6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<ul style="list-style-type: none"> • This development is not needed. Kingsdown has a large proportion of properties that are either second homes or Airbnb. Many of the proposed houses would be used for the same purpose. • Access to the site is very difficult. Ringwould Road is very narrow. Construction of a new access would lead to chaos for existing residents. If the proposed development is built, there are no footways into the village which would mean either driving or walking on a very busy roadway. • The village centre is small with very narrow roads and very limited parking. • There are very few facilities within the village, no doctor or any other health facility. • The primary school is full. The nearest secondary school is in Deal. • Public transport, the bus service, is very limited which means more private car use. • There are no cycle tracks at this end of the village and the roads are too unsafe for cycling. • The proposed development is adjacent to an AONB. It is on the skyline and would be very dominant visually, both from the AONB and also on the approach to the village from Ringwould. Tree planting would not mitigate this. • Prime agricultural land would be lost for ever which is not compatible with food security. • This proposal will not be consistent with the existing village and the limited facilities which it has available. It is out of scale with the appearance and character of the village.

	<ul style="list-style-type: none"> To sum up: the development is not "of a scale that is consistent with the relevant settlement's accessibility, infrastructure provision, level of services available, suitability of sites and environmental sensitivity"SP4
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	Remove this proposal entirely and concentrate on development of brown field sites.
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Local Development Plan from Dover District Council – Objection to Development of 50 houses SAP34/KIN002</p> <p>The following information is in answer to the question: 'Do you think the local plan is sound?' Was it:</p> <p>Positively prepared – NO Justified – NO Effective – NO Consistent with national policy - NO</p> <p>SAP 34 Ringwould Rd, arable Field behind Glenview Carehome, Kingsdown</p> <p>It is unsound and ineffective to a damaging extent, to list Kingsdown as being a <i>'Local Centre; a village providing services for a local rural area and a secondary focus for development in the rural area'</i> Any development at SAP 34 would do the opposite of 'reinforcing the role of the village'; it would in fact choke off the existing parish economy, reducing its attractiveness to tourists. Any development at SAP34 would endanger life given the unique highways situation of the village, the district-wide need for traffic to flow through village on narrow lanes with single lane passing whenever the A258 is blocked.</p> <p>SAP 34 Kingsdown p. 163: The selection of SAP 34 is totally unsound, on 5 different grounds. Firstly, the Highways Assessment of Ringwould Road is inadequate and unsound as regards this site. The facts are that Ringwould Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes and unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows to single lane passing. The Kingsdown village residents (population 2000 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwould Road traffic flowing freely. Therefore, selection of SAP 34 for any development is unsound firstly on the grounds of highways assessment unsound/inadequate. This development would cause extreme danger and gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. KCC for years have refused to listen to requests to reduce the speed limit on this road and refused also to put in pavement on the northern side of Ringwould Road. The economy of the village depends on visitors and residents walking, cycling and horse-riding on the Ringwould Road and any development of SAP 34 would increase the likelihood of accidents which may result in fatalities.</p> <p>The selection of SAP 34 is unsound secondly on the grounds of landscape character, being incompatible with criteria described above in SP 4. the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character. SAP34 would be the first siting of any visitor turning right off the A258 in Ringwould and heading towards Kingsdown. Regardless of any attempt to hide the development it would still be seen as an 'eyesore'.</p> <p>The selection of SAP 34 is unsound thirdly on the grounds that the Deal/Walmer conurbation of 30,000 depends on the narrow – single lane in places - Ringwould Rd, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. The A258 is the only southern entrance to the 30,000-conurbation starting in Upper Walmer and stretching to North Deal and Sholden. Diverted traffic creates a is a dangerous situation for the village every time it happens, some diverted traffic uses Glen Rd/Liverpool Road selected as site for SAP 15 Ray's Bottom in Walmer. This site too, if developed, is likely to mean diverted traffic cannot get in/out of Deal/Walmer 30,000 conurbation. Surely our emergency services would oppose both developments for this reason as acutely dangerous and life threatening. Unsound due to being incompatible with SP12, because its lanes periodically become part of the district Strategic Transport Infrastructure. Selection of these sites is completely unsound and non-compliant with all laws/planning regulations relating to the prevention of accidents and protection of human life. SAP 34 would result in <i>'Traffic movements from the development resulting in severe impacts to the highway network that it would not be possible to mitigate'</i>, and as such contrary to SP4 2 j within the plan, thus unsound and highly ineffective.</p> <p>The selection of SAP 34 is unsound fourthly on the grounds that it borders the AONB and is valuable arable farmland, needed at times for valuable food producing farmland. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch and Freedown woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwould/Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital within the boundary of the AONB to be protected on the boundary of this site. Also, because it would be destructive of the Landscape Character. It is also unsound given that it is in a BOA Biodiversity Opportunity Area.</p>

	The selection of SAP 34 is unsound fifthly on the grounds that any development would possibly remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP 15, so development here could contribute to flooding (see CC5 p. Flood Risk). This area at the bottom of the dip is already a dangerous blackspot
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Not Applicable</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>I object strongly to KIN002 being included in the draft LDP for the following reasons:</p> <p>The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii ‘SPs should provide for objectively assessed needs for housing & other uses, . . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole’. The following arguments show why this development would not be sustainable as is a requirement of the NPPF and would have more adverse impacts than benefits. Also as the government have decided on 5/12/22 to stop putting pressure on local authorities with their unsustainable housing targets; the LDP now needs reviewing with respect to how it is putting pressure on rural communities to accept unreasonable developments of this nature.</p> <p>The continued inclusion of SAP34 / KIN002 land at Woodhill Farm, Kingsdown in the LDP is unsound. Despite many concerns and reasoned arguments from residents the only concession seems to have been to reduce the housing numbers from 90 to 50; and it is doubtful that 50 would be the maximum if the proposal were to go ahead. Developers would likely try to negotiate the number back up to 90. The site has not been given a green allocation in the HELAA report despite its many issues and the fact that an adequate full highways assessment has not yet been carried out and the HELAA highways assessment remains amber. The latest HELAA report states that the many failings can be mitigated for within the LDP. I would argue that this is unsound and not justified or consistent with National Policy NPPF 21. The evidence from DDC has not been used correctly. NE2 Landscape character and the Kent Downs; states in section 11.13 that DDC aims: <i>To ensure that all development coming forward over the plan period respects and reflects the character of the landscape in which it is located.</i> The DDC landscape character assessment of 2020 (LCA) shows that SAP34 / KIN002 falls within Ripple F3, <i>open chalk farmland and woodland.</i> NE2 states <i>The classification identifies 17 LCAs and defines issues of landscape management and development management which should be delivered over the plan period.</i></p> <p>Development Management guidelines for LCA F3 include:</p> <ul style="list-style-type: none"> -<i>Conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB.-Seek to reduce lighting and noise impacts on this landscape and in longer views through sensitive highway design/management. Conserve the distinctive narrow winding lanes and grassy verges.</i> - <i>Conserve the open skyline, avoiding the introduction of vertical elements such as pylons, telecommunications masts etc.- Protect and enhance views from more elevated areas and from the coast out to sea and towards landmark features such as Walmer Castle.</i> - <i>Protect the open character of the chalk landscape, preserving elements of tranquillity associated with it.</i> <p>The development of SAP34 would result in the loss of an important buffer between the built environment of Kingsdown along Glen Rd and the AONB. The mitigation measures proposed would also include changes to Ringwould Rd to provide a better access to the site. Guidance for F3 suggests that the narrow winding lanes and grassy verges should be preserved. Ringwould Rd would certainly lose its character and the main entrance to the village would be altered. From within F3 views across to Kingsdown and the sea would be altered by the development of SAP34, the open character of the landscape would be lost and pollution from light and traffic would increase. The HELAA sustainability appraisal incorrectly states; <i>The site has been judged by Council officers to have the potential to moderately affect the District’s landscapes, townscapes or seascapes.</i> I would argue that this is not justified due to inclusion in LCA F3 and proximity to the AONB.</p> <p>NE2 11.19 states <i>The setting of the AONB comprises land adjacent to or within close proximity of its boundary, including but not limited to land which is visible from the AONB and from which the AONB can be seen.....Within the setting of the AONBs, priority will be given over other planning considerations to the conservation or enhancement of natural beauty, including landscape, wildlife habitats, tranquillity, dark skies, and geological features.</i></p> <p>SAP34 is on the boundary of the AONB and within F3 Ripple on land which should provide a clear buffer between Kingsdown built environment and the setting of the AONB. Priority should therefore be given to conservation of the natural beauty of the AONB.</p> <p>SP13 states that <i>the NPPF 2021 requires local plan policies to conserve and enhance the natural environment, to recognise the intrinsic character and beauty of the countryside and the wider benefits from natural capital and ecosystems.</i> It is unsound to include SAP34 in the LDP as it would detract from the beauty of the countryside particularly the adjacent AONB. The Kent Downs AONB management plan 2021-26 says <i>the Kent Downs AONB, perhaps more than any other of Britain’s protected landscapes – AONBs, Heritage Coasts or National Parks, has experienced and is experiencing severe development pressure. DEFRA evidence shows ‘The Kent Downs AONB stands out as an area which has experienced major, but expected, change, showing a rate of urban growth of almost 10%.pa, with the urban area spreading by 14 ha over the decade’.</i> The AONB in Dover District has suffered development at a disproportionate rate which indicates that planning pressures on our district are unsustainable. National Planning Practice Guidance (NPPG) confirms that the Duty of Regard is “relevant in considering development proposals</p>

that are situated outside National Park or Area of Outstanding Natural Beauty boundaries, but which might have an impact on the setting of, and implementation of, the statutory purposes of these protected areas." I would argue that because the entrance onto Ringwould Rd requires widening and changing of the road which will encroach into the AONB, to mitigate for it being unsafe, this will be detrimental to the setting and indeed directly upon the AONB.

NPPF 2021 11 – making effective use of land - Planning policies and decisions should: 120 *b recognise that some undeveloped land can perform many functions, such as for wildlife, recreation, flood risk mitigation, cooling/shading, carbon storage or food production.* As food security is such a national issue, including SAP34 for development is unsound and unsustainable as good agricultural land would be better served in producing food.

Local Centres: I would argue that the designation of Kingsdown as a local centre is unsound and not justified. Due to the unique nature of its location with AONB to the South as a border, the Sea to the East, heritage coast and cliffs to the South. The 3 narrow access roads serving Kingsdown do not link up easily to other hamlets and smaller villages to provide services. The main settlement of Ringwould is the other side of the A258 arterial road from Kingsdown and better served by Deal or Dover. There is no doctors, a recently reduced bus service, poor transport links for pedestrians and cyclists, no train station. A small village shop with post office and butchers. It is necessary to run a car to get to Deal or Dover for a food shop. The services within the village are by no means comprehensive and running a car is necessary.

The number of 2nd homes and Air BandB's in the village proves that dwellings outnumber homes required, so there is NOT an 'objectively assessed need for housing within the Parish'. To include SAP34 /KIN002 is therefore unsound and not consistent with NPPF 21.

SAP 34 /KIN002 is outside the village boundary and is part of the green space surrounding the village. In the housing section of the draft LDP strategic policy SP4 which refers to residential windfall developments -ie small scale developments there are strict criteria with regards to development.

a -The scale must be appropriate to the size of the settlement and existing facilities - This development would create problems for Kingsdown as the school is small and oversubscribed, we do not have a doctors surgery and few shops. Inadequate public transport makes travelling to secondary schools difficult as well. Between the Regulation 18 and 19 consultations bus services have been further cut. The HELAA highways assessment indicates it is unlikely that the proposed development will generate enough additional patronage to lead to an increase in bus service provision. This contravenes SP1 as the need to travel by private car would be increased.

Allocated money from the developers would not do any good as there is no space and parking in the village for improving infrastructure. The narrow single track roads through the village which are an inherent part of the character and charm of the village are also a limiting factor for the village in terms of further development. Residents of KIN002 would therefore have to use their cars for everything, creating pollution and congestion.

b - development must be compatible with the layout, density, fabric and appearance of the existing settlement and would not result in merging of separate settlements - . Kingsdown has a sizeable conservation area and is a pretty seaside village with a shingle beach, woodland, chalk grassland and AONB. This would be a blight on the character and heritage of the village and would set the tone for people as they drive into the village. The HELAA assessment indicates that the entrance to the site would require the road to be widened at this point. Land is apparently available on the other side of the road. I would argue that this contravenes NE2 – the AONB would be compromised by taking a section of it to widen the road. This would also be detrimental to the character of the village as it would be the first thing that is seen as you drive into the village and would go against the development guidance for Ripple F3 in the LCA 2020.

C and d- There must not be harm to important green spaces - the site is directly opposite the AONB which is highlighted throughout the draft LDP (NE2) as being an important constraint to development. The AONB must be protected. Green fields around the village are very important to the communities health and happiness and this field is surrounded by busy footpaths and bridleways. This has been shown during the current pandemic to be of vital importance. There is also an area of land on Ringwould Rd in front of the site which is managed for nature by the owner and has a large number of nesting birds in the spring and overwintering birds. To the west of the site is an area of managed rare chalk grassland and woodland which has been the nesting and roosting site for many bird species including buzzards and skylarks.

f and g. It would not result in the loss of best and most versatile agricultural land currently used for agriculture and ...It includes an appropriately sized and designed landscape buffer to the open countryside;

NE2 states that proposals affecting the setting of the AONB will only be supported where the development is sensitively located and designed to avoid or minimise adverse impacts on the AONB and its setting and the development would enhance the special qualities, distinctive character and tranquillity of the AONB.

Having a wide access for good sight lines and widening Ringwould Rd using part of the AONB would be contrary to this. Also due to the contours of the land it would be very difficult to adequately screen the site from the AONB and therefore would have a negative impact on it. The site would also be visible from the Dover Road and would change the character of the landscape which is LCA Ripple F3.

h It would not have a significant adverse impact on the living conditions of existing adjoining residents;-

All residents of Glen Road would have their gardens overlooked and their privacy compromised. This would be contrary to their legal human right to enjoy their homes peacefully. During the building phase there would be a lot of noise, disruption and dust. Their views across the AONB would be blighted. The large number of cars would also create localised pollution and noise once such a development was completed. There would also be an increase in light pollution.

i Where development would result in the loss of active employment, open space, sport or community facilities within the settlement that such development is consistent with the requirements of policies EN2, PM5 and PM6 of this Plan; This development would not be sustainable as it would result in the loss of active employment in the village as the special character of the village would be affected and it would not be as desirable to visitors from outside the area.

j. Traffic movements generated from the development do not result in severe impacts to the highway network that cannot be mitigated - residents of this proposal would all have to use their cars to travel to nearby towns or to join trains or bus routes safely for work. This would create extra pollution contrary to the SP1 climate change strategy. The HELAA highways assessment shows that the site is still designated as orange. However the viability assessment shows it is now green so that the site can be pushed forward to reg 19 stage and concerns can be mitigated within the LDP. I consider this to be unsound. The mitigation is chiefly concerned with using some of the AONB to widen the road. This contravenes the NPPF as it would cause more adverse impacts than benefits to the village and AONB. It is unsound to put any more pressure on the 3 narrow, characterful roads into the village as emergency vehicles will not be able to safely gain access. When the A258 is closed as it was recently due to a fatal accident and traffic diverted into our village the gridlock in Kingsdown is dangerous. The HELAA assessment is also assuming that there is a good bus service; however, this has been cut. The HELAA assessment is underestimating the number of car movements that a development of this size would generate at 60 – 70 at peak times. It is more likely with the large 4 or 5 bed homes that would be built here that this would be in excess of 100.

T11 Development should, in so far as its size, characteristic and location -Give priority to the needs of pedestrians, cyclists, users of public transport, car sharers and users of low and ultra-low emission vehicles. This site is outside the village boundary and not well served by footpaths or cycle paths. The site is crossed by a footpath ER5 which connects to the village along a dirt track with no lighting. The site will exit onto Ringwould Rd which is not safe for children to cycle down and does not have any footpaths. The HELAA Sustainability appraisal is incorrect with its summation of minor negative with regards to climate change mitigation and sustainable transport. This has not taken into account the cutting of bus services to the village and the fact that it is not easy to walk or cycle to Deal or Dover.

T12 New accesses and intensified use of existing accesses onto the road network will not be permitted if it would result in a clear risk of crashes or traffic delays unless the proposals can incorporate measures that provide sufficient mitigation. I consider this site to be unsound as there would be an increase in crashes and traffic delays. Widening the junction at the exit would not do anything for the rest of Ringwould Rd. Land either side (opposite the AONB) is not owned by the same party as KIN002 and so cannot make up part of this development. The access is also very complicated. It is used by visitors to the play area and the landowner to the left as you enter the field from the road. No mention is made in the HELAA highways assessment of the landowner needing access. ER5 also crosses the entrance which would therefore be dangerous to pedestrians crossing from the field back to the village. ER5 is a very busy path used by dog walkers on a daily basis. The sight lines onto Ringwould road from either direction are poor. Ringwould Rd is very narrow in places and in places, 2 vehicles cannot pass each other. Turning left out of the site would be onto a narrow road going into a 20mph zone. Turning right is in a 50mph zone with a bridleway and footpath crossing with poor visibility and slow tractors turning out onto the road. There has already been an RTC resulting in a fatality and serious injury on Ringwould Rd. I would argue that issues with access alone mean that this site is not suitable and unsound for development. A medium pressure gas main crosses KIN002 diagonally and crosses the road at this access point which would require careful consideration when changing the access. This would cause a lot of disruption to the villagers as this is the only classified road in and out of the village and as poor as it is, is the main route to the A258. If traffic had to divert via Deal this would create extra pollution and congestion for a protracted period of time which would be contrary to SP1 and the climate emergency declaration by DDC.

T12 Applicants must demonstrate that traffic movements to and from the development can be accommodated, resolved, or mitigated to avoid severe cumulative residual impacts.

The streets of Kingsdown particularly in the conservation areas are narrow and some unmade and unadopted. There are no footpaths in Upper Street where pedestrians are often to be found walking down the road to the shops. Lorries have repeatedly damaged property in Upper Street and the Rise and this is why there is a weight limit of 7.5 tonnes on Ringwould Rd. During the development phase the construction traffic would

	<p>not safely be able to get in and out of the site. Also how can construction traffic get to the site if there is a 7.5 tonne weight limit on Ringwould Rd? An increase in 50 houses would result in far more car movements than the 60 – 70 car movements in rush hour predicted by the HELAA highways assessment. There would also be all the delivery vans, workmen etc. If these then turn left down the village to avoid the difficult junction at Ringwould onto the A258 they would cause gridlock in the village. The current windfall developments of a few homes per year is enough to cause problems within the village due to vehicle movements.</p> <p>These criteria refer to windfall developments which is how Kingsdown has grown slowly over the last planning period. These criteria are very sensible when applied to a rural settlement with poor infrastructure such as this. Any large scale development other than windfall would have a devastating effect on the community and could be considered as a disproportionate and unsustainable development in terms of this settlement.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Remove SAP34 from the LDP.</p> <p>Housing targets particularly with respect to characterful rural settlements need to be renegotiated in light of new government rulings.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	SAP34 - Land at Woodhill Farm, Kingsdown (KIN002)
<p>2 - Do you consider this part of the Plan sound?</p>	No
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	Positively prepared Justified

	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This plan of 50 new houses clearly does not take in consideration the already much under pressure road infrastructure, of this village, if you are familiar with the local traffic, you will know how congested is especially when you try to go to the post office, butcher or at the school, and no doubt with this extra 50 houses and about 80 to 100 cars will add extra real grief to the existing resident and to the potential new ones.</p> <p>There will be important negative wildlife impact on the local area, also if you take all the necessary preventions.</p> <p>Knowing how the design and the quality building construction of the general developer in UK are the poorest in Europe and the most expensive, will make a real bad impact on the general landscape of the village, by building these match box houses over priced and bad design.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>We should not develop any houses in the area, since we should use first all the brown areas or if we need to build some houses these should be given to an arch practice and to a creative developer that has got a vision.</p> <p>Should not be a plan to make as many houses possible like a mass, dormitory but value the area and cherish it.</p> <p>The house plan should be halved at least, and not to be a high concentration of bricks that will no doubt destroy the local beauty</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	i would like to participate to make sure that what i said is conveyed to the people responsible to take a decision to the interest of the village and not for the Farmer that is money out of this or to the developer.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34 Land at Woodhill Farm (KIN002)

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The plan is unsound on five different grounds: a) The Highways Assessment of Ringwoud Road is inadequate; b) landscape character as it is on a skyline with sea behind, and a lovely view and the building of this plan will impact on individual identify and character; c) Ringwoud Road carries diverted traffic from the A258 every time A258 is blocked by an RTA or road works. d) It borders the AONV and is valuable arable farmland, needed in times of national food security is of concern. e) Any development will remove a flood sponge on the top slope of the hill.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I do not consider that this particular plan is legally compliant or sound. It will have a detrimental impact on Kingsdown and we do not have the infrastructure in place to sustain it.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Local Centres: Kingsdown, St Margaret's-at-Cliffe,
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan is fundamentally unsound for a number of reasons, both practical and cultural.</p> <p>Firstly, the information upon which it is based is inaccurate or specukative. For example, there is no longer a bus service that serves Kingsdown. Stagecoach, the operating comoany have stopped the uneconomivcal service and say they are unlikely to reintroduce it as the cost effectiveness is getting wrose not better and won't imrove to a point of being economucally viable. (The LSE research into subsidied public services support the argument that long term subsidies of public services should not be expected to last indefinitely and would inevitably cease in the economic short term.)</p> <p>Secondly, the sensitive nature of the setting of Kingsdown would be unsettled and disturbed permanently by the introduction of 50 houses on this site because of the impact on its setting within the AONB and proximity to other sensitive areas near by. The village itself would suffer unduly as a result. It is the dark blue bit on the DEal Mnpoly boad for a reason. It is a highly sought after holidiay destination with a large capacity and developed campsite, a holiday park and numerous holiday homes. It is an expensive pace to live as it is so sought after because of its location and composition. Putting a large housing estate on its edges would negatively impact on its ambiance, character and charm that make it the desirable place that it is. Practically it is insane to overload an already overloaded infrastructure with more occupants and development. The drainage system, especially in parts of Upper Street and the lower portion of The Rise are already overloaded and often flood or back up. Southern Water are unable to say why or how this can be improved. Adding more effluent and sewage to the system is madness and likely to make an existing Health and Safety issue worse. The traffic in the village and up to the junction with the A258 at Ringwold is already a problem. There is inadeqaute access and very little parking available in the village itaself and the A258 junction is a congestion and motoring related problem already. The traffic from another 50 houses would have to involve major highways redesign with something like a roundabout or traffic lights, which would impact not only on the village but make the A258 an even more congested and troublesome route than it already is.</p> <p>The evironmental impact is also unacceptable for this location as its not an 'out of the way' / 'out of sight out of mind' situation as there will be light. and noise pollution which would be far reaching beyond the boundries of the development and it will be there permanently, not just for a while!</p> <p>There are also flaws in the propossal in the statement :</p> <p><i>'Development should be set back from the western boundary to mitigate impact on the AONB;'</i></p> <p>This is an acknowledgement that this development will impact on the AONB. The AONB has been researched and refined and registered to determine its boundaries and borders and setting and any impact upon it will reduce its fulfilment of that role. Why is this deemed as acceptable? They are there for a reason and domestic development is no excuse to permananetly remove, impact or destroy them. The boundaries are c exactly where they should be and should not be impinged upon.</p> <p>There is no need for this development in Kingsdown as there are numerous other sites that would accomodate further domestic development without extra impact on the environment. Another 50 residences at Whitfield, which is already under development, would have no extra impact and save the precious areas in our county that are under increasing and unnecessary threat.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)	

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34 Land at Woodhill Farm, Ringwoud Road, Kingsdown (KIN002)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	I believe the selection of SAP34 is unsound in the following areas: 1.Highways Assesment of Ringwoud Road is inadequate and unsound as regards to site SAP34. Ringwoud Road is signposted as unsuitable for: long vehicles (over 7.5 tonnes); wide vehicles; has SLOW painted in 3 places. Residents in Kingsdown are dependent on the Ringwoud

<p>possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Road traffic flowing freely. Any development will cause further difficulties on an already difficult road to navigate at gridlock times. Traffic diversions through the village - using either Glen Road or Kingsdown Road, when there are issues on the A258, already cause difficulties for and added dangers to residents, (and the children and staff of the village school during term times,) as well as deliveries to village businesses and residents and for emergency services that try to access specific areas within the village. SAP 34 will only increase those dangers and potential loss of life.</p> <p>2.The site of SAP 4 is on the skyline with the backdrop of sea behind, an iconic view that welcomes people to Kingsdown, giving the village its individual identity and character. With the density of 50 houses on this site, that attractive and highly individual identity will be eroded.</p> <p>3. SAP 34 is unsound on the grounds that it borders the AONB, and is valuable arable farmland, needed more than ever now when national food security is of concern. Sites capable of food production and contribution to bio-diversity are SO important these days, the loss of which would impact negatively on this AONB.</p> <p>4.SAP 34 is unsound on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond, which drains towards Rays' Bottom, so development could lead to flooding in an area that has already seen a near RTA fatality and many near misses on the dip of the Ringwoud Road.</p> <p>Any development should not override existing benefits of current provision. I fear that the above mentioned concerns will erode benefits of village life. The characteristic and charm of Kingsdown will disappear. There will be a loss of amenity to villages for walks and the biodiversity of the area will also be affected.</p> <p>A further concern is the lack of information on the legally binding 0% carbon commitment by 2050 within the plans. What are the quality of the material being used?</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Not Applicable
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34 p 163 SAP34 - Land at Woodhill Farm, Kingsdown (KIN002)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I think this plan is unsound as Kingsdown is already completely overcrowded with what we have. It does not have the roads to accommodate anymore houses and people. Which also won't be affordable for young families. The road needs footpaths, cycle tracks. I also want to state that I think your way of getting us to return our concerns is unacceptable and suggests you have deliberately tried to put us off stating our concern. the language use is incomprehensible.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	New roads. Footpaths cycling tracks. As said before the language in the revised plan is so complicated, designed to bewilder and confuse.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I understand houses have to be built but require that all houses built are to the highest quality of sustainability and affordable to our local people. Not to support more second homes and Airbnb's. We do not have the road systems, cycle paths, foot paths to access this site safely. All theses should be legally binding to any future building on this sie b sewers, c
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	7.11 page 268, 3.71 page 37, SAP 34 page 163
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Not Legally compliant - The local plan specifically related to Kingsdown (SAP 34 and SAP 35) and the immediate boundary area (SAP 15 and SAP 53) is not legally compliant with the new and legal Highway Code changes which came into place in January 2022 i.e. after the evidence review and call for sites. The Highway Code states that a car must allow a minimum of 1.5 metres to overtake a cyclist (car travelling at under 30 MPH) or pedestrian (2 metres) when there is no pavement. All of the access roads into Kingsdown and the main roads used within Kingsdown (Upper St, The Rise, Undercliffe) do not allow the Highway code to be followed currently but therefore In the Local plan cannot by definition follow the guidance to be legally compliant or to support sustainable infrastructure (encourage walking and cycling) or to works towards climate neutral. The danger to cyclists and walkers will be enhanced when the A258 is blocked after an accident and traffic is diverted via the Ringwold Road.</p> <p>Unsound - the local plan is unsound with reference to SAP34 as the Ringwold Road is already signposted as unsuitable for long vehicles, vehicles over 7.5 tonnes, wide vehicles, narrowing to single lane passing. The proposed SAP34 development would cause dangerous gridlock particularly with the added traffic in summer months.</p> <p>The developments of SAP34, SAP35 and SAP 15 would compromise the 'individual identity of Kingsdown Village' and contradiction to Policy 4 statement.</p> <p>the SAP34 development is unsound on the grounds that it would remove a flood sponge.</p> <p>the Local plan is also unsound in that it has not taken into account reasonable alternatives for Kingsdown or even considered these. There is no mention or even any attempt to assess the number of 2nd (or indeed 3rd, 4th) homes in Kingsdown/Walmer/Deal which are not lived in for most of the year. There is an increasing number of AirBnBs which provide multiple occupants (and multiple cars to travel) for family houses. As there is no attempt to assess these I will provide one road number as an example - Of the 34 houses in North Road, Kingsdown only 7 are lived in as a 1st home. The last house to sell in North/South Road was in the region of £600,000 for a 2nd home. This is in direct contrast to the statement of the local plan (7.11, page 268) 'to support the delivery of rural local needs homes to enable local people to remain in the village where they live or work and not to be forced to move away because of high house prices and high rents'. The plan only allocates 30% of new homes as affordable housing and so there is no demonstration for a local need for more housing. The other 70% of houses being built on greenfield could all be bought as 2nd/3rd/4th homes or run as AirBnBs.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I suggest a review of housing need in specific areas of DDC and build houses in areas of housing need. This need has not be demonstrated in Kingsdown and surrounding areas unless DDC council want an area largely lived in by 2nd home owners. I suggest a 20 MPH limit throughout Kingsdown and the access roads with designated pedestrian and cycling lanes.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	This site lies immediately adjacent to the AONB boundary and extensive views of the site are available from the AONB to the south of Ringwold Road due to the rising topography of the AONB to the south and west, including from a well-used network of public right of ways. A large scale development here could impact on the setting of the AONB given its proximity to the AONB and intervisibility, with sensitivity of the site increased by its high topography and the fact it shares similar landscape characteristics to the adjacent AONB. The existing built form of Kingsdown is set back from the edge of the hill and is not readily visible from the AONB in this direction. The safeguards included in criteria a, b, c and e are considered crucial to help manage potential AONB impacts. While we support the provision of a requirement for advanced planting along the western boundary of the site, we consider it unlikely that it will reach maturity prior to the completion of the development and we would recommend that this is amended to also allow planting prior to commencement of development.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	e) Advanced tree planting. This should be undertaken on-site EITHER PRIOR TO THE COMMENCEMENT OF DEVELOPMENT or at the time the development of the site commences, to ensure trees are established and have reached maturity prior to the completion of the development, to mitigate the impact on the AONB;
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>See Green Parth 24 page submission flags up non-legal-compliance with Localism Act 2011, Environment Act 2021. NPPF 2021 version and previous version, the legally binding UK Climate Emergency declaration of 2019 (commitment to net zero 2050) and Climate Change Act 2008.</p> <p>SAP 34 Kingsdown p. 163: The selection of SAP 34 is totally unsound, on 5 different grounds. Firstly the Highways Assessment of Ringwold Road is inadequate and unsound as regards this site. The facts are that Ringwold Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes and unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows to single lane passing. The 1400 voters in Kingsdown village (population 2000 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwold Road traffic flowing freely. So the selection of SAP 34 for any development is unsound firstly on the grounds of highways assessment unsoundness / inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. It is a disgrace that KCC for years have refused to listen to requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwold Road. The economy of the village depends on visitors and residents walking, cycling and horse-riding on the Ringwold Road and any development of SAP 34 would increase the likelihood of fatalities exponentially.</p> <p>The selection of SAP 34 is unsound secondly on the grounds of landscape character, being incompatible with criteria described above in SP 4. the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character.</p> <p>The selection of SAP 34 is unsound thirdly on the grounds that the Deal / Walmer conurbation of 30,000 depends on the narrow – single lane in places - Ringwold Rd, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. The A258 is the only southern entrance to the 30,000 conurbation starting in Upper Walmer stretching to North Deal and Sholden. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Rd / Liverpool road selected as site for SAP 15 Ray's Bottom in Walmer. This site too, if developed is likely to mean diverted traffic cannot get in / out of Deal /Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. Unsound due to being incompatible with SP12, because its lanes periodically become part of the district Strategic Transport Infrastructure. Selection of these sites is completely unsound and non-compliant with all laws / planning regs relating to the prevention of accidents and protection of human life. SAP 34 would result in <i>'Traffic movements from the development resulting in severe impacts to the highway network that it would not be possible to mitigate'</i>, and as such contrary to SP4 2 j within the plan, thus unsound and highly ineffective.</p> <p>The selection of SAP 34 is unsound fourthly on the grounds that it borders the AONB and is valuable arable farmland, needed in times when national food security is of concern. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch / and Freedown woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwold w/ Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital within the boundary of the AONB to be protected on the boundary of this site.</p> <p>The selection of SAP 34 is unsound fifthly on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP 15, so development here could contribute to flooding (see CC5 p. Flood Risk). (FYI we have seen an RTA fatality, and many near misses, in this dip on the Ringwold Rd).</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Discard this plan
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	No applicable

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	Landscape

to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

This site is in the LCAF3 Ripple area defined in the district *Landscape Character Assessment 2020* which defines on page 118 under Development Management that (developments should) **Conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB.**

Having defined a conservation strategy for the F3 area, the site proposal then proceeds in a contrary direction with a development allocation of no less than 50 houses in an iconic landscape.

The Kent Downs AONB response to the Regulation 18 consultation is unequivocal: **Sensitivity of the site is increased by its high topography and the fact that it shares similar landscape characteristics to the adjacent AONB. We therefore do not support this allocation.**

The individual site appraisal *HELLA Appendix 2d Landscape Assessments* notes that it is close to and is intervisible with the AONB and shares similar landscape characteristics. The assessment says it is within 400m of the AONB - It is actually across road. It makes clear that the **development of this site would have an impact on the landscape and further assessment is required to demonstrate whether this can be mitigated.**

Environment

HELLA Appendix 3d Environment Assessments reports contaminated land and the risk of surface water flooding. The site is in Groundwater source protection Zone 2.

Use of this land for housing removes productive farmland from the economy. It will remove flood water retention land on the top slope of the site, contributing to seasonal flooding to the proposed site at SAP15

The same report fails to mention (as does the site proposal) the adjacent biologically rich **Local Wildlife Site DO02 The Lynch and Oxney Court Woods**, within the AONB. A 2019 management plan by Kent Wildlife Trust for the parish council provides evidence of environmental capital requiring protection.

In regard to both landscape and environment the proposal appears entirely contrary to paragraph 174a of the NPPF: **'protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan)'**

Regarding landscape and environment, the proposal appears entirely contrary to paragraph 174a of the NPPF: **'protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan)'**

Transport

HELLA Appendix 3b Highways Assessments states that **concerns have been identified in relation to access and/or highway impact and further assessment is required to demonstrate whether this can be mitigated.**

It mentions overreliance on private car for travel owing to an inadequate bus service, which applies incidentally to both SAP15 and SAP35. The service operated by Stagecoach has been declared uneconomic and is likely to remain so, and is entirely funded by KCC. 4 or 5 buses a day run on a circular route at 90 minute interval with a 3-hour break around midday.

Ringwould road is a narrow winding lane unsuitable for wide vehicles and those over 7.5 tons. Elsewhere in Kingsdown in Upper Street and The Rise there are pinch-points where there is single-land traffic owing to parked cars.

The additional traffic likely as a consequence of this development seems not to have been taken into account, and appears contrary to paragraph 104(d) of the NPPF **so that the environmental impacts of traffic and transport infrastructure can be identified, assessed and taken into account – including appropriate opportunities for avoiding and mitigating any adverse effects, and for net environmental gains.**

Sustainability

The *Sustainability Assessment Appendix F* makes many observations illustrating that the site is unsustainable:

Poor access to the town centre, to secondary school and FE facilities, and to a NHS GP surgery. Where together with SAP15 and SAP34 it is accessible to the local Kingsdown primary school which is currently oversubscribed, resident children will have to travel elsewhere by car, or if given preference will result in other schools overflowing from the ejected population. See comments above with regard to the fragility of the bus service and the impact on roads.

It **incorrectly** states that is not located within Source Protection Zone 1, 2 or 3. **The site is in GWSP Zone 2.**

The site intersects with a SSSI risk zone. See above under environment for Lynch/Freedown Wood which is again neglected.

	NPPF paragraph 11 states Plans and decisions should apply a presumption in favour of sustainable development. 11b (1) in particular points to a strong reason for restricting the overall scale, type or distribution of development in the plan area. It appears that this proposal fails to do so.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Yes</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>I consider the SAP34 proposal is non-compliant with the NPPF requirement to objectively assess the positive and negative impacts of the proposal for the following reasons:</p> <p>1. The SAP34 proposal is non-compliant with the NPPF requirement to objectively assess the positive and negative impacts effect of a proposal.</p> <p>There are no identifiable benefits for local residents, the only benefits would be for house buyers seeking a new property in a suburban type development with a prestigious address.</p> <p>There are many negative impacts on local residents particularly for Glen Road residents. Local shops will not benefit significantly because the site is remote form their location. Pedestrian access to the village proper is via Kingsdown Road which is the main access to Kingsdown for the A258. The route is narrow and unsafe with no pavements at any point. Vehicular access is similarly constrained and exacerbated by lack of parking and there is no Public Transport. The new residents will be house buyers looking for a house in a suburban style new development with a prestigious Postal Address and reasonably close to nearby Deal and Dover shopping centres and Railway stations. Local residents will experience more traffic on Kingsdown Road and other minor local roads and congestion in the village centre as newcomers try to navigate their way through the narrow village streets.</p> <p>I consider the SAP34 Proposal does not comply with the NPPF requirement that the positive and negative impacts of a site should be objectively assessed.</p> <p>2. The SAP34 Proposal is non-compliant with the NPPF requirements for development proposals in, or in the settings of, an AONB.</p> <p>DDC Commissioned a Landscape Character Assessment (LCA)survey . This showed SAP34 was a site in the Ripple Landscape Area which is identified as an Area of Open Chalk Arable Farming. As such the site provided a Buffer between the built Lanscape of Kingsdown village and the surrounding farmland and AONB. This proposal would substantially lessen this buffer with particular impact on the adjacent AONB. DDC also commissioned a Landscape Sensitivity Assessment (LSA) which was a site specific assessment covering a much wider range factors than an LCA and covered the impact on both the the immediate Landscape around a site but also the impact of the wider landscape. DDC selected only 33 sites and for some reason none of the sites in Kingsdown or the neighbouring village Ringwould were selected. The Ringwould site SAP53 was inside the AONB and the Kingsdown site SAP34 was adjacent to the AONB. The selection criteria is unexplained.</p> <p>There has therefoe been no site specific assessment of the Landscape Sensitivity of SAP 34.</p> <p>I consider the SAP34 Proposal is non-compliant with the NPPF requirements for sites in or adjacent to an AONB.</p> <p>3. I consider the SAP 34 Proposal is non-compliant with the Requirements of DDC Site Selection Policies SP3 and/or SP4.</p> <p>DDC have not indicated under which of the above policies SP3 and SP4 they have selected SAP 34. This omission is not limited to this proposal and appears to be genral for all proposals.</p> <p>This omission makes representations against the selection of sites such as SAP34 because both policies could have been used, However SP4 proposal have to comply with SP3 requirements.</p> <p>Any development under either SP policy should be compatible in scale ,design and appearance of the Settlement in or next to which it is situated. A new build housing estate in this particular location is not compatible with any of these.</p> <p>The scale is disproportionate to the existing adjacent properties and the village as whole, the design would be quite unlike any of the neighbouring houses or the general range of mixed styles and ages of property in this village with it's conservation area and appearance would be incopitable with it's location in open arable farmland adjacent to an AONB.</p> <p>I consider that the SAP34 Proposal is non-compliant with DDC Site Selection Policies.</p> <p>For all the above reasons I consider the SAP34 Proposal to be UN SOUND.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I request the removal of the SAP34 proposal from the Local Plan. I consider this will help to make the Local Plan less unsafe .
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	The above site allocation is unsound on the following grounds:

<p>to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Highways Assessment has not fully taken into account the road network in and around Kingsdown. Kingsdown has small narrow roads which often require stopping to allow oncoming vehicles to pass. The recent closure of the A258 in November due to a fatal crash highlighted the unsuitability of Kingsdown's roads for increased traffic numbers. Ringwould Rd has no lighting, cycle lane, footpaths and is narrow in many places. For pedestrians or cyclists to access the village centre and/or school would require traversing a PROW which is unlit and unpaved or using Ringwould Road which as said has no footpath, cycle lane and limited lighting in that area. A proper assessment of the road network would have shown the unsuitability of this site.</p> <p>SAP 34 is inconsistent with NPPF section 104. Buses have been limited in Kingsdown for many years and have been significantly reduced recently. The school bus services have been removed. Developing SAP 34 would not allow new residents access to sustainable transport infrastructure. This would add to the highways impacts detailed above.</p> <p>SAP 34 is inconsistent with the NPPF section 172, paragraph C. As the site straddles a designated coastal zone and doesn't bring wider sustainability it falls foul of this section.</p> <p>SAP 34 is inconsistent with the NPPF section 174, paragraphs A & B. Development of this area would harm the intrinsic natural beauty of Kingsdown and would not protect or enhance the valued landscape.</p> <p>SAP 34 is inconsistent with NPPF section 180. The area is near to a strategic wildlife corridor (Nights Bottom which is fed from the Lynch). The Lynch links to an important chalk grassland area. As Kingsdown is surrounded by important SSSI areas, development is not suitable. As paragraph A states, if no alternative is found the planning should be refused.</p> <p>The updated HELLA report changes SAP34 from Amber to Green, stating concerns can be mitigated through the local plan. I have seen no evidence in the Regulation 19 Submission which reassures me this would be the case. All of the factors above were commented on in the Regulation 18 Submission and still remain from what I can see. I don't therefore think the local plan is sound or has been adequately revised by DDC and their officers.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>A full review of the allocation SAP34, taking into account the above points.</p> <p>The whole plan is lengthy and wordy, which whilst I appreciate this is needed, the format DDC have made it available in is not suitable. There is no search function to easily get to elements of the plan or drill down into areas of interest. If I were to comment via paper, a 100 word limit is mentioned on the paper comment form. This is surely discriminatory to people who are digitally excluded or digitally disadvantaged either through hardware or knowledge.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34 (KIN002)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Inclusion of SAP34 is not legally compliant with NPPF 2021 item 11 (b) ii.</p> <p>DM Policies NE2 (Natural Environment) p 285. I submit that the area inland from Kingsdown, west to Ringwoud, Ripple, Sutton, Studdal and Little Mongeham should all be included as LTF F Open Arable Chalk Farmland with Woodland, as an extension to F3 Ripple. This would render the designation sound and effective and show why the chalk farmland of SAP34 is unsound/unsuitable for development.</p> <p>SAP34 p 163. The selection of SAP34 is totally unsound on 5 grounds:</p> <ol style="list-style-type: none"> 1) The highways assessment of Ringwoud Road is inadequate and unsound as regards this site. Ringwoud Road (as signposted) is unsuitable for long vehicles, those over 7.5 tonnes and wide vehicles, In several places the road narrows to single lane. Any development on this site is unsound. The village economy relies on pedestrians, cyclists and horse riders who would be severely negatively impacted by the additional traffic development would cause. 2) Landscape character - the selection of SAP34 contradicts the comments in SP4 on individual village identity and character. The site is on the skyline with sea behind - an iconic view which greets all people travelling from Dover to Deal. 3) Unsound and non-compliant with all laws and planning regulations relating to the prevention of accidents and protection of human life. SAP34 would result in traffic movements from the development resulting in severe impacts of the highway network that it would not be possible to mitigate and thus contrary to SP4 2j. 4) Borders an AONB and is valuable arable farmland. A 2017 Kent Wildlife Trust survey provides evidence of the natural capital within the boundary of the AONB to be protected on the boundary of this site. 5) Selection of SAP34 is unsound on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the pumping station and pond which drains towards Rays Bottom, so development here would contribute to flooding.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Nothing would make SAP34 sound, effective, safe or compliant with Strategic Policy 12.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34 (KIN002) Land at Woodhill Farm
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Dover Local plan is unsound on five different grounds. 1. The highways assessment of Ringwoud Road is inadequate and unsound regards the site. 2. Unsound on the grounds of landscape character. 3. Unsound on the grounds of Deal/Walmer conurbation of 30,000 depends on single line traffic/Ringwoud Rd. when there is blockage on the A258. 4. Unsound on the grounds of it borders on AONB and is valuable arable farmland. 5. Unsound on any development would remove a flood sponge on the top slope of the hill, below which is Knight's Bottom pumping station.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance	The area cannot sustain any more building as the roads and infrastructure were not built for the extra housing that is being planned.

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I have significant concerns regarding the effects of implementing this part of the plan combined with other plans to build on land adjacent to or near the A258 Dover to Deal Road. The A258 is already a very busy road. From time to time there is a need to divert traffic from this road due to accidents, repairs etc. The only possible diversions take traffic through the villages either side of the road usually causing significant delays and disruption in the villages themselves. For emergency vehicles especially this is of great concern. Further housing development on land between the A258 and the adjacent villages will only exacerbate these problems since there is no tenable way in which these issues can be avoided.

	The present plan is unsound for the above reason together with the detrimental effects that large increases in population and consequential motor vehicles will have on the character of the villages concerned, especially as they lie in an area of outstanding natural beauty.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	There is no obvious practicable or economically viable way in which the above issues can be avoided or ameliorated if significant additional housing development is permitted in the area in question. Windfall development alone will gradually worsen the position in all respects.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34 (KIN002) Land at Woodhill Farm
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>1. The highway's assessment of Ringwoud Road is inadequate and unsound regards the site. 2. Unsound on the grounds of landscape character. 3. Unsound on the grounds of Deal/Walmer conurbation of 30,000 depends on single line traffic/Ringwoud Road. When there is a blockage on the A258. 4. Unsound on the grounds it borders on AONB and is valuable arable farmland. 5. Unsound on any development would remove a flood sponge on the top slope, of the hill, below which is Knight's Bottom pumping station.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The area cannot sustain any more building as the roads and infrastructure were not built for the extra housing that is being planned.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The plans fail to consider the impact on this unique village with limited road access only. Pedestrians are already compromised with no lighting or pavements. The other access is by car on narrow roads which are already regularly blocked. Schooltimes, deliveries and ordinary travel is necessary by car as there is a very restricted bus service and no nearby station. Alterations to the topography to provide access would, in this area of outstanding scientific interest impact badly on wildlife, particularly bats which need dark corridors. The LCA (2020) from DDC LCA F3 Ripple map shows that KIN002 is within this area of Open Arable Chalk Farmland with Woodland. It should be therefore kept as an important buffer between the village and open countryside to preserve the special character of the area.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 2 - Do you consider this part of the Plan sound?	No

<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Positively prepared Consistent with National Policy</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>No</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Woodhill farm, Ringwould road, Kingsdown 50 houses SAP 34 (KIN002) page 177-79</p> <p>I believe the development of 50 houses in Kingsdown contravenes the guidance set out in: NPPF, Section 2, 11b; Section 9, para 111; Section 15, para 174, 176, 177.</p> <p>Section 2: 11b. Sustainable development: or ii. any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole</p> <p>The proposed development is not sound or justified. It does not consider the geography of Kingsdown, how narrow its access and exit roads are, the congestion the village experiences at peak school times, nor the safety of residents because there are no pavements. The development will seriously affect the community and inflict major harm to an area directly next to the AONB. The field itself is enjoyed by residents, and wildlife. The location of the development would seriously affect the local landscape with a housing development on one of the village's highest points, visible from the ANOB and surrounding area.</p> <p>Section 9: 111: The development should "be prevented or refused on highway grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impact on the road network would be severe". Kingsdown road from Ringwould is narrow, twisty and hilly. There have been deaths on this road. The cumulative damage caused by an rise in the number of vehicles for building the houses and then by the new homeowners for these 50 houses is not acceptable nor safe. There are high banks on either side of the road and it is restricted to heavy vehicles. The roads though the village are single track (due to parked cars) and do not have pavements.</p> <p>Section 15: 174-177. Planning policies and decisions should contribute to and enhance the natural and local environment by:</p> <p>174a:</p> <ol style="list-style-type: none"> 1 a) protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan). The site is right next to an AONB. It has long been farmland and has created a buffer to the densely populated Kingsdown village. The village itself is constrained by its hills and descent to cliffs and beach, via a narrow single-track road. 2 b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services. A dense development of 50 houses with minimum of two cars per house and associated utility and household deliveries is beyond what the village infrastructure can accommodate. We already see problems of access for utility and emergency vehicles. 3 c) maintaining the character of the undeveloped coast, while improving public access to it where appropriate. Kingsdown has always welcomed holiday visitors and tourists. But it's popularity in recent years has meant that its infrastructure and services are struggling to cope. The conservation zone status is under threat, with modernisation trumping conservation. The development of 50 homes will only add to the issues that this village already faces. There are no controls of whether these homes will be second or third homes leased out for AirBnB and short holiday lets.

	<p>175: Allocate land with the least environmental amenity and 176: The conservation and enhancement of wildlife and cultural heritage are also important considerations in these areas. There will be an environmental and visual impact given that the development is adjacent to an established AONB and that the proposed field is bound by mature hedgerows and trees which I fear would be torn out. Light pollution will affect Kingsdown's resident bat population and other wildlife. New built structures at this high point will impede the flights of bats and other animals.</p> <p>177: Permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest The site is located by AONB. The harm to the village is substantial and is not outweighed by the public or business benefit. The houses will not be for local people, nor will they be affordable. They will be too densely populated and will add to the ongoing traffic issues that the village faces. Not least when the A258 is closed and traffic is redirected through the narrow tiny roads. It will cause substantial harm to wildlife and residential amenity (para c).</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The Woodhill development is in such contravention of national policies that I would want it removed entirely</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>

<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Positively prepared Justified Effective Consistent with National Policy</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>No</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p><i>DDC Note: The attachment to this representation is the Dover Landscape Assessment (Document number NEEB07)</i></p> <p>I consider the inclusion of site SAP34 within the Dover Local Plan is unsound because it:</p> <ul style="list-style-type: none"> • fails to comply with the National Planning Policy Framework (NPPF) • contravenes Dover District Council's strategic policies • contravenes the advice in Dover District Council's Landscape Character Assessment for Dover District. <p>The inclusion of site SAP34 is not consistent with the national policy enabling the delivery of sustainable development in accordance with the policies in the NPPF. In particular it is in contravention of the following paragraphs: 70, 92, 93, 104, 105, 110, 111.</p> <p>Development at this site represents a significant move away from the policy of promoting sustainable transport. The scale, location and density of development proposed is unsound on highways grounds, representing an unacceptable cumulative impact on highway safety, and the residual impacts on the road network would be severe. Ringwould Road is signposted as unsuitable for long vehicles, vehicles over 7.5 tonnes, and wide vehicles, further the road is painted SLOW in three places, despite the 50mph signs, and there are four sections where the road narrows to single lane passing. The road already struggles to cope with the additional traffic use with a) access to the holiday village, campsite and golf course and b) the road is used as an alternative route for traffic diverted from the A258, causing significant safety issues on Ringwould Road, The Rise and Glen Road. Any additional traffic will cause gridlock. A fatal road traffic accident occurred on Ringwould Road in recent years, and the proposal to introduce further traffic to the road represents unacceptable cumulative impact.</p> <p>The inclusion of site SAP34 is unsound because it contravenes Dover District Council's Strategic Policies in particular:</p> <ul style="list-style-type: none"> • SP2. Development at the site will have an adverse effect upon the existing community with a deterioration in existing open spaces, air quality, water maintenance and an increase in traffic. • SP4. The scale of the development is not appropriate to the size of the settlement and existing facilities, would harm green spaces, would result in the loss of agricultural land • SP13 and SP14. Development at the site will have an adverse effect upon the landscape and natural environment. The site borders an AONB and is in close proximity to the Dover to Kingsdown cliffs SAC and site of SSI. Further the site is on the skyline with sea beyond, and any development will have a detrimental effect upon the intrinsic character of the landscape. <p>Development at the site contravenes the advice in Dover District Council's Landscape Character Assessment for Dover District, in particular the advice on landscape management and development as set out on page 118 of the document (file attached).</p> <p>The inclusion of site SAP 34 is unsound on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station.</p> <p>I consider the inclusion of site SAP34 fails to comply with the duty to co-operate because it does not respect the needs and safety of the local community; it is detrimental to the needs and safety of the local community by increasing the risk of road traffic accidents and flooding, reducing air quality, and deteriorating the natural environment.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful</p>	<p>The inclusion of site SAP34 contravenes the National Policy Planning Framework and I suggest it be removed from the Dover Local Plan.</p>

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34 - Land at Woodhill Farm, Kingsdown (KIN002)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I believe that the plan is neither practical nor consistent with achieving sustainable development. The proposed access to the site via Ringwould Road would place additional strain on a route that is already inadequate. Kingsdown is a holiday village, which attracts significant, additional traffic onto this narrow lane - which does not have dedicated provision for pedestrians or cyclists and is also used by horseriders, visitors to the Golf Club and large farm vehicles. The existing vehicle weight limit of 7.5T already recognises the difficulty in accessing Kingsdown safely via this road and there has been at least one accident leading to a fatality. If, as part of the proposed development, Ringwould Road was upgraded, I would still have significant concerns about an increased volume of traffic joining the A258 at Ringwould. The A258 is an extremely busy, single-carriageway road that has seen a significant number of serious road traffic accidents in recent years including fatalities. At peak times the A258 regularly comes to a stand-still due to the sheer volume of traffic - a situation which will be exacerbated by other residential developments locally for which permission has already been granted. This congestion not only leads to increased pollution but can impede the response times of emergency services.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The Ringwould Road would need to be significantly upgraded to ensure the safety of all users, including pedestrians and cyclists, and to facilitate the free flow of traffic between Kingsdown and Ringwould. The A258 would need to be upgraded to become a dual-carriageway road, without compromising the principles of sustainable development.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Not applicable.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The selection of SAP 34 is totally unsound, The Highways Assessment of Ringwoud Road is inadequate. The facts are that Ringwoud Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes and unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are Dover and Deal Green Party: submission to Reg 19 consultation on Dover DC new Local Plan, deadline 9 Dec 2022. 14 4 sections where the road narrows to single lane passing. The 1400 voters in Kingsdown village (population 2000 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwoud road traffic flowing freely. We have seen an RTA fatality on the road, and many near misses. It is a disgrace that KCC for years have refused to listen to requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwoud Road. The economy of the village depends on visitors walking, cycling and horse-riding on the Ringwoud Road and any development of SAP 34 would increase the likelihood of fatalities exponentially. The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'. Any development at SAP 34 is unsound firstly on the grounds of highways inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. Secondly The selection of SAP 34 is unsound on the grounds that the Deal / Walmer conurbation of 30,000 depends on the narrow – single lane in places - Ringwoud road, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. It is part of the transport infrastructure of the whole district. The A258 is the only southern entrance to the 30,000 conurbation starting in Upper Walmer. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Rd / Liverpool road selected as site for SAP 15 Ray's Bottom in Walmer, this site too if developed is likely to mean diverted traffic cannot get in / out of Deal / Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. Thirdly on the grounds of landscape character, the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character and falls within LCT F3, Open Arable Chalk farmland with woodland, needed for national food security. The selection of SAP 34 is unsound fourthly on the grounds that it borders the AONB. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch / and Freedown woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwoud w/ Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital to be protected on the boundary of this site. The selection of SAP 34 is unsound fifthly on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP 15, so development here could contribute to flooding (see CC5). (cross referenced SAP 15 Walmer Rays Bottom).</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I believe the development of 50 houses in Kingsdown contravenes the guidance set out in: NPPF, Section 2, 11b; Section 9, para 111; Section 15, para 174, 176, 177.</p> <p>Section 2: 11b. Sustainable development: or ii. any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole</p> <p>The proposed development is not sound, justified or effective. It does not consider the geography of Kingsdown, its narrow access and exit roads, the congestion the village faces at peak school times, nor the safety of residents when there are no pavements. The development will adversely impact the community and cause substantial harm to an area sited near an AONB, which is enjoyed by residents, and wildlife.</p> <p>Section 9: 111: The development should "be prevented or refused on highway grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impact on the road network would be severe". Kingsdown road is small, narrow and hilly. There have been fatalities on this road. The cumulative damage caused by an increase in the number of vehicles for building the houses and then by the new homeowners for these 50 houses is not acceptable or safe. The current road has high banks on either side. The roads though the village are narrow, single track (due to parked cars) and do not have pavements.</p> <p>Section 15: 174-177. Planning policies and decisions should contribute to and enhance the natural and local environment by:</p> <p>174:</p> <p>a) protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan). The site is situated near an AONB. It has long been farmland and has created a boundary to the densely populated Kingsdown village. The village itself is constrained by its geography descending to cliffs and beach, via a narrow single-track road.</p> <p>b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services. A dense development of 50 houses with minimum of two cars per house and associated utility and household deliveries is too much for the village infrastructure to accommodate.</p> <p>c) maintaining the character of the undeveloped coast, while improving public</p>

	<p>access to it where appropriate. Kingsdown is a small village at the foot of the White Cliffs. It has always welcomed holiday visitors and tourists. But it's popularity in recent years has meant that its infrastructure and services are struggling to cope. The conservation zone status is under threat, with modernisation trumping. The development of 50 homes will only add to the issues that this village already faces.</p> <p>175: Allocate land with the least environmental amenity and 176: The conservation and enhancement of wildlife and cultural heritage are also important considerations in these areas. I am also concerned about the environmental and visual impact given that the development is adjacent to an established AONB and that the proposed field is bound by mature hedgerows and trees which I fear would be torn out.</p> <p>177: Permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest The site is located near to an AONB. The harm to the village is substantial and is not outweighed by the public or business benefit. The houses will not be for local people, nor will they be affordable. They will be too densely populated and will add to the ongoing traffic issues that the village faces. Not least when the A258 is closed and traffic is redirected through the narrow tiny roads. It will cause substantial harm to wildlife and residential amenity (para c).</p> <p>There is no public health services in Kingsdown in terms of doctors. Many doctors surgeries and pretty much all dentistry services are closed for NHS patients.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The plan is refused in its entirety.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Chapter 4 SAP34, Land at Woodhill Farm, Kingsdown (KIN002)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The inclusion of SAP34bis not legally compliant with NPPF 2021 item 11,(b11 '<i>SP should provide for objectivity assessed needs for housing & other uses...unless(1)any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this framework taken as a whole</i>'</p> <p>the following arguments show why this development would not be sustainable as is a requirement of the NPPF and would have more adverse impacts then benefits.</p> <p>NE2 Landscape Character and The kent Downs sections states in section11.13 that DDC aims: 'To ensure that all development coming forward over the plan period respects and reflects the character of the landscape in which it is located. The LCA(2020) from DDC LCA F3 Ripple map shows that KIN002 is within the area of Open Arable Chalk Farmland with Woodland. Proximity of this site to the boundary of the AONB means that it must be kept as an important buffer between the village built enviroment and open countryside in order that the special character of the area is maintained.</p> <p>Kingsdown should not be designated as a local centre. It is unsound and ineffective to a damaging extent. '<i>a village providing services for a local area and a secondary focus for development in the rural area</i>' - it does not serve other settlements and is confined by the sea and AONB, is small and has lots of character and has a rural setting.</p> <p>SP4 Windfall Development. a)- The scale must be appropriate to the size of the settlement and existing facilities. -the village has lots of character, conservation area, narrow roads, small svhoo;, no doctors, much reduced bus service,no access to rail, and is car dependence.</p> <p>b)- development must be compatible with the layout, density, fabric, and appearance of the existing settlement and would not result in merging separate settlements.. this would set the tone as you drive in the village, impacts the AONB, need buffer between village boundary and AONB. Widening the road here to make it suitable for highways would ruin the entrance to the village.</p> <p>c & d)- There must not be harm to important green spaces. - the site is directly opposite the AONB which is highlighted throughout the Draft LDP(NE2) as being an important constraint to development, important to village for health and happiness, dog walking, amenity value,. There is Footpath ER5 round the field.</p> <p>f & g) - It would not result in the loss of best and most vesatile agricultural land currently used for agriculture and - it includes an appropriately sized and designed landscape buffer to the open countryside;</p> <p>NE2 states that proposals affecting the setting of the AONB will only be supported where the development is sensitively located and designed to avoid or minimise adverse impacts on the AONB and its setting and the development would enhance the special qualities, distinctive character and tranquility of the AONB.</p> <p>This development would impact the AONB due to entrance needing to use some of AONB to widen the road, houses seen from the AONB. The site is better put to use in growing food. We need all the agricultural land we have to grow food for future generations. All development must be sustainable NPPF 21 states. To use growing land is not.</p> <p>h) - it would not have a significant adverse impact on the living condition of existing adjoining residents - but Glen Road is affected.</p> <p>i) - Where development would result in the loss of active employment, open space, sport or community facilities within the settlement that such development is consistent with the requirements of policies EN2, PM5, and PM6 of the plan; visitors are less likely to want to come to Kingsdown if the entrance is blighted by this development and roads are gridlocked.</p>

	<p>j) - Traffic movements generated from the development do not result in severe impacts to the highway network that cannot be mitigated. - Ringwould Road is very dangerous - fatality recorded near Pumping Station. Large tractorsturn out into the road, a bridleway and fottpaths cross in two points. Ringwould Road has a 7.5 tonne weight limit. There is dangerous gridlock in village during busy periods, namely school run etc.. Ringwould Road would have to be closed for long periods to facilitate work being carried out tomake entrance to development safe.</p> <p>T11 - Development should , in so far as its size, characteristic and location , give priority to the needs of pedestrians, cyclists, users of public transport, car sharers, and users of ultra-low emission vehicles. This site is outsidethe village boundary and not well served by footpaths or cycle paths. The site is crossed by a footpath ER5 which connects to the village along a dirt track with no lighting. Bus services have been reduced and this development is said by HELAA hghways assessment to be unlikely to lead to more buses being laid on.</p> <p>T12. - New accesses and intensified use of existing accesses onto the road network will not be permitted if it would result in a clear risk of crashes or traffic delays unless proposals can incorporate mearsures that provide sufficient mitigation. It is considered this site to be unsound as there would be an increase in crashes and traffic delays. Shared access - poor park users, ER5 footpath, land owner to the left, gas main under the entrance and poor sight lines in both directions.</p> <p>T12 - Applicants must demonstrate that traffic movements to and from the development can be accommodated, resolved, or mitigated to avoid severe cumulative residual impacts. - Kingsdown village has narrow roads few footpaths in main streets. Lorries passing through or delivering/collecting cause long hold-ups beside adding to chaos and doing damage.</p> <p>Kingsdown settlement already has a significant number of 2nd homes and airb&b's, plus the holiday camp. This development of some 50 dwellings could increase this number which would negate the purpose of this development.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Delete site for development KIN002 (50 houses) from the Local Plan. The field needs to be kept as agricultural land as there too many factors against any development</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The development of SAP34 Kingsdown is unsound as it conflicts with National Planning Policy Framework requirements for conserving and enhancing the natural environment. It contradicts NPPF 174 due to the loss of landscape character. DDC's Dover District Landscape Character Assessment 2020 p114-9 identifies LCA F3 Ripple as a valuable landscape where development should conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB. The proposed development at Woodhill Farm SAP34 is within LCA F3 area and contradicts the requirement to conserve the characteristic pattern of historic villages maintaining their tight knit enclosed built character.</p> <p>Additionally, the development conflicts with Dover Local Plan SP13 "All proposals within, or affecting the setting of, the AONB and Heritage Coasts must have regard to the purpose of conserving and enhancing their natural beauty in accordance with the requirements of Policy NE2." and NPPF 176 as the development is within the setting of and clearly visible from the Kent Downs AONB, so is not sensitively located. The eastern boundary of the Kent Downs AONB is Ringwould Road, Kingsdown. With the site access on the opposite side of this narrow country lane, the development will not avoid or minimise adverse impacts on the AONB.</p> <p>The development of SAP34 Kingsdown is unsound as it conflicts with NPPF requirements for promoting sustainable transport. The development does not meet the requirements on NPPF 104 and 105 as it is on the edge of the small rural village of Kingsdown with limited opportunities for walking and cycling with particular challenges of walking or cycling along Ringwould Road which is a busy, narrow country lane, with no footpath. Public transport options are limited with an infrequent bus service from Kingsdown to Deal that has recently been significantly reduced. This will result in most journeys to and from this development by car along Ringwould Road which is already very busy as the main access to Kingsdown from A258. However, improvements to Ringwould Road would be challenging without adverse effects on the Kent Downs AONB on the western edge of the road. The location of a site for housing development is the key factor in the use of sustainable transport throughout the lifetime of the housing so it is critical that this accurately assessed before approving development within the local plan. The NPPF requirements for considering development proposals, NPPF 111 in my view should be refused on highways grounds because the additional estimated 75 movement of cars at peak times along the already busy Ringwould Road which would be unsafe to pedestrians, cyclists and motorists. Improvements to the road would conflict with the AONB requirements. Additionally, there is a weight limit of 7.5 tons on this road which would require all deliveries of building materials to the site would be limited to lorries meeting this requirement.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	SAP34 should be removed from the proposed housing allocation in the Dover Local Plan as it would result in the loss of landscape character, would have an adverse impact on the setting of the Kent Downs AONB and would be unsafe for pedestrian, cyclists and motorists.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34 - land at Woodhill Farm, Ringwoud Road, Kingsdown
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object to the proposal to include build housing on land at Woodhill Farm, Ringwoud Road, Kingsdown (SAP34 / site KIN002). I would like to highlight the following concerns:</p> <ol style="list-style-type: none"> road access: This is a notoriously tricky, narrow and hazardous road. A deep dip in the middle is followed on approaching Kingsdown with a dangerous bend and very poor sight lines. It is also frequently used by tractors and other agricultural vehicles. Traffic leaving the new dwellings would have to join this difficult road at right angles - and at a particularly dangerous point with very poor visibility. pedestrian / cycle use: this is essentially a narrow winding rural lane. The speed of traffic on it - and the narrowness - makes it very challenging and hazardous for cyclists. There is no pavement - and as such cannot

	<p>be used safely by pedestrians. This means all traffic to and from the new housing would have to be by motorised vehicles</p> <p>3 emergency vehicle access: emergency access to the new dwellings will be very challenging - given the poor road access</p> <p>4 proximity to AONB: just the other side of this narrow road is the start of the magnificent Kent Downs Area of Outstanding Natural Beauty. Such a large and dense new housing development on a green field site so close to this strongly protected AONB is just wrong.</p> <p>5 scale: the size of the development is simply inappropriate for this location - situated on the edge of this remarkable village. At the moment, these fields form a natural 'break' between two historic settlements - Ringwould and Kingsdown. This large development will hugely extend the current boundary of housing in Kingsdown and change the character and visual amenity of the approach to the village. It will also lose forever an important green space around the village.</p> <p>6 Dover District Landscape Character Assessment: building new housing here is simply not compatible with the findings of DDC's 'Dover District Landscape Character Assessment' of 2020. I refer specifically to LCA F3 (chapter 5 - pages 114-119). As well as highlighting the environmental sensitivities and environmental and habitat values of this part of the district, the document rightly characterised this location as <i>"undulating chalk landscape with an intact agricultural character providing a rural setting for the South Forelands areas of the Kent Downs AONB as well providing rural separation between Deal and Kingsdown"</i>.</p> <p>7 LCA F3 further emphasised the vital importance of conserving:</p> <ul style="list-style-type: none"> • <i>"the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB"</i> • <i>"the characteristic pattern of historic villages maintaining their tight knit enclosed built character"</i> <p>In summary, I object to the proposal to build housing on greenfield land at Woodhill Farm, Ringwould Road, Kingsdown.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The proposal to build housing on greenfield land at Woodhill Farm, Ringwould Road, Kingsdown should be removed from the plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 34 KIN002
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The development of this site would have a detrimental landscape impact that cannot be mitigated.</p> <p>The site is adjacent to AONB, which lies immediately to the South.</p> <p>The development would change the approach to the village, which would now be visible from the primary approach and would become the dominant impression, rather than the current rural character. There are also significant viewpoints from Kingsdown Wood, a locally important place of recreation.</p> <p>The site is in an area characterised by rolling countryside and has the same landscape characteristics of the AONB and on the setting of the village.</p> <p>The site provides a vital role in softening the transition from urban form to open countryside. The site boundary is wooded with significant copse to the West. The site is bounded by hedgerows and scrub which is likely to provide important roosting, nesting and resting sites for birds as well as a foraging area for bats.</p> <p>It forms an important ecological link from the Butts to Knight Bottom, which would be severed by this development.</p> <p>The Landscape Assessment says: 'The development of this site would have an impact on the landscape and further assessment is required to demonstrate whether this could be mitigated.'</p> <p>It is of my opinion that given the topography and the some 25m level change from the important viewpoints (on the approach to the village at the junction of the A258; and from approach from Hill Wood), vegetative planting will be inadequate means of mitigation. The proposed site is highly visible and will have a detrimental impact on both the character of the village and the AONB.</p> <p>The Ringwold Road will make a very dangerous unsafe access. It is not suitable for pedestrians or cyclists, unsafe for both modes given the bends in the road on approach to the village and lack of forward visibility. (Indeed the wife of the development sites owner was nearly killed in a car accident a few years ago)</p> <p>With no pavements there is no safe active travel route to the village, and therefore the entire development will be based on car travel, and is therefore unsustainable.</p> <p>I understand the applicant will have proposed the PRoW via the Butts as a suitable alternative, but this is not lit, unsurveyed and of an unsuitable width and surface. It is not suitable for all users.</p>

	I would question the principle of development in Kingsdown to this scale as there is almost no public transport or jobs or services in the village. It will change the character of the village- rural, historic, coastal village particularly when viewed from the special zones identified.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The Ringwould Road would have to be made wider with pavements and cycle ways. this would impact greatly on the character of the valley. It has a weight limitation so would be unsuitable for plant and materials to the site without a massive upgrade. I believe the Government are to scrap house building targets especially on green field sites.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I have lived in St Margarets and Kingsdown for 75 years and have a unique perspective on the changes being proposed.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34 (KIN002) Woodhill Farm Kingsdown
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>No real consideration is given to the impact on the existing community. This proposal will have a devastating effect on our existing inadequate roads. It is an area of outstanding beauty. Also no real support is offered to the existing or proposed community - pharmacies, shops, creative outside spaces, thoughtful well considered landscaping. You are offering the building of what exactly? Define the type of properties. It seems to me you are proposing creeping sprawl. You are offering up a triangular pincer movement of sprawl from Deal, Walmer and Kingsdown. Recently, executive homes in Walmer and Deal have been built that are rammed together, small gardens, lack of privacy, no landscaping (not even trees). Yet these green community ideas were all in the original proposals - so what happened? If recent builds were proven to be a success in providing real support for cohesive, happy communities this might set a positive precedent but that is not the case. Already a negative precedent has been created by recent past mistakes. There is not enough mention of social housing. However, by the time houses do get built the percentage of social housing magically seems to diminish. Faith is built on trust and belief for the good of all - not just erecting too many houses on an area of outstanding beauty and making a profoundly negative impact of the existing community and the extraordinary landscape.</p> <p>On a final note, your online forms are far too complex and impenetrable for people to tackle and therefore without real true consultation this whole proposal is non valid and unsound. The You Tube Video is of poor quality and difficult to understand - this is profoundly unfair.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Infrastructure: Kingsdown is a small village that evolved gradually with additions of small builds over the years. It is organic and the roads mostly are very narrow with few passing spaces. The road from Chalk Hill Road to Ringwould Road through to the A258 is no more than a slightly enlarged single track. It is absolutely treacherous and potentially deadly and already does not support the existing traffic flow. If you propose entrance and exit points on Ringwould Road or The Glenn Road you are creating an absolute death trap (no exaggeration).</p> <p>Potential new residents will use - Kingsdown village & pubs, the beach, Deal town, Dover and Canterbury. All of these roads are already full to capacity and impossible to negotiate. There is no parking facilities and there never can be as there is no space whatsoever for parking. If you are seriously thinking about adding such a massive introduction of new homes you are in fact not addressing the most important issue - the roads. The A258 should be widened or changed completely. Ringwould road to Chalk Hill Road is (given the size of cars and vans) only a single track at times.</p> <p>This will improve your proposal but simultaneously ruin a fine village and an area of outstanding natural beauty. Look at what happened to Brighton and the awful sprawl around the coast - no real thought to the implication on the land or the people.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	<p>SAP 15 & SAP 34</p>
<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Justified Effective Consistent with National Policy</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>No</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'.</p> <p>DM Policies NE2 (Natural Environment) p.285: It is sound to designate the area inland from Kingsdown, west to Ringwoud, Ripple, Sutton, Studdal and Little Mongeham, south to Guston, as LCT F Open Arable Chalk Farmland with Woodland, F3 Ripple. But it is unsound, ineffective and contradictory to then ignore the designation when selecting the dangerously located chalk farmland of SAP 34 for development.</p> <p>SAP 34 Kingsdown p. 163: The selection of SAP 34 is totally unsound, on 5 different grounds,. Firstly the Highways Assessment of Ringwoud Road is inadequate and unsound as regards this site. The facts are that Ringwoud Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows to single lane passing. The 1400 voters in Kingsdown village (population 2000 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwoud Road traffic flowing freely. So the selection of SAP 34 for any development is unsound firstly on the grounds of highways assessment unsoundness / inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. It is a disgrace that KCC for years have refused to listen to requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwoud Road. The economy of the village depends on visitors and residents walking, cycling and horse-riding on the Ringwoud Road and any development of SAP 34 would increase the likelihood of fatalities exponentially.</p> <p>The selection of SAP 34 is unsound secondly on the grounds of landscape character, being incompatible with criteria described above in SP 4. the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character.</p> <p>The selection of SAP 34 is unsound thirdly on the grounds that the Deal / Walmer conurbation of 30,000 depends on the narrow – single lane in places - Ringwoud Rd, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. The A258 is the only southern entrance to the 30,000 conurbation starting in Upper Walmer stretching to North Deal and Sholden. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Rd / Liverpool road selected as site for SAP 15 Ray's Bottom in Walmer. This site too, if developed is likely to mean diverted traffic cannot get in / out of Deal /Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. Unsound due to being incompatible with SP12, because its lanes periodically become part of the district's Strategic Transport Infrastructure. Selection of these sites is completely unsound and non-compliant with all laws / planning regs relating to the prevention of accidents and protection of human life. SAP 34 would result in '<i>Traffic movements from the development resulting in severe impacts to the highway network that it would not be possible to mitigate</i>', and as such contrary to SP4 2 j within the plan, thus unsound and highly ineffective.</p> <p>The selection of SAP 34 is unsound fourthly on the grounds that it borders the AONB and is valuable arable farmland, needed in times when national food security is of concern. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch / and Freedown woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwoud w/ Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital within the boundary of the AONB to be protected on the boundary of this site. The selection of SAP 34 is unsound fifthly on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP 15, so development here could contribute to flooding (see CC5 p. Flood Risk). (FYI we have seen an RTA fatality, and many near misses, in this dip on the Ringwoud Rd).</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Nothing can be done to mitigate putting any development on either site SAP 34 or SAP 15. They should both be excluded as sites for development.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34 - Land at Woodhill Farm, Kingsdown (KIN002)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The proposal to build 50 new houses on land at Woodhill Farm will impact the natural and local environment in a prominent hilltop location not far from the boundary of the Kent Downs Area of Outstanding Natural Beauty and Kent's Heritage Coast. It will entirely consume an open field crossed by footpaths frequented by local residents and visitors. Together with other developments in the vicinity, it will cause shrinkage of the green spaces between Kingsdown and Walmer - a valued landscape of undulating downland and sweeping views. NPPF 2021 chapter 15 para 174 a, b and c refer.</p> <p>The development is likely to lead to a significant increase in car traffic, in an area already constrained by narrow approach roads, very limited clearance in the streets of Kingsdown, and very limited bus services. There would be an unacceptable impact on highway safety, and the residual cumulative impacts on the road network would be severe (per NPPF para 111).</p> <p>The development is also likely to cause strain to Kingsdown's already limited supply of fresh water.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Remove the proposal for Woodhill Farm entirely, for the reasons outlined in 7.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>

<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Positively prepared Justified Effective</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>No</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Not Legally compliant - The local plan specifically related to Kingsdown (SAP 34 and SAP 35) and the immediate boundary area (SAP 15 and SAP 53) is not legally compliant with the new and legal Highway Code changes which came into place in January 2022 i.e. after the evidence review and call for sites. The Highway Code states that a car must allow a minimum of 1.5 metres to overtake a cyclist (car travelling at under 30 MPH) or pedestrian (2 metres) when there is no pavement. All of the access roads into Kingsdown and the main roads used within Kingsdown (Upper St, The Rise, Undercliffe) do not allow the Highway code to be followed currently but therefore In the Local plan cannot by definition follow the guidance to be legally compliant or to support sustainable infrastructure (encourage walking and cycling) or to works towards climate neutral. The danger to cyclists and walkers will be enhanced when the A258 is blocked after an accident and traffic is diverted via the Ringwoud Road.</p> <p>Unsound - the local plan is unsound with reference to SAP34 as the Ringwoud Road is already signposted as unsuitable for long vehicles, vehicles over 7.5 tonnes, wide vehicles, narrowing to single lane passing. The proposed SAP34 development would cause dangerous gridlock particularly with the added traffic in summer months.</p> <p>The developments of SAP34, SAP35 and SAP 15 would compromise the 'individual identity of Kingsdown Village' and contradiction to Policy 4 statement.</p> <p>the SAP34 development is unsound on the grounds that it would remove a flood sponge.</p> <p>the Local plan is also unsound in that it has not taken into account reasonable alternatives for Kingsdown or even considered these. There is no mention or even any attempt to assess the number of 2nd (or indeed 3rd, 4th) homes in Kingsdown/Walmer/Deal which are not lived in for most of the year. There is an increasing number of AirBnBs which provide multiple occupants (and multiple cars to travel) for family houses. As there is no attempt to assess these I will provide one road number as an example - Of the 34 houses in North Road, Kingsdown only 7 are lived in as a 1st home. The last house to sell in North/South Road was in the region of £600,000 for a 2nd home. This is in direct contrast to the statement of the local plan (7.11, page 268) 'to support the delivery of rural local needs homes to enable local people to remain in the village where they live or work and not to be forced to move away because of high house prices and high rents'. The plan only allocates 30% of new homes as affordable housing and so there is no demonstration for a local need for more housing. The other 70% of houses being built on greenfield could all be bought as 2nd/3rd/4th homes or run as AirBnBs.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I suggest a review of housing need in specific areas of DDC and build houses in areas of housing need. This need has not been demonstrated in Kingsdown and surrounding areas unless DDC council want an area largely lived in by 2nd home owners.</p> <p>I suggest a 20 MPH limit throughout Kingsdown and the access roads with designated pedestrian and cycling lanes.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34 - Land at Woodhill Farm, Ringwould Road, Kingsdown (KIN002) Point M
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I believe the plan is unsound in the respect that I cannot see that any consideration has been made for the fact that the adjacent highways are not suitable for such a development.</p> <p>In particular There are only three roads which access the site, Ringwould Rd has a 7.5 ton weight limit on it so should not be used by construction traffic. The other two roads are Glen Rd and The Rise. Both these roads are single track roads with passing places and all three roads form the only access to Kingsdown Primary School. All three roads suffer with regular blockages and vehicles having to reverse in order to pass each other which can cause considerable congestion. The local bus service comes up The Rise and proceeds past the School and down The Glen. The bus often gets blocked by vehicles passing in the opposite direction. For example I saw the bus stuck for around 20 minutes on the Glen recently as the person driving in the opposite direction was incapable of reversing to a suitable passing place and by then had traffic backed up all the way to Walmer further preventing their movement. Any additional traffic on these two roads in particular would be dangerous and prove impossible for local residents.</p> <p>Furthermore, I don't believe any consideration has been made for the fact that this lively and active village has a narrow and often impassable road through its centre called Upper St. This is the main access road through the village from Ringwould to Walmer/Deal. This road regularly cannot cope with the existing amount of traffic and gets blocked on a daily basis. Any additional traffic to this road from this development would render it impossible to use for residents and visitors to the Kingsdown Holiday Park at the bottom of this road. I cannot see that any consideration has been made for this knock on effect just a few hundred yards from the development.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance	I don't believe I am qualified to answer this particular part of the development of the plan.

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Dover Local Plan (SAP 34) is totally unsound on the grounds that it is not effective. In comparison with other areas, most of which have been classified as unsuitable, this field is by no means suitable. This area is agricultural farmland, situated behind a Primary school and beside a playpark.</p> <p>This is also a dangerous stretch of road - a recognised black spot. As a resident of Glen Road on the junction to Balmoral Road, I have witnessed first hand the chaos which often ensues, particularly at school drop off and pick up times. There are no pavements on Glen Road and the narrow nature of the road allows for only one car to pass at a time. Currently, traffic pulls onto my driveway to allow other vehicles to pass.</p> <p>The following points have been overlooked:</p>

- Poor bus service. The current bus service is due to be further reduced
- Distance from GP surgeries
- The site is a groundwater source protection zone
- Development of the site has the potential to result in the loss of less than 25% of an open space, sport, recreation facility, open country or registered common land.
- The Primary School is oversubscribed so additional children will need to travel to attend other schools.
- The site is within 200m of a Public Right of Way/Cycle Path.
- The site is not within 2,000m of a secondary school.
- The site is not within 2,000m of further/higher education facilities.
- The site is not within 2,000m of Strategic Employment Sites/Enterprise Zones
- The site is not within 1,200m of a town centre.

Firstly:

Ringwould Rd is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5 tonnes and unsuitable for wide vehicles. The road is painted "SLOW" in 3 places and there are four sections where the road narrows to single lane passing.

The population of Kingsdown, in excess of 2,500 (more in summer months due to the campsite and holiday park), depends on the traffic flowing freely. Therefore, SAP 34 is totally unsound for any development on the grounds of highways inadequacy. Any development would cause dangerous gridlock involving cars of current residents, parents/guardians of children attending Kingsdown Primary School, construction vehicles and new residents' vehicles.

Secondly:

On the grounds of landscape character. I moved to Kingsdown just over a year ago. Having previously lived (for around 30 years) in Walmer, this has always been an iconic sea view that greets people visiting Deal. Any development would COMPLETELY destroy the unique village identity and character. This is a beautiful rural location with a lot of local wildlife including bats, firecrests, goldfinches, greenfinches, great-tits, blue-tits, long-tailed tits, wrens, blackbirds, woodpeckers, robins, dunnocks, sparrows, herons and skylarks, which are now becoming quite rare in the UK. Also, many species of butterflies visit, including humming bird hawk moths and many others. Rural locations need to be protected from development, or all these species will disappear. There is also reported a Saxon burial ground on the propose site.

Thirdly:

On the grounds that the Deal/Walmer conurbation of 30,000 depends on the narrow, single lane in places - Ringwould Road, carrying diverted traffic. Much of the diverted traffic uses Glean Road/Liverpool Road. This would also be a major concern for emergency vehicles.

Fourthly:

On the grounds that it borders the AONB and is valuable arable farmland. This is particularly pertinent when national food security is of concern.

Fifthly:

On the grounds that any development would remove the flood sponge

	<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. <p>2 - Do you consider this part of the Plan sound?</p>	No
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	Positively prepared Justified Consistent with National Policy
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	No

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>No adequate traffic assessment with regard to the impact upon the village or indeed sufficient equalities assessments relating to the junior and aging population of its residents and their safety as they engage within their community. When the Dover Road is at rush hour, exiting the Ringwould road can be difficult. There are two other routes out of Kingsdown - one being Liverpool Road - a single lane Road, which would also provide for the land identified as suitable SAP75; and The Rise, to Upper Street - which already struggles to manage its existing traffic flow at peak times such as school pick up and drop off. These are all narrow or single lane roads with no footpaths in the village - There will be an increased danger to pedestrians with more traffic. There are no footpaths, so pedestrians have to stop to allow cars to pass frequently. With more traffic it would be very difficult to walk anywhere within the village. Particularly on the lower part of The Rise and on Upper street (where the shops are). People do walk in the village not only for exercise but to the shops as there are very few parking spaces. There is already a problem with traffic flow, with cars having to reverse to allow other cars to pass. This creates frequent traffic jams particularly involving the bus - which is an important mode of transport for the elderly and school children. Has there been a discussion with the bus drivers? To ask them how difficult it is already for them to provide the much needed service. The development would have a poor relationship with the existing settlement and would be detrimental in terms of additional vehicles. The proposed access to the Site "Ringwould road" Also is single lane with no footpath with blind bends. The duty of care to the local villagers safety is lacking within this plan.</p> <p>No consultation with BT open-reach to see if there would be adequate broadband available. This is currently a problem in the Village of Kingsdown with intermittent Wifi and particularly difficulty in connecting new customers.</p> <p>Whilst the plan claims to have consulted with Southern water, the proposal that the development link to existing sewers is unsound. There have been examples of the failure of the existing sewer lines in the village, having significant detrimental impact, in addition the storm water drains do not cope with existing run off and additional development will exacerbate this. There appears to be no consideration of these environmental impacts.</p> <p>The determination of the suitability of SAP34 for development is incongruous with the plans own determination of the unsuitability of other considered sites within Kingsdown. KIN06, KIN07. It would seem that the site selection has been based upon a topographical view of the village and fails to consider adequately the impact on the amenity of the village upon entry from the Ringwould road, which is Arable land (currently used year on year for agriculture and pastoral grazing which of itself adds to the amenity of the area bordering an AONB, but also contributing positively to the wellbeing of the Residents who graze their horses and walk to OXNEY Woods or the National Trust Woodland. Whilst the plan refers to the need to provide for trees, given the number of units to this site the likelihood will be dense development with postage stamp gardens deterring the planting of maturing native trees and any planting would require strict application of enforcement for their protection which does not feature.</p> <p>Following the Pandemic, greater appreciation of the need for open green spaces should have been provided for within the plan when considering the Health and Wellbeing of Residents. The Plan presumes the existing green space to be sufficient to accommodate the additional residents that would result from this development without provision for additional provision. The Plan fails to account for the increased demand for parking to access shops in the village or the increased traffic which will result either from the new residents driving through the village (to access Deal) or the noise impact of heavier traffic along the Ringwould and Dover Road.</p> <p>The plan is supposed to have complied with National Policy. The Government has announced its intention to rescind the Requirement of Local Governments to provide for a minimum number of houses.</p> <p>There has been insufficient analysis as to the actual need or demand for the proposed housing development in the area. There are new build properties showing as for sale which were added to Rightmove as long ago as 25.08.2021 (as at 08.12.2022) - some 16 months on the market. And that is based upon a quick search of one website.</p> <p>There has been inadequate consideration of the implications on the infrastructure or the economy of the area</p> <p>The identification of this area as suitable is incongruous with the decision to determine other areas such as KIN06 and KIN07 as unsuitable - the same grounds applying to those areas applying to this.</p> <p>* The development would have a poor relationship to the settlement and not in keeping with the character of the village. It is certainly not a logical extension to the settlement area (nor is SAP35).</p> <p>Where mistakes have been made previously with regard to permitted planning should not and must not be a basis for continued errors. This is one of the very few remaining Historic Villages, with a committed community seeking to preserve its heritage and beauty.</p> <p>The Council undertook a Conservation Area Appraisal of Kingsdown, the very first observation under 1.1 of part 1 of that document noting that Kingsdown is a "small, compact village... that has at its roots a history of both farming and fishing."</p>

	<p>That assessment noted "Section 72 of the 1990 Act specifies that in determining any application for development within the conservation area, special attention shall be had to the desirability of preserving or enhancing the character or appearance of the conservation area."</p> <p>Increased numbers of residents, thus increasing the size of the village and the traffic through the conservation area will contravene this ethos; and it is noted that the Council in recent years EXTENDED the Conservation area, highlighting the importance of Kingsdown's particular character.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>regenerate Dover town centre particularly the wharf to attract an influx of spending from visitors and from the ferry passengers thus providing more jobs. Compulsory purchase the rundown housing stock and regenerate to provide affordable housing and flats to families, which are close to jobs, shops, places to eat and transport hubs. Make Dover a destination and a place to be proud of</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>The Portal and is too difficult to use and the language hard to understand</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Kingsdown is a small village with terrible traffic problems both within the village and with access to the village, especially the road from the Ringwold/A258 junction. This proposed development will increase the amount of traffic in the village and on this road in particular. The Ringwold Road is terribly narrow and hilly — as are all the roads in Kingsdown — and is exceptionally dangerous with very bad visibility on the corners. The proposed access to this site is in a very difficult part of the road and will make an already busy and dangerous road even more so. I most strongly object to this proposal.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I would not have an access road to this development at this place on the Ringwold Road. It will be lethal. Kingsdown gets very busy especially in the summer with huge camper vans trying to access the camp site. We also have a holiday village here which also increases the amount of traffic. Kingsdown just cannot cope with the traffic it already has.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 34, Kin 002
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective

	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Firstly the Highways Assessment of Ringwould Road is inadequate and unsound as regards this site. The facts are that Ringwould Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows to single lane passing. This road is a known accident blackspot that has suffered a recent fatal accident. The access to the site of SAP 34 is just behind the brow of a hill and behind a sharp bend, just as the road narrows to one lane. Having traffic join here seems obviously dangerous. For this reason I believe SAP 34 is non-compliant with all laws / planning regs relating to the prevention of accidents and protection of human life.</p> <p>The selection of SAP 34 is unsound secondly on the grounds of landscape character, being incompatible with criteria described above in SP 4. the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character. DM Policies NE2 (Natural Environment) p.285: It is 'sound' to designate the area inland from Kingsdown, west to Ringwould, Ripple, Sutton, Studdal and Little Mongeham, south to Guston, as LCT F Open Arable Chalk Farmland with Woodland, F3 Ripple. But it is unsound, ineffective and contradictory to then ignore the designation when selecting the dangerously located chalk farmland of SAP 34 for development.</p> <p>The selection of SAP 34 is unsound on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP 15, so development here could contribute to flooding (see CC5 p. Flood Risk).</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object to KIN002 (SAP 34) being included in the draft LDP for the following reasons:</p> <p>The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . . unless (ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'.</p> <p>The following arguments show why this development would have more adverse impacts than benefits and would not be sustainable.</p> <p>Kingsdown is a quiet village which has not developed into a larger settlement because it is isolated by its geography (see my later comments on local centres). Allocated money from developers would not 'improve' the infrastructure of the village as there is no space to provide parking or for widening roads or for improving any other physical infrastructure. The narrow single track roads through the village which are an inherent part of the character and charm of the village are also a limiting factor for the village in terms of further development. The roads in the village are already adorned with parked cars wherever possible, and there are very limited pavements in the village, this means pedestrians are often forced to walk in the middle of the roads and duck in-between cars when traffic approaches. Some parts of the roads have high walls and no pavements which, with current traffic levels, make walking perilous. Any increase in cars trying to park to use services or passing through the village, would be very dangerous. Residents of KIN002 would have to use their cars for almost all of their journeys, creating pollution and congestion.</p> <p>Furthermore, as the UK government have decided on 5/12/22 to stop putting pressure on local authorities to authorise unsustainable housing targets the LDP now needs reviewing in light of the new directives. The Dover District Area has, in recent years, been subject to considerable housing development, higher than that allowed for by the current local plan, and this development has been unsustainably concentrated into certain specific areas, because much of our district is either already overdeveloped, or not suitable for large scale development as it is either designated as an area of outstanding natural beauty (AONB), or it is heritage coast, or it is very low lying and liable to flooding or needed as floodplain.</p> <p>The continued inclusion of SAP34/ KIN002 land at Woodhill Farm, Kingsdown in the LDP is unsound, because, despite many concerns and reasoned arguments from residents the only concession seems to have been to reduce the housing numbers from 90 to 50; Due to the weak wording of the local plan that only suggests what would be 'preferred' by the district council, it is highly likely that the final number of houses would be in excess of 50 and possibly in excess of 90, if the proposal were to go ahead.</p> <p>The site has now been given a green allocation in the HELAA report despite its many issues and the fact that an adequate highways assessment has not yet been carried out and the HELAA highways assessment remains amber. The latest HELAA report states that the many failings can</p>

be mitigated for within the LDP. I argue that this is unsound and not justified nor consistent with National Policy NPPF 21. The evidence from DDC has not been used correctly. NE2 Landscape character and the Kent Downs; states in section 11.13 that DDC aims: *To ensure that all development coming forward over the plan period respects and reflects the character of the landscape in which it is located.* The DDC landscape character assessment of 2020 (LCA) shows that SAP34 / KIN002 falls within Ripple F3, *open chalk farmland and woodland.* **NE2** states; *the classification identifies 17 LCAs and defines issues of landscape management and development management which should be delivered over the plan period.*

Development Management guidelines include:

- Conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB.-Seek to reduce lighting and noise impacts on this landscape and in longer views through sensitive highway design/management. Conserve the distinctive narrow winding lanes and grassy verges.

SAP 34 would not *'conserve the rural character of the landscape'*

SAP 34 would be right next to the AONB so would clearly not *'provide a rural setting for the Kent Downs AONB'*.

SAP 34 would, in direct contravention of the guidelines, increase *'lighting and noise impacts on this landscape'*.

SAP 34 would, in direct contravention of the guidelines, due to the raised setting of the site, negatively affect the rural setting of the AONB on *'longer views'* of this landscape, both looking into and out from the AONB.

SAP 34 would also, according to the HELLA Highways assessment, require the alteration of and therefore not *'conserve the narrow winding lane and grassy verges'* which form the main entrance to and help to define the character of, the quiet village of Kingsdown.

The Development Management guidelines also include:

- Conserve the open skyline, avoiding the introduction of vertical elements such as pylons, telecommunications masts etc.- Protect and enhance views from more elevated areas and from the coast out to sea and towards landmark features such as Walmer Castle.

SAP 34 is in an elevated position so it would not *'Conserve the open skyline'* of this landscape area of open chalk fields with woodland.

SAP 34 is in an elevated position so it would not *'Protect and enhance views from more elevated areas'* of this special landscape area of Ripple F3.

SAP 34 is clearly visible from many viewpoints within both the AONB and the Ripple F3 special landscape area, from along the A258 and the network of footpaths, and from the locally renowned 'Nelsons seat viewpoint'. I contend that it would therefore not *'protect and enhance the views of this landscape'*.

SAP 34 can, as I have mentioned be seen from within the Ripple F3 landscape area, and from certain directions it would be in the foreground of views out to sea, it would therefore not *'Protect and enhance views out to sea'*

SAP 34 has views out to the picturesque Ripple windmill, which I contend is a *'landmark feature'*, therefore this development would contravene the development guidelines, by not protecting nor enhancing views towards *'landmark features'*, which would be lost.

The development of SAP34 would result in the loss of an important buffer between the built environment of Kingsdown and the AONB. Ringwould Rd would lose part of its character and the main entrance to the village would be deprived of its character. Part of the AONB would be lost as would part of the character of the AONB. From within The Ripple F3, views across to Kingsdown and the sea would be negatively impacted and the open character of the landscape would be lost and pollution from light and traffic would increase. The HELAA sustainability appraisal states; *The site has been judged by Council officers to have the potential to moderately affect the District's landscapes, townscapes or seascapes.* I argue that this is not supported by the facts, and is not a fair appraisal of the probable impact of this development, especially when considered in the light of the site forming part of the LCA F3, the proximity to the nationally important AONB and the suggested necessary alterations to the *'distinctive narrow winding lane and verges'* which lead into what is at present a quiet rural village.

NE2 11.19 states *'The setting of the AONB comprises land adjacent to or within close proximity of its boundary, including but not limited to land which is visible from the AONB and from which the AONB can be seen.....Within the setting of the AONBs, priority will be given over other planning considerations to the conservation or enhancement of natural beauty, including landscape, wildlife habitats, tranquillity, dark skies, and geological features'*.

NE2 11.19 clearly and accurately describes the proposed site for SAP34. It is adjacent to and within close proximity of the AONB, it is visible from the AONB and the AONB can be seen from it. By allowing this development to go ahead, *'conservation of natural beauty, including landscape, wildlife habitats, tranquillity and dark skies'* would not have been given *'priority over other planning considerations'* I therefore contend that the development is not sound.

SP13 states that *the NPPF 2021 requires local plan policies to conserve and enhance the natural environment, to recognise the intrinsic character and beauty of the countryside and the wider benefits from natural capital and ecosystems.* Including SAP34 in the LDP is therefore in direct contravention of the NPPF, which means it is unsound as it would detract from the beauty of the countryside particularly the adjacent AONB. The Kent Downs AONB management plan 2021-26 says *the Kent Downs AONB, perhaps more than any other of Britain's protected landscapes – AONBs, Heritage Coasts or National Parks, has experienced and is experiencing severe development pressure.* DEFRA evidence shows *'The Kent Downs AONB stands out as an area which has experienced major change, showing a rate of urban growth of almost 10%.pa, with the urban area spreading by 14 ha over the decade'*. The AONB in Dover District has suffered development at a disproportionate rate which indicates that planning pressures on our district are unsustainable as they are overflowing into this nationally important landscape area. National Planning Practice Guidance (NPPG) confirms that the Duty of Regard is *'relevant in considering development proposals that are situated outside National Park or Area of Outstanding Natural Beauty boundaries, but which might have an impact on the setting of, and implementation of, the statutory purposes of these protected areas'*. I would argue that because the entrance onto Ringwoud Rd requires widening and changing of the road which will encroach into the AONB, to mitigate for it being unsafe, this will be detrimental to the setting and directly upon the AONB.

NPPF 2021 11 – making effective use of land - Planning policies and decisions should: 120 b *recognise that some undeveloped land can perform many functions, such as for wildlife, recreation, flood risk mitigation, cooling/shading, carbon storage or food production.* As food security is such a national issue, including SAP34 for development is unsound and unsustainable as good agricultural land would be better served in producing food. I would add that the local plan talks about sustainability for future generations, but as the UK only produces around half of the food we need domestically, and the world population is growing and with global warming crops around the world are beginning to fail, it is highly likely that in the future we will need all the agricultural land we have to feed ourselves. Developing agricultural land is not sustainable.

Allocated money from the developers would not improve things as there is no space to provide parking in the village or for widening roads or for improving infrastructure. The narrow single track roads through the village which are an inherent part of the character and charm of the village are also a limiting factor for the village in terms of further development. The roads in the village are already adorned with parked cars wherever possible, and there are very limited pavements in the village, this means pedestrians are often forced to walk in the middle of the roads and duck in-between cars when traffic approaches. Any increase in cars trying to park to use services or passing through the village would be very dangerous. Residents of KIN002 would therefore have to use their cars for everything, creating pollution and congestion

Local Centres:

I would argue that the designation of Kingsdown as a local centre is unsound. Due to the nature of its location, with the undeveloped AONB, heritage coast and cliffs to the south, with no roads for access from this direction, the Sea to the east, with no villages, inhabitants nor roads, only Walmer to the north, which is closer to the town of Deal than to Kingsdown, but in any case, itself has better facilities than Kingsdown. To the west there are several small villages, such as East and West Langdon, but they are closer to and have better links to Dover, to the north west are Studdle, Ripple and Mongeham, but they are closer to and have better links to Deal. This leaves the small settlement of Ringwoud, which is close to Kingsdown, but is cut off by the Arterial A258. Ringwoud Road, which joins the two settlements, is steep and narrow in parts and not suitable for occasional cyclists or walkers, so most people would tend to drive between the two villages, however, there is very limited parking and limited facilities in Kingsdown, so even people from Ringwoud are much more likely to frequent Dover, Walmer or Deal for everyday needs or services. All of this probably goes a long way to explain why Kingsdown has never developed wide roads and modern infrastructure.

The high proportion of second homes and Air b and bs in the village demonstrates that dwellings outnumber homes required, so there is not an *'objectively assessed need for housing within the Parish'*. If largescale development were to take place in Kingsdown, it is highly likely that, many of them would become second homes or Air b and bs. Unless houses used for these purposes are owned by local people who already live in the village, which is unlikely, such houses would bring very little to the village. To include SAP34 /KIN002 is therefore unsound and not consistent with NPPF 21.

NPPF 2021, Paragraph 73. b) states that suitable land for development should; *'ensure that their size and location will support a sustainable community, with sufficient access to services and employment opportunities within the development itself (without expecting an unrealistic level of self-containment), or in larger towns to which there is good access;* However SAP34 is unsound because there are extremely limited opportunities for employment within Kingsdown and there is not *'good access'* to larger towns. There is no rail link, the bus service is very limited and reduced since Reg 18, and the roads are narrow and already at certain times, dangerously busy.

NPPF 2021 Paragraph 79, states; *To promote sustainable development in rural areas, 'housing should be located where it will enhance or maintain the vitality of rural communities. Planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. Where there are groups of smaller settlements, development in one village may support services in a village nearby'*. Because as I have outlined, Kingsdown is not at the heart of other rural settlement, the development of SAP34 will not *'enhance or maintain the vitality of rural communities'*.

The HELLA highways assessment commented that the scale of KIN002 was too small to create enough new footfall to improve the bus service, I suggest it would also be insufficient to warrant any other new services either.

I have mentioned that Kingsdown is isolated by distance and due to poor public transport, due to the position of the A258 and due to the narrow roads leading to and from the village. For these reasons, it cannot be said to be part of a '*group of smaller settlements*', where '*development in one village may support services in a village nearby*'. New residents at KIN002 would mostly have to use their cars to visit Dover, Deal or Walmer for services, contributing to Carbon emissions and making the roads more congested and dangerous. For these reasons I believe the KIN002 is unsound and unsustainable.

For all of the above reasons I contend that classifying Kingsdown as a 'village centre' is not justified by the facts. It should be reclassified as a 'larger village', which would mean the only development permitted would be windfall development within the village boundary.

If Kingsdown were to be classified as a larger village, which I have shown is demonstrably appropriate, then there would be strict criteria limiting developments such as KIN002, which would not be allowed to proceed as it is outside the village boundary.

When using the criteria of the draft local plan SAP34 is not sustainable and unsound for the following reasons:

T11 Development should, in so far as its size, characteristic and location -Give priority to the needs of pedestrians, cyclists, users of public transport, car sharers and users of low and ultra-low emission vehicles.

The location and size of SAP34 means it will give priority to car drivers only so it will not be in line with T11. The HELLA appraisal said it will not be large enough to warrant improvement of public transport. It is not on a train route. There are poor footpath routes to the village and only narrow and winding lanes to the village and to local towns. There is a cycle route to Deal along the seafront, but this joins Kingsdown at the other side of the village and the route would probably be too far for most casual cyclists. It is probably too far for people to walk to Deal or Dover in order to use the facilities at these towns. Any attempt to improve the cycling and walking routes to the village would result in loss of the distinctive character of the winding lanes which the 2020 LCA F3 Ripple seeks to preserve.

T12 New accesses and intensified use of existing accesses onto the road network will not be permitted if it would result in a clear risk of crashes or traffic delays unless the proposals can incorporate measures that provide sufficient mitigation. I consider this site to be unsound as there would be an increase in crashes and traffic delays. Widening the junction at the exit would not do anything to improve the narrow dangerous access through Kingsdown village. It would also not improve the access from Ringwould Road onto the very busy A258 at Ringwould. Widening the road at the access point on Ringwould Road, would mean losing part of the Kent Downs AONB and would also effect the character of the winding lane entering the village, which as I have mentioned the 2020 LCA F3 Ripple seeks to preserve. Land either side of Ringwould Road is not owned by the same party as KIN002 and so cannot make up part of this development. Furthermore, any attempt to alter Ringwould Road at any point would also result in the loss of the charming character of the road. The access is also complicated. It is used by visitors to the play area and the landowner to the left as you enter the field from the road. No mention is made in the HELAA highways assessment of the landowner needing access. ER5 also crosses the entrance which would therefore be dangerous to pedestrians crossing from the field back to the village. ER5 is a very busy path used by dog walkers on a daily basis. The sight lines onto Ringwould Road in both direction are poor. Ringwould Rd is very narrow in places and in places, 2 vehicles cannot pass each other. Turning left out of the site would be onto a narrow road going into a 20mph zone. Turning right is in a 50mph zone with a bridleway and footpath crossing with poor visibility and slow tractors turning out onto the road. There has already been an RTC resulting in a fatality and serious injury on Ringwould Rd. I would argue that issues with access alone mean that this site is not suitable and unsound for development. A medium pressure gas main crosses KIN002 diagonally and crosses the road at this access point which would require careful consideration when changing the access. This would cause a lot of disruption to the villagers as this is the only classified road in and out of the village and as poor as it is, is the main route to the A258. If traffic had to divert via Deal this would create extra pollution and congestion for a protracted period of time which would be contrary to SP1 and the climate emergency declaration by DDC.

T13 Applicants must demonstrate that traffic movements to and from the development can be accommodated, resolved, or mitigated to avoid severe cumulative residual impacts.

As I have already pointed out, traffic movements to and from the site would be on to Ringwould Road. This road is narrow, in places steep, in places it has high banks and hedgerows which preclude views along it, it sometimes floods in the dip before the hill towards Ringwould and I have known many winters when it has been impassable because of snow. If cars from the proposed development SAP34 were to turn left onto Ringwould Road they would soon enter the narrow streets of Kingsdown where there are many parked cars and very little pavement for pedestrians. If they were to turn right they would find themselves on the narrow, twisting, steep, liable to flooding and with poor sight lines, high banks and hedges, Ringwould Road. After this they would have to try to get onto the busy, at times extremely busy A258 at Ringwould. Ringwould Road is crossed by an official footpaths, and an official footpath/bridalway, both are on bends where it is difficult for pedestrians and

	<p>horse riders to see what traffic is coming or to be seen by drivers. Pedestrians also use Ringwould Road to access the special needs school and Ringwould Village Hall which are both situated on the road close to the junction with the A258.</p> <p>Any increase in traffic on this Road would be impossible to mitigate for without damaging the character of the 'distinctive winding narrow lane' which the 2020 LCA F3 Ripple seeks to preserve.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>SAP34 should not be included in the LDP.</p> <p>DDC should now reconsider the housing allocation targets in light of the government announcement of 5/12/22, particularly with respect to rural settlements.</p>

<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>No</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>SAP 34 Kingsdown The selection of SAP 34 is totally unsound, on 5 different grounds. Firstly the Highways Assessment of Ringwoud Road is inadequate and unsound as regards this site. The facts are that Ringwoud Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes and unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows to single lane passing. The 1400 voters in Kingsdown village (population 2000 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwoud Road traffic flowing freely. So the selection of SAP 34 for any development is unsound firstly on the grounds of highways assessment unsoundness / inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. It is a disgrace that KCC for years have refused to listen to requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwoud Road. The economy of the village depends on visitors and residents walking, cycling and horse-riding on the Ringwoud Road and any development of SAP 34 would increase the likelihood of fatalities exponentially.</p> <p>The selection of SAP 34 is unsound secondly on the grounds of landscape character, being incompatible with criteria described above in SP 4. the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character.</p> <p>The selection of SAP 34 is unsound thirdly on the grounds that the Deal / Walmer conurbation of 30,000 depends on the narrow – single lane in places - Ringwoud Rd, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. The A258 is the only southern entrance to the 30,000 conurbation starting in Upper Walmer stretching to North Deal and Sholden. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Rd / Liverpool road selected as site for SAP 15 Ray's Bottom in Walmer. This site too, if developed is likely to mean diverted traffic cannot get in / out of Deal /Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. Unsound due to being incompatible with SP12, because its lanes periodically become part of the district Strategic Transport Infrastructure. Selection of these sites is completely unsound and non-compliant with all laws / planning regs relating to the prevention of accidents and protection of human life. SAP 34 would result in <i>'Traffic movements from the development resulting in severe impacts to the highway network that it would not be possible to mitigate'</i>, and as such contrary to SP4 2 j within the plan, thus unsound and highly ineffective.</p> <p>The selection of SAP 34 is unsound fourthly on the grounds that it borders the AONB and is valuable arable farmland, needed in times when national food security is of concern. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch / and Freedown woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwoud w/ Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital within the boundary of the AONB to be protected on the boundary of this site.</p> <p>The selection of SAP 34 is unsound fifthly on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP 15, so development here could contribute to flooding . (FYI we have seen an RTA fatality, and many near misses, in this dip on the Ringwoud Rd).</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The current plan is not compliant or sound. The scale of the development is unacceptably and impossible to implement without infringement of current agreed parameters. A development of this scale will literally destroy the identity of our village and make the roads a misery for all those who have to use them. We will become part of a sprawl of housing. I object to development on green sites completely. Why not build new housing on existing brown field sites in the area of which there are many.</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I consider the inclusion of site SAP34 within the Dover Local Plan is unsound because it:</p> <ul style="list-style-type: none"> - fails to comply with the National Planning Policy Framework (NPPF) - contravenes Dover District Council's strategic policies - contravenes the advice in Dover District Council's Landscape Character Assessment for Dover District. <p>The inclusion of site SAP34 is not consistent with the national policy enabling the delivery of sustainable development in accordance with the policies in the NPPF. In particular it is in contravention of the following paragraphs: 70, 92, 93, 104, 105, 110, 111.</p> <p>Development at this site represents a significant move away from the policy of promoting sustainable transport. The scale, location and density of development proposed is unsound on highways grounds, representing an unacceptable cumulative impact on highway safety, and the residual</p>

impacts on the road network would be severe. Ringwoud Road is signposted as unsuitable for long vehicles, vehicles over 7.5 tonnes, and wide vehicles, further the road is painted SLOW in three places, despite the 50mph signs, and there are four sections where the road narrows to single lane passing. The road already struggles to cope with the additional traffic use with a) access to the holiday village, campsite and golf course and b) the road is used as an alternative route for traffic diverted from the A258, causing significant safety issues on Ringwoud Road, The Rise and Glen Road. Any additional traffic will cause gridlock. A fatal road traffic accident occurred on Ringwoud Road in recent years, and the proposal to introduce further traffic to the road represents unacceptable cumulative impact.

The inclusion of site SAP34 is unsound because it contravenes Dover District Council's Strategic Policies in particular:

- SP2. Development at the site will have an adverse effect upon the existing community with a deterioration in existing open spaces, air quality, water maintenance and an increase in traffic.
- SP4. The scale of the development is not appropriate to the size of the settlement and existing facilities, would harm green spaces, would result in the loss of agricultural land
- SP13 and SP14. Development at the site will have an adverse effect upon the landscape and natural environment. The site borders an AONB and is in close proximity to the Dover to Kingsdown cliffs SAC and site of SSI. Further the site is on the skyline with sea beyond, and any development will have a detrimental effect upon the intrinsic character of the landscape.

Development at the site contravenes the advice in Dover District Council's Landscape Character Assessment for Dover District, in particular the advice on landscape management and development as set out on page 118 of the document.

The inclusion of site SAP 34 is unsound on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station.

I consider the inclusion of site SAP34 fails to comply with the duty to co-operate because it does not respect the needs and safety of the local community; it is detrimental to the needs and safety of the local community by increasing the risk of road traffic accidents and of flooding, reducing air quality, and deteriorating the natural environment.

NPPF 2021 item 11 states in (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'. The inclusion of SAP34 within the plan is unsound because it does not objectively address the need for housing. The adverse impact on the already overloaded local infrastructure and would be detrimental to the small village of Kingsdown and adjacent areas of natural beauty.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Removal of SAP34 from the plan

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This area is within Open Arable Chalk Farmland with Woodland. Proximity of this site to the boundary of the AONB requires it to be kept as a buffer between the existing built environment and open countryside in order that the special character of the area is maintained.</p> <p>The village has lots of character, includes a conservation area, has narrow roads, a small school, limited amenities such as no medical services, limited bus service, recently reduced, no immediate access to rail services and therefore very dependent on car use. This results in frequent congestion in the village. There are limited footpaths in the village, unlit so access becomes increasingly dependent on motor transport.</p> <p>The site is opposite the AONB where there is normally pedestrian access for health and wellbeing.</p> <p>The proposal would result in the loss of agricultural land, recently becoming a topic of concern as continuity of food supply is threatened. Access is compromised and becomes dangerous on an already difficult road.</p> <p>This village has narrow roads which are already congested and at times blocked, as heavy vehicles try to gain access.</p> <p>My question is why there is a proposal for development here when it is within the zone of influence of both an SSI and AONB.</p> <p>The elevated views from routes to and from Wood Hill cannot be mitigated against with planting alone. Sensitive view points are 25m above the site from both the lynch and the woods. A screen of planting cannot satisfactorily mitigate the impact on these sensitive views from a nationally important designated sites.</p> <p>I think the access is also a major issue. The Ringwould road is not suitable for pedestrians and cyclists - unsafe for both modes given the bend in the road on the approach to the village and lack of forward visibility. With no pavement there is no safe active travel route to the village, and therefore the entire development will be based on car travel, and is therefore unsustainable.</p>

	<p>It is not suitable to redesign/ provide offsite 'improvements' - lights/tarmac etc to pedestrian path through the trees as it is an important bat corridor (must remain dark) and important ecological corridor (that makes a strategic green link to the green corridor at Knights bottom and along the Glen)</p> <p>Moreover, the access to the site will require tree/hedge/scrub removal and impede movement of wildlife from the Butts ecological zone and the woodland to the west of the site.</p> <p>With regards to site access, given the high banks and bend in the road, the junction is poorly located, particularly given the speed of peoples approach from the A 258 and the width of the carriageway.</p> <p>I would also question the principle of development in Kingsdown to this scale as there is no public transport or jobs/services in the village. It will change the character of the village- rural, historic, coastal village etc, particularly when viewed from the special zones that they have identified.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I am writing to you reference the new Local Plan and two large proposed developments in Kingsdown. I believe these to be totally inappropriate. Our village infrastructure is woefully inadequate to support such developments. Kingsdown already has traffic problems and the local primary school is full to the brim. The cancelling of local buses for school and public will add to the problem. The disruption caused by these developments, particularly building materials and heavy plant deliveries, will be intolerable. The muck away will cause major problems on the narrow county lanes. From what I have seen this plan has not been thought through. No infrastructure conditions been given on planning. Like new schools, doctor surgery, and access roads.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . . unless (ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'. SAP 34 Kingsdown p. 163: The selection of SAP 34 is totally unsound, on 5 different grounds.. Firstly the Highways Assessment of Ringwoud Road is inadequate and unsound as regards this site. The facts are that Ringwoud Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows to single lane passing. The 1400 voters in Kingsdown village (population 2000 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwoud Road traffic flowing freely. So the selection of SAP 34 for any development is unsound firstly on the grounds of highways assessment unsoundness / inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. It is a disgrace that KCC for years have refused to listen to requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwoud Road. The economy of the village depends on visitors and residents walking, cycling and horse-riding on the Ringwoud Road and any development of SAP 34 would increase the likelihood of fatalities exponentially.</p> <p>The selection of SAP 34 is unsound secondly on the grounds of landscape character, being incompatible with criteria described above in SP 4. the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character. DM Policies NE2 (Natural Environment) p.285: It is 'sound' to designate the area inland from Kingsdown, west to Ringwoud, Ripple, Sutton, Studdal and Little Mongeham, south to Guston, as LCT F Open Arable Chalk Farmland with Woodland, F3 Ripple. But it is unsound, ineffective and contradictory to then ignore the designation when selecting the dangerously located chalk farmland of SAP 34 for development.</p> <p>The selection of SAP 34 is unsound thirdly on the grounds that the Deal / Walmer conurbation of 30,000 depends on the narrow – single lane in places - Ringwoud Rd, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. The A258 is the only southern entrance to the 30,000 conurbation starting in Upper Walmer stretching to North Deal and Sholden. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Rd / Liverpool road selected as site for SAP 15 Ray's Bottom in Walmer. This site too, if developed is likely to mean diverted traffic cannot get in / out of Deal /Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. Unsound due to being incompatible with SP12, because its lanes periodically become part of the district Strategic Transport Infrastructure. Selection of these sites is completely unsound and non-compliant with all laws / planning regs relating to the prevention of accidents and protection of human life. SAP 34 would result in 'Traffic movements from the development resulting in severe impacts to the highway network that it would not be possible to mitigate', and as such contrary to SP4 2 j within the plan, thus unsound and highly ineffective.</p> <p>The selection of SAP 34 is unsound fourthly on the grounds that it borders the AONB and is valuable arable farmland, needed in times when national food security is of concern. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch / and Freedown woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwoud w/ Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital within the boundary of the AONB to be protected on the boundary of this site. The selection of SAP 34 is unsound fifthly on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP 15, so development here could contribute to flooding (see CC5 p. Flood Risk).</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	I object to this proposal on the grounds of traffic congestion, the ringwold road is narrow with pinch points (very bad on the rise and chalk hill road) and increased traffic will just worsen congestion that already causes queues and delays. This is a major problem if emergency and essential services need reasonable access. there is nat an option to widen the road as it would mean using land allocated to AONB. There is also no footpath and increased traffic will endanger pedestrians. This is also a protection zone for the aquifer. The public transport is not adequate at

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	present and the service will not cope with the increase in demand and there will be no increase in services. Other services such as schools will be under increased pressure and can barely cope at present. There is also a lack of shops in kingsdown which will increase traffic in and out of thr village. I see there is no plan for cycle paths so increased traffic will endanger cyclists.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Planning policies and decisions should contribute to and enhance the natural and local environment.</p> <p>The proposed site is next to an Area of Outstanding Natural Beauty and any development would have a detrimental effect on the surrounding area. Mature hedgerows would be torn down destroying habitats for wildlife which makes the area such a special place. In the case of the policy SAP35 Skylarks currently nest at the site of the proposed development and in a species who's habitat is already at risk any further loss would be a disaster.</p> <p>The development of 50 new homes is unlikely to improve local environmental conditions. It is likely to bring an extra 100 plus cars into the village. Ringwold Road is completely unsuitable to cope with this extra traffic. It is extremely narrow and has no footpaths for pedestrians or cyclists nor is there any space for these to be added. Added to the existing village, school, campsite and holiday park traffic, the already struggling village roads would cease to cope. The situation would be made even worse if the proposed development of 75 houses SAP15 were to go ahead.</p> <p>Kingsdown is a small village and does not have the infrastructure to support such developments.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I consider the SAP34/KIN002 site to be an unsound choice for a development of 50 houses because:</p> <p><u>Traffic</u> Traffic dangers make site SAP34 unsuitable for a development of 50 houses. There is only one access point onto this field from the Ringwold road, which is a dangerous stretch of road and an accident black-spot. However, there should be more to a highways assessment than simply just the entrance/exit to the proposed development site and the nearby junction onto the Dover Road (which has weight and size limits). Kingsdown is a small country village set at the top of a hill. The 3 main roads leading up into the village are all narrow country lanes which wind uphill. Not just the Ringwold road, but ALL of these country lanes would be affected by the increased amount of traffic that a development of 50 more houses would bring to the top of Kingsdown. These roads are mostly only wide enough for one car to pass at a time, and not suitable for large volumes of traffic. Even now there are often hold-ups on the hills.</p> <p>When the Dover road is closed between Ringwold and Deal the traffic from that road is diverted through Kingsdown using the country lanes which causes havoc when it happens leading to concerns from the Emergency Services about access. And of course Building work itself would generate noise and increased traffic volume with large vehicles and dust, putting extra strain on the country lanes.</p> <p>I do not feel that enough consideration has been given to the existing road structure in Kingsdown and so I consider that the Highways Assessment for SAP34 is unsound and inadequate.</p> <p>No footpaths for pedestrians.</p> <p><u>Greenfield site used for agriculture</u> Real sustainability - This field is currently farmland used for agriculture. In the wake of Brexit this country should be producing as much of its own food as possible, so all local farmland should be kept as such to provide food for our local population in a sustainable fashion. We are constantly hearing on the TV News that farmland is much needed for agriculture, in particular there is a shortage of wheat that used to come from Ukraine – this field was used to grow wheat in 2021 and can be again – it would be very short-sighted to allow any change of use to building development on this land.</p> <p><u>Infrastructure</u> Kingsdown is a small rural village, with only one small general village shop/post office and a butcher, but no doctors or dentists or any of the other infrastructure needed for a large population. The village school is already oversubscribed. Local bus services are being cut back. It is a historic village with no room for expansion for large volumes of traffic or people beyond the current inhabitants and holiday visitors. Water supply may also be stressed if serving more people.</p> <p><u>AONB</u> I looked up the Kent Downs Area of Outstanding Natural Beauty (AONB) online (a satellite image) and from what I could see it looks as if this AONB runs right up to the Ringwold road – literally across the lane from SAP34 Kingsdown site. It is also near to a SSSI, thus local flora & fauna, hedgerows and habitats need to be protected – bats, birds, trees, flowers so that the character of the surrounding countryside and biodiversity is protected. I noticed a comment that “the developer” is already working with the Highways Agency and may be able to obtain land over the other side of the road to improve access – is he jumping the gun? If the land talked about on the opposite side of the Ringwold road from the proposed entrance/exit is in the AONB would he be allowed to use it? I believe there are rules about building on land that is this close to an AONB. Also governing how the local views would impact the AONB. This proposed development would be clearly visible and impossible to hide from nearby roads and fields.</p> <p><u>Biodiversity</u> SAP34 in Kingsdown is a beautiful rural location with a lot of local wildlife. I have often heard skylarks overhead which are now becoming quite rare in the UK, and also seen a firecrest and often buzzards. I also have many birds, nearly all of which are declining in numbers in the UK, regularly visiting my garden, including woodpeckers, goldfinches, greenfinch, blue tit, long-tailed tit, great tit, wren, robin and a heron as well as</p>

the more common pigeons, collared doves, seagulls, sparrows, dunnocks and blackbirds. Also many species of butterflies visit, including humming bird hawk moths and many others. Rural locations need to be protected from development, or all these species will disappear. This field is a much-valued local green space where many village people walk their dogs and take exercise.

Historical site

Possible Saxon Burial Ground in this field which should be investigated.

Housing need

There is not a need for housing in Kingsdown Village as evidenced by the number of 2nd homes and Airbnb properties in the village. You have only to drive round Walmer, Sholden and areas all over Deal to see how much housing development has already taken place in this district and how much is STILL being built. More is simply not needed in Kingsdown and SAP34 is the wrong place for it.

Not justified - I consider that the best approach when considered against reasonable alternatives is to remove site SAP34/KIN002 from this Local Plan. It would certainly be the best thing for Kingsdown Village. This is a beautiful rural location which should be protected from development and in my view should be made part of the nearby Area of Outstanding Natural Beauty.

Kingsdown is happy as a village and does not want to be a sprawling metropolis with motorways coming into it. There is the potential for a development of this size (50 houses in SAP34) and the traffic associated with it to cause great harm to our village and its identity. If more houses are needed they should be placed near a larger main road which can cope more easily with the traffic generated, or, better still, in a larger town where there would be better public transport links and infrastructure. Kingsdown Village can then be preserved and retain its identity, charm, beauty and character. Therefore I consider the selection of SAP34 Kingsdown as a site for development is unsound.

Legal Compliance

The section on Legal Compliance talks about the involvement of the local community in the preparation and revision of the Plan. The one comment from everyone is how difficult this has been made. The online Consultation Portal caused problems for quite a few people during the first round of consultation a couple of years ago, but at that stage it was possible for people to send written comments in their own words by email or post which was helpful. This second round of consultation (Reg 19) has caused even more problems with its restrictive format of having to answer certain questions on a specific form and needing definitions which has caused even more upset and confusion, particularly among elderly residents and has meant that some have been unable to comment on the revision of the plan which has made them feel that their views are not being listened to. Future consultations should be simpler and more flexible and genuinely take everyone's comments into account. Re the KIN002/SAP34 site I have heard said many times "no-one in Kingsdown wants this development" – this view should be taken into account and not just dismissed out of hand by the powers that be.

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? <p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Having lived in Kingsdown for 17 or more years I am totally against any major housing development here. Although I realise there is a need for more homes nationally, I feel that Kingsdown is totally unsuitable for this purpose for a number of reasons.</p> <p>This pretty village has limited access by road, which can be illustrated at the present time by the congestion caused by cars arriving to drop off and pick up of children too and from the local primary school.</p> <p>The village itself has mainly narrow winding approach roads, with the main high street (Upper Street) having limited parking places, which would be made worse by the addition of a large housing development.</p> <p>A development of this nature would potentially destroy Kingsdown as we now know it.</p> <p>The logistics of houses being built here would involve better public transport, improved roads especially the A258 and many other considerations. On the assumption that most of the properties would be purchased by people of working age, and in all probabilities would need to travel to London. As Kingsdown is some way from the railway station, which has limited parking, and also poor access roads to the A2/ A20 this would also make for an unsuitable choice for this development.</p> <p>Since I have lived here, past developments in the surrounding area do not seem to have been given sufficient thought before being agreed, Burlington House next to County Hotel, and The White Cliffs Experience are two examples which come to mind.</p> <p>The beauty of this area of Kent is its coast line and coastal villages such as Kingsdown, St Margarets, and Capel-le Ferne, with Deal, Dover and Folkestone adding additional character.</p> <p>Please look again and not include Kingsdown in the DDC Development Plan and help preserve the character of this village for the future.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The selection of SAP 34 is totally unsound, The Highways Assessment of Ringwoud Road is inadequate. The facts are that Ringwoud Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes and unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows to single lane passing. The 1400 voters in Kingsdown village (population 2000 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwoud road traffic flowing freely. We have seen an RTA fatality on the road, and many near misses. It is a disgrace that KCC for years have refused to listen to requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwoud Road. The economy of the village depends on visitors walking, cycling and horse-riding on the Ringwoud Road and any development of SAP 34 would increase the likelihood of fatalities exponentially.</p> <p>The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'.</p> <p>Any development at SAP 34 is unsound firstly on the grounds of highways inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. Secondly The selection of SAP 34 is unsound on the grounds that the Deal / Walmer conurbation of 30,000 depends on the narrow – single lane in places - Ringwoud road, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. It is part of the transport infrastructure of the whole district. The A258 is the only southern entrance to the 30,000 conurbation starting in Upper Walmer. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Rd / Liverpool road selected as site for SAP 15 Ray's Bottom in Walmer, this site too if developed is likely to mean diverted traffic cannot get in / out of Deal / Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. Thirdly on the grounds of landscape character, the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character and falls within LCT F3, Open Arable Chalk farmland with woodland, needed for national food security. The selection of SAP 34 is unsound fourthly on the grounds that it borders the AONB. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch / and Freedown woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwoud w/ Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital to be protected on the boundary of this site. The selection of SAP 34 is unsound fifthly on the grounds that any development would remove a</p>

	flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP 15, so development here could contribute to flooding (see CC5). (cross referenced SAP 15 Walmer Rays Bottom).
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>DDC Note (1) The text below is an extract from the original representation which is attached to SDLP1438.</p> <p>SAP 34 & 35 Kingsdown</p> <p>The selection of SAP 34 is totally unsound, The Highways Assessment of Ringwould Road is inadequate. The facts are that Ringwould Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes and unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows to single lane passing. The 1400 voters in Kingsdown village (population 2000 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwould road traffic flowing freely. We have seen an RTA fatality on the road, and many near misses. It is a disgrace that KCC for years have refused to listen to requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwould Road. The economy of the village depends on visitors walking, cycling and horse-riding on the Ringwould Road and any development of SAP 34 would increase the likelihood of fatalities exponentially.</p> <p>The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'.</p> <p>Any development at SAP 34 is unsound firstly on the grounds of highways inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. Secondly The selection of SAP 34 is unsound on the grounds that the Deal / Walmer conurbation of 30,000 depends on the narrow – single lane in places - Ringwould road, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. It is part of the transport infrastructure of the whole district. The A258 is the only southern entrance to the 30,000-conurbation starting in Upper Walmer. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Rd / Liverpool Road selected as site for SAP 15 Ray's Bottom in Walmer, this site too if developed is likely to mean diverted traffic cannot get in / out of Deal / Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. Thirdly on the grounds of landscape character, the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character and falls within LCT F3, Open Arable Chalk farmland with woodland, needed for national food security. The selection of SAP 34 is unsound fourthly on the grounds that it borders the AONB. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch / and Freedown woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwould w/ Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital to be protected on the boundary of this site. The selection of SAP 34 is unsound fifthly on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP 15, so development here could contribute to flooding (see CC5). (cross referenced SAP 15 Walmer Rays Bottom).</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note</p>	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SAP34 & SAP35</p> <p>After careful consideration of the Local Plan (LP) and on hearing comments from the residents in both Ringwould and Kingsdown it is considered by the PC that the LP is unsafe.</p> <p>The village of Kingsdown is a small village of mainly small properties, it has an Article 4 on some areas of the village, some areas are in a conservation zone, and some of the village is also in an AONB.</p> <p>Yes, there is a small shop and a butcher, along with a small school, however there are no medical facilities and all health care requirements will only be accessed by private transport; this is not sustainable.</p> <p>The roads are narrow and there is no space for any mitigation to take place to alleviate this, therefore this will be contrary to any Traffic management within the Plan and the HELAA highways assessment has stated that it does not see an increase in any public transport; in fact, in recent weeks the PC have been notified of a reduction/removal of public transport. Again unsustainable, and the road from Kingsdown to the A258 is narrow, with local agricultural use of large tractors and trailers.</p> <p>The public realm would be severely affected, by unsafe roads, unsafe bridleways & PROWs and loss of open space. There appears to have been no assessments of the fauna or flora loss that would occur if the development was in the plan.</p> <p>Both sites are outside the village settlement and should be removed from the plan.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	That both sites are removed from the Local Plan

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	I object to development of 50 new houses on the field between Glen Rd and Ringwould Rd Kin002/SAP34. Before one more house in Kingsdown is even considered the infrastructure must be improved by KCC and Southern Water, The highway from the A258 Deal to Dover including the junction must be improved. Currently the Ringwould Rd has 50 mPH speed limit. No grass verge. The narrow road only just wide enough for two small cars to pass is flanked by high overgrown hedges and high banks. To add construction traffic and materials delivery lorries to the

<p>possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>existing traffic without widening and straightening the Ringwould Rd would cause the Rd to be even more dangerous than it is now. The Road should be widened right through to the junction with Upper Street which should be improved as it is almost blind. The increased use by towed caravans and campervans of the junction en route too and from the Kingsdown International Camp and Caravan Centre makes this junction very dangerous.</p> <p>It is a traffic offence to drive across a registered footpath. The Footpath ER 23 is currently flanked by posts to prevent cars being parked on it. The footpath requires to be re routed. An adopted highway running through the 50 houses to the lane beside Glendale Lodge requires to be built before the 50 houses. The junction with Glen Rd must be improved and Glen Rd and Liverpool road all requires to be widened by KCC and sewers laid prior to one house being built. the new road from behind Glendale Lodge to the Ringwould Rd should be the new access route for all school traffic. There should be a large car park for dropping off and collection of children for school and parking for the play park and the developer should have to provide a new village hall and landscape the Butts leading from Glen Rd because the Parish Council refuse to do it. The village hall with up to date refreshment facilities should be built before the houses, enabling the toilets to be used by the builders.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am a resident of Kingsdown. My concern is with the consequences of the housing developments at Woodhill Farm (SAP 34 - 50 dwellings) and Courtlands (SAP 35 - 5 dwellings), also adjacent developments at Ringwoud Alpines (SAP 53 - 10 dwellings) and at Rays Bottom, Walmer (SAP 15 - 75 dwellings). These are connected by Ringwoud Road between Kingsdown and Ringwoud, by Glen Road between Kingsdown and Walmer (inland) and by Kingsdown Road between Kingsdown and Walmer (along the seafront). The first two, in particular, are narrow roads with inadequate width at many/most locations for passing traffic. Kingsdown Road is less restrictive. The number of dwellings will inevitably lead to increased car usage for Kingsdown village access, for school access, for work/employment access, for shopping and for general leisure access. There is no meaningful bus service to accommodate all these needs. Kingsdown Primary School will likely be the primary school of choice for the developments I have noted, putting particular strain on these roads. Children at secondary school (and those attending primary schools elsewhere) will all need to use these roads to move out of the referenced development areas. The whole village road network is generally narrow and unsuited for heavy traffic volumes. When discussing these aspects with DDC Planning representatives at the Deal open-day for the Plan, I was advised that the plan does not address these transport needs (and I have not found any text to contradict them.)</p> <p>My main comment therefore is that a full traffic analysis must be made to ensure adequate provision for the daily needs of the developments. Access for construction traffic will be an immediate concern. While not directly related to the quoted paragraphs of the Infrastructure Plan, the village primary school is probably too small to accommodate the likely increase in demand. Road access around it does fall within the reference and is similarly restrictive already. Additionally, for Ringwoud Road between Kingsdown and Ringwoud there should be pavement(s) (or alternative footpaths) to provide a safe pedestrian route to access the main bus route along the A258 (the Dover-Deal road). The current road is unsafe for pedestrians and cyclists. The junction of Ringwoud Road with the A258 will need to be enhanced to accommodate the increased traffic. Similar safe access will be required for Glen Road.</p> <p>It is not clear to me how the narrow road network in Kingsdown can be modified to suit an increased volume of traffic. This might in itself be good reason to object to the developments, but a more positive attitude by the planners and developers is surely required?</p>

	<i>(DDC note: This representation was originally made against the Infrastructure Delivery Plan consultation document but has been duplicated in relevant places against the Local Plan due to the specific site allocation references made)</i>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 4 - Do you consider the Local Plan is Legally Compliant?*	No

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Not Applicable</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>To whom it may concern, (Without prejudice)</p> <p>I would like to object to SAP 34 for the reasons as specified below. These reasons also apply to SAP 35, 53 and 15 .</p> <p>The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii ‘SPs should provide for objectively assessed needs for housing & other uses, . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole’. SAP 34 Kingsdown p. 163: The selection of SAP 34 is totally unsound, on 5 different grounds,.</p> <p>Firstly the Highways Assessment of Ringwould Road is inadequate and unsound as regards this site. The facts are that Ringwould Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows to single lane passing. The 1400 voters in Kingsdown village (population 2000 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwould Road traffic flowing freely. So the selection of SAP 34 for any development is unsound firstly on the grounds of highways assessment unsoundness / inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents’ cars. It is a disgrace that KCC for years have refused to listen to requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwould Road. The economy of the village depends on visitors and residents walking, cycling and horse-riding on the Ringwould Road and any development of SAP 34 would increase the likelihood of fatalities exponentially.</p> <p>The selection of SAP 34 is unsound secondly on the grounds of landscape character, being incompatible with criteria described above in SP 4. the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character. DM Policies NE2 (Natural Environment) p.285: It is ‘sound’ to designate the area inland from Kingsdown, west to Ringwould, Ripple, Sutton, Studdal and Little Mongeham, south to Guston, as LCT F Open Arable Chalk Farmland with Woodland, F3 Ripple. But it is unsound, ineffective and contradictory to then ignore the designation when selecting the dangerously located chalk farmland of SAP 34 for development.</p> <p>The selection of SAP 34 is unsound thirdly on the grounds that the Deal / Walmer conurbation of 30,000 depends on the narrow – single lane in places - Ringwould Rd, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. The A258 is the only southern entrance to the 30,000 conurbation starting in Upper Walmer stretching to North Deal and Sholden. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Rd / Liverpool road selected as site for SAP 15 Ray’s Bottom in Walmer. This site too, if developed is likely to mean diverted traffic cannot get in / out of Deal /Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. Unsound due to being incompatible with SP12, because its lanes periodically become part of the district Strategic Transport Infrastructure. Selection of these sites is completely unsound and non-compliant with all laws / planning regs relating to the prevention of accidents and protection of human life. SAP 34 would result in ‘Traffic movements from the development resulting in severe impacts to the highway network that it would not be possible to mitigate’, and as such contrary to SP4 2 j within the plan, thus unsound and highly ineffective.</p> <p>The selection of SAP 34 is unsound fourthly on the grounds that it borders the AONB and is valuable arable farmland, needed in times when national food security is of concern. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch / and Freedown woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwould w/ Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital within the boundary of the AONB to be protected on the boundary of this site.</p> <p>The selection of SAP 34 is unsound fifthly on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight’s Bottom pumping station and pond which drains towards Rays’ Bottom SAP 15, so development here could contribute to flooding (see CC5 p. Flood Risk).</p> <p>Any development of SAP 34 is not legally compliant with emerging government policy, see Mr Sunak statement 5 Dec 2022 announcing dropping of compulsory housing targets for LPAs (Local Planning Authorities such as DDC)’. I would also like to object to SAP 35, 53 and 15 for the same reasons as above.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant</p>	

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC Note: The text below was extracted from the attached representation The inclusion of SAP 34 and SAP 15 especially, (but also SAP 53 and SAP 35) is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'. Also it is not compliant with the

emerging govt policy announced 5 Dec 2022 by Mr Sunak on stopping compulsory housing targets on LPAs, and empowering LPAs to decide on local needs.

DM Policies NE2 (Natural Environment) p.285: It is sound to designate the area inland from Kingsdown, west to Ringwould, Ripple, Sutton, Studdal and Little Mongeham, south to Guston, as **LCT F Open Arable Chalk Farmland with Woodland, F3 Ripple**. But it is unsound, ineffective and contradictory to then ignore the designation when selecting the dangerously located, chalk farmland of SAP 34 for development.

It is unsound and ineffective to a damaging extent, to list Kingsdown as being a '*Local Centre ; a village providing services for a local rural area and a secondary focus for development in the rural area*'. Any development at SAP 34 would do the opposite of 'reinforcing the role of the village'; it would in fact choke off the existing parish economy, reducing its attractiveness to tourists, a key location on the Deal Welcomes Walkers initiative. The number of 2nd homes and airB&B in the village proves that dwellings outnumber homes required, so there is NOT an 'objectively assessed need for housing a la NPPF 11' within the Parish'. (Gladman did a landgrab in 2017 in the parish 17/00487 An application rejected by DDC that Gladman took to Planning Inspectorate and won. Currently being built by Taylor Wimpey on A258 as 85 executive homes on land opposition 423-459 Dover Road to the endangerment of all road users of arterial A258 with refusal to put in pavements).

SAP 34 Kingsdown p. 163: The selection of SAP 34 is totally unsound and not legally compliant on 5 different grounds.

- 1 The selection of SAP 34 is unsound on the grounds that the Deal / Walmer conurbation of 30,000 depends on the narrow, single lane in places, Ringwould Rd, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. The A258 is the only southern entrance to the 30,000 conurbation starting in Upper Walmer stretching to North Deal and Sholden. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Rd / Liverpool road (selected as site for SAP 15 Ray's Bottom in Walmer). This site too, if developed is likely to mean diverted traffic cannot get in / out of Deal /Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. So Unsound due to being incompatible with SP12, because its lanes periodically become part of the district Strategic Transport Infrastructure. Selection of these sites is completely unsound and non-compliant with all laws / planning regs relating to the prevention of accidents and protection of human life. SAP 34 would result in '*Traffic movements from the development resulting in severe impacts to the highway network that it would not be possible to mitigate*', and as such contrary to **SP4 2 j** within the plan, thus unsound and highly ineffective.
- 2 Local village traffic; the Highways Assessment of Ringwould Road is inadequate and unsound as regards this site. The facts are that Ringwould Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes, unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows and bends to single lane passing. The 1400 voters in Kingsdown village (population 2000 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwould Road traffic flowing freely. So the selection of SAP 34 for any development is unsound on the grounds of highways assessment unsoundness / inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. It is a disgrace that KCC for years have refused to listen to requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwould Road. The economy of the village depends on visitors and residents walking, cycling and horse-riding on the Ringwould Road and any development of SAP 34 would increase the likelihood of fatalities exponentially.
- 3 Landscape character, being incompatible with criteria described above in SP 4. the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character.
- 4 Borders the AONB and is valuable arable farmland, needed in times when national food security is of concern. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch / and Freedown woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwould w/ Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital within the boundary of the AONB to be protected on the boundary of this site.
- 5 Flood Risk DM-CC5 . Any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP 15, so development here could contribute to flooding along the biodiverse, valley bottom from Ringwould Road to junction of Gram's Road/ Liverpool Rd (FYI we have seen an RTA fatality, and many near misses, in the sometimes flooded dip on the Ringwould Rd).

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will

make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP34 not legally compliant with NPPF 20-21 item 11 DM policies NE2 (natural environment) P285 The chalk farmland of SAP34 is unsound/unsuitable for development. SAP34 is unsound on the grounds of landscape character being incompatible with criteria in SP4. SAP34 is unsound on the grounds that it borders the AONB and is valuable arable farmland. SAP34 – any development would remove a flood sponge on the top slop of the hill which drains toward Ray Bottom SAP15, so development here would contribute to flooding. SAP35 is unsound in that it involves loss of food producing farmland; destructive of the landscape character and it is in a BOA. SAP15 is unsound as incompatible with SP4; 3.71 separation of settlements. Also, it is incompatible with statements in SP14 relating to biodiversity connectivity. The highways assessment of this site is unsound and inadequate. SAP15 A.160 fails to note that Liverpool Road is a single lane road which becomes gridlocked with traffic from Kingsdown primary school twice a day.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	no comment
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I consider that 50 dwellings on this site is too many. The site only has one access from Ringwoud Road, which is not enough for 50 dwellings. If the access is blocked, no emergency services can gain access other than by helicopter. Ringwoud Road is narrow and very busy, further traffic accessing onto this road will make it even more of a danger than at present Final it will be a further loss to our food agricultural land.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Reduce the number proposed significantly or reduce altogether

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<ol style="list-style-type: none"> 1 Very obtuse and confusing for people to understand 2 Appears to be a fait accompli rather than seeking local opinion. Also new government guidelines show cutting back on unsuitable developments 3 Unsound due to a very already congested village with poor road structure. Primary school in the middle 4 Very disappointing due to lack of safety issue especially with an elderly local population 5 The Dover-Deal A258 is constantly challenged blocked with traffic diversions through Kingsdown. It can't cope with more traffic. 6 There is no potential for a pavement/cycle path for the local residents, both elderly and young.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	As a move elderly resident I feel the local plan and how it is structured make it very difficult for my age group to properly represent our opinions. It is designed to be battling to make the development plans SAP35 and 15 more sound I strongly suggest it is an over intense treatment of an already congested area. Inadequate narrow lanes, a busy primary school and elderly population and young families and overwhelmed by an ever-growing holiday population. The various limited approaches to the village are unable to cope with the traffic burden.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Kingsdown has one primary school which is over subscribed. There is no Doctors surgery or Dentist. JUSTIFIED. These sites are unsuitable for development. Your website is not clear as to what research or solid facts you have, or from whom it has been compiled by. EFFECTIVE. These sites will be detrimental to the existing residents by causing light pollution, noise pollution, congestion and pollution. CONSISTENT. I am not certain what the national policy is, if it is to make existing residents unhappy in there existing environment, then these proposed sites would achieve that. LEGALLY compliant. I consider that most people within the village were not aware of these sites being considered, my neighbours and I were only aware when the details were noted in the November 2022 issue of Rural Roundup. Your website is over complicated and not fit for purpose. Within the village there are many elderly residents who do not have access to computers. TC4S074 was not in the Regulation 18 Consultation-there has not been adequate time for public engagement. DUTY to co-operate. Unable to find out if this was carried out.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Scheme should be scrapped.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	As a resident I have found this a very confusing and difficult process to complete and would look forward to attending an oral examination to put my questions to whoever allowed these proposals to get this far.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP34 (KIN002) PP177-179 Woodhill Farm Access/Exit from site: B2057 Ringwould/Kingsdown Road. The proposed access is on the North side of the B2057 on a bend where there is also access to and parking for the village playing field with play apparatus for children. The road itself is very narrow with no footpath. There is already a restriction (frequently ignored) on 'heavy vehicles' using the road.

Will use of the playing field facilities including parking be affected or denied during and/or after the proposed development?

The increased traffic of construction vehicles during the proposed development and then that of future residents from it will cause added congestion and safety hazards on this winding country lane which forms the main service road from Dover have to be diverted via Walmer and Glen Road or via the coast road to Upper Street.

Without a detailed site plan of the proposed development and its internal access roads to be certain, but it is possible that SAP34 (KIN002) is accessible from the Glen at the site's northern extremity. Added construction traffic to this narrow-wooded lane, single track with passing places would cause major hold-ups, a real concern for care-staff, visitors and residents at Glendale Lodge and for the many who use this main access to the north end of Kingsdown, and the school.

SAP34 (KIN002)

Selection of the site for development and its effect on the environment and community.

The proposed site is clearly productive, arable land; a scarce and vital commodity, yet the DDC proposes to build over it, or rather, allow developers to make use of it.

This completely contrasts with the findings and landscape management guidelines of the Dover District Landscape Character Assessment (chap 5) of October 2020 (LUC1199) F3 Ripple, which clearly includes SAP34 (KIN002) on the F3 Ripple Map.

The 'Landscape Evaluation' identifies key sensitivities and values including 'the open character of the landscape allowing uninterrupted view across the arable landscape and over the surrounding lower landscapes. The uncluttered skylines are vulnerable to large scale of intrusive development'. Precisely what SAP34 proposes. The 'Landscape Strategy' presumably DDC policy, states the overall aim is to conserve the rural character of the landscape and sense of place created by the combination of an open rolling arable landscape with small historic villages linked by winding rural lanes and panoramic views.

Widening and straightening the B2057 in order to turn open rolling arable land into a building site hardly fits this strategy to conserve the distinctive narrow winding lanes and grassy verges. Neither does it fit with the Landscape Management Guidelines (LUC1118) to manage and enhance arable land to enhance its biodiversity value and connectivity by encouraging the creation of uncultivated field margins and headlands perhaps not by building on it. LUC1119

SAP34 (KIN002)

Development Management Guidelines from Dover District Landscape Character Assessment, F3 Ripple LUC1118 (chap 5) to conserve the rural character of the landscape, ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs Area of Outstanding Natural Beauty.

This laudable policy would lead us to believe that DDC takes a serious role as custodians of our countryside, but the SAP34 proposal represents a complete reverse of this policy.

What has led DDC to propose a development on this particular area of precious landscape? It cannot be directly connected to water, sewage or power supplies without major disruption to access to Kingsdown and road building over arable land, with environmental damage.

What is special about SAP34 (KIN002)?

In developers terms it has 'added value' location location.

A panoramic North westerly view, unique in the area; from Oxney Woods, St Nicholas Tower, Ripple Mill, a distant road and rolling fields. Idyllic. Nobody would have been given OK to build on it before, witness DDC planning problems for the long-standing small—holding at Kingsdown, yet somehow the whole upper field is to be placed in the hands of a developer for fifty luxury homes. Despite DDC policies outlines above, the landowner, developer, DDC members and officers will have engineered a highly profitable scheme that results in lasting damage to the landscape, environment and quality of life of a small Kent village and its visitors. SAP34 must be removed from the Dover District Local Plan

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The proposal for building development on SAP34 (KIN002) Woodhill Farm, Kingsdown should be removed from the Dover Local Plan. Addition sheets are attached to support this
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I do not have the internet technology or expertise apparently necessary to make a proper response, or the legal advice to make a decision on Q4 and Q5

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	SAP34 not legally compliant with NPPF 20-21 item 11 DM policies NE2 (natural environment) P285 The chalk farmland of SAP34 is unsound/unsuitable for development. SAP34 is unsound on the grounds of landscape character being incompatible with criteria in

to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SP4. SAP34 is unsound on the grounds that it borders the AONB and is valuable arable farmland. SAP34 – any development would remove a flood sponge on the top slop of the hill which drains toward Ray Bottom SAP15, so development here would contribute to flooding. SAP35 is unsound in that it involves loss of food producing farmland; destructive of the landscape character and it is in a BOA. SAP15 is unsound as incompatible with SP4; 3.71 separation of settlements. Also, it is incompatible with statements in SP14 relating to biodiversity connectivity. The highways assessment of this site is unsound and inadequate. SAP15 A.160 fails to note that Liverpool Road is a single lane road which becomes gridlocked with traffic from Kingsdown primary school twice a day.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	no comment

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I consider the plan not legally compliant, is unsound and fails to comply with the duty to co-operate because there has been little or inadequate consultation with local Council's and community groups.</p> <p>I believe the plan is not complaint with the Climate Change Act 2009 regulations to protect the climate and with National Planning Policy Framework 2021 item 11 in relation to designation of the area in land for Kingsdown to Ringwoud, Ripple, Sutton, Studdal and Little Mongeham chalk farmland.</p> <p>SAP34 is also unsound because Ringwoud Road is unsuitable for long and heavy vehicles on grounds of landscape criteria and individual village character and is non-compliant with laws and regulations relating to the prevention of accidents and protection of human life. SAP34 borders AONB and is valuable arable farmland. Development in SAP15 contravenes the need to promote biodiversity connectivity, misrepresents the SSSI at Hawkshill Freedown, and disregards the vital importance of the valley bottoms as a flood sponge protections against flooding</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I believe it is vital that the plan should take into account and proactively protect against unplanned erosion of countryside between confines of settlements and should proactively protect the individual identity of these villages and important elements of their setting – i.e. farmland and coastal landscape of unequalled beauty in the UK. The plans in SAP34 and 15 are unsound and would significantly damage and negatively impact the village
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Extracts from the 24-page submission on DDC Reg 19 Local Plan Consultation, Dover and Deal Green Party. Focused on sites affecting Ringwould with Kingsdown Parish :</p> <p>the inclusion of SAP34 is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing and other uses, . . unless (ii) any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this framework taken as a whole'.</p> <p>DM policies NE2 (Natural Environment) p..285: we submit that the area inland from Kingsdown, west to Ringwould, Ripple, Sutton, Studdal and Little Mongeham should all be included as LFT F Open Arable Chalk Farmland with woodland and as extension to F3 Ripple. This would render the designation sound and effective and show why the chalk farmland of SAP34 is unsound / unsuitable for development.</p> <p>SP4 Residential Windfall Development p.37: 3.71 separation oof settlements: unplanned erosion of countryside between confines oof settlements . . . therefore has the potential to have a serious adverse impact on the overall landscape character and on the individual identity of villages through loss of important elements of their setting or more seriously through coalescence. Around Deal particularly at risk. There is a contradiction between this strategic Policy 4 statement which is very sound and the inclusion of SAP35/35 and 15 in the Local Plan. Any development of any of those sites would compromise the 'individual identity' of Kingsdown Village and lead to coalescence of loss of identity. It is unsound and ineffective to a damaging extent, to list Kingsdown as being a 'Local Centre; a village providing services for a local rural area and a secondary focus for development in the rural area'. Any development at SAP34 would do the opposite of 'reinforcing the role of the village'; it would in fact choke off the existing parish economy, reducing its attractiveness to tourists, a key location on the Deal Welcomers Walkers initiative. Any development at SAP34 would endanger life given the unique highways situation of the village, the district-wide need for traffic to flow through the village on narrow lanes with single lane passing whenever the A258 is blocked. The number of 2nd homes and AirB&B in the village proves that dwellings outnumber homes required, so there is NOT and 'objectively assessed need for housing'. NPPF 11 'withing the parish'. (Gladman did landgrab in 2017 in the parish 17/00487 and application rejected by DDC that Gladman took to planning inspectorate and won. Currently being built on A258 land opposition 423-429 Dover Road to the endangerment of all road users of arterial A258).</p> <p>SAP34 Kingsdown p.163: The selection of SAP34 is totally unsound on 5 different grounds. Firstly, the Highways Assessment of Ringwould Road is inadequate and unsound as regards this site. The facts are that Ringwould Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5 tonnes, unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows to single lane passing. The 1400 voters in Kingsdown village (population 200 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwould Road traffic flowing freely. So, the selection of SAP34 for any development is unsound firstly on the grounds of highway assessment unsoundness/inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. It is a disgrace that KCC for years have refused to listen to the requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwould Road. The economy of the village depends on visitors and residents walking, cycling and horse-riding on the Ringwould Road and any development of SAP34 would increase the likelihood of fatalities exponentially.</p> <p>The selection of SAP34 is unsound secondly on the grounds of landscape character, being incompatible with criteria described above in SP4. The site is on the skyline with the sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character.</p>

The selection of SAP34 is unsound thirdly on the grounds that the Deal/Walmer conurbation of 30,000 depends on the narrow – single lane in places – Ringwoud Road, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. The A258 is the only southern entrance to the 30,000 conurbation starting in Upper Walmer stretching to North Deal and Sholden. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Road/Liverpool Road selected as site for SAP15 Ray's Bottom in Walmer. This site too, if developed is likely to mean diverted traffic cannot get in/out of Deal/Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. Unsound due to being incompatible with SP12, because its lanes periodically become part of the district Strategic Transport Infrastructure. Selection of these sites is completely unsound and non-compliant with all laws/planning regs relating to the prevention of accidents and protection of human life. SP34 would result in 'traffic movements from the development resulting in severe impacts to the highway network that it would not be possible to mitigate' and as such contrary to SP4 2 j within the plan, thus unsound and highly ineffective.

The selection of SAP34 is unsound fourthly on the grounds that it borders the AONB and is valuable arable farmland, needed in times when national food security is of concern. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch/and Freedown Woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwoud with Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital within the boundary of the AONB to be protected on the boundary of this site. The selection of SAP34 is unsound fifthly on the grounds that any development would remove a flood sponge on the top slop of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP15, so development here could contribute to flooding (see CC5 p. Flood Risk). (FY1 we have seen an RTA fatality, and many near misses, in this dip on the Ringwoud Road).

Page 2 of 2 Extracts from the 24-page submission on DDC Reg 19 Local Plan consultation, Dover and Deal Green Party. Comments focused on sites affecting Ringwoud with Kingsdown Parish.

Reasons why including KIN002 (SAP34) land at Woodhill Farm, Ringwoud Road is unsound:

The inclusion of SAP34 is not legal compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing and other uses, .. unless(ii) any adverse impacts of doing so would significantly and demonstrably outweigh the benefits assessed against the policies in this Framework taken as a whole'. The following arguments show why this development would not be sustainable as is a requirement of the NPPF and would have more adverse impacts than benefits.

NE2 Landscape character and the Kent Downs section states in section 11.13 that DDC aims: to ensure that all development coming forward over the plan period respects and reflects the character of the landscape in which it is located. The LCA (2020) from DDC LCA F3 Ripple map clearly shows that KIN002 is within this area of Open Arable Chalk Farmland with Woodland. Proximity of this site to the boundary of the AONB means that it must be kept as an important buffer between the village-built environment and open countryside in order that the special character of the area is maintained.

Kingsdown should not be designated as a local centre – it is unsound and ineffective to a damaging extent, a village providing services for a local rural area and a secondary focus for development in the rural area it does not serve other settlements as is confined by the sea and AONB, is small and has lots of character and has rural setting. Therefore, is instead ideally suited to windfall development.

SP4 – windfall development

A – the scale must be appropriate to the size of the settlement and existing facilities

The village has lots of character, conservation area, narrow roads, small school, no doctors, much reduced bus service, no access to rail, car dependance.

B – development must be compatible with the layout, density, fabric and appearance of the existing settlement and would not result in merging of separate settlements

Would set the tone as you drive in the village, impacts AONB (area of outstanding natural beauty), need buffer between village boundary and AONB. Widening road here to make ok for highways would ruin the entrance to the village

C and D – there must not be harm to important green spaces

The site is directly opposite the AONB which is highlighted throughout the draft LDP (NE2) as being an important constraint to development. Important to village for health and happiness, dog walking, amenity value. Footpath ER5 around the field.

F and G – it would not result in the loss of best and most versatile agricultural land currently used for agriculture and... it includes an appropriately sized and designed landscape buffer to the open countryside;

NE2 states that proposals affecting the setting of the AONB will only be supported where the development is sensitively located and designed to avoid or minimize adverse impacts on the AONB and its setting and the development would enhance the special qualities, distinctive character and tranquility of the AONB.

This development would impact AONB due to entrance needing to use some of AONB to widen road, houses seen from AONB. Land better out to use of growing food. Need all the agricultural land we have to grow food for future generations. All development must be sustainable NPPF 21 states using good growing land is not.

H – it would not have a significant adverse impact on the living conditions of existing adjoining residents.

Glen Road affected

I – where development would result in the loss of active employments, open space, sport or community facilities within the settlement that such development is consistent with the requirements of policies EN2, PM5 and PM6 of this plan

Visitors less likely to want to come to Kingsdown if the entrance is blighted by this development and roads are gridlocked.

J – traffic movements generated from the development do not result in severe impacts to the highway network that cannot be mitigated.

Ringwood Road very dangerous – fatality recorded. Tractors turning out onto road, bridleway and footpaths crosses at 2 points. Ringwood Road has a 7.5 tonne weight limit. Dangerous gridlock in village during busy periods – school run etc. Ringwood Road would have to be shut for long periods while work done to make entrance safe.

T11 Development should, in so far as its size, characteristic and location – give priority to the needs of pedestrians, cyclists, users of public transport, car sharers and users of low and ultra-low emissions vehicles.

This site is outside the village boundary and not well served by footpaths or cycle paths. The site is crossed by a footpath, ER5, which connects to the village along a dirt track with no lighting. Buses have been cut and this development is said by HELAA highways assessment to be unlikely to lead to more buses being laid on.

	<p>T12 New accesses and intensified use of existing accesses onto the road network will not be permitted if it would result in a clear risk of crashes or traffic delays unless the proposals can incorporate measures that provide sufficient mitigation. I consider this site to be unsound as there would be an increase in crashes and traffic delays. Shared access – park users, ER5 footpath, land owner to left. The gas main under the entrance. Poor sight lines both ways.</p> <p>T12 Applicants must demonstrate that traffic movements to and from the development can be accommodated, resolved, or mitigated to avoid sever cumulative residual impact. Village has narrow roads, few footpaths in main streets. Cannot have lorries in village as damage property and cause chaos.</p> <p>These criteria refer to windfall developments, which is how Kingsdown has grown slowly over the last planning period. These criteria are very sensible when applied to a rural settlement with poor infrastructure such as this. Any large scale development other than windfall would have a devastating effect on the community and could be considered as a disproportionate development in terms of this settlement.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Ringwould Road from Kingsdown to Ringwould is already a very busy road with constant traffic. O build 50 houses and consequently each house may have more than one car would only add to more congestions. This land has always been agriculture and should remain so. The safety for the residents of Kingsdown using this road should be paramount
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	This site I feel is not appropriate for residential development
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<ul style="list-style-type: none"> • I believe the plans to be unsound for reasons of safety. The increased pressure on the roads (esp at Glen Road) will cause inevitable traffic jams so emergency services will not be able to get through • The plans do not fully take account of the 'landscape assessment'. Bird and animal habitats will be destroyed, and alternative sites will not be joined up. • The sloping nature of both sites means it would be a flood risk for the lower lying properties and agriculture. • The infrastructure (bus services, schools, doctors) could not sustain the proposed swelling • The narrowness of the roads (esp the Ringwold Kingsdown Road) is already too dangerous to walk or cycle along and with extra traffic there's a high risk of pedestrian or cyclist's lives being lost • Risk of surface water contamination. The aquafer is inside the development zone
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Extracts from the 24-page submission on DDC Reg 19 Local Plan Consultation, Dover and Deal Green Party. Focused on sites affecting Ringwould with Kingsdown Parish :</p> <p>the inclusion of SAP34 is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing and other uses, . . unless (ii) any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this framework taken as a whole'.</p> <p>DM policies NE2 (Natural Environment) p..285: we submit that the area inland from Kingsdown, west to Ringwould, Ripple, Sutton, Studdal and Little Mongeham should all be included as LFT F Open Arable Chalk Farmland with woodland and as extension to F3 Ripple. This would render the designation sound and effective and show why the chalk farmland of SAP34 is unsound / unsuitable for development.</p> <p>SP4 Residential Windfall Development p.37: 3.71 separation oof settlements: unplanned erosion of countryside between confines oof settlements . . . therefore has the potential to have a serious adverse impact on the overall landscape character and on the individual identity of villages through loss of important elements of their setting or more seriously through coalescence. Around Deal particularly at risk. There is a contradiction between this strategic Policy 4 statement which is very sound and the inclusion of SAP35/35 and 15 in the Local Plan. Any development of any of those sites would compromise the 'individual identity' of Kingsdown Village and lead to coalescence of loss of identity. It is unsound and ineffective to a damaging extent, to list Kingsdown as being a 'Local Centre; a village providing services for a local rural area and a secondary focus for development in the rural area'. Any development at SAP34 would do the opposite of 'reinforcing the role of the village'; it would in fact choke off the existing parish economy, reducing its attractiveness to tourists, a key location on the Deal Welcomers Walkers initiative. Any development at SAP34 would endanger life given the unique highways situation of the village, the district-wide need for traffic to flow through the village on narrow lanes with single lane passing whenever the A258 is blocked. The number of 2nd homes and AirB&B in the village proves that dwellings outnumber homes required, so there is NOT and 'objectively assessed need for housing'. NPPF 11 withing the parish'. (Gladman did landgrab in 2017 in the parish 17/00487 and application rejected by DDC that Gladman took to planning inspectorate and won. Currently being built on A258 land opposition 423-429 Dover Road to the endangerment of all road users of arterial A258).</p> <p>SAP34 Kingsdown p.163: The selection of SAP34 is totally unsound on 5 different grounds. Firstly, the Highways Assessment of Ringwould Road is inadequate and unsound as regards this site. The facts are that Ringwould Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5 tonnes, unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows to single lane passing. The 1400 voters in Kingsdown village (population 200 + 500? more in summer months</p>

due to holiday village + campsite) are all dependent on the Ringwoud Road traffic flowing freely. So, the selection of SAP34 for any development is unsound firstly on the grounds of highway assessment unsoundness/inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. It is a disgrace that KCC for years have refused to listen to the requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwoud Road. The economy of the village depends on visitors and residents walking, cycling and horse-riding on the Ringwoud Road and any development of SAP34 would increase the likelihood of fatalities exponentially.

The selection of SAP34 is unsound secondly on the grounds of landscape character, being incompatible with criteria described above in SP4. The site is on the skyline with the sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character.

The selection of SAP34 is unsound thirdly on the grounds that the Deal/Walmer conurbation of 30,000 depends on the narrow – single lane in places – Ringwoud Road, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. The A258 is the only southern entrance to the 30,000 conurbation starting in Upper Walmer stretching to North Deal and Sholden. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Road/Liverpool Road selected as site for SAP15 Ray's Bottom in Walmer. This site too, if developed is likely to mean diverted traffic cannot get in/out of Deal/Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. Unsound due to being incompatible with SP12, because its lanes periodically become part of the district Strategic Transport Infrastructure. Selection of these sites is completely unsound and non-compliant with all laws/planning regs relating to the prevention of accidents and protection of human life. SP34 would result in 'traffic movements from the development resulting in severe impacts to the highway network that it would not be possible to mitigate' and as such contrary to SP4 2 j within the plan, thus unsound and highly ineffective.

The selection of SAP34 is unsound fourthly on the grounds that it borders the AONB and is valuable arable farmland, needed in times when national food security is of concern. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch/and Freedown Woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwoud with Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital within the boundary of the AONB to be protected on the boundary of this site. The selection of SAP34 is unsound fifthly on the grounds that any development would remove a flood sponge on the top slop of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP15, so development here could contribute to flooding (see CC5 p. Flood Risk). (FY1 we have seen an RTA fatality, and many near misses, in this dip on the Ringwoud Road).

Page 2 of 2 Extracts from the 24-page submission on DDC Reg 19 Local Plan consultation, Dover and Deal Green Party. Comments focused on sites affecting Ringwoud with Kingsdown Parish.

Reasons why including KIN002 (SAP34) land at Woodhill Farm, Ringwoud Road is unsound:

The inclusion of SAP34 is not legal compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing and other uses, .. unless(ii) any adverse impacts of doing so would significantly and demonstrably outweigh the benefits assessed against the policies in this Framework taken as a whole'. The following arguments show why this development would not be sustainable as is a requirement of the NPPF and would have more adverse impacts than benefits.

NE2 Landscape character and the Kent Downs section states in section 11.13 that DDC aims: to ensure that all development coming forward over the plan period respects and reflects the character of the landscape in which it is located. The LCA (2020) from DDC LCA F3 Ripple map clearly shows that KIN002 is within this area of Open Arable Chalk Farmland with Woodland. Proximity of this site to the boundary of the AONB means that it must be kept as an important buffer between the village-built environment and open countryside in order that the special character of the area is maintained.

Kingsdown should not be designated as a local centre – it is unsound and ineffective to a damaging extent, a village providing services for a local rural area and a secondary focus for development in the rural area it does not serve other settlements as is confined by the sea and AONB, is small and has lots of character and has rural setting. Therefore, is instead ideally suited to windfall development.

SP4 – windfall development

A – the scale must be appropriate to the size of the settlement and existing facilities

The village has lots of character, conservation area, narrow roads, small school, no doctors, much reduced bus service, no access to rail, car dependance.

B – development must be compatible with the layout, density, fabric and appearance of the existing settlement and would not result in merging of separate settlements

Would set the tone as you drive in the village, impacts AONB (area of outstanding natural beauty), need buffer between village boundary and AONB. Widening road here to make ok for highways would ruin the entrance to the village

C and D – there must not be harm to important green spaces

The site is directly opposite the AONB which is highlighted throughout the draft LDP (NE2) as being an important constraint to development. Important to village for health and happiness, dog walking, amenity value. Footpath ER5 around the field.

F and G – it would not result in the loss of best and most versatile agricultural land currently used for agriculture and... it includes an appropriately sized and designed landscape buffer to the open countryside;

NE2 states that proposals affected the setting of the AONB will only be supported where the development is sensitively located and designed to avoid or minimize adverse impacts on the AONB and its setting and the development would enhance the special qualities, distinctive character and tranquility of the AONB.

This development would impact AONB due to entrance needing to use some of AONB to widen road, houses seen from AONB. Land better out to use of growing food. Need all the agricultural land we have to grow food for future generations. All development must be sustainable NPPF 21 states using good growing land is not.

H – it would not have a significant adverse impact on the living conditions of existing adjoining residents.

Glen Road affected

I – where development would result in the loss of active employments, open space, sport or community facilities within the settlement that such development is consistent with the requirements of policies EN2, PM5 and PM6 of this plan

Visitors less likely to want to come to Kingsdown if the entrance is blighted by this development and roads are gridlocked.

	<p>J – traffic movements generated from the development do not result in severe impacts to the highway network that cannot be mitigated.</p> <p>Ringwould Road very dangerous – fatality recorded. Tractors turning out onto road, bridleway and footpaths crosses at 2 points. Ringwould Road has a 7.5 tonne weight limit. Dangerous gridlock in village during busy periods – school run etc. Ringwould Road would have to be shut for long periods while work done to make entrance safe.</p> <p>TI1 Development should, in so far as its size, characteristic and location – give priority to the needs of pedestrians, cyclists, users of public transport, car sharers and users of low and ultra-low emissions vehicles.</p> <p>This site is outside the village boundary and not well served by footpaths or cycle paths. The site is crossed by a footpath, ER5, which connects to the village along a dirt track with no lighting. Buses have been cut and this development is said by HELAA highways assessment to be unlikely to lead to more buses being laid on.</p> <p>TI2 New accesses and intensified use of existing accesses onto the road network will not be permitted if it would result in a clear risk of crashes or traffic delays unless the proposals can incorporate measures that provide sufficient mitigation. I consider this site to be unsound as there would be an increase in crashes and traffic delays. Shared access – park users, ER5 footpath, land owner to left. The gas main under the entrance. Poor sight lines both ways.</p> <p>TI2 Applicants must demonstrate that traffic movements to and from the development can be accommodated, resolved, or mitigated to avoid sever cumulative residual impact. Village has narrow roads, few footpaths in main streets. Cannot have lorries in village as damage property and cause chaos.</p> <p>These criteria refer to windfall developments, which is how Kingsdown has grown slowly over the last planning period. These criteria are very sensible when applied to a rural settlement with poor infrastructure such as this. Any large scale development other than windfall would have a devastating effect on the community and could be considered as a disproportionate development in terms of this settlement.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I consider the changes to the plan the responsibility of DDC</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>To ensure a resident's voice is heard</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP34 is unsound because: <ul style="list-style-type: none"> • An iconic vista has been ignored. Destruction of it is unjustified • No preparedness has been given to the impact on overstretched school, medical centres, and traffic flows. • SAP34 is undeliverable without causing traffic hazards and village gridlock since the site is accessed only via a single-lane road leading to a hazardous junction.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	A completely different site needs to be chosen – one that will not cause gridlock by feeding traffic either into Kingsdown Village (single lane) driving custom away from local shops and pubs; or sending extra traffic (single lane) towards the hazardous junction at Ringwould – a route that has already caused deaths.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP35 - Site TC4S074 - Land Adjacent to Courtlands
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I do not feel that development on this land is justified - even for a small number of dwellings. The land comprises an area of biodiversity, with rare birds fledging in the hedge, and the land itself supports a population of hedgehogs, and other field dwellers. Furthermore, the land itself is one of the few natural chalk soils and grasses that still exist in the UK. It also happens to be subject to flooding at different times during the year, which would make it unsuitable for development.</p> <p>Kingsdown is a small village with only single lane roads. Further development in this section of Kingsdown will lead to environmental damage due to increased motor traffic which brings with it idling of vehicles, and further congestion. Access to this area will increase traffic through a settled neighbourhood.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The council should consider other areas of Kingsdown abutting the Dover Road as a possible alternative. The Dover Road is a major thoroughfare that can support additional traffic and residential development.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The proposal for Courtlands was not included in the Reg 18 consultation and was slipped into the Reg 19 consultation without any notice thus not giving the fullest opportunity for the local community or directly affected residents to review it properly or seek its removal at the earlier consultation stage. The proposal does not take account of how the building of these five houses and the loss of this part of the field contravenes Section 15 of the National Planning Policy Framework in terms of the following paragraphs</p> <p>174. Planning policies and decisions should contribute to and enhance the natural and local environment by:</p> <p>a) protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan) - the assessment makes a light mention of biodiversity when locals know the field is visited by nesting skylarks in the summer and the field edge contains the burrows of bumble bees. Bats also feed and fly across the field and hedge line. The field is also regarded as a valued landscape with open views across the Channel that is widely enjoyed by locals and tourists who walk between Walmer and Kingsdown over the free down</p> <p>b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services –including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland - building over a quarter or more of the field will make it less sustainable for agriculture. The field is regularly used for arable crops. There is little confidence that there will not be pressure of build over the rest of the field despite the plan</p> <p>c) maintaining the character of the undeveloped coast, while improving public</p>

	access to it where appropriate - the building of these five homes further develops the coast. Given how other parts of the south coast have been ruined by dense coastal developments this development doesn't comply at all. The homes will be viewable from Kingsdown beach and the sea.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I can see no better modification than for the removal of this proposal from the plan for its un-soundness and non-compliance with the NPPF Section 15
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This spot of area is one of the most beautiful sight in kingsdown and is a real shame that has being considered to become am area of development, I thnk is a real short sight to allow this delopment to take place. it gives a signal to the future generation, that there is not limit where greed can reach..</p> <p>Does kingsdown need these 10 houses at the cost to loose this beautifl sight / NO really. All the residents that are aware in the village and outside the village are shocked, that this site has been proposed to be devlepped. with further destruction and a real damage to the environment. Plus more road to connect and trees and natural landscape gone, without mentioning the potential archeological loss.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	YES just leave this site alone, and instead to plan 10 houses plan how to incentivte with some funds the farmer to plant tress and encourage the wildlife.I know the council needs moeny but we also need a vision and a healthy future for our children.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Making sure that my thought have been heard

1 - Which Part of the Local Plan does this comment relate to?Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Land Adjacent Courtlands(TC4S074) SAP35
2 - Do you consider this part of the Plan sound?	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I do not consider that the introduction of SAP35 into the proposed Dover Local Plan Reg19 is legally compliant. This parcel of land did not feature in Reg18, but without warning it appears in Reg 19. Why has it appeared? The council found they had a shortfall of five houses? Can we believe that? No one was warned or consulted. The Council has failed in their Duty to Cooperate. It has been slipped in without any consultation or notification to the people who live closeby.</p> <p>This version of the Dover Local Plan Reg19 is unsound because</p> <p>SAP35 Courtlands seems to contradict Dover Councils own Policies SP4, regarding protecting the naturalness of coastal landscaping and habitat. HELLA Appendix 2c.</p> <ol style="list-style-type: none"> 1 It is incorrect to say the proposed triangle is untended meadow. That only applies for a small section. 2 That small section is kept like that to provide a sponge to help hold back all the rain that falls on this huge arable field, that SAP35 is part of. At present there is a very noticeable flow of water down Courtlands after heavy rain. Without this sponge ie if there is a tarmaced road and houses, the flow of water would be unbearable. I live at No 5 Courtlands, and would take the full brunt of the water flow. What would be done to protect my property? 3 I understand a Policy called Ripple 3 protects much of the countryside in this area. Please could it be extended to include the land of SAP35 Courtlands which fits the description of open arable chalk farmland with woodland. 4 Why does this Local Plan encourage land being taken out of food production. If the farmer doesn't want to grow things, it should be returned to chalk grassland. 5 Each time a chunk of field is taken away it makes the land less sustainable for agriculture. In this case, SAP35 it is a quarter of the field, not just a little plot in the corner. I know the land is in different ownership but it is maintained agriculturally as a whole. 6 The footpath to the West of SAP35 is much frequented by locals and tourists. At the highest point there is a most fantastic view of the English Channel. Do not ruin this precious resource by allowing the land to be given over to housing. 7 The current hedgerow along the Eastern boundary of SAP35 is much frequented by rare birds and bees. Do not destroy by building houses too close. 8 Any planning Application would have to include full proposals about how the above problems would be mitigated. I don't think it can be done satisfactorily to maintain the bio-diversity and to stop the stop the loss of the current habitat. <p>The proposed Local Plan Reg 19 -The Highways infrastructure for SAP35 - has not been fully assessed or is incorrect.</p> <ol style="list-style-type: none"> 1 Courtlands comes off Kingsdown Road. Turning out of Courtlands is very difficult at present as you cannot safely see to either side without pulling out into Kingsdown Road. This is dangerous. There are often cars parked adjacent to Beech Mews causing vehicles from Deal to move over to the right hand side of the road, and thus be out of view. 2 Encouraging more lorries onto Kingsdown road is a bad thing. They cannot negotiate Upper Street, Chalk Hill Road nor The Rise and turning round by the Rising Sun is very difficult. 3 Courtlands road is quite unsuitable as an access road to SAP35. There are no pavements, it is only just wide enough for two cars to pass and there are blind spots. 4 Courtlands as an access road would need to be widened but properties 1-5 all own land on both sides of the road. 5 Courtlands serves 14 properties plus the five houses in a little lane whose addresses are Kingsdown Road. That is 19 properties. Not what is stated in the Highways Assessment. HELLA Appendix 2c

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I think it is quite wrong of the Dover Council to propose SAP35 for Housing. They know full well that once a road access is made into a small section of a field that it is only a short time before housing is built on the rest whether or not there are Planning restrictions in place. When an Application goes to Appeal all the careful work of the local council goes out of the window and the Appeal is granted because our country needs more houses, with little regard to the nature of the area.</p> <p>Final questions</p> <ol style="list-style-type: none"> 1 How will the planners ensure that access to the field will not encourage a route through to the potential development of more houses? 2 How will the planners mitigate the intrusion of five houses in this rural and natural setting? 3 How will the Environmental Agency protect my house from rivers of water flowing past, or into my property, in times of heavy rain. 4 If SAP35 stays in the Local Plan there should be very strict rules in place and expectations that a developer would provide considerable benefits to the local community and village infrastructure. A binding Community Infrastructure Levy eg a pavement along the whole of Kingsdown Road from Deal, at the very least.
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP35 Land adjacent to Courtlands
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<ul style="list-style-type: none"> • This site is good agricultural land although it has been neglected recently. Allowing this to be developed on, will encourage more land to be left so that it too will be built on until development stretches all the way to Walmer. • A large proportion of existing properties in this part of Kingsdown are second homes or let out as Airbnb. New houses on this site would most likely go the same way. • This area is used very extensively by walkers, both on the adjacent footpath and around the field of which this proposed site is part. Development would cause a serious loss of amenity to the village. • The surrounding trees and hedges are very important to wildlife, including as a roosting spot for migrating birds. Even if the hedges are retained having housing so close will deter wildlife. • There is practically no employment in Kingsdown, any new residents would need to drive to work, increasing the pressure on already overcrowded roads.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Remove this site from the Local Plan as increasing the housing stock by 5 is not worth the damage that would be caused to the environment.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SP4 Residential Windfall Development - p37, 3.71 - Separation of settlements: Unplanned erosion of countryside between confines of settlements...therefore has the potential to have a serious adverse impact on the overall landscape character and on the individual identity of villages. There is a contradiction between this Strategic Policy 4 statement and the inclusion of SAP 35 in the Local Plan.</p> <p>Any development of this site would inevitably lead to the remainder of this and neighbouring fields - which separate Kingsdown from Walmer - being developed.</p> <p>Any development of this site would compromise the individual identity of Kingsdown village and lead to coalescence and loss of identity. It is unsound and ineffective to list Kingsdown as a "Local Centre". Any development of SAP35 would do the opposite of "reinforcing the role of the village". It would reduce its attractiveness to tourists - in particular walkers using the footpath adjacent to SAP35 - which has iconic views of France across the sea - to travel between Kingsdown and Walmer Castle,</p> <p>The number of second homes and air b&bs in Kingsdown (in addition to the number of properties available for sale) prove that dwellings outnumber homes required, so there is not an "objectively assessed need for housing" NPPF 11 within the parish.</p> <p>SAP35 is also unsound as it would involve the loss of food-producing farmland and additionally it would be destructive of the Landscape Character.</p> <p>SAP35 is also unsound given that it is in a Biodiversity Opportunity Area.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Nothing would make SAP35 sound, effective, safe or compliant with Strategic Policy 12.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<ul style="list-style-type: none"> SAP35 (TC4S074) A windfall (non-strategic) site of 5 dwellings (10 dwellings in Habitats Assessment Appendix C Screening Matrix page LUC i C-30) is unsound for the following reasons. Chapter 2 2.1 Vision and Objectives, , Overarching Vision, site fails to comply with 2nd paragraph in respect Landscapes, SP1 ,3.8, again biodiversity and landscapes and section on Adaptation, site is contrary to paragraph h, Chapter 3 ,3.47, site not protecting the character of the settlement and surrounding countryside of Kingsdown; SP4, 3.71 and 3.72, site fails again to respect the landscape and the importance of protecting the distinctive character of individual settlements i.e Kingsdown; section g mentions buffers adjoining open countryside i.e. west and north sides of the plot would take years to mature and be at risk of being removed for the views.; section implementation ,3.74 , paragraph 1 mentions distinctive character and identity plus highway network (Kingsdown has in the main narrow streets with no pavements presenting a danger to pedestrians especially the vulnerable such children and the elderly; site does not comply.

	<ul style="list-style-type: none"> • chapter 4 , 4.210 mentions Kingsdown being highly attractive and sensitive, it has already had infill throughout the years in parts of the village and a further site will only add to its urbanisation. • section 4.240 mentions the site is within a Biodiversity Opportunity Area ; there is a thick hedgerow with mature trees not on the eastern boundary as stated but adjacent in the access track for the properties opposite; this hedgerow takes up half the 41feet width of the track and is home to foxes badgers, numerous species of rodents and birds, reptiles such as adders and slow-worms; however, the access track is actually included in the site and therefore this hedgerow is not on the boundary and could be taken out; • Habitat Regs Assessment, Appendix C, page LUC I C-30 gives an adverse report for this development. • NE2, Landscape Character, 11.13 and 11.14, the developmentwhat is contrary to the contained text of these paragraphs; • Appendix 2c Housing Sites Landscape Assessment has mention that the countryside beyond the western and northern boundary is hills that provide views into the site and any development of the site would have to mitigate the impact on the open countryside and due to the countryside beyond hilly nature is difficult to see how the impact can be mitigated; if mitigation of the north and west boundaries of the development is entertained with natural "soft" buffers, this will take time to mature and would be subject to being eradicated for maintaining views; • SP4 Residential Windfall Development p.37; 3.72 Separation of settlements. <i>Unplanned erosionof countryside between confines of settlements... has the potential to have a serious adverse impact on the overall landscape character and on the individual identity of villages through the important elements of their setting or more seriously through coalescence.</i> Around Deal is particularly at risk. There is contradiction between Strategic Policy 4 statement which is sound and the inclusion of SAP 35 (TC4S074). • Kingsdown has a conservation area with narrow roads with no pavements, hence even with 20 mph speed limit, it is still particularly dangerous for pedestrians with children or the elderly. • Courtlands for which this site must use for access has no pavements. From experience, vehicles have the tendency to accelerate up the slope despite the fact there is a blind bend in the road. • The field which contains this site, has a PRoW passing by the western side of the site and then goes up to the top of the hill . Throughout its length, superb views over the surrounding countryside can be had including the sea and the French coast. In order to preserve this amenity, certain local residents have acquired small sections of the field soecifically to maintain the agricultural aspect with its views. In addition, it is an amenity which is within walking distance for the local community of Deal and Walmer (use of private transport not necessary (hence pollution reduced, plus there is exercise and well being). This PRoW and the Hawshill Freedown is therefore very popular and well used by not only the local community but also visitors/tourists and even Twitchers for watching migratory birds. • Kingsdown has not only a large holiday camp about its conservation area but also a significant number of second homes and airb&b's throughout the entire village, Because of its attractiveness, building more houses could increase that number still further, particularly if such houses are near the beach.
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Delete SAP35 (TC4S074) site for development from the local plan in order to maintain the agricultural aspect and keep the amenity of the spectacular views for the benefit of the whole community</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SAP 35- Courtlands</p> <p>The Courtlands site was only introduced to the local plan after reg 18, and was poorly advertised , so few people knew about it.</p> <p><u>Highways considerations.</u></p> <p>These need mitigation.</p> <p>The road into Courtlands is now adopted by KCC, but there is no footpath at the side.</p> <p>The likely residents of these proposed houses are likely to have cars, and would join the stream of traffic going through the single lane narrow roads of Kingsdown , onto the Ringwould road, and join the overcrowded Deal to Dover road, which has problems at the Duke of York's Roundabout. There is also a problem returning to Kingsdown from the main Dover Deal road, as at the turn off at Ringwould, the road is only 2 lanes wide , so when a car turns right to go to Kingsdown, all the traffic behind has to wait. This part of the road needs to be made 3 lanes wide.</p> <p><u>Sustainability considerations.</u></p> <p>Sustainability is poor because:</p> <p>Kingsdown is not well served by public buses. There is no direct bus to Dover, and the Ringwould road up to the A258 does not have a path, and is only just 2 lanes wide, so it is a dangerous road for pedestrians, or bikes. There is a service into and from Deal. The service is limited, infrequent, does not operate throughout the day, and Kent County council recently threatened to cut the funding for Stagecoach, who run the service. as it is not profitable, Th end result has reduced the service, and may reduce it further. From Deal there is a bus connection to Dover, but the times of arrival and departure from the bus station do not coincide.</p> <p>There is a poor bus service for children going to secondary schools, and many parents from the village drive their children at least part way, adding to the road congestion in the narrow country lanes. E.g. to get to Walmer station, to catch a train to Sandwich schools , they drive along the single lane Glen road.</p> <ul style="list-style-type: none"> • The site is not within 1,200m of an NHS GP Surgery.

- The site is within 200m of a Public Right of Way/Cycle Path, but the cycle path is not lit at night. .
- The site is not within 2,000m of a secondary school.
- The site is not within 2,000m of further/higher education facilities.
- The site is not within 2,000m of Strategic Employment Sites/Enterprise Zones.
- The site is not within 1,200m of a town centre.

Landscape

The proposal does not take account of how the building of these five houses and the loss of this part of the field contravenes Section 15 of the National Planning Policy Framework in terms of the following paragraphs

Para 174. Planning policies and decisions should contribute to and enhance the natural and local environment by:

a) protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan) - the assessment makes a light mention of biodiversity when locals know the field is visited by nesting skylarks in the summer and the field edge across the Channel that is widely enjoyed by locals and tourists who walk between Walmer and Kingsdown over the free down contains the burrows of bumble bees. There are many bats which flit about and can be seen at dusk here (low levels of lighting here favours this). The field is also regarded as a valued landscape with open views

b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services –including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland – building over a quarter or more of the field will make it less sustainable for agriculture. The field is regularly used for arable crops. There is very little confidence that there will not be pressure of build over the rest of the field despite the plan. It is likely that the old hedge, (at edge of the old estate), at one side of the property would be removed. It needs to be protected, as it is full of wildlife. .

c) maintaining the character of the undeveloped coast, while improving public access to it where appropriate - the building of these five homes further develops the coast, as it is up a bit higher. Given how other parts of the south coast have been ruined by dense coastal developments this development doesn't comply at all. The homes will be viewable from Kingsdown beach and the sea.

In addition , This site is in the LCA F3 Ripple area defined in the district *Landscape Character Assessment 2020* which defines on page 118 under Development Management that (developments should) **Conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB.**

In the HELLA Appendix 2c Landscape Assessments it says "**Any development of the site would have to mitigate the impact on the hilly countryside and due to this hilly nature it is difficult to see how the impact can be mitigated.**

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

SAP 35- Courtlands

The Courtlands site was only introduced to the local plan after reg 18, and was poorly advertised , so few people knew about it.

Highways considerations

The road into Courtlands is now adopted by KCC, but there is no footpath at the side.

The likely residents of these proposed houses are likely to have cars, and would join the stream of traffic going through the single lane narrow roads of Kingsdown, onto the Ringwould Road, and join the overcrowded Deal to Dover road, which has problems at the Duke of York's Roundabout. There is also a problem returning back to Kingsdown from the main Dover Deal road, as at the turn off at Ringwould, the road is only 2 lanes wide , so when a car turns right to go to Kingsdown, all the traffic behind has to wait. This part of the road needs to be made 3 lanes wide.

Sustainability

Kingsdown is not well served by public transport into and from Deal. The service is limited, infrequent, does not operate throughout the day, and Kent County council recently threatened to cut the service completely, as it is not profitable, but then has ended up reducing the service, and may reduce it further. From Deal there is a bus connection to Dover, but the times of arrival and departure from the bus station do not coincide.

There is a poor bus service for children going to secondary schools, and many parents from the village drive their children there, adding to the road congestion in the narrow country lanes. E.g. to get to Walmer station, to catch a train to Sandwich schools , drive along the single lane Glen road.

- The site is not within 1,200m of an NHS GP Surgery.
- The site is within 200m of a Public Right of Way/Cycle Path, but the cycle path is not lit at night. .

- The site is not within 2,000m of a secondary school.
- The site is not within 2,000m of further/higher education facilities.
- The site is not within 2,000m of Strategic Employment Sites/Enterprise Zones.
- The site is not within 1,200m of a town centre.

Landscape

The proposal does not take account of how the building of these five houses and the loss of this part of the field contravenes Section 15 of the National Planning Policy Framework in terms of the following paragraphs

Para 174. Planning policies and decisions should contribute to and enhance the natural and local environment by:

a) protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan) - the assessment makes a light mention of biodiversity when locals know the field is visited by nesting skylarks in the summer and the field edge across the Channel that is widely enjoyed by locals and tourists who walk between Walmer and Kingsdown over the free down contains the burrows of bumble bees. There are many bats which flit about and can be seen at dusk here. The field is also regarded as a valued landscape with open views

b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services –including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland- building over a quarter or more of the field will make it less sustainable for agriculture. The field is regularly used for arable crops.

There is little confidence that there will not be pressure of build over the rest of the field despite the plan
c) maintaining the character of the undeveloped coast, while improving public access to it where appropriate - the building of these five homes further develops the coast. Given how other parts of the south coast have been ruined by dense coastal developments this development doesn't comply at all. The homes will be viewable from Kingsdown beach and the sea.

In addition, This site is in the LCA F3 Ripple area defined in the district *Landscape Character Assessment 2020* which defines on page 118 under Development Management that (developments should) **Conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB.**

In the HELLA Appendix 2c Landscape Assessments it says **The development of this site would have an impact on the landscape and further assessment is required to demonstrate whether this can be mitigated.**

A general point about this site being suitable for 5 houses. This site is 0.71 hectares. There is a site opposite, over the Kingsdown Road called Beach Mews, which has been built on fairly recently. It is 0.265 hectares and has 7 luxury 3 & 4 bed houses built on it. My suspicion is, that the owner of site SAP 35 will not be content with just 5 houses in a large area, but will apply for more houses in due course, badly affecting the landscape. Any houses built on SAP 35 will be luxury houses to fit into the area. Finally, this area does not need more luxury houses, but it badly needs houses for young families at an affordable price. This will not happen here

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP35 Land adjacent to Courtlands
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The selection of SAP35 is unsound as it involves the loss of food-producing farmland. This is unsustainable and contrary to NPPF 21. Future generations will not be able to grow sufficient food if we continue to lose our agricultural land. The CPRE have found that almost 14,500 hectares of the country's best agricultural land, which could grow at least 250,000 tonnes of vegetables a year, has been permanently lost to development in just 12 years.</p> <p>This is also unsound as it would be destructive of the Landscape Character. It appears from the mapping that it is within Ripple F3 from the DDC LCA (2020). Any development would require tree and hedge planting to shield the site from the open character of the landscape and would need to be done early to allow it to mature.</p> <p>It is also unsound given that it is in a BOA Biodiversity Opportunity Area. NE1 requires that the net gain be at least 10%. Existing hedges on site are important for birds nesting and roosting.</p> <p>I also consider that the consultation process is flawed with respect to this site. SAP35 was not included in Regulation 18 and this has come as a surprise to residents who now find it in Regulation 19 with a much more complicated and daunting process to try and come to terms with before making a submission.</p> <p>There is grave concern from residents that this would result in coalescence with Walmer by way of ribbon development along the cliffs. This would be contrary to SP3 and SP4.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Agricultural land should not be built on if development is to be truly sustainable.</p> <p>Retention of all hedges and trees.</p> <p>Thorough mapping and protection of the BOA</p> <p>A hard boundary to the village to prevent ribbon development and coalescence with Walmer.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP35 - Land adjacent to Courtlands, (TC4S074)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I do not believe that the proposal for five houses for Courtlands is justified or effective. I believe it also contravenes the guidance set out in: NPPF, Section 2, 11b; Section 9, para 111; Section 15, para 174-175.</p> <p>In relation to the soundness of the proposal: Courtlands was not included in the Reg 18 consultation and was only first seen in the Reg 19 consultation without any notice. This has not allowed the local community or residents directly affected to comment at an earlier stage. The proposal negatively impacts on visual and residential amenity and there is no proportionate evidence to show how five houses are justified. Section 2: 11b. Any adverse impacts of [development] would significantly and demonstrably outweigh the benefits.</p> <p>The development will adversely impact access to green space, to neighbouring properties, to visual amenity and cause substantial harm to a site which is enjoyed by both residents and wildlife (including nesting skylarks, solitary bees and bats).</p> <p>Section 9: para 111. Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe.</p> <p>Access to this farmland will be along the narrow, busy, heavily parked up Cliffe Road, through a small residential road on entering Kingsdown. There is a fixed 7.5 tonne limit for the narrow roads of Kingsdown which will inevitably lead to issues for builders and therefore anyone visiting or living in the area. The cumulative impact on development within Kingsdown is already felt by residents, utilities, emergency vehicles and those servicing the three public houses. When the A258 Dover Road is closed due to accidents, it is this one entry and exit road in Kingsdown which takes all the traffic. This leads to gridlocking and is not sustainable for homeowners or businesses.</p>

	<p>The proposal does not take account of how the building of these five houses and the loss of this part of the field contravenes Section 15 of the National Planning Policy Framework in terms of the following paragraphs:</p> <p>1 Planning policies and decisions should contribute to and enhance the natural and local environment by:- a) protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan) - the assessment mentions biodiversity when locals know the field is visited by nesting skylarks in the summer, is populated by bats and the field edge contains thousands of burrowing solitary bees. The field is also regarded as a valued landscape with open views across the Channel that is widely enjoyed by locals and tourists who walk between Walmer and Kingsdown over the free down.</p> <p>b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services –including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland - building over a quarter or more of the field will make it less sustainable for agriculture. The field is regularly used for arable crops. There is little confidence that there will not be pressure to build over the rest of the field despite the plan.</p> <p>c) maintaining the character of the undeveloped coast, while improving public access to it where appropriate - the building of these five homes further develops the coast. Given how other parts of the south coast have been ruined by dense coastal developments this development doesn't comply at all. The homes will be viewable from Kingsdown beach and the sea, so will therefore impact visual amenity.</p> <p>Para 175: Allocate land with the least environmental or amenity value for the reason of nesting skylarks, bats and colonies of solitary bees and enjoyed by villagers for decades. For over 20 years that I have lived here the land has been successfully farmed and any loss of this agricultural land can only lead to further proposal for more houses and the land becoming less valuable for farming.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Removal of the development in its entirety.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	This proposal TC4SO74 was added to the plan without sufficient notice. Not included in Regulation 18. I bounds an area very important to hundred of dog walkers and in my opinion one of the most beautiful areas of our coastline. The house proposed would, no doubt be sold for six figure prices and do nothing to solve the housing shortage. It would lead to pressure to continue development outside the village boundaries on this green field site.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Please concentrate on brown field sites and windfall, before taking valuable agricultural land, reducing food security
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<ol style="list-style-type: none"> 1 Location: this is not an appropriate location for new housing. This would build on an historic piece of greenfield agricultural land. This field forms a natural 'break' between the village of Kingsdown and Walmer. Development here will extend the current boundary of housing in Kingsdown and change the character and visual amenity of this historic approach to the village over Hawksdown. 2 Dover District Landscape Character Assessment: building new housing here is not compatible with DDC's 'Dover District Landscape Character Assessment' of 2020. I refer specifically to LCA F3 (chapter 5 - pages 114-119). As well as highlighting the environmental sensitivities and environmental and habitat values of this part of the district, the document rightly characterised this location as "<i>undulating chalk landscape with an intact agricultural character providing a rural setting for the South Forelands areas of the Kent Downs AONB as well providing rural separation between Deal and Kingsdown</i>". 3 LCA F3 further emphasised the vital importance of conserving: <ul style="list-style-type: none"> • <i>"the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB</i> • <i>"the characteristic pattern of historic villages maintaining their tight knit enclosed built character"</i> <p>In summary, I object to the proposal to build housing on greenfield land adjacent to Courtlands, Kingsdown (SAP35 -TC4S074)</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The proposal to build new housing on greenfield land adjacent to Courtlands, Kingsdown (SAP35 -TC4S074) should be removed from the plan.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	7.11 page 268, 3.71 page 37, SAP 34 page 163
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Not Legally compliant - The local plan specifically related to Kingsdown (SAP 34 and SAP 35) and the immediate boundary area (SAP 15 and SAP 53) is not legally compliant with the new and legal Highway Code changes which came into place in January 2022 i.e. after the evidence review and call for sites. The Highway Code states that a car must allow a minimum of 1.5 metres to overtake a cyclist (car travelling at under 30 MPH) or pedestrian (2 metres) when there is no pavement. All of the access roads into Kingsdown and the main roads used within Kingsdown (Upper St, The Rise, Undercliffe) do not allow the Highway code to be followed currently but therefore In the Local plan cannot by definition follow the guidance to be legally compliant or to support sustainable infrastructure (encourage walking and cycling) or to works towards climate neutral. The danger to cyclists and walkers will be enhanced when the A258 is blocked after an accident and traffic is diverted via the Ringwould Road.</p> <p>Unsound - the local plan is unsound with reference to SAP34 as the Ringwould Road is already signposted as unsuitable for long vehicles, vehicles over 7.5 tonnes, wide vehicles, narrowing to single lane passing. The proposed SAP34 development would cause dangerous gridlock particularly with the added traffic in summer months.</p> <p>The developments of SAP34, SAP35 and SAP 15 would compromise the 'individual identity of Kingsdown Village' and contradiction to Policy 4 statement.</p>

	<p>the SAP34 development is unsound on the grounds that it would remove a flood sponge.</p> <p>the Local plan is also unsound in that it has not taken into account reasonable alternatives for Kingsdown or even considered these. There is no mention or even any attempt to assess the number of 2nd (or indeed 3rd, 4th) homes in Kingsdown/Walmer/Deal which are not lived in for most of the year. There is an increasing number of AirBnBs which provide multiple occupants (and multiple cars to travel) for family houses. As there is no attempt to assess these I will provide one road number as an example - Of the 34 houses in North Road, Kingsdown only 7 are lived in as a 1st home. The last house to sell in North/South Road was in the region of £600,000 for a 2nd home. This is in direct contrast to the statement of the local plan (7.11, page 268) 'to support the delivery of rural local needs homes to enable local people to remain in the village where they live or work and not to be forced to move away because of high house prices and high rents'. The plan only allocates 30% of new homes as affordable housing and so there is no demonstration for a local need for more housing. The other 70% of houses being built on greenfield could all be bought as 2nd/3rd/4th homes or run as AirBnBs.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I suggest a review of housing need in specific areas of DDC and build houses in areas of housing need. This need has not been demonstrated in Kingsdown and surrounding areas unless DDC council want an area largely lived in by 2nd home owners.</p> <p>I suggest a 20 MPH limit throughout Kingsdown and the access roads with designated pedestrian and cycling lanes.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	SAP35 - Land adjacent to Courtlands (TC4S074)
<p>2 - Do you consider this part of the Plan sound?</p>	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The proposal for Courtlands was not included in the Reg 18 consultation. It has been included in the Reg 19 consultation without any notice, effectively denying affected residents and the wider community the opportunity to review it properly and/or to seek its removal at an earlier stage.</p> <p>The presumption in favour of sustainable development (as required in NPPF 2021 chapter 2 et seq) has not been upheld.</p> <p>Contrary to NPPF 2021 chapter 15, the proposal for Courtlands will not contribute to or enhance the natural and local environment.</p> <p>The development will take up a substantial part of an arable field crossed by public footpaths and highly valued by residents of Kingsdown and Walmer, and visitors from further afield, for its very broad and uninterrupted views of the sea as well as the woods and downland around Kingsdown. As such, it will severely harm a valued landscape (per NPPF para 174a), it fails to recognise the intrinsic character and beauty of the countryside (per NPPF para 174b), it constrains the viability of versatile agricultural land (per NPPF para 174b), and it fails to maintain the character of the undeveloped coast (per NPPF para 174c).</p> <p>It will also impact an area of biodiversity (per NPPF para 174a and 174d): the field is visited by nesting skylarks in the summer and the field edge contains the burrows of bumble bees. For the natural and local environment to be so harmed, so close to the Kingsdown Conservation Area and the Kent Downs Area of Outstanding Natural Beauty, for the sake of building 5 additional houses, is clearly not sustainable, sound or legally compliant. There is no exceptional circumstance or public benefit that would justify it.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The proposal for Courtlands should be entirely removed from the Dover Local Plan. For the reasons outlined in 6 above, any housing development on the land in question is unlikely to be legally compliant and/or sound.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I consider it necessary because the importance of the natural and local environment is best appreciated and explained by those who have known and treasured it for several decades.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP35 - Land adjacent to Courtlands
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Local Plan states this on page 268 (7.11): 'to support the delivery of rural local needs homes to enable local people to remain in the village where they live or work and not to be forced to move away because of high house prices and high rents'. This happens in Kingsdown but there is no mention in the local plan. Houses in Kingsdown are rapidly bought by 2nd/3rd/4th home owners as 2nd homes or to run as AirBnB. There is absolutely no assessment of these numbers in the plan but for instance North Rd in Kingsdown has only 7 of 34 home owners who live there. This is a representation of many other roads. Building homes near Courtlands will not solve this problem as they are not ALL allocated as affordable. Given the space allocation near Courtlands which is almost 3 times the size of Beach Mews (9 houses) it seems likely these will be large executive homes with big gardens which will subsequently have houses built in them potentially increasing numbers to 15 houses. The local plan with reference to transport is inconsistent with the Highway Code (Jan 2022) which specifies 1.5. metre minimum passing a cyclist and 2 metre for pedestrian for cars under 30 MPH. Therefore it will be illegal to overtake a cyclist or pedestrian going up the hill in all the roads leading out of Kingsdown. No car will wait going to work or to take their child to the school at the top and so DDC have encouraged illegal activity by increasing the number of homes and drivers.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	To make a proper assessment of housing needs in Kingsdown for local people as you outline in your plan
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP35 - Land adjacent Courtlands (TC4S074)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The inclusion of site SAP35 (land at Courtlands in Kingsdown TC4S074) is unsound because it is not consistent with the NPPF 2021 policy (174) that planning decisions should : "contribute to and enhance the natural and local environment by (a) protecting and enhancing valued landscapes..." and "(b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital..."</p> <p>The site, which was not included in the Regulation 18 consultation, was added in response to the Council's call for windfall sites. The site is on the south-east corner of arable-chalk farming fields which slope up from Kingsdown village to the hills above the English Channel. These open fields are bisected by a popular Public Right of Way (PROW) which eventually joins the England Coastal Path. Iconic photos from the top of these fields looking down over the countryside surrounding Kingsdown and out to the sea emphasise Kingsdown's special rural ambience. One such photo features in Kent County Council's pamphlet on the Kingsdown to Walmer section of the National Trail.</p> <p>In the proposal put forward by the planning agent, five plots of detached houses will directly abut, in a row, this PROW which connects Kingsdown to the hills above. The council's Landscape Assessment Evidence for the site (TC4S074 HELAA Appendix 2c) states:</p> <p>"There is residential development to the south and east of the site, with open countryside to the west and north. There is strong tree screening along the southern and eastern boundary, the western and northern boundaries are exposed. Further the countryside beyond the western and northern boundary are hills the provide views into the site. Any development of the site would have to mitigate the impact on the open countryside and due to the countryside beyond's hilly nature it is difficult to see how the impact can be mitigated."</p>

	<p>Presumably, the officer's judgement of "difficult" was considered in the context of the local plan's SP4 (Residential Windfall Development) criteria, specifically:</p> <p>"d) It would conserve and enhance landscape character and biodiversity and not result in an unacceptable intrusion into the open countryside or the loss of important green spaces within the confines that contribute positively to the existing character of that settlement" and;</p> <p>"g) Where the site adjoins open countryside, an appropriately designed landscape buffer is included."</p> <p>Also, in the implementation criteria of SP4 the local plan specifies that (3.73): "This buffer should enable limited views into and out from the development to ensure the development blends in with its setting."</p> <p>In the agent's proposal, the western and northern boundaries of the site, the latter sitting right on the PROW, are landscaped to screen the development. The agent suggests that with some landscape screening the Kingsdown settlement boundaries could thus be moved forward/extended without harm to the visual amenities of the countryside.</p> <p>The agent's proposals fail to consider that the iconic views of Kingsdown when approached from the north of these open fields are from a vantage point some 35 feet higher than the site. This fact did not elude the officer providing the evidence for the Landscape Assessment (HELAA Appendix 2c), who used the word "difficult". The agent's assurances do not alter the topographical facts.</p> <p>This site is located in a landscape of particular local value; a landscape which accentuates Kingsdown's special characteristics as a seaside village, a hillside village, and a rural village. The benefits of this development do not outweigh the adverse impact on this much-loved landscape of breaking through the boundaries of the Kingsdown settlement.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The Local Plan would be more sound if site SAP35 was ruled out for housing development.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP35
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object to the Selection of SAP35 - TC4S074 Land adjacent to Courtlands as it is Unsound, not legally Compliant and has not illustrated a Duty to Co-operate.</p> <p>1 SAP35 was <u>not</u> in the consultation document regulation 18 and therefore there has not been sufficient time for public consultation. This is contrary to the statement in the "Introduction" within regulation 19, page 12, "Consultation and engagement" item 1.7 which states "significant consultation has been undertaken with the local community and key stakeholders". The proposal is Unsound and not legally Compliant and should be rejected.</p> <p>1 SAP35 has no information relating to the site. whereas SAP34 – Woodhill Farm which was in regulation 18, has copious notes relating to its location and a further 14 statements (a-n) relating to development proposals such as - Access - design and height of properties - location of the properties relative to the borders of the site - impact on pathways, etc, etc There is nothing attached to SAP35 which further illustrates that Proposal SAP35 has not undergone Consultation and engagement or sufficient Scrutiny.</p> <p>1 The location of SAP35 is outside of the Kingsdown residential boundary and is on agricultural land which is actively farmed to produce food. This particular incursion into agricultural land has significant and far-reaching consequences (see items 4 and 8 below). Strategic Policy 3 (SP3) Item 3.47 advises "a balance must be achieved to protect the character and heritage of the settlements as well as the surrounding countryside". This declared objective is repeated again in SP4 item 3.70. In this instance Regulation 19 is not consistent with its own guidelines or those of the National Policy.</p> <p>1 SP4, Separation of Settlements - item 3.72 clearly states "Small settlements in close proximity to the three urban settlements of Dover, Deal and Sandwich are particularly at risk of coalescence". If coalescence is to be prevented, eventually a stand has to be taken over the erosion of boundaries between residential areas and food producing farmland. There is no justification to allow the breaching of the village boundary to allow a development such as SAP35 to be approved.</p>

	<p>1 Allowing this development to proceed will reduce the size of the contained area currently being actively farmed, to a level which would render it uneconomical to farm. it would then become a prime target for “Land banking”. The land immediately adjacent to and North of SAP35 is owned by the same entity as SAP35. By default this will become a “land banked” area. The Central Government is against Land banking, a strategy most recently emphasised by the Prime Minister in Parliament on 7th January 2022. To approve SAP35 is therefore a major contributor to Coalescence (SP4 item 3.72) as well as being against Government Policy</p> <p>1 SAP35 is unsound as it is designated a Biodiversity Opportunity area. The details in the application on Page 179 and relating to trees and hedgerows is misleading as the major hedgerow worthy of protection and supporting significant wildlife, is within the site and not on the boundary. The SAP35 application even acknowledges it has an issue with Biodiversity but presumes it can be ignored. As there is no information available relating to access and the fate of the hedge and the Biodiversity Opportunity, conclusions cannot be drawn. The Biodiversity Opportunity area guidance has not been addressed rendering the application unsound.</p> <p>1 SAP35 is a huge site of .710 hectares with a declared capacity for 5 houses. 100 meters from SAP35 is a development of 7 luxury houses with garages on a site of .265 hectares, approximately a third of the size of SAP35. SAP35 is therefore going to be a development of luxurious and hugely expensive properties. The overarching objective from Central government for the House building programme is “to provide affordable accommodation, particularly for young people to get on the housing ladder and remain in the community where they work and where their families live.” This sound objective is repeated throughout all documents such as regulation 18/19 and the National Planning Policy Framework. SAP35 fails to address this fundament objective by any criteria and should be denied.</p> <p>1 The stretch of elevated agricultural land between Kingsdown and Walmer Castle provides outstanding vistas and coastal views and is considered a treasure. Visitors and the community, both Local and further afield walk this route on a daily basis. As the path is largely on level ground it is enjoyed by young and old alike. It affords people with mobility issues the opportunity to enjoy a stimulating outdoor environment and is essential to the health and wellbeing of the community. This route gives access to the World War One Airfield and down to Walmer Castle. Granting approval for SAP35 will be the crucial key to unlocking the inevitable speculative development of these fields which are the Holy Grail for property developers. Approval of this site is contrary to the guidelines in SP3 and SP4 and is therefore unsound.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>1 By acknowledging SAP35 was introduced under uncertain circumstances with no scrutiny, the plan would be preventing the accusation of being unsound.</p> <p>2 The act of rejecting SAP35 would indicate that the plan is paying some attention to its own guidelines such as biodiversity, respect for the protection of agriculture land, the value of protecting open spaces and the need to support the health and wellbeing of the community.</p> <p>3 that the wishes of the community can be respected over the greed and pressure from powerful speculators. this is seen as a major criticism of the planning process</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>The objections are based a broad range of circumstances and circumstances at local level cannot, quite understandably, cannot be adequately conveyed or evaluated by people quite removed from the working of a small community such as Courtlands.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP35
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The selection of SAP35 is unsound as it involves the loss of food-producing farmland. This is unsustainable and contrary to NPPF 21. Future generations will not be able to grow sufficient food if we continue to lose our agricultural land. The CPRE have found that almost 14,500 hectares of the country's best agricultural land, which could grow at least 250,000 tonnes of vegetables a year, has been permanently lost to development in just 12 years.</p> <p>This is also unsound as it would be destructive of the Landscape Character. It appears from the mapping that it is within Ripple F3 from the DDC LCA (2020). Any development would require tree and hedge planting to shield the site from the open character of the landscape and would need to be done early to allow it to mature.</p> <p>It is also unsound given that it is in a BOA Biodiversity Opportunity Area. NE1 requires that the net gain be at least 10%. Existing hedges on site are important for birds nesting and roosting.</p> <p>I also consider that the consultation process is flawed with respect to this site. SAP35 was not included in Regulation 18 and this has come as a surprise to residents who now find it in Regulation 19 with a much more complicated and daunting process to try and come to terms with before making a submission.</p> <p>There is grave concern from residents that this would result in coalescence with Walmer by way of ribbon development along the cliffs. This would be contrary to SP3 and SP4.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	<p>Agricultural land should not be built on if development is to be truly sustainable. Retention of all hedges and trees.</p> <p>Thorough mapping and protection of the BOA.</p> <p>A hard boundary to the village to prevent ribbon development and coalescence with Walmer.</p>

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Failure to consult: No consultation with BT open-reach is listed to see if there would be adequate broadband available. This is currently a significant and persistent problem in the Village of Kingsdown with intermittent Wifi and particular difficulty in connecting new customers. Whilst the plan claims to have consulted with Southern water, the proposal that the development link to existing sewers is unsound. There have been examples of the failure of the existing sewer lines in the village, having significant detrimental impact, in addition the storm water drains do not cope with existing run off and additional development will exacerbate this. There appears to be no consideration of these environmental impacts. The determination of the suitability of SAP35 for development is incongruous with the plans own determination of the unsuitability of other considered sites within Kingsdown. KIN06, KIN07. It would seem that the site selection has been based upon a topographical view of the village

	<p>and fails to consider adequately the impact such development will have on the amenity of the edge of the village. Whilst the plan refers to the need to maintain existing hedging, and provide for trees, any planting would require strict application of enforcement for their protection which is not noted (and the Council's enforcement has been seriously lacking in the Village in recent years setting a concerning precedent).</p> <p>Whilst the list of consultees is significant, I can see no actual analysis of the recreational use and therefore the impact upon Villagers of this area. It is significant in that it is an easily accessed high point of open land with a walking path to Hawksdown and Walmer Castle, frequently used by locals as a place to take exercise and to contemplate. Such areas were VITAL to the mental wellbeing during the recent pandemic; and yet there has been inadequate consideration to the mental health and wellbeing of the Residents deprivation of this area would have.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? <p>Agent Company / Organisation</p>	
<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	SAP35
<p>2 - Do you consider this part of the Plan sound?</p>	No
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	Justified

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>6) Details of why I consider part of the Dover Local Plan is unsound with regard to Local Plan Site Allocation SAP35</p> <p>The inclusion of SAP35 (TC4S074) in the plan at a later stage (2021) after the Regulation 18 Draft Local Plan consultation has meant that there has been inadequate time for public engagement and consultation on its inclusion. This is a very sensitive greenfield site within the LCT/F3 of the Dover Landscape Character Assessment 2020 and development here would therefore be inappropriate. The proposed 5 home development also will immediately lead to developer pressure for further windfall or larger scale, development of the adjacent agricultural land to the north of Kingsdown which slopes down to the coast to the east with fine maritime views over the Downs and Channel. As custodians of meadowlands close to this site we are fully aware of recent developer pressure to access more land here for development. Development of SAP35 will be counter to the Landscape Character Assessment guidelines as it will threaten conservation of the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB. Development will also threaten the wildlife potential of this area which hosts declining farmland bird species including skylark, yellowhammer, and house sparrow, and is an important arrival and departure point for seasonally migrating birds including numerous warblers, goldcrests and firecrests, and winter snipe and woodcock.</p> <p>In addition I feel the inclusion of SAP35 is unsound as little account has yet been taken of the fact that Courtlands is a popular pavement free access route to the large network of PROWs which radiate from the locale of the SAP35 site - increased residential development here will necessarily increase risk of harm to all walking up and down Courtlands.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>7) Recommended Change to make Dover Local Plan More Sound</p> <p>Remove SAP35 from the Local Plan to make it consistent with Dover Landscape Character Assessment 2020 and to remove risk of follow on development of the seaward facing agricultural land to the north of Kingsdown village</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 35 Land adjacent to Courtlands (TC4S074)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I consider it to be unsound because there are many controversial issues arising from it eg-lack of Infrastructure Development Planning, (open spaces, for example) Also this site has just been added on to the Regulation 18 plan ;therefore the local community and neighbouring residents did not have the opportunity to comment on it .</p> <p>It is also unsound because it involves loss of food-producing farmland.A;so it would be destructive of the Landscape Character. The site is within a Biodiversity Opportunity Area. (SAP 35)-Landscape Assessment. There is also a Protected Right of Way across the field to the north , up a long slope , which is used continually by hikers and dog walkers , for the benefits of fresh air and open landscapes across the Channel (so vital for mental health), The development of this site would have an uncalled for impact on the landscape and further assessment is required to demonstrate whether this can be mitigated.HELLA Appendix 2c Landscape assessments.</p> <p>SP 13 is non - compliant with the Environmental Act .Well established hedges and trees on the east boundary are important stops for migrating birds.(they are protecting and enhancing)valued landscapes.</p> <p>SAP35 Highways assessment (TC4SO74) The bus stops do not promise a reasonably frequent service any longer. There are no footpaths on the Courtlands site (which is not a wide road ,like most roads in the village) There are 12 properties in Courtlands and a further 5 along the 'lane ' which leads along the east side of the site .There are also 2 dwellings at the top of the PROW which runs along the west side of the site. These already generate a surprising amount of vehicle movements not just from the residents but also from commercial traffic.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	In my opinion , to make it sound, there needs to be a reduction to the number of dwellings proposed and even more important, an in depth look at the present situation with regard to traffic movement in the narrow village roads.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC Note: The text below was extracted from the attached representation The inclusion of SAP 34 and SAP 15 especially, (but also SAP 53 and SAP 35) is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'. Also it is not compliant with the emerging govt policy announced 5 Dec 2022 by Mr Sunak on stopping compulsory housing targets on LPAs, and empowering LPAs to decide on local needs. DM Policies NE2 (Natural Environment) p.285: It is sound to designate the area inland from Kingsdown, west to Ringwould, Ripple, Sutton, Studdal and Little Mongeham, south to Guston, as LCT F Open Arable Chalk Farmland with Woodland, F3 Ripple. But it is unsound, ineffective and contradictory to then ignore the designation when selecting the dangerously located, chalk farmland of SAP 34 for development. It is unsound and ineffective to a damaging extent, to list Kingsdown as being a 'Local Centre ; a village providing services for a local rural area and a secondary focus for development in the rural area' Any development at SAP 34 would do the opposite of 'reinforcing the role of the village'; it would in fact choke off the existing parish economy, reducing its attractiveness to tourists, a key location on the Deal Welcomes Walkers initiative. The number of 2nd homes and airB&B in the village proves that dwellings outnumber homes required, so there is NOT an 'objectively assessed need for housing a la NPPF 11' within the Parish'. (Gladman did a landgrab in 2017 in the parish 17/00487 An

	<p>application rejected by DDC that Gladman took to Planning Inspectorate and won. Currently being built by Taylor Wimpey on A258 as 85 executive homes on land opposition 423-459 Dover Road to the endangerment of all road users of arterial A258 with refusal to put in pavements).</p> <p>SAP 35 is unsound SP4 Residential Windfall Development p.37: 3.71 Separation of Settlements : Unplanned erosion of Countryside between confines of settlements . . . therefore has the potential to have a serious adverse impact on the overall landscape character and on the individual identity of villages through the loss of important elements of their setting or more seriously through coalescence. Around Deal particularly at risk. There is a contradiction between this Strategic Policy 4 statement which is very sound and the inclusion of SAP 35 in the Local plan. Also it involves loss of food-producing farmland. Selection of this site is destructive of the Landscape Character. It is also unsound given that it is in a BOA Biodiversity Opportunity Area.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Kingsdown has one primary school which is over subscribed. There is no Doctors surgery or Dentist. JUSTIFIED. These sites are unsuitable for development. Your website is not clear as to what research or solid facts you have, or from whom it has been compiled by. EFFECTIVE. These sites will be detrimental to the existing residents by causing light pollution, noise pollution, congestion and pollution. CONSISTENT. I am not certain what the national policy is, if it is to make existing residents unhappy in there existing environment, then these proposed sites would achieve that. LEGALLY compliant. I consider that most people within the village were not aware of these sites being considered, my neighbours and I were only aware when the details were noted in the November 2022 issue of Rural Roundup. Your website is over complicated and not fit for purpose. Within the village there are many elderly residents who do not have access to computers.TC4S074 was not in the Regulation 18 Consultation-there has not been adequate time for public engagement. DUTY to co-operate.Unable to find out if this was carried out.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Scheme should be scrapped.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	As a resident I have found this a very confusing and difficult process to complete and would look forward to attending an oral examination to put my questions to whoever allowed these proposals to get this far.

SAP34 not legally compliant with NPPF 20-21 items 11 DM policies NE2 (natural environment) P285 The chalk farmland of SAP34 is unsound/unsuitable for development. SAP34 is unsound on the grounds of landscape character being incompatible with criteria in SP4. SAP34 is unsound on the grounds that it borders the AONB and is valuable arable farmland. SAP34 – any development would remove a flood sponge on the top slop of the hill which drains toward Ray Bottom SAP15, so development here would contribute to flooding. SAP35 is unsound in that it involves loss of food producing farmland; destructive of the landscape character and it is in a BOA. SAP53 is unsounds as being incompatible with LSA falling within the AOB. SAP15 is unsounds as incompatible with SP4; 3.71 separation of settlements. Also, it is incompatible with statements in SP14 relating to biodiversity connectivity. The highways assessment of this site is unsound and inadequate. SAP15 4.160 fails to note that Liverpool Road, is a single lane road which becomes gridlocked with traffic from Kingsdown primary school twice a day
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>AP34 & SAP35</p> <p>After careful consideration of the Local Plan (LP) and on hearing comments from the residents in both Ringwoud and Kingsdown it is considered by the PC that the LP is unsafe.</p> <p>The village of Kingsdown is a small village of mainly small properties, it has an Article 4 on some areas of the village, some areas are in a conservation zone, and some of the village is also in an AONB.</p> <p>Yes, there is a small shop and a butcher, along with a small school, however there are no medical facilities and all health care requirements will only be accessed by private transport; this is not sustainable.</p> <p>The roads are narrow and there is no space for any mitigation to take place to alleviate this, therefore this will be contrary to any Traffic management within the Plan and the HELAA highways assessment has stated that it does not see an increase in any public transport; in fact, in recent weeks the PC have been notified of a reduction/removal of public transport. Again unsustainable, and the road from Kingsdown to the A258 is narrow, with local agricultural use of large tractors and trailers.</p> <p>The public realm would be severely affected, by unsafe roads, unsafe bridleways & PROWs and loss of open space. There appears to have been no assessments of the fauna or flora loss that would occur if the development was in the plan.</p> <p>Both sites are outside the village settlement and should be removed from the plan.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at	That both sites are removed from the Local Plan

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To emphasise the position of the PC

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I am writing to you reference the new Local Plan and two large proposed developments in Kingsdown. I believe these to be totally inappropriate. Our village infrastructure is woefully inadequate to support such developments. Kingsdown already has traffic problems and the local primary school is full to the brim. The cancelling of local buses for school and public will add to the problem. The disruption caused by these developments, particularly building materials and heavy plant deliveries, will be intolerable. The muck away will cause major problems on the narrow county lanes. From what I have seen this plan has not been thought through. No infrastructure conditions been given on planning. Like new schools, doctor surgery, and access roads.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	To whom it may concern, (Without prejudice) I would like to object to SAP 34 for the reasons as specified below. These reasons also apply to SAP 35, 53 and 15 .

to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'. SAP 34 Kingsdown p. 163: The selection of SAP 34 is totally unsound, on 5 different grounds..

Firstly the Highways Assessment of Ringwoud Road is inadequate and unsound as regards this site. The facts are that Ringwoud Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows to single lane passing. The 1400 voters in Kingsdown village (population 2000 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwoud Road traffic flowing freely. So the selection of SAP 34 for any development is unsound firstly on the grounds of highways assessment unsoundness / inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. It is a disgrace that KCC for years have refused to listen to requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwoud Road. The economy of the village depends on visitors and residents walking, cycling and horse-riding on the Ringwoud Road and any development of SAP 34 would increase the likelihood of fatalities exponentially.

The selection of SAP 34 is unsound secondly on the grounds of landscape character, being incompatible with criteria described above in SP 4. the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character. DM Policies NE2 (Natural Environment) p.285: It is 'sound' to designate the area inland from Kingsdown, west to Ringwoud, Ripple, Sutton, Studdal and Little Mongeham, south to Guston, as LCT F Open Arable Chalk Farmland with Woodland, F3 Ripple. But it is unsound, ineffective and contradictory to then ignore the designation when selecting the dangerously located chalk farmland of SAP 34 for development.

The selection of SAP 34 is unsound thirdly on the grounds that the Deal / Walmer conurbation of 30,000 depends on the narrow – single lane in places - Ringwoud Rd, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. The A258 is the only southern entrance to the 30,000 conurbation starting in Upper Walmer stretching to North Deal and Sholden. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Rd / Liverpool road selected as site for SAP 15 Ray's Bottom in Walmer. This site too, if developed is likely to mean diverted traffic cannot get in / out of Deal /Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. Unsound due to being incompatible with SP12, because its lanes periodically become part of the district Strategic Transport Infrastructure. Selection of these sites is completely unsound and non-compliant with all laws / planning regs relating to the prevention of accidents and protection of human life. SAP 34 would result in 'Traffic movements from the development resulting in severe impacts to the highway network that it would not be possible to mitigate', and as such contrary to SP4 2 j within the plan, thus unsound and highly ineffective.

The selection of SAP 34 is unsound fourthly on the grounds that it borders the AONB and is valuable arable farmland, needed in times when national food security is of concern. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch / and Freedown woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwoud w/ Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital within the boundary of the AONB to be protected on the boundary of this site.

The selection of SAP 34 is unsound fifthly on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP 15, so development here could contribute to flooding (see CC5 p. Flood Risk).

Any development of SAP 34 is not legally compliant with emerging government policy, see Mr Sunak statement 5 Dec 2022 announcing dropping of compulsory housing targets for LPAs (Local Planning Authorities such as DDC)'.

I would also like to object to SAP 35, 53 and 15 for the same reasons as above.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I am a resident of Kingsdown. My concern is with the consequences of the housing developments at Woodhill Farm (SAP 34 - 50 dwellings) and Courtlands (SAP 35 - 5 dwellings), also adjacent developments at Ringwoud Alpines (SAP 53 - 10 dwellings) and at Rays Bottom, Walmer (SAP 15 - 75 dwellings). These are connected by Ringwoud Road between Kingsdown and Ringwoud,

by Glen Road between Kingsdown and Walmer (inland) and by Kingsdown Road between Kingsdown and Walmer (along the seafront). The first two, in particular, are narrow roads with inadequate width at many/most locations for passing traffic. Kingsdown Road is less restrictive. The number of dwellings will inevitably lead to increased car usage for Kingsdown village access, for school access, for work/employment access, for shopping and for general leisure access. There is no meaningful bus service to accommodate all these needs. Kingsdown Primary School will likely be the primary school of choice for the developments I have noted, putting particular strain on these roads. Children at secondary school (and those attending primary schools elsewhere) will all need to use these roads to move out of the referenced development areas. The whole village road network is generally narrow and unsuited for heavy traffic volumes. When discussing these aspects with DDC Planning representatives at the Deal open-day for the Plan, I was advised that the plan does not address these transport needs (and I have not found any text to contradict them.)

My main comment therefore is that a full traffic analysis must be made to ensure adequate provision for the daily needs of the developments. Access for construction traffic will be an immediate concern. While not directly related to the quoted paragraphs of the Infrastructure Plan, the village primary school is probably too small to accommodate the likely increase in demand. Road access around it does fall within the reference and is similarly restrictive already. Additionally, for Ringwould Road between Kingsdown and Ringwould there should be pavement(s) (or alternative footpaths) to provide a safe pedestrian route to access the main bus route along the A258 (the Dover-Deal road). The current road is unsafe for pedestrians and cyclists. The junction of Ringwould Road with the A258 will need to be enhanced to accommodate the increased traffic. Similar safe access will be required for Glen Road.

It is not clear to me how the narrow road network in Kingsdown can be modified to suit an increased volume of traffic. This might in itself be good reason to object to the developments, but a more positive attitude by the planners and developers is surely required?

(DDC note: This representation was originally made against the Infrastructure Delivery Plan consultation document but has been duplicated in relevant places against the Local Plan due to the specific site allocation references made)

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP34 not legally compliant with NPPF 20-21 item 11 DM policies NE2 (natural environment) P285 The chalk farmland of SAP34 is unsound/unsuitable for development. SAP34 is unsound on the grounds of landscape character being incompatible with criteria in SP4. SAP34 is unsound on the grounds that it borders the AONB and is valuable arable farmland. SAP34 – any development would remove a flood sponge on the top slop of the hill which drains toward Ray Bottom SAP15, so development here would contribute to flooding. SAP35 is unsound in that it involves loss of food producing farmland; destructive of the landscape character and it is in a BOA. SAP15 is unsound as incompatible with SP4; 3.71 separation of settlements. Also, it is incompatible with statements in SP14 relating to biodiversity connectivity. The highways assessment of this site is unsound and inadequate. SAP15 A.160 fails to note that Liverpool Road is a single lane road which becomes gridlocked with traffic from Kingsdown primary school twice a day.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	no comment

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP 35 I object to the selection of SAP35 – TC4S074 Land adjacent to Courtland as it is unsound, not legally compliant and has not illustrated a duty to co-operate

	<p>1 SAP35 was not in the consultation document regulation 18 and therefore has not been sufficient time for public consultation. 'Significant consultation has not been undertaken with the local community and key stakeholders'</p> <p>2.SAP35 has no information relating to the site or development proposals further illustrates that proposal SAP35 has not undergone consultation and engagement or sufficient scrutiny</p> <p>3.The location of SAP35 is outside of the Kingsdown residential boundary and is on agricultural 'a balance must be achieved to protect the character and heritage of the settlements as well as the surrounding countryside. Regulation 10 is not consistent with its own guidelines or those of the National Policy</p> <p>4.SP4 page 39 – separation of settlements – item 3.72 clearly states 'small settlements in close proximity to the three urban settlements of Dover Deal and Sandwich are particularly at risk of coalescence'. There is no justification to allow the breaching of the village boundary to allow SP35 to be developed on agricultural land.</p> <p>5.Needs words to support coalescence like creep along the fields to Walmer. To approve SAP35 is therefore a major contributor to coalescence.</p> <p>6.SAP35 is unsound as it is designated a Biodiversity Opportunity area. The SAP35 application even acknowledges it has an issue with Biodiversity but presumes it can dismiss it. As there is no information available relating to access has not undergone consultation and engagement or sufficient scrutiny.</p> <p>7.SAP35 is a huge site of for a declared capacity of 5 houses. It hugely luxuriously and expensive properties.to overarching objective from Central Government is to 'provide affordable accommodation, particularly for young people to get on the housing ladder and remain in the community where they work and where their families live.</p> <p>Extracts from the 24-page submission on DDC Reg 19 Local Plan Consultation, Dover and Deal Green Party. Focused on sites affecting Ringwould with Kingsdown Parish :</p> <p>SP4 Residential Windfall Development p.37: 3.71 separation oof settlements: unplanned erosion of countryside between confines oof settlements . . . therefore has the potential to have a serious adverse impact on the overall landscape character and on the individual identity of villages through loss of important elements of their setting or more seriously through coalescence. Around Deal particularly at risk. There is a contradiction between this strategic Policy 4 statement which is very sound and the inclusion of SAP35/35 and 15 in the Local Plan. Any development of any of those sites would compromise the 'individual identity' of Kingsdown Village and lead to coalescence of loss of identity. It is unsound and ineffective to a damaging extent, to list Kingsdown as being a 'Local Centre; a village providing services for a local rural area and a secondary focus for development in the rural area'.</p> <p>SAP35 is also unsound in that it involves loss of food producing farmland. Also, because it would be destructive of the Landscape Character. It is also unsound given that it is in a BOA Biodiversity Opportunity Area</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I consider changes to the Plan to be the responsibility of DDC</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	1) Local Centres : Paragraph 4.209 and following, with specific reference to Shepherdswell and 2) Housing Site Allocations : paragraph 4.242 and following, with reference to site SAP36
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>1) LOCAL CENTRES</p> <p>Shepherdswell is designated as a local centre [para 4.209], alongside Eythorne & Elvington, Eastry, Ash, Wingham, St Margaret's and Kingsdown. This paragraph contains a particularly egregious error in stating that <i>"Shepherdswell is located to the north of Dover just to the west of the A2."</i> Shepherdswell, in fact, lies to the east of the A2, and it is distressing that a Local Plan could be so geographically inaccurate.</p> <p>Unfortunately, this is not the only inaccuracy in assessing Shepherdswell as a "local Centre." When this exercise was first presented under the Regulation 18 consultation, various mistakes in the scoring of Shepherdswell were identified and reported by consultees. It appears that only some have these have been corrected in the latest draft. The following errors and inconsistencies remain :</p> <ul style="list-style-type: none"> • The local bus service is described as "infrequent" in para 5.1 of the Rural Settlement Hierarchy Supporting Document, but has been strangely up-graded to "regular daily" in the scores table presented in para 5.2. There is also no acknowledgement that two services have subsequently been withdrawn • The "pop-up" Post Office which visits the village briefly on two days per week is accorded the same score as permanent Post Offices in other villages • Two points are "awarded" for unspecified services, without further explanation • There is no recognition that neither the local pub nor café serve food in the evening <p>In para 4.4 of the document, it is acknowledged that the village survey data is taken from the Council's Authority Monitoring Report of 2018/2019, which was not up-dated due to Covid restrictions, and they have relied on Parish Council input for any up-dates and corrections. Such an ad-hoc approach to data collection and verification is neither reliable nor sound.</p> <p>The Settlement Hierarchy scoring system only records the "advantages" of the different communities ; there is no consideration of the negatives. In that context, the road infrastructure for Shepherdswell and Eythorne/Elvington is markedly inferior that of the other "local centres." The other</p>

centres are either directly crossed by main “A” roads, or have such roads in close proximity and running parallel to the main axis of the community – thereby providing easy access.

All access to Shepherdswell and Eythorne/Elvington is by small rural lanes, particularly the narrow, tortuous and congested road known variously along its course as Coxhill, Eythorne Road, Shepherdswell Road, Wigmore Lane and Barville Road. The problems with this route are well known, but are almost wholly ignored in the draft Local Plan. Indeed, the silence of the Plan on the critical subject of the area’s rural road network is another example of why it is “unsound.”

2) HOUSING SITE ALLOCATIONS

In the previous version of the draft Local Plan, submitted for Regulation 18 consultation, two large sites (then designated SHE003 and SHE004) were ear-marked for housing development. Whilst it is pleasing to see that SHE003 has now been dropped, it is illogical and unsound to that the other site (now renamed SAP36) has been retained, and, indeed, quietly enlarged, even though it was opposed on the same grounds as SHE003.

SAP36 has, in fact, been considered – and rejected – for housing development in the past, with previous DoE inspectors highlighting the potential damage to the landscape and environment, and the problems with the transport infrastructure. Over the years, the environmental issues have not changed, but the transport problems have got worse.

The proposed access to SAP36 would be via St Andrew’s Gardens. St Andrew’s Gardens can only be accessed from Mill Lane. Mill Lane itself, at its north-eastern end, is a narrow single track lane, whilst, at its south-western extremity, it connects, at the village green, with the narrow and congested Church Hill and the small back road from Coldred. It is, therefore, impossible to access St Andrew’s Gardens other than by single-lane, constricted roads that are inadequate for existing levels of traffic. St Andrew’s Gardens currently contains approximately 50 dwellings, meaning that the planned development would double the volume of traffic needing to use this route. An on-site traffic survey conducted on 11 November 2022 suggested that, based on current volumes, an extra 250 vehicles would enter/leave St Andrew’s Garden’s during peak times. In rejecting a previous planning application, a DoE inspector wrote that “the layout of St Andrew’s Gardens is too constricted and too tortuous to provide free and safe access to any considerable number of dwellings.” Nothing has changed since that comment was made.

It has also become clear that the actual carriageway within St Andrew’s Gardens itself was constructed to a very basic standard, and, as a result, the tarmac surface is noticeable pitted and pot-holed, and in need of regular repair. It is inadequate for current levels of usage, and would not be capable of supporting a doubling of traffic volumes, nor, indeed, the passage of the heavy machinery that would inevitably be part of any construction project.

The draft Local Plan, in its existing form, makes no attempt to address these issues, although they have been extensively explained in the past.

The traffic problems are not confined to the immediate vicinity of the proposed development site. Vehicular access to Shepherdswell is, with the exception of a couple of small country lanes, confined to the road running from the A2, just west of the Lydden junction, through the villages of Shepherdswell and Eythorne to the A256, south of Tilmanstone, and known variously along its course as Coxhill / Eythorne Road / Shepherdswell Road / Wigmore Lane / Barville Road. This road is itself a minor route – narrow, frequently tortuous, beset by poor sight lines, and, in many places, unable to accommodate two lines of traffic at the same time. It is deemed unsuitable for heavy goods vehicles. The road is already over-used and heavily congested, with daily instances of traffic queuing at the various bottlenecks, and the occasional “confrontation.” The local topography and the proximity of existing dwellings to the road’s edge excludes any possibility of a significant up-grade.

This is the same route that would have to serve the 300 new houses proposed for Eythorne and Elvington (SAP28 and SAP29).

The draft plan blandly suggests that “a review of the impact on the surrounding rural road network” should be undertaken as part of any planning application. Surely, any review should be conducted **before** the sites are accepted for possible development.

Similarly, alongside the transport infrastructure problems, any substantial housing development in Shepherdswell would put extra strain on a sewerage and waste water system that is already unable to cope, a local primary school that is currently over-subscribed, and a doctor’s surgery that is having to send patients to Dover for treatment. Again, the draft local plan is silent on how such problems can be handled.

It is again necessary to draw attention to inaccuracies and misinformation contained on the Plan’s evidence base. For example, the Sustainability Appraisal Appendix contains – in more than one place – the assertion that site SAP36 is within 500 metres of the local railway station. It is not. GPS data clearly shows that it is almost one kilometre from the site to the station utilising the most direct road and footpaths.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness

- Correction of persisting errors in the Local Centre scoring system, and correction of errors in the evidence base
- Recognition of not only the advantages, but also the negatives, in assessing whether a community qualifies as a Local Centre (e.g. deficiencies in the local infrastructure)

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	- The removal from the Plan of site SAP36 as a suitable location for future housing development.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	In the responses to the Regulation 18 consultation of the draft Local Plan, numerous inaccuracies and mistakes were reported to DDC. These were not matters of opinion, but matters of fact. It has become apparent that not all of these have been corrected in the document now under consultation. I am not, therefore, confident that the Council can be relied upon to present to the Inspector a document that is 100% accurate, and that members of the local community must have the opportunity to challenge such failings in a public forum.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Paragraph 4.241, Figure 4.11 and Table 4.8 Housing Site Allocations in Shepherdswell.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Omission of land at Shepherdswell Glebe as a housing allocation. The site is identified in the associated Maps, Plans and Images Document. The Local Plan makes the case for additional housing development at Shepherdswell, which is designated as a Local Centre. The Glebe site could deliver a further 30 dwellings bringing the total to be allocated to 100.

	<p>The 2.5 hectare site would be a logical extension to the village. It has clear development potential for 30 houses.</p> <p>It is a gently sloping, arable field with peripheral structural vegetation. It has a very long frontage onto Coldred Road and a separate pedestrian access to the centre of the settlement.</p> <p>The proposed development is achievable, suitable and deliverable.</p> <p>Development would complement its setting and deliver excellent connectivity with the established community.</p> <p>There is a unique opportunity to reinstate the historical field boundary and create a wildlife corridor.</p> <p>There is an acute problem of lack of off-street parking in Shepherdsweil which causes inconvenience, congestion and pedestrian-vehicle conflict when traffic is only slightly above average. The proposed development could make provision for overspill parking.</p> <p>The northern section is scrubby grazing with strong boundary vegetation and the southern section forms part of a featureless arable field. There is scope to create a strong southern boundary by recreating hedgerow as part of strong structural landscaping around the site.</p> <p>There is scope to create a new principal vehicular access point away from the village green with its awkward junctions.</p> <p>There is a strong case for new village housing at Shepherdsweil in terms of benefits to the village and neighbouring communities and to the District as a whole in achieving a more balanced spread of deliverable sites for new homes.</p> <p>The site now put forward to the south of the village is the 'natural' location for new village housing. It would round-off development and create the opportunity to reinstate hedgerows as many were grubbed out sometime after WW2. The development would meet all of the principles of sustainable development and deliver a good degree of connectivity with the existing community and the surrounding footpath network. An allocation of 30 houses would assist in sustaining and supporting local services as well as contributing towards meeting housing needs with an array of appropriate sites across the District. There is also the opportunity to resolve the long running car parking problem in the village. It should therefore be included as a housing site in the District Local Plan.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Allocate land at Shepherdsweil Glebe for housing with an indicative capacity of 30 units and requirements for strong structural landscaping and the delivery of off street parking to serve the wider community.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Traffic and the local road networks through and around Shepherdswell
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Traffic and the local road network</p> <p>Comments regarding poor access via single track roads with passing places to and through Shepherdswell have been made by numerous individuals and various points of the consultation process and in response to the current planning application at St Andrews Gardens. Such concerns do not only relate to the proposed development within Shepherdswell but also include the <u>scale of proposed local development</u> in the surrounding villages that will increase the burden on the local road network.</p> <p>There are obviously concerns not just locally but also within DDC and KCC highways in relation to the burden on the local road network, as the local plan Regulation 19 quotes that for sites SHE006 (Botolph street Farm 10 dwellings) and SHE008 (Land off Mill Lane 10 dwellings) under Site Specific issues and Requirements states a "Transport Statement. This must take into account the cumulative impact of this, and other sites allocated in this Plan on common road links."</p> <p>This criterion is not mentioned for the proposed 50 dwellings at SHE004 and the revised extension to this TC4S082. In fact in the current planning application 22/0127 for SHE006 the applicants Highways Statement quotes "2.1.2 The proposed development of the site does not warrant a full Transport Assessment in accordance with the National Planning Policy Framework (NPPF) as the site will not generate significant traffic flows. The site falls below the Department for Transport 'Guidance on Transport Assessments' that suggests a threshold of 80 units of C3 Land use requiring a full assessment."</p> <p>Why has the site at Saint Andrews Gardens not been identified as requiring analysis of the "cumulative impact of this and other sites allocated in this Plan on common road links." Especially as we see potential developers already trying to avoid this.</p> <p>The logic of placing the onus of individual sites to ascertain "the cumulative impact of their development and other sites allocated in this Plan on common road links" seems unsound. Will this not result in a first come first serve rush as the burden on local roads increases. Or possible a stale mate where each site reaches the conclusion that the local road network cannot support the level of development proposed. Surely this will also result significant duplication with each site completing the same piece of work. Is it not the purpose of the Plan to allocate proposed sites on the bases that they are suitably located and dispersed to ensure that the impact on local services and road networks can sustainable the impact and that where discrepancies are noted that mitigation is taken in advance of an issue manifesting?</p> <p>The regulation 19 Transport modelling forecast Report (70089926 dated October 2022) 9. External Local Plan Sites 9.1 Introduction (incorrectly labelled in footer as page 239 of 239) acknowledges that for sites outside the DDTM study area modelling has been completed in significantly less detail. 9.1.2 goes on to explain that excel modelling has been used. 9.2.3 states that automatic and manual counts were completed during November and December 2019 and 9.2.4 states the detail of these surveys are shown in table 9-1 and figure 9-1. Table 9.1 is titled 2019 Data Collection (although some of this data was collected in October 2021) There are errors dates on lines 22 to 25 5/10/21 -7/19/21 (paragraph 9.2.6 explains that further manual counts were undertaken in Eythorne between 5/10/21 and 7/10/21).</p> <p>I note the bulk of the traffic data is now three years old. Government guidelines in respect of the preparation of local plans states "Is the evidence base sufficiently up-to-date? 1.12. Evidence base documents, especially those relating to development needs and land availability, that date from two or more years before the submission date may be at risk of having been overtaken by events, particularly as they may rely on data</p>

that is even older. As a minimum, any such documents should be updated as necessary to incorporate the most recent available information. But this may not be necessary for evidence documents on topics that are less subject to change over time, such as landscape character assessments.” (extract from Procedure Guide for Local Plan Examinations - GOV.UK (www.gov.uk) as updated February 2022)

From Figure 9.1 it appears that no traffic surveys were undertaken in Shepherdswell. 9.2.33 identifies only one key junction within Eythorne and 9.2.34 states that KCC raised concerns regarding additional anticipated flow on Shepherdswell road due to the narrow rural nature of the road. Traffic traveling from the A2 to Eythorne converges at the junction of Coxhill, Churchill, Eythorne Road and Westcourt Lane which due to the parking at the COOP lack of footways and narrowing bend at the rail crossing. Traffic at this point is combined with that of Shepherdswell and is equally in not more important than the junction in Eythorne.

9.2.34 also details speed, distance and time from the Church Hill / Shooters Hill junction in Eythorne **it incorrectly quotes the speed as 64 Kph much of this route is through 30mph and 40mph limits? Distance 2.13Km its 4.5Km or 2.8 miles? And time 2 minutes Goole maps suggests 6 minutes?**

Due to the errors, age of the data and omission of specific physical survey data relating to the Coxhill, Churchill, Eythorne Road and Westcourt Lane junction in the regulation 19 Transport modelling forecast Report (70089926 dated October 2022). It cannot be considered as sound source of in respect of the cumulative impact on the local roads from development both within Shepherdswell and the surrounding villages.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Transport modeling for the local roads through and around Shepherdswell should be current (less than two years old) and consider all proposed housing land allocations that will impact on the local road network. The information in the modeling should be accurate and consider appropriate pinch points (for example the junction of Coxhill Road, Church Hill, Eythorne Road and West Court Lane).

If the modeling shows that the current road network cannot support the increased traffic flows mitigation should be identified and modeled to ensure it alleviates any issues or land allocations in the area should be reduced to a level where the local road network can cope.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Full Representation attached to SDLP1698. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1698.)</p> <p>Introduction</p> <p>1.1 Country House Homes Limited thanks Dover District Council for setting a 7-week period for its Local Plan Review Regulation 19 Public Consultation from 21st October 2022 to 9th December 2022.</p> <p>1.2 Country House Homes Limited is a Kent based property developer with a good understanding of the Borough and its spatial arrangement. The directors of the company live in and come from Kent, therefore we have a good knowledge of the district and are well placed to express valid opinions on the housing, employment and social strategies promoted within the Local Plan Review.</p> <p>1.3 Country House Homes Limited are the promoter of site SHE003, Land to the north of Westcourt Lane. This site was allocated as part of the Regulation 18 stages of the Local Plan Review for 100 homes. This site has since been removed following the findings of the Dover District Housing and Employment Land Availability Assessment of September 202, which found that the site was not suitable 'due to highway safety concerns raised by KCC'. We are of the opinion that this assessment of the site is flawed and that the removal of this site is unsound.</p> <p>2.0 - Country House Homes Regulation 19 Representations Summary of Findings</p> <p>2.1 Country House Homes Limited submit the following in regard to the District Council Local Plan Regulation 19 Public Consultation December 2022.</p> <p>2.2 Our representations upon the Local Plan find that the Local Plan is not Legally Compliant and is Unsound.</p> <p>2.3 We are of the view that the plan is not legally compliant given that the Plan fails to adopt a robust spatial strategy.</p> <p>2.4 We are of the view that the plan is unsound given that it is not positively prepared, it is not justified, it is not effective and it is not consistent with national policy.</p> <p>2.5 The plan is unsound because it has failed to employ a spatial strategy that is sufficiently robust and fails to deliver the required housing growth in the right locations.</p> <p>2.6 Our proposed Modifications to the Local Plan Review are outlined within our responses below where we fully address how Modifications are required to the Local Plan to render the Local Plan Legally Compliant and Sound, however, to summarise please see the points below;</p> <p>2.6.1 The Whitfield Garden Village/Urban Expansion is an inappropriate location for housing growth given that it would cause irreparable landscape harm, leave future residents isolated from established sustainable centres and</p>

result in affordable housing residents being isolated from their locations of origin. The proposed housing delivery here should be reduced by at least 800 homes. 2.6.2 The Council is demonstrating an over reliance on the Whitfield expansion, which will harm the A2 highway network and result in neglect to its established Rural Service Centres and Local Centres. The reduction of units by 800 homes will allow the Council to properly mitigate the perceived harm.

2.6.3 The Council is under-providing homes at Shepherdswell and has ignored an opportunity to significantly improve highway safety and capacity to the Coxhill Road and Westcourt Road routes from the A2 to Shepherdswell, Eythorne and Elvington.

2.6.4 A highly sustainable site (HELLA Site SHE003) with direct pedestrian and cycle connectivity to Shepherdswell Train Station has been ignored, even though the proposal brings forward much needed Affordable Housing, a 6Ha Public Access Local Nature Reserve and Highway Enhancements.

2.6.5 The Council should Allocate HELLA Site SHE003 for 130 new homes and attain the associated benefits of Housing Delivery, Affordable Housing Provision, Public Transport Access and Highway Enhancements

3.0 Policy SP3 – Housing Growth

(DDC Note - Section DUPLICATED onto SP3)

3.1 In our view the Spatial Strategy adopted by Dover District Council is flawed by virtue of;

3.1.1 The new housing provision to the Secondary Regional Centres of Dover and Whitfield, makes up some 60.5% of Housing Allocations across the borough, providing a minimum of 3,381 homes. Policy SP3 states that the majority of housing will be in Dover Town and at Whitfield. While this is the case, 60.5% of the District's growth located either in Dover or adjacent to Dover at Whitfield, is not a sustainable strategy for the District's Growth going forward.

3.1.2 This level of Growth in a single location over an 18 year period from 2022 to 2040 would not only result in an oversupply of housing within Dover, most likely resulting in the sales of these homes to struggle. Additionally, from these Regulation 19 alterations housing delivery in Rural Service Centres and Local Centres has fallen by 7% of the total allocations within the Borough. This will lead to an undersupply of housing in these areas, negatively affect residents who wish to remain within the villages in which they are brought up within and a subsequent further increase in housing prices to these locations.

3.1.3 The changes from the Regulation 18 version of the Local Plan Review to Regulation 19, have resulted in 530 fewer homes in Rural Service Centres, 195 fewer homes in Local Centres and 95 fewer homes in Larger Villages.

3.1.4 These revisions will result in 820 less homes within the Rural Locations of the District. This will sufficiently harm the growth of the Borough going forward in the Plan Period and does not meet with the outlined Spatial Strategy at SP3. We would argue that 60% of housing located in the Secondary Regional Centre,

while representing a 'majority' of new housing development, is an excessive amount of housing growth in one location, that will prove to be undeliverable at the annual rate advocated by the Council.

3.1.6 It is commonly accepted that urban expansions that are akin to Garden Village scale proposals will not deliver at the rate the Council expects due to the quantum of new homes being located in one location, where developments will compete against each other for housing sales.

3.1.7 Additionally locating the relevant proportion of affordable homes within the Whitfield expansion area will lead to future residents being isolated from Dover centre and again prevent residents from being able to remain within the villages

from which they are from.

3.1.8 Given that Rural Services Centres are noted as being 'the secondary focus for housing development' we are unable to countenance as to why such low numbers of new homes have been identified within the Allocated Sites for these highly sustainable locations.

3.1.9 Para's 68 & 69 of the NPPF states;

Para 68. Strategic policy-making authorities should have a clear understanding of the land available in their area through the preparation of a strategic housing land availability assessment. From this, planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability. Planning policies should identify a supply of:

- a) specific, deliverable sites for years one to five of the plan period³⁴; and
- b) specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15 of the plan.

Para 69. Small and medium sized sites can make an important contribution to meeting the housing requirement of an area, and are often built-out relatively quickly. To promote the development of a good mix of sites local planning authorities should:

- a) identify, through the development plan and brownfield registers, land to accommodate at least 10% of their housing requirement on sites no larger than one hectare; unless it can be shown, through the preparation of relevant plan policies, that there are strong reasons why this 10% target cannot be achieved;
- b) use tools such as area-wide design assessments and Local Development Orders to help bring small and medium sized sites forward;
- c) support the development of windfall sites through their policies and decisions –

giving great weight to the benefits of using suitable sites within existing settlements for homes; and d) work with developers to encourage the sub-division of large sites where this

could help to speed up the delivery of homes.

3.1.10 It is our opinion that the Council is not able to identify sites in accordance with Para 69 of the NPPF given that the sites identified have not been proven to be deliverable or viable, as required under Para 68 of the NPPF.

3.1.11 It is important to refer to analyse the build-out rate to Garden Villages of the 2000+, noting that this scale of delivery is accepted as being 130 per annum when there are more than 3 outlets operating at one time. This is evidenced by the Lichfields Feb 2020 'Start to Finish' document at Page 14, a copy of which is attached at Appendix 1 below.

3.1.12 Given our understanding of delivery, evidence provided by Lichfields and the historic slow rate at which homes are delivered within the urban area of Dover, we are of the view that the proposed strategy is unsound, that the Council has too great a reliance on the Whitfield urban expansion and that greater focus to Rural Services Centres, Local Centres and Larger Villages is required to meet the Housing Land Supply for the Plan Period.

Shepherdswell – Local Centre

3.1.13 Country House Homes Limited are the promoters of HELAA Site SHE003, as identified by the location plan shown below.

3.1.14 The above land lies within the parish of Shepherdswell, on the north-west side of the village centre, approximately 450m from the centre of

Shepherdswell village. 3.1.15 Shepherdswell is a designated Local Centre within the Dover District and being a Sustainable Settlement and should be identified for greater growth than the 70 homes that have been identified within the Reg19 version of the plan.

3.1.16 The majority of the site is currently arable land directly abutting the existing settlement boundary of the village to the south of the site and abutting the Dover-Canterbury Railway Line to the east of the site. Within the north-east portion of the existing site there is a natural woodland separating the site from wider arable land to the north.

3.1.17 The proposed development would take vehicular access from Westcourt Lane via a proposed road widening and new junction. A new 3m wide pedestrian/cycleway access directly to Shepherdswell Railway Station is provided to the north-east of the site.

3.1.18 The existing site has a sloping topography, rising from its abutment to Westcourt Lane in the south to a higher elevation in the north where the north portion of the existing site has a natural woodland which is retained by the proposed development.

3.1.19 The total site area is 12.1Ha of which 6Ha is dedicated to a new Local Nature Reserve populating the west and north sides of the proposed residential development. The proposed Local Nature Reserve is to be planted in a parkland style with significant new tree and understory planting as well as ecology enhancements and new pedestrian pathways.

3.1.20 The remaining developable area of the site equates to 6.1Ha, which can provide 100 new homes to the lower elevations of the site at a housing density of 16 dwellings per hectare, a low housing density as is appropriate for this edge of settlement location.

3.1.21 The proposed Master Plan shown below includes a widening to Westcourt Lane in order to facilitate the proposed new junction, to accommodate the location of the local bus stop within the existing single lane carriageway and to improve highway safety within the street.

3.1.22 Westcourt Lane, at its frontage to the subject site is currently a single lane roadway which opens out to a two lane roadway at 50m to the east of the subject site. The roadway has a 30mph speed limit and the approach to the subject site from the west has a 'gateway' into the village showing the change in speed limit from 60mph to 30mph.

3.1.23 The locational sustainability of the site is very good. It is located some 450m from the village centre and has a bus stop directly outside of the subject site in Westcourt Lane and has direct pedestrian and cycle access to Shepherdswell Train Station. Access to essential services is very good with nearly all daily/weekly required services being located in Shepherdswell.

3.1.24 The site itself is not protected by any landscape designations and the site already has residential development abutments to its south, and west boundaries. The introduction of a new natural woodland to the east and north boundaries will largely screen and protect the landscape to the east and north from the impact of development. Given the site location, surrounding uses and the proposed landscape enhancements the site is very well positioned from a landscape sustainability viewpoint.

3.1.25 The development site has been subject to professional surveys including topographical, ecology, arboriculture, geology and protected species.

3.1.26 The key issue that has led to Dover District Council removing this site from the process is Highways, however we have already demonstrated to the

	<p>Council and to KCC Highways how the main routes of Westcourt Road and Coxhill Road can be improved, widened and controlled to safely manage the highway capacity, highway traffic flow and highway safety matters that caused concern, as shown in our Shepherdswell Highway Analysis & Enhancement Proposals attached at Appendix 2.</p> <p>3.1.27 This document was first shared with the Council & KCC Highways during in December 2020 and was further promoted during 2021.</p> <p>3.1.28 The proposals provide the Council with the opportunity to significantly improve the highway routes from the A2 to Shepherdswell which would not only aid the transport movements for Shepherds well but would also significantly improve access to Eythorne and Elvington where additional housing growth has been identified. These other villages, identified for some 355 new homes rely heavily on the Coxhill and Westcourt Road routes to the A2.</p> <p>3.1.29 We are of the view that the Council has missed a significant opportunity here, that would make the site allocations of Shepherdswell, Eythorne and Elvington robust in highway terms and well as providing an appropriate level of housing growth in Shepherdswell.</p> <p>3.1.30 Consequently we find the Local Plan to be unsound in regard to the site allocations and highway transportation matters. We recommend that; HELLA Site SHE003 be reinstated to the Local Plan and that our Highway Enhancement Proposals are adopted by the Council in order to provide Soundness to the Local Plan.</p> <p>Appendix 1 – LICHFIELDS FEBRUARY 2020 START TO FINISHGUIDE ON BUILD OUT RATES FOR LARGE SCALE SITES</p> <p>Appendix 2 – COUNTRY HOUSE HOMES LTD SHEPHERDSWELL HIGHWAY ANALYSIS AND ENHANCEMNT PROPOSALS</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP 36, SHE004, TC4S082, SAP37 A full species and habitat survey has not taken place, which should take place over a full 12 month period, 24 hours day and night. A wintering bird survey must also be undertaken, again 24 hours every day. The ancient pilgrim trail between Canterbury and Rome must be fully acknowledged and totally protected.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	SAP 36, SHE004, TC4S082, SAP37 to make this proposal legally compliant in Shepherdswell, there needs to be access to the Village by roads which are NOT single track with passing places the provision of pedestrian pathways must be made. All roads leading into the Village and the proposed development are not safe or adequate for the additional traffic which will result in additional houses. All roads into the village are Single Track. The water pressure issues in that area must be addressed - a water supply is a basic human need. And the sewage/waste water problems which have existed in the lower part of the village for over 40 years must also be addressed. Extra waste water cannot be accommodated by the present system. There are no local jobs, therefore the new residents would need cars to get to their jobs and the roads into and out of the village do not have that capacity. There is no regular reliable bus service and what is already in place is under threat of removal. The train station provides one train per hour each way. If the track between Dover and Folkestone suffers another rockfall, this will not be repaired and Dover will become just a branch line. The fast track bus system from Whitfield would not be used for the purpose of getting a fast train from Dover to London.

	No fast link to London, equals more cars on the roads which is against government policy of reducing vehicle traffic and carbon emissions CC1.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The allocation is for the development of approximately 50 new dwellings across the entire site. Woodchurch Property (BK) Ltd support the proposed allocation of the site for residential development but object to components of the draft policy. Woodchurch raise an overarching objection to the combination of this site (ref. TC4S082) with the land to the north and east of St Andrews Gardens (ref. SHE004). The principle reasons as to why Woodchurch would suggest that the sites should not be combined for the purposes of the allocation have been summarised below:

- Promotion – as far as we are aware, neither party has promoted the sites on the basis of a combined allocation or delivery. The amalgamation of the sites has been proposed unilaterally by the Council, contrary to the Call for Sites submissions.
- Land ownership - the northern section of the site allocation (ref. SHE004) is under separate land ownership to the land to the south (ref. TC4S082). This would have implications on any future development in terms of deliverability and certainty of development coming forward.
- Delivery – Woodchurch are the chosen developer for site ref. TC4S082 and have prepared a development proposal, as summarised in Section 2, above. The proposal is being prepared as part of a planning application that is anticipated to be submitted in the near future and which has benefitted from pre-application discussions with the LPA. Whilst the land to the north is being promoted, we have not been made aware of the preparation of a separate application for that parcel and therefore cannot guarantee that development will come forward on this site. There has been no discussion between the parties to date. This has implications for the Council with regards to housing land supply and target delivery.

Whilst the draft wording of the policy seeks to avoid a ransom situation with regards to access, that alone is not considered to be sufficiently robust as rights of access over land are not solely governed by Town and Country Planning. The allocation as drafted therefore does not guarantee delivery of the Mill House land. Notwithstanding this, delivery of the Mill House land is wholly dependant upon prior delivery of the remainder of the site, which is outside the control of the Mill House land owners. The drafting therefore fails to guarantee delivery of the Mill House site, a position which is avoidable and unnecessary given that it benefits from its own deliverable and suitable access.

The southern site (TC4S082), in isolation, is immediately available for development and allocating as two separate sites would therefore increase certainty for the Council in relation to the delivery of the number of dwellings required through the allocation.

- Access & Highways – the draft combined allocation would require all c. 50 dwellings to be accessed via St Andrews Gardens. If these were split as proposed, this would lessen the impact upon existing residents at St Andrews Gardens. As confirmed above, the Mill House land is capable of being accessed via Mill Lane and would not be reliant upon achieving access via St Andrews gardens.
- Quality of Development – Woodchurch have prepared a development proposal on the basis of the area of land available to the south. The development proposal offers 10no. new dwellings that would be of a density and design approach that is consistent with the location of the site on the settlement edge. Woodchurch would not have control over the form of development proposed to the north and should the sites have to come forward together, it would be considered detrimental to the scheme proposed thus far. Furthermore, the allocation as drafted would necessitate access through the existing and established landscaped northern boundary of the Mill House site, which would give rise to negative landscape and biodiversity impacts. As above with regard to access, these impacts are unnecessary and unavoidable given the site can be developed in isolation, preserving that boundary. Quality of future development of the sites can still be secured through two separate allocations. If both are allocated, it would be reasonable to include wording in each policy that requires any scheme to demonstrate regard to the future delivery of development on the adjacent site and ensure that development in no way precludes future effective development of that site.

In view of the above, it is requested that the two sites are separated as shown in the attached representation.

The draft policy also includes a number of criteria which we are able to respond to directly, as below.

- 1 The existing trees along the southern border of the site are to be maintained and enhanced with new screening to be provided to northwest and western boundaries to mitigate the impact of development on the countryside and provide opportunities for biodiversity habitat creation and enhancement.
No objections are raised to this criterion. The development proposal shown in Section 2 seeks to retain the existing trees along the boundaries of the site, with the exception of two trees at the site entrance which need to be removed to allow for acceptable visibility splays. A Tree Survey has been conducted which demonstrates that the trees are Category C and in view of the other vegetation retained at the entrance, the loss of the trees would pose a minimal impact on the site, its ecological circumstances, or surrounding area.
In contrast, as currently drafted as a single allocation, the policy would necessitate the avoidable removal of vegetation between the two land parcels.
- 2 Trees which need to be removed to enable an access to be provided to the site, shall be kept to the minimum needed to provide necessary visibility, and will be required to be replaced on-site.
No objections are raised to this criterion. The trees on this boundary would not be lost in the creation of an access to the southern parcel. A landscape masterplan is being prepared to support the application that can take the above into consideration. Separating the two sites as individual allocations would also avoid the need to breach the existing landscaped boundary between the two land parcels.
- 3 Primary vehicular, pedestrian and cycle access to the whole site shall be provided from St. Andrews Gardens, and therefore development of site SHE004 must provide vehicle access and servicing up to the boundary with TC4S082 to enable a main access road to be created through the whole development. An additional, secondary emergency access onto Mill Lane may be achievable from TC4S082 and should be explored, along with a speed survey to clarify and address visibility restrictions.

- Objections raised.** Woodchurch object to this criterion based on the above request for the two plots of land to be separated into individual allocations. This drafting does not overcome potential concerns relating to rights of access and agreement between the parties and does not guarantee delivery of the Mill House parcel. This requirement is unnecessary given that access to the Mill House parcel can be suitably achieved via Mill Lane.
- Should the parcels of land be separated, a secondary access to the northern parcel should not be provided through this site. Inclusion of the access to the northern parcel would require a loss in the number of units proposed and would also detrimentally affect the development with regards to the quality of the development through the avoidable loss of existing boundary vegetation which currently provides screening and habitat. Accesses should be provided independently to both development parcels.
- 4 Provide off-site pedestrian improvements (pram crossings) at road junctions within the St. Andrews Garden Estate.
Should the plots be separated, this requirement should be included in the allocation of the land to the north. It would not be considered reasonable or necessary for off-site improvements to be delivered through the development of the southern plot of land alone as access would not be via St Andrews Gardens.
- 5 Provide pedestrian crossing improvements on Mill Lane.
No objections are raised to this criterion.
- 6 In accordance with Policy SP13, a wintering bird survey must be undertaken in advance of a planning application on the site. If the bird survey identifies that the development will exceed the threshold of significance, mitigation will be required. A suitable scheme of mitigation will need to be submitted with the planning application for the site.
Objections raised. Woodchurch object to this criterion. Following the preparation of a Preliminary Ecology Appraisal for the proposed development in the Mill House plot, wintering bird surveys are required where site allocations have a high or moderate suitability for qualifying bird species.
The site is not in close proximity to the specified designated sites (the Thanet Coast and Sandwich Bay SPA and Ramsar, Stodmarsh SPA and Ramsar and Dungeness, Romney Marsh and Rye Bay SPA). The site has also not been identified to have a high or moderate suitability to support the qualifying bird species. As such, these should not be required for the Mill House parcel. Impacts on nesting birds generally would in any event be significantly reduced if the allocations are separated and the existing boundary between the land parcels preserved. A letter from PJC Ecology is enclosed that provides context to the above.
- 7 Ensure appropriate species and habitat surveys are carried out prior to determination. Survey results will inform layout and design to avoid ecological impacts in accordance with the mitigation hierarchy and to inform on site ecological mitigation, compensation and enhancement measures and proposals for effective implementation, management and monitoring of all such measures.
No objections. A Preliminary Ecological Appraisal has been conducted to support the application for the Mill House site. The PEA identified that no further surveys would be required. As such, they should not be required as part of any future planning application.
- 8 A site-specific Flood Risk Assessment is required to address the issue of surface water flooding and consider the impacts of climate change over the lifetime of the development.
No objections. The southern site is within Flood Zone 1 and measures less than 1 hectare. Therefore, an FRA should not be required. However, a Flood Risk Assessment is being prepared for the southern plot (land adjacent to Mill House) and will be submitted with the application in any event.
- 9 An Archaeological Assessment for the site must be carried out in accordance with Policy HE3 Archaeology, the results of which should inform the layout and design of the development which is necessary to avoid harm to any archaeological assets identified through the assessment.
No objections. An Archaeological Assessment is being prepared for the southern plot (land adjacent to Mill House) and will be submitted with the application.
- 0 An assessment of land contamination for the site shall be carried out and submitted as part of the planning application and appropriate mitigation measures must be implemented prior to development commencing.
No objections. A Phase 1 Desk Study is being prepared for the southern plot (land adjacent to Mill House) and will be submitted with the application.
- 1 Layout is planned to ensure future access to existing wastewater infrastructure for maintenance and upsizing purposes.
Objection raised. The layout of the development on the Mill House land parcel (which Woodchurch request is severed from the northern parcel) has been planned to ensure future access to existing wastewater infrastructure if necessary. Woodchurch would, however, object to future access being provided and maintained through the southern plot to facilitate access for the northern site in view of the impact this would have on the quality and quantum of development proposed on the plot. This would in any event be unnecessary if both sites have their own independent access.
- 2 Open space requirements in accordance with Policy PM3 shall be provided. However, due to the location nearby to existing open space infrastructure, off-site contributions to upgrade or enhance nearby facilities may be sought rather than on-site provision.

Open space will be provided on-site through this development. Woodchurch would be pleased to discuss if off-site contributions are necessary with the Council.

Summary and Conclusions

The draft policy includes both the land adjacent to Mill House and the site to the north and east of St Andrews Gardens Estate. Woodchurch have shown, through the preparation of a development scheme and associated technical assessment work, that the southern site should be separated from the northern parcel in the allocations.

The southern parcel (TC4S082) is in separate ownership to the northern parcel (SHE004). This representation demonstrates that the southern parcel is readily available and that development is deliverable without any reliance on third party land, including land to the north. We are not aware of the ownership of the land to the north and have not been made aware of any development proposal coming forward as part of this. In view of this, there is no certainty that the northern parcel is coming forward. Separating the two sites will afford the Council a greater level of certainty that at least one of the sites will be developed to a high standard.

As currently drafted, the proposed allocation policy unnecessarily introduces risk to delivery and would deliver unnecessary landscape and ecology impacts that separate allocations would avoid. The two sites are not related or linked physically, in separate ownership and have been promoted separately. Whilst both sites are considered sound allocations in their own right, there is not considered to be any reasonable justification for them to be combined as a single allocation with a single point of access.

Woodchurch therefore object to various prescriptive parts of the draft policy as set out and in the event the combined draft allocation remains, would wish to make representations to the Inspector at the Examination Hearings accordingly.

Given the above, we request that Policy SAP36 is revised to separate sites SHE004 & TC4S082 and the wording of the draft allocation amended accordingly.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

This representation has been prepared and submitted behalf of Woodchurch Property (BK) Limited in respect of the Dover District Council Regulation 19 draft Local Plan Review. These representations highlight support for the draft allocation of the Land Adjacent to Mill House for residential development in principle, but highlight specific concerns with regard to the detail of the draft allocation under Policy SAP36.

A summary of suggested amendments:

- Land Adjacent to Mill House (TC4S082) should be severed from the land to the north at Land to the North and East of St Andrews Gardens (SHE004) and the allocation split into two.
- Access to be amended to allow for separate primary accesses to the northern and southern parcels of land.
- Requirement for a wintering bird survey should be deleted for the Mill House land parcel, based on the response provided by the ecologist for the development proposal being prepared on the southern half of the site.
- Provision for off-site highways improvements for St Andrews Estate be restricted to the allocation for the northern parcel of land (SHE004).
- Open space requirement to be a proportionate level, based on the total number of units and layout of the southern section of the site.
- Future access to wastewater infrastructure to be retained but amended so that the access and provision on the southern half of the site is proportionate to the scale of the development.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

To be able to respond to any matters raised in relation to amendments to Draft Policy SAP36. Any changes to the allocation directly impact the ability for the site at Land Adjacent to Mill Lane to be able to be delivered by our client, thus impacting the Council's housing delivery targets.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Traffic and the local road network</p> <p>There are obviously concerns not just locally but also within DDC and KCC highways in relation to the burden on the local road network, as the local plan Regulation 19 quotes that for sites SHE006 (Botolph street Farm 10 dwellings) and SHE008 (Land off Mill Lane 10 dwellings) under Site Specific issues and Requirements states a "Transport Statement. This must take into account the cumulative impact of this, and other sites allocated in this Plan on common road links."</p> <p>This criterion is not mentioned for the proposed 50 dwellings at SHE004 and the revised extension to this TC4S082. In fact in the current planning application 22/0127 for SHE006 the applicants Highways Statement quotes "2.1.2 The proposed development of the site does not warrant a full Transport Assessment in accordance with the National Planning Policy Framework (NPPF) as the site will not generate significant traffic flows. The site falls below the Department for Transport 'Guidance on Transport Assessments' that suggests a threshold of 80 units of C3 Land use requiring a full assessment."</p> <p>Why has the site at Saint Andrews Gardens not been identified as requiring analysis of the "cumulative impact of this and other sites allocated in this Plan on common road links." Especially as we see potential developers already trying to avoid this.</p> <p>Emergency Access to Sanit Andrews Gardens</p> <p>HELAA document appendix 4 used a traffic light system Red (unsuitable) amber (potentially suitable) and green (suitable). Site SHE004 was shown in amber and stated under the heading of suitability assessment "secondary emergency access required which does not appear achievable". This comment is was not included in the key considerations in the regulation 18 draft Local Plan. The current regulation 19 draft states "C -Primary vehicular, pedestrian and cycle access to the whole site shall be provided from St. Andrews Gardens, and therefore development of site SHE004 must provide vehicle access and servicing up the boundary with TC4S082 to enable a main access road to be created through the whole development. An additional, secondary emergency access onto Mill Lane may be achievable from TC4S082 and should be explored, along with a speed survey to clarify and address visibility restrictions;</p> <p>This is inconsistent and fails to align with Kent County Councils "Kent Design Guide- Step 3 Designing for movement" (https://www.kent.gov.uk/__data/assets/pdf_file/0018/12096/design-guide-movement.pdf). The terminology used in regulation 19 "main access road" does not align with that used in the Kent Design Guide, which refers to:</p> <ul style="list-style-type: none"> Major Access Roads described as "3 generally serves between 50 and 300 dwellings (or equivalent mixed uses) including those located on other access roads feeding onto it. In some cases, it could serve as a bus route. 4 preferably has two points of access or is a loop with a short connection to a single point of access and a secondary emergency access link" pages 124 & 125

- Minor Access Road “2 generally serves up to 100 dwellings, including those in other residential areas which feed onto it. **The road should either be a through-road or, if a cul-de-sac, serve no more than 50 dwellings unless an alternative emergency access route, to serve also as a pedestrian and cycle route, can be provided**”pages 126 & 127

In both instances secondary emergency access is required where there is either not a short interconnecting link or in excess of 50 dwellings in a Cul-de-Sac configuration. Saint Andrews Gardens currently comprises 56 dwellings and the proposals in the local plan will increase this to 107

Adoptable Highways

Regulation 19 of the Draft Local Plan under SAP36 (Saint Andrews Gardens) states “4.245 The site is made of of two parcels of land but should be designed and implemented as one contiguous scheme, where possible. Each phase of development, regardless of ownership, **shall provide adoptable highways and services up its boundaries** to enable subsequent phases to be delivered. No ‘ransom strip’ or other gap should be left between the highway and the site boundary”

However, I note that under the current planning application on this parcel 22/01207 the Rebus planning statement (RS/0731) page 28 section 9.6 “The highway statement addresses access geometry, **confirming that it is the developers intention not to offer the highways for adoption all be in that they will be constructed to adoptable standards**”

Under the current application 22/01207, Jackson Turner + Day “Existing Lower Site Sections” project 1789 drawing 004, shows spot heights across the lower site. Looking at section A, the end of the existing road at the edge number 54 St Andrews Gardens is shown at 115.99 meters and immediately the other side of the existing substation on the same section A is 113.02 meters. This indicates a fall of virtually 3 meters in a linear distance of 20 meters. This equates to an incline of 1 in 6.6 or 15% or 8.53 degrees. It may be possible to lengthen this access into the site to reduce the gradient however the site continues to fall.

Kent County Councils “Kent Design Guide- Step 3 Designing for movement states “ Minor Access Way which generally serve a maximum of about 50 dwelling (or 25 if a cul-de-sac). These are for access by low pantechnicon, refuse vehicle, fire tender and cars. They should have a **maximum longitudinal gradient of 6% to 7% it does state that gradients may only be increase if unavoidable due to local topography and alternatives can be provided for the mobility impaired**”.

Regulation 19 draft of the Local Plan does mention that the land at SHE006 rises from north to south but does not go as far as to acknowledge that this gradient exceeds the guidance for adoptable standards and stipulate that alternatives must be provided for the mobility impaired.

Construction Traffic

Aside from increased traffic post development access and the impact developing sites on local roads is an important consideration. The current proposed access under planning application 22/01207 as borne out by KCC’s responses to this application dated 25 October 2022” While routing of vehicles via A256 and Barville Road is **preferred**”. It is acknowledged in the same letter that “Wigmore Lane and Shepherdswell Road are subject reduced highway widths, pinch points and localised on street parking. Mill Lane on this approach is narrow in width. Therefore, the size of vehicles and timings of deliveries is paramount.”

Aside from KCC’s comments it is noted at the north end of Wigmore Lane Road adjacent to multi panel UK and Bakkavor Salads the proposed route is designated and signposted as “Unsuitable for Heavy Goods vehicles”. The route beyond these signs to St Andrews Gardens stretches for 2.2miles. It initially narrows down under some tree cover which frequently has poor visibility due to sunlight, this section isn’t truly two way and care is needed to squeeze past other vehicles. Once through the narrow tree lined section the road opens up passing through Eythorne. There are however parked cars on one side and speed humps. There is a school crossing at the junction of Church Hill and after this the road narrows again before becoming Shepherdswell Road and winding through to the end of Mill Lane. At this point the route is single track with passing places on soft verges. At the end of Mill Lane approaching Shepherdswell there are some blind bends and a livery where horses are common site on the road and the route finally passes through a narrow section again under low tree cover. The school busses and a large proportion of the school traffic for Shepherdswell use this route. These factors combined result in frequent stopping, reversing (sometimes for considerable distances) and jostling at numerous times of the day.

Although the designation of “Unsuitable for Heavy Goods vehicles” is not enforceable and delivery vehicles may use these routes if they have a legitimate drop off in the area. The construction of 50 dwellings will not result in intermittent access and will presumably persist for more than a year, hence the risk and potential for disruption increases as will the subsequent damage of the highway and soft verges. KCC recognise this in they response to planning application 22/01207 dated 25 October 2022” Due to the location of the site, it is considered that deliveries should be restricted to avoid the AM and PM peak periods. Moreover, the size of vehicle proposed to be utilised during construction **will need to be outlined to ensure no or limited use of HGVs and trailers**”

	This restriction is not stated in Regulation 19 of the Draft Local Plan and the statement itself raises questions as to the viability of this route for such a significant development that will take place over a prolonged period require large plant to construct roads and complete landscaping, a significant quantity of aggregate and large roof trusses to name but a few that can only be transported on large vehicles.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>The site criteria for SHE004 & TC4S082 should be ammended to mirror the other sites in shepherdswell and include a "Transport Statement. This must take into account the cumulative impact of this, and other sites allocated in this Plan on common road links".</p> <p>If the sites at St Andrews Gardens (SHE05 &TC4S082) cannot provide adoptable highways and services up to (typo in reg 19 document) its boundaries as per paragraph 4.245. Due to excess gradients with no alternative route for the mobility impaired, width of access and bondaries to the lower site or lack of secondary emergency access. The sites should be removed or the scale reduced.</p> <p>In terms of construction traffic should the site still be deemed suitable the developer should be require to provide proper hard standing suitable passing points along the route and part time traffic signals should be included on the narrowest section at the end of Mill Lane adjacent the livery operating when there are construction traffic movements.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Section 1.Category Infrastructure Delivery Plan Reference: Infrastructure Delivery Plan – Draft for Consultation October 2022 PART 1: Physical Infrastructure Theme 1: Transport SP12 - Strategic Transport Infrastructure- Local Road Network 3.39 As part of the Local Plan modelling work, the impacts of Local Plan growth on the Local Highway Network were assessed however site specific mitigation and policies need to be considered . The plan must address the adequacy of the Coxhill, Eythorne Road, Shepherdswell Roads, local road network and public transport services supporting the proposed SAP 36,37, 28, 29 and 30 developments.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

The draft local plan regulation 19 states under TI2 - Transport Statements, Assessments and Travel Plans section 10.7 the objective to ensure that traffic generated from new development can be accommodated on the highway network to promote the delivery of sustainable development. Section 10.8 states that traffic generated by development should normally be targeted towards the primary and secondary route network in the District. However other routes should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements.

In the event SAP 36,37, 28, 29 and 30 developments are implemented the Coxhill, Eythorne Road, Shepherdswell Roads will be the main route by car from Shepherdswell, Eythorne and Elvington to the A2 road network, we believe this will place significant pressure on local road traffic which needs to be addressed however there is no material consideration to implementing road improvements and assign funding in either the Dover Local Plan or SP12.

Access to Shepherdswell, Eythorne and Elvington from the A2 involves narrow single track road with passing place. Access at the top end of Shepherdswell village via Mill Lane connects to the lower end of the Shepherdswell Road restricted by road width, parked vehicles, speed humps and traffic. All access roads currently suffer from significant traffic congestion during peak commuter periods.

Shepherdswell has limited parking facilities around the village hall and local shop and heavy reliance on road parking further limits the width of Coxhill to single file traffic. Traffic bound for the Eythorne industrial estates includes a significant flow of large articulated lorries that regularly lead to partial/ temporary road blockages and significant road congestion.

The Local Plan SP12 - Strategic Transport Infrastructure focusses on improvements to the A2 highway network and key junctions only and decisions around improvements to the local road network are deferred. Regulation 19 Transport Modelling Forecasting Report, forecasts that traffic leading from the A2 through Coxhill, Shepherdswell and Eythorne, is projected to grow at 15-19% as a minimum scenario, our independent assessment based independent analysis of development proposals is this will be nearer 60%.

Analysis of Coxhill peak traffic flow conducted by Shepherdswell Speedwatch (in collaboration with the Metropolitan Police) in June and July 2022 recorded traffic flow of circa 550 vehicles per hour.

The Draft Local Plan Regulation 19 states that approved development must account for the cumulative impact of all developments allocated in the Plan on common road links. SAP 36,37, 28, 29 and 30 proposed developments will add 425 houses to the local area served by the A256 with residents needing to commute regularly to work, schools etc. during peak commuting periods. Shepherdswell has circa 700 houses so combined with the proposed plan increase of 425 houses in Shepherdswell, Eythorne and Elvington, this represents a 60% increase in property numbers which we project will be mirrored by an equivalent increase in road traffic. An increase of 60% on current commuter peak traffic flow translates to circa 590 vehicles per hour or 10 vehicles per minute along largely single-track road with road speed impacted by slow moving heavy goods traffic.

Compounding significant road congestion there is a lack of pedestrian footways in Shepherdswell leading to key routes i.e. school, local shop, health centre and village hall, peak footfall along pavement less roads occurs when traffic flow is at its highest presenting a significant road safety concern.

There are specific road access concerns relating to St Andrews Gardens (SAP 36 SHE004) a development of 57 houses served by one road access and exit point. The Local Plan Reg 19 proposes to increase the number of properties by 50 on this estate effectively doubling its size without addressing & mitigating emergency access and road safety design.

KCC's Kent Design, Creating the design, Step 3- Design recommends that minor access roads generally serving up to 100 dwellings, including those in other residential areas which feed on to it should either be a through road or, if a cul-de-sac, serve no more than 50 dwellings unless an alternative access route, to serve motorists, pedestrian and cyclists, can be provided. Previous development surveys of SHE004 access points used the Housing and Economic Land Availability Assessment traffic light system which rated this site as Amber with an assessment proviso that "secondary emergency access is required however this does not appear achievable".

St Andrews Gardens access road links into Mill Lane which is restricted at points to single track road with passing places. Mill Lane is heavily used constituting one of the main access routes to the Shepherdswell Health Centre, School and Church.

	The Draft Local Plan Regulation 19 states under section E1 that for designated industrial settlements new employment development will be supported within existing employment sites as identified on the Policies Map or on land within or immediately adjoining the settlement confines of designated settlements. While employment for villagers is essential it should be considered without a viable public transportation network such development will further challenge the stressed A256 local road network.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The Draft Local Plan Regulation 19 must propose improvements that address the adequacy of the A256 and local road network and public transport services supporting the proposed SAP 36,37, 28, 29 and 30 developments and ensure funding for these needs is addressed in the final plan.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>I write in support of the comments made by Shepherdswell Parish Council.</p> <ol style="list-style-type: none"> 1. Evidence errors – the Parish Council points out several inaccuracies in the Local plan statements, un relation to various local amenities (which do not actually exist), and the village’s location, which are rather worrying. The Council is also concerned about the validity of the traffic survey results in relation to these surveys being taken just pandemic when traffic flows were significantly lower – and this is very significant because a main objection to the house building is the inadequate road structure. The Council quotes current Speedwatch reports which show traffic flows much higher than those recorded with a peak of 224 vehicles per hour – and which was measured one way only. 2. Highways infrastructure and transport - the existing local highway network is already inadequate for the number of houses in the village and surrounding areas. More houses will mean be significant adverse effects on the already heavily congested and dangerous Cox hill crossroads by the Co-op, and Coxhill road running through Shepherdswell, This road is already over stretched, and extensively used as a rat run between the Sandwich/Dover main road and the A2. There will also be a knock-on effect from the 350 houses planned for Eythorne, which will make this problem even worse – these should not be built – plus the expansion of the industrial estate planned there. SAP 37 transport statement specifies that the development must account for the cumulative impact of all developments in this plan on common road links, but the proposed plans for Elvington and Eythorne, which will obviously significantly increase traffic numbers, utterly invalidate this statement. Nothing can be done about all this, unless you build a by-pass, for which funding will simply never be available, and which would be undesirable anyway, given the rural and beautiful nature of the area. <p>Kent Highways has no cash to undertake mitigation works – such as improving junctions and dealing with congestion caused by on-street parking – and the number of houses will not generate enough Developer funding to pay for such attempts to resolve these problems. . There is also a problem with sustainable transport – there are no cycle tracks, and the bus service has recently been cut – and there are no footways or cycleways along dangerously narrow and bendy roads. The Coldred SHE013 proposals suffer, too, from such drawbacks. Again, there are no funds to improve these problems, despite the (unachievable) aspirations in the Local Plan. While there is a railway station at Shepherdswell, disabled access urgently requires improvement.</p> <ol style="list-style-type: none"> 3. Sewage and drainage – the Parish Council statement explains fully the serious problems already existing here, and , as a DDC ward Cllr, I am currently trying to get something done about the regular flooding problems affecting the houses next to St Andrew’s development which will worsen the situation. Kent County Council say the Developers should pay for this but there are insufficient funds – and Kent Council has no plans for new drainage systems, as far as I am aware. The Local Plan does not deal adequately with these problems. 4. Village amenities – the Parish Council outlines the problems with the limitations on these – especially with regards to local school places, and inadequate transport arrangements for pupils to get to the secondary schools in Dover, Deal or Sandwich. Access to the shops, school, village hall etc are difficult and dangerous because of some roads without proper footways, such as Church Hill. The capacity of the local surgery is also clearly insufficient to cope with existing demand.
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The Highways, draining and public transport problems are understated in the Local Plan, where there appears to be no coherent strategy for achieving improvements in the rural road network or rural transport or local drainage – or for achieving sustainable travelling through cycling, walking and public transport use. We need a specific strategy on these important matters, which should clearly set out the problems and solutions - and, most importantly, identify clearly where funding is to be obtained, as there appears to be no future funding available in the foreseeable future for any of these areas from Dover or Kent Councils, or the Government. Aspirations are meaningless without a realistic chance of implementation – which means CASH. Without such strategies, there should be little or no further housing development in this rural area of Shepherdswell and Eythorne, and attention should be focused on other larger villages - with better facilities than Shepherdswell, and better road and transport links - and on brownfield sites.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note</p>	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>1) LOCAL CENTRES</p> <p>Shepherdswell is designated as a local centre [para 4.209], alongside Eythorne & Elvington, Eastry, Ash, Wingham, St Margaret's and Kingsdown. This paragraph contains a particularly egregious error in stating that <i>"Shepherdswell is located to the north of Dover just to the west of the A2."</i> Shepherdswell, in fact, lies to the east of the A2, and it is distressing that a Local Plan could be so geographically inaccurate.</p> <p>Unfortunately, this is not the only inaccuracy in assessing Shepherdswell as a "local Centre." When this exercise was first presented under the Regulation 18 consultation, various mistakes in the scoring of Shepherdswell were identified and reported by consultees. It appears that only some have these have been corrected in the latest draft. The following errors and inconsistencies remain :</p> <ul style="list-style-type: none"> • The local bus service is described as "infrequent" in para 5.1 of the Rural Settlement Hierarchy Supporting Document, but has been strangely up-graded to "regular daily" in the scores table presented in para 5.2. There is also no acknowledgement that two services have subsequently been withdrawn • The "pop-up" Post Office which visits the village briefly on two days per week is accorded the same score as permanent Post Offices in other villages • Two points are "awarded" for unspecified services, without further explanation • There is no recognition that neither the local pub nor café serve food in the evening <p>In para 4.4 of the document, it is acknowledged that the village survey data is taken from the Council's Authority Monitoring Report of 2018/2019, which was not up-dated due to Covid restrictions, and they have relied on Parish Council input for any up-dates and corrections. Such an ad-hoc approach to data collection and verification is neither reliable nor sound.</p>

The Settlement Hierarchy scoring system only records the “advantages” of the different communities ; there is no consideration of the negatives. In that context, the road infrastructure for Shepherdswell and Eythorne/Elvington is markedly inferior that of the other “local centres.” The other centres are either directly crossed by main “A” roads, or have such roads in close proximity and running parallel to the main axis of the community – thereby providing easy access.

All access to Shepherdswell and Eythorne/Elvington is by small rural lanes, particularly the narrow, tortuous and congested road known variously along its course as Coxhill, Eythorne Road, Shepherdswell Road, Wigmore Lane and Barville Road. The problems with this route are well known, but are almost wholly ignored in the draft Local Plan. Indeed, the silence of the Plan on the critical subject of the area’s rural road network is another example of why it is “unsound.”

2) HOUSING SITE ALLOCATIONS

In the previous version of the draft Local Plan, submitted for Regulation 18 consultation, two large sites (then designated SHE003 and SHE004) were ear-marked for housing development. Whilst it is pleasing to see that SHE003 has now been dropped, it is illogical and unsound to that the other site (now renamed SAP36) has been retained, and, indeed, quietly enlarged, even though it was opposed on the same grounds as SHE003.

SAP36 has, in fact, been considered – and rejected – for housing development in the past, with previous DoE inspectors highlighting the potential damage to the landscape and environment, and the problems with the transport infrastructure. Over the years, the environmental issues have not changed, but the transport problems have got worse.

The proposed access to SAP36 would be via St Andrew’s Gardens. St Andrew’s Gardens can only be accessed from Mill Lane. Mill Lane itself, at its north-eastern end, is a narrow single track lane, whilst, at its south-western extremity, it connects, at the village green, with the narrow and congested Church Hill and the small back road from Coldred. It is, therefore, impossible to access St Andrew’s Gardens other than by single-lane, constricted roads that are inadequate for existing levels of traffic. St Andrew’s Gardens currently contains approximately 50 dwellings, meaning that the planned development would double the volume of traffic needing to use this route. An on-site traffic survey conducted on 11 November 2022 suggested that, based on current volumes, an extra 250 vehicles would enter/leave St Andrew’s Garden’s during peak times. In rejecting a previous planning application, a DoE inspector wrote that “the layout of St Andrew’s Gardens is too constricted and too tortuous to provide free and safe access to any considerable number of dwellings.” Nothing has changed since that comment was made.

It has also become clear that the actual carriageway within St Andrew’s Gardens itself was constructed to a very basic standard, and, as a result, the tarmac surface is noticeable pitted and pot-holed, and in need of regular repair. It is inadequate for current levels of usage, and would not be capable of supporting a doubling of traffic volumes, nor, indeed, the passage of the heavy machinery that would inevitably be part of any construction project.

The draft Local Plan, in its existing form, makes no attempt to address these issues, although they have been extensively explained in the past.

The traffic problems are not confined to the immediate vicinity of the proposed development site. Vehicular access to Shepherdswell is, with the exception of a couple of small country lanes, confined to the road running from the A2, just west of the Lydden junction, through the villages of Shepherdswell and Eythorne to the A256, south of Tilmanstone, and known variously along its course as Coxhill / Eythorne Road / Shepherdswell Road / Wigmore Lane / Barville Road. This road is itself a minor route – narrow, frequently tortuous, beset by poor sight lines, and, in many places, unable to accommodate two lines of traffic at the same time. It is deemed unsuitable for heavy goods vehicles. The road is already over-used and heavily congested, with daily instances of traffic queuing at the various bottlenecks, and the occasional “confrontation.” The local topography and the proximity of existing dwellings to the road’s edge excludes any possibility of a significant up-grade.

This is the same route that would have to serve the 300 new houses proposed for Eythorne and Elvington (SAP28 and SAP29).

The draft plan blandly suggests that “a review of the impact on the surrounding rural road network” should be undertaken as part of any planning application. Surely, any review should be conducted **before** the sites are accepted for possible development.

Similarly, alongside the transport infrastructure problems, any substantial housing development in Shepherdswell would put extra strain on a sewerage and waste water system that is already unable to cope, a local primary school that is currently over-subscribed, and a doctor’s surgery that is having to send patients to Dover for treatment. Again, the draft local plan is silent on how such problems can be handled.

It is again necessary to draw attention to inaccuracies and misinformation contained on the Plan’s evidence base. For example, the Sustainability Appraisal Appendix contains – in more than one place – the assertion that site SAP36 is within 500 metres of the local railway station. It is not. GPS data clearly shows that it is almost one kilometre from the site to the station utilising the most direct road and footpaths.

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>- Correction of persisting errors in the Local Centre scoring system, and correction of errors in the evidence base</p> <p>- Recognition of not only the advantages, but also the negatives, in assessing whether a community qualifies as a Local Centre (e.g. deficiencies in the local infrastructure)</p> <p>- The removal from the Plan of site SAP36 as a suitable location for future housing development.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>In the responses to the Regulation 18 consultation of the draft Local Plan, numerous inaccuracies and mistakes were reported to DDC. These were not matters of opinion, but matters of fact. It has become apparent that not all of these have been corrected in the document now under consultation. I am not, therefore, confident that the Council can be relied upon to present to the Inspector a document that is 100% accurate, and that members of the local community must have the opportunity to challenge such failings in a public forum.</p>

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Not Applicable</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails</p>	<p>We have sent 3 letters giving specific reasons why developing the above land is a bad idea. We hope you have received them. We are depressed and helpless at what you propose, so this email is an emotional reaction to the plan, which, as you are human beings, we hope you may accept.</p>

to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This land is the only green space in the village and it is right at the centre. It is ancient meadow land and its beauty and what it means to the community is beyond words. If you allow development on this land you will destroy something real and tangible and you will be destroying the village itself. Previous generations knew this: that is why it has never been built on before.</p> <p>Wars will end; diseases will be cured; poverty can be abolished - but once you build on this land it is dead - finished. What has contributed immeasurably to the character of the village and the wellbeing of its inhabitants over hundreds of years - and continues every day to do so - will be gone forever. PLEASE PLEASE PLEASE remove it from your Plan. In hope</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	PLEASE PLEASE PLEASE remove it from your Plan

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 36
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The recent policy change on mandatory numbers for new housing means that individual developments for houses should be reviewed and that current plans are not sound, they do not comply with policy.</p> <p>The South east is under pressure and does not have the infrastructure to cope with the demands that new housing developments bring. It is one of the driest counties and so water stress will become a more serious issue.</p> <p>In Shepherdswell access from the A2 is by two narrow lanes. Both are unsafe for pedestrians, cyclists and horses. There is nowhere local for people to ride. I often struggle to walk the 50 m from the village hall to the shop with my two dogs. There is no traffic calming and cars do not slow down.</p> <p>The many extra houses expected at Elvington will increase this traffic as will the houses planned for the village itself. This is a major concern. I support the Green Party proposal for safe, well lit cycle lanes to link villages with stations but this does not help dog walkers.</p> <p>People move to the countryside to be able to access and enjoy green spaces but this is difficult with so many cars. We don't see children playing out as they used to.</p> <p>I am concerned about the destruction of hedges for new build projects. Tho the plan proposes to maintain as many as possible we have recently seen the ripping out of a perimeter hedge for the community trust housing next to the village hall. I do not trust that hedges and trees will be maintained and emphasise that mature hedging and trees offer so much more habitat than new planting which would need to be on a much greater scale if it is to offer the same benefits in terms of carbon capture as well as habitat.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Policy on housing has changed and so plans should change to comply with this. The housing which our village needs is sheltered housing for the elderly, many of whom are single, living alone, wanting to stay in the village. Providing purpose built accommodation for them would free up many houses for families. Have the needs of the often ageing population of villages been considered? A limited number of affordable housing is included in larger developments but this does not meet the needs of our ageing villagers.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

A pilgrim route from Canterbury to Rome. Pilgrims' appreciation of this view can be read in the Visitors' book kept in St Andrew's church.</p> <p>The proposed development would obliterate historic views and be an intrusion into the Downs landscape.</p> <p>The additional housing proposed in Regulation 19, would create massive pressure on Mill Lane in each direction. It is mostly a single track lane.</p> <p>only recently a bus caught fire and caused considerable damage to boundary hedges and trees. It could so easily have affected nearby properties.</p> <p>Additional traffic generated by additional housing and the constant heavy vehicles carrying building materials, would be an impossible intrusion to villages living in this area.</p>

Highway Agency review required due to only single lane access to site unsuitable for vehicles over 7.5 ton. Access to site via residential area not suitable for through construction traffic and large vehicles. Site is situated above old mine workings mortgage lenders require indemnity in place due to possible subsidence. Due to St Andrew's Gardens elevation water supply is pumped under pressure. This means water pressure in the area is very poor. Southern Water are unwilling to address also water supply from the chalk aquifer is depleted and southern water are unwilling to invest in alternate water collection methods.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Consultation does not conform to the statement of community involvement. Nobody has attempted to discuss with the people affected by TC45082, or with the protest group (SAD). The landscape impact is not met by the sustainability assessment SA10 or SA11. There will be substantial wildlife impact (7205), including loss to habitats. This area is a red high for migrating birds. Also disturbed will be bats and slow worms which are protected by fame and wildlife conservation trust law. Water resources and sewage have not been taken into account. Also, the impact on additional traffic in the village and yet more pollution and congestion in the narrow lanes. Perhaps rejuvenating Dover town rather than tearing up more green countryside would be more appropriate!!!
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness

	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>As residents in Shepherdswell for 22 years we love living in this quite village. It has its problems of course, excess traffic being a main one. This has been mostly caused by the removal of the Barfreston turn off on the A2, causing all traffic to Eythorne/Barfreston etc to come through Shepherdswell. New housing in the proposed sites would certainly add to this. Most difficult would be Mill Lane, Church Hill, Village Green, into Eythorne Road at the crossroads. At present its almost impossible to get through to Hazling Dane off Mill Lane during pats of each day. Bus services have been curtailed greatly over the 22 years we've lived here. The drivers over those years have been brilliant dealing with regular 'snarl-ups' at the village green, overhanging branches, parking on narrow roads in and out of the village. So, the extra homes proposed for St. Andrews Gardens would not only cause more problems, making it even harder for folks to access their homes, or go about their business.</p> <p>We live at the bottom of the village and have always been grateful for the recreation ground and the fields that back onto it up to St Andrews Gardens. The reason being that huge amounts of water pour down Approach Road when it rains, into Eythorne road. The Rec and fields act as a catchment to absorb a lot of this water. If this 'flood plan' is built on built on, all that water will incur huge legal implications for the homes that will be affected downhill (even flooded). This would affect all Roads including Church Hill, Hill Avenue, Approach Road, Eythorne Road, Station Road, Meadowview Road, Bernards Gardens etc. Something surely to be seriously considered.</p> <p>For over 30 years, Aylesham has had permission to greatly expand their boundaries. They have built some new homes that seem to enhance their village and give the new and old dwellers good access to the A2 and a very large village green with excellent shops and space for many more. The roads within the village are wide and spacious, very different from Shepherdswell. We have just one shop and extremely limited parking and now space for any more shops. Our roads are narrow and often just single track. Traffic problems can cause tempers to fray, and an addition of more people, who deserve to live in a harmonious environment may not be able to.</p> <p>Overall, we think that this plan for development in Shepherdswell is completely unsuitable.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP36
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We have sent 3 letters giving specific reasons why developing the above land is a bad idea. We hope you have received them. We are depressed and helpless at what you propose, so this email is an emotional reaction to the plan, which, as you are human beings, we hope you may accept.</p> <p>This land is the only green space in the village and it is right at the centre. It is ancient meadow land and its beauty and what it means to the community is beyond words. If you allow development on this land you will destroy something real and tangible and you will be destroying the village itself. Previous generations knew this: that is why it has never been built on before.</p> <p>Wars will end; diseases will be cured; poverty can be abolished - but once you build on this land it is dead - finished. What has contributed immeasurably to the character of the village and the wellbeing of its inhabitants over hundreds of years - and continues every day to do so - will be gone forever. PLEASE PLEASE PLEASE remove it from your Plan. In hope</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	PLEASE PLEASE PLEASE remove it from your Plan.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SHE004: The whole proposal is entirely inappropriate for a small village and will seriously undermine its infrastructure and traffic flows, accessibility etc. as well as destroying or damaging its character. <ol style="list-style-type: none"> 1 Transport access – from Mill Lane to Left Road (i.e. towards North) narrows substantially – becoming a single track lane; to the right south towards the green would cause congestion where building development has already taken place and block of houses is being constructed now (east side of Mill Lane) 2 Infrastructure – will rely on already existing infrastructure which is already overloaded (drainage etc.) 3 Amenities – schools, public transport, shops – services in general are currently designed for, or appropriate for a village – not an urban development of anything more than half a dozen houses.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I do not consider there has been a commitment to public engagement by DDC. I am a local resident that will be most affected by this particular proposal/plan. I have never been written to or mailed a paper copy of the Local Plan as requested from DDC. It is, and has been, the village group Shepherdsweil Against the Development that made me aware of the development and continues meaningful public engagement. The number of proposed dwellings has been increased to 50 since regulation 18 and again no contact from DDC regarding this even though I submitted a representation during Reg 18.</p> <p>Concerns that have been raised are being disregarded including an already overloaded waste water/sewage system causing some flooded gardens and an already low water pressure issue causing some types of boilers to malfunction.</p> <p>The road infrastructure is inadequate to support this development. The main access roads to Shepherdsweil are single tracks with passing places. These roads are already in a constant state of disintegration. With the building of a further 50 houses, getting on towards another 100 cars will be added to an increasingly congested village centre. The lack of pavements on Church Hill and toward the Village Hall should also be considered for the road safety of pedestrians.</p> <p>The proposed development in Elvington should also be taken into consideration when assessing traffic volume along Eythorne Road through to the A2.</p>

	<p>The extensive long ranging views from the North Downs Way located near to the proposed site affords magnificent views, which stops walkers in their tracks, to be admired, enjoyed and soaked in.</p> <p>These views will be eradicated from the landscape, currently to the benefit of all, to become the 'property' of a few private citizens.</p> <p>The detrimental impact on the landscape and the wildlife that exists alongside human neighbours is being overwhelmingly underestimated. Already, with the felling of trees at Mill House, the variety of birds visiting has diminished, notably the green woodpecker.</p> <p>The historic reasons that were cited for rejecting previous planning applications are even more relevant today. Especially being able to easily access open countryside for exercise, clean air and fitness. Very relevant to our already overcrowded modern life is the benefit to positive mental health and wellbeing which is widely recognized. The development will be to the detriment of citizens and wildlife residing in and around St Andrews Gardens.</p> <p>It is a plan for unjustified new build housing on a green field site which should be retained as the heart of the village for grazing horses and as a natural habit for wildlife, flora and fauna.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Delete SAP36 – the allocation of land for 50 houses to the North and East of St Andrews Gardens and adjacent to Mill House and all references relevant to this site from the plan to comply with Council's Sustainability Assessment and to comply with the Council's Statement of Community.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The research conducted into the proposed plan has not been carried out properly. Especially into the impact of traffic around Mill Lane and access into and out of St Andrews Gardens. Impact on water supplies, sewerage and area of outstanding natural beauty along the North Downs way
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	DDC Vision is environmentally sound transport access road to Shepherdsweil are in Pieces, especially along Mill Lane single Lane. Increased road traffic will cause more congestion along Mill Lane and Church Hill. The roads cannot be made wider, safety consideration for school children at Sibertswold Primary School should be taken into account. Water pressure in St Andrews Gardens is already low, there are problems with sewerage. Also the proposed buildings are close to the North Downs Way, and area of natural beauty.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I expect councillors and planners to do their job and enforce the obligations of developers to develop safely and to upgrade and future proof infrastructure.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	You intend to allow the building of over one hundred properties, at the end of my road. The infrastructure is not there. There is problems with sewerage the bottom of the village have overflow problems. There is not a pumping station in Shepherdswell, the nearest is at Coldred and that has to be pumped out every week. Water pressure is insufficient if anymore properties are built the gas boiler will not work. We had this problem some years ago. Access roads are inadequate, they are lanes not main roads. Safety for people with children no adequate pavements the school is well attended but cars and traffic around the village green is dangerous.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	My recommendation would be to look for alternative land not in Shepherdswell given the flooding and sewage issues. Not mentioning health and safety. Also, I would like to take the opportunity to point out the signage from highways that states not suitable for HGVs or large lorries, these are country lanes not roads. This village simply isn't big enough.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>As I live in Shepherdswell, naturally, I am very concerned about proposals for housing here.</p> <p>Shepherdswell is very unique in that every road into the village is narrow and we cannot see any way of improving the infrastructure except at major cost.</p> <p>The arguments by which the proposal for houses in Westcourt Lane were rejected also apply to the proposal at the end of St Andrews Gardens. Mill Lane narrows considerably going out of the village and there have been quite a few accidents (mainly minor so will not have been reported) and we know of at least two of our neighbors who have had quite serious collisions leading to write offs of their vehicles.</p> <p>Also, as the landowner near Mill Lane does not wish to sell, all traffic (including construction traffic) will come down St Andrews Gardens and one of the access points designated is round a hairpin bend.</p> <p>The school run time is one to avoid even now as cars are parked all the way up Mill Lane to past Millfields, all round the Green and down Church Hill. It is naïve to suppose that people will walk or cycle to school. They will not, especially when it is raining. Also, the school is oversubscribed even now with families having to take their children elsewhere (by car)</p> <p>Transport in the village is very poor and I believe more cuts are on the way. Only the smaller buses are used due to access. There can be no possibility of cycle lanes, the roads are too narrow to allow for this.</p> <p>There are very few facilities in the village. We have a Co-op which is well used but has no designated parking and at busy times cars park illegally, a beauty salon and a pub which, as we all know, is probably under pressure from the financial crisis.</p> <p>The sewage system is constantly under pressure and the system cannot be fit for purpose with foul waste appearing in gardens in Eythorne and The Glen</p> <p>The train station is an asset to commuters but not so much so for shoppers, especially if you live in the top of the village. Walking up steep Church Hill and Approach Road with heavy shopping bags is not an option.</p> <p>To conclude, I feel that because of the above arguments, Shepherdswell is not the place for large-scale developments, and I hope you will take this into consideration.</p> <p>I also wish to express my concern about developments at Eythorne and Elvington. Eythorne Road in Shepherdswell is very busy during the rush hour and this will only get worse.</p> <p>If builders wish to build estates, they must be prepared to improve the infrastructure at their expense.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Shepherdswell is not the place for large-scale developments, and I hope you will take this into consideration. If builders wish to build estates, they must be prepared to improve the infrastructure at their expense.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	Many residents have responded to the Dover District Council Local Plan. During public consultation the council has been made aware that while there is a recognised need for limited housing growth there are very strong concerns regarding the proposed sites in both Shepherdswell and Coldred and the consequential impact of proposed housing developments in the neighbouring villages of Eythorne and Elvington.

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

New housing without adequate local infrastructure puts significant strain on local amenities such as medical services, school and playgroup places as well as increasing traffic on our roads. The existing sewerage system is already overloaded and any future developments will only exacerbate this problem.

Far from being "sound" the Dover Local Plan is flawed. It contains many inaccuracies including:

- Shepherdswell now only has one public house.
- Shepherdswell is stated as being to the west of the A2 when in fact it is to the east .
- Traffic measurement flows were taken just post pandemic and clearly show a flow much lower than the parish's normal traffic volume.
- The plan states there is a bus service along Eythorne Road but this service was withdrawn many years ago and most other services have been withdrawn this year.

One must question the validity of much of the data and evidence attached to the plan, and how (and when) it was collected. Have DDC representatives visited the Parish in recent years to carry out surveys?

If development of any kind is to be permitted it should be linked to a S106 agreement to improve the facilities within Shepherdswell and Coldred.

The plan indicates that Dover District Council can fund parish councils from S106 monies when a case is made that this is a good use of funds. Shepherdswell with Coldred Parish Council would like to make a case for funding of community facilities, including improvements to the village hall, its parking facilities, the recreation ground, the cemeteries and improvements to the local school.

Sewerage and Drainage. The sewerage and foul water from the majority of properties in Shepherdswell drains into sewers connected to a pumping station at the rear of the East Kent Railway Station. Surface water from roads and paved areas also drain into these sewers and can add considerable load to the pumping station equipment . When the pumps cannot cope with this excess flow, foul flooding occurs in the houses and gardens of properties situated in The Glen. This has already been evidenced by frequent calls to DDC Environmental Services and Southern Water. Permitting the proposals at St Andrews Gardens will necessitate an immediate up-grade to this system to enable it to cope with the increased load, not even taking into account climate changes that result in increased rainfall.

Highways. As stated the current highway systems within our parish are totally inadequate for the current traffic levels and there are already congestion problems, especially with large and farm vehicles travelling through and trying to park within the villages. When we take into account new housing planned for our parish and also for Eythorne and Elvington (which will add even more vehicles from the 350+proposed dwellings there, travelling through Shepherdswell and Coldred to reach the A2), the traffic flow will again increase adding further to congestion and delays. Emergency response vehicles will be subject to these delays putting lives at risk. As previously stated traffic measurement levels were taken just post pandemic and clearly show flows much lower than normally experienced. Current Speedwatch reports show traffic flows much higher than those recorded with a peak of 224 vehicles per hour which was measured one way only. The highest speed recorded in the 30 mph limit was 64mph and 52mph in the 40 mph limit. These are current figures from November and December 2022.

Comments regarding poor access via single track roads with passing areas have been made by several residents. These narrow lanes inevitably lead to increased congestion and pollution.

We are advised that the Highways Department have no funds available for highway improvements and the current level of maintenance is inadequate. Shepherdswell has limited parking facilities near the village hall and Co-op area which frequently leads to congestion. This added congestion compounds the problems caused by the lack of pavements on three of the four roads at that junction. An expansion of the industrial site in Eythorne will undoubtedly lead to yet more congestion problems unless all heavy goods vehicles accessing that site are prohibited from using any access other than from the A258. There is already a problem with partial/temporary road blockages leading to significant congestion.

Transport. Whilst we are fortunate to have a railway station it does not offer reasonable access to disabled persons or those with limited mobility- it is difficult to envisage how access can be improved.

Most bus services have now been withdrawn apart from school services so residents will have to rely on cars for shopping etc. There are no dedicated cycle paths and many cyclists are reluctant to use their bikes because of this traffic congestion.

Those residents who want to use the train services must endure walking to the station on roads with limited or no footpaths. Residents in Eythorne and Elvington will have to either use cars to get to the station or walk along a very busy main road - again without footpaths.

SAP 37 transport statement specifies that the development must account for the cumulative impact of all developments in this plan on common road links. This makes a nonsense of the proposed plans for Elvington and Eythorne which would significantly increase traffic flow.

	<p>Village Services. The surgery situated in Mill Lane is oversubscribed and patients are very often referred to the Dover branch . There is no “walk in “ service .</p> <p>The village school is again nearly full with no current plans for extending present facilities. The location of the school causes severe traffic congestion at core times. Many parents taking their children to school have to walk up Church Hill which is a narrow, busy road with no footpath.</p> <p>The nearest secondary schools are located in Dover and parents experience considerable difficulty in transporting their children to school.</p> <p>Any proposed development around the Mill Lane/ St Andrew's Gardens areas do not comply with Policy T12-Transport Statements as this clearly states- “Developments that would generate significant traffic movements must be well related to primary and secondary school network. Proposals which would generate levels and types of traffic movements resulting in severe cumulative residual impacts in terms of capacity and road safety will not be permitted”. A large proportion of traffic from these proposed developments would have to pass along Mill Lane and Church Hill to access the A2. Because of the built up nature of these roads mitigation will not be sufficient to alleviate the impact of increased traffic.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>If development of any kind is to be permitted it should be linked to a S106 agreement to improve the facilities within Shepherdsweil and Coldred.</p> <p>The plan indicates that Dover District Council can fund parish councils from S106 monies when a case is made that this is a good use of funds. This is simply too big and there are few, if any improvements that could be made to alleviate this . Allowing for an additional of a minimum vehicle use of , 4 journeys household per day x57 = 228 additional vehicle movements. More than the suggested 20% increase predicted . Existing traffic movements recorded in and out of St Andrews Gdns recorded 246 vehicles movements during a period 6am -9pm, Speedwatch have recorded a total of 130 vehicles coming into and exiting the village along Mill Laned during the period 7,30am-9.30am See photos attached of the issues of congestion along Mill Lane where the road is at points single track. This being the suggested exit proposed to Eythorne/Sandwich /256 . Should vehicles go in the opposite direction to Church Hill the road allows for single traffic at most times of the day. There is no footpath and pedestrian access is dangerous. Traffic would then enter on to Coxhill (see further details under Sec SAP37) KCC report states The development of this site for residential use would place additional pressure on the surrounding highway network, in particular St Andrews Gardens, Mill Lane and Church Hill. KCC Highways advice should therefore be sought as part of any development proposals to ensure that any cumulative impacts can be mitigated The local bus has recently been given a short term reprieve after Stagecoach decided the route was not viable and as yet no plans have been formulated to offer residents a viable alternative. Unless this is forthcoming current and any future residents will use their cars DDC acknowledge climate change issues do need to be tackled in a holistic manner There are no suitable cycle paths and in addition being a rural community we have many horse riders using the lanes which adds to the worry that more cars equals more dangerous conditions. The Transport Report whilst acknowledging the issues does not provide the necessary solutions. <i>(DDC note: This representation was originally made against the Infrastructure Delivery Plan consultation document but has been duplicated in relevant places against the Local Plan due to the specific site allocation/policy references made)</i></p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Names and addresses redacted. Will be made available to the Inspector on request. Group rep 111 Shepherdsweil residents</p> <p>1.1 This representation is presented on behalf of Shepherdsweil against the Development (SAD). It addresses specifically SAP36: the site allocation of Land to the north and east of St Andrews Gardens and adjacent to Mill House. It is presented by the following:</p> <p>[Names and addresses redacted]</p> <p>It is signed additionally by the over one hundred Shepherdsweil residents listed at the end of the representation. [Redacted]</p> <p>1.2 SAD was established in the autumn of 2019. SAD aims to ensure that villagers are engaged on issues relating to planning, the environment, sustainability, services and other issues that impinge on the quality of life. The group is not against development per se, but its aim is to oppose 'inappropriate and exploitative development in our village'. Since 2019, SAD has organised regular public events in the village, including a meeting of 400 residents in October 2019 (photograph redacted). During the Regulation 18 consultation, SAD organised events and discussion in the village, including zoom meetings, distribution of questionnaires, consultation boxes in the Co-op etc. Its members drew up the Parish Council's submission to the Regulation 18 Consultation. The group runs a Facebook page with close to 500 members. This Representation was drawn up after a consultation meeting attended by 60 residents in the Village Hall and then circulated for comments and amendments amongst supporters of SAD.</p> <p>2. We do not consider the Local Plan to be sound.</p> <p>3. We consider it unsound on the grounds that it is not been positively prepared, not justified and is not consistent with national policy.</p> <p>4. We do not consider the Plan to be legally compliant.</p> <p>5. We accept that the Plan complies with the Council's Duty to Cooperate.</p> <p>6. We consider that SAP36, which allocates land for 50 houses to the north and east of St Andrews Gardens and adjacent to Mill House, is unsound and not legally compliant for the following reasons:</p> <p>6.1 To be legally compliant the plan should follow the Council's Statement of Community Involvement (SCI). This includes a commitment to public engagement 'to include people whom we consider would be most affected by the particular proposals or plans, and where possible we will include known interest groups' (p.3). During the Regulation 18 Consultation there were 191 representations from 179 consultees on the proposed site allocation SHE004, which was made up of two parcels of land and a proposed 40 new dwellings. This number of comments is significant. Of the comments, 167 were objections and only 3 were agreement.</p> <p>6.2 The Regulation 19 draft makes some attempt to address the comments from consultees. The issue of wastewater was raised by many and Regulation 19 acknowledges the need to address the issue – though the details of how this will be done remain vague. But other main concerns raised by consultees are not seriously addressed. These are: character of the area (raised by 103 consultees), tree landscape impact (92 consultees); habitats impact (68); highways (167). Some residents who made comments received a standard letter as a reply, but many did not.</p>

6.3 SAP36 in the Regulation 19 draft has made significant changes to the SHE004 proposal. These increase the size of the site and adds a new parcel of land (TC4S082). They also increase the proposed number of dwellings to 50. Despite the significant number of representations about this site, there has been no attempt to discuss the impact of these changes in the Plan with those 'most affected' members of the community or their representatives, including 'the known interest group', SAD.

6.4 To be sound, the proposal must comply with the Council's Sustainability Assessment objectives. SA 10 is to 'conserve or enhance the significant qualities, fabric, setting and accessibility of the District's historic environment'. SA 11 is to 'conserve and enhance the special qualities, accessibility, local character and distinctiveness of the District's settlements, coastline and countryside'. In relation to SA10, the Draft Plan recognises 'minor negative effects' (7.207). 3 In relation to SA11, the Draft Plan concedes that the proposed site has 'potential to moderately affect the District's landscapes, townscapes and seascapes'. It is our contention that these desk-top surveys underestimate the negative effects of SA10 and the 'potential' damage in relation to SA11. They ignore evidence provided from local residents during the Regulation 18 consultation.

6.5 Definitions of 'historic environment' include not only historic buildings, but a sense of location, of space and of past historical events. The proposed site contains these qualities. It is one of the few remaining spots in the Dover district granting residents easy access to view the eastern and northern Kentish coastline (See figure 1). The historical record shows the significance of this – or nearby now inaccessible vantage points – for Kentish history – some examples going back ten centuries. More recently, in 2012 the site was the assembly point for many local residents to view the demolition of the Richborough Power Station towers. The inclusion of the site would obliterate this historical viewpoint for the community, at best turning it into a private place for particular residents.

6.6 The site, as the Draft Plan notes, opens onto 'open rural countryside'. In so doing, it enables a sense of space that provides character and distinctiveness, as well as a sense of well-being. These qualities have previously been recognised by planners and Her Majesty's Inspectorate. Rejecting a proposal for building on the site in 1991, the Inspector noted: From my visit to the site and its surroundings and from the representations made, I consider the principal issue to be the impact of the development on the character and appearance of the countryside around Shepherdswell [...] If the development were permitted, it would expand the confines of the village into the open surrounding downland. [...] In my view, the scheme would create a harmful, visual intrusion into this attractive area, spoiling its character and appearance. (D.G. Hayes, Planning Inspectorate, Department of the Environment, 31 October 1991)

An earlier assessment noted: The development of this site would involve the sacrifice of considerable assets in respect of landscape. From a distance such development would be plainly seen occupying what is now open hillside upon which only very limited skyline building impinges, and the development on the site would also add to this to a limited degree, but the more serious loss would be in respect of the magnificent outward views now enjoyed from the 2 public footpaths which cross the site one of which is of national importance. S. M. J. Wallis, Department of the Environment, 22 May 1974, DDC CH/6/72/195.

Despite changes in planning laws, these assessments remain relevant. They are not 'outdated'. The inclusion of site SAP36 would be an inappropriate development that would have – not a moderate – but a serious effect on local character, distinctiveness and the landscape. The photos in the Appendix taken from the site are testimony to this fact. 4

6.7 Highways and Access. In the Regulation 18 consultation, 167 consultees raised problems relating to Highways and Transport Infrastructure. We do not believe that these concerns have been adequately addressed in the Regulation 19 draft plan. The Council previously noted (in its HELAA document) that 'secondary emergency access' to the site 'does not appear achievable'. This was one of the reasons why the site was flagged as 'yellow', rather than 'green' on the traffic light system. Regulation 19 states (p. 166) that 'primary vehicular, pedestrian and cycle access to the whole site shall be provided from St. Andrews Gardens, and therefore development of site SHE004 must provide vehicle access and servicing up the boundary with TC4S082 to enable a main access road to be created through the whole development'. It states that 'a secondary emergency access onto Mill Lane may be achievable from TC4S082' (our emphasis). We argue that the safety of residents must be prioritised and more than the possibility of a secondary emergency access is necessary before the site's inclusion is included.

6.8 The access issue is doubly important because of the road network system surrounding SAP36 and, more generally, in Shepherdswell. The village is accessed from almost every direction by country lanes – which are generally single-tracked. Within the village, sections of roads – including Church Hill, Mill Lane, Westcourt Lane, Cox Hill – are narrowed into single-track because of parked vehicles. The main thoroughfare through the village (Eythorne Road/Cox Hill) has well-documented difficulties at certain points. The only access to SAP36 is through Mill Lane – a road accessed through single-tracked lanes in all directions and often experiencing congestion due to the school run and activities involving the Village Green. Emergency vehicles accessing the proposed site will not only have to navigate difficult lanes (Church Hill, area surrounding The Green and Mill Lane) but have only one access points into the site, posing risks to the safety of both existing and new residents.

6.9 Environmental Impact Legal compliance requires abiding by sustainability and habitats regulations. The Regulation 19 sustainability report admits that there are 'precautionary significant effects on the site concerning the policy of 'conserving and enhancing the District's wildlife habitats and species' (7.205). It accepts that the proposal will lead to a 'loss and/or damage to habitats'. The Habitats Regulations Assessment

flags the site as Red – High – as a suitable habitat for migrating birds. The report claims that these losses can be mitigated. But the report is underestimating the extent of the damage the proposed site would do to the district's wildlife and species. The NPPF (para 182) states that 'presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site' unless 'an appropriate assessment' has been carried out. There is no evidence that anything other than a desk-bound assessment has been undertaken. Residents have viewed Golden Orioles visiting the Site during migration. Raptors, such as Sparrow Hawks, are seen hunting over the Site, which is a testament to the amount of wildlife the Site provides, including insects and small mammals. Three residents living adjacent to the site have identified the following amongst the wildlife using the site as a habitat.

- Bats (a growing population, which nest in properties adjacent to the site)
- Stoats
- Badgers (**DDC Redacted**)
- Foxes
- Slow worms (utilising disused rabbit/vole burrows around the perimeter of the site) (See photo)
- Newts and toads
- Owls
- Spotted woodpeckers
- Green woodpeckers
- Pheasants (visiting)
- Herons
- Male and female bullfinches and goldfinches
- Variety of tits, including long-tailed
- Song thrushes
- Wrens
- Jays
- Flora is varied – the summer months boasting a display of wild flowers.

Two other residents living adjacent to the site write: 'The land is used by wildlife, especially birds (I feed them year round, and regularly get 20-40 'red-listed' Starlings and up to 15 House Sparrows to my bird tables each day.) There is a variety of birds that use this land, including Collared Doves, Blue Tits, Blackbirds, Crows, Jackdaws, Rooks - all traditional farmland birds. Starlings alone have decreased by 66% since the mid 70s. By depriving them of this open meadow land, rich in the earthworms and insects on which they heavily depend, we would be driving increasingly frequent extinction events. The loss of this meadow land and its wildlife would be a blow to the people of the village. There have been widely publicised reports that access to and interaction with the countryside and wildlife contributes to mental health. I know that looking out of my window each morning and seeing all the birds lifts my heart.' [Name and addresses available on request.]

The changes proposed to make the Plan sound and legally compliant are to delete SAP36, which allocates land for 50 houses to the north and east of St Andrews Gardens and adjacent to Mill House, and all other references to this site from the Plan.

8. We would like to take part in the oral part of the examination.

9. This request is necessary in order to ensure that our points and evidence are presented to the Inspector.

See attachment for photographs

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The changes proposed to make the Plan sound and legally compliant are to delete SAP36, which allocates land for 50 houses to the north and east of St Andrews Gardens and adjacent to Mill House, and all other references to this site from the Plan.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP36
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The plan does not take into account the current lack of supporting infrastructure within the village. Roads are extremely narrow and cannot support repeated heavy haulage vehicles (at one point Mill Lane is only seven feet wide) Existing lack of school spaces; lack of medical practice facilities; lack of sufficient shops for the whole village. Ruination of the small amount of existing green spaces
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Planning consent for this development is neither sound or sensitive and should be refused on the grounds of my comments at part 6
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

These have increased the size of the site and added a new parcel of land (TC4S082). They have also increased the proposed number of dwellings to 50.</p>

Despite the significant number of representations about this site, there has been no opportunity to discuss the impact of these changes with those 'most affected' members of the community or their representatives, including 'the known interest group', 'Shepherdswell Against the Development'

Sustainability Assessment Objectives

In order to be 'sound', the proposal must comply with the Council's Sustainability Assessment objectives.

SA 10 is to 'conserve or enhance the significant qualities, fabric, setting and accessibility of the District's historic environment'.

SA 11 is to 'conserve and enhance the special qualities, accessibility, local character and distinctiveness of the District's settlements, coastline and countryside'.

In relation to SA10, the Draft Plan recognises 'minor negative effects' (7.207).

In relation to SA11, the Draft Plan concedes that the proposed site has 'potential to moderately affect the District's landscapes, townscapes and seascapes.'

It is my view that these surveys do not fully recognize the negative effects of SA10 and the 'potential' damage in relation to SA11. They totally ignore evidence provided from the local community during the Regulation 18 consultation.

Historic Environment

Definitions of 'historic environment' include not only historic buildings, but a sense of location, of space and of past historical events, the proposed site contains these qualities. It is one of the few remaining spots in the Dover District granting residents easy access to the eastern and northern Kentish coastline. The historical record shows the significance of this – or nearby now inaccessible vantage points – for Kentish history – some examples going back ten centuries. The inclusion of the site would obliterate a historical viewpoint for the community, at best turning it into a private place for particular residents.

The existence of the North Downs Way and the ancient Via Francigena Pilgrim path from Canterbury to Rome appears not to be mentioned or to be of any significance.

Distinctive Character of the Landscape

The site, as the Draft Plan notes, opens onto, 'open rural countryside'. In doing so, it enables a sense of space that provides character and distinctiveness as well as a sense of wellbeing. These qualities have previously been recognized by planners and Her Majesty's Inspectorate.

Rejecting a proposal for building on the site in 1991, the inspector noted:

From my visit to the site and its surroundings and from the representations made, I consider the principle issues to be the impact of the development on the character and appearance of the countryside around Shepherdswell (...). If the development were permitted, it would expand the confines of the village into the open surrounding downland. (...) In my view, the scheme would create harmful, visual intrusion into this attractive area, spoiling its character and appearance. (D.G. Haynes, Planning Inspectorate, Department of the Environment, 31 October 1991)

An earlier assessment noted:

The development of this site would involve the sacrifice of considerable assets in respect of landscape. From a distance such development would be plainly seen occupying what is now open hillside upon which only very limited skyline building impinges, and the development on the site would also add to this to a limited degree, but the more serious loss would be in respect of the magnificent outward views now enjoyed from 2 public footpaths which cross the site one of which is of national importance.

1 M. J. Wallis, Department of the Environment, 22 May 1974, DDC CH/6/72/195.

Despite changes in planning laws, these assessments are not 'outdated'. The inclusion of site SAP36 would be an inappropriate development that would have – not a moderate – but a serious effect on local character, distinctiveness and the landscape.

Environmental Impact

Legal compliance requires abiding by sustainability and habitats regulations

The regulation 19 sustainability report admits that there are 'precautionary significant effects on the site concerning the policy of 'conserving and enhancing the District's wildlife habitats and species' (7.205). It accepts that the proposal will lead to a 'loss and/or damage to habitats'.

The Habitats Regulations Assessment flags the site as Red – High – as suitable habitat for migrating birds.

The report claims that these losses can be mitigated. But the report is underestimating the extent of the damage the proposed site would do to the district's wildlife and species. The presence of an abundance of wildlife has been observed and noted by many local residents, including (DDC Redacted)

- Badgers
- Slow Worms (utilising disused rabbit/vole burrows around the perimeter of the site)
- Newts and toads
- Owls
- Spotted woodpeckers
- Pheasants (visiting)
- Male and female bullfinches
- Variety of tits, including long-tailed
- Song thrushes
- Wrens
- Jays
- Flora is varied – the summer months boasting a display of wild flowers

Infrastructure & Highways

When Highways are a top priority for the District Council, have the infrastructure needs of the area been met?

Now that an earlier proposal in the Westcourt Lane was abandoned because of lack of a pavement, how can it be possible for heavy construction traffic to travel in and out of St Andrews Gardens area when there is not only no pavement but also highly narrow and one-way restriction on the roadway in Mill Lane?

This is simply – beyond belief and comprehension!

The impact on increased road traffic created by more residents will be considered in an area which already struggles, especially at peak parts of the day and at traffic pinch points.

The drainage system in the village is already overloaded, with a potential sewerage risk.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In order to make the plan legally compliant, section SAP36 needs to be deleted
Also, there is significance in today's 'hot off the press' news (Dec 6 2022) about the change of Central Government's housing policies which gives more freedom for District Councils to act with greater responsibility towards the local community

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Dear Sir/Madam I am writing to object to comment on the above plan. I am very concerned about the amount of developments scheduled in and on the outskirts of villages, as opposed to the government's dictum that Brownfield sites should be the main focus for developments. I note that many of the proposals in towns are designated as medium timescale whereas many in the villages are designated short term. I feel that the brownfield sites in towns should be developed first then, if needed, the villages should be considered.

As I live in Shepherdswell, naturally, I am very concerned about proposals for housing here.

Shepherdswell is very unique in that every road into the village is narrow and we cannot see any way of improving the infrastructure except at major cost.

The arguments by which the proposal for houses in Westcourt Lane were rejected also apply to the proposal at the end of St Andrews Gardens. Mill Lane narrows considerably going out of the village and there have been quite a few accidents (mainly minor so will not have been reported) and we know of at least two of our neighbors who have had quite serious collisions leading to write offs of their vehicles.

Also, as the landowner near Mill Lane does not wish to sell, all traffic (including construction traffic) will come down St Andrews Gardens and one of the access points designated is round a hairpin bend.

The school run time is one to avoid even now as cars are parked all the way up Mill Lane to past Millfields, all round the Green and down Church Hill. It is naïve to suppose that people will walk or cycle to school. They will not, especially when it is raining. Also, the school is oversubscribed even now with families having to take their children elsewhere (by car)

Transport in the village is very poor and I believe more cuts are on the way. Only the smaller buses are used due to access. There can be no possibility of cycle lanes, the roads are too narrow to allow for this.

There are very few facilities in the village. We have a Co-op which is well used but has no designated parking and at busy times cars park illegally, a beauty salon and a pub which, as we all know, is probably under pressure from the financial crisis.

The sewage system is constantly under pressure and the system cannot be fit for purpose with foul waste appearing in gardens in Eythorne and The Glen

The train station is an asset to commuters but not so much so for shoppers, especially if you live in the top of the village. Walking up steep Church Hill and Approach Road with heavy shopping bags is not an option.

To conclude, I feel that because of the above arguments, Shepherdswell is not the place for large-scale developments, and I hope you will take this into consideration.

I also wish to express my concern about developments at Eythorne and Elvington. Eythorne Road in Shepherdswell is very busy during the rush hour and this will only get worse.

If builders wish to build estates, they must be prepared to improve the infrastructure at their expense.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SHE006, SAP37 The Land at Botolph Street Farm, Shepherdswell Is not suitable for development it is a known flood plain. There are already flooding problems along CoxHill which is adjacent to this site. This site can only be accessed by single track road, with NO pedestrian path. The resultant extra traffic would put extra pressure on the current already under pressure single track road into the village. There is no pedestrian path, this part of the road is very dangerous for pedestrians. Not legal, there needs to be a full ecological species and habitat survey, over a full 12 month period 24 hours per day for; bats, wildlife and birds.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Not legal, you shouldn't build on a flood plain. Not legal, you shouldn't build where it is dangerous for pedestrians. And no room to make it safe for pedestrians.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP 36, SHE004, TC4S082, SAP37 A full species and habitat survey has not taken place, which should take place over a full 12 month period, 24 hours day and night. A wintering bird survey must also be undertaken, again 24 hours every day. The ancient pilgrim trail between Canterbury and Rome must be fully acknowledged and totally protected.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	SAP 36, SHE004, TC4S082, SAP37 to make this proposal legally compliant in Shepherdsweil, there needs to be access to the Village by roads which are NOT single track with passing places the provision of pedestrian pathways must be made. All roads leading into the Village and the proposed development are not safe or adequate for the additional traffic which will result in additional houses. All roads into the village are Single Track. The water pressure issues in that area must be addressed - a water supply is a basic human need. And the sewage/waste water problems which have existed in the lower part of the village for over 40 years must also be addressed. Extra waste water cannot be accommodated by the present system.

<p>if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>There are no local jobs, therefore the new residents would need cars to get to their jobs and the roads into and out of the village do not have that capacity. There is no regular reliable bus service and what is already in place is under threat of removal.</p> <p>The train station provides one train per hour each way. If the track between Dover and Folkestone suffers another rockfall, this will not be repaired and Dover will become just a branch line. The fast track bus system from Whitfield would not be used for the purpose of getting a fast train from Dover to London.</p> <p>No fast link to London, equals more cars on the roads which is against government policy of reducing vehicle traffic and carbon emissions CC1.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	<p>Section 1. Category Infrastructure Delivery Plan Reference: Infrastructure Delivery Plan – Draft for Consultation October 2022 PART 1: Physical Infrastructure Theme 1: Transport SP12 - Strategic Transport Infrastructure- Local Road Network 3.39 As part of the Local Plan modelling work, the impacts of Local Plan growth on the Local Highway Network were assessed however site specific mitigation and policies need to be considered . The plan must address the adequacy of the Coxhill, Eythorne Road, Shepherdswell Roads, local road network and public transport services supporting the proposed SAP 36,37, 28, 29 and 30 developments.</p>
<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Justified Consistent with National Policy</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>Yes</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Not Applicable</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The draft local plan regulation 19 states under TI2 - Transport Statements, Assessments and Travel Plans section 10.7 the objective to ensure that traffic generated from new development can be accommodated on the highway network to promote the delivery of sustainable development. Section 10.8 states that traffic generated by development should normally be targeted towards the primary and secondary route network in the District. However other routes should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements.</p>

In the event SAP 36,37, 28, 29 and 30 developments are implemented the Coxhill, Eythorne Road, Shepherdswell Roads will be the main route by car from Shepherdswell, Eythorne and Elvington to the A2 road network, we believe this will place significant pressure on local road traffic which needs to be addressed however there is no material consideration to implementing road improvements and assign funding in either the Dover Local Plan or SP12.

Access to Shepherdswell, Eythorne and Elvington from the A2 involves narrow single track road with passing place. Access at the top end of Shepherdswell village via Mill Lane connects to the lower end of the Shepherdswell Road restricted by road width, parked vehicles, speed humps and traffic. All access roads currently suffer from significant traffic congestion during peak commuter periods.

Shepherdswell has limited parking facilities around the village hall and local shop and heavy reliance on road parking further limits the width of Coxhill to single file traffic. Traffic bound for the Eythorne industrial estates includes a significant flow of large articulated lorries that regularly lead to partial/ temporary road blockages and significant road congestion.

The Local Plan SP12 - Strategic Transport Infrastructure focusses on improvements to the A2 highway network and key junctions only and decisions around improvements to the local road network are deferred. Regulation 19 Transport Modelling Forecasting Report, forecasts that traffic leading from the A2 through Coxhill, Shepherdswell and Eythorne, is projected to grow at 15-19% as a minimum scenario, our independent assessment based independent analysis of development proposals is this will be nearer 60%.

Analysis of Coxhill peak traffic flow conducted by Shepherdswell Speedwatch (in collaboration with the Metropolitan Police) in June and July 2022 recorded traffic flow of circa 550 vehicles per hour.

The Draft Local Plan Regulation 19 states that approved development must account for the cumulative impact of all developments allocated in the Plan on common road links. SAP 36,37, 28, 29 and 30 proposed developments will add 425 houses to the local area served by the A256 with residents needing to commute regularly to work, schools etc. during peak commuting periods. Shepherdswell has circa 700 houses so combined with the proposed plan increase of 425 houses in Shepherdswell, Eythorne and Elvington, this represents a 60% increase in property numbers which we project will be mirrored by an equivalent increase in road traffic. An increase of 60% on current commuter peak traffic flow translates to circa 590 vehicles per hour or 10 vehicles per minute along largely single-track road with road speed impacted by slow moving heavy goods traffic.

Compounding significant road congestion there is a lack of pedestrian footways in Shepherdswell leading to key routes i.e. school, local shop, health centre and village hall, peak footfall along pavement less roads occurs when traffic flow is at its highest presenting a significant road safety concern.

There are specific road access concerns relating to St Andrews Gardens (SAP 36 SHE004) a development of 57 houses served by one road access and exit point. The Local Plan Reg 19 proposes to increase the number of properties by 50 on this estate effectively doubling its size without addressing & mitigating emergency access and road safety design.

KCC's Kent Design, Creating the design, Step 3- Design recommends that minor access roads generally serving up to 100 dwellings, including those in other residential areas which feed on to it should either be a through road or, if a cul-de-sac, serve no more than 50 dwellings unless an alternative access route, to serve motorists, pedestrian and cyclists, can be provided. Previous development surveys of SHE004 access points used the Housing and Economic Land Availability Assessment traffic light system which rated this site as Amber with an assessment proviso that "secondary emergency access is required however this does not appear achievable".

St Andrews Gardens access road links into Mill Lane which is restricted at points to single track road with passing places. Mill Lane is heavily used constituting one of the main access routes to the Shepherdswell Health Centre, School and Church.

The Draft Local Plan Regulation 19 states under section E1 that for designated industrial settlements new employment development will be supported within existing employment sites as identified on the Policies Map or on land within or immediately adjoining the settlement confines of designated settlements. While employment for villagers is essential it should be considered without a viable public transportation network such development will further challenge the stressed A256 local road network.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The Draft Local Plan Regulation 19 must propose improvements that address the adequacy of the A256 and local road network and public transport services supporting the proposed SAP 36,37, 28, 29 and 30 developments and ensure funding for these needs is addressed in the final plan.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP37 - Shepherdswell Small Housing Sites
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible.	SAP37 - Shepherdswell Small Housing Sites Site SHE006 NPPF states that when considering development proposals, it should be ensured that 'safe and suitable access to the site can be achieved for all users' and that developments 'give priority first to pedestrian and cycle movements'.

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

In the Regulation 18 draft plan DDC noted that the site had 'no footway' and that DDC had concerns over this. It should also be noted that the part of site sits at a lower ground level than Coxhill Road and that this could potentially cause issues around access 'for all users'.

In the current plan, no mention is made of this as a 'site specific issue'

In the Regulation 18 draft plan, the site SHE012 (immediately opposite) was shown as rejected on the grounds that:
 Site is in a remote location
 Development here would be unsustainable

Both comments are clearly applicable to SHE006, especially given the potential risks to pedestrians using Coxhill Road, a narrow road subject to increasing vehicular movements (including HGVs), something that the development would clearly add to.

Associated DDC evidence also states that the site is less than 300m from a bus stop. What this fails to observe, is that there is no regular bus service within the village, with the exception of a daily school service.

The site has previously been rejected by the Planning Inspectorate.

DDC evidence states that the site is at risk from 1 in 30 year risk of surface water flooding, considered by the Environment Agency to be at 'High Risk'.

NPPF states that 'inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk'.

In the Regulation 18 draft plan, DDC noted that Coxhill Road would need 'widening at the access point' to the site. Yet the current plan states that 'existing trees and hedges should be retained and enhanced'. Given that these abut Coxhill Road, this would appear to be a contradictory position. Pedestrian access would also require the loss of hedging. Any loss of existing trees/hedgerow plants, would go against DDC's policy of 'conserving and enhancing the district's wildlife habitats'. Given the hedgerow's length, age, species and proximity to a PROW, it is also likely to be protected by the Hedgerow Regulations 1997. It should also be noted that hedgerows can significantly help to reducing flooding.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The removal of site SHE006

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP37
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I write in support of the comments made by Shepherdswell Parish Council.</p> <p>1. Evidence errors – the Parish Council points out several inaccuracies in the Local plan statements, un relation to various local amenities (which do not actually exist), and the village's location, which are rather worrying. The Council is also concerned about the validity of the traffic survey results in relation to these surveys being taken just pandemic when traffic flows were significantly lower – and this is very significant because a main objection to the house building is the inadequate road structure. The Council quotes current Speedwatch reports which show traffic flows much higher than those recorded with a peak of 224 vehicles per hour – and which was measured one way only.</p> <p>2. Highways infrastructure and transport - the existing local highway network is already inadequate for the number of houses in the village and surrounding areas. More houses will mean be significant adverse effects on the already heavily congested and dangerous Cox hill crossroads by the Co-op, and Coxhill road running through Shepherdswell, This road is already over stretched, and extensively used as a rat run between the Sandwich/Dover main road and the A2. There will also be a knock-on effect from the 350 houses planned for Eythorne, which will make this problem even worse – these should not be built – plus the expansion of the industrial estate planned there. SAP 37 transport statement specifies that the development must account for the cumulative impact of all developments in this plan on common road links, but the proposed plans for Elvington and Eythorne, which will obviously significantly increase traffic numbers, utterly invalidate this statement. Nothing can be done about all this, unless you build a by-pass, for which funding will simply never be available, and which would be undesirable anyway, given the rural and beautiful nature of the area.</p> <p>Kent Highways has no cash to undertake mitigation works – such as improving junctions and dealing with congestion caused by on-street parking – and the number of houses will not generate enough Developer funding to pay for such attempts to resolve these problems. . There is also a problem with sustainable transport – there are no cycle tracks, and the bus service has recently been cut – and there are no footways or cycleways along dangerously narrow and bendy roads. The Coldred SHE013 proposals suffer, too, from such drawbacks. Again, there are no funds to improve these problems, despite the (unachievable) aspirations in the Local Plan. While there is a railway station at Shepherdswell, disabled access urgently requires improvement.</p> <p>3. Sewage and drainage – the Parish Council statement explains fully the serious problems already existing here, and , as a DDC ward Cllr, I am currently trying to get something done about the regular flooding problems affecting the houses next to St Andrew's development which will worsen the situation. Kent County Council say the Developers should pay for this but there are insufficient funds – and Kent Council has no plans for new drainage systems, as far as I am aware. The Local Plan does not deal adequately with these problems.</p>

	4. Village amenities – the Parish Council outlines the problems with the limitations on these – especially with regards to local school places, and inadequate transport arrangements for pupils to get to the secondary schools in Dover, Deal or Sandwich. Access to the shops, school, village hall etc are difficult and dangerous because of some roads without proper footways, such as Church Hill. The capacity of the local surgery is also clearly insufficient to cope with existing demand.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The Highways, draining and public transport problems are understated in the Local Plan, where there appears to be no coherent strategy for achieving improvements in the rural road network or rural transport or local drainage – or for achieving sustainable travelling through cycling, walking and public transport use. We need a specific strategy on these important matters, which should clearly set out the problems and solutions - and, most importantly, identify clearly where funding is to be obtained , as there appears to be no future funding available in the foreseeable future for any of these areas from Dover or Kent Councils, or the Government. Aspirations are meaningless without a realistic chance of implementation – which means CASH. Without such strategies, there should be little or no further housing development in this rural area of Shepherdswell and Eythorne, and attention should be focused on other larger villages - with better facilities than Shepherdswell, and better road and transport links - and on brownfield sites.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

This rep is submitted on behalf of Coxhill Road Residents, a group consisting of 23 members. A list of members names, addresses and method of consenting to be included has been provided

It is good to note that DDC will act positively to ensure that development and infrastructure needs are met. This is to ensure that new development is delivered sustainably, in a way that is properly planned. Also that "Kent County Council continues to ensure that highway safety is one of its top priorities." The newVision Zero objectives state Partners will all follow the 'Safe System Approach', which is designed with the human being at its core. And that KCC will seek to understand the risks of injury that are posed to road users by the environment and seek to minimise those risks before they become problem locations that result in injury. As about 25% of rural collisions occurred on 30mph roads, in village settlements. The proposal for another 10 dwellings is of concern along this particular stretch of road.

It is interesting to note the data gathered from Community Speed Watch can also be used to monitor tra c speed and support the case for further speed reduction measures.

So I hope the latest statistics are taken seriously -

Shepherdswell Speedwatch group carried out an observation this morning (25/11/22) on Coxhill Rd by Oast House . between 07:30-09:00 A total of 336 vehicles were counted heading SW towards the A2. A similar number traveled into the village. This indicates about 200 vehicle movements an hour in each direction pre any new developments.

There was considerable congestion, (see photos) due to a number of lorries, which slowed tra c, but 69 vehicles (1 in 5 - 20%) was exceeding 30mph, of which 7 will be reported for traveling in excess of 34mph (3 at 40/41mph)

Coxhill and the lower end of the village do not have access to a bus service as indicated in the DDC Plan , There is NO bus running along Eythorne Road as mentioned in the Plan .

Whilst this part of the village is nearer to Railway Station , the proposed development SHE006 would mean extra pedestrians having to walk along the non existent pavement

until they reach the junction of Westcourt Lane. Something already highlighted as a potential dangerous hotspot.

See photos of pedestrians having to go into residents gardens to avoid tra c.

This is not only the major route out of the village for our residents but also those from our neighboring villages ,SAP28/29/30 at Eythorne and Elvington face even larger scale developments .

These will undoubtedly have the effect of increasing tra c going through Shepherdswell on roads not designed for this amount of tra c.

DDCs own document highlights potential issues with this site such as:-

Some widening works may be required at the access point. KCC looked at this and the possibility of a mini roundabout was dismissed. So it is di cult to see where this can be achieved.

Coxhill Road is narrow, and is particularly constrained to the east of the site by on-street parking.

Whilst the latter part of this statement is true this also acts ,at the moment , as a means of slowing tra c at the point where residential properties , the local pre school and Village Hall are situated.

The yet to be completed Community Land Trust development of 13 dwellings will create another exit along this busy stretch of road , approximately 50 meters from the proposed SHE006 development, and measures to ensure the visibility splay will result in yellow lines being put in place, reducing the parking availability for existing residents.

Requests for a junction box at the entrance to this site have been discounted by KCC recently.

Concerns acknowledged by DDC :-

Any proposals coming forward on the site should seek the views of KCC Highways at an early stage to ensure that the cumulative impacts of development can be accommodated by the surrounding roads .

No footway serving site.

Concern regarding cumulative impact from potential allocation sites on wider highway network, particularly routes through to A2/A256 (issues with width, on-street parking and significant increase in use of junctions)

. More than recommended 400 meter walking distance to nearest bus stops in Mill Lane, but limited services and no footway.

SAP37

Flooding She006

It is noted by DDC , there may be issues around flooding .

This is not a maybe but a reality.

Please see KCC reports regarding flooding outside Whittington Terrace which is adjacent to the land identified for additional 10 houses at Botolph Street Farm .

This has required urgent action to clear recently as water was up to the front door of at least 3 of the properties .

This being after routine maintenance a few months ago so there is obviously an underlying problem that needs addressing .

This has been a continued issue over the past few years and has recently been brought to the attention of DDC Cllr Linda Keen by both residents and Parish Councillors. She has had to intercede on behalf of residents .

Further development is ongoing opposite these houses and it is feared that this may exacerbate the problem . The impact of this must be fully assessed before any further development is contemplated..

Please see photos attached

Basically Coxhill residents are concerned that the infrastructure is not and cannot be put in place to service the proposed builds .

It is fully appreciated that Public transport is the safest form of transport, so DDC working with Kent's public transport team to promote public transport where it offers an alternative to driving is good news but simply not available .

The Parish Council have asked for safety improvements within the area to address existing issues and have highlighted the dangerous situation along Coxhill, speeding, volume of tra c and no pavements but as yet this situation has not been addressed.

Shepherdswell Station - There is currently an hourly service from this station which Network Rail are looking to increase to half hourly due to increased demand.

The following improvements would be beneficial:

- o DDA compliant access;
- o First and last mile improvements (car parking, cycling parking, pedestrian access improvements).

It is hard to see how these recommendations can be implemented .

GP SURGERY

There is existing lack of GP capacity within the villages of Lydden and Shepherdswell

Which means at the moment many Shepherdswell residents are seen at the practice surgery in Dover. .Which is accessed by car in contravention of DDCs own policy of reducing travel in this way.

SCHOOLS

The Local Plan would suggest 430 dwellings leading to 93 primary aged pupils. Extant permission of 41 dwellings leading to a further 9 pupils (total 102 pupils). This is equivalent to around 0.5FE of additional primary school provision..

Our local Primary is almost at capacity and there are no plans for expansion. The DDC Plan states an increase in provision at Eythorne is anticipated . There is no bus service between the villages so there would be an increase in car usage.

In conclusion we , the residents of Coxhill , are extremely worried about the impact of this and the other developments proposed both in Shepherdswell and our neighboring villages .

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Not Applicable

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Text Extracted from Document sent from Savills on Behalf of the Church Commissioners. Representation has been split across relevant areas of the Local Plan. Full attachment and introduction to Policy comments can be found under reference SDLP1265 for Shepherdswell Site and SDLP1266 for Eastry Site.) Introduction Savills has been instructed by the Church Commissioners to submit representations to the Draft Dover District Local Plan Regulation 19 Consultation. The consultation on the Local Plan commenced on 21st October and closes at 5pm on 9th December 2022. These representations focus primarily on the Land at Botolph Farm but also cover the Church Commissioners other landholdings in the district, including Land East of Eastry. These representations support the allocation of the Land at Botolph Street Farm and explain why it is suitable for additional residential development. Additionally, these representations identify why the Land East of Eastry should be considered as a site for future residential development. The Church Commissioners also own smaller land holdings within various settlements across the district which are considered suitable for conversion for residential use or via windfall housing. The Church Commissioners are promoting these sites in line with the Government agenda to deliver much needed new homes quickly and efficiently. These land holdings will guide the representations made in regards to the Regulation 19 Consultation Document. The National Planning Policy Framework (NPPF) explains that the planning system should be plan-led. Paragraph 16 sets out the Plans should: a) be prepared with the objective of contributing to the achievement of sustainable development;

- b) be prepared positively, in a way that is aspirational but deliverable;
- c) be shaped by early, proportionate and effective engagement between planmakers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;
- d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;
- e) be accessible through the use of digital tools to assist public involvement and policy presentation; and
- f) serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant). At examination, a Plan will be found 'sound' if it is considered to be positively prepared, justified, effective and consistent with national policy, as set out within paragraph 35 of the NPPF. As such, ensuring that the Local Plan meets the tests of soundness is important throughout the Local Plan process - including at Regulation 19 stage.

Structure of the Representation The structure of this representation is as follows:

Section 2: Summary of the site at Botolph Street Farm: Sets out a broad outline of the Land at Botolph Street Farm, its surroundings and provides a brief description of the draft allocation.

Section 3: Summary of the site at Eastry: Sets out a broad outline of the Land East of Eastry, explaining its surroundings and potential for residential development.

Section 4: Representations on the Draft Local Plan: Makes observations on the Evidence Base Documents; Provides comments and recommendations on key elements of the Draft Local Plan.

Section 5: Conclusion: Summarises the observations within the representations and outlines the next steps in the draft Local Plan process. Additional Documents A number of documents have been submitted in conjunction with this representation. These are listed below and labelled in regards to which site they are supporting:

Botolph Street Farm

Report 104906-PFC-ZZ-XX-RP-YE-000010-S0-P01_FRDS Rev P01 - Flood Risk and Drainage Statement

2. Botolph Street Farm - The Site, The Surrounding Area and The Draft Allocation The site lies adjacent to the village of Shepherdswell, approximately 8 miles north-west of Dover. The allocated site comprises approximately 0.82 Ha of greenfield land (see Figure 2.1) and is currently used for agricultural purposes.

(DDC Note - Unable to display image - see attachment for full representation)

The site is bounded by residential development to the north, agricultural buildings to the south, Coxhill Road to the east, and open fields to the west. Planning permission was granted on 26th July 2022 for the 'Erection of 13no. dwellings of which 10 are proposed as affordable rent (rural exceptions housing) with associated parking and new access road' on the land to the east of Botolph Street Farm (Ref: 20/01508). The boundary with Coxhill Road is formed by a mature field hedge which is circa 3-4m in height. There is a small gap in the hedge which allows access to a footpath (Ref: ER81) which runs north-westwards through the site. The northern boundary adjoins the southern edge of the village and the properties of Whittington Terrace (which currently forms the settlement boundary). The western boundary of the site is currently undelineated, however the boundary of the wider field is defined by a native field hedgerow with a small gap to allow access for the footpath. There is potential for the development site to be extended to include the agricultural land directly south of the allocated site (see the redline in Figure 2.2, the blue area is other land in the Church Commissioner's ownership). This land is currently occupied by dated farm buildings, thereby providing an opportunity for re-development. Access to these buildings exists off Coxhill (see Figure 2.3). This would create an overall site area of 1.39 Ha.

(DDC Note - Unable to display image - see attachment for full representation)

Topography The site generally falls from the south to north, with the lowest point on the site being in the north-west corner. The highest points of the site are along the southern boundary at approximately 91.25m AOD. From there the land falls north towards the lower part of the site to levels of approximately 88.75m AOD.

Access Access to the development site is key to ensuring a successful scheme. Through extending the redline, suitable access to the site can be achieved via the existing access from Coxhill Road. By upgrading the existing farm access, this maximises the retention of the existing hedgerows at the front of the site and still achieves highways compliant visibility splays to both sides of the access.

Heritage There are three Grade II Listed Buildings located within 150m of the site (see Figure 2.4). Further information can be found in the attached Heritage Report. The report concludes that the majority of the designated heritage assets in close proximity to the site would not be affected by development. However, for the few which could be potentially sensitive, suitable mitigation measures would be required such as the retention of hedgerow boundaries.

(DDC Note - Unable to display image - see attachment for full representation)

Drainage The site lies within Flood Zone 1 where there is a very low risk of flooding from rivers or the sea. The area has a chance of flooding of less than 0.1% each year. The site is susceptible to surface water flooding. Figure 2.5 demonstrates that the western boundary of the site is partially classified as a high risk to flooding. This means that the area has a chance of flooding of greater than 3.3% each year. However, as discussed below, technical studies suggest that the risk of surface water flooding is actually only low to medium and can be mitigated.

(DDC Note - Unable to display image - see attachment for full representation)

The site was initially allocated in the draft Regulation 18 Local Plan for Dover for 20 dwellings. However, it is now only allocated for 10 dwellings in the recently published draft Regulation 19 Local Plan. This reduction in development capacity is due to perceived issues surface water flooding issues. Significant technical work has been conducted to explore potential flooding mitigation options. The submitted drainage drawings show suitable SuDS options for the allocated site and for a larger development site of approximately 25 dwellings. Pell Frischmann has conducted a desk-based review of the risk of the site to all types of flooding. The report found that the site is unlikely to be affected by tidal influences due to its location in Flood Zone 1. However, considering the aquifer designation, underlying geology and information on groundwater provided with local documentation, the risk of flooding from groundwater is considered to be moderate and mitigation is recommended to address this risk. The risk of surface water flooding is only deemed to be 'Low to Medium Risk'. The report concluded that the risk of surface water flooding is significantly less than that suggested by the Environment Agency (EA) due to the EA's methodology only taking into account initial, conservative losses to infiltration. The report suggests that the superficial and bedrock geologies in the area are highly permeable. This is further evidenced by an absence of surface water sewers in the area. A review of nearby approved planning applications also suggests high rates of permeability in the immediate vicinity. Furthermore, the watershed draining to the site is relatively large, and any regular flow of surface water would likely form some surface feature like a ditch or stream. None is present within the site, suggesting that overland flows do not occur regularly. The report concludes that the site is therefore exposed to a 'Low to Medium Risk' of surface water flooding. Pell Frischmann recommend that suitable mitigation should be considered in the form of sustainable surface water management, appropriate landscaping, and maintenance of flow routes where possible.

The proposed Surface Water Drainage Strategy will ensure that run-off from the site will be managed in a sustainable way now and in the future. The drainage strategy assumes an infiltration-based solution, managing runoff for all events up to the 100-year storm, including a 40% increase in rainfall intensity to allow for climate change. Site-specific infiltration testing and groundwater monitoring will be required as part of any future planning application to ensure the drainage arrangements are suitable for the proposed development in line with conditions on site. The proposed Surface Water Drainage Strategy proposes the use of infiltration as the source of outfall from the site, with infiltration basins as the collection point. This is due to the bedrock comprising Seaford Chalk, which is extremely porous and permeable. The strategy also includes an initial drainage concept plan which shows suitable locations for infiltration basins, in line with site topography. The strategy also recommends a range of SuDS features which can be incorporated into the final design. Therefore, it can be demonstrated that the risk of surface water flooding can be suitably mitigated against to propose a sustainable development of approximately 25 units on a larger site.

The Surrounding Area Shepherdswell is a well-serviced, village located approximately equidistant from the larger settlements of Deal, Dover and Canterbury. The Settlement and Confines Topic paper (August 2022) that supports the Regulation 19 Local Plan, explains that Shepherdswell has a railway station on the Dover to London Victoria line, a bus service, a village shop, a public house, a hairdressers, a post office twice a week in the village hall, a cash point, a church, village hall, play area, recreation ground, primary school and doctor's surgery. The paper scored Shepherdswell 26 points, ranking the village as 6th out of the 38 tested settlements. Shepherdswell is therefore a sustainable location for development due to the range of community facilities and public transport options already available. Paragraph 5.4 of the paper concludes that Shepherdswell is a rural local centre and:

'given the wide range of services present in such villages each has the capability to act as a principle focus for services in its rural catchment area.' Shepherdswell was also classified as a 'Local Centre' in the adopted Core Strategy 2010. Policy CP1 of the Core Strategy 2010 defines Local Centres as:

"Secondary focus for development in the rural area; suitable for a scale of development that would reinforce its role as a provider of services to its home and adjacent communities."

Planning History The allocated site has not been subject to any previous planning applications. A number of minor applications have been made for extensions and maintenance to the nearby property of St Sibert's Place.

Draft Allocation The site (SHE006) has been allocated under policy SAP37 for an indicative housing capacity of 10 units. A total of three sites have received draft allocations in Shepherdswell, see Figure 2.6, equating to a total of 70 dwellings. However, site SHE006 was previously allocated for 20 units in the Regulation 18 draft Local Plan. The Church Commissioners will deliver a landscape-led development that seeks to support, enhance, integrate with the surrounding community and landscape. The site is sustainably located in a high-ranking Local Centre which has existing facilities and public transport links. The submitted vision document sets out the vision and objectives of the proposal and provides further information concerning landscaping and design. Overall, the site is suitable, available and achievable for residential development within the first five years of the Plan Period. The Church Commissioners are committed to delivering a sympathetic and resilient development of the site, seeking to ensure that the proposal is fully compatible with and supportive to the wider village. This is demonstrated by a nearby scheme. Planning permission was granted on 26th July 2022 for the 'Erection of 13no. dwellings of which 10 are proposed as affordable rent (rural exceptions housing) with associated parking and new access road' on the land to the east of Botolph Street Farm (Ref: 20/01508). Application 20/01508 is a joint venture in which the Church Commissioners are the landowner and English Rural is bringing forward the development. Therefore, there is a precedent of the Church Commissioners reliably helping DDC to meet the housing needs in Shepherdswell and the wider district, including affordable provision.

(DDC Note - Unable to display image - see attachment for full representation)

Conclusion

This representation to the Dover District Council (DDC) Regulation 19 Local Plan Consultation is written on behalf of The Church Commissioners in relation to the Land at Botolph Street Farm in Shepherdswell, the Land East of Eastry and a number of rural sites also in the Client's ownership. The allocation of the Land at Botolph Street Farm is supported as the site is available, developable and deliverable. The site is in a sustainable location and forms part of a logical residential extension of the local centre of Shepherdswell, according with the approach to plan-making as set out in the NPPF. The development would make a valuable contribution to the future of the village and help DDC meet its housing need. The Land East of Eastry is provided as an option for a future strategic allocation or an alternative option for the emerging Local Plan. The site is located in a sustainable location with easy walking access to a range of amenities in the local centre of Eastry. A range of technical reports have already been conducted, demonstrating significant potential for a major residential development and are submitted with this representation. This document provides representations on the Regulation 19 Local Plan and includes observations on the supporting evidence base. Several recommendations have been made throughout these representations. The most notable recommendations include:

Local Plan SP1 (Climate Change) – DDC should clarify the meaning of what constitutes as 'qualifying development' and what a 'climate change statement' constitutes. It is recommended that the proposed wording changes suggested in Section 4 are adopted.

Local Plan SP3 (Housing Growth) - DDC should reconsider their reliance on larger allocations given the delivery history in these locations. Instead, DDC should seek to allocate more smaller sites to reliably meet this housing need since these sites can be delivered earlier in the Plan Period.

Local Plan SP4 (Residential Windfall Development) – DDC should provide greater flexibility for windfall development in all locations and each site should be judged on its own merits.

Local Plan SP5 (Affordable Housing) – DDC should provide a larger buffer than 8% on the required housing need due to the over-reliance on the Whitfield Urban Expansion and to ensure that the affordable housing needs of the district are met.

Local Plan SP6 (Economic Growth) – DDC should provide evidence that the housing strategy set out in SP3 is supportive of the economic growth aspirations set out in SP6.

Local Plan SP11 (Infrastructure and Developer Contributions) - DDC to ensure that any developer contributions meet with the tests set out in paragraphs 56 and 57 in the NPPF.

Local Plan Policy SAP37 (Shepherdswell Small Housing Sites) – DDC should increase the allocation of the Land at Botolph Street Farm to 25 dwellings.

Local Plan PM1 (Design) – DDC should provide further clarification on what is meant by 'relevant and appropriate' and remove any reference to 'rhythm'.

Local Plan PM3 (Providing Open Space) – DDC should update Draft Policy PM3 to reflect that a scheme to secure long term management and maintenance of the open space must be secured via planning obligation. DDC should also provide greater flexibility for the requirement of smaller sites to provide set open space measures.

Local Plan H2 (Rural Local Housing Needs) – DDC should adopt the wording changes suggested in Section 4 of this representation in relation to viability assessments.

Local Plan CC8 (Tree Planting and Protection) – DDC should provide greater flexibility for smaller development sites and clarify against the requirement for tree-lined streets.

Sustainability Appraisal (2022) – Amend the sustainability ratings of site SHE006 to match that illustrated in Figure 4.4 of this report.

	Housing and Economic Land Availability Assessment (2022) - Increase the capacity of site SHE006 and update the name of the site to 'Land at Botolph Street Farm'. This representation clearly demonstrates that there is scope to increase the dwelling capacity across the Land at Botolph Street Farm and improve its contribution to the housing needs of the district. This is supported by national policy, specifically in its emphasis on the capacity for small to medium development sites to contribute to the housing requirement of the district in the earlier part of the Plan Period.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to?Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 37
2 - Do you consider this part of the Plan sound?	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Concern over housing proposals for Shepherds Well. Loss of farmland to development Roads busy, little or no traffic calming, lack of lit cycle routes, safe routes for families, dogs walkers, horse riders Pressure on local school places Limited bus service and trains do not link with on-going services Threat to wildlife with loss of trees and hedgerows
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Suggest bat boxes, bird boxes for all new builds and retention of hedging, trees Suggest provision of local sheltered housing for elderly which would free up family housing in village.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The recent policy change on mandatory numbers for new housing means that individual developments for houses should be reviewed and that current plans are not sound, they do not comply with policy.</p> <p>The South east is under pressure and does not have the infrastructure to cope with the demands that new housing developments bring. It is one of the driest counties and so water stress will become a more serious issue.</p> <p>In Shepherdswell access from the A2 is by two narrow lanes. Both are unsafe for pedestrians, cyclists and horses. There is nowhere local for people to ride. I often struggle to walk the 50 m from the village hall to the shop with my two dogs. There is no traffic calming and cars do not slow down.</p> <p>The many extra houses expected at Elvington will increase this traffic as will the houses planned for the village itself. This is a major concern. I support the Green Party proposal for safe, well lit cycle lanes to link villages with stations but this does not help dog walkers.</p> <p>People move to the countryside to be able to access and enjoy green spaces but this is difficult with so many cars. We don't see children playing out as they used to.</p> <p>I am concerned about the destruction of hedges for new build projects. Tho the plan proposes to maintain as many as possible we have recently seen the ripping out of a perimeter hedge for the community trust housing next to the village hall. I do not trust that hedges and trees will be maintained and emphasise that mature hedging and trees offer so much more habitat than new planting which would need to be on a much greater scale if it is to offer the same benefits in terms of carbon capture as well as habitat.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Policy on housing has changed and so plans should change to comply with this. The housing which our village needs is sheltered housing for the elderly, many of whom are single, living alone, wanting to stay in the village. Providing purpose built accommodation for them would free up many houses for families. Have the needs of the often ageing population of villages been considered? A limited number of affordable housing is included in larger developments but this does not meet the needs of our ageing villagers.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Text Extracted from Document sent from Savills on Behalf of the Church Commissioners. Representation has been split across relevant areas of the Local Plan. Full attachment and introduction to Policy comments can be found under reference SDLP1265 for Shepherdswell Site and SDLP1266 for Eastry Site.) Policy SAP37 is the housing allocation for the 'Land at Botolph Street Farm, Shepherdswell'. The policy is largely supported, however, there are aspects to the policy over which amendments are sought. The policy seeks the delivery of Land at Botolph Street Farm, Shepherdswell, for approximately 10 dwellings. This is a significant reduction from the 20 dwellings previously set out in the Regulation 18 Consultation Document. Policy SAP37 sets out that this reduction in units is due to the risk of surface water flooding and the requirement of SuDS. Technical drainage work has been undertaken to identify the most suitable location for a SuDS pond to be constructed on site. Pell Frischmann has identified the northern area of the site, above the existing PRow, as the most effective location for an infiltration basin to be located. Although the inclusion of a SuDS pond does reduce the overall developable area of the site, technical work has been completed to identify the potential development capacity of 25 units. The technical reports which have been completed have also included the land to the south of the allocated site. This additional land currently comprises agricultural land and farm buildings. The additional 0.57 Ha could accommodate an overall site total of 25 units. This could be incorporated into the allocation to help DDC meet its overall housing need and encourage much-needed development in settlements outside of Dover. Given the scale of the development, DDC can be confident that it will come forward within the early part of the plan period in accordance with NPPF paragraph 69 and our comments on Draft Strategic Policy SP3.

	<p>The Regulation 18 consultation document allocated 170 dwellings across 4 sites around the village of Shepherdswell. However, the draft Regulation 19 consultation document has reduced these allocations to result in a total of 70 dwellings. Site SHE003 had been allocated for 100 units in the draft Regulation 18 consultation document but was consequently removed at the Regulation 19 consultation stage due to significant objections and highways safety concerns raised by KCC highways. This demonstrates that Shepherdswell had been deemed to have the capacity to support an additional 100 dwellings in the emerging Local Plan period. Therefore, the additional units which could come forward on the land next to Botolph Farm can also be deemed sustainable as there was sufficient services and infrastructure to allow an additional 100 dwellings on another site within the village. The increase in land and unit numbers on the Land at Botolph Street Farm could help to compensate some of this loss in units and help to meet the housing need of the district in a sustainable and deliverable location. With regards to the additional land, paragraph 68 of the NPPF outlines that:</p> <p>“Strategic policy-making authorities should have a clear understanding of the land available in their area through the preparation of a strategic housing land availability assessment. From this, planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability.” Increasing the number of units in the allocation creates a more efficient use of available land. This is supported by paragraph 124 of the NPPF:</p> <p>“Planning policies and decisions should support development that makes efficient use of land, taking into account:</p> <p>a) the identified need for different types of housing and other forms of development, and the availability of land suitable for accommodating it;</p> <p>b) local market conditions and viability;</p> <p>c) the availability and capacity of infrastructure and services – both existing and proposed – as well as their potential for further improvement and the scope to promote sustainable travel modes that limit future car use;” DDC need to ensure that a suitable range of sites, of varying sizes and scales, are allocated in the emerging Local Plan to ensure the delivery of a sufficient number of new homes to create a robust position when measured against their five year housing land supply or the Housing Delivery Test. DDC need to ensure that the Plan is able to meet the demands both in terms of providing for housing need but also delivering at a sufficient rate. Increasing the size of the allocation of the Land at Botolph Street Farm can help meet this housing need in a deliverable timeframe. There is a clear emphasis in national policy to produce an effective plan that is deliverable over the Plan Period. It is considered that the allocation of the entirety of Botolph Street Farm is available, suitable and deliverable, and will make a positive contribution to the development of an effective Local Plan.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP37
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Many residents have responded to the Dover District Council Local Plan. During public consultation the council has been made aware that while there is a recognised need for limited housing growth there are very strong concerns regarding the proposed sites in both Shepherdswell and Coldred and the consequential impact of proposed housing developments in the neighbouring villages of Eythorne and Elvington.</p> <p>New housing without adequate local infrastructure puts significant strain on local amenities such as medical services, school and playgroup places as well as increasing traffic on our roads. The existing sewerage system is already overloaded and any future developments will only exacerbate this problem.</p> <p>Far from being "sound" the Dover Local Plan is flawed. It contains many inaccuracies including:</p> <ul style="list-style-type: none"> • Shepherdswell now only has one public house. • Shepherdswell is stated as being to the west of the A2 when in fact it is to the east . • Traffic measurement flows were taken just post pandemic and clearly show a flow much lower than the parish's normal traffic volume. • The plan states there is a bus service along Eythorne Road but this service was withdrawn many years ago and most other services have been withdrawn this year. <p>One must question the validity of much of the data and evidence attached to the plan, and how (and when) it was collected. Have DDC representatives visited the Parish in recent years to carry out surveys?</p> <p>If development of any kind is to be permitted it should be linked to a S106 agreement to improve the facilities within Shepherdswell and Coldred.</p> <p>The plan indicates that Dover District Council can fund parish councils from S106 monies when a case is made that this is a good use of funds. Shepherdswell with Coldred Parish Council would like to make a case for funding of community facilities, including improvements to the village hall, its parking facilities, the recreation ground, the cemeteries and improvements to the local school.</p> <p>Sewerage and Drainage. The sewerage and foul water from the majority of properties in Shepherdswell drains into sewers connected to a pumping station at the rear of the East Kent Railway Station. Surface water from roads and paved areas also drain into these sewers and can add considerable load to the pumping station equipment . When the pumps cannot cope with this excess flow, foul flooding occurs in the houses and gardens of properties situated in The Glen. This has already been evidenced by frequent calls to DDC Environmental Services and Southern Water. Permitting the proposals at St Andrews Gardens will necessitate an immediate up-grade to this system to enable it to cope with the</p>

increased load, not even taking into account that result in increased rainfall.

climate changes

Highways. As stated the current highway systems within our parish are totally inadequate for the current traffic levels and there are already congestion problems, especially with large and farm vehicles travelling through and trying to park within the villages. When we take into account new housing planned for our parish and also for Eythorne and Elvington (which will add even more vehicles from the 350+proposed dwellings there, travelling through Shepherdswell and Coldred to reach the A2), the traffic flow will again increase adding further to congestion and delays. Emergency response vehicles will be subject to these delays putting lives at risk. As previously stated traffic measurement levels were taken just post pandemic and clearly show flows much lower than normally experienced. Current Speedwatch reports show traffic flows much higher than those recorded with a peak of 224 vehicles per hour which was measured one way only. The highest speed recorded in the 30 mph limit was 64mph and 52mph in the 40 mph limit. These are current figures from November and December 2022.

Comments regarding poor access via single track roads with passing areas have been made by several residents. These narrow lanes inevitably lead to increased congestion and pollution.

We are advised that the Highways Department have no funds available for highway improvements and the current level of maintenance is inadequate. Shepherdswell has limited parking facilities near the village hall and Co-op area which frequently leads to congestion. This added congestion compounds the problems caused by the lack of pavements on three of the four roads at that junction. An expansion of the industrial site in Eythorne will undoubtedly lead to yet more congestion problems unless all heavy goods vehicles accessing that site are prohibited from using any access other than from the A258. There is already a problem with partial/temporary road blockages leading to significant congestion.

Transport. Whilst we are fortunate to have a railway station it does not offer reasonable access to disabled persons or those with limited mobility- it is difficult to envisage how access can be improved.

Most bus services have now been withdrawn apart from school services so residents will have to rely on cars for shopping etc. There are no dedicated cycle paths and many cyclists are reluctant to use their bikes because of this traffic congestion.

Those residents who want to use the train services must endure walking to the station on roads with limited or no footpaths. Residents in Eythorne and Elvington will have to either use cars to get to the station or walk along a very busy main road - again without footpaths.

SAP 37 transport statement specifies that the development must account for the cumulative impact of all developments in this plan on common road links. This makes a nonsense of the proposed plans for Elvington and Eythorne which would significantly increase traffic flow.

Village Services. The surgery situated in Mill Lane is oversubscribed and patients are very often referred to the Dover branch. There is no "walk in" service.

The village school is again nearly full with no current plans for extending present facilities. The location of the school causes severe traffic congestion at core times. Many parents taking their children to school have to walk up Church Hill which is a narrow, busy road with no footpath.

The nearest secondary schools are located in Dover and parents experience considerable difficulty in transporting their children to school.

Any proposed development around the Mill Lane/ St Andrew's Gardens areas do not comply with Policy T12-Transport Statements as this clearly states- "Developments that would generate significant traffic movements must be well related to primary and secondary school network. Proposals which would generate levels and types of traffic movements resulting in severe cumulative residual impacts in terms of capacity and road safety will not be permitted". A large proportion of traffic from these proposed developments would have to pass along Mill Lane and Church Hill to access the A2. Because of the built up nature of these roads mitigation will not be sufficient to alleviate the impact of increased traffic.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

If development of any kind is to be permitted it should be linked to a S106 agreement to improve the facilities within Shepherdswell and Coldred.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Re housing; These numbers of houses should not be built on agricultural land and the transport issues involved with the various and roads etc make it especially unviable due to congestion and environmental concerns. The villages are small and there is little in the way of shops and other facilities. Car-use would be high – and a big increase on currently. Has the relative value of the land concerned been assessed in terms of value through agriculture and carbon capture versus covering with concrete.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. Coxhill and the lower end of the village do not have access to a bus service ,without a walk up Church Hill ,with no pavements , to pick up the bus at Mill Lane, which as has been said is under threat ,
 Whilst this part of the village is nearer to Railway Station is via a non-existent pavement from Whittington Terrace , the nearest houses to the proposed development, to the junction of Westcourt Lane.
 See photos of pedestrians having to go into residents gardens to avoid traffic.
 This is not only the major route out of the village for our residents but also those from our neighbouring villages ,
(DDC note: This representation was originally made against the Infrastructure Delivery Plan consultation document but has been duplicated in relevant places against the Local Plan due to the specific site allocation/policy references made)

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Not Applicable

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>As residents in Shepherdswell for 22 years we love living in this quite village. It has its problems of course, excess traffic being a main one. This has been mostly caused by the removal of the Barfreston turn off on the A2, causing all traffic to Eythorne/Barfreston etc to come through Shepherdswell. New housing in the proposed sites would certainly add to this. Most difficult would be Mill Lane, Church Hill, Village Green, into Eythorne Road at the crossroads. At present its almost impossible to get through to Hazling Dane off Mill Lane during pats of each day. Bus services have been curtailed greatly over the 22 years we've lived here. The drivers over those years have been brilliant dealing with regular 'snarl-ups' at the village green, overhanging branches, parking on narrow roads in and out of the village. So, the extra homes proposed for St. Andrews Gardens would not only cause more problems, making it even harder for folks to access their homes, or go about their business.</p> <p>We live at the bottom of the village and have always been grateful for the recreation ground and the fields that back onto it up to St Andrews Gardens. The reason being that huge amounts of water pour down Approach Road when it rains, into Eythorne road. The Rec and fields act as a catchment to absorb a lot of this water. If this 'flood plan' is built on built on, all that water will incur huge legal implications for the homes that will be affected downhill (even flooded). This would affect all Roads including Church Hill, Hill Avenue, Approach Road, Eythorne Road, Station Road, Meadowview Road, Bernards Gardens etc. Something surely to be seriously considered.</p> <p>For over 30 years, Aylesham has had permission to greatly expand their boundaries. They have built some new homes that seem to enhance their village and give the new and old dwellers good access to the A2 and a very large village green with excellent shops and space for many more. The roads within the village are wide and spacious, very different from Shepherdswell. We have just one shop and extremely limited parking and now space for any more shops. Our roads are narrow and often just single track. Traffic problems can cause tempers to fray, and an addition of more people, who deserve to live in a harmonious environment may not be able to.</p> <p>Overall, we think that this plan for development in Shepherdswell is completely unsuitable.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The research conducted into the proposed plan has not been carried out properly. Especially into the impact of traffic around Mill Lane and access into and out of St Andrews Gardens. Impact on water supplies, sewerage and area of outstanding natural beauty along the North Downs way
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	DDC Vision is environmentally sound transport access road to Shepherdsweil are in Pieces, especially along Mill Lane single Lane. Increased road traffic will cause more congestion along Mill Lane and Church Hill. The roads cannot be made wider, safety consideration for school children at Sibertswold Primary School should be taken into account. Water pressure in St Andrews Gardens is already low, there are problems with sewerage. Also the proposed buildings are close to the North Downs Way, and area of natural beauty.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I expect councillors and planners to do their job and enforce the obligations of developers to develop safely and to upgrade and future proof infrastructure.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Dear Sir/Madam I am writing to object to comment on the above plan. I am very concerned about the amount of developments scheduled in and on the outskirts of villages, as opposed to the government's dictum that Brownfield sites should be the main focus for developments. I note that many of the proposals in towns are designated as medium timescale whereas many in the villages are designated short term.

I feel that the brownfield sites in towns should be developed first then, if needed, the villages should be considered.

As I live in Shepherdswell, naturally, I am very concerned about proposals for housing here.

Shepherdswell is very unique in that every road into the village is narrow and we cannot see any way of improving the infrastructure except at major cost.

The arguments by which the proposal for houses in Westcourt Lane were rejected also apply to the proposal at the end of St Andrews Gardens.

Mill Lane narrows considerably going out of the village and there have been quite a few accidents (mainly minor so will not have been reported) and we know of at least two of our neighbors who have had quite serious collisions leading to write offs of their vehicles.

Also, as the landowner near Mill Lane does not wish to sell, all traffic (including construction traffic) will come down St Andrews Gardens and one of the access points designated is round a hairpin bend.

The school run time is one to avoid even now as cars are parked all the way up Mill Lane to past Millfields, all round the Green and down Church Hill. It is naïve to suppose that people will walk or cycle to school. They will not, especially when it is raining. Also, the school is oversubscribed even now with families having to take their children elsewhere (by car)

Transport in the village is very poor and I believe more cuts are on the way. Only the smaller buses are used due to access. There can be no possibility of cycle lanes, the roads are too narrow to allow for this.

There are very few facilities in the village. We have a Co-op which is well used but has no designated parking and at busy times cars park illegally, a beauty salon and a pub which, as we all know, is probably under pressure from the financial crisis.

The sewage system is constantly under pressure and the system cannot be fit for purpose with foul waste appearing in gardens in Eythorne and The Glen

The train station is an asset to commuters but not so much so for shoppers, especially if you live in the top of the village. Walking up steep Church Hill and Approach Road with heavy shopping bags is not an option.

To conclude, I feel that because of the above arguments, Shepherdswell is not the place for large-scale developments, and I hope you will take this into consideration.

I also wish to express my concern about developments at Eythorne and Elvington. Eythorne Road in Shepherdswell is very busy during the rush hour and this will only get worse.

If builders wish to build estates, they must be prepared to improve the infrastructure at their expense.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP39 - Land to the West of Townsend Farm Road St. Margaret's at Cliffe (STM007 & STM008)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We believe that the proposed site is part of an "aerea of outstanding beauty" and therefore it would be "not consistent with National Policy".</p> <p>We believe that a new Development in the area of St Margaret's at Cliffe is deeply unsuitable because the Village has a very poor infrastructure (narrow and single lane roads, huge traffic issues, over subscribed surgery, no first aid facility, etc... etc...). Specifically Townsend Farm Road is a single lane road (with a disable parking) and wouldn't be suitable for any further increase of traffic)</p> <p>The main characteristic of this little village is the fact that it is a Historically important and a touristic area. Building new housing without improving first the infracture (such as new roads or eventually a bypass) would make this village lose its attraction and damage the economy of the area.</p> <p>In addition, a new Development at the entrance of the town would also have a negative visual impact causing the Village to lose its main characteristic of being a historical and touristic village.</p> <p>We also believe that the land where the Development should be built is a site of Archaeological importance and as a such not suitable for new buildings.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at	<p>We would suggest to build any New Developments in Rural areas like it has been done at Richmond Park (Whitfield Dover) or Preston Grange near Wingham.</p> <p>Ultimately refuse planning permission SAP39.</p>

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	N/A
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	N/A

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP40, STM010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The proposed development of the land between The Droveaway and Salisbury Road for the building of "executive" homes is unsound for multiple reasons and should be deleted from the overall Plan.</p> <ol style="list-style-type: none"> We do not believe this proposal has been positively prepared in that it does not seek to meet Dover District's objectively assessed needs. <ul style="list-style-type: none"> There is clearly a need for more housing in the District, but there are many more suitable sites available. The biggest need is for affordable housing and this site, with its proposed maximum of ten executive houses, will not make any contribution to that need. One of the assessed needs is to increase the prosperity of the District and this aspect of the plan will not achieve that. The only people who would have their prosperity increased by this proposal are the current landowner (who does not live in the District) and the property developers. The plan does not take into account the local infrastructure and its incapacity to satisfy any further expansion. <ul style="list-style-type: none"> The permanent increase in traffic resulting from the construction of these houses, as well as the temporary (but long term) increase due to heavy construction traffic, will have significant adverse impacts on all existing residents. Since Salisbury Rd is private, access

	<p>to the site is likely to be along The Droveaway which is narrow in places and can become extremely congested - particularly at the Sea Street end.</p> <ul style="list-style-type: none"> • Heavy construction traffic will damage the road surface (and pavements) and will be a danger to the many pedestrians (not just local residents) who use this road. • The village of St Margaret's is accessed by a single road, which is already congested and can be difficult to negotiate. It is surprising that there are not more accidents already. The plan does not propose any improvements to this local infrastructure to accommodate the increased traffic that would result from adoption of this proposal. • The same argument applies to the proposal to build 40 houses along Reach Road (SAP38, STM003) and 10 houses to the west of Townsend Farm Road (SAP39, STM007 and STM008), which will exacerbate the traffic problem still further. • There appear to be no plans to increase the capacity of local amenities (GP surgery, dentists, schools...) to accommodate the increase in population. <p>3 The plan does not take into account the sustainability of the local environment.</p> <ul style="list-style-type: none"> • The proposed site is in open countryside, lying within the boundaries of the Kent Downs Area of Outstanding Natural Beauty. AONBs are entitled to extra protection from inappropriate development so as to preserve their beauty for all to enjoy. The site is very close to several important habitats for wildlife with highly protected status and is adjacent to the National Trust land at Bockell Hill. The site is an important buffer between these sensitive habitats and the existing residential areas of the Bay, and a housing development would severely damage that protection. • The proposed site is the highest point in the area and any housing development there will severely affect the visual beauty of the immediate and surrounding areas. There are public footpaths along three of the boundaries and these are very well used and enjoyed by residents and many visiting walkers and wildlife enthusiasts. The views from the proposed site extend eastward to Ramsgate and beyond, to the Dover Patrol Memorial and west to the South Foreland lighthouse. These views are unique and should be protected from being blocked by development. • The existing tree line of the site next to The Droveaway is sparse and will offer little to no mitigation of the damage of this proposed development. The proposal submitted by the Lander Group offers no solution to this. <p>4 Legal Compliance is uncertain.</p> <ul style="list-style-type: none"> • We understand that the inclusion of this site as being suitable for immediate development was made at the latest possible stage (i.e. the day before closure) in the previous iteration of the Local Plan process (Regulation 18) and we further believe that by doing so DDC made procedural mistakes in that the legally required public consultation was not carried out. This is particularly unfair, given the significant impact this proposed development would have on local residents who have not therefore had the chance to make our views known until this last stage. The absence of our views may lead the Council to assume that we have/had no objections to the proposals, whereas the opposite is abundantly clear. • We also question the further exploitation of this site should initial approval for its development be granted. Once the principle of housing on this site has been accepted, a developer could come back with a much larger development proposal. Local residents are well aware that it has been previously, and frequently, suggested that as many as 72 houses could be built on the field and, therefore, this proposal very much represents the thin end of a wedge.
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Perhaps not surprisingly, the simple solution to the issues cited above is to abandon this proposal of development of the land between The Droveaway and Salisbury Road and, indeed, any further development of the village of St Margaret's.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Given the importance of my objections to the proposed development, I do not consider it sufficient to leave this representation to those who do not live in the village nor who would be directly impacted by it. It doesn't have to be me, but there MUST be direct and personal representation of the villagers at the oral proceedings.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Roman Way forms a natural edge to the village leading onto the Area Of Natural Beauty, with its rolling landscape leading up to the White Cliffs. With its landscape, hedges, trees and open fields, it is home to much wildlife of which we are losing rapidly. I have seen a Munjac deer in the field of the proposed site. Being so close to The White Cliffs and National Trust Property I feel this could be detrimental to the whole area. The road through the village is not adequate for more traffic it is overloaded already. I understand the school and doctors surgery is already full to capacity. The bus service has recently been reduced.</p> <p>DDC note: Emil submitted 26.11.22 stated the following:</p> <p>I am writing to comment on the proposed development of 40 houses off Reach Road at the rear of Roman Way. I do not think this is a area where houses should be constructed. Roman Way forms a natural edge to the village leading onto the Area Of Natural Beauty, with its rolling landscape leading up to the cliffs. Obviously with its natural landscape, hedges, trees and open fields, it is home to much wildlife of which we are losing rapidly. " I have seen Munjac deer" in the field of the proposed sight. Being so close to The White Cliffs and Nation Trust property I feel this could also be detrimental to the whole area. I do believe that perhaps, brown sites are not used to their full potential. I cannot see how any type of building would "Blend" well with the existing settlement and landscape. There is also the problem of extra cars in the village, It is so narrow and there are difficulties already</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	I understand the need for houses, possibly social or affordable but in an area where a main road is more accessible.

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP38
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	As recognised in the policy, the site lies partially within the Kent Downs AONB. The site would seem an appropriate extension of the settlement, reflecting the existing settlement pattern in this part of the village and in view of its relationship with the built confines of the existing settlement is considered acceptable in AONB landscape terms. The proposed requirements included in criteria a and b to help manage impacts on the AONB are supported. While we support the provision of a requirement for advanced planting along the western boundary of the site, we consider it unlikely that it will reach maturity prior to the completion of the development and we would recommend that this is amended to also allow planting prior to commencement of development.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	b iii Include provision for advanced tree planting. This should be undertaken on-site EITHER PRIOR TO THE COMMENCEMENT OF DEVELOPMENT or at the time the development of the site commences, to ensure trees are established and have reached maturity prior to the completion of the development, to mitigate the impact on the AONB;
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Plan is Unsound</p> <p>The proposed development of the land between The Drove way and Salisbury Rod for the building of "executive" homes is unsound for multiple reasons and should be deleted from the overall plan.</p> <p>1. We do not believe that this proposal has been positively prepared in that it does not seek to meet the Dover Districts objectively assessed needs. There is clearly a need for more housing in the District but there are many more suitable sites available.. The biggest need is for affordable housing and this site with its proposed maximum of ten executive houses will not make any contribution to that need. One of the assessed needs is to increase the prosperity of the District and this aspect of the plan will not achieve that. The only people who will have an increase in prosperity are the current landowner (who does not live in the District, and the property developers.</p> <p>2. The plan does not take into account the local infrastructure and its capacity to satisfy any further expansion.</p> <p>The permanent increase in traffic resulting from the construction of these houses as well as the temporary (but long term) increase due to heavy traffic will have significant adverse impacts on all existing residents. Since Salisbury Road is private access to the site is likely to be only along The Drove way. The Drove way is a long and narrow road which only has a limited section of paving at the Sea Street end. The road is always very congested, especially at the Sea Street end, and so narrow there that large vehicles always drive on the pavement to get through. There is a constant stream of people walking in this beautiful area, but I have observed that when cars come through they often have to step into driveways in order to feel safe. The increase in traffic in this lane is potentially very dangerous. Heavy construction traffic will damage the road surface (and such pavements as there are) and will be an additional danger to the many pedestrians (not just local residents) who use this road.</p> <p>The village of St. Margarets is accessed by a single road, which is already congested and can be difficult to negotiate. The same argument applies to the 40 Houses along Reach Road (SAP38, STM003), 10 houses to the West of Towns end Farm Road (SAP39, STM007) and STM008) which will exacerbate the problem further. However, the development on the Drove way is by far the worst issue because there is no other access road to the bay area, and all additional traffic for the bay has to go via Sea Street past the Primary School, where</p>

	<p>frequent traffic issues occur and will cause additional risk for the children. Even if the Doctors surgery could accomodate additional patients there is no parking facility in the bay to deal with this.</p> <p>3. The plan does not take into account the Sustainability of the local environment. The proposed site is in open countryside, lying within the boundaries of the Kent Downs Area of Outstanding Natural Beauty. AONBs are entitled to extra protection from inappropriate development so as to protect their beauty for all to enjoy. The site is close to several very important habitats for wildlife with highly protected status and is adjacent to the National Trust Land at Bockhill. The site is an important buffer between these sensitive habitats and the existing residential areas of the Bay and a housing development would seriously damage the protection.</p>

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Harris Lamb Planning Consultancy has been instructed by the owner of proposed residential allocation STM003 to submit these representations in support of the proposed residential allocation of their land.</p> <p>Proposed Housing Allocation STM003 – Land Adjacent to Reach Road is a deliverable site that will contribute towards the Council's five-year housing land supply and meeting the housing requirement set out in the pre-submission plan. The site is available now, is a suitable location as evidenced by the Council's own assessment and is clearly of a scale that can be delivered in the first 5 years of the plan.</p> <p>Allocation STM003 is located on the edge of St Margaret's at Cliffe. It adjoins the existing settlement boundary on two sides, with the holiday park to the north and the existing houses in Roman Road to the north west. The role of St Margaret's at Cliffe as a Local Centre is clearly defined within the Pre-submission Plan and we support the delivery of housing in this location to help sustain the role and function of St Margaret's going forwards.</p> <p>Thereafter, site STM0003 is an incredibly logical location to deliver additional housing and it presents the opportunity to better integrate this edge of the village with the surrounding countryside which forms part of the Kent Area of Outstanding Natural Beauty (AoNB) and South Forelands Heritage Coast.</p> <p>For housing to be delivered in St Margaret's at Cliffe there is a requirement to release sites which are in the Kent Downs Area of Outstanding Natural Beauty. Paragraph 177 of the NPPF sets out when development should be considered appropriate in AoNB. In this context, it sets out how major developments should be considered. However, it is considered that the size of development in this allocation does not meet the definition of major development as set out in the footnote. This being the case whether it is considered against the scale of the village, the overall target for the rural area, or the amount of land that would need to be released relative to the size and nature of the AoNB. This is, therefore, an appropriate location to deliver housing .</p> <p>Emerging Policy SAP38 sets out the criteria against which this allocation will be considered when a planning application is submitted, and we consider this represents a sound basis for ensuring this allocation comes forward in a way that positively addresses the opportunities and constraints presented by this site. We set out our thoughts on the matters raised within these criteria below:</p> <ul style="list-style-type: none"> • An appropriate design and mix of materials can be secured at the application stage. The latter being particularly important given the stark white cladding on the dwellings in Roman Way that currently line the boundary of the village with the surrounding countryside. • The proposed housing scheme could be delivered in a way that would not only mitigate the impact on the surrounding AoNB, but would actually secure a betterment through better integrating the existing village into the surrounding countryside. • At present, the dwellings in Roman Way form a stark edge to the village and are readily visible from the public viewpoints to the east and south of the site. These include views from Reach Road as motorists travel towards the village and from the established Public Rights of Way to the south east and south west (i.e. ER33, ER40, and ER282). From these viewpoints, the white clad housing in Roman Way forms a very prominent feature within the view back towards the village. Beyond this the rooftops of the other houses in St Margaret's at Cliffe and St Margaret's Bay can be seen. In developing a housing scheme for the site, the allocation requires a tree belt to be provided along the southern and western boundaries of the site. This can be provided early on with mature specimens to provide filtered views from an early stage. In delivering this tree belt, the proposed houses would become largely screened in the summer months and views filtered during the Winter months from the public viewpoints to the west and south. In turn, views of the white clad properties in Roman will be screened and only the rooftops to the properties in behind would now be visible. The proposed tree belt would not completely screen views of the proposed housing, and this would not be the intent, however a combination of these and the use of more appropriate materials would better integrate this edge of the village into the surrounding countryside . It is considered that this is a notable benefit of the allocation and results in a positive impact on the Kent Downs AoNB and South Forelands Heritage Coast. • Vehicle access can be secured from Reach Road through a priority junction. This will be more than appropriate for the number of dwellings proposed and could be integrated with the existing farm access should this prove necessary. In this context, there is no reason to believe an appropriate access cannot be delivered when a more detailed study is undertaken. The tree belt to the west and south of the allocation would more than compensate for the loss of any landscape to create this access. • Between the land owned by Reach Court Farm and the adopted highway it will be possible to deliver the connection to the existing footway on the southern side of Reach Road as required by the policy.

- Pedestrian improvements can be secured through a planning obligation.
- The site is entirely in Flood Zone 1 and is an appropriate location to deliver housing in this context.
- Subject to an appropriate foul and surface water drainage system, the proposed houses would not have an unacceptable impact on the Groundwater Source Protection Zone in which the site is located. For surface water, this will require an appropriate level of filtration to take place within the drainage system design and this will be relatively easy on what is a new rectangular, greenfield site.

In accordance with the above, it is evident that acceptable solutions can be delivered to address all of the opportunities and constraints presented by this proposed allocation.

Delivery Statement

The owner of the site are actively supporting the delivery of this housing allocation. I can confirm that it is available now and that should the allocation be confirmed that owner intends to partner with a housebuilder at that time and allow them to bring it forwards through a full planning application. Allowing time for contracts to be agreed, full planning permission to be granted and conditions discharged, we can confirm that the site could comfortably be delivered within the first five years of the Plan and would contribute towards both the five year housing land supply and the overall housing target.

Timeline

- Contract agreed with housebuilder following confirmation of the allocation – 3 months
- Securing the grant of full planning permission – 9 months (12 months total)
- Completing the purchase and discharging the pre-commencement conditions – 6 months (18 months total)
- 6 months till the first completion on the allocation (24 months total)
- 12 months to the completion of the last dwelling (36 months total)

This timeline would see all the dwellings completed by 3 years from the confirmation of the allocation. This, of course, allows some flexibility for any delays that might occur for the site to still come forward within the first five years following the adoption of the Plan.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

We can be available to answers any questions the Inspector might have in relation to the deliverability of this proposed allocation.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP38
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I think that the plan for Reach Farm land behind Roman Way involves too many houses. Reach Road is too narrow for the amount of increased traffic for the holiday parc, country hotel & country club, the housing developments already there such as Roman Way, Glebe close and Langdon close. The new development, like Glebe close and Langdon close will no doubt have traffic entering and exiting from Reach Road. The Local Authority should no encourage good agricultural land being used for development.</p> <p>The Local authority should use vacant lots in Nelson Park Estate for development. Being land originally sold in 1900 for development in particular along Collingwood Road where the highway is already tarmacked. Land both sides of Collingwood road could be used instead of Reach Road</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Land both sides of Collingwood road could be used instead of Reach Road
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Regarding the proposals registered under the above reference: I would like to register my objections in the strongest possible terms. These developments are totally inappropriate, given the surrounding infrastructure. The local primary school is oversubscribed. Some local children need to travel to other locations. The surgery is full The bus service is limited The roads are already a nightmare. Upper road is narrow, with hairpin bends, treacherous in bad weather. Sea Street is narrow with no adequate footpath. There are often delays at post box corner, if a bus or lorry is coming in/out of the village, especially if a post office van is parked outside the post office. Please recognise the major problems which will be caused if masses of extra families, together with their very necessary vehicles, take up residence here. In addition, this once lovely village, an ANOB, will simply become a massive housing estate. An annex to Dover. Many of the recent new builds which have been allowed are completely out of keeping with the village surroundings too. Please consider the very real dangers associated with heavy additional traffic which these plans will bring to the village. However great the need for housing is, I am afraid St Margarets is not the place for it! I sincerely hope that common sense will prevail over finance. DO NOT GIVE THESE PLANS THE GO AHEAD</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The National Trust is the owner and custodian of Langdon Cliffs and Foxhill Down which forms part of the Dover to Kingsdown Cliffs Special Area of Conservation (SAC) and Site of Special Scientific Interest (SSSI). Qualifying features include vegetated sea cliffs of vegetated sea cliffs of the Atlantic and Baltic Coasts, and Semi-natural dry grasslands and scrubland facies on calcareous substrates.</p> <p>As identified at paragraph 3.256 of the draft Local Plan, the White Cliffs of Dover are one the country's most iconic landscapes, attracting visitors from across the country and from overseas. The National Trust has seen year on year increases in visitor numbers to the Dover to Kingsdown Cliffs SAC site and we are increasingly concerned about the designated areas being damaged through trampling and path widths spreading by the increased use of visitors to the site. The Trust is working hard to ensure that the integrity of the site is maintained and along with partner organisations is committed to an extensive and ongoing programme of visitor management and mitigation measures. As well as this, the National Trust is currently seeking planning permission to secure new parking outside of the designation at Wanstone with the aim of alleviating pressure on the qualifying natural habitats and to reduce footfall through the SAC.</p> <p>Policy SAP38 proposes 40 new dwellings which will be located approximately 350m from the Dover to Kingsdown Cliffs SAC. This is a major development on the edge of a rural settlement where the quantum of development in such a context could be considered significant. The National Trust primary concern is to conserve the integrity of the SAC, and although protection should be afforded through proposed Policy SP13 Protecting the District's Hierarchy of Designated Environmental Sites and Biodiversity Assets, the Trust want certainty that the integrity of the Dover to Kingsdown Cliffs SAC qualifying features will be maintained and enhanced and that appropriate avoidance and mitigation measures will be in place.</p> <p>Recommend criterion added to policy wording which states, 'Due to the scale of development and close proximity to the Dover to Kingsdown Cliffs SAC and site of SSSI, a project level HRA is required. The HRA should consider the potential impact pathway of significantly increased recreational pressure and the relevant avoidance or mitigation measures required in line with Strategic Policy SP13'.</p>

	The western half of proposed site allocation SAP38 is located both within the Kent Downs AONB and land defined as Heritage Coast. The principle of major development in this location is not supported by national policy (paragraph 178, NPPF) which states that 'major development within a Heritage Coast is unlikely to be appropriate, unless it is compatible with its special character'. To be consistent with national planning policy it is recommended that the indicative capacity of development on this site is either revised down to minor development, or the allocation should only cover the area outside of the Heritage Coast with a revised indicative capacity to reflect appropriate densities in this sensitive rural location.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? The resultant increase in amount of traffic along Reach and onto the High Street would be dangerous and unacceptable, especially beyond the village hall to The High Street. The High Street is narrow and without a footpath in sections and an increase of traffic will cause further danger to pedestrians, cyclists and motorists, This sole route in and out of the village is already congested as is the last stretch of Reach Road.</p> <p><i>(DDC note: This representation was originally made against the Infrastructure Delivery Plan consultation document but has been duplicated in relevant places against the Local Plan due to the specific site allocation/policy references made)</i></p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Duplicate of SDLP1746) I think to consider planning for Reach Farm for housing is so wrong 1) Taking agricultural land. When we need land for food 2) Our roads are too narrow for traffic already. Either way into the village or towards the castle. Roads get flooded often further along. 3 Land at Nelson Park adjacent to Collingwood Road seems a much better idea The roads are already tarmacked. It was muted many years ago to develop that area, Village Roads frequently have traffic chaos when heavy goods or farm tractors use them I wish to register my objections to this planning for Reach Farm planning
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	With reference to the plan to create 40 new homes in St Margarets, I have to object. The village is too small to cope. We have a terrible bus service, so the number of cars that this will bring to the village is not feasible. We have trouble coping with the traffic already, without more being added. I appreciate that there are needs for new homes to be built, but not to the detriment of the village and the people who live here. These new homes will have a devastating impact on the village and the people who live there. So I am objecting to these proposals and ask you to reconsider these plans.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note: 3 emails sent on 16th Oct, 30th Oct; 31st Oct. They appear to relate to the same site and Email dated 16th Oct</p> <p>My Partner and I wish to oppose and raise the following issues re the building of this development we live and work in the village, my partner is one of the village Postman so we feel we have first hand knowledge and know the villages problems. It's infrastructure cannot cope with any more vehicles or people which these homes will bring to the village and its resources are already beyond stretched.</p> <p>Reach Rd, Sea Street and the High Street are already totally congested and dangerous and cannot be altered due to St Margarets unique position, with this only one main road in and out for The Cliffe and The Bay.</p> <p>Upper Road out of the village is fraught with problems, its narrow with hairpin bends and has the following continually on it....</p> <p>Castle visitors including large groups of student and school parties.</p> <p>Castle events bring hundreds of visitors and cars. Cruise ships bring hundreds of visitors on foot, bikes and coaches.</p> <p>Two National Trust entrances with hundreds of visitors, in cars, coaches on foot and an additional overflow carpark for the Main center, The Lighthouse and the Continuing projects in the area at Wanstone which will bring even more visitors.</p> <p>The ever busy Coastguard</p> <p>The Farm vehicles</p> <p>Car and visitors, especially foreign visitors parking dangerously on the narrow road not knowing where they are going.</p> <p>Bikes and Walkers use this road as its a AONB and a visitor attraction for the Whitecliffs, The Bay, Cliffe walks and Historical sites</p> <p>The Parkdean Holiday Park visitors and residents which continually grows.</p> <p>The Wedding venue at Reach Court Farm = alot of traffic for every event which has grown.</p> <p>We use these roads 6 times a day back and forth and 8 times out of 10 we encounter some sort of problem/incident, which just get worse.</p> <p>There are no footpaths or only partly on these roads and often jammed so no emergency vehicles can only get through with difficulty if at all.</p> <p>The resources in the village, GPs, Schools etc are at over full capacity already along with the communication systems and gas supply.</p> <p>It would destroy even more of AONB, flora and fauna we have to and been told to protect.</p>

These houses should not be built on top of the iconic Whitecliffs in St Margarets which sits in a very unique position for these reason.
Please pass these objections onto the relevant person.

Emails dated 30th and 31st Oct

Myself and my Husband who is one of the Postman for the village live and work in St Margarets at Cliffe we therefore use Upper and Reach Road leading in the High Street etc upto 8 times aday so feel very qualified to say this:

We are writing to express are very real concerns and FEARS, we oppose the building of 40/50 houses this side of the Village because of the many vehicles and pedestrians these developments would add to these already dangerous and congested roads and an even bigger concern for Pedestrians both Adults and Chidren who use them.

These roads are UNIQUE with what they already and gave to cope with especially Upper Road with hundreds and hundreds of cars and pedestrians using it all year around visiting Dover Castle, Cruise Passengers, The National Trust and its Car Parks, The Coastguard, The Farms, Reach Court Farm Wedding Venue, The Holiday Park, St Margarets Bay and obviously visiting the iconic Whitecliffs, The Village itself and this area of AONB to name but afew.

In addition locals from the Village, "Cliffe and Bay" and Dover plus visitors from further afield going about their daily lives taking their children to school and getting to work etc plus for Walkers, dog walking, cycling and exercise and getting out into a green space. Alot of foreign visitors also use these roads not always knowing where they are going or where to park etc.

All these factors make these EXTREAMLY BUSY DANGEROUS, HAZARDOUS roads, like no other which are also very exposed, narrow with hairpin bends and no or only partial pavements and lighting.

There is always alot of congestion and que's restricting emergency vehicles access and entrance.

Due to the uniqueness and layout there is no way of changing this infrastructure.

As we said we travel on these roads everyday in all weathers and 8 out of 10 times there is an incident from dodging pedestrians, swerving coaches to bad accidents, there are already memorials on the road we don't want any more.

These roads cannot cope and it would be extreamly irresponsible to add to it by building on/off them adding and causing more health and safety risks and ultimately we fear more fatalities. PLEASE listen to us the people who know these roads and use them.

PLEASE acknowledge this email and assure us it will be read and seriously considered by the right people. We would be very happy to talk to whomever face to face about our real concerns and fears, by adding more traffic and people to this side of the village when other options are available and far more suitable without adding to risk of life

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I think to consider planning for Reach Farm for housing is so wrong 1) Taking agricultural land. When we need land for food 2) Our roads are too narrow for traffic already. Either way into the village or towards the castle. Roads get flooded often further along. 3 Land at Nelson Park adjacent to Collingwood Road seems a much better idea The roads are already tarmacked. It was muted many years ago to develop that area, Village Roads frequently have traffic chaos when heavy goods or farm tractors use them I wish to register my objections to this planning for Reach Farm planning
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I object to STM3 for the following reasons: 1. St Margarets is a village, I want to keep it that way. We don't want or need it to expand. 2. The area considered is beautiful farmland, the views are enjoyed by many, we don't want a housing estate built on it. 3. Reach Road is already difficult to navigate during rush hour, having even more traffic will make it a nightmare. 4. I doubt the local primary school could cope with extra pupils, as far as I am aware it is already at full capacity. 5. Extra housing will impact on the water levels, we already have to endure hosepipe bans, this will only get worse.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The proposed development of the land between The Droveaway and Salisbury Road for the building of "executive" homes is unsound for multiple reasons and should be deleted from the overall Plan.</p> <ol style="list-style-type: none"> We do not believe this proposal has been positively prepared in that it does not seek to meet Dover District's objectively assessed needs. <ul style="list-style-type: none"> There is clearly a need for more housing in the District, but there are many more suitable sites available. The biggest need is for affordable housing and this site, with its proposed maximum of ten executive houses, will not make any contribution to that need. One of the assessed needs is to increase the prosperity of the District and this aspect of the plan will not achieve that. The only people who would have their prosperity increased by this proposal are the current landowner (who does not live in the District) and the property developers. The plan does not take into account the local infrastructure and its incapacity to satisfy any further expansion. <ul style="list-style-type: none"> The permanent increase in traffic resulting from the construction of these houses, as well as the temporary (but long term) increase due to heavy construction traffic, will have significant adverse impacts on all existing residents. Since Salisbury Rd is private, access to the site is likely to be along The Droveaway which is narrow in places and can become extremely congested - particularly at the Sea Street end. Heavy construction traffic will damage the road surface (and pavements) and will be a danger to the many pedestrians (not just local residents) who use this road. The village of St Margaret's is accessed by a single road, which is already congested and can be difficult to negotiate. It is surprising that there are not more accidents already. The plan does not propose any improvements to this local infrastructure to accommodate the increased traffic that would result from adoption of this proposal.

	<ul style="list-style-type: none"> • The same argument applies to the proposal to build 40 houses along Reach Road (SAP38, STM003) and 10 houses to the west of Townsend Farm Road (SAP39, STM007 and STM008), which will exacerbate the traffic problem still further. • There appear to be no plans to increase the capacity of local amenities (GP surgery, dentists, schools...) to accommodate the increase in population. <p>3 The plan does not take into account the sustainability of the local environment.</p> <ul style="list-style-type: none"> • The proposed site is in open countryside, lying within the boundaries of the Kent Downs Area of Outstanding Natural Beauty. AONBs are entitled to extra protection from inappropriate development so as to preserve their beauty for all to enjoy. The site is very close to several important habitats for wildlife with high protected status and is adjacent to the National Trust land at Bockell Hill. The site is an important buffer between these sensitive habitats and the existing residential areas of the Bay, and a housing development would severely damage that protection. • The proposed site is the highest point in the area and any housing development there will severely affect the visual beauty of the immediate and surrounding areas. There are public footpaths along three of the boundaries and these are very well used and enjoyed by residents and many visiting walkers and wildlife enthusiasts. The views from the proposed site extend eastward to Ramsgate and beyond, to the Dover Patrol Memorial and west to the South Foreland lighthouse. These views are unique and should be protected from being blocked by development. • The existing tree line of the site next to The Drove way is sparse and will offer little to no mitigation of the damage of this proposed development. The proposal submitted by the Lander Group offers no solution to this. <p>4 Legal Compliance is uncertain.</p> <ul style="list-style-type: none"> • We understand that the inclusion of this site as being suitable for immediate development was made at the latest possible stage (i.e. the day before closure) in the previous iteration of the Local Plan process (Regulation 18) and we further believe that by doing so DDC made procedural mistakes in that the legally required public consultation was not carried out. This is particularly unfair, given the significant impact this proposed development would have on local residents who have not therefore had the chance to make our views known until this last stage. The absence of our views may lead the Council to assume that we have/had no objections to the proposals, whereas the opposite is abundantly clear. • We also question the further exploitation of this site should initial approval for its development be granted. Once the principle of housing on this site has been accepted, a developer could come back with a much larger development proposal. Local residents are well aware that it has been previously, and frequently, suggested that as many as 72 houses could be built on the field and, therefore, this proposal very much represents the thin end of a wedge.
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Perhaps not surprisingly, the simple solution to the issues cited above is to abandon this proposal of development of the land between The Drove way and Salisbury Road and, indeed, any further development of the village of St Margaret's.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>Given the importance of my objections to the proposed development, I do not consider it sufficient to leave this representation to those who do not live in the village nor who would be directly impacted by it. It doesn't have to be me, but there MUST be direct and personal representation of the villagers at the oral proceedings.</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><i>I consider the selection of this site as unsuitable as it is not compliant with NPPF paragraph 174/176/177. It is in the Kent Downs Area of Outstanding Natural Beauty and I feel that any development would not enhance the landscape. The development would be clearly visible when approaching the village of St Margaret's via Dover Rd. A view which is currently open countryside. The site has also been of archaeological interest HER Numbers: TR34 SE 368/369/385 refer on Kent County Council website.</i></p> <p><i>Access to the site via Townsend Farm Rd would seem totally unsuitable. The junction at The High Street end is narrow and it would not be possible to widen it as there is housing on both sides. This end of the road is not only used for parking by residents but by others locally when visiting the village as the parking bays and spaces on The High St are often full. There is also a designated disabled parking space used by a resident of Townsend Farm Rd. I would also like to say that there is often a queue of stationary traffic opposite that junction due to congestion in the village when there are high volumes of traffic coming out of the village. Something that happens on a daily basis.</i></p> <p><i>I believe that any development of this site would result in an unacceptable traffic impact on the local vicinity and the village. It would mean the introduction of yet more cars which is something the village most definitely does not need. It will just add to the congestion already affecting the village as a whole. Something which becomes more dangerous and problematic at weekends and with tourism. The bus service connecting St Margaret's to Dover and Deal has recently been significantly reduced by Stagecoach which is also likely to contribute to an increase in traffic.</i></p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	STM007/STM008 (SAP39 Land to the west of Townsend Farm Road. St Margaret's at Cliffe)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Infrastructure: There is no mention in the plan of any improvements to be made to the village infrastructure to support this large number of additional houses and the number of extra vehicles and people this development will bring. Apart from the narrowness of the road through the village, the absence of footpaths and pedestrian walkways and the increasing volume of cars and delivery vans passing through each day, the plan does not take into any account the tourist nature of St Margaret's and its rapidly growing popularity with summer visitors. The village will need considerable re-modelling and new roads and services if it is to cope with this added influx and I do not see any details on infrastructure to support the plan. It is very short termist to just build more houses without considering where the traffic will go, what facilities there are for families, schools, doctors, dentists, shops, etc- obviously presuming the houses are for local families and not to be sold as second homes or to foreign investors. There is a high number of holidays homes in the village already with only part-occupancy during the year. These underprepared and ill-thought out developments will take away the attraction of St Margaret's. Long queues to go through the village will detract visitors and make life even more difficult and dangerous for the people already living here. The plan does not seem to address these issues of sustainability and infrastructure.</p> <p>AONB: The fact that the village is in an AONB is not given enough importance in the plan- what will be the view as visitors approach the village to be met by a large scale housing estate, 36 terraced house in SAP39 blocking the views to the church, the memorial and the famous cliffs. The high density will change the landscape, the aspect of the village and contravenes the Dark Skies Policy that is within the village. There is no mention of the effect of light pollution in the plan- no provision for the environment and how this plan will irrevocably change the nature of the village and the landscape. It is short- termist and ill-conceived. We should not simply be meeting a housing quota- once lost there is no going back. and an ancient historic village is changed forever.</p> <p>Access & Sustainability: At a more specific level, the SAP39 proposed plot has not addressed the issue of accessibility to the new development. How will the greatly increased number of cars access the high street? Townsend Farm Road is too narrow at the junction and cannot be widened as the parking is needed for the disabled resident and for village parking. There is often a bottleneck now as cars and delivery vans queue to pass through the narrowest point at the shop so another 60 +cars from the 36 houses will only make it considerably worse. This plan will more</p>

	<p>than double the number of users on a very small narrow road which only allows single file traffic at the junction. Furthermore, at the development stage how will construction traffic access the plot? Meadow View is an unadopted road and unsuitable for heavy traffic turning around or unloading; there is the very real likelihood of causing costly damage to be paid for by the residents. The plan does not address the facilities and services required by such an increase in the population of the village.</p> <p>Over recent years, there has been much increased interest in St Margaret's as a tourist destination, in particular as a WW2 historical site attracting international visitors as well as national. There is evidence of WW2 tunnels and hospital complex on the SAP39 site and it would be very short-sighted to lose this potential future tourist attraction. Costly archeological investigations are accounted for in the plan but the existence of these heritage sites is already known. Why even consider building houses on an historical site when they could be built on a more neutral piece of land without incurring any historical loss? Once lost it is gone for good and it is important to remember that tourism is the main attraction of the area.</p> <p>In conclusion, the plan should address these issues of sustainability and infrastructure before considering proceeding with building on plot SAP39 and in general developing anywhere in STM010.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	Removal of site STM007/STM008 from the Local Plan.
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	To be able to put by objections forward in person along side others in the village.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	STM010 location SAP39, fields west of Townsend Farm Road, St Margaret's at Cliffe
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Site access - the current road (Townsend Farm Road) is totally unsuitable for proposal SAP39. The plan indicates widening of the road and reconfiguration of the Ash Grove junction. However, this would not in any way resolve access from the High Street as the road cannot be widened at the High Street junction end and the road is effectively only one lane as it is used for local residents parking, including designated disabled parking. The proposal would more than double the existing number of properties in Townsend Farm Road, Ash Grove and Meadowview and accordingly the traffic in what is a new through road country lane. There is also mention of improved pedestrian access to the services in the village, namely a pram crossing. There is currently no pedestrian access from the western side of the village to other village services in the eastern side including the local GP, the school and the village hall. Therefore any pedestrian improvement at the Townsend Farm junction will have minimal impact and traffic through the village will increase as residents try to access services on the other side of the village. Any access via Dover Road would require removing part of an established thick hedgerow. Another issue for the residents of Meadowview is that it is an unadopted road. There are implications for vehicle access and liability insurance in relation to this if the road is damaged or there is an accident.</p> <p>Local services - The few local services in the village are stretched and there is nothing in the plan to improve or increase the services which will only increase the pressure on them. Local bus services to Deal and Dover have recently been reduced to the extent that no one can use public transport within normal travel to work hours and the new timetable severely hinders the ability of children in the village traveling to and from school. The likely result is a substantial increase in traffic to and from the village during peak hours and the plan does not take account of this significant change which only took place at the end of November 2022.</p> <p>AONB - Part of SAP39 falls within the Kent Downs AONB. Although the plan indicates the use of certain designs, materials and landscaping to mitigate the impact, it fails to cover some very important aspects. The proposed development would have no environmental buffer or screening along the southern boundary of SAP39 and it would be clearly visible on the approach from Dover Road. The land slopes steeply westwards and any attempts to naturally screen the development across long views from a westerly direction would take decades. The site is of particular significance visually and environmentally because it is permanent pasture (a priority habitat) and is currently used for grazing and, it currently forms an important visual and environmental contribution to open countryside on the edge of the village. It is not "infill" as it lies on the edge of the village. There is no mention of the environmental impact in the plan in relation to the pastureland nor the fact that the site has an old field boundary running through the middle of it with numerous mature trees along its edge. It only vaguely refers to impact on the site boundary hedges and trees and not the fields themselves. Being on the edge of the village, the site has an important function in the AONB dark skies policy and this is significant for the local known bat population and roosting birds. There is no mention of a local impact study on the bats and other wildlife in relation to this.</p> <p>There is a footpath and bridleway in the AONB that runs the length of the western boundary of SAP39. The proposal would have a negative effect on this amenity for villagers and tourists alike in terms of the view and the traffic generated by the development. SAP 39 would also have a significant impact on the visual aspect of the village church from southern and western approaches to the village and there have been planning restrictions on development in relation to these views and vistas in the recent past (Meadowview development).</p> <p>The development would also be contrary to the national planning policy position that it must comply in the first instance with the primary requirement of conserving and enhancing the landscape and scenic beauty of the settlements in, surrounded or adjoining an AONB.</p> <p>Archaeological considerations - There is no mention in the plan of the existing archaeological observations in the site vicinity. These are detailed below.</p>

Planning reference CON/16/00866 had an archaeological report carried out for MeadowView development on the eastern side of Townsend Farm Road. It identified Anglo Saxon activity had been recorded west of Meadowview where these two site references are located. 12 Anglo Saxon burials had been identified and this was likely part of a bigger cemetery/burial ground on the site. The area was also identified as having a high archaeological potential. During the archaeological dig carried out at the Ash Grove development opposite, evidence of late neolithic, Bronze age and medieval remains were found despite the housing foundations already being laid before the dig could be carried out.

Historic England Monument no. 1520749 - An underground tunnel system on the site or in the vicinity of the site is thought to be a military hospital from WW2. Although the exact dimensions are not known, it is thought to be significant with 6 entrances and over 275ft in length. The site has a wealth of other defence related constructions from this period including deep air raid shelters and the recoil spur for the long range gun. There is a lack of historical information regarding this site due to it previously being a military site which restricted detailed investigation of the site. The site and vicinity should be protected from development because of the historical heritage significance and the future tourism potential which would be lost if this development takes place.

A detailed archaeological survey should take place before consideration is given for such a sensitive site but is only given a passing reference in the plan if approval is given.

Other considerations - Tourism and the visitor experience are key aims of the plan according to DM24. It already plays a significant role in the local economy and is seen as a valuable part of future economic growth. Such a development in a village this size would significantly detract against such aims. The White Cliffs and the Bay would lose its appeal if those wishing to visit have to navigate long queues to pass through the village and are faced with a prominent housing estate as you enter the village, and is not in keeping with the rest of the village which is typically made up of individual dwellings or small developments.

Summary and conclusion - The development of SAP39 for housing would represent a major intrusion into the countryside of the Kent Downs AONB and village surrounds and would be of severe detriment to the local landscape. Steps to mitigate the impact of the proposal as set out in the plan are either non-existent or wholly inadequate and it would leave a lasting scar on the village landscape. It would also have an unacceptable traffic impact on the local vicinity and the rest of the village. The increase in traffic in recent years as a result of minor incremental building development in the village regularly causes traffic jams, noise and air pollution and it is no longer a safe place to cycle around. Recognising the need for local housing, SAP39 is unsuitable in terms of scale and location within the village.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The removal of SAP39 from STM010 in the local plan.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	STM010 location SAP39 land west of Townsend Farm Road St Margaret's at Cliffe
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>It relates to the inclusion of policy number SAP39 of the draft local plan which allocates the site references STM007 and STM008 west of Townsend Farm Road for 36 dwellings. In my view, the site is unsuitable for development for the reasons outlined below.</p> <p>I further note that Reg.18 of the draft plan proposed 11 dwellings for the site and the new plan increases this more than threefold. It is unclear how this proposal can be supported by the Plan since, during the same time, village services have suffered perceptible decline and the transport infrastructure is totally inadequate given the increasing strains placed upon it. It is my contention that this development is not required based on local needs and will serve to degrade the local environment given that it will exacerbate increasing village deficits.</p> <p>St. Margaret's is an important part of the Dover Area of Outstanding Natural Beauty which the DDC and the National Trust have been at great pains to promote as a tourist destination, whether to enjoy the world renowned clifftop views of the Strait of Dover or to visit the important components of our national heritage made up of such elements as South Foreland Lighthouse, Second World War tunnels or the Dover Memorial. At the same time, the beach at St. Margaret's Bay has become ever busier thanks in part to the enhanced car parking, refreshment kiosk and pub which also offers overnight motorhome camping. During the summer and at weekends, there is now a seamless stream of vehicles passing through the village where (on street) parking and road width make the experience dangerous for both road users and pedestrians due to the absence of pavements. It seems contradictory to seek to build on a site that will markedly increase traffic on the High Street which invariably backs up from the single track 'pinch point' of the village shop several times a day and therefore cannot do anything but routinely impede access to the beauty spots and heritage sites being promoted. This is, of course, without reflecting on the quality of the living environment of local inhabitants which, with respect to the roads, is perilous.</p> <p>Other reasons for why the proposed site is unsuitable follows:-</p> <p>AONB - Part of SAP39 falls within the Kent Downs AONB. Although the plan indicates the use of certain designs, materials and landscaping, it fails to cover some very important aspects. The proposed development would have no environmental buffer or screening along the southern boundary and it would be clearly visible on the approach from Dover Road. The land slopes steeply westwards and any attempts to naturally screen the development across long views from a westerly direction would take decades. The site is of particular significance visually and environmentally because it is permanent pasture (a priority habitat) and currently used for grazing, and it currently forms an important visual and environmental contribution to open countryside on the edge of the village. It is not "infill" as it lies on the edge of the village. There is no mention of the environmental impact in the plan in relation to the pastureland nor the fact that the site has an old field boundary running through the middle of it with numerous mature trees along its edge. It only vaguely refers to impact on the site boundary hedges and trees. Being on the edge of the village, the site has an important function in the AONB dark skies policy and this is significant for the local known bat population. There is no mention of a local impact study on the bats and other wildlife in relation to this. There is a footpath and bridleway in the AONB that</p>

runs the length of the western boundary of SAP39. The proposal would have a negative effect on this amenity for villagers and tourists alike in terms of the view and the traffic generated by the development. The development would also be contrary to the national planning policy position that it must comply in the first instance with the primary requirement of conserving and enhancing the landscape and scenic beauty of the settlements in, surrounded or adjoining an AONB.

Site access - the current road (Townsend Farm Road) is totally unsuitable for this size of development. The plan indicates widening of the road and reconfiguration of the Ash Grove junction. However, this would in no way resolve access from the High Street as the road cannot be widened at the junction end and the road is effectively only one lane as it is used for local parking, including designated disabled parking. 36 units will more than double the existing number of properties in Townsend Farm Road, Ash Grove and Meadowview and accordingly the traffic. There is also mention of improved pedestrian access to the services in the village, namely a pram crossing. There is currently no pedestrian access from the western side of the village to other village services in the east including the local GP, the school and the village hall. Therefore any pedestrian improvement at the Townsend Farm junction will have minimal impact and traffic through the village will increase as residents try to access services in the village. Any access via Dover Road would require removing part of an established thick hedgerow.

Another issue for the residents is that Meadow View is an unadopted road. There are implications for vehicle access and liability insurance in relation to this if the road is damaged or there is an accident.

Local services – The few local services in the village are stretched and there is nothing in the plan to improve or increase the services which will only increase the pressure on them. Local bus services to Deal and Dover have recently been reduced to the extent that no one can use public transport within normal travel to work hours and severely hinders the ability of children in the village travelling to and from school. The railway station is three miles distant and requires a car to access. The likely result is a substantial increase in traffic to and from the village during peak hours and the plan does not take account of this significant change.

Archaeological considerations - There is no mention in the plan of the existing archaeological observations in the site vicinity. These are detailed below. Planning reference CON/16/00866 had an archaeological report carried out for Meadow View development on the eastern side of Townsend Farm Road. It identified Anglo Saxon activity had been recorded west of Meadowview where these two site references are located. 12 Anglo Saxon burials had been identified and this was likely part of a bigger cemetery/burial ground on the site. The area was also identified as having a high archaeological potential. During the archaeological dig carried out at the Ash Grove development opposite, evidence of late neolithic, Bronze age and medieval remains were found despite the housing foundations already being laid before the dig could be carried out. Historic England Monument no. 1520749 - An underground tunnel system on the site or in the vicinity of the site is thought to be a military hospital from WW2. Although the exact dimensions are not known, it is thought to be significant with 6 entrances and over 275ft in length. The site has a wealth of other defence related constructions from this period including deep air raid shelters and the recoil spur for the long range gun. There is a lack of historical information regarding this site due to it previously being a military site which restricted detailed investigation of the site. The site and vicinity should be protected from development because of the historical heritage significance and the future tourism potential which would be lost if this development takes place.

Other considerations - Tourism and the visitor experience are key aims of the plan according to DM24. It already plays a significant role in the local economy and is seen as a valuable part of future economic growth. Such a development in a village this size would significantly detract from such aims. The White Cliffs and the Bay would lose its appeal if those wishing to visit have to navigate long queues to pass through the village and are faced with a prominent housing estate as you enter, not in keeping with the rest of the village made up of individual dwellings or small developments. Summary and conclusion - The development of SAP39 for housing on the scale outlined would represent a major intrusion into the countryside of the Kent Downs AONB and the village surrounds and thus would be of severe detriment to the local landscape. Steps to mitigate the impact of the proposal as set out in the plan are either non-existent or wholly inadequate and it would leave a lasting scar on the village. Such a development would also have an unacceptable traffic impact on the High Street and surrounding access points.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Removal of SAP39 from STM010 in the local plan.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP40 STM010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Plan is Unsound</p> <p>The proposed development of the land between The Drove way and Salisbury Rod for the building of "executive" homes is unsound for multiple reasons and should be deleted from the overall plan.</p> <ol style="list-style-type: none"> 1. We do not believe that this proposal has been positively prepared in that it does not seek to meet the Dover Districts objectively assessed needs. There is clearly a need for more housing in the District but there are many more suitable sites available.. The biggest need is for affordable housing and this site with its proposed maximum of ten executive houses will not make any contribution to that need. One of the assessed needs is to increase the prosperity of the District and this aspect of the plan will not achieve that. The only people who will have an increase in prosperity are the current landowner (who does not live in the District, and the property developers. 2. The plan does not take into account the local infrastructure and its capacity to satisfy any further expansion. <p>The permanent increase in traffic resulting from the construction of these houses as well as the temporary (but long term) increase due to heavy traffic will have significant adverse impacts on all existing residents. Since Salisbury Road is private access to the site is likely to be only along</p>

	<p>The Droveaway. The Droveaway is a long and narrow road which only has a limited section of paving at the Sea Street end. The road is always very congested , especially at the Sea Street end, and so narrow there that large vehicles always drive on the pavement to get through. There is a constant stream of people walking in this beautiful area, but I have observed that when cars come through they often have to step into driveways in order to feel safe. The increase in traffic in this lane ipotentially very dangerous. Heavy construction traffic will damage the road surface (and such pavements as there are) and will be an additional danger to the many pedestrians(not just local residents) who use this road.</p> <p>The village of St. Margarets is accessed by a single road, which is already congested and can be difficult to negotiate. The same argument applies to the 40 Houses along Reach Road(SAP38,STM003), 10 houses to the West of Townsenbd Farm Road (SAP39, STM007) and STM008) which will exacerbate the problem further. However, the development on the Droveaway is by far the worst issue because there is no other access road to the bay area, and all additional traffic for the bay has to go via Sea Street past the Primary School, where frequent traffic issues occur and will cause additional risk for the children. Even if the Doctors surgery could accomodate additional patients there is no parking facility in the bay to deal with this.</p> <p>3. The plan does not take into account the Sustainability of the local environment. The proposed site is in open countryside, lying within the boundaries of the Kent Downs Area of Outstanding Natural Beauty. AONBsare entitle to extra protection from inappropriate development so as to protectr their beauty for all to enjoy. The site is close to several very important habitats for wildlife with highly protected staus and is adjacent to the National Trust Land at Bockhill.The site is an imoportant buffer between these sensitive habitatsand the existing residential areas of the Bay and a housing development would seriously damage the protection.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The simple solution to the issues cited above is to abandon this proposal of development of the land between The Droveaway and Salisbury Road and , indeed, any further development of the village of St. Margarets.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>There must be direct and personal representation of villagers, and especially those living in roads concerned, at the oral proceedings.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>RESPONSE TO DOVER DISTRICT COUNCIL LOCAL PLAN REG.19 CONSULTATION NOVEMBER 2022</p> <p>This response is submitted on behalf of the residents of Meadow View, Townsend Farm Road, St Margaret's at Cliffe. It relates to the inclusion of policy number SAP39 of the draft local plan which allocates the site references STM007 and STM008 west of Townsend Farm Road for 36 dwellings. In the view of residents, the site is unsuitable for development for the reasons outlined below.</p> <p>We further note that Reg.18 of the draft plan proposed 11 dwellings for the site and the new plan increases this more than threefold. It is unclear how this proposal can be supported by the Plan since, during the same time, village services have suffered perceptible decline and the transport infrastructure is totally inadequate given the increasing strains placed upon it. It is our contention that this development is not required based on local needs and will serve to degrade the local environment given that it will exacerbate increasing village deficits.</p> <p>St. Margaret's is an important part of the Dover Area of Outstanding Natural Beauty which the DDC and the National Trust have been at great pains to promote as a tourist destination, whether to enjoy the world renowned clifftop views of the Strait of Dover or to visit the important components of our national heritage made up of such elements as South Foreland Lighthouse, Second World War tunnels or the Dover Memorial. At the same time, the beach at St. Margaret's Bay has become ever busier thanks in part to the enhanced car parking, refreshment kiosk and pub which also offers overnight motorhome camping. During the summer and at weekends, there is now a seamless stream of vehicles passing through the village where (on street) parking and road width make the experience dangerous for both road users and pedestrians due to the absence of pavements. It seems contradictory to seek to build on a site that will markedly increase traffic on the High Street which invariably backs up from the single track 'pinch point' of the village shop several times a day and therefore cannot do anything but routinely impede access to the beauty spots and heritage sites being promoted. This is, of course, without reflecting on the quality of the living environment of local inhabitants which, with respect to the roads, is perilous.</p> <p>Other reasons for why the proposed site is unsuitable follows:-</p> <p>AONB - Part of SAP39 falls within the Kent Downs AONB. Although the plan indicates the use of certain designs, materials and landscaping, it fails to cover some very important aspects. The proposed development would have no environmental buffer or screening along the southern boundary and it would be clearly visible on the approach from Dover Road. The land slopes steeply westwards and any attempts to naturally screen the development across long views from a westerly direction would take decades. The site is of particular significance visually and environmentally because it is permanent pasture (a priority habitat) and currently used for grazing, and it currently forms an important visual and environmental contribution to open countryside on the edge of the village. It is not "infill" as it lies on the edge of the village. There is no mention of the environmental impact in the plan in relation to the pastureland nor the fact that the site has an old field boundary running through the middle of it with numerous mature trees along its edge. It only vaguely refers to impact on the site boundary hedges and trees. Being on the edge of the village, the site has an important function in the AONB dark skies policy and this is significant for the local known bat population. There is no mention of a local impact study on the bats and other wildlife in relation to this. There is a footpath and bridleway in the AONB that runs the length of the western boundary of SAP39. The proposal would have a negative effect on this amenity for villagers and tourists alike in terms of the view and the traffic generated by the development. The development would also be contrary to the national planning policy position that it must comply in the first instance with the primary requirement of conserving and enhancing the landscape and scenic beauty of the settlements in, surrounded or adjoining an AONB.</p>

Site access - the current road (Townsend Farm Road) is totally unsuitable for this size of development. The plan indicates widening of the road and reconfiguration of the Ash Grove junction. However, this would in no way resolve access from the High Street as the road cannot be widened at the junction end and the road is effectively only one lane as it is used for local parking, including designated disabled parking. 36 units will more than double the existing number of properties in Townsend Farm Road, Ash Grove and Meadowview and accordingly the traffic. There is also mention of improved pedestrian access to the services in the village, namely a pram crossing. There is currently no pedestrian access from the western side of the village to other village services in the east including the local GP, the school and the village hall. Therefore any pedestrian improvement at the Townsend Farm junction will have minimal impact and traffic through the village will increase as residents try to access services in the village. Any access via Dover Road would require removing part of an established thick hedgerow.

Another issue for the residents is that Meadow View is an unadopted road. There are implications for vehicle access and liability insurance in relation to this if the road is damaged or there is an accident.

Local services – The few local services in the village are stretched and there is nothing in the plan to improve or increase the services which will only increase the pressure on them. Local bus services to Deal and Dover have recently been reduced to the extent that no one can use public transport within normal travel to work hours and severely hinders the ability of children in the village travelling to and from school. The railway station is three miles distant and requires a car to access. The likely result is a substantial increase in traffic to and from the village during peak hours and the plan does not take account of this significant change.

Archaeological considerations - There is no mention in the plan of the existing archaeological observations in the site vicinity. These are detailed below. Planning reference CON/16/00866 had an archaeological report carried out for Meadow View development on the eastern side of Townsend Farm Road. It identified Anglo Saxon activity had been recorded west of Meadowview where these two site references are located. 12 Anglo Saxon burials had been identified and this was likely part of a bigger cemetery/burial ground on the site. The area was also identified as having a high archaeological potential. During the archaeological dig carried out at the Ash Grove development opposite, evidence of late neolithic, Bronze age and medieval remains were found despite the housing foundations already being laid before the dig could be carried out. Historic England Monument no. 1520749 - An underground tunnel system on the site or in the vicinity of the site is thought to be a military hospital from WW2. Although the exact dimensions are not known, it is thought to be significant with 6 entrances and over 275ft in length. The site has a wealth of other defence related constructions from this period including deep air raid shelters and the recoil spur for the long range gun. There is a lack of historical information regarding this site due to it previously being a military site which restricted detailed investigation of the site. The site and vicinity should be protected from development because of the historical heritage significance and the future tourism potential which would be lost if this development takes place.

Other considerations - Tourism and the visitor experience are key aims of the plan according to DM24. It already plays a significant role in the local economy and is seen as a valuable part of future economic growth. Such a development in a village this size would significantly detract from such aims. The White Cliffs and the Bay would lose its appeal if those wishing to visit have to navigate long queues to pass through the village and are faced with a prominent housing estate as you enter, not in keeping with the rest of the village made up of individual dwellings or small developments. Summary and conclusion - The development of SAP39 for housing on the scale outlined would represent a major intrusion into the countryside of the Kent Downs AONB and the village surrounds and thus would be of severe detriment to the local landscape. Steps to mitigate the impact of the proposal as set out in the plan are either non-existent or wholly inadequate and it would leave a lasting scar on the village. Such a development would also have an unacceptable traffic impact on the local vicinity and the rest of the village.

(No list of the other residents supplied)

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Removal of SAP39 from STM010 in the local plan.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Because this is a resident's group response.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP39 - Land to the West of Townsend Farm Road St. Margaret's at Cliffe (STM007 & STM008)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We believe that the proposed site is part of an "aerea of outstanding beauty" and therefore it would be "not consistent with National Policy".</p> <p>We believe that a new Development in the area of St Margaret's at Cliffe is deeply unsuitable because the Village has a very poor infrastructure (narrow and single lane roads, huge traffic issues, over subscribed surgery, no first aid facility, etc... etc...). Specifically Townsend Farm Road is a single lane road (with a disable parking) and wouldn't be suitable for any further increase of traffic)</p> <p>The main characteristic of this little village is the fact that it is a Historically important and a touristic area. Building new housing without improving first the infracture (such as new roads or eventually a bypass) would make this village lose its attraction and damage the economy of the area.</p> <p>In addition, a new Development at the entrance of the town would also have a negative visual impact causing the Village to lose its main characteristic of being a historical and touristic village.</p> <p>We also believe that the land where the Development should be built is a site of Archaeological importance and as a such not suitable for new buildings.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	We would suggest to build any New Developments in Rural areas like it has been done at Richmond Park (Whitfield Dover) or Preston Grange near Wingham. Ultimately refuse planning permission SAP39.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	STM010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I am commenting on STM010. It is unsound because the land is outside of the Village confines in an AONB and part of the North Downs.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Remove this land from a proposed building site and instead purchase it as a wildlife area, as it is adjacent to the National Trust wildlife area.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>In my view, site STM010 in St. Margaret's at Cliffe is unsuitable for housing development for the following reasons:</p> <p>Firstly, the Landscape Impact of any development of the site would have a very detrimental impact on the surrounding landscape. The field in question rises to 90 metres and is the highest point of land on the cliffs at the north end of the village (see contour map attached). Any houses built it would be visible from a considerable distance. In the assessment carried out by Dover District Council out in 2012 for the Local Plan adopted in 2015 (SAD28) the council itself argued with that Landscape Impact of any development would be unacceptable, pointing out: "The site is on the crest of a hill and, despite screening, would be visible from a long distance". It then went on to declare that "Any development on the site would, therefore, have a highly detrimental impact on the surrounding landscape". Since the hill has not shrunk in the past 10 years this valid objection still stands and Dover CC should stand by the argument they made at that time.</p> <p>Secondly, any development on the site would have a serious impact on the setting of the adjacent grade 2* listed Dover Patrol Memorial, an important heritage asset on the popular Frontline Britain Trail. The listing description makes the point that the memorial is "intact in its original coastal setting". The land on which the memorial is sited is several metres lower than STM010 and any housing development is would have a negative effect on this important coastal setting.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance	Site STM010 should not be allocated for housing and should therefore be deleted from Policy SAP40.

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. 3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The proposed development of the land between The Drove way and Salisbury Road for the building of "executive" homes is unsound for multiple reasons and should be deleted from the overall Plan. 1 We do not believe this proposal has been positively prepared in that it does not seek to meet Dover District's objectively assessed needs. <ul style="list-style-type: none"> There is clearly a need for more housing in the District, but there are many more suitable sites available. The biggest need is for affordable housing and this site, with its proposed maximum of ten executive houses, will not make any contribution to that need.

- One of the assessed needs is to increase the prosperity of the District and this aspect of the plan will not achieve that. The only people who would have their prosperity increased by this proposal are the current landowner (who does not live in the District) and the property developers.
- 2 The plan does not take into account the local **infrastructure** and its incapacity to satisfy any further expansion.
- The permanent increase in traffic resulting from the construction of these houses, as well as the temporary (but long term) increase due to heavy construction traffic, will have significant adverse impacts on all existing residents. Since Salisbury Rd is private, access to the site is likely to be along The Droveaway which is narrow in places and can become extremely congested - particularly at the Sea Street end.
 - Heavy construction traffic will damage the road surface (and pavements) and will be a danger to the many pedestrians (not just local residents) who use this road.
 - The village of St Margaret's is accessed by a single road, which is already congested and can be difficult to negotiate. It is surprising that there are not more accidents already. The plan does not propose any improvements to this local infrastructure to accommodate the increased traffic that would result from adoption of this proposal.
 - The same argument applies to the proposal to build 40 houses along Reach Road (SAP38, STM003) and 10 houses to the west of Townsend Farm Road (SAP39, STM007 and STM008), which will exacerbate the traffic problem still further.
 - There appear to be no plans to increase the capacity of local amenities (GP surgery, dentists, schools...) to accommodate the increase in population.
- 3 The plan does not take into account the **sustainability** of the local environment.
- The proposed site is in open countryside, lying within the boundaries of the Kent Downs Area of Outstanding Natural Beauty. AONBs are entitled to extra protection from inappropriate development so as to preserve their beauty for all to enjoy. The site is very close to several important habitats for wildlife with highly protected status and is adjacent to the National Trust land at Bockell Hill. The site is an important buffer between these sensitive habitats and the existing residential areas of the Bay, and a housing development would severely damage that protection.
 - The proposed site is the highest point in the area and any housing development there will severely affect the visual beauty of the immediate and surrounding areas. There are public footpaths along three of the boundaries and these are very well used and enjoyed by residents and many visiting walkers and wildlife enthusiasts. The views from the proposed site extend eastward to Ramsgate and beyond, to the Dover Patrol Memorial and west to the South Foreland lighthouse. These views are unique and should be protected from being blocked by development.
 - The existing tree line of the site next to The Droveaway is sparse and will offer little to no mitigation of the damage of this proposed development. The proposal submitted by the Lander Group offers no solution to this.
- 4 **Legal Compliance is uncertain.**
- We understand that the inclusion of this site as being suitable for immediate development was made at the latest possible stage (i.e. the day before closure) in the previous iteration of the Local Plan process (Regulation 18) and we further believe that by doing so DDC made procedural mistakes in that the legally required public consultation was not carried out. This is particularly unfair, given the significant impact this proposed development would have on local residents who have not therefore had the chance to make our views known until this last stage. The absence of our views may lead the Council to assume that we have/had no objections to the proposals, whereas the opposite is abundantly clear.
 - We also question the further exploitation of this site should initial approval for its development be granted. Once the principle of housing on this site has been accepted, a developer could come back with a much larger development proposal. Local residents are well aware that it has been previously, and frequently, suggested that as many as 72 houses could be built on the field and, therefore, this proposal very much represents the thin end of a wedge.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful

Perhaps not surprisingly, the simple solution to the issues cited above is to abandon this proposal of development of the land between The Droveaway and Salisbury Road and, indeed, any further development of the village of St Margaret's.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Given the importance of my objections to the proposed development, I do not consider it sufficient to leave this representation to those who do not live in the village nor who would be directly impacted by it. It doesn't have to be me, but there MUST be direct and personal representation of the villagers at the oral proceedings.

A development on this site will be extremely detrimental to an AONB site (of which there are few enough already). it will also be extremely detrimental to the wildlife in the area to which the fields , trees etc are vital. the infrastructure of the town (in terms of width of roads , parking , buses to schools, and recreational amenities now that the White Cliff hotel , Red Lion and Hope has been allowed to change use for housing) are insufficient to warrant the building of housing estates.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The plan for site ST M 010 is not sound as the plan was rushed through last year under Article 18 with no time for consultation. The plan now doesn't take into consideration the siting of the proposed homes in an area of already congested traffic, no infrastructure for the number of people in the village as it is now! This area is an area of outstanding natural beauty. The footpaths around the field have been used by walkers both local and from other areas of the country and abroad. We are in need of areas like this more now than ever since the pandemic for the need to be able to exercise in open spaces of beauty! Also this is an historic area right across from the Dover Patrol War Monument.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	STM010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

We believe, as evidenced in the submission, that due process has not been followed and that there have been material procedural and legal flaws (including non-compliance with applicable planning law and the European Convention on Human Rights) in the consultation with regard to STM010 that mean its inclusion in the plan should be withdrawn.

- 1 The inclusion of STM010 does not meet the tests of soundness in the NPPF and other applicable mandatory requirements of the NPPF, as set out in detail in the submission.
- 1 Breach of ECHR Article 10 – Expression. The information displayed on the Local Plan Portal explicitly implied that site STM010 was not available or under consideration. It required a subsequent FOI request to ascertain from the LPA that a submission was made by the landowner at the very end of the Regulation 18 consultation period. The parish council of St. Margaret's at Cliffe was one of fourteen parish councils that were listed in Regulation 19 as not participating or commenting during the consultation stages of Regulation 18. In fact, St. Margaret's at Cliffe parish council did comment on Regulation 18 matters, but not on this site. Other residents as well as the Parish Council were totally unaware of site STM010's inclusion and acceptance into the Local Plan until Regulation 19 was commenced and the evidence released. A further FOI request to ascertain the facts before the promulgation of Regulation 19 was denied. The engagement with communities has been by-passed. The submission of Regulation 18 comments has been bypassed. The assessment and decision making based on contemporary evidence has been by-passed. The resultant decision is flawed. All members of the public were mis-informed and as the direct result I allege denied their rights of "expression" in accordance with Article 10.
- 2 Breach of ECHR Article 1 Protocol 1. Everyone has the right to own property alone as well as in association with others and to quietly enjoy such property(s). This, in St. Margaret's at Cliffe, includes private properties, the common roads and footpaths and pavements that connect them and includes all aspects of the AONB. The AONB is for the nation to enjoy and experience well-being and tranquillity. It is not a private asset that can be sold for development and financial gain. Its unique designation laid certain responsibilities on the landowner, bequeathing it to all and marking it as something not to be sold and speculatively developed. I allege that the removal of the protections on site STM010 and the resultant development processes are a breach of Article 1 for not only the residents but also the nation.
- 3 Non-compliance with Duty to Co-operate. As evidenced in 1 above and in the narrative below.

- 1 Not in Compliance with the present Local Development Scheme and DDC's planning

decisions in Council that have arisen from its implementation over more than one decade in this area of St. Margaret's at Cliffe. There exists a disconnect between the existing Local Plan and LPA decisions over the years and the future Local Plan. If the plan is formed and connected to the past it should, and would, seamlessly move forward with full accord. The fact that I am having to submit this comment tells me it has not.

- 1 Sustainability Appraisal Irregularities. I have difficulty in comprehending how the sustainability appraisals at different times in the plan can give differing results. For the Regulation 18 appraisal, site STM010 had two, or more, caveats imposed resulting in the site being ringed in red and shown in the narrative as unavailable. These caveats were long established, recognised barriers to development by the LPA and their resolution was necessary to enable the sites to be considered. There exists no safe and suitable road access to the site along either of the two roads that pass along its length. The caveats have not been met yet somehow the appraisal assessment methodology can, in secret, move the site from not only "red" to approved "green".

- 1 Unsafe for residents. The village and especially, The Droveaway, were the product of pedestrian and animal traffic. The Droveaway, an ancient highway, would not have been closed on two sides. Housing would have been scarce or non-existent. We now have narrow roads, ribbon width footpaths with pedestrians and all forms of transport from combine harvesters to baby buggies trying to co-exist. There exist no mitigating measures other than removing the vehicles or providing very substantial new infrastructure which would totally destroy the AONB.

- 1 Has not been positively prepared. The parish of St. Margaret's at Cliffe is one of a number of parish's that have been actively formulating a Neighbourhood Plan. "Neighbourhood planning gives communities the power to develop a shared vision for their area." Consultation has taken place and DDC has known that this site is considered as "protected" by the parish council. It does not reflect well on DC that this site has deliberately, and in secrecy, been included in the Local Plan at regulation 19. The time for submission of arguments of substance is over. We are now left to deal with mere protocol.

8. Sustainability Appraisal Reg 18 2021

Stage B: Developing and refining options and assessing effects

“Indeed, there will often be an equal number of positive or negative effects identified by the SA for each option, such that it is not possible to rank them based on sustainability performance in order to select a preferred option. Factors such as public opinion, deliverability and conformity with national policy will also be taken into account by plan-makers when selecting preferred options for their plan.”

The site STM010 has 11 negative scores against 2 positive scores of equal weight. I do not see how this has been valued to advance inclusion into the plan.

1 Unreasonable within the settings and the parameters. The inclusion of this site, STM010, within the proposed local development plan is not consistent with paragraph 3.405 of the current Dover Local Plan which emphasises that there only very limited opportunities for development within the Cliffe/Bay areas that would not harm the AONB. The inclusion of this site, within the AONB, will cause the very harm to the AONB that the existing local plan says should not happen and seeks to avoid.

1 The planned 10 houses on this site within the AONB constitutes a major development which would be seriously detrimental to the AONB. The village has seen, in my time in the village, the demise of three public house, a number of shops including a greengrocers and a butchery, a garage and petrol station, a large bakery, a pharmacy and a post office, etc. The bus service could close tomorrow. The train station is a car journey for most residents. Public houses are scored the same whether they are open restricted days, restricted hours and whether they offer food or limited food. There is no provision for new facilities such as proper dedicated doctor surgeries or dental practices or anything else in this Plan. Nothing proposed for this site will bring these services back or revitalize this community. The development of this site brings nothing of benefit to the community. All non-strategic housing for its own sake brings is to the detriment of all and all that its many visitors presently enjoy.

1 STM010 is not deliverable at this moment in time. What leads DDC to believe it will be deliverable at some future date? The previous section 18 consultation stated categorically that development of this site would only occur in conjunction with the adjoining STM011. The owners of STM011, who live in The Droveaway, had to, after being alerted to their land being allocated for development, positively instruct DDC to remove their site from the plan. In later versions of the plan both sites were removed as potential development sites.

2 Inconsistent with National Policy in more ways than can be listed here.

The evidence is laid out in the narrative below which was prepared for Regulation 18 but not submitted. This narrative comment has been amended and updated as further evidence has become available.

Comment on the proposal for development of site STM010 in St Margaret’s at Cliffe, now submitted as part of the Regulation 19 (submission version), comments on Non Strategic Housing Allocations of the Local Plan.

Date: 24.10.2022.

I previously submitted a late comment, on behalf of the residents of The Droveaway, on the 30.12.2021, in relation to the proposed development of site STM010 as it was included in the Regulation 18 Consultation version of the Draft Dover District Local Plan but was coloured orange. This indicated that it was considered but not selected as were both STM003 and STM006. STM007 and STM008 were coloured green showing that they had been considered and selected. It had been considered by the LPA and then publicly posted as refused, prior to the closure date on the 17th March, 2021. STM010 was not a chosen site. The Local Plan has been advanced since then to the next stage, Regulation 19 and site STM010 has now been listed for inclusion in the final plan, without due process being followed, along with three other sites in the parish’s AONB, in the plan. Further specific evidence supporting this allegation is found within Reg 19 of the Local Plan. In the Evidence Base on page 13, STM010 is listed as “allocated.” On page 62 it says “STM010 and STM011 are unavailable.” In late 2021, it required an FOI request to ascertain that the application had been resubmitted at the “last minute.” A subsequent FOI request this year was rejected on the grounds that the information sought would be found in the supporting evidence of Reg 19. I have sought but not found it. How anyone is meant to navigate this uncharted “shoal” and derive answers and engage with the Local Plan has become foggy. It is certainly testing this simple sailor!

Additionally, STM011, was originally listed as being available. The lady who owned the field read this in the plan and rang DDC to ascertain why it was in the plan. She was told that they assumed it was for development because STM010 had been made available. She could not ascertain from DDC who had informed them that it was available and instructed DDC to remove it. STM011 was subsequently listed as unavailable as was STM010.

In my earlier late submission to Regulation 18 I wrote, almost solely, of the detrimental social amenity effects of permitting such a development. I wish to comment initially on a technical aspect and then the AONB and SPA’s before returning to my earlier submitted statements.

On the 10.10.2022 I found on Natural England's web-site their Planning Consultation with DDC dated 17th March, 2021, reference 340831. In it, sites STM003, STM 006, STM 007, STM 008, but not STM 010, are listed as being consulted. I have no knowledge if NE has been consulted regarding STM010 at any relevant time during the proceedings of this Local Plan as I cannot find on DDC's web-site any such details. The National Trust has recently replied to me confirming the absence of consultation. There appears to exist a total lack of transparency in relation to information about this site with this site being initially under consideration, removed and then re-instated following the last day for applications by DDC. This site has special considerations when compared with the above listed sites as further detailed below. Consequently, it appears, not to have been assessed as required, or an assessment has not been made public for consultees and officials to be better informed and comment on. Chapter 11 of the Local Plan, pages 279 to 294, contains specific policies NE1 (Bio-Diversity Net Gain) and NE2 (Landscape Character and The Kent Downs AONB). I cannot find that these policies have been followed for STM010 in the Local Plan. I cannot find the assessments available for consultees and others. I find a decision made in favour of allocation grounded on the basis of 11 negatives and 2 pluses irrational. What mitigations can balance the mathematics? Has this just been a desk top exercise by officialdom or has any meaningful assessment been recently made by on-site visits by responsible and knowledgeable parties? The Local Plan Policy Team seem to have been acting in isolation, and, without reference to the Planning department. Past contemporary decisions by the planning department consultee advice reinforced at Inspector level regarding sites adjacent to this field are now questioned. This was recognised by the Local Planners when the site was listed as unavailable and coloured in "orange" on the map in Reg 18. The field STM010 was considered not suitable for development and the evidence is fully in the Local Plan Evidence base if you only search for it!

I ask the inspector to separately assess this aspect in consideration of STM010?

AONB and SPA Status

Impacts to site as it stands

STM010 has several characteristics which need careful consideration within an LVIA (Landscape and Visual Impact Assessment) on the AONB before the allocation can be recommended. Namely the site is directly connected via a footpath (approx. 300 metres) to a popular stretch of the England coast path which is a key feature of the South Foreland heritage coast based around the Dover Patrol Memorial near Leathercote Point. It also has a second footpath (approx. 75metres) running along another boundary and a shorter footpath (approx. 30 metres) leading to the kissing gate access directly from The Droveaway. Leathercote Point is a popular base and destination point for many visitors to the heritage coast with a prominent English heritage war memorial, car parking and panoramic views of the coast line. Inland from the car park and England coastal path, a footpath leads through an area of land (Bockhill) which is under conservation management by the National Trust to improve its grassland habitats. The SSSI coastal strip has been broadened deliberately by The National Trust between Leathercote Point and Hope Point to create an even greater bio-diversity habitat than previously existed. This broadened coastal strip has also been created by The National Trust to the west of the Lighthouse towards Dover. This picturesque area provides an inland expansion of the cliff top grassland landscape intrinsic of this part of the heritage coast and AONB and provides a direct connection both in terms of landscape and access to the proposed STM010 development site. The arable land and woodland of the site provides an important transition and buffer between the important open cliff top landscape and the built environment of St. Margaret's at Cliffe village meaning development in the STM010 site could therefore have significant effects on the landscape of the AONB/Heritage coast.

Whilst the AONB designation does not preclude housing development on the site, an important consideration is that fact that the AONB and heritage coast boundaries were drawn to explicitly include the area of STM010. The settlement boundaries excluded it from development. The site is not an incidental inclusion into a large AONB but the result of a deliberate intention to protect this land as it offered some benefit to the objectives of the site. A housing development would be a clear separation from the intended purpose of the AONB designation for this area.

Restoration potential and contribution to Biodiversity Net Gain resource

The prime purpose of the AONB designation is to conserve and enhance the natural and scenic beauty of the landscape. In relation to STM010, it's important to not only consider what would be lost by developing the area, i.e., the benefits it currently offers the AONB and Heritage coast but also what potential for enhancement it provides as this will be lost permanently with any development. The National Planning policy framework makes reference several times to the responsibility, authorities, such as DDC, have for not only protecting, but **enhancing**, the natural environment. Specifically, it states in 176, *Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty which have the highest status of protection in relation to these issues.* This site, by DDC's own submissions, has UK and European recognition status in the form of AONB and SPA's giving it very high levels of protection. This site must be given this consideration.

With regard to restoration, an important consideration is that the site is 300 meters from the Dover to Kingsdown cliffs Special Area of Conservation (SAC) and Site of Special Scientific Interest (SSSI) which protects cliff top grassland and scrubland habitat which is also a key natural and landscape feature of the AONB and heritage coast. This habitat is constrained along a thin corridor by housing development and land use except

in areas where specific land management allows its progression inland. If the arable land (STM010) could be restored to natural cliff top grassland and scrub then it could serve to create more of this national scarce habitat. Furthermore, the location of the STM010 site adjacent to the land under conservation managed at Bockhill by the National Trust would create a natural corridor to internationally important cliff top grassland habitats of the Dover to Kingsdown SAC. Such restoration would directly contribute to the management plan objectives of the Kent Downs AONB and Dover local plan's natural environment policies. Importantly this site could represent an important location where the **biodiversity net gain (BNG)** obligations of other developments could be targeted. Its proximity aids connectivity to designated conservation sites and possible high importance of the habitat restored could mean the site represents a high value site for biodiversity net gain. In short, by retaining its very high intrinsic value, it would aid and assist the development of strategic development sites in settings where the developments are purpose built to high residential standards and with full and proper amenities. The minimum, ten percent offset, could aid the development of as much as 25 hectares of Strategic Housing development!

General Points

- The Dover Area of Outstanding Natural Beauty runs from Dover to Kingsdown and also enjoys Special Protected Area status (protection of birds). It is a contiguous coastal corridor, and located in it are the four AONB which are in consideration for development in the parish of St. Margaret's at Cliffe. They were established and have been protected for some decades by repeated agreement between National Bodies such as Natural England, local bodies, Dover District Council and landowners. It has been agreed and protected, nationally and internationally, as migratory birds are not the property of any country and I will leave it to others with fuller knowledge to comment on the exact details and the enhanced protections that such status brings. It is now being very seriously considered by the LPA that these smaller parts of the AONB should be removed from the greater AONB, have their established protections revoked and for them to be brought within the settlement boundaries. All for the sole purpose of creating, by their own plan objectives, Non-Strategic Housing. In short, housing that has no special needs other than it would be nice to have or to make up the numbers game.
- The overall AONB is important to migratory birds, particular the smaller more vulnerable species. The meeting of the Dover Straits and the North Sea, Leather-cote Point (the monument) to the Walde Light House (near Calais Harbour Entrance), was the narrowest point until the formation of the sandbanks off Calais when Cap Blanc became the nearer option. It is the route which certain species followed and still follow during their twice-yearly migrations from Europe to the British Isles and back. Migratory birds are most vulnerable over open water and close to exhaustion. Leather-cote Point is the choke-point of their migration route! On a foggy damp late October morning at about 0800, as I walked in the field under consideration into the grazing field next to the monument, I witnessed enormous flocks of swallows, swifts and house martins lifting up over the cliff edge and turning inland to crash down within a few hundred metres of the cliff edge. Returning from all along the south coast of England on their annual migration south they found themselves damp, exhausted, with no insects aloft to feed on and settled for the morning to wait for the sun to break through and the fog to clear. The cliffs are slowly receding, hard housing, hard landscaping and hard fencing is proliferating, the AONB is shrinking by all means, natural and man-made and the LPA wants to make it even more difficult for our feathery friends. When the last 25 metres of cliff path finally succumbs to the elements and tumbles down these parts of the SSSI will cease to exist, visitors will only have the roads to continue their journey across St. Margaret's Bay and the birds will need to seek refuge further inland.
- Mitigation in such areas is a requirement for development to proceed. National policies and the Local Plan tell us this. What mitigation exists for the irreversible destruction of critical protected habitat? There exists none and for the LPA to pretend otherwise is a fallacy.
- New housing will bring with it the associated light pollution that goes with additional development of the AONB. On this most prominent site on the ridge this will have the associated detrimental effects on countryside character and an overall negative impact for all forms of insect and animal life in respect of migration patterns, wake-sleep habits, and habitat formation. Evidence exists, that it can be a deadly factor for migratory birds. (Reference National Geographic Society 15.07.2022) Street lighting is almost, or is, totally absent from St. Margaret's at Cliffe within 750 metres of the cliff edge. At night, darkness blankets the landscape.
- Additionally, the creation of new housing will bring with it some years of noise, dust, obstructions and inconvenience for residents and nature. It will not be seamless. It will be a total disconnect between the decades before and the years to follow. It will leave an enduring legacy during and following the builds that will not reflect well on the LPA. Trust and respect are precious commodities.

- The views of the Royal Society for the Protection of Birds should be sought at the earliest opportunity. Their members are frequently, certainly daily in the field in question and adjoining parts of the greater AONB monitoring the bird-life. They will, I am sure, corroborate all that I have written here and be able to supply important additional information. Additionally, the particular species, of which, I have previously written are all, on the British Trust for Ornithology, 2021 Red-List (Birds of Conservation Concern).
- The field STM010 with its inter-connecting footpaths leading to other lanes and paths is an important part of the pedestrian network used by local and visiting national and international tourists. These footpaths connect to others not only parallel to the coastal path but also inland via footpath ER27 to Hogg's Bush lying along Otty Bottom. Traversing along these interconnecting paths and lanes with their associated views of scenery and all life-forms gives the user a feeling of wellness and freedom which cannot be quantified.
- The land between Salisbury Road and The Droveaway was bought by Brian Powell for the express reason that he did not want it to be developed, especially for housing, as it would impact his privacy and the value of both the property that he owned and resided in, "Margarita" and his parents who owned and resided in "Jasmine". Both properties are along Salisbury Road and are adjacent to the field. With the field standing considerably higher than both properties, any buildings would dwarf their properties, have a view into their rooms, obscure the late afternoon and evening sun and be detrimental to their well-being. The land was passed onto his son, David Powell about the time when Brian Powell passed away in 2014. David Powell does not live in the village and as such the site has become a speculative and profitable site to develop for him.
- It is pivotal and vital for future migrations that STM010, in particular, is not desecrated by Non-Strategic development. We should be enjoying our natural landscape and aiding the greatest of avian natural movements, not hindering them. Once this route is irreversibly choked, the irrevocable loss to our fragile ecosystem will be felt all around the globe.

Infra-Structure And Social Amenities (STM 010 Only)

- The Droveaway is officially classified on the county's registry as an ancient highway. As such it is a public road along which residents and farm vehicles travel. As it is a "no exit" road vehicles enter and exit by the same route which maximises the traffic movements of The Droveaway, Salisbury Road, The Rise, Norman Road, Convent Close, Kennelworth Close, Droveaway Gardens and Downside at the only public entry\exit point onto Sea Street at the top of Bay Hill.

The landowner of site SM010, Mr David Powell, may have a legal access to the site from The Droveaway at the field's north eastern extremity. Farm vehicles are the only ones which have been noticed using this access. The part of The Droveaway that borders the entire length of this field was poorly maintained and consequently thought to be private until the 1990's when residents lobbied for it to be entertained by KCC as public in the fullest sense of the word. The road surface was skimmed but it has never been provided with drainage or substrate as laid down in the subsequent legislation of 2006. Footpaths, pavements and kerbs are also most difficult to find. Consequently, it has required frequent remedial repairs though traffic here is the lightest to be encountered along the Droveaway.

Salisbury Road has been a private Road maintained by its residents for some decades. The enjoys no access onto or along this road.

- The proposed development would affect the three established footpaths that lie along three sides of the field to be developed. These paths can be found in the KCC register and two are presently sign posted.
- The field to the north east of site STM010 contained the largest post WW2 underground fortifications ever built in the British Isles to accommodate thousands of military personnel. They were on more than one level. A bunker at the SW extremity of site STM010 is reported to have a tunnel leading in a north easterly direction. If so, some underground fortifications run under this field. This extensive underground works under the National Trust field is privately owned, is not protected, but needs consideration and may be a factor in why no development has been permitted to date anywhere on adjoining fields.
- All vehicular traffic from The Droveaway and Salisbury Road needs to pass in its entirety along the section of The Droveaway extending from the Salisbury Road junction to Sea Street. On road parking by residents and visitors to the village surgery for approx. 100 metres of road frontage effectively makes this part of the road one-way only. Droveaway Gardens also meets The Droveaway here resulting in the residents of the Droveaway Gardens (approx. 15 properties) being required to turn at right angles into the traffic flow. At the junction with

Sea Street there exist a bar and tea room (First Light) which have limited/no parking so vehicles are parked at or near this junction, both in Sea Street, Granville Road and The Droveaway) from 0800 to evening hours.

- The junction with Sea Street at the top of Bay Hill is a complex and challenging one. It comprises a number of roads meeting at the crest of a hill with the associated hazards of blind spots, a bus stop, pedestrians and the tearoom traffic. On modern designed highways this would be regulated by traffic lights or a round-about. It is not so here.
- The Droveaway has pavements, often parked over, along approximately one third of its length. A very short section, approx. 25 metres has pavements both sides, the remainder one. Salisbury Road has no dedicated pavements. Large and small vehicles frequently mount the pavements and verges for considerable distances to gain access.
- Any increase in vehicular traffic will also need to pass through the village along one of two routes, that of Sea Street or that of Reach Road. Vehicular traffic is a particular issue in Sea Street which, in part, is a narrow village street with shops and two schools along its length, inadequate or no pavements and doesn't even boast a pedestrian crossing at any of the points that one would be expected, or a lower than 30mph speed limit! This may be because almost nowhere exist opposing pavements to connect them to. No improved infrastructure is contemplated by KCC in this future plan, yet DDC seems to be assessing the situation as "the more the merrier". I have written and spoken in council chambers of "abrogation of responsibilities" in the past and will leave it here.
- Almost all vehicles, especially heavy farm machinery, have become bigger. With their extra wide bodies and tyres to spread the load they are too wide to pass along many lanes and roadways and mount the banks and pavements where they may exist. This is the frequent situation along The Droveaway with no mitigation possible. Construction traffic just adds to the problem.
- The site STM010 lies at the highest point on the ridge. It enjoys a small wood and is tree and thicket lined on two sides with two being open giving extensive views in north\south directions, i.e., the memorial to the lighthouse. Previous developments along this ridge, historical and much more recent, have revealed archaeological treasures in the form of graves. It will very likely require extensive "digs" to prove this site and the associated part of the field clear of artefacts with the associated total destruction of habitat.
- The proposed site, STM010, as previously detailed, forms a vital part of the greater Dover AONB which surrounds the parish settlement boundaries at a prominent height on the ridgeline of 86 metres. It has, and continues, to lie outside the settlement boundaries for many reasons, including all of those listed above.

Each and every part of the Local Plan, as submitted and required by regulation 19, has to meet four tests for the Inspector to approve them. These tests are detailed in the Soundness Self-Assessment Checklist as summarised below -

- 1 Positively Prepared: based on a strategy which seeks to meet objectively assessed development and infrastructure requirements
- 2 Justified: the most appropriate strategy when considered against the reasonable alternatives, based on proportionate evidence
- 3 Effective: deliverable over its period based on effective joint working on cross-boundary strategic priorities
- 4 Consistent with national policy: enabling the delivery of sustainable development

When the evidence is assessed against the tests listed above, each and every-one fails to meet, let alone pass the test. Whichever objective is chosen, be it infrastructure requirements, reasonable alternatives, strategic priorities or consistent with national policy the tests result in failures.

The plan is not deliverable in any meaningful manner, it does not deliver sound infrastructure and it has regulatory and national barriers to its delivery.

Dover District Council have confirmed publicly at the council meeting held on the 12th October, 2022, to pass the Local Plan, that there existed 17 village sites, in total, for inclusion in the Local Plan. This is only one! I ask the inspector to view and assess each and every one of these similarly for an approach that may have mis-interpreted or disregarded the necessities of the Soundness Test.

I reaffirm my absolute opposition and objection to any development on this site for the stated reason of Non-Strategic Development.

	Gerald Irvine.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The change sought are – <ol style="list-style-type: none"> 1 For the site STM010 to be removed from the Local Plan and the site returned to the status it has enjoyed for many years or even be granted further protections. 2 That all other windfall sites are reviewed with a critical eye to ensure that the alleged non-compliances listed in 6 are not present and to ensure compliance.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I wish to participate in the oral part of the examination because I believe that I can assist and satisfy the Inspector's requirements and examinations to properly investigate and assess the issues raised and alleged by me in the way the Local Plan has been administered and implemented, especially in relation to STM010 and STM011.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The development between The Droveaway and Salisbury Road should be deleted from the plan.</p> <p>There are many more suitable sites available in the District. One of the needs is to increase the prosperity of this village, this only makes the current land owner and the developer prosperous</p> <p>This plan does not address the LOCAL INFRASTRUCTURE to satisfy further expansion. The Droveaway (which is a cul-de-sac) is narrow in places which at present causes problems for pedestrians as well as motorists. This plan does not suggest any improvement to The Droveaway/Salisbury Road/Sea Street junctions. In The Droveaway we have a cafe, bar, doctors surgery and a Catholic church, hence there is continuous movement of traffic attending these establishments. The traffic includes large agricultural vehicles which use the full length of The Droveaway to work on the land. There is NO ALTERNATIVE ROUTE to use</p> <p>SUSTAINABILITY</p> <p>The site is in open countryside, this is important to the wildlife. A development on this site would severely damage the existing vista. These views are unique and should be protected from being blocked by a development. This site is the highest point in the area any housing would affect the visual beauty of this and the surrounding area. The ambience of the area is demonstrated by the number of visitors, a development would harm the existing Green Infrastructure and the opportunities for enhancement</p> <p>This inclusion is particularly unfair as this was made at the last possible stage, and could have given the Council to assume that I had no objections to this plan. Whereas the opposite is abundantly clear</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Abandon this proposal development and, any further development of the village
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	This does not have to be me, but there must be representation from the villagers at the oral examination. I don't consider this hearing to be left to those who do not live in the village

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 40 St Margarets-at-Cliffe, STMO10 Land between Salisbury Road and The Droveaway
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This is the first time this allocation has been made public and the background information generally, for the area, is out of date.</p> <p>The proposed site is part of the AONB and is significant within the area as it is about the highest point and contains important views from a public right of way towards the nationally important Dover Patrol memorial. Any buildings on this site will dominate the entire area.</p> <p>Planning Policy Statement 7 in the Dover District Settlement and Review Hierarchy document sets out an ambition for development in or near local service centres where employment, housing, services and other facilities are provided close together. Some limited development may be permitted to meet local business and community needs to maintain the vitality of communities.</p> <p>None of these tests are met by this proposal</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>The background information needs to be accurate and proper consideration given to the proposed allocation. For example, the background information describes a bus service timetable that no longer exists. The site cannot be considered sustainable with a limited bus service. I cannot see any reference in the background information discussing the access to this site. The Droveaway is narrow and difficult to navigate. Even if the carriageway is fit for purpose, the junction with Sea Street is not coping with current levels of traffic and further down the hill and through the village centre there is congestion.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP40 (STM010)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The narrow and often pavementless roads through the village are unsuitable for the volume of heavy site traffic which this housing development would create. This would not only create traffic congestion but would endanger pedestrians using the village amenities, parents and children crossing Sea Street at school drop-off and pick up time, pedestrians using our vibrant and lively cafe on the corner of The Droveaway - much loved by walkers! Of grave concern are those residents using the Drs. Surgery a little further along The Droveaway. Patients arriving by car particularly the elderly and frail have no choice but to walk in the narrow road to access the Surgery because there is no pavement. The excess plant and site traffic would greatly increase the risk of accidents in both Sea Street and the Droveaway. Heavy plant and site traffic would break up the road surface and what pavements there are, increasing the danger for pedestrians. The site for development is next to an area of outstanding natural beauty which attracts visitors from all over the world. I consider it is socially, aesthetically and environmentally inappropriate for this site to be used for development.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I feel that the last minute decision to include this site without local consultation in the Local Plan was underhand.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP40, STM010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The proposed development of the land between The Droveaway and Salisbury Road for the building of "executive" homes is unsound for multiple reasons and should be deleted from the overall Plan.</p> <ol style="list-style-type: none"> We do not believe this proposal has been positively prepared in that it does not seek to meet Dover District's objectively assessed needs. <ul style="list-style-type: none"> There is clearly a need for more housing in the District, but there are many more suitable sites available. The biggest need is for affordable housing and this site, with its proposed maximum of ten executive houses, will not make any contribution to that need. One of the assessed needs is to increase the prosperity of the District and this aspect of the plan will not achieve that. The only people who would have their prosperity increased by this proposal are the current landowner (who does not live in the District) and the property developers. The plan does not take into account the local infrastructure and its incapacity to satisfy any further expansion. <ul style="list-style-type: none"> The permanent increase in traffic resulting from the construction of these houses, as well as the temporary (but long term) increase due to heavy construction traffic, will have significant adverse impacts on all existing residents. Since Salisbury Rd is private, access to the site is likely to be along The Droveaway which is narrow in places and can become extremely congested - particularly at the Sea Street end. Heavy construction traffic will damage the road surface (and pavements) and will be a danger to the many pedestrians (not just local residents) who use this road.

	<ul style="list-style-type: none"> • The village of St Margaret's is accessed by a single road, which is already congested and can be difficult to negotiate. It is surprising that there are not more accidents already. The plan does not propose any improvements to this local infrastructure to accommodate the increased traffic that would result from adoption of this proposal. • The same argument applies to the proposal to build 40 houses along Reach Road (SAP38, STM003) and 10 houses to the west of Townsend Farm Road (SAP39, STM007 and STM008), which will exacerbate the traffic problem still further. • There appear to be no plans to increase the capacity of local amenities (GP surgery, dentists, schools...) to accommodate the increase in population. <p>3 The plan does not take into account the sustainability of the local environment.</p> <ul style="list-style-type: none"> • The proposed site is in open countryside, lying within the boundaries of the Kent Downs Area of Outstanding Natural Beauty. AONBs are entitled to extra protection from inappropriate development so as to preserve their beauty for all to enjoy. The site is very close to several important habitats for wildlife with high protected status and is adjacent to the National Trust land at Bockell Hill. The site is an important buffer between these sensitive habitats and the existing residential areas of the Bay, and a housing development would severely damage that protection. • The proposed site is the highest point in the area and any housing development there will severely affect the visual beauty of the immediate and surrounding areas. There are public footpaths along three of the boundaries and these are very well used and enjoyed by residents and many visiting walkers and wildlife enthusiasts. The views from the proposed site extend eastward to Ramsgate and beyond, to the Dover Patrol Memorial and west to the South Foreland lighthouse. These views are unique and should be protected from being blocked by development. • The existing tree line of the site next to The Droveaway is sparse and will offer little to no mitigation of the damage of this proposed development. The proposal submitted by the Lander Group offers no solution to this. <p>4 Legal Compliance is uncertain.</p> <ul style="list-style-type: none"> • We understand that the inclusion of this site as being suitable for immediate development was made at the latest possible stage (i.e. the day before closure) in the previous iteration of the Local Plan process (Regulation 18) and we further believe that by doing so DDC made procedural mistakes in that the legally required public consultation was not carried out. This is particularly unfair, given the significant impact this proposed development would have on local residents who have not therefore had the chance to make our views known until this last stage. The absence of our views may lead the Council to assume that we have/had no objections to the proposals, whereas the opposite is abundantly clear. • We also question the further exploitation of this site should initial approval for its development be granted. Once the principle of housing on this site has been accepted, a developer could come back with a much larger development proposal. Local residents are well aware that it has been previously, and frequently, suggested that as many as 72 houses could be built on the field and, therefore, this proposal very much represents the thin end of a wedge.
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Perhaps not surprisingly, the simple solution to the issues cited above is to abandon this proposal of development of the land between The Droveaway and Salisbury Road and, indeed, any further development of the village of St Margaret's.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>Given the importance of my objections to the proposed development, I do not consider it sufficient to leave this representation to those who do not live in the village nor who would be directly impacted by it. It doesn't have to be me, but there MUST be direct and personal representation of the villagers at the oral proceedings.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I do not believe that the plan is sound and am of the opinion that it should be deleted. The proposal has not been positively prepared and does not meet DDC's assessed needs' A maximum of 10 "executive houses is in no way a "need" and the site has been wrongly described as an "infill".</p> <p>The name of the road reminds us of it's original use and it remains a narrow road leading to the farm and the Downs. The road is narrow and for the most part has no footpath. Parking is allowed in places where there is a footpath, from Salisbury Road to Sea Street, and farm vehicles and contractor's lorries frequently are obliged to mount the narrow pavement in order to pass.</p> <p>Any development to the seaward side of the village of St. Margaret's at Cliffe is unwise as it will only add to the amount of traffic which is forced to go through the already congested centre of the village.</p> <p>The proposed site is in an area of outstanding beauty and may be of archeological interest.</p> <p>Whether the application is legally compliant is a moot point. It was submitted on the day of closure which gave no opportunity for public consultation.</p> <p>If permission were granted there would be nothing to stop a developer applying for approval of a larger number of houses thus adding a greater burden of traffic to the Droeway and the Village.</p> <p>No thought at all seems to have been given to the infrastructure.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)	Changes? Abandon the plan and seek suitable sites on the landward side of the village which would have access to main roads and space for suitable infrastructure.

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I am sure that the site looks feasible to the desk-bound observer. The reality is different and I would ask that the Inspector visit the and see for himself.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

I consider the plan to be unsound.

3a) NOT positively prepared

NOT Consistent with National Policy

STM010 is an AONB on the South Foreland Heritage Coast, adjacent to National Trust land and has unique ecological status as a corridor for migratory birds from the continent.

Adjacent to the Kent Coastline Walk, this field gives access at the North East corner of the field to the Frontline Britain Trail leading to the Dover Patrol Memorial. The landscape of the White Cliffs of Dover is treasured nationally and unique in the history of the nation, particularly in respect of lives lost in the Straits of Dover in WW1 and WW2

The NPPF states

Para 195

Local planning authorities should identify and assess the particular significance of any heritage asset that may be affected by a proposal (including by development affecting the setting of a heritage asset) taking account of the available evidence and any necessary expertise. They should take this into account when considering the impact of a proposal on a heritage asset, to avoid or minimise any conflict between the heritage asset's conservation and any aspect of the proposal.

This development would impact the Dover Memorial by dominating the landscape and overlook the Heritage coastline

Para 174

- 1 protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan)

The landscape across the valley from the lighthouse to the memorial should be protected. Two houses No's 80 and 78 built along then Droeway adjacent to this site, were reduced in height by DDC planners, as they would affect the landscape and would be seen from across the valley. The proposed development has a ground level starting at the base roofline of these properties. They would tower above these properties and deface the landscape. Natural England were consulted and helped enforce this change. Where is the consultation with Natural England for this site?

Biodiversity would be affected, as human activity, cars and light pollution would deter migratory and resident birds, wildlife and butterflies from using the hedgerows.

b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services – including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland;

This would be another green field site, used for crops to be lost and destruction of the ecosystem.

c) maintaining the character of the undeveloped coast, while improving public access to it where appropriate;

The character of this undeveloped site would be destroyed, not maintained and an established footpath along the field lost to the public, reducing accessibility to the National Trust chalk grasslands.

d) minimising impacts on and providing net gains for biodiversity, including by establishing coherent ecological networks that are more resilient to current and future pressures;

This would be a 'net loss' for biodiversity, create more pressure on the ecosystem, and reduce resilience of migratory birds reaching this country.

Para 176

Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and **Areas of Outstanding Natural Beauty** which have the highest status of protection in relation to these issues.

The conservation and enhancement of wildlife and cultural heritage are also important considerations in these areas.

This would destroy, not enhance, the unique landscape. It would impact the cultural heritage of the Frontline Britain Trail. Scenic beauty would be lost, as it is on the highest ground of the coastline ridge and would be seen from all directions.

Para 177

When considering applications for development within National Parks, the Broads and **Areas of Outstanding Natural Beauty**, permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest.

We do not believe this is in the public interest. A small development of large houses, no significant gain for housing stock, poor infrastructure, poor access, increases pressure of vehicles through the village centre, reduces land for crops and destroys the ecosystem.

Consideration of such applications should include an assessment of:

- 1 the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy.

This development would not benefit the community, only the pocket of the land owner and Developer.

- 1 the cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way.

Other less harmful sites could be found, reducing the ecological and scenic impact.

- 1 any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

This would have a detrimental effect on the environment, landscape and recreational walking space. It could not be moderated to mitigate these effects

178. Within areas defined as Heritage Coast (and that do not already fall within one of the designated areas mentioned in paragraph 176), planning policies and decisions should be consistent with the special character of the area and the importance of its conservation. Major development within a Heritage Coast is unlikely to be appropriate, unless it is compatible with its special character.

Development for housing on this part of the Heritage Coast, is NOT consistent with the special character of the area and the coast's character should be preserved.

Habitats and biodiversity

179. To protect and enhance biodiversity and geodiversity, plans should:

- 1 Identify, map and safeguard components of local wildlife-rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity; wildlife corridors and stepping stones that connect them; and areas

identified by national and local partnerships for habitat management, enhancement, restoration or creation.

This site is part of a wildlife corridor to Europe, unique, as it is the closest part of the British coastline to Europe. Biodiversity would be lost forever and should be safeguarded.

b) promote the conservation, restoration and enhancement of priority habitats, ecological networks and the protection and recovery of priority species; and identify and pursue opportunities for securing measurable net gains for biodiversity.

The DDC should be promoting the conservation of this area, if anything, restoring it to chalk grassland to enhance the habitat of endangered species and many migratory birds that are under threat from our urbanisation of biodiverse habitat.

The National Trust have bought land adjacent to and along the length of the cliffs from the Dover Memorial, encouraging and preserving wildlife habitat.

3b) We believe this development is NOT JUSTIFIED or an appropriate strategy based on the evidence above, of the damage it would inflict to an Area of Outstanding Beauty and our unique Heritage Coastline.

3c) We believe it is NOT EFFECTIVE,

It has not been planned with joint working or consultation with the Parish Council, local residents, Natural England, The National Trust the RSPB or other interested parties.

3d) We believe it is NOT CONSISTANT WITH NATIONAL POLICY.

The policy framework, as set out above, is not being adhered to and the development is detrimental to every part of the National Policy.

It does not meet the requirements for:

policy 15 - Conserving and enhancing the natural environment, Habitats and biodiversity, policy 16 - Conserving and enhancing the historic environment

or Proposals affecting heritage assets.

It does not Consider the potential impact - on visitors to the White Cliffs Country, visitors on the Kent Coastline Walk or Frontline Britain Trail.

4) We do NOT consider the Local Plan is legally compliant.

It has not followed the national guidelines as set out above, so we do not think it is legally compliant.

5) We do NOT consider the Local Plan complies with the Duty to Co-operate.

This area has always been outside the village planning envelope and specifically excluded from plans for building.

At Regulation 18 in 2021, information on the Local Plan Portal explicitly implied that STM0101 was not available or under consideration, St Margaret's Parish Council were only made aware that it had been included when regulation 19 was commenced.

Consultation with the Parish Council and community has been bypassed and its inclusion is flawed. We were denied our 'Right of Expression'.

	We would like to register our complete opposition to this plan, due to its long term effect on the destruction of the natural environment, loss of biodiversity, visual impact across the coastline view, light pollution and lack of infrastructure improvements.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Remove this site from the Local Plan
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	NO

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	STM010.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective

	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I understand that the field in question was included in the previous Plan for Dover District, but was considered unsuitable for development and withdrawn. At the last minute it was re-entered into the latest plan, thereby allowing no time for the legally required public consultation, or for residents to make their views known. This appears to have been very underhand and shoddy behaviour by Dover District Council.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Dear Sir / Madam,</p> <p>I request that you please reject all proposals for any housing development in the field located between The Drove way and Salisbury Road at their eastern ends, - as outlined in Section SAP 40, STM010 of the New Dover District Local Plan. My reasons for opposing the project are as below:</p> <p>The field is within an area of outstanding natural beauty. It borders the National Trust land of Bockhill Farm which is adjacent to the iconic and symbolic white cliffs of Dover. The site is on the highest ground in the area and additional housing would ruin the skyline when seen from the Dover Patrol Memorial and also the splendid views across to the South Foreland Lighthouse, the Bay, Inland and beyond. Surely, we have a moral duty not to spoil such vistas for future generations.</p> <p>The field under consideration is adjacent to and part of the area's wild life habitats. For many birds flying across the Channel in the Spring this is the first place where they land after departing from France. This means that it is a favourite spot for "Twitchers," (Bird Watchers). It is not unusual to find groups of enthusiasts enjoying their hobby after travelling here from all over the country and even from the Continent after word has spread of an unusual arrival. I have personally seen rare Water Rails and an Osprey nearby.</p> <p>Footpath No. 26 runs along the south-western edge of the field and there is another well used track running between the Drove way, Salisbury Road and National Trust land. These need to be preserved.</p> <p>My wife and I have been very fortunate to live in the pleasant Drove way for the past forty-seven years. During this period, we have witnessed a substantial increase in traffic following additional building in this locality. The Drove way is a narrow road, with a single lane in places and either narrow, or non-existent pavements. Even where the road consists of two narrow lanes, one of these is usually blocked by the parked vehicles of residents who have no alternative space near their property.</p> <p>Additionally, there is often solid parking outside the Doctor's surgery which necessitates residents in vehicles attempting to enter, or leave The Drove way, backing and filling in order to get through. Frequently one car is forced to reverse into the Salisbury Road entrance. There is a similar situation at the junction with Sea Street where parked customers of the First Light Café habitually restrict the road and dangerously reduce visibility.</p> <p>At its Eastern end, The Drove way leads to the busy and successful Bockhill Farm with its need for heavy agricultural vehicles. All other movement ceases when this equipment is traversing The Drove way. Only yesterday I was stopped for a genuine 15 minutes whilst the Owner's of parked cars had to be found to move them and allow passage of an enormous beet picking machine.</p> <p>The Drove way cannot cope with the extra traffic it already has to bear. The Rise, Norman Road, Convent Close, Kenilworth Close and Salisbury Road all feed into it with no alternative means of escape. The Drove way, Salisbury Road, Granville Road, Bay Hill, Lighthouse Road and St. Margaret's Road, (The five roads containing all traffic from the entire Bay area), then meet in a bottleneck at the top of Bay Hill. The situation is already dire and an additional twenty (Say), or perhaps more, cars from any new estate would make things even worse. <u>In these circumstances, there is absolutely no way that an ambulance, or fire engine would be able to reach us in an emergency.</u></p> <p>It is not just The Drove way which is over stuffed with traffic. St. Margaret's village itself is a bottleneck nightmare, especially at the Chicane by the Newsagents. I believe that additional traffic travelling from the Bay area is unsustainable and any new estates should now only be permitted on the North side of the village. Their Residents would be able to freely access Dover and Deal without the need to pass through St. Margaret's congested village centre. I further consider that even these new developments should only be permitted if additional Medical Facilities are provided.</p> <p>For the above reasons, I request that you please reject all proposals to build any housing development in the field located between The Drove way and Salisbury Road at their eastern ends, - as outlined in Section SAP 40, STM010 of the New Dover District Local Plan.</p>

	<p>Thank you for your attention.</p> <p>Yours faithfully,</p> <p>John Kirby.</p> <p>(DDC Note: Address and contact details were removed)</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	see #7

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I am just wanting to coment on SAP 40 10 Land between The Droveay and Salisbury Road. This proposal is not viable because the Village of St. Margaret's at Cliffe and St. Margaret's Bay is way over crowded and overbuilt on already!! The traffic problems on our small roads is always in a mess. We have no real infrastructure to support the number of people here already and certainly not more from all the proposed houses. This is not to mention that the site for building between The Droveay and Salisbury Road is a sight of beauty that has been enjoyed by walkers and wildlife for years. It is very important to have these few open spaces especially since the pandemic where we have all found a need to have room to walk on the footpaths around the proposed field!!!
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>STM010 sits outside the settlement confines of St Margaret's and is within an area designated as AONB, adjacent to National Trust land which has special scientific interest. The inclusion of STM010 in the Local Plan for housing development would contravene national policy with regards to AONB's (NPPF 117) since there are no "exceptional circumstances" which would justify its inclusion. This therefore brings into question the legal compliance of the local plan.</p> <p>Its inclusion is also completely unjustified. The following extracts from the SHLAA assessment of this site in the preparation of the 2012 version of the local plan explain why this site was not deemed suitable for inclusion in 2012. Since that time there has been no lessening or mitigation of the reasons given; indeed the reasons for not including this site for housing development have been further heightened.</p> <p>"Landscape Impact: The site lies within the AONB and close to the Heritage Coast. It abuts National Trust land to the NE. The site is on a crest of a hill and, despite the screening, would be visible from a long distance. Any development on this site would, therefore, have a highly detrimental impact on the designated landscape."</p> <p>"Biodiversity: The site is identified as chalk grassland to the NE which is a priority habitat under the Natural Environment and Rural Communities Act 2006 and is a material consideration..... The arable land is chalk based and maybe amenable to reversion to chalk grassland with appropriate management. The site could provide foraging and flight lines for bats."</p> <p>"Green Infrastructure: The site provides a wide range of recreational walking opportunities, together with the biodiversity associated with chalk grassland and its associated hedges and scrub. The ambience of the area is demonstrated by the numbers of visitors to the coastal area and the levels of usage of paths, both public and permissive. The site is within the "Restore and Conserve" area of the GI network, reflecting the real opportunities for GI. Development would harm the existing GI and the opportunities for enhancement."</p> <p>"Proximity to Road Networks: The two roads that lead to this site appear to be unadopted and not well maintained. There is no access onto the site. The site is located in the area between Salisbury Road and The Droveway. Salisbury Road is a single track unadopted road and there are no footways along its length. The Droveway is also a single track road but is adopted. However, the road already serves a large number of dwellings and there are no footways beyond the junction with Salisbury Road. Pedestrian access to services, including the local bus stop, is therefore poor and reliance on the car is likely to be high as a consequence."</p> <p>"Access to Services: This site is located on the edge of the Bay area, and as a consequence the majority of the services and facilities would be over a ten minute walk."</p> <p>"Analysis: The site is located in the AONB in a highly visible location at the top of a hill on a plateau. Any development would have a detrimental impact on this designation. Access to the site is unsuitable on unadopted roads."</p> <p>There has been a noticeable increase in local traffic in the area of The Droveway since 2012 and an increase in the amount of on-street parking. In recent years there have been a number of minor accidents resulting from this. Indeed, the September 2022 HELAA report for this site recognises the issues with access:</p> <p>"The Droveway is geometrically constrained and is subject to a large amount of on street parking which reduces effective width, whilst in theory waiting restrictions could be imposed, this would have a significant impact on local parking amenity. The junction of The Droveway/Sea Street is subject to constrained visibility (southbound), as such an increase in turning movements at this junction will increase the likelihood of vehicle conflict and there is limited scope to provide meaningful improvements."</p> <p>The issues regarding access are therefore greater than when the 2012 study was undertaken. Similarly, the potential impact of any development of STM010 on the surrounding area has been heightened since 2012 due to the increased loss of chalkland nationally (a loss of 80% in the past 60 years) and hence the increased scarcity value of this land in terms of rare habitat.</p> <p>STM010 was considered unsuitable for inclusion in the local plan in 2012. To now propose that STM010 is suitable for inclusion in the 2022 plan is contradictory and unjustified.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful</p>	<p>Remove STM010 from the Local Plan</p>

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I believe that it is important that someone is present to ensure that the points raised are given due consideration

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP40, Housing development at the end of The Droveaway
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	As residents of Salisbury Road. my wife and I consider this element of the Plan to be unsound and it is a cause of grave concern. There are two primary reasons for this. Firstly, the level of construction traffic will not just create a problem but a real hazard. Traffic through the village can be tricky at the best of times. Traffic on Sea Street is restricted to a single lane for some of the day during School Terms as children are dropped off or collected. The junction of Bay Hill , The Droveaway and Sea Street already has blind spots with vehicles parked at the end of The Droveaway and the top of Sea Street. A lot of the Droveaway itself is restricted to a single lane as residents naturally park outside their homes and as the Droveaway is a dead end, any traffic travelling along it must also travel back along the same piece of road. The existing level of traffic, with its mixture of domestic, trade and farm vehicles as well as builders and construction vehicles supporting ongoing home developments and improvements can already cause real problems. Adding a new construction site at the end of The Droveaway would not just make matters significantly worse but would we believe represent a very real and dangerous hazard to the village and school area.

	<p>Secondly, the proposed development borders the Kent Downs Area of Outstanding Natural Beauty (AONB). Any development at this local highpoint adjacent the this AONB could only have a detrimental effect on access to and the enjoyment of this area, which is very popular with locals and visitors alike. It is our understanding that AONBs should only be impinged upon in exceptional circumstances.</p> <p>There are of course other major concerns, relating to infrastructure, the archaeology of the area etc and we trust that these are already being given due consideration</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Do not proceed with this development.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP40 - STM010 Land located between Salisbury Rd and The Drove way, St Margaret's at Cliffe
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Not Applicable</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>There is little doubt that this allocation conflicts with national planning policy particularly with respect to paragraph 176 of National Planning Policy Framework which states that:</p> <p>“Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty which have the highest status of protection in relation to these issues. “</p> <p>The allocation of this site fails to meet the requirements for development in AONBs as set out in that paragraph and those of 174,175 and 177</p> <p>Paragraph 174 of the NPPF requires planning policies to:</p> <p>1 a) protect and enhance valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan);</p> <p>and</p> <p>1 b) recognise the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services – including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland;</p> <p>This proposal has failed to give sufficient weight to this requirement, and means that a valued landscape, in a protected area, will be lost forever, and the biodiversity of the area damaged.</p> <p>Paragraph 175 of the NPPF stipulates that local authorities should:</p> <p>allocate land with the least environmental or amenity value, where consistent with other policies in this Framework; to take a strategic approach to maintaining and enhancing networks of habitats and green infrastructure and where significant development of agricultural land is demonstrated to be necessary, areas of poorer quality land should be preferred to those of a higher quality.</p> <p>This proposal to develop a prime agricultural site within the AONB, for just 10 houses that could be built on other far less sensitive sites, clearly brings it into conflict with the requirements of this paragraph</p> <p>As stipulated above paragraph 176 of the NPPF requires that “Great weight should be given to conserving and enhancing landscape and scenic beauty in ... Areas of Outstanding Natural Beauty which have the highest status of protection in relation to these issues”. However, for the reasons as stipulated above that requirement has been disregarded in this and the proposal will neither conserve nor enhance the landscape and scenic beauty of the area.</p>

Paragraph 177 of the NPPF states that:

When considering applications for development within National Parks, the Broads and Areas of Outstanding Natural Beauty, permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest. Consideration of such applications should include an assessment of:

- 1 a) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;
- 1 b) the cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way; and
- 1 c) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

The footnote to this paragraph states that :

“whether a proposal is ‘major development’ is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined.”

DCC has not indicated how it believes that the allocation of STM010 constitutes a “major development” under NPPF. Consequently, it needs to show how the development will be in the public interest and that the allocation will not have a significant adverse impact on the landscape within the AONB. DDC has failed to do this within the draft Local Plan whilst all the evidence would indicate that the provision of 10 properties along the line of the AONB within a sparsely populated area would constitute considerable damage to the current landscape.

Furthermore, development of housing on this site will not comply with the requirements of national and local planning policy that new development should be focused at accessible and sustainable locations. The site is more than 400 metres from the nearest bus stop and at least 1000 metres away from the amenities and facilities in the village centre, which is likely to result in more car journeys and increased carbon emissions. This location, on the very edge of the settlement boundary of St. Margaret’s, cannot be described as sustainable.

The promoters of the site have referred to its prospective development as “infill”, but this is not an appropriate description. It lies on the edge of the built-up area of St. Margaret’s, and between the northern ends of the residential roads of the Droveaway and Salisbury Road. But where those roads abut this site, both are only very lightly developed, each with a slender strip of ribbon development on one side of the road: 10 houses in Salisbury Road and 14 in the Droveaway. The size of this site, with an area of 2.2 hectares, is much too large to be considered proportionate development in such a sparsely built-up area and cannot reasonably be regarded as “infill”. Due to the site’s elevation, any houses built on it would rise well above surrounding properties and would not be visually integrated with the existing development. I would refer you to a recent refusal by DDC Planning of a similar site within St Margaret’s at Cliffe. This site was on a similar piece of land which was also referred to as an “infill” along the Station Rd by the junction with Dover Rd. It also lay within the AONB and was refused by the planning officer for the following reasons:

“The proposed development would result in an unjustified intrusion of built development into an undeveloped countryside location, which would harm the prevailing rural character at this point and result in significant and demonstrable harm to the character and appearance of the AONB and the setting of St Margaret’s within it’s rural context. The proposal would therefore conflict with policies

	<p>DM15 and DM16 of Dover District Local Plan that seeks to protect the character of the countryside and paragraphs 170 and 172 of the NPPF as well as policies SD1, SD2, SD3 and SD9 of the Kent Downs AONB Management Plan.”</p> <p>This application was for the construction of only four houses and the decision was upheld by the Planning Committee. If the planning authority considered this application to equate to considerable harm then one must question how they can propose the creation of a much larger development within another area of the AONB within the same village.</p> <p>Finally, I would refer you to the assessment that took place when this allocation was previously considered during the creation of the current Local Plan (Site code SAD28). The analysis rejected its suitability as follows:</p> <p>“The site is located in the AONB in a highly visible location at the top of a hill on a plateau. Any development would have a detrimental impact on this designation. Access to the site is unsuitable on unadopted roads.”</p> <p>Little has changed since the site was considered unsuitable in 2012 and I would therefore propose that it be removed from the current draft of the Local Plan.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>As stated above I would strongly suggest that this site be removed from the Local Plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I am the District Ward Councillor for the parish wherein this proposed allocation is situated.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP40 Land between Salisbury Road and The Droveaway, St Mragarets at Cliffe (STM010)
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>As a resident and community charge payer living directly opposite the proposed site I have not been provided with an opportunity to comment on the development prior to regulation 19.</p> <p>This is contrary to Dover District Councils publish guidance regarding their statement relating to how they will involve the community in plan making as part of the Development Plan and DDC's Statement of Community Involvement documents.</p> <p>It is also at odds with the Town and Country Planning (Local Planning) England Regulations Section 18 "Preparation of a Local Plan" which states inter alia:</p> <p>18 (1) – a local Planning Authority must –</p> <p>a) Notify each of the bodies or persons specified in para (2) of the subject of a Local Plan which the LPA propose to prepare, and</p> <p>b) invite each of them to make representations to the LPA about what a local plan with that subject ought to contain.</p> <p>18 (2) – the bodies or persons referred to in para (1) are</p> <p>A) such of the specific consultation bodies as the LPA consider may have an interest in the subject of the proposed plan</p> <p>B) such of the general bodies as the LPA consider appropriate and</p> <p>C) such residents or other persons carrying on business in the LPA area from which the LPA consider appropriate to invite representations</p> <p>18(3) In preparing the local plan the LPA must take into account any representations made to them in response to invitations under paragraph (1)</p> <p>Had such an opportunity been provided I would have objected to the proposed development on the site (STM010) with the following reasons:</p> <ul style="list-style-type: none"> • The site is within a designated AONB and borders National Trust land. Development would be detrimental to the aesthetic of the surrounding landscape and wildlife habitats • Given the elevation / height of the site the open space acts as a natural drainage area for rainfall, which is becoming increasingly heavier with climate change. The surrounding established undergrowth and trees act as a natural windbreak with increasingly stronger winds being experienced with climate change. Both of these natural defences are protecting the surrounding residential areas at the Bockhill end of the Droveaway. Hard landscaping and covering the site in brick, tarmac and concrete will severely increase the risk of flood and storm damage on existing properties and infrastructure. • Given the height of the site (STM010) any buildings put thereon will severely impact natural light and privacy on 71 The Droveaway and surrounding properties. • The Droveaway road itself adjacent to the site is not suitable for the burden of additional traffic. It is a no through road and used as access by residents and is access only at the far end to Bockhill Farm. It would not support additional on road parking for a housing development and is unsuitable for heavy plant and machinery associated with housing developments, Salisbury Road being a private road. Navigating on road parking on the Droveaway towards Sea Street is currently hazardous and dangerous.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

I am a member of the Salisbury Road Association committee and also the treasurer and was re-elected to this position at our recent annual general meeting (AGM), held on the 28th October 2022. During the AGM there was a discussion on the DDC Local Plan and the inclusion of the STM010 site in the Regulation 19 version. During that meeting a motion was put forward that I should submit a representation, on behalf</p>

of the Salisbury Road Association and thus all the residents, as part of the public consultation. This motion was carried unanimously and constitutes authorisation from the residents of Salisbury Road for this submission. A list of all the residents and their addresses is included as an attachment to this submission.

Site STM010 was not included in the Regulation 18 version of the Local Plan and was therefore not available for representation to be made during the public consultation period for this version of the plan. As such, residents, the Parish Council, Natural England, the National Trust, Kent Downs AONB etc etc were unable to review and comment on the proposal for site STM010 to be included in the Regulation 19 version of the Local Plan. Given this, we believe that the process for public engagement for the Local Plan is not in general accordance with the Statement of Community Involvement and in fact contravenes it and would therefore question if it is legally compliant?

Given the lack of public consultation and agreements with the likes of Natural England, the National Trust and the Kent Downs AONB and the public for Site STM010, we would also claim a lack of Soundness for this aspect of the plan. As such, we believe that this part of the plan does not demonstrate that it is Positively prepared, Justified, Effective and Consistent with National Policy and has therefore not followed due process.

Based on the above, it is our opinion that site STM010 should be removed from the Regulation 19 version of the DDC Local Plan.

We have been advised that we should include here the comments that we would have made during the Regulation 18 public consultation if the STM010 site had been included in that version:

- Salisbury Road is a Private Road the upkeep and maintenance of which is undertaken by the Salisbury Road Association SMB, managed by an elected committee. Annual payments are collected from all residents to finance any works required and to pay for Public Liability insurance. The Salisbury Road Association has been in existence for over 50 years.

It is the view of the Salisbury Road Association that the landowner of site SM010, Mr David Powell, would have no legal right to create an access road and/or junction with Salisbury Road. Neither Mr Powell nor the farmer currently renting the field have ever accessed the field via Salisbury Road and there is currently no access in existence. In addition, neither Mr Powell nor the farmer have ever contributed to the upkeep or maintenance of Salisbury Road.

- The proposed development access road and junction as shown on page 19 of the landowners proposal is also not reasonable, feasible or achievable. The junction with Salisbury Road would be immediately opposite the drive and/or frontage of the existing properties, wherever it was placed on this section of the road. In addition, Salisbury Road is only 4.7m wide at its widest point and this, together with the fact that the residents park their cars on the road outside of their properties, results in the road being single track and would essentially make turning in and out of such a junction highly hazardous and likely impossible.
- Given the above, the Salisbury Road Association would not grant right of access or agree to the proposed access/junction between Salisbury Road and the proposed site. In addition, we would also not allow access to the site for any construction plant if the site were ever to be developed.
- It is our view that the impact of the proposed development and the resultant increased traffic flow has not been fully evaluated and that it would certainly significantly worsen what is already a system that barely copes with the current traffic flow, especially at the narrow and congested junctions between Salisbury Road and the Drove way and the Drove way and Sea Street.
- The Drove way, like Salisbury Road, is no more than single track at many points along its length and as such does not provide any reasonable access to the site for construction plant or future residents of that site.
- Analysis of the Title deeds of the proposed STM010 site reveals that it is in fact land locked, with its boundaries completely inside of the hedgerow and tree line along its borders with both Salisbury Road and the Drove way. As such, the landowner has no obvious access to the site that is in his ownership and therefore renders the site as undeliverable and unachievable.
- The ground level of the proposed site is in excess of 5 metres higher than the ground level of the properties opposite the proposed site on Salisbury Road. As such, the houses adjacent to Salisbury Road in the proposed development at Option B (D, page 16) will be of the order of 11-12 M higher and dominate the existing properties. This will significantly impact the access to sunlight due to the inevitable shading by these new properties. In addition, the proposed properties will have direct line of site into the front aspects of the existing properties, which include bedrooms, bathrooms, living rooms and kitchens. It is our view that this development proposal would therefore significantly adversely impact the residential amenities of these properties.
- Further to the above point we would also like to highlight the Landscape Sensitivity Assessment of proposed development sites FINAL REPORT January 2021, page 139 where under the Mitigation heading it is stated that –‘Any development should also be one story to minimise visual impact.’ Thus, confirming that the height of this site is a significant issue.
- The proposed site, whilst currently used agriculturally is part of the Kent Downs AONB and constitutes a buffer zone between the residential aspects of Salisbury Road and the Drove way and the North Downs SLA, the Heritage Coast, National Trust land, the Site of Special Scientific Interest (SSSI) and the Biodiversity Opportunity Area. In fact, the site is only 300 meters from the Dover to Kingsdown cliffs Special Area of Conservation (SAC) and Site of Special Scientific Interest (SSSI) which protects cliff top grassland and scrubland habitat

which is also a key natural and landscape feature of the AONB and heritage coast. Any development on this site would remove that buffer and significantly impact these extremely important and sensitive conservation areas.

- The AONB and heritage coast boundaries were drawn to explicitly include the area of STM010 to protect this land from development. A housing development would be a clear separation from the intended purpose of the AONB designation for this area.
- We also believe that the proposed development in an AONB is in complete conflict with National Planning Policy Framework (paragraphs 174 to 178).

In particular paragraph 174 states that Planning policies and decisions should contribute to and enhance the natural and local environment by;

- protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils.
- recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services.
- maintaining the character of the undeveloped coast, while improving public access to it where appropriate.
- minimising impacts on and providing net gains for biodiversity.

Paragraph 175 states that plans should allocate land with the least environmental or amenity value.

Para 176 states that great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty which have the highest status of protection in relation to these issues.

In our view the allocation of site STM010 in the Local Plan is contrary to all of the above and could therefore be deemed as not being legally compliant and is further evidence that the site should be removed.

- The Local Plan Policy NE2 clearly states that; '*Major development proposals within the AONB will only be permitted in exceptional circumstances and where it is demonstrated they are in the public interest*'. In addition, NE2 also states that any development in the AONB should achieve the following:
 - Be sensitively located and designed to avoid or minimise adverse impacts on the AONB and its setting.
 - The location, form, scale, materials and design should conserve and where appropriate enhance or restore the special character of the landscape.
 - The development should enhance the special qualities, distinctive character and tranquillity of the AONB and the Heritage Coasts
 - The development has regard to the AONB Management Plan and any associated guidance.

It is our view that the proposed STM010 development site does not meet any of the above criteria.

- In addition, any development of this site would impact on the long and medium view of the extremely important Dover Patrol Memorial from many aspects of the surrounding area.
- DDC will be aware of the number of Saxon burial sites that have been identified both on and adjacent to the Droveaway and Salisbury Road. It is widely accepted that the proposed development site, given that it constitutes the highest point in the locale, will contain a significant concentration of Saxon burial sites and is therefore of high archaeological significance and value.

In summary, the Salisbury Road Association, which consists of all 81 residents of the road, believes that any housing development on site STM010 would have significant impact on this component of the Kent Downs AONB and the Heritage Coast and will be highly detrimental to the nationally and internationally important SSSI and SAC areas that it abuts. We believe that allocation of the site for development conflicts with national and local planning policy. In addition, any such development would have a significant impact on the residents of the area with respect to residential and visual amenity and further exacerbate the already significant traffic issues.

In conclusion, we believe that, for all of the reasons discussed above, Site STM010 should be removed from the DDC Local Plan.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful

Remove site STM010 from the Regulation 19 version of the Local Plan and this will negate the issues we have identified above.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	If site STM010 is not removed from the Regulation 19 version of the Local Plan, I would like the opportunity to represent the views of the Salisbury Road residents as detailed in the above representation.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I wish to object in the strongest terms to the proposed development of the land between The Droveaway and Salisbury Road for the building of 10 executive homes, for the following reasons which I believe make the plan Unsound. <ol style="list-style-type: none"> 1 The GP surgery ("Tara") on The Droveaway is at capacity and can not accept new patients. There is no proposal in the Local Plan to fund the recruitment of new GPs nor nursing staff, hence any new residents will not have access to medical care. Further, there is insufficient parking outside the surgery as things stand, even if the surgery were to be expanded. 2 The school in St Margaret's, which has a very good reputation, is full and unable to take in more children.

	<p>3 Traffic is already very heavy along The Droveaway, and speeding is a recurrent serious problem. It is now difficult to turn into and negotiate a route along The Droveaway due to customers of the First Light cafe parking in and around the junctions with Sea Street, Lighthouse Road and Bay Hill. Any further traffic along the Droveaway will only make this problem worse, despite what the Lander group's plan says.</p> <p>4 There are children that live in The Droveaway, Salisbury Road (a private road with a 20mph limit) and roads off them, and there are long stretches of road with no pavement, meaning they need to walk in the road. Agricultural traffic speeds along the road and is an accident waiting to happen. The Droveaway is the only route of access for these agricultural vehicles and any further residential traffic would only add to these dangers.</p> <p>5 Regarding public transport, the bus service has been severely reduced to one single decker bus every two hours, with the last bus to St Margaret's leaving at 2.30pm. There is no service at all on Sundays nor on Bank Holidays! This is wholly inadequate and there is no proposal in the Local Plan to rectify this situation.</p> <p>6 The disruption caused by development over the last few years from a succession of DDC planning decisions on new homes as well as extensions/modifications of existing houses has been detrimental to the quality of life of local residents. Proposing to repeat this, and worse, with these plans would make living here intolerable.</p> <p>7 Local residents were not consulted in the inclusion of this site in the Regulation 18 stage, since the proposal now referred to as STM010 was only included on the last day of the previous consultation period.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The only acceptable solution to these issues is to remove STM010 from consideration in the Local Plan</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>There has to be direct representation by local residents, as this is far too important to leave to the representations of those who do not live in the village.</p>

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>1. I do not believe this proposal has been positively prepared in that it does not seek to meet Dover District 's objectively assessed needs.</p> <p>One of the assessed needs is to increase the prosperity of the District and this aspect of the plan will not achieve that. The only people who would have their prosperity increased by this proposal are the landowner and the property developers.</p> <p>2. The plan does not take into account the local infrastructure and its incapacity to satisfy any further expansion.</p> <p>The permanent increase in traffic resulting from the construction of the houses, as well as increase due to heavy construction traffic, will have significant adverse impacts on all existing residents. Because Salisbury road is private, access to the site is likely to be along The Droveaway Rd ,which is narrow in places and can become extremely congested- particularly at the Sea Street end.</p> <p>Heavy construction traffic will damage the road surface and will be a danger to the many pedestrians who use this road.</p> <p>The village of ST.Margaret's is accessed by a single road, which is already congested and can be difficult to negotiate. The plan does not propose any improvements to this local infrastructure to accommodate the increased traffic that would result from adoption of this proposal.</p> <p>3. The plan does not take into account the sustainability of the local environment.</p> <p>The proposed site is in open countryside , lying within the boundaries of the Kent Downs Area of Outstanding Natural Beauty. The site is very close to several important habitats for wildlife with high protected status and is adjacent to the National Trust land at Bockell Hill. The site is an important buffer between these sensitive habitats and the existing residential areas of the Bay, and a housing development would severely damage that protection.</p> <p>The proposed site is the highest point in the area and any housing development there will severely affect beauty of the immediate and surrounding areas. The views from the proposed site extend eastward to Ramsgate and beyond to the Dover Patrol Memorial and West to The South Foreland lighthouse. These views are unique and should be protected from being blocked by development. The proposal submitted by the Lander Group offers no solution to this.</p> <p>4. Legal Compliance is uncertain.</p> <p>I understand that the inclusion of this site as being suitable for immediate development was made at the latest possible stage in the previous iteration of the local plan process and I further believe that doing so DDC made procedural mistakes in that the legally required public consultation was not carried out. This is particularly unfair, given the significant impact this proposed development would have on local residents who have not therefore had the chance to make our views known until this last stage. I also question the further exploitation of this site should initial approval for its development be granted. Local residents are well aware that it has been previously , and frequently suggested that as many as 72 houses could be built on the field and , therefore , this proposal very much represents the thin end of a wedge.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)</p>	<p>Perhaps not surprisingly , the simple solution to the issues cited above is to abandon this proposal of development of the land between The Droveaway and Salisbury Road and, indeed , any further development of the village of ST.Margaret's .</p>

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Given the importance of my objections to the proposed development, I do not consider it sufficient to leave this representation to those who do not live in the village nor who would be directly impacted by it. It there must be direct and personal representation of the villagers at the proceedings.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	Site STM010 was not included in Regulation 18 of the Local Plan. There was no public consultation, so local residents and interested parties were unable to comment.

<p>possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The Salisbury Road Association submission highlights road infrastructure concerns with access, poor visibility and congestion on the Droveaway, in particular at the junction with Salisbury Rd. This stretch has become a chokepoint in recent years, with on-road parking making it effectively one track from Sea St to Droveaway Gardens. In my experience these concerns are well-founded.</p> <p>I have lived in Salisbury Rd for over 20 years, driven extensively in Britain and abroad, and only ever been involved two accidents - both occurred at the junction with the Droveaway, both as a result of poor visibility and restricted access. Additional traffic will only increase the danger. The existing road infrastructure is incompatible with a residential development on the proposed scale.</p> <p>The development is also in an imposing position, considerably higher than the surrounding properties and would dominate the landscape. It is part of the Kent Downs AONB; a designation specifically created to protect such areas.</p> <p>This site should therefore be removed from the Local Plan.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. <p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	SAP40 STM010 land between The Droveaway and Salisbury Road
<p>2 - Do you consider this part of the Plan sound?</p>	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>With regard to STM 010 land between The Droveaway and Salisbury Road being developed for housing I object to this on access and traffic movement grounds and believe it should be removed from the Dover plan</p> <p>Let me first quote your own recommendations</p> <p>Developments that would generate significant traffic movements must be well related to the primary and secondary road network.</p> <p>Proposals which would generate levels and types of of traffic movements resulting in severe cumulative residual impacts in terms of capacity and road safety will not be permitted.</p> <p>New accesses and intensified use of existing accesses onto the road network will not be permitted if it would result in a clear risk of crashes or traffic delays unless the proposals can incorporate measures that provide sufficient mitigation.</p> <p>Applicants must demonstrate that traffic movements to and from the development can be accommodated, resolved or mitigated to avoid severe cumulative residual impacts.</p> <p>My objections are</p> <p>All traffic, truck deliveries, specialist transport would need to pass through the village centre. The area by the village shop and church will not take trucks and cars at the same time and has seen several instances of trucks hitting buildings also there is limited pavement in this area requiring pedestrians to cross the road or walk on the road .</p> <p>Vehicles would then need to pass the entrance to two local schools where parking is allowed necessitating single lane traffic. There is also limited visibility in this area due to a bend in the road.</p> <p>Traffic would then enter The Droveaway. This is a multi access junction with 5 roads leading off to it, yet another traffic hazard. Once in the Droveaway vehicles would need to pass the village surgery. This area of the road is particularly narrow being only 2.4 to 2.6 mtrs wide in places when cars are parked which is always the norm. I would point out that a standard UK truck is 2.55 mtrs wide and 3.26 mtrs wide including driving mirrors . This would mean driving mirrors would overhang the narrow pathway with possible injuries to pedestrians. Should a high sided van be parked, the truck would have no choice other than to mount the kerb or it's driving mirrors strike the van. Pedestrians would have to trespass onto private drives to be clear of HGV traffic. There is also limited pavement in this area and patients leaving the surgery would need to cross the road at this point to access the pavement, yet another danger bearing in mind these people have just exited the GO surgery and they may not be as mobile as some. Also there is the entrance to Droveaway Gardens with very limited viewing for drivers onto the Droveaway itself.</p> <p>I would also point out there is a pavement only on approximately 1/3rd of The Droveaway again putting pedestrians at risk from vehicle traffic. To compound this issue there are only 2 street lights along the whole length of the Droveaway.</p> <p>Heavy farm traffic also use the Droveaway to access land and farm buildings and many times the road has been blocked by trucks and farm vehicles.</p> <p>Approximately vehicles of 190 properties already use the lower end of the Droveaway. This figure includes Salisbury Road, The Rise, Norman Road, Convent Close, Kenilworth Close but does not include any visitor to the Catholic Church or First Lighr cafe/bar in the Droveaway Ar a suggested average of 1.4 cars per household or 8 out of 10 houses having 2 cars this means potentially either 268 or 342 cars use this road at any time.</p> <p>This photo supports my comment about road widths you will note a utility company vehicle the measurement from the vehicles door mirror to the dropped kerb is 2.3mtrs a standard up truck is 2.55mtrs without a door mirror. You will note the van is parked next to the nearside kerb . This is the area just beyond the entrance to the Droveaway .</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	Remove land STM 010 between The Droveaway and Salisbury Road from the Dover Plan

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I do not wish to take part but people who are affected by this proposal must be allowed to participate, it is important to be left to people not affected

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Page 188. SAP40 - St Margarets-at-Cliffe Small Housing Sites. Section 4.254, Site STM010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	Page 188. SAP40 - St Margarets-at-Cliffe Small Housing Sites. Section 4.254, Site STM010 Site STM010 was not included in the Regulation 18 version of the Local Plan and was therefore not available for representation to be made during the public consultation period for this version of the plan. As such, no-one was able to review and comment on the proposal for site

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

STM010 to be included in the Regulation 19 version of the Local Plan. Given this, I think that the process for public engagement for the Local Plan is not in general accordance with the Statement of Community Involvement and in fact contravenes it and therefore think that it is not legally compliant.

Based on the lack of public consultation for Site STM010, I believe that there is a lack of Soundness for this aspect of the plan. As such, the plan does not demonstrate that it was Positively prepared, Justified, Effective and Consistent with National Policy and has therefore not followed due process.

Based on the above, it is my opinion that site STM010 should be removed from the Regulation 19 version of the DDC Local Plan.

Please find below the reasons why I believe that site STM010 should not be included in the Regulation 19 version of the Local Plan:

- This site was proposed as a potential development site in 2012 for inclusion in the current version of the Local Plan. After due consideration DDC concluded that it was not a suitable site for housing development, and it was therefore not included. I have included the SAD28 SHLAA assessment as an attachment such that you can read the reasons why the site was rejected. No material changes have occurred in the last 10 years with respect to this site and as such I believe that DDC should have come to the same conclusion during the consideration of this site during the current process. In fact, the Sustainability Assessment for Site STM010 indicates that only two of the eleven identified Objectives are deemed to be a Minor Positive (Housing and Economy) whilst all of the other nine Objectives are deemed to be Minor Negative. As such, this beggars the question as to how this site warrants being included in the Regulation 19 version of the Local Plan? In my view this evaluation demonstrates that this site is not suitable for development and should be removed from the Local Plan.
- Salisbury Road is a Private Road the upkeep and maintenance of which is undertaken by the Salisbury Road Association SMB. Access to and from the proposed STM010 site from Salisbury Road will not be possible as the residents have decided not to allow it and as frontagers we have the legal right to do so.
- I believe that the impact of the proposed development and the resultant increased traffic flow has not been fully evaluated and that it would certainly significantly worsen what is already a system that barely copes with the current volume of traffic, especially at the narrow and congested junctions between Salisbury Road and the Droveaway and the Droveaway and Sea Street.
- The Droveaway, like Salisbury Road, is no more than single track at many points along its length and as such does not provide any reasonable access to the site for construction plant or future residents of that site.
- I have examined the Title deeds of the proposed STM010 site and have found that it is in fact land locked. Its boundaries are completely inside the hedgerow and tree line along its borders with both Salisbury Road and the Droveaway. As such, the landowner has no obvious access to the site that is in his ownership and therefore renders the site as undeliverable and unachievable.
- The ground level of the proposed site is approximately 5 metres higher than the ground level of the properties opposite it on Salisbury Road. As such, any houses adjacent to Salisbury Road will be of the order of 11-12 M higher and dominate the existing properties. This will significantly impact the access to sunlight due to the inevitable shading by these new properties. In addition, the proposed properties will have direct line of site into the front aspects of the existing properties, which include bedrooms, bathrooms, living rooms and kitchens. It is my view that this development proposal would therefore significantly adversely impact the residential amenities of these properties. This was further highlighted in the Landscape Sensitivity Assessment of proposed development sites FINAL REPORT January 2021, page 139 where under the Mitigation heading it is stated that –‘Any development should also be one story to minimise visual impact.’ Thus, confirming that the height of this site is a significant issue.
- The proposed site, whilst currently used agriculturally is part of the Kent Downs AONB and constitutes a buffer zone between the residential aspects of Salisbury Road and the Droveaway and the North Downs SLA, the Heritage Coast, National Trust land, the Site of Special Scientific Interest (SSSI) and the Biodiversity Opportunity Area. In fact, the site is only 300 meters from the Dover to Kingsdown cliffs Special Area of Conservation (SAC) and Site of Special Scientific Interest (SSSI) which protects cliff top grassland and scrubland habitat which is also a key natural and landscape feature of the AONB and heritage coast. Any development on this site would remove that buffer and significantly impact these extremely important and sensitive conservation areas.
- The AONB and heritage coast boundaries were drawn to explicitly include the area of STM010 to protect this land from development. A housing development would be a clear separation from the intended purpose of the AONB designation for this area.
- I also believe that the proposed development in an AONB is in complete conflict with National Planning Policy Framework (paragraphs 174 to 178), which I am sure you are aware of. As such the allocation of site STM010 is not legally compliant and is further evidence that the site should be removed.
- The Local Plan Policy NE2 clearly states that; ‘*Major development proposals within the AONB will only be permitted in exceptional circumstances and where it is demonstrated they are in the public interest*’. In addition, NE2 also states that any development in the AONB should achieve the following:
- Be sensitively located and designed to avoid or minimise adverse impacts on the AONB and its setting.

	<ul style="list-style-type: none"> • The location, form, scale, materials and design should conserve and where appropriate enhance or restore the special character of the landscape. • The development should enhance the special qualities, distinctive character and tranquillity of the AONB and the Heritage Coasts • The development has regard to the AONB Management Plan and any associated guidance. <p>In my view the proposed STM010 development site does not meet any of the above criteria and should be removed.</p> <ul style="list-style-type: none"> • In addition, any development of this site would impact on the long and medium view of the extremely important Dover Patrol Memorial from many aspects of the surrounding area. <p>In summary, any housing development on site STM010 would have significant impact on this component of the Kent Downs AONB and the Heritage Coast and will be highly detrimental to the nationally and internationally important SSSI and SAC areas that it abuts. I believe that allocation of the site for development conflicts with national and local planning policy. In addition, any such development would have a significant impact on the residents of the area with respect to residential and visual amenity and further exacerbate the already significant traffic issues.</p> <p>In conclusion, for all the reasons highlighted above, Site STM010 should be removed from the DDC Local Plan.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Removal of site STM010 from the Regulation 19 version of the Local Plan.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To fully represent the facts and views expressed in my submission.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP40 (Site STM010)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note: This is a group representation on behalf of 135 residents. The spreadsheet of names and addresses and emails will be made available to the Inspector on request.</p> <p>We consider that the Dover Local Plan is not legally compliant for the reasons set out in our response below. We consider that the plan is unsound due to the inclusion of Site STM010 in Policy SAP40 which for the reasons set out below renders that policy unjustified, ineffective and inconsistent with national planning policy.</p> <p>Response to Dover District Council Local Plan Regulation 19 Consultation November 2022</p> <p>This response is submitted on behalf of 124 (DDC EDIT 135 residents) residents of St. Margaret's at Cliffe and other areas (the STM010 Residents' Group), whose names and addresses are listed in Attachment 1 and who have supplied the spokesperson for the Group with their written authority to make these representations. The response relates to the inclusion of site STM010 in Policy SAP40 of the draft Local Plan, which allocates the site for housing.</p> <p>In the view of the signatories to this response, this site is entirely unsuitable for housing development for a number of reasons, and its inclusion in this policy is unjustified and inappropriate, based on the relevant evidence and taking into account the reasonable alternatives. Access to the site is problematic, and it may not be deliverable within the plan period, making this allocation potentially ineffective. The allocation of the site for housing also conflicts with national and local planning policy, and is inconsistent with material considerations such as the policies of the draft Local Plan itself and the Kent Downs AONB management plan. Its inclusion in Policy SAP40 renders the Local Plan unsound to that extent, and we request that this allocation be deleted from the Plan.</p> <p>Our arguments in support of this request are set out below. They are made at some length due to the fact that this is the first time we, as residents, have been properly consulted on this proposal, and the first time that we have had the opportunity to put them forward. This is because the site was not included as a selected site for housing in the published Regulation 18 document, only as one which had been considered. It was only very shortly before the Regulation 18 consultation process closed that the site was added to the list of sites allocated for housing in St. Margaret's, and so far, as we are aware, no local resident nor the Parish Council was aware of this inclusion until the Regulation 19 document was published. It appears, from the response to a freedom of information request to DDC, that on the last day of the Regulation 18 consultation, 16 March 2021, agents acting for the site owner submitted a letter to DDC putting forward this site for housing.</p> <p>Although its subsequent allocation may not have been a technical breach of the requirements of the consultation process, local residents perceive it as unfair and a breach of natural justice. They had a legitimate belief and expectation that the site would not be allocated due to its omission from the published Regulation 18 document. This was reinforced by the fact that the HELAA suitability assessment for STM010 stated that the site was only to be taken forward with STM011. The latter site is a paddock which adjoins STM010. The owners of STM011, who are signatories to this letter, have always indicated their paddock is not available and should never have even been considered for allocation, and this was well-known locally. We would question whether these flaws in the consultation process mean that the required process for public engagement as set out in the Statement of Community Involvement has not been followed, and whether this means that the Local Plan is not legally compliant.</p> <p>However, there are also many compelling reasons based on the planning merits of the case as to why this site should not be allocated for housing, and these are set out below.</p> <p>Characteristics of the site and effect of proposed development</p>

STM010 is in open countryside and lies entirely within the bounds both of the Kent Downs Area of Outstanding Natural Beauty (AONB) and of the Heritage Coast.

The site is a field of 2.2 hectares, currently used for arable crops, which borders an area of open access land owned by the National Trust (NT) known as Bockell Hill. This adjoining land is of high conservation, wildlife and landscape value. STM010 is also within 400 metres of several important habitats for wildlife that have highly protected status: Dover to Kingsdown Cliffs is both a Site of Special Scientific Interest and a Special Area of Conservation. The site is an important buffer between these protected areas and the residential area of St. Margaret's Bay. The site is within a Biodiversity Opportunity Area as defined by SP14 of the draft Local Plan, and the field with its associated hedgerows and trees forms an important part of the biodiversity of the AONB in this area. (See Google Map entitled "Field 2006" **Attachment 2**).

The whole of the site was, from the outset, included within the AONB designation. The boundaries of the AONB in this area generally follow the settlement boundary of St. Margaret's village, but the site justifies its inclusion in the AONB for very specific reasons. It contains the highest point in the locality, as can be seen from the contour map at **Attachment 3**, and lies prominently in the landscape, being higher even than Bockell Hill or the land on which the Dover Patrol Memorial is built to the north. Old maps show the field as being called Snag Burrows (Tithe Map of 1840) or Snag Barrow Mount (1876 OS Map). The term "Mount" confirms its prominence, and the 1876 map shows the site of a prehistoric barrow in the field: such barrows are normally found on local high points. The area is known by old-established residents of the village as "Up-on-top", and a modern house built close by in the Drove way echoes this name.

The prominence of the site means that from the field and the footpaths around it, there are wide-ranging coastal and countryside views, including across the Straits of Dover to the French coast, to the coast of Thanet and the Goodwin Sands, and to the South Foreland lighthouse to the south and to the Dover Patrol Memorial to the north. Both the lighthouse and the memorial are designated heritage assets, being listed buildings (Grade II and Grade II* respectively). There are also extensive views across parts of the site southwards from the NT access land at Bockell Hill, stretching as far as the South Foreland lighthouse. The sightlines required for these iconic views would be adversely impacted by built development and associated screening on the site. The Landscape Assessment carried out in 2020 for HELAA (Appendix 3(a)) recognised that built development on the site would be visible from a long distance away, and would have an impact on the landscape.

Although currently used as productive farmland, the site with its hedgerows and trees makes an important visual contribution as open countryside to the neighbouring highly sensitive landscape. In terms of its value to wildlife, it is functionally linked with the scrubland and grassland of Bockell Hill and via that land, with the Dover/Kingsdown cliffs SSSI and SAC beyond. The Sustainability Assessment confirms that it intersects with a relevant SSSI Impact Risk Zone. It thus provides a valuable corridor for wildlife, including migratory and resident bird species, bats and other fauna. The site is within the "restore and conserve" area of the Green Infrastructure Network as defined in the draft Local Plan, and the Landscape Assessment carried out for HELAA in 2020 (Appendix 3(c)) refers to the "real opportunity for Green Infrastructure" in relation to the site.

The site is also important for local informal recreation. Paths within the site and along its boundaries are used extensively by walkers, as an alternative to walking along the Drove way, and to gain access to the Bockell Hill NT site. There is a gate giving access to Bockell Hill in the north-eastern boundary of the site, presumably installed by the National Trust. The official Frontline Britain Trail, developed by the White Cliffs Countryside Partnership, runs from the Dover Patrol Memorial across Bockell Hill and emerges at this gate, continuing along the north-eastern boundary of the site to the Drove way. Although current editions of local OS maps do not show these paths as public footpaths, there are certainly rights of public access along the Frontline Britain Trail, and other customary rights of access across the site also appear to have been established. The 2020 Landscape Assessment referred to above refers to the wide range of walking opportunities in the vicinity of the site. The plans put forward by the promoter of the site do not recognise this use of the land, and make no reference as to how the established recreational amenity of the site is to be protected. In the absence of protection for this amenity, walkers seeking access to Bockell Hill and the English Coastal Path beyond are likely to be displaced on to the paths on the adjoining coastal habitats of the SSSI and SAC. These are already recognised in the Habitats Assessment as being under potentially unsustainable pressure from recreational use.

It seems that the particular characteristics of this site, and the significance of its location within the AONB, have not been properly considered by DDC when assessing its suitability for housing development. This is evidenced by the fact that the site is described in the Housing Site Assessments of HELAA 2022 (Appendix 1(a), page 18) as "**adjacent** to the AONB and Heritage Coast". The site is in fact completely within

both these designated areas. This misapprehension (indeed glaring error) appears to have informed the judgment made in the same assessment that the site was of “low to medium sensitivity”. In our view, this opinion is totally incorrect and cannot be sustained.

The site lies on a high point of the AONB, and it will be impossible to build houses on any part of this exposed field without intruding upon and adversely impacting the sensitive landscape of which it is an essential component. As can be seen from the contour map at **Attachment 3**, the site is a gently sloping plateau, and there are effectively no “lower slopes” where locating buildings would materially lessen the visual impact of development (contrary to the suggestion made in the course of consultations by the Kent Downs AONB unit). The drop from the summit of the site to the level of its boundaries is only a few metres: see the contour map. The potential for unacceptable visual impact from development in this area was recognised when housing was built in the Droveaway on the southern boundary of the site: this land is lower, but still only single-storey development was permitted. In addition, this site had to be excavated and lowered by approx. 3 metres to permit this development to proceed. **Attachment 4** is a computer simulation showing the single storey development looking north-east from the Droveaway. **Attachment 5** is another computer simulation showing how new housing development on this site would tower above and dominate the existing single storey-development.

As Site STM010 rises above all the surrounding development, only the rooftops of the surrounding houses can be seen from most parts of the site, as illustrated by the photograph at **Attachment 6**. **Attachment 7** is an artist’s impression of the likely visual impact of a new house built on this corner of the field, which would be visible from a considerable distance from all directions.

Our view that the suitability of this site for housing has been incorrectly assessed is strengthened by comparison with other assessments made in the same HELAA 2022 in respect of sites in St. Margaret’s which are also within the AONB: see Appendix 1c. For example, land at New Townsend Farm (site STM006) is described as a site which sits prominently in the landscape, and where development of the whole site would have an unacceptable impact on the AONB. Other sites considered were rejected outright on the basis of unacceptable impact on the landscape. It is difficult to see why a similar judgment was not made in respect of STM010, which also sits prominently in the landscape, is closer to important designated sites such as the SAC and SSSI, and is also part of the highly sensitive landscape of the Heritage Coast. This lack of consistency in the suitability assessments for sites in different parts of the AONB amounts to a breach of the soundness criteria applying to the Local Plan, requiring that its policies be justified and consistent with national policy.

The promoters of the site have referred to its prospective development as “infill”, but this is not an appropriate description. It lies on the edge of the built-up area of St. Margaret’s, and between the northern ends of the residential roads of the Droveaway and Salisbury Road. But where those roads abut this site, both are only very lightly developed, each with a slender strip of ribbon development on one side of the road: 10 houses in Salisbury Road and 14 in the Droveaway. The size of this site, with an area of 2.2 hectares, is much too large to be considered proportionate development in such a sparsely built-up area, and cannot reasonably be regarded as “infill”. Due to the site’s elevation, any houses built on it would rise well above surrounding properties, and would not be visually integrated with the existing development: see **Attachments 5, 7 and 9** as evidence of the likely impact.

Attachment 8 shows the existing view over site STM011 (the paddock) and STM010 towards the south-west, taken from the Frontline Britain Trail which crosses the NT land at Bockell Hill. **Attachment 9** is an artist’s impression of the likely impact of housing development on this view, based on the proposals made by the promoter of the site. It can be seen that this important view, an integral component of the iconic views of the Heritage Coast available from the site, would effectively be lost if such development were permitted.

We consider that due to the special characteristics of this site, including its elevation and landform (not immediately apparent from a desk-based review) it is essential that the inspector should visit the site to reach a properly-informed view of its suitability for the proposed allocation, and we request that such a visit be arranged.

Conflict with policies relating to the AONB

Due to the special characteristics of this site, and its status as an integral part of a highly protected landscape, any housing development on the site would amount to an unjustifiable intrusion into open countryside and would have an unacceptable impact on the landscape and scenic beauty of the AONB, which could not be satisfactorily mitigated. Such development would be in conflict with many of the policies of the existing and draft Local Plans, with national planning law and guidance and with the provisions of the Kent Downs AONB Management Plan.

The current Local Plan, adopted by DDC in January 2015, provides for the protection of sites within St Margaret's at Cliffe (including St Margaret's Bay) that fall within the AONB. Section 2.18 of the DDC Land Allocations Local Plan emphasises that AONBs have the highest status of protection and the plan states that there are very limited development opportunities in St. Margaret's Bay 'that would not harm the setting of the AONB.' For this reason, no sites within the AONB in St Margaret's Bay were allocated for housing in the current Local Plan.

It is accepted that the current Local Plan requires updating, and that there is a need for more housing in the District. However, it is not clear why the AONB should be entitled to less protection now than in 2015, nor how building on sites within the AONB such as STM010 will not still cause unacceptable harm to its setting: no convincing explanation is given in the draft Local Plan for this change in policy.

The proposed allocation of the site for housing also conflicts with several policies in the current draft of the Local Plan (the Regulation 19 submission document). Although many of these policies relate to the way in which future proposals for development in the district should be assessed and managed, rather than to the allocation of specific sites for development within the Local Plan itself, there should obviously be consistency between these related aspects of the local planning system, particularly with regard to development within the AONB.

It is a stated Strategic Objective of the draft Local Plan to conserve and enhance the District's important natural landscapes. Policy SP4 of the draft Plan re-states the well-established legal and national planning policy position that proposals for residential development in settlements in, adjoining or surrounded by, the Kent Downs AONB or Heritage Coasts, **must comply in the first instance with the primary requirement of conserving and enhancing landscape and scenic beauty.** This principle should also apply to the allocations for housing made in the Local Plan itself. The housing development proposed for STM010 will in no way conserve or enhance the landscape in which it lies, or the scenic beauty of the AONB in this area. For the reasons set out in this submission, it will on the contrary amount to an unwarranted intrusion into highly attractive and sensitive open countryside, and have a very significant adverse effect on the landscape of the AONB and the scenic beauty of the area.

Policy NE2 of the draft Local Plan reinforces the principle above, and sets out how the impact of development proposed within or affecting the setting of the AONB should be mitigated. Proposals will only be supported where:

"Development is sensitively located and designed to avoid or minimise adverse impacts on the AONB and its setting;

The location, form, scale, materials and design would conserve and where appropriate enhance or restore the special character of the landscape;

The development would enhance the special qualities, distinctive character and tranquillity of the AONB and the Heritage Coasts; and

The development has had regard to the AONB Management Plan and any associated guidance."

So far as the first three requirements are concerned, it is not possible, given the sensitive location and special characteristics of this site, to achieve any significant mitigation of the adverse impact of housing development. The landowner's submission refers to suggested screening of the visual impact of the site by landscaping: it seems commercially unlikely that this will be carried out, given that the magnificent sea views from this site are likely to be an important marketing advantage for any properties built on it. Any such screening would in itself be deleterious, as it would block the important views across the site from public access points to the coast, countryside and historic monuments in the vicinity. It is therefore impossible to see how any such development could enhance the "special qualities, distinctive character and tranquillity of the AONB and Heritage Coast": these qualities can only be damaged by built development on the site.

The fourth requirement above requires that proposals should have regard to the Kent Downs AONB Management Plan. The allocation of STM010 is inconsistent with the provisions of this Plan. At section 1 of the Plan, particular emphasis is given to tranquillity and remoteness. It states: "Much of the AONB provides surprisingly tranquil and remote countryside - offering dark night skies, space, beauty and peace. Simply seeing a natural landscape, hearing birdsong, seeing and hearing the sea, watching stars at night or 'bathing' in woodland are important perceptual

qualities of the AONB.” St Margaret’s Bay has a Dark Skies Policy at local level, and there are very few streetlights. The building of houses on this site will forever remove that tranquillity and sense of remoteness, not just for the site but also the surrounding protected landscape. In such a prominent position, houses will inevitably add substantial light pollution, contrary to Sustainability Development Principle 7 of the Plan. That light pollution will also have an adverse impact on local wildlife, particularly on the birds and bats which frequent the hedgerows and copse on the site, and the adjacent conservation land owned by the National Trust.

The Kent AONB Management Plan refers to the “breath-taking long-distance panoramas from clifftops and plateaux” in the District as one of its most iconic features: these views should be given the highest levels of protection, but the development proposed for STM010 would deprive local residents and visitors of one of the most valuable points in the locality for appreciating them.

The AONB Management Plan also specifically warns against the cumulative effect of small-scale developments on the special character and qualities of the AONB. Paragraph 3.1.4 states: “each individually small impact taken cumulatively is progressively diminishing the qualities and character of the AONB at a strategic scale”. This proposed allocation in a particularly prominent part of the coastal AONB may only provide 10 houses, but would contribute significantly to the cumulative diminution of the AONB.

This allocation is also in conflict with national planning policy. Under the National Parks and Access to the Countryside Act 1949) and the National Planning Policy Framework (paragraph 176), AONBs are entitled to the **highest status of protection**, and great weight should be given to conserving and enhancing the landscape and scenic beauty of such areas. The same considerations apply to land designated as Heritage Coast (of which Dover District contains the only such designations in Kent).

The allocation of this site fails to meet the requirements for development in AONBs set out in the National Planning Policy Framework paragraphs 174, 175 and 176. Paragraph 174 of the NPPF requires planning policies to contribute to and enhance the natural and local environment, in particular by protecting and enhancing valued landscapes and sites of biodiversity. This allocation has the completely opposite effect, and means that a valued landscape, in a protected area, will be lost forever, and the biodiversity of the area damaged.

Paragraph 175 of the NPPF requires authorities to allocate land with the least environmental or amenity value, in the interests of conserving and enhancing the natural environment. Paragraph 3.4 of the draft Local Plan reflects this requirement in stating that “a key aim of the growth strategy is to focus development in the least sensitive areas of the District in order to conserve and enhance the District’s rich natural and historical environment”. This allocation within the AONB, for just 10 houses that could be built on other far less sensitive sites, will be of land that has extremely high environmental and amenity value, and accordingly conflicts with both national and local planning policy.

Paragraph 176 of the NPPF requires that “Great weight should be given to conserving and enhancing landscape and scenic beauty in ... Areas of Outstanding Natural Beauty which have the highest status of protection in relation to these issues”. No such ‘great weight’ has been given in deciding on this allocation, as the proposal will neither conserve nor enhance the landscape and scenic beauty of the area. The lack of weight given to these factors is also demonstrated by the incorrect assessment of the site as “low to medium sensitivity” in the assessment of its suitability for housing, and its original incorrect identification as being outside the AONB and Heritage Coast. Additionally, no site-specific assessment has been made by DCC of whether the allocation of STM010 constitutes a “major development” under NPPF Paragraph 177 and is thereby subject to the additional public interest test for such developments under the NPPF. No evidence has been put forward to show why this allocation is in the public interest.

Traffic and access issues

Developing this site for housing will have unacceptable impacts on traffic on roads in the village of St. Margaret’s. In addition, there is no safe and suitable access to the site. Due to these issues, the allocation of STM010 for housing is inconsistent with local and national planning policy, and in particular, does not enable the delivery of sustainable development. The access problems mean that development of the site is likely to be unachievable and undeliverable over the Local Plan period.

Traffic issues

The promoter of the site has claimed that access to the site could be obtained either from Salisbury Road or from the Droveaway. However, Salisbury Road is a private unadopted road, owned and maintained collectively by the residents whose properties front the road. Those residents would not be prepared to grant rights of access to the developer to allow construction of houses on the site, nor to any eventual residents of the site. They will be submitting separate representations to this effect in the Regulation 19 consultation process.

All access to the site would therefore need to be along the Droveaway. The Droveaway is narrow for a considerable distance from its junction with Sea Street, and as parking is unrestricted, parked cars normally line most of the road up until its junction with Convent Close and beyond. The pressure on parking is increased by customers visiting the café-bar First Light at the Sea Street junction, and patients visiting the doctors' surgery near Droveaway Gardens. Salisbury Road, as a private road, provides no available parking to alleviate these pressures.

Due to the parking situation, the Droveaway is effectively only the width of one vehicle for much of its southern stretch. This already results in congestion, enforced reversing and other dangerous situations involving conflict between vehicles, particularly at the Sea Street junction. As there is no exit point for vehicles at the northern end of the Droveaway, all traffic must enter and leave by the route to Sea Street, which increases the congestion. This is further increased by the fact that all traffic to properties in Salisbury Road must enter and leave that road via its junction with the Droveaway, and then via the Droveaway/Sea Street junction.

If STM010 is developed for housing, the additional traffic along the Droveaway of heavy construction vehicles, and subsequently of more residential traffic, plus delivery and utility vehicles, will result in unacceptable and dangerous levels of vehicle movements, with their associated congestion, noise and potential for accidents. As STM010 is located at the furthest (northern) end of the Droveaway, all traffic from and to the site would have to travel the full length of the road.

As the Droveaway connects to several public footpaths, including the Frontline Britain Trail and others leading seawards to the English Coastal Path, it also carries a high level of pedestrian traffic, including recreational walkers and local dog-walkers. As there are no pavements beyond the junction with Convent Close, the road from that point is for all practical purposes a shared surface. Any increase in traffic would result in increased danger to pedestrians, and a loss of amenity for those recreational walkers enjoying what is effectively still a country lane.

Many of these serious traffic issues were recognised by the highway authority in earlier consultations: it is pointed out in the highways assessment carried out for HELAA 2020 (Appendix 3b in the Evidence Base) that the increase in traffic at the Droveaway/ Sea Street junction resulting from the development of STM010 would increase the likelihood of vehicle conflict at that junction. This assessment also states: "Both roads are at their narrowest in the vicinity of the site, although there may be scope for some localised widening along the site frontages". However, as far as local residents are aware, the owner of the site does not own or control any land between the site and the highway which would allow for such widening. (See below for the issues this raises as to access to the site generally.)

In view of the concerns raised, it is stated that if this site ever came forward for development, it would need to be in consultation with KCC.

These and other highways concerns are raised again in the housing site assessments in HELAA 2022 (Appendix 1a in the Evidence Base). Again, the highway authority points out that "the junction of The Droveaway/Sea Street is subject to constrained visibility (southbound), as such **an increase in turning movements at this junction will increase the likelihood of vehicle conflict and there is limited scope to provide meaningful improvements.** - General concern over traffic levels within the Village given the constrained nature of the High Street which is subject to narrow sections and on street parking, this would need to be considered in tandem with other potential allocation sites in the locality".

In relation to another site proposed to be developed for housing in St. Margaret's (STM006 at New Townsend Farm), the highway authority commented in its highway assessment in HELAA 2020 (Appendix 3c) that the site "is located some distance away from the services and amenities within the village, which could lead to an increase in demand for parking within the village as residents are likely to drive rather than walk or cycle." This consideration would apply even more strongly to the proposed development of STM010, which is considerably further from the village centre than STM06. Parking within the village is very limited.

Unlike most of the other proposed housing sites for St. Margaret's, which are situated on the landward side of the village centre, most of the increased traffic resulting from the development of this site would have to pass along Sea Street, past the entrance to two schools, and then along the very narrow road through the centre of the village (which lacks a pavement for long stretches and is single-width in parts) in order to enter or leave the village. This would increase the existing danger to pedestrians (including children at the schools), congestion, delays, air pollution, traffic noise and potential for vehicle conflict throughout this area of the village, which already suffers badly in these respects.

The bus service connecting St Margaret's to Dover and Deal has recently been reduced significantly by its operators Stagecoach. There are now only 5 buses a day to Dover, and 3 to Deal (none on Sundays). These reductions are already affecting the ability of children in the village to travel to school by bus, and of residents to travel to work. This is likely to result in a substantial increase in traffic in all parts of the village, particularly at peak hours, and this will add to the congestion already affecting the Droveaway, Sea Street and the village centre, making the

addition of further traffic from the proposed site even more problematic. As a recent development, this has not been taken into account in any of the traffic assessments carried out to date.

An additional relevant consideration is the future maintenance of the Droveway. Residents of the road cannot recall the last time it received any maintenance from the highway authority, and the surface is very patched and uneven in parts due to work by various utility companies. This would be exacerbated by all the works necessary to bring services to the site, and the impact of heavy construction traffic. In the current economic climate, it seems unlikely that the highway authority will have sufficient funds in future to maintain the road to a proper standard, and its deterioration will continue to the detriment of residents.

Access

As mentioned above, the only potential access to the site would be via the Droveway, in view of the unwillingness of the residents of the private and unadopted Salisbury Road to grant access over that road. The highways assessments referred to above made it clear that the promoter would need to ensure that there was a right of access to the site. However, this right of access has not been clearly established by the promoter.

In DDC's stakeholder engagement document, included in the Evidence Base for the Local Plan at Appendix 3g, the highway authority comments that "there does appear to be a gap between the red line boundary [of the proposed site] and the adopted highway which will need to be clarified." The site can only be accessed from the adopted highway (the Droveway) by crossing the area of land comprised in this gap. The promoter of the site has not stated that this area of land is in its ownership (indeed failing to answer this question in the submission correspondence with DDC. From the local knowledge of many of the residents on whose behalf this response is submitted, the promoter does not in fact own this area of land: its actual ownership is historically obscure, and the land does not appear in any Land Registry title.

The land in question is a long wide strip which runs along the entire western boundary of the arable field comprising the site, and is occupied by a wide hedgerow, with associated scrub and small trees. The present agricultural access has been formed by making a gap in this hedge at the northern end. However, part of the access area thus created falls within the boundaries of the adjacent property to the north-west of the site, known as Lomea, as can be seen from the Land Registry title map for the western part of that property (see **Attachment 10**). The owners of Lomea are not prepared to grant access over their land to the promoter of this site, and will be submitting separate representations to confirm this. The present agricultural access is informal and not documented as an easement binding Lomea: any rights relating to it are personal to the farmer cultivating the land, and do not extend to any use beyond that needed for agricultural purposes.

In the absence of a right to use the full extent of the current access area, development of this site could only proceed by removing part of the existing thick hedgerow bordering the Droveway. Assessments of the suitability of the site for housing have stated that this hedgerow and neighbouring vegetation should be retained if the site is ever developed, due to its value for wildlife, the landscape and screening for neighbouring properties. Its removal would have an unacceptable adverse impact on these features. The promoter has not in any event demonstrated that it has any right of ownership over any part of this area of land, or any consent from the owner of the land to remove the hedgerow, or to access the site for development or any other purpose.

In view of the absence of any such rights or consent, there is no safe and suitable access to the site, as required by national and local planning policy. Without such access, the site cannot be developed, and should therefore not be treated as being deliverable, or its development as being achievable, within the period of the Local Plan.

Other material considerations

Housing development on this site will adversely affect the setting of a heritage asset, as it will interfere with the long views across the site, and from other vantage points, of the Dover Patrol Memorial, which is a Grade II* Listed Building. Grade II* buildings are particularly important buildings of more than special interest: only 5.8% of listed buildings are Grade II*. In the listing description, Historic England make clear the value of the memorial's setting, stating that "it is an impressive example of a commemorative War memorial, intact in its original coastal setting".

Development on the site also has the capacity to impact adversely on the long views from the Bockell Hill access land to the South Foreland Lighthouse, also a Grade II Listed Building. Policy SP15 of the draft Local Plan, reflecting national planning policy, states that "applications that will affect a heritage asset should ensure that asset, including its setting, is conserved and enhanced in a manner appropriate to its significance". This proposal will neither conserve nor enhance the settings of these heritage assets, rather the contrary.

Housing development on this site will not comply with the requirements of national and local planning policy, reflected in the draft Local Plan at page 19, that new development should be focused at accessible and sustainable locations. The Sustainability Appraisal carried out in respect of the site produced scores of "minor negative" for all Objectives apart from Objectives 1 and 3, relating to Housing and Economy, for which all sites appraised scored minor positives by definition. The site is more than 400 metres from the nearest bus stop, and is at least 1000 metres away from the amenities and facilities in the village centre, which is likely to result in more car journeys and increased carbon emissions. This location, on the very edge of the settlement boundary of St. Margaret's, cannot be described as sustainable.

In terms of providing for housing need in the District, the 10 houses proposed for this site contribute a negligible amount to overall numbers, and are not necessary to fulfil the housing objectives of the Local Plan. Table 3.2 of the draft Plan sets out DDC's 5-year housing land supply based on the strategy and sites proposed in the Plan, and demonstrates a 6.16-year supply with a 10% buffer, well above the required 5-year supply. Neither is housing development on this site likely to contribute to fulfilling the undoubted need for affordable housing in the District. The surrounding area is one of mainly high-value properties, and houses in this extremely desirable countryside location will undoubtedly be priced accordingly. The promoter of the site has not offered any such housing, and the illustrative drawings suggest that none will be provided here. Despite the requirement in the draft Local Plan that 30% of housing in the AONB should be affordable, it is very difficult in reality to envisage this aim being fulfilled in relation to this site: many arguments are available in practice to developers to avoid these requirements.

Summary and Conclusion

The development of site STM010 for housing would represent an unwarranted intrusion into the countryside of the Kent Downs AONB and the Heritage Coast, to the severe detriment of a sensitive landscape setting. The adverse impact of this intrusion could not be successfully mitigated, due to the special characteristics of the site. Such development would also have unacceptable traffic impacts on the locality and on the village of St. Margaret's. Other material considerations as set out above also indicate strongly that the site should not be developed for this purpose.

These adverse impacts considerably outweigh any potential benefit accruing from the addition of the 10 houses proposed for this site to the local housing stock. The allocation of this site for housing is contrary to national and local planning policy, is inappropriate and unjustified, and reasonable alternatives are available. The inclusion of this site in Policy SAP40 renders the Local Plan unsound to that extent. We submit that STM010 should therefore be deleted from this policy and from the Local Plan.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	The allocation of site STM010 within SAP40
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC note: the full representation without redaction will be made available to the inspector on request.</p> <p>We are the owners of xx The Drove way, St Margarets Bay, which directly adjoins site STM010 which has been allocated in policy SAP40 of the Dover District Council (DDC) Regulation 19 local plan submission document. Indeed, the proposed extent of STM010 is such that it would appear that it includes land owned by us.</p> <p>We object strongly to the inclusion of Site STM010 in policy SAP40 of the DDC Local Plan. This site is not appropriate or suitable for housing. A housing development on this site would severely damage and conflict with the legal protections that have been put in place to protect this site. The inclusion of this site has, as explained further below, been the subject of multiple flaws and errors in the Regulation 18 and 19 process that mean the tests of soundness in the National Planning Policy Framework (NPPF) have not been met.</p> <p>Moreover, the inclusion of STM010 is not justified and is inconsistent with local and national planning policy, including the NPPF, as well as being inconsistent with the current DDC local plan and the requirements of the Town and Country Planning (Local Planning) (England) Regulations 2012 (the Regulations). The basis for these contentions are set out in three sections below relating to access, the AONB and process flaws.</p> <p>We would ask that the planning inspector should visit the site to understand its importance in the landscape. We would also ask, as parties directly impacted severely and adversely by this allocation, to give oral evidence to the planning inspector.</p> <p>STM010 - the site and access to it</p> <p>Our house is the final house on the Drove way; it was an old RAF guard house. Uniquely for houses on this road (and Salisbury Road which is the other side of STM010), our home is within the boundary of both the Kent Downs AONB ('AONB') and the Heritage Coast, as well as being within a few hundred metres of the Dover to Kingsdown Cliffs Special Area of Conservation (SAC) and SSSI.</p> <p>Our back garden directly adjoins site (STM010). STM010 is a field which lies within the bounds of the AONB as well as the Heritage Coast. The rest of our garden is contiguous with national trust owned farmland (also within the AONB/Heritage Coast) as well as Bockell Hill (also within the AONB/Heritage Coast). There is a footpath (within STM010) along the back of our garden which connects via a gate to the National Trust land of Bockell Hill. This footpath is very heavily used.</p> <p>A key consideration about STM010 is that it sits prominently above the surrounding land. Our house and gardens are much lower than this field and our back garden slopes upwards to it. The field which is STM010 (Snag Burrows Mount) is a plateau. The contour map shows that STM010 is higher than all the surrounding land including Bockell Hill. Any houses on this site will be visible throughout this part of the AONB, Heritage Coast and SAC. The large houses that are proposed will not only seriously impact the sensitive landscape and dark skies but will also significantly impede views towards both the Grade 2 listed Dover Patrol (one of three special WW1 Memorials located in the UK, France and the USA) and</p>

the Grade 2 listed South Forelands Lighthouse. The significant detriment to this sensitive landscape caused by this intrusion is discussed more in the AONB section.

The key issue in this section of our submission is the extent of the land owned by those who put forward Site STM010 at the close of the Regulation 18 consultation.

As can be seen quite clearly in the DDC 2015 Land Allocations Local Plan Adopted Policies Map, the promoters of this site own a piece of land, the legal boundaries of which do not join either of the two roads (The Droveaway and Salisbury Road). Correspondence between the promoters of STM010 and DDC (obtained under FOI) shows that the promoter has not disclosed their lack of ownership of any access to any road and DDC does not seem to have pursued this issue, nor has it asked whether the owners of the land that could provide access, namely ourselves, are willing to do so.

In relation to Salisbury Road, this is a private road whose owners, we know, are not prepared to give any access. This means the sole viable access to this site would be on The Droveaway, a public road, where there is currently a small break in the extensive and deep hedgerow (under separate ownership to the field) which runs the whole of the way along The Droveaway.

The promoter of STM010 submitted to DCC a document on 16 March 2021 which proposed the allocation of STM010. This document was not made public and was obtained via FOI. It includes access drawings by a company called Transport Dynamics. The drawing for the access to The Droveaway (on which DDC presumably have relied to establish 'suitable and safe access' under NPPF Paragraph 110) shows a road, including a splay, over land which is owned by us and the separate owners of the adjoining hedgerow. The owners of the field own none of this land. This is a fact they have failed to mention and which DDC seem to have not ascertained.

Indeed, in relation to the proposed Droveaway access, most of the proposed left side splay is within our garden and currently has trees, grass, daffodils and bluebells on it. The central part of the proposed access road is also, as to about 50% of that land, within our legal boundary. The attached photo shows the extent of our legal boundary. The person in the photo is standing where the boundary lies. The owner of the field has absolutely no right of access, no easement or covenant allowing access. The tenant farmer has limited and very infrequent access for a tractor to this field, strictly personal to the tenant farmer and only for agricultural purposes, which permission can be withdrawn by us at any time.

We object very strongly to the allocation of site STM010 within SAP40. We also very strongly object to the inclusion of land owned by us within the scope of STM010. DDC should have established whether the owners of the land through which there is proposed access to the highway consent to that access before allocating the site within SAP40.

The promoters of site STM010 own a 'land locked' field with absolutely no access to a road. It is noteworthy that this very issue of the need to confirm how access would be provided was raised by Kent County Council (KCC) in the highways assessment. A reasonable person might have expected DDC to check this point, including crucially who owns the land which is to provide access and whether they consent to such access before allocating it within the SAP40 policy.

The site owner of the field within STM010 cannot provide safe and suitable access for all users. Allocation of this land within SAP 40 is therefore unsound under the NPPF and the Regulations because it is not justified and because there is no safe and suitable access to this site for all users as required under NPPF Paragraph 110.

Related to access, there is also the significant traffic issues which were noted in the initial HELAA 2020 for STM010 (appendix 3b in the evidence base). At the point of the proposed access to The Droveaway, the road is essentially single track, in a poor state of repair and completely unsuitable for increased road traffic. There are no footpaths. There are no street lights because the village has a dark skies policy. The pedestrians, including dog walkers, who currently access Bockell Hill via the footpath at the back of our garden (across STM010) walk in the middle of The Droveaway. If allocated and then developed, there could easily be up to 30-40 cars using this part of The Droveaway multiple times per day, plus delivery vans etc (see the St Margarets Cliffe PPC's submission on the reality of how many cars are owned by residents of houses such as that which would be built on the allocated land). DDC have suggested no measures are required for this site in the draft Infrastructure Delivery Schedule document attached to the Regulation 19 Local Plan. No footpaths, no road widening, no measures for dealing with the serious traffic problems further up The Droveaway. It is inconceivable that a small housing estate could be built on the basis of the current infrastructure without the access to it being unsuitable and unsafe for many different types of users of that access. Again, this reinforces the conclusion that there can be no safe and suitable access to this site and its allocation in SAP40 is unsound because it is unjustified and not consistent with national planning policy.

AONB

Areas defined as AONB are entitled to extra legal protection (including from inappropriate allocation under a Local Plan) to preserve their beauty and sensitive landscape for everyone to enjoy. The site is also very close (within a few hundred metres) of a Special Area of Conservation which is meant to give additional protection for important habitats for wildlife, flora and fauna as well as wildlife and birds. This status has been given

insufficient weight and consideration in all aspects of the sustainability assessment, landscape evaluation and proposed allocation within SAP40.

As stated in the introduction above, a housing development on this site would severely damage and conflict with the legal protections that have been put in place to protect this site.

Old ordinance survey maps show the field as being called Snag Burrows Mount. The field is higher than surrounding land, which is why it was termed a Mount. The prominent position of this field, over and above even Bockell Hill, is shown in the contour map. This prominence means that from the footpaths across the field there are iconic views across to the Grade 2 listed South Foreland lighthouse, the Straits of Dover and the Grade 2 listed World War One Memorial of the Dover Patrol. Any development will intrude and impact severely and negatively on this protected landscape.

The land which encompasses STM010 was, from the creation of the AONB, included within its boundary. It was intended to mark a separation between the houses of St Margarets Bay (which in this area were not included in the AONB) and the open countryside. Although used for farmland, the field is an integral part of this incredibly beautiful, and sensitive, landscape for which world heritage status is currently being sought. The field may have an agricultural purpose but its inclusion within the extent of the AONB was very deliberate. The elevated landscape of the field is itself beautiful. It adds to the surrounding landscape with its footpaths giving access for walkers, providing far reaching vistas, together with its tranquility and nighttime 'darkness'.

The site seamlessly adjoins the land (both scrubland and farmland) which forms part of the Dover to Kingsdown Cliffs, which are a Designated Special Area of Conservation (SAC) and a Site of Special Scientific Interest (SSSI). The field is within a few hundred metres of this very sensitive Coastal SAC/SSSI (a fact which, extraordinarily, seems not to have formed part of the DCC Habitat Assessment nor the Sustainability Assessment). The field is an important part of the biodiversity of the AONB. Indeed, the site is within a Biodiversity Opportunity Area and part of the Green Infrastructure Network.

The designation of STM010 for planning purposes is in contravention of the Regulation 19 Plan's policies regarding the natural environment with reference to the Kent Downs AONB. Paragraph NE2 of the Local Plan requires that 'proposals' - including allocations- should demonstrate regard to the particular characteristics of the land. No such regard seems to have been made to these characteristics in the proposed allocation. This is evidenced not least by the fact that the characterisation of this site as low to medium sensitivity in the sustainability assessment cannot be commensurate with the special characteristics of this prominent site which should have been fully assessed and taken into account. This is a high point of the AONB, it will not be possible to build houses on this elevated field without intruding upon and adversely impacting significantly the sensitive landscape of which it is an essential component. That impact will not just be on the AONB and Heritage Coast but also the SAC.

There is also a lack of consistency in the sustainability assessments for different parts of the AONB (which amounts to a breach of the soundness criteria of being justified and consistent with national policy). This can be seen from the fact that a less elevated site, namely STM006 [New Townsend Farm] which is also further from the SSSI and SAC, was considered highly sensitive. A similar assessment should have been made for STM010.

Paragraph NE2 of the Local Plan also requires that allocations should have regard to the AONB Management Plan. The inclusion of site STM010 means DDC have not properly considered their agreement to abide by the Management Plan for the Kent Downs AONB.

At section one of the AONB Management Plan (Management Plan) particular emphasis is given to 'Tranquillity and remoteness'. The Management Plan states: 'Much of the AONB provides surprisingly tranquil and remote countryside – offering dark night skies, space, beauty and peace. Simply seeing a natural landscape, hearing birdsong, seeing and hearing the sea, watching stars at night or 'bathing' in woodland are important perceptual qualities of the AONB'.

This part of St Margarets Bay has no streetlights, and this field enhances and extends the dark skies, space, beauty, and peace that the AONB and DDC have pledged to protect. Allocation within SAP40 – and subsequent building of multiple homes - will forever remove that tranquillity and sense of remoteness not just for the site but also the surrounding protected landscape which includes our home. In such a prominent position, these houses will be seen from far around and will inevitably add substantial light pollution. This should have been considered, not least in the landscape evaluation and the Sustainability Assessment, as the Management Plan says dark skies are a key priority to protect (See the Management Plan's Sustainability Development Principle 7).

The Management Plan also specifically warns against the cumulative effect of small-scale developments on the special character and qualities of the AONB (See paragraph 3.1.4 of the Management Plan). That paragraph states: 'each individually small impact taken cumulatively is progressively diminishing the qualities and character of the AONB at a strategic scale'. The proposed allocation of a site which is over two hectares in an elevated part of the coastal AONB would, contrary to the Management Plan, be a significant diminution of the AONB.

Furthermore, the Management Plan requires both a landscape led approach (page 26) and net gains for biodiversity (page 27). Allocation of a prominent site within the AONB seems incompatible with such a landscape led approach, not least when the landscape to be designated is of such a sensitive nature (just a few hundred metres from a SAC and an SSSI).

The inclusion of site STM010 is also not in compliance with the requirements for local planning allocations and developments within Areas of Outstanding Natural Beauty. No site-specific assessment has been made by the decision maker, namely DDC, of whether the allocation of site STM010 within SAP40 constitutes a major development under NPPF Paragraph 177 and is thereby subject to the additional public interest test for such allocations under the NPPF. No evidence has been put forward to show why this allocation is in the public interest.

Even if it had been assessed that it is not a major development (and no such assessment has to date taken place), it still fails to meet the requirements for AONBs under the national planning policy framework paragraphs 174, 175 and 176. Allocation of this site would represent an unwarranted intrusion into AONB/Heritage Coast countryside to the detriment of a sensitive landscape setting.

Paragraph 174 of the NPPF requires allocations to contribute to and enhance the natural and local environment, in particular by (as set out in Para 174 (a)) 'protecting and enhancing valued landscapes and sites of biodiversity'. This allocation has the completely opposite impact and effect. This allocation means an elevated and valued landscape, with protected status, will be lost forever. The inclusion of requirements, such as screening (which in any event would block the iconic views) in the proposed allocation are completely inadequate to meet this statutory obligation. Many large houses on a prominent site cannot and will not protect and enhance the landscape.

Paragraph 175 of the NPPF requires authorities to allocate land with the least environmental or amenity value. Yet this allocation, for 10 houses that could be built in other far less sensitive sites, will be of land that has the absolutely highest environmental and amenity value.

Paragraph 176 of the NPPF requires that 'Great weight should be given to conserving and enhancing landscape and scenic beauty in ... Areas of Outstanding Natural Beauty which have the highest status of protection in relation to these issues'. No such 'great weight' has been applied to this allocation. The landscape assessment and sustainability assessment for this site have both failed to put any real weight on the sensitive nature of the landscape and its scenic beauty. The assessment of the site as low to medium sensitivity demonstrates the lack of weight that has been applied by DDC (again in contrast to other allocation of AONB sites within the St Margarets area).

In failing to meet all the requirements of the NPPF, the allocation of STM010 within SAP40 means the allocation also does not fulfil the soundness obligations of being justified and consistent with national policy.

Process flaws and errors

The process for the inclusion of this site has been flawed from the outset and we object to this allocation and seek deletion of site STM010 from SAP40 of the local plan.

The National Planning Framework requires a Housing and Economic Assessment (HELAA) to be undertaken. This was done by DCC and its publication was the first indication for local residents that STM010 was being considered as potentially available for allocation and subsequent development. The contents of the HELAA 2020 suitability assessment for STM010 represents the commencement of the omissions, flaws and errors.

The initial suitability assessment for STM010 is clearly based on the incorrect assertion, set out in that assessment, that the site 'adjoins' the AONB and Heritage Coast. This was and is completely wrong. The land is, as set out within this submission, an intrinsic part of the AONB and the Heritage Coast. As such, the requirements under the NPPF, including Paragraphs 174, 175 and 176, should have been the legal basis for that initial HELAA suitability assessment. They do not seem to have been used. This means the land seems to have been assessed under the wrong legal basis. It was assessed as potentially suitable because the DCC omitted to consider that it was AONB/Heritage Coast land, very close to a SAC and subject to specific legal requirements under the NPPF in relation to assessment and allocation.

Moreover, it seems to have been this initial incorrect assessment that then informs the characterisation of the landscape as low to medium sensitivity (as set out in the Regulation 19 suitability assessment for STM010). That is an incorrect assessment. This initial HELAA assessment of the landscape sensitivity has subsequently been repeated throughout the Regulation 18 and 19 process.

As set out in the AONB part of this submission, if proper consideration had been given to the requirements of Paragraphs 174, 175 and 176 of the NPPF, the true sensitivity of the landscape characteristics of this site would have been recognised in the landscape evaluation and the Sustainability Assessment. It was not and there was therefore failure to adhere to the NPPF.

As set out in the AONB section, the inconsistent way in which sites within the AONB just within the St Margarets Bay Area have been assessed is clear from comparison of the assessments for STM010 and STM006. STM010 is a more prominent landscape, part of the Heritage Coast, a Biodiversity opportunity area and, critically, much closer to the Dover to Kingsdown Cliffs SAC and should at least have the same landscape sensitivity assessment as STM006.

In particular, the landscape sensitivity assessment should have been informed not only by its status as an AONB but also by the closeness of this site to the SAC. As mentioned above, this proximity seems to have not been considered by the DDC as it is not mentioned in any of the landscape or suitability assessments, nor has it informed consideration of the habitat assessment for this site. The habitat assessment for STM010 references an SSSI miles away but omits to consider one within a few hundred metres of this site. The failure to consider the SAC and SSSI just a few hundred metres from the site means the habitat assessment for STM010 should be considered as failing to be a proper assessment of that habitat.

The Sustainability Assessment for this site has also not been undertaken properly and contains multiple omissions, errors, and flaws such that no proper sustainability appraisal has been carried out.

In addition, and importantly there has been no Regulation 18 consultation proposing the allocation of site STM010 within SAP40. Indeed, for the local community there was the belief based on natural justice and legitimate expectation that site STM010 would not be the subject of any allocation within SAP40.

When the Regulation 18 Consultation on the draft Dover District Local Plan was published, although STM010 was referenced as having been considered, it was indicated in the Regulation 18 consultation that it had not been selected for allocation.

The proposed allocation of this site solely at the Regulation 19 stage means not only that there has been no proper consultation. It has also meant that DCC has allocated this site within SAP40 without giving consideration to the many requirements under the NPPF which would and should have been properly considered and explored if there had been a Regulation 18 consultation.

How this site was designated at the Regulation 19 stage has become apparent through Freedom of Information (FOI) requests to DDC. On the last day of the Regulation 18 consultation, 16 March 2021, the site's agents submitted a letter to DDC putting forward this site (plus another site in Kingsdown) for allocation within the local plan for housing. This letter was not made public.

The Regulation 18 consultation process for allocation of site STM010 never took place. Indeed, the Regulation 18 consultation had created the legitimate expectation that this site was not to be allocated because that is what it had said in that consultation. Moreover, the HELAA 2020 had stated that STM010 was only to be taken forward with STM011, an adjoining paddock also in the AONB. The owners of that paddock, who live on The Droveaway had made it absolutely clear that their paddock is not and never was available for allocation or development.

The first therefore that anyone locally knew that DCC was proposing allocating STM010 within SAP40 was when the DDC Regulation 19 document was published.

The absence of a Regulation 18 consultation, the failure to adhere to the principles of natural justice and legitimate expectations, plus the process flaws in both the Regulation 18 and 19 process means that there has not been a proper process for public engagement as required by the Statement of Community Involvement (Planning – SCI- 2019 Dover.Gov.UK).

It would also appear that DDC may have placed considerable reliance upon the submission by the site owner's agents and it is not clear that DDC have made their own independent assessment of a range of matters that should have informed their appraisal of this site. This includes the issue of whether the site and access to the adjoining roads is in the 'sole ownership' of the landowner. This is significant because in the absence of the owners of site STM010 having any land with road access, there is, as explained above, no 'safe and suitable access to the site...for all users' as required by Paragraph 110 of the NPPF. The access suggested by the site owner's agents is over land owned by others who strongly object to this allocation.

The failure to consider properly the issue of safe and suitable access, including the concerns raised by KCC about vehicular access and the impact on traffic along The Droveaway, is exemplified by the fact that while for other allocated sites in St Margarets (and other sites throughout the Regulation 19 Dover Local Plan) there is supporting analysis in the Draft Infrastructure Delivery Schedule of what actions need to be taken in relation to access (local highways, walking, cycling etc), there is a total absence of any such analysis or infrastructure proposals for STM010. DDC does not seem to have properly considered the issue of safe and suitable access and has therefore not complied with its obligations under NPPF Paragraph 110.

The apparent disregard for the NPPF can also be seen in the fact that STM010 has been allocated as a small housing site. The area of STM010 is just over two hectares. Paragraph 69(a) of the NPPF says small (and indeed medium) sites should be 'no larger than one hectare'. No explanation is provided of why there has been a departure from the NPPF for this site.

Inclusion of site STM010 is also contrary to the current policies for both the North Downs AONB and the development of St Margarets Bay as set out in the current local development scheme. The current local plan adopted by DCC in January 2015 provides for the protection of sites within St Margarets Cliffe (including St Margarets Bay) that have the status of AONB. The relevant provisions can be found at Section 2.18 of the 2015 DCC Land Allocations Local Plan which emphasises that AONBs have the highest status of protection and this is then applied to St Margarets Bay at Section 3.6.9, paragraph 3.405 on page 127. The current plan states that there are very limited development opportunities

	<p>'that would not harm the setting of the AONB' This was why under the 2015 plan no sites within the AONB in St Margarets Bay were chosen for allocation. The allocation of STM010 within SAP40 departs from this policy. It is not explained why a site within the AONB should no longer be protected due to its AONB status, nor is it explained how the choice of this site would not harm the AONB.</p> <p>The allocation of site STM010 within SAP40 would also seem to be a breach of the requirements of the Town and Country Planning (Local Planning) (England) Regulations 2012. Section 8 of these Regulations has not been met: (a) The Regulation 19 allocation of STM010 within SAP40 does not contain a reasoned justification of why this site in an AONB and Heritage Coast has been allocated; (b) The Regulation 19 allocation of STM010 within SAP40 conflicts with the DCC's current adopted development plan – see above; (c) The current local plan protects site STM010. The Regulation 19 allocation within SAP40 supersedes the previous protection offered by the current local plan and this should have been identified in both the Regulation 18 and 19 proposed plans and in breach of this requirement it should have stated that fact and identified and explained the superseded policy.</p> <p>In conclusion, the multiple procedural flaws have been so serious in the Regulation 18 and 19 process that the tests of soundness have not been met. The allocation of STM010 within SAP40 is unsound, it is not justified and it is not consistent with national policy.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The deletion of STM010 from SAP40
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We would also ask, as parties directly impacted severely and adversely by the allocation of site STM010 within SAP40, to give oral evidence to the planning inspector. Our house directly adjoins STM010 and the extent of that allocation includes land that we own and which purportedly would be used for access to the rest of the site. Our permission has never been sought and we strongly object to the proposed allocation.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	STM010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am writing to express my objections on the proposal for development of site STM010 in St Margaret's at Cliffe, now submitted as part of the Regulation 19 (submission version) for the following reasons:</p> <ol style="list-style-type: none"> 1 Site STM010 was included in the Regulation 18 consultation version of the Draft Dover District Local Plan but was coloured orange i.e.: it was considered but not selected as a suitable site for development and publicly posted as refused by the LPA prior to the closure date of 17th March 2021. However the day before the end of the consultation period a new proposal was submitted and as a result site STM010 was suddenly included and changed status from orange to green. Local residents and even the Parish council were not aware of this late submission until Regulation 19 was released. As such local residents were misinformed and denied their legal right of expression. (ECHR Article10) Furthermore there have been no changes to the infrastructure, services, road layout that could have made a significant justification to include site STM010 in the Regulation 19. I fail to detect any evidence based reason for the inclusion of this site. 2 The site is in open countryside and lies within the boundaries of the Kent Downs Area of Outstanding Natural Beauty (AONB). AONBs are entitled to extra protection from inappropriate development to preserve their beauty for everyone to enjoy. The site is also very close to several important habitats for wildlife with highly protected status, and borders the National Trust land at Bockell Hill. It is an important buffer between these sensitive habitats and the residential areas of the Bay. A housing development would severely damage that protection. 3 The site is the highest point in the surroundings, and a housing development with its associated light pollution will severely affect the visual beauty and amenity of the area. Previous developments along this ridge have been height restricted; in fact the last two houses at the end of the Droveaway adjoining the site have had to excavate several meters deep as the roof line could not exceed neighbouring houses. The ground level of the proposed site is at least 5 meters higher than the ground level of the surrounding properties. As such the houses would be at least 11 to 12 meters higher and severely impact on access to light as well as privacy as the new properties would have direct line of site into the opposite houses. It has public footpaths running around three of its boundaries, and these are well-used and much valued by residents and visiting walkers. The views from the site of the Dover Patrol Memorial round to the South Foreland lighthouse and over large areas of surrounding countryside and coast are unique, and should be protected from being blocked by development. 4 Existing traffic along the Droveaway is already an issue. The road is a "no exit" road with vehicles using the road as an entry and exit road which maximises road traffic. Several other roads along the Droveaway flow into the Droveaway with the only exit point into the village being Sea Street. Only the first part of the Droveaway benefits from pavement and as the road is already narrow in places vehicles are often parked on the pavement. Wide farm vehicles also use the road to and from their fields and frequently mount the banks and pavements. The increased traffic resulting from both the construction of the houses and their occupation will have a major adverse impact on all existing residents. The only access to the site will be along the Droveaway, as Salisbury Road is a private road and no access will be granted. Heavy construction traffic will damage the road surface and will be a danger to the many pedestrians and schoolchildren who use this road. 5 In the last couple of years social amenities in the village have been dramatically reduced. During the pandemic the hotel was closed and sold off as several individual residential properties. We now only have one pub/restaurant in the village and one on the seafront. Both are only open a couple of days a week with restricted hours. There is no provision for new facilities such as a proper doctor's surgery with adequate car parking or a dental practice. Bus routes have been reduced or completely axed, which has contributed to more traffic during school peak times in the morning and afternoon. There are no parking facilities or drop of zones for parents ferrying their children to and from school, consequently Sea Street becomes completely blocked during peak times. There is no bus service to the train station and there is no bus service on a Sunday. There is one local shop which stocks bare essentials, hence a car is indispensable. Subsequently

	<p>we experience already high levels of traffic and congestion in the village due to a poor infrastructure which was not designed to accommodate the level of traffic we now experience let alone heavy construction traffic in the future.</p> <p>There might be a need for more housing in the Dover District; however there are many more suitable sites available. The biggest need is for affordable housing and this site, with a maximum of 10 executive houses proposed, is not going to make any meaningful contribution to that need or to Dover District Council's housing targets generally. Dover District Council confirmed publicly at their council meeting on the 12th October 2022 that there were 17 village sites, in total, for inclusion in the Local Plan. With that in mind and considering that the proposed plan will not bring anything to the local village community in terms of improved infrastructure, better services and or social amenities but on the contrary will be detrimental to the community and the visitors alike currently enjoying this area of outstanding natural beauty I cannot see any meaningful reason to support this development.</p> <p>In my view this development plan does not meet any of the criteria in the Soundness test, be it positively prepared, justified, effective and consistent with national policy. I have illustrated in the points above why I believe this plan is not deliverable and should be seriously scrutinised by the inspector.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>To remove site STM010 from the local plan and return the site to its former status and enjoyed by all residents of St Margarets as well as tourist, ramblers and dog walkers . To ensure that in the future all sites are reviewed and scrutinised and above all that AONB sites are respected and protected as they should be .</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>STM10 has been added to the Local Plan, after the close of Reg 18, following an HELAA (Housing and Economic Land Availability Assessment) review. Whilst it is disappointing not to have been able to comment, I will now take the opportunity to make my views known.</p> <p>I have read the outline reasons using the various SA Objectives; however, I would beg you to consider some points in more detail.</p> <p>I am upset you do not seem to place much emphasis on the AONB boundaries. I am led to believe there are many migratory birds which pass over our cliffs – buildings and additional lights will certainly have an adverse effect on their wellbeing – I would hope you ensure proper consultation with the National Trust, Natural England, and RSPB before finalising this review.</p> <p>Regarding the location of the site. I appreciate this should have been visited by council staff as part of the HELAA review, however I believe they have not understood the full effect of this proposal on the community.</p> <p>This land is situated above the Drove way and Salisbury Road where previous applications have been rejected due to height restrictions. Surely this development would be higher than surrounding houses and be a complete contradiction to previous decisions.</p> <p>The site measures 20,358m2 (approx. per google earth). If we assume there will be 10 houses, this equates to 2035m2 per plot. (I appreciate there will be some roads and service areas included, therefore a small adjustment may be needed!)</p> <p>It is very difficult to understand why 10 bungalow style houses would be an economic development for this site. Obviously, there is no requirement to provide affordable housing however I fail to understand the need for such expensive style homes in this area. In addition Salisbury Road is a private road and there can be no access from that side. The only access is therefore via The Drove way.</p> <p>The site is situated at the end of what is a very narrow road with houses on both sides and only a small section serviced by a pavement. Most of the road has no pavements and, obviously, when cars are parked on the side, it becomes a single carriage road.</p> <p>The regular traffic is currently cars and delivery vans, often with congestion issues when passing the parked vehicles. On the occasions when heavy vehicles must use the road, they invariably mount the pavements or run up the grass verges.</p> <p>If this development were to go ahead there would be circa 2/3 years of large construction vehicles making their way to/from the site. Post construction the increase in cars /delivery vans using The Drove way and Sea Street (past the St Margarets primary school) would be unconscionable. Mothers and children and older people especially will be at risk. (I can assure you, from experience, the drivers do NOT take extra care!). There is no way of mitigating this risk.</p> <p>This is a residential road leading to a farmyard and has not had the benefit of regular maintenance. Without doubt the continual heavy traffic will cause undue wear and tear – will there be a budget set aside to restore the inevitable damage.</p> <p>Access to the Drove way is through St Margaret's village and up to Bayhill via Sea Street. This involves navigating a very narrow passage between some old cottages on one side and the entrance to the village primary school on the other side.</p> <p>I ask a proper traffic usage survey is instigated to assess the impact the increased traffic will have on The Drove way and Sea Street – especially at the start and end of the school day- before authorisation is given.</p> <p>Your review also considers the infrastructure at the location.</p> <p>Water and sewage pipes have not been upgraded or replaced in over 30 years and it is unlikely they will cope with the additional demand.</p> <p>The review also states there is an NHS surgery. This is a small building (in The Drove way – parking issues!) and has to service the whole of St Margarets. It currently is struggling to cope. By adding four additional building developments, I believe it will be overwhelmed – perhaps this should be checked before just noting a surgery within 800m. The above-mentioned school suffers from the same problems, I would recommend their capacity is checked before accepting the application.</p> <p>In respect of local transport, the latest bus timetable has been issued which identifies only 5 buses per day to Dover and Deal – the last one to St Margarets leaves Deal at 2.30.</p>

	In respect of your transport criteria, especially re climate change, I would suggest this is not a suitable timetable.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I believe if the prpoer consultation had been invoked with regulation 18, this project would not have been allowed. It is my belief Nelson Park St Margarets is a more appropriate area which would accomodate 10 dwellings - including affordable houses. STM010 should be deleted.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Site STM010 was not included in the Regulation 18 version of the Local Plan and was therefore not available for representations to be made during the public consultation period for this version of the plan. As such, residents and other interested parties were unable to review and comment on the proposal for site STM010 to be included in the Regulation 19 version of the Local Plan. Given this, I believe that the process for public engagement for the Local Plan is not in general accordance with the Statement of Community Involvement and, in fact, contravenes it and I would, therefore, question if it is legally compliant.</p> <p>Given the total lack of public consultation and agreements with interested parties for site SMT010, I must also claim a lack of Soundness for this aspect of the plan. As such, I would also claim that this part of the plan does not demonstrate that it is Positively prepared, Justified, Effective and Consistent with National Policy and has, therefore, not followed due process.</p> <p>Based on the above, I strongly believe that the site SMT010 should be removed from the Regulation 19 version of the DDC Local Plan.</p> <p>Below are comments I would have made if the STM010 site had been included in the Regulation 18 version of the plan:</p> <p>Salisbury Road is a private road maintained by the residents of the road . The landowner of site STM010 appears to have no legal right to create an access road and/or junction with Salisbury Road.</p> <p>The impact of the proposed development and the resultant increased traffic flow has not been fully evaluated. The narrow and congested junctions between Salisbury Road and The Drove way barely cope with the current traffic flow. Pavements are narrow or non existent.</p> <p>The height of the proposed site would impact greatly the important and sensitive conservation areas that abound.</p> <p>Any housing development on site STM010 would have significant impact on this component of the Kent Downs, AONB and the Heritage Coast and would be highly detrimental to the nationally and internationally important SSSI and SAC areas that it abuts.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am writing to give my objections on the proposal for development of site STM010 in St Margaret's at Cliffe, now submitted as part of the Regulation 19 (submission version) for the following reasons:</p> <ol style="list-style-type: none"> 1 Site STM010 was included in the Regulation 18 consultation version of the Draft Dover District Local Plan but was coloured orange i.e.: it was considered but not selected as a suitable site for development and publicly posted as refused by the LPA prior to the closure date of 17th March 2021. The day before the end of the consultation period a new proposal was submitted and site STM010 was suddenly included. The status then changed from orange to green. The Parish council and local residents had no idea of this late submission until Regulation 19 was released. Therefore it is my believe that local residents were misinformed and denied their right of expression. Also I can't see any changes to services or road layout etc... that could have made a significant justification to include site STM010 in the Regulation 19. 2 The site is in open countryside and lies within the boundaries of the Kent Downs Area of Outstanding Natural Beauty (AONB). AONBs are entitled to extra protection from inappropriate development to preserve their beauty for everyone to enjoy. The site is very close to several important habitats for wildlife with highly protected status, and borders the National Trust land at Bockell Hill. Rare birds have been sighted; including hen harrier, peregrine falcons and shrike. It is also an important buffer between these sensitive habitats and the residential areas of the Bay. A housing development would severely damage that protection. 3 The site is the highest point in the surroundings, and a housing development will have a significant negative effect on the aesthetic of the AONB. Furthermore light pollution will severely affect the visual beauty and amenity of the area and be in direct conflict with the "dark skies policy" of the local plan. Previous developments along this ridge have been height restricted; in fact the last two houses at the end of the Drove way adjoining the site have had to excavate several meters deep as the roof line could not exceed neighbouring houses. The ground level of the proposed site is at least 5 meters higher than the ground level of the surrounding properties. As such the houses would be at least 11 to 12 meters higher and severely impact on access to light as well as privacy as the new properties would have direct line of site into the opposite houses. It has public footpaths running around three of its boundaries, and these are well-used and much valued by residents and visiting walkers. The views from the site of the Dover Patrol Memorial round to the South Foreland lighthouse and over large areas of surrounding countryside and coast are unique, and should be protected from being blocked by development. 4 The traffic along the Drove way is already a huge issue, being a "cul de sac" and the only access to Bockhill farm with the associated problem of being used by large, wide farm vehicles which frequently need to mount the pavement to be able to drive through. Several

	<p>other roads along the Droveaway flow into the Droveaway with the only exit point into the village being Sea Street. Only the first part of the Droveaway benefits from pavement and as the road is already narrow in places vehicles are often parked on the pedestrian pathway. The increased traffic resulting from both the construction of the houses and their occupation will have a major adverse impact on all existing residents all the way to the village high street which is also very narrow and only suitable for one vehicle at a time. The only access to the site will be along the Droveaway, as Salisbury Road is a private road and under no circumstances will access be granted. Heavy construction traffic will be a danger to the many pedestrians and schoolchildren who use this road as some sections of Sea Street have no footpath at all.</p> <p>5 Amenities in the village are poor. There is no provision for new facilities such as a proper doctor's surgery with adequate car parking or a dental practice. Bus routes have been reduced or completely axed, which has contributed to more traffic during school peak times in the morning and afternoon. There are no parking facilities or drop of zones for parents ferrying their children to and from school, consequently Sea Street becomes completely blocked during peak times. There is no bus service to the train station and there is no bus service on a Sunday. There is one local shop which stocks bare essentials, hence a car is indispensable. Subsequently we experience already high levels of traffic and congestion in the village. The poor infrastructure has not benefitted from development in the last 100 years was never designed to accommodate the level of traffic we now experience let alone heavy construction traffic in the future.</p> <p>There might be a need for more housing in the Dover District; however there are many more suitable sites available. The biggest need is for affordable housing and this site, with a maximum of 10 executive houses proposed, is not going to make any meaningful contribution to that need or to Dover District Council's housing targets generally. Dover District Council confirmed publically at their council meeting on the 12th October 2022 that there were 17 village sites, in total, for inclusion in the Local Plan.</p> <p>The proposed plan will not bring anything to the local village community in terms of improved infrastructure, better services and or social amenities but on the contrary will be detrimental to the community and the visitors alike who are currently enjoying this popular area of outstanding natural beauty. Therefore I see no reason to support this development.</p> <p>In my view this development plan does not meet any of the criteria in the Soundness test, be it positively prepared, justified, effective and consistent with national policy. I have illustrated in the points above why I believe this plan is not deliverable and should be seriously scrutinised by the inspector.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>That the site STM010 is deleted from the local plan and reinstated to its original status</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP40, STM010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I believe SAP40 STM010 is not legally compliant as we were not given an opportunity to object at Regulation 18 stage. I also believe it is not legally compliant as the area is in the Kent Downs Area of Outstanding Natural Beauty. This area has been designated as one which should be preserved for future generations. It sits next to the Dover Patrol Memorial and is a high point so clearly visible next to the protected White Cliffs. Any building on this land would infringe the rules of the AONB and this valuable special heritage site would be compromised.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	To make it legally compliant you would need to go back to Regulation 18 stage and offer chances for comment at that point - I don't know if you are able to do this but if you cannot, then you cannot make it legally compliant.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>1. I do not believe this proposal has been positively prepared in that it does not seek to meet Dover District 's objectively assessed needs.</p> <p>One of the assessed needs is to increase the prosperity of the District and this aspect of the plan will not achieve that. The only people who would have their prosperity increased by this proposal are the landowner and the property developers.</p> <p>2. The plan does not take into account the local infrastructure and its incapacity to satisfy any further expansion.</p> <p>The permanent increase in traffic resulting from the construction of the houses, as well as increase due to heavy construction traffic, will have significant adverse impacts on all existing residents. Because Salisbury road is private, access to the site is likely to be along The Droeway Rd ,which is narrow in places and can become extremely congested- particularly at the Sea Street end.</p> <p>Heavy construction traffic will damage the road surface and will be a danger to the many pedestrians who use this road.</p> <p>The village of St.Margaret's is accessed by a single road, which is already congested and can be difficult to negotiate. The plan does not propose any improvements to this local infrastructure to accommodate the increased traffic that would result from adoption of this proposal.</p> <p>3. The plan does not take into account the sustainability of the local environment.</p> <p>The proposed site is in open countryside , lying within the boundaries of the Kent Downs Area of Outstanding Natural Beauty. The site is very close to several important habitats for wildlife with high protected status and is adjacent to the National Trust land at Bockell Hill. The site is an important buffer between these sensitive habitats and the existing residential areas of the Bay, and a housing development would severely damage that protection.</p> <p>The proposed site is the highest point in the area and any housing development there will severely affect beauty of the immediate and surrounding areas. The views from the proposed site extend eastward to Ramsgate and beyond to the Dover Patrol Memorial and West to The South Foreland lighthouse. There views are unique and should be protected from being blocked by development. The proposal submitted by the Lander Group offers no solution to this.</p> <p>4. Legal Compliance is uncertain.</p>

	I understand that the inclusion of this site as being suitable for immediate development was made at the latest possible stage in the previous iteration of the local plan process and I further believe that doing so DDC made procedural mistakes in that the legally required public consultation was not carried out. This is particularly unfair, given the significant impact this proposed development would have on local residents who have not therefore had the chance to make our views known until this last stage. I also question the further exploitation of this site should initial approval for its development be granted. Local residents are well aware that it has been previously, and frequently suggested that as many as 72 houses could be built on the field and, therefore, this proposal very much represents the thin end of a wedge.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Perhaps not surprisingly, the simple solution to the issues cited above is to abandon this proposal of development of the land between The Drove way and Salisbury Road and, indeed, any further development of the village of ST.Margaret's .
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Given the importance of my objections to the proposed development, I do not consider it sufficient to leave this representation to those who do not live in the village nor who would be directly impacted by it. It there must be direct and personal representation of the villagers at the proceedings.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	4.253 Policy Number SAP STM010 at St Margaret's-at-Cliffe
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>1. Site STM010 is in an Area of Outstanding Natural Beauty (AONB) giving onto the Heritage Coast. The proposed development would be an undesirable intrusion into the open countryside in this exposed location. The proposal would have an adverse effect on the natural beauty and landscape character of the area. It would also adversely affect the scenic beauty of the area. The White Cliffs are renowned worldwide and attract many overseas visitors, housing nearby would be a blot on the landscape and a huge shame.</p> <p>2. This field acts as a buffer between housing on the Drove way and Salisbury Road and the National Trust's White Cliffs countryside property Bockell Hill. The adjoining meadow, with its chalk downland wild flowers, is an amazing habitat, beneficial to many species of insects.</p> <p>3. There are footpaths on 3 sides of this field, which are used daily by both locals and visitors: Public Footpath number ER26 on 2 sides of the field and the Frontline Britain Trail on the third. We learned the value (to our physical as well as mental health) of walking in the countryside during the COVID pandemic and do not want housing to spoil this site.</p> <p>4. The ground is much higher in this field (probable ancient burial ground) than the surrounding land so housing on the mound would be extremely prominent and would destroy the quality of the open countryside here with its views out towards the Dover Patrol Monument and the sea. It would also be a source of light pollution.</p> <p>5. Road traffic/safety: On-road parking, by residents, patients attending the doctor's surgery and clients of the bar/café in the first 100 meters of the Drove way between Sea Street and the junction to Salisbury Road, means one relies on the courtesy of other drivers to slalom along it. As the road is not wide, one has to mount the pavement when there is a heavy/wide vehicle.</p> <p>6. In 2005 outline application DOV/05/1146 for a dwelling on the paddock STM011 (next to STM010) was refused and went unsuccessfully to Appeal in 2006. This was a smaller field and now in 2022 DDC should be even more aware of our environmental and ecological concerns. Therefore I feel that STM010 should be withdrawn from the Local Plan as totally unsuitable.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	AONBs should not have housing developments built on them. There is no justification for it.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>It looks as though due process has not been followed and that there have been procedural and legal flaws with regard to STM010 that would indicate the plan should be withdrawn.</p> <p>1. The inclusion of STM010 doesn't meet the soundness tests in the NPPF as set out in the submission.</p> <p>1. Breach of ECHR Article 10. A submission was made by the Landowner at the very last minute. Others e.g St. Margaret's at Cliffe Parish Council were unaware of this submission due to the last minute approach taken, local communities subsequently bypassed.</p> <p>2 Breach of ECHR Article 1 Protocol 1. The right to own property at St. Margaret's at Cliffe a quiet area of AONB is known for it's well-being, and tranquillity. That is why there are very few houses there - it is being protected for the nation. It is not something to be sold and developed speculatively.</p> <p>3. Non-compliance with duty to co-operate as indicated above.</p> <p>1. Not in compliance with present local development scheme and DDC's planning decisions in Council that have arisen in the last 10 years. Therefore there is a disconnect.</p> <p>1. Sustainability irregularities. Caveats were established some time ago to recognise barriers to development by the LPA. There is no suitable access by road to the site on either road.</p> <p>1. Unsafe for residents. The village of St. Margaret's at Cliffe is already a bottleneck, it is dangerous, and narrow road passing a school and a home for protected folk as well as local residents. Additional traffic in the village is not sensible. It is also unsafe in The Droveaway, as the Doctor's surgery is busy and parking along the road is difficult now. Additionally the junction of The Droveaway and Salisbury Road is not easy to negotiate now, let alone with additional traffic.</p> <p>The planned 10 houses within the AONB are a major development and would be detrimental to the AONB. The land is also adjacent to the National Trust and the Dover Patrol Monument - which should be respected and visible.</p> <p>The ground level of the proposed site is more than 5 metres higher than the level of the properties opposite the site on Salisbury Road. Subsequently those houses would lose privacy and light. Also the Landscape Sensitivity Assessment of the proposed developments sites FINAL REPORT J21 page 139 states that any development should also be one storey to minimise visual impact. This is significant.</p> <p>DDC will be aware of the number of Saxon Burial sites previously identified on the Droveaway and Salisbury Road. As the chosen site is at the highest point it is likely there will be a concentration of the Saxon sites which will be of great archaeological value and significance.</p>

	Lastly The White Cliffs area including this location is know for protecting the English coast from marauders. By inviting additional properties to be built in this particular location we may be undermining our security.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Remove STM010 from the Local Plan.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	STM010 in Policy SAP40 of the draft local plan
2 - Do you consider this part of the Plan sound?	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I believe the inclusion of this site in the plan to be unjustified and inappropriate for a number of reasons which I will set out below.</p> <p>The site was not included in the original regulation 18 document which would have allowed for appropriate consultation instead it was, I understand, submitted on the last day of the regulation 18 document and so regulation 19 is the first time I, as a member of the public, have had an opportunity to comment. I also understand no local resident nor the Parish Council were aware of the sites inclusion until the regulation 19 document was published.</p> <p>The HELAA suitability assessment for STM010 clearly stated it could only be taken forward if STM011 was also included. The latter is not available as the owners have always stated and I am aware they are also confirming this in their submission.</p> <p>I also consider the site unsuitable as it does not "focus new development at accessible and sustainable locations which can utilise existing infrastructure, facilities and service nor does it "ensure a range of housing tenures, types and sizes ...to meet the needs of the local community". The site is located a mostly single lane road which already struggles to accommodate the traffic for the existing housing and working farm located at the end. The houses are likely to be substantial in size and cost given the premium location (which I will also discuss further down) with panoramic views out to sea. A quick check with local agents will tell you we have a large number of substantial houses available for purchase in the area, however, what is needed is 2-3 bedroom family homes with good access to primary NHS services (doctors/dentists) and education. Considering the local doctors practice is no longer taking on patients, there isn't a local NHS dentist that I have managed to find. The bus services from the Village to attend Goodwin Academy in Deal have been withdrawn and the services to the schools in Dover are incredibly unreliable, let alone the lack of services for non school traffic to Deal / Dover for residents wishing to work in the local towns. One village resident is having to resign from her job in Deal as the last bus leaves the town returning to St Margarets at 1400. I don't consider the location sustainable at all.</p> <p>In terms of the national planning policy framework I would also challenge the inclusion of this site. Firstly let me just note the location of the site which is within, and not adjacent as the Regulation 19 Draft plan states, the AONB and Heritage Coast. Secondly the topography of this site means it is much higher than surrounding land and any properties built on it would therefore be significantly higher than the existing housing which would not only impact the privacy of surrounding houses but also impact the views of and from the AONB and the Heritage Coast. Any so called screening which would inevitably be suggested to lessen the impact of these properties would have a two fold impact, I suspect one would be of significant interest to the developers, and that is it would block the views from the Dover Patrol to the South Foreland Lighthouse from these homes which would likely significantly reduce and planned market price, but also obstruct the views from locals and tourists who regularly come to the area to admire our amazing coastline and walk the fields with its rare vegetation. I understand other sites where development was considered to have an unacceptable impact on the AONB due to the prominence of the site in the landscape were rejected and believe this should also be the case here if a member of DDC was to visit the site to understand the statements made above. This would then reflect the 'careful stewardship of [the areas] world class landscapes, thriving natural environments and wealth of historic sites' which the council prides itself on. Nothing about any potential development on this site would contribute positively to the existing character of the area. Remember this section of the cliff is also part of the international sites noted in the council's own plan.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	As the inclusion of STM010 does not comply in the first instance with the primary requirement of conserving and enhancing landscape and scenic beauty I would like this site removed from the plan.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Houses would be unacceptable and out of character in such a beautiful spot. This is an Area of Outstanding Natural Beauty (AONB) and should remain so. This development proposal does not enhance the natural beauty of the AONB so should not be permitted. This Kent Downs AONB is of national importance and its character and qualities should be protected for everyone to enjoy. Previous Planning Decisions: One dwelling was refused in 2005 (Appication DOV/05/1146) on the paddock (STM011) next to this field (STM010).
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SAP 40 St Margarets STM 010 Salisbury Rd/The Droveaway:</p> <p>The site lies wholly with the AONB boundary and Heritage Coast designation. It is therefore imperative that if development of the site takes place, it would meet the purpose of AONB designation, i.e. the conservation and enhancement of natural beauty.</p> <p>In respect of landscape character, the land comprises an arable field with a small, wooded copse in its south-eastern corner and has vegetative enclosure along its boundaries with Salisbury Road and The Droveaway. While not containing any particularly notable landscape features, the site is rural in character and associates more closely with its surrounding rural environs than the housing associated with St Margarets to the south. Its rural character provides a green 'finger' into the settlement, softening the village's built up edge and the sense of transition between the village and the undeveloped countryside beyond.</p> <p>Notwithstanding these characteristics, the site is surrounded on three sides by existing built form, with a further dwelling also sited against the fourth boundary, although the majority of this northern boundary adjoins rural Open Access land. As stated above, it also has a relatively strong</p>

enclosure in landscape terms as a result of vegetation along much of its boundaries with residential development beyond. In these respects, the site could be regarded as being an appropriate and logical extension to the village and acceptable in landscape terms.

However, this fails to take into account a key aspect of the site; its topography. The site comprises a mound of higher ground that rises significantly above the surrounding land levels (at least 4 metres), upto a high point of 90m AOD, which is by far the highest point within this part of St Margarets and some 5 metres higher than the ground level of the War Memorial monument sited north east of the proposed allocation.

As such, the AONB Unit has concerns that a residential development in this location could introduce built form into the landscape that is much more prominent in views from the surrounding AONB than the existing built form associated with St Margarets, which could be visually damaging to this part of the Kent Downs AONB. This would include from the north and north-east where there is an extensive and well used public rights of way network, including the England Coast Path, a National Trail, along with several areas of Open Access land. It may also introduce housing development into views where there currently are none from the AONB to the south. The introduction of built form in this location could also impact on views of important historic features in the landscape in this location, such as the Dover Patrol Memorial monument and lighthouse at South Foreland, both iconic features that are located within the Kent Downs landscape. While there is no detail provided of the proposals at this stage, our concerns are exacerbated by development being likely to comprise larger size houses by virtue of the low density that is proposed.

Views to, from and within the AONB are an integral part of the scenic beauty of the designated landscape and one of its 'special qualities'. In other words, they are a key attribute on which the priorities for the area's conservation, enhancement and management should be based. The views out from the chalk scarp of the North Downs were a key reason for the designation of the AONB. This feature has remained critical to its value and to public enjoyment ever since. Section 1.2. of the AONB Management Plan, on 'Special characteristics and qualities' states: "The Kent Downs dramatic and diverse topography is based on underlying geology. Key features comprise: impressive south-facing steep slopes (scarps) of chalk and greensand....Breath-taking, long-distance panoramas are offered, often across open countryside, estuaries, the sea from the scarp, cliffs and plateaux..." The visual sensitivities of the coastal area between Dover and Kingsdown are specifically noted in the Landscape Character Assessment Update of the Kent Downs AONB, where at para. 8.2.6 it is stated '*The sparse tree cover and the rolling, open countryside allow coastal landmarks such as Dover Castle, South Foreland Lighthouse and the Dover Patrol Memorial to stand out. It also results in an open landscape of uncluttered skylines which is very vulnerable to any form of development.*' Principle SD 8 of the AONB Management Plans requires 'proposals, projects and programmes do not negatively impact on the distinctive landform, landscape character, special characteristics and qualities, the setting and views to and from the Kent Downs AONB.'

The potential impacts on the AONB landscape are acknowledged in the evidence base for the Local Plan with the Sustainability Appraisal acknowledging that '*The site has been judged by Council officers to have the potential to moderately affect the District's landscapes, townscapes or seascape.*' Further detail is provided in the HLAA Landscape Assessment DDC Landscape Assessment where it is stated '*The site lies within the AONB and close to the Heritage Coast. It abuts National Trust land to the NE. The site is on a crest of a hill and despite the screening, would be visible from a long distance. The site is bounded by footpath ER26 along the SW, the vehicular cul-de-sacs of The Drove way to the NW, Salisbury Road to the SE and by National Trust land to the NE, providing a wide range of recreational walking opportunities. The site is within the 'restore and conserve' area of the Green Infrastructure network, reflecting the real opportunities for Green Infrastructure. Any development on the site would need to be low density and to conform with surrounding street pattern, with generous landscaping required to mitigate the impact on the wider landscape.*' The site is given a yellow Rag Rating and the commentary advises '*The development of this site would have an impact on the landscape and further assessment is required to demonstrate whether this can be mitigated.*'

No such further assessment appears to have been carried out. Given the sensitivities of the site, we consider an initial LVIA or landscape capacity study is required to help ascertain whether a development could be introduced onto the site while conserving key views and protecting the scenic beauty of the Kent Downs AONB. Without this, the Kent Downs AONB Unit considers that the current evidence base does not appear to support the allocation of this site in landscape terms and the policy is considered Unsound, as it has not been demonstrated that the allocation is consistent with national planning policy, and in particular paragraphs 174, 175 and 176 of the NPPF that seek to protect and enhance valued landscapes, allocate land with the least environmental value and give great weight to conserving and enhancing AONBs.

SAP 40 St Margarets STM 006 Land at New Townsend Farm:

As recognised in the policy, the site lies within the Kent Downs AONB. The site is relatively well contained within the wider landscape and relates well to the existing settlement, where the settlement pattern includes linear development extending eastwards from Station Road and the High Street. The proposed requirements included in site specific requirements to help manage impacts on the AONB are supported.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To ensure the potential impacts of STM010 on the Kent Downs AONB are appropriately considered.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP40 STM010 This site is designated AONB and in an elevated position, the highest point in the locale. It is in fact it is between 4 and 7 metres higher over its area than the ground the Dover Patrol Monument 180 metres away stands on, a noted landmark sited to be seen from miles around. Housing here of even average height will be visibly dominant from much of the surrounding area.

	<p>It is also directly adjacent to National Trust's Bockell Hill, and development will totally change the natural feel and character of this tranquil place, much enjoyed by both visitors and locals, with views of housing replacing the current farmland vistas from every main path through it from the Monument. The habitat it provides for wildlife is very likely to be negatively affected by accompanying noise and particularly light pollution.</p> <p>The current proposal for 10 houses, presumably therefore large executive style properties, will make little contribution to Dover District's overall housing requirement, none at all where the greatest housing needs for lie, and seems very inadequate justification for developing AONB land at one of the highest points and most visited areas in the locale.</p> <p>Notes accompanying the proposed development acknowledge the importance of providing "a landscape buffer" to protect the surrounding landscape. This is the very role the undeveloped farmland-field site currently fulfills, and on enough scale to make it properly effective in providing a suitably gentle transition between existing village housing and landscape beyond, preserving open views across it in the process. Once built on, the idea that space will remain for a protective landscape buffer to be reinstated on any meaningful scale is entirely unconvincing.</p> <p>For these reasons I believe development here is unjustified, and that this site should be removed from the allocations list.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The NPPF sets out in Government's planning policies retaining a presumption in favour of sustainable development in accordance with the development plan, unless material considerations indicate otherwise. On a number of counts I consider the proposal for 10 houses along The Droveaway inappropriate which i advise as follows.</p> <p>Due to the significant increase in size, scale and mass these houses would have an overbearing structure to the surrounding area. Previous planning for "Franconia" now 78 and 80 required a height line no higher and in alignment to its neighbours. For this field to be similar would require excavation of at least four meters before the laying of foundations, otherwise their sheer size and volume would overlook all surrounding properties in any compass direction.</p> <p>Properties already built in The Droveaway in the last three years include three 2/3 terrace houses and a pair of 3/4 bedroom houses (now all rented). Two newly built 5 bedroom executive homes are presently on the market. All these properties have failed to sell in the last 8 months (in outstandingly good market conditions) suggesting demand for such houses is not high and a further development would be inappropriate within this residential area.</p> <p>The prposal fails to protect or enhance the character and appearance of the area, which is contrary to local and national planning policy.</p> <p>Finally, whilst highways may have the last say with regard to traffic congestion, The Droveaway is a no through road providing access to the local farm. The road where planning is proposed narrows and already struggles with any parked cars on the road. This will become significantly worse where households of 2/3 cars will increase congestion and block access for large farm vehicles.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP40, STM010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We wish to object to the proposed development of STM010, the field at the end of The Drove way, and we feel that its inclusion in the Local Plan is unsound as there has been insufficient thought and consideration applied to it.</p> <p>We have lived here for 16 years, and although the village is far busier now than it was 16 years ago its infrastructure has not at all kept pace with that expansion.</p> <ul style="list-style-type: none"> • The doctor's surgery is already at capacity and could not cope with the inclusion of further patients from all the new housing proposed in the village • The school in the village is already full and cannot take any further pupils. • Traffic along The Drove way is already very heavy and simply passing along the road requires "negotiation" with oncoming traffic, frequently involving reversing along what is essentially a single track road. • In addition to passenger traffic, The Drove way is the only route available to the farm traffic - not only the frequent tractor movements, but also far larger items of equipment which have to drive along the pavements to get through. This is a risk to pedestrians as well as causing damage to the road/pavement structure. Any increase in passenger traffic (such as would be caused by increased housing) would only make this issue worse. • As it is, The Drove way is plagued by potholes and an uneven road surface caused by multiple "patchwork" repairs by local service providers (BT, electricity, gas, water) and the local authority has done nothing to rectify this. • Salisbury Road is a private road and will not grant access to any future construction traffic needed for site STM010. The only route for all the construction traffic therefore would be along The Drove way, increasing the risks to vehicular and pedestrian traffic and further damaging the roadway and pavements. • The site is within the Area of Outstanding Natural Beauty. AONBs are meant to be entitled to extra protection from inappropriate development so as to preserve their beauty for all. The site is also adjacent to the National Trust land at Bockell Hill, placing this natural wildlife habitat at increased risk.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	None. The only way in which this proposal could become sound would be to remove it from consideration entirely.

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 40 .STM010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible.	I answered "No" to section 2 and 5 and ticked all the boxes in section 3 without fully understanding the the questions but felt "No" was a more fitting answer than "Yes" (Section 3 . I Believe the plan is: Not positively prepared. Not Justified. Not Effective. Not consistent with National Policy.) Section 4 has been answered as "Not Applicable" as again I do not fully understand the jargon and full definition .I am obviously not a solicitor. (Poor start)

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

Please read on to hear my justification for my answers.

I wish to strongly object to the Planning Application to build 10 properties on STM010. and wish the site to be removed from the Local Plan.

1. My understanding is that the Application was submitted on the last day of the previous stage of submissions (Regulation 18) This did not allow for any consultation for local residents nor the St. Margaret's Parish Council , Natural England , The National Trust and Kent Downs AONB.

(Legal Compliance) "This includes public participation in the Local Plan "

The Application has been processed and moved to the next stage. Regulation 19. Is this application legally compliant? The above ; I feel undermines the Plans Soundness.

2. The site is within the boundaries of the Kent Downs Area of Outstanding Beauty and borders National Trust land. Currently the agricultural field acts as a buffer zone to this highly sensitive and precious Chalk Downs with its unique flora and fauna. These surrounding areas make St Margaret's a very special place for its residents and for the many visitors who walk in these areas to experience its stunning beauty. Development of STM010 would have a greatly detrimental effect to these highly sensitive areas.

3. The site is the highest point in the area. Any buildings would have a massive visual effect on the horizon and the surrounding area however much screening was put in place to try to mask it. Buildings and screening would take away sunlight and cast a huge shadow over the existing adjacent properties in The Droveaway. Even single storey properties would have a similar effect due to being greatly elevated on the raised ground. With the additional height the new properties will cause 'overlooking' and privacy problems, looking directly into existing Droveaway properties, bedrooms, living rooms etc.

4. While talking of high ground. St. Margaret.s has much evidence of Saxon past life and death. Many graves and sacred burial sites have been found in the area ,(The Droveaway and Salisbury Road) and consensus is the highest ground,(STM010) would have the highest concentration such burial sites

5. On looking at the Title Deeds of the site (STM010) it shows that the area is " land locked " on three sides. Both The Droveaway and Salisbury Road have a boundary verge/bank of grass/scrub/trees and a public footpath defining the westerly boundary. If access at all could be obtained it would likely be on The Droveaway. This road, like Salisbury Road is narrow in many places with many parked cars reducing the width to a single track in many places. Heavy construction vehicles and delivery lorries would cause damage and havoc to the roads resident users during a lengthy construction period. Not to mention vital access to emergency services. Any junction point from area STM010 to The Droveaway could be very problematic as it is potentially entering a single lane road. With the new extra traffic the situation becomes worse at the Sea Street junction. I have spent countless times waiting to pass parked school vehicles only to wait for jammed lorries and buses on the village roads. Additional traffic flow to and from STM010 will only exacerbate the situation.

6. I have been extremely fortunate to live in this wonderful and unique village for 50 years. I have seen many developments of individual houses -large gardens divided up and sometimes an extra property squeezed in. Not drastic changes. This development of 10 properties is a comparatively huge change to St. Margaret's Bay, particularly in such a sensitive area. Surely if this development is allowed , other applications will follow. The proverbial thin end of the wedge .

. 7. I believe the Dover District Council denied an application in 2015, then referred to as SAD28 for the same site. Circumstances are exactly the same now as then.....Nothing has changed . Please take site STM010 off the list of potential building sites. The Government want " affordable " housing. These 10 properties will not be "affordable."

8. As a resident of Salisbury Road I am a member of Salisbury Road Association, St Margarets Bay. A response to the Regulation 19 Plan has been submitted on behalf of the residence. This is a precise and detailed reply and I and Mrs. Peta Quiddington (My wife) concur with it.

Thank you for reading through my objection and hope you agree to delete STM010

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I answered "No" in section 8 not because I feel it is not important. Im passionate about stopping this plan,but anticipate the numbers allowed to attend will be limited and going will be taking the place of someone who is more articulate,effective and knowledgeable.

1 - Which Part of the Local Plan does this comment relate to?Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Page 188 SAP40 St Margarets-at-Cliffe Small Housing Sites STM101 (formerly SAD 28)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	1. STM010 (the "Site") was refused for inclusion in the 2012 Local Plan in 2012 following a qualitative assessment taking account of relevant Community Involvement. That assessment (copy attached) records the reasons why the Site should not be developed. As DDC records in its letter of December 1 2022 under cover of which it provided the 2012 assessment in response to a FOI Request, it has no further substantive documents in respect of the Site; i.e., it has no objective independent evidence to contradict the ongoing validity of the assessment made in 2012. Between 2012 and 2022 there has been no change in any of the factors which led to the assessment or in any other relevant circumstance. The only new influence has been the representation (the "Submission") on behalf of the owner of the Site, submitted to DDC on 16 March 2021, the day before consultation on Regulation 18 closed. This Submission was submitted by email and I suggest it is relevant to consider the timing of the email. It might be concluded that the professionally advised and supported Submission was deliberately timed to preclude consultation and Community Involvement and to achieve the result of having the Site included as suitable for development at Regulation 18 stage for housing without proper legal compliance by DDC. If the Submission had been provided to DDC in a timely fashion many of the issues in respect of consultation and challenge would have been dealt with at the time of Regulation 18 consultation, and the obligations of DDC could have been observed by the Council. "Sneaking" the application in, knowing of the 2012 objections and the very qualified and negative content of the 2015

HELAA in respect of the Site, might be seen as a tactic to preclude consultation and to achieve the illusion that the inclusion of the land as suitable for housing development was not opposed (as it undoubtedly is) by the various bodies representing Community Interests.

2. As the 16 March Submission would seem to be the only input to explain the reversal of policy in respect of inclusion of the Site as suitable for housing development between 2012 and 2022, it is appropriate to examine the accuracy of the contentions in the Submission and also the omissions of relevant facts from the Submission. Had consultation been possible at Regulation 18 stage the assumptions and assertions of the Submission masquerading as fact would have been challenged at that time rather than now being raised as a complaint that DDC has not complied with its statutory obligations in respect of legal compliance, and soundness of the plan.

(i) It is by no means certain that the Site falls within windfall development as the Submission seeks to imply; to regard it as falling within windfall development runs counter to the conclusions of the 2012 assessment. It is not supported by the 2015 HELAA.

(ii) The Site is not, as asserted, "available and deliverable", as contended in the Submission; The owner may wish it to be so but it does not in fact have access from either The Droveaway or Salisbury Road. Careful inspection of Ordinance Survey maps and the property deeds will confirm this. This fundamental failure is not remedied if STM011 is included as that plot (the owners of which have in any case stated that they have no intention of having the paddock site developed) does not include actual frontage to Salisbury Road.

(iii) The Site is not sustainably located, as the Submission contends; even if it had access to either The Droveaway or Salisbury Road, neither The Droveaway nor Salisbury Road can safely support any increase in vehicular or pedestrian traffic; the village facilities are a fifteen minute walk away, much of it on roads with no lighting or footpath. The Submission is not supported by any input from the utilities but local experience is that the gas infrastructure is at its limit. There is no evidence for the statement "Infrastructure can easily be connected to the site".

(iv) To suggest that housing on the Site would not harm the amenities of the countryside is totally at odds with the 2012 assessment and with the bulk of the comment in the 2015 HELAA and flies in the face of the facts. The 2012 assessment very specifically documents this "Any development on the land would, therefore, have a highly detrimental impact on the designated landscape."

(v) The Submission acknowledges but seeks to treat *de minimis* that the Site is immediately adjacent to an Area of Outstanding Natural Beauty and the Heritage Coast (the Submission states that it is in fact within the East Kent Area of Outstanding Natural Beauty, but seeks to reduce the impact of this by suggesting its importance is undermined by bordering ribbons of housing development - ignoring the levels of these in relation to the Site); it ignores that the Site is in an elevated position generally and in particular in relation to the "neighbouring developments", which follow the lay of the land so as not to intrude in the landscape as recorded in the Landscape Impact in the 2012 assessment. That assessment gives the lie to the totally inaccurate and unsupported assertion in the Submission that "There are no identified, insurmountable site constraints that would hinder the site coming forward for housing." The subsequent arguments in the Submission in respect of the impact of the proposed development, however 'sensitive' and low density, are fallacious, having ignored the central fact that the Site is an elevated area varying between 5 metres and 12 metres above adjacent land and any development, even single story, will not only adversely affect existing properties but will impact on the overall landscape viewed from the AONB and the Heritage Coast and in particular the Dover Patrol monument.

(vi) The Submission contains an assertion that the Site has access from The Droveaway. In fact the deeds for the Site show that not to be the case. The tenant farmer takes a tractor onto the Site using essentially a footpath as access. The Site has no access to Salisbury Road. The Submission misleadingly appends a drawing of an access road on to Salisbury Road. That drawing ignores that to achieve any access the owners of Salisbury Road would need to transfer ownership of land between the tarmac area and the edge of the Site to the developer; as the owners of the road have made clear they would not be willing to do this. Over the years since he inherited the Site the owner of the Site has by his conduct made it clear that he does not purport to be an owner of Salisbury Road. In reality the Site is not therefore "available and deliverable" as the Submission contends.

(vii) The assertion about the visibility at the junction of Salisbury Road and The Droveaway is neatly fudged in the Submission and to the extent that any actual range of visibility is offered it is not accurate. The Submission does concede that the visibility it claims "could be achieved" not that there is actually that visibility. At the point of the junction of Salisbury Road into The Droveaway The Droveaway is always a single width roadway as a result of the parking position on the north side of the road. Any vehicle travelling from Sea Road along The Droveaway is required to use the right-hand-side of the road, often from the First Light Cafe and always from Downside to the far side of the Salisbury Road junction. So to turn left out of Salisbury Road safely a driver needs visibility to the right and to the left. The realistic position given the proximity of the corner properties to the roadway is that this can only be achieved by advancing into the path of any vehicle coming from the left or the right. Regular users of the junction know not to stop close behind a vehicle attempting to turn out of Salisbury Road as often it will need to reverse swiftly to avoid a collision from approaching vehicles from the left or the right on The Droveaway, vehicles which were not visible until the car turning from Salisbury Road has advanced into the right-hand lane of The Droveaway. Vehicles supplying construction materials can only negotiate The Droveaway by mounting the pavement on the south side of The Droveaway. Smaller delivery vehicles, the drivers of which are not familiar with the issues and the local etiquette to handle the problems of access, often have to reverse considerable distances, or cause other

vehicles to have to reverse. The Submission refers to DDC HELAA as supportive of the Submission. In fact the reverse is the case. In respect of the Salisbury Road/The Drove junction HELAA says "Junction of Salisbury Road/The Drove is poor with insufficient sightlines with very limited scope for improvement. The Drove is geometrically constrained and is subject to a large amount of on street parking which reduces effective width, whilst in theory waiting restrictions could be imposed, this would have a significant impact on local parking amenity." The Submission and its Transport Dynamics appendage seeks to minimise traffic volumes and issues. Assuming any development is as the Submission indicates to be family houses the use of private cars will greatly exceed the volume predicted in the Submission, each child will need a lift to and from school or to the school bus stop, twice a day, all access to the world outside of the village involves passing the school, with the real parking issues this makes on Sea Road, and in reality through the village with its series of one-way stretches.

(viii) The Submission seeks to give credence to its reasonableness by suggesting both alternative proposals are low density. With the greatest of respect to the professional author of the Submission, that is no more than a device to get the Site into development status. Once the Site is included for development there is no guarantee to any Community Interest that the present or a subsequent owner of the Site would not make an actual application for much denser development, and DDC would be faced with a dilemma in respect of such an application particularly in respect of low cost housing. This would exacerbate the problems associated with any development of the Site, on Green Infrastructure, Landscape, etc., fully documented in the 2012 assessment and in HELAA. The issues with volume of traffic, the danger of The Drove/Sea Road junction and the congestion in the village are well recorded in both the 2012 assessment and the HELAA. They have been well illustrated in other comments which have been submitted in respect of the inclusion of this Site in Regulation 19; the issues which were seen as relevant in the past to the decision not to include the Site as suitable for development are still relevant.

(ix) Much is made in the Submission about the intention to retain the existing trees screening the Site, a statement of intention that is not borne out as being reliable by conduct to date. The wooded area to the south east of the Site has been neglected for many years and poses a hazard to the users of the public footpath. Efforts to interest the owner of the Site in giving some care to the trees and their under growth have been met with a negative response.

3. In conclusion as no representations at the Regulation 18 stage could be received and considered from the residents directly affected by the inclusion of the Site as being suitable for development, nor from the Parish Council, Natural England, the National Trust, Kent Downs AONB and other Community Interests, the inclusion of the site in the Regulation 19 version of the Dover Local Plan is not in accordance with the Statement of Community Involvement, in fact contravenes it, and is therefore not Legally Compliant. Further given the 2012 assessment and the exclusion from representation of all affected interests in the process of the inclusion of the Site as suitable for development, the Plan in respect of SMT010 is not Sound; the previous position of DDC and the known interests of Community Interests demonstrates that the Plan was not Positively Prepared, Justified, Effective or Consistent with National Policy. In short due process was not followed.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I suggest that to make the Dover Local Plan in respect of STM010 legally compliant and sound it is necessary for the steps which should have been taken at Regulation 18 stage to be conducted by DDC and that in the meantime the position in respect of the Site should revert to that determined in the 2012 assessment, which was properly conducted with due regard to the legal process in respect of consultation and objective assessment. I suggest the modification required is "In respect of STM010, previously designated SAD28, the site is not included in Local Plan as land designated for housing for the reasons specified in the assessment of the site in the 2012 assessment excluding the site from being designated for development."

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

I predict that the owner of the land will instruct his professional advisors to attend; the inspector deserves to have access to factual information with which he can assess the oral arguments advanced by those professional advisors, and although it is possible to predict some of what they may say, it is not possible to predict in total the information and argument they may seek to advance and to provide any appropriate rebuttal unless those of us with concerns about the accuracy of such arguments (as evidenced by the Regulation 18 submission) are present.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Site STM010 Policy SAP40 Reg 19 Local Plan (2022)</p> <p>This is additional to the group submission made by residents in The Droveway, St Margaret's Bay to which I am a signatory.</p> <p>This is the first practical opportunity for me to comment on the draft local plan for this site due to STM010 being removed from allocation in SAP40 Reg 18 by Dover DC before being re-allocated in Reg 19. I live within 30 meters of the site.</p> <p>The site STM010 in its present form has high natural beauty and recreational value and is worthy of its designation within the AONB. I frequently use and highly value the three footpaths that border the site and I very much appreciate and enjoy the beauty and openness of the field, for example as it gently rises from the north east corner or the view from footpath ER26 which looks across this undeveloped field to Bockell Hill and the Dover Patrol Memorial. The site is at a local high point, prominent and allowing many views which would be lost by building development. The adjoining houses in The Droveway and Salisbury Road are mostly at a lower level and screened by trees. The adjoining redevelopment at 78 and 80 The Droveway was required, for good reason, to dig into the chalk to lower the houses so that the roofline does not adversely impact STM010. This is not some forgotten corner of the AONB but widely used and appreciated by locals and visitors as the well trodden footpaths indicate. The inclusion of site STM010 for allocation as housing in SAP40 is therefore not justified due the significant loss of landscape and recreational value as described above, and particularly when compared with other housing sites outside the AONB.</p>

	<p>My experience of site StM010 is that it does feel part of the Heritage Coast within which it is included and is also distinct from the residential areas which it adjoins. It also borders and is environmentally linked to Bockell Hill where the National Trust has now advanced the management to a high level in the last few years as chalk grassland and scrub, greatly improving the flora and wildlife. This makes the maintaining of site STM010 as undeveloped land even more important and justified in land use policy for environmental sustainability. The future direction for site STM010 should be to enhance its wildlife habitat and not to compromise it with built development which would adversely impact Bockell Hill and the nearby SAC. The UK Government's stated aim is to target 30% of land for wilding/carbon capture. The inclusion of site STM010 for allocation as housing in SAP40 is therefore not justified or consistent with National Policy due to the damage and loss to the qualities which the AONB and Heritage Coast status are meant to protect, and for a site of this prominence and proximity to Bockell Hill and the SAC. In this respect it does not appear to be legally compliant.</p> <p>To quote from the assessment of the site by Dover DC in 2012 (obtained by FOI Request, the site then known as SAD28):- "Any development on the site would, therefore, have a highly detrimental impact on the designated landscape."</p> <p>The current description of the site by Dover DC in SAP40 (Reg 19, 2022) as medium to low sensitivity can only be seen as an error, along side the omission of AONB status when they first included it in SAP40 in the early stages of the current draft plan. The apparent major change of approach by Dover DC to this site within the draft plan compared to all previous approach by Dover DC has not been explained or justified and suggests lack of consistency and possible error.</p> <p>Finally, problems with road access to site STM010 are well covered in the group submission mentioned above. I wish to add that current problems with access (driving and walking) are very real for me and experienced daily, especially in the working week and school terms. To drive through the village centre and along the Drove way always involves stopping, pulling over, sometimes reversing and often waiting for blockages to resolve. It is my experience that this is getting worse. Also, to walk on long stretches of the Drove way or in the village centre where there are no pavements when cars are passing is not relaxing. To develop more housing and more car usage on this site at the end of the Drove way will add to all these traffic issues and is not sustainable, safe or compatible with sound Highways Policy. The focus for new housing should be on sites where good infrastructure is possible and not in villages with restricted historic access.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Site STM010 should be removed from the allocation as suitable for housing development in SAP40. This will then correct the mis-allocation of a site for the reasons given in 6 above.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP40 STM010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Plan is Unsound</p> <p>The proposed development of the land between The Droveaway and Salisbury Rod for the building of "executive" homes is unsound for multiple reasons and should be deleted from the overall plan.</p> <ol style="list-style-type: none"> 1. We do not believe that this proposal has been positively prepared in that it does not seek to meet the Dover Districts objectively assessed needs. There is clearly a need for more housing in the District but there are many more suitable sites available.. The biggest need is for affordable housing and this site with its proposed maximum of ten executive houses will not make any contribution to that need. One of the assessed needs is to increase the prosperity of the District and this aspect of the plan will not achieve that. The only people who will have an increase in prosperity are the current landowner (who does not live in the District, and the property developers. 2. The plan does not take into account the local infrastructure and its capacity to satisfy any further expansion. <p>The permanent increase in traffic resulting from the construction of these houses as well as the temporary (but long term) increase due to heavy traffic will have significant adverse impacts on all existing residents. Since Salisbury Road is private access to the site is likely to be only along The Droveaway. The Droveaway is a long and narrow road which only has a limited section of paving at the Sea Street end. The road is always very congested, especially at the Sea Street end, and so narrow there that large vehicles always drive on the pavement to get through. There is a constant stream of people walking in this beautiful area, but I have observed that when cars come through they often have to step into driveways in order to feel safe. The increase in traffic in this lane is potentially very dangerous. Heavy construction traffic will damage the road surface (and such pavements as there are) and will be an additional danger to the many pedestrians (not just local residents) who use this road.</p> <p>The village of St. Margarets is accessed by a single road, which is already congested and can be difficult to negotiate. The same argument applies to the 40 Houses along Reach Road (SAP38, STM003), 10 houses to the West of Townsend Farm Road (SAP39, STM007) and STM008) which will exacerbate the problem further. However, the development on the Droveaway is by far the worst issue because there is no other access road to the bay area, and all additional traffic for the bay has to go via Sea Street past the Primary School, where frequent traffic issues occur and will cause additional risk for the children. Even if the Doctors surgery could accommodate additional patients there is no parking facility in the bay to deal with this.</p>

	3. The plan does not take into account the Sustainability of the local environment. The proposed site is in open countryside, lying within the boundaries of the Kent Downs Area of Outstanding Natural Beauty. AONBs are entitled to extra protection from inappropriate development so as to protect their beauty for all to enjoy. The site is close to several very important habitats for wildlife with highly protected status and is adjacent to the National Trust Land at Bockhill. The site is an important buffer between these sensitive habitats and the existing residential areas of the Bay and a housing development would seriously damage the protection.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The simple solution to the issues cited above is to abandon this proposal of development of the land between The Drove way and Salisbury Road and, indeed, any further development of the village of St. Margarets.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	There must be direct and personal representation of villagers, and especially those living in roads concerned, at the oral proceedings.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	STM010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I understand that Site STM010 was not included in the Regulation 18 version of the Local Plan and was therefore not available for representation to be made during the public consultation period for this version of the plan.</p> <p>I therefore consider that STM010 should be removed from the Regulation 19 version of the Local Plan.</p> <p>On the basis I understand that we did not have the opportunity to make representations on the Regulation 18 Local Plan, I would make the following points:</p> <p>1) Private Road. Salisbury Road is a private road with no existing access to the site. I understand the landowner has not contributed to the upkeep of the road (consistent with it not having any access from the road). I question how, from a legal perspective, the landowner intends to create an access road with access for multiple houses and construction traffic when taking into account the above?</p> <p>2) Access Issues. The purported potential "access" to the site from Salisbury Road is from a narrow, privately maintained, road with cars parked at various points in the vicinity of the proposed access way. Whilst the road is reasonably well maintained, it is not up to the standard of an adopted highway. Equally, the width and standard of the Droveaway at the other suggested access points is not suitable for access for a multi-building site. In the consideration of the site for the 2012 Local Plan it was noted in the SHLAA Score comments that "the two roads that lead to the site appear to be unadopted and not well maintained. There is no access on to the site". It concludes "access to the site is unsuitable on unadopted roads". No facts have changed since the 2012 consideration and therefore the same conclusions should be drawn now.</p> <p>3) Ground level - the proposed site is somewhat higher than the surrounding road and houses - any proposed development will overshadow and dominate the existing properties on Salisbury Road and those abutting the site from the Droveaway. See comments below.</p> <p>4) AONB - the site is within the AONB, in close proximity to the Heritage Coast, National Trust land and an SSSI. It is also in very close proximity to the Dover Patrol Memorial. Why should this land be included in the Local Plan when other, less sensitive areas, are no doubt available for development? It would seem that the site was included in the AONB to provide protection from future development. I understand that the site was removed from consideration in the 2012 Local Plan as it was considered that "any development on the site would, therefore, have a highly detrimental impact on the designated landscape".</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Remove STM010 from the Local Plan.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 40 STM 006 AND STM 010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SAP 40 St Margarets STM 010 Salisbury Rd/The Droveaway:</p> <p>The site lies wholly with the AONB boundary and Heritage Coast designation. It is therefore imperative that if development of the site takes place, it would meet the purpose of AONB designation, i.e. the conservation and enhancement of natural beauty.</p> <p>In respect of landscape character, the land comprises an arable field with a small, wooded copse in its south-eastern corner and has vegetative enclosure along its boundaries with Salisbury Road and The Droveaway. While not containing any particularly notable landscape features, the site is rural in character and associates more closely with its surrounding rural environs than the housing associated with St Margarets to the south. Its rural character provides a green 'finger' into the settlement, softening the village's built up edge and the sense of transition between the village and the undeveloped countryside beyond.</p> <p>Notwithstanding these characteristics, the site is surrounded on three sides by existing built form, with a further dwelling also sited against the fourth boundary, although the majority of this northern boundary adjoins rural Open Access land. As stated above, it also has a relatively strong enclosure in landscape terms as a result of vegetation along much of its boundaries with residential development beyond. In these respects, the site could be regarded as being an appropriate and logical extension to the village and acceptable in landscape terms.</p> <p>However, this fails to take into account a key aspect of the site; its topography. The site comprises a mound of higher ground that rises significantly above the surrounding land levels (at least 4 metres), upto a high point of 90m AOD, which is by far the highest point within this part of St Margarets and some 5 metres higher than the ground level of the War Memorial monument sited north east of the proposed allocation.</p> <p>As such, the AONB Unit has concerns that a residential development in this location could introduce built form into the landscape that is much more prominent in views from the surrounding AONB than the existing built form associated with St Margarets, which could be visually damaging to this part of the Kent Downs AONB. This would include from the north and north-east where there is an extensive and well used public rights of way network, including the England Coast Path, a National Trail, along with several areas of Open Access land. It may also introduce housing development into views where there currently are none from the AONB to the south. The introduction of built form in this location could also impact on views of important historic features in the landscape in this location, such as the Dover Patrol Memorial monument and lighthouse at South Foreland, both iconic features that are located within the Kent Downs landscape. While there is no detail provided of the proposals at this stage, our concerns are exacerbated by development being likely to comprise larger size houses by virtue of the low density that is proposed.</p>

Views to, from and within the AONB are an integral part of the scenic beauty of the designated landscape and one of its 'special qualities'. In other words, they are a key attribute on which the priorities for the area's conservation, enhancement and management should be based. The views out from the chalk scarp of the North Downs were a key reason for the designation of the AONB. This feature has remained critical to its value and to public enjoyment ever since. Section 1.2. of the AONB Management Plan, on 'Special characteristics and qualities' states: "The Kent Downs dramatic and diverse topography is based on underlying geology. Key features comprise: impressive south-facing steep slopes (scarps) of chalk and greensand...Breath-taking, long-distance panoramas are offered, often across open countryside, estuaries, the sea from the scarp, cliffs and plateaux..." The visual sensitivities of the coastal area between Dover and Kingsdown are specifically noted in the Landscape Character Assessment Update of the Kent Downs AONB, where at para. 8.2.6 it is stated '*The sparse tree cover and the rolling, open countryside allow coastal landmarks such as Dover Castle, South Foreland Lighthouse and the Dover Patrol Memorial to stand out. It also results in an open landscape of uncluttered skylines which is very vulnerable to any form of development*'. Principle SD 8 of the AONB Management Plans requires 'proposals, projects and programmes do not negatively impact on the distinctive landform, landscape character, special characteristics and qualities, the setting and views to and from the Kent Downs AONB.'

The potential impacts on the AONB landscape are acknowledged in the evidence base for the Local Plan with the Sustainability Appraisal acknowledging that '*The site has been judged by Council officers to have the potential to moderately affect the District's landscapes, townscapes or seascape*'. Further detail is provided in the HLAA Landscape Assessment DDC Landscape Assessment where it is stated '*The site lies within the AONB and close to the Heritage Coast. It abuts National Trust land to the NE. The site is on a crest of a hill and despite the screening, would be visible from a long distance. The site is bounded by footpath ER26 along the SW, the vehicular cul-de-sacs of The Droveaway to the NW, Salisbury Road to the SE and by National Trust land to the NE, providing a wide range of recreational walking opportunities. The site is within the 'restore and conserve' area of the Green Infrastructure network, reflecting the real opportunities for Green Infrastructure. Any development on the site would need to be low density and to conform with surrounding street pattern, with generous landscaping required to mitigate the impact on the wider landscape*'. The site is given a yellow Rag Rating and the commentary advises '*The development of this site would have an impact on the landscape and further assessment is required to demonstrate whether this can be mitigated*'.

No such further assessment appears to have been carried out. Given the sensitivities of the site, we consider an initial LVIA or landscape capacity study is required to help ascertain whether a development could be introduced onto the site while conserving key views and protecting the scenic beauty of the Kent Downs AONB. Without this, the Kent Downs AONB Unit considers that the current evidence base does not appear to support the allocation of this site in landscape terms and the policy is considered Unsound, as it has not been demonstrated that the allocation is consistent with national planning policy, and in particular paragraphs 174, 175 and 176 of the NPPF that seek to protect and enhance valued landscapes, allocate land with the least environmental value and give great weight to conserving and enhancing AONBs.

SAP 40 St Margarets STM 006 Land at New Townsend Farm:

As recognised in the policy, the site lies within the Kent Downs AONB. The site is relatively well contained within the wider landscape and relates well to the existing settlement, where the settlement pattern includes linear development extending eastwards from Station Road and the High Street. The proposed requirements included in site specific requirements to help manage impacts on the AONB are supported.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

To ensure the potential impacts of STM010 on the Kent Downs AONB are appropriately considered.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The evidence and justification for the selection of Site STM010 at Policy SAP 40 of the DLP is based on errors in the assessment of Site STM010. The allocation of the site for housing is unsound because:</p> <ol style="list-style-type: none"> 1. Allocation of Site STM010 in Policy SAP40 conflicts with other policies in the DDLP. 2. Site STM010 is not compatible with the Kent Downs AONB Management Plan 2021 – 2026. 3. The site is unsustainable - its allocation is based on errors within the DDLP Reg 19 Sustainability Appraisal Report. 4. Planning history demonstrates the site is inappropriate for development. 5. The site is not deliverable due to landownership and highway constraints. <p>For the above reasons the inclusion of site STM010 in Policy SAP40 renders the DDLP unsound and it should be removed from Policy SAP 40 and the DLP.</p> <p>A full objection and reasoning for the unsoundness of the DLP in relation to the allocation of site STM010 at Policy SAP40 for housing has been submitted direct to the Council via its localplan@dover.gov.uk email address and as attachments to this online submission. The objection has been prepared by DEB Town Planning and Development Ltd on behalf of Mr J Thorn of (address of resident local to the site has been redacted). This letter of objection on grounds of unsoundness is accompanied by Appendix 1 - Paul Mew Associates Transport Assessment of STM010.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at	<p>Proposed change:</p> <p>Delete site STM010 as a housing allocation from Policy SAP40 of the Dover Local Plan</p>

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I am writing to question the evaluation, justification and soundness of the inclusion of the site, known as STM010, in the proposed DDC local plan. This site has recently been assessed by DDC as suitable and available and as meeting the necessary criteria for development to proceed. One of the tests for soundness is that the policy criteria should be consistent with past policies and the decisions taken to formulate these policies, i.e. the application and consistency of rational thought throughout the process. This site, in 2012, was assessed for inclusion in the existing current local plan under site code SAD28. It was not scored by DDC under SHLAA in part due to the site being in the AONB and therefore no individual or overall score was awarded.

	<p>Landscape Impact assessment concluded that “any development on the site would, therefore, have a highly detrimental impact to the designated landscape.”</p> <p>Biodiversity assessment “The site is identified as chalk grassland to the NE (STM09), which is a priority habitat under the Natural Environment and Rural Communities Act, 2006, and is a material consideration under PPS9. maybe amenable to reversion to chalk grassland with appropriate management.”</p> <p>Green Infrastructure “The ambience of the area is demonstrated by the numbers of visitors to the coastal area and the levels of usage of paths, both public and permissive. Development would harm the existing GI and the opportunities for enhancement.”</p> <p>Proximity to Road Network Here all the negative aspects are acknowledged. There existed no positives.</p> <p>Access to Services This acknowledges that the village is a large village but the majority of these services and facilities are more than a ten minute walk away.</p> <p>Analysis“The site is located in the AONB in a highly visible location at the top, of a hill on a plateau. Any development would have a detrimental impact on this designation. Access to the site is unsuitable on unadopted roads.</p> <p>Consider for Inclusion In The Submission Document “NO”</p> <p>Just ten years ago, the site was assessed by qualitative means and the decision not to proceed further with a quantitative assessment taken. Ten years later a quantitative assessment has been made without considering a qualitative assessment as being necessary. The different assessment processes have resulted in totally opposite answers. In the intervening ten years the policy numbers may have changed but the legislation has evolved and given greater protections for the landscape, biodiversity, green infrastructure etc. in revisions of the NPPF and joint stewardships such as that between DDC and Kent AONB. DDC’s own mission statements echo all that has been agreed as being good for communities and the landscape in which they live. Yet, in this one single included site, we see this “blind” number assessment method over-riding rational thought and legislation, local and national.</p> <p>I allege that the plan is unsound because irrational thought and assessment as detailed above have driven its direction without qualitative checks being in place to assess its soundness. Site STM010 has been incorrectly assessed and should be removed from the proposed Local Plan.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Removal of Site STM010 from the Local Plan</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><u>Environmental Impact</u></p> <p>This site is within the Kent Downs AONB and is 150m from the Dover to Kingsdown SSSI and SAC, which is a European designated site. According to the Natural England citation, "The coastline from Dover harbour to Kingsdown is of extreme importance ... for its varied floral and faunal communities which include many rare species". "There are numerous breeding sea birds along the cliffs including fulmars, rock pipits and lesser-black backed gulls; kittiwakes have been established since 1967, their expanding population now exceeds 1100 pairs, but are still found nowhere else in Kent. The South Foreland valley at St Margarets is a significant landfall for migrant birds in the spring and a gathering point for dispersal in the autumn. More importantly many migrants breed here including whitethroat, blackcap, grasshopper and other rarer warblers."</p> <p>Any development this close to the SSSI / SAC would undoubtedly have a negative impact on the sensitive and rare flora and fauna so close by, not only from additional people walking here but especially from their pets. More cats and dogs in the area would put more pressure on the rare bird species close by, as well as contribute to nutrient enrichment to the detriment of the chalk grassland habitat.</p> <p>As stated in the Kent Downs AONB Management Plan 2021-2026, one of the main issues for the Heritage Coast is that "High and rapidly increasing visitor pressure, particularly at the Dover to Kingsdown Heritage Coast ... is degrading important habitats and placing the historic heritage at risk and reducing the valued sense of tranquillity as well as the visitor experience."</p> <p>This is a large site of over 2 hectares, so while only 10 houses may be in the plan now, what would stop an additional 50 or more being built in the future? Or if it is only to be 10 houses, does this really make a material contribution to the housing shortage that would outweigh the impact on the SSSI / SAC? These would likely be expensive executive homes, capitalising on the fantastic views from the site, thereby doing nothing to help with the affordable housing crisis.</p> <p>According to SP 13, "All proposals within, or affecting the setting of, the AONB and Heritage Coasts must have regard to the purpose of conserving and enhancing their natural beauty in accordance with the requirements of Policy NE2." Given that the site is the highest point in the surrounding area, it is surely not possible to put in any mitigation for a housing development here to conserve and enhance the natural beauty of the area; quite the opposite. Indeed, this site was excluded from the 2012 local plan and the SHLAA at the time concluded that "The site is located in an AONB in a highly visible location at the top of a hill on a plateau. Any development would have a detrimental impact on this designation".</p>

	<p>The site is currently chalk-based arable land with the potential for it to be returned to chalk grassland. According to the Kent Wildlife Trust: "Restoring chalk grassland is crucial in our vision to create a wilder Kent. Chalk grassland is Europe's version of the rainforest; up to 40 species of flowering plants can be found in just one square metre of this rich habitat. Incredibly, 2.5% of the UK's chalk grassland is found around Dover, so it is crucial that we protect our existing reserves and bring back other chalk grassland sites that have been neglected." Developing this site would remove this as a future possibility. Given that the site is within the 'restore and conserve' area of the Green Infrastructure network, this would be a sorely missed opportunity to make a meaningful contribution. The Green Infrastructure Strategy 2014 specifically mentions to "Encourage species-rich grassland and the reversion of arable land as key priority".</p> <p><u>Traffic</u></p> <p>Access to the site can only be via the Droveaway, since Salisbury Road is a private road. There is already considerable congestion at the Sea Street end of the Droveaway due to the large number of parked cars making the road effectively single track for approximately 200m. This results in road users often having to reverse back to allow oncoming traffic through, which is a safety concern. Additional housing will only make this situation worse. This section of road is used by many parents walking their children to and from the local schools via Droveaway Gardens. The risk of accidents caused by a large volume of heavy construction traffic which will likely need to mount the pavement to fit past the parked cars will be significantly increased. I have personally witnessed large agricultural vehicles and delivery lorries mounting the pavement in order to fit past the parked cars many times.</p> <p>In addition, there is already significant congestion in the village of St Margaret's at Cliffe, due to the restricted road width, lack of pavements over a large section, and frequent bus and delivery vehicle movements. Adding housing developments that have no choice but to use this road will make the situation worse, and there are no possibilities for widening the road or creating bypasses.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Remove SAP 40 STM010 (Land located between Salisbury Road and The Droveaway, St Margarets-at-Cliffe) from the local plan, to avoid the negative impact the proposed development would have on extremely critical SSSI and SAC habitat which is only 150m away.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	STM010 in Policy SAP40
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	In relation to SAP040 there was no period of consultation, it was inserted less than 24 hours before the deadline, with no notification to me living less than 100 metres from the land in question. In 2012, when the same application was made to build on the AONB, planning was refused. Nothing has changed. The Patrol Monument, an historical monument will be obscured and this view will be detrimental to the landscape, a landmark and the monument to our fallen heroes will be interrupted. There is no access to the land by road and no public ownership or permission has been granted. Wildlife will be disrupted, including birds, insects and animals. There are existing restrictions on the height our home can be built. The builder had to excavate to build my property adjacent to Snag Burrows, STM010 is considerably higher than my property, so it will be impossible to build the planned estate. The photos show the monument from near to my home and this estate will completely obscure the view. The 6 spotted Burnett moth in the photo is quite rare, but plentiful on Snag Burrows, I have recorded many sightings on DECIDE@ceh.ac.uk
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The plan should be removed because procedural errors or more sinister actions were taken to put this development estate into the plan, which may provoke an investigation.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I am in a house adjacent to Snag Burrows AONB and can put up a good case for this to be withdrawn from the Dover Plan

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>1.0 INTRODUCTION</p> <ul style="list-style-type: none"> • These representations have been prepared by Esquire Developments Ltd, a multi-award-winning SME developer based in Longfield, Kent. • Esquire Development has a number of land interests in Dover, including <ol style="list-style-type: none"> 1 New Townsends Farm, St Margaret's (Appendix 01); 2 Appleton Farm, East Langdon (Appendix 02) and 3 Ringwould Nurseries, Ringwould (Appendix 03) • New Townsend Farm is identified as an emerging allocation identified as SAP40 (STM006) in the Regulation 19 Local Plan. Appleton Farm and Ring would Nurseries are not identified as emerging allocations but put forward as suitable alternative sites. • As a local SME Housebuilder, the development of these sites brings forward the opportunity to help diversify the housing market and offer a wide choice of housing from different developers.

2.0 RESPONSE TO THE REGULATION 19 PLAN

A. New Townsend Farm, St Margaret's-at-Cliffe

- St Margaret's-at-Cliffe is recognised in the Regulation 19 Local Plan as a Local Centre along with Eythorne and Elvington, Eastry, Kingsdown, Shepherdswell, Wingham and Ash. These Local Centres are noted to be the largest of the district's rural settlements. The Local Centres are characterised by the range of services and facilities that they offer, serving the needs of their own residents and those of adjoining small villages and hamlets. We support the recognition within the plan that in order to help sustain and strengthen the role of these local centres, additional housing is considered appropriate. A total of 96 dwellings are allocated within the Regulation 19 Local Plan in St Margaret's-at-Cliffe.
- New Townsend Farm has been identified as an allocated site for 10 dwellings under SAP40 which allocates all small sites in St Margaret's-at-Cliffe. We support the identification of the site for development, and we consider this site to be deliverable in the lifetime of the plan.
- SAP40 includes two sites within St Margaret's-at-Cliffe Land at New Townsend Farm (referred to as STM006) and Land located between Salisbury Road and The Drove way (referred to as STM010). These are shown on the map at Figure 4.12 and are both referred to as SAP40. As a point of transparency, it would be beneficial to separately identify these allocations on the accompanying Plan in order to prevent any confusion.
- We consider that this area has the potential to deliver more dwellings than the allocated number of 10 dwellings as part of a more comprehensive form of development which would, overall, deliver a much enhanced scheme of approximately 20 dwellings alongside significant areas of open spaces offering net biodiversity gain and maintaining views and perceived areas of separation.
- The proposed development would be in keeping with the surrounding pattern of development, reflecting an extension of built form in an eastward direction away from Station Road/High Street in a linear character (see Nelson Park Road, Hardy Road, St Vincent Road and Kingsdown Road for example in Appendix 04)
- Appendix 01 demonstrates how this could come forward and facilitates the ability to deliver this allocation which has a covenant constraint that whilst is not a showstopper, would benefit from an increased capacity of dwellings.
- St Margaret's-at-Cliffe is recognised within SP4 Residential Windfall Development as an area where residential development or infilling will be permitted within or immediately adjoining the settlement boundaries. We consider that the wording of this policy is too restrictive (see SME Network Representations for full position) where it seeks to limit development unless within or immediately adjoining the settlement boundaries. We consider that the wording of this policy should be amended to reflect a more flexible approach. We would suggest that wording used by Ashford Borough Council in Policy HOU5 from the Ashford Local Plan 2030 adopted February 2019. A copy of this policy wording is provided at Appendix 05.

B. Appleton Farm, East Langdon

- East Langdon is recognised in the Regulation 19 Plan as a Larger Village and allocates Land adjacent Langdon Court Bungalow for 40 dwellings (LAN003). We consider that this site has a number of legal constraints that cannot be overcome and is therefore undeliverable. We suggest an alternative site should be proposed for allocation in Appleton Farm, East Langdon.
- East Langdon is categorised as a Larger Village within the Plan and distinguishes between the two distinct parts, the southern part and the northern part.
- East Langdon is recognised within SP4 Residential Windfall Development as an area where residential development or infilling will be permitted within or immediately adjoining the settlement boundaries.
- Paragraph 79 of the NPPF sets out that in order to promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities. It puts emphasis on the opportunities to grow where this will support local services. The key section of this paragraph is that where there are groups of smaller settlements, development in one village may support services in a village nearby. This is the case for East Langdon and Martin Mills, whereby services are interdependent on each other (by way of example the primary school is located in East Langdon, but the Railway Station is located in Martin Mills).
- We consider the allocated site in East Langdon, Land adjacent Langdon Court Bungalow (LAN003) to be undeliverable in the lifetime of the plan due to a number of restrictive covenants upon the land. The land is subject to restrictions which prevent the erection of any dwellinghouse or other buildings without consent from other parties. This is noted as a land charge and a copy can be found at **Appendix 06**. Our reading of the title indicates the following issues:
 - No sale is permitted until 30 September 2045 without consent of The Church Commissioners for England
 - Transfer dated 22 April 1970 contains Restrictive Covenants on over 5 parcels within the land to benefit and protect the part of the Langdon Court Farm House and farmlands adjoining the proposed land jointly and severally covenant with the personal representatives that they and their successors in title will not at any time erect or suffer to be erected any dwellinghouse or other buildings whatsoever upon the designated land without the written consent of the Personal Representatives.
- These restrictions are sufficient for a developer to not be able to purchase and develop the site.
- Accordingly, alternative sites should be found in East Langdon that are available, suitable and deliverable. Appleton Farm is such a site.
- Appleton Farm represents a parcel of land that is in total approximately 18.5 hectares. It extends from Holland Hill to the north to White Hill to the South. Whilst this is an extensive area, the site has the potential to deliver a modest scale of development of circa 30-35 dwellings on approximately 3.5ha that would offer a suitable alternative to the identified site – See **Appendix 02**.
- The proposal represent a reasonable alternative to the identified site and in a location that is recognised as being sustainable. Indeed, East Langdon and Martin Mills offer one of the few locations in the District outside of the main urban areas offering a railway connection and therefore a greater scale of development could be considered.

C. Ringwold Nurseries, Ringwold

	<ul style="list-style-type: none"> • Ringwould is identified as a Smaller Village and Hamlet within the Plan. It is noted that although there is a limited range of services and facilities available, it is served by a regular bus service and there is a Church within Ringwould. It has close connections to the services and facilities in Kingsdown. Ringwould is located on the A258, the main road connecting Dover and Deal. We support the recognition that in order to help sustain and strengthen the role of smaller villages and hamlets, additional housing is considered appropriate. There is one emerging allocation within Ringwould for 10 units (Land at Ringwould, Alpines, Dover Road). • Ringwould is identified in Policy SP4 Residential Windfall Development as a settlement appropriate for minor residential development or infilling of a scale that is commensurate with that of the existing settlement. • The Nursery site is located to the west of Ringwould, with a long frontage to the A258. It comprises approximately 9.2ha and is considered suitable to deliver a wide mix of uses, including residential, retail, care and affordable homes and/or potentially education. Appendix 03 demonstrates how a care/retirement facility could be delivered. • The mix of uses would help improve the services and facilities available to the existing community of Ringwould, as well as serve a wider catchment. The proposals would inherently improve the sustainability credentials of Ringwould as well as delving a mix of uses which are most in need, including care, affordable homes and potentially education. • Consideration should be given by the Council as to the opportunity the site presents - including working with the Council's own Housing department to deliver locally required housing needs in partnership with the Council itself. <p>Please see attached full representations including appedices</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Please see above and attached representations in full</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 40. STM010 Land located between Salisbury Road and The Droveaway, St Margarets Bay
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Not Legally Compliant and fails with Duty to Cooperate</p> <ul style="list-style-type: none"> Site not included in Regulation 18 until 16/03/2021. Regulation 18 closed to consultation 17/03/2021 so no time to raise objection. <ul style="list-style-type: none"> This was not transparent and I feel an internal investigation should be conducted to rule out any possible corruption within DDC. Our house, 78 The Droveaway did not originally gain planning permission. Approval was met when our house was lowered so that there would not be a visual impact on the surrounding area. This proposed site is much higher than any other property in the area and would obstruct the view across the landscape to the Historical site: the Dover Patrol Memorial. This can be viewed from the landscape of Dover Road entering the village and the landscape from South Foreland Lighthouse on South Downs (this view is currently on the TV Advert for Skipton Building Society- screenshot attached below). <p>Unsound</p> <ul style="list-style-type: none"> Site was excluded from submission in 2012 under site code SAD28. <ul style="list-style-type: none"> analysis of site in 2012 has not changed 10 years later. Site in an area of AONB. If developed will impact on wildlife in the area including the adjacent National Trust land and Heritage Coast. It will also impact the surrounding biodiversity of the area. The Wildlife Trust plan to release the rare bird the Chough in the surrounding area. Access to site would be via the Droveaway, which is narrow, unlit and for most part does not have footpaths. Increased traffic and construction vehicles would pose a danger to residents and the public eg. children walking to school, elderly to access public transport, horse riders and cyclists. Construction traffic causes obstruction and possible danger to life with no other access to the Droveaway (see photo below - taken 15.11.2022) Major disruption caused to residents when just 2 large houses were built at , no 36 and 38. These and several other properties have not sold in this area, proving there is not a need for further housing within this area (Rightmove screenshot dated today attached below)
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	Site STM010 should be removed from the Local Plan at Regulation 19

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Local Residents should be represented and I live nearly adjacent to Site

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Page 188. SAP40 - St Margarets-at-Cliffe Small Housing Sites. Section 4.254, Site STM010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>It is my understanding Site STM 010 was not included in Reg 18 Version of the Local Plan which meant that there was a lack of opportunity for local residents (such as myself), the Parish Council, National Trust, Natural England and other interested parties to be involved in the required consultation and therefore contravenes the requirements of the Statement of Community Involvement.</p> <p>On the initial 'Call For Sites' STM010 was aligned with a separate small paddock to the South East (bordering Salisbury Road) STM011. Although I have no documentary evidence to support it, I and most of my neighbours in Salisbury Road were given understand that Dover District's response to an application by the owner of plot STM010 was that it would only consider an application which included both STM 010 and STM 011. Most of the residents are friends of the owners of site STM 011 and were assured by them that they did not want their land included in any proposed development and had informed Dover District Council of this. Thus we were very surprised to discover that site STM010 had been included in the Regulation 19 version of the Local Plan. Subsequent enquires revealed that the owner of STM010 had made his submission for the site's inclusion under Regulation 18 shortly before its deadline date.</p> <p>As I was not afforded the opportunity to voice my comments during the Regulation 18 public consultation period I would like to make them now.</p> <p>1 The proposed site is part of the Kent Downs ANOB. It is possibly the highest point in St. Margaret's- at-Cliffe and has panoramic 360 degree views to France, Deal, Pegwell Bay, Ramsgate, Dover Patrol Monument and St. Margaret's Lighthouse.</p> <p>It also abuts National Trust and Heritage Coast Land.</p> <p>1 Any development on this site would contravene National Planning Policy Framework (paragraphs 174 to 178).</p> <p>1 Due to the height of the land, which is more than 5meters above the ground level of the existing properties is Salisbury Road any development would not only overlook, effect the privacy and sunlight to these houses but would dominate the whole of the local landscape.</p> <p>4.The only practical access to the site is via The Droveaway, which because it houses the Doctor's Surgery and a very popular Cafe/bar is currently very congested. Any additional traffic would only add to this congestion.</p> <p>5.This site STM010 was previously assessed in 2012 for inclusion in the 2015 version of the Local Plan (SAD28) and subsequently not included. Given that nothing materially has change since then, what are the new reasons for including it now.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Remove site STM010 from the Regulation 19 version of the Local Plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Page 188. SAP40 - St Margarets-at-Cliffe Small Housing Sites. Section 4.254, Site STM010
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>First, I would like to ask why site STM010 has been included in the Local Development Plan. Information recently received indicates that following a meaningful qualitative assessment for STM010, previously referred to as SAD28, the site was removed from consideration in 2012. At this time however, following a meaningless quantitative assessment it was included in the local plan.</p> <p>Secondly, as a Resident and Member of the Salisbury Road Association Committee, I would like to agree with the points raised on my behalf: Site STM010 was not included in the Regulation 18 version of the Local Plan and was therefore not available for representation to be made during the public consultation period for this version of the plan. As such, residents were unable to review and comment on the proposal for site STM010 to be included in the Regulation 19 version of the Local Plan. Given this, I believe that the process for public engagement for the Local Plan is not in general accordance with the Statement of Community Involvement and in fact contravenes it and would therefore question if it is legally compliant.</p> <p>Given the lack of public consultation and agreements with the likes of Natural England, the National Trust and the Kent Downs AONB and the public for Site STM010, I would also claim a lack of Soundness for this aspect of the plan. As such, I believe that this part of the plan does not demonstrate that it is Positively prepared, Justified, Effective and Consistent with National Policy and has therefore not followed due process.</p> <p>Based on the above, it is my opinion that site STM010 should be removed from the Regulation 19 version of the DDC Local Plan.</p> <p>I have been advised to include comments that should have been made during the Regulation 18 public consultation if the STM010 site had been included in that version:</p> <ol style="list-style-type: none"> 1 Salisbury Road is a Private Road the upkeep and maintenance of which is undertaken by the Salisbury Road Association SMB, managed by an elected committee. Annual payments are collected from all residents to finance any works required and to pay for Public Liability insurance. The Salisbury Road Association has been in existence for over 50 years.

It is the view of the Salisbury Road Association that the landowner of site SM010, Mr David Powell, would have no legal right to create an access road and/or junction with Salisbury Road. Neither Mr Powell nor the farmer currently renting the field have ever accessed the field via Salisbury Road and there is currently no access in existence. In addition, neither Mr Powell nor the farmer have ever contributed to the upkeep or maintenance of Salisbury Road.

- 1 The proposed development access road and junction as shown on page 19 of the landowners proposal is also not reasonable, feasible or achievable. The junction with Salisbury Road would be immediately opposite the drive and/or frontage of the existing properties, wherever it was placed on this section of the road. In addition, Salisbury Road is only 4.7m wide at its widest point and this, together with the fact that the residents park their cars on the road outside of their properties, results in the road being single track and would essentially make turning in and out of such a junction highly hazardous and likely impossible.
- 2 Given the above, the Salisbury Road Association would not grant right of access or agree to the proposed access/junction between Salisbury Road and the proposed site. In addition, it would also not allow access to the site for any construction plant if the site were ever to be developed.
- 3 It is my view that the impact of the proposed development and the resultant increased traffic flow has not been fully evaluated and that it would certainly significantly worsen what is already a system that barely copes with the current traffic flow, especially at the narrow and congested junctions between Salisbury Road and the Drove way and the Drove way and Sea Street.
- 4 Analysis of the Title deeds of the proposed STM010 site reveals that it is in fact land locked, with its boundaries completely inside of the hedgerow and tree line along its borders with both Salisbury Road and the Drove way. As such, the landowner has no obvious access to the site that is in his ownership and therefore renders the site as undeliverable and unachievable.
- 5 The ground level of the proposed site is in excess of 5 metres higher than the ground level of the properties opposite the proposed site on Salisbury Road. As such, the houses adjacent to Salisbury Road in the proposed development will be 11-12 M higher and dominate the existing properties. This will significantly impact the access to sunlight due to the inevitable shading by these new properties. In addition, the proposed properties will have direct line of site into the front aspects of the existing properties, which include bedrooms, bathrooms, living rooms and kitchens. It is my view that this development proposal would therefore significantly adversely impact the residential amenities of these properties.
- 6 Further to the above point I would also like to highlight the Landscape Sensitivity Assessment of proposed development sites FINAL REPORT January 2021, page 139 where under the Mitigation heading it is stated that –‘Any development should also be one story to minimise visual impact.’ Thus, confirming that the height of this site is a significant issue.
- 7 The proposed site, whilst currently used agriculturally is part of the Kent Downs AONB and constitutes a buffer zone between the residential aspects of Salisbury Road and the Drove way and the North Downs SLA, the Heritage Coast, National Trust land, the Site of Special Scientific Interest (SSSI) and the Biodiversity Opportunity Area. In fact, the site is only 300 meters from the Dover to Kingsdown cliffs Special Area of Conservation (SAC) and Site of Special Scientific Interest (SSSI) which protects cliff top grassland and scrubland habitat which is also a key natural and landscape feature of the AONB and heritage coast. Any development on this site would remove that buffer and significantly impact these extremely important and sensitive conservation areas.
- 8 The AONB and heritage coast boundaries were drawn to explicitly include the area of STM010 to protect this land from development. A housing development would be a clear separation from the intended purpose of the AONB designation for this area.
- 9 I also believe that the proposed development in an AONB is in complete conflict with National Planning Policy Framework (paragraphs 174 to 178).

In particular paragraph 174 states that Planning policies and decisions should contribute to and enhance the natural and local environment by;

- protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils.
- recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services.
- maintaining the character of the undeveloped coast, while improving public access to it where appropriate.
- minimising impacts on and providing net gains for biodiversity.

Paragraph 175 states that plans should allocate land with the least environmental or amenity value.

Para 176 states that great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty which have the highest status of protection in relation to these issues.

In my view the allocation of site STM010 in the Local Plan is contrary to all of the above and could therefore be deemed as not being legally compliant and is further evidence that the site should be removed.

- 1 The Local Plan Policy NE2 clearly states that; ‘Major development proposals within the AONB will only be permitted in exceptional circumstances and where it is demonstrated they are in the public interest’. In addition, NE2 also states that any development in the AONB should achieve the following:

	<ul style="list-style-type: none"> • Be sensitively located and designed to avoid or minimise adverse impacts on the AONB and its setting. • The location, form, scale, materials and design should conserve and where appropriate enhance or restore the special character of the landscape. • The development should enhance the special qualities, distinctive character and tranquillity of the AONB and the Heritage Coasts • The development has regard to the AONB Management Plan and any associated guidance. <p>It is my view that the proposed STM010 development site does not meet any of the above criteria.</p> <ol style="list-style-type: none"> 1 In addition, any development of this site would impact on the long and medium view of the extremely important Dover Patrol Memorial from many aspects of the surrounding area. 2 DDC will be aware of the number of Saxon burial sites that have been identified both on and adjacent to Salisbury Road. It is widely accepted that the proposed development site, given that it constitutes the highest point in the locale, will contain a significant concentration of Saxon burial sites and is therefore of high archaeological significance and value. <p>In conclusion, I believe that, for all of the reasons discussed above, Site STM010 should be removed from the DDC Local Plan.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	As stated above, the Plan is in no way legally compliant or sound and cannot be modified to make it so.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	The allocation for housing of site STM010 in St Margaret's at Cliffe by policy SAP40
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>In my view, site STM010 in St. Margaret's at Cliffe is unsuitable for housing development for the reasons set out below. I believe that its allocation for such development in Policy SAP40 of the Regulation 19 Submission Document Local Plan makes the Plan unsound to that extent, as built development on this site would be in conflict with national and local planning policy, and with the policies of the Kent Downs AONB Management Plan.</p> <p>I am aware that the St. Margaret's at Cliffe Parish Council has objected in its response to the Local Plan to the allocation of this site for housing, on the grounds principally of the harm which would be caused to the AONB and which could not be satisfactorily mitigated. I am also a named supporter of the response which has been submitted by Mr. Gerald Irvine in relation to this site on behalf of over 100 local residents. Without repeating in detail the arguments set out in these responses, I would like to confirm that I strongly support them. Contrary to paragraph 176 of the National Planning Policy Framework and policy SP4 of the draft Local Plan, the development for housing of this site would not conserve or enhance the beautiful surrounding landscape of the AONB, and would in fact cause considerable damage to that landscape setting, due to the inevitable visual intrusion which would result from any building on this prominent and elevated site. This site topography makes it virtually impossible for there to be any meaningful mitigation of the harmful impact of development.</p> <p>I should like to add a further consideration which I believe should be taken into account, which is the inconsistent treatment of this site in the various assessments and judgments made in connection with the preparation of the Local Plan. This is demonstrated in the two instances below.</p> <p>Firstly, this site is in a much more prominent position, and much closer to the highly sensitive coastal parts of the AONB in this area, than other sites in the village which have been considered for allocation and rejected, for example site STM002. A planning application was made in 2020 for the erection of four detached dwellings on land included in the latter site (application number 20/00541), which was refused by Dover District Council for the following reasons:</p> <p>"The proposed development would result in an unjustified intrusion of built development into an undeveloped countryside location, which would harm the prevailing rural character at this point and result in significant and demonstrable harm to the character and appearance of the AONB and the setting of St Margaret's within it's rural context. The proposal would therefore conflict with policies DM15 and DM16 of Dover District Local Plan that seeks to protect the character of the countryside and paragraphs 170 and 172 of the NPPF as well as policies SD1, SD2, SD3 and SD9 of the Kent Downs AONB Management Plan." (see attachment 1)</p> <p>These reasons for refusal would apply with equal, if not stronger, force to any proposed housing development on STM010. In my view, they should therefore also rule out the allocation of STM010 for housing in the Local Plan, due to conflict with the cited policies.</p> <p>Secondly, the suitability of the land comprising STM010 for housing land was previously considered by DDC in 2012, when preparing the current Local Plan (adopted in 2015). The site assessment form for the site, then coded as SAD28, is attached as attachment 2. The assessment makes the following points:</p> <ul style="list-style-type: none"> • The site is higher than properties on the western side, on the Droveaway • The site is on the crest of a hill and, despite screening, would be visible for a long distance

- Redevelopment of a house adjacent to this but lower, on the Droveaway, had to undergo numerous changes before it was considered acceptable
- Any development on the site would have a **highly detrimental impact** on the designated landscape of the AONB (my emphasis)
- The arable land may be amenable to reversion to chalk grassland with appropriate management
- The site could provide foraging and flightlines for bats
- The area around the site provides a wide range of recreational walking opportunities, together with the biodiversity associated with chalk grassland and the associated hedges and scrub
- The site is within the "restore and conserve" area of the Green Infrastructure network
- Development would harm the existing Green Infrastructure and the opportunities for enhancement
- The approach roads to the site (the Droveaway and Salisbury Road) are both single track and lack footways from the site up to their junction, and the Droveaway already serves a large number of dwellings
- Pedestrian access to services, including the local bus stop, is therefore poor, and reliance on cars is likely to be high as a consequence
- The site is located on the edge of the Bay area, and the majority of services and facilities in the village would be over a ten-minute walk

The concluding analysis states:

"The site is located in the AONB in a highly visible location at the top of a hill on a plateau. Any development would have a detrimental impact on this designation. Access to the site is unsuitable on unadopted roads."

The site was therefore not considered for inclusion in the Submission Document, and was not allocated for housing in the 2015 Local Plan.

Since this assessment was prepared in 2012, there has been no change in any of the factors considered that would mean that this site was any more suitable for development now than it was at that time. (The only exception being that the northern section of the Droveaway adjacent to the site is now adopted, but it was not widened, and there is still no footway.) Indeed, in the light of the worsening of the climate and biodiversity crises since 2012, the weight that should be given to material considerations such as the protection of the environment, Green Infrastructure and biodiversity; sustainability; and the need to reduce carbon emissions has increased, and this has been reflected in many aspects of current national and local planning policy.

The inconsistency displayed in the difference of approach between the earlier assessment and that carried out for the current Local Plan process, which has resulted in the proposed allocation of this site for housing, is very marked. In my view, all the considerations which led to the site's rejection in 2012 remain of great force, and this inconsistency should be resolved in favour of the earlier and much sounder judgment. The 2012 rejection was justified and correct, and there is no valid reason for a different judgment to be made now.

The only benefit of this proposal would be to add 10 houses (according to the submission made by the promoter) to the stock of those to be built in Dover District over the period of the Local Plan. There is no demonstrable need in the village for further housing of this type, which would inevitably be high-cost due to the perceived prestigious location. There are currently several unsold houses in the likely price bracket on the market in the village, and that market is slowing. The main housing need in the village is for affordable housing, and none is proposed on this site. The other proposals for the allocation of housing land in the Local Plan, almost all of which are in more sustainable and acceptable locations than this proposal, would if approved allow DDC to exceed comfortably its five-year housing target. (See Table 3.2 of the draft Plan, which estimates a 6.16-year supply with a 10% buffer). In any event, it seems that mandatory housing targets may even have been abolished by the government by the time that this Plan comes to be approved.

Any benefit of allowing built development on this site would therefore be substantially outweighed by the harm caused to the surrounding countryside and especially to the AONB and the Heritage Coast, the detriment to the residents of the village and the potential damage arising from the precedent of allowing development which is in conflict with so many important national and local planning policies. For the reasons set out above, I would ask that this site be deleted from Policy SAP40 of the Regulation 19 Submission Document, and not allocated for housing in the Local Plan.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will

The deletion of site STM010 from policy SAP40

make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	There has been no proper public consultation in relation to this site, as it was not included in the Regulation 18 consultation process and was added to the Regulation 19 submission document as a new site. Participation in the oral part of the examination will assist in redressing this lack of consultation.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The National Trust is the owner and custodian of Langdon Cliffs and Foxhill Down which forms part of the Dover to Kingsdown Cliffs Special Area of Conservation (SAC) and Site of Special Scientific Interest (SSSI). Qualifying features include vegetated sea cliffs of vegetated sea cliffs of the Atlantic and Baltic Coasts, and Semi-natural dry grasslands and scrubland facies on calcareous substrates.</p> <p>As identified at paragraph 3.256 of the draft Local Plan, the White Cliffs of Dover are one the country's most iconic landscapes, attracting visitors from across the country and from overseas. The National Trust has seen year on year increases in visitor numbers to the Dover to Kingsdown Cliffs SAC site and we are increasingly concerned about the designated areas being damaged through trampling and path widths spreading by the increased use of visitors to the site. The Trust is working hard to ensure that the integrity of the site is maintained and along with partner</p>

	<p>organisations is committed to an extensive and ongoing programme of visitor management and mitigation measures. As well as this, the National Trust is currently seeking planning permission to secure new parking outside of the designation at Wanstone with the aim of alleviating pressure on the qualifying natural habitats and to reduce footfall through the SAC.</p> <p>Proposed site allocation SAP40 is located approximately 300m west of the Dover to Kingsdown Cliffs SAC with direct access to the South Foreland Coastal Path and the SAC via a historic permissive path through National Trust land that adjoins the proposed site allocation to the north. Although protection should be afforded through proposed Policy SP13 Protecting the District's Hierarchy of Designated Environmental Sites and Biodiversity Assets, the Trust wants certainty that the integrity of the Dover to Kingsdown Cliffs SAC qualifying features will be maintained and enhanced and that appropriate avoidance and mitigation measures will be in place.</p> <p>Recommend criterion added to policy wording which states, 'Due to the scale of development and close proximity to the Dover to Kingsdown Cliffs SAC and site of SSSI, a project level HRA is required. The HRA should consider the potential impact pathway of significantly increased recreational pressure and the relevant avoidance or mitigation measures required in line with Strategic Policy SP13'.</p> <p>Whilst the impact of development on the Dover to Kingsdown Cliffs SAC is the Trust's primary concern we also object to the principle of development at this location. The proposed site allocation is located within the Kent Downs AONB and although not identified within policy wording, or the supporting evidence base 'Landscape Sensitivity Assessment, Douglas Horman' (2021), the site is located within the Heritage Coast as identified on the adopted Dover Policies Map, and Magic Maps (Defra). As identified at paragraph 3.264, Heritage Coasts are defined by Natural England based on their notable natural beauty, flora and fauna, and their heritage features. There are only two areas defined as Heritage Coast within Kent, both of which are within the Dover District. This site falls within the South Foreland Heritage Coast which stretches a total of 8km covering an area 4km2 . The supporting Sustainability Appraisal Regulation 19 (September 2022) identifies the site to have the 'potential to moderately affect the District's landscapes, townscapes or seascapes'. However, given the omission it is of the opinion that not full consideration had been given to the sites status as defined Heritage Coast. The site has an elevated position within the landscape and any development in this location would be visually intrusive when viewed from the north back towards the village and it is considered that development here will have an adverse impact on the undeveloped coast. This does not align with proposed Policy NE2 – Landscape Character and the Kent Downs AONB, criterion (j) which seeks to enhance the special qualities, distinctive character and tranquillity of the AONB and Heritage Coasts, and national policy (paragraph 178) which places importance on the special character of the area and the importance of its conservation.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Recommend criterion added to policy wording which states, 'Due to the scale of development and close proximity to the Dover to Kingsdown Cliffs SAC and site of SSSI, a project level HRA is required. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 40. St. Margaret's-at-Cliffe. STM010. Land located between Salisbury Road and The Droveaway, St Margarets-at-Cliffe. Page 171
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Site STM010 Policy SAP40 Reg 19 Local Plan (2022)</p> <p>This is additional to the group submission made by residents in The Droveaway, St Margaret's Bay to which I am a signatory.</p> <p>This is the first practical opportunity for me to comment on the draft local plan for this site due to STM010 being removed from allocation in SAP40 Reg 18 by Dover DC before being re-allocated in Reg 19. I live within 30 meters of the site.</p> <p>The DDC 2012 assessment form, which informed the adopted Land Allocation Local Plan 2015, said no to the inclusion of land site SAD28 (the same site as SMT010 in Policy SAP40 of the draft Local Plan to 2040). I largely concur with its findings and quote some of them below along with my comments.</p> <p>(The quotations are from the above mentioned assessment form, obtained by a Freedom Of Information Request, and released for public viewing by DDC Freedom Of Information Office)</p> <p>From the section entitled "Landscape Impact":</p> <p>"The site lies within the AONB and close to the Heritage Coast. It abuts National Trust land to the NE. The site is on a crest of a hill and, despite the screening, would be visible from a long distance (Redevelopment of a house adjacent to this, but lower, on The Droveaway had to undergo numerous changes before it was considered acceptable) Any development on the site would, therefore, have a highly detrimental impact on the designated landscape."</p>

Comment: Actually the site lies not only in an AONB, but also within the Heritage Coast and a BOA, and several hundred yards from an SSSI and an SAC. The development of 78 and 80 The Droveaway, immediately adjoining STM010, included the removal of vast amounts of chalk to allow the two chalet bungalows to sit low enough so that their rooflines did not impinge on the AONB landscape (I was a daily eyewitness to that). It must also be noted that DDC's Regulation 18 draft, as well as documents related to the Local Plan 2015, referred to STM010 as being adjacent to rather than in the AONB—a significant error on DDC's part and one which could be construed as influencing its decisions regarding STM010's eligibility for housing.

From the section entitled: "Biodiversity":

"The site is identified as chalk grassland to the NE(STM09), which is a priority habitat under the Natural Environment and Rural Communities Act 2006 and is a material consideration under PPS 9. That section of the site is not amenable to development. Apart from a small area of scrub to the SW, the rest of the site is arable with some hedging along boundaries. The arable is chalk-based and maybe amenable to reversion to chalk grassland with appropriate management.

The site could provide foraging and flight lines for bats. EIA Screen: Essential due to sensitive location Appropriate Assessment: The site is within 300m of the Dover to Kingsdown Cliff SAC and screening would be necessary. There would also be a requirement to contribute to the Thanet Coast Mitigation strategy."

Comment: I concur with the conclusions of the above quotation.

From the section entitled: "Green Infrastructure":

"The site is bounded by footpath ER26 along the SW, the vehicular cul-de-sacs of the Droveaway to the NW, Salisbury Road to the SE and by National Trust land to the NE, providing a wide range of recreational walking, together with the biodiversity associated with chalk grassland and its associated hedges and scrub. The ambience of the area is demonstrated by the numbers of visitors to the coastal areas and the levels of usage of paths, both public and permissive. The site is within the 'restore and conserve' area of the GI network, reflecting the real opportunities for GI. Development would harm the existing GI and the opportunities for enhancement."

Comment: I concur with the conclusions of the above quotation.

From the section entitled "Proximity to Road Network"

"The two roads that lead to the site appear to be unadopted and not well maintained. There is no access onto the site. The site is located in the area between Salisbury Road and The Droveaway. Salisbury Road is a single track unadopted road and there are no footways along its length. The Droveaway is also a single track road but is adopted. However, the road already serves a large number of dwellings and there are no footways beyond the junction with Salisbury Road. Pedestrian access to services including the local bus stop is therefore poor and reliance on the car is likely to be high as a consequence."

Comment: The Droveaway is adopted. Cars are parked all along the Droveaway allowing single lane access and nothing more. I concur with the above quotation otherwise.

From the section entitled "Analysis":

"The site is located in the AONB in a highly visible location at the top of a hill on a plateau. Any development would have a detrimental impact on this designation. Access to the site is unsuitable on unadopted roads.

	<p>Comment: The Drove way is adopted but very unsuitable. Otherwise I concur with the above quotation.</p> <p>From the section entitled: :“Consider for inclusion in the Submission Document?”</p> <p>(Answer) “No”</p> <p>Comment: I have lived at the end of The Drove way for thirteen years. The land in question is a thirty seconds walk from my house. The above mentioned council document faithfully reflects the present situation except that now there are even more parked cars on The Drove way and its size and condition have not changed. That DDC’s present Planning Office have allocated STM010 as a building plot, thus radically negating their own past assessment, is understandably shocking.</p> <p>I can only think that they have failed to consult their own archives —e.g. how could they otherwise have mistakenly identified the land as ‘adjoining’ the AONB? I also fear that they failed to visit and visibly assess the land, its setting and its accessibility. If they have failed to, it is crucial that they do visit in order to understand the error of their recent judgment. The DDC Planning Office must be made to understand that the construction of at least ten ‘executive’ houses on the highest point of our local AONB, no matter what attempts are made to screen, disguise, or ‘landscape’, can in no way be construed as a beauty enhancement or a road improvement. It would be unmistakably an insult to the designation AONB and the Heritage Coast, a dangerous precedent for future assaults on our protected environments, and a further deterioration of existing road difficulties.</p> <p>I find the inclusion of Site SMT010 in policy SAP40 of the DDC Local Plan to be, as a decision, unsound, not justified, inconsistent with National Policy, and not legally compliant, and therefore I object strongly to its inclusion in the proposed Local Plan.</p> <p>Thank you for the opportunity to submit my opinion.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The removal of STM010 as an allocation from policy SAP40 of the DDC Local Plan for the reasons given above</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I write as an ex-resident of St Margaret Bay with experience of living there for some 46 years, both in the Drove way and nearby Granville Road. One of the reasons for our move to Walmer was the congested road situation between the Bay area and the road out of the village, particularly exacerbated at school dropping-off and picking-up times, making it almost impossible to get to and from. The latter problem needs to be addressed now by the provision of an offroad parking lane from the top of Bay Hill to the School entrance, on either side of the road, and improved sightlines around the bend in the middle. A further factor is the increase in size of the average motor car with the school pick-up vehicles being very largely of the 'Chelsea Tractor' variety.</p> <p>The building of many more houses in the Bay area, such as the above proposals, without a corresponding upgrading of the access road situation would be most irresponsible. Similarly, I have seen over the years the huge increase in the number of parked cars in The Drove way itself making it difficult to negotiate with one-way traffic necessary at many points.</p> <p>I do hope these, and all the other points raised by the residents, will receive due consideration before any decisions on the house building proposals are decided.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>STM10 has been added to the Local Plan, after the close of Reg 18, following an HELAA (Housing and Economic Land Availability Assessment) review. Whilst it is disappointing not to have been able to comment, I will now take the opportunity to make my views known.</p> <p>I have read the outline reasons using the various SA Objectives; however, I would beg you to consider some points in more detail.</p> <p>I am upset you do not seem to place much emphasis on the AONB boundaries. I am led to believe there are many migratory birds which pass over our cliffs – buildings and additional lights will certainly have an adverse effect on their wellbeing – I would hope you ensure proper consultation with the National Trust, Natural England, and RSPB before finalising this review.</p> <p>Regarding the location of the site. I appreciate this should have been visited by council staff as part of the HELAA review, however I believe they have not understood the full effect of this proposal on the community.</p> <p>This land is situated above the Drove way and Salisbury Road where previous applications have been rejected due to height restrictions. Surely this development would be higher than surrounding houses and be a complete contradiction to previous decisions.</p> <p>The site measures 20,358m² (approx. per google earth). If we assume there will be 10 houses, this equates to 2035m² per plot. (I appreciate there will be some roads and service areas included, therefore a small adjustment may be needed!)</p> <p>It is very difficult to understand why 10 bungalow style houses would be an economic development for this site. Obviously, there is no requirement to provide affordable housing however I fail to understand the need for such expensive style homes in this area. In addition Salisbury Road is a private road and there can be no access from that side. The only access is therefore via The Drove way.</p>

	<p>The site is situated at the end of what is a very narrow road with houses on both sides and only a small section serviced by a pavement. Most of the road has no pavements and, obviously, when cars are parked on the side, it becomes a single carriage road.</p> <p>The regular traffic is currently cars and delivery vans, often with congestion issues when passing the parked vehicles. On the occasions when heavy vehicles must use the road, they invariably mount the pavements or run up the grass verges.</p> <p>If this development were to go ahead there would be circa 2/3 years of large construction vehicles making their way to/from the site. Post construction the increase in cars /delivery vans using The Droveaway and Sea Street (past the St Margarets primary school) would be unconscionable. Mothers and children and older people especially will be at risk. (I can assure you, from experience, the drivers do NOT take extra care!). There is no way of mitigating this risk.</p> <p>This is a residential road leading to a farmyard and has not had the benefit of regular maintenance. Without doubt the continual heavy traffic will cause undue wear and tear – will there be a budget set aside to restore the inevitable damage.</p> <p>Access to the Droveaway is through St Margaret's village and up to Bayhill via Sea Street. This involves navigating a very narrow passage between some old cottages on one side and the entrance to the village primary school on the other side.</p> <p>I ask a proper traffic usage survey is instigated to assess the impact the increased traffic will have on The Droveaway and Sea Street – especially at the start and end of the school day- before authorisation is given.</p> <p>Your review also considers the infrastructure at the location.</p> <p>Water and sewage pipes have not been upgraded or replaced in over 30 years and it is unlikely they will cope with the additional demand.</p> <p>The review also states there is an NHS surgery. This is a small building (in The Droveaway – parking issues!) and has to service the whole of St Margarets. It currently is struggling to cope. By adding four additional building developments, I believe it will be overwhelmed – perhaps this should be checked before just noting a surgery within 800m. The above-mentioned school suffers from the same problems, I would recommend their capacity is checked before accepting the application.</p> <p>In respect of local transport, the latest bus timetable has been issued which identifies only 5 buses per day to Dover and Deal – the last one to St Margarets leaves Deal at 2.30.</p> <p>In respect of your transport criteria, especially re climate change, I would suggest this is not a suitable timetable.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I believe if the prpoer consultation had been invoked with regulation 18, this project would not have been allowed. It is my belief Nelson Park St Margarets is a more appropriate area which would accomodate 10 dwellings - including affordable houses. STM010 should be deleted.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

Map of Allocations in St Margarets -at -Cliffe SAP 40 STM010 land loacated between Salisbury Road and The Droveway St Margarets -at- Cliffe I am a resident of Salisbury Road. The access from and to Salisbury Road via the Droveway currently is both difficult and dangerous as there is poor visibility, a very narrow road access and cars parking in the Droveway (as very few houses have off street parking) especially opposite the entrance to Salisbury Rd make this perilous. Additional traffic along the Droveway resulting from any residential development would create a bottleneck and a hazard.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? <p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>I would like to object against the above mentioned Planning submission - as follows:- Firstly the proposed site is within an area of outstanding natural beauty - being so close to the famous White Cliffs of Dover. Secondly, and following:- Access to the site would be a problem, as it can only be accessed by The Droveaway - as there are properties, and farmers field with livestock in on the other side. The Droveaway reduces in width as you approach that particular end which does not lend itself for increased throughput - especially with the larger type of vehicles required for the build. There are many other arguments as set out in the group objection sent in by various residents of not just The Droveaway residents, but many more people in St Margarets Bay and St Margarets-at-Cliffe. I noted that the promoters of the site referred to its proposed development as " infill " ?? On what grounds? - as this certainly is not an appropriate description - it is situated on the edge of a built up area of St Margarets - and between the Northern ends of the Droveaway and Salisbury Road. Finally, the current local plan. adopted by the DDC in Jan 2015 provides for the protection of sites in St Margarets at cliffe, and includes St Margarets Bay, that fall within the AONB section 2.18 of the DDC land allocations local plan - emphasises that AONB have the highest status of protection and the plan states that there are very limited development opportunities in St Margarets Bay that would NOT HARM the setting of the AONB. For this reason, I understand that no sites with the AONB of St Margarets Bay were allocated for housing in the current plan.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Lander Planning sent a PDF document which has been split across the relevant sections of the Plan. See Original Attachment on SDLP1346)</p> <p>The identification of the land between Salisbury Road and The Drove way at St Margaret's at Cliffe as a housing allocation is supported. The site is available and deliverable and is sustainably located. Housing in this local centre is important to creating sustainable development in these areas. The policy is therefore 'effective' and 'justified' and therefore supported.</p> <p>In terms of the likely phasing of delivery of the site, ecology and other surveys are underway, with the hope that a planning application will be submitted in 2023. A pre-application has taken place with the Council, with it identifying the key issues that any planning application would need to address. The pre-application indicated support for the principle of a development on this site.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>It is disappointing to learn this application was not given the scrutiny it deserves because decisions were made at the last minute the donkey's field in Salisbury Road is privately owned and not part of this development.</p> <p>DDC has previously declined to use this site preferring others in the village. The Drove way is effectively a cul-de-sac with five roads feeding off it. Can this junction take more traffic from 72 houses on the field in question, this was the figure was quoted in the past. It is not financially viable to build just ten houses. Are any of them going to be affordable houses? With building land costs, of course not!</p> <p>This development will destroy the scenic value of the White Cliffs of Dover when seen from the sea (Green space dark skies project). It will destroy the view of the war memorial from the village. The field is adjacent and complimentary to the AONB with footpaths running along each end, and across the field. I have used the footpaths for over twenty years. Surely it is outside the village envelope and has planning protection on both counts!</p> <p>What of the bank of trees along the Drove way, and the copse of trees along Salisbury Road? Will they disappear along with the wildlife they support?</p> <p>The Drove way has little pavements along its length it is just over one lane in width beyond the Post Box. I understand access will only be via the existing field entrance. Large farm vehicles already struggle to make their way along The Drove way. The road surface in the Drove way is in a poor state of repair.</p> <p>Lastly what about the impact of the gales along the coast? This site is raised about 2-3m above the level of the road. it is exposed to high winds n all sides, especially from South Westerly gales. The solid wooden stable in the donkey's field blew over. My bungalow has experienced structural damage despite being protected from the worst of the gales. The garage roof blew off, and the car was written off. I replace blown double glazing annually. Cladding broke free. Gales are made more intense by the funnel shaped land mass either side of the channel. Living through gales is a terrifying experience.</p> <p>Be warned this raised site is not suitable for even single storey development</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I am Julian Thorn, and I wish to strongly object to the inclusion of the AONB field STM010, at St Margarets Bay, opposite my property, (DDC Redacted) The Droveaway, St Margarets Bat, in the Local Plan, Regulation 18, and now Regulation 19. STM010 is owned by David Powell and in one corner of it, a smaller field STM011 owned by an elderly Droveaway resident who has no intention of selling it and is opposed to the development of STM010. Previously these two fields had only particularly ever been considered with any proposals jointly, so something of a departure, why?

STM010 is an AONB field, and European status SPA adjacent to National Trust land, South Foreland Heritage Coastal Path area, Dover Patrol Memorial, Leathercote Point, which includes an SSSI, biodiversity area, and important for migrating birds. It forms a vital buffer zone between these and the village of St Margarets Bay, as the views over the field are a continuation of the landscape. It stands on the crest of the area, at 86 metres high, and seen from all around, has 3 public footpaths across it, which are much used by locals and walkers.

Originally it was 'discounted' from being included in the Local Plan, Reg 18, then the day before closure. 16 March 2021, it was suddenly included. With closure on 17 March 2021 there was no chance of consultation for The Drove way residents to have their say. Indeed, St Margarets Parish Council on learnt of it later!! A worrying lack of transparency, was correct procedure followed, indeed even legal?? Very sadly passed now to Regulation 19.

No prior consultation with interested parties, namely NT, Natural England, CPRE and Kent AONB, why not? Looking at the criteria required to consider development on AONB land, particularly NPPF rules 115 and 116, these seems to have been flagrantly disregarded, namely the detrimental effect on landscape quality and heritage. We are only custodians of such precious sites as this and have a duty to care for and hand them on to future generations. Both the Drove way and Salisbury Road and 'dropped down', built on one side only, opposite and away from this field, which is about 5 metres above them, with a deep hedge/tree line, excepting the field 'entrance' opposite me. The visual impact of 10-metre-high houses on top (15 metres in total) would be a horrendous scar on the landscape crest of this field and seen for miles around. Ironically enough, about 8-10 years ago, 2 chalet bungalows, 80 and 78 The Drove way were built abutting STM010. To get planning permission, he builders had to take away 100s of tons of soil and chalk to 'drop down' the properties to preserve the views over the field, and avoid roof lines spoiling the view, different rules applied then it would seem. This is also a Saxon burial site, important to preserve.

The entrance to the field has only ever been used by tractors, no cars, is directly opposite my property, and would be the entrance to the proposed development. Originally it was only a turning point, and it seems the farmer probably pushed through the hedge. Going right back, the field entrance was via Brockhill Farm (CT15 6DF) prior to NT ownership. Also, STM010 is shown on plans as having its boundary 'inside' the field plot, effectively landlocked ?legal access?, interesting legal question. The last quarter of the Drove way is a narrow track and ends at Brickhill Farm; the Council tarmacked it for the first time in the 1990's, just screeding it, no actual foundations. The road outside my house is just over 4 metres wide. If myself or visitors park on the road, farm vehicles and cars can only pass by virtue of the field opening opposite. Looking at the plans in the Landers development report the farmer commissioned, it very wrongly shows The Drove way ay this end as a normal two-lane width road, it most certainly is NOT!! For vehicles to enter the proposed site they would have to enter via the proposed site's exit side for the road if anyone was parked outside my house. Dangerous and illegal.

The Drove way has no pavements for the bulk of its length, and where it is accessed off Sea Street at the beginning. The Drove way is effectively single file for the first quarter of a mile with parked cars always, a doctor's surgery compounds this, and ambulances must be able to access. Lorries often have to go on the pavement to pass, only bit with pavement, a nightmare it's a real problem and dangerous. Also, Sea Street is a horror story with the school and village centre traffic most the daytime, not helped by the bus service being reduced to only 1 bus every 2 hours no!

Because STM010 is about 5 metres higher than my house, at night, cars would illuminate my bedrooms coming and going opposite me, adding to the general increase in light pollution this development would bring. So much an AONB!

I hope you can understand why I am so upset and angry because DDC's inclusion of STM010 in Local Plan Ref 18, and now 19. When I look at how cavalierly STM010's AONB status has been disregarded I am horrified. Landscape, scenic beauty, conservation and enhancement, public amenity interest all seem to have counted for nothing.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Abandon the inclusion of STM010 in local plan

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	For the Droveaway. Salisbury Road residents to be directly represented.

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>I write in relation to the proposals made under the above reference and wish to register my strong objections.</p> <p>Given the surrounding infrastructure, these proposed developments are totally inappropriate. The local primary school is already over subscribed, with some local children having to travel some distance to other schools.</p> <p>The GP Surgery offers a fairly limited service and is full to capacity in any event. The bus service is now extremely limited, following the recent changes to the timetable, making it almost impossible for children to get to school.</p> <p>The traffic on our narrow and winding village roads and lanes has already increased dramatically over recent years. Upper Road to Dover is narrow and winding, fairly dangerous in wet weather and treacherous in ice and snow. The main road through the centre of the village, Sea Street, is very narrow with no adequate footpath, and we already have frequent traffic jams in the centre of the village, outside the Post Office, particularly when a brewery lorry is delivering to The Smugglers, a post van is parked outside the Post Office or a bus is going in or out of the village. A massive increase in the population of the village would cause huge problems in relation to the amount of traffic and parking, not to mention the safety element, as each new household would have at least one car, most having two or more, particularly as there is next to no bus service here anymore.</p> <p>We do not want to lose what peace and quiet we are currently able to enjoy in our lovely, rural village, by overpopulating the area and creating a huge housing estate.</p> <p>I would urge you to please reconsider and choose an alternative location.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I wish to express my strongest objections to this proposed development of 10 dwellings which – if allowed – I feel would only be the thin end of the wedge and many more applications would follow.</p> <p>Historically I know of 2 applications to build on this site – one for 5 dwellings and the other for just one – both applications were refused.</p> <p>The Droeway which is the only reasonable access to Salisbury Road and other roads is very busy already carrying too much traffic unsuited for a narrow road with very limited pavements for pedestrians. I live right opposite the doctor's surgery and Droeway Gardens and every day see situations where pedestrians' lives are already at risk due to the volume, speed and type of traffic passing. Cars are inevitably parked on one side of the road for people using the doctor's surgery, parents and children cross the road here to access the footpath to the local nursery and primary schools.</p> <p>Our bus service is now very limited so many people drive children to school, people drive to work, and others drive for personal reasons. New housing will obviously increase the private traffic.</p> <p>Oversized commercial vehicles – delivery, farm, construction and even DDC refuse – often have to travel along the narrow pavement this end of the Droeway – obviously very dangerous. Apart from my concern about the increase in traffic both during construction and afterwards, I also worry about the loss of green spaces, loss of habitat for birds and other wildlife and the inevitable light pollution. At the moment we are lucky enough to still be able see the stars.</p> <p>I am in my 90's so this proposed development would not affect me personally for long but the future residents.....?</p> <p>Please do not allow this to happen.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Wingham
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Plan is considered unsound for failure to allocate the land at Gobery Hill, Wingham. The site has not been correctly assessed in so far as a smaller scheme of up to 10 units can be accommodated on site without causing any harm.</p> <p>4.255 Land off Gobery Hill, Wingham</p> <p>The Council assessed the site as part of its assessment of sites in connection with the Regulation 18 version of the emerging Local Plan (site reference WIN013). The site was rejected as part of this process for a number of reasons, including heritage and landscape.</p> <p>The site which the Council assessed is 0.97 ha in size, with an indicative capacity of 29 units. To ensure that the points raised by the Council have been addressed Stantec and Mark Hanton Studio (Landscape Architecture and Urban Design) have been engaged. Predominately utilising the existing access a landscape-led low density scheme can be accommodated on site.</p> <p>From the analysis a sensitively located scheme of approximately 10 units is considered suitable for the site (compared to a figure of 29 which was assessed by the Council).</p> <p>As part of any proposed development there is an opportunity to open up the riverside, both to existing and new residents, to enhance the River setting and create new wetland habitat. Other ideas to be explored include the creation of a small bird hide/ecological centre.</p> <p>In reducing the potential capacity of the site to 10 units we can demonstrate that the views of the Church will not be impacted, and that the countryside setting will be retained as part of the development.</p> <p>A pre-application request has been submitted to the Council under reference PE/22/00130, in November 2022 with a separate pre-app approach direct to KCC Highways.</p>

	<p>Proposed vehicular access</p> <p>It is anticipated that the site will, in effect, be accessed from two locations. One location will be through the use of a shared driveway at the west end of the site frontage. The other access would be using the existing vehicular access at the east end of the site frontage.</p> <p>The west shared driveway access has been considered with respect to visibility splays of 2.4m x 43m to the west, and 2.4m x 160m to the east, from a new driveway access that would serve around three units. These splays are based upon the Manual for Streets requirement for a 30mph speed limit (to the west) and Design Manual for Roads and Bridges (DMRB) requirement for a 50mph speed limit (to the east). The existing east access will serve the balance of the proposed development. Visibility splays have been considered at 2.4m x 90m to the west and 2.4 x 160m to the east from the existing site access. These distances are based upon DMRB guidance based on a 50mph speed limit from the east and the 30mph limit from the west.</p> <p>The visibility splays considered would be expected to fall within the scope of existing highway boundary or site frontage. On this basis it is considered that suitable vehicular access could be provided to serve the proposed development.</p> <p>Deliverability</p> <p>The site is immediately available being pursued by a local developer, TG Designer Homes, who have a number of active sites under construction in the local area. Following obtaining pre-application advice the intention is that the required supporting evidence to accompany a full planning application will be drawn together. The site itself has no ownership or infrastructure constraints or extraordinary development costs, the site is considered by the developer to be a viable proposition. There are no known barriers to development of the site and an application is likely to be submitted in 2023.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The Plan should allocate the land at Gobery Hill, Wingham for a small sensitive scheme of approximately 10 units</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>To demonstrate that the site is suitable for development and is immediately available</p>

Full Representation attached to SDLP1520. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1520.)</p> <p>Dover Local Plan Regulation 19 Consultation: Gobery Hill, Wingham We write to you on behalf of our client, Mr Guy Van Petegem in relation to the Dover District Council Regulation 19 consultation on its Local Plan.</p> <p>Our client owns the site at Gobery Hill (HEELA site WIN006). The extent of the site is shown below. This site is not included as an allocation within the Pre-Submission version of the Local Plan. We are writing to object to its omission. For the reasons set out below we consider it is a suitable and available site to help deliver housing to Wingham, a local centre within the district.</p> <p>The Site This 1.3 ha site is located on the northern side of Gobery Hill adjacent to the settlement confines, which runs along the back gardens on the eastern side of Preston Hill. The site extends for approximately 150 metres in a northeast direction rising from Gobery Hill. The main section of the site is approximately 70 metres wide, with a further triangular section of land adjacent to Gobery Hill in addition to this, which will be retained as a setting to the existing dwellinghouse.</p> <p>The site is currently accessed from a field gate onto Gobery Hill, adjacent to the rear of Chegworth Cottages and Beech Tree Cottages. These are situated on Preston Hill, but also have rear parking onto Gobery Hill. Immediately northeast of the site is the residential dwelling Bircham House.</p> <p>The site is currently undeveloped land. It is not located in flood zones 2 or 3, nor is it in an area at risk of surface water drainage.</p> <p>Planning History Planning permission was dismissed at appeal in May 2022 for the redevelopment of this site for 15 dwellings. However, this was refused on highway grounds and on a technical footpath connection and safety issue which we consider can be addressed and overcome in conjunction see below (an assumption that KCC supported when withdrawing its original objection shortly before the Informal Hearing).</p> <p>It is pertinent to note that during the course of discussions on this site at pre-application and application stage, officers at the Council considered the principle of residential development in this location was acceptable. The only issue dealt with through the appeal was highway safety (appeal ref. APP/X2220/W/20/32642360), and in particular, the provision of a safe and suitable pedestrian crossing over Preston Hill. Ahead of the appeal hearing, KCC highways dropped its objection to the scheme and the council agreed it would work with the applicant to find a suitable mitigation scheme. We are confident this can be found and accordingly this site would be suitable for development removing the single technical reason to this residential site not coming forward.</p> <p>Suitability of the Site This site is located immediately adjacent to the Settlement confines for Wingham, a defined Local Centre. It is appropriate that growth is directed towards Wingham given it has a good range of services for a settlement of this size. This is evident from its high placement in the settlement</p>

hierarchy. The site is also very well connected to the centre of Wingham which provides the services and local facilities, all of which can be appropriately accessed via an improved footpath linkage as outlined above.
The site is located in flood zone 1, which is sequentially preferable location for development.

We note that this site has been considered as part of the HEELA (site WIN006), and within this it is concluded that the site is “potentially suitable”. Low density development here would be appropriate, which follows the existing grain, and would represent a logical extension to existing built form. Within the HEELA it is acknowledged, as set out above, that improvements would be required at the junction of Gobery Hill and Preston Hill to provide pedestrian crossing facilities, allowing connection between site and bus stops/services/amenities in village. Accordingly, we consider the site is suitable for development and should be allocated.

Availability

We confirm on behalf of our client that this site is available for development over the short to medium term of the plan period.

SP3: Housing Growth

(DDC Note - Section DUPLICATED against SP3)

We welcome DDC’s commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period. Within the Policy, reference is made to the Council’s overall spatial strategy i.e. the majority of growth will be focused towards the principal town, Dover, and the nearby further expansion of Whitfield. It is appropriate that medium/smaller sized settlements in the district, i.e. local centres such as Wingham, receive some growth to sustain their role in the settlement hierarchy over the plan period, serving the needs of its own residents and those within surrounding villages and hamlets and also to provide a good choice of sites. Wingham contains a range of local services including a primary school, a local food store, a pub and Post Office facilities. The allocation of around 100 dwellings across various sites is therefore considered appropriate for this settlement when considering its role in the settlement hierarchy. A large proportion of growth is being directed towards further expansion of Whitfield (over 2,000) where delivery rates in the past have not matched the local plan housing trajectory. Large strategic sites delivery rates can easily slow down during the plan period and under-deliver. Whilst there is a buffer within the Plan, it is considered appropriate not to use this as a limit and allocate other suitable sites in sustainable locations where available.

Wingham is a sustainable location for growth and delivering a choice and this allocation is attractive to smaller housebuilder. The expansion of the settlement in other directions is constrained by flood risk, access, landscape and heritage considerations which are constraints which do not affect this site (if the assumption that KCC will support the detailed pedestrian crossing design which was its position at the recent Informal Hearing). It was established through the work undertaken as part of the recent planning application and support of LPA Officers that the Gobery Hill site is considered suitable for residential development. It is also available and can be delivered within the short to medium term, and in our view this site should be allocated within the Plan.

Summary

Hume Planning Consultancy welcomes the opportunity to comment on this stage of the Council’s Pre-Submission Local Plan and would like to reserve the right to attend the Examination in Public in due course to discuss potential development sites in Wingham.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Policy SA41 - Footpath Field, Staple Road, Wingham (WIN014)
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Not applicable.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>SA41 – Footpath Field, Staple Road, Wingham (WIN014)</p> <p>The site, Footpath Field, Staple Road, Wingham as shown on the policies map is allocated for an indicative capacity of 75 dwellings.</p> <p>This policy provision is considered by Dandara to be “sound”.</p> <p>Development proposals for the site shall include the following:</p> <p>a) Development should be sensitively designed to respect the character of the built area to the west of the site and to allow transition to the rural landscape;</p> <p>Dandara does not object to this criterion and considers it to be “sound”.</p> <p>b) A sensitive landscaping scheme and appropriate landscape buffer determined by a Landscape Visual Impact Assessment is required to mitigate the impact of development on the wider countryside. The existing trees/hedgerows along the southern and eastern edge of the site are to be maintained and enhanced;</p> <p>Dandara does not object to this criterion and considers it to be “sound”.</p>

c) Consideration will need to be made regarding the quality and condition of trees and hedgerows within the site. Detailed proposals should aim to protect those of importance and incorporate them in the overall design of the development and to provide opportunities for biodiversity habitat creation and enhancement;

Dandara does not object to this criterion and considers it to be “sound”.

d) Primary vehicular, pedestrian and cycle access to the site shall be provided via either Staple Road or Miller Close and should include traffic calming features on Staple Road;

Dandara does not object to this criterion, yet it considers that an “if required” clause should be inserted with regard to the proposed traffic calming features. The necessity for traffic calming features has not yet been fully established. This work will be undertaken through the Transport Statement in preparation of the planning application for the site. Accordingly it is recommended this criterion is re-worded as follows:

*Primary vehicular, pedestrian and cycle access to the site shall be provided via either Staple Road or Miller Close and, **if required** should include traffic calming features on Staple Road;*

e) Widening of Staple Road will be required along the site frontage with a footway provided along the frontage connecting to the existing network at Miller Close;

Dandara does not (yet) consider this criterion to be “sound”. As per criterion d above, the necessity, or otherwise for road widening and footway provision along Staple Road will be established through survey work and the Transport Assessment (to be prepared in advance of the planning application). Equally, Dandara notes the presence of both a foul sewer drain and a change in site levels along the site frontage onto Staple Road (northern edge of Staple Road).

The above aspects will need to be considered through further site and survey work in advance of the planning application for the site. Accordingly to enable the criterion to be “sound” it is recommended that an “if required” clause is introduced to the policy wording as follows:

***If required**, widening of Staple Road will be **required provided** along the site frontage with a footway provided along the frontage connecting to the existing network at Miller Close;*

f) The design and layout of the site should retain and enhance the PROW;

Dandara does not object to this requirement, yet it notes that the proposed alignment of the PROW at the site will need to be the subject of further review and consideration including with Kent County Council. This work will be undertaken prior to the submission of the planning application and will have regard to the design and layout considerations for the site indicated under criterion a.

g) In accordance with Policy SP13, a wintering bird survey must be undertaken in advance of a planning application on the site. If the bird survey identifies that the development will exceed the threshold of significance, mitigation will be required. A suitable scheme of mitigation will need to be submitted with the planning application for the site;

Dandara does not object to this criterion and considers it to be “sound”.

h) The site is over 1ha in size and a Flood Risk Assessment is required which should include an appraisal of the impact of climate change;

Dandara does not object to this criterion and considers it to be “sound”.

i) Development must include appropriate air quality mitigation measures as set out in the Air Quality study;

This criterion is not considered to be “sound” at the present time. It refers to an Air Quality Study, which is not yet apparent from the emerging Local Plan evidence base. It is therefore recommended that the criterion is re-worded as follows:

Development ~~must~~ include appropriate air quality mitigation measures ~~as set out~~ to be identified in the Air Quality study;

j) Layout is designed to ensure future access to existing wastewater infrastructure for maintenance and upsizing;

Dandara does not object to this criterion and considers it to be “sound”.

k) A Transport Assessment is required in accordance with Policy TI2 to identify off-site highway improvements and sustainable transport measures that are necessary to serve the development. The Transport Assessment must evidence that there is no severe impact on the highway network and identify appropriate mitigation;

Dandara does not object to this criterion, yet it makes a presumption that off-site highway improvements and sustainable transport measures will be necessary to serve the development. Whilst this may be the case, this work will emerge through the Transport Assessment for the site. Accordingly, it is recommended that works are referred to as “potential” works as follows:

	<p>A Transport Assessment is required in accordance with Policy TI2 to identify potential off-site highway improvements and sustainable transport measures that are necessary to serve the development. The Transport Assessment must evidence that there is no severe impact on the highway network and identify appropriate mitigation;</p> <p>l) Open space requirements in accordance with Policy PM3 shall be provided. However, due to the location of nearby existing open space infrastructure, off-site contributions to upgrade or enhance nearby facilities may be sought rather than on-site provision; and</p> <p>Dandara does not object to this criterion and considers it to be “sound”.</p> <p>m) Development must include appropriate odour mitigation measures to mitigate any impact from the nearby Dambridge Waste Water Treatment Works.</p> <p>Dandara does not object to this criterion and considers it to be “sound”.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Dandara is seeking to bring forward development proposals for the site broadly in line with Policy SA41. As above, Dandara is seeking proposed modifications to some of the wording for the site policy. This wording may have implications for the development proposals for the site. Accordingly, Dandara would seek to attend and participate at the examination in order to make its case for the above modifications to be inscribed into the Local Plan.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>a) As in the Council's previous response to the Reg.18 Submission (Ref: 21-06 DDC Local Plan 17.3.21), Councillors are in general agreement with the suitability assessment undertaken previously which identified sites potentially suitable for residential development and those that were not. The assessments resulted in identification of the above three sites for potential development in Wingham, subject to Planning Permission. Councillors continue to have no objections to the allocated sites, subject to appropriate design, scale and planning permission.</p> <p>b) Impact of SAP41 & SAP42 Councillors have no objection to the allocation of site SAP41 but were very surprised to see the Reg 19 indicative capacity increased by 50% from 50 to 75 dwellings. Councillors question how this increase came about and why it is required as they do not believe the site can sustain this level of development. Character Impact on Wingham River & farmland: The Dover District Landscape Character Assessment 2020, which contains guidance and strategy when considering any type of change to the landscape character, refers to two Landscape 'segments' [LCA A3 (Little Stour and Wingham River) & LCA D3 (Staple farmlands)] which outline the key characteristics, key sensitivities and values of the area, and the Landscape strategy. Regarding 'Development management' of Footpath field/SAP41 the strategy guidance is:-</p> <ul style="list-style-type: none"> • Conserve the strong vernacular of historic buildings and their rural setting; • Conserve and respect the character and pattern of the historic built form and their association with traditional farming practices by resisting further agricultural intensification; • Conserve the open landscape and avoid the introduction of large scale or incongruous elements; • Encourage the use of traditional and in keeping materials, such as flint, redbrick and render; • Resist proposals for highway upgrading to retain the rural character of the narrow lanes and associated verges. <p>The Council seeks reassurance that the principles of this DDC document are adhered to and that the commercial drivers of the developers play no part whatsoever in the decision-making process for development in our village. Traffic/drainage: Both SAP41 and SAP42 will have a significant impact on traffic in the immediate vicinity both during development and once completed. The 'Seath's Corner' junction where Staple Road meets the B2046 Adisham Road is notorious for damaged buildings and infrastructure from large vehicles using this junction and thus an informal one-way system is in place for existing businesses with local and visiting foreign LGVs to help ease this issue. This must be taken into consideration, especially at the development stage. Surface water drainage at site SAP41 is of concern to Councillors post development, especially if 75 dwellings are built.</p> <p>c) Affordable Housing Wingham's requirement for socially affordable housing is well documented. The land at Footpath Field (SAP41) was due to be used for the second phase of the Miller Close development for 16no rural exception affordable units but was not given planning consent at the time. The existing Miller Close development of 26 properties supplied a much-needed housing resource for Wingham residents. The Local Housing Needs Survey (HNS) carried out by Action with Communities in Rural Kent (ACRK) on the Parish Council's behalf in February 2021 identified a need for 10 affordable homes; 2 of which are for older households plus a requirement for 3 open market properties suitable for older households who want to downsize/move to more suitable housing for their needs. This information, and the breakdown on the types of property required was supplied to DDC Planning Officers and discussed in May 2021 where the Council were assured 15 affordable properties would be included in the development at WIN014 (SAP41) and the HNS would inform the type of property built. The Council urge DDC Planners to ensure this local housing need is allocated as required by their existing policies and that a Local Lettings Plan for rural settings is put in place. Councillors also request that any development is phased to ensure local housing needs.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	generally supportive of the allocated sites for the parish, though not the number of dwellings allocated to SAP41, and request that development includes suitable affordable housing to meet the local need

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP42 - land adjacent to Staple Road (WIN003)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Policy is not making the best use of land by maximising the level of development appropriate for the land.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The site was identified in the HELAA as being suitable for 20 dwellings with the reason given that a 'lower density development would be a logical continuation of built form'. Since the site submission, the road speed has been reduced to 30mph, recognising the change in character as passing into the settlement. Additionally, a larger site is proposed for allocation on the northern side of the road. These allocations will naturally extend the built form and edge of the settlement further east and with existing residential developments still further along Staple Road to the east, there seems no good planning reason to reduce the density on this site. Therefore, we request the policy wording for WIN003 under Policy SAP42 be increased from 20 to 25 dwellings.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	The proposed allocation of site WIN003 under Policy SAP42, land adjacent to Staple Road, Wingham is supported. The land is available and in a single ownership to enable easy access to be provided from Staple Road. It is deliverable in the first 5 years of the Plan.

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	<p>Being a site smaller than 1 hectare in size, its allocation is supported by paragraph 68 of the National Planning Policy Framework which recognises the important contribution small sites can make to meeting the housing requirements of an area and requires Local Planning Authorities to accommodate at least 10% of their housing requirement on sites less than 1 hectare in size. This site allocation supports these objectives.</p> <p>In terms of housing numbers, the site was submitted for 24 residential units based on 30 dwellings per hectare. It is considered this is an acceptable density for this site given it will become part of the settlement confines itself and the land opposite is also proposed to be allocated for residential development. Therefore in the interest of making the best use of the land, it is suggested that the allocation number should be raised to 24 dwellings.</p> <p>The site benefits from being within walking distance of the local school and shops and is considered a sustainable extension to housing provision in Wingham. The land to the south, east and west is already developed and these developments provide an existing screen to this site. Residential land adjoins on both eastern and western boundaries and further residential development is proposed for allocation opposite this site on the northern side of Staple Road. This site is considered appropriate for residential development without resulting in any landscape harm and it is therefore suggested the allocation number should be raised accordingly.</p> <p>Since the submission of the site to the Plan, the speed limit on Staple Road has been reduced to 30 mph, in further recognition of its more developed setting. The allocation of this site offers an opportunity to obtain some localised highway improvements, with the addition of a pedestrian crossing link to the existing footway on the northern side of Staple Road and some minor road widening at the site entrance to ensure uninterrupted passage for buses, all which can be carried out on land either within the Applicants or Kent Highways ownership, confirming that all necessary works can be provided.</p>

<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Effective</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>Yes</p>

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The proposed allocation of site WIN003 under Policy SAP42, land adjacent to Staple Road, Wingham is supported. The land is available and in a single family ownership to enable easy access to be provided from Staple Road. It is deliverable in the first 5 years of the Plan.</p> <p>Whilst the Council envisage the site to be built out between 2031 and 2034, the estimated trajectory for this site should be brought forward to build out between 2024-2026, with 10 units being completed in each year 2025 and 2026.</p> <p>Being a site smaller than 1 hectare in size, its allocation is supported by paragraph 68 of the National Planning Policy Framework which recognises the important contribution small sites can make to meeting the housing requirements of an area and requires Local Planning Authorities to accommodate at least 10% of their housing requirement on sites less than 1 hectare in size. This site allocation supports these objectives.</p> <p>In terms of housing numbers, it is still considered that the identification of this land within the HELAA for 24 units, based on 30 dwellings per hectare, is an acceptable density for this site given it will become part of the settlement confines itself and the land opposite is also proposed to be allocated for residential development. Therefore in the interest of making the best use of the land, it is suggested that the allocation number should be raised to 24 dwellings.</p> <p>The site benefits from being within walking distance of the local school and shops and is considered a sustainable extension to housing provision in Wingham. The land to the south, east and west is already developed and these developments provide an existing screen to this site. Residential land adjoins on both eastern and western boundaries and further residential development is proposed for allocation opposite this site on the northern side of Staple Road. This site is considered appropriate for residential development without resulting in any landscape harm and it is therefore suggested the allocation number should be raised accordingly.</p> <p>Since the submission of the site to the Plan, the speed limit on Staple Road has been reduced to 30 mph, in further recognition of its more developed setting. The allocation of this site offers an opportunity to obtain some localised highway improvements, with initial highway discussions requesting the addition of a pedestrian crossing link to the existing footway on the northern side of Staple Road and some minor road widening at the site entrance to ensure uninterrupted passage for buses, all which can be carried out on land either within the Applicants or Kent Highways ownership, confirming that all necessary works can be provided.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Wingham is a complex settlement that includes ancient historic buildings, many of which are listed, and more modern housing. The roads are constantly busy and congested by heavy traffic. Staple Road carries heavy vehicles to and from the large Grain Store which often causes a bottleneck at Seath Corner leading onto the High Street or along the B2046 towards Alyesham and the A2. The recent additional speed reductions to 20mph have hardly mitigated against this.</p> <p>Access onto the Staple Road from the proposed development would further exacerbate the congestion especially during deliveries to the construction site when the adjacent site, WIN014, is also likely to be under construction. Due to the depth of the road below the hedgerow flooding often ensues.</p> <p>For all these reasons I question the soundness of this proposal to develop 20 houses. The settlement is already under great pressure from the large number of developments in this rural farming area. Fields should be used for agricultural purposes if we are to feed the nation.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Councillors continue to have no objections to the allocated sites, subject to appropriate design, scale and planning permission. SAP42 will have a significant impact on traffic in the immediate vicinity both during development and once completed. The 'Seath's Corner' junction where Staple Road meets the B2046 Adisham Road is notorious for damaged buildings and infrastructure from large vehicles using this junction and thus an informal one-way system is in place for existing businesses with local and visiting foreign LGVs to help ease this issue. This must be taken into consideration, especially at the development stage. Request that development includes suitable affordable housing to meet the local need. Councillors also seek assurance that adequate provision is made to prevent severe traffic impact in Wingham and that policies in relation to traffic assessments and travel plans will be clarified.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Numerous residents of Worth have made numerous representations about the lack of infrastructure, services, education and health to support WOR 006 and WOR009. We do not believe that these representations have been adequately resolved. In addition the rural bus service servicing these potential developments has been withdrawn and therefore both these developments will cause an increase in the use of private vehicles this breaching the NPPF. Furthermore the emerging findings of the Census (Dover District) indicate that the population in the District is declining. Therefore it follows that the need for developments in Worth (if not elsewhere) is not needed - breaching government policy of the right houses in the right places. Both these proposed site allocations need to be removed from this draft Local Plan. And finally, again on vehicular movements, KCC(Highways) has stated on a nearby planning application that parts of the A258 (the road used by Worth residents) including a key roundabout is overcapacity - again breaching the NPPF (paragraph 109?)
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	Remove WOR006 and WOR009 from the draft Local Plan.

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). WOR004 Land at Jubilee Road

<p>possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Deliverability of the Site</p> <p><i>Despite the Site being discounted from the draft Local Plan, we consider the Site to be suitable, available and achievable for allocation in the draft Local Plan for residential development, particular to provide high quality rural housing delivered in the early years of the plan period.</i></p> <p><i>Although the Site was considered unsuitable in the 2022 HELAA due to its impact on landscape and the setting of the village, these are concerns that can be remedied through detailed design and a careful and considered approach to layout and landscaping. The Site comprises a nominally sized segment of the overall agricultural field and countryside beyond and would be tightly positioned close to existing development along Jubilee Road. The Site is capable of delivering linear ribbon development, symmetrical to the housing opposite and which would represent a sustainable pattern of development. Through the delivery of a comprehensive and sympathetic landscaping scheme, the visual impact on the wider countryside would be limited, ensuring proposed house types, materiality and overall scale is consistent with neighbouring housing in the village, harmonious to the established village character and vernacular. Achieving this would ensure the village setting is unharmed as a result of development coming forward on the Site.</i></p> <p><i>The landowner is actively promoting the Site for residential and there remain no legal constraints in implementing and delivering the development within the first five years of the Local Plan. If allocated, the LPA can be confident that the Site will form a robust part of the Council's five year housing land supply. We urge the Council to allocate more smaller sites capable of delivering local housing to rural communities in sustainable locations, with Land at Jubilee Road considered deliverable and capable of ensuring the supply of local housing in the early years of the plan period. The allocation of the Site will help to remedy the issues with the draft spatial strategy helping to make the Plan sound.</i></p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Please refer to the accompanying representations.</p> <p>Text below (copied from attached statement) added by DDC. See attachment for full representation.</p> <p><i>We also have concerns with the site selection process, and the resulting impact on the soundness of the spatial strategy and draft Local Plan as a whole.</i></p> <p><i>We note that The Former Packhouse was assessed through the 2022 SHELAA under reference NOR002. The Site was considered to be achievable, available and potentially suitable, with the following comments:</i></p> <ul style="list-style-type: none"> <i>- Brownfield site. Impact on the landscape and adjacent heritage asset would need to be mitigated through good screening, sensitive design, low densities and landscaping</i> <i>- Site adjacent to a Conservation Area and partly within the Grade II* Northbourne Court Registered Park. Site is also within an AAP and adjacent to an undesignated heritage asset. A Heritage Assessment will therefore be required as will consultation with Historic England and the Gardens Trust.</i> <i>- Trip generation from 60 dwellings is likely to be significantly above that which could be generated by the permitted use(s) on this brownfield site, and is therefore unacceptable due to limited visibility at access and width of The Drove. A smaller scheme may however be acceptable in highways terms</i> <i>- Concern regarding impact of this site on narrow sections of the routes between the site and the A256 /A258. Concern regarding the cumulative impact on the wider highway network from potential allocation sites in the locality.</i> <i>- No footways serving the site.</i> <i>- A Transport Assessment will be required to satisfy that highway concerns can be overcome - Risk of surface water flooding</i> <p><i>As part of the 2022 SHELAA it also underwent a highways assessment. The concluding comments were as follows: "Trip generation from 80 dwellings is likely to be significantly above that which could be generated by the permitted use(s) on this brownfield site and is therefore unacceptable due to limited visibility at access and width of The Drove. Further assessment is required"</i></p> <p><i>Combining the two sets of comments, we can draw the conclusion that the Site is considered suitable subject to achieving a satisfactory access strategy which will likely be derived from a reduction in development quantum.</i></p> <p><i>The Site was then subject to assessment as part of the Council's Sustainability Appraisal (SA) (2022). The Site was discounted from the site selection process on the following grounds:</i></p> <p><i>"Northbourne is a large village where development would be acceptable in principle in or adjoining the settlement To allocate all the sites identified as suitable or potentially suitable in the HELAA in Northbourne would be in conflict with the settlement hierarchy and would not lead to sustainable development. Given this it was considered that NOR005 was best related to the settlement, is already supported by existing infrastructure and would deliver the most benefit to the existing community. NOR001, NOR002 and NOR003 were therefore discounted."</i></p> <p><i>The Site was therefore not allocated in the Regulation 18 Draft Local Plan in favour of NOR005 (Betteshanger Colliery). NOR005 was however removed from the Regulation 19 Submission Local Plan because it now benefits from planning permission for 210 homes.</i></p>

	<p><i>We therefore question the robustness of the SA in discounting The Former Packhouse in favour of a site that now benefits from planning permission and has been removed from the draft Local Plan as a result. Failing to allocate additional sites in Northbourne so that housing is delivered across the plan period, once again, heavily relying on extant permissions risks delivering unsustainable growth to rural communities. The Former Packhouse also better relates to Northbourne village, is more centrally located in proximity to the village hall and other local facilities and is also a brownfield site which should be actively promoted for residential development through the emerging Local Plan. As such, the draft Local Plan should look to allocate smaller sites already considered suitable and sustainable through the SHELAA in Northbourne, such as The Former Packhouse. This would also ensure that should the consent for 210 dwellings face any problems in implementation and build out (problems frequently referenced throughout this letter), a modest provision of housing on The Former Packhouse can help serve the immediate needs of the local community and can be delivered more quickly in the early years of the plan period</i></p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Please refer to the accompanying representations.</p> <p><i>Text below (copied from attached statement) added by DDC. See attachment for full representation.</i></p> <p>The Former Packhouse is considered suitable, available, and achievable for development as confirmed in both the SHELAA and the SA 2022</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>To ensure that that the spatial strategy and distribution of growth is amended to rebalance the portionality of housing growth across the district, requiring additional smaller rural sites that are deliverable.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	4.266
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	IT is regnised the need for additional housing but it must come with appropriate design and supporting infrastructure, to ensure safety and preserve the character of an historic AONB village. The junction of this develoment area is already an accident hot spot as the road's exit is freequently blind due to visibility splays and high speed of traffic.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Parking provision on the curtalige of the site needs to be adaaquate for the planned number of dewellings as the road is already extremely congested by existing resident vehicles. Slow and reduce passing traffic and review design of road junction with Alkham valley road to improve both vehicular and pedestrian safety. The current sewage provision in the area is overloaded often requiring tanker support. Poluted surface water endangers the aquifer and local residents so this needs to be addressed as part of the residential planning process.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>REPRESENTATIONS TO DOVER DISTRICT COUNCIL LOCAL PLAN (REGULATION 19) LAND ON THE SOUTH EAST SIDE OF ALKHAM VALLEY ROAD, ALKHAM Rubix Estates Ltd. (hereafter, the Agent) and the landowners are working together on the promotion of the above Site for sustainable residential development. Enclosed is our representation to the Regulation 19 Submission Draft of the Dover District Local Plan 2040. The site is promoted for an estimated total of 25 dwellings, including 18 market houses and 7 affordable homes. This would, based on the site being 2.16ha, represent a dwelling per hectare (DPH) of 11 DPH, a sympathetic amount for Alkham. This Site will be designed to ensure all on-site open space and biodiversity improvements will accessible for the new and existing community. Furthermore, the Site proposed for this representation is adjacent to the settlement of Alkham and consists currently of pasture land. We will be presenting and promoting an exemplar sustainable scheme that garners local for a high quality development that boasts both attractive design. A vital part of our strategy is early engagement with the community, ward councillors and other key stakeholders. We understand how local communities can feel threatened by housing development forced upon them and we will work hard to actively and meaningfully engage with the community to make them part of the process. The Promoter and Landowners generally support the Submission Draft of the Dover District Local Plan 2040 and in particular allocation for 10 dwellings. Included to our response following our review of the Draft of the Dover District Local Plan 2040 is a formal representation to provide assurances to Dover District Council that this land is available, suitable and deliverable for sustainable residential development if further housing allocations are needed. In addition to the Strategic Housing Allocations and Non-Strategic Housing Allocations identified in the Plan, there is a small site allocation for housing in Alkham (SAP43 - Land at Short Lane, Alkham (ALK003). We support this allocation and make this Site available for further growth in the village. We welcome the opportunity to assist or provide comment on the preparation of the Plan which will help shape future development in Alkham and we look forward to the opportunity to participate at later hearing sessions where appropriate. SUMMARY Overall, our representations conclude that the Plan is legally compliant, and provides a sound evidencebased approach to planning in the District over the plan period. It finds further that Dover District Council has sufficiently met the Duty to Cooperate. We look forward to onwards participation in the Examination of the Plan in 2023, and towards the progression of our promotion of this land for sustainable residential development.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	4.266
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I do not agree with the proposed development of this site. I live in the immediate area and am fully aware of previous applications for development in this area, all of which have been refused by both the local Authority as well as the Planning Inspectorate.</p> <p>The main reason for the many objections to development in this part of the countryside are as follows -</p> <p>The site is out of the confines of the village boundaries</p> <p>It would be detrimental to an Area of Outstanding Natural Beauty - and there is strong evidence of protected wildlife habitats</p> <p>The services and infra-structure in this area are inadequate now, especially with notable problems with sewage and waste water disposal.</p> <p>The site is in a high flood risk zone</p> <p>The village has no relevant amenities, save a Church and public house. The present bus service is minimal, increasing the need for more vehicles, especially with the recent cuts to bus services in the District. An increase in traffic in this small but busy road, is not acceptable</p> <p>Development of the site would adversely affect people living nearby, who currently enjoy the vista and beauty of the countryside.</p> <p>Development of this site would set a precedent for further development of the countryside</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I think the Local Plan would be more compliant if more emphasis was made to protect our naturally beautiful countryside and consideration given to redevelop brown field sites and re-addressing empty and neglected properties in the District, with the view of creating more affordable housing.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Not Applicable</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Alkham Parish Council challenges the classification as a “Larger Village” as defined in the Local Plan. “Each of these villages has a good range of services and facilities which serve their own residents and those of nearby hamlets. Capel-le-Ferne, Lydden, Preston, Worth and East Langdon have primary schools and Capel-le-Ferne, Lydden, Worth, Alkham are served by frequent regular bus routes. Retail facilities are not as available however as at the Local Centres, with only Preston and Capel-le-Ferne having a village shop, and only East Langdon having Post Office facilities”</p> <p>Alkham does not have a frequent or regular bus service, there are no shops, no school, no GP surgery therefore we do not have a good range of facilities which serve our own residents and those of nearby hamlets. The parish council requests that Alkham is reclassified as a smaller village.</p> <p>The parish council again to raises concerns with Dover District Council’s wanton disregard for the protection of the AONB. We note with interest that none of the other Non Strategic Housing Allocation sites are within the AONB. We consider it a fundamental duty of DDC to protect the AONB , not to encourage and actively promote its erosion.</p> <p>The parish council are astonished to see this site included in the local plan when in January 2017 outline planning permissions for six homes on this site was refused by DDC. The grounds given were:</p> <p><i>TAKE NOTICE that Dover District Council, the Local Planning Authority, HAS REFUSED Outline Planning Permission for the proposal in accordance with the application and accompanying plans received on 21/10/2016</i></p> <p><i>The reasoning underlying such refusal is as follows:-</i></p> <p><i>1 The proposed development would result in an obtrusive urban form of development in the open countryside, beyond the settlement confines, which would detract from the unspoiled rural character of the area and the setting of the village of Alkham and the character and appearance of the Area of Outstanding Natural Beauty within which the site lies. In particular, the proposal would be contrary to Dover District Core Strategy Policies DM1, DM15 and DM16, paragraphs 109 and 115 of the National Planning Policy Framework and Policies SD1, SD2 and SD03 of the Kent Downs Area of Outstanding Natural Beauty Management Plan</i></p> <p><i>2014-2019</i></p> <p><i>In accordance with paragraphs 186 and 187 of the NPPF, Dover District Council (DDC) takes a positive and proactive approach to development proposals focused on solutions.</i></p> <p><i>DDC works with applicants/agents in a positive and proactive manner by: Offering a pre-application advice service; where possible, suggesting solutions to secure a successful outcome; and, as appropriate, updating applicants/agents of any issues that may arise in the processing of their application. In this instance:</i></p> <p><i>1 The application does not accord with the development plan and no material considerations are apparent to outweigh these matters.</i></p> <p>Alkham parish council asserts that the AONB remains unchanged and that this ‘development’ of 10 houses would result in an obtrusive urban form of development in the open countryside, beyond the settlement confines, which would detract from the unspoiled rural character of the area and the setting of the village of Alkham and the character and appearance of the Area of Outstanding Natural beauty within which the site lies. In particular, the proposal would be contrary to Dover District Core Strategy Policies DM1, DM15 and DM16, paragraphs 109 and 115 of the National Planning Policy Framework and Policies SD1, SD2 and SD03 of the Kent Downs Area of Outstanding Natural Beauty Management Plan 2014-2019</p> <p>A subsequent appeal to the Planning Inspectorate was unsuccessful.</p> <p>Appeal Decision</p> <p><i>Site visit made on 21 November 2017</i></p> <p>by Grahame Gould BA MPhil MRTPI</p> <p>an Inspector appointed by the Secretary of State for Communities and Local Government</p> <p>Decision date: 11th December 2017</p> <p>Appeal Ref: APP/X2220/W/17/3180321 Land at Short Lane, Alkham CT15 7BZ</p> <p><i>The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.</i></p>

- *The appeal is made by Mr S Barnes against the decision of Dover District Council.*
- *The application Ref DOV/16/01216, dated 20 October 2016, was refused by notice dated 25 January 2017.*
- *The development proposed is the erection of up to 6 dwellings with garaging.*

1 *The appeal is*

- 1 *The application was made in outline form and sought permission for up to six dwellings, with matters relating to access, appearance, landscaping, layout and scale all being reserved for future consideration.*
- 1 *The main issue is the effect of the development on the character and appearance of the Kent Downs Area of Outstanding Natural Beauty (the AONB).*
- 1 *The dwellings would occupy part of a field, currently used as grazing land, which slopes gently from north to south. To the west, on the opposite side of Short Lane, there is housing, while to the east and south there are gently rolling open fields. Immediately to the north of the site there are four pairs of semi-detached houses, 1 to 8 Short Lane (Nos 1 to 8) granted planning permission in 1993. A little to the south of the site there is a public right of way (PROW) extending eastwards from Short Alkham is a small village mainly characterised by housing, with very few local services and facilities being available within it.*
- 2 *Given that the site is situated in the AONB there is a general duty to have regard to the purpose of conserving and enhancing the AONB's natural beauty¹.*

Alkham parish council asserts that none of the above reasons for refusal have changed. Further that Policy DM16 of the Core Strategy states that development that would harm the character of the landscape will only be permitted if: it accords with a development plan allocation and incorporates any necessary avoidance or mitigation measures; or it can be sited to avoid or reduce the harm and/or its design would incorporate measures to mitigate the impact to an acceptable level. The parish council asserts that this development does not incorporate any necessary avoidance of mitigation measures and its siting will harm the nature of the AONB.

We would refer you to point 10 of the Inspectors response:

- 1 *While the site's roadside boundary is marked by an established hedgerow it would only provide limited screening for the development, not least because an opening or openings would be needed for access purposes. I recognise that there would be scope to undertake soft landscaping along the eastern boundary and immediately to the south of the site. However, it would take a considerable period of time before any new planting would provide any meaningful mitigation for the development when it was viewed from Short Lane or the PROW.*

Alkham parish council asserts that the observations of the Inspector are still valid and there will not be suitable screening of this development.

The parish council concurs and supports the inspectors decisions point 12:

- 1 *I consider that the development would neither conserve nor enhance the AONB's natural beauty and I therefore conclude that it would be harmful to the character and appearance of the AONB. There would therefore unacceptable conflict with Policies DM1, DM15 and DM16 of the Core Strategy and paragraphs 109 and 115 of the Framework. In relation to Policy DM15 I consider that the development would not come within any of this policy's stated exceptions. I also consider that the Kent Downs Area of Outstanding Natural Beauty Management Plan 2014 to 2019 does not provide support for this development.*

Alkham parish council fully supports all reason given by the Inspector in his refusal of the appeal for six houses on the site in November 2017.

We are therefore astounded that Dover District Council has completely ignored not only the Planning Inspectorates Decision (November 2017) but its own refusal (December 2017)for six properties and now suggests that ten houses on the same site would be acceptable.

Further DDC have identified that the site is liable to flood and that a flood risk assessment is required. The constraints of the existing infrastructure with regards sewage and flooding is insufficient for a development of this size.

The parish council would urge Dover District Council to reconsider this site and act in a manner that is both consistent and to protect the AONB.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	This development will have a significant impact on the residents of Alkham and is damaging to the AONB. The Parish Council would wish to make the voice of our residents known to the Inspector. The Parish Council is passionate in its resolve to maintain the character of the AONB.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	IT is regnised the need for additional housing but it must come with appropriate design and supporting infrastructure, to ensure safety and preserve the character of an historic AONB village. The junction of this develoment area is already an accident hot spot as the road's exit is freequently blind due to visability splays and high speed of traffic.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	Parking provision on the curtalige of the site needs to be adaquate for the planned number of dewellings as the road is already extremely congested by existing resident vehicles. Slow and reduce passing traffic and review design of road junction with Alkham valley road to improve both vehicular and pedestrian safety.

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The current sewage provision in the area is overloaded often requiring tanker support. Poluted surface water endangers the aquifer and local residents so this needs to be addressed as part of the residential planning process.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>DDC Note: Please see detailed representation (attached at 1770) which has been divided against numerous consultation points. The representation has images within the test. The text below is an extract from the detailed representation 'by an Alkham resident'.</p> <p>5 Housing Growth</p> <p>5.1 The Green Integration Plan and the local housing plan originally identified considerable growth for Dover District with land initially to be allocated for 14,000 new homes with a target to complete 10,100 homes by 2026. This target now appears to have been reduced and the new plan identifies the broad areas where the growth of the additional homes will be located; notably sites within the Dover urban area, Whitfield, Deal, Sholden and Sandwich.</p> <p>5.2 The Dover District Council Plan justifies its housing allocation growth on the grounds of identified need in line with NPPF and the Department of Levelling Up Housing and Communities criteria and as such has identified a number of choices for housing based on supply, demand, windfall sites etc. As a result a number of small development sites have been identified throughout the District including one in Alkham as well as a plan for a major Urban expansion site at Whitfield.</p> <p>5.3 The District Plan identifies a requirement for an additional 42 traveller pitches throughout the district and identifies two such pitches in Alkham and three others elsewhere.</p> <p>Comment 5</p> <p>a) I welcome the fact that the Plan wishes to increase the types of housing built, encouraging designs to maximise climate benefits and I take no issue with the site for ten houses identified within Alkham and would welcome the development of more affordable housing to encourage more families into the village.</p> <p>b) Alkham has many traveller residents who partake in village life I but would query where the other 37 sites will be accommodated as windfall proposals sites have not been identified. Information on this would be welcome .</p> <p>c) However I must raise severe concerns re the planned development at Whitfield</p> <ul style="list-style-type: none"> • The DDC highlights the requirement for 6350 homes at Whitfield stating that this will be supported by education, primary health and social care , utility services retail and leisure provision as well as the development of the Whitecliff Business Park area at Whitfield which will not only have retail but also light industrial and haulage uses. • The Plan talks at length on the landscaping and it highlights transport networks and in particular references the upgrades required for the Whitfield and the Duke of York Roundabouts It also says that consideration must be given to the local transport links , the Alkham road , the A256 and Whitfield Hill • This matter was raised in 2014 when the Transport Plan for 2015 -2030 was adopted and no action was taken. • Since that time traffic along the Alkham Valley has hugely increased. Representations have been made to the local MP, KCC and a Highway improvement plan submitted all to no avail. • The current plan makes a flawed assumption that householders and businesses will access routes to London via the A20/M20 or A2/M2 whereas in reality they use the Alkham Valley Road , a DECLASSIFIED Road to access the M20. This matter is the subject of more detailed comment later in the report under transport <p>D) As housing increases traffic will continue to expand and radical options to consider the Valley a green space in the middle of urban development with road only open for business residents leisure use and emergency vehicles offering a range of bridleways, walks, cycle routes should be explored. This type of scheme has been successfully carried out in other areas such as the Goyt Valley Derbyshire and can lead to vibrant rural community improved air quality and improved traffic management</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Please see appended report</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I can speak to any of the points raised in the attached document

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Re above plots that are looking at having dwellings on them, can I be one of the voices that says: NO Wildlife, flora and fauna will be ruined. People's lives ruined by this quiet village becoming busier and even more noise pollution and racing around the village in cars and bikes and flouting driving rules. Flooding will be more of a risk. Water shortages will be more of an issue and slower services in telephone lines, broadband and electricity and gas. Once again this probably won't be considered and backhanders will be going on to build these. And the long term future and sustainability not thought about.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The road Capel is a very dangerous road with more traffic it will make the junction worse with traffic going both way accidents will happen. Also the dwellings there a to many we're they are proposed to be built it will destroy an Area of natural beauty. There's a dip in the land and privacy for people living in Capel street will be impaired also loss of light the noise factor. And parking will be impossible to park outside your own home. there are also listed buildings in the area
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Local plan - Land west of Capel Street - CAP006</p> <p>The proposed new road will be running along our boundary hedge just a few meters from our back door, producing noise, pollution and extreme loss of privacy. Houses backing onto our rear garden will also present a severe loss of privacy. As the site slopes down, the highest points are above our roof line and would create another loss of privacy.</p> <p>Buildings backing onto our rear garden would be overshadowing and produce a loss of light and privacy.</p> <p>Capel Street and Cauldham Lane are both narrow and unsuitable for any increase in traffic of several hundred cars, vans, emergency vehicles, delivery trucks of all sizes. Emergency vehicles could find it impossible to access through the proposed narrow gap after the demolition of number 11 Capel Street.</p> <p>Traffic passing within a few meters of our back door, driveway and front & rear garden creating dangerous, unacceptable, and possibly illegal levels of pollution and noise nuisance.</p> <p>Previous planning applications have been rejected for development of this area, ALL those reasons still apply. Part of this same field, north of Green Lane footpath, is designated as an 'area of outstanding natural beauty' the question is - why is the area south of the footpath, the land in question, different? What makes it different?</p> <p>Capel-le-Ferne's present infrastructure is totally inadequate for any further development of this kind. In a time when populations are expanding and more sustainable food needs to be produced, covering good agricultural land with buildings is bordering on criminal. As we go into a recession, if built how many will remain unsold/unoccupied given the interest rates, inflation and mortgage rationing leaving a development unfinished or homes left empty or derelict. Some of the property's in Capel's most recent development of comparable size (40) on the New Dover Road stood unsold and empty for years.</p>

	In my submission to the Council in July 2021 I touched on some of these points and made perfectly clear that we strongly and unreservedly object to any development in this area west of Capel Street for all of the reasons above.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	This large development would cause numerous problems in Capel Street and Cauldham Lane as the access is quite restrictive, adding to the already traffic problem. Cauldam Lane is very narrow and virtually a single track road. Lack of amenities with in the village and the surrounding area ie doctors, schools. This is farming land as should be kept as such. This development has already been refused before. Drainage in the village needs to be improved and this will only add to the problem.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP44 land to the east of Great Cauldham Farm
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We object to the above plan for the following reasons: the site is on arable land used every year to grow valuable crops, creating a T junction five houses down from the busy New Dover road; Cauldham Lane and Capel Street junction is unsafe as it will cause traffic to build up at the top of Capel Street, this is a large increase in the number of dwellings in the village and we do not have the infrastructure to support this.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Please build on Brown Field land with proper access
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Other important factors:</p> <ul style="list-style-type: none"> - Capel Street is, as we all know, a very busy narrow road sustaining normal traffic + school traffic + an increasing number of large lorries and delivery vans. Choosing this road to gain access to and exit the proposed development would be an untenable idea. - Based on what I believe was suggested in the past: To access the new proposed estate, traffic would turn off at a proposed one way new road off Capel Street (adjacent to No.9). House No. 11 would be pulled down to create this road as it is now part of the development site. Traffic would come out again at another one way road a little further up Capel Street. This would make traffic conditions considerably worse all around. - *DDC REDACTED* this allegedly proposed new entry road (green area on the map) would make it difficult to enter/exit the drive. It would also be adjacent to our 3 bedrooms and the whole length of our garden (155ft /47m). This would unavoidably make our environment unpleasant, adding unwanted movement, noise and pollution at the front and on the side of the house. - The amazing open view at the back should also be preserved from an environmental point of view (so critical nowadays). The new proposed development would destroy this and unavoidably increase factors detrimental to the environment. It would also increase the population density of our "village", directly affecting the school intake number.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? The housing development needs to be scaled down. Capel Street does not have safe foot paths in parts of the road and from a pedestrian point of view is dangerous, and the volume of extra traffic the development will create is not acceptable. A footpath needs to be created and if necessary the hedge removed and replanted. Consideration also needs to be given to allowing at least two car parking places for each property within the development and designated visitors parking.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<ul style="list-style-type: none"> • 3 of the 4 sites allocated in the plan CAP006, CAP009(Decided) and CAP013 have very poor infrastructure • Capel Le Ferne is defined as a large village in the Plan, yet the allocation housing sites by settlement as identified within the Strategic Policies (table 3.3) allocates 95 dwellings, some 279% increase to Capel Le Ferne compared with the average of the other 5 villages in the district which has an average of 34 as can be seen in table 1 (Attachment). • In relation to Local Centres which has a separate definition, DDC strategy for the rural area, it is proposing to grow the adjacent villages of Eythorne & Elvington by 355 to create a new Local Centre. Excluding this Local Centre, Capel le Ferne's allocation of 95 is some 113% compared to the average of the 5 Local Centres identified in the Plan. The average in the district is 84 and Capel is a village not a Local Centre as can be seen on table 2 (Attachment). • When looking at the 4 sites proposed the increase would amount to circa 20% increase compared to that North of New Dover Road as identified table 3 and 4 (Attachment). <p>Sustainability In the Sustainability Appraisal, SA 10 state: To conserve and/or enhance the significant qualities, fabric, setting and accessibility of the district's historic environment SA 11 states: To conserve and enhance the special qualities, accessibility, local character and distinctive character and distinctiveness of the district's settlements, coastline and countryside. Capel is a unique settlement within Dover District, located over 500ft above sea level with the Heritage Coast to the South and AONB to the North, East and West of the settlement Sites CAP006, CAP011 and CAP013 will all have a significant negative impact on both SA 10 and SA 11. Capel Le Ferne Parish Council and our Parishioners have raised the above concerns and are extremely worried about the proposed local plan and the impact this would leave on our village.</p> <p>CAP006 Land to the east of Great Cauldham Farm, Capel-le-Ferne CT18 7LZ Number of units: - 70</p>

In the Local Plan Capel has been designated as a Large Village. However, Capel Parish Council are extremely concerned that Dover District Council still appear to be treating Capel as a Local Centre with an indicative number of dwellings set at 85 plus 15 (originally 10) for Longships, where planning permission has already been granted. The figure of 100 dwellings appears disproportionate when compared with the number of dwellings proposed in other Large Villages and Local Centres in this Local Plan and will have a major impact on the AONB that borders these sites.

The Parish Council considers that CAP006 has high-level constraints because of its prominent position and do not support this site for development as it does not sit well with Policy NE2.

The site is outside the settlement of Capel-Le-Ferne, the impact of any development here would be detrimental to the setting of the AONB which borders the site to the Northwest and the wildlife-rich habitat of the area. Development on this scale is also considered inappropriate in this location given the size of the existing settlement.

The access points proposed are from Capel Street and Cauldham Lane, both providing completely inadequate highway infrastructure, for example Cauldham Lane is single track with no passing places and Capel Steet, although two-way, has a very restrictive traffic flow due to parked vehicles on one side of the road making it in essence a single lane. This is because many houses towards the New Dover Road end of Capel Street are built on higher ground with no off-street parking.

KCC have concerns over whether a secondary emergency access onto Cauldham Lane is achievable.

The Cauldham Lane access point is of significant concern as it is a single-track lane. The lane is often blocked by delivery vehicles and is regularly used by heavy vehicles accessing the local farm and the industrial units further down the lane.

Consideration must be given to the increased volume of traffic resulting from this and other sites put forward in the new Local Plan (CAP 009 (Decided) & CAP013), together with a further 34 houses likely to be built in the near future at the lower end of Capel Street (CAP010 from the 2015 Local Plan). These sites could amount to 134 new dwellings that would need to access Capel Street. Currently there are approximately 170 dwellings fronting Capel Street. Therefore, the new and current Local Plans are likely to generate a substantial increase in traffic using Capel Street, which is totally unacceptable as the street cannot accommodate this increase due to the inadequate highways infrastructure as mentioned above.

This additional traffic would impact heavily on the New Dover Road/ Capel Street/Cauldham Lane's junction. This is already a dangerous junction and would be completely inadequate for the increase volume of traffic being proposed. DDC have previously raised concerns about this difficult junction. Historically there have been a number of road traffic collisions exacerbated by the blind entrance / exit to the B2011 often in foggy times. The poor visibility often experienced in Capel is due to its geological situation which is in excess of 500ft above sea level.

Capel Street is the main access route to the local Primary school so will add even further pressure at certain times of the day. The Parish Council are of the opinion that no further development should take place in this part of Capel because of the unconventional layout of the Capel Street/Cauldham Lane/New Dover Road junction, which would be impracticable to change along with parked cars and passing points in Capel Street as stated above.

Although Capel-le-Ferne is designated as a **Large Village**, it has little in the way of facilities and services. There is no post office, no health care facilities, no doctor, no dentist and no pubs within the village boundaries. **It only has one shop, a primary school and a through bus service to Dover, Folkestone and beyond.** This site does not conform with your Strategic Policy 3 – Housing growth, specifically identifies new development at accessible and sustainable locations which can utilise existing infrastructure, facilities and services, and to ensure development contributes to the sustainability of local communities and services, supporting regeneration and wherever possible make the best use of brownfield land. We see little evidence of this.

Many residents of Capel use Health Service facilities in Folkestone which are not directly accessible by bus, therefore, in order to access these services, residents tend to drive to Folkestone which is clearly at odds with **SP1.Planning for Climate Change. Item f**, which mentions reducing the need to travel.

It is also worth mentioning that because of Capel's geological position, it is unlikely that residents would walk or cycle to use facilities in the nearest towns.

This plot is a high class agricultural green field site that has been cropped for many years. The Parish Council object to the loss of valuable arable land and believe that the development of this site would be contrary the National Planning Policy Framework.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP44
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We believe the revised Local Plan is not sound for the following reasons: It has not been justified and is not effective as the reasonable, sustainable alternatives for additional housing previously suggested in larger development centres such as North Aylesham, Elvington and Ethorne and Farthingloe and included within the original plan have now been removed and the proposed allowance for housing has been increased in Capel-le-Ferne and may not be deliverable. The original draft Local Plan has been changed so that 900 fewer houses are proposed overall and yet the number of houses proposed in Capel-le-Ferne has increased

to 95. This is on top of recent planning permission for 34 houses off Capel Street, 15 dwellings at Longships on Cauldham Lane and 40 new dwellings in a recently completed development at Grasslands. It would appear that Dover District Council are spreading development with numerous small sites which is uneconomic and unsustainable rather than concentrating in larger developments where existing services, facilities and infrastructure are already available. We find it difficult to understand why Dover District Council persist with this policy in relation to Capel-le-Ferne when it clearly is not in keeping with the council's stated objectives.

SP2 - Planning for Healthy and Inclusive Communities and

SP3 – Housing growth

SP2 states that *'The Council will support the creation of healthy, inclusive and safe communities in the District by ensuring that new development is well served by services and facilities (for example education, health care, community, cultural facilities, play, youth, recreation, sports, faith and emergency facilities) and that a mix of uses are provided in new development that support daily life.'*

SP3 states that what they are trying to achieve is *'To focus new development at accessible and sustainable locations which can utilise existing infrastructure, facilities and services, and to ensure development contributes to the sustainability of local communities and services, supporting regeneration and wherever possible make the best use of brownfield land'.*

We do not believe that the proposals for Capel-le-Ferne meet any of the objectives in the above Strategic Policies as follows:

- The proposed development is on arable land, currently in use and not brownfield land.
- The development of the village is clearly not sustainable – Capel-le-Ferne has little or no facilities and services – only one small shop, no post office, no health care facilities, no doctor, no dentist, no pubs within the village confines and only a primary school. Therefore, in order to access services, residents need to drive to either Folkestone or Dover which is clearly at odds with SP1 – Planning for Climate Change.
- The location of the proposed development in SAP 44 will connect to existing overloaded roads using Capel Street as its primary access point.
- The addition of 40 dwellings recently completed at Grasslands has not led to any benefit to the community in terms of new services or facilities.
- Trying to 'grow the villages' by increasing the number of houses, but not having any plans to help develop services and facilities is unsustainable and uneconomic and will only lead to more unnecessary travel.
- There is only a single bus service and no train service at all.
- The strategic policy SP6 – Economic Growth identifies areas distant from Capel-le-Ferne for economic development. Capel-le-Ferne has little opportunity for employment generation so cannot be seen to contribute to SP6.
- The agreed number of number of houses for the site was originally set at 100, this was then reduced to 50 to allow a single point of access to the site. It has now been increased to 70 and is deemed achievable. We would question this and believe any scheme is likely to be undeliverable. It would appear that the increase in the number of houses is being driven by economic needs to cover developer contributions which are likely to be substantial rather than by any need by Dover District Council to provide more housing. The development at Longships under SAP45, which has been granted planning permission, exceeds the allocated housing number by 5 dwellings on the basis that sticking to the SAP45 allocation of 10 houses would be uneconomic. The development of SAP44 is likely to encounter similar cost problems and is unlikely to be achievable in the proposed timetable (2021-2026) due to strong local opposition when it comes to the planning application stage

CONSULTATION WITH STATUTORY CONSULTEES (Reg 22)

We believe that Dover Council **has not fully consulted with statutory consultees** to ensure that the existing facilities where present are sufficient or that plans are in place for future development of infrastructure.

SP11 – Infrastructure and Developer Contributions states: *Supporting infrastructure should be provided in advance of, or alongside, the development, unless there is sufficient existing capacity. The appropriate phasing for the provision of infrastructure will be determined on a case-by-case basis with reference to the most up to date Infrastructure Delivery Plan (IDP) and the priority classification along with other relevant evidence, and in consultation with the relevant providers.*

It is noted that the site at Aylesham North (AYL004) has been removed for transport reasons – essentially Kent County Council objected on transport grounds – yet given 500 homes in a sustainable location (two rail stations, large settlement), that would seem to be logical focus for development and the Council has failed its Duty to Cooperate with Kent County Council by failing to ensure the relevant transport assessments are undertaken / potential mitigation identified and agreed, rather than simply removing the large site from the plan and yet still maintaining and increasing allocations on the edge of villages (such as Capel-le-Ferne) that they hope are small enough to slip under the radar at Examination.

	<p>The existing infrastructure in Capel-Le-Ferne is already struggling to cope with the existing level of housing. Water supply is weak throughout the village, power outages are common, and drainage has insufficient capacity and frequently blocks. The addition of 90 houses along with the 49 already given planning permission will make this worse. Access to the site is proposed via Capel Street, an already congested road (little off street parking, busy cut through, primary school).</p> <p>Looking through the supporting Infrastructure Delivery Plan (IDP), no mention is made of any suggested improvements to facilities/services or for any proposed improvements to be carried out by Kent Highways, Southern Water (drainage) or Affinity Water (water supply) in Capel-le-Ferne. Incremental development such as extensions to villages are more difficult to plan for with respect to infrastructure as they are too fragmented and should therefore be avoided.</p> <p>Transport modelling has been carried out for developments in other areas, but nothing has been done for Capel-le-Ferne where there will be over 100 new houses accessing Capel Street, a narrow congested road. This was highlighted as a significant problem during the long drawn out process of granting planning permission for 34 dwellings off Capel Street. The revised Local Plan is proposing to add a further 70 houses along with 20 dwellings on Cauldham Lane. All the traffic from these developments will exit onto the New Dover Road at the junction of Capel Street/Cauldham Lane –a poorly designed junction which has been identified in numerous surveys as a real problem for development in the area. The Local Plan does not include any transport modelling for this area.</p> <p>Kent County Council have reservations about access to the site SAP44 indicating that it is not ideal. Given the current frequent traffic congestion in the area, this is not surprising. Particular concern was raised regarding emergency vehicle access, hence the requirement for a secondary access to SAP44 and further consultation with the emergency services. However, it should be noted that this secondary access is via a single track lane. Clearly insufficient consultation has been carried out at this stage.</p> <p>Although Dover District Council have consulted with Capel-le-Ferne Parish Council as required, it would appear that they have not engaged fully with the parish council as the objections raised by the council to overdevelopment of the village have been ignored both in this local plan and in planning permissions granted in the past. If the purpose of consultation is to incorporate the views of the local population, Dover District Council have clearly failed in this regard.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>We believe that the best way to make the plan more sound would be to remove SAP44 from the areas where housing can be considered and to provide more housing in a more sustainable location, where there is easy access to facilities, services, transport and infrastructure (or where the size of the proposed development would warrant significant investment in new infrastructure).</p> <p>The Planning Inspector may wish to consider that the non-compliance with the duty to co-operate with other bodies is sufficient to reject the plan outright. However, as a compromise, if SAP44 were removed from the plan, then the requirement to fully co-operate with utility providers in respect of Capel-le-Ferne would no longer be an issue and the plan could go forward to the next stage.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I feel it is necessary as it would appear to me that the council is not following it's own strategic policies and ignoring the genuine objections made by the local Parish Council and residents of Capel-le-Ferne.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><u>Dover Local Plan – Section 19 Consultation</u></p> <p>SAP 44</p> <p>SOUNDNESS</p> <p>The revised Local Plan is not sound for the following reasons:</p> <p>It has not been justified and is not effective. It has not been positively prepared to meet 'objectively assessed' needs and for this reason is not consistent with National Policy.</p> <p>Why have the reasonable, sustainable alternatives for additional housing previously suggested in larger development centres such as North Aylesham, Elvington and Ethorne and Farthingloe and included within the original plan have now been removed? At the same time the proposed allowance for housing has been increased in Capel-le-Ferne and will not be deliverable.</p> <p>The original draft Local Plan has been changed so that 900 fewer houses are proposed overall and yet the number of houses proposed in Capel-le-Ferne has increased to 95.</p> <p>This is on top of recent planning permission for 34 houses off Capel Street, 15 dwellings at Longships on Cauldham Lane and 40 new dwellings in a recently completed development at Grasslands.</p> <p>Why is Dover District Council spreading development across numerous small sites which is uneconomic and unsustainable rather than concentrating in larger developments where existing services, facilities and infrastructure are already available?</p> <p>Why Dover District Council persist with this policy in relation to Capel-le-Ferne when it clearly is not in keeping with the council's stated objectives?</p> <p>SP2 - Planning for Healthy and Inclusive Communities and</p> <p>SP3 – Housing growth</p> <p>SP2 - Planning for Healthy and Inclusive Communities and</p> <p>SP3 – Housing growth</p> <p>SP2 states that <i>'The Council will support the creation of healthy, inclusive and safe communities in the District by ensuring that new development is well served by services and facilities (for example education, health care, community, cultural facilities, play, youth, recreation, sports, faith and emergency facilities) and that a mix of uses are provided in new development that support daily life.'</i></p>

SP3 states that what they are trying to achieve is 'To focus new development at accessible and sustainable locations which can utilise existing infrastructure, facilities and services, and to ensure development contributes to the sustainability of local communities and services, supporting regeneration and wherever possible make the best use of brownfield land'.

But the proposals for Capel-le-Ferne do not meet any of the objectives in the above Strategic Policies as follows:

- 1 The location of the proposed development in SAP 44 will connect to existing overloaded roads using Capel Street as its primary access point.
- 2 The proposed development is on arable land, currently in use and not brownfield land.
- 3 The development of the village is clearly not sustainable – Capel-le-Ferne has little or no facilities and services – only one small shop, no post office, no health care facilities, no doctor, no dentist, no pubs within the village confines and only a primary school. Therefore, in order to access services, residents need to drive to either Folkestone or Dover which is clearly at odds with SP1 – Planning for Climate Change.
- 4 The addition of 40 dwellings recently completed at Grasslands has not led to any benefit to the community in terms of new services or facilities.
- 5 Trying to 'grow the villages' by increasing the number of houses, but not having any plans to help develop services and facilities is unsustainable, uneconomic and unethical. It will only lead to more unnecessary travel.
- 6 There is only a single bus service and no train service at all.
- 7 The strategic policy SP6 – Economic Growth identifies areas distant from Capel-le-Ferne for economic development. Capel-le-Ferne has little opportunity for employment generation so cannot be seen to contribute to SP6.
- 8 The agreed number of number of houses for the site was originally set at 100, then reduced to 50 to allow a single point of access to the site. It has now been increased to 70 and is deemed achievable. This is not realistic and undeliverable. It would appear that the increase in the number of houses is being driven by economic needs to cover developer contributions which are likely to be substantial rather than by any need by Dover District Council to provide more housing. The development at Longships under SAP45, which has been granted planning permission, exceeds the allocated housing number by 5 dwellings on the basis that sticking to the SAP45 allocation of 10 houses would be uneconomic. The development of SAP44 is likely to encounter similar cost problems and is unlikely to be achievable in the proposed timetable (2021-2026)

Consultation With Statutory Consultees (Reg 22)

Dover Council **has not fully consulted with statutory consultees** to ensure that the existing facilities where present are sufficient or that plans are in place for future development of infrastructure.

SP11 – Infrastructure and Developer Contributions states: *Supporting infrastructure should be provided in advance of, or alongside, the development, unless there is sufficient existing capacity. The appropriate phasing for the provision of infrastructure will be determined on a case-by-case basis with reference to the most up to date Infrastructure Delivery Plan (IDP) and the priority classification along with other relevant evidence, and in consultation with the relevant providers.*

It is noted that the site at Aylesham North (AYL004) has been removed for transport reasons – essentially Kent County Council objected on transport grounds. However, given 500 homes in a sustainable location (two rail stations, large settlement), that would seem to be the obvious logical focus for development and the Council has failed its Duty to Cooperate with Kent County Council by failing to ensure the relevant transport assessments are undertaken and potential mitigation identified and agreed; rather than simply removing the large site from the plan and increasing allocations on the edge of villages (such as Capel-le-Ferne) that they hope are small enough to slip under the radar at Examination. This is not ethical.

The existing infrastructure in Capel-Le-Ferne is already struggling to cope with the existing level of housing. Water supply is weak throughout the village, power outages are common, and drainage has insufficient capacity and frequently blocks.

The addition of 90 houses along with the 49 already given planning permission will make this worse. Access to the site is proposed via Capel Street, an already congested road (little off street parking, busy cut through, primary school).

Note also the checkered history of road traffic accidents and injuries caused at the congested at the junction of Capel Street/Cauldham Lane from New Dover Road.

Looking through the supporting Infrastructure Delivery Plan (IDP), no mention is made of any suggested improvements to facilities/services or for any proposed improvements to be carried out by Kent Highways, Southern Water (drainage) or Affinity Water (water supply) in Capel-le-Ferne.

Incremental development such as extensions to villages are more difficult to plan for with respect to infrastructure as they are too fragmented and should therefore be avoided.

	<p>Transport modelling has been carried out for developments in other areas, but nothing has been done for Capel-le-Ferne where there will be over 100 new houses accessing Capel Street, a narrow congested road. This was highlighted as a significant problem during the long drawn out process of granting planning permission for 34 dwellings off Capel Street. The revised Local Plan is proposing to add a further 70 houses along with 20 dwellings on Cauldham Lane. All the traffic from these developments will exit onto the New Dover Road at the junction of Capel Street/Cauldham Lane –a poorly designed junction which has been identified in numerous surveys as a real problem for development in the area. The Local Plan does not include any transport modelling for this area.</p> <p>Kent County Council have reservations about access to the site SAP44 indicating that it is not ideal. Given the current frequent traffic congestion in the area, this is not surprising. Particular concern was raised regarding emergency vehicle access, hence the requirement for a secondary access to SAP44 and further consultation with the emergency services. However, it should be noted that this secondary access is via a single track lane. Clearly insufficient consultation has been carried out at this stage.</p> <p>Although Dover District Council have consulted with Capel-le-Ferne Parish Council as required, they have not engaged fully with the parish council as the objections raised by the council to overdevelopment of the village have been ignored both in this local plan and in planning permissions granted in the past. If the purpose of consultation is to incorporate the views of the local population, Dover District Council have clearly failed in this regard.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Changes I would make:</p> <p>Take SAP 44 out of the plan completely as it is not following the policies that the council say they are trying to Achieve and not following their own policies.</p> <p>Choose one of the alternative sites for additional housing in larger development centres such as North Aylesham, Elvington and Ethorne and Farthingloe and included within the original plan. In particular, Aylesham North (AYL004) is far more appropriate, given 500 homes in a sustainable location (two rail stations, large settlement), that would seem to be the obvious logical focus for development</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I would like to participate as I represented the Village Council in recent Planning Committee meetings.</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I beleive the plan is unsound due to the fact that there are no services to accomadate further dwelligns. The only service the village has is an over subscribed bus service that would not be sufficient for taking any further children to the towns for secondary schools. The local infrastructure is not sufficient to support this number of houses and cannot be made so due to existing properties. There are already flooding and water pressure issues in the area that should buiding go ahead will only become worse. I am also concerend that there will be significan timpact to the AONB

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object most strongly to the proposals in the latest local plan for proposals CAP006 and CAP013.</p> <p>Despite the local resident majority view objecting in respect of CAP009 it is noted that the Council at the stroke of a pen has disregarded these views and agreed to this development. Any further development in the areas proposed will despoil the rural nature of Capel Le Ferne and in particular Cauldham Lane, at least CAP011 is close to a major thoroughfare and will not require a rural lane to become a main road.</p> <p>Both CAP006 and CAP013 and in conjunction with CAP009 2ill require the widening of Cauldham Lane in an attempt to ease the inevitable increase in traffic flow. All these proposals in conjunction with the traffic now accessing great Cauldham farm industrial complex, are likely to increase the number of additional vehicle movements by 180 with the inevitable bottle neck of vehicles trying to access the B2011 from both Capel Street and Cauldham Lane.</p> <p>It is curious to note that the persistent applications for CAP006 site have been; over time reduced to 70 dwellings (previous latest proposal was for 50 dwellings) on the basis that local utilities are unlikely to be to support a greater number. This is particularly applicable to water supply. The water pressure in Cauldham Lane has always been low and is particularly low in summer months. With the above proviso that utilities would be unable to support a larger development in CAP006 it is now suggested that CAP009 and CAP013 (15 dwellings) are supportable – where is the logic for this?</p> <p>I am further concerned that the proposal for CAP006 is likely to be considered as an interim solution bearing in mind the comment in SAP44 item (h) that refers to future upsizing. This suggests the site s likely to be considered for more development in the future. Does this mean that there are plans to improve local infrastructure in regard to water supply, reliable electricity supply along with drainage referred to in item h above?</p> <p>In conclusion I find it unacceptable that these proposals should be considered where local rural lanes should be developed in to major thoroughfares when there are sites close to the B2011 that have been mysteriously redesignated as not suitable but would be far more easily accessed.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP45
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	CAP013 This land is on a dangerous corner and at the end of a narrow lane which already has a number of large lorries and farm vehicles using it numerous times on a daily basis. CAP009 should never have been granted permission for the same reason. These 2 plus CAP006 will be accessed by an already busy dangerous junction of B2011/Capel Street/Cauldham Lane.

	<p>I was recently waiting in a queue of 5 vehicles coming from Folkestone and 2 lorries on the opposite side of the road, waiting for a large lorry to exit Cauldham Lane.</p> <p>A few months ago I was attempting to exit Cauldham Close and had to wait for a lorry to perform a 6 point turn to enable 4 cars to come from the direction of Longships to the top of Capel Street</p> <p>The government has expressed a wish for the country to become self sufficient in food. Why would any sane council give permission for CAP006 which is prime agricultural land.</p> <p>Please consider carefully the safety of villagers, particularly the elderly who struggle already with the traffic in the area and please remember that Capel Street is the access for the village school, village hall and the Baptist chapel.</p> <p>Capel residents already have problems accessing doctors, additional residents will exacerbate the problem</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>As I have already indicated, these developments will expose villagers to danger and reduce the country's ability to be self sufficient in food</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>Hopefully, the elected Parish councillors will be able to pass on the comments of the villagers</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	CAP006 Object most strongly. Too many houses - the access to Capel Street, just not suitable, not wide enough, not enough vision. Capel Street is chaos frequently now. Would public services be up to such a vast increase on demand? I think not. We would lose our identity as a village, surely as residents we have that right to stay as a village.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	1. With no major changes or improvements to Capel-le-Ferne highways (Roads or Pavements) for numerous years, any increase in extra vehicle traffic or additional road use will have a detrimental effect on Fire, Police and Ambulance Services response times. Fire Services state their vehicles require a 4 metre gap to operate. (Issue relates to Parking, Highway Safety, Traffic, Noise and Disability Parking/Access) 2. Before building any housing on farm land, building on old disused buildings and exindustrial sites be a priority. (Issue relates to Government Policy) 3. With no major changes or improvements to Capel-le-Ferne and surrounding infrastructure, such as Primary and Secondary schools, Doctors Surgeries, Hospitals etc, any increase in population (to Capel-le-Ferne) will have a detrimental effect on services that are either very strained or at breaking point. (Issue relates to Government policy Parking, Highway Safety, Traffic, Noise, Disability Parking/Access and proposals in the Development Plan)
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I believe the proposals concerning this particular location are unsound for the following reasons: -</p> <ol style="list-style-type: none"> 1 The location is very close to an Area of Outstanding Natural Beauty and the scale of the development envisaged is out of keeping with this designation. 1 This is productive agricultural land, and its loss would seem to be contrary to the current Government policy to ensure 'food security' and also its stated policy to emphasise the use of Brownfield sites for housing development. 1 There is every likelihood that the development proposed would cause significant traffic disruption and threaten pedestrian safety. The current proposals envisage a main exit from the site onto Capel Street with a backup/emergency exit onto Cauldham Lane. As regards Capel Street – this street is the site of severe congestion at peak times (notably school drop off and pick up plus the usual commuter periods). I am surprised that any traffic survey undertaken did not identify this feature and would therefore question the timing of said survey! A development on the scale envisaged would inevitably generate a significant increase of traffic flows, particularly as most future householders will inevitably work outside the village. The most obvious result would be log-jam in Capel Street. The secondary exit onto Cauldham Lane is supposedly not for regular traffic usage but how on earth would this be adequately monitored and controlled to ensure it was not abused. The aforementioned potential problems in Capel Street would obviously incline motorists to seek alternative routes. Cauldham Lane is a typical narrow country lane, bordered by hedgerows and lacking any pavements, and any increase in traffic usage would have a seriously negative impact. The lane provides the only access for HGVs and articulated lorries regularly servicing the nearby farm and adjacent industrial units and such vehicles would have great difficulty in maneuvering/reversing if confronted by oncoming traffic. Any disruption would adversely impact local business. In addition, there are concerns for the safety of pedestrians and horse riders – the lane is used by pedestrians (some disabled) dog walkers and horse riders. It should be remembered that there are no pavements and there is a blind bend which also happens to be the entrance to a bridal path. In conclusion there is significant scope for both traffic disruption and the potential for heightened risk to pedestrians.

	1 There is highly likely to be an adverse impact on local utilities, especially water supply/pressure. I believe the local water company have already flagged potential supply problems if the development proceeds on the scale envisaged. There is already a recognized problem with inadequate water pressure locally and this problem can only worsen.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	This development proposed should ideally be rejected in its entirety, or at least substantially scaled back
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	CAP006 Object most strongly. Too many houses - the access to Capel Street, just not suitable, not wide enough, not enough vision. Capel Street is chaos frequently now. Would public services be up to such a vast increase on demand? I think not. We would lose our identity as a village, surely as residents we have that right to stay as a village.

This would result in a massive increase in traffic. Capel Le Ferne roads are not the easiest to negotiate at present and this would increase the problems i.e., what effect would it have on emergency services. The infrastructure of the village is not capable of supporting new developments. Things like water pressure have been a problem with the current population of the village, increase the population, increase the problem.</p> <p>What of design and appearance, when Grasslands obtained planning permission, I like many of the villagers were under the impression that houses would be built in keeping with the appearance of the village, what was built a modern housing estate that would fit in very well on Folkestone Beach what we have is a blot on the landscape.</p> <p>Any development is going to cause loss of trees, hedgerows and natural habitat, for wildlife. We are being reminded every day that we need to act quickly to help nature conservation before it's too late.</p> <p>We live in a time of unrest and turmoil and a planet that has an ever-increasing population. We are told that food production is becoming more strained and the need for countries to become as productive as possible in growing as much food stuff as they can. I therefore feel that to even consider development on CAP006 would be completely inappropriate, as this is agricultural land.</p>

Due to the war in Ukraine there should be a stop to the building on farm land for the next 2-5 years due to the shortage of grain, this field has been used for crops for many years and believe this is how it should stay, before building on any farm land the council should investigate any old disused and ex industrial sites first. Any additional road use will have a detrimental effect on fire, police and ambulance services response time, with fire engines requiring a 4 metre road with space to operate, existing local roads are not adequate. Capel street and Cauldham lane are not wide enough for increased traffic.

I have been a resident in Capel Street (DDC Redacted) for 23 years, I have raised my concerns many times as this seems to be a regular application over the period of time I have lived here. It's so sad that the farmer who owns the field behind me (proposed 70 dwellings) has stooped to a new low on offering and successfully succeeding on purchasing a bungalow (that can be demolished) to enable an entry road from Capel street as this in the past has been an issue. This area is noted on the plan. All this points out to me is this man has no concern for the local community and is only driven by financial gain. The residents of Capel like myself live in Capel due to the peace and outstanding countryside which surrounds us which obviously attracts all sorts of wild animals/ insects/ wild flowers. All of this I'm sure is part of the attraction for young couples/ families and Senior citizens to live in a SMALL village and helps to promote the community we now have. Concerns are felt as we feel Capel is at its limits now and especially our primary school. All this says to me if these dwellings are passed it will open the door for future dwellings and mass expansion in infrastructure to be able to make this viable. I'm sure you can sense but just to confirm I am absolutely against all the projects proposed and it will take away everything Capel Le Ferne stands for.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Iceni Projects Limited ('Iceni') is writing on behalf of Quinn Estates Ltd ('Quinn Estates') to submit representations to the Dover District Local Plan Regulation 19 Consultation in respect of land to the east of Great Cauldham Farm, Capel-le-Ferne ('the Site').</p> <p>These representations should be considered alongside the following supporting documents appended to this letter:</p> <ul style="list-style-type: none"> • Appendix 1 - Indicative Site Layout Plan; • Appendix 2 - Landscape Briefing Note; • Appendix 3 – Transport Note; and • Appendix 4 – Cultural Heritage and Archaeology Note. <p>Quinn Estates supports the allocation of the Site within the new Local Plan for 70 dwellings in order to support the Council's target of 11,924 homes over the Local Plan period to 2040. Nevertheless, as set out in further detail below, the Site can sustainably accommodate additional housing to deliver further dwellings in the Plan period, as demonstrated by the documents appended to this letter.</p> <p>The vision for the Draft Local Plan reflects the growing importance of new challenges facing local communities in regard to climate and ecological emergency, and greater emphasis on the protection and enhancement of retail, leisure, cultural and commercial development across the district area, and promoting the health and social wellbeing of communities. The corresponding objectives strive for a more prosperous economy, as well as vibrant new communities. Nevertheless, Quinn Estates considers that the approach to assessing settlements, and the resultant amount of housing allocated to settlements, is based on an ineffective method of understanding the sustainability of villages. Quinn Estates considers that the Plan would be strengthened by increasing the amount of housing allocated to settlements which can suitably accommodate such growth.</p> <p><u>a. Relevant Background</u></p> <p>Quinn Estates Quinn Estates is the south east's foremost mixed-use developer with numerous development interests within Dover District, Kent and the wider South East area. The company has delivered both successful community extension schemes and stand-alone development sites both within rural and urban locations within the District. Quinn Estates' track record of housing delivery should be a material consideration that should inform key planning decisions, including which sites to allocate for development. Furthermore, Quinn has demonstrated through its' actions that it can formulate and deliver development solutions of high community value, always working hard to identify through community engagement how the company's developments can support and strengthen communities by delivering community infrastructure needed. They have a track record of delivery in Dover, with over 200 new homes and 45,000 sq.ft of commercial space delivered.</p> <p>Site and Surroundings The Site adjoins the existing settlement of Capel le Ferne, though it is centrally located within the settlement given the proposed Site lies between Capel Street and Cauldham Lane. The Site is approximately 4ha and currently comprises farmland. It is located outside the settlement boundary as defined by the Core Strategy 2010.</p> <p>The Site is well connected to the local footway network with a footway running alongside Capel Street. The path is approximately 2.0m in width and provides links to the north and to the south as well as excellent connectivity to the centre of the village, including a network of interconnected public rights of way and bridleways.</p> <p>The Kent Downs Area of Outstanding Natural Beauty (AONB) borders the Site to the west and the Capel le Ferne settlement boundary bounds the site to the east. Notably, the landholding comprises the only land adjoining the settlement that lies outside of the AONB, which makes the land the best suited and the most sequentially preferable development option for the settlement. The Site is not located within a Conservation Area and there are no heritage assets or Scheduled Ancient Monuments within the site boundary. The whole of the Site is located within Flood Zone 1.</p>

To the north-west, the Site is bound by agricultural fields whilst the north-east corner is bound by residential properties. To the south and east of the site are further existing residential dwellings fronting onto Cauldham Lane and Capel Street. Existing dwellings also border the western boundary of the Site on the southern section and farmland on the northern section. The existing settlement is characterised by one and two storey dwellings. The rear gardens of the existing dwellings directly adjoin the Site. The gardens are generally substantial in size and therefore setback from Site.

The Site is well located in proximity to services, facilities, amenities and public transport making it a sustainable location for residential development. Capel le Ferne Primary School and Village Hall are located approximately 200m north-east of the Site (less than 5-minute walk), a convenience store is located less than 200m from the Site to south-east and so the most important components of a sustainable settlement are already in situ. In addition, the Site is served via nearby bus stops located on New Dover Road, approximately 200m to the south of the Site. The bus service runs every 15 minutes between Dover, Folkestone, New Romney, Rye and Littlestone-on-Sea and as such, there is a frequent and reliable public transport option to access a variety of high order settlements. This connectivity is an important and sometimes overlooked factor in determining the sustainability credentials of settlements such as Capel.

Capel le Ferne is defined in the adopted Dover District 2010 Core Strategy as a Local Centre providing a range of shops and services for the local communities and surroundings. There are also a variety of nearby employment areas including Folkestone and Dover that provide work opportunities for residents of Capel le Ferne and surrounding areas. Dover is the principal town in the District and therefore hosts a range of employment opportunities including those relating to the international port and retail related employment, whilst Folkestone is a sub-regional town in the Folkestone & Hythe Local Plan which provides “(inter-) national transport links, and a good choice of employment, retail, cultural/leisure and public services for the whole of the district, adjoining districts and visitors.”.

b. Response to Draft Dover District Local Plan

The draft Dover District Local Plan Regulation 19 Consultation seeks comments on the legal compliance, soundness, and compliance with the duty to cooperate of the Submission Version of the plan. This section responds to the draft Local Plan and assesses its soundness in relation to the housing growth strategy (Policy SP3) and proposed allocation at Great Cauldham Farm (Policy SAP44).

Quinn Estates welcomes the inclusion of the Site within the Draft Local Plan for residential development. However, Quinn Estates consider that the Settlement Hierarchy, particularly for Capel-le-Ferne, is based on an assessment methodology which fails to appropriately assess the sustainability of the village. Accordingly, the village could accommodate additional growth and the Table 4.12 should be amended to propose a minimum of 70 dwellings on the site. The current approach to the development strategy raises several issues which can be addressed through the allocation of additional housing growth to Capel le Ferne, including the Site subject to this representation.

Housing Need and Supply

Table 3.1 of the draft Local Plan outlines an overall supply of 11,924 dwellings across the plan period. This equates to an 8% buffer over the minimum housing requirement derived from the standard method. This is proposed to be met through a combination of committed schemes, site allocations and windfall sites. This is not considered to be sufficient due to the over reliance on one strategic site - the Whitfield Urban Expansion.

Quinn Estates has no objection to large-scale housing development at strategic sites playing an important role in meeting housing need. However, what looks good on paper needs to deliver in practice. However, in a District like Dover where there is a need for the benefits of growth to translate across the District, the spatial strategy should be seeking to unlock growth and inward investment at other settlements, such as Capel le Ferne, and this is a significant weakness of the Plan in its current form. Paragraph 35 of the NPPF outlines how plans are effective where they are found to be deliverable over the plan period. The disproportionately high dependence on Whitfield Strategic Allocation (SAP1) results in a plan which raises considerably uncertainty as to this key soundness test.

Strategic scale sites typically have long lead-in times and often require infrastructure to be delivered up-front. As a result, they may not begin to deliver housing until the later in the Plan period. Smaller scale sites, such as the subject Site at Great Cauldham Lane, which is rightly allocated to ensure the plan is positively prepared in line with the requirements of the NPPF is supported. In this regard, Paragraph 60 of the NPPF highlights that “to support the Government’s objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed”. The allocation of the site at Great Cauldham Lane is supported by Quinn Estates, it can come forward early in the period, it is capable of delivering a mix of housing types and tenures and therefore makes an important contribution to local housing needs in the near future.

Quinn therefore encourages Dover District Council (DDC) to make every effort to meet, and if possible, exceed this target to ensure the Government’s objective to significantly boost the supply of housing can be met. As part of this a wide range of sites of different sizes and locations should be allocated to ensure choice and flexibility in the supply, in accordance with paragraph 67 of the NPPF. Sites such as Great

Cauldham Farm should therefore be utilised to their full extent to reduce this over reliance on the Whitfield Urban Expansion to deliver housing across the plan period.

Settlement Hierarchy

Quinn Estates considers that the approach taken to the delivery of housing in Dover as set out within Table 3.3 of the Regulation 19 Submission Version of the Draft Local Plan is not a result of sound plan-making. It is considered that the Settlement Hierarchy inappropriately assesses settlements using a bizarre matrix system which does not reflect how residents use services, and the resultant ability for a settlement to support additional residential development and deliver benefits to existing residents.

The Council's evidence base for the Local Plan comprises a range of technical reports and topic papers including a Rural Settlement Hierarchy Study (2022). Quinn Estates are disappointed to note that the previous comments made at Regulation 18 stage have not been taken into account, and that Capel le

Ferne remains downgraded to a 'Larger Village' rather than as a 'Local Centre' as the 2010 Dover Core Strategy currently acknowledges. Within the 2010 Dover Core Strategy Capel le Ferne was identified as a Local Centre and therefore a secondary focus for development in the rural area; suitable for a scale of development that would reinforce its role as a provider of services to its home and adjacent communities.

The Rural Settlement Hierarchy Study is an important document, as it has clearly directly led to the spatial approach presented in the Plan. However, the methodology to assess the sustainability of settlements is flawed and consequently this undermines the soundness of the whole spatial strategy. A simple matrix exercise has been used to count the number of facilities within the settlement, yet limited consideration is given to the level or value of service these facilities provide or any objective and balanced measure of sustainability of settlement based on critical elements such as their characteristics or spatial relationship in relation to other settlements and connections to them. It is disappointing to note that this matrix exercise has been used again for the Regulation 19 draft of the Local Plan.

A quantified points system has been used in which each service is awarded a certain number of points based on the amount and range of facilities provided within the settlement. It is clear there are some significant shortcomings in using this inventory method to assess the sustainability of a settlement and thus determining its position within the settlement hierarchy. For example, each shop unit is worth one point whilst a primary school or train station is only worth three points in total. The result of this is a settlement could score points if it contains shops that do not provide an everyday service to the settlement, for example a car dealership or a furniture store. It is clear that these uses will make a limited contribution to sustainability, they have a limited day to day function, they make a negligible contribution to day-to-day sustainable travel patterns and indeed, if anything, they could serve to weaken the potential to achieve more sustainable travel patterns if such uses are sited at remote settlements. As such, the methodology inflates the sustainability credentials of some settlements, whilst failing to identify the high sustainability credentials of others. When considering the sustainability of the site, the Council should consider a settlement's respective connectivity to other settlements and the way that settlements inter-relate to support and foster sustainable development. This more nuanced qualitative approach was taken through the previous Local Plan Review, but appears to have been discarded in the current Plan review for no discernible reason. As such, the method used to review settlements calls into question the soundness of the Local Plan as it would not be considered appropriately justified under Paragraph 35B of the NPPF.

In the case of Capel le Ferne, the settlement is supported by its own services, as detailed the Housing and Economic Land Availability Assessment submission for the subject site in 2022, and the Sustainability Appraisal Appendix F 2022.

These services include regular bus services to Dover and Folkestone, general public store, public house, café, village hall, two churches, weekly farmers market and a primary school. This range of services meets the everyday needs of existing and future residents of Capel le Ferne and a new residential population would ensure that the vitality and viability and the range of local service provision is enhanced. Focusing growth at the settlement offers the potential to achieve highly sustainable development through a combination of the existing facilities at the settlement to meet a day-to-day convenience function, and the settlement's superb connectivity and proximity to the main town of Dover and the Sub-Regional town of Folkestone to provide sustainable access to a host of major employment opportunities. No other rural settlement boasts such connectivity to the two primary towns in this part of the County, yet this factor has been entirely overlooked.

Quinn Estates currently have land under option adjacent to the existing primary school for expansion. A larger allocation could provide the opportunity to include additional services, such as GP surgery, which is identified as lacking in the village. Nevertheless, this can only be delivered in tandem with additional housing allocation to support it.

The downgrading of Capel le Ferne from a Local Centre to a Larger Village is unsound and appears to have resulted in the development allocation at Great Cauldham Lane being reduced in size, to the detriment of the settlement and the District. Within the existing Dover Local Plan Capel le Ferne was identified as a Local Centre to 'reinforce its role as provider of services to its home and adjacent communities'. Therefore, the settlement was presumed to support the retention of existing services

and attract new services within the area. The proposed downgrading of the settlement implies this objective has been met, although there is no evidence to support this. Capel Le Ferne should therefore continue to be identified as a Local Centre to continue to support this objective, with allocations such as that at Land east of Great Cauldham Lane being able to come forward to support this.

Given the range and suitability of the services available to residents in Capel le Ferne, along with its strong connections to employment centres via public transport, the settlement should be re-designated as a Local Centre. Moreover, the allocation of Land east of Great Cauldham Farm amended to a minimum of 70 dwellings to make full use of the site, strengthen the sustainability of the village and enable Quinn Estates to explore the delivery of additional services which would further enhance the settlement for existing and future residents.

Site Allocation Policy SAP44 – Land to the east of Great Cauldham Farm (CAP006)

Quinn Estates supports the allocation of the land to the east of Great Cauldham Farm within the draft Policy SAP44 for residential development. The site is available, suitable and achievable, as confirmed by the Housing and Economic Land Availability Assessment 2022. There are no obvious barriers to delivery, including that there are no constraints on the site such as ecology, trees, flooding and heritage, and the site is not dependent on the delivery of infrastructure before coming forward.

Quinn Estates consider that the land to the east of Great Cauldham Lane can comfortably accommodate additional housing. The appended Indicative Site Layout Plan details the ability of the site to accommodate up to 100 homes whilst retaining existing trees and hedgerows and providing sufficient screening along the western boundary of the Site, in accordance with the above assessment under the HELAA.

The Landscape Briefing Note submitted confirms that the site is more closely associated with the settlement edge than the open countryside to the north-west. It is considered that views are highly localised, and the visual envelope of the site is limited to a small area to the north. The site is not considered to be reflective of the special qualities or characteristics of the AONB, nor would the proposal bear any significant or detrimental impact on its setting. Furthermore, its redevelopment provides an opportunity to reinstate hedgerow planting that was lost due to intensive agricultural use and therefore a more sensitive transition to the AONB can be achieved.

Finally, it is considered to be a logical approach to extend the allocation further to the north, due to a localised dip in the land here meaning this part of the site is far less prominent and can ensure that a robust landscape buffer can be provided. Additional dwellings in this location are therefore suitable in landscape and visual terms, and the amendment of the allocation to 'minimum 70' can be supported. It is also significant to note that the site is the only site at the settlement outside of the AONB which can deliver housing, therefore, it is imperative that the Council makes best use of the site by expanding the allocation, or at the least revising the policy wording to a minimum of 70 dwellings.

A Cultural Heritage and Archaeological Scoping Report has been prepared in relation to the site and is appended to these representations. This Report confirms that there are no heritage assets on or near the site that would be directly affected by development. It is however considered that there may be archaeological remains, however it is not clear due to the limited archaeology works undertaken in the area. As such it is proposed that as part of any planning permission, a programme of archaeological evaluation would be agreed to confirm whether any remains exist, and any mitigation required.

This provision would enable greater benefits for the wider local community to be delivered, including:

- Contributing further to the local housing need;
- More affordable housing provision;
- Provision for community facilities;
- Increased amount of open space;
- Financially enables the delivery of the additional school land and potential GP surgery; and
- Opportunities to meet local self/custom build need

c. Conclusion

Quinn Estates wishes to support Dover in bringing forward a successful, effective and sound Local Plan that can serve the District across the Plan period. The allocation of the Site within the draft local plan is welcomed by Quinn and they are committed to delivering a successful housing scheme. However, Quinn seeks a minor amendment to the wording of the policy to support additional housing numbers on site, of which it has been demonstrated that the Site is suitable to do so.

It is considered that Capel le Ferne should be reconsidered as a Local Centre due to a number of factors including the facilities and services it currently provides, its proximity to Dover and Folkestone and its sustainable transport links to these settlements and the

	<p>potential for future development to support existing and new facilities in the village. The matrix exercise used to determine the settlement hierarchy has taken a very narrow view on settlement sustainability and its position in the hierarchy must be reviewed. In this regard, it is recommended that the Council exercise planning judgement to ensure that the settlement hierarchy for the District reflects the potential to achieve and deliver a sustainable growth strategy.</p> <p>The benefits of increasing the size of the allocation have been detailed as providing a more significant contribution to the housing needs for the local area, provision for a community facility and enhanced provision of open space. Given the range of benefits a larger allocation would be able to provide, Quinn Estates request the wording of the allocation in Table 4.12 to be amended to a minimum of 70 dwellings to enable these significant benefits to be utilised by new and existing residents.</p> <p>We trust that the above amendment is acceptable to the Council and that these representations will be taken into account in consideration of the current consultation. We also confirm that Quinn Estates would welcome the opportunity to be involved in the forthcoming Examination-in-Public and contribute to the debate to ensure that the best strategy for the District is found.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The site is promoted for 100 dwellings and requests the policy wording is amended to minimum 70 dwellings on the present site boundary, or expanding the site to the north to include 100 dwellings</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP44
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The proposed works would destroy the insects, shrubbery, habitats and other creatures which rare wildlife rely on. We've photographed redwing, turtle doves, song thrush, pied flycatcher, field fare, lesser spotted woodpecker, mistle thrush, house sparrow, tree sparrow, starling, squirrel, rabbit, domestic/household family – cats, dogs, foxes – many of these are on the red and amber list – see RSPB.org.uk/birds and wildlife guides. There are also summer migrants. Many native animals forage in the field. Other issues are: noise – disruption to the peace, health from both building and from any new buildings. This is a windy area – building debris would blow into the gardens, windows, prevent hanging out washing/airing the house, cause breathing and health difficulties. Especially stress from the dirt, noise and disruption. Vibration could disturb the structure of buildings/houses, drainage, structures. Our cats are elderly and used to going in the garden – we'd have to keep them in to keep them safe – would be expensive to buy litter and time consuming – stressful. New buildings would block light, no privacy, living here for decades in peace – the noise of new people/cars etc. would exasperate us and cannot manage it. Lighting would disrupt sleep, disrupt life and create more environmental concerns.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	There are two other plans in place – ne has been granted for a block of flats, the other is nearby and if hedges are kept/minimal pruning, these will provide many new residences. Iir makes sense to assess what issues incur during these works, assuming the new plan will be accepted. New residences require resources. There's only one shop, it needs a doctors, there's a shortage and none in the village, additional properties and the works pose security risks.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We wish to object to CAP006 / CAP009 / CP013 We are very concerned about the extra traffic these sites will cause, we live in a lane, we are both disabled and concerned about parking and access to our property if the road is widened. Also, the amount of traffic that is going to be using Capel Street is scary, it is dangerous enough crossing at the junction of Cauldham Lane / Capel Street now as I walk my dog and we are slow. Why don't the build where access can be directly off the main road, e.g. opposite Grasslands or opposite the war memorial. This is our village we don't really want a town

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We believe the proposals concerning this location are unsound for the following reasons:</p> <ol style="list-style-type: none"> 1. The location is currently home to Badgers, foxes, skylarks and numerous other wildlife whose existence would be threatened by building this development. This is an area of outstanding natural beauty. The location is currently very productive in the production of numerous crops vital for food security as per Government policy. This land is not a brown field site as cited in NPPF paragraph 145, this would be contrary to Government policy we would be very concerned if this land was considered. 2. The school is full to capacity we have no doctors surgery and services to provide for the increased community. 3. The local residents would be subject to noise and light pollution and we would be concerned how this would impact on mental wellbeing if this proceeds as the residents will have an impact of their lives that they will have no control over foisted on them through no fault of their own also suffer from property devaluations. 4. The village of Capel-le-Ferne suffers from low water pressure, which has been added to by the development already completed in Capel, to add even more houses will be even more detrimental to the poor supply of water. 5. The proposed development will create traffic problems accessing/ exiting the site. Capel street is already congested at peak times for school drop off/ pick up and commuter traffic. Two car households would equate to 140 plus extra cars, this would simply not be viable, traffic would try and exit on to Cauldham Lane which is already a rat run at certain times and frequently blocked by farm traffic being that it is a single lane with no passing spaces. We would assume that this would have been evident in any traffic survey. We currently queue to exit Cauldham Lane onto Capel Street, additional traffic will cause significant backlog to an already dangerous junction. 6. Finally the phrase 'not in my back yard' applies to us 3 fold, as there is development proposed at the back at the front and down the lane, which will destroy this beautiful area.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Major concerns of loss of agricultural land, given the uncertainty of last few years. Environmental damage, loss of habitat/feeding grounds for rare and local wildlife. I have photographed those on the RSPB red and amber lists: song thrush, house and tree sparrows, lesser spotted woodpecker, stopet, mistle thrush, starling, squirrel, turtle dove, foxes, rabbits, many butterflies, lapwing, pied flycatcher, field fare and lots of insects, beetles and more. Buildings would generate more light, heat, waste, electricity, telephone and other cables and pipework – all disrupt wildlife and disturb existing residences peace, would affect sleep, light, noise, smell would create stress, exasperate health. Drain light from gardens/windows increase our utility costs. More tarmac/concrete in an area known to be damp/frequent costal storms and mist would stop the natural drainage. There are limited resources in Capel Le Ferne, these have reduced, there's no doctor, only one shop, no direct bus to Canterbury. No shop open in the evening/Sunday after 12pm – insufficient resources puts stress on overstretched doctors, dentists etc. in Folkstone – the nearest. There are other places to build.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	New houses have already been built in Capel Le Ferne. A block of flats is due to be built and many other road/structural changes – there's been no consultation of local residents or considerations as to how we'll be affected by that. Another proposition is in place for houses off Cauldham Lane – let that go ahead but spare us living with all the stress of multiple works/building on our doorsteps and back gardens. Its too much. This is supposed to be a peaceful area in the countryside. It's an area that's often damp/foggy/stormy, most rain gets swallowed up by the trees, shrubs, soil, wildlife, adding more concrete and tarmac would cause flooding problems, as well as risks from flying debris from proposed new properties. We've been affected by earthquakes here too and the ground and buildings still move. Poses a security risk, invades privacy.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Issue relates to Government policy)</p> <ol style="list-style-type: none"> 1 Due to the war in Ukraine, there should be a stop to the building on farmland for a minimum five years (5yrs) due to the shortage of grain. This will enable the UK to identify solutions to producing its own crops and grain growing, reducing reliance on imported crops and grain in the shortage to medium term (issue relates to Government policy) 2 With the fire service requiring a four metre (4m) gap in the road for their fire engines to pass safely, neither Capel Street, Cauldham Lane or Surrounding Roads are currently wide enough or complaint, particularly when cars are parked. (Issue relates to parking, highway safety, traffic, noise and disability parking/access) 3 With no major changes or improvements to Capel-Le-Ferne and surrounding infrastructure, such as primary and secondary school intake capacity umbers, doctors' surgeries, hospitals etc, any increase in population (to Capel-Le-Ferne) will have a detrimental effect on public services that are either very strained or at breaking point. (Issue relates to Government Policy, parking, highway safety, traffic, noise, disability parking/access and proposals in the development plan) 4 With no major changes or improvements to Capel-Le-Ferne Highways (roads or pavements) for numerous years, any increase in extra vehicle traffic or additional road use will have a detrimental effect on fire, police, ambulance response times. (Issue relates to parking, highway safety, traffic, noise and disability parking/access)

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible.	I believe proposals for CAP006 are unsound for these reasons: <ul style="list-style-type: none"> • Capel Street is, in reality a single carriageway, due to cars of existing residents that park on one side of the roads, for the entirety of the road. The additional congestion this proposal would cause if it went ahead is unsustainable and dangerous, particularly so for the young school children that use Capel Street on a daily basis

<p>possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<ul style="list-style-type: none"> • There are insufficient amenities within the village • There are insufficient school places which are already competitive, at a detriment to the existing residents • Increase in noise and light pollution • Existing residents will financially be at a significant detriment as additional housing in the back gardens of the existing houses of Cauldham Lane and Capel Street will lose value • The wellbeing and mental health of the existing residents of Capel Street and Cauldham Lane will be impacted as a result of the destroyed views caused by the buildings, the views being a key reason for the existing residents to purchase their homes • There is a food shortage crisis looming; changing the use of this land from agricultural to residential contributes to the crisis • The proposals are not in line with the rest of the village, nor the accreditation of the area being close to and Area of Outstanding Natural Beauty' • The proposed building would be harmful to the vast array of wildlife that has inhabited the area for many years • The proposals would have a serious impact and significant consequences for Cauldham Lane (identified as an access route). The reasons for this are • There is no pathway, which poses a significant safety risk for pedestrians and horse riders due to significant additional traffic using the lane caused by these proposals • The country lane is simply unable to support the traffic these proposals would cause • There is a national speed limit zone with a sharp, blind bend; additional traffic increases the risk of serious accidents comprising public safety • The lane is a narrow country lane, often blocked by delivery drivers and farm traffic
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>This part of the plan should be rejected¹</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP44
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I am writing to ask you please to turn down the proposed development of plot CAP006 of 70 dwellings whose main access after the demolition of a property will be an already fairly narrow stretch of an already busy Capel street. Please think of the residents who live on the street and think of the impact of at least 100-140 vehicles accessing the street especially at peak times etc work and school. It would be a nightmare. The construction of these houses would also cause major disruption and chaos for all of us who live on the street. It is not a main road so should not be treated as one. If more houses are needed surely the best place to build them would be next to the proposed brownfield site CAP011 which has no other development round it and has immediate access to the main road. this would cause minimal disruption for residents and builders alike and I feel sure this site would be acceptable. I have no problem with the 5 dwellings CAP013 on Cauldham Lane next to the agreed development CAP009 longships as this is a minimal build for this small lane. Please think hard about the effect a large development would make on us as we are still a village in an Area of Outstanding Natural Beauty and we want to stay this way. Please don't allow any development that will impact Capel Street as it was never designed to take large volumes of traffic and as where I live I have no pavement on my side of the road it could also make Capel Street more dangerous. We have a 20 mile an hour rule but sadly this is frequently ignored.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	CAP13 & SAP44
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Submitted sites at this end of Capel should have been considered together to produce a more cohesive planning solution.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	CAP13 site specific requirements should include a requirement for development to be set back sufficiently to allow road widening in line with that agreed by the adjoining site CAP009 during a planning application as well as providing a footway. There is sufficient highways land beside the existing surfaced carriageway along Cauldham Lane to allow it to be widened to allow two cars to pass in addition to a full width pavement on one side. CAP015 was rejected at the HELAA stage for landscape reasons that could have been equally applied to CAP13 or vice versa. If this had been considered together with SAP44 access to the larger site could be provided along Cauldham Lane which can be widened rather than Capel Street which cannot.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	To answer questions not anticipated by the written submission and point at maps where explanation in words is more difficult.

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I cannot comment on the legality of the plan as I am not qualified. I object to the plan for the following reasons; 1. A pedestrian connection along Cauldham Lane implies widening of the lane which will encourage increased traffic use of this quiet rural lane which is already a "rat run" from B2011 to the Alkham Valley and is busy with traffic to Great Cauldham farm and the industrial complex on the farm. 2. The proposed site is inappropriate given its close proximity to the Kent Downs and AONB. 3. This proposal will further increase pressure on local utilities in particular water pressure (exacerbated by the approval of CAP009) which in Cauldham Lane is already problematic particularly in the summer months.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	Do not approve this proposal

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Local plan - Land west of Capel Street - CAP006</p> <p>The proposed new road will be running along our boundary hedge just a few meters from our back door, producing noise, pollution and extreme loss of privacy. Houses backing onto our rear garden will also present a severe loss of privacy. As the site slopes down, the highest points are above our roof line and would create another loss of privacy.</p> <p>Buildings backing onto our rear garden would be overshadowing and produce a loss of light and privacy.</p> <p>Capel Street and Cauldham Lane are both narrow and unsuitable for any increase in traffic of several hundred cars, vans, emergency vehicles, delivery trucks of all sizes.</p> <p>Emergency vehicles could find it impossible to access through the proposed narrow gap after the demolition of number 11 Capel Street.</p> <p>Traffic passing within a few meters of our back door, driveway and front & rear garden creating dangerous, unacceptable, and possibly illegal levels of pollution and noise</p>

	<p>nuisance.</p> <p>Previous planning applications have been rejected for development of this area, ALL those reasons still apply. Part of this same field, north of Green Lane footpath, is designated as an 'area of outstanding natural beauty' the question is - why is the area south of the footpath, the land in question, different? What makes it different?</p> <p>Capel-le-Ferne's present infrastructure is totally inadequate for any further development of this kind.</p> <p>In a time when populations are expanding and more sustainable food needs to be produced, covering good agricultural land with buildings is bordering on criminal.</p> <p>As we go into a recession, if built how many will remain unsold/unoccupied given the interest rates, inflation and mortgage rationing leaving a development unfinished or homes left empty or derelict. Some of the property's in Capel's most recent development of comparable size (40) on the New Dover Road stood unsold and empty for years.</p> <p>In my submission to the Council in July 2021 I touched on some of these points and made perfectly clear that we strongly and unreservedly object to any development in this area west of Capel Street for all of the reasons above.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable

<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>Not Applicable</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Not Applicable</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<ul style="list-style-type: none"> • 3 of the 4 sites allocated in the plan CAP006, CAP009(Decided) and CAP013 have very poor infrastructure • Capel Le Ferne is defined as a large village in the Plan, yet the allocation housing sites by settlement as identified within the Strategic Policies (table 3.3) allocates 95 dwellings, some 279% increase to Capel Le Ferne compared with the average of the other 5 villages in the district which has an average of 34 as can be seen in table 1 (Attachment). • In relation to Local Centres which has a separate definition, DDC strategy for the rural area, it is proposing to grow the adjacent villages of Eythorne & Elvington by 355 to create a new Local Centre. Excluding this Local Centre, Capel le Ferne's allocation of 95 is some 113% compared to the average of the 5 Local Centres identified in the Plan. The average in the district is 84 and Capel is a village not a Local Centre as can be seen on table 2 (Attachment). • When looking at the 4 sites proposed the increase would amount to circa 20% increase compared to that North of New Dover Road as identified table 3 and 4 (Attachment). <p>Sustainability In the Sustainability Appraisal, SA 10 state: To conserve and/or enhance the significant qualities, fabric, setting and accessibility of the district's historic environment SA 11 states: To conserve and enhance the special qualities, accessibility, local character and distinctive character and distinctiveness of the district's settlements, coastline and countryside. Capel is a unique settlement within Dover District, located over 500ft above sea level with the Heritage Coast to the South and AONB to the North, East and West of the settlement Sites CAP006, CAP011 and CAP013 will all have a significant negative impact on both SA 10 and SA 11. Capel Le Ferne Parish Council and our Parishioners have raised the above concerns and are extremely worried about the proposed local plan and the impact this would leave on our village.</p> <p>CAP011 Land known as the former Archway Filling Station, New Dover Road, Capel-le-Ferne CT18 7JD</p> <p>Number of units: - 10</p> <p>This site sits within the AONB and was previously a petrol filling station, buried tanks and site contamination may still exist. There is existing access on the site so there are no access concerns. However, the Parish Council would like to remind DDC that the site was previously rejected as it was divorced from the main settlement and would have a detrimental impact on the surrounding AONB.</p> <p>Whilst development may be acceptable on 'Previously Developed Land', a considerable portion of the site would need to be used to provide a generous landscape buffer from the AONB to the North and West of the site.</p> <p>However, if this site were to be taken forward, the Parish Council believe that if a generous landscape buffer is put in place between development and the AONB, they would support sympathetic ribbon development on this site.</p> <p>CAP013 Land at Cauldham Lane, Capel-le-Ferne CT18 7HG</p> <p>Number of units: - 5</p> <p>This site is on the edge of Capel, outside of the definite settlement boundary and detached from the village.</p> <p>The site is in a prominent position on high ground overlooking the adjacent AONB and bridle path. It would need significant screening to mitigate its impact on the AONB and Bridleway.</p> <p>Any development on this site would have a major negative impact when viewed looking north-east from the bridle path and beyond.</p>

	<p>The only access to this site is via Cauldham Lane, the lane is single-track and is regularly blocked by delivery vehicles. It is also used by heavy vehicles accessing the local farm and the industrial units further down the lane.</p> <p>Cauldham Lane is also used by many of our parishioners including dog walkers, ramblers, school children, elderly residents, families and horse riders accessing the bridle path. Any increase in traffic would have wider health, safety & social impact to this part of the village.</p> <p>This site will also impact on the dangerous Cauldham Lane/Capel Street/New Dover Road junction.</p> <p>The Parish Council believe that such development is inappropriate in this area and the site does not sit well with Policy NE2 or the National Planning Policy Framework, therefore, is not supported by the Parish Council. For the reasons given above, Capel Parish Council request this site is excluded from the Local Plan.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP45 CAP009, CAP 011 and CAP013
2 - Do you consider this part of the Plan sound?	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SAP45 Capel-le Ferne CAP 009 Longships: The site lies in the setting of the AONB. The proposed requirements included in site specific requirements to help manage impacts on the AONB are supported.</p> <p>SAP45 Capel-le Ferne CAP 011 Archway Filling Station: The site lies wholly within the Kent Downs AONB and we have concerns that the site lies separated and unrelated to existing built form at Capel-le-Ferne and that the allocation would result in new development in the countryside, that would fail to be complementary to local settlement pattern in the AONB, in conflict with the AONB Management Plan principle SD9. The open undeveloped nature of the site together with its boundary hedgerows means that it contributes positively to the rural character of the area and constitutes part of the rural setting to Capel-le-Ferne, which given the recent development at George's Close on the opposite side of New Dover Road, it is considered all the more important to retain. While we note that the site was previously occupied by a Petrol Filling Station, aerial imagery indicates that this only occupied the very front part of the site and was removed at least 20 years ago. The site has reverted to nature and the remains of permanent structures/infrastructure have blended into the landscape and as such, we do not consider that the site constitutes Previously Developed Land, as per the Glossary in Annex 2 of the NPPF. As such, it is considered that development here would be unsound as it would fail to conserve or enhance the landscape and scenic beauty of the AONB and is therefore in conflict with paragraph 176 of the NPPF. However, we do not consider the site to represent Major Development for the purposes of paragraph 177 of the NPPF.</p> <p>SAP 45 Capel-le Ferne CAP 013 Land at Cauldham Lane: This site immediately abuts the Kent Downs AONB on its north-western boundary and lies on high ground that is highly visible in long distance views from the AONB. The proposed requirements included in site specific requirements to help manage impacts on the AONB are supported.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Omission of SAP45 Capel-le Ferne CAP 011 Archway Filling Station as an allocation.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To ensure impacts of the proposed allocation CAP 011 on the AONB are fully considered.

The proposed requirements included in site specific requirements to help manage impacts on the AONB are supported.</p> <p>SAP45 Capel-le Ferne CAP 011 Archway Filling Station: The site lies wholly within the Kent Downs AONB and we have concerns that the site lies separated and unrelated to existing built form at Capel-le-Ferne and that the allocation would result in new development in the countryside, that would fail to be complementary to local settlement pattern in the AONB, in conflict with the AONB Management Plan principle SD9. The open undeveloped nature of the site together with its boundary hedgerows means that it contributes positively to the rural character of the area and constitutes part of the rural setting to Capel-le-Ferne, which given the recent development at George's Close on the opposite side of New Dover Road, it is considered all the more important to retain. While we note that the site was previously occupied by a Petrol Filling Station, aerial imagery indicates that this only occupied the very front part of the site and was removed at least 20 years ago. The site has reverted to nature and the remains of permanent structures/infrastructure have blended into the landscape and as such, we do not consider that the site constitutes Previously Developed Land, as per the Glossary in Annex 2 of the NPPF. As such, it is considered that development here would be unsound as it would fail to conserve or enhance the landscape and scenic beauty of the AONB and is therefore in conflict with paragraph 176 of the NPPF. However, we do not consider the site to represent Major Development for the purposes of paragraph 177 of the NPPF.</p> <p>SAP 45 Capel-le Ferne CAP 013 Land at Cauldham Lane: This site immediately abuts the Kent Downs AONB on its north-western boundary and lies on high ground that is highly visible in long distance views from the AONB. The proposed requirements included in site specific requirements to help manage impacts on the AONB are supported.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	Omission of SAP45 Capel-le Ferne CAP 011 Archway Filling Station as an allocation.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To ensure impacts of the proposed allocation CAP 011 on the AONB are fully considered.

<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Justified</p>

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We consider the plan to be unsound and cannot be justified based upon the following: -</p> <ul style="list-style-type: none"> • 3 of the 4 sites allocated in the plan CAP006, CAP009 and CAP013 have very poor infrastructure • Capel Le Ferne is defined as a large village in the Plan, yet the allocation housing sites by settlement as identified within the Strategic Policies (table 3.3) allocates 95 dwellings, some 279% increase to Capel Le Ferne compared with the average of the other 5 villages in the district which has an average of 34 as can be seen in table 1. • In relation to Local Centres which has a separate definition, DDC strategy for the rural area, it is proposing to grow the adjacent villages of Eythorne & Elvington by 355 to create a new Local Centre. Excluding this Local Centre, Capel le Ferne's allocation of 95 is some 113% compared to the average of the 5 Local Centres identified in the Plan. The average in the district is 84 and Capel is a village not a Local Centre as can be seen on table 2. • When looking at the 4 sites proposed the increase would amount to circa 20% increase compared to that North of New Dover Road as identified below. <p>Sustainability</p> <p>In the Sustainability Appraisal, SA 10 state: To conserve and/or enhance the significant qualities, fabric, setting and accessibility of the District's historic environment</p> <p>SA 11 states: To conserve and enhance the special qualities, accessibility, local character and distinctive character and distinctiveness of the District's settlements, coastline and countryside.</p> <p>Capel is a unique settlement within Dover District, located over 500ft above sea level with the Heritage Coast to the South and AONB to the North, East and West of the settlement</p> <p>Sites CAP006, CAP009, CAP011 and CAP013 will all have a significant negative impact on both SA 10 and SA 11.</p> <p>Capel Le Ferne Parish Council and our Parishioners have raised the above concerns and are extremely worried about the proposed local plan and the impact this would leave on our village.</p> <p>CAP009 Longships, Cauldham Lane, Capel-le-Ferne CT18 7HG</p> <p>Number of units: - 10</p> <p>The Parish Council agree with DDC that this is a self-contained previously developed site. The owner of this site has currently applied for planning permission for a block of 15 self-contained double apartments with social areas, 5 units above that indicated in the Local Plan. This is not supported by the Parish Council</p> <p>In principle, the Parish Council agree with the concept of a mix of single and double retirement units within the Parish to service the need of those Parishioners wishing to downsize. This was identified in The Capel Community Plan following a detailed survey undertaken within the village in 2019 and shared with Dover District Council.</p> <p>However, Cauldham Lane does present a barrier to any development in the area because it is a single-track narrow lane with no passing places or pedestrian linkage to the existing footway network or the public transport system. The lane is frequently blocked by delivery vehicles and is regularly used by heavy vehicles accessing the local farm and the industrial units further down the lane. Therefore, the increased traffic likely to be generated from this site by residents, deliveries, contractors, staff, etc. would become intolerable for existing local residents.</p> <p>This site would also impact on the dangerous Cauldham Lane/Capel Street/New Dover Road junction.</p> <p>Many residents of Capel use Health Service facilities in Folkestone which are not directly accessible by bus, therefore, in order to access these services, residents tend to drive to Folkestone which is clearly at odds with SP1.Planning for Climate Change. Item f, which mentions reducing the need to travel.</p> <p>It is also worth mentioning that because of Capel's geological position, it is unlikely that residents would walk or cycle to use facilities in the nearest towns. Therefore it is reasonable to assume that many residents of any apartments built on this site would use private vehicles to access health and other facilities.</p> <p>The redevelopment of this site may also result in the loss of mature trees, which would exacerbate the harsh visual impact of any redevelopment. As the site is in a prominent position on high ground, it would need significant screening to mitigate its impact on the adjacent AONB.</p>

	<p>As stated previously, whilst the Parish Council recognise the need for retirement apartments in the village, the Council does have concerns about development on this scale in this location for the reasons identified above.</p> <p>Therefore, the Parish Council believe that such development is inappropriate in this area and the site does not sit well with Policies NE2, SA10 and SA11 or the National Planning Policy Framework, therefore, is not supported by the Parish Council.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP45 CAP011 - Land known as the former Archway Filling Station, New Dover Road, Capel-le-Ferne
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><u>Introduction</u></p> <p>This representation has been prepared by DHA Planning on behalf of Guardian Parks Ltd in response to the Dover District Council 'DDC' Local Plan (Regulation 19) consultation which runs until 9th December 2022.</p> <p>We understand that Dover District Council is in the process of preparing a new Local Plan to set out a strategy for development for the period to 2040 and that the Council are presently seeking comments on the pre-submission Plan prior to its submission for examination in early 2023. Our client controls 'Land known as the former Archway Filling Station, New Dover Road, Capel-le-Ferne' (hereafter referred to as 'the former Archway Filling Station' or 'the site') and is promoting the residential allocation of the site as part of the new Dover District Local Plan preparation process. The site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 10 dwellings under policy reference SAP45 (CAP011).</p> <p>The purpose of the representation is to support the allocation of 'the former Archway Filling Station' for a greater quantum of development. In this regard, we remain wholly supportive of the allocation of the site and agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client's site can be made. Accordingly, we say that the former Archway Filling Station can further assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.</p> <p>It is submitted that the SAP45 (CAP011) policy wording should be amended to reflect the capability of the site to accommodate an estimated 18 dwellings, deliverable early in the Plan period.</p> <p>Based on the current national and local planning context, we consider the site to be a highly suitable edge-of-settlement location to allocate land for housing to help meet the need for new homes in the district and its effective use should be appropriately maximised in accordance with national policy objectives.</p> <p><u>Site Specific Assessment</u></p> <p>As set out in the preceding sections, Guardian Parks Ltd control 'the former Archway Filling Station' at Capel-le-Ferne and are continuing to promote the residential allocation of the site. The site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of an estimated 10 dwellings under policy reference SAP45 (CAP011). Notwithstanding our client's support of the draft allocation within the Regulation 19 Plan, we suggest that the policy text be re-visited prior to submission, to allow a higher dwelling per hectare and ensure the site is developed to its full potential. It is submitted that the SAP45 (CAP011) policy wording be amended to more accurately reflect the capability of the site to accommodate approximately 18 dwellings which will be deliverable early in the plan period. The site is available immediately and discussions have been ongoing with a number of interested parties who would look to deliver this site, including housebuilders. It is therefore anticipated the site could be delivered within the next five years, with commencement taking place within 2-3 years after allocation (or sooner should planning permission be secured quickly).</p> <p><u>Site and Surroundings</u></p> <p>The site is located to the eastern edge of Capel-Le-Ferne, to the northern side of New Dover Road. A former petrol station, the site constitutes previously developed land. Parts of the former structure, forecourt as well as below ground tanks remain on site. Approximately 0.65 ha in size, dense boundary planting and hedgerow establishes the site's boundary, with a line of mature trees to the north. Existing access to the site is from New Dover Road to the south-western corner.</p> <p>Enclosed by established planting, the site is relatively level, and bounded by a collection of housing to the east, and agricultural land to the north and western boundaries. Beyond the agricultural land to the west forms the wider built-up settlement of Cape-le-Ferne. To the south, the site is bound by New Dover Road with Capel Court Park caravan park and the newly developed George Close beyond.</p> <p>Within the wider settlement of Capel-le-Ferne services and facilities available include pub-restaurants, a convenience store, village hall and Primary School.</p> <p>The nearest bus stop located 100m east of the site serves the 102 bus route with regular services between Dover and Rye/Littlestone-on-Sea. This provides a direct route into Folkestone which provides a variety of facilities and services including train station, hospital, supermarkets, primary and secondary schools, eating establishments and sports facilities.</p> <p>The site does lie within the Kent Downs AONB, and a small part of the site is identified on the policies map as lying within an area at risk of surface water flooding. This is however not considered to prevent development, and can be appropriately assessed through a Flood Risk</p>

Assessment and Drainage Strategy as part of future applications. The site does not have any history of flooding. Furthermore, the site does not lie within Flood Zones 2 or 3. The site is not subject to any other constraints.

Development Capacity

For the purposes of this representation, the former Archway Filling Plot is submitted with capacity for approximately 18 dwellings which would be delivered as part of a high-quality, well-landscaped residential scheme that could be delivered in the early part of the plan period.

Draft Policy Allocation Capel-le-Ferne Small Housing Sites (SAP45) – CAP011 Land known as the former Archway Filling Station, New Dover Road, Capel-le-Ferne

As introduced in the preceding sections, our client's site is allocated for residential development within the Dover Pre-submission (Regulation 19) Local Plan. For ease of reference, the draft policy wording is as follows:

SAP45 – Capel-le-Ferne Small Housing Sites

Planning permission will be granted for proposals that:

- a) Accord with the policies in the Local Plan; and
- b) Address the site-specific issues and requirements for the site set out below.

CAP011 – Land known as the former Archway Filling Station, New Dover Road, Capel-le-Ferne

Estimated dwelling number: 10

Site-specific issues:

- Existing trees and hedgerows along the boundary of the site should be retained and enhanced.
- The site is in the AONB and any scheme coming forward on this site should be designed to be appropriate to the sites sensitive location within the Kent Downs AONB in respect of scale, form, materials and colour palette.
- Existing trees and hedgerows along the boundary of the site should be retained and enhanced and an appropriate landscape buffer is required along the northern and western boundaries of the site to mitigate the impact of development on the AONB
- Archaeological Assessment is required.
- The site is within Groundwater Source Protection Zone 3.
- Contamination Assessment is required

To be clear, our client remains wholly supportive of the allocation of the site. The allocation represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client's site can be made.

The sensitive landscape nature of the site is acknowledged given its location within the Kent Downs AONB. However, as set out within the Housing Sites Landscape Assessment which forms part of the Evidence Base, the established boundary planting to the north and western edges of the site have the potential to mitigate any impact and could be retained and enhanced as part of a future development. The site comprises brownfield land and therefore a betterment could be secured on this site through a sensitive, landscape led design.

It is therefore proposed that any impact on the surrounding landscape character can be mitigated easily, and that the impact of 10 houses from the surrounding views would not be dissimilar to the impact of 18 units. Furthermore, a scheme of 18 units would be able to provide a good level of landscape which would assist to mitigate any potential impact. The Council previously considered 18 units to be an appropriate number on this site as part of previous iterations of the draft plan, and that this number of homes could be accommodated on site, whilst limiting impact on the surrounding landscape character.

Furthermore, emerging policy PM1 requires an average of 30-50 net dwellings per hectare (dph). Should the proposed policy wording be updated to allocate an estimated 18no. dwellings this would be more closely aligned with the requirement of policy PM1, with an average of 27dph for the site. Whilst this is still slightly below the policy, this is reflective of the edge of settlement location and allows for the appropriate landscape mitigation. The current estimated density of 10 dwellings results in an average 15dph would be well below policy requirements and not make efficient use of this previously developed land.

An allocation of estimated 18 dwellings would make the most efficient use of the site, which constitutes previously developed land and has the capability to be brought forward in the early part of the Plan period. Accordingly, the former Archway Filling Station can assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.

It is therefore submitted that the SAP45 (CAP011) policy wording be amended to reflect the capability of the site to accommodate approximately 18 dwellings, deliverable early in the plan period.

Deliverability

There is no recent planning history for the site of a residential nature or a history of unimplemented permissions. There are not considered to be any impediments to the site being brought forward for development within the first five years of the plan period. Combined with the other allocations in Capel-le-Ferne and wider allocations in the district, this would ensure a steady delivery of housing in Dover district across the majority of the Plan period.

For the reasons set out in this representation, the site is considered suitable for the residential development of approximately 18 dwellings. The site comprises previously developed land and lies in the settlement of Capel-le-Ferne, adjacent to existing residential development and would form a natural and logical development within the settlement.

Finally, in respect of suitability there are no physical limitations or problems which cannot be overcome such as access, infrastructure or flood risk.
