a conurbation of 30,000 from access by emergency vehicles, commuters, school buses is not sustainable housing growth and is very unsound.

3.29 I note and welcome a degree of shift from the Reg 18 draft, in that more sites have been selected with a view to using 'existing infrastructure, facilities and services, with a greater professed purpose to ensure development contributes to the sustainability of local communities and services'.

I note with appreciation both the increase in the number of sites in Dover town SAP 6 – SAP 13, and the SAP 26 Former Snowdown Colliery, Aylesham near a rail station for example. It should be possible to state a determination to 'make best use of brownfield – non-rewilded – land) without giving developers the opt-out qualification 'wherever possible'.

On Five Year Housing Land Supply. 3.39 Having stated the Council had 6.03 years land supply plus a 5% buffer; it is not sound, effective or legally compliant to then state 'the provision of additional sites within the first 5 years of plan period is needed to ensure resilience and promote flexibility;!' Instead of ensuring resilience, it will create exactly the

destructive suburbanisation of a rural district that many, many of the resident electorate are most worried about.

3.46 It is the conspicuous lack of a secondary school in Aylesham that prevents Aylesham becoming the small garden town planners aspire to. The provision of a secondary school by 2028 should be a condition of SAP 23. There seems to be a complete lack of planning in the statement that now

3.48 Many, many of the current residents of ex mining village Elvington were / are dependent on buses that have recently (2022) been cut, (following KCC cut to bus subsidies) to get to work in Canterbury, Folkestone, Sandwich, Thanet or Dover, or to get to secondary school, or to get to doctors, or to shop. These people had environmentally sustainable public transport service that has been cut. KCC is saying it is looking at potential bankruptcy in 2023, so promises of new services and facilities are met with some disbelief. The selection of this site is ONLY sound with cast-iron conditions to provide all of the services we mention below, including new drainage infrastructure. Council housing in Elvington has been subject to flooding from the sewage system, long overdue for replacement. As in Dover deprived wards, there are unhealthy EPC EFG homes in Elvington that need to be transformed into zero carbon home to lift residents out of fuel and therefore food poverty.

3.68 Windfall. Unless existing settlement boundaries are respected, there is suburban ribbon development creep from field to field to field. To render the plan sound it should contain a statement 'Previously existing settlement boundaries will be respected, until such time as town and parish councils may have agreed changes with Dover District Council, in accordance with the principles of Localism Act 2011.' In the current economic climate, it seems very naïve to hope that 'new housing in villages can help them retain existing services such as public transport, retail (many pubs are going under because lack of staff and sky high energy bills) and schools'. Indeed we have lost a large proportion of our bus services in the district.

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Push back to central government and demand a reduction in the housing allocation of 10,998 new homes. Now possible after announcements 5/12/22 from Prime Minister.</p> <p>Regenerate Dover as a priority, retrofitting existing housing stock to provide well insulated renewable energy powered homes. Windfall development only should be allowed in Deal, Sandwich and surrounding villages. Create a self sufficient sustainable garden village at Aylesham with secondary school and green infrastructure and homes far beyond future homes standard.</p> <p>Provide better facilities and transport links for Whitfield to ensure that homeowners are not car dependent.</p> <p>Lobby central government for changes to the rules for ownership of second homes. Priority should be given to locals.</p> <p>Make the wording in the plan stronger in favour of brownfield sites eg 3.32 <i>sufficient amount and variety of land</i> should also state that brownfield must be used before greenfield as per stated in NPPF 21.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Road infrastructure will not sustain the extra housing in the area. B2046 already had a fatality in 2022, and several big accidents where it is joined by Spinney Lane, Dorman Avenue North, and the Industrial Estate. B2046 regularly closed at Wingham end causing tailbacks with queues of traffic polluting the atmosphere. Diversions through country lanes happen several times a year and cause damage to local flora and fauna on the one track country lanes leading to local towns.</p> <p>B2046 already being used by heavier lorries which are causing crumbling to the verges.</p> <p>There is no secondary school in the area so children have to travel to Dover, Sandwich and Canterbury. Bus services have recently been curtailed resulting in overcrowding, and young vulnerable children being left stranded waiting an hour or more for the next bus, or having to be collected when parents finish work.</p> <p>Train services are sporadic and the current amount of secondary school age children in the area cannot be allocated local school places.</p> <p>Sewerage, gas, broadband are nearing capacity, with regular broadband outages and lack of any FFTP in the area with the current number of houses.</p> <p>Dorman Avenue building work is still not complete, and within that plan there was provision for extra shops. Current shops are high cost and low volume, thus travel 10-15 miles to nearest superstore means more vehicles on inadequate roads.</p> <p>Local doctor's surgeries are also at capacity and many wait weeks for appointments. The local hospitals have been at bed capacity for months, with people waiting in A&E for beds overnight, sometimes for 48 hours before being treated, or going for surgery.</p> <p>The Ukraine war has shown that greenfield areas are much needed for crops so that the UK can be self-sufficient rather than relying on imports. Many local farmers have increased crop harvesting already.</p> <p>The Covid-19 pandemic has resulted in increased mental health issues, and the spread of the virus has been shown to increase in more densely housed areas, where there are limited garden spaces to breathe fresh air and exercise. Along with limited parking causing problems in the recent estates at Dorman Avenue, and assuming an extra minimum of 1 car per household the increase of cars especially at peak times on the B2046 will cause more accidents and hold ups.</p> <p>For those travelling to Sandwich or Thanet, the A257 is inadequate in terms of the junctions leading onto it. Already fatalities and severe accidents involving the use of air ambulances this year deem this road unsuitable for the current traffic levels. The Sandwich area developments will cause more disruption on these junctions, and the increase to delays on this road will cause more traffic pollution.</p> <p>The new Canterbury City Council plan has not been discussed with DDC and thus contravenes the Duty To Co-operate with both councils.</p> <p>Together with 640 houses in Aylesham, 3200 in the adjoining Cooting Farm Town, and another 500-800 also in close proximity, the infrastructure and the amenities cannot cope with these plans.</p> <p>The Government has recently abolished the 300,000 new homes for the next year and that was the figure on which this plan was based</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Government has just rescinded the 300,000 new housing level, and the levels in these plans need to be modified, meaning an urgent review of this plan should be commenced.</p> <p>Lack of consultation with CCC on their forthcoming plan including Cooting Farm Town which abuts the B2046 shows failure in Duty to Co-operate with neighbouring areas, and thus this plan should be put on hold with both councils meeting to discuss both plans and redesign a way forward that benefits both councils. The area cannot sustain either at present and with no discussions both plans have been launched at similar times without knowledge.</p> <p>Highways involvement in terms of upgrading the B2046, straightening the blind bends, installing roundabouts at dangerous junctions, plus the dualing of the A257 before the Sandwich housing areas are finalised, must take place. Both roads have had fatalities this year, and with a doubling of housing in the surrounding area, the road state must be revisited.</p> <p>Local fauna relies on corridors away from businesses and housing and these have already been narrowed by previous recent housing in Dorman Avenue. Rare red kites, bats, and more nest and live in the area and these must be preserved, not eradicated by housing.</p> <p>A secondary school is required in the area, travel to and from other schools with inadequate/exorbitant price bus and train services has to be revisited before considering the increase in housing.</p> <p>Local shops need to be varied and increased before any more housing. With only one Post Office in five local villages, the post office in Aylesham is already over-used and other village amenities and infrastructure must be revisited.</p> <p>FFTP broadband is essential now with over-use and will be impossible with new housing levels, The Government agrees to supply broadband to low income households, instead this will get worse.</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Policy SAP26 - Former Snowdown Colliery, Aylesham
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The plan, in respect of Policy SAP26, does not identify the whole of the Snowdown Colliery site, which is a brownfield site, for future re-development. This is not consistent with national policy which seeks to regenerate and bring forward brownfield sites and fails to take positive steps to support the Council's aspirations for sustainable development by including the whole of the site.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will	The Coal Authority welcomes this opportunity to comment on the Regulation 19 consultation for the New Dover District Local Plan, to which this representation relates. We are pleased to see that our previous representation in respect of the dichotomy between the Districts' Economic Growth Strategy (Consultation Draft, January 2021) and the Local Plan, specifically with regard to the prospects for rural economic development and redevelopment of the Snowdown Colliery site has been addressed, in part. We welcome the inclusion of Policy SAP26 – Former Snowdown Colliery, Aylesham, which allocates the majority of the former site for employment development in order to facilitate the re-use of the site. We are also pleased to see that the allocation notes that acceptable uses on this site will include Class E, to include offices, research and development or industrial processes (E g) (i), (ii) and (iii), B2 and B8 uses as well as some leisure, retail, food and drink, non-residential and tourism uses.

make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The allocation of this substantial brownfield site should make a significant and positive contribution to the aspirations and objectives of the Local Plan.

We are however disappointed to note that the whole of the site to which our previous representation related has not been included in the site allocation. Inclusion of the whole site, including the former bath house site on the northern side of Holt Street (which is actually mentioned specifically in the introductory text), would ensure that this brownfield site as a whole contributes to a sustainable mix of new uses. We consider that this northern part of the site provides an opportunity to support re-use of a brownfield site for housing led development which would contribute towards local housing provision aligned with the identification of Aylesham as a strategic housing growth location in the draft Local Plan. We are therefore seeking the inclusion of the colliery site to the north of Holt Street in the SAP26 site allocation, as shown edged in red on the attached plan, and for further flexibility in the uses allowed on site to enable appropriate housing development to come forward.

As this northern part of the wider Snowdown Colliery site has been omitted from the SPA26 allocation the Coal Authority is concerned that as currently drafted, the broader policies within the plan would act to limit the prospects for this brownfield site's redevelopment. We are therefore seeking suitable alterations to the draft Local Plan to ensure that its policy content in respect of the Snowdown Colliery site is fully aligned with other relevant strategies and the brownfield first agenda. The allocation of the whole site, including the northern part of the site, would be appropriate given that redevelopment of the Snowdown Colliery site is a target activity of the council's Economic Growth Strategy.

In the case of brownfield sites like Snowdown Colliery, the allocation policy needs to be sufficiently flexible to facilitate and encourage the redevelopment of these sites, which should include an element of housing, while recognising that any new use needs to be sensitive to the character and appearance of the site's context and proportionate to its location. As drafted Policy SAP26 not only excludes part of the brownfield colliery site but it is also restrictive and prevents forms of development that may be required to support the wider regeneration of this substantial site. If the northern part of the former colliery site is excluded from the allocation, as now, then the draft policies are too restrictive and would not facilitate the future redevelopment of the northern part of the site. In this case it could be considered that the policies are in conflict with paragraph 81 (d) of the National Planning Policy Framework:

"81. Planning Policies should:

1 d) be flexible enough to accommodate needs not anticipated in the plan..."

The allocation and redevelopment of the Snowdown Colliery site provides major opportunities for the rural economy, promoting diversification, sustainable development and economic growth. It will facilitate the development of a new workspace hub which will complement the district's settlement hierarchy and specifically the Local Plan's identification of Aylesham as a location for strategic housing growth (a total of 1140 houses during the plan period). A mixed-use scheme at the site would be sustainable, resilient and embrace innovation in the district while also having the potential to support the Growth Strategy for Tourism. The site provides an opportunity to fulfil the aspirations of the Local Plan and the Coal Authority requests that Policy SAP26 and the allocation boundary are amended to include the land to the north of Holt Street and to provide flexibility for an element of housing to come forward as part of the wider redevelopment of the Snowdown Colliery site during the plan period.

We note the Council's ambition to utilise previously developed land where possible to meet housing delivery targets. We also acknowledge the Council's aspiration to support and sustain rural communities and local services. The Snowdown Colliery site constitutes previously developed land and lies approximately 1 mile from Aylesham. Having reviewed the Council's settlement hierarchy it is noted that Snowdown is not included within the "smaller villages and hamlets" settlement type, where windfall development will be acceptable. However, there are occasions where brownfield sites within the countryside, outside of the defined areas, should be supported for redevelopment in order to assist in regenerating vacant and/or derelict areas; the Snowdown Colliery site is one of these areas.

Policies within the Local Plan should facilitate and support opportunities for small scale mixed-use schemes outside of defined settlements, including a limited element of housing where this will support the objectives of sustainable development and make an important contribution to housing supply. In this case redevelopment of the Snowdown Colliery site as a whole, including an element of housing provision, will assist in supporting the vitality and viability of nearby settlements. Given the close proximity of the Snowdown Colliery site to Aylesham, the provision of an element of housing within the redevelopment of the site will support both the identified housing growth strategy and the services and facilities available within this rural centre. It would also reduce pressure for the development of greenfield sites, in accordance with national planning policy.

	<p>Allocating the whole of the Snowdown Colliery site, to include an element of housing provision as part of an employment led development would assist in the viability of the site's redevelopment, which contains a range of built heritage assets including two Listed buildings. However, that will require significant investment to facilitate their reuse and conservation.</p> <p>This representation is not seeking a specific housing allocation, but rather inclusion of the whole brownfield site within the SAP26 allocation and flexibility within the policy wording to allow for a limited amount of housing development to come forward as part of the wider redevelopment of Snowdown Colliery. The Coal Authority considers that the northernmost part of the Snowdown Colliery site, the location of the former colliery bath house which is omitted for the current draft allocation, to the north of Holt Street, could facilitate a logical extension to the existing adjacent housing in Snowdown.</p> <p>We respectfully request that renewed consideration is given to:</p> <ol style="list-style-type: none"> 1 The allocation of the Snowdown Colliery site (Policy SAP26) to include the former colliery land to the north of Holt Street as shown edged red on the attached plan, and 1 For the wording of the policy to be amended to be more flexible to allow for a variety of uses included a limited amount of housing led regeneration on this part of the site.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	In order to have an opportunity to discuss our representation, and to answer any questions raised by the Council or the Inspector, in respect of the inclusion of the whole of the Snowdown Colliery site in the SAP26 allocation and further flexibility in the policy wording to allow for a limited amount of housing led regeneration.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP26
2 - Do you consider this part of the Plan sound?	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SAP26 Snowdon Colliery</p> <p>This is a brownfield site like the Betteshanger Colliery sites and like Betteshanger it has been rewilding for decades. Has its biodiversity value been established? Have comprehensive ecological surveys been carried out recently on the whole site? Or is it assumed that whatever the site supports the effects of any development can be mitigated?</p> <p>It would be a tragedy if yet another site of high importance for its biodiversity value was lost to development.</p> <p>The NPPF says allocate sites that have the least harmful effect on the environment. Snowdon Colliery site may qualify as a Local Nature reserve of a SSSI. Thuis should be established before it is allocated for development.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I would like to see this Policy prefaced by the following: a full ecological survey of the site will be carried out to establish the sites full biodiversity value and whether it would qualify for a conservation designation.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Comments</p> <p>I would like to object to the Dover District Council Local Plan SAP24 Aylesham on the basis that it is not "Sound".</p> <p>The Local Plan has made a considerable number of statements. SP3 Page 36 for instance regarding Aylesham states that <i>Developments will be at a more limited scale, compatible with the more limited job opportunities, shops and services.</i> It goes on to say that <i>- Development which results in disproportionate growth to any of the Districts settlements which cannot be supported by the necessary infrastructure and or services or which would result in a loss of services and facilities which are considered to be key to supporting local communities will be resisted.</i></p> <p>Yet looking at the Local Plan for the area where I live it is proposed to increase the size of the village of Aylesham with proposal to build a further 650 house in addition to the 1340 already approved. This is disproportionate growth for Aylesham and cannot be supported by the infrastructure yet Dover District Council is doing the opposite of resisting this development.</p> <p>Dover District Council states that it is the policy to provide sustainable employment in the area where people live in order to minimise travel. In the plans the area of Snowdown Colliery is given as a potential site for employment of up to 500 people. It is stated Dover District Council intend to "Work with local partners to enable and explore all opportunities for the redevelopment of the vacant Snowdown Colliery site. Ideas include the potential delivery of Snowdown Park to create an environmentally-friendly hub for start-up businesses and artisan producers, as well as an international centre for research and development into the health and welfare of the honey bee".</p> <p>In fact this site is private property in private ownership, whose owner who has only one tenant - the British Coal Board. It is not a "vacant site".</p> <p>It is not owned by Dover District Council.</p> <p>We have been informed there are no plans by the owner to change the tenant so there is no evidence that Dover District Council can claim this is a "vacant site". There are no plans for any employment opportunities on this site, and no financial backing for development of employment. The plans for an International centre for research into bee health seems to have been an aspiration rather than a commitment to a tangible reality. The current owner has no plans to change the tenant. If this situation were to change, and it is not expected to do so in the foreseeable future, there are also the potential downsides to developing a former coal mine which will present considerable challenges due to the continued presence of existing underground mine workings and Grade 2 listed buildings.</p> <p>For any developer this will add considerably to the cost of any redevelopment. For any potential business owner, in addition to the higher cost of rental space as the developer seeks to maximise their profits, the cost of running a business in a rural location will be heavily impacted by transport costs which will add to the carbon footprint of the business.</p>

Therefore the inclusion of Snowdown Colliery in the list of potential areas for employment is an attempt to conflate the number of employment opportunity sites and job numbers rather than a true picture of what is available or will be available in the future. It is not a true picture of employment opportunities available in the Aylesham area at present or in the future.

The consequences of the additional housing proposed at Aylesham will be the unofficial formation of a mini town at Aylesham village, without any consideration for increased infrastructure or facilities. The in progress and planned housing will potentially grow the population from 5,000 in 2018 to 25,000 by 2030. The current expanding population has already stretched the existing infrastructure beyond what can be sustained.

The current medical centre is already working at maximum capacity and yet there does not appear to be any provision to increase capacity for medical care.

There is a lack of provision of nursery places and amenities for young people. Cultural amenities are also lacking. Despite the large number of houses already built and sold by the developers, the people of Aylesham have not seen significant enhancement of the amenities, services, retail or entertainment opportunities.

There is no secondary school in Aylesham with the result that there will be increased traffic on roads to Canterbury, Sandwich, Ramsgate, Deal and Dover with children being taken to school by car. Kent County Council has already announced it is cutting funding for almost all of its bus services and this will impact public and school bus services. In consequence more journeys will be by car. Dover District Council's stated aim is to *build houses where the need for travel for employment and education are reduced*. The plan does not meet this stated aim.

The Garden Village design model includes the statement "*should be designed to provide affordable homes close to employment*". The number of houses proposed vastly exceeds the realistic potential for increase in employment in Aylesham.

The NPPF SECTION 9 paragraph 106 states Planning policies should

a) support an appropriate mix of uses across an area, and within larger scale sites, to minimise the number and length of journeys needed for employment, shopping, leisure, education and other activities;

So how does Dover District Council show the proportionate evidence of where the extra 20,000 people in Aylesham will work and how they will travel to this work or where their children will be educated, where they will shop and where they will participate in leisure activities. No evidence has been produced on scenarios for potential travel routes and the numbers likely to be travelling by different modes and routes. We may speculate that some may choose to travel by train. It should be noted that there is only one accessible platform at Aylesham rail station. The platform for any return journeys from Canterbury or onward travel to Dover is inaccessible for anyone unable to climb the stairs. However the vast majority will most probably choose to travel by car daily to and from Canterbury, Dover, Ramsgate, Deal or Sandwich with additional journeys to collect school children where the bus service does not exist or is not funded. The report by Sustrans on the cycling and walking opportunities for Aylesham, whilst welcomed, does not reflect the reality of most peoples daily lives, where the speed of travel to and from work, and the safety of their children's journey to and from school takes priority. On the small country roads in this area of Kent, cyclists contend with blind corners and speeding car motorists for most of their journeys, not to mention the small army of delivery drivers and tradesmens vans aiming to meet their latest deadline and of necessity travelling as fast as possible. How does this Local Plan meet the Dover District Council stated aim that *new developments should reduce the dominance of cars*? The answer is that it does not meet the aim.

In the plans we see no evidence that the Dover District Council has assessed the impact of the additional housing on our area with regard to the increase in traffic from Aylesham due to the lack of employment and secondary education in Aylesham. We see no evidence that there is any proposed increase in infrastructure and support services such as schools, hospitals and doctors surgeries to meet the requirements of an additional 20,000 people. We see no evidence that the Dover District Council Local Plan will address the lack of facilities, infrastructure and amenities in Aylesham for the current residents and the 20,000 new residents

In addition to the houses proposed at Aylesham there are also proposals by Canterbury City Council to allow the building of 420 houses on land near Womenswold, south of Aylesham. This development would adjoin the proposed extra 650 houses proposed by Dover District Council. The plan does not seem to meet the requirement for co-operation with other authorities if you consider the extent of the housing proposed by Canterbury City Council right up to their boundary with 3200 houses between Adisham and Aylesham. This is a total of 3620

	<p>houses proposed by Canterbury City Council almost adjacent to the Dover District Council's proposed and existing new developments for Aylesham. Where is the co-operation between these councils concerning the area on the boundary of Canterbury City Council and Dover District Council at Aylesham. There is no evidence in the local plan that Dover District Council has taken account of the impact of Canterbury City Council's Local plan, on the existing communities in this area. Their plans seem to overlap but the Local Plans do not include sufficient information on how they will work together effectively to mitigate the massive impact of the combined numbers of additional houses in such a rural area.</p> <p>This is not a plan that will meet the requirements for sustainability and the social, economic and environmental costs of this unsustainable plan will fall predominantly on the residents of Aylesham and the surrounding villages.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Aylesham North (500 homes) has now been removed from the Draft Local Plan. Aylesham Parish Council welcomes this decision.</p> <p>In the south, site AYL003 runs from Spinney Lane (with Aylesham Road to the East and Ackholt Wood to the West) all the way to housing in the village of Snowdown. This site has a proposed development of 640 homes. The site map has been amended (as per SA[1]) to properly reflect land ownership and remove a private property from the proposed area.</p> <p>This relates to SAP24 South Aylesham.</p> <p>In addition, there is 1 smaller site (AYL001 policy SAP27) located on land on Dorman Avenue North. Initially this land was due to be windfall housing but is now allocated for 9 houses.</p> <p>Aylesham Parish Council opposes the uses of AYL001 for the development of 9 houses as this would result in the loss of registered native woodland.</p> <p>Aylesham Parish Council believes this level of development is over-bearing on the village and risks altering the character of the community. This is far beyond the original master-plan.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan is not sound as it does not address the flooding that currently occurs at the junction of Dorman Avenue North, with moderate rainfall. The already completed housing development has increased the frequency of surface flooding in the area and the promised upgrade to the drainage system has not happened, currently, there are no plans from Southern Water to improve the situation.</p> <p>The area identified for development consists of woodland that helps to control the surface water runoff, if this is removed then, as a direct result, more flooding will occur.</p> <p>This woodland contains a number of Ancient and Veteran trees (as identified by the Woodland Trust, Tree I.D. 216747, 217804, 217808, 217809) https://ati.woodlandtrust.org.uk/tree-search/tree?treeid=217809&from=3523&v=2189965&ml=map&z=18&nwLat=51.22840516018046&nwLng=1.1970068468518935&seLat=51.22665829532552&seLng=1.1990989698835097#/</p> <p>According to the 'Keepers of time: Ancient and native woodland and trees policy in England' (May 2022) Protection of the resource.</p> <p>1.2 Requires local planning authorities to consult with the secretary of state for Leveling up, Housing and Communities before granting planning permission for developments affecting ancient woodland.</p> <p>1.3 Consult on the protections for long-established woodlands in the planning system, recognising their high ecological and societal value.</p> <p>1.5 Update the ancient woodland inventory to cover the whole of England, 'this will include smaller ancient woodland sites of less than 0.25 hectares'</p> <p>Additional photos relating to the trees have been forwarded to localplan@dover.co.uk</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)	

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>No</p>

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	This section of Dover local plan is in collaboration with Canterbury local plan building circa 8k new houses linkinking and encompassing both Aylesham and Adisham. .There are no places for any children who would move in to this development locally in primary schools. There will be no transport by the time this is built for children to be able to go to secondary schools . None of this housing will be financially achievable by local people or their extended families. The prospective buyers for these homes can only be the cash rich or business purchasers who can avoid many taxes to create income from rents that are unaffordable to local people. There is no infrastructure proposed for this section of the New Dormitory Town encompassing and extending both Aylesham and Adisham. No supermarket, no youth centre, no police,no focal point where communities can meet. No accomodation whatsoever for safeguarding the community. The ability of the land to absorb heavy rainfall is compromised, the ability of the land to absorb CO2 emmissions is compromised, the ability of the land to grow food for our local people is removed entirely. We are in a cost of living and coming into an availability of purchasing food for our whole population crisis.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Upgrade the housing stock you have and that housing association has to be of a decent human habitable standard. You have a lot of homes that are damp and mouldy, your relevant departments do not respond adequately nor timely to emergencies such as boiler breakdowns or water leaking through houses. You could just as easily as another authority, have been sued for harm to babies from mould and damp as another local authority was. Build on brownfield sites. build to a good sustainable standard ie passive solar heating, heat pumps etc so that the tenants of the landlords the houses are sold to are warm without draughts and with a low carbon cost to heat. Properly update the water and sewage systems to cope with the massive extra load on systems that are failing with the current load. Put in protections so that our rivers and our seas are no longer discharging fecal matter into our local rivers and the channel where so many like to swim. build a school for our teenagers so poor families don't have to struggle to pay £450 for each child each year for the privelege of going to a secular state school, then being terrified that your children can't get transport to the school anyway. Your planning has a role in the educational and health comprehensive failure for SEND children and along with them secondary school children in your villages, but all this (8k in total) extra housing without any of the vital infrastructure,will make this place like a ghetto.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	In order for the process to be accessible I would like this as a reasonable adjustment

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Road infrastructure will not sustain the extra housing in the area. B2046 already had a fatality in 2022, and several big accidents where it is joined by Spinney Lane, Dorman Avenue North, and the Industrial Estate. B2046 regularly closed at Wingham end causing tailbacks with queues of traffic polluting the atmosphere. Diversions through country lanes happen several times a year and cause damage to local flora and fauna on the one track country lanes leading to local towns.</p> <p>B2046 already being used by heavier lorries which are causing crumbling to the verges.</p> <p>There is no secondary school in the area so children have to travel to Dover, Sandwich and Canterbury. Bus services have recently been curtailed resulting in overcrowding, and young vulnerable children being left stranded waiting an hour or more for the next bus, or having to be collected when parents finish work.</p> <p>Train services are sporadic and the current amount of secondary school age children in the area cannot be allocated local school places.</p> <p>Sewerage, gas, broadband are nearing capacity, with regular broadband outages and lack of any FFTP in the area with the current number of houses.</p> <p>Dorman Avenue building work is still not complete, and within that plan there was provision for extra shops. Current shops are high cost and low volume, thus travel 10-15 miles to nearest superstore means more vehicles on inadequate roads.</p> <p>Local doctor's surgeries are also at capacity and many wait weeks for appointments. The local hospitals have been at bed capacity for months, with people waiting in A&E for beds overnight, sometimes for 48 hours before being treated, or going for surgery.</p> <p>The Ukraine war has shown that greenfield areas are much needed for crops so that the UK can be self-sufficient rather than relying on imports. Many local farmers have increased crop harvesting already.</p> <p>The Covid-19 pandemic has resulted in increased mental health issues, and the spread of the virus has been shown to increase in more densely housed areas, where there are limited garden spaces to breathe fresh air and exercise. Along with limited parking causing problems in the recent estates at Dorman Avenue, and assuming an extra minimum of 1 car per household the increase of cars especially at peak times on the B2046 will cause more accidents and hold ups.</p> <p>For those travelling to Sandwich or Thanet, the A257 is inadequate in terms of the junctions leading onto it. Already fatalities and severe accidents involving the use of air ambulances this year deem this road unsuitable for the current traffic levels. The Sandwich area developments will cause more disruption on these junctions, and the increase to delays on this road will cause more traffic pollution.</p> <p>The new Canterbury City Council plan has not been discussed with DDC and thus contravenes the Duty To Co-operate with both councils. Together with 640 houses in Aylesham, 3200 in the adjoining Cooting Farm Town, and another 500-800 also in close proximity, the infrastructure and the amenities cannot cope with these plans.</p> <p>The Government has recently abolished the 300,000 new homes for the next year and that was the figure on which this plan was based</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	<p>Government has just rescinded the 300,000 new housing level, and the levels in these plans need to be modified, meaning an urgent review of this plan should be commenced.</p> <p>Lack of consultation with CCC on their forthcoming plan including Cooting Farm Town which abutts the B2046 shows failure in Duty to Co-operate with neighbouring areas, and thus this plan should be put on hold with both councils meeting to discuss both plans and redesign a way forward that benefits both councils. The area cannot sustain either at present and with no discussions both plans have been launched at similar times without knowledge.</p> <p>Highways involvement in terms of upgrading the B2046, straightening the blind bends, installing roundabouts at dangerous junctions, plus the dualling of the A257 before the Sandwich housing areas are finalised, must take place. Both roads have had fatalities this year, and with a doubling of housing in the surrounding area, the road state must be revisited.</p>

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Local fauna relies on corridors away from businesses and housing and these have already been narrowed by previous recent housing in Dorman Avenue. Rare red kites, bats, and more nest and live in the area and these must be preserved, not eradicated by housing. A secondary school is required in the area, travel to and from other schools with inadequate/extortionate price bus and train services has to be revisited before considering the increase in housing. Local shops need to be varied and increased before any more housing. With only one Post Office in five local villages, the post office in Aylesham is already over-used and other village amenities and infrastructure must be revisited. FFTP broadband is essential now with over-use and will be impossible with new housing levels, The Government agrees to supply broadband to low income households, instead this will get worse.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP27
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	1. SAP24, AYL003 South Aylesham, 640 houses – I support the Parish Council's objection that this level of development is overbearing on the village (for reasons given below) and risks altering the nature of the community here, which has already seen approval for some 1300 houses. It goes far beyond the original master plan.

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

2. SAP 27 (AYL001 policy SAP27), 9 houses – I support the opposition of the Parish Council to this because it would result in the loss of registered native woodland.

3. Over the past few years, Aylesham has seen a vast amount of development, which has put considerable strain on local amenities such as local shops, local community and leisure facilities, highways infra-structure and medical services, which are currently inadequate, as outlined below.

4. Transport and Highways infrastructure Bus services are totally inadequate – there is no evening service to anywhere, and no bus to Dover or Whitfield, despite a recent service showing that this is what most people want, and a promise from the local bus privatised company and Kent Council that it will provide a minibus dial-up service. There is no sign of the latter so far, despite many promises – and it will be inadequate for the numbers of existing and new houses. This means over reliance on cars, and isolation from those without their own transport. The train service does not cater for people with disabilities who cannot cross between the different platforms at both Aylesham and Snowdown Stations. The IDP identifies that “passenger numbers have risen significantly” and that Network Rail are looking to increase to half-hourly services – but there are no firm commitments. There is a need for second station entrances and DDA3 compliant access; improvements to car and cycle parking; improvements to pedestrian access; and more waiting bus shelters. There are no cycle tracks – and these are badly needed to other villages, Dover and Canterbury.

Local roads are increasingly congested – there is a knock-on effect for Nonington and Wingham where increased traffic from Aylesham through the narrow road to Sandwich through Nonington and the B2046 to Wingham will make much worse already bad problems with speeding, and long queues at the B2046 junction at Wingham. Short of a new bypass for which there is no funding, nothing can be done to significantly improve these problems. Any future developments must include a plan to make significant upgrades to key routes such as Spinney Lane and B2046 (Adisham Road). Although this is mentioned in the IDP2, there are no firm commitments to immediate improvements.

5. Local amenities – as the Parish Council explains in detail, given the recent and ongoing development of 1300 odd houses – are already grossly inadequate, with no local supermarket, insufficient community/leisure facilities, highways infra-structure and insufficient medical services. There is no coherent youth service provision, very poor shopping facilities, no local pub or restaurant, and limited sports and community facilities which have received only a limited amount of developer contributions so far, and which have resulted in little real addition to such facilities in the village. There is a lack of pre-school education provision, excessive demand on the local medical centre, no dentist, all of which contravenes 3.8 SP2 statement that ‘ new development is well served by services and facilities. The IDP identifies a need for increased sports hall facility for which the developers’ funds allocation has still not been spent. The IDP also mention a proposed community facility/ which has yet to materialise and on which the Parish Council says it has not been consulted. Moreover KCC closed the Youth club some years ago, and, despite the tremendous increase in families and young people already happening as a result of the existing new builds, there is no coherent strategy of funds for much greater youth service provision in the village.

6. Rural Service Centre - this is Aylesham's official designation in the Dover Council Settlement hierarchy, level with the town of Sandwich. But, although both communities have equal weighting in the settlement hierarchy, they are not getting an equal weighting in housing development or in terms of investment. The Site Allocations refer to the district's “existing larger settlements of Dover, Deal and Sandwich” but in reality Aylesham is now likely to have a larger population than Sandwich. Aylesham is receiving 649 new homes (SAP24 and SAP27), whilst Sandwich has a proposed development of just over 200 homes.

The Draft Local Plan proposes investment in Sandwich to improve the town and protect its heritage, plus a culture investment plan. THIS IS NOT HAPPENING IN AYLESHAM. This relates to SP3 – Housing Growth and SP10 – Sandwich Town Centre. The residents of Aylesham should also see their cultural capital widened and enriched in a similar extensive Draft Local Plan. Funding should be provided for organisations such as cinemas, museums, galleries etc that will help to enrich people's lives. In addition, funding should be made to include a substantial mining heritage centre to the site at SP26 which will provide much welcome additional employment on the old Colliery site. Only two of these buildings are currently listed – more should be listed, and adapted to new cultural uses, plus the provision of shops and other leisure/cultural facilities..

7. According to Kent County Council's childcare sufficiency analysis, Aylesham currently has a significant deficit of 0-4 yr old childcare places, 5-11 yr old breakfast club places and 3 & 4 yr old extended entitlement places in nurseries. There needs to be FIRM commitment to SPECIFIC sites and PLANS to provide these increases in this vital early years service area. As the Parish Council says, the plan must go further than listing a whole host of possible “off-site” provisions to safeguard this vital sector.

8. In relation to secondary school provision, Secondary school age children have to travel by bus or train to Dover, Deal and Sandwich schools. Often, these buses or overcrowded or full and so do not stop at all designated stops to pick up school children leaving them stranded before school. Recently, the 96A to Dover Christ Church Academy was planned to be cut from Stagecoach's timetable. There should be a properly

	funded and specific commitment to improve school trans[port as the numbers of children increase, and the possible need for a new Secondary School in the Dover District should be located in Aylesham.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>For a rural settlement, a further 640 houses, on top of a recent development of 1,360, is too much.</p> <p>Whatever the final number approved, the following changes should be made</p> <ul style="list-style-type: none"> • The 9 houses (AYL001) should not be built, for the reasons given above, and the further 640 houses should be reduced in number – nothing in reality can be done about the problems of significantly increased traffic on the B2046 especially.. • Buses – funding MUST be provided for adequate bus services – new ones to Dover and the local villages, and also in the evenings, to reduce car use, and avoid isolation amongst the large numbers of residents without cars. • Both train stations should be immediately upgraded to ensure DDA3 compliance, with second entrances, and train services should be increased in frequency. • Cycle track provision - there is nothing at the moment at all. • Upgrades to Spinney Lane and the B2046, and more parking provision and better traffic management in the village itself. • Guaranteed investment in local services, including generic dentist provision (not just the special dentistry service provided at the moment), enhancements to the medical centre, identification of specific sites for additional community facilities such as shops, pubs/restaurants, a sports/leisure/community Centre (for which some funding already exists which should be spent immediately, and there should be more developer funding), - and museum, cinema, library (far too small) – and a new Youth Centre with a coherent programme of events and activities. • Equal provision on the same level as Sandwich (Aylesham will be bigger in terms of population) in relation to heritage and cultural resources, and other community facilities. • Education – specifically identified funds and[plans to meet the needs identified above for early years education provision, more school buses, and the building of a new secondary school in Aylesham. <p>OTHERWISE, Aylesham will be reduced from a thriving community to nothing more than an enormous housing estate.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object to the proposal in the 2040 Local Plan that Eythorne and Elvington become a "Local Centre". I also object to the proposed building around Elvington. The reasons for both objections are set out below.</p> <p>Elvington and Eythorne, although geographically close, have their own distinct heritage, character, culture and community. Elvington was mostly built in the early 20th century to serve the nearby coal mine at Tilmanstone. Eythorne is very much older, with evidence of occupation from the stone age and in the heart of the village are many buildings from the 18th and 19th century. Eythorne is essentially a community founded on agriculture and it is not, and has never been, a mining village. The development of Tilmanstone colliery did not lead to significant housebuilding in Eythorne. In the late 1960s and early 1970s, however, small housing developments sprang up on land originally used for farming and latterly used by the local school and community.</p> <p>There are no existing problems, or conceivable future ones, that would be better served by combining these two individual communities as opposed to keeping them separate. Indeed, it might well be the case that better, more consensual, decision making would occur if the communities were kept unique (for example Coldred and its community driven management of the village centre). It is also evidentially the case that communities that keep their identities have less societal problems and better mental health because of the developed relationships and contacts within the community (people looking out for each other etc). As it stands the countryside is in easy walking or cycling distance for anyone no matter where they live in either community, young or old, and this access is enjoyed by many to the benefit of their mental wellbeing. Where there is urban sprawl, loss of green space and loss of identity, quality of life plummets (cf Thanet). Unnecessary and unsympathetic "planning" has irrevocably harmed many communities, villages and towns over the years, resulting in poor and problematic living environments for future generations to inherit.</p>

There is also no conceivable opportunity that could arise that would only be possible by combining the two communities rather than keeping them as they are now.

The issues facing these communities are many but none are due to them not being combined.

It is proposed that the two separate villages of Eythorne and Elvington are developed as a "Local Centre" based on them "having a very good range of services and facilities". This is a considerable overstatement as the two villages have, in fact, a very limited range of both.

In terms of existing GP services, the nearest is Shepherdswell which is only open between 8.30-10.30 a.m., Monday to Friday, and does not routinely offer an actual GP surgery but only "administrative" or nurse appointments. Overall, the other GP services in the area are stretched to the limit and will struggle to take up the amount of new patients that will arise with significant further new house building in this area. Additional patient numbers will introduce further frustration from the community with getting GP appointments when wanted. Unless GP provision is significantly improved, is properly delivered to time, and is written into the DDC plan then there will be a healthcare crisis in this District.

As well as insufficient GP provision, the area also suffers from inadequate response times from the Ambulance Service, SECAMB. April 2022 saw the worse response times on record for SECAMB. Although things have improved slightly since then, it is still poor and inadequate. Hospital waiting times especially for A&E are also poor. In part, the long waiting times for both hospital appointments and for A&E, as well as poor ambulance response times, are due to the inadequate GP primary care driving people to attend hospital rather than their own GP.

It is practically impossible to get an NHS dentist in this area and most surgeries are not taking on any new patients. This means new arrivals into the area are forced to go private pushing up their cost of living and ultimately leading to further degradation of the NHS provision even though we have all paid for it and it should be readily available.

Local policing is entirely absent in the main and incidences of anti social behaviour, vandalism and theft (for example frequent van break-ins for tools) that have occurred in both villages are largely not dealt with at all by the Police. Most certainly the Police are not being proactive in preventing such crimes. There is also a local drug taking and drug dealing problem, again not tackled.

The bus service for Elvington and Eythorne was always poor and inadequate for it to be used to commute to work. Now KCC has cut bus services further, there will be no public transport serving the villages. This has caused a major problem for school children attending secondary education in Canterbury, Dover and Sandwich and great difficulties for parents in trying to find alternative transport methods that also accommodate their need to attend work. Many in the village have mentioned considering moving away from this area to one that does have public transport for the school trip.

In Section 4.2.11 it mentions a range of tourist attractions available including Wingham Wildlife park, The "Historic park and Garden of Waldershare" and the EKR (East Kent (Heritage) Railway). The first is certainly an excellent attraction. Waldershare Park is, however, a private estate not open to the public. The heritage EKR line runs only one day a week (Sunday) and some bank holidays (not just "a few times a year" as stated in 4.216) from approximately April to October. Although it has a charm of its own and continues to be developed, it is currently of very limited appeal to the general public as it has a short track length and no steam engines.

In the Section on Eythorne and Elvington, and as shown in the plan in Section 4.214, land is shown "Allocated for Employment". This is all very laudable but the employment opportunities must be such that they provide opportunities, careers and suitable salaries for the local population. To date, attracting blue chip employers into this area has not met with tangible success. The Pike Road Industrial Estate businesses such as Tilmanstone Salads, which is a minimum wage employer, are not likely to be attractive to the majority of residents of employable age. More of the same is not going to adequately provide opportunities to deliver a sustainable community. The biggest employers for the communities will probably remain Dover docks and first responders, with others working for service industries from home.

Section 4.218 listing services and facilities has several errors. Eythorne does not have two village halls. It has one pre-cast concrete structure which could be considered a village hall behind Ss Peter and Pauls' Church. It is at the border of Eythorne and Elvington and hence poorly placed for Eythorne residents. It is barely used because of that and is most noted for being a polling station. Eythorne does not have a Cafe and to the best of my knowledge hasn't had one since the last century. It does have a village shop and Post Office combined (they are not separate amenities as might be supposed from the text as written in 4.218). Thus the actual "amenities" in Eythorne are one pub, one "village hall", and one Post Office/shop. It does have two churches (Baptist and CoE) but these are used by a tiny minority of residents and so can hardly be considered to be a significant amenity. According to the Church of England's own figures (2019), less than 1 % of the population attend church regularly. Over 50 % of the UK population are irreligious.

In terms of Elvington, it does not have a church as stated. The rest of the statement regarding Elvington amenities is correct. However, with the advent of services such as Uber Eats, Deliveroo and "Just Eat" etc the community attractiveness of the takeaways is diminished.

Regarding the statement in 4.219, and as clarified above, the settlements do not have much in the way of services and facilities that make them stand out as a place to create a new "Local Centre" unless the critical criteria you are using are possession of a pub, a shop, and unused churches.

Tilmanstone Colliery Welfare Sports Ground, as mentioned in 4.221, is a good facility for sports in the Eythorne and Elvington communities. As a non-profit making charity, however, it requires membership fees or hire fees for use of its facilities and the facilities are thus not freely available. These fees are not onerous however.

The entrance to the primary school which sits on the boundary between lower Eythorne and Elvington, and serves both communities, is on a corner and is a blind bend coming up Church Hill which is problematic for parents dropping off and picking up their children. Church Hill itself is narrow in parts, permitting passage of a vehicle only in one direction at a time, and is a bottle neck. Children arriving by foot from Upper Eythorne have to travel along Shooters hill which already has issues with child safety due to the narrowness of the road and traffic density, resulting in vehicles mounting the pavements to pass. Additional vehicle movements due to more house building will only exacerbate the problem. Traffic build up is also a problem at the staggered junction between Wigmore Lane, Shooters hill and Church hill which has visibility issues. If the new estate exits through Elvington, there will be a build up of traffic on Church Hill trying to exit onto Wigmore Lane using the Staggered junction. If the estate exits through Wigmore Lane then the increased traffic will cause problem trying to cross the staggered junction from Shooters Hill or Church Hill directions.

For sustainability of the community any new building must contain a large component of genuinely affordable housing. At the moment new houses are beyond the reach of the local young and are being bought up by people outside the community, diluting the community common values, or by buy-to-let investors.

It goes without saying that any new development must have searches done to ensure that subsidence and any ground contamination from the extensive Tilmanstone mining activity will not be an issue. Also the area around Elvington village has been found to contain much live WWII ordnance from troops stationed here during the war and this needs to be factored in to pre-building work.

The building on the proposed area will substantially diminish an important green corridor for wildlife movement (especially insects) and a source of food for many types of wildlife.

It is very disappointing to read in Section 4.2.11 that Dover District Council believe that "Shepherdswell, Eythorne and Elvington have their roots in the short-lived East Kent coalfields". Whilst it is certainly the case that Elvington is a (model) colliery village, the roots of both Shepherdswell and Eythorne precede the development of the coal fields by a considerable margin. Both have been occupied since the stone age, have evidence of Roman occupation, are mentioned in the doomsday book and have recorded history since then. Incidentally, it is stated in section 4.211 (and repeated in 4.216) that the EKR line was originally built to serve the Colliery at Tilmanstone. This is factually incorrect as the line was built to

	<p>serve any colliery in the area that might prove to be productive and reached as far as Wingham and also to Richborough at its peak. http://www.dover-kent.com/VILLAGES/18-Eythorne.html</p> <p>In conclusion there is clearly not the necessary infrastructure to support the proposed development and nowhere near enough amenities to justify development as a Local Centre. Progressing with the latter is wholly unnecessary. It would be much better if new villages were developed to support increased population, as was done when coal mining took off, to stop urban sprawl.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>For one, it needs to have guarantees on increases in health care, public transport, policing and schooling written in, commensurate with the increased number of houses, for it to be creditable as a plan to deliver sustainable communities.. Rather than continue "urban sprawl" by having "Local Centres" and diminishing sense of community etc, a much better policy would be to build new villages/towns to accommodate the additional housing as was done when mining started in Kent.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I would argue that the designation of Kingsdown as a local centre is unsound, unjustified, ineffective and inaccurate. Due to the unique nature of its location with AONB to the South as a border, the Sea to the East, heritage coast and cliffs to the South. The 3 narrow access roads serving Kingsdown do not link up easily to other hamlets and smaller villages to provide services. The main settlement of Ringwould is the other side of the A258 arterial road from Kingsdown and better served by Deal or Dover. There is no doctors, a recently reduced bus service, poor transport links for pedestrians and cyclists, no train station. A small village shop with post office and butchers. It is necessary to run a car to get to Deal or Dover for a food shop. It is not best served by large scale development and can only cope with a windfall developments due to its very poor but characterful roads.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Kingsdown should be designated as a larger village not a local centre.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Paragraph 2.214 of the Plan states that the Ash Neighbourhood Plan makes a number of site allocations in Ash. Given this, no further site allocations are proposed at this settlement. The Local Plan should however be read in conjunction with the Ash Neighbourhood Plan. The period of the Neighbourhood Plan is up to 2038 and there will, no doubt be a revision to it, before then. The periods for the Neighbourhood Plan and Local Plan do not align and there is no contingency in the Local Plan for what happens to residential development in Ash beyond 2038.</p> <p>The Local Plan states that it should be read in conjunction with the Neighbourhood Plan in respect of allocations in Ash. However, the reverse is also true – That the Neighbourhood Plan should be read in conjunction with the Local Plan. That there is a Neighbourhood Plan for the settlement should not preclude new development at the settlement, particularly when there is a pressing need for development to come forward in the early part of the Local Plan period.</p> <p>Policy SP3 of the Local Plan requires that development in the 'rural areas' will be of a scale that is consistent with the relevant settlement's accessibility, infrastructure provision, level of services available, suitability of sites and environmental sensitivity. Development that would result in disproportionate growth to any of the district's settlements, which cannot be supported by the necessary infrastructure and services or would result in a loss of services and facilities which are considered to be key to supporting local communities will be resisted. Appendix E of the Local Plan classifies Ash as a 'Local Centre' which is appropriate for proportionate development. Therefore, where sites in Ash which are available, deliverable and developable and of a scale cognisant of a "Local Centre" then they should be considered for allocation by the Council.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Text Extracted from Document sent from Savills on Behalf of the Church Commissioners. Representation has been split across relevant areas of the Local Plan. Full attachment and introduction to Policy comments can be found under reference SDLP1266.)</p> <p>Introduction</p> <p>Savills has been instructed by the Church Commissioners to submit representations to the Draft Dover District Local Plan Regulation 19 Consultation. The consultation on the Local Plan commenced on 21st October and closes at 5pm on 9th December 2022. These representations focus primarily on the Land at Botolph Farm but also cover the Church Commissioners other landholdings in the district, including Land East of Eastry. These representations support the allocation of the Land at Botolph Street Farm and explain why it is suitable for additional residential development. Additionally, these representations identify why the Land East of Eastry should be considered as a site for future residential development. The Church Commissioners also own smaller land holdings within various settlements across the district which are considered suitable for conversion for residential use or via windfall housing. The Church Commissioners are promoting these sites in line with the Government agenda to deliver much needed new homes quickly and efficiently. These land holdings will guide the representations made in regards to the Regulation 19 Consultation Document. The National Planning Policy Framework (NPPF) explains that the planning system should be plan-led. Paragraph 16 sets out the Plans should:</p> <p>a) be prepared with the objective of contributing to the achievement of sustainable development;</p> <p>b) be prepared positively, in a way that is aspirational but deliverable;</p> <p>c) be shaped by early, proportionate and effective engagement between planmakers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;</p> <p>d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;</p>

e) be accessible through the use of digital tools to assist public involvement and policy presentation; and
f) serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant). At examination, a Plan will be found 'sound' if it is considered to be positively prepared, justified, effective and consistent with national policy, as set out within paragraph 35 of the NPPF. As such, ensuring that the Local Plan meets the tests of soundness is important throughout the Local Plan process - including at Regulation 19 stage.

Structure of the Representation The structure of this representation is as follows:

Section 2: Summary of the site at Botolph Street Farm: Sets out a broad outline of the Land at Botolph Street Farm, its surroundings and provides a brief description of the draft allocation.

Section 3: Summary of the site at Eastry: Sets out a broad outline of the Land East of Eastry, explaining its surroundings and potential for residential development.

Section 4: Representations on the Draft Local Plan: Makes observations on the Evidence Base Documents; Provides comments and recommendations on key elements of the Draft Local Plan.

Section 5: Conclusion: Summarises the observations within the representations and outlines the next steps in the draft Local Plan process.

Additional Documents A number of documents have been submitted in conjunction with this representation. These are listed below and labelled in regards to which site they are supporting:

Botolph Street Farm

Land East of Eastry - The Site, The Surrounding Area and The Proposal

The site is located in the village of Eastry. It comprises approximately 20.9 Ha of agricultural land to the east of Eastry's village envelope (see Figure 3.1.). The site is bounded by the A256 (Eastry bypass) to the east, Public Rights of Way (PRoW) footpath EE279 to the west, PRoW footpath EE241 to the north and a mixture of houses and St Mary the Virgin Church to the south.

(DDC Note - Unable to display image - see attachment for full representation)

The site has a sloped topography where it generally falls south to north. The lower areas lie adjacent to two ditches on the northern and eastern boundary. The A256 is mostly higher than the surrounding ground level other than a short section through the valley base. The Thanet Coast & Sandwich Bay Special Protection Area (SPA) and Ramsar Site, as well as Sandwich Bay to Hacklinge Marshes Site of Special Scientific Interest (SSSI), are situated within 2km of the site. As such, the site falls within a SSSI impact zone whereby development proposing 50 dwellings or more will need to consult with Natural England. Furthermore, the site falls within the 9km Zone of Influence of the Thanet Coast & Sandwich Bay SPA. The north east of the site lies within Flood Zone 3 where there is generally a high probability of flooding from rivers and sea flooding. This is due to location of two ditches which run along the northern and eastern boundary, then along the boundary between Parcel A and B. The remainder of the site falls within Flood Zone 1 which has the least probability of flooding. The majority of the site has a very low probability of surface water flooding. The northern and eastern boundary generally have a low risk, with some small areas falling into a medium or high risk category. It is also notable that two sewer lines cross the site. Access can be achieved from the A256. It is proposed to widen this access to accommodate a right-turn lane for southbound vehicles turning right into the site. Technical work has been undertaken to demonstrate that suitable visibility splays can be provided in both directions. An agricultural access is also located to the south east of the site, from Brook Street. The site lies outside of, but adjacent to, Eastry Conservation Area (see Figure 3.2.).

(DDC Note - Unable to display image - see attachment for full representation)

There are also several listed buildings in proximity to the site. Figure 3.3 shows the locations of Grade I (yellow), Grade II (red) and Grade II* (blue) listed buildings. The locations of these listed buildings have been taken into consideration when deciding the initial development capacity, illustrated in the submitted vision document.

Planning History

No planning applications have previously been made on the site.

Surrounding Area

Eastry is a medium sized village with a population of circa 2,500 (2011 Census). As such, it has several services and facilities which make it a sustainable location for development. The Settlement and Confines Topic paper (August 2022) that supports the Regulation 19 Local Plan, found Eastry to possess: a post office, 12 shops (including a bakers, butchers, general store, 2 hairdressers, a public house, and 2 takeaways), a village hall, church, scout hut, nursery, bowling green, football pitch, a primary school and 2 play areas. There are also regular bus services to Deal, Sandwich, Canterbury and Ramsgate, with buses running hourly on weekdays. The site is within walking distance of all these facilities and existing PRoWs provide pedestrian access straight to the High Street. The village of Eastry scored 32 points in the Settlement and Confines Topic paper, ranking it 3rd out of the 38 tested settlements. Paragraph 5.4 of the paper concludes that Eastry is a rural local centre and: 'given the wide range of services present in such villages each has the capability to act as a principle focus for services in its rural catchment area.'

The Proposal The site has the capacity to accommodate approximately 200 new dwellings. This unit number takes into consideration potential constraints identified in recently conducted technical work. The Church Commissioners is the sole landowner of the site and have a strong track record for bringing sites forward for high-quality and sustainable homes. The proposal of 200 new homes in a sustainable location can help provide additional housing for the district. This is in accordance with paragraph 60 of the NPPF which states that:

"To support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, that the needs of groups with specific housing requirements are addressed and that land with permission is developed without unnecessary delay." A vision document for the Land east of Eastry will be submitted alongside these representations.

Initial technical work has been undertaken on site and will also be submitted as part of these representations. These reports include:

- A Flood Risk and Drainage Statement;
- A Transport and Access Strategy; and
- A Preliminary Ecological Appraisal.

Conclusion

This representation to the Dover District Council (DDC) Regulation 19 Local Plan Consultation is written on behalf of The Church Commissioners in relation to the Land at Botolph Street Farm in Shepherdswell, the Land East of Eastry and a number of rural sites also in the Client's ownership. The allocation of the Land at Botolph Street Farm is supported as the site is available, developable and deliverable. The site is in a sustainable location and forms part of a logical residential extension of the local centre of Shepherdswell, according with the approach to plan-making as set out in the NPPF. The development would make a valuable contribution to the future of the village and help DDC meet its housing need. The Land East of Eastry is provided as an option for a future strategic allocation or an alternative option for the emerging Local Plan. The site is located in a sustainable location with easy walking access to a range of amenities in the local centre of Eastry. A range of technical reports have already been conducted, demonstrating significant potential for a major residential development and are submitted with this representation. This document provides representations on the Regulation 19 Local Plan and includes observations on the supporting evidence base. Several recommendations have been made throughout these representations. The most notable recommendations include:

Local Plan SP1 (Climate Change) – DDC should clarify the meaning of what constitutes as 'qualifying development' and what a 'climate change statement' constitutes. It is recommended that the proposed wording changes suggested in Section 4 are adopted.

Local Plan SP3 (Housing Growth) - DDC should reconsider their reliance on larger allocations given the delivery history in these locations. Instead, DDC should seek to allocate more smaller sites to reliably meet this housing need since these sites can be delivered earlier in the Plan Period.

Local Plan SP4 (Residential Windfall Development) – DDC should provide greater flexibility for windfall development in all locations and each site should be judged on its own merits.

Local Plan SP5 (Affordable Housing) – DDC should provide a larger buffer than 8% on the required housing need due to the over-reliance on the Whitfield Urban Expansion and to ensure that the affordable housing needs of the district are met.

Local Plan SP6 (Economic Growth) – DDC should provide evidence that the housing strategy set out in SP3 is supportive of the economic growth aspirations set out in SP6.

Local Plan SP11 (Infrastructure and Developer Contributions) - DDC to ensure that any developer contributions meet with the tests set out in paragraphs 56 and 57 in the NPPF.

Local Plan Policy SAP37 (Shepherdswell Small Housing Sites) – DDC should increase the allocation of the Land at Botolph Street Farm to 25 dwellings.

Local Plan PM1 (Design) – DDC should provide further clarification on what is meant by 'relevant and appropriate' and remove any reference to 'rhythm'.

	<p>Local Plan PM3 (Providing Open Space) – DDC should update Draft Policy PM3 to reflect that a scheme to secure long term management and maintenance of the open space must be secured via planning obligation. DDC should also provide greater flexibility for the requirement of smaller sites to provide set open space measures.</p> <p>Local Plan H2 (Rural Local Housing Needs) – DDC should adopt the wording changes suggested in Section 4 of this representation in relation to viability assessments.</p> <p>Local Plan CC8 (Tree Planting and Protection) – DDC should provide greater flexibility for smaller development sites and clarify against the requirement for tree-lined streets.</p> <p>Sustainability Appraisal (2022) – Amend the sustainability ratings of site SHE006 to match that illustrated in Figure 4.4 of this report.</p> <p>Housing and Economic Land Availability Assessment (2022) - Increase the capacity of site SHE006 and update the name of the site to 'Land at Botolph Street Farm'. This representation clearly demonstrates that there is scope to increase the dwelling capacity across the Land at Botolph Street Farm and improve its contribution to the housing needs of the district. This is supported by national policy, specifically in its emphasis on the capacity for small to medium development sites to contribute to the housing requirement of the district in the earlier part of the Plan Period.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Omission site in Ash (ASH010)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>With reference to the above document and the consultation upon its contents. Please accept this email as our response on behalf of our client Land Allocation Ltd to the above consultation. We wish to make representations upon the deletion of our clients site at land adjacent to Saunders Lane, Ash as an allocation.</p> <p>Overall, our clients site represents a deliverable, sustainable housing site that was proposed to be allocated in the emerging Local Plan for housing at the Reg 18 Stage and as such the allocation of ASH010 land adjacent to Saunders Lane, Ash for housing should be supported. The Councils reason in deleting the allocation is that outline planning permission has been granted. This doesn't make sense as the grant of outline planning permissions adds to the evidence of deliverability. There is a willing landowner and promoter to develop the site as evidenced by the submission of outline planning application reference 19/01462.</p> <p>There are no on site issues that would prevent the sites allocation for residential development as evidenced by the supporting information for application reference 19/01462. S106 contributions have all been established through the Outline Planning Application and there is no indication of any viability issues here. The Full Policy Requirements are expected to be made as evidenced by the Outline Planning Application and the legal agreement.</p> <p>There is no reason not to allocate this site for residential development. After all the site is readily available, deliverable with excellent access to services within the Council's Local Centres tier of the settlement hierarchy. There are no major infrastructure or abnormal costs to affect the overall delivery of this site. The site has readily available access to all the necessary utilities and infrastructure with a suitable access to the site. The site will form an important allocation to deliver much needed housing in the area with the full complement of s106 contributions to ensure that the allocation constitutes sustainable development.</p> <p>The site can deliver new housing within the short term and can make a significant and positive contribution towards addressing Dover's identified housing needs. The site adjoins the existing built-up and is seen in the context of the existing settlement. An attractive residential development can be achieved, which will provide significant benefits to the local community. If you need any further information or wish to discuss matters further, then please don't hesitate to contact me at this office. We trust that our representations will be taken account of in the future stages of the preparation of the Local Plan.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at	

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

(DDC Note - Full Representation attached to SDLP1883. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1883.) Land North of Sandwich Road, Ash Barratt David Wilson Homes December 2022 1 1. Introduction Savills has been instructed by Barratt David Wilson Homes Kent (BDW) to submit representations to the Draft Dover District Local Plan Regulation 19 Consultation. The consultation on the Local Plan commenced on 21st October 2022 and closes on the 9th of December

2022. These representations focus on the Land North of Sandwich Road, Ash. These representations explain why the Site is suitable for residential development. BDW is working with the landowners to promote the Site in line with the Government agenda to deliver much-needed new homes quickly and efficiently. The following documents are submitted with these representations:

Vision Document;

Flood Risk and Drainage Report 2022

Ecological Appraisal Summary Report 2022

Transport Appraisal 2022 The National Planning Policy Framework (NPPF) explains that the planning system should be plan-led. Paragraph 16 sets out the Plans should:

be prepared with the objective of contributing to the achievement of sustainable development;

be prepared positively, in a way that is aspirational but deliverable;

be shaped by early, proportionate and effective engagement between planmakers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;

contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;

be accessible through the use of digital tools to assist public involvement and policy presentation; and

serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant). At examination, a Plan will be found 'sound' if it is considered to be positively prepared, justified, effective and consistent with national policy, as set out within Paragraph 35 of the NPPF. As such, ensuring that the Local Plan meets the tests of soundness is important throughout the Local Plan process - including at Regulation 19 stage.

Structure of the Representation The structure of this representation is as follows:

Section 2: Summary of the Site: Sets out a broad outline of the Land North of Sandwich Road and its surroundings and provide a brief description of the proposal.

Section 3: Review of Evidence Base: Makes observation on the Evidence Base Documents;

Section 4: Representations on the Draft Local Plan: Provides comments and recommendations on key elements of the Draft Local Plan.

Section 6: Conclusion: Summarises the observations within the representations and outlines the next steps in the draft Local Plan process.

2. The Site, The Surrounding Area & The Proposal Land North of Sandwich Road lies adjacent to the settlement of Ash which is identified as a Local Centre within the DDC adopted and emerging Local Plan. The Site comprises approximately 5.73 Ha of agricultural land. Sandwich Road bounds the south of the site with residential development situated to the south of this. Several new housing developments have recently been approved which urbanises the existing character of the area. The northern boundary abuts the A257 (Ash Bypass) which forms a defensible edge to the village. A mature hedgerow provides a buffer between the site and the road. The Site is predominantly flat. It is well contained and has a sense of enclosure due to the existing hedgerows to the north. Additional planting has been introduced which helps to further limit views into and out of the Site. Suitable access can be achieved via Sandwich Road. The topography of the land is such that it is raised slightly in the middle. There is a public bridleway which runs along the north of the western boundary of the site which has hedgerows either side. The Ash NDP designates this areas as a Local Green Space. Views of the Church of St Nicholas can be seen from this Public Right of Way (PRoW) but other views are limited owing to the flat nature of the topography. The site is located entirely within Flood Zone 1 and there is one listed building within proximity to the Site which will be treated sensitively in any design. A Site location plan accompanies these representations and Figure 2.1 identifies the approximate extent of the Site.

Figure 2.1 Site Location

The Land North of Sandwich Road lies adjacent to the settlement of Ash which is identified as a Local Centre within the DDC adopted and emerging Local Plan. It is a well-served, large village to the north-west of Dover District. It is within reasonable proximity to both larger settlements of Sandwich, Deal, Dover and Canterbury. The Rural Settlement Hierarchy (SHR) (2022) that supports the Regulation 19 Local Plan, explains that Ash has regular bus services and several facilities that allow residents to meet their day to day needs. Within this, the RSH scores rural settlements in relation to the services present at the time of the assessment. Ash scores 34 which is the second highest after Aylesham. This has increased from 33 in the Regulation 18 where which was identified as the fourth highest score of the rural settlements. As such, Ash is ranked as a 'Local Centre'. Pertinently, paragraph 5.5 of the SHR notes that:

"Given the wide range of services present in such villages each has the capability to act as a principle focus for services in its rural catchment area".

Figure 2.1 The Settlement Summary for Ash in the Settlement Hierarchy and confines topic paper

Planning History One planning application has been made on the site in 2016 under ref. DOV/16/00800 for the erection of 104 residential dwellings with associated commercial (B1) and nurse (D1) units, hard and soft landscaping, and associated infrastructure. The application was recommended for approval by the Case Officer, however, was refused at Committee. The reasons for refusal were as follows:

1) The site lies outside of the settlement boundaries of Ash and the development proposed, although making a contribution towards the Councils 5 year housing supply deficit, would, if permitted, be contrary to Policy DM1 of the Core Strategy. The proposed development would fail to protect the character and appearance of the natural and built environment and would result in the significant loss of Best and Most Versatile Agricultural Land. Consequently, the adverse impacts of the development would significantly and demonstrably outweigh the benefits, when assessed against the National Planning Policy Framework read as a whole, and the proposal does not therefore constitute sustainable development.

2) The proposed development, if permitted, by virtue of its scale, density, prominent location and urbanising nature in this transitional location, would result in a severe and adverse impact on the character and appearance of the area, in particular with regard to its relationship with the village of Ash and the countryside, contrary to Policies DM15 and DM16 of the Core Strategy and the Core Principles of the National Planning Policy Framework.

3) The proposed development would result in the significant loss of Best and Most Versatile Agricultural Land, contrary to the aims and objectives, in particular of Paragraph 112, of the National Planning Policy Framework. The decision was taken to appeal where it was dismissed by the Planning Inspectorate in December 2017 (appeal ref. APP/X2220/W/17/3174842). The Planning Inspectorate concluded that:

“The significant harm to the local landscape and loss of Best and Most Versatile Agricultural Land (BMV) would conflict with these Policies and with the NPPF and would, in the presence of a 5YHLS, significantly and demonstrably outweigh the above material benefits of the scheme.”

Notably, the Inspector stated that:

“the introduction of a large new housing estate on the site would project a spur of intensive urban development into the countryside despite the substantial areas of landscaped open space around its edges. It would only be bounded on its southern side by existing village development.”

Since the Appeal, a new development at the ‘Land north of Orchard View and west of Saunders Land’ (Ref: 19/01462) was granted planning permission for 76 dwellings. This will significantly urbanise this area of the village and extend the village further to the east away from the village centre. Moreover, the future development of the ‘Land north of Orchard View’ will significantly urbanise the area, thus changing the character of the eastern edge of Ash completely. Through sensitive masterplanning and further consideration into the Site’s opportunities and constraints many of the Inspector’s comments can be overcome. BDW is committed to delivering a sympathetic and resilient development of the Site.

Seeking to ensure that the proposal is fully compatible with and supportive to the wider village. This is one of the key differences of the current scheme in relation to the dismissed appeal. Details contained within the Council’s evidence base and the supporting Vision Document demonstrate that the Inspector’s concerns can be overcome. Thus, the Site is suitable, available and achievable for residential development within the first five years of the Plan Period.

Brief Description of Proposal BDW will deliver a landscape-led development that seeks to better integrate the Site with the existing village. The Site has capacity to deliver approximately 110 dwellings alongside public open space. An indicative layout is provided within the supporting Vision Document and in Figure 2.2 below. Of these 110 dwellings a policy compliant proportion of affordable housing will be delivered. Currently Draft Policy SP5 seeks 30% of dwellings to be delivered as affordable units. Thus, this site would deliver 33 affordable homes. Access will be provided via Sandwich Road to the south west of the site. New pedestrian and cycle paths are proposed throughout the proposal and will link into the wider network to provide active routes into the village. Trees and hedgerows will be retained and enhanced where possible given their maturity and important landscape impact. Additional planting is also proposed on the site including street trees and landscape enhancements. Any additional planting will be native species. These features along with other measures will enhance the existing habitats and create new ones. As such, the proposal will seek to enhance the biodiversity net gain by at least 10% on-site. Two SUDs ponds are proposed as part of the development. The first is situated on the western edge of the site, which assists in creating a landscape buffer between the development and existing public right of way, which is designated as Green Space within the Ash Neighbourhood Plan. The second is situated to the east within the public open space. The development has been prepared to maintain important views into and out of the site. Importantly, the view of the Church from the east of the site has been used to define the southern development edge as per the Developable Areas plan set out within the supporting Vision Document. For further details on the proposed development, please refer to the supporting Vision Document.

Figure 2.2 Proposed Masterplan

3. Review of Evidence Base

As part of the Draft Local Plan consultation, DDC has published a number of Evidence Base documents. These are listed below. Comments are provided on those which are shown in bold in this representation.

- Sustainability Appraisal Reg 19 Local Plan (September 2022)
- Habitats Regulation Assessment (September 2022)
- HELAA 2022 – Housing Site Assessments

(DDC Note - Text extracted and added to relevant consultations / Parts of the plan)

4. Representations on Draft Local Plan This section provides Representations on the Regulation 19 Local Plan and includes observations regarding the supporting evidence base.

(DDC Note - sections duplicated onto relevant sections of the plan)

Observations on the Regulation 19 Draft Local Plan Policies

Draft Strategic Policy 3: Planning for Housing Growth - COMMENT Strategic Policy 3 sets out the Council's current housing supply position and shows that in order to meet the Local Housing Need for the District, the Council will need to allocate housing sites in the Local Plan to deliver 3,316 homes over the Plan period. This number has been reduced since the Regulation 18 draft which made allocation of 5,288 homes. Draft Strategic Policy 3 confirms that in total the provision is made for at least 11,924 additional homes across the Plan Period (2020 – 2040) – the baseline growth. Dover Council makes provision of a buffer between needs and supply of approximately 8% which is not considered to be sufficiently large enough to ensure that needs are met over the plan period, especially given that around half of the homes will come from urban expansions. BDW agrees with the representations submitted by the Housing Building Federation (HBF) which states that a buffer of around 20% would be more appropriate, including the allocation of smaller sites which will deliver earlier in the plan period. This would also provide an additional buffer in overall supply should there be delays in the delivery of the larger sites in Dover. The council should actively be seeking to boost housing in accordance with NPPF paragraph 60. NPPF paragraph 69 explains the important role that small and medium sized site can make in meeting the housing need and that they are often brought forward quickly. Thus, to ensure that sufficient housing can come forward within the early years of the Plan Period, further small and medium scale sites should be allocated. This will alleviate the risk of the larger allocations under-delivering within the Plan Period which is historically documented in the District. NPPF Paragraph 11 sets out that a Local Plan should apply a presumption in favour of sustainable development and this means that strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses. This is unless the protection of areas or assets restrict development or there would be adverse impacts that demonstrably outweigh the benefits of the development. It is considered that Regulation 19 Local Plan is not ambitious enough in the planning for the baseline of housing growth, especially given that the housing target is less than that which was provided for under Regulation 18. Paragraph 3.45 of (page 31) of the Regulation 19 Document states that housing delivery in Deal and Sandwich is constrained by a number of factors including: flood risk, wildfire sites, heritage and highways. As such it is claimed that the potential growth of these settlements are considered to be limited. BDW considered the Land North of Sandwich Road to be a logical option for additional development, outside of Sandwich and the listed constraints, whilst still in close proximity. Paragraph 3.47 also states that a key part of the Council's growth strategy is to promote the sustainable development of rural areas, to support the vitality of rural communities in line with national policy. At the same time national policy advises that a balance must be achieved between allowing new housing and the need to protect the character and heritage of the settlements themselves, as well as the surrounding countryside. Within SP3 there are several allocated sites that are not confined by the listed constraints and are capable of delivering more housing across the District. This should include the Land North of Sandwich Road, where BDW has a firm commitment to delivering a high quality proposal of circa 110 dwellings.

Recommendation: DDC seek to meet their higher housing growth target, taking into account small and medium sized sites that are unconstrained and able to meet the overarching vision for the district. The housing requirement of 10,998 over the plan period 2022 to 2040 is consistent with the minimum number of homes the Council should plan for using the standard method. However, what is not clear from the Council's evidence is whether this level of growth will be sufficient to meet the growth aspirations of the Council. The current housing strategy seeks to distribute housing across the District but with the majority in and around Dover Town. A secondary focus will be in Deal, Sandwich and Aylesham. The housing strategy is reliant on the delivery of major allocations which have historically been slow to deliver new homes. This is acknowledged by DDC at paragraph 6.7 where it is stated: "the proportion of housing development in Dover Town has been significantly less than the 70% envisaged in the Core Strategy. There does not currently appear to be any evidence to demonstrate that the delivery of the major allocations will improve. Paragraph 060 (Ref: 61-060-20190315) of the Planning Practice Guidance explains that:

"Should issues arise which would adversely affect the delivery of the adopted strategy then the authority should consider alternative strategies, through a plan review, if these issues are unlikely to be resolved." There is clear evidence that there are issues with the delivery the major allocations. At paragraph 6.8 DDC states that there are issues with the existing housing growth strategy. DDC appears to be dismissing alternative strategies including the allocation of small/medium scale site alongside the major allocation as part of the preparation of this new Local Plan. Alternative strategies should be considered otherwise the Local Plan will fall short of the tests of soundness.

Recommendation: DDC reconsider their reliance on major allocations and alternative strategies are considered.

Draft Strategic Policy 4: Residential Windfall Development - COMMENT Given the poor delivery at major allocations over the adopted Plan period, DDC has recognised at paragraph 6.8 that there have been higher levels of windfall development in the district. Further to this, paragraph 6.84 notes that windfall allowance accounted for 45% of housing delivery across the district in the adopted Plan period. From year 4, the Housing Trajectory makes allowance for 70 windfall sites a year. As there is currently no evidence for the delivery of larger strategic allocations, it is likely that this windfall allowance will be larger and account for a large percentage of housing delivery in the District. It is likely that windfall development will come forward in the early stages of the Plan period resulting in housing growth that is not genuinely plan-led in accordance with NPPF paragraph 15. DDC should allocate further sites that are deliverable within the first five years of the Plan period to ensure that the number of windfall sites does not conflict with the objectives of the Local Plan. By allocating further deliverable sites in the early stages of the Plan period, the over-reliance of delivery at large strategic sites is less. This will alleviate the risk of windfall development leading development

in the area and risking the delivery of the overarching objectives. BDW consider that the Land North of Sandwich Road can deliver a high quality housing development efficiently within the early stages of the Plan period. Further consideration for sites such as the Land North of Sandwich Road should be given to ensure a plan-led approach is delivered.

Recommendation: DDC consider the housing delivery within the early years of the Plan period and seek to allocate quickly deliverable sites to ensure a plan-led approach is adopted.

Draft Site Allocation Policy 1: Non-Strategic Housing Allocations- COMMENT NPPF Paragraph 69 sets out small and medium sized sites can make an important contribution to meeting housing requirement. These sites are often built-out quickly. It is noted that non-strategic sites have been allocated through Draft Policy SA Policy 1. However, there are few sites of 100 – 200 units whereby additional benefits can be accommodated and delivered as part of planning consent. As set out above, it is considered that the DDC's Spatial Strategy is too reliant on the delivery major allocations and other larger sites. Therefore, it does not meet the requirement (b) set out at NPPF paragraph 16 which states that plans should be: "Prepared positively, in a way that is aspirational but deliverable". Instead, the Local Plan should identify further medium sized sites of 100-300 units which are able to be deliver quickly and provide wider community benefits. These type of development could be provide across Local Centres and Larger Villages allowing for gaps in housing and infrastructure needs to be met across the District.

Recommendation: DDC reassess their Spatial Strategy and provide more medium sized sites across Local Centres and Larger Villages. This will ensure that the housing need is deliverable. The Local Plan does not seek to allocate any sites within Ash and instead DDC is relying on housing allocations in the neighbourhood plan. NPPF paragraph 30 states:

Once a neighbourhood plan has been brought into force, the policies it contains take precedence over existing non-strategic policies in a local plan covering the neighbourhood area, where they are in conflict; unless they are superseded by strategic or non-strategic policies that are adopted subsequently. The Ash Neighbourhood Plan was Made in 2021 and prepared with the currently Adopted Local Plan. Once adopted, the Local Plan will supersede the policy within the Ash Neighbourhood Plan. DDC needs to ensure that the sites allocated within the Ash Neighbourhood Plan do not conflict with the newly proposed policies within this draft Local Plan or updated national policy to ensure the allocated sites are deliverable. Therefore, DDC should undertake a comprehensive assessment of all sites available within Ash to ensure the most suitable and deliverable sites are allocated within Local Plan.

Recommendation: DDC undertake an assessment of all sites within Ash and allocated site that are able to deliver housing and employment opportunities to meet the needs of the district in accordance with the draft policies set out in the Local Plan Review.

Draft Policy PM1 – Achieving High Quality Design placemaking and provision of Design Codes.- COMMENT BDW is generally supportive of the overarching vision set out within Chapter 4 of the Draft Local Plan. They support DDC's ambition to make Dover District a: "place of aspiration, providing outstanding opportunities for sustainable living". The determination to create places that are well-design and well-built is also supported and should be the basis of new development proposals coming forward in the District. BDW maintain a firm commitment that their development at the Land North of Sandwich Road will be a high quality, landscape-led development that provides a healthy and sustainable environment for future residents. Concern is raised regarding the reference to local design codes. Whilst the notion behind a local design code is supported to ensure that development is seamlessly integrated into the existing built form, it should be noted that design code can also be overly restrictive. This can result in a loss of architectural freedom resulting monotonous design if there is not enough flexibility. It can also negatively affect the viability of a scheme. As such, any design codes should allow for flexibility. It is noted that the Draft Design Policies do not include reference to design codes and instead reference a Local Design Guide which is considered more appropriate.

Recommendation: Design codes are not taken forward and instead a Local Design Guide is produced which is used to inform development proposals but not restrict them.

Draft Policy PM3 – Providing open space - COMMENT PM3 sets out the requirements for the creation, enhancement and management of open space in new development, including parks and gardens, amenity greenspaces, allotments and equipped play spaces. Part C of the policy requests that a 'Governance Strategy' should support developments that propose open space which seeks to set out how the open space will be managed and maintained. BDW agree with the importance to ensure the management and maintenance of open space and would normally detail how it will be managed via a planning obligation. It would be premature to enter into such agreements with the potential stakeholders before a planning application is determined and as such, it is recommended that this policy is updated to reflect that a scheme to secure long term management and maintenance of the open space must be secured via planning obligation.

Recommendation: Draft Policy PM3 is updated to reflect that a scheme to secure long term management and maintenance of the open space must be secured via planning obligation. Draft Policy CC1 – reducing Carbon Emissions - COMMENT Draft Policy CC1 states:

In the event that the Future Homes Standard is required to be delivered through the planning system, all new residential dwellings must achieve, as a minimum, a reduction in carbon as required by this Standard The Government's response to The Future Homes Standard (January 2021) sets out that the Future Homes Standard will be delivered through amendments to the Building Regulations. In June 2022, some of these amendments came into force. Given this, it is not justified or effective to include a policy that is covered by other relevant legislation. The reference to the Future Homes Standard should be removed from the policy.

Recommendation: Reference to the Future Homes Standard is removed from Draft Policy CC1.

Draft Policy CC8 – Tree Planting and Protection - COMMENT Draft Policy CC8 requires a minimum of two new trees to be planted for each new dwelling with a presumption of these to be planted on site. Where it is demonstrated that the new trees cannot be provided on site a financial contribution will be required. BDW support the delivery of new trees on site and respect the requirements of NPPF paragraph 131. However, concern is raised over the impact to design, landscape character and viability in relation to such a prescriptive requirement. It is also not clear whether these trees are sought over and above the national requirement for tree-lined streets. In respect of design, incorporating large amounts of trees on small - medium scale development with limited strategic open space, could directly impact the developable area and consequently, impact on placemaking aspects. Furthermore, significant tree cover within a residential area can have impacts to daylighting levels and residential amenity. When considering landscape character, the NPPF paragraph 130 (c) states that planning policies should ensure that developments “are sympathetic to local character and history, including the surrounding built environment and landscape setting, while not preventing or discouraging appropriate innovation or change (such as increased densities)”. Trees make an important contribution to the landscape setting and have the ability to significantly change the character of an area. Thus, Draft Policy CC8 should take this into account. Whilst the Whole Plan Viability Study (2020) notes the two tree requirement at paragraph 8.52, the viability assessment is not clear how the inclusion of these impacts the development costs. BDW have concerns that this level of planting could impact the viability of a development alongside other policy requirements. Finally, where a financial contribution is sought, the contribution should be in accordance with the tests set out in NPPF paragraph 57. With the above in mind, it is considered that the policy should be updated to encourage two trees to be planted where there will be no design, landscaping, viability or other issues caused by doing so. A reasonable and proportionate contribution for off-site planting will be requested where on-site planting cannot be achieved on site unless there are viability issues which prohibit this.

Recommendation: Draft Policy CC8 is updated to read:

- a) A minimum of two new trees will be required encouraged to be planted for each new dwelling (this does not apply to applications for conversions and changes of use to residential), and one new tree will be required encouraged to be planted for every 500sqm of new commercial floorspace created.
 - b) The planting of these trees should not impact the design quality or landscape character of the area.
 - c) Trees should be native Kent species, of local provenance from a bio-secure source, and should be standard size in specification as a minimum.
 - d) A presumption that the trees will be planted on-site rather than off-site will apply. For major development where it is demonstrated that new trees cannot be provided on-site, a proportionate financial contribution will be required towards the planting of trees off-site in accordance with the requirements of the Council's Green Infrastructure Strategy unless there are demonstrable viability concerns.
- Additionally, the Council should seek to clarify the relationship of these trees to the national requirement to deliver tree-lined streets.

Conclusion These representations to the Dover District Council (DDC) Regulation 19 Local Plan Consultation is written on behalf of BDW Developments Plc in relation to the North of Land Sandwich Road in Ash. This Site is available, developable and deliverable. This Site is an entirely sustainable medium sized, residential extension to the urban area of Ash and will make a valuable contribution to the village in the long term. This document provides representations on the Regulation 19 Local Plan and includes observations on the supporting evidence base. Several recommendations have been made throughout these representations. Notably, it is considered that DDC should reconsider their reliance on larger allocations given the delivery history in these locations. Instead, DDC should seek to allocate further small to medium sites for that can be delivered quickly whilst also providing additional benefits to the local area. A reassessment of the Land North of Sandwich Road (ASH006) should be undertaken as part of an updated Housing and Economic Land Availability Assessment (HELAA). This reassessment should take note of potential improvements, intensification and change. It should be positively prepared and take into account new planning permissions, changing legislation, the technical information submitted with this representation and the Council's own evidence Base. Savills and BDW reserve the right to comment on any further local plan consultation (if required). Once at examination, BDW request to attend and speak at the relevant hearing sessions.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Paragraph 4.215, Figure 4.7 and table 4.5
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Regulation 18 Local Plan identified 'Land at Monkton Court Lane, Eythorne as a residential allocation, with estimated capacity of 20 dwellings.' (Policy EYT001)</p> <p>The reason for the allocation were;</p> <p>"Eythorne and Elvington are currently identified as villages in Policy CP1 of the Core Strategy (2010). However the recent Settlement Hierarchy Review conducted by the Council shows that both these settlements score well in relation to the number of services and facilities provided. Given this, as part of the Council's strategy for the rural area it is proposed to grow the villages of Eythorne and Elvington to create a new local centre in the District.</p> <p>EYT001, EYT008 and EYT019 have also been identified as suitable sites in the HELAA that would provide a logical extension to the existing settlement and are also proposed as housing</p>

	<p>allocations in line with the housing growth strategy."</p> <p>The site was removed from the Regulation 19 Local Plan. The sole reason was;</p> <p>"EYT001 – Land at Monkton Court Lane. Site was proposed for 20 units. The site is covered by a surface water flow path which constrains development here so has been removed."</p> <p>No evidence was given to justify the removal of the site.</p> <p>The promoters of the site have commissioned a Flood Risk Assessment of the site which concludes;</p> <p>"It is proposed to construct 20 new dwellings on this greenfield site with associated accesses and hardstandings.</p> <p>Surface water will be discharged to a series of swales and soakaways on the site.</p> <p>The main flood risks are assessed to be from overland flow from land to the rear of the site, and exceedance of the on-site sewer systems</p> <p>Construction of a cut-off drain along the eastern boundary and regular maintenance of this and the other soakaways on the site should result in a low residual risk of these events happening.</p> <p>No additional flood risk will be created off-site, and indeed the development may contribute some betterment to the situation</p> <p>It is concluded therefore that the site can be satisfactorily drained and maintained flood free."</p> <p>A copy of the Flood Risk Assessment is appended to these representations.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>It is requested that Land at Monkton Court Lane Eythorne be re-instated as a residential allocation, with an estimated capacity of 20 dwellings. Draft policy as follows;</p> <p>"EYT... - Monkton Court Lane, Eythorne. Planning permission will be granted for proposals that:</p> <p>a) Accord with the policies in the Local Plan; and</p> <p>b) Address the site-specific issues and requirements for the site set out below.</p> <ul style="list-style-type: none"> - Site Estimated Capacity - 20 dwellings. - Boundary planting to create a landscape buffer, - Flood Risk Assessment required, due to risk of surface water flooding. - SuDs should be provided. - Transport Assessment, - Heritage Assessment and Archaeological Assessment required."
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>It is submitted that the decision to remove draft allocation EYT 001 from the regulation 19 Local Plan was arbitrary and unjustified. There is no evidence to support the sites removal. It is submitted that attendance at the examination allow a detailed consideration of the merits of the site and will assist the inspector in his/her deliberations.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Developments of land around Aylesham, Nonington and Elvington
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>What planning discussions have happened with Nonington Parish Council and equivalents for Aylesham and Elvington? Exhibitions and requests for comments but not proper conversations and discussions. You cannot call this cooperation. The Duty to Cooperate has not been fulfilled - also evidenced by the councils' objections and surprise at these plans.</p> <p>Despite the plan strategically saying that most development is needed in Dover and that it has an imbalance of housing and is unattractive, DDC has decided to inappropriately "promote" Aylesham now a large village, isolated with few amenities, to the status equivalent to Sandwich, a town that has developed over centuries and has many facilities and bus routes based on it. This is not justified and so the plan is not positively prepared.</p> <p>Roads around Aylesham, Nonington and Elvington have already too much traffic. Where are the assessments? The attached map shows how poor the road infrastructure is. the roads are narrow, bendy and almost all without pavements. There are v few bus services - none in Nonington. The plan is not sound as there would be far too much new traffic. So the plan is ineffective, not positively prepared and not justified.</p> <p>Where is the employment to come from? We do not need more space - there are empty units. Snowdown Colliery site is going to remain leased to the NCB Residuary Body and not developed - as confirmed by the owner. Even if it were to be released, the costs of development, whilst preserving key buildings and on this brownfield site, would not be economic. In the plan, this is a pillar of justifying the developments and the need for more housing but it is very tenuous to say the least - so the plan is unjustified and unsound.</p> <p>The population of Dover District and surrounding districts is pretty static. There is not the robust evidence to justify the degree of planned housing expansion. The plan is not justified or positively prepared. Large developments in East Kent provide housing which looks cheap to London boroughs which can place people they are responsible for into East Kent. We have seen this already in several places. Those placed are unlikely to bring prosperity to the region given their dependence on local authorities for housing. This is not serving the needs or wishes of the existing local population so on these two counts the plan is not positively prepared, evidenced or has there been cooperation with locally elected bodies like parish councils who are only too aware of relatively large influxes from London into new developments. It is also not effective as many of these people will not have the skills to fill employment needs.</p> <p>The description of one of the areas as a "Country Park" yet it has 420 houses allocated is disingenuous. Is this an attempt to allay concerns? The areas around Aylesham are also earmarked by Canterbury City Council for major development. It would turn the whole area into an isolated</p>

	<p>housing estate, most people commuting for work elsewhere. The lack of facilities risks widening inequalities as it would be not be attractive to people with the resources to live elsewhere.</p> <p>Given the lack of soundness of this plan, I doubt that it is legally compliant.</p> <p>This is not just nimbyism - we should be planning something that we ourselves could well imagine being keen to move into. I really doubt many DDC planners or councillors or plan inspectors would wish to move into the new estates in the proposed locations and with he lack of facilities that this plan envisages. From the heart - do you really think that this is what you want to do? Create a big housing estate of poorer people? Almost an East Kent ghetto? Large housing estates carefully and optimistically planned and built elsewhere have gone quite wrong for similar reasons - poverty and isolation.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I cannot see how the current plans can go ahead. There needs to be a rethink, ideally abandoning plans to turn this area predominantly into a large housing estate.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Positively prepared</p>

	<p>Justified</p> <p>Effective</p> <p>Consistent with National Policy</p>
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Due to the governments announcement 5/12/22 the plan is not positively prepared as the development needs must be reassessed. This means it is no longer justified as there now is the room without central government pressure to find reasonable alternatives. It is also not effective as the pressure put on local communities and existing infrastructure is unreasonable and means that it is not deliverable. The plan is also not consistent with NPPF 2021 as the many landscape and heritage assets in Dover District are being compromised by the level of unsustainable overdevelopment which the current plan has allowed.</p> <p>The Housing Growth statement that the aim is to , “provide a greater choice of high-quality housing to meet the needs of Dover districts’s growing population and changing demographic and address affordability issues”, does not seem internally consistent with the details provided in the plan which underestimates the evidence showing a large part of district population growth is due to aging. The details thus render SP 3 and SP 5 less effective and less sound.</p> <p>Under the current LDP developers have shied away from the badly needed regeneration of Dover and concentrated on building maximum profit, minimum affordability developments of large homes around the more desirable town of Deal and out in Whitfield. The supposed regeneration of Dover has resulted in another generic shopping centre and a more depressed high street and has not lifted the rest of Dover. The promenade area is uplifted but there seems to be little connectivity to the rest of Dover.</p> <p>The government department (DLUHC) decision that Dover needs 611 new dwellings a year and a minimum of 10,998 new homes between now and 2040 we find very incompatible with legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008, and unsound. We should be transforming existing housing stock into zero carbon homes as is happening in East Sussex, led by Lewes DC. Combining these numbers with 3.51 and the statement ‘76.7% of the new homes are on greenfield sites, while 23.3% are on brownfield sites’ is unsound and unacceptable to the public.</p> <p>We feel that our communities are being harvested by developers and our worries are not being heard or needs met in terms of infrastructure. Thanks to certain national newspaper Sunday supplements, Deal is desired as a 2nd home location by the wealthy from London and elsewhere. Holiday homes which spend most of the year empty in Deal, Dover and coastal villages of Kingsdown and St Margarets are stopping locals from buying affordable homes in their own area from existing housing stock.</p> <p>It must also be pointed out that at least one of the sites included in the 23.3% of brownfield sites is actually a site intended by SEEDA as local nature reserve having rewilded on unstable slag (only rendered stable by tree-planting, a site which DDC forgot to make a local nature reserve in 2004, and it has become a biodiversity hotspot well known to genuine ecologists nationally; Betteshanger Park.</p> <p>Central government in London, according to Housing Today is imposing a disproportionate amount of housing growth on Kent and the SE. There is a grievous lack of democratic accountability across Kent. So the chances of protecting Kent, of achieving a Growth Strategy that creates climate-friendly jobs and suitably sized, suitably-priced zero-carbon homes for the next generation of local families, are not good. The space available for infrastructure, functions well for compact coastal towns of the size that Deal / Walmer and Sandwich were 5 years ago.</p> <p>The level of greenfield overdevelopment which has been disastrous under the current weak LDP is putting Deal infrastructure under strain now, so in-fill should make up the majority of the allocations for Deal and that the housing growth specified for District Centre of Deal and around its boundaries needs to be stopped or radically reduced. Either or both of SAP 15 / SAP 34 would destroy the only road access alternative for diverted traffic. (See detailed comments under SAP 15/ SAP 34 below). Housing Growth that threatens gridlock, blocking off a conurbation of 30,000 from access by emergency vehicles, commuters, school buses is not sustainable housing growth and is very unsound.</p> <p>3.29 I note and welcome a degree of shift from the Reg 18 draft, in that more sites have been selected with a view to using ‘existing infrastructure, facilities and services, with a greater professed purpose to ensure development contributes to the sustainability of local communities and services’.</p> <p>I note with appreciation both the increase in the number of sites in Dover town SAP 6 – SAP 13, and the SAP 26 Former Snowdown Colliery, Aylesham near a rail station for example. It should be possible to state a determination to ‘make best use of brownfield – non-rewilded – land) without giving developers the opt-out qualification ‘wherever possible’.</p>

	<p>On Five Year Housing Land Supply. 3.39 Having stated the Council had 6.03 years land supply plus a 5% buffer; it is not sound, effective or legally compliant to then state 'the provision of additional sites within the first 5 years of plan period is needed to ensure resilience and promote flexibility;'.! Instead of ensuring resilience, it will create exactly the destructive suburbanisation of a rural district that many, many of the resident electorate are most worried about.</p> <p>3.46 It is the conspicuous lack of a secondary school in Aylesham that prevents Aylesham becoming the small garden town planners aspire to. The provision of a secondary school by 2028 should be a condition of SAP 23. There seems to be a complete lack of planning in the statement that now</p> <p>3.48 Many, many of the current residents of ex mining village Elvington were / are dependent on buses that have recently (2022) been cut, (following KCC cut to bus subsidies) to get to work in Canterbury, Folkestone, Sandwich, Thanet or Dover, or to get to secondary school, or to get to doctors, or to shop. These people had environmentally sustainable public transport service that has been cut. KCC is saying it is looking at potential bankruptcy in 2023, so promises of new services and facilities are met with some disbelief. The selection of this site is ONLY sound with cast-iron conditions to provide all of the services we mention below, including new drainage infrastructure. Council housing in Elvington has been subject to flooding from the sewage system, long overdue for replacement. As in Dover deprived wards, there are unhealthy EPC EFG homes in Elvington that need to be transformed into zero carbon home to lift residents out of fuel and therefore food poverty.</p> <p>3.68 Windfall. Unless existing settlement boundaries are respected, there is suburban ribbon development creep from field to field to field. To render the plan sound it should contain a statement 'Previously existing settlement boundaries will be respected, until such time as town and parish councils may have agreed changes with Dover District Council, in accordance with the principles of Localism Act 2011.' In the current economic climate, it seems very naïve to hope that 'new housing in villages can help them retain existing services such as public transport, retail (many pubs are going under because lack of staff and sky high energy bills) and schools'. Indeed we have lost a large proportion of our bus services in the district.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Push back to central government and demand a reduction in the housing allocation of 10,998 new homes. Now possible after announcements 5/12/22 from Prime Minister.</p> <p>Regenerate Dover as a priority, retrofitting existing housing stock to provide well insulated renewable energy powered homes. Windfall development only should be allowed in Deal, Sandwich and surrounding villages. Create a self sufficient sustainable garden village at Aylesham with secondary school and green infrastructure and homes far beyond future homes standard.</p> <p>Provide better facilities and transport links for Whitfield to ensure that homeowners are not car dependent.</p> <p>Lobby central government for changes to the rules for ownership of second homes. Priority should be given to locals.</p> <p>Make the wording in the plan stronger in favour of brownfield sites eg 3.32 <i>sufficient amount and variety of land</i> should also state that brownfield must be used before greenfield as per stated in NPPF 21.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Paragraph 4.215, Figure 4.7 Map of Site Allocations in Eythorne and Elvington, Table 4.5 Site Allocations in Eythorne and Elvington.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Plan fails to allocate Site EYT016 Land at Church Hill, Eythorne for housing development. Site details are submitted in the Maps, Plans and Images document accompanying these comments. The Council's Evidence Base shows that the site was omitted for one reason only, namely the assessment of a heritage officer who said it would harm the setting of the Listed Church. In reality, there is scope to accommodate 17 dwellings whilst safeguarding the setting of the church and, moreover, ensuring that it has a viable long term future. The following facts are pertinent:</p> <ul style="list-style-type: none"> • Site EYT016 extends to 0.8 hectares of which approximately 0.6 hectares could be developed to provide 17 dwellings. • The location enjoys all of the sustainability credentials of the settlement and lies very close to the village primary school. • Although identified by the LPA as a greenfield site it has in fact been in use for many years. There are three elements: the Rectory and its very large garden, the dilapidated hall/resource centre, and open space used for ancillary purposes, including car parking and events. • The Church is hidden from the site by a dense screen of trees with a minimum depth of 17 metres. • The LPA granted planning permission in 2018 for the development of 9 detached houses on land immediately south east of the church (PP Ref 17/00246/DOV). The development was deemed to be wholly consistent with NPPF and the local policy framework. <p>The hall on the site is in very poor condition and at the same time the church is in need of significant investment. It is a special building being a complete C12th structure which has not been extended apart from a small porch. It is Listed Grade II*. The strategic response is to upgrade the space within the church to provide a community hub capable of meeting a vast range of community support activities, ranging through mother and baby groups, pre-school groups, cafe for retired people, bereavement support, community meeting spaces, brownies/cubs, etc. Such an undertaking would demand very substantial resources, so the concept is to develop social housing on the EYT016 site with an element of market housing which would deliver the funding for the community hub. The effect on the Listed Building would be to give it a new lease of life by bringing strengthening sustainable long term usage.</p> <p>So, the benefits may be summarised as:</p> <ol style="list-style-type: none"> 1) Efficient and appropriate use of previously developed land. 2) Delivery of social housing. 3) Delivery of market housing. 4) Safeguarding the setting of the Listed Building. 5) Upgrading the Listed Building into a community hub, thereby providing it with a long-term sustainable future. 6) Strengthening the social infrastructure of the village.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Allocate Site EYT016 Land at Church Hill Eythorne for residential development with an indicative capacity of 17 dwellings. The normal range of S106 obligations would be required together with a very substantial contribution towards church works to deliver a community hub within the Listed Building.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Eythorne and Elvington
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	There were a broiad range of concerns about the Evidence base used in the Settlement Hierarchy change and in the absence of detailed traffic modeling data on traffic from Adelaide Rd heading north to the A2.

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

DDC 'restructured' the settlement hierarchy in December 2020, to reclassify Elvington as suitable for Greenfield development. DDC confirm this is informed by NPPF guidance that 'in the first instance, the principle of sustainable development, and which requires local planning authorities to ensure that, wherever possible, new development is located in the most sustainable locations'. The evidence for sustainable transport delivery in out of town greenfield sites overwhelming shows greenfield developments are highly environmentally destructive, car use reliant and land hungry. This reclassification ignores large sections of (applicable at time of exercise) NPPF 2019 guidance including paragraph 84 and 102 which states 'Transport issues should be considered from the earliest stages of plan-making and development proposals, so that:.a) the potential impacts of development on transport networks can be addressed; d) the environmental impacts of traffic and transport infrastructure can be identified, assessed and taken into account' ONS journey to work Census data for Elvington shows that 95.8% of journeys were made in cars, vans and motorbikes while only 2.7% were by bus, DDC fail to comply with this NPPF guidance.

1.0 Summary

Top down housing targets, geography and an historic underinvestment in the strategic road network have created genuine constraints in the Dover District. Nevertheless, an LDP where 76% of all proposed housing is on greenfield sites is inherently unsustainable.

From the loss of irreplaceable agricultural land and habitat, to reinforcing the district's car dependency by creating greenfield sprawl that will significantly change the rural character of the north west of Dover District, DDC's Reg 19 LDP DDC's will deliver the wrong houses in the wrong locations. It won't improve the environment or mitigate climate change. If the purpose of the planning system is (as set out in the NPPF) to ensure that sustainable development is pursued in a positive way, we believe this plan cannot be considered to be justified and it will not enable the delivery of sustainable development.

1.1 Objective

Overarching concerns about the sustainability of the adopted land allocation strategy were raised in our Reg 18 comments (see attached). Our Reg 19 response is focuses on mitigating the traffic impacts from the proposed development that (as a small village located on one of the 2 main rural routes between the A256 / 7 and the A2) will have a direct, severe and devastating impact on our community. These impacts are outlines in Section 2.0 below.

Based on our experience on Aylesham (DOV/07/01081 and DOV/13/0120), Nonington Parish Council believe that the site-specific impact focus of S106 means it is not an effective framework for mitigating cumulative impacts from multiple spatially distributed developments on a rural road network. It is impossible to disaggregate traffic flow to attribute the increase to specific site.

We note that Reg 19 Housing Policy 4.21 states that cumulative impact all sites allocated in this Plan on common road links must be considered. However, in judging how this might work in practice, we reviewed how the cumulative traffic impacts from the current plan period developments (in Aylesham, Sholden, Woodnesborough, Sandwich, Sholden, Eastry, Betteshanger, Discovery Park) have been considered in relation to the C195 route on which the village is located. To date only Aylesham has been required to measure traffic impacts (DOV/13/0120 – Variation of Conditions 76 of Planning Permission DOV/07/01081)' to identify the traffic impact arising from the cumulative occupation'. Conducted in April 2018 with 380 of 447 units occupied, the traffic consultants, MLM, concluded that no impact could be attributed to the development because the identified increases were in line with ONS data showing road traffic increased by 29% from 1990 to 2018. It is noteworthy that greenfield housing, like that Aylesham, with unrealistic assumptions of self- containment were – in turn – identified as a key driver national car use increases.

Combined with our concerns about the robustness of the employment, sustainability and traffic baseline evidence (outlined below), we are seeking effective mitigation enshrined in a Local Plan policy rather than deferring this to a S106 negotiation at the planning application stage.

1.2 Basis for Objecting

1.2.1 Inconsistent and Insufficient Traffic Evidence undermining Plan Soundness and Sustainability

MHCLG's guidance states that an LDP should be based on robust transport evidence base collected in advance that should encompass: the cumulative impacts of existing and proposed development on transport networks, a review journey purpose and accident records as well contextual data such as travel to work areas in order to measure the impact on the locality in economic, social and environmental terms.

I. Detailed traffic evidence has been collected for the DDTM area in the REGULATION 19 TRANSPORT MODELLING FORECASTING REPORT but the strategic housing and employment sites outside the DDTM area have only been modelled 'in significantly less detail'.

The result is that the area bounded by A2, B2046, A256 and A257 has significantly less robust traffic evidence, undermining the scope for an effective analysis of cumulative impacts of existing and proposed development on transport networks in this area. This area includes Sandwich, Aylesham, Elvington, Eythorne, Eastry, Wingham, Shepherdswell and Ash and has 1554 of the Reg 19 plan new dwellings allocated within it (Source: Distribution of Housing Site Allocations by Settlement). This accounts for 78% of all Dover District's Reg 19 housing allocations outside Dover and Whitfield. This area also encompasses the strategic employment sites at Discovery Park and the Aylesham Development Area. Detailed Analysis of Traffic Evidence is set out in Section 4.1

II. The sustainability evidence base uses 'unrealistic assumptions about self-containment' and unfounded onsite employment assumptions that are not supported by contextual travel and commuting pattern data. For example in SA 7.51 LUC incorrectly include Snowdown Colliery as a strategic site inflating site employment sustainability and under estimating outbound commuting from Aylesham.

III. There are inconsistencies in the sustainability evidence base. For example SA Section 6.207 states that Eythorne (and Elvington) has 'relatively good access to existing local rail...services'. Eythorne railway station closed to passenger traffic in 1948.

IV. The Office of Road and Rail passenger data for Aylesham between 01/01/2016 – 01/01/2020 show rail journeys per head of population in Aylesham fell as the first phases of the 'garden village' were occupied. Transport in Aylesham has actually become less, not more sustainable.

1.2.2 The Duty to Co-operate

DDC were only made aware of Canterbury City Council's (CCC's) Reg 18 plan for 3200 houses north of B2046 and the 420 dwellings on land contiguous to SW Aylesham in September 2022, shortly before the publication of their Reg 19 plan.

We haven't seen a statement of common ground or any evidence of the active ongoing constructive engagement and co-operation required to maximise the effectiveness of local plan in the context of strategic cross boundary matters or of any coherent strategy based on agreements between them.

As all authorities are required to reach agreement on strategic matters before submission we expect this is under review but – based on the absence of co-operation evident to date – we question whether the legal duty to co-operate can be complied with in a meaningful way.

1.2.3 Scale of Cross Boundary Development Impact on DDC Reg 19 Evidence Base and Plan Soundness

Although DOV/07/01081 and DOV/13/0120 promoted Aylesham as a 'Garden Village', in their Reg 19 plan Dover District Council propose that Aylesham becomes a small Garden Town of 15,000 (LDP 4.196 and 4.199). Canterbury City Council propose another 3,620 dwelling adjoining Aylesham to create a single 'new town' or Freestanding Garden City with a population of 25-30,000 people. A development of this scale requires realistic assumptions about self-containment, a strong foundation of employment and appropriate infrastructure to avoid creating an unacceptable severe cumulative impact on adjacent road network.

The consideration and mitigation of transport impacts is an essential part of Government's wider policy objectives for sustainable development. The objectives set out in NPPF para 111, DDC's Reg 19 Policy T12

10.8 can only be effectively delivered against a robust evidence base that provides the clear benchmarks and thresholds that a planning application can be measured against.

Canterbury City Council's stated Reg 18 position is that the traffic impacts of their proposed new town joining Adisham to Aylesham are mitigated by the planned south Canterbury bypass which, they claim, will reduce traffic impacts as measured across their district. No evidence has been provided to establish how this will mitigate the impact of 3,620 additional dwellings on the rural road network in Dover District.

As highlighted in 1.2.1 (i) above, in relation to DDC's Reg 19 plan, we have existing concerns regarding the absence of a robust transport evidence base for the area bounded by A2, B2046, A256 and A257, collected in advance and benchmarking existing traffic levels so the cumulative impacts of proposed developments on transport networks can be subsequently measured.

The additional scale of Canterbury's proposed development and proximity to Aylesham and the District's boundary, means that DDC's Reg 19 plans is not positively prepared as it is not informed by agreements with other authorities or consistent with achieving sustainable development.

It is not justified as it is clearly not based on proportionate traffic or sustainability evidence.

We would argue that this also compromises plan efficacy given the absence of effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.

2.0 Location - Background

Nonington is set along a 1.2 mile stretch of a rural road with constrained widths, a number of single lane pinch points and long stretches (including in the heart of the Easole Conservation area) with no pavements. This route connects Sandwich and the A257 to the A2. A 'rat run', the C195 is badly impacted by the cumulative impact of traffic from Sandwich, Deal, Eastry, Woodnesborough, Sholden (via Drainless Road, Heronden Rd and Thornton Road), Elvington and Aylesham, with pre-pandemic baseline traffic of 90,800 vehicles a month. (MLM / K & M SURVEYS 2018 - 7 day total (East and West) = 20,888 traffic movements)

KCC Highways confirm Holt Street, Easole Street and Sandwich Road route (Linking B2046 and Sandwich) is classified as the C195 and is "not a secondary route, as defined in our road hierarchy, and 'for reasons of various highway constraints along the corridor". It should, therefore, be protected from the cumulative or inappropriate traffic impacts. However, as detailed in item 1.1 above, in the current plan period no actual measures have been put in place to mitigate development traffic impacts on the C195 route.

We have had several accidents, 6 road accident deaths on the C195 since 2014 and multiple crashes in the village mostly unrecorded by the police.

Multiple single lane pinch points with no pavements. On street parking and private driveways used as passing points

We have a problem with speeding in excess of the speed limit of 30mph. MLM's s106 surveys 2014 and 2018 showed Holt Street Nonington speeds heading SE 38 mph and NW 37 mph.

Applications directly increasing C195 local traffic in the current LDP:

Aylesham 1320 dwellings (DOV/07/01081), Sholden 230 residential dwellings (DOV/10/01065), Sandwich 120 residential dwellings (DOV/19/00243), Hammil 29 residential dwellings (DOV/16/01026). Woodnesborough 24 residential dwellings (DOV/11/00965) with a number of application to be decided including a 120 bedroom hotel and 210 residential dwellings in Betteshanger Country Park.

3.0 TI1 - Sustainable Transport and Travel

Item 10.1 seeks to 'facilitate a shift away from petrol and diesel powered vehicles over the lifetime of the Plan and promote sustainable forms of transport and travel'.

The evidence doesn't support the deliverability of this goal on a Reg 19 housing allocation with over 76% of all new dwellings on greenfield sites. These are known to have significantly higher car dependency than brownfield sites. If we take Aylesham as an example, DOV/07/01081 and DOV/13/0120 committed to the expansion of Aylesham Garden Village and promoting sustainable transport predicated on the rail service. Yet, the Office of Road and Rail passenger data show rail journeys per head of population in Aylesham dropped between 01/01/2016 – 01/01/2020. Despite the 'garden village' aspirations, transport in Aylesham has actually become less, not more sustainable.

Public transport, cycling and walking uptake is highest in metropolitan and dense urban areas where use of public transport is typically 35%-50%. This falls dramatically in greenfield developments in ex-urban and rural sites. Research also shows significant sustainable transport adoption variations exist within settlement types driven by socio-economic and topographical factors. (Source - Bennett Institute for Public Policy at the University of Cambridge 2020.) None of this appears to be considered.

KEY FACTS

Elvington and Whitfield don't have rail connections. Stagecoach have cancelled the 38 bus service.

ONS Travel to Work Census data for Elvington showing 95.8% of journeys were made in cars, vans and motorbikes while only 2.7% were by bus.

ONS Travel to Work Census data for Whitfield, Elvington and Aylesham combined: 82.5% of all journeys were in a Car. Only 5.8% on public transport.

The 'Dover Fast Track' represents the largest infrastructural investment in the district. At £50-£70 million, is it an effective use of scarce capital investment or a white elephant?

ORR Passenger entries and exits for Aylesham data shows passenger numbers per head of population dropping Jan 2016- Dec 2020.

o Passenger entries and exits increased by 19.6%. 2016-17 to 2019-20.

o Aylesham Population increased by 30% over the same period.

NOTE _ 20-21 data discounted because of Covid. 2016 Population=4,980. By March 2018, 493 new dwellings had been completed. Estimated mean new dwelling occupied by 2019- 2020 = 500. Estimated population increase = 1,500.

Aylesham Elvington Whitfield Combined

Train 74 (4.1%) 60 (3.06%) 29 (1.4%) 2.3%

Bus 66 (3.6) 49 (2.5) 86 (4.3) 3.5%

Car/Van 1130 (62.0) 1544 (84.9) 1411 (69.7) 72.2%
Passenger in car/van 163 (8.9) 141 (7.8) 182 (9.0) 8.6%
Motorcycle 18 (1.0) 45 (2.5) 30 (1.5) 1.7%
Bicycle 29 (1.6) 19 (1.0) 34 (1.7) 1.4%
Taxi 0 (0) 9 (0.5) 6 (0.3) 0.26%
On foot 201 (11.0) 89 (4.9) 110 (5.4) 7.1%
Source ONS Census Data Travel to Work 2001

Conclusion

This policy cannot be said to be 'positively prepared' when the evidence shows it is not consistent with achieving sustainable development;

This policy cannot be said to be 'justified' as it is not based on proportionate evidence if we accept the PAS definition as 'evidence obtained with an understanding of the way in which issues arise within a plan area to enable an understanding of the issue/topic in question thereby leading to clear analysis and a consequential strategic or policy position within the plan'.

As non-planners, we are struck by the fact that plan making appears to focus on assigning 'sustainability' labels to plan policies without evaluating the evidence for how well these deliver in the real world. What is the local evidence that garden villages or towns actually deliver improvements in sustainable travel? Has the 900 house garden village expansion of Aylesham delivered the expected uptake of cycling and public transport use? Has the provision of employment space delivered the expected expansion in the local employment base, in shops, services, and local business employment (within new office space) capable of accommodating supporting 40% of the population? Or does the evidence show that it is a dormitory commuter suburbs – the antithesis of the Garden City idea.

Failure to assess the performance of policies risk creating confirmation bias and recycle poor policies that deliver poor outcomes. So is this plan policy 'consistent with national policy'? Does it enable 'the delivery of sustainable development in accordance with the policies in this Framework? Based on the evidence and judged against the policies set out in NPPF para7,8, 9 and 10 then the answer is no.

The absence of evidence is not evidence of absence. PAS state good evidence should contain reliable, objectively collected recent data and will not contain unjustified assumptions. If the evidence shows assumptions about 'self-containment' are unrealistic and that the offer of plentiful land for industry has not delivered the expected employment, then these are unjustified assumptions.

4.0 Reg 19 T12 - Transport Statements, Assessments and Travel Plans

In item 10.7 set out their goal of 'promoting the delivery of sustainable development' stating that 'Traffic generated by development should normally be targeted towards the primary and secondary route network in the District. Other routes should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements'.

Although KCC Highways consulted with DDC on policy (T12) they haven't published benchmark traffic levels or defined 'inappropriate' or 'unsuitable' traffic impacts because 'baseline conditions vary considerably from location to location'. Nor does NPPF para 111 provide a definition of 'severe' or 'unacceptable'. DDC also seek discretionary power over:

When or whether Transport Assessments and Travel Plans are required.

And to decide what constitutes a severe residual cumulative impact on the local highway on a case by case basis.

Without the robust benchmark data on existing traffic (as required by MHCLG and DDC's Sustainability Appraisal of Growth Options), it unclear how this will work in practice. Especially given the pressure to deliver on housing targets and the local government financial incentives to facilitate housing inherent the New Homes Bonus which we understand paid £1,728,587 to DDC in 2019.

The Reg 19 proposed Aylesham South and Snowdown sites are accessed directly from the C195 / Holt Street, which is also the direct route to the A2 from Elvington. This will increase our traffic issues.

While recognising the 'porosity' of the contiguous rural road network the traffic impacts from the proposed Aylesham site on to Holt Street, WSP data and modelling is restricted to the observation that 'Holt Street is not modelled but anticipated trips for Aylesham Development will leave the network here'.

No ACT data has been collected or for traffic heading North on Adelaide Road from Elvington to the A2 or from Aylesham heading south east to Sandwich, Discovery Park and South Thanet

PAS state good evidence should contain reliable, objectively collected recent data and will not contain unjustified assumptions. For the area bounded by the A2, B2046, A256 and A257, we believe the patchy 2018 ACT traffic evidence fails this test as it does not include:

1. Disaggregated SERTM data.
2. Node Impedance Calculation (ICA)
3. VISUM Network Map of existing and proposed roads
4. Detailed benchmark capacity PCU per Lane per lane data for Links types including for Rural Roads and Minor Road Rural Village (30mph).
5. Education Cat Trips prior matrices .

In assessing whether the Reg 19 sites in Aylesham and Elvington likely to result in inappropriate levels of traffic generation or unsuitable traffic movements' on the C195 route, we reviewed the following data to establish the likely impact:

2011 ONS Census data,
 ONS - Nomos data, labor market statistics and DataShine ESRC BODMAS conclusions in the Sustainability Assessment,
 WSP's DDTM and Reg 19 traffic data,
 the Office of rail and Road Estimates of station usage and
 Onsite employment assumptions
 Education commuting data.
 AA Route Planner

The key findings are itemised in Section 4.1 below.

Reg 19 TI2 - Conclusions

Reg 19 SA Appendix B confirms the District's residents 'rely heavily on cars to...access employment, education, amenities and services' and predicts an increase of commuting from Aylesham to Sandwich (the district's 2nd commuting hub) as well as to Thanet and Deal. In addition to reduced onsite employment at Aylesham (reduced in WSP modelling from 1013 in Reg 18 to 263 in Reg 19) and the absence of any direct public transport links to Discovery Park, Deal or Thanet; the absence of Secondary education facilities and the primary education capacity issues in Aylesham will also continue to drive increases in commuting road traffic on the C195.

The conclusions are clear, Aylesham will increase traffic on the surrounding rural road network but what is not clear is how DDC propose to deliver their goal of 'promoting the delivery of sustainable development' or ensure 'Other routes should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements'.

DDC have failed to engage with the conclusions from existing evidence base or commission a sufficiently robust traffic data for the area bounded by A2, B2046, A256 and A257 containing >78% of all Dover Districts Reg 19 housing allocations outside Dover and Whitfield. Consequently there are no clear thresholds against which future applications can be measured. If, as a result, unsound policies are included in the LDP, then no subsequent s106 developer contribution led mitigation will be achievable.

Therefore, we conclude the policy is unsound because:

1. This plan is not consistent with achieving sustainable development and therefore cannot be called positively prepared.
2. Ignoring the area-specific evidence itemized in 4.0 and below, this policy cannot claim to be based on proportionate evidence and., so, cannot be considered justified.

4.1 Traffic Evidence Summary

1. Despite the Ministry of Housing, Communities & Local Government 2020 LDP guidance stressing the importance of contextual data such as travel to work areas (and that evidence needs to inform what is in the plan and shape its development rather than being collected retrospectively). Although referenced at a District level in the Sustainability Assessment, none of this contextual or empirical evidence has been considered in the LDP strategic site allocation process in relation to the impact of Aylesham and Elvington on the road network.

2. From ONS data to SA commuter patterns and to SHMA 2017 all highlight a strong trend of out-commuting. ONS data shows high car reliance in all major strategic site locations.

3. WSP's DDTM (Reg 18 Traffic Plan Assessment 2020 / Regulation 19 Transport Modelling Forecast Main Report or Appendices) report conducted detailed modelling of the Dover and Deal traffic. Other areas were 'modelled in significantly less detail'.

4. Despite recognising the LDP will 'lead to large increases in flow' in Aylesham, WSP's analysis is limited to a handful of ATC's (automatic traffic counters) on the B2046 1n 2019. WSP's report offered no conclusions on the area north of the A256 as it was outside the DDTM area. Although concerns were raised at Reg 18 no new traffic data or modelling has been introduced at Reg19.

We understand KCC Highways have 'requested projected development flows leaving the currently modelled areas in that direction to sense check on any need to extend the models'. However, given the site-specific impact focus of S106 means it is not an effective framework for

mitigating cumulative impacts from multiple spatially distributed developments on a rural road network, we believe an specific LDP policy is required.

5. 'Critical locations on the road network with poor accident records should be identified in order to determine if the proposed land allocations will exacerbate existing problems and whether highway mitigation works or traffic management measures will be required to alleviate such problems. The accident records should be compared with accident rates on similar local roads'. (MHCGL guidance on traffic evidence for LDP)

There have been 4 deaths on Holt / Easole Street within 1.5 miles of the Aylesham Road junction. How many deaths are required in order for Holt Street to qualify as having a poor accident record and to be included in the detailed traffic modelling?

6. The Elvington data consists of ATC and manual data counts. By citing proximity to A256, the implicit study assumption is that the A256 is the primary route used. No empirical data collected on the traffic heading to the A2 / M2 / M26 or M25 from Elvington.

7. WSP recognised the porosity between the B2046 and the adjacent rural road network, yet provided no analysis of (1) the rural road capacity restrictions or (2) of baseline cumulative traffic from development to date or (3) the projected increase on the road network from the LDP.

8. According to WSP, Highways England approved matrix information from the South East Regional Transport Model (SERTM) used by WSP in Deal was only disaggregated using the 2011 Census data for the DDTM area. As noted in 2.2.13 of WSP's 2018 DDTM the SERTM data is very coarse and with no disaggregation would provide little insight into Elvington and Aylesham commuting patterns via the rural road network

9. There is an extensive resource of rural road network ATC data from Aylesham's s106 TA's (2007/ 2014/2018 etc.) that could have been consulted. KCC Highways confirm the ACT data used for Phase 2b of the Aylesham Village Expansion has not been considered.

10. WSP's observation on likely traffic impacts of proposed Aylesham Development on the rural road network is restricted to 'Holt Street is not modelled but anticipated trips for Aylesham Development will leave the network here'. WSP implicitly assumed all traffic for Aylesham will access and leave the site form Dorman Ave North. ATC and modelling evidence shows this assumption to be unsound.

11. In their Reg 18 comments on Aylesham KCC raised concerns over 'the impact of the development on the highway network, particularly as Aylesham has no secondary education provision so the need for travel by private vehicle for secondary school age children may be higher than in other areas of the district'. No modelling of the associated traffic impacts has been provided.

Note - During the development of the 2015 DTM and 2018 DDTM car trips which are made to schools were modelled by WSP. Despite the absence of a Secondary School no similar exercise has been conducted on

12. By highlighting the need to expand St Joseph's primary, KCC's Reg 19 comment identify the shortfall of primary places in Aylesham. Unlike in the DDTM area WSP has not modelled car trips which are made to schools for Aylesham or Elvington. There are 378 primary places in Aylesham for a current population of 6,000 with a further 630 houses proposed in this LDP. This is below the national average. As a result the pupils attend schools across the area. For example at Goodnestone & Nonington CE Primary School 43% of pupils come from Aylesham and 30% Elvington creating up to 4 car trips of 1-3 miles each per day.

13. KCC Highways informs us that education commuting will be dealt in a Transport Assessment. We have been unable to locate any education commuting evidence in the Transport Assessment evidence for (App no 07/01081) for either Phase 1 or 2 in Aylesham or a School Travel Plan as recommended in Managing Our Roads (DfT, 2003) and The Future of Transport – a Network for 2030 (DfT) White Paper, 2004.

14. In Reg 18 comments, KCC raised concerns regarding the additional flow anticipated on Shepherdswell Road due to the narrow, rural nature of the road. Holt Street / Easole St / Sandwich Rd are similar in terms of their physical constraints and traffic levels. Both are 'rat runs' between the A2 A256 and significant coastal settlements. In relation to application 19/00381, Richard Smith (Senior Development Planner - KCC Highways) accepted a reduced vision splay from 45m to 25 metres on Easole Street based on an independent highways report describing Easole Street as being a narrow road, 'in a rural location with a tight bend to the west and a junction to the east. The road has no footways, with high hedges bordering each side of the road, creating an extremely constrained environment. There is evidence of vehicles crossing the centre line; the markings are very worn and hardly visible'.

15. ORR Passenger entries and exits for Aylesham data shows passenger numbers per head of population dropping Jan 2016- Dec 2020.

o Passenger entries and exits increased by 19.6%. 2016-17 to 2019-20.

o Aylesham Population increased by 30% over the same period.

NOTE _ 20-21 data discounted because of Covid. 2016 Population=4,980. By March 2018, 493 new dwellings had been completed. Estimated mean new dwelling occupied by 2019- 2020 = 500. Estimated population increase = 1,500.

16. WSP's Reg 19 Traffic Report is based on the 2018 DDTM study which undertook a detailed analysis of the rural road network the other (western) side of the A256 using disaggregated SERTM data, Node Impedance Calculation (ICA), mapped out on a VISUM Network map. This established benchmark capacity PCU per Lane data for a range of defined link types including 'Rural Roads' and 'Minor Road Rural Village (30mph)'.

17. In their Sustainability Appraisal of Growth Options in the Dover District Council Local Plan Topic Paper: Overarching Strategy (Part 1) point 1.5. DDC undertook to 'assess growth options in terms its likely effects on environmental...using available evidence including commuting patterns, transport infrastructure, traffic congestion (and related air quality and carbon emissions issues)'. Although some data was considered, the detailed data was not considered when evaluating the impact of the Aylesham or Elvington sites

18. In the SA LUC use ONS - Nomos data, labor market statistics and DataShine ESRC BODMAS (using 2011 ONS Census data) to establish commuter patterns. Based on this the Reg 19 SA Appendix B confirms the District's residents 'rely heavily on cars to...access employment, education, amenities and services' and predicts an increase of commuting from Aylesham to Sandwich (the district's 2nd commuting hub) as well as Thanet and Deal.

19. DDC's LDP Sustainability Appraisal identifies Sandwich as the District's key centre for inbound commuting. The Reg 19 provision of employment sites in Aylesham have been reduced by 85% from 1013 jobs in Reg 18 to 263 jobs in Reg 19. (source WSP main Report (i) Reg 18 and (ii) Reg 19. Reduced onsite employment will increase site generated commuting traffic.

(NOTE The Reg 19 Sustainability Assessment has not been revised to reflect the 85% reduction of onsite jobs, calling its conclusion about Aylesham site sustainability into question).

20. The Local Plan (Reg 18 and Reg 19) Sustainability Appraisal for the proposed sites in Aylesham and Elvington is – for traffic purposes - limited to recording the proximity of proposed dwellings to a bus stop and / or train station. The ONS - Nomos data, labor market statistics and DataShine ESRC BODMAS conclusions in the Sustainability Assessment, analysis of car dependency and commuting patterns or journey to work data was considered on the site assessments. This appears to limit real world applicability.

21. None of the evidence base on car dependency in Greenfield ex-urban developments nor car-dependency and the commuting pattern evidence appears to have been considered.

22. SA Section 6.207 states that Eythorne and Elvington already have 'relatively good access to existing local rail and bus services'. However Eythorne railway station closed to passenger traffic in 1948. In response to our Reg 18 RFI DDC stated that the SA did not claim Elvington 'already have relatively good access to existing local rail and bus services'. However, this is a direct quote from the SA - 6.207. This claim is factually false but is a base assumption used to justify Aylesham and Elvington's compliance with SA 4: To reduce the need to travel and encourage sustainable and active alternatives to road vehicles.

23. MHCGL guidance on traffic evidence for LDP states 'Critical locations on the road network with poor accident records should be identified in order to determine if the proposed land allocations will exacerbate existing problems and whether highway mitigation works or traffic management measures will be required to alleviate such problems. The accident records should be compared with accident rates on similar local roads'. There have been 4 deaths on Holt / Easole Street within 1.5 miles of the Aylesham Road junction. How many deaths are required in order for Holt Street to qualify as having a poor accident record?

4.2 Base Data Availability

One problem we encountered is availability of the granular base data that forms the building blocks for the LDP traffic and commuting evidence. We can't find base data. For example

The Dover Transport Model (DTM) Local Model Validation Report November 2016 is not available. So we have to rely on DDTM for the base modelling data for additional trips zonal distribution.

In the SA LUC use ONS - Nomis data, labour market statistics and DataShine ESRC BODMAS (using 2011 ONS Census data) to establish commuter patterns. However, this data set is not available for review.

The SA conclusions suggest a data granularity (e.g. the availability of Aylesham to Deal commuting numbers), that is absent from the methodology employed in LUC's site-specific sustainability assessments. This would matter less were LUC's Reg 19 report not used inflated employment assumptions for Aylesham creating unsound sustainability conclusions.

4.3 Employment Evidence Driving Commuting

1. The Reg 19 SA 7.51 (Reg 19 Strategic employment allocation policies) and Table 7.6 include former Snowdown Colliery as a strategic site. This incorrect. Aylesham site employment has been reduced from 1,013 onsite jobs in Reg 18 to 267. The sustainability conclusions have not been reassessed. This clearly undermines the deliverability NPPF para 72 b.

2. DDC provided site employment estimates to both LUC and WSP for SA and Traffic modelling purposes. Aylesham's employment modelling conclusions in the 2022 SA are contradictory and misleading. They don't align with the WSP's modelling numbers, which reduced by 84% from 1,013 onsite jobs in Reg 18 to 267 on site jobs in Reg 19.

	<p>3. In the Reg 19 SA main report (3: 4.75, SA 3 - 7.160 and table Table 7.6) still cite Aylesham as a 2nd largest employment hub with Land off Holt Street identified as ++ positive effect against. Also true for Reg 19 Appendix B growth and spatial options findings by SA objective, which offer conclusions based on inflated on site employment numbers numbers In Appendix F Snowdown employment drops to a 'Minor positive (+)'. This looks like a revised assessment that hasn't then been added into the main report.</p> <p>4. Trip generation for employment sites (approach agreed with NH and KCC) the potential jobs were calculated using the SQM area of the site and dependant on the land use type an employment number was provided have not been used in the SA. As onsite employment is a key indices of sustainability:</p> <p>a. Why is the discrepancy in Aylesham employment number in the SA?</p> <p>b. Has the South Aylesham site's sustainability been reassessed by LUC to reflect the reduction in onsite employment?</p> <p>c. Why is WSP using a different employment assumption to LUC?</p> <p>5. Has the council assessed the financial viability of the development proposal for Snowdown Colliery? The land owner informs us their existing tenant has a substantial remediation liability and is unaware of any ongoing discussions about reassigning this not have they aware of any detailed financial backing that would fund the redevelopment of this site. Obviously a site needs to be deliverable. Has it passed deliverability benchmarking test to justify the site's continued inclusion in the LDP?</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Use robust evidence that is reliable, objectively collected recent data based on an understanding of the data collected and the characteristics of the plan area without relying on unjustified assumptions or unsupported assertions.</p> <p>Engage with the significant body of evidence that clearly shows that Greenfield sites is inherently unsustainable. From the loss of irreplaceable agricultural land and habitat, to reinforcing the district's car dependency by creating greenfield sprawl that will significantly change the rural character of the north west of Dover District, DDC's Reg 19 LDP DDC's will deliver the wrong houses in the wrong locations. It won't improve the environment or mitigate climate change. If the purpose of the planning system is (as set out in the NPPF) to ensure that sustainable development is pursued in a positive way, we believe this plan cannot be considered to be justified and it will not enable the delivery of sustainable development.</p> <p>Base the plan on a properly resourced and deliverable employment strategy that engages with local businesses to ensure that the plan can deliver the right employment, community facilities to make the Garden Village label actually signify a sustainable community rather than just sustainability washing to gerrymander an environmentally harmful planning outcome that will lead to a loss of irreplaceable agricultural land and habitat, reinforce the district's car dependency by creating greenfield sprawl that will significantly change the rural character of the north west of Dover District, DDC's Reg 19 LDP DDC's and deliver the wrong houses in the wrong locations.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 37
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The recent policy change on mandatory numbers for new housing means that individual developments for houses should be reviewed and that current plans are not sound, they do not comply with policy.</p> <p>The South east is under pressure and does not have the infrastructure to cope with the demands that new housing developments bring. It is one of the driest counties and so water stress will become a more serious issue.</p> <p>In shepherdswell access from the A2 is by two narrow lanes. Both are unsafe for pedestrians, cyclists and horses. There is nowhere local for people to ride. I often struggle to walk the 50 m from the village hall to the shop with my two dogs. There is no traffic calming and cars do not slow down.</p> <p>The many extra houses expected at Elvington will increase this traffic as will the houses planned for the village itself. This is a major concern. I support the Green Party proposal for safe, well lit cycle lanes to link villages with stations but this does not help dog walkers.</p> <p>People move to the countryside to be able to access and enjoy green spaces but this is difficult with so many cars. We don't see children playing out as they used to.</p> <p>I am concerned about the destruction of hedges for new build projects. Tho the plan proposes to maintain as many as possible we have recently seen the ripping out of a perimeter hedge for the community trust housing next to the village hall. I do not trust that hedges and trees will be maintained and emphasise that mature hedging and trees offer so much more habitat than new planting which would need to be on a much greater scale if it is to offer the same benefits in terms of carbon capture as well as habitat.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Policy on housing has changed and so plans should change to comply with this. The housing which our village needs is sheltered housing for the elderly, many of whom are single, living alone, wanting to stay in the village. Providing purpose built accommodation for them would free up many houses for families. Have the needs of the often ageing population of villages been considered? A limited number of affordable housing is included in larger developments but this does not meet the needs of our ageing villagers.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Full Representation attached to SDLP1740. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1740.)</p> <p>REPRESENTATIONS TO THE DOVER DISTRICT LOCAL PLAN REGULATION 19 CONSULTATION IN RESPECT OF LAND AT SHOOTERS HILL, EYTHORNE</p> <p>Iceni Projects, on behalf of Quinn Estates, welcomes the opportunity to submit further representations to the Dover District Local Plan (Regulation 19 Consultation) in respect of land at Shooters Hill, Eythorne (hereafter referred to as 'the Site'). A Site location plan showing the extent of the Site is contained at Appendix 1 of this representation.</p> <p>Quinn Estates is disappointed to see that the Site has not been included as a housing allocation at this stage in the plan making process. Quinn believes that the Site would be a unique and attractive addition to the Eythorne Settlement and is an important opportunity that should be positively identified for residential redevelopment in the Plan. It is considered that the land should be allocated for residential development of approximately 10 self-build homes with associated access and parking, within a landscaped setting. The site is sustainably located within a settlement earmarked for growth by Dover District Council.</p> <p>It is Quinn's view that the current suite of allocations in the draft Plan would fail to provide a sufficient level of growth in and around the main settlements within the Dover district, and that the draft plan is over reliant upon a single urban extension to meet local housing needs. To ensure the soundness of the plan, further Sites, such as the one advocated in this representation, should be allocated to enable the Plan's ambitions for Dover to be delivered.</p> <p>a. Land at Shooters hill, Eythorne ('The Site')</p>

The site is located within Eythorne and comprises approximately 0.5ha of land. The site is bound in the north and east by residential ribbon developments along Shepherdswell Road and Shooters Hill Road respectively. Eythorne Railway Station and the associated railway line (in use for recreational railway trips only) borders the south and south east of the site. The western edge of the site is partially hemmed in by a row of conifers, and gives way to open land. The site consists of greenfield land and is currently in use as a grazing paddock, sloping gently from north to south.

The site is located entirely within Flood Zone 1. It is not located within or in close proximity to any ecological designations. The site is not subject to any specific landscape designations and is not within a conservation area. There are heritage designations in proximity to the site, including three Grade II listed buildings associated with Eythorne Court to the west of the site, and three Grade II listed buildings on Church Hill and Wigmore Lane to the north/northeast. Eythorne Railway Station is identified as a non-designated heritage asset in the Dover District Local Plan. A Public Right of Way cuts through the site from the north to the southernmost corner

b. Sustainability

Quinn Estates considers that the approach taken to the delivery of housing in Dover as set out within Table 4.1 of the Regulation 19 Submission Version of the Draft Local Plan is not a result of sound plan-making. It is considered that further Sites, including the Site subject of this representation, should be allocated to secure steady growth in the Dover District.

Eythorne is identified as a village in the current adopted Local Plan offering a good and sustainable range of facilities including all key services. However, the emerging Local Plan (supported by the updated Settlement Hierarchy Review (2020)) upgrades Eythorne to a local centre. This change in categorisation within the settlement hierarchy will change the growth strategy for the settlement. The Council's emerging vision, as set out in emerging Local Plan, is to support the existing sustainability credentials of the village and encourage further growth of a suitable scale to support its continued sustainability (in accordance with draft Strategic Policy 2). The closest bus stop adjoins the northeastern boundary of the appeal site and offers services to major places of employment and facilities including Aylesham, Dover, Sandwich and Canterbury. Eythorne Elvington Community Primary School is located c.300m walking distance to the north-west of the site. In addition, Eythorne village centre, including a village shop, pub and post office, is c.400m to the south-east of the site.

Ensuring the delivery of new homes

For a plan to be considered effective, the objectives and identified requirements must be deliverable and achievable. It is considered that, in its current form, the plan fails to accord with this part of the soundness test, due to over reliance on the Whitfield (SAP1) Strategic Allocation to provide the District's projected housing needs over the plan period. Therefore, to ensure the balanced and steady delivery of housing over the plan period, further Sites should be allocated to ensure that the needs of the district are met.

Whitfield Urban Extension (SAP1) is the largest allocation in the plan and it is expected to deliver over 5,750 dwellings. Of the 5,750 dwellings proposed for the Site, 3,483 dwellings are considered deliverable in the emerging Plan period. The Council acknowledges that the 2010 Core Strategy included provision for the Site to deliver 5,750 dwellings. Phase 1 of the SAP1 allocation (Dover ref. 10/01010) is underway and as of the 2020/2021 monitoring year, 185 dwellings had been completed with a delivery rate of approximately 50dpa for the past three years. Given this slow progress, it seems likely that although the existing outline planning permission should be completed over the Plan period, a more cautious approach should be taken in terms of the remaining dwellings allocated for the Site given its proven issues in delivering housing to date. Without clear evidence by way of a planning application for these additional dwellings, it is questioned whether Whitfield will ramp up to delivery of 120dpa from 2023/24 and then up to 200dpa from 2026/27 for the remainder of the Plan period. More consideration should therefore be made to the current planning position of the Site and the length of time it has taken so far to deliver housing. Paragraph 73D of the NPPF recommends the inclusion of realistic delivery rates within Local Plans, and DDC should therefore review those proposed for Whitfield and consider building more flexibility and more volume into the pipeline to be able to respond to delivery issues.

It is considered that, particularly with the deliverability issues of the Whitfield Urban Extension to date, additional Sites should be allocated for housing to ensure that there is sufficient choice and flexibility in the supply so that DDC can meet its housing requirement throughout the Plan period, as well as to meet the Government's objective to significantly boost the supply of housing as set out in Paragraph 60 of the NPPF. Land at Shooters Hill, Eythorne would be an appropriate allocation which would assist in ensuring a variety of housing Sites are allocated in accordance with NPPF Paragraph 68.

(DDC Note - section DUPLICATED onto H5)

Self and custom build

Policy H5 of the Draft Local Plan states that the Council will support self-build and custom house building schemes on housing sites allocated in the Local Plan and on non-allocated windfall developments subject to compliance with the other Policies in the Local Plan, and where overall this would not result in an over-provision of this type of housebuilding when compared to the Council's supply/demand evidence. The Self-Build and Custom Housebuilding Act 2015 requires relevant authorities, including District Councils, to keep a register of individuals and associations of individuals who are seeking to acquire serviced plots of land for self-build and custom housebuilding. Council's are also required under sections 2 and 2A of the Act to have regard to this and to give enough suitable development permissions to meet the identified demand. The benefits of self and custom build housing are recognised as diversifying the housing market and increasing customer choice. The NPPF supports the delivery of a variety of land coming forward to meet the needs of groups with specific housing requirements including for those wishing to commission to build their own homes.

The Self-Build and Custom House building need as identified from the Council's register is reported annually through the Authority Monitoring Report. The latest Authority Monitoring Report (2019-20) states that since the introduction of the self-build and custom house building requirements in 2015, there has been 1 plot allowed at appeal, where at appeal it was identified as self-build (planning reference 16/01101). There have also been 18 plots marketed as self-build since April 2020 by the developer from planning application 16/01026, however these were not identified as self-build on the planning application. On 31st October 2020, there has only been one planning application identified as including self-build and customhouse building, reference 20/00419, which is also a Quinn site, for which a reserved matters application (ref: 22/01379) is currently pending determination.

The Self-Build Need Assessment submitted as part of the application (22/01379), points towards a very strong relative demand for self-build plots in Dover and also identifies Dover as being one of the authorities with the highest demand per capita in the country. Moreover, it is important to highlight that when considering demand in the context of the Local Authority's self-build register; an Ipsos Mori poll undertaken for NaCSBA in 2016 found that only one in eight people interested in self-build were aware of the introduction of Right to Build Registers in England. As a result, the number of expressions of interest on a Local Authority's self-build register may substantially underestimate demand.

Crucially, the Council's method of updating the self and custom build register, and resultant understanding of demand within the District, is flawed. The Council reviewed and updated its register in March 2020. All persons and organisations on the first (2016) version of the register were invited to re-register in February 2020, with reminders sent out in March 2020. Those who re-registered and passed the local connectivity and financial solvency tests, had their interest back dated to their original registration date and were placed on part 1 of the register. Those who did not pass the tests but still wished to register their interest in self-build customhouse building were placed on part 2 of the register. It is not clear from the Council's Authority Monitoring Report and evidence base for the draft Local Plan whether additional independent survey work has been undertaken to fully understand the demand for self and custom build housing in the District. As mentioned previously, public knowledge and understanding of Right to Build in England is generally low. The method of the Council to understand demand has wholly relied upon people who had joined the register in 2016 and has not sought to further publicise Right to Build or develop a clearer understanding of demand in the District through additional surveys. This results in an incomplete picture of demand in the local area and resultant lack of allocations for self-build sites within the draft Local Plan.

	<p>Quinn Estates are the leading provider of self-build in Kent and have assembled their own database of interested self-builders. Having facilitated self-build development in East Kent, the company is ideally positioned to understand the market requirements and best placed to assist the District in meeting its growing demand for plots. Quinn Estates propose the land subject to this representation as suitable for a self-build site of approximately 10 dwellings which would assist with addressing the Council's underestimated demand for this housing type.</p> <p>c. Conclusion Quinn Estates wishes to support Dover in bringing forward a successful, effective and sound Local Plan that can serve the District across the Plan period. In its current form, it is considered that improvements can be made and that the allocation of land at Shooters Hill (the land subject of this representation) for self or custom-build residential redevelopment will strengthen the soundness of the Plan and the sustainability of the spatial strategy. Quinn would welcome the opportunity to participate in the forthcoming Examination-in-Public into the Plan and contribute to the debate to ensure that the best strategy for the District is found.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Rubix Estates. Full Representation attached to SDLP1624. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1624.)</p> <p>INTRODUCTION</p> <p>1.1 Rubix Estates Ltd (hereafter, the Promoter) is submitting this representation to the Regulation 19 Submission Draft of the Dover District Local Plan 2040 for land in Elvington (the Plan).</p> <p>1.2 The Plan outlines the scale and distribution of new development which is required to meet Dover District's needs to 2040. It further identifies the planning principles and policies to guide decisions on all new developments, including through a series of site allocations and detailed development management policies against which development proposals will be assessed during the plan period to 2040.</p> <p>1.3 This response offers the Promoter's view on why this additional parcel of land (the Site) could be considered as an additional option for sustainable residential development.</p> <p>1.4 It makes specific reference to the Promoter's land interests in Elvington and advocates for consideration of this land for sustainable residential development.</p> <p>1.5 It should be noted that the Promoter is currently working with third party landowners including Dover District Council (DDC) to secure an alternative access point into the land. The current access is through Eythorne Parish Council's land.</p> <p>1.6 The following comments are therefore set out in a positive and constructive manner intended to aid the clarity and implementation of the Plan, structured around the following sections:</p> <p>Section 2 of this Statement describes the representation site and its surroundings. Section 3 sets out commentary our Vision, Objectives, and key policies; Section 4 summarises the case for the inclusion of this land for sustainable residential development.</p> <p>1.7 As Promoter and on behalf of the Landowner's we strongly advocate for further land to be included for sustainable residential development in Elvington and Eythorne.</p> <p>1.8 We welcome the opportunity to further assist or provide comment on the preparation of the Plan which will help shape future development in the area; and we look forward to the opportunity to participate at later hearing sessions where appropriate.</p> <p>SITE DESCRIPTION AND PLANNING CONTEXT</p> <p>2.1 The Site comprises arable land measuring 6.16 ha with access from Adelaide Road. The Site is well-related to the existing built form of Elvington and Eythorne and falls adjacent to existing amenities of the village.</p>

- 2.2 The Site is not within the Area of Outstanding Natural Beauty, Green Belt, any other landscape designation and is not susceptible to flooding.
- 2.3 Sustainable development of this land will therefore allow easy access by foot and bicycle to existing services, facilities and employment opportunities.
- 2.4 Public transport is good for the local community and new residents, with regular bus services to Dover, Canterbury and Sandwich. Given the wide range of services present in Elvington we believe it can act as a principle focus for more development.
- 2.5 Nearby residential development is of a mixed appearance and vernacular, rising generally to two storeys in height.
- 2.6 Topography of the Site is generally flat and will have little impact on the surrounding landscape. Careful and sensitive design of this area of land will provide a positive contribution for Elvington & Eythorne.
- 2.7 Within the Site, its current configuration is characterised by the existing arable use. Built development is concentrated at present to eastern part of the Site.
- 2.8 The Site benefits from boundary treatment to the north west including existing trees and hedges which are established and offer in places year-round screening to the wider countryside.
- 2.9 The Site benefits from an existing access to Adelaide Road via a private gated access over Eythorne Parish Council land to the highways network, providing wider connectivity thereafter.
- 2.10 An existing Byway runs along the north western boundary and a Footpath runs through the Site.
- 2.11 It is noted that the Site sits within the immediate context of the as one of the Strategic Housing Allocation for 350 homes, SAP28 - Land Between Elvington and Eythorne

Planning Policy Context

- 2.12 Eythorne and Elvington were previously identified as "Villages" in the previous Dover District Council Local Plan.
- 2.13 The recent Settlement Hierarchy study conducted by DDC explains that both these settlements score well concerning the number of services and facilities available. Therefore, as part of DDC's strategy for the rural area, it is proposed to grow the villages of Eythorne and Elvington to create a new "Local Centre" in the District.
- 2.14 Upgrading and reclassifying Eythorne and Elvington from "Village" to "Local Centre" within the new Local Plan confirms that this area is among the largest of the district's rural settlements. It will therefore be the focus of sustainable development.
- 2.15 As mentioned earlier, an urban extension is proposed on land between Eythorne and Elvington to deliver 300 new homes, employment space and a mix of ancillary uses (see plan below). The extension planned to Eythorne and Elvington will create a new sustainable community, incorporating garden village principles

The Site was identified In DDC's Housing and Economic Land Availability Assessment (HELAA). This considered the Site for sustainable development and deemed it "Available" and "Achievable", and potentially suitable for housing.

- 2.17 With the revised classification to Local Centre and the strategic allocation for residential and employment in Elvington and Eythorne, the area has the capacity to grow further.
- 2.18 Eythorne and Elvington has several services and facilities, including two village halls, a primary school, two churches, one public house, a café, a post office, a village shop and a playground.
- 2.19 Elvington has a village hall and church, a small parade of shops (with hairdressers and takeaways) and a recreation ground. With the urban extension proposed, the sustainability and appeal of Elvington will further be enhanced.

REPRESENTATIONS TO REGULATION 19 LOCAL
PLAN CONSULTATION

3.1 As stated above the Dover District Local Plan to 2040 Regulation 19 Submission (The Plan) establishes the scale and distribution of new development which is required to meet Dover District's needs to 2040, identifying a series of site allocations and detailed development management policies against which development proposals will be assessed during the plan period.

3.2 This follows a period of extensive evidence-gathering, and previous consultation on the Regulation 18 Draft Local Plan in 2020.

3.3 Detailed commentary is provided below on the Vision, Objectives, and Policies of the Plan. Commentary is not provided for all policies and is instead reserved for those considered of most relevance to the Site.

3.4 However, supplementary commentary is provided elsewhere, namely on emerging policies as follows:

SP3 – Housing Growth

SP5 – Affordable Housing

CC8 – Tree Planting and Protection

PM1 - Achieving High Quality Design, Place Making and the provision of Design Codes

PM2 – Quality of Residential Development

H1 – Type and Mix of Housing

TI1 – Sustainable Travel and Infrastructure

TI3 – Parking on New Developments

OVERARCHING VISION & OBJECTIVES

(DDC Note - Section duplicated against Strategic Objectives)

3.5 The Overarching Vision for the District in providing “outstanding opportunities for sustainable living” is supported as a high level principle underpinning the aspirations of the Plan.

3.6 The ambition of the Plan to position the District as a destination of choice for people to make their home, achieved “...through careful stewardship of its world class landscapes, thriving natural environments and wealth of historic sites” is also supported as a matter of principle as a reasonable basis for the Plan.

3.7 The Vision goes on to outline aspirations for ‘Vibrant Communities’, which emphasises how “new developments will blend seamlessly with existing townscapes to embody the best of local distinctiveness and will have created places that are well-designed and well-built. Built to local design codes, they will respect the spectacular natural environments and rich heritage of the District achieves significant progress to becoming net zero carbon”.

3.8 It further underscores how the Plan should seek to provide greater choice of high-quality housing to meet the needs of Dover District’s growing population and changing demographic, and address affordability issues, as well as highlighting the focus of new development at accessible and sustainable locations which can utilise existing infrastructure, facilities and services, and to ensure development contributes to the sustainability of local communities and services. This objective is consistent with the thrust of the National Planning Policy Framework in its pursuit of sustainable development. Again, this is supported overall at the District-wide level as an appropriate and realistic vision for Dover over the Plan period.

3.10 Whilst commentary is not provided for each of these objectives, due regard has been had to their content.

3.11 It is considered that the objectives are generally appropriate in supporting the implementation of the Vision, and that the objectives themselves are adequately reflected across the strategic policies as proposed, albeit subject to any refinement that may follow during the Examination process and later ‘Main Modifications’.

3.12 In this regard the Promoter supports to the overarching Vision for Elvington & Eythorne.

3.13 In accordance with the relevant Local Plan policies and development of the site and wider

area would provide:

- A wide mix of housing typologies including affordable housing, housing for the older demographic and plots of land to contribute to meeting the demand for self and custom build housing.

- Design Codes will be developed to guide and ensure the delivery of beautiful, eco friendly homes that are affordable for local people;

- Formal and informal open spaces for leisure and recreation, including play areas, sports fields, allotments and community orchards, or enhancements to nearby facilities, to meet the needs of the development

Open spaces will be multi-functional contributing to the wider public networks with sustainable drainage. All new and existing residents will have access to upgraded routes for walkers and cyclists. This sustainable development will improve connections between and enhancements to existing habitats; provide safe routes for wildlife, protecting and enhancing wildlife assets

- Sustainable access arrangements will be in place from Adelaide Road with associated improvements and traffic calming measures to Adelaide Road and where necessary improvements to the Public Right of Way network to increase connectivity in the area.

STRATEGIC AND DEVELOPMENT MANAGEMENT POLICIES

POLICY SP3 – Housing Growth

(DDC Note - Section Duplicated against SP3)

3.14 This policy deals with the housing strategy for the Plan period. It expresses clear linkages to the overarching vision for the Plan, and its objectives in focusing growth at sustainable locations providing greater choice of high quality and sustainable housing to meet identified needs.

3.15 Need is derived from household projections and targets set by central government, here identified as at least 611 dwellings per annum, with a minimum of 10,998 new dwellings over the Plan period.

3.16 The housing growth strategy at SP3 is geared towards delivery of such. This baseline position of meeting identified need is wholly supported.

It is noted that the policy wording recognises 'a minimum of 10,998 dwellings over the Plan period'. It is considered that this wording is most appropriate in encouraging sustainable growth; a cap should not be applied.

3.18 The Plan allocates a number of sites to ensure a consistent supply of housing to facilitate demonstration of a continuous five-year housing land supply. Again, it is pleasing that the Plan seeks to clearly satisfy this basic requirement. It is essential that the Plan is able to meet identified need, and the allocation of multiple sites across the Plan area at different scales should enable a reliable supply of dwellings to meet need – again as a minimum target only, rather than a capped 'ceiling' figure.

3.19 The Settlement Hierarchy is supported, particularly as far as it concerns the higher order settlements as a Local Centre alongside Eastry, Wingham, Ash, Shepherdswell, St Margarets, Kingsdown.

3.20 In recognition for its sustainability and its role as a Local Centre, Elvington & Eythorne is ranked highly within the district. It benefits from high connectivity and a range of services and facilities.

3.21 It is a highly sustainable location for development and it is agreed that its place in the Settlement Hierarchy sufficiently recognises this.

3.22 It is considered that the apportionment of growth across the hierarchy is appropriate in distributing sustainable growth to support communities in multiple locations in the District. Table 3.3. of the Plan identifies that over 300 dwellings and employment land will be delivered in Elvington and Eythorne under the Plan.

3.23 As an indicative figure, this ambitious level of growth is supported in realising the

overarching vision for the District. Detailed commentary on the precise quantum of development to the settlements is not provided here, though it is emphasised that the aspiration of meeting growth in sustainable locations such as Elvington and Eythorne gains significant support from the Promoter.

3.24 Assessment of precise scale and quantum of development will be undertaken at the application stage following a housing allocation, though the indicative capacity of over 300 dwellings across multiple sites in Elvington and Eythorne is supported.

3.25 It should be noted however that revision to SP3 should look to clarify the meaning of 'disproportionate growth', which at present is too subjective to rely upon in the policy wording as drafted. Minor amendment may simply refer to [amendments in bold text]: "development that would result in disproportionate growth to any of the District's settlements, which cannot be supported by the necessary infrastructure and services or would result in a loss of services and facilities which are considered to be key to supporting local communities will be resisted".

POLICY SP5 – Affordable Housing

3.26 This policy sets out the Local Planning Authority's (LPA) position on affordable housing. It is derived from an extensive evidence base.

3.27 The provisions of SP5 are generally supported, though refinement to the policy should be made to ensure that its application does not become a barrier to delivery.

It is welcomed that criterion (3) allows for flexibility in the provision of affordable housing.

3.29 This policy should introduce an additional criterion to maximise its application and implementation, with the underlying objective to encourage viable development delivery.

This amendment should include for the following clarifications [amendments in bold text]:

- 3 Should independently verified viability evidence establish that it is not possible to deliver the affordable housing as required by part 1 of this policy, and the viability position is agreed by the Council, the Council will consider, on a case by case basis, flexibility in the provision of affordable housing, including through the following options:
- a Change in the tenure mix required; or
 - b Reductions in the overall proportion of affordable housing; or
 - c Provision of an off-site financial contribution in lieu of affordable housing provision on site, to secure equivalent provision of affordable housing off site, including 25% to secure First Homes; or
 - d A combination of the above; or
 - e Deferred contributions; or

if Any other suitable alternative as may be agreed with the Council, taking account of site specific circumstances.

POLICY SP11 – Infrastructure and Developer Contributions

POLICY PM1 – Achieving High Quality Design, Place Making and the provision of Design Codes

(DDC Note - Section duplicated against PM1)

3.30 PM1 deals with high quality design. Its contents are not repeated here, though it is noted that the policy wording includes for a large number of criteria across seven topic areas spanning context, built form, and movement, among others.

3.31 This is useful in guiding development, though care must be taken to ensure that this volume of criteria is not unduly onerous in the planning application process. There are already references to the aspirations of the Plan to achieve high quality design, place making and the provision of Design Codes elsewhere in the Plan's Vision and Strategic Objectives. As drafted, a number of PM1's criteria add little else to this information, and the granular level of detail alluded to might otherwise be best sought in Design Codes applied to specific areas, as also referenced in PM1 itself.

3.32 To ensure the effectiveness of the Plan – by way of its effective implementation in the

application process - consideration should be given to a reduction in the volume of criteria attached to PM1, which is otherwise addressed in the overarching Vision and Objectives as drafted.

POLICY PM2 – Quality of Residential Accommodation

(DDC Note Section Duplicated against PM2)

3.33 PM2 refines the aspirations of the Plan to reflect the quality of proposed residential development. It outlines the base criteria required in demonstrating how residents can expect to achieve a good quality of living, with regard to space standards, accessibility, and amenity space.

3.34 The intention of this policy is supported in full in realising the Vision and Strategic Objectives set out elsewhere in the Plan.

3.35 That said, there is refinement required in the policy wording. In particular, there should be greater recognition of the possibility that not all sites can deliver the full extent of PM2's

requirements. This is best illustrated through Criterion (D) which requires a set percentage mix of dwellings to be built to Part M4(2) / M4(3) standards. It should be revised to recognise that not all sites will be capable of achieving such, sometimes owing to site-specific circumstances. Whilst retaining the aspiration and expectation of this policy to provide for accessible housing, amendment is proposed as follows [amendments in bold text]:

(i) On schemes of up to 19 dwellings, the Council will expect all new build development to be built in compliance with building regulation part M4(2).

ii On schemes of 20 or more dwellings, the Council will require where reasonably possible 5% of the development to be built in compliance with building regulation M4(3)(wheelchair accessible homes), with the remaining development to be built in compliance with building regulation part M4(2).

POLICY H1 – Type and Mix of Housing

3.36 Type and Mix of Housing is important in responding to the needs of the District over the Plan Period. It is essential that the mix is not prescriptive or otherwise onerous in what it seeks to impose on new development.

3.37 As drafted, H1 provides a clear objective for new development in responding to need.

3.38 However, to support the implementation of Policy H1 it is essential that the LPA retains an updated SHMA and is able to clearly direct Applicants to readily available information at any given period.

3.39 It is recommended that the LPA commits – in the final wording of Policy H1 – to a signposting to the SHMA as the appropriate record of up to date housing need in the District.

3.40 Without further clarity, the smooth implementation of Policy H1 is at risk given what otherwise ascribes too much uncertainty to applicants. It is unrealistic to expect applicants to prepare commercially viable proposals without sufficient direction as to what type and mix of dwellings the LPA expects to be delivered, and therefore what it may support. To better facilitate the implementation of the housing delivery mechanisms of the Plan, certainty must be better provided.

POLICY T13 – Parking on New Developments

(DDC Note - section duplicated against T13)

3.41 Parking on new development will be a product of a site-specific proposal. It is important that this is better reflected in the policy wording itself. It must not prescribe unrealistic or broad brush assumptions to all sites, as to do so may inadvertently restrict the capacity of sites to delivery on contextually appropriate schemes. This is particularly important in the settlements atop the settlement hierarchy which benefit from range of sustainable travel options, such as those in Elvington and Eythorne.

3.42 As drafted, T13 is supported by the Promoter in seeking a viable and implementable balance of parking provision that reflects local character and site conditions.

	<p>3.43 It is agreed that – as drafted – TI3 is capable of satisfying the objectives of the Plan.</p> <p>4. CONCLUSION</p> <p>4.1 Rubix Estates Ltd and the Landowner's strongly advocate for the consideration of this land for sustainable residential development.</p> <p>4.2 Overall, these representations conclude that given the future direction of growth in Elvington and Eythorne further land could come forward for sustainable residential development in the short to medium term.</p> <p>4.3 Specific to the Promoter's interests for this Site, we would support the inclusion of the Site for housing. As part of Dover District Council's strategy for the rural area, it is proposed to grow the villages of Eythorne and Elvington to create a new Local Centre in the District, with new services and facilities to be delivered alongside new sustainable and affordable homes.</p> <p>The local highway network has capacity to accommodate the additional traffic associated with the development, without adverse impact; The Sites falls within the EA Flood Risk Zone 1 (i.e. land assessed as having a less than 1 in 1,000 annual probability, or <0.1% chance of flooding); The land is not within Area of Outstanding Natural Beauty (AONB) or Green Belt; The land is not within an area of high landscape sensitivity; There are no designated heritage assets within or immediately adjacent to the site, and the development is not considered to affect the setting of any Listed Buildings.</p> <p>4.4 We welcome the opportunity to further assist or provide comment on the preparation of the Plan which will help shape future development in the area; and we welcome look forward to the opportunity to participate at later hearing sessions where appropriate.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	You have plans for Whitfield and Dover that Eythorne will be helping to fund, but no plans to allow safe travel for cyclists leaving Eythorne via Kennel hill or Barville rd. Both of these roads are too dangerous for safe cycling or walking. Barville road is also unsuitable for the number and size of trucks currently using it. Those of us using it regularly find trucks crossing the centre line whilst trying to negotiate the bends on this narrow road. Do we need to block it like the idiots from the eco groups do to get something done?
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SAP28/29/30 at Eythorne and Elvington face even larger scale developments . These will undoubtedly have the effect of increasing traffic going through Shepherdswell making a dangerous situation even worse. Allowing for 50% of their homes coming through our village twice a day that is a further 350 traffic movements.</p> <p>Speedwatch , authorised and run in association with Kent Police, have undertaken sessions along Coxhill when in a period from 7.30am-9am 255 vehicles were observed going out of the village , and on another occasion between 4,30pm-6pm 211 coming back into the village.</p> <p>DDCs own document highlights potential issues with this site such as :States the cumulative impact on of this AND OTHER developments on common road use.</p> <p>.</p> <p>Some widening works may be required at the access point Coxhill Road is narrow, and is particularly constrained to the east of the site by on-street parking. Any proposals coming forward on the site should seek the views of KCC Highways at an early stage to ensure that the cumulative impacts of development can be accommodated by the surrounding roads.</p> <p>No footway serving site.</p> <p>Concern regarding cumulative impact from potential allocation sites on wider highway network, particularly routes through to A2/A256 (issues with width, on-street parking and significant increase in use of junctions)</p>

	<p>. More than recommended 400 metre walking distance to nearest bus stops in Mill Lane, but limited services and no footway.</p> <p>It would be wise to note a recently agreed and yet to be built Community Land Trust development of 13 dwellings is about to start construction within 50 metres of the proposed site at Botolph Farm The effect of this has yet to be assessed . The impact of additional vehicle movements and the removal of on road parking for existing residents may well increase the speeds of traffic heading for the A2.</p> <p>Speedwatch group carried out an observation this morning (25/11/22) on Coxhill Rd by Oast House . between 07:30-09:00</p> <p>A total of 336 vehicles were counted heading SW towards the A2. A similar number travelled into the village. This indicates about 200 vehicle movements an hour in each direction. There was considerable congestion, due to a number of lorries, which slowed traffic, but 69 vehicles (1 in 5 - 20%) was exceeding 30mph, of which 7 will be reported for travelling in excess of 34mph (3 at 40/41mph)</p> <p><i>(DDC note: This representation was originally made against the Infrastructure Delivery Plan consultation document but has been duplicated in relevant places against the Local Plan due to the specific site allocation/policy references made)</i></p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Tilmanstone will be affected by the expansion of Elvington. Doubling the size of Elvington which already scores highly on the indices of deprivation will put a great strain on existing services and infrastructure. New housing without adequate local infrastructure puts significant strain on local amenities such as medical services, school and playgroup places as well as increasing traffic on our roads. The existing sewerage system is already overloaded and any future developments will only exacerbate this problem.</p> <p>It should be noted with some concern that the expansion of the employment opportunities at Pike Road Industrial Estate is not substantiated by figures - it's marked N/A in the document. Barville Road was identified for improvement even before the A256 was built - improvements to this very busy, nominated HGV route have never been done and the increase in domestic traffic accessing the A256 as a result of the Elvington expansion will need to be addressed.</p> <p><i>(DDC note - this is an extract from representation SDLP1639)</i></p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object to the proposal in the 2040 Local Plan that Eythorne and Elvington become a "Local Centre". I also object to the proposed building around Elvington. The reasons for both objections are set out below.</p> <p>Elvington and Eythorne, although geographically close, have their own distinct heritage, character, culture and community. Elvington was mostly built in the early 20th century to serve the nearby coal mine at Tilmanstone. Eythorne is very much older, with evidence of occupation from the stone age and in the heart of the village are many buildings from the 18th and 19th century. Eythorne is essentially a community founded on agriculture and it is not, and has never been, a mining village. The development of Tilmanstone colliery did not lead to significant housebuilding in Eythorne. In the late 1960s and early 1970s, however, small housing developments sprang up on land originally used for farming and latterly used by the local school and community.</p> <p>There are no existing problems, or conceivable future ones, that would be better served by combining these two individual communities as opposed to keeping them separate. Indeed, it might well be the case that better, more consensual, decision making would occur if the communities were kept unique (for example Coldred and its community driven management of the village centre). It is also evidentially the case that communities that keep their identities have less societal problems and better mental health because of the developed relationships and contacts within the community (people looking out for each other etc). As it stands the countryside is in easy walking or cycling distance for anyone no matter where they live in either community, young or old, and this access is enjoyed by many to the benefit of their mental wellbeing. Where there is urban sprawl, loss of green space and loss of identity, quality of life plummets (cf Thanet). Unnecessary and unsympathetic "planning" has irrevocably harmed many communities, villages and towns over the years, resulting in poor and problematic living environments for future generations to inherit.</p> <p>There is also no conceivable opportunity that could arise that would only be possible by combining the two communities rather than keeping them as they are now.</p> <p>The issues facing these communities are many but none are due to them not being combined.</p>

It is proposed that the two separate villages of Eythorne and Elvington are developed as a "Local Centre" based on them "having a very good range of services and facilities". This is a considerable overstatement as the two villages have, in fact, a very limited range of both.

In terms of existing GP services, the nearest is Shepherdswell which is only open between 8.30-10.30 a.m., Monday to Friday, and does not routinely offer an actual GP surgery but only "administrative" or nurse appointments. Overall, the other GP services in the area are stretched to the limit and will struggle to take up the amount of new patients that will arise with significant further new house building in this area. Additional patient numbers will introduce further frustration from the community with getting GP appointments when wanted. Unless GP provision is significantly improved, is properly delivered to time, and is written into the DDC plan then there will be a healthcare crisis in this District.

As well as insufficient GP provision, the area also suffers from inadequate response times from the Ambulance Service, SECAMB. April 2022 saw the worse response times on record for SECAMB. Although things have improved slightly since then, it is still poor and inadequate. Hospital waiting times especially for A&E are also poor. In part, the long waiting times for both hospital appointments and for A&E, as well as poor ambulance response times, are due to the inadequate GP primary care driving people to attend hospital rather than their own GP.

It is practically impossible to get an NHS dentist in this area and most surgeries are not taking on any new patients. This means new arrivals into the area are forced to go private pushing up their cost of living and ultimately leading to further degradation of the NHS provision even though we have all paid for it and it should be readily available.

Local policing is entirely absent in the main and incidences of anti social behaviour, vandalism and theft (for example frequent van break-ins for tools) that have occurred in both villages are largely not dealt with at all by the Police. Most certainly the Police are not being proactive in preventing such crimes. There is also a local drug taking and drug dealing problem, again not tackled.

The bus service for Elvington and Eythorne was always poor and inadequate for it to be used to commute to work. Now KCC has cut bus services further, there will be no public transport serving the villages. This has caused a major problem for school children attending secondary education in Canterbury, Dover and Sandwich and great difficulties for parents in trying to find alternative transport methods that also accommodate their need to attend work. Many in the village have mentioned considering moving away from this area to one that does have public transport for the school trip.

In Section 4.2.11 it mentions a range of tourist attractions available including Wingham Wildlife park, The "Historic park and Garden of Waldershare" and the EKR (East Kent (Heritage) Railway). The first is certainly an excellent attraction. Waldershare Park is, however, a private estate not open to the public. The heritage EKR line runs only one day a week (Sunday) and some bank holidays (not just "a few times a year" as stated in 4.216) from approximately April to October. Although it has a charm of its own and continues to be developed, it is currently of very limited appeal to the general public as it has a short track length and no steam engines.

In the Section on Eythorne and Elvington, and as shown in the plan in Section 4.214, land is shown "Allocated for Employment". This is all very laudable but the employment opportunities must be such that they provide opportunities, careers and suitable salaries for the local population. To date, attracting blue chip employers into this area has not met with tangible success. The Pike Road Industrial Estate businesses such as Tilmanstone Salads, which is a minimum wage employer, are not likely to be attractive to the majority of residents of employable age. More of the same is not going to adequately provide opportunities to deliver a sustainable community. The biggest employers for the communities will probably remain Dover docks and first responders, with others working for service industries from home.

Section 4.218 listing services and facilities has several errors. Eythorne does not have two village halls. It has one pre-cast concrete structure which could be considered a village hall behind Ss Peter and Pauls' Church. It is at the border of Eythorne and Elvington and hence poorly placed for Eythorne residents. It is barely used because of that and is most noted for being a polling station. Eythorne does not have a Cafe and to the best of my knowledge hasn't had one since the last century. It does have a village shop and Post Office combined (they are not separate amenities as might be supposed from the text as written in 4.218). Thus the actual "amenities" in Eythorne are one pub, one "village hall", and one Post Office/shop. It does have two churches (Baptist and CoE) but these are used by a tiny minority of residents and so can hardly be considered to be a significant amenity. According to the Church of England's own figures (2019), less than 1 % of the population attend church regularly. Over 50 % of the UK population are irreligious.

In terms of Elvington, it does not have a church as stated. The rest of the statement regarding Elvington amenities is correct. However, with the advent of services such as Uber Eats, Deliveroo and "Just Eat" etc the community attractiveness of the takeaways is diminished.

Regarding the statement in 4.219, and as clarified above, the settlements do not have much in the way of services and facilities that make them stand out as a place to create a new "Local Centre" unless the critical criteria you are using are possession of a pub, a shop, and unused churches.

	<p>Tilmanstone Colliery Welfare Sports Ground, as mentioned in 4.221, is an good facility for sports in the Eythorne and Elvington communities. As a non-profit making charity, however, it requires membership fees or hire fees for use of its facilities and the facilities are thus not freely available. These fees are not onerous however.</p> <p>The entrance to the primary school which sits on the boundary between lower Eythorne and Elvington, and serves both communities, is on a corner and is a blind bend coming up Church Hill which is problematic for parents dropping off and picking up their children. Church Hill itself is narrow in parts, permitting passage of a vehicle only in one directon at a time, and is a bottle neck. Children arriving by foot from Upper Eythorne have to travel along Shooters hill which already has issues with child safety due to the narrowness of the road and traffic density, resulting in vehicles mounting the pavements to pass. Additional vehicle movements due to more house building will only exacerbate the problem. Traffic build up is also a problem at the staggered junction between Wigmore Lane, Shooters hill and Church hill which has visibility issues. If the new estate exits through Elvington, there will be a build up of traffic on Church Hill trying to exit onto Wigmore Lane using the Staggered junction. If the estate exits through Wigmore Lane then the increased traffic will cause problem trying to cross the staggered junction from Shooters Hill or Church Hill directions.</p> <p>For sustainability of the community any new building must contain a large component of genuinely affordable housing. At the moment new houses are beyond the reach of the local young and are being bought up by people outside the community, diluting the community common values, or by buy-to-let investors.</p> <p>It goes without saying that any new development must have searches done to ensure that subsidence and any ground contamination from the extensiveTilmanstone mining activity will not be an issue. Also the area around Elvington village has been found to contain much live WWII ordnance from troops stationed here during the war and this needs to be factored in to pre-building work.</p> <p>The building on the proposed area will substantially diminish an important green corridor for wildlife movement (especially insects) and a source of food for many types of wildlife.</p> <p>It is very dissapointing to read in Section 4.2.11 that Dover Dictict Council believe that "Shepherdswell, Eythorne and Elvington have their roots in the short-lived East Kent coalfields". Whilst it is certainly the case that Elvington is a (model) colliery village, the roots of both Shepherdswell and Eythorne precede the development of the coal fields by a considerbale margin. Both have been occupied since the stone age, have evidence of Roman occupation, are mentioned in the doomeday book and have recorded history since then. Incidentally, it is stated in section 4.211 (and repeated in 4.216) that the EKR line was originally built to serve the Colliery at Tilmanstson. This is factually incorrect as the line was built to serve any colliery in the area that might prove to be productive and reached as far as Wingham and also to Richborough at its peak. http://www.dover-kent.com/VILLAGES/18-Eythorne.html</p> <p>In conclusion there is clearly not the necessary infrastructure to support the proposed development and nowhere near enough amenities to justify development as a Local Centre. Progressing with the latter is wholly unnecessary. It would be much better if new villages were developed to support increased population, as was done when coal mining took off, to stop urban sprawl.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>For one, it needs to have guarantees on increases in health care, public transport, policing and schooling written in, commensurate with the increased number of houses, for it to be creditable as a plan to deliver sustainable communities.. Rather than continue "urban sprawl" by having "Local Centres" and diminishing sense of community etc, a much better policy would be to build new villages/towns to accomodate the additional housing as was done when mining started in Kent.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	EYT003
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>EYT003</p> <p>I believe the Dover Local Plan is unsound.</p> <p>I would vehemently like to oppose the proposed development of Elvington namely the EYT003 development and any other large development in this village, my reasons are given below.</p> <p>SERVICES</p> <p>Can only be said to be practically non existent and the Planners should take another look at what is actually available round here.</p> <p>HERITAGE</p> <p>The effect of the proposed development of the land EYT003 would be catastrophic to the character of the neighbourhood.</p> <p>As you may know the village is essentially a mining village with many of the older occupants having worked for the mining company or are or were related to someone who worked for the mining company. Slowly housing developments have depleted from the ambiance of the area and it is in danger of loosing its Heritage.</p> <p>VISUAL AMENITY</p>

EYT003 covers an area of land that whilst not intrinsically beautiful, adds to the harmony of village life.

People are constantly walking past it along Terrace Road which overlooks the EYT003 proposed site, taking their dogs for walks, going about their business, taking the kids to school and bringing them home and horse riders exercise/ride their horses along Terrace Road.

The land is a visual amenity in as much as it is enjoyed by just being there for all to plainly see as they go by. If a housing development were to go through you would destroy that visual amenity and less people would be inclined to go out for a stroll round the block, as who wants to go out and look over the rooftops of a housing development? This would inevitably result in more people staying indoors and becoming stagnant, causing all sorts of medical and mental problems and costing the public purse a lot of money caring for the people who succumb to the medical and mental problems. Possibly the one good thing that Covid-19 has done for everybody is, in the resulting lockdowns people have been inclined to go out and use their public space for exercise and enjoyment. Exercise can be said to be good for the body and the enjoyment can be said to be good for the mind, think what you will have once you take that away.

At the moment the site is used for Agricultural use which fits in with the everyday ambiance of the village and the outlook to the hills beyond.

Last year I had an assessor from Keypointing come round to my house in Terrace Road to assess my property for pointing of the brickwork, his name is Michael and after he introduced himself he said "you've got a good view here", "in fact I'd say it is a beautiful view". This is a view shared by many delivery drivers who have said similar things to me, as well as the general public. So please reassess this site for that reason alone.

ENVIRONMENTAL

From an environmental perspective EYT003 covers an area of land that resides in a frost hollow i.e. it is at the base of a slope, water and indeed frost collect at the base of slopes if there is nowhere for it to go. In frost hollows minimum temperatures can be tens of degrees below the surrounding landscape temperature. So now you have got a housing estate that is sitting in damp and is using a lot of power to keep the dwellings habitable and warm, as hot air rises and cold air sinks. I don't think the proposed development of EYT003 could be regarded as environmentally friendly and therefore it would be more expensive to build houses that would comply with the Standard Assessment Test (SAP) test prelim to Building Controls test to ensure new builds meet the Part L1a Building Regulations. I believe after 2025 new regulations come into force called the Future Homes and Buildings Standard requiring new homes to produce 75-80% less carbon emissions than homes delivered under the old regulations, again this will have a knock on effect on the cost of building these homes because they will be built in the wrong place.

Luckily the fact that water runs downhill to the lowest point is in favour of the site EYT003 being used for agriculture, as there is less need to irrigate crops growing in the field, which is only needed in very dry conditions, therefore there is less strain on the local water supply, which I understand comes from aquifers around here, and there is only a finite amount of water in them that takes a long time to replenish as they are not bottomless pits full of water. Affinity Water which is the Water Company that supplies drinking water around here have recently sent me an email stating that the underground aquifers are at a low point after this years (2022) long hot summer and there may be restrictions on the use of water in the near future. They have plans to bring in more water by various means but that is a plan that is way in the future for completion. So I ask you, how are you going to supply water to not only the developers for building houses, roads & pavements as they all take water to build, and then how are you going to supply the 300+ new households with water while maintaining the existing households water supply? Are you going to bring it in by tanker or perhaps bottled water? It's ludicrous, No thought has gone into this plan.

The fact that EYT003 is a frost hollow is not a problem for agriculture as farmers adjust the crops they grow to the conditions of the land used, as has been going on for centuries.

I have been informed by a long time resident that not only do we have fairly frequent sewage blockages due to the low drop in elevation of the said sewage/drains pipes (Southern Water are the Sewage company), there are also infrequent times when the pumping station in the woods not half a mile away from the proposed development blocks up and you get a sewage overflow in the wood. So I ask you, if the pumping station can't handle the current amount of sewage at high usage rates, how will it cope with an additional 300+ houses sewage?

HEALTH & SAFETY

EYT003 has National Grid power lines travelling the whole length of the site, apart from any perceived health issues linked to electricity and the human body, who in their right mind is going to want to live in a house with a pylon and power lines carrying massive amounts of electricity overhead?

I don't know the occurrence of how many power cables break and consequently fall to the ground or touch other cables causing sparking but it is known to happen, both of which would have life threatening consequences. A Health & Safety nightmare. We have very strong Southerly winds around here which can affect properties and structures alike.

TRAFFIC

I understand that you intend to place approximately 300 dwellings on the site known as EYT003, that in itself means there would be approximately 600 additional vehicles associated with the village in one fell swoop. At least one car per household is required but usually two, as there is no other option for residents that need to travel for their work (many on shift/unsociable hours), shopping run, school run, trips to the doctors, waste disposal and finally pleasure outings.

Apparently the buses have been stopped and the ones that used to run were not easy to join up for trips around the county let alone trying to do trips for work purposes, and the last time I was on them they stopped running about 6.00 p.m. I speak from bitter experience.

Also you have got all the associated delivery vans coming and going. This all builds up to a lot of vehicles traveling down roads that were not designed to take that amount of traffic.

At the best of times Adelaide Road is a single lane carriageway from the junction of Adelaide Road, Church Hill, Barfrestone Road and down Adelaide road to just past the new houses on the left. Once you have added an entrance/exit road to the proposed new estate it will be hell trying to get up and down that part of the road. In winter the route up Church Hill and down Adelaide Road and vice versa is barely navigable and personally I wouldn't try unless I had to. The roads to exit the village to the West of the village namely Tye Wood and Kelk Hill are single lane roads where you have to pull in to let people pass and vice versa. Wigmore Lane is a two lane carriageway until you get near the junction of Church Hill, Wigmore Lane, Shooters Hill and Shepherdswell Road where the parking in Wigmore Lane brings it down to a single lane carriageway. Shepherdswell Road is OK until you get to Shepherdswell and then it is single lane carriageway on and off on the way out to the A2. Going up and down Shooters Hill to and from Eythorne is mainly single lane carriageway. Coldred Road has places of single lane carriageway especially in the vicinity of the Eythorne Roundabout.

Not to mention all the air pollution resulting from these additional vehicles trapped in traffic jams of their own making. The resulting traffic jams will also make it nigh on impossible for emergency vehicles to make a timely appearance, (they have a hard enough time as it is due to distance related issues) most of which can be life or death situations.

In my opinion any large addition to the Elvington settlement will result in chaos on the surrounding entrance and exit roads to the village.

PUBLIC SAFETY

At the present time children can relatively safely walk to the primary school with their parents or sometimes by themselves or a group, you will not have that amount of safety once you have the amount of extra vehicles on the roads around here associated with the proposed developments.

There is only pavement on one side of Adelaide Road running the width of the proposed EYT003 development, this pavement is on the same side of the road as the proposed EYT003 development, therefore the clash of pedestrians and motor vehicles is inevitable as children and their parents will be trying to get to school while drivers are trying to edge their way out so they can see if the road is clear enough to get out from the estate into Adelaide Road. When there is heavy rain Adelaide road floods slightly at the lowest point. I have only seen it flood enough to slow cars down and make them travel down the centre of the road, but it is enough to disrupt traffic at peak times, along with which is the danger to the general public because they have to try and get past the flooding to take the kids to school and then come back. So once there are more cars along Adelaide Road the clash of motorist and pedestrians is inevitable.

The proposal to have vehicle entrances and exits to the estate in Terrace Road will only add to the danger concerning children and the public in general as well as motorists who use Terrace Road to get to and from their abode, in other words it's a bit of a rat run and you often get speeding cars down here. As said previously horse riders exercise/ride their horses along Terrace Road.

CONSTRUCTION WORK

The work needed to complete such a venture will in itself cause chaos on the surrounding roads and consequently on the safety of the villages residents. Any construction of slip roads to provide entrances and exits to the EYT003 proposed estate will need to be properly surveyed to ensure stability of the ground of Terrace Road as Terrace Road resides on a bank approximately four and a half metres to 6 metres above the EYT003 proposed development.

PLANNING

As I understand it there would be problems if I were to apply for Planning Permission to build an extension or a dwelling that overlooked another persons dwelling to the detriment of their privacy. So how does that differ from the proposed development of multiple dwellings on a field in a hollow that is overlooked by the multiple houses of Terrace Road and passers by?

CONCLUSION

So given the arguments above and the fact that the Covid-19 virus has ripped through our population and is yet to stop, they say we will have to live with it for the foreseeable future, economically it has caused businesses, shops and pubs to close, with the loss of many jobs. The high streets were already in decline, as were pubs and Post Offices. Many more people now use the Internet as a means of working from home and getting things that they want or need for everyday life, it has become a way of life, more so now than before covid-19. Therefore it is my belief that the high streets will have to evolve and you will find that more buildings will need to be Repurposed into Dwellings/Flats, high streets will be bulldozed and made into more appealing locations. It just needs the foresight to see this. So in time with the dwindling population comes the exchange of property ownership and also change of use of various properties. So is there really any need to build on any bit of food producing land especially as the world is facing a food producing problem in the future? Once you have built on agricultural land you will not be able to revert it back to agricultural land.

GENERAL NOTES

Statement of Community Involvement (SCI)

It has been noted that Dover District Council has pushed forward with the Draft Local Plan whilst we have all been in lockdown due to Covid-19 and community communication has been at its lowest level, the villages free papers that were delivered to every door in the village has been stopped due to the fear of catching or passing on Covid-19, thus making it hard for the community to come together as a whole to protest at this wilful destruction of our countryside let alone know of the Draft Local Plan in the 1st place.

When I complained about this on the last webinar that Dover District Council held regarding the Draft Local Plan, I was told they had done all that was legally required. What about morally?

Furthermore the Dover District Council Draft Local Plan website for lodging your opposition to the various developments was not fit for purpose and only useable to those that have PC's, as the hand held devices such as iPads and mobile phones can't use the site in the way it should be usable, case of point the size of print and general layout of the tables that show the allocated sites and the proposed infrastructure and the general design of the site made it unusable, therefore once again you have less people able to communicate their protest at the proposed developments.

Prior to this, In this General Notes section I noted what had happened 2020-2021. We are now in December 2022 and the lucky few of us (residents) that are fairly computer/new technology ways savvy have previously received emails from Dover District Council telling us there are Local Plan Exhibitions and telling us the Locations and Times these Exhibitions are taking place and not one of them was planned for taking place in Elvington, which is where they plan to build these 300+ houses. It is only due to the fact that resident's complained to the Parish Council and they consequently brought up the residents complaint with Dover District Council that they decided to have an Exhibition in Elvington, otherwise there would have been even less people residing in Elvington able to see what is planned for Elvington. The fact that the residents had barely been made aware of their plans in 2020-2021 and had the chance to object bears no credence as this time is the last time for objections to be placed and we have to re-submit our objections even though we have placed them in 2021 (I was told this by a Dover District Council official at one of the Exhibitions).

Yours Sincerely

Charles Baynes

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination? Not Applicable

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP28 Development between Elvington & Eythorne
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Infrastructure - rural roads unable to cope with 700+ more vehicles</p> <p>Environmental - bats, skylark, woodpecker, buzzard to name but a few are all active within this area. Development means habitat loss</p> <p>Education - One small school already to capacity, How are so many new families expected to source schooling? This will mean travelling into nearby towns. Stress on road and further environmental impact via pollution</p> <p>Health - No available GP surgeries. Again, requires travel to nearby towns. Shepherdswell surgery is not viable as has very limited operating hours</p> <p>Integrity of village heritage - This development connects Elvington & Eythorne. Individual village status will be lost. How are the villages to be named?</p> <p>Buses - Local services recently withdrawn. Proposed community will be isolated for non-drivers</p> <p>Green space - the area is used by hundreds of local residents per week. Exercise, dog walking and leisure via open space and connecting footpaths. Where are they supposed to go? Through a housing estate?</p> <p>Landscape - Views from surrounding properties (Elvington, Lower Eythorne) all compromised by the development. Countryside surroundings sought by these residents, lost.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	To develop one of the many derelict areas around the district or closer to towns and their amenities. Many areas in Dover town with crumbling, disused buildings where the investment/spending would be better placed. Develop in already built-up areas that have the services to cope. The solution to the need for more housing shouldn't be to concrete the countryside - especially when there are so many run down areas in need of the investment.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP28 Development between Elvington & Eythorne
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Lack of Amenities - Busses have been stopped to our area due to spend cuts. isolating many villagers already, before the proposal to bring hundreds more people here.</p> <p>Closest GP surgery is Shepherdswell. Due to GP shortages their opening hours have been reduced. More potential patients will not enable them to magic GPs that aren't there.</p> <p>Roads - I myself have moved from Thanet where it can take an hour to get from one side to the other, to live in the countryside. Many people living here have done the same, having bought houses to live here, they would now be plagued by 700 + more cars than we currently have living in the area. Not only that the roads through the villages are small and where historical old buildings line them cannot be widened.</p> <p>Quality of life - People who live here use the proposed area for excersize, walking dogs, running, cycling close to their homes where they do not need to drive to get there. Should this area become houses, they will be forced to travel further to do this which many may not do, or will find themselves having to drive to a green space.</p> <p>Schools. Local schools are small and full to capacity. Secondary schools are only in the towns which is a long drive for families.</p> <p>People who buy houses in the new development will likely need to comute. meaning likely driving to Dover and parking near the train station all day. overloading roads and carparks there.</p> <p>We are currently in a cost of living crisis. the houses proposed would not be affordable by the people already living in the area and only by people who are already wealthy.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I would recomend redeveloping areas in the towns where building have fallen into disrepair or derelict land. Pottentially for appartments mixed with small houses for people of lower incoms and first time buyers. where he build would put less strain on wildlife. roads and amenities are already bigger and can be made to better cope with the increased population.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	The unsoundness of the Plan is as set out in the attached representation by the Parish Council in relation to SAP28 and SAP29.

to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

DDC Edit: Detailed representation with analysis, photographs and table attached. Comment summary reproduced below.

3.6 Concluding Summary

3.6.1 In consideration of the above and other representations made by the Parish Council during the Regulation 18 consultation, Eythorne Parish Council strongly objects to the District Council's Regulation 19 submission containing the future development of local plan areas SAP28 and SAP29 on the following grounds and therefore calls for the Planning Inspectorate to remove both areas from the approved local plan document:

- a) the development areas contradict the District Council's intentions to promote sustainable growth
- b) the development areas, without good reason, contravenes the District Council's policy and NPPF objectives of achieving sustainable development and protecting the open countryside
- c) the development areas are wholly outside the existing settlement confines and will erode valuable open countryside without any overwhelming reason or justification
- d) the consequence of the local plan proposals in respect of SAP28 and SAP29 conflicts with the Governments food strategy as it removes existing productive agri-land and weakens our national food security position
- e) the development areas will place significant demand on services which are already oversubscribed or unavailable to the existing community
- f) there are no local employment opportunities to sustain any further demand for jobs
- g) the existing local highway network features many hazards and sub-standard geometric elements which will develop into a greater compromise on highway safety given the substantial increase in traffic movements generated
- h) parts of the existing local highway network already suffer from excessive vehicle speeds and as such this problem will be significantly exacerbated by the substantial increase in traffic movements generated
- i) the existing highway network characteristics of on street parking and additional traffic calming will promote greater traffic conflict and the potential for driver rage, as a result of the higher incidence of conflict from the additional traffic generated
- j) the local plan suggestion of traffic calming to roads not currently traffic calmed is suggested without foundation as the following criteria, applicable to any proposed traffic calming scheme, has not been proven: i) to contribute to casualty reduction ii) to reduce excessive speeding iii) to improve environment and quality of life issues
- k) the existing local highway infrastructure simply cannot sustain a 53% increase in traffic whilst avoiding the unacceptable consequent dangers to the travelling public as a result
- l) given the absence of any sustainably recognised transport facilities in and around Eythorne and Elvington none of the proposed development areas can meet the local plan aspirations of sustainable development or sustainable transport being realised

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Eythorne Parish Council suggests SAP28 is removed from the Dover Local Plan for the reasons given in the attached representation.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP28 - Land between Eythorne and Elvington (EYT003/EYT009/EYT012)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Development proposals in villages such as those proposed for Eythorne, Elvington and Shepherdswell should be considered very carefully therefore I OBJECT to this application for the following reasons:</p> <ol style="list-style-type: none"> 1 Infilling the areas of green fields around Eythorne, Elvington and Shepherdswell will ruin the character of the villageS. 2 The proposed building of this huge number of additional new homes in these developments along with its inhabitants would overwhelm the villages and the limited amenities they have to offer. The village amenities, providing basic needs are already oversubscribed. The adequacy of these amenities to accommodate future demand should have been determined- I do not believe they are in any way adequate. 3 The protection of villages' visual, historic, archaeological and environmental qualities are at serious risk should these developments go ahead. 4 The developments, both during construction and once completed will result in a significant increase in traffic and the noise and pollution associated with this increase. Road widening to reduce the inevitable congestion is not an option in the roads leading in and out of the villages. 5 The proposed siting of the developments are particularly ill-considered: being on a greenfield sites, and building here would both diminish the striking views from the villages and have an irreversible impact on flora and fauna and the local biodiversity. I think it's fair to say that many villagers are proud, if not very protective of the many and varied wildlife that choose to make these villages their home. 6 The importance of protecting our rural communities and the benefits that they provides in terms of both our physical and mental well-being should not be underestimated. 7 We need to make it our priority to protect the natural environment and habitats so that they remain undisturbed and thriving for future generations to enjoy.

	<p>8 The development in Eythorne with some 350+ new homes on top of the proposed 39+ at St Andrews Gardens will have a significant impact on the roads in Shepherdswell especially the main routes in and out of the village. I have personally abandoned my journey exiting the village via Coxhill due to congestion on numerous occasions. Our village roads simply cannot accommodate this significant increase in traffic. Traffic, particularly at peak times already causes major problems; a) sufficient pedestrian/vehicle segregation due to a lack of suitable foot paths and, b) speed and volume of traffic.</p> <p>9 Being able to comment on the Local Plan has been quite difficult. This process should have been made far more straightforward than this. Similar to how objections can be made on the planning portal.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Look at using former brownfield sites before carving up and concreting over virgin agricultural land. Far too many new houses are being built in Kent at this time. Our roads, water/waste infrastructure is already overstretched. There are insufficient amenities available to accommodate the additional inhabitants of these small villages.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Finn's, working jointly with Catesby Estates, represent the landowners of land reference EYT009 proposed to be allocated under Emerging Policy SAP28 situated between Evington and Eythorne to be allocated for a residential led scheme. We write to support the proposed allocation and the Policies aims for quality place making.</p> <p>The Emerging Policy includes an Indicative Development Strategy referenced as Figure 4.8 which identifies indicative development areas, landscape buffers and an area for open space provision. This Indicative Development Strategy appears well-considered taking into account the known opportunities and constraints of the land.</p> <p>The policy promotes joint working with between landowners to prepare a masterplan for the site set out the quantum of distribution of land uses, access, sustainable design and layout principles and this is agreed and also encouraged. Initial work leading on from Figure 4.8 has determined that the proposed allocation area is capable of accommodating a minimum of between 300 and 350 dwellings, in line with the Policies aims over the Plan period. It is suggested that the policy should either propose a range for the housing provision or promote a higher figure to ensure the best use of this land. The trajectory for the build out is envisaged as set out below, based on the assumed adoption of the Plan at end of 2023, and pre-app discussions running alongside:</p> <ul style="list-style-type: none"> • Adoption of Local Plan – December 2023 • Submission of outline planning application – Q1 2024 • Outline permission issued – Q3 2024 • Reserved Matters permission issued – Q2 2025 • Commencement on site – Q4 2025 • First units delivered – Q3 2026 • Delivery 50-60 units per year <p>A first stage initial concept Masterplan has been produced in conjunction with the Council's representatives as owners of adjoining site reference EYT003 which identifies areas suggested to be developed, access, convenience facilities provision and amenity/landscape areas within the site. A copy of this initial concept Masterplan, which builds further on Figure 4.8, is submitted alongside this representation to aid further discussions.</p> <p>Land parcel EYT012 is already allocated for 50 residential units under Policy LA36 of the Land Allocations Local Plan 2015 and can be accessed off Sweetbriar Lane within internal site connections into site reference EYT009 to link the land parcels together.</p> <p>The main site access into sites EYT003 and EYT012 has been found most suitable from Adelaide Road with potential for a secondary/emergency access provision from Terrace Road. Consideration has been given to access from Wigmore Lane, however this Lane is narrow and heavily treed to both sides and discussions between both parties have found that Wigmore Lane is unlikely to offer suitable access opportunity into the site. Reference to this within the Policy at (f) is therefore requested to be removed.</p> <p>The land is very well placed in relation to existing community and sports facilities at the Tilmanstone Colliery Sports and Welfare Club which is situated adjacent to the south of the site. The Emerging Policy, part (d), promotes the provision of sports fields or the enhancement of nearby facilities. Whilst no discussions with the Tilmanstone Colliery Sports and Welfare Club have yet taken place, it would seem most beneficial to the local community to support the ongoing enhancement and provision of this existing valuable facility which is already well located between Evington and Eythorne and offers a good variety of sports pitches and activities, rather than provide a new range of separate facilities within the allocated site.</p> <p>Adjacent to the north and north-east lies a proposed employment allocation on the former colliery tip ground which has been undergoing cleaning and filling since granted planning consent in 2013. Given the close location of this land to the proposed allocated sites, the existence of established paths between the land and the proposed residential allocations, together with the size of the employment allocation adjacent to a range of existing employment facilities, it is considered that additional employment facilities within the Policy area, with the exception of maintenance employment regarding maintenance of highways, the operation of the new convenience store and similar jobs, cannot be justified. It is therefore requested that reference within the policy wording is clarified to explain what employment the Council envisage upon this site.</p>

	<p>We would envisage employment on site to be related to the convenience offering along with the possibility of flexible work hub/ small office space within the development and suggest that the policy wording should make clear that employment uses falling within light industrial/ industrial categories are not suitable on this site.</p> <p>The policy requests provision of a new convenience store to meet day-to-day shopping needs of new residents. In discussions with the Council and its Representatives, there is also an aim that this facility should serve existing residents as well as new residents and it is suggested an amendment to the wording in part (c) would be helpful to reflect this. Whilst at an early stage, the initial concept Masterplan suggests a suitable location close to the site entrance from Adelaide Road which would provide ease of access to both existing and new residents.</p> <p>With particular regard to the convenience use, it should be clarified within the emerging Policy that such provision sought should sit within Use Class E or Use Class F, depending upon the identified needs following further work supporting this policy.</p> <p>The Policy also seeks consideration to be given to the undergrounding of power cables which cross the site in a south-west to north-east direction. Initial work separately by Catesby Estates and the Council's Representatives has suggested this would most likely be unviable due to the extensive costs involved. However, the alternative suggested in part (p) of the Emerging Policy, to provide separation between residential properties and overhead pylons, does seem a reasonable option and would enable the provision of the required number of dwellings on the site. It is therefore suggested that reference to the undergrounding of power cables in part (p) of the Emerging Policy be removed.</p> <p>Part of the site is recognised as being subject of surface water flooding. This area lends itself to open space and amenity provision as suggested in Figure 4.8. Initial findings of representatives of both land parcels EYT003 and EYT009 suggest that available data may be out of date and we expect that the surface water flooding area will be reduced when assessments are fully carried out and there will be no impact on achieving the numbers of dwellings expected to be provided at this site.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To support the Council's proposed allocation and to discuss the proposed changes to the policy wording.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Very few facilities in the village. Bus service suspended. GP surgery 3 miles away. Settlement survey - services and facilities out of date. Traffic single file. Church Hill and Chapel Hill and road to school - traffic problems. No capacity at the school. Not enough infrastructure. Our objections are to do with lack of facilities and very difficult traffic management problems. The nearest doctor is three miles away. No bus services locally. One local shop with one day a week post office, majority collected data out of date. Primary school too small for an influx of pupils. These new houses will bring horrendous traffic problems, Most of the area is single file traffic as the roads are choked with parked cars. By the school, Church Hill and Chapel Hill at Eythorne are very problematic. Any queue of cars could be dangerous for small and vulnerable children.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We object to an over-reliance of the Plan to deliver dwellings in the medium and long term parts of the Plan. There appears to be little delivery of dwellings in the early part of the Plan period and this will not make a positive contribution to the Council's housing land supply. The strategic, urban extensions will take time to deliver due to the requirement for a masterplan and prolonged planning process. This will not aid 'upfront' delivery for dwellings in the district. Please see representations for further information</p> <p>We do not consider that this settlement is appropriate for a strategic allocation. The villages are classified as a 'Local Centre' and the definition given in Appendix E of the Plan does not tally with the number of dwellings proposed at this location. It is contrary to the broad thrust of the Plan and paragraph 3.29 which states that that new development should be focused at accessible and sustainable locations which can utilise existing infrastructure, facilities and services, and to ensure development contributes to the sustainability of local communities and services. We are not convinced that this draft allocation seeks the purposes of the Plan and is not in accordance with the part of Policy SP3 which seeks to focus development of such a scale in the larger settlements in the district.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Development of this scale should not be located at draft allocation SAP28. The lack of housing delivery in the early part of the Plan period should be rectified by allocating new, smaller sites for development in appropriate locations in the district. This includes development at Ash, for which we have promoted a site which is cognisant with its classification as a 'Local Centre'. Please see representations for further information
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To contribute to the assessment of housing demand and potential requirement to assess when housing across the deistrict would be delivered.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We object to the scale of development proposed at Eythorne and Elvington:</p> <ul style="list-style-type: none"> • These are two distinct settlements separated by the proposed allocation. • The Agricultural Land Classification Map indicates that the site is likely to be grade 2 (best and most versatile agricultural land). • The 2011 Census indicates that 80% residents travelled to work by car, either as a driver or passenger. Public transport was used by a lowly one in twelve (8.2%). Given the limited public transport service provision – and that the funding subsidy has recently been removed - it is unlikely that new residents in employment will choose to travel by public transport. The site is a significant distance from the railway station and involves an uphill walk from Eythorne to Elvington. • With regard to sites EYT003 and EYT009 the Landscape Consultants Assessment in HELAA Appendix 3a states: 'Development conflicts with many landscape characteristics and some significant landscape/visual impacts are likely to occur. Site identified as medium high sensitivity'. • HELAA Appendix 3B: The site is given orange status as 'Highways concerns have been identified in relation to access and/or highway impact and further assessment is required to demonstrate whether this can be mitigated.' <p>The purported commensurate scale development in rural areas will result, in the case of Eythorne and Elvington, in the coalescence of two separate villages – with the intention that these two villages become one combined, larger, local centre. It is noted that these two separate villages are subject to environmental and highway constraints.</p> <p>With facilities being shared between the two existing communities, CPRE Kent is very concerned that opportunities for active travel will be hazardous – particularly when the narrow pavement flanking one side of the Adelaide Road would not seemingly allow two-way pedestrian traffic to safely pass (including mobility scooters, prams/buggies and children's scooters); and changes in topography across the allocation will make connectivity that avoids Adelaide Road exceptionally challenging.</p> <p>While development that would facilitate the retention and strengthening of existing services and community facilities is welcomed, it is not clear how – in the case of Eythorne and Elvington - this fits with climate change aspirations, when interconnectivity using Adelaide Road does not offer an safe/welcoming travelling environment; such that reliance on car travel is likely to be the norm.</p> <p>The growing (ie merging) of the adjacent villages of Eythorne and Elvington will mean a loss of their individual communities/character, which could have a major impact on social cohesion. The strategy of placing roughly half of all local centre development at these two villages – which currently sit below the level of local centre in the settlement hierarchy is likely to lead to devastating impacts. That is, of the 774 dwellings</p>

	<p>proposed at local centres, 355 (46%) would be provided at Eythorne and Elvington – which will outperform Deal as a district centre, which is set to accommodate just 223 dwellings.</p> <p>In fact, the breakdown of housing numbers in reveals the extent to which the spatial strategy which seeks to distribute development in accordance with the settlement hierarchy, doesn't actually pay regard to the settlement hierarchy, as a proxy for sustainable development.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? <p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	Section 1. Category Infrastructure Delivery Plan Reference: Infrastructure Delivery Plan – Draft for Consultation October 2022 PART 1: Physical Infrastructure Theme 1: Transport SP12 - Strategic Transport Infrastructure- Local Road Network 3.39 As part of the Local Plan modelling work, the impacts of Local Plan growth on the Local Highway Network were assessed however site specific mitigation and policies need to be considered . The plan must address the adequacy of the Coxhill, Eythorne Road, Shepherdswell Roads, local road network and public transport services supporting the proposed SAP 36,37 , 28, 29 and 30 developments.
<p>2 - Do you consider this part of the Plan sound?</p>	No
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	Justified Consistent with National Policy
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	Yes

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Not Applicable</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The draft local plan regulation 19 states under TI2 - Transport Statements, Assessments and Travel Plans section 10.7 the objective to ensure that traffic generated from new development can be accommodated on the highway network to promote the delivery of sustainable development. Section 10.8 states that traffic generated by development should normally be targeted towards the primary and secondary route network in the District. However other routes should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements.</p> <p>In the event SAP 36,37, 28, 29 and 30 developments are implemented the Coxhill, Eythorne Road, Shepherdswell Roads will be the main route by car from Shepherdswell, Eythorne and Elvington to the A2 road network, we believe this will place significant pressure on local road traffic which needs to be addressed however there is no material consideration to implementing road improvements and assign funding in either the Dover Local Plan or SP12.</p> <p>Access to Shepherdswell , Eythorne and Elvington from the A2 involves narrow single track road with passing place. Access at the top end of Shepherdswell village via Mill Lane connects to the lower end of the Shepherdswell Road restricted by road width, parked vehicles, speed humps and traffic. All access roads currently suffer from significant traffic congestion during peak commuter periods.</p> <p>Shepherdswell has limited parking facilities around the village hall and local shop and heavy reliance on road parking further limits the width of Coxhill to single file traffic. Traffic bound for the Eythorne industrial estates includes a significant flow of large articulated lorries that regularly lead to partial/ temporary road blockages and significant road congestion.</p> <p>The Local Plan SP12 - Strategic Transport Infrastructure focusses on improvements to the A2 highway network and key junctions only and decisions around improvements to the local road network are deferred. Regulation 19 Transport Modelling Forecasting Report, forecasts that traffic leading from the A2 through Coxhill, Shepherdswell and Eythorne, is projected to grow at 15-19% as a minimum scenario, our independent assessment based independent analysis of development proposals is this will be nearer 60%.</p> <p>Analysis of Coxhill peak traffic flow conducted by Shepherdswell Speedwatch (in collaboration with the Metropolitan Police) in June and July 2022 recorded traffic flow of circa 550 vehicles per hour.</p> <p>The Draft Local Plan Regulation 19 states that approved development must account for the cumulative impact of all developments allocated in the Plan on common road links. SAP 36,37, 28, 29 and 30 proposed developments will add 425 houses to the local area served by the A256 with residents needing to commute regularly to work, schools etc. during peak commuting periods. Shepherdswell has circa 700 houses so combined with the proposed plan increase of 425 houses in Shepherdswell, Eythorne and Elvington, this represents a 60% increase in property numbers which we project will be mirrored by an equivalent increase in road traffic. An increase of 60% on current commuter peak traffic flow translates to circa 590 vehicles per hour or 10 vehicles per minute along largely single-track road with road speed impacted by slow moving heavy goods traffic.</p> <p>Compounding significant road congestion there is a lack of pedestrian footways in Shepherdswell leading to key routes i.e. school, local shop, health centre and village hall, peak footfall along pavement less roads occurs when traffic flow is at its highest presenting a significant road safety concern.</p> <p>There are specific road access concerns relating to St Andrews Gardens (SAP 36 SHE004) a development of 57 houses served by one road access and exit point. The Local Plan Reg 19 proposes to increase the number of properties by 50 on this estate effectively doubling its size without addressing & mitigating emergency access and road safety design.</p> <p>KCC's Kent Design, Creating the design, Step 3- Design recommends that minor access roads generally serving up to 100 dwellings, including those in other residential areas which feed on to it should either be a through road or, if a cul-de-sac, serve no more than 50 dwellings unless an alternative access route, to serve motorists, pedestrian and cyclists, can be provided. Previous development surveys of SHE004 access points used the Housing and Economic Land Availability Assessment traffic light system which rated this site as Amber with an assessment proviso that "secondary emergency access is required however this does not appear achievable".</p>

	<p>St Andrews Gardens access road links into Mill Lane which is restricted at points to single track road with passing places. Mill Lane is heavily used constituting one of the main access routes to the Shepherdwell Health Centre, School and Church.</p> <p>The Draft Local Plan Regulation 19 states under section E1 that for designated industrial settlements new employment development will be supported within existing employment sites as identified on the Policies Map or on land within or immediately adjoining the settlement confines of designated settlements. While employment for villagers is essential it should be considered without a viable public transportation network such development will further challenge the stressed A256 local road network.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The Draft Local Plan Regulation 19 must propose improvements that address the adequacy of the A256 and local road network and public transport services supporting the proposed SAP 36,37, 28, 29 and 30 developments and ensure funding for these needs is addressed in the final plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I object to SAP 28 and SAP 29 being included in the DDC local plan for the following reasons:- As prime agricultural land these sites should never be built on. The sites are outside the settlement confines. The topography of the area means that local roads flood which then extends into adjacent fields. The infrastructure is not suitable now for the amount of local traffic. Raw sewage is frequently discharged onto these fields. The water supply from the acquirers is limited. There is no capacity for new patients at any local GP surgery. There is no public transport. Submitted by Malcolm Whitehead

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>As a Dover District Cllr (Linda Keen) for this ward, I fully support the views of Eythorne Parish Council, as summarised briefly below.</p> <ol style="list-style-type: none"> Both SAP28 and SAP29 areas are currently open countryside and consequently would be classed as greenfield development. Brownfield sites should be used instead - a brownfield land stock of some 174 hectares already exists within the Dover district which would support some 5000 new homes. The expansion of the built up areas proposed by SAP28 and SAP29 are both outside of the Settlement Confines defined and reviewed in 2021. The large scale development in respect of SAP28 and SAP29 are located wholly outside the settlement confines and consequently contradict the expressed will of DDC to protect open countryside. The current local amenities listed in the local plan are wrong in a number of respects as clearly shown in the Parish Council's table. Moreover, the Plan does not identify the services and facilities which do not exist nor are available in close proximity, and thus ignores the negative outcome on the sustainability, and indeed suitability, of SAP28 and SAP29. There is no GP surgery, no conveniently located secondary education or higher education, no nearby supermarket outlet and no public transport. Consequently, the major services required by families e.g. education, health and food shopping, and in particular those of any new developments, all will need to be accessed using non sustainable forms of transport. There are no local employment opportunities to sustain any further demand for jobs. The limited Developer Contributions which would be requested cannot overcome these deficiencies – they cannot be used, for example, to fund ongoing bus services which are outside the control of Dover Council, and which are provided by Kent Council and privatised bus companies which are completely outside the control of Dover Council. The extra houses will also place significant demand on services which are already oversubscribed or unavailable to the existing community. The existing local highway network features many hazards and sub-standard features which will develop into a greater compromise on highway safety given the substantial increase in traffic volumes generated by the extra houses. Especially with regard to the main road between the Sandwich/Dover Rd and the A2 (heavily used as a rat run between these two roads), there will be significant adverse effects on the already heavily congested and dangerous Cox hill crossroads by the Co-op and Coxhill road running through Shepherdswell. This road is already totally inadequate for current traffic volumes and will simply get worse. Nothing can be done about this, unless you build a by-pass, for which funding will simply never be available. <p>The Parish Council shows clearly in detail, that various possible traffic calming measures will not alleviate these and other problems such as on-street car parking. It is impossible to resolve the problems to road safety and traffic flows by tinkering with a few junction layouts and traffic calming measures, as these rural roads are simply too narrow and bendy to cope already – and there is no cash proposed for any widening of them – which would not be possible in most cases anyway.</p> <p>Moreover, given the absence of any sustainably recognised public transport facilities in and around Eythorne and Elvington none of the proposed development areas can meet the local plan aspirations of sustainable development or sustainable transport.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	No more than a very small number of houses should be built in Eythorne/Elvington because of the insoluble problems outlined in Box 6 – especially the inadequate road infrastructure – of at the most, say, 50 new houses.

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	No new houses should be built anywhere in the Dover/rural area until the A2 is dualized and a proper bridge or underpass constructed to relieve the already very congested Whitfield roundabout – for which no funds are currently available, nor likely to be in the foreseeable futures.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Eythorne and Elvington: Policy SAP 28 Dover Local Plan Reg. 19

We write to you on behalf of our client, Dover District Council (DDC) Estates department, in relation to the Dover District Council Regulation 19 consultation on its Local Plan. Specifically, we write in support of the proposed allocation at the land between Eythorne and Elvington (Policy SAP 28).

Our client owns part of the land within the allocation (broadly speaking the north-western half). The masterplan showing the full extent of combined ownership is enclosed at Appendix 1. The remaining part of the land is owned by the Ledger Family, represented by Catesby Estates. Both parties are working positively together and are committed to delivering this allocation in a holistic manner to deliver a sustainable extension to the existing settlements of Elvington and Eythorne.

SP3: Housing Growth

We welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period. Within the Policy, reference is made to the Council's overall spatial strategy i.e. the majority of growth will be focused towards the principal town, Dover, and the further expansion of Whitfield. Reference is made to growth then being focusing on the next layer of settlements, Deal (district centre), Sandwich and Aylesham (both rural service centres). It is noted that Eythorne and Elvington, as a designated local centre, will be allocated for up to 300 dwellings under Policy SAP 28. Accordingly, we consider it would provide greater transparency if Policy SP3 made reference to the growth proposed in this location within the spatial hierarchy referenced at Policy SP3.

We consider it is appropriate to direct development towards the land between Eythorne and Elvington which will be separated by the central playing fields and open space known as the Tilmanstone Colliery Sports and Welfare Club which is situated adjacent to the south of the allocation. Housing along with community facilities and local convenience store in this central position separated by the open space will enhance the sustainable credentials and degree of containment of the adjoining settlements. Both Eythorne and Elvington are well served by local facilities including, amongst other things, village halls, a primary school, public house, post office and local shops. There is also an established employment area to the east. The growth proposed, along with the expansion of Pike Industrial Estate, will also create a sustainable expanded settlement within the district. As well as improved cycleway and footpath linkages delivered by the allocations bus linkages will be improved and the villages are also served by the nearby railway stations 2 miles away at Shepherdswell and 2.3 miles away at Snowdown.

SAP28- Land between Eythorne and Elvington

DDC Estates confirms its support for this allocation and its intention to deliver this site at an early stage of the Plan period. Please see our comments below on the proposed housing trajectory for information on assumed delivery rates.

The allocation is in two landownerships and both parties are already working closely together to progress the initial masterplan for the delivery of this allocation in line with the Policy requirements. This requirement is acknowledged, and supported, by both parties to ensure the site is delivered as a whole, in the most sustainable and appropriate manner. This work is already underway, and a draft high level initial masterplan is enclosed at Appendix 1.

This masterplan is based on a high-level review of the site's constraints and opportunities, and it is acknowledged by both parties that further work is needed to develop the masterplan. However, at this stage it provides a good level of certainty to both landowners and the Council that the site can provide a net developable area of at least 10.4 ha, along with providing a good level of open space and biodiversity opportunities in line with the policy requirements, and adequate areas for surface water drainage. This would facilitate the delivery of between 300-350 dwellings, depending on the average density per hectare applied (30 dph and 35 dph respectively). Further design work on the character areas within the allocation and the range of densities that could be possible will be finalised in advance of the Local Plan Examination.

This draft masterplan should provide sufficient comfort to the Council that the allocation, as envisaged, can be delivered. As noted above, further work will be carried out by both parties in conjunction with the Planning Department to further refine this masterplan ahead of the Local Plan Examination and later planning application stage. This additional work will include detailed drainage work. It is acknowledged that the site is located within an area at risk of surface water flooding. This has been considered in the enclosed high level masterplan using data available from the Environment Agency. However, further work will be carried out to understand the drainage strategy for the site and determine the net developable area. There is some confidence from the work being done to date that the developable area may be expanded beyond that shown, and that in excess of 300-350 dwellings may be accommodated on this site. We expect to be in a position to update the Inspector on this at Examination when the additional technical modelling evidence has been undertaken and an agreed position reached with statutory consultees. Whilst in broad terms we are supportive of the allocation, we do consider some minor amendments to the policy as worded is required to ensure the policy is sound. We deal with each in turn.

First, we consider the requirements of the masterplan can be strengthened to ensure it serves the purposes as envisaged i.e. that, even if the site is bought forward separately by the two landowners that the principles embodied by the masterplan framework for the totality of the landholding would still be secured and delivered. The inclusion of a requirement for a phasing and implementation plan to be submitted on the first application will mean the infrastructure requirements stemming from the site as a whole will be understood, and the triggers and development contributions calculated in a fair way regardless of the timing of any application within the allocation. This will ensure the effectiveness of the Policy.

It is acknowledged in the Sustainability Appraisal (SA) to the Local Plan, that whilst the existing villages are well served by a number of local facilities, there are also higher order services located further away. Notwithstanding this, the SA, having taken this into full consideration, concludes that the allocation is likely to have significant positive effects when taken as a whole, largely in part due to the scale of the housing allocation delivering new local services and facilities at the centre of the expanded community it creates. We support the conclusions of the SA in this regard. It follows that we support the requirement of the policy to provide community and local retail facilities to provide a sustainable new settlement where trips can be internalised as far as possible. It is recognised the provision of sustainable transport links will also be key to ensure residents can use sustainable modes of travel, and the policy requirements towards sustainable transport measures including public transport will ensure this is delivered.

Whilst there is general agreement that to create a sustainable new place, local employment facilities should be provided, it is anticipated that the need for Class B employment uses will be met through the large employment allocation to the east (Policy ELR 5a and b). Any employment provision within the SAP28 site is likely to be small scale office development/work hubs etc (Use Class Eg). The Council may wish to amend the wording to ensure this is clear and therefore effective.

Housing Trajectory

We confirm that DDC Estates will be looking to deliver this site, along with the adjoining landowner, early on in the Plan period. Work being undertaken to develop a more detailed masterplan will be undertaken in conjunction with the Council's Planning Department, which will allow for an early stage of pre-application discussions so a planning application can be submitted upon receipt of an Inspector's letter or upon adoption of the Plan. In broad terms it is anticipated development could commence within 2 years following adoption, and first units delivered 6-9 months later. For example, if the Plan is adopted in December 2023, the first units could be delivered Autumn 2026. It is anticipated this site could deliver 50-60 units a year.

The proposed rewording or reinforcement of the policy wording of Policy SAP28 is set out below. It is also noteworthy that this omits the referencing of the undergrounding of the pylons across the site which has been investigated, but the cost would make this option unviable and on this basis the masterplan shows a generous 20m buffer on either side of the line of pylons.

Policy SAP28 - Land between Eythorne and Elvington (EYT003/EYT009/EYT012)

An extension is planned to Eythorne and Elvington to create a new sustainable community, incorporating garden village principles. Land is allocated to the east of Adelaide Road to deliver approximately 300 new homes over the Plan period.

A masterplan is required for the site to set out the quantum and distribution of land uses, access, sustainable design and layout principles. This should be prepared jointly by the landowners/developers, working with key stakeholders. This masterplan should be submitted and agreed by the Council before the submission of the first planning application, along with a phasing and implementation plan to agree the key infrastructure requirements and their trigger points for delivery. Any application for development should be preceded by, and consistent with, the agreed Masterplan. The masterplan shall be subject to a design review in accordance with Policy PM1.

In accordance with the relevant Local Plan policies, the masterplan and development of the site should provide:

- a. A wide mix of housing types, sizes and tenures, including affordable housing in line with the requirement of Policy SP5; housing for older people and serviced plots of land to contribute towards meeting evidenced demand for self-build and custom housebuilding;
- b. Design codes shall be developed as part of or to supplement the masterplan for the site in accordance with Policy PM1;
- c. Community facilities (Use Class E) and a new small convenience shop in an accessible location to meet the day-to-day convenience shopping needs of new residents;
- d. Formal and informal open spaces for leisure and recreation, including play areas, sports fields, allotments and community orchards, or enhancements to nearby facilities, to meet the needs of the development following community engagement and an assessment of the existing open space provision immediately adjoining the site. Where possible open spaces should be multi-functional contributing to wider ecological networks and the provision of sustainable drainage, and should be accessible to new and existing communities; provide upgraded routes for walkers and cyclists; improve connections between and enhancements to existing habitats; provide safe routes for wildlife, protecting and enhancing wildlife assets;
- e. Development on the site should be well related to the existing settlement of Elvington and respect the residential amenity of adjoining properties;
- f. Suitable access arrangements will be provided from Adelaide Road and Terrace Road, with associated improvements and traffic calming measures to both Adelaide Road and Terrace Road. NB Both landowners have reviewed the site access and do not consider access to be achievable from Wigmore Lane and on this basis referencing to the investigation of access from Wigmore Lane should be deleted from Policy SAP28;
- g. The following will be required in relation to wider strategic and local highway mitigation measures, to be informed by a Transport Assessment in accordance with Policy TI2:
 - i Consideration of the need for traffic management improvements to Church Hill, including a review of parking restrictions;
 - ii A review of the impact on the surrounding rural road network, and mitigation where necessary;

h. On and off-site sustainable transport measures including new and improved pedestrian links and cycle paths to connect the site with the services and facilities in Eythorne and Elvington; and public transport provision, informed by a Travel Plan which will be required in accordance with Policy T12;

i. Improvements to the Public Right of Way network to increase connectivity in the area;

j. Protection and where possible, enhancement of heritage assets and their settings through appropriate mitigation measures, to be informed by a Heritage Assessment and Archaeological Assessment.

k. A generous landscape buffer to the north/north-west of the site, determined by a Landscape Visual Impact Assessment, to minimise visual impact on the surrounding landscape. Existing landscape features such as hedgerows, trees and field boundaries shall be maintained and incorporated into the design and layout of the development, except to provide suitable access. l. Sustainable Drainage Systems should be integrated into on-site multi-functional green space and landscape provision;

m. A site-specific Flood Risk Assessment, including a comprehensive investigation into surface water flood risk, must be carried out in accordance with Policy CC5. This should inform the Sequential Approach which should be applied to the layout of the site by locating the most vulnerable elements in the lowest risk areas;

n. A wintering bird survey must be undertaken in advance of a planning application on the site. If the bird survey identifies that the development will exceed the threshold of significance, mitigation will be required. A suitable scheme of mitigation will need to be submitted with the planning application for the site;

o. Necessary utilities, including integrated communications infrastructure to facilitate homeworking. The developer should consult the relevant water authority at an early stage to ensure that there will be sufficient capacity in the wastewater system to accommodate the development and any upgrades are carried out where necessary. The occupation of the development should be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider. The site layout should be planned to ensure future access to existing water and wastewater infrastructure for maintenance and upsizing purposes;

p. The layout should be designed to ensure necessary separation between residential properties and the overhead pylons. This should be informed by consultation with The National Grid; and

q. Financial contributions towards the delivery of required off-site infrastructure including, but not limited to, primary, secondary and SEN education provision, libraries, community facilities, youth services, social care, waste provision and local bus services in accordance with Strategic Policy 11 .

In order to ensure that each site is planned and delivered comprehensively, any application for development on part of the site will be assessed against its contribution to the approved masterplan and will not prejudice the implementation of the site as a whole.

Summary

With specific reference to the proposed allocation and Eythorne and Elvington (SAP 28), we confirm the site is available for residential development, and the policy aspirations for the site can be achieved, it is therefore an achievable and deliverable allocation. DDC and Catesby Estate, (the latter on behalf of the Ledger Family), will be working together on progressing a more detailed masterplan with the Council in advance of the Local Plan Examination which when approved will guide the preparation of later planning application(s). Given the good range of services within both the existing villages of Eythorne and Elvington, it is considered to be appropriate to allocate this available land which because of its siting will serve to link the expanded settlements together and in conjunction with further community consultation will deliver uses and benefits that will make the settlement more self-contained and enhance its local centre status. Hume Planning Consultancy welcomes the opportunity to comment on this stage of the Council's Pre-Submission Local Plan and would like to reserve the right to attend the Examination in Public in due course.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP28
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	As a resident of Eythorne, I must voice my complaint to the proposed Plan for housing on the Eythorne and Elvington site. As SAP28 and SAP29.I write with concern about the local plan development within our two small village areas. The two villages, Elvington/ Eythorne has an estimated population of around 2,500 to 3,000 people depending on what source you get you figures from. Your proposed development is in access of 350houses to be built, 300 in one area and 50 in another. These residents will be capable of housing 700to 1000 people. This ratio can easily be seen to overwhelm the little facilities that are in the area. There are about 6 lock up type shops, a small infant school that cannot expand its facilities, a bus route that the local council have reduced its service to non existence. The roads are already causing concern to ALL residents and the Parish Council. I cannot see how this LOCAL PLAN can be allowed to exist as it stands, the area cannot take the increase in population.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)	

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	Regulation 19 Consultation Response on SAP28 & SAP29: I strongly oppose the proposals for development of the above sites for the following reasons :- The sites are areas of open countryside which should be protected. The agricultural land must be retained for food production & any housing development should be limited to existing brownfield sites.

<p>to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>These sites are outside of the settlement confines.</p> <p>There are no existing medical facilities in Eythorne or Elvington and Kent & Medway NHS Trust recently commented on a nearby planning application for 39 houses that there is no capacity at any GP surgery in the area for new patients and that they objected to the application. The suggestion that the same Trust could provide care for the residents of over 300 houses is therefore ludicrous.</p> <p>The very limited bus services are unlikely to continue beyond the end of the current academic year. Pupils will be unable to travel to any secondary school by public transport & residents have already had to give up their employment as they had relied on public transport. To suggest that hundreds of people would want to live in an area with no public transport, limited employment opportunities, no school places or medical facilities is seriously underestimating the needs of local families.</p> <p>The existing road infrastructure is already unsuitable. The access route to the proposed sites includes a single carriageway road with a passing place. Any increase in traffic, including construction traffic would only exacerbate the current, unacceptable situation. Southern Water have already written to local residents asking them to reduce their water consumption as the aquifers are very low on capacity and are drying up. Any additional housing & the amount of water required during any construction stage would have a detrimental effect on the availability of water in the future.</p> <p>Kindest Regards Annette Whitehead</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP28
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Natural England's advice in our statutory Regulation 18 response was that the policy wording should be strengthened so that both the Masterplan and landscape mitigation are informed by a detailed LVIA and that advice should be sought from the Kent Downs AONB Unit in progressing this allocation and associated policy. We are pleased to hear from the AONB Unit that you have indeed engaged with them while progressing this policy but we are concerned that the only reference in the policy to LVIA is under requirement 'k' which states: A generous landscape buffer to the north/north-west of the site, determined by a Landscape Visual Impact Assessment, to minimise visual impact on the surrounding landscape. Existing landscape features such as hedgerows, trees and field boundaries shall be maintained and incorporated into the design and layout of the development, except to provide suitable access; Unless you have received specific advice to the contrary from the AONB Unit (in which case we would be happy to discuss) our advice would be that the whole Masterplan for the site should be informed by a detailed LVIA (not just the landscape buffer). The policy should be re-worded to reflect this and we would suggest something along the following lines: A masterplan (based on a detailed Landscape and Visual Impact Assessment) is required for the site to set out the quantum and distribution of land uses, access, sustainable design and layout principles. This should be prepared jointly by the land owners/developers, working with key stakeholders. Any application for development should be preceded by, and consistent with, the agreed Masterplan. The masterplan shall be subject to a design review in accordance with Policy PM1. We further note that this strategic allocation policy does not include the requirement to "ensure appropriate species and habitat surveys are carried out prior to determination" while many other site Page 5 of 8 allocation policies in this plan do. Our overarching comments on this requirement notwithstanding we would query whether this is an oversight in this case. We welcome the expectation set out in the supporting text that while this site allocation is comprised of several parcels of land it should be designed and implemented as one contiguous scheme, established through a jointly prepared masterplan. We also welcome requirements 'd' and 'i' which relate to open space, green infrastructure, access, biodiversity and Sustainable Drainage Systems (SuDSs). Depending on our final HRA advice it may be possible to remove policy requirement (o) requiring wintering bird surveys which is related to concerns around loss of undesignated land that is still important in supporting the bird populations of Habitats Sites (otherwise known as functionally linked land).
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The policy should be re-worded to reflect this and we would suggest something along the following lines: A masterplan (based on a detailed Landscape and Visual Impact Assessment) is required for the site to set out the quantum and distribution of land uses, access, sustainable design and layout principles. This should be prepared jointly by the land owners/developers, working with key stakeholders. Any application for development should be preceded by, and consistent with, the agreed Masterplan. The masterplan shall be subject to a design review in accordance with Policy PM1.

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We have overlaid Turtle Dove territory data with the proposed sites in the Dover Draft Local Plan (using data from the 2021 National Turtle Dove survey and supporting data from BTO BirdTrack), to see if any developments pose a risk to known Turtle Dove territories.</p> <p>Two proposed sites for development contain recent records of Turtle Dove territories within a 1km area; SAP28 - Land between Eythorne and Elvington and Elvington and SAP52 - Prima Windows, Nonington. While we welcome the consideration of protecting trees and hedgerows within the site, further consideration needs to be provided for Turtle Doves, see below mitigation guidance.</p> <p>Turtle Dove Mitigation Guidance</p> <ol style="list-style-type: none"> Detailed proposals should aim to protect areas of scrub and mature hedgerows suitable for nesting habitat. If destroyed, this habitat can take up to 20 years to establish and become suitable for nesting. Detailed proposals should aim to ensure foraging habitat is available and managed correctly (food shortage is the main factor triggering it's decline on their breeding grounds). Alongside this, fresh water sources should be retained and managed sympathetically. Where known breeding birds occur, detailed proposals should feature; nesting habitat, foraging areas and a freshwater source within 350 metres. Studies have shown that recently fledged turtle doves will rarely venture more 350 metres from the nest site (Dunn et al. 2016) and at this stage are likely to:

	<p>I. be very vulnerable to predation. With increased human habitation it is possible there may be adverse effects from generalist predators (e.g. cats) that tend to congregate near to human habitat. (Dunn et al. 2016) and</p> <p>II. incur poor body condition if there is insufficient food nearby in the form of natural arable plant species (as opposed to anthropogenic food resources such as garden bird seed mixes and brassicas) (Dunn et al. 2018). As well as maintaining what habitat is already present for Turtle Doves within the Dover TDFZs, we recommend looking at opportunities to further expand/create areas of suitable habitat to ensure the long-term preservation and prosperity of this species within the Dover district. Further information can be found; www.operationturtledove.org ('helping your turtle doves'). The RSPB can assist with this advice on a case-by-case basis.</p> <p><i>(DDC note - this is an extract from full RSPB representation reference SDLP1435)</i></p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared

	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP28: Elvington desperately needs services. There is no doctors' surgery near since the Eastry surgery closed. Drains / sewage infrastructure are inadequate for current number of dwellings, bus services were drastically cut in 2022. A better, more affordable retail outlet is also needed. 300 houses surrounding Tilmanstone Colliery Welfare Club with access also on to Wigmore Lane and Barville Road are proposed with natural landscaping buffers.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Nearby, highways are crying out to be made safe and widened with pavements and pedestrian crossings. For this site to be sound, also the 30% affordable housing SP must be rigorously implemented. Then this would be a sound and effective choice of site; conditional on the provision of all the services above, the reinstatement of the bus services cut in 2022 and conditional on 3 engineered cycle paths to connect to Aylesham and Snowdown Station, Shepherdswell station and Walmer rail station.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

Re housing; These numbers of houses should not be built on agricultural land and the transport issues involved with the various and roads etc make it especially unviable due to congestion and environmental concerns. The villages are small and there is little in the way of shops and other facilities. Car-use would be high – and a big increase on currently. Has the relative value of the land concerned been assessed in terms of value through agriculture and carbon capture versus covering with concrete.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I am writing to object to the following housing development applications - 50 houses to the east of Roman Way, and the development of a further 300 between Eythorne and Elvington which I believe are referenced as SAP 28&29. Given the fact that the existing infrastructure barely supports the number of houses already in this area, I was shocked to hear the proposal of a further 350+ houses being built. The roadways in to, out of, and around the estate are constantly congested with huge volumes of parked cars lining both sides of the road. The junction between Adelaide Road, Roman Way, Tye Wood and Kelk Hill and the bend between Roman Way and Sweetbriar Lane have near-miss incidents multiple times a day, especially in late summer when the hedges overgrow and make them entirely blind bends. Further to this, the area between Adelaide Road and Church Hill is also often impassable, especially with the volumes of traffic caused by the primary school, which has no parking facility of its own, and Woodpecker Court's facility. Wigmore Lane is equally troublesome with the commuting traffic and Tilmanstone Salads lorries passing through essentially single-track roads given the volume of cars lining the streets at all times. Adding a further 300-700+ cars to the area would be an utter catastrophe, especially given the public transport routes have all been closed. It is my understanding that the primary school is already at capacity and there are no other primary or secondary schools within a reasonable distance, again given the lack of public transport. Even when public transport did exist, the number of buses passing through each day was so minimal that it could not replace people's needs for cars, so reinstating these would now only add to the traffic problem. There is one small convenience store in Elvington and one in Eythorne, again with no parking facilities, with the next larger store being miles up the road in Shepherdswell - again with no parking facilities and in a village with a congestion problem of its own given it's the main pass-through route from the A2. This is also where the closest doctor's surgery is. I am sure there are many more suitable locations for such a development near already established towns and cities rather than imposing it on villages already ill-equipped to deal with existing residents. All residents in the area are very concerned about this proposal and are all utterly opposed to it. I trust our voices will be heard.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Our objections are to do with lack of facilities and very difficult traffic management problems. The nearest doctor is three miles away. No bus services locally. One local shop with one day a week post office, majority collected data out of date. Primary school too small for an influx of pupils. These new houses will bring horrendous traffic problems, Most of the area is single file traffic as the roads are choked with parked cars. By the school, Church Hill and Chapel Hill at Eythorne are very problematic. Any queue of cars could be dangerous for small and vulnerable children.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP28
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC Note (1) The text below is an extract from the original representation which is attached to SDLP1438. SAP 28 – 30 Elvington and Eythorne SAP 28: Elvington desperately needs services. There is no doctors' surgery near since the Eastry surgery closed. Drains / sewage infrastructure are inadequate for current number of dwellings, bus services were drastically cut in 2022. A better, more affordable retail outlet is also needed. 300 houses surrounding Tilmanstone Colliery Welfare Club with access also to Wigmore Lane and Barville Road are proposed with natural landscaping buffers. Nearby, highways are crying out to be made safe and widened with pavements and pedestrian crossings. For this site to be sound, the 30% affordable housing SP should also be rigorously implemented. Then this would be a sound and effective choice of site; conditional on the provision of all the services above, the reinstatement of the bus services cut in 2022 and conditional on 3 engineered cycle paths to connect to Aylesham and Snowdown Station, Shepherdswell station and Walmer rail station.

	<p>DDC Note: additional relevant text from P5 of original rep:</p> <p>3.48 Many, many of the current residents of ex mining village Elvington were / are dependent on buses that have recently (2022) been cut, (following KCC cut to bus subsidies) to get to work in Canterbury, Folkestone, Sandwich, Thanet or Dover, or to get to secondary school, or to get to doctors, or to shop. These people had an environmentally sustainable public transport service that has been cut. Kent CC is saying it is looking at potential bankruptcy in 2023, so promises of new services and facilities are met with some disbelief.</p> <p>SAP 28 is planned on the cricket field next to the Tilmanstone Welfare club, The selection of this site can only be sound if cast-iron conditions to provide all of the services mentioned , are included as well as new drainage infrastructure. Council housing in Elvington has been subject to flooding from the sewage system, long overdue for replacement. As in Dover deprived wards, there are unhealthy EPC EFG homes in Elvington that need to be transformed into zero carbon home to lift residents out of fuel and therefore food poverty.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>2 - Do you consider this part of the Plan sound?</p>	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The plan provides for up to 600 more cars using Adelaide Road. Apart from blocking a single track road, it puts the school children in more danger from car impacts and they will have to breathe more co2 pollution on the way to school, in the playground and going home. Any risk assessment would show the plan endangers children and the outcome could be death. The plan is not sound as it endangers children it is not national policy to endanger children The plan is not legally compliant as it is not legal to endanger children DDC do not have to co-operate with endangering children, by shortening their lives. Could the risk assessment be made public.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The entrance to the new estate could come from Wigmore Lane. This avoids the school this will spare the children health issues later in life. Children's wellbeing should be the heart of all council decisions.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Dear Sir/Madam</p> <p>I am writing to object to comment on the above plan.</p> <p>I am very concerned about the amount of developments scheduled in and on the outskirts of villages, as opposed to the government's dictum that Brownfield sites should be the main focus for developments.</p> <p>I note that many of the proposals in towns are designated as medium timescale whereas many in the villages are designated short term.</p> <p>I feel that the brownfield sites in towns should be developed first then, if needed, the villages should be considered.</p> <p>As I live in Shepherdswell, naturally, I am very concerned about proposals for housing here.</p> <p>Shepherdswell is very unique in that every road into the village is narrow and we cannot see any way of improving the infrastructure except at major cost.</p> <p>The arguments by which the proposal for houses in Westcourt Lane were rejected also apply to the proposal at the end of St Andrews Gardens. Mill Lane narrows considerably going out of the village and there have been quite a few accidents (mainly minor so will not have been reported) and we know of at least two of our neighbors who have had quite serious collisions leading to write offs of their vehicles.</p> <p>Also, as the landowner near Mill Lane does not wish to sell, all traffic (including construction traffic) will come down St Andrews Gardens and one of the access points designated is round a hairpin bend.</p> <p>The school run time is one to avoid even now as cars are parked all the way up Mill Lane to past Millfields, all round the Green and down Church Hill. It is naïve to suppose that people will walk or cycle to school. They will not, especially when it is raining. Also, the school is oversubscribed even now with families having to take their children elsewhere (by car)</p> <p>Transport in the village is very poor and I believe more cuts are on the way. Only the smaller buses are used due to access. There can be no possibility of cycle lanes, the roads are too narrow to allow for this.</p> <p>There are very few facilities in the village. We have a Co-op which is well used but has no designated parking and at busy times cars park illegally, a beauty salon and a pub which, as we all know, is probably under pressure from the financial crisis.</p> <p>The sewage system is constantly under pressure and the system cannot be fit for purpose with foul waste appearing in gardens in Eythorne and The Glen</p>

	<p>The train station is an asset to commuters but not so much so for shoppers, especially if you live in the top of the village. Walking up steep Church Hill and Approach Road with heavy shopping bags is not an option.</p> <p>To conclude, I feel that because of the above arguments, Shepherdswell is not the place for large-scale developments, and I hope you will take this into consideration.</p> <p>I also wish to express my concern about developments at Eythorne and Elvington. Eythorne Road in Shepherdswell is very busy during the rush hour and this will only get worse.</p> <p>If builders wish to build estates, they must be prepared to improve the infrastructure at their expense.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The road structure of Elvington and the plans to put 350 houses. No buses or trains. No medical facilities.</p> <p>The infrastructure of the roads are not good enough now, there are not enough parking places. The cars are parked on the road making most of them single lane in Elvington. Building 350 houses which will have one car or more so adding to the problem of congestion. Also heavy vehicles and machinery adding to the traffic, mud and dirt on the roads all coming by the school and Adelaide Road, which is very dangerous for the children going and coming from school.</p> <p>In Elvington we have no bus services, so you need a car to get anywhere. We have no train station to get anywhere at all.</p> <p>There are not enough places in the school here. Elvington and Shepherdswell are full up which leaves Nonington, and you need a car to get there.</p> <p>We have no doctors or medical facilities in the village at all. The nearest doctors is Shepherdswell, Aylesham or Lydden</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I believe this plan to be not sound and this is for the following reasons: Nowhere in your plans do you address the major concerns that myself and all the local people are asking about. Such as the road infrastructure, which is already at capacity, Doctors surgeries, where are they? Then of course the schools and shops. I am quite sure that you adhere to the law regarding planning but how can we as local people be expected to make a judgement when you are ill prepared to provide the answers to the above questions. Is the present sewage system able to cope with the additional demand of housing, I don't believe it is. Public transport including children attending the secondary schools. With the bus situation as it is, locals were expected to let the children walk to Shepherdswell station (from Elvington and Eythorne) I believe this to be very dangerous and if you knew these roads, how busy and fast the traffic is, I am sure you would agree to it being very unsafe for children or adults for that matter to walk. If 300 houses are being built, there would be a minimum of 1.5 cars per household as this is a rural area so with a few social visits this would be at least 1000 car movements per day. As far as most locals are concerned whilst the process may be legal, the actual planning is flawed in as much as you "put the cart before the horse" or so to speak. We need answers to all these questions before we can agree/comment.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	See Box 7
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Finn's, as Planning Agent are working with Catesby Estates, as Promoter, to bring this site forwards. The proposed allocation of site EYT008, Land to south-east of Roman Way, Elvington is supported. The land is available and in a single ownership and is deliverable in the first 5 years of the Plan. The site, at 1.65 hectares, can be accessed off Beech Drive. Secondary access for emergency vehicles, bicycles and pedestrians can be provided via Byway EE335 at the western corner of the site, which is within the same landownership and can be improved to provide access suitable for a fire appliance.</p> <p>In continuity with the larger emerging allocation reference SAP28 in Elvington/Eythorne, it is suggested that the supporting text should be amended to state that there should be no ransom strips between the site and the highway in Beech Drive to ensure the site can be brought forward swiftly.</p> <p>The site forms an indent within the established settlement boundary and due to its location, being screened along the north-western boundary with a high established tree screen along the byway and fields to the west together with established housing to the south and east, the site benefits from good screening and enclosure.</p> <p>There is opportunity to provide a new hedged boundary along the north-eastern edge which will provide a biodiversity net gain through the provision of an additional habitat corridor to provide an improved link with the foliage and boundary treatment to the north of Ash Grove and linkage with the western boundary of the former colliery land to the east which is proposed to be allocated for employment use.</p>

	<p>The site can deliver up to 50 dwellings and playspace in accordance with the policy requirements which delivers a suitable density of development which reflects the local character and form. The site is located within easy walking distance of the community centre and sport facilities on Sweetbriar Lane to the south and other local services and facilities. The requirement for funding support for nearby community/leisure facilities is recognised and accepted as the increase in residential units is likely to result in greater use of local facilities and therefore It is considered a sustainable extension to housing provision in Elvington. It is requested that the site be allocated for residential development for 50 units.</p> <p>In terms of the proposed trajectory for delivery within Appendix Di, this has been listed as being built out between 2031-2035. This is incorrect. The site is available in single ownership with the main access from Dover District Council controlled land and a promoter on board and is expected to be built out within the first 5 years of the plan. The trajectory should therefore be amended to reflect this.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To fully explain the benefits of the site and confirm deliverability within the first 5 years of the Plan

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The unsoundness of the Plan is as set out in the attached representation by the Parish Council in relation to SAP28 and SAP29.</p> <p>DDC Edit: Detailed representation with analysis, photographs and table attached. Comment summary reproduced below.</p> <p>3.6 Concluding Summary</p>

	<p>3.6.1 In consideration of the above and other representations made by the Parish Council during the Regulation 18 consultation, Eythorne Parish Council strongly objects to the District Council's Regulation 19 submission containing the future development of local plan areas SAP28 and SAP29 on the following grounds and therefore calls for the Planning Inspectorate to remove both areas from the approved local plan document:</p> <ul style="list-style-type: none"> a) the development areas contradict the District Council's intentions to promote sustainable growth b) the development areas, without good reason, contravenes the District Council's policy and NPPF objectives of achieving sustainable development and protecting the open countryside c) the development areas are wholly outside the existing settlement confines and will erode valuable open countryside without any overwhelming reason or justification d) the consequence of the local plan proposals in respect of SAP28 and SAP29 conflicts with the Governments food strategy as it removes existing productive agri-land and weakens our national food security position e) the development areas will place significant demand on services which are already oversubscribed or unavailable to the existing community f) there are no local employment opportunities to sustain any further demand for jobs g) the existing local highway network features many hazards and sub-standard geometric elements which will develop into a greater compromise on highway safety given the substantial increase in traffic movements generated h) parts of the existing local highway network already suffer from excessive vehicle speeds and as such this problem will be significantly exacerbated by the substantial increase in traffic movements generated i) the existing highway network characteristics of on street parking and additional traffic calming will promote greater traffic conflict and the potential for driver rage, as a result of the higher incidence of conflict from the additional traffic generated j) the local plan suggestion of traffic calming to roads not currently traffic calmed is suggested without foundation as the following criteria, applicable to any proposed traffic calming scheme, has not been proven: i) to contribute to casualty reduction ii) to reduce excessive speeding iii) to improve environment and quality of life issues k) the existing local highway infrastructure simply cannot sustain a 53% increase in traffic whilst avoiding the unacceptable consequent dangers to the travelling public as a result l) given the absence of any sustainably recognised transport facilities in and around Eythorne and Elvington none of the proposed development areas can meet the local plan aspirations of sustainable development or sustainable transport being realised
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Eythorne Parish Council suggests SAP29 is removed from the Dover Local Plan for the reasons given in the attached representation.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Section 1. Category Infrastructure Delivery Plan Reference: Infrastructure Delivery Plan – Draft for Consultation October 2022 PART 1: Physical Infrastructure Theme 1: Transport SP12 - Strategic Transport Infrastructure- Local Road Network 3.39 As part of the Local Plan modelling work, the impacts of Local Plan growth on the Local Highway Network were assessed however site specific mitigation and policies need to be considered . The plan must address the adequacy of the Coxhill, Eythorne Road, Shepherdswell Roads, local road network and public transport services supporting the proposed SAP 36,37, 28, 29 and 30 developments.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The draft local plan regulation 19 states under TI2 - Transport Statements, Assessments and Travel Plans section 10.7 the objective to ensure that traffic generated from new development can be accommodated on the highway network to promote the delivery of sustainable development. Section 10.8 states that traffic generated by development should normally be targeted towards the primary and secondary route network in the District. However other routes should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements.</p> <p>In the event SAP 36,37, 28, 29 and 30 developments are implemented the Coxhill, Eythorne Road, Shepherdswell Roads will be the main route by car from Shepherdswell, Eythorne and Elvington to the A2 road network, we believe this will place significant pressure on local road traffic which needs to be addressed however there is no material consideration to implementing road improvements and assign funding in either the Dover Local Plan or SP12.</p> <p>Access to Shepherdswell , Eythorne and Elvington from the A2 involves narrow single track road with passing place. Access at the top end of Shepherdswell village via Mill Lane connects to the lower end of the Shepherdswell Road restricted by road width, parked vehicles, speed humps and traffic. All access roads currently suffer from significant traffic congestion during peak commuter periods.</p> <p>Shepherdswell has limited parking facilities around the village hall and local shop and heavy reliance on road parking further limits the width of Coxhill to single file traffic. Traffic bound for the Eythorne industrial estates includes a significant flow of large articulated lorries that regularly lead to partial/ temporary road blockages and significant road congestion.</p> <p>The Local Plan SP12 - Strategic Transport Infrastructure focusses on improvements to the A2 highway network and key junctions only and decisions around improvements to the local road network are deferred. Regulation 19 Transport Modelling Forecasting Report, forecasts that traffic leading from the A2 through Coxhill, Shepherdswell and Eythorne, is projected to grow at 15-19% as a minimum scenario, our independent assessment based independent analysis of development proposals is this will be nearer 60%.</p>

	<p>Analysis of Coxhill peak traffic flow conducted by Shepherdswell Speedwatch (in collaboration with the Metropolitan Police) in June and July 2022 recorded traffic flow of circa 550 vehicles per hour.</p> <p>The Draft Local Plan Regulation 19 states that approved development must account for the cumulative impact of all developments allocated in the Plan on common road links. SAP 36,37, 28, 29 and 30 proposed developments will add 425 houses to the local area served by the A256 with residents needing to commute regularly to work, schools etc. during peak commuting periods. Shepherdswell has circa 700 houses so combined with the proposed plan increase of 425 houses in Shepherdswell, Eythorne and Elvington, this represents a 60% increase in property numbers which we project will be mirrored by an equivalent increase in road traffic. An increase of 60% on current commuter peak traffic flow translates to circa 590 vehicles per hour or 10 vehicles per minute along largely single-track road with road speed impacted by slow moving heavy goods traffic.</p> <p>Compounding significant road congestion there is a lack of pedestrian footways in Shepherdswell leading to key routes i.e. school, local shop, health centre and village hall, peak footfall along pavement less roads occurs when traffic flow is at its highest presenting a significant road safety concern.</p> <p>There are specific road access concerns relating to St Andrews Gardens (SAP 36 SHE004) a development of 57 houses served by one road access and exit point. The Local Plan Reg 19 proposes to increase the number of properties by 50 on this estate effectively doubling its size without addressing & mitigating emergency access and road safety design.</p> <p>KCC's Kent Design, Creating the design, Step 3- Design recommends that minor access roads generally serving up to 100 dwellings, including those in other residential areas which feed on to it should either be a through road or, if a cul-de-sac, serve no more than 50 dwellings unless an alternative access route, to serve motorists, pedestrian and cyclists, can be provided. Previous development surveys of SHE004 access points used the Housing and Economic Land Availability Assessment traffic light system which rated this site as Amber with an assessment proviso that "secondary emergency access is required however this does not appear achievable".</p> <p>St Andrews Gardens access road links into Mill Lane which is restricted at points to single track road with passing places. Mill Lane is heavily used constituting one of the main access routes to the Shepherdswell Health Centre, School and Church.</p> <p>The Draft Local Plan Regulation 19 states under section E1 that for designated industrial settlements new employment development will be supported within existing employment sites as identified on the Policies Map or on land within or immediately adjoining the settlement confines of designated settlements. While employment for villagers is essential it should be considered without a viable public transportation network such development will further challenge the stressed A256 local road network.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The Draft Local Plan Regulation 19 must propose improvements that address the adequacy of the A256 and local road network and public transport services supporting the proposed SAP 36,37, 28, 29 and 30 developments and ensure funding for these needs is addressed in the final plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>As a Dover District Cllr (Linda Keen) for this ward, I fully support the views of Eythorne (Parish Council, as summarised briefly below.</p> <ol style="list-style-type: none"> Both SAP28 and SAP29 areas are currently open countryside and consequently would be classed as greenfield development. Brownfield sites should be used instead - a brownfield land stock of some 174 hectares already exists within the Dover district which would support some 5000 new homes. The expansion of the built up areas proposed by SAP28 and SAP29 are both outside of the Settlement Confines defined and reviewed in 2021. The large scale development in respect of SAP28 and SAP29 are located wholly outside the settlement confines and consequently contradict the expressed will of DDC to protect open countryside. The current local amenities listed in the local plan are wrong in a number of respects as clearly shown in the Parish Council's table. Moreover, the Plan does not identify the services and facilities which do not exist nor are available in close proximity, and thus ignores the negative outcome on the sustainability, and indeed suitability, of SAP28 and SAP29. There is no GP surgery, no conveniently located secondary education or higher education, no nearby supermarket outlet and no public transport. Consequently, the major services required by families e.g. education, health and food shopping, and in particular those of any new developments, all will need to be accessed using non sustainable forms of transport. There are no local employment opportunities to sustain any further demand for jobs. The limited Developer Contributions which would be requested cannot overcome these deficiencies – they cannot be used, for example, to fund ongoing bus services which are outside the control of Dover Council, and which are provided by Kent Council and privatised bus companies which are completely outside the control of Dover Council. The extra houses will also place significant demand on services which are already oversubscribed or unavailable to the existing community. The existing local highway network features many hazards and sub-standard features which will develop into a greater compromise on highway safety given the substantial increase in traffic volumes generated by the extra houses. Especially with regard to the main road between

	<p>the Sandwich/DoverRd and the A2 (heavily used as a rat run between these two roads), there will be significant adverse effects on the already heavily congested and dangerous Cox hill crossroads by the Co-op and Coxhill road running through Shepherdswell. This road is already totally inadequate for current traffic volumes and will simply get worse. Nothing can be done about this, unless you build a by-pass, for which funding will simply never be available.</p> <p>The Parish Council shows clearly in detail, that various possible traffic calming measures will not alleviate these and other problems such as on-street car parking. It is impossible to resolve the problems to road safety and traffic flows by tinkering with a few junction layouts and traffic calming measures, as these rural roads are simply too narrow and bendy to cope already – and there is no cash proposed for any widening of them – which would not be possible in most cases anyway.</p> <p>Moreover, given the absence of any sustainably recognised public transport facilities in and around Eythorne and Elvington none of the proposed development areas can meet the local plan aspirations of sustainable development or sustainable transport.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>No more than a very small number of houses should be built in Eythorne/Elvington because of the insoluble problems outlined in Box 6 – especially the inadequate road infrastructure – of at the most, say, 50 new houses.</p> <p>No new houses should be built anywhere in the Dover/rural area until the A2 is dualized and a proper bridge or underpass constructed to relieve the already very congested Whitfield roundabout – for which no funds are currently available, nor likely to be in the foreseeable futures.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	SAP29

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Regulation 19 Consultation Response on SAP28 & SAP29:</p> <p>I strongly oppose the proposals for development of the above sites for the following reasons :-</p> <p>The sites are areas of open countryside which should be protected. The agricultural land must be retained for food production & any housing development should be limited to existing brownfield sites.</p> <p>These sites are outside of the settlement confines.</p> <p>There are no existing medical facilities in Eythorne or Elvington and Kent & Medway NHS Trust recently commented on a nearby planning application for 39 houses that there is no capacity at any GP surgery in the area for new patients and that they objected to the application. The suggestion that the same Trust could provide care for the residents of over 300 houses is therefore ludicrous.</p> <p>The very limited bus services are unlikely to continue beyond the end of the current academic year. Pupils will be unable to travel to any secondary school by public transport & residents have already had to give up their employment as they had relied on public transport. To suggest that hundreds of people would want to live in an area with no public transport, limited employment opportunities, no school places or medical facilities is seriously underestimating the needs of local families.</p> <p>The existing road infrastructure is already unsuitable. The access route to the proposed sites includes a single carriageway road with a passing place. Any increase in traffic, including construction traffic would only exacerbate the current, unacceptable situation. Southern Water have already written to local residents asking them to reduce their water consumption as the aquifers are very low on capacity and are drying up. Any additional housing & the amount of water required during any construction stage would have a detrimental effect on the availability of water in the future.</p> <p>Kindest Regards Annette Whitehead</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I object to SAP 28 and SAP 29 being included in the DDC local plan for the following reasons:- As prime agricultural land these sites should never be built on. The sites are outside the settlement confines. The topography of the area means that local roads flood which then extends into adjacent fields. The infrastructure is not suitable now for the amount of local traffic. Raw sewage is frequently discharged onto these fields. The water supply from the acquirers is limited. There is no capacity for new patients at any local GP surgery. There is no public transport. Submitted by Malcolm Whitehead

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	As a resident of Eythorne, I must voice my complaint to the proposed Plan for housing on the Eythorne and Elvington site. As SAP28 and SAP29. I write with concern about the local plan development within our two small village areas. The two villages, Elvington/ Eythorne has an estimated population of around 2,500 to 3,000 people depending on what source you get your figures from. Your proposed development is in excess of 350 houses to be built, 300 in one area and 50 in another. These residents will be capable of housing 700 to 1000 people. This ratio can easily be seen to overwhelm the little facilities that are in the area. There are about 6 lock up type shops, a small infant school that cannot expand its facilities, a bus route that the local council have reduced its service to non existence. The roads are already causing concern to ALL residents and the Parish Council. I cannot see how this LOCAL PLAN can be allowed to exist as it stands, the area cannot take the increase in population

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>I am writing to object to the following housing development applications - 50 houses to the east of Roman Way, and the development of a further 300 between Eythorne and Elvington which I believe are referenced as SAP 28&29. Given the fact that the existing infrastructure barely supports the number of houses already in this area, I was shocked to hear the proposal of a further 350+ houses being built. The roadways in to, out of, and around the estate are constantly congested with huge volumes of parked cars lining both sides of the road. The junction between Adelaide Road, Roman Way, Tye Wood and Kelk Hill and the bend between Roman Way and Sweetbriar Lane have near-miss incidents multiple times a day, especially in late summer when the hedges overgrow and make them entirely blind bends. Further to this, the area between Adelaide Road and Church Hill is also often impassable, especially with the volumes of traffic caused by the primary school, which has no parking facility of its own, and Woodpecker Court's facility. Wigmore Lane is equally troublesome with the commuting traffic and Tilmanstone Salads lorries passing through essentially single-track roads given the volume of cars lining the streets at all times. Adding a further 300-700+ cars to the area would be an utter catastrophe, especially given the public transport routes have all been closed. It is my understanding that the primary school is already at capacity and there are no other primary or secondary schools within a reasonable distance, again given the lack of public transport. Even when public transport did exist, the number of buses passing through each day was so minimal that it could not replace people's needs for cars, so reinstating these would now only add to the traffic problem. There is one small convenience store in Elvington and one in Eythorne, again with no parking facilities, with the next larger store being miles up the road in Shepherdswell - again with no parking facilities and in a village with a congestion problem of its own given it's the main pass-through route from the A2. This is also where the closest doctor's surgery is. I am sure there are many more suitable locations for such a development near already established towns and cities rather than imposing it on villages already ill-equipped to deal with existing residents. All residents in the area are very concerned about this proposal and are all utterly opposed to it. I trust our voices will be heard.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Dear Sir/Madam I am writing to object to comment on the above plan. I am very concerned about the amount of developments scheduled in and on the outskirts of villages, as opposed to the government's dictum that Brownfield sites should be the main focus for developments. I note that many of the proposals in towns are designated as medium timescale whereas many in the villages are designated short term. I feel that the brownfield sites in towns should be developed first then, if needed, the villages should be considered. As I live in Shepherdswell, naturally, I am very concerned about proposals for housing here. Shepherdswell is very unique in that every road into the village is narrow and we cannot see any way of improving the infrastructure except at major cost. The arguments by which the proposal for houses in Westcourt Lane were rejected also apply to the proposal at the end of St Andrews Gardens.

Mill Lane narrows considerably going out of the village and there have been quite a few accidents (mainly minor so will not have been reported) and we know of at least two of our neighbors who have had quite serious collisions leading to write offs of their vehicles.

Also, as the landowner near Mill Lane does not wish to sell, all traffic (including construction traffic) will come down St Andrews Gardens and one of the access points designated is round a hairpin bend.

The school run time is one to avoid even now as cars are parked all the way up Mill Lane to past Millfields, all round the Green and down Church Hill. It is naïve to suppose that people will walk or cycle to school. They will not, especially when it is raining. Also, the school is oversubscribed even now with families having to take their children elsewhere (by car)

Transport in the village is very poor and I believe more cuts are on the way. Only the smaller buses are used due to access. There can be no possibility of cycle lanes, the roads are too narrow to allow for this.

There are very few facilities in the village. We have a Co-op which is well used but has no designated parking and at busy times cars park illegally, a beauty salon and a pub which, as we all know, is probably under pressure from the financial crisis.

The sewage system is constantly under pressure and the system cannot be fit for purpose with foul waste appearing in gardens in Eythorne and The Glen

The train station is an asset to commuters but not so much so for shoppers, especially if you live in the top of the village. Walking up steep Church Hill and Approach Road with heavy shopping bags is not an option.

To conclude, I feel that because of the above arguments, Shepherdswell is not the place for large-scale developments, and I hope you will take this into consideration.

I also wish to express my concern about developments at Eythorne and Elvington. Eythorne Road in Shepherdswell is very busy during the rush hour and this will only get worse.

If builders wish to build estates, they must be prepared to improve the infrastructure at their expense.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Specific to TC4S039 (the area off Chapel Hill Eythorne) the area does not appear to have been fully appraised. this area is already used for majority of parking and garage spaces. There is also limited access via an approx 8 foot wide concrete access between the adjacent houses. This also provides the only access for the 2 bungalows located behind the crescent. The worry is that any major building works with the associated ground works would cause major disruption given the amount of heavy plant vehicles that would require access. There is also the worry of the rear gardens of the crescent being overlooked with new dwellings. There is also worry asto how utilities would be provided given the aforementioned concrete pathway and hardstanding. There is also concern that from the councils initial scoping of the area on document appendix-2c-tc4s-sites-landscape-assessment.pdf highlights this area as a yellow and notes "development of this site would have and impact on the landscape and further assessment is required to demonstrate wether this can be mitigated". Why was this site chosen over more suitable areas?
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Scrapping site TC4S039 and re-exploring more suitable sites

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	to have an open conversation to allow opposing viewpoints to be fairly explored

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Section 1. Category Infrastructure Delivery Plan Reference: Infrastructure Delivery Plan – Draft for Consultation October 2022 PART 1: Physical Infrastructure Theme 1: Transport SP12 - Strategic Transport Infrastructure- Local Road Network 3.39 As part of the Local Plan modelling work, the impacts of Local Plan growth on the Local Highway Network were assessed however site specific mitigation and policies need to be considered . The plan must address the adequacy of the Coxhill, Eythorne Road, Shepherdswell Roads, local road network and public transport services supporting the proposed SAP 36,37, 28, 29 and 30 developments.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The draft local plan regulation 19 states under TI2 - Transport Statements, Assessments and Travel Plans section 10.7 the objective to ensure that traffic generated from new development can be accommodated on the highway network to promote the delivery of sustainable development. Section 10.8 states that traffic generated by development should normally be targeted towards the primary and secondary route network in the District. However other routes should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements.</p> <p>In the event SAP 36,37, 28, 29 and 30 developments are implemented the Coxhill, Eythorne Road, Shepherdswell Roads will be the main route by car from Shepherdswell, Eythorne and Elvington to the A2 road network, we believe this will place significant pressure on local road traffic which needs to be addressed however there is no material consideration to implementing road improvements and assign funding in either the Dover Local Plan or SP12.</p> <p>Access to Shepherdswell , Eythorne and Elvington from the A2 involves narrow single track road with passing place. Access at the top end of Shepherdswell village via Mill Lane connects to the lower end of the Shepherdswell Road restricted by road width, parked vehicles, speed humps and traffic. All access roads currently suffer from significant traffic congestion during peak commuter periods.</p>

Shepherdswell has limited parking facilities around the village hall and local shop and heavy reliance on road parking further limits the width of Coxhill to single file traffic. Traffic bound for the Eythorne industrial estates includes a significant flow of large articulated lorries that regularly lead to partial/ temporary road blockages and significant road congestion.

The Local Plan SP12 - Strategic Transport Infrastructure focusses on improvements to the A2 highway network and key junctions only and decisions around improvements to the local road network are deferred. Regulation 19 Transport Modelling Forecasting Report, forecasts that traffic leading from the A2 through Coxhill, Shepherdswell and Eythorne, is projected to grow at 15-19% as a minimum scenario, our independent assessment based independent analysis of development proposals is this will be nearer 60%.

Analysis of Coxhill peak traffic flow conducted by Shepherdswell Speedwatch (in collaboration with the Metropolitan Police) in June and July 2022 recorded traffic flow of circa 550 vehicles per hour.

The Draft Local Plan Regulation 19 states that approved development must account for the cumulative impact of all developments allocated in the Plan on common road links. SAP 36,37, 28, 29 and 30 proposed developments will add 425 houses to the local area served by the A256 with residents needing to commute regularly to work, schools etc. during peak commuting periods. Shepherdswell has circa 700 houses so combined with the proposed plan increase of 425 houses in Shepherdswell, Eythorne and Elvington, this represents a 60% increase in property numbers which we project will be mirrored by an equivalent increase in road traffic. An increase of 60% on current commuter peak traffic flow translates to circa 590 vehicles per hour or 10 vehicles per minute along largely single-track road with road speed impacted by slow moving heavy goods traffic.

Compounding significant road congestion there is a lack of pedestrian footways in Shepherdswell leading to key routes i.e. school, local shop, health centre and village hall, peak footfall along pavement less roads occurs when traffic flow is at its highest presenting a significant road safety concern.

There are specific road access concerns relating to St Andrews Gardens (SAP 36 SHE004) a development of 57 houses served by one road access and exit point. The Local Plan Reg 19 proposes to increase the number of properties by 50 on this estate effectively doubling its size without addressing & mitigating emergency access and road safety design.

KCC's Kent Design, Creating the design, Step 3- Design recommends that minor access roads generally serving up to 100 dwellings, including those in other residential areas which feed on to it should either be a through road or, if a cul-de-sac, serve no more than 50 dwellings unless an alternative access route, to serve motorists, pedestrian and cyclists, can be provided. Previous development surveys of SHE004 access points used the Housing and Economic Land Availability Assessment traffic light system which rated this site as Amber with an assessment proviso that "secondary emergency access is required however this does not appear achievable".

St Andrews Gardens access road links into Mill Lane which is restricted at points to single track road with passing places. Mill Lane is heavily used constituting one of the main access routes to the Shepherdswell Health Centre, School and Church.

The Draft Local Plan Regulation 19 states under section E1 that for designated industrial settlements new employment development will be supported within existing employment sites as identified on the Policies Map or on land within or immediately adjoining the settlement confines of designated settlements. While employment for villagers is essential it should be considered without a viable public transportation network such development will further challenge the stressed A256 local road network.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful

The Draft Local Plan Regulation 19 must propose improvements that address the adequacy of the A256 and local road network and public transport services supporting the proposed SAP 36,37, 28, 29 and 30 developments and ensure funding for these needs is addressed in the final plan.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	As a Dover District Cllr (Linda Keen) for this ward, I fully support the views of Eythorne Parish Council, as summarised briefly below. 1. Both SAP28 and SAP29 areas are currently open countryside and consequently would be classed as greenfield development. Brownfield sites should be used instead - a brownfield land stock of some 174 hectares already exists within the Dover district which would support some 5000 new homes. 2. The expansion of the built up areas proposed by SAP28 and SAP29 are both outside of the Settlement Confines defined and reviewed in 2021. The large scale development in respect of SAP28 and SAP29 are located wholly outside the settlement confines and consequently contradict the expressed will of DDC to protect open countryside.

	<p>3. The current local amenities listed in the local plan are wrong in a number of respects as clearly shown in the Parish Council's table. Moreover, the Plan does not identify the services and facilities which do not exist nor are available in close proximity, and thus ignores the negative outcome on the sustainability, and indeed suitability, of SAP28 and SAP29. There is no GP surgery, no conveniently located secondary education or higher education, no nearby supermarket outlet and no public transport. Consequently, the major services required by families e.g. education, health and food shopping, and in particular those of any new developments, all will need to be accessed using non sustainable forms of transport. There are no local employment opportunities to sustain any further demand for jobs. The limited Developer Contributions which would be requested cannot overcome these deficiencies – they cannot be used, for example, to fund ongoing bus services which are outside the control of Dover Council, and which are provided by Kent Council and privatised bus companies which are completely outside the control of Dover Council. The extra houses will also place significant demand on services which are already oversubscribed or unavailable to the existing community.</p> <p>4. The existing local highway network features many hazards and sub-standard features which will develop into a greater compromise on highway safety given the substantial increase in traffic volumes generated by the extra houses. Especially with regard to the main road between the Sandwich/DoverRd and the A2 (heavily used as a rat run between these two roads), there will be significant adverse effects on the already heavily congested and dangerous Cox hill crossroads by the Co-op and Coxhill road running through Shepherdswell. This road is already totally inadequate for current traffic volumes and will simply get worse. Nothing can be done about this, unless you build a by-pass, for which funding will simply never be available.</p> <p>The Parish Council shows clearly in detail, that various possible traffic calming measures will not alleviate these and other problems such as on-street car parking. It is impossible to resolve the problems to road safety and traffic flows by tinkering with a few junction layouts and traffic calming measures, as these rural roads are simply too narrow and bendy to cope already – and there is no cash proposed for any widening of them – which would not be possible in most cases anyway.</p> <p>Moreover, given the absence of any sustainably recognised public transport facilities in and around Eythorne and Elvington none of the proposed development areas can meet the local plan aspirations of sustainable development or sustainable transport.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>No more than a very small number of houses should be built in Eythorne/Elvington because of the insoluble problems outlined in Box 6 – especially the inadequate road infrastructure – of at the most, say, 50 new houses.</p> <p>No new houses should be built anywhere in the Dover/rural area until the A2 is dualized and a proper bridge or underpass constructed to relieve the already very congested Whitfield roundabout – for which no funds are currently available, nor likely to be in the foreseeable futures.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

Sap 30 tc4so39 objection I park my car in a garage daily as there is no parking up my road.the road access to the crescent is very narrow enough for one car only with a blind bend going down with no scope to make the road any wider.No dustcart can drive down or any other emergency vehicles or any land to make a pedestrian path.The properties in the crescent rely on the parking Outside there fences as there is no where to park.the new houses would over look the existing bungalows and houses.where will the cars park for these houses as it could be at least another minimum of 10 cars.a very poor site to build houses.will you be knocking down the trees currently on the site.if it does go ahead how on earth will any materials lorries get to the site as it is in consent use and access can not be blocked for the current residents.there is No other access to this site.will you be paying for the removal of all the garages and what notice will you give or will you be providing an alternative parking / garage space for me.the access out of the crescent is vey dangerous as cars park either side of the junction limiting the views onto the main road as it is the main route through the village.I don't expect these houses will be affordable to any local person and bungalows are most needed for the elderly.why would anyone want to move to Eythorne /elvington now that the stagecoach has removed the bus service not everyone drives.Hope that the plans do not go ahead as very unsuitable area to proceed

Re housing; These numbers of houses should not be built on agricultural land and the transport issues involved with the various and roads etc make it especially unviable due to congestion and environmental concerns. The villages are small and there is little in the way of shops and other facilities. Car-use would be high – and a big increase on currently. Has the relative value of the land concerned been assessed in terms of value through agriculture and carbon capture versus covering with concrete.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	With reference to the proposed allocation of land behind the crescent at Chapel Hall, Eythorne. It seems to be a thoroughly bad idea to build a further five houses on a development plot which has such a narrow access. Local vehicles already park in the access road and what will probably happen is that the Council will paint double yellow lines and force vehicles to park on Chapel Hill. But where will people park as the hill is already virtually at full capacity with vehicles parked from the roundabout right down to the Chapel. Any development in this area will increase the bottleneck at the top of Chapel Hill.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

I am writing to object to comment on the above plan.

I am very concerned about the amount of developments scheduled in and on the outskirts of villages, as opposed to the government's dictum that Brownfield sites should be the main focus for developments.

I note that many of the proposals in towns are designated as medium timescale whereas many in the villages are designated short term.

I feel that the brownfield sites in towns should be developed first then, if needed, the villages should be considered.

As I live in Shepherdswell, naturally, I am very concerned about proposals for housing here.

Shepherdswell is very unique in that every road into the village is narrow and we cannot see any way of improving the infrastructure except at major cost.

The arguments by which the proposal for houses in Westcourt Lane were rejected also apply to the proposal at the end of St Andrews Gardens. Mill Lane narrows considerably going out of the village and there have been quite a few accidents (mainly minor so will not have been reported) and we know of at least two of our neighbors who have had quite serious collisions leading to write offs of their vehicles.

Also, as the landowner near Mill Lane does not wish to sell, all traffic (including construction traffic) will come down St Andrews Gardens and one of the access points designated is round a hairpin bend.

The school run time is one to avoid even now as cars are parked all the way up Mill Lane to past Millfields, all round the Green and down Church Hill. It is naïve to suppose that people will walk or cycle to school. They will not, especially when it is raining. Also, the school is oversubscribed even now with families having to take their children elsewhere (by car)

Transport in the village is very poor and I believe more cuts are on the way. Only the smaller buses are used due to access. There can be no possibility of cycle lanes, the roads are too narrow to allow for this.

There are very few facilities in the village. We have a Co-op which is well used but has no designated parking and at busy times cars park illegally, a beauty salon and a pub which, as we all know, is probably under pressure from the financial crisis.

The sewage system is constantly under pressure and the system cannot be fit for purpose with foul waste appearing in gardens in Eythorne and The Glen

The train station is an asset to commuters but not so much so for shoppers, especially if you live in the top of the village. Walking up steep Church Hill and Approach Road with heavy shopping bags is not an option.

To conclude, I feel that because of the above arguments, Shepherdswell is not the place for large-scale developments, and I hope you will take this into consideration.

I also wish to express my concern about developments at Eythorne and Elvington. Eythorne Road in Shepherdswell is very busy during the rush hour and this will only get worse.

If builders wish to build estates, they must be prepared to improve the infrastructure at their expense.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	4.228 "The following site allocations are proposed in Eastry"
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I believe the additional site options at Statenborough House should be factored into the local plan to make it sound. The site has had previous structures and still contains extensive evidence of use and contamination from prior buildings in the ground that is consistent with the categorisation of a brownfield site. Addition of the site noted in the attached document also has the potential to elevate the environmental conditions for local flora and fauna at the site. As a footnote I personally think the local plan is otherwise good.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The addition of the site at Statenborough House to section (4.228) of this document (the DDC Local plan). The details of the site are in the attached document for consideration.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To allow the Inspector / Examiner to ask for further clarification that may not have been covered in the attached documentation.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	P. 260, para 6.81: "..facility which demonstrably provides a net benefit to the community"
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>To allow a small loss of Open Space as outlined below will provide a greater net benefit to the community as it will enable a larger area of Open Space to be restored and improved. The Evidence Base does not justify the current designation which will prevent recommended site improvements (see DDC Evidence Base OPEN SPACE AND PLAY STANDARDS PAPER Dec. 2019 p.17 Table 4.1.4: Rural Analysis Area Quality Summary).</p> <p>The site Off Mill Lane Eastry (site ref 393) is quite large at 0.53 ha and is designated as Amenity Greenspace but with the exception of several trees towards the north of the site. Visually (see pictures attached) this former builders yard and tile manufacturing site is more akin to a brown field site. The site is overgrown by brambles and covered with roof tiles and slag heaps of several tons of building rubble. We argue that while the trees must be protected, the rest of the site has been wrongly classified. This position is also supported by the DDC Evidence Reports: out of all the 120 Open Space sits assessed in the 2019 Open Space Assessment Report, this site is identified as the very lowest scoring amenity green-space in terms of quality (34.4%) and second lowest in terms of value (28.0%).</p> <p>Additional text insert by DDC from comment SDLP468</p> <p>This comment is an amendment to my previous comment in relation to PM5:</p> <p>If the proposed amendment to the Local Plan is approved and subsequent planning application to Dover district Council for a single dwelling is also authorised, provisions will be made to alleviate the current congestion on Mill Lane traffic by providing a car parking space for the adjacent property to the site's East access road, Bushley house. This will result in a further measurable and concrete net benefit to the community.</p>

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>This representation seeks to remove a small area from the open space designation of that site. This would enable a single dwelling unit to come forward (self build) under Strategic Policy 3 and taking account of all other Development Management Policies at the time of making the application. Living on site would enable us to restore, improve and manage the remaining open space, improve the quality of the overall site, including both access roads belonging to the site and tree maintenance, resulting in a measured enhancement to Eastry's open space provision and in a net benefit to the community.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>The Open Space and Play Standards Paper (2019, page 17, table 4.1.4) rates 10 Amenity Greenspace sites, including the site "Off Mill Lane Eastry" as being "below quality" and recommends "Enhancing site quality should be explored where possible (e.g. exploring options for improved maintenance, drainage and enhancement of general appearance)."</p> <p>We wish to participate in the oral part of the examination to present how this amendment to the Plan will enhance the site quality and appearance of the area.</p>

<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>No</p>

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am totally dumbfounded with the Dover District revised Draft Local Plan as the number of dwellings now being proposed has now been increased by an additional 95, which will lead to the loss of more of 'Dover's world class landscapes'. Surely there is a policy conflict here, where the government seeks to protect and enhance our domestic production so as to maintain our food security? How does building on agricultural land help with global warming? The scale of this revised Local Plan is out of proportion to the size of the village and is out of character. Please re-read my original comments regarding the original Local Plan as they are still pertinent (although I am aware that dwelling numbers have increased). Please see below: I understand the fundamental philosophy, aims and aspirations of the Local Draft Plan. However, when it comes to the over-development of the ancient village of Eastry, which has been predominantly developed using the original generic plan, small roads and paths where they exist, I feel that some of this has not been fully considered. Local residents have already formulated a campaign with regards to vehicles speeding throughout the village. This problem will only become worse with all the added cars and their movements. There are already two developments which have planning permission (130 dwellings). If the Draft Local Plan is adopted, this will add a further 120 dwellings. With the hospital site (which already has planning permission) and ESA002 in close proximity to each other, this will mean 160 dwellings bordering up to an existing conservation area and a natural habitat area. The total number of new dwellings will be 250. Comparing the EAS002 site size and estimated 80 dwellings, with that of EAS012, 35 dwellings, it appears that EAS002 will have high density smaller housing. This is a concern especially with the area having a significantly lower job density than that of Kent and the South East region. Where will all the new employment come from? There is also an issue for the wellbeing of local residents, following the loss of spectacular landscape views, habitats and agricultural land and the demise of the present flora and fauna. How do these developments in Eastry provide significant environmental, social and economic benefits for local residents and visitors? There will be added pressure on local amenities, a small school, limited shops and no Doctors surgery. The use of a car or public transport will be needed to access Primary Shopping areas, as they cannot be accessed safely by pedestrians. Therefore, some key issues need to be carefully considered and resolved: Amenities. Infrastructure: provision and connectivity. Utilities. Roads and Paths, Health and Safety issues. Size, speed and volume of traffic using the narrow roads. Parking for Residents. Pathways (some unsafe or do not exist at all). Loss of areas of natural beauty. Noise and Air pollution (during and after developments). Ancient village. Roads and paths cannot be widened. Over Development. Loss of Agricultural Land. Wellbeing of present local residents. Community facilities. Damage to present buildings by traffic movement (already identified). Allocation of building density and diversity on plots. Flora and Fauna. Present wildlife habitats etc. Bats, birds and reptiles. Listed property and Conservation area. Quality of each site for proposed Development...access, flooding, impact on area and residents. Will Eastry Parish Council receive any SO16 money if the plan is approved? I strongly object to the proposed Developments in Eastry shown in the revised Local Draft Plan.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Eastry is a rural village with roads, without footpaths, that are already hazardous to pedestrians. Main culprits are speeding vehicles. At the same time selfish parking causes hazards on many roads but especially in the High Street. While I accept the need for development particularly on the Old Hospital site to do it without considerable improvements to the infrastructure will just cause mayhem. Finally the proposed 50 house development on Gore Lane, which is basically a single track road with many lorries and buses on it regularly, without any footpath or road widening is an accident waiting to happen. How are children supposed to cross this road safely to get to school? Insist on road improvements before granting permission for the safety of all village residents. Do not wait for it to happen before doing the job properly.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? <p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>I have just been onto the get-involved part of the website to comment on the local plan for new housing in Eastry. I note it states that there are only 3 areas allowed for comment, namely; Legal Compliance, Soundness and Duty To Cooperate. I am certain that you have all these wrapped up very soundly and it just furthers my view that consultations when applied to local or national government are no such thing and are just statements of intent.</p> <p>With regard to Eastry no one should suggest that no housing should be built. Obviously, the old hospital site, being brown field is an obvious place to build and there are others - some as you have listed. However I cannot see the justification for a large number of houses being built in Lower Street Eastry on prime agricultural land.</p> <p>We are all aware of the type of housing that will be built. It will be expensive properties built for maximum profit to the building companies. Being honest, it costs more or less the same to build a property in Eastry as it does in Middlesborough but it will sell for probably 5-10 times as much. So much for levelling up. The need, where a demand exists in this area, is for affordable housing for young people and I have previously been told by a councillor that this cannot be insisted upon.</p> <p>In addition, I have heard absolutely nothing about improvements in basic infrastructure such as: Schools – how will Eastry Primary School cope with the extra children from the proposed 273 new homes.</p> <p>Doctors- surgeries have been closing throughout the area and there is a national shortage of GPs anyway.</p> <p>Sandwich Medical Practise appears to be at full capacity regardless of the recent new building.</p> <p>Public transport- buses throughout the area have been dramatically scaled back and indeed I believe there are no buses running through Eythorne at all and they are apparently going to have 900 new houses.</p> <p>I suspect that your local plan is a box ticking exercise that the council can pass to their national government colleagues for some “brownie” points.</p> <p>As I mentioned earlier I don’t expect any action from “consultative “documents as they are really only for a legal compliance on what they are going to do regardless of any local opinion.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I've been on the Local plan to have my say and how they expect people to negotiate the minefield and leave your objections or comments heaven oly knows. I feel fir older folk. How do I submit my comments please? I think it's utter madness that there are plans submitted to build so many unaffordable houses around the village. We have no Dr Surgery, Cooks Lea cannot cope with the amount of traffic that currently goes up to the School. The road needs traffic calming measures as it is. People speed up the road with no care for people's pets, cats have been run over, my neighbours cat was run over and left in the road. I've lived in Eastry all my life and it's a beautiful village which is sadly being ruined by all the unaffordable houses. The trees and hedgerows are being cut down and destroyed. Unless we are going to take a pill which is a three course meal (like Charlie and the chocolate factory) how are the wildlife and the Bees supposed to survive. There is too much farmland being sold to developers.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I have lived in Eastry and Lower Street for 34 years. I have lived in both the lower part (Buttsole end) and upper part of Lower Street where I live currently. I therefore feel I am well placed to comment on The Dover District revised draft Local Plan as I have a long term knowledge of the workings of both the Eastry village and Lower Street. I am somewhat surprised that the Local Plan for Eastry is still under consultation with two major housing development sites (the old Hospital site and Gore Lane and Lower Gore Field) already having received planning permission for such an incredibly large number of houses in such a small historic village. It also appears that Dover District Council is considering even more housing than in the original plan: TC4S0231 (SAP 33). With the 178 houses already granted planning permission, how can the Council even consider an additional 95 new houses? I chose to live in Eastry as it is a small historic village in the countryside. I did not choose a town which it will soon be if the Council continue.</p> <p>My main objections are:</p> <p>1) Infrastructure Eastry is an ancient village with even the central main road being extremely narrow. There is currently a major speeding issue, both night and day, which the village residents have already raised with the Council (particularly in Lower Street) and an issue with heavy load and large vehicles. The road is extremely dangerous for existing residents, even the double yellow no parking road signs are being ignored. With the proposed increased number of dwellings at EAS002 and TC4S0231 (90 dwellings) in addition to the EAS010 site (hospital –planning already approved) which run almost back to back, it seems highly likely that the traffic load will increase further, with further risk. In Lower Street the pathways are extremely narrow, poorly maintained (despite this being raised with the Council) and there are sections where there is no pathway at all. The road is too narrow for widening without narrowing the road further due to the room needed for pathways. With Lower Street</p>

being extremely narrow, with residents parking on the road outside their houses (which they should be able to do for their own safety) vehicles already use the narrow path and driveways as part of the roadway when passing. How will the new residents of EAS002 and TC4S0231 access the centre of the village safely and existing residents be safe? Safe access to the EAS002 and TC4S0231 site on Lower Street is of concern especially with the speeding issue and large, heavy vehicles, as visibility is extremely restricted. If safe access cannot be achieved in Lower Street, it would mean access via the centre of the village, which would then mean increased traffic and further safety issues.

2) Existing Historic Buildings Eastry has many old and listed buildings, especially through the main central road (Lower Street and upwards). There is already damage being caused to these buildings by the volume and heavy traffic. Increased traffic flow will only exacerbate this problem. Eastry has a conservation area, how can increasing the damage to this historic village be approved? The scale of the allocation of new housing is totally out of proportion to the size of the village and totally out of character.

3) Existing Habitats Between EAS010 (already approved) and EAS002 sites, there is land which has a number of species of plants, birds and animals. This is home to bats and adders and a large variety of birds including: wrens, partridges, woodpeckers, jays, robins, owls and kestrels plus a whole range of other species of birds. There is also a range of wild flowers e.g cowslips. This area is an asset to the village and enhances the well-being of the local community with the area being used by many for pleasure walks and for the siting of these species. An increase in residents at EAS002, alongside those in EAS010, as well as an increase in traffic could have a significant negative impact on these species and the wellbeing of existing residents. If a road is put in place that crosses this land to improve the infrastructure (which has been suggested) would these species actually remain here and how would the well-being of local residents be improved?

4) Agriculture, Landscape and Resident Well-being Many residents of Eastry enjoy the landscape of the edge of the village that looks over the valley of Eastry, to view the agricultural and natural landscapes especially when walking the public footpath that runs between the proposed EAS002 site and the already approved EAS010 site. Many residents also walk the narrow country lanes to enjoy the views across the fields where EAS012 site is. With these areas covered in new dwellings, this existing beautiful landscape which brings a sense of well-being to local residents and the existing character of this village will be destroyed. There is also a clear policy conflict within government which seeks to protect and enhance our domestic production to maintain food security.

5) Amenities Amenities in Eastry have already been reduced over recent years. Residents have to now travel to Sandwich to the doctors and dentist. If unwell and travelling by bus, this is an extremely unpleasant experience. How can parents with young children, the elderly and disabled residents manage such an ordeal? There is also no footpath all the way to Sandwich. Eastry Primary School has limited space for the possible increase in the number of children. Where will they go to school? Worth Primary school is extremely small and Ash has limited space. Sandwich Infant and Sandwich Junior School also have limited space. All of these villages are not easy to access on the bus with children. Sandwich has no large superstores and Eastry has limited shops. How will families or those residents with disabilities manage the journey on the bus or by foot to Whitfield, the Primary Shopping area? Many existing residents still have the copper broadband internet connection which can be intermittent. Will this be updated to ensure an efficient service for both existing residents and the additional 273 dwellings? With so many Eastry residents now working online from home, this would need an essential upgrade.

6) Noise and Pollution The noise and pollution of the village is of concern with the current traffic volume and speed of traffic. With an increase of 95 planned houses on top of the 178 already with planning permission, this situation can only worsen. The health and well-being of existing residents can only be worsened by such a plan.

7) Flooding As a resident who has lived in Eastry for many years, flooding is a concern in relation to site EAS002. How will this be addressed without destroying the village pond and landscape?

8) Employment The Dover area has a lower job density than that of Kent and the South East region. With the proposed number of dwellings in addition to those already planning approval, where will the new employment be found?

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I am very against the proposed new builds in our village. This is too much for the limited infrastructure of the village, the school is over subscribed, the local doctors surgery is now in sandwich and virtually impossible to get an appointment as it is. Traffic through the village is forever growing and speeding has been an issue over recent times. Buses have trouble getting around and through the parked cars. I have lived in this village for over 30 years and feel I must speak out against this proposal , this was a small, rural community and I do not wish it to become a town.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>I email you in response to the above as to which I am opposed. Eastry is meant to be a village in the country, which is slowly being eroded away. Unless we are not careful the village of Tilmanstone, Woodnesborough, Betteshanger and the hamlet Hamill will all join up with Eastry, and it shall become one "Big Suburbia" Where is the infrastructure to cope? new schools? doctors? need I go on? 178 houses have already been proposed that will already cause major disruption, especially in Gore lane between Albion road and Gore Farm, tipper trucks, cement lorries, where the road is already very narrow and only 2 small cars can pass. On the approach to Eastry from Dover the beautiful view of the countryside and the devastation of the habitats of the existing wildlife is going to be sacrificed for 90 houses all on Lower Street.. There is too much new building going on generally in the South-East, it is already overcrowded, Soon all we will be looking on is concrete ,a sad prospect for the current and future generation So to clarify I would like to repeat, I am strongly against the go ahead of these houses being built...</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am writing, as an Eastry village resident, to register my very strong objection to the above revised local plan. This plan is proposing additional housing of 95 dwellings plus some 130 houses that have already received planning permission to be erected in the village.</p> <p>Eastry is a very pretty and historic village nestling in the heart of some staggeringly beautiful countryside. The countryside immediately surrounding and adjacent to Eastry with rolling tree studded meadows, windmills and leafy lanes is unique to this part of Kent, and contributes to and compliments Eastry itself.</p> <p>The sleepy quiet village with its different styles of housing, that all somehow seem to blend, and it's beautiful ancient Church, steeped in history often brings people to visit. That however, thanks to Dover District Council, would seem to be a thing of the past since permission is likely to be given for some 225 house to mushroom up ringing round the village.</p> <p>Eastry was built to fit and sustain itself and up until now has managed to maintain that status quo, even though, with the advent of so many cars per household the narrow roads are now somewhat crowded.</p> <p>Eastry simply does not have the infrastructure to sustain the huge number of proposed new houses, each with possibly two cars on average per household thrown into the mix. It does not appear that any thought or regard to safety and likelihood of flooding has been factored into this decision to sink Eastry under concrete. No consideration either, appears to have been given to the truly devastating effect on the environment and our already dwindling wildlife.</p> <p>Indeed it would be nice to know why this whole area of South East Kent generally has been singled out for such excessive over development. Are these decisions made specifically by the various Councils Planning Department or, are they following a directive from Westminster.</p> <p>I am appealing to the Planning Department of Dover District Council to reconsider this whole very disturbing and unsettling proposal.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP 32 will raise traffic levels in an already troublesome spot. Along with SAP 33 the addition of 90 homes will make Lower Road even more treacherous than it is now, or will be after the hospital development is complete. Older residents of the village have pointed out that the area designated as SAP 32 has flooded historically in bad weather.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Remove SAP 32 from the plan along with the Cross Farm plot.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note: Document titled 'Facebook: Eastry Community Watch – Lower Street Traffic Complaints' was removed from objective for Data Protection reasons. It contains comments from Facebook and names. The comments relate to traffic on Lower Street (18 pages) and will be made available to the Inspector on request.</p> <p>1. These additional houses will put huge stress on the village resources, given that it has limited schooling and no medical practices, and all roads within the village are single lane due to parked cars.</p> <p>2. With the 178 houses that have been granted planning permission, Eastry will already be There is no room for a further 10 houses or the 95 in this Local Plan - see the attached 175 comments on the Eastry Community Watch Facebook page about traffic congestion and the danger to lives on Lower Street.</p> <p>3. The whole Local Plan consultation process is unsound and probably illegal. (a) The public exhibition events were poorly promoted and occurred prior to the village receiving an excellent leaflet from the Parish Council, so very few people knew about them as is evidenced by just 300 people attending. (b) Most of the marketing has been web based, excluding many people from participating, such as my parents. (c) The web-based mechanism for providing feedback is over complicated and beyond most people's ability, including mine, to raise objections or comment.</p> <p>4. Given that the government is no long setting targets for numbers of houses built by local authorities, there is no need for this development which will have a detrimental impact on Lower Street and Eastry.</p>

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Exclude the land at Land at Buttsole Pond, Eastry (EAS002) from the Local Plan. In Section 6, I have commented on why I think the Local Plan is not legally compliant but I'm not a lawyer and am not qualified to comment on changes that would make it legally compliant.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>Yes</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Yes</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as</p>	<p>Whilst I have read the plans for Eastry SP32 (and SP33) and appreciate that various waste water, run off water, ecological and heritage surveys will be done I still have serious reservations with regards the flow of additional traffic through the narrow road from Lower Street past Buttsole Pond and poor observation for vehicle drivers. There are no pavements for pedestrians and too many parked cars outside of the existing building to support 90+10 additional houses proposed. Consideration needs to be made to take parked cars off the road, where possible widen the road</p>

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>and put in proper pavements for pedestrians to make the road safer for pedestrians and slower moving road users like cyclists and horse riders of which there are many. This is a really dangerous road in the village, traffic travels way too fast given the poor line of sight and lack of pavements and the council needs to the impact on public health if non-car users (walkers, runners, cyclists, horse riders) are forced off the roads due to the extra traffic.</p> <p>It should also be noted that Buttsolde Pond lies in the log term flood risk area so additional run off will only add to the problems already experienced where 3 hillside roads converge and this will only get worse if the only means of drainage (the conduit across to Brook Street) is put under additional strain / when flooding starts to take place.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Widen lower street to junction of Northbourne Road junction, add a pavement and improve sightlines to keep non-vehicle users safe, provision of off road parking for the residents in Lower Street. Develop a roundabout at the junction of Lower Street and Northbourne Road so that traffic to the Buttsolde Pond development (and even hospital site) have an alternative entrance other than driving up Lower Street. Improve the drainage of surface water from Buttsolde Pond through to Brook Street and beyond.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We have very recently moved to Eastry and now live very close to the housing site proposed in SAP32. This has allowed us the "luxury" of observing the practical realities of living near to the proposed development.</p> <p>It is obvious that the proposed development would be a very real danger in making worse what is already a very serious road safety issue at the south end of the village.</p> <p>I am afraid that very few people observe the 30 speed limit up to the clearly marked "red 30" sign as you enter/leave the village. Indeed I would strongly suggest that some drivers seem to feel that the red marking zones are used as the starting line to a drag race to the bypass.</p> <p>The irony is that the entrance to the proposed development is exactly where some drivers seem to take a "run up " to the sign to see how fast they can enter/exit the village. You only have to stand at the junction of Northbourne Road/Pike Road/Dover Road/Lower Street for a few minutes in the day for this to be very obvious. This makes turning out of both Northbourne Road and Pike Lane very dangerous as there is very limited visibility to see cars either coming down the hill or out of the village at such speeds.</p> <p>This objection is not about noise or objecting just for the sake of it. I am genuinely worried someone will be killed as the road becomes ever busier as villages like Eastry are pushed towards ever more development often at the expense of the existing residents.</p> <p>This safety issue is also compounded by the lack of any pedestrian walkway between the bus stop at Buttshole pond and the main village. We walk this route regularly and can assure you it is not safe for pedestrians to walk towards or out of the village.</p> <p>There is especial danger walking towards the village as you walk in to a blind corner which drivers approach at speed. This blind corner IRONICALLY is by the entrance to the proposed development. I wonder if anyone from DDC has stood at the entry point of the proposed development and put any thought into what the implications are of the development - a national department for planning cannot appreciate or understand these safety concerns, which frankly NEED to be understood and appreciated for the safety of local residents.</p> <p>Having spoken to one of the Rural Task Force Police Officers last week, he acknowledged that traffic is travelling far too quickly, and he witnessed numerous people in cars, Ovenden lorries, delivery drivers only slowing as they saw his blue lights which were flashing on his car parked at the junction of Dover Road/Pike Lane. He wants to organise speed tests and is going to speak to his boss.</p> <p>You would be welcome to come to our house and witness the traffic as we are slightly elevated and people would not know anyone was watching them. We also have a concealed driveway facing the traffic for speed cameras.</p> <p>I also object from the perspective of surface water coming from the roads in the area. By removing fields which absorb water, and concreting them to provide housing, more and more surface water will converge at Buttshole Pond. This pond takes the water from Eastry's road and holds it effectively. When we moved in to our house in late October the pond was empty. By the end of November the pond was half full. It is</p>

	<p>not maintained and therefore its capacity is diminished. By putting hard surfaces on a local field, the surface water will have nowhere else to go except to Buttshole Pond.</p> <p>I would also like to highlight that Kent County Council are proposing to remove the bus route serving Eastry, leaving people without a means to leave the village especially school children. Whilst this has been postponed until the end of this school year it is by no means guaranteed to be reinstated after this. How can another two hundred homes be built and then a bus route removed?</p> <p>Please see two photos showing the blind corner near the proposed entrance, and the lack of visibility from Pike Lane on to Lower Street/Dover Road.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Removal of site allocation SAP32
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP32 Land at Buttsole Pond, Lower Street, Eastry (EAS002)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified

	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<ol style="list-style-type: none"> 1. Local Infrastructure is likely to be put under increasing strain. KCC's Kent Water for Sustainable Growth Study October 2017, Project Number 60487848, highlights a projected shortfall of water supply of 4.31 Mega litres per day in relation to proposed development in Southern Water's Kent - Thanet Water Resource Zone, within which SAP32 falls. 2. There has been no further sighting of Kent Highway report on traffic volume & road conditions through Lower Street which was on the original local plan to be actioned. 3. There is no mention of the drainage system in Buttsole Pond which is a heritage site, breached in 2014 which subsequently led to the collapse of gas main pipes under Lower Street pond site resulting in major gas pipe repairs and remedial work to the road. Further flooding from here to properties in Pike Road and Lower Street. Buttsole pond also filters water from the underground stream from Tilmanstone through the pond under fields to Brook Street and out to Stour. 4. This is an unsustainable location because there is no footway and it is too far from the village 5. There is lack of pedestrian access to bus stops and poor connectivity to the main village 6. Lower Street is a narrow road making it unsuitable and potentially unsafe for the additional traffic expected. There is very limited off-road parking available. 7. There is very poor visibility because of the sharp blind bend of the road. 8. The scale of the allocation is out of proportion with the size of the village and therefore out of character. 9. There is no connectivity to a railway station. 10. There are very few shops & areas of employment to sustain such a large allocation of houses. 11. There are better locations within Dover for allocations of this scale – larger settlements elsewhere 12. Traffic flow in the village, particularly through Lower Street, has already increased. There was yet another accident at the lower end of Lower Street on 03/12/2022. 13. The Title Deeds ref K60861 show a right of way to Halcyon & building restrictions are in place over this piece of land which has been suggested as access to the site at Lower Street.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	This site should be removed from the local plan. 130 additional houses have already been approved at 2 sites in Eastry.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I consider the proposal in respect of the land at Buttssole Pond to be unsound as, other than a vague requirement for a Flood Assessment Risk, it contains no specific provision for the fact that the development of this site will materially add to the volume of run-off water from the site into Buttssole Pond. Any ability of the land to absorb heavy rain will be vastly reduced by covering the site with buildings/driveways/estate roads etc.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at	The existing overflow drainage pipe, which runs from Buttssole Pond into a drain on the north side of Brook Street, is not functioning properly; this needs to be restored and additional drainage needs to be specified in any development brief for the site to ensure that the effect of any development of this site does not result in the pond being unable to cope with the extra surface water which would inevitably run into it.

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	In section 4.232 the buildings in the road near the site are described as 'a sporadic residential development that is a mixture of two storey victorian terraced housing and large detached dwellings' - it omits to mention the historic age of these large detached dwellings - our own cottage being one of these and dating 400 years old. The new housing is therefore not in keeping or sensitive to the character of the surrounding area and street scene. 80 houses in an area on of sporadic buildings in a tree lined road surrounded by fields is not a low density addition to the road.

	<p>The vehicular access point proposed for the site onto Lower Street has been poorly considered it adjoins a narrow road that narrows further - this is unsuitable and potentially dangerous for the volume of additional traffic from 80 dwellings - a road narrowing sign is located just before the proposed vehicular access entrance location.</p> <p>Very poor visibility because of the sharp blind bend of the road - there is also another blind bend further up the road heading into the village, with the speeding traffic and cars frequently forced to drive on the wrong side of the road due to parked cars on both sides of the road - this entrance is a potential deathtrap.</p> <p>It is also on a busy bus route, buses already struggle to pass traffic in this part of Lower Street adding this amount of traffic in this part of the road is going to exacerbate the problem.</p> <p>There is a speeding problem in this part of the road monitored by Eastry Parish Council's Speed watch - earlier in the year we had our car written off parked in this part of Lower Street due to a speeding car. Police incident number 01-1536</p> <p>The current amount of traffic regularly cannot pass/flow down the road due to the parked cars in Lower Street on both sides of the road.</p> <p>The scale of the development is out of proportion to the size of the village</p> <p>No connectivity to a railway station.</p> <p>The village amenities are not suited to sustain such a large allocation of houses.</p> <p>Title deeds ref K60861 shows right of way to Halcyon & building restrictions are in place over this piece of land which has been suggested for vehicular access to the site at Lower Street.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	1. Location unsuitable - on narrow, busy road into village, already has problems with speeding and congestion, largely single lane due to the parked cars from the terraced houses. Within the last year there have been several accidents/damage to property from buses and speeding cars on Lower Street. 2. Unsustainable location - No footpath to the village or bus stops, poor connectivity to the village 3. Buttssole Pond - issues with previous flooding, underground stream leads to it. 4. Existing habitats for nature and wildlife in EAS002 will be destroyed by build and increased traffic, negative effect on species and well-being of residents. 4. 178 houses in the process of being built/have permission to be built, an extra 80 houses will put a strain on the village resources and lead to over-development. No Doctor's surgery in the village. 5. Section 106 money would be required for Highways improvements, play area, parish room and sports pavilion provision/improvement.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Take SAP32 out of the Plan.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP32: 100 houses at Buttsole pond nature reserve (a small local biodiversity hotspot). The pond acts as a flood sponge as does the arable land all around it. Rudimentary geography suggests that if the arable land is replaced by a housing development there will be a dramatic increase in the run-off to the pond area. And the Landscape Sensitivity Assessment should have ruled this site as being unsound.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>1.No further sighting of Kent Highway report on traffic volume & road conditions through Lower Street which was on the original local plan to be actioned.</p> <p>2.No mention of drainage system in Buttssole Pond which is a heritage site, breached in 2014 which subsequently led to gas main pipes under Lower Street, pond site collapsed which led to major gas pipes repairs and remedial work to road. Further flooding from here to properties in Lower Street. Buttssole pond also filters water from the underground stream from Tilmanstone through the pond under fields to Brook Street and out to Stour.</p> <p>3.Unsustainable location because there is no footway and it is too far from the village</p> <p>4.Lack of pedestrian access to bus stops and poor connectivity to the main village</p> <p>5.Narrow road making it unsuitable and potentially unsafe for the additional traffic expected</p> <p>6.Very poor visibility because of the sharp blind bend of the road</p> <p>7.the scale of the allocation is out of proportion to the size of the village and so out of character</p> <p>8.No connectivity to a railway station.</p> <p>9.Very few shops & areas of employment to sustain such a large allocation of houses.</p> <p>10.Better locations within Dover for the allocations of this scale – larger settlements elsewhere</p> <p>11.Traffic flow in village particularly through Lower Street has already increased</p> <p>12.Title deeds ref K60861 shows right of way to Halcyon & building restrictions are in place over this piece of land which has been suggested as access to the site at Lower Street.</p> <p>As a local who has lived in Eastry for more than 20 years I find this latest application for more housing will spoil the whole look on the approach to the village from the Dover end. A TOTAL EYESORE.</p> <p>Having spoken to other residents in the village it seems many were unaware of this planning application until very recently including me leaving little time to discuss and respond with others during COVID lockdown.</p> <p>Pond cottages are on the DEFRA list due to flooding which then goes on to affect Brook Street and Ham Fens. With climate change this will happen again, so the last thing we need is more tarmac low maintenance gardens with block paving and little or no thought given to wildlife.</p> <p>There is no pavement from proposed site until Site cottage and very little room to put one. I feel this would endanger pedestrians from the proposed housing estate as this is the main route through Eastry.</p> <p>Constant threats of huge developments is unsettling and disrupts the lives of people who have chosen to live here. Please don't turn villages into towns.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Full Representation attached to SDLP1427. This document has been split across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1427.)</p> <p>Introduction</p> <p>Dover Local Plan Regulation 19 Consultation: Policy SAP 32 Land at Buttshole Pond, Lower Street, Eastry</p> <p>We write to you on behalf of our client, Jane Marsden, Andrew Mollart and Sarah Wells (all members of the same family), in relation to the Dover District Council Regulation 19 consultation on its Local Plan. Specifically, we write in support of the proposed allocation at Land at Buttshole Pond, Lower Street, Eastry, under Policy SAP 32, which is proposed to deliver around 80 dwellings.</p> <p>Our client owns the site which is proposed to be allocated. Detailed pre-application discussions (LPA Ref PAP/2019/221) have already taken place on this scheme with officers in the planning department at Dover District Council and a detailed planning application is currently being prepared.</p> <p>(DDC Note: Comments on SP3 and SAP23 on relocated)</p> <p>Summary</p> <p>With specific reference to the proposed allocation in Eastry (SAP 32), we confirm the site is available for residential development, and is a suitable site for residential development. It is therefore an achievable and deliverable allocation.</p> <p>Hume Planning Consultancy welcomes the opportunity to comment on this stage of the Council's Pre-Submission Local Plan and would like to reserve the right to attend the Examination in Public in due course.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP32
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Hume Planning. Full Representation attached to SDLP1427. This document has been split across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1427.)</p> <p><u>Policy SAP 32: Land at Buttshole Pond, Lower Street, Eastry</u></p> <p>Our client fully confirms its support for this policy which seeks to allocate 80 residential units on this site. The proposed site is in a sustainable location. Eastry is a Local Centre, and in line with our comments on Policy SP3, it is appropriate that growth is directed towards Eastry given it has a good range of services for a settlement of this size. This is evident from its high placement in the settlement hierarchy. The site is also very well connected to the centre of Eastry which provides a range of local services and facilities; Lower Street runs directly up to the High Street.</p> <p>The site itself is in single family ownership which would facilitate early delivery. Pre-application discussions have taken place with both Dover District Council and Kent County Council (Highways) to deliver an 80-unit scheme in this location. This commitment to early delivery is evident in the preparations currently underway toward submission of a detailed planning application in mid-2023. On this basis, it is considered that the Council's anticipated trajectory for this site at Appendix D of the Local Plan could be brought forward by one or two years.</p> <p>The site is unconstrained by any policy or environmental designations. For example, it is not affected by any recognised landscape designations, not in close proximity to any heritage assets, not affected by Flood Risk and not the highest quality agricultural land. Whilst the site is currently open and cultivated, all trees and hedgerows within the site can be retained. Further, proposed landscaping can be controlled at planning application stage to ensure that any scheme will enhance the existing landscape structure complimented by the proposed built form which responds to the changes in levels within the site.</p> <p>This site lies immediately to the south of the Eastry Hospital site, which is consented for a mixed development comprising housing plus community and business floorspace, pursuant to planning permission LPA ref. 19/00572. Construction has not yet commenced; however various pre-commencement conditions are in the process of being discharged. Whilst immediately to the south, the approved scheme for the hospital site shows a landscape buffer to the south, providing SUDs and recreational facilities, and accordingly any built development would be broken up. The site represents a logical extension of built development, adjoining the settlement confines at the southern end which is considered to</p>

	<p>be the least constrained direction of growth and is the most easily accessible to the village centre. The site is considered to be visually contained by surrounding topography and existing ribbon development and will be seen against the backdrop of the proposed residential development at the former Eastry Hospital site which is elevated relative to the application site.</p> <p>On this basis, the site is considered suitable for development given the sustainability of the site and its relationship to the services in Eastry, and given it is a relatively unconstrained site.</p> <p>Our client is comfortable with the proposed requirements of Policy SAP 32 and has been preparing an application on this basis. For example, it has been agreed through discussions with KCC highways that the site will be accessed via an existing vehicle access off Lower Street and KCC has agreed that the visibility splays of this existing access are acceptable.</p> <p>In terms of the pedestrian connectivity at the site, we have several options under consideration to ensure formal pedestrian connections can be made between the site and the village. It is relevant that there is a footway on both sides of Lower Street to the north of the site and a Public Rights of Way which runs through the Eastry Hospital land to the north and leads onto the footway on the western side of Lower Street. It is therefore a suitable and available site and its proposed allocation provides for a deliverable policy within the Local Plan.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Dear Sir/Madam</p> <p>Having read the amended DDC local plan I would like to raise concerns and objections outlined below with reference to the above plan.</p> <p>I am extremely disappointed at the proposal of 80 houses directly opposite my property and this being totally unsuitable . And am greatly concerned about the road infrastructure directly outside our property and the danger it will cause.</p> <ol style="list-style-type: none"> 1. unsustainable location because there is no footway and no room for footway and as Buttsole is a hamlet it is outside all of the main village constraints . 2. There is lack of pedestrian access to bus stops no shelters and very poor connectivity to the village. 3. A very NARROW and busy road making it unsuitable and potentially unsafe for the additional traffic expected . The requirement for a KCC Report has been removed from the original plan as a highways objection and concerns and s full report was previously required??? This is an area of massive concern. And surely a KCC report is mandatory? 4. Poor visibility sight line because of the narrow and double bend in the road. How can additional road/roads be adjoined to this current road without causing danger. 5. The scale of this allocation is greatly out of proportion to the size of our ancient village and so out of character. There is already a large build underway at the old hospital site, Eastry roads cannot sustain this amount of additional vehicles let alone more! 6. No railway station access to the village or within acceptable distance. 7. employment is a concern, few actual shops, a local company in Felderland have ceased trading, causing unemployment already in the community so employment is a concern to sustain such a large allocation. 8. better locations are within Dover for allocations of this scale – larger settlements elsewhere 9. Access to Gp's is already a concern the nearest surgery is in Sandwich and they are overwhelmed with patients already. 10. Previous flooding is an issue. With a build of this scale would impact this problem further. 11. Buttsole pond is used as drainage system with underwater stream from Tilmsnstone through pond to Brook St and out to Stour. in 2014 with weeks of rain the pond was breached by under water stream rising, eventually causing the road at the pond to sink and bursting main

gas pipes as well as flooding the whole entire area around the pond. No remedial changes to the pond system have been made. This area cannot sustain further water or drainage.

12. Residents of Eastry who use Lower Street already continually moan about the cars that are parked down Lower Street, where will these owners cars get parked to facilitate a road for access to this build?

13. The fields all surrounding this area are full of wildlife, birds of prey, nesting birds, butterflies to name a few and these should not be eradicated.

14. The complete aesthetics of the beautiful views of Eastry as you drive into the village will be ruined.

15. No secondary school in the village or within acceptable distance.

16. I have parked my car on the private land opposite my property (part of the allocated site) for over 17 years as have my neighbours. My direct neighbour for over 50 years. We maintain this area for our parking and have done so to keep our cars off this extremely busy and lethal stretch of the non pathed part of lower street and to enable pedestrians to walk as close within the white lines as possible whilst they are out enjoying walks and to keep the access clear for buses, emergency services and local firms lorries whom would struggle if all our cars were on the road outside our properties. (Possible Adverse possession.)

Finally given the current issues within the village with speeding and the recent car accidents in Lower Street alone it would appear if the plan were to be approved it would make the problem much worse than it is currently and possibly lead to fatalities.

Please lodge my objections to this development
EASA002 (SAP32)

Kind Regards
Kim Hylott
Resident at Buttssole.

2nd December 2022

DDC EDIT: SEE BELOW FOR ADDITIONAL TEXT THAT WAS EMAILED TO DDC ON A REPRESENTATION FORM

- 1.No further sighting of Kent Highway report on traffic volume & road conditions through Lower Street which was on the original local plan to be actioned.
- 2.No mention of drainage system in Buttssole Pond which is a heritage site,breached in 2014 which subsequently led to gas main pipes under Lower Street,pond site collapsed which led to major gas pipes repairs and remedial work to road.Further flooding from here to properties in Lower Street.Buttssole pond also filters water from the underground stream from Tilmanstone through the pond under fields to Brook Street and out to Stour.
- 3.Unsustainable location because there is no footway and it is too from the village
- 4.Lack of pedestrian access to bus stops and poor connectivity to the main village
- 5.Narrow road making it unsuitable and potentially unsafe for the additional traffic expected
- 6.Very poor visibility because of the sharp blind bend of the road
- 7.the scale of the allocation is out of proportion to the size of the village and so out of character
- 8.No connectivity to a railway station.
- 9.Very few shops & areas of employment to sustain such a large allocation of houses.
- 10.Better locations within Dover for the allocations of this scale – larger settlements elsewhere
- 11.Traffic flow in village particularly through Lower Street has already increased

	12.Title deeds ref K60861 shows right of way to Halcyon & building restrictions are in place over this piece of land which has been suggested as access to the site at Lower Street.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	This site to be removed from the local plan,130 house already approved at 2 sites in Eastry.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC Note (1) The text below is an extract from the original representation which is attached to SDLP1438. SAP 31 – 33 Eastry (cross referenced SAP 55 Woodnesborough) SAP32: 100 houses at Buttsole pond nature reserve (a small local biodiversity hotspot). The pond acts as a flood sponge as does the arable land all around it. Rudimentary geography suggests that if the arable land is replaced by a housing development there will be a dramatic increase in the run-off to the pond area. And the Landscape Sensitivity Assessment should have ruled this site as being unsound.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(1) There is a clear safety issue re. traffic access to this site. Kent Highway report on traffic volume & road conditions through Lower Street (on the original local plan) has not been seen. The road is narrow and not suitable for access to the site. There is very poor visibility because of the blind bend. The few houses opposite (including my own) have only on street parking which would potentially be lost, resulting in parking further up Lower Street in an already crowded location. (2) The traffic issue has already resulted in a campaign "Lower Speed Street" by residents concerned about the speed and volume of traffic at Lower Street. Several accidents in recent months. (3) Concerns re. drainage system at Buttssole Pond which in 2014 led to gas main pipes under Lower Street. At this time, the pond site collapsed, causing major gas repairs and remedial work to road. (4) Environmental and heritage impacts on site supporting natural wildlife. (5) No footway at this location and poor connectivity to the main village for pedestrians. (6) The scale of the allocation is out of proportion to the size of the village. (7) Very little employment within the village to sustain a larger population. (8) Title deeds (ref K60861) shows right of way to "Halcyon" & building restrictions are in place over this piece of land which has been suggested as access to the site at Lower Street
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	With regard to this site in particular, I would suggest that removal from the Local Plan would be the only way to ensure the Plan is sound, given the additional housing proposals for Eastry village.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I would like my comments/objections submitted from Regulation 18 taken into account,

(see attached photos). 3) A development at this site will just increase the future justification for further similar developments and as such will be the start of the slippery slope of mass development around a rural village to create yet another urban sprawl.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We consider that the proposed development of 80 dwellings on the land at Buttsole Pond will add significantly to the traffic on Lower Street. There is parking on one side of the road for much of its length and on both sides of the narrow bends in the area of the access road to the planned site. This is already a hazardous section and recently there was an accident involving a double decker bus resulting traffic from the other direction having turn back towards the village. In addition, traffic from the housing under development on the site of the former hospital will add significantly to the traffic along Lower Street. We would ask the Council to re-consider this proposed development on the grounds of safety.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>I attach my objection to the local plan SAP32 Land at Buttsole Pond, Eastry (ESA002).</p> <p>In addition to the points raised in my objection form, I would also like to say that the village school would not be large enough to accommodate all the new children that these number of houses would potentially add to the village. As a School Governor and Chair of the PTA in the past, we fought long and hard to raise enough money to build the extension to the village school to replace the portacabins that three year-groups (yrs 4,5 and 6) were educated in for at least 10 years. They were far too hot in summer and far too cold in winter, a situation that is not conducive to a good education and I would hate that situation to be repeated for a further generation.</p> <p>Also we have lost our GP Surgery in Eastry and the surgery in Sandwich seems unable to cope with the current number of residents in Eastry and Sandwich, as it stands. It is extremely difficult to get a doctor's appointment now, without increased pressure from new residents coming into the village, combined with an increased number of new houses in Sandwich.</p> <p>The proposed site (SAP32) is a green field site and should remain so. We have waited well over 30 years for the brown field site at Eastry Hospital/Eastry Workhouse to be developed; if housing was so critical, why wasn't this site developed much sooner?</p> <ol style="list-style-type: none"> 1.No further sighting of Kent Highway report on traffic volume & road conditions through Lower Street which was on the original local plan to be actioned. 2.No mention of drainage system in Buttsole Pond which is a heritage site,breached in 2014 which subsequently led to gas main pipes under Lower Street,pond site collapsed which led to major gas pipes repairs and remedial work to road.Further flooding from here to properties in Lower Street.Buttsole pond also filters water from the underground stream from Tilmanstone through the pond under fields to Brook Street and out to Stour. 3.Unsustainable location because there is no footway and it is too from the village 4.Lack of pedestrian access to bus stops and poor connectivity to the main village 5.Narrow road making it unsuitable and potentially unsafe for the additional traffic expected 6.Very poor visibility because of the sharp blind bend of the road 7.the scale of the allocation is out of proportion to the size of the village and so out of character 8.No connectivity to a railway station. 9.Very few shops & areas of employment to sustain such a large allocation of houses. 10.Better locations within Dover for the allocations of this scale – larger settlements elsewhere 11.Traffic flow in village particularly through Lower Street has already increased and is dangerous 12.Title deeds ref K60861 shows right of way to Halcyon & building restrictions are in place over this piece of land which has been suggested as access to the site at Lower Street.
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>1.No further sighting of Kent Highway report on traffic volume & road conditions through Lower Street which was on the original local plan to be actioned. 2.No mention of drainage system in Buttsole Pond which is a heritage site,breached in 2014 which subsequently led to gas main pipes under Lower Street,pond site collapsed which led to major gas pipes repairs and remedial work to road.Further flooding from here to properties in Lower Street.Buttsole pond also filters water from the underground stream from Tilmanstone through the pond under fields to Brook Street and out to Stour. 3.Unsustainable location because there is no footway and it is too from the village 4.Lack of pedestrian access to bus stops and poor connectivity to the main village 5.Narrow road making it unsuitable and potentially unsafe for the additional traffic expected 6.Very poor visibility because of the sharp blind bend of the road 7.the scale of the allocation is out of proportion to the size of the village and so out of character 8.No connectivity to a railway station. 9.Very few shops & areas of employment to sustain such a large allocation of houses. 10.Better locations within Dover for the allocations of this scale – larger settlements elsewhere 11.Traffic flow in village particularly through Lower Street has already increased 12.Title deeds ref K60861 shows right of way to Halcyon & building restrictions are in place over this piece of land which has been suggested as access to the site at Lower Street.</p> <p>I am against the planning development on a personal and general level, my objections are as follows Flooding Pond Cottages, Buttsole Easry have been flooded and we are now on the DEFRA list as prone to flooding, a tarmacked field will exacerbate this along with climate change Pollution to Buttsole Pond The overflow drains to Ham Fens a valued area for nature, neither Ham Fens or Buttsole Pond need any more petrol or diesel impregnated road run off drawing into them. Wildlife disturbance Buttsole pond As I understand there is not another unfenced area of water in Easry which makes Buttsole pond very important for wildlife, a housing estate with families, cats and dogs will make the pond an inhospitable environment for wildlife which will be devastating to the wild bird population in Easry and other wild animals who use the ponds eco system, a housing estate will create a barrier for wildlife who use the wild area at the back of the hospital and also rely on the pond. Other homes in Easry Many homes in Easry are on the main route through the village, they are older style houses and many of them are terraced,</p>

	these are properties with no off road parking facilities to park their vehicles, they rightly so park outside their houses which does help calm traffic moving or cutting through the village, excess traffic caused by more vehicles due to the extra housing will add to the congestion and in turn pollute the families homes on the main road and surrounding area. In my opinion the infrastructure of the village cannot sustain the extra houses. I could not even get change of use for a garden behind my house so how is a housing estate even being considered in the vicinity, I feel this threatens the integrity of Eastry, Many people have worked very hard all of their lives to be able to live in a village and I understand there has to be progression but there are other areas around this part of Dover that will not impact on the lives of people and wildlife to the extent it will do in Eastry where new housing estates have already been built.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	TC4S023 SA33 Land adjacent to Cross Farm, Eastry
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note: Document titled 'Facebook: Eastry Community Watch – Lower Street Traffic Complaints' was removed from objective for Data Protection reasons. It contains comments from Facebook and names. The comments relate to traffic on Lower Street (18 pages) and will be made available to the Inspector on request.</p> <p>I object to the inclusion of the land adjacent to Cross Farm (TC4S023), Lower Street, Eastry, in the Dover District Council Local Plan for the following reasons:</p> <ol style="list-style-type: none"> 1. Cross Farm (TC4S023) was not included in the previous Local Plan so there has been no consultation on it, as there was with the previous Local Plan, which has led to significant site allocations being removed from the plan. This is inconsistent with the spirit of this consultation process, is undemocratic and unjust. This shows total disregard for the views of the residents of Dover District Council. The location of access to Cross Farm (TC4S023) is dangerous as it's on a busy road, one of the main ones into the village, which is largely single lane due to the parking of cars, making it hard to exit the site, and adjacent to a dangerous blind corner and is likely to lead to serious injury to the public or fatalities. For this reason, this location is unsuitable for additional houses, which is probably why none were built here in the past – see the attached 175 comments on the Eastry Community Watch Facebook page about traffic congestion and the danger to lives on Lower Street. Developing Cross Farm (TC4S023) will have a detrimental effect on an area of significant amenity value to the village with listed buildings, including Cross Farm, the adjoining conservation area, and the Saxon burial ground. It will also adversely impact views from the public footpath that runs along the top of The Lynch and overlooks the site. Once developed Cross Farm (TC4S023) will add to the already significant traffic congestion on a busy single lane (because of parked cars) bus route into the village and will impact the rest of the village, which only has single lane traffic due to parked cars. If the parking is to be

	<p>banned there is nowhere for residents to park in the village and it will cause huge inconvenience to residents – see the attached 175 comments on the Eastry Community Watch Facebook page about traffic congestion and the danger to lives on Lower Street.</p> <p>5. It will be impossible to develop Cross Farm (TC4S023) without causing huge inconvenience to the village because of the narrowness of Lower Street and the large number of construction vehicles involved – see the attached 175 comments on the Eastry Community Watch Facebook page about traffic congestion and the danger to lives on Lower Street.</p> <p>6. Cross Farm (TC4S023) is not served by utilities, such as gas and sewerage, and given the limited size of it, connecting them is unlikely to be economically viable.</p> <p>7. These additional houses will put huge stress on the village resources, given that it has limited schooling and no medical practices, and all roads in the village are single lane due to parked cars.</p> <p>8. With the 178 houses that have been granted planning permission, Eastry will already be overdeveloped. There is no room for a further 10 houses or the 95 in this Local Plan. Eastry is a village not a town. All of its streets have single file traffic, not two way.</p> <p>9. Given that the government is no long setting targets for numbers of houses built by local authorities, there is no need for this development which will have a detrimental impact on Lower Street and Eastry.</p> <p>10. The whole Local Plan consultation process is unsound and probably illegal. (a) The public exhibition events were poorly promoted and occurred prior to the village receiving an excellent leaflet from the Parish Council, so very few people knew about them as is evidenced by just 300 people attending. (b) Most of the marketing has been web based, excluding many people from participating, such as my parents. (c) The web-based mechanism for providing feedback is over complicated and beyond most people's ability, including mine, to raise objections or comment.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Classify the land adjacent to Cross Farm (TSC4S023) as unsuitable for development.</p> <p>In Section 6, I have commented on why I think the Local Plan is not legally compliant but I'm not a lawyer and am not qualified to comment on changes that would make it legally compliant.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I have no idea what this means but if it helps classify the land adjacent to Cross Faarm (TSC4S023) as unsuitable for development, I would like to attend.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 33
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Whilst I have read the plans for Eastry SP32 (and SP33) and appreciate that various waste water, run off water, ecological and heritage surveys will be done I still have serious reservations with regards the flow of additional traffic through the narrow road from Lower Street past Buttssole Pond and poor observation for vehicle drivers. There are no pavements for pedestrians and too many parked cars outside of the existing building to support 90+10 additional houses proposed. Consideration needs to be made to take parked cars off the road, where possible widen the road and put in proper pavements for pedestrians to make the road safer for pedestrians and slower moving road users like cyclists and horse riders of which there are many. This is a really dangerous road in the village, traffic travels way too fast given the poor line of sight and lack of pavements and the council needs to the impact on public health if non-car users (walkers, runners, cyclists, horse riders) are forced off the roads due to the extra traffic.</p> <p>It should also be noted that Buttsolde Pond lies in the log term flood risk area so additional run off will only add to the problems already experienced where 3 hillside roads converge and this will only get worse if the ony means of drainage (the conduit across to Brook Street) is put under additional strain / when flooding starts to take place.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Widen lower street to junction of Northbourne Road junction, add a pavement and improve sightlines to keep non-vehicle users safe, provision of off road parking for the residents in Lower Street. Develop a roundabout at the junction of Lower Street and Northbourne Road so that traffic to the Buttssole Pond development (and evn hosital site) have an alternative entrance other than driving up Lower Street. Improve the drainage of surface water from Buttssole Pond through to Brook Street and beyond.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Vehicular access will be highly dangerous due to the bend in the road and indiscriminate parking on both sides of the road. What are the plans for access to the main drains when the height of the buildings constructed on the bank will present a problem? Or are they all going to be on cesspits or soakaways as are the existing farmhouse and bungalow conversion.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Additional information is requested by DDC regarding availability and deliverability of the site - accordingly the following supporting material is detailed below SAP33 Land adjacent to Cross Farm, Eastry (TC4S023) The site remains to be immediately available being owned by a developer -Thomas Estates LLP, and Hollaway Studio remain engaged to work up a scheme of approximately 9 units. The site itself has no ownership or infrastructure constraints or extraordinary development costs, the site is considered by the developer to be a viable proposition. There are no known barriers to development of the site and an application is likely to be submitted in 2023.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	No changes required
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Local Planning Site Allocations
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP 32 will raise traffic levels in an already troublesome spot. Along with SAP 33 the addition of 90 homes will make Lower Road even more treacherous than it is now , or will be after the hospital development is complete. Older residents of the village have pointed out that the area designated as SAP 32 has flooded historically in bad weather.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Remove SAP 32 from the plan along with the Cross Farm plot.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP33 Eastry Court Farm, Eastry (EAS009)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Comment being made on behalf of Jane Thomas, owner of The Oast House, Brook Street, Eastry, Sandwich CT13 0HR</p> <p>SAP33 Eastry Court Farm, Eastry (EAS009)– The Plan is unsound as the wording within SAP33 (EAS009) is not sufficiently precise. The only form of access should be taken via the existing access to the site on Church Street. This should be mentioned explicitly within the policy narrative. There should be no through access, to the east, onto Brook Street. Brook Street is a narrow rural lane with limited passing places. The wording should also make reference to the need for additional landscaping to the south east of the site to ensure a soft boundary to existing residential properties. Please note that I support the proposed quantum of housing on the site, five units, since the constrained existing access limits any further development on site.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Add in the additional wording under 'Site-specific issues and requirements'</p> <p>'Access from Church Street only'</p> <p>and additional wording (as inserted in bold)</p> <p>Existing trees and hedgerows should be retained and enhanced where possible and an appropriate landscape buffer provided along the northern 'and south eastern' boundary of the site.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	Access and Highways suitability needs to be reviewed the proposed entrance to this development is not safe for this amount of extra vehicles entering and exiting at this location. It is on a blind bend where the road narrows - there are warning signs before the entrance for the road narrowing.

<p>possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The slow sign to warn traffic to slow down for the bend written on the road just before the entrance to Cross Farm is frequently parked on. Cars are forced from both directions due to parked cars onto the wrong side of the road at this point of Lower Street which is a blind bend. Cars frequently park both sides of the entrance to Cross Farm considerably affecting visibility accessing the road and any flow of traffic. This part of Lower Street has a problem with collision incidents and problems with traffic flow. Eastry Parish Council have recently submitted their latest Highway Improvement plan to KCC Highways and it's number one priority was concerns with speeding and parked cars along Lower Street. There is a huge speeding problem in Lower Street, this is with cars coming in and out of the village. As a result of this problem our car was written off earlier in the year by a speeding car while parked near to the entrance of Cross Farm. Two neighbours cars were also damaged by the collision. Police incident no. 01-1536</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Eatery Court Farm EAS009 is allocated for 5 dwellings in the Local Plan. As I live in the old Farm I, and other local residents, are happy with this number of dwellings. However does this number mean the TOTAL number of dwellings to be built in the Farm or does it exclude any development of the existing pay office and the old barn, which could increase the number to possibly 9 or 10?</p> <p>There is some confusion regarding this which could come under the "soundness" criteria of Reg 19.</p> <p>The accompanying details relating to EAS 009 say that a flood assessment is required! I find this quite strange as the land is adjacent to a church and on very high ground within Eastry. However no mention of a traffic assessment is made in the accompanying details. Why is this?</p> <p>Considering the narrow entrance and exit to the Farm and the width of Church Street, which is a cul-de-sac, together with the sensitivity of the road as a route to the church in a conservation area, this is strange as the traffic issues are the major reason in limiting the dwellings proposed for the Farm.</p> <p>5 dwellings has been the number in the 2015 Local Plan and again in the 2022/3 Local Plan.</p> <p>The omission of a traffic assessment prior to any development being allowed could be considered "unsound".</p> <p>Overall, I am happy with the local plan in relation to EAS009 and I am happy with the consultation process (apart from the fact you can't access the portal to make any comments!), and I trust that DDC will maintain their stance that Eastry Court Farm can only accommodate 5 dwellings (which has been consistent though 2 Local Plans since 2015) , and they will not be swayed by commercial pressure to increase this number.</p> <p>I trust this e mail is sufficient to register these comments for the Reg19 Consultation.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>With regard to the above, we would like to comment as follows:-</p> <p>In principal and provided no further dwellings are proposed for this site, we agree to the 5 dwellings indicated in the plan, however, these dwellings should be sympathetic to the site, which ajoins the conservation area and should be sympathetic to the buildings that are already there bordering the site, two of which are listed buildings.</p> <p>Of great concern is the current available access to and from the site via church street, any further vehicular activity along this street would not be ideal, currently when vehicles are parked on both sides of the street toward the church end it becomes a very narrow thoroughfare leaving very little space for bigger vehicles to navigate and included amongst these would be fire, ambulance and other emergency services.</p> <p>REDACTED BY DDC of even greater concern REDACTED BY DDC is 1&2Eastry Court Cottages which sit at the entrance to the farm yard. It is a grade 2 listed building being some 320 plus years old, and not built on foundations, we know through experience that heavy vehicles going back and forth will have a detrimental effect on the structure of the building as witnessed through earlier building works accessed from Church street which caused cracks to appear in the building.</p> <p>We are interested to know if curtilage is applicable and to what extent it would apply</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will	

make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP33 TC4S023
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Eastry Parish Council believe that the Local Plan is not legally complaint and is unsound as the choice of the land adjacent to Cross Farm Eastry - TC4S023 has not taken into account the following: 1. The location is unsuitable for housing as it is on the busy road into the village which already has problems with speeding and congestion as it is largely single lane due to the parked cars from the terraced housing stock which doesn't have parking provision. Within the last year there have been several accidents/damage to property from buses and speeding cars on Lower Street. 2. This site was not originally in the local plan so no consultation has yet taken place until now. 3. This area is of significant amenity value to the village with listed buildings, adjoining the Conservation area and the saxon burial ground and will adversely effect the views from the footpath that overlooks the site. 4. There are already 178 houses in the process of being built/have permission to be built within the village and these extra 10 houses will put a strain on village resources and lead to over-development
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)	Take TC4S023 out of the Plan

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Page 268 states 'to support the delivery of rural local needs homes to enable local people to remain in the village where they live or work and not to be forced to move away because of high house prices and high rents'. The proposed housing in Kingsdown like the rest of the local plan has only 30% affordable. Has the council made any attempt to identify the number of 2nd/3rd/4th homes in Kingsdown or homes bought to run totally as AirBnBs? No there is no mention in the plan. Has the council attempted to find out who has bought the last 10 homes for sale in Kingsdown e.g. the £600,000 2 bedroom home in North Road? If DDC had explored this they would find that many of the homes are not affordable to locals and are bought as 2nd homes. For instance in North Road only 7 of the 34 homes are lived in - the rest are 2nd homes or AirBnBs. This is the same in South Road and many other roads. The new houses will do nothing to increase housing for locals.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	It is unsound because there is no proper assessment of housing need for locals (as you specify in your introduction) in Kingsdown or indeed Deal where there are also many 2nd homes. it is legally not compliant because it encourages car use as the roads in Kingsdown are too narrow for drivers to obey the 2022 Highway Code for cyclists and walkers.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34(KIN002) and SAP35(TC4S074)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>NE2 11.13 , Allocations for housing development SAP35 (TC4S074) and SAP34(KIN002) fails to address this issue of respecting the landscape and 11.14 states that landscapes provide a livelihood for agricultural and tourism sectors.</p> <p>With SAP35, this site according to Evidence Base Appendix 2c (Housing Sites and Landscapes) cannot be mitigated because of the hilly nature of the terrain allowing the site to be easily viewed. Later assessment gives the qualification that there will be minor negative affects for this site but this is to be disagreed with. There is a PRoW passing through the middle of the field from the western edge of the site and proceeds up to the top of the hill. Any development in this area wii be easily discernable and will stand out against the unique and attractive character of the village. The proximity of the aforementioned PRoW is a footpath within easy reach by walking of both residential areas of Deal and Walmer, and is well used by dog walkers,visitors and bird watchers (good for health and well-being and the use of private transport not needed). Its popularity is enhanced by the views over Kingsown, the adjoining countryside and across the Dover Strait to France. Putting houses in the bottom corner of the field, small though the number is, will unfortunately lead to marring this walk despite questionable attempts to provide buffers.</p> <p>With respect to SAP34 (KIN002), this site for housing is adjacent to the AONB. It is agricultural land , needed for producing food..The development will be on the skyline and mar the landscape.and again will be discernable on the approach to Kingsdown village via the Ringwould Road. This road is narrow and in cosequence will be difficult to gain accesss to and from the site. If the road is widened at this point, the land is part of the AONB and therefore presumably cannot be used for this purpose. The highway network just adjacent to the proposed entrance of this site and</p>

	<p>into and around Kingsdown is much constrained with no pavements for pedestrians. Development of this site for 50 houses will add to the already present congestion of vehicles negotiating this network. This will reduce the attractiveness of the village and deter visitors and tourists. Kingsdown already has a number of 2nd homes and airbnbs. With the infilling that has been done over the past few years, building another 55 houses (SAP35 and SAP34) in this attractive and sensitive area, will allow the potential for this number to increase which might be acceptable for the tourist industry but will not be for people wishing to own and live in this village.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>To maintain and keep the coastal village of Kingsdown as highly attractive and therefore encourage visitors and ensure its sustainability, both sites for development (SAP34 and SAP35) need to be withdrawn from the Local Plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	<p>Housing and Employment Site Allocations, 4.236, fig. 4.10, table 4.7, SAP34 and SAP35</p>
<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Positively prepared Justified</p>

	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Section 4.210 states that the Kingsdown landscape setting is highly attractive and sensitive. Section 4.213 disagree with 1st sentence that these sites are appropriate for development as infilling has already occurred in Kingsdown. Further housing development in this castal village will lead to an increase in 2nd homes and airb&b's.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	To comply with the requirements of the Local Plan , withdraw sites for development SAP34 and SAP35 from the list of housing allocations.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.
