On behalf of the landowner, we submit that there are no known financial restrictions that would impact upon the viability of a future housing scheme or that would prohibit development coming forward within the early stages of the Plan period. To the contrary, we consider there to be an opportunity to deliver a high-quality, sustainably located residential development scheme consistent with the Council's proposed growth strategy.

The site is in single ownership and there are no complicated legal agreements or covenants that would prohibit the ability to bring forward the site early in the Plan period. The site is therefore considered available and achievable for the purposes of the tests of deliverability.

Conclusion

Summary

This representation has been prepared by DHA Planning on behalf of Guardian Parks Ltd in response to the Dover District Council Local Plan (Regulation 19) consultation which runs until 9th December 2022.

Our client controls 'Land known as the former Archway Filling Station, New Dover Road, Capel-le-Ferne' and is promoting the residential allocation of the site as part of the new Dover District Council Local Plan preparation process. The site is an allocation for residential development in the Regulation 19 Pre-submission Plan for the provision of an estimated 10 dwellings under policy reference SAP45 (CAP011).

We consider that the land promoted at the former Archway Filling Station should remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040.

Without prejudice to our client's position, we would urge the Council to re-visit the allocation policy text and allow a higher dwelling per hectare guide to ensure the site is developed to its full potential. It is submitted that the SAP45 (CAP011) policy wording should be amended to more accurately reflect the capability of the site to accommodate approximately 18 dwellings.

In addition to being a highly sustainable and logical edge-of-settlement allocation, the site is deliverable in a single land ownership with no viability issues, legal or third-party constraints present.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

For the reasons set out in this representation, the site is considered suitable for the residential development of approximately 18 dwellings. The site comprises previously developed land and lies in the settlement of Capel-le-Ferne, adjacent to existing residential development and would form a natural and logical development within the settlement.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note

Please refer to the attached consultation response submitted on behalf of Guardian Parks Ltd.

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP45
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>INTRODUCTION</p> <ul style="list-style-type: none"> • These representations have been prepared by Esquire Developments Ltd, a multi-award-winning SME developer based in Longfield, Kent. • Esquire Development has a number of land interests in Dover, including Land at Cauldham Road, Capel-Le-Ferne. The site is identified as an emerging allocation under reference SAP45 Capel-le-Ferne Small Housing Sites. • We support the allocation of the site for residential development but query the identified capacity (5 dwellings) and the justification for a reduction in capacity from the Regulation 18 stage (15 dwellings). • We consider the Council should reassess the site's capacity, or acknowledge that the number is not 'fixed' with the final capacity of the site to be determined through the course of a planning application. • As a local SME Housebuilder, the development of this site brings forward the opportunity to help diversify the housing market and offer a wide choice of housing from different developers.

1.0 RESPONSE TO THE REGULATION 19 PLAN

Land at Cauldham Lane, Capel-Le-Ferne

- Land at Cauldham Lane, Capel-Le-Ferne has been allocated for development for an estimated 5 dwellings as part of SAP45 Capel-le-Ferne Small Housing Sites. This site is also referenced as CAP013 and is allocated under policy SAP45 along with Longships, Cauldham Lane (CAP009) and Land known as the former Archway Filling Station, New Dover Road (CAP011) for a total of 25 units. 70 dwellings have also been allocated under policy SAP44 within Capel-le-Ferne.
- Figure 4.15 (shown at **Appendix 01**) shows a Map of site allocations in Capel-le-Ferne including all of those mentioned above. As a point of clarity, we would suggest that each individual allocation is afforded separate references on the map - so that each site is easily identifiable within the policy.
- Capel-le-Ferne is identified as one of the six settlements recognised as a 'Larger Village'. It is noted within this that these villages have a good range of services and facilities which serve their own residents and those of nearby hamlets. It is noted that Capel-le-Ferne has a primary school, is served by frequent regular bus routes and has a village shop.
- We support the plan that identifies Capel-le-Ferne for housing and consider it an appropriate settlement for development. It is noted that development is needed in Capel-le-Ferne to help sustain and strengthen the role of these larger villages and that development will be of a scale that is consistent with the settlements accessibility, infrastructure provision, level of services available, suitability of sites and environmental sensitivity.

Site Capacity

- The Site was identified in the Regulation 18 Consultation Local Plan for a total of 15 dwellings with an anticipated medium delivery timescale which was set as 2025-2029.
- However, the current Regulation 19 Consultation has reduced the site's capacity to only 5No. dwellings – a 65% reduction in capacity between the Regulation 18 to Regulation 19 Local Plan.
- The only reference to the site's reduction is at paragraph 7.49 of the Local Plan Regulation 19 Cabinet Report where it is stated that the reason for this reduction was 'to mitigate impact upon AONB'. However, within the Local Plan evidence base, there is no further evidence or explanation as to why this number was reduced or how this reduction would mitigate the impact upon the AONB.
- The site, at approximately 0.75ha can accommodate at least 15 dwellings as originally allocated while still respecting the proximity to the AONB. The plan shown at **Appendix 02** shows how a development of at least 15 dwellings could be delivered on the site whilst offering sufficient landscape buffers to the site. 15 dwellings represents a density of approximately 20 dwellings per hectare,. Reflecting a more efficient use of site than 5 dwellings (which would only be 6.6 dwelling per ha).
- Initial informal views have been sought from the AONB Unit in order to agree LVIA methodology, study area and view points along with a request for feedback on the draft layout (as shown in **Appendix 02**). This sets out that the draft layout responds to the existing context by:

	<ul style="list-style-type: none"> • Off-setting development from the AONB by new open space and retained vegetation along the western edge of the Site; • Implementing a new vegetated buffer along the southern boundary of the Site via new hedge and tree planting; • Reducing the overall density of development towards the western edge of the Site, so that there is the potential for increased gardens and new planting; • Incorporating the existing sloping landform across the Site via locating SUDS in the northern (lower lying) part of the Site; • Retaining the existing hedgerow along the northern edge of the Site, with the exception of access and visibility splays; and • Aligning the proposed western extent of development with that adjacent to Cauldham Lane to the north of the Site. <ul style="list-style-type: none"> • A full response has yet to be received from the AONB Unit, however initial feedback sets out that there is no objection in principle to a sensitively designed development and although allocated for an indicative number of 5 units in the emerging Local Plan- an increase may be acceptable in terms of AONB impacts. • We therefore consider that the total number of dwellings expected to be generated from the site is reassessed, and returned to the Regulation 18 capacity of atleast 15 dwellings, or that reference is made within the supporting text/policy that the numbers are indicative and subject to assessment at the planning application stage. <p>Please see attached set of representations including appendices</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>See above and attached</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>CAP013 As permission has already been granted to longships to have 15 flats built on it I think the addition of another 5 properties is just too much, we have the governments and wildlife trusts asking us to look after nature and asking farmers to plant more hedgerows yet it seems that certain people find it perfectly acceptable to destroy as much as they can, Cauldham lane is as it says a lane, not a road nor a street and considering it is a village it should remain that way. Micheal Gove has stated that villagers should be happy with the amount of building work going on in their village, well at present all these threats of more and more properties it is causing a lot of stress to a lot of people.</p> <p>Any building of houses (if really needed) should be looked at more closely, looking at areas that can have direct access from main roads instead of small streets/lanes and roads.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I have been a resident in Capel Street (DDC Redacted) for 23 years, I have raised my concerns many times as this seems to be a regular application over the period of time I have lived here. It's so sad that the farmer who owns the field behind me (proposed 70 dwellings) has stooped to a new low on offering and successfully succeeding on purchasing a bungalow (that can be demolished) to enable an entry road from Capel street as this in the past has been an issue. This area is noted on the plan. All this points out to me is this man has no concern for the local community and is only driven by financial gain. The residents of Capel like myself live in Capel due to the peace and outstanding countryside which surrounds us which obviously attracts all sorts of wild animals/ insects/ wild flowers. All of this I'm sure is part of the attraction for young couples/ families and Senior citizens to live in a SMALL village and helps to promote the community we now have. Concerns are felt as we feel Capel is at its limits now and especially our primary school. All this says to me if these dwellings are passed it will open the door for future dwellings and mass expansion in infrastructure to be able to make this viable. I'm sure you can sense but just to confirm I am absolutely against all the projects proposed and it will take away everything Capel Le Ferne stands for.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I believe the proposals concerning the above designated location are unsound for the following reasons: -</p> <ol style="list-style-type: none"> 1 The area immediately abuts an Area of Outstanding Natural Beauty and this is exacerbated by the fact that the location would represent the highest point in the village – as such it would reinforce the adverse visual impact 2 There would be a seriously negative impact on traffic/pedestrian safety, and it would, furthermore, cause unwarranted and severe disruption. Traffic volume along Cauldham Lane would inevitably increase, both during the construction phase and thereafter. This is a narrow country lane, bordered in parts by hedgerows, and lacking pavements – it is barely wide enough for one vehicle in parts. It should be noted that the lane is the only access route for the HGVs and articulated lorries servicing the local farm and the adjacent industrial units – these large vehicles fill the lane and have greater difficulty in maneuvering/reversing. This regular flow would be significantly disrupted for local businesses. As regards pedestrian safety the lack of pavements allied to increase traffic flows would significantly heighten the dangers posed to pedestrian safety/dog walkers and horse riders who use the lane – some of whom are disabled. Finally, the site is adjacent to a blind bend and a bridle path would serve to increase the safety risks previously highlighted. 3 This is not a brownfield site and as such its development would run contrary to recently stated Government policy which seeks to emphasise the usage of brownfield sites wherever possible. 4 There would be an adverse impact on local utilities – particularly water supplies and pressure. We already have a recognized problem with water pressure locally and any such development would only serve to worsen the problem – particularly as the site is the highest point in the village!
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The development proposal should not proceed
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	CAP013 I believe the proposals concerning this particular location are unsound for the following reasons: <ul style="list-style-type: none"> • Cauldham Lane is a single carriageway, with a speed limit of 60mph at the entrance to this plot. The Lane does not have a pavement and is used frequently by pedestrians and horse riders. Adding to the traffic will cause a danger, especially considering there are numerous other potential planning sites nearby which will also add significantly to the traffic • The land is raised and is higher than the properties on the opposite side of the lane. The existing properties are therefore likely to have their privacy invaded. The construction of new houses will also interrupt the view from existing properties • There will be a negative impact on the local wildlife • The number of houses is not in keeping with the rest of the lane which is quiet and peaceful
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance	This part of the plan should be rejected

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP45 - CAP009
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I believe the current proposals for this site are unsound for the following reason: - 1 The development envisages a number of individual dwellings which in turn will generate considerable traffic activity from the site into a narrow lane. The lane is the only access for HGV's and articulated lorries servicing the nearby farm and adjacent industrial units and even if marginally widened in parts the lane would not permit two way traffic. These large vehicles find it very difficult to reverse or maneuver. The lane itself is used by pedestrians, dog walkers and horse riders and there is every possibility that safety would be compromised. Such a situation would also arise during the construction phase which may well result in considerable/unacceptable disruption to local occupants and businesses.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The current proposals should be rethought – perhaps scaled back and more thought given to entrance/exit issues
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object to any considered development on plots CP006, CAP011 and CAP 013. This would result in a massive increase in traffic. Capel Le Ferne roads are not the easiest to negotiate at present and this would increase the problems i.e., what effect would it have on emergency services. The infrastructure of the village is not capable of supporting new developments. Things like water pressure have been a problem with the current population of the village, increase the population, increase the problem.</p> <p>What of design and appearance, when Grasslands obtained planning permission, I like many of the villagers were under the impression that houses would be built in keeping with the appearance of the village, what was built a modern housing estate that would fit in very well on Folkestone Beach what we have is a blot on the landscape.</p> <p>Any development is going to cause loss of trees, hedgerows and natural habitat, for wildlife. We are being reminded every day that we need to act quickly to help nature conservation before it's too late.</p> <p>We live in a time of unrest and turmoil and a planet that has an ever-increasing population. We are told that food production is becoming more strained and the need for countries to become as productive as possible in growing as much food stuff as they can. I therefore feel that to even consider development on CAP006 would be completely inappropriate, as this is agricultural land.</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>CAP013</p> <p>Although not a resident of Cauldham Lane – personal family circumstances lead me to spend considerable time there. I believe the proposed development is unsound for the following reasons</p> <ol style="list-style-type: none"> 1 The site borders designated area of outstanding natural beauty with its associated ecological and wildlife habitats including 'red' status species such as skylarks (ground nesting) protected by Wildlife and Countryside Act 1981. 2 The site itself is highest marked point in Capel with all its associated history of the Battle of Britain memorial. Any development will cause adverse visual impact 3 The residents of Cauldham Lane purchased their properties in the quiet and peace of a rural location which will be destroyed – thus impacting on mental health and wellbeing of current residents whose lives will be permanently affected by this proposal. 4 Onne cannot underestimate the dangerous situation that already exists in Cauldham Lane in respect of traffic. It is a narrow single lane without pavements that primarily services residents and the farm so a great deal of heavy traffic is already present. There are blind spots and no pull in places. It has a great deal of pedestrian traffic with dog walkers and also horses using the land for bridle path access. The route is used as a high-speed rat run in the mornings with little regard to the 20-mile speed limit in place to protect residents and pedestrians . the additional traffic that would come with this proposal would bring disruption and there would be sever detriment to the lives of residents who sometimes already take their life in their hands by pulling out of their drives into the lane as speed is ignored by the rat runners and this is worse if accidents elsewhere cause more drivers to use the route. One cannot underestimate the impact on mental wellbeing if this proceeds as the residents will have and aspect of their lives that they have no control over foisted on them through no fault of their own. 5 Issues already exist with the water pressure this will be magnified
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	This development proposal should not proceed.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP45 (CAP013)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>CAP013</p> <p>We believe this site is unsound for any development for the following reasons:</p> <ol style="list-style-type: none"> 1 This area is on the edge of a designated area of outstanding natural beauty, being the highest marked point in Capel-Le-Ferne. To develop this site would cause an adverse visual impact. This site is directly opposite our property and our privacy would be compromised, with light and noise pollution. Our property would be devalued considerably. 2 There are significant problems with the water pressure and this site being the highest point will adversely impact this further. 3 We are concerned that there are horses buried on the site, which could cause an environmental issue should the site be developed. 4 Cauldham Lane is a narrow single lane without any pavements, dog walkers and horse riders use the lane to access the nearby bridle path, to increase the traffic using the lane would cause a detrimental effect for the users. The lane is frequently blocked by heavy farm traffic as there are no passing places, there is also a blind corner on the brow of the hill causing a further hazard
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	This development should be rejected
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I received the grapevine newsletter and feel sad about proposed building of 10 dwellings on brownfield site . I am most unhappy that this beautiful field where I take my children for walks etc , as do many other people within the village, is now going to have ten houses built there . It is such a beautiful field. There are so many abandoned houses around Kent , why is the money not being used to renovate other properties instead? Why build brand new houses , destroying the beautiful nature around us ? The village is perfect the way it is surrounded by these beautiful views and beautiful walks and open space. That is what makes capel le ferne this lovely village to live in. It is so sad that someone sees a field and instantly wants to build on it . The farmers work hard there growing their crops . That is their livelihood. That the farmers pass down from generation to generation. If we build on every field , then farming will soon cease to exist in the future. That is a really scary thought.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I have been a resident in Capel Street (DDC Redacted) for 23 years, I have raised my concerns many times as this seems to be a regular application over the period of time I have lived here. It's so sad that the farmer who owns the field behind me (proposed 70 dwellings) has stooped to a new low on offering and successfully succeeding on purchasing a bungalow (that can be demolished) to enable an entry road from Capel street as this in the past has been an issue. This area is noted on the plan. All this points out to me is this man has no concern for the local community and is only driven by financial gain. The residents of Capel like myself live in Capel due to the peace and outstanding countryside which surrounds us which obviously attracts all sorts of wild animals/ insects/ wild flowers. All of this I'm sure is part of the attraction for young couples/ families and Senior citizens to live in a SMALL village and helps to promote the community we now have. Concerns are felt as we feel Capel is at its limits now and especially our primary school. All this says to me if these dwellings are passed it will open the door for future dwellings and mass expansion in infrastructure to be able to make this viable. I'm sure you can sense but just to confirm I am absolutely against all the projects proposed and it will take away everything Capel Le Ferne stands for.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We wish to object to CAP006 / CAP009 / CP013 We are very concerned about the extra traffic these sites will cause, we live in a lane, we are both disabled and concerned about parking and access to our property if the road is widened. Also, the amount of traffic that is going to be using Capel Street is scary, it is dangerous enough crossing at the junction of Cauldham Lane / Capel Street now as I walk my dog and we are slow. Why don't the build where access can be directly off the main road, e.g. opposite Grasslands or opposite the war memorial. This is our village we don't really want a town
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>1.0 INTRODUCTION</p> <ul style="list-style-type: none"> • These representations have been prepared by Esquire Developments Ltd, a multi-award-winning SME developer based in Longfield, Kent. • Esquire Development has a number of land interests in Dover, including <ol style="list-style-type: none"> 1 New Townsends Farm, St Margaret's (Appendix 01); 2 Appleton Farm, East Langdon (Appendix 02) and 3 Ringwould Nurseries, Ringwould (Appendix 03) • New Townsend Farm is identified as an emerging allocation identified as SAP40 (STM006) in the Regulation 19 Local Plan. Appleton Farm and Ring would Nurseries are not identified as emerging allocations but put forward as suitable alternative sites. • As a local SME Housebuilder, the development of these sites brings forward the opportunity to help diversify the housing market and offer a wide choice of housing from different developers.

2.0 RESPONSE TO THE REGULATION 19 PLAN

A. New Townsend Farm, St Margaret's-at-Cliffe

- St Margaret's-at-Cliffe is recognised in the Regulation 19 Local Plan as a Local Centre along with Eythorne and Elvington, Eastry, Kingsdown, Shepherdswell, Wingham and Ash. These Local Centres are noted to be the largest of the district's rural settlements. The Local Centres are characterised by the range of services and facilities that they offer, serving the needs of their own residents and those of adjoining small villages and hamlets. We support the recognition within the plan that in order to help sustain and strengthen the role of these local centres, additional housing is considered appropriate. A total of 96 dwellings are allocated within the Regulation 19 Local Plan in St Margaret's-at-Cliffe.
- New Townsend Farm has been identified as an allocated site for 10 dwellings under SAP40 which allocates all small sites in St Margaret's-at-Cliffe. We support the identification of the site for development, and we consider this site to be deliverable in the lifetime of the plan.
- SAP40 includes two sites within St Margaret's-at-Cliffe Land at New Townsend Farm (referred to as STM006) and Land located between Salisbury Road and The Drove Way (referred to as STM010). These are shown on the map at Figure 4.12 and are both referred to as SAP40. As a point of transparency, it would be beneficial to separately identify these allocations on the accompanying Plan in order to prevent any confusion.
- We consider that this area has the potential to deliver more dwellings than the allocated number of 10 dwellings as part of a more comprehensive form of development which would, overall, deliver a much enhanced scheme of approximately 20 dwellings alongside significant areas of open spaces offering net biodiversity gain and maintaining views and perceived areas of separation.
- The proposed development would be in keeping with the surrounding pattern of development, reflecting an extension of built form in an eastward direction away from Station Road/High Street in a linear character (see Nelson Park Road, Hardy Road, St Vincent Road and Kingsdown Road for example in **Appendix 04**)
- **Appendix 01** demonstrates how this could come forward and facilitates the ability to deliver this allocation which has a covenant constraint that whilst is not a showstopper, would benefit from an increased capacity of dwellings.
- St Margaret's-at-Cliffe is recognised within SP4 Residential Windfall Development as an area where residential development or infilling will be permitted within or immediately adjoining the settlement boundaries. We consider that the wording of this policy is too restrictive (see SME Network Representations for full position) where it seeks to limit development unless within or immediately adjoining the settlement boundaries. We consider that the wording of this policy should be amended to reflect a more flexible approach. We would suggest that wording used by Ashford Borough Council in Policy HOU5 from the Ashford Local Plan 2030 adopted February 2019. A copy of this policy wording is provided at **Appendix 05**.

B. Appleton Farm, East Langdon

- East Langdon is recognised in the Regulation 19 Plan as a Larger Village and allocates Land adjacent Langdon Court Bungalow for 40 dwellings (LAN003). We consider that this site has a number of legal constraints that cannot be overcome and is therefore undeliverable. We suggest an alternative site should be proposed for allocation in Appleton Farm, East Langdon.
- East Langdon is categorised as a Larger Village within the Plan and distinguishes between the two distinct parts, the southern part and the northern part.
- East Langdon is recognised within SP4 Residential Windfall Development as an area where residential development or infilling will be permitted within or immediately adjoining the settlement boundaries.
- Paragraph 79 of the NPPF sets out that in order to promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities. It puts emphasis on the opportunities to grow where this will support local services. The key section of this paragraph is that where there are groups of smaller settlements, development in one village may support services in a village nearby. This is the case for East Langdon and Martin Mills, whereby services are interdependent on each other (by way of example the primary school is located in East Langdon, but the Railway Station is located in Martin Mills).
- We consider the allocated site in East Langdon, Land adjacent Langdon Court Bungalow (LAN003) to be undeliverable in the lifetime of the plan due to a number of restrictive covenants upon the land. The land is subject to restrictions which prevent the erection of any dwellinghouse or other buildings without consent from other parties. This is noted as a land charge and a copy can be found at Appendix 06. Our reading of the title indicates the following issues:
 - No sale is permitted until 30 September 2045 without consent of The Church Commissioners for England
 - Transfer dated 22 April 1970 contains Restrictive Covenants on over 5 parcels within the land to benefit and protect the part of the Langdon Court Farm House and farmlands adjoining the proposed land jointly and severally covenant with the personal representatives that they and their successors in title will not at any time erect or suffer to be erected any dwellinghouse or other buildings whatsoever upon the designated land without the written consent of the Personal Representatives.
- These restrictions are sufficient for a developer to not be able to purchase and develop the site.
- Accordingly, alternative sites should be found in East Langdon that are available, suitable and deliverable. Appleton Farm is such a site.
- Appleton Farm represents a parcel of land that is in total approximately 18.5 hectares. It extends from Holland Hill to the north to White Hill to the South. Whilst this is an extensive area, the site has the potential to deliver a modest scale of development of circa 30-35 dwellings on approximately 3.5ha that would offer a suitable alternative to the identified site – See Appendix 02.
- The proposal represent a reasonable alternative to the identified site and in a location that is recognised as being sustainable. Indeed, East Langdon and Martin Mills offer one of the few locations in the District outside of the main urban areas offering a railway connection and therefore a greater scale of development could be considered.

C. Ringwould Nurseries, Ringwould

- Ringwould is identified as a Smaller Village and Hamlet within the Plan. It is noted that although there is a limited range of services and facilities available, it is served by a regular bus service and there is a Church within Ringwould. It has close connections to the services and facilities in Kingsdown. Ringwould is located on the A258, the main road connecting Dover and Deal. We support the recognition that in order to help sustain and strengthen the role of smaller villages and hamlets, additional housing is considered appropriate. There is one emerging allocation within Ringwould for 10 units (Land at Ringwould, Alpines, Dover Road).
- Ringwould is identified in Policy SP4 Residential Windfall Development as a settlement appropriate for minor residential development or infilling of a scale that is commensurate with that of the existing settlement.
- The Nursery site is located to the west of Ringwould, with a long frontage to the A258. It comprises approximately 9.2ha and is considered suitable to deliver a wide mix of uses, including residential, retail, care and affordable homes and/or potentially education. Appendix 03 demonstrates how a care/retirement facility could be delivered.
- The mix of uses would help improve the services and facilities available to the existing community of Ringwould, as well as serve a wider catchment. The proposals would inherently improve the sustainability credentials of Ringwould as well as delving a mix of uses which are most in need, including care, affordable homes and potentially education.
- Consideration should be given by the Council as to the opportunity the site presents - including working with the Council's own Housing department to deliver locally required housing needs in partnership with the Council itself.

Please see attached full representations including appedices

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see above and attached representations in full

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Local Site Allocations SAP 46 - Land adjacent Langdon Court Bungalow (LAN003), East Langdon
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Category: Soundness: Justified See previous comments related to the availability of services and facilities in East Langdon. 40 homes would increase the size of the village by 58% and it is unclear about how this will be sustainable as per Policy SP2 (Planning for Healthy and Inclusive Communities) which includes the following text: "Ensuring that new development is well served by services and facilities (for example education, health care, community, cultural facilities, play, youth, recreation, sports, faith and emergency facilities) and that a mix of uses are provided in new development that support daily life") and clause a of SP4.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	a: Development should be focused in the southern part of the site fronting onto The Street. The northern and north-western part of the site should remain undeveloped and be retained as a landscape buffer: Category: Soundness: Effective Unclear if the settlement confines are to be amended to include the new site. If so, the landscape buffer would be at odds with Policy SP4 (Residential Windfall), which would permit windfall within or immediately adjoining the settlement boundaries, as shown on the Policies Map with the intention of reducing instances of isolated dwellings. Suggested amendment: Development should be restricted to the southern part of the site fronting onto The Street. The northern and north-western part of the site should remain undeveloped and be retained as a landscape buffer, to prevent development no further north than the existing line set by the existing woodland; b: Development should be low density and sensitively designed to respect the character of the area and to allow transition to the rural landscape: Category: Soundness: Effective Concern about the viability of delivering type type/mix/affordability of homes required to meet local need versus low density housing.

Suggested amendment: The design, numbers and style of housing need to be commensurate with the existing houses, density and connectivity with the village. Development should be low density throughout and sensitively designed to respect the prevailing historic character of the wider area and to allow transition to the rural landscape to the north and east.

c: A generous landscape buffer and structural planting, determined by a Landscape Visual Impact Assessment is required to mitigate the impact of development on the wider countryside:

Category: Soundness: Effective

It is unclear as to how 'generous' is being defined here. Also would be helpful to include detail as to the type of buffer – i.e. it should be a natural buffer comprising native species.

Suggested amendment: A generous landscape buffer and structural planting along all site boundaries, determined by a Landscape Visual Impact Assessment is required to mitigate the impact of development on the wider countryside.

d: The existing trees/hedgerows in the site and around the boundary of the site are to be maintained and enhanced where necessary to provide screening to mitigate the impact of development on the countryside:

and

e: Consideration will be to be made regarding the quality and condition of trees and hedgerows within the site. Detailed proposals should aim to protect those of importance and incorporate them in the overall design of the development and to provide opportunities for biodiversity habitat creation and enhancement:

Category: Soundness: Effective

Clauses appear to be somewhat contradictory.

How will trees/hedges be considered in terms of 'importance'? What is the definition being used (e.g. Woodland Trust veteran/ mature trees etc.). Cross-reference to Policy CC8, which required 2 x new trees to be planted per dwelling.

Suggested amendment: The existing trees/hedgerows in the site and around the boundary of the site are to be maintained and enhanced where necessary to provide screening to mitigate the impact of development on the rural countryside, particularly the existing woodland area to the immediate west of the site, which is of high ecological value. Where unavoidable boundary planting loss is necessary to achieve site access and footpath connectivity, a new tree-planted boundary shall be re-provided within the site between the development and the existing highway.

Consideration will be to be made regarding the quality and condition of trees and hedgerows within the site. Detailed proposals should aim to protect those of importance and incorporate them in the overall design of the development and to provide opportunities for biodiversity habitat creation, protection, enhancement and improving wider ecological connectivity.

f: Primary vehicular, pedestrian and cycle access to the site shall be provided from East Langdon Road, with the existing road to be widened at access point:

Category: Soundness: Effective

Improve clarity of wording to make more locally specific and effective.

Suggested amendment: Primary vehicular, pedestrian and cycle access to the site shall be provided from The Street/East Langdon Road, with the existing road to be widened at access point before new properties are sold.

g: Include a review of 20mph speed limit extent including appropriate gateway feature on The Street:

Category: Soundness: Effective

Essential to ensure safe connectivity with the existing village. Presumably this will be the responsibility of the Highways Authority (i.e. KCC). How will this be delivered?

h: Investigate, and where possible deliver, the need for improvements to the local rural road network:

Category: Soundness: Effective

This is noted in the IDP. Is this in relation to the site boundary or wider works across the parish?

No mention of rural bus services? Link to SP12 (the Council will support proposals for the rural demand-responsive bus service and other improvements to local bus service provision) – given that rural transport is limited in the village.

Policy T11: states: Development should, in so far as its size, characteristic and location: (A) Be designed so that opportunities for sustainable transport modes are maximised and provide for; (b) a variety of forms of transport as alternatives to travel by private motorised vehicle.

Clause H of the Langdon Policy appears to water these (and the other T11) clauses down.

Widening roads? How? A clause that would be impossible to deliver. But try to make safer?

Needs to be more locally specific: Suggested amendment: Investigate, and where possible deliver, the need for improvements to the local rural road network, in particular along Waldershare Lane to the west, Lucerne Lane to the north, and the junction of Station Approach onto the A258 to the east.

i: Provide pedestrian and cycle connections to Landon Playing Field and Langdon Primary School, in addition to connections and enhancements to the PROW ER44/45/47:

Category: Soundness: Effective

And connecting these to the wider footpath/cycle network?

The popular White Cliffs Skylark Cycle Trail passes through Langdon parish.

Links to the shop and the railway station?

Many of the local facilities that the residents might wish to access are located in neighbouring small villages (e.g. pubs, the railway station).

Therefore new developments should be required to connect to the wider network that enables this access.

Suggested amendment: Provide pedestrian and cycle connections along The Street between the Parish/Village Hall, Landon Playing Field and Langdon Primary School, in addition to connections and enhancements to the PROW ER44/45/47, and improved footpath/cycle connectivity to Martin Mill railway station.

k: A site-specific Flood Risk Assessment is required to address the issue of surface water flooding and consider the impacts of climate change over the lifetime of the development:

Category: Soundness: Effective

The site falls wholly within Groundwater Protection Zone 2, hence reference to NE5 needs to be made.

o: Open space requirements in accordance with Policy PM3, shall be provided. Due to the location in adjacent to existing open space and equipped play infrastructure in Langdon Playing Field, this scheme should seek to provide extensions and/or enhancements to those facilities:

Category: Soundness: Effective

This is also included in the IDP.

There may be other infrastructure required as opposed to or in addition to that mentioned. The Parish Council is in the process of producing a neighbourhood plan and would not wish the LP to restrict any findings from the community that could be used to inform this provision.

Suggested amendment: provision of community infrastructure, based on local need following engagement with the local community.

This would also assist in contributing to the achievement of policies SP2 and SP4.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP4 - Residential Windfall Development, Paragraph 1
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Langdon Parish remains concerned about the categorisation of East Langdon as a 'Large Village'— see comments below this table. It is unclear as to whether the settlement confines are to be amended to incorporate the proposed site allocation at East Langdon (Policy SAP46 - Land adjacent Langdon Court Bungalow, The Street, East Langdon (LAN003)). The Parish Council would like to see clarity on this, as extending the boundary would potentially open up additional countryside to windfall development. As an aside, the Policies map describes these as the 'settlement confines' as opposed to the 'settlement boundaries'
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	12Settlement hierarchy- East Langdon as a 'larger village': The Parish Council remains concerned about the categorisation of East Langdon as a 'larger village' The criteria for this category states that larger villages have a good range of services and facilities, which serve their own residents and those of nearby hamlets. East Langdon village has no retail facilities. There is a Post Office operated from the village hall two mornings per week. One bus serves the village 5 times a day, although there is no evening service. The main facility is the primary school, however it is unclear as to the viability of the school. The KCC Schools Plan states that there is likely to be a surplus of spaces in the coming years: " <u>District commentary</u> : We forecast a significant surplus of Year R and Year R-6 places over the Plan period. This surplus is the result of the falling birth rate, with some planning groups having around one quarter increase of Year R surplus in the coming years. As schools are primarily funded on the number of pupils on roll, low Year R numbers will impact on future budgets with some schools choosing to reduce their published admissions numbers." " <u>Dover East Planning Group</u> : Surplus places are forecast throughout the Plan period. However, in the longer term places will be required to support the planned development of Connaught Barracks. Ideally this will be via the expansion of Guston Church of England Primary School. We are continuing to work with interested parties to secure the additional land that will be required to enable the expansion to happen." The supporting text for the policy says that to help sustain and strengthen the role of these larger villages, additional housing over the lifetime of this Plan is considered appropriate. Criteria (a) of the policy itself states that any development is to be of "a scale that is appropriate to the size of the settlement and the range of services and community facilities that serve it, taking account of the cumulative impact of any allocated sites and committed development". This is further emphasised in Policy SP2 (Planning for Healthy and Inclusive Communities) which includes the following text: "Ensuring that new development is well served by services and facilities (for example education, health care, community, cultural facilities, play, youth, recreation, sports, faith and emergency facilities) and that a mix of uses are provided in new development that support daily life."

	<p>East Langdon currently comprises some 87 dwelling, 69 being concentrated central to the village in the vicinity of The Street, a narrow through-route to other hamlets of the parish. The proposed land allocation SAP46 at East Langdon is for 40 dwellings adjacent to the current north-eastern settlement boundary on BMV quality agricultural land.</p> <p>This location would be accessed via the network of narrow country lanes which lead from the A258 – A256 – A2 district highways into East Langdon Road and The Street. Although SAP46 has been identified as the most suitable allocation site in East Langdon, increasing the village core from 69 to 109 dwellings (58%) would have a profound impact on the local infrastructure, road network and access to services.</p> <p>It is considered that there is a discrepancy between the allocation of 40 additional dwellings to the village (with no requirement for mixed development to include space for other services/ retail/ economic use etc.) in the context of Policy SP2 and clause (a) of Policy SP4 particularly in the context of lack of certainty over the school, which is the primary service in the village, and the rural nature of the road network. The Parish Council consider that either the categorisation of East Langdon as a larger village should be reconsidered, or the number of dwellings in the proposed site allocation should be reconsidered to ensure that it is sustainable in the context of the lack of local services.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Langdon Parish Council wishes the opportunity to explain the specific issues with East Langdon being categorised as a "Large Village" and the consequential issues it raises if a development was proposed which would increase the dwellings by nearly 60% on the infrastructure, road safety and infrastructure services.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP46 - Land adjacent Langdon Court Bungalow, East Langdon (LAN003)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>I consider the SAP 46 of the Local Plan to be unsound on the grounds of its positive preparation. To be positively prepared, the Plan should achieve sustainable development part of which includes an environmental objective.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>This environmental objective is not met due to the partially contradictory nature of points D and E. Point D states "The existing trees/hedgerows in the site [...] are to be maintained and enhanced where necessary to provide screening to mitigate the impact of development" while E states "Consideration will be to be made regarding the quality and condition of trees and hedgerows within the site [...] aim to protect those of importance".</p> <p>It is therefore unclear whether any potential developers have a responsibility to maintain and enhance the wooded area in the southern corner of the site or only if this only applies if they deem it of sufficient importance or screening.</p> <p>The regulation should be re-written in a more prescriptive manner to ensure the protection and, if at all possible, expansion of this wooded area to safeguard the current level of biodiversity.</p> <p>Furthermore, point C should be more prescriptive about the "generous landscape buffer". This should include linking the buffer, to be focussed in the northern end of the site, with the wooded area at the southern end of the site. The regulation should ensure that a wildlife corridor is maintained between the landscape buffer and wooded area.</p> <p>Overall, the plan should seek to combine points C, D and E to ensure a generous boundary to the north and north-west with this linked, or curved round, to the wooded area in the south.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>1.0 INTRODUCTION</p> <ul style="list-style-type: none"> • These representations have been prepared by Esquire Developments Ltd, a multi-award-winning SME developer based in Longfield, Kent. • Esquire Development has a number of land interests in Dover, including <ol style="list-style-type: none"> 1 New Townsends Farm, St Margaret's (Appendix 01); 2 Appleton Farm, East Langdon (Appendix 02) and 3 Ringwould Nurseries, Ringwould (Appendix 03) • New Townsend Farm is identified as an emerging allocation identified as SAP40 (STM006) in the Regulation 19 Local Plan. Appleton Farm and Ring would Nurseries are not identified as emerging allocations but put forward as suitable alternative sites. • As a local SME Housebuilder, the development of these sites brings forward the opportunity to help diversify the housing market and offer a wide choice of housing from different developers. <p>2.0 RESPONSE TO THE REGULATION 19 PLAN</p> <p>A. New Townsend Farm, St Margaret's-at-Cliffe</p> <ul style="list-style-type: none"> • St Margaret's-at-Cliffe is recognised in the Regulation 19 Local Plan as a Local Centre along with Eythorne and Elvington, Eastry, Kingsdown, Shepherdswell, Wingham and Ash. These Local Centres are noted to be the largest of the district's rural settlements. The Local Centres are characterised by the range of services and facilities that they offer, serving the needs of their own residents and those of adjoining small villages and hamlets. We support the recognition within the plan that in order to help sustain and strengthen the role of these local centres, additional housing is considered appropriate. A total of 96 dwellings are allocated within the Regulation 19 Local Plan in St Margaret's-at-Cliffe. • New Townsend Farm has been identified as an allocated site for 10 dwellings under SAP40 which allocates all small sites in St Margaret's-at-Cliffe. We support the identification of the site for development, and we consider this site to be deliverable in the lifetime of the plan.

- SAP40 includes two sites within St Margaret's-at-Cliffe Land at New Townsend Farm (referred to as STM006) and Land located between Salisbury Road and The Drove Way (referred to as STM010). These are shown on the map at Figure 4.12 and are both referred to as SAP40. As a point of transparency, it would be beneficial to separately identify these allocations on the accompanying Plan in order to prevent any confusion.
- We consider that this area has the potential to deliver more dwellings than the allocated number of 10 dwellings as part of a more comprehensive form of development which would, overall, deliver a much enhanced scheme of approximately 20 dwellings alongside significant areas of open spaces offering net biodiversity gain and maintaining views and perceived areas of separation.
- The proposed development would be in keeping with the surrounding pattern of development, reflecting an extension of built form in an eastward direction away from Station Road/High Street in a linear character (see Nelson Park Road, Hardy Road, St Vincent Road and Kingsdown Road for example in **Appendix 04**)
- **Appendix 01** demonstrates how this could come forward and facilitates the ability to deliver this allocation which has a covenant constraint that whilst is not a showstopper, would benefit from an increased capacity of dwellings.
- St Margaret's-at-Cliffe is recognised within SP4 Residential Windfall Development as an area where residential development or infilling will be permitted within or immediately adjoining the settlement boundaries. We consider that the wording of this policy is too restrictive (see SME Network Representations for full position) where it seeks to limit development unless within or immediately adjoining the settlement boundaries. We consider that the wording of this policy should be amended to reflect a more flexible approach. We would suggest that wording used by Ashford Borough Council in Policy HOU5 from the Ashford Local Plan 2030 adopted February 2019. A copy of this policy wording is provided at **Appendix 05**.

B. Appleton Farm, East Langdon

- **East Langdon is recognised in the Regulation 19 Plan as a Larger Village and allocates Land adjacent Langdon Court Bungalow for 40 dwellings (LAN003). We consider that this site has a number of legal constraints that cannot be overcome and is therefore undeliverable. We suggest an alternative site should be proposed for allocation in Appleton Farm, East Langdon.**
- **East Langdon is categorised as a Larger Village within the Plan and distinguishes between the two distinct parts, the southern part and the northern part.**
- **East Langdon is recognised within SP4 Residential Windfall Development as an area where residential development or infilling will be permitted within or immediately adjoining the settlement boundaries.**
- **Paragraph 79 of the NPPF sets out that in order to promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities. It puts emphasis on the opportunities to grow where this will support local services. The key section of this paragraph is that where there are groups of smaller settlements, development in one village may support services in a village nearby. This is the case for East Langdon and Martin Mills, whereby services are interdependent on each other (by way of example the primary school is located in East Langdon, but the Railway Station is located in Martin Mills).**

- We consider the allocated site in East Langdon, Land adjacent Langdon Court Bungalow (LAN003) to be undeliverable in the lifetime of the plan due to a number of restrictive covenants upon the land. The land is subject to restrictions which prevent the erection of any dwellinghouse or other buildings without consent from other parties. This is noted as a land charge and a copy can be found at Appendix 06. Our reading of the title indicates the following issues:
 - No sale is permitted until 30 September 2045 without consent of The Church Commissioners for England
 - Transfer dated 22 April 1970 contains Restrictive Covenants on over 5 parcels within the land to benefit and protect the part of the Langdon Court Farm House and farmlands adjoining the proposed land jointly and severally covenant with the personal representatives that they and their successors in title will not at any time erect or suffer to be erected any dwellinghouse or other buildings whatsoever upon the designated land without the written consent of the Personal Representatives.
- These restrictions are sufficient for a developer to not be able to purchase and develop the site.
- Accordingly, alternative sites should be found in East Langdon that are available, suitable and deliverable. Appleton Farm is such a site.
- Appleton Farm represents a parcel of land that is in total approximately 18.5 hectares. It extends from Holland Hill to the north to White Hill to the South. Whilst this is an extensive area, the site has the potential to deliver a modest scale of development of circa 30-35 dwellings on approximately 3.5ha that would offer a suitable alternative to the identified site – See Appendix 02.
- The proposal represent a reasonable alternative to the identified site and in a location that is recognised as being sustainable. Indeed, East Langdon and Martin Mills offer one of the few locations in the District outside of the main urban areas offering a railway connection and therefore a greater scale of development could be considered.

C. Ringwould Nurseries, Ringwould

- Ringwould is identified as a Smaller Village and Hamlet within the Plan. It is noted that although there is a limited range of services and facilities available, it is served by a regular bus service and there is a Church within Ringwould. It has close connections to the services and facilities in Kingsdown. Ringwould is located on the A258, the main road connecting Dover and Deal. We support the recognition that in order to help sustain and strengthen the role of smaller villages and hamlets, additional housing is considered appropriate. There is one emerging allocation within Ringwould for 10 units (Land at Ringwould, Alpines, Dover Road).
- Ringwould is identified in Policy SP4 Residential Windfall Development as a settlement appropriate for minor residential development or infilling of a scale that is commensurate with that of the existing settlement.
- The Nursery site is located to the west of Ringwould, with a long frontage to the A258. It comprises approximately 9.2ha and is considered suitable to deliver a wide mix of uses, including residential, retail, care and affordable homes and/or potentially education. Appendix 03 demonstrates how a care/retirement facility could be delivered.

	<ul style="list-style-type: none"> The mix of uses would help improve the services and facilities available to the existing community of Ringwould, as well as serve a wider catchment. The proposals would inherently improve the sustainability credentials of Ringwould as well as delving a mix of uses which are most in need, including care, affordable homes and potentially education. Consideration should be given by the Council as to the opportunity the site presents - including working with the Council's own Housing department to deliver locally required housing needs in partnership with the Council itself. <p>Please see attached full representations including appedices</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Please see above and attached representations in full
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP46
2 - Do you consider this part of the Plan sound?	Yes

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Gladman is promoting land adjacent Langdon Court Bungalow, The Street, East Langdon (LAN003) for residential development. The site is approximately 4.6 hectares in size currently in agricultural use and is situated to the north of The Street, on the northern edge of the village of East Langdon, Kent. Accompanying this representation is a Design Journal prepared by TaylorHare Architects which describes the emerging development proposals and provides a design rationale for the scheme. There has been detailed analysis undertaken in order to establish a considered set of design principles, upon which a site layout has been derived. (DDC Note - Text Extracted from Document sent from Gladman Developments Ltd. Full attachment can be found under the introduction comment reference SDLP1192)
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Gladman would advise that the wording of Policy SAP46 is altered from "Development proposals for the site shall include the following:" to "Development proposals for the site shall be supported when in broad accordance with the following:" to ensure that any necessary deviations following the outcome of detailed technical works can be supported in order to allow the site to come forward in conformity with Policy SAP46.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Gladman are actively promoting Land off the Street, East Langdon and would therefore request a seat at the table to have detailed discussions regarding the suitability of the sites allocation.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Lydden ~Parish Council does not consider the proposed development on the land adjacent to Lydden Court Farm to be sound for the following reasons: 1. There will be a massive issue with the drainage of waste from the development 2. There will be huge issues with the disruption to local residents during the building of the development 3. There is no suitable access by road apparent in the plan 4. There is no village shop or amenities to support future residents 5. There is likely to be substantial flooding during the winter months and the subsequent freezing of the water will lead to dangerous conditions
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The development should not go ahead. It is unnecessary and there is already a new development that is taking place within the curtilage of the village with no suitable access or amenities, this proposed development is both unnecessary and unsuitable for the area.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The site lies adjacent to the Kent Downs, with the AONB boundary formed by Canterbury Road. The site is considered relatively well contained within the wider landscape with limited intervisibility between the AONB and the site, from where development would be viewed in conjunction with existing development associated with the village. The proposed requirements included in criterion c to help manage impacts on the AONB are supported.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP47 -S Land adjacent to Lydden Court Farm (LYD003) a) & b) Building on this site, even if restricted to the southern most part of the site will not prevent the impact i.e. smells/noise from the working farm c) No consideration of the impact on properties already bordering the site have been taken into account particularly if development is to be on the southern most part of the site e) f) l) Primary vehicular will impact on our quality of life i.e. noise and air quality. Egress from the site in only a southerly direction will result in all vehicles passing our property in both directions and the new road into the site will mean having roadways on 3 sides of our property. There is no mention of existing traffic using Church Lane and if and how this will be impacted.

	<p>Pedestrians will have no pathway to the eastbound bus stop as Lydden Garage forecourt is not a public right of way. At times of heavy rainfall Church Lane from site to Canterbury Road can be under water, affecting cycle and pedestrian access and vehicles causing a wash that could affect our fencing. This has occurred historically and on several occasions over the past 2 years.</p> <p>g) This I believe is incorrect as a crossing would be required to access the westbound bus stop.</p> <p>j) Partly referenced above. Surface water from all directions courses towards Lydden Pond and then down the current track behind our property to the proposed development site. If property is built on this site it will cause additional surface water into this location at its lowest point.</p> <p>In addition and in light of the use of mobile phones and data in 21st century, Lydden, particularly the proposed development area, has very limited/no mobile/data service by any provider.</p> <p>The hedgerow on Church Lane and where the access road is to be built is full of wildlife, including rabbit warren and deserves some consideration so as not to cause mass destruction.</p> <p>Consideration during construction, if it goes ahead will cause considerable dust, mud, noise and disruption, including the increased number of large vehicles/machinery and workers vehicles.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I would not recommend this site for development.</p> <p>As in g) above</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

REPRESENTATIONS TO THE DOVER DISTRICT LOCAL PLAN REGULATION 19 CONSULTATION IN RESPECT OF LAND ADJACENT TO LYDDEN COURT FARM, CHURCH LANE, LYDDEN

Iceni Projects, on behalf of Quinn Estates, welcomes the opportunity to submit further representations to the Dover District Local Plan (Regulation 19 Consultation) in respect of land to the north of Lydden Court Farm, Church Lane, Lydden (referred to in the Plan as as Policy SAP47). Quinn Estates ('Quinn') is the south east's foremost mixed use developer with numerous development interests within Dover District, Kent and the wider South East area. The company has delivered both successful community extension schemes and stand-alone development sites both within rural and urban locations within the District. Quinn Estates' track record of housing delivery should be a material consideration that should inform key planning decisions, including which sites to allocate for development. The company has delivered more commercial space than any other developer in Kent creating over 5,000 jobs and millions of pounds of investment in the Kent economy and in the past year obtained planning permission for circa 3,000 new dwellings. Furthermore, Quinn has demonstrated through its actions that it can formulate and deliver development solutions of high community value, always working hard to identify through community engagement how the company's developments can support and strengthen communities by delivering community infrastructure needed.

Quinn supports the proposed allocation of Land adjacent to Lydden Court Farm, and considers that it is a sustainable, deliverable and achievable site that would enable the delivery of a high-quality residential development that could support the steady growth of Lydden and bring an opportunity to deliver public improvements. The site is well-located, in a desirable location with good sustainability credentials for a settlement of its size. With Quinn overseeing the delivery of the scheme, it is also considered that it could unlock new benefits for the town, including public open space provision, which the plan recognises Lydden to be in need of. As will be evidenced in the following sections, Quinn considers that the issues of visual impacts, highways, ecology, flooding and drainage can be managed and appropriately addressed.

a. The Site

The site is approximately 2ha of relatively flat land, comprising one large open grassland field and a smaller field forming part of the residential curtilage of a residential dwelling ('Glebelands') which adjoins Church Lane. The site adjoins the settlement boundary of Lydden to the south and east and is located on the western side of the village. The site is bound by development on three sides. Lydden Court Farm, including the Farmhouse, outbuildings and open fields which front onto Church Lane lie to the north. Residential properties fronting onto Canterbury are to the east. In the south, the site is bound by further residential properties fronting onto Canterbury Road, whilst to the west are open agricultural fields. The site boundary includes a smaller area of open land fronting onto Church Lane

than is included in the draft allocation boundary. The adjoining residential dwelling known as Glebelands and its associated outbuildings further to the north of this are not proposed to be included as part of the allocation.

A Public Right of Way (PRoW) runs along the eastern boundary of the site and across the back of Lydden Court Farm towards the Church of St Mary further north. The site is within a Groundwater Source Protection Area (Zone 2) and the Dover & Folkestone Cliffs & Downs Biodiversity Opportunity Area, but is not subject to any statutory ecological designations. The Kent Downs AONB is located to the south of the site beyond the residential dwellings fronting onto Canterbury Road. There are no heritage assets on or adjoining the site and the site is not located in a Conservation Area. The closest heritage asset is the Grade II listed Lydden Court Farmhouse and the Church of St Mary (Grade II*) beyond this to the north of the site, however it appears that views of these assets from the site are reduced due to the farm outbuildings located between the Farmhouse and site. The site is wholly located in Flood Zone 1.

b. Support for SAP47, Dover District Local Plan

Quinn Estates is in support of the allocation of Land at land to the north of Lydden Court Farm, Church Lane (Policy SAP47). The land is located within Lydden, a small but sustainable settlement located in

the south of Dover. The village benefits from a number of valuable services which are uncommon for a settlement of its size, including a GP, Primary School and Public House. There are also a number of industrial/commercial sites within close walking distance, providing residents with a local source of work. For residents that work in other sectors, there is a regular bus service which provides quick access to the coastal town of Dover. The site Sustainability Appraisal submitted as part of the Regulation 19 Evidence Base indicates that the site scores well in regard to Services and Facilities, Employment Opportunities, Sustainable Transport Options and opportunity for Climate Change Mitigation. By virtue of these credentials, Quinn Estate therefore also supports the promotion of the settlement from Village (in the adopted Core Strategy 2010) to 'Larger Village' in the Draft Local Plan. The principal constraints for development relate to drainage, flooding, and access, in addition to impacts on nearby heritage and ecology assets. Given these considerations, the previous allocation of the site for 65 dwellings, at the 'Preferred Options' phase (Regulation 18), was considered undeliverable. It was also considered that this quantum would conflict with the existing settlement character, which currently comprises detached and semi-detached dwellings set within medium and large plots. The Regulation 19 Submission version of the Plan allocates the site for 30 dwellings, which Quinn considers to be deliverable in account of the sites constraints and more in keeping with the prevailing character and urban form of the village. It is also noted that this site allocation falls outside of the Nutrient Neutrality Catchment Area, and therefore would be able to make a meaningful contribution to Dover District's short term housing supply. A number of measures to address the issues mentioned are set out within Policy SAP47 of the Draft Plan, which ensures that an acceptable and sustainable scheme is delivered. These measures are discussed in further detail below. Though the capacity of the allocation has been reduced, it is considered that the approach taken to the allocation of the site is a result of sound plan making and would enable the delivery of a sustainable development whilst still making a meaningful contribution to Dover District's rural housing needs. The site is suitable, available now and achievable in accordance with NPPF Paragraph 68, and could come forward quickly to bolster the Council's short term supply. There are no obvious barriers to delivery, and, as will be shown below, the requirements listed in draft Policy SAP47 are considered to be deliverable and appropriate measures to ensure that negative impacts are not generated. In addition to this, Quinn Estates recognise the needs of the village, and consider that through the delivery of the scheme, they could also make a meaningful contribution towards addressing identified public infrastructure needs to support the new and existing residents.

c. Site Allocation Conditions

For the Draft Allocation SAP47, a number of conditions are listed within this Policy to ensure that a sustainable and appropriate scheme is secured. At this stage, Quinn consider that the conditions posed on the site do not threaten the deliverability, suitability or achievability of the site and that the proposed Policy is sound and in conformity with the NPPF. The revised development quantum can be accommodated with limited impact on the local area, particularly in terms of transport and heritage, as set out in more detail below.

Public infrastructure provision

Parish Council have identified that the settlement is in need of new play facilities for children. In terms of Policy SAP47, a requirement has therefore been set out within matter (o) to investigate the provision of equipped play facilities, either on site or off site. Although Draft Policy PM3 would not require this level of provision for a scheme of this size, Quinn Estates agree that this is something that should be explored and, although it may not be possible to secure such provision on site, is prepared to work with the Parish Council and District Council to secure this provision. It is envisaged that this objective is more achievable given the reduction in dwellings for the regulation 19 submission.

Heritage

As noted, there are multiple heritage assets within proximity to the site, including Lydden Court Farmhouse (Grade II listed) and the Church of St Mary (Grade II* listed) both to the north of the site. Views of and from the assets are limited due to the existing outbuildings ancillary to the Farmhouse that are located between the assets and the site. In addition, there is strong tree and hedge planting to the rear of these outbuildings and along the field boundaries to the north and north-east which will

limit views further. The following conditions are proposed in the Draft Allocation:

(b) Development should be restricted to the southernmost part of the site with a significant buffer zone and density significantly decreased, in order to reduce potential harm to the setting of the farmstead and Grade II* church;

(k) A Heritage Assessment for the site must be carried out in accordance with Policy HE1 the results of which should inform the layout and design of the development which is necessary to avoid harm to any heritage assets identified through the assessment;

Quinn Estates raises no objection to the suggested conditions and consider that this would be deliverable with any future proposals on the site. The proposed reduction in dwelling numbers for the site will help ensure that the future development would significantly limit any impacts on surrounding heritage assets, whilst being able to secure an effective use of land and public benefits. Whilst the site currently benefits from existing landscaping features, it is envisaged that additional landscaping is proposed to screen views of the site from the north and a sensitive design is proposed which will ensure the proposed development is in keeping with the character of the area. Overall, in regard to heritage impacts, the allocation is considered to be sound and would be comply with the Heritage Objectives set out within the NPPF.

Landscape

As the site is within the Kent Downs AONB, the draft allocation also states in matter (c) that appropriate measures are taken to avoid or minimise impacts on the setting of the Kent Downs AONB through the completion of a Landscape Visual Impact Assessment to determine the provision of an appropriate landscape buffer which will mitigate the impact of development on the AONB and wider countryside. The site is bordered by existing development to the south and east, as well as partly to the west and north. Therefore, the site is considered to be enveloped by the existing settlement, which significantly limits the impacts of any future development upon wider views from the surrounding countryside. Quinn considers that this proposed condition, coupled with the recommendations set out to limit heritage assets, will rule out any risk of significant landscape impacts. It is envisaged that the dwellings will benefit from planting and trees, providing a suitable buffer between the proposed development and existing dwellings and in particular, the listed buildings to the north. Overall, it is considered that the reduced scheme will provide an opportunity to deliver a high quality landscape setting which is suitable for the settlement.

Transport and Access

The site is encompassed by Church Lane in the west and Canterbury Road in the east. Apart from the small section of land to the east, the site is separated from these roads by single rows of buildings. Previous works conducted for Regulation 18 Local Plan consultation confirm that the existing junction function well and that the provision of 30-35 dwellings would not result in a detrimental impact on the local highway network.

In respect to Allocation SAP47, the following conditions are suggested to address transport and access matters:

(e) Primary vehicular, pedestrian and cycle access to the site shall be provided from Church Lane. Site access is to be designed to physically prevent access/egress to/from Church Lane to the north;

(f) Alterations are required at the two Canterbury Road junctions to manage vehicle movements;

(g) An uncontrolled pedestrian crossing where PROW ER116 joins Canterbury Road, is required to provide access to eastbound bus stop; and

(n) A Transport Assessment is required to be carried out in accordance with Policy TI3;

Quinn considers the above proposed conditions represent a sound approach to ensuring that the future development would be safe and suitable in regard to transport and access for the site, however, it is suggested that the wording of matter (e) altered so that the objectives can be delivered through a more realistic approach:

(e) Primary vehicular, pedestrian and cycle access to the site shall be provided from Church Lane. Site access is to be designed to discourage access/egress to/from Church Lane to the north;

Additionally, whilst Quinn supports the requirement for the access to be provided to/from the south of Church Lane, it is considered that to allow flexibility for the scheme, the wording of matter 'f' of draft Policy SAP47 should be changed to the following:

(f) "A suitable layout at the Canterbury Road / Church Lane junction will be secured to manage vehicle movements."

In addition, Quinn supports the requirement for the development of the site to include a connection to the PRow to provide routes to the bus stops and primary school. The village benefits from regular buses 7 days a week to Canterbury and Dover, so this provision would ensure that the new residents would be able to safely access sustainable transport options within the village. It is considered that the improvements to the junctions at Canterbury Road and pedestrian crossings are deliverable, and their exact location and nature would be subject to detailed work as part of any future planning application. Overall, it is considered that the transport impact of the new development could be mitigated, and even result in a betterment on the existing situation, whilst also providing significant benefits in terms of sustainable modes of transport in accordance with NPPF paragraph 104.

Ecology

The site is greenfield land, comprising grassland fields, bordered by hedgerows and trees. Previous technical studies confirm that the site is located within a Biodiversity Opportunity Area but is not subject to any ecological designations. In terms of habitats, previous works have also confirmed the site is a potential habitat of nesting birds which would need to be investigated further. In light of these considerations, a number of conditions have been attached to draft allocation in regard to Ecology:

(d) Consideration will be made regarding the quality and condition of trees and hedgerows within the site. Detailed proposals should aim to protect those of importance and incorporate them in the overall design of the development and to provide opportunities for biodiversity habitat creation and enhancement and support integrity of the BOA;

(h) In accordance with Policy SP13, a wintering bird survey must be undertaken in advance of a planning application on the site. If the bird survey identifies that the development will exceed the threshold of significance, mitigation will be required. A suitable scheme of mitigation will need to be submitted with the planning application for the site;

(i) In accordance with Policy SP13, an Environment Assessment study will be required for any development to address any potential impact on the Lydden & Temple Ewell Downs SAC;

Quinn considers that the proposed mitigation measures suggested are appropriate for the scheme and would ensure that the development would not result in the loss of any important ecological features.

As noted, the site benefits from a range of ecological features that would be able to be retained with any future development, which would contribute towards the objectives of the Biodiversity Opportunity Area. The development could also be timed appropriately to ensure that the development of the site does not result in any negative or harmful impacts on wintering birds. In addition to retaining as much ecological features on site as possible, Quinn would also seek to achieve Biodiversity Net Gain on site, resulting in an overall betterment to what presently exists. This could be achieved through a number of methods, such as native tree planting, bat roosting and more diverse nesting habitats for birds. The development of the site is considered to be suitable in regard to Ecology matters and the measures imposed are a result of sound plan making and would accord with Paragraph 174 of the NPPF.

Flooding and Drainage

The site is located within Flood zone 1, however, has been identified to contain land with a 1 in 30 year risk of surface water flooding. Therefore, it was considered in the Regulation 18 phase that this should be addressed by a carefully informed layout designed to address the potential threat of surface water flooding. A key change made between the Regulation 18 and Regulation 19 versions of the Local Plan was to lower the overall quantum of the site from 65 to 30. It is considered that this is a significant step down in the number of homes that would be delivered, and would create scope to position the dwellings away from the areas at highest risk of flooding. The following conditions are proposed in SAP47:

(j) A site specific Flood Risk Assessment must be carried out in accordance with Policy CC5 to address the issue of surface water flooding. This should inform the Sequential Approach which

	<p>should be applied to the layout of the site by locating the most vulnerable elements in the lowest risk areas;</p> <p>(m) Layout is planned to ensure future access to existing wastewater infrastructure for maintenance and upsizing purposes</p> <p>Overall, Quinn Estates support the approach taken to the site in respect to the mitigation of flood impacts, and consider that through the implementation of the measures suggested, a safe and suitable scheme could be delivered on the site.</p> <p>d. Conclusion</p> <p>Quinn Estates wishes to support Dover in bringing forward a successful, effective and sound Local Plan that can serve the District across the Plan period. With respect to the proposed Housing Allocations, Quinn Estates consider that the allocation of Land Adjacent to Lydden Court Farm, Church Lane, Lydden is a good opportunity to provide for the Districts future rural housing needs, and consider that the proposed conditions would ensure that the scheme delivered is sustainable and compliant with National Planning Objectives. The site will create a number of local benefits:</p> <ul style="list-style-type: none"> • Promoting the appropriate expansion of rural communities in the most suitable and sustainable locations, whilst ensuring that the town's existing character, heritage assets and surrounding landscape are preserved; • Creating the opportunity to address locally identified public infrastructure needs; • Protecting existing habitats and ensuring Biodiversity Net Gain within an identified Biodiversity Opportunity Area; • Improving the quality of local transport networks to create to a safer environment for both motorists and pedestrians; and • Delivering a high quality scheme which would be seen as an asset to the town and community. <p>Quinn would welcome the opportunity to participate in the forthcoming Examination-in-Public into the Plan and contribute to the debate to ensure that the best strategy for the District is found.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	Quinn Estates is a prominent developer with multiple land interests in the district, and will play a vital role in realising the development objectives and vision of the plan.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Hume Planning. Full Representation attached to SDLP1460. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1460.)</p> <p>Re: Regulation 19 Consultation on the Draft Dover District Local Plan to 2040 Site: Land to the East of The Street, Preston Dear Ms Taylor, We write to you on behalf of our client, Mr George Jenkins, to Dover District Council's Regulation 19 Submission Local Plan consultation. Hume Planning Consultancy are providing a written representation to the emerging Plan's housing strategy, with reference to our client's interest in the above site, pursuant to its positive rating in the latest version of the Housing and Economic Land Availability Assessment (HELAA) which has been published by Dover DC. The location and extent of the site is identified on the enclosed site plan (outlined in red). The site is in single ownership, and this will also help to simplify accelerated delivery of the development opportunity. This acceleration of delivery will also be assisted by the size of the site which, as well as providing housing choice to meet the need identified in a desirable location, will be attractive to smaller housebuilders, which is supported by national guidance and local plan policy. These representations focus on the site and the reasons the land can be justified for development because of its locational advantages, the fact that it is unconstrained and thirdly</p>

its single ownership and ability to make a short-term impact in meeting the development requirements of the district. For these reasons, together with the Council's positive assessment of the land in the HELAA, it is asserted that the land should be allocated within the emerging Dover Local Plan.

Spatial Strategy

(DDC Note - below section DUPLICATED against SP3 and SP4)

Whilst we welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 seeking to provide at least 10,998 net additional homes over the Plan period, it is considered smaller size additional sites, if suitable and available, should be additionally included within the Plan (especially where high scoring in the HELAA such as this site).

This is because a large proportion of the plan's growth is again being directed towards Dover, with further units at Whitfield (over 2,000 dwellings), and also Aylesham. With large strategic sites delivery rates can easily slow down during the plan period and under-deliver. This has been evidenced by the track record of slow delivery rates at earlier phases of planned development at Whitfield upon which previous approved development plans were very heavily reliant; a factor that explains the very high contribution of windfall opportunities to housing land supply over the last 15 years. Whilst it is acknowledged that there is a planned buffer within the emerging Local Plan, it is considered appropriate not to use this as a limit, and allocate other suitable sites in sustainable locations such as Preston where available.

Whilst it is acknowledged that emerging SP4 'Residential Windfall Development' allows for residential development or infilling of a scale that is commensurate with that of the existing settlement will be permitted within or immediately adjoining the settlement boundaries of Preston, subject to all of the listed criteria being met, it is considered preferable, in order to allow more certainty for small housebuilders (for the site-specific reasons outlined below and the positive HEELA scoring compared with other land opportunities), that the site is individually allocated. We believe will provide more certainty and accelerate housing delivery.

HELAA Rating

(Below section DUPLICATED against Appendix A -Evidence base)

The site was submitted to the Council during the 'targeted' call for sites process in March 2021, which sought additional small & medium housing sites between 0.25 and 1 hectare in size, but had not been promoted prior to this.

The published HELAA assesses the site as follows (please refer to reference: TC4S099):

Estimated housing number: 19 dwellings

Potentially Suitable

Summary of Suitability Assessment:

- Site would form a logical extension to the settlement area
- Access is achievable
- Pedestrian safeguarding issues
- Site is contained with good screening
- Archaeological assessment required
- Heritage assessment required

Available

Achievable

Medium Delivery

Despite this positive HELAA rating, the site has not been carried forward as a housing allocation for Preston.

Site Background

The site presents an opportunity for residential development that would provide a contribution towards the housing objectives of the Council and meeting the future needs of the district in

a sustainable way.

Our client is the landowner of the above site which falls under single title ownership (Land Registry Title Number K666656), which would facilitate early delivery and it is unconstrained by policy or technical designations.

The site extends to 0.62 hectares and comprises a rectangular field which is used as a horse paddock and contains a small stabling building, which is accessed off the eastern side of The Street – the main road through the village of Preston. The site is located towards the southern end of the village, 300m from the centre, and adjoins the defined settlement boundary on two sides. In the adopted Core Strategy, Policy CP1 designates Preston as a village which is suitable for a scale of development that would reinforce its role as a provider of services to essentially its home community. Moreover, the emerging Local Plan categorises Preston as a 'Larger Village'. Preston has a number of services including a village shop, Preston Primary School, a The Half Moon & Seven Stars pub, Preston Garden Centre and bus stops (No 11 service to Westwood and Canterbury). On this basis, it common ground that Preston and the subject site are regarded as a sustainable location for development.

The perimeter of the site is lined with brambles, shrubs and dispersed trees which provides some visual enclosure, and the topography of the site is relatively flat. The site adjoins horse paddocks and stabling to the east and north related to Shotfield Equestrian Centre. To the south and west, the site adjoins the rear gardens of predominately two storey properties fronting The Street and Longmete Road. As a result of its location and being nestled within

existing development, it is considered that development at the site would form a logical extension to the village – which is also reflected in the HELAA assessment.

From a review of heritage and aerial mapping, the site appears to have formed part of a wider agricultural landholding in Preston before being used for woodland or orchard planting in the 1930's and 40's, during which time development extended towards the southern edge of the village. The site lies beyond the conservation area and is well separated from the nearby Grade II listed buildings Mossey's Farm Shop and Parsonage Farm which are located on the western side of The Street and are well screened from the site due to intervening vegetation and built form.

A summary of the site's characteristics is set out as follows:

- The site has an area of c.0.62 hectares and constitutes an underutilised parcel of land used as horse paddock
- The site adjoins the settlement boundary of Preston on two sides
- The site benefits from an existing access from The Street
- A Public Rights of Way (EE144A) adjoins the north-eastern corner of the site which provides links to The Forstal, Longmete Road, Preston Primary School and other services at the centre of the village
- The site falls outside of any landscape or ecological designations
- The site lies outside the conservation area and there are no heritage constraints affecting the development potential of the site
- The site is within Flood Zone 1, an area of low flood risk, and there is a small area in the south-eastern corner at risk of localised surface water flooding
- There is no planning history directly relevant to the site

Taking account of the HELAA assessment and these characteristics, it is estimated that the site could accommodate approximately 15-19 dwellings. If allocated, detailed layout proposals and technical work would ensure that suitable access is provided along with a quality designed housing development that would have a positive impact on the character of Preston and surrounding residential properties, through the use of landscape buffers and sensitive design.

Other Sites in Preston

(DDC Note: Below section DUPLICATE against SAP48)

The HELAA identifies a total of 19 sites within Preston, including this site (ref. TC45099) which is rated as being potentially suitable. Of the remaining 18 sites, the Council have rated 15 of them as being unsuitable for development for a range of reasons mostly relating to unacceptable landscape, heritage or transport impacts.

Three sites have been rated as being suitable (ref's PRE003, PRE016 and PRE017), which are adjoining land parcels and have been put forward as a combined single allocation for 65 dwellings in the emerging local plan (draft policy SAP48). This site is located at the northern edge of the village and adjoins the new residential development site at Red Pippin Lane. Given the size of the allocation and the separate land ownerships, we anticipate the delivery of the site could be delayed, therefore allocating an additional smaller and unconstrained site, such as this, at the opposing end of the village would accelerate the sustainable delivery of homes in Preston in the short-term.

Anticipated Timescales for Delivery

Spring/Summer 2023: Pre-Application Submission

Early 2024: Application Submission

Autumn 2024: Permission Received & Commencement of Development

Autumn 2025: Completion & Occupation of Development

There have been regular approaches from developers and housebuilders to acquire the site, and interest remains high given its attractive village location and its unconstrained nature.

In summary, there are no known impediments to the development of the site and the location represents a logical extension to the village of Preston which would deliver up to 19 dwellings.

There are no restrictive covenants or ransom strips as demonstrated by the Title Register. There are no technical constraints that would affect delivery. Pedestrian permeability considerations, as noted in the HELAA, can be addressed through the design process following the site allocation and it is noted that any future application would be accompanied by an archaeological assessment report. As such, for the purpose of supporting future housing delivery and the plan creating certainty to guide development for housebuilders and landowners and consistent with the LPA's proposed housing objectives over the plan period up to 2040, it is requested that this site, which is suitable, available and achievable, is allocated as a housing site.

Hume Planning Consultancy welcome the opportunity to comment on this stage of the Council's emerging Local Plan 2040 and would be happy to discuss the attributes of the site and its allocation in further detail, should it be of assistance.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP48
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>These plots are currently owned by 3 different landowners and are now being brought together by one developer, along with the original landowner of 2 of the plots, to create another large development within a village setting that cannot support this further growth. Whilst I do agree the area requires some affordable housing there is not the need or the structure in place to support the level of housing that this now single development would provide. The local facilities are limited with only a pub, garden centre, a butchers and local shop along with a single primary school , which is already oversubscribed. Couple this with the poor road network, lack of safe pedestrian routes throughout the village and now non-existent bus route, expect for the use of school children twice per day, Preston Village cannot support this level of housing in a rural location.</p> <p>I see no mention of infrastructure improvements in this area included in this Local Plan so imagine it will again be left down to broken promises through the S106 process, should these sites be included in the Plan any infrastructure requirements, driven by local needs, should be completed prior to any development.</p> <p>PRE016 The statement “the western field of the site is predominately brownfield with light industrial units”, is untrue, there are no “industrial units” on this site, there is only redundant commercial materials that have been dumped there, without a change of use to the land by the current owner. This site was offered to DDC during the development of “Preston Grange” to build some affordable houses, which were not included in the “Preston Grange” development, due to alleged financial constraints to relocate the transport yard driving the need to build “Preston Grange”. The affordable housing will now be grouped together rather than spreading this within the previous development. It is noted that the proposal now by the developer is for around 35 Dwellings, to include both market and affordable housing, I believe this will lead to overcrowding in this plot, the market housing is not required and is only being proposed for “Economic gain” rather than the needs of locals. My understanding is that there is a need for around 19 Affordable houses to meet the local needs. As per Southern Waters submission to the Section 18 “there is limited capacity in the area for further development”, in fact there have already been many instances of over capacity on the wastewater in this area, this development is only going to increase this risk. The site I note also</p>

	<p>borders a flood plain and is regularly flooded during heavy rain. The access to this site is currently through a Private Road which leads out onto a small country lane not suitable for increased traffic.</p> <p>PRE017</p> <p>This plot is Arable Grade 1 agricultural land and as such should be kept for future food needs of the local and wider communities. As is evident from recent troubles the UK relies on food imports to much whilst building unneeded housing on farming land, purely for economic gain of the few.</p> <p>This plot was also "gifted" to the Parish in compensation for the building of Preston Grange. However it is now apparent there were many strings attached that prohibited the Parish for using this land for any meaningful purpose, other than now selling the land back, to the same developer/owner in return for a promise of building an unneeded village hall, which incidentally was the same promise made during the building of Preston Grange and never delivered. Its interesting to note how this piece of land was added to the local plan, not by the current owners, almost as if it were part of an original plan to develop Preston Grange further.</p> <p>As per PRE016 there is insufficient capacity for this development on the already overloaded wastewater system and would further add to this risk, along with the increase run off caused by over developing this area and extra traffic again this development is unneeded for local requirements and therefore is just for economic gain.</p> <p>PRE003</p> <p>As this is a relatively small site I would suggest it would have sufficient space alone to meet the local affordable housing needs, also as it is already adjacent to a main road through the area would not have any significant impact on others for traffic flow. The fact that it is being used already for a few dwellings and a caravan park would mean the impact to the wastewater system would be lessened with the inclusion of a few houses.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Only PRE003 should be included into the Local Plan in order to meet the Affordable housig needs identified for locals, all other housing is not required and will only impact further on the local infrastructure that is already poor.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - This Representation has been made by Iceni Projects on Behalf of Quinn Estates in relation to a Specific Site. Sections relating to strategic / DM Policies will be duplicated to the relevant locations within the Plan.)</p> <p>REPRESENTATIONS TO THE DOVER DISTRICT LOCAL PLAN REGULATION 19 CONSULTATION IN RESPECT OF LAND NORTH OF DISCOVERY DRIVE, PRESTON, DOVER</p> <p>On behalf of our client, Quinn Estates Ltd, we hereby provide our representations in relation to the Proposed Submission Version (Regulation 19) of the Draft Dover Local Plan to 2040 in respect of land to the north of Discovery Drive, Preston, Dover (hereafter referred to as 'the Site'). A Site location plan showing the extent of the Site is contained at Appendix 1 of this representation.</p> <p>Quinn Estates supports the Site as a housing allocation within the new Local Plan to contribute towards meeting Dover District's housing needs over the Local Plan period to 2040. Quinn supports the amendment from the Reg 18 Plan that now links the sites together to create a cohesive development. However, Quinn would recommend that the Site is allocated for 75+ homes instead of the stated indicative capacity of 65 homes.</p> <p>a. The Site and Surrounding Area</p> <p>The site is formed by four parcels that are all linked together, with Quinn Estates being in control of three of the landholdings and Dover District Council in control of the fourth.</p> <p>The site is located north of the Preston settlement boundary and is formed of several parcels of relatively flat fields, which accommodate a mix of brownfield with light industrial units, arable land and a holiday caravan park. The site is bounded by a mixture of mature trees and hedgerows to the east and north that provide containment to the central and eastern fields. The western field has an area of open space which is exposed on its western boundary to the larger field beyond. Located to the south of the Site is a new residential development, consisting of two storey developments. The site is bound</p>

by open fields to the north and east and west.

The site does not contain any Public Right of Ways (PRoWs). Existing access to the site is from a private road via Grove Road to the south of the site. The closest train station is located at Sturry, approximately 10km to the south-west of the site, whilst Minster train station is located c.10km to the north-east of the site. Both stations run on the southeastern line, offering direct trains to London Victoria and Ramsgate. The closest bus stop is approximately 0.5km from the site on Stourmouth Road and includes direct services to Canterbury and Westwood.

The site is wholly within Flood Zone 1, however an area of Flood Zone 3 is c.150m to the west which forms the floodplain of the Little Stour. The site is not subject to any designations in the emerging Proposals Map, however to the north and west of the site is a River Terrace Deposits designation under Kent County Council's Minerals and Waste Local Plan (KCC). The site is not subject to any ecological designations. Furthermore, there are no heritage assets on or adjoining the site.

2

b. Supporting allocation of the site within the Draft Dover District Local Plan

Within the draft Local Plan, the Site is allocated under SAP48 for approximately 65 homes. Quinn Estates considers that the approach taken to the delivery of housing at Preston as set out within Regulation 19 Submission Version of the Draft Local Plan is generally sound. However, it is considered that the Site's indicative capacity should be increased to at least 75 homes, as through a holistic development of the landholding, this quantum and density of development is considered to be wholly suitable, deliverable and entirely consistent with the density and character of the site surroundings. The site represents an opportunity to deliver a significant proportion of affordable housing which could make a meaningful contribution to local housing needs and can be developed in the short term. In planning terms, it is desirable and sound to optimise the capacity of sites such as this to make the most of brownfield land and to reduce greenfield landtake.

Housing Need and Supply

Strategic Policy 3 (Housing Growth) states that Dover will make provision for at least 10,998 homes (611 dpa) in the District over the Plan period, up to 2040. This target will be met through a mix of committed schemes, site allocations and suitable windfall proposals, however not all these commitments will be delivered and arguably a higher quantum with a larger buffer should be planned for to negate those sites that will not be developed in the plan period.

Of all the new homes positively allocated in the Plan, 76.7% are on greenfield sites and just 23.3% are on brownfield sites. The low ratio of brownfield housing compared to greenfield reinforces the need to optimise the development of suitable brownfield sites such as the subject land. This is considered to be a valid consideration in relation to this representation's request for increased capacity on the site.

The focus of the NPPF is to achieve sustainable development (Paragraph 8) and the Council should seek to encourage housing growth in the most sustainable locations, especially when they can ensure the achievement of societal improvements, economic benefits and positive environmental outcomes. The Site is well located with various other residential developments nearby, providing the opportunity for further social and economic growth in a settlement that would benefit from housing. In this regard, the site is the only land allocation at Preston, which is designated as a larger village in the settlement hierarchy, where a commensurate level of growth should be delivered, in accordance with Strategic Policies SP3 and SP4.

The requirements of the draft Local Plan must be deliverable and achievable whilst meeting the local need in order for the plan to be effective for the district. It is considered that, in its current form, the plan strategy is over reliant on the Whitfield (SAP1) Strategic Allocation to provide the district's housing needs over the plan period and that optimising the capacity of allocated sites elsewhere within the District will help to reduce the District's reliance on Whitfield whilst assisting the Council in exceeding the minimum housing number.

Affordable Housing

Dover District has an increasingly growing population and changing demographic, making it a key priority of the Government to deliver more homes, including more affordable homes. To enforce this policy SP5 (affordable housing) of the draft Local Plan explains that for this site, at least 30% of the housing provided should be affordable housing.

A scheme that optimises the capacity of the site will also optimise the number of affordable homes that can be delivered at this site, helping to ensure that sufficient affordable housing is delivered at Preston. Raising the development capacity of the site to at least 75 home will increase the affordable housing delivery to a minimum of 23 affordable homes.

Draft allocation: SAP48 - Apple Tree Farm and north west of Apple Tree Farm, Stourmouth Road, Preston (PRE003 PRE016 and PRE017)
Under Policy SAP 48 in the draft Local Plan, the Site is allocated for an indicative housing capacity of 65 homes, that will be provided across four land parcels, all connected.

	<p>Quinn Estates support all the design and landscape criteria included in the policy. Quinn Estates are particularly supportive of criterion d), which details that primary vehicular, pedestrian and cycle access to the whole of the site shall be provided from Stourmouth Road, with access provided to each site boundary. This criterion is considered necessary, given the land is in multiple ownership and it reduces any perceived ambiguity regarding the need for a holistic development where the sum of the parts adds up to a high quality, unified development site.</p> <p>Supporting Paragraph 4.283 of the draft Local Plan explains that although the site is made up of separate parcels it should all be designed and implemented as one contiguous scheme, where possible. Quinn Estates aims to bring forward all four parcels themselves through a single development and this will ensure the cohesiveness of the development.</p> <p>Through unifying the land parcels together in a single Masterplan layout, Quinn Estates is confident it can effectively and suitably deliver a high quality development of a minimum of 75 homes across the Site.</p> <p>c. Conclusion</p> <p>On behalf of Quinn Estates, we thank you for the opportunity to input into the Dover District Local Plan Regulation 19 Consultation. Quinn Estates wishes to support Dover in adopting a sound Local Plan that can serve the District across the Plan period. In respect of the subject land, Quinn supports the amendment from the Reg 18 Plan that now links the sites together to create a cohesive development. In its current form, it is considered that the Site is suitable but can be made more effective by increasing the number of dwellings proposed to around 75. It is considered this will strengthen the soundness and sustainability of the Plan by optimising the capacity of the site, maximising affordable housing delivery and boosting the viability and vitality of shops, service and infrastructure at Preston.</p> <p>I trust that these comments are of assistance and that these representations will be taken into account in consideration. Quinn would welcome the opportunity to participate in the forthcoming Examination-in-Public into the Plan and contribute to the debate to ensure that the best strategy for the District is found.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	Quinn Estates is a developer with significant land interests in the District, who has an important role in delivering the Plan strategy

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Representation submitted by Hume Planning. Full Representation attached to SDLP1460. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1460.) The HELAA identifies a total of 19 sites within Preston, including this site (ref. TC45099) which is rated as being potentially suitable. Of the remaining 18 sites, the Council have rated 15 of them as being unsuitable for development for a range of reasons mostly relating to unacceptable landscape, heritage or transport impacts. Three sites have been rated as being suitable (ref's PRE003, PRE016 and PRE017), which are adjoining land parcels and have been put forward as a combined single allocation for 65 dwellings in the emerging local plan (draft policy SAP48). This site is located at the northern edge of the village and adjoins the new residential development site at Red Pippin Lane. Given the size of the allocation and the separate land ownerships, we anticipate the delivery of the site could be delayed, therefore allocating an additional smaller and unconstrained site, such as this, at the opposing end of the village would accelerate the sustainable delivery of homes in Preston in the short-term.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We agree in general with the requirements listed under this area before planning permission, however all surveys or assessments must be thoroughly and independently verified. Each of the three areas should be considered on their own merits, PRE017 is very different to the other areas in that it is currently an active greenfield site. PRE016 was to be returned to country side on completion of the Preston Grange site by DWH (David Wilson Homes) as part of their planning permission, instead some deal was done to leave the hard standing, subsequently it became used as an unsightly scrapyard. 100's of tons of hardcore or building waste has now been dumped at the low-lying end of the land which could affect storm drainage or stability of the land. PRE017 is teeming with wildlife especially birdlife and the large mature hedge between PRE017 and PRE016 is a key factor in this respect. The November rain this year caused issues again, adversely affecting residents of the Grange at the West side of the development, Red Pippin Lane was like a river and Grove Road was also affected, the absorbency of PRE016 and PRE017 does a lot to mitigate this and prevent matters getting worse. We support the Flood Risk Assessment proposed but are concerned that the situation we observed last November could be overlooked. Issues with sewage capacity keep occurring and seem to affect many areas in this location. Surveys and action seem to promised with no sign of a significant improvements. Traffic through Preston is quite a problem, speeding and recklessness. The ridiculous number of housing developments in this part of Kent is having an impact on traffic generally and as more people arrive in North Kent, more discover the route through Preston as a means of getting south avoiding problems like congestion is Canterbury, this applies to delivery drivers as well. The road through Preston from Plucks Gutter to Wingham is not suitable now and certainly not for any increase. Preston Grange has over two cars per household and the need to travel for the basics is there, as with all rural towns, a further increase from even more residents is of concern. Preston has very little infrastructure. Recently the bus service through Preston has been reduced to an inadequate level which makes having your own transport a necessity. We are concerned at the number of greenfield sites being developed in this area of Kent and do not agree with those who try to claim there is a shortage especially as there are already other more advanced proposals in the pipeline.

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>"Soundness and duty to co-operate": The plan regarding Preston and Elmstone Parish fails on grounds that it has not been "positively prepared nor effective", for the following reasons. The Local Plan Regulation 19 submission whilst showing a reduction in indicative housing for site policy numbers SAP 48 PRE003/PRE016/PRE017 from 122 to 65 homes, which is welcome (although I understand challenged by the PPC as 77), fails to take account of several important strategic implications. Namely, the NO DEVELOPMENT in the prior Local Plan, the need for a small number of affordable homes as identified in the Village Design Statement 2008, which through windfall has now delivered 112 new homes since 2011 with more in the pipeline. Of these 82 are associated with the Salvatori redevelopment and the remainder, barn conversions, infill or garden new builds. The proposals in the pipeline that have received planning but not yet completed and a recent likely submission for 10 new homes at the Preston Nursery (Torren) will mean that the housing projection since 2011 together with this Local Plan will increase the residential housing in Preston by some 200 homes (~70%). The village parish is on the outer edges of Dover District close to borders with Canterbury and Thanet. It is accessed by inadequate local country roads already under severe pressure from local, commuter delivery and commercial farm traffic (Preston Hill and the junction of The Street with Mill Lane being of particular concern). A recent planning approval for the rebuilding of a new Village Hall on Mill Lane close to the primary school and village shop, has not taken account of this unfolding housing growth. The "six-acre" site was given to the village as a Section 106 agreement with Salvatori / Quinn to act as a buffer to future development, specifically for village use but has become part of the call for local sites (PRE 117). It could be better as a site for a new village hall making a strategic contribution to the growing village. I urge DDC to reconsider its plans and carry out a careful "strategic rural use" study, taking account, amongst other input, of plans in Thanet and Canterbury that impinge on the highways and infrastructure of Preston parish, the growth plans and the protection of the environment, the place and the community and its integral whole. Such a study by experts with no vested interest would undoubtedly lead to a better outcome for sustainable growth of the community into 2040 and potentially beyond. Furthermore, a balanced study with clear objectives rather than a piecemeal approach, as has been the case to date, would engender greater community involvement and buy-in.</p> <p>END</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Dover Local Plan is unsound and illegal (see attached rep).</p> <p>The decision to drop this site from the local plan was unsound and was not legal, it was not given due diligence and consideration, in spite of many attempts by the applicant, to communicate with the Council, regarding the draft Local Plan, via, telephone calls, emails, and previous representations, without a response, except that it was valid. The postcode presented by the Council against the Land is that of another property further away (Upton house) on Deal Road.</p> <p>The site presented is in an excellent position for the village and the offering of a footpath and widening the road, it will be a great help for the village. The site has access to three bus stops, two at the entrance to Deal Road and one just opposite at The Street, Worth, and with a footpath, it will be easy access to the villagers to use public transportation rather than using a car.</p> <p>The site has access to electricity, water, telephone lines, and internet as well as the main drain running just across its edge with Mill Lane. The site is vacant since the applicant's ownership in 1996. The site is kept tidy by cutting the grass once a year and has no constraints. The site is not in a flood-risk area. The site is flat and not in an area of outstanding natural beauty. The site is privately owned and is available immediately if successful. There have been few interested in developing this site, including a large property company as well as few local builders, and hence could employ few locals if the council agrees.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	To amend the Local Plan to include the site HELAA Reference WOR005

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	wish to make representation regarding DDC Local Plan and WOR005 My site was wrongly labeled under a wrong post code and rejected because of its relation to the centre of the village of Worth. It can't be legal or acceptable to do so! The correct post code is CT14 0BD and the site starts from 4-7 meters from the centre of the village "the Street".

<p>possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The site is that wooden fence opposite the road sign "The Street" of Worth. I made objection early in the year and my comment was labeled valid and ignored! Also the council did not include this important part which link the site to the centre of the village, which will provide access to widen Mill lane, provide footpath and improve the entrance and visibility for the Mill lane traffic. I have been asking for 18 months to reduce the number of dwellings in the interest of the village and I believe 15-25 dwellings is more appropriate than 100. There are other less attractive sites which are acceptable to the council but further away from the centre of the village! That can't be acceptable. WOR005 is bordering Mill Lane through two large gates.</p> <p>The site has access to water, electricity, gas and main drain just along its side at Mill Lane. The site is flat without hinderance. It isn't a site of outstanding natural beauty and of no special interest. The site has been vacant for 27 years and used to cut grass once a year to keep it tidy. The site has access three bus stops from 7-15meters away providing access to Worth and local villages, Sandwich, Dover and Canterbury. We are offering the following for the council and the village: 1) a large family park 2) footpath over 200 meters and currently there is none 3) widening Mill lane as now it is only possible for one car to pass. 4) improving the entrance to Mill lane and improving visibility.</p> <p>The site is owned by me since 1996 (K591936 and K 209681)and if accepted it will be available immediately. There has been few developers interested in the site and if accepted, it will be available immediately.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP49
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The proposed site is accessed through a single track paved area which is very small, I believe that this would be inadequate for construction vehicles and heavy machinery and would have a major impact on said traffic coming through the existing development. But more worrying is that I don't think the emergency services particularly a fire engine would easily get through the very narrow entrance to the proposed site, if at all. Also this would be very dangerous for pedestrians to walk as there is no path and as stated above it is a very small road.</p> <p>Our property is adjacent to this single track and would have a serious impact if the development was to go ahead.</p> <p>The Sunningdale site that exists at present has had a major impact on the village with water mains/flooding etc and this would only exacerbate the problem. Also this would add to traffic passing past a school and nursery and would have major disruption for the residents.</p> <p>Having also recently lost our bus service this would be a further blow to this wonderful rural village. I hope this ill thought out paddock plot will not be considered for suitable development.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at	I don't see that tjis could be compliant and sound

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Happy to be invited to the hearings or be around for a site visit

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Paragraph 4.284 and Policy SAP49
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The proposed allocation should be widened to include land adjacent to the west identified under the WOR006 reference as an Amber site in the HELAA. Pre-application advice findings have identified the land is suitable, will have no landscape or neighbour impacts, benefits from suitable access and already found the site frontage suitable for allocation. Failure to include the whole site within the SAP49 allocation (WOR006) is not achieving the best use of this land which is required by National Policy.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	Site WOR006 was submitted to the Local Plan Call for Sites and the frontage section is proposed for allocation both in the Regulation 18 and Regulation 19 Draft Plan documents and this proposed allocation is fully supported. The land is available and in a single ownership with control of a wide site frontage to enable easy access location to be provided. The Housing Trajectory proposes development in 2031 and 2032. This

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

is a small site in single ownership and can be delivered within the first five years of the Plan with an estimation of build out of 10 units in each of 2026, 2027 and 2028.

However, a further strip of land adjacent to the east of the area proposed to be allocated has still not been included within the proposed allocation. This part of the site was identified as 'amber' in the Housing and Economic Land Availability Assessment (HELAA) stating frontage development was most suitable however most importantly the site was not labelled a 'red' site and found to be unsuitable for development.

It is strongly suggested that the entire site area submitted should be allocated to make the most efficient use of this site and ensure the Plan is justified and effective in meeting its housing provision targets.

A draft layout of the site as a whole, both green and amber areas, showing the development of 30 dwellings was submitted to the Council for pre-application advice. Pre-application advice received from Dover District Council recognised half of the site had been found suitable for development and is proposed to be allocated. It found that it 'proposed development within the site of a suitable scale and density, would have the potential to be read within the boundary of built context of existing development and the wider village' and whilst an LVIA is requested to accompany any application submission, complete with landscape buffer provision along the field side of the land, it importantly did not find the proposal would be unsuitable on landscape impact grounds.

Turning to design and the submitted layout for development across the green and amber areas, the pre-application advice stated 'It is considered that the proposed scheme presented at this stage responds to the existing character and pattern of existing development by virtue of the layout, form and scale proposed.'

Whilst the pre-application site layout proposed a density lower than 30dph, the advice was to increase density 'to at least 30dph to make efficient use of land'. Further, the advice stated, 'To conclude, it is considered that in terms of layout, scale, character and appearance, the development proposed through this pre-app would form a compatible and suitable expansion of the village.'

It was found that the site as a whole would not have an unacceptable impact on the residential amenity of neighbours. It also found that the scoping flood risk assessment submitted with the scheme confirmed flood risk was low.

Despite these positive comments, the Officer concluded that part of the land was not proposed for allocation and therefore could not be supported for development. It is considered that the failure to allocate the amber area of land at WOR006 which lies adjacent to the area proposed to be allocated, leaves the Council in a position where the Emerging Plan is not effective and not making the best use of available land.

The Flood Risk Assessment has confirmed that the whole area, green and amber is suitable for residential development. The land is very well connected with Worth being within 400m of the bus stop on Jubilee Road and with public footpaths EE243 and EE456 passing close to the south and east of the site. Kent Highways accepted that suitable visibility to a new site access would be achievable. With the combined allocation of the green and amber sites WOR006, the road could be widened not just at the site entrance, but along the site frontage to provide inset off street parking bays which would provide opportunity for the existing pavement parking opposite the site to be removed. This would provide a highway benefit.

Development along Jubilee Road is described as 'linear', however existing development to the south of the site is not linear in form and extends some distance eastwards back from the road. Therefore the development of both the green and amber areas of WOR006 would not be out of character and would enable sufficient land to provide a soft landscaped buffer edge along its eastern side.

The amber area of WOR006 is as equally well located to existing development and facilities in Worth as the land proposed for allocation and its development would not result in any additional landscape impact. Both the green and amber areas of the site are in a single ownership making the whole site available and deliverable within the first five years of the Plan. This will enable a modest provision of housing to meet local needs throughout the next Plan Period as it is requested that the area identified in amber to the east of the green area subject of the proposed allocation is included as part of a larger green allocation for both area of land identified as WOR006.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

To achieve allocation of the full site rather than only the site frontage to make best use of the available land.
The site is available as a whole in single ownership and can be delivered within the first 5 years of the Plan.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Objections to Site Allocation WOR006 East of Jubilee Road</p> <ol style="list-style-type: none"> 1 Development of this site would conflict with the National Planning Policy Framework as it would not be sustainable. The site is versatile, productive farmland in open countryside outside the limits of the settlement. 2 Development of this site would cause serious harm to the character and appearance of the village which is characterised by views from the centre out across the surrounding fields. 3 The proposal would be unsustainable ribbon development with a multiplicity of access points onto the principal highway. 4 The development would conflict with the National Planning Policy framework as the site is within Flood Zones 2 and 3 when suitable Zone 1 land closer to the centre of the settlement is available. 5 Development would compromise the adjoining nature reserves which are important nationally and internationally for birds and have seen massive investment in recent years through RSPB. 6 The site forms part of a large agricultural unit which is well suited to modern farming methods, so its loss would be harmful to agricultural interests.

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Allocation WOR006 should be omitted from the Local Plan. It should be replaced by Site WOR007 which was found to be a suitable housing site by the Council's professional officers.</p> <p>The case for allocating WOR007 may be summarised briefly as follows:</p> <ol style="list-style-type: none"> 1 As the DDC officers concluded, the 1.02 hectares (2.5 acres) site would be a logical extension to the village. It has clear development potential for 15 – 20 houses. In many ways it is the leading contender to deliver new housing by consolidating some of the very loose structure of the built-up part of the village. 2 It is a flat, arable field with peripheral vegetation. It has a 16m wide frontage giving access directly from Jubilee Road. There is a bus stop adjoining the access point. 3 The roughly rectangular site is bounded to the north by the "New Churchyard". The listed medieval parish church of St Peter and St Paul lies a short distance to the north east. 4 To the south, the land is bounded by ribbon development along Jubilee Road. 5 The site has no obvious physical constraints. Much of Worth Parish is at high risk of flooding, however the Glebe lies within Zone 1 which has a negligible risk of inundation. 6 Vehicular access can be derived directly from Jubilee Road. Pedestrian access can be derived directly from Jubilee Road or through the churchyard to the north via the public right of way. <p>In the Officers' Assessment there were only two negative comments both of which were inaccurate as follows:</p> <p>Firstly, the site does not lie within Flood Zone 2/3. The EA map confirms it is in Zone 1 i.e. least liable to flooding.</p> <p>Secondly, the out-of-date Worth Neighbourhood Plan is misleading regarding the facts. The site is a small area of privately owned farmland.</p> <p>For the above reasons, Site WOR007 Should be included in the Local Plan as a non-strategic housing allocation.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>The WOR006 site allocation is transparently unsound. Indeed it is very surprising that the Local Plan should propose ribbon development, which is intrinsically unsustainable, thereby blocking long distance (several miles) public views across open countryside and harming the character of the village. It is important for the Inspector to appreciate in detail the unsound rationale for the WOR006 allocation so that the evidence can be tested in public. At the same time it is important for the Inspector to hear the case for the allocation of WOR007. This would also allow for the arguments previously adduced against such an allocation to be tested in public.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP49
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	As the resident that lives directly adjacent to this proposed development addition I will be most affected. The road to this area is single track block pavier and as such is totally inadequate for construction traffic or continued access for 15+ properties. My enjoyment and access of my own property would be seriously impacted as I would not have clear and open access to my own driveway. The land in question was confirmed by the original developers to those who bought on Nursery Fields (the original development) as being used as Paddock for horses and no development would take place. Many people bought here with those assurances from Sunningdale House. The village suffers from terrible flooding part of which is due to over-development. The current water mains are wholly inadequate for the additional load. Development traffic would be through a fully finished and landscaped area at the detriment of the owners who have only recently been able to enjoy a fully completed development. This is a ridiculous inclusion with very little forethought for those that will be impacted the most by it.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	As per my note in item 6 this should be struck from the plan for the reasons aforementioned.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I feel the only way that the inspector can fully understand the enormous impact this would have on myself and the other local residents is if I articulate this directly.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 49 WOR009 east of former Bisley Nursery
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This part of the DLP is contrary to the village strategic plan which runs until 2025, and does not comply with assurance provided to villagers that this land would be returned to paddock once the Sunningdale development on the west side of the former Nursery Fields site was completed.</p> <p>Assess to the proposed building site at SAP49 WOR009 is very limited and building work is likely to be highly disruptive, and destructive to adjacent roads and properties, regardless of any assurances a developer may provide.</p> <p>Sunningdale Developments exceeds the number of properties that should have been built on the Nursery Fields site by 4 and cannot be trusted to adhere to an agreed plan and, in any event, the proposed density of housing on this part of the village will dangerously exceed the village's sewage infrastructure, which is already over its intended capability.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The DLP should be modified to delete SAP49 WOR009 which is an unsound. The village sewage system would need to be upgraded in capacity before any proposed development is considered. Assess to the site would need to be carefully considered and approved only if it does not disrupt or cause damage to existing infrastructure. An assurance by the developer alone would be insufficient in this regard
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	WOR006 Jubilee Road
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This site is unsuitable for inclusion in the Dover Local Plan because:</p> <p>1) This plan to initially build 10 houses on this site is not in accordance with the Worth Neighbourhood Plan (currently in force until 2026) relative to future housing development. The Worth Village Neighbourhood Plan is likely to be renewed and reinforced prior to 2026.</p> <p>INFRASTRUCTURE INADEQUACY:</p> <p>2) The foul sewage system of Worth has been a source of problems for years and the Bisley Nursery Fields (Planning number DOV15/00749) more than exhausted its capacity to take more house building without Southern Water undertaking major sewage infrastructure investment, which Southern Water has repeatedly refused to undertake.</p> <p>3) The surface water drainage of Jubilee Road where it feeds into Worth Village Pond will put Worth Primary School at greater risk of surface water flooding when the pond cannot cope with the increased volume of surface water and overflows. The school has already been evacuated in the past due to flooding problems arising from the pond.</p> <p>4) Jubilee Road is too narrow for two cars to pass in numerous long sections already, and the bus already struggles to get through, so much so that the initial review of this site by DDC in the Local Plan suggested banning parking in Jubilee Road, but this does not appear in the final draft. Banning parking would leave some households with no option but to concrete over their front gardens, adding to the surface water going into the village pond. Even if all parking were banned, two cars will struggle to pass one another without mounting the pavement, putting pedestrians at risk. 10 new houses would generate a significant increase in vehicle movements, arising from this site and potentially from 20 more houses at Site WOR009, and the bus service may not be prepared to continue along such a restricted width road with increased traffic volumes.</p> <p>AMENITY VALUE:</p> <p>5) The RSPB has developed the Lydden Valley wildlife park with new lakes and ponds. To develop houses on this site will deny residents and visitors their only real chance to look over the resulting visually improved countryside. It will also create an urban ribbon development street scene, out of character with a country village.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>This site is unsuitable for inclusion in the Dover Local Plan because:</p> <p>1) This plan to build a further 20 houses on this site is not in accordance with the Worth Neighbourhood Plan (currently in force until 2026) relative to future housing development. The Worth Village Neighbourhood Plan is likely to be renewed and reinforced prior to 2026.</p> <p>The Worth Neighbourhood Plan originally supported the construction of 32 houses on the Bisley nursery site which was to include integral on-site green space in the form of two "paddocks". In the end 35 houses have been built and finished. The Dover Local Plan should not now allow building on the reserved green space of the "paddocks". In addition the housing proposal for this site WOR009 envisages a significantly higher density of building than the original Bisley development, by proposing to build a further 20 houses on just 0.86 of a hectare, being the overall surface area of the designated green space paddocks. This site has already been artificially raised by several feet using the soil spoil from digging out the foundations of the recently constructed houses on the Bisley site. The land is therefore unstable for construction.</p> <p>INFRASTRUCTURE INADEQUACY:</p> <p>2) The foul sewage system of Worth has been a source of problems for years and the Bisley Nursery Fields (Planning number DOV15/00749) more than exhausted its capacity to take more house building in Worth, without Southern Water undertaking major sewer infrastructure investment, which Southern Water has repeatedly refused to undertake.</p> <p>3) The surface water drainage from this site, which feeds directly into The Street's surface water drains, and from there, straight into Worth Village Pond, will exacerbate and put Worth Primary School at far greater risk of surface water flooding when the pond cannot cope and overflows. The Primary School has been evacuated in the past due to flooding, and another 20 houses will make flooding even more likely, especially when violent downpours become more frequent due to climate change.</p> <p>4) Exiting The Street and Jubilee Road onto the main Sandwich-Deal road has become very difficult and dangerous since the Nursery Fields site added traffic from its 35 new houses. Any more houses will require KCC or DDC to install a roundabout on the main road at the end of The Street to both avoid accidents and enable the buses to re-join the main road quickly and safely, so as to keep to its timetable. Extra vehicles leaving this site and heading towards Deal via Jubilee Road will further add to the difficulties of two cars trying to pass one another on Jubilee Road.</p> <p>5) Access: How is this site to be accessed for construction? The only current access is over PRIVATE ROADS owned and maintained by residents of the Bisley site, and access permission is unlikely to be forthcoming.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Numerous residents of Worth have made numerous representations about the lack of infrastructure, services, education and health to support WOR 006 and WOR009. We do not believe that these representations have been adequately resolved. In addition the rural bus service servicing these potential developments has been withdrawn and therefore both these developments will cause an increase in the use of private vehicles this breaching the NPPF. Furthermore the emerging findings of the Census (Dover District) indicate that the population in the District is declining. Therefore it follows that the need for developments in Worth (if not elsewhere) is not needed - breaching government policy of the right houses in the right places. Both these proposed site allocations need to be removed from this draft Local Plan. And finally, again on vehicular movements, KCC(Highways) has stated on a nearby planning application that parts of the A258 (the road used by Worth residents) including a key roundabout is overcapacity - again breaching the NPPF (paragraph 109?)
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	Remove WOR006 and WOR009 from the draft Local Plan.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Simply because residents will be better able to discuss with the Inspector the detailed local issues surrounding this representation.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP49
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	<p>SITE "WOR006" Jubilee Road:</p> <p>This site is unsuitable for inclusion in the Dover Local Plan because:</p> <ol style="list-style-type: none"> 1) This plan to initially build 10 houses on this site is not in accordance with the Worth Neighbourhood Plan (currently in force until 2026) relative to future housing development. The Worth Village Neighbourhood Plan is likely to be renewed and reinforced prior to 2026. INFRASTRUCTURE INADEQUACY: 2) The foul sewage system of Worth has been a source of problems for years and the Bisley Nursery Fields (Planning number DOV15/00749) more than exhausted its capacity to take more house building without Southern Water undertaking major sewage infrastructure investment, which Southern Water has repeatedly refused to undertake. 3) The surface water drainage of Jubilee Road where it feeds into Worth Village Pond will put Worth Primary School at greater risk of surface water flooding when the pond cannot cope with the increased volume of surface water and overflows. The school has already been evacuated in the past due to flooding problems arising from the pond.

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

4) Jubilee Road is too narrow for two cars to pass in numerous long sections already, and the bus already struggles to get through, so much so that the initial review of this site by DDC in the Local Plan suggested banning parking in Jubilee Road, but this does not appear in the final draft. Banning parking would leave some households with no option but to concrete over their front gardens, adding to the surface water going into the village pond. Even if all parking were banned, two cars will struggle to pass one another without mounting the pavement, putting pedestrians at risk. 10 new houses would generate a significant increase in vehicle movements, arising from this site and potentially from 20 more houses at Site WOR009, and the bus service may not be prepared to continue along such a restricted width road with increased traffic volumes.

AMENITY VALUE:

5) The RSPB has developed the Lydden Valley wildlife park with new lakes and ponds. To develop houses on this site will deny residents and visitors their only real chance to look over the resulting visually improved countryside. It will also create an urban ribbon development street scene, out of character with a country village.

SITE "WOR009" Nursery Fields/Bisley site off The Street. (Allied to planning number DOV15/00749)

This site is unsuitable for inclusion in the Dover Local Plan because:

1) This plan to build a further 20 houses on this site is not in accordance with the Worth Neighbourhood Plan (currently in force until 2026) relative to future housing development. The Worth Village Neighbourhood Plan is likely to be renewed and reinforced prior to 2026. The Worth Neighbourhood Plan originally supported the construction of 32 houses on the Bisley nursery site which was to include integral on-site green space in the form of two "paddocks". In the end 35 houses have been built and finished. The Dover Local Plan should not now allow building on the reserved green space of the "paddocks". In addition the housing proposal for this site WOR009 envisages a significantly higher density of building than the original Bisley development, by proposing to build a further 20 houses on just 0.86 of a hectare, being the overall surface area of the designated green space paddocks. This site has already been artificially raised by several feet using the soil spoil from digging out the foundations of the recently constructed houses on the Bisley site. The land is therefore unstable for construction.

INFRASTRUCTURE INADEQUACY:

2) The foul sewage system of Worth has been a source of problems for years and the Bisley Nursery Fields (Planning number DOV15/00749) more than exhausted its capacity to take more house building in Worth, without Southern Water undertaking major sewer infrastructure investment, which Southern Water has repeatedly refused to undertake.

3) The surface water drainage from this site, which feeds directly into The Street's surface water drains, and from there, straight into Worth Village Pond, will exacerbate and put Worth Primary School at far greater risk of surface water flooding when the pond cannot cope and overflows. The Primary School has been evacuated in the past due to flooding, and another 20 houses will make flooding even more likely, especially when violent downpours become more frequent due to climate change.

4) Exiting The Street and Jubilee Road onto the main Sandwich-Deal road has become very difficult and dangerous since the Nursery Fields site added traffic from its 35 new houses. Any more houses will require KCC or DDC to install a roundabout on the main road at the end of The Street to both avoid accidents and enable the buses to re-join the main road quickly and safely, so as to keep to its timetable.

Extra vehicles leaving this site and heading towards Deal via Jubilee Road will further add to the difficulties of two cars trying to pass one another on Jubilee Road.

5) Access: How is this site to be accessed for construction? The only current access is over PRIVATE ROADS owned and maintained by residents of the Bisley site, and access permission is unlikely to be forthcoming.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Full Representation attached to SDLP1606. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1606.)</p> <p>Dover Local Plan Regulation 19 Consultation: Policy SAP 49 Land east of Bisley Nursery, Worth</p> <p>We write to you on behalf of our client, Sunningdale House Developments ('Sunningdale'), in relation to the Dover District Council Regulation 19 consultation on its Local Plan. Specifically, we write in support of the proposed allocation at Land east of Bisley Nursery at Worth under Policy SAP 49, which is proposed to deliver around 15 dwellings.</p> <p>Sunningdale owns the site which is proposed to be allocated. As officers will be aware, Sunningdale also owns the land to the west (former Bisley Nursery now referred to as "Nursery Fields") which has been developed for residential development; 36 units have been constructed pursuant to planning permissions LPA ref. 15/07749 and 16/01161. Accordingly, the proposed redevelopment of this allocated site would form a logical extension to the "Phase 1" Nursery Fields scheme. It is noted at the outset, the existing Nursery Fields development is supported through the Worth Neighbourhood Development Plan which allocates this site for</p>

the provision of around 30 residential dwellings; over half of the residents who contributed to the Plan supported this site for housing development. Whilst this doesn't provide for the proposed allocation as now promoted through the Local Plan, it shows the principle of development to the north of the village as previously being acceptable. If progressed, Sunningdale confirms its commitment to work with the existing community in Worth to develop a high-quality scheme and pre-application engagement with LPA officers at the site has already been progressed.

SP3: Housing Growth

We welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period. Within the Policy, reference is made to the Council's overall spatial strategy i.e. the majority of growth will be focused towards the principal town, Dover, and the expansion/planned new settlement at Whitfield. It is appropriate that smaller settlements in the district, i.e. the larger and smaller villages, receive some growth to sustain their role in the settlement hierarchy over the plan period.

Policy SAP 49: Worth Small Housing Sites

Sunningdale confirms its support for this policy, and in particular the allocation of housing on land to the east of Bisley Nursery.

It is noted in the supporting text to the policy that Worth is a large village that serves the northern part of the district (paragraphs 4.261 and 4.263). It has a primary school, several pubs and is served by regular bus routes. The strategy for Worth is to provide additional housing over the lifetime of the Plan to sustain and strengthen the role of this village and the allocation of an additional c. 25 units is considered appropriate to the position of Worth in the Council's settlement hierarchy, and the level of services provided.

Sunningdale confirms this site is available for development and can be delivered early on in the Plan period. Accordingly, the Council's assumed trajectory for the site as set out in Appendix D appears reasonable (9 units delivered 2026/27 and the remaining 6 units delivered 2027/28). As noted above, Sunningdale has already delivered 36 units on land immediately to the west of the proposed allocation; the development is completed and fully occupied. Sunningdale, as a regional housebuilder has a track record of delivery in Dover district and will develop a high-quality scheme in this location and therefore the prospects of delivery of housing to meet local need and also contribute to meeting the district's overall housing requirement are very good.

The allocation assumes 15 units can be delivered on the site which is roughly consistent with the pre-application approach already made to DDC by Sunningdale for 14 dwellings.

It is intended that the new allocation would be served from the existing access which serves the Nursery Fields housing development (St Crispin Close); which can provide access directly into the land to the east, which Sunningdale control. This access is considered appropriate to accommodate at least an additional 15 units as envisaged in the Plan.

The site is not within flood zone 2 or 3, nor is it at risk of surface water flooding. Accordingly, in sequential terms, it is a preferential site in a sustainable location adjacent to the existing built-up settlement of Worth. It is noted that the southern part of the site immediately adjoins the Worth Conservation Area and heritage issues will need to be considered as part of the proposed scheme. Accordingly, our client accepts the reference to heritage issues within the policy.

It is therefore a suitable and available site and its proposed allocation provides for a deliverable policy within the Local Plan.

Policies Map

It is noted that the proposed site "land east of Bisley nursery" is located outside, but immediately adjacent along the western and southern boundary, to the proposed settlement confines of Worth. On the basis that the site is to be allocated for residential development, it would appear sensible to extend the settlement boundary to include the site.

Summary

With specific reference to the proposed allocation in Worth (SAP 49), we confirm the site is available for residential development, and is a suitable site for residential development. It is therefore an achievable and deliverable allocation.

Hume Planning Consultancy welcomes the opportunity to comment on this stage of the Council's Pre-Submission Local Plan and would like to reserve the right to attend the Examination in Public in due course.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

DDC note (see comment SDLP0132) Canton Downs Rd, East Studdal - Title No. K414599. We found out yesterday that the draft District Local Plan is available & so checked to see if our site was included for deliberation. We cannot find any reference to it or the other site we put forward - the car park at the Hare & Hounds Northbourne. Could you please provide an indication where these may be as you office did confirm that they had been included in the targeted call for sites last year (see attached). Regarding TC4S038, Canton under appendix 2d Highways assessment it been given a red and "It would appear that the required sightlines for an access onto the highway could not be achieved within land that the site promoter has control over" and " Access considered to be unachievable and/or highway impact cannot be mitigated." Not sure if they are looking at older plans but the access was changed & sightlines approved by Highways & we currently own the land accessing the road.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DOVER DISTRICT COUNCIL LOCAL PLAN CONSULTATION: REGULATION 19 REPRESENTATION TO REVIEW SITE TC4S067 THE GLEBE PLOT, STATION ROAD (OFF SHORT STREET) CHILLENDEN, CT3 1PR AND INCLUDE IN THE LOCAL PLAN</p> <p>Representation</p> <p>I am making a representation against the Dover District Council (DDC) Local Plan, which is currently subject to Regulation 19 Local Plan Consultation. I believe it is unsound and that The Glebe Plot Station Road (off Short Street) Chillenden (TC4S067) has been wrongly omitted from the Local Plan. I believe the site TC4S067 has been omitted from the Local Plan when it should have been included as an allocation, this is because I believe the HELAA assessment carried out by DDC is incorrect. I would ask that during your examination process you consider my representation, confirm the failings of the HELAA assessment and add site TC4S067 to the Dover District Council Local Plan.</p> <p>I also want to confirm that should this be included under the Examination process that I would like to attend the examination process and, if it is felt necessary, to support this representation.</p> <p>Background to Representation</p> <p>The Glebe Plot, Station Road (off Short Street) Chillenden (TC4S067) submission was made to DDC, following its Call for Sites in 2021. The submission was sent to the DDC Local Plans team and receipt acknowledged on 15th March 2021.</p>

When the Regulation 19 Local Plan Consultation was released in October 2022, by DDC, the Glebe Plot (TC4S067) was referenced by inclusion on the list of eliminated sites. The reason for the elimination is set out in the Evidence Base as having been eliminated at the Stage 1 Assessment, which is the initial desktop study, the reason stated is that the site is "isolated in the Countryside". This meant that there was no further consideration of the site and its suitability, availability and achievability to bring forward much needed housing in a sustainable and sympathetic location for the local community.

My representation is that the Stage 1 assessment is wrong, and that The Glebe Plot (TC4S067) is clearly within the boundaries and confines of Chillenden Village and represents an opportunity for the development of an infill site for the village.

To support this view, in addition to the absolute fact that The Glebe Plot is within the village and is not "isolated in the Countryside" I present the evidence of DDC's own information. Four sites were submitted for consideration from Chillenden village. These are set out on the Settlement maps for Goodnestone and Chillenden sites which were included at Stage 1 Assessment. This map is shown below.

This shows clearly that The Glebe Plot (TC4S067) sits between two sites that were not eliminated at stage 1, if these plots were not eliminated for being "isolated in the countryside" it cannot be correct that The Glebe Plot was eliminated for that reason, and it should have been carried forward for further assessment.

This first stage assessment also considered the following criteria and sites could have been eliminated if they were:

- Too small
- Covered by National designations

and/or

- Contrary to policy.

None of these criteria were identified as the reason for the elimination of The Glebe Plot, and I can confirm that the plot could not be eliminated for these reasons because:

- The site area extends to 0.38 hectares (3,800 metres squared). As part of the targeted call for sites 2021, the evidence base states that Housing sites would be considered between 0.25 and 1 hectare in size and therefore, The Glebe Plot, TC4S067 meets these criteria.
- The Glebe Plot TC4S067 is not covered by any National designations.
- Following discussions and e mail correspondence with DDC Local Plans team in November 2022, I understand that the reason The Glebe Plot TC4S067 was rejected is that it was considered that the site was "Isolated in the countryside". This is the reason given and why the Glebe Plot, TC4S067 was included in the HELAA document Appendix 2a (Initial assessment housing sites eliminated on page 3. Please see the link below.

<https://www.doverdistrictlocalplan.co.uk/uploads/pdfs/appendix-2a-tc4s-initial-assessment-housing-sites-eliminated.pdf>

In preparing to make this representation, on 21st November 2022, I asked the DDC Local Plan team to confirm the definition they had used of "Isolated in the Countryside". On 1st December 2022, DDC Local Plans team responded stating that the term "Isolated in the countryside" is explained in Paragraph 3.73 of the Local Plan (Page 39) and is also set out within National Guidance - See NPPF National Planning Policy Framework - 5. Delivering a sufficient supply of homes - Guidance - GOV.UK (www.gov.uk) Paragraphs 78 onwards. I have also researched numerous legal cases around the interpretation of the term 'isolated' in the NPPF.

I have read the explanation on Strategic Policy 4 (SP4) on page 39 Paragraph 3.73. The Local Plan states "National Policy is clear that new isolated dwellings in the countryside, outside of settlement boundaries are only permissible in exceptional circumstances"

The Local plan identifies in SP4 2, Chillenden "as a settlement suitable for minor residential development or infilling of a scale that is commensurate with that of the existing settlement and that "residential development or infilling will be permitted within the settlement boundaries, as shown on the Policies Map of the settlements" and which includes the settlement of Chillenden subject to criteria a) to k) being met (reference SP4 page 39 of the Local Plan).

With the above in mind, I would request that the Planning Inspector reviews the conclusion reached by the Stage 1 assessment that the Glebe Plot TC4S067 is "Isolated in the Countryside" for the following reasons:

- As can be seen from the map, The Glebe Plot TC4067 site is quite clearly within the well-defined settlement confines and boundary of the settlement of Chillenden.
- The TC4S067 site meets NPPF and SP4 policy subject to criteria 2a)-k) being met.
- The Glebe Plot Site TC4S067 is just 50m from the GOO006 site, (Land adjacent to short street, Chillenden) which has been included in the Consultation Local plan Regulation 19 submission on page 211.

	<ul style="list-style-type: none"> • From further research, I understand that the definition of “isolated in the countryside” is a dwelling that is physically separate or remote from a settlement (Court of appeal judgement Lord Justice Lindblom). The Glebe Plot TC4S067 is neither physically separate nor remote from the settlement of Chillenden. <p>In summary, I believe it to be absolutely clear that The Glebe Plot site (TC4S067) should not have been eliminated from consideration for inclusion in the DDC HELAA at stage 1 desk top assessment, because it is not “isolated and in the countryside”. Further to this, I consider that the site would not have been excluded at the Site, Suitability, Availability and Achievability assessments as it meets the same standards as the site, GOO006, that has been included in the Local Plan on page 212, but with the added advantage of not being a site which is subject to flooding.</p> <p>In summary The Glebe Plot TC4S067 site is:</p> <ul style="list-style-type: none"> • Highly accessible to Chillenden Village, being centrally located. • Not affected by Flood Risk • Suitably accessed from an existing access point off Station Road with the ability to improve the access further. • Visually contained by surrounding topography and existing mature hedgerow and trees and will be seen against the backdrop of the existing neighbouring dwellings. • Not affected by any recognised landscape designations. • Adjacent to a sole Heritage asset, with significant screening between them and the ability to further mitigate the impacts. • Not subject to any ecological constraint. <p>We have engaged fully with Goodnestone Parish Council (GPC) regarding the proposal to include, The Glebe Plot site, as part of the HELAA process and we are sympathetic to the comments made in the GPC letter dated 11th March 2021 as part of their response to the District Plan consultation. Due to its unique location in the middle of the settlement of Chillenden, The Glebe Plot site will not impact adversely on the surrounding landscape. It does not suffer from surface water flooding. The site is well screened by mature trees, hedgerows and bushes and a preliminary study has been undertaken by a heritage expert, to ensure that any heritage concerns of the nearby Grade 2 listed building can be mitigated. Importantly, The Glebe Plot site benefits from its own access off Station Road with no other shared properties or driveways.</p> <p>In addition to the documents submitted on 15th March 2021 as part of the targeted call for sites 2021, I would request that the details of the site’s suitability, achievability and availability appended to this representation to be considered (Appendix 1).</p> <p>In conclusion, my representation is that the Glebe Plot was wrongly excluded at the first stage assessment, because it is not “isolated in the Countryside” as it is within the confines and boundary of the village of Chillenden, and it should have been considered suitable for inclusion in the Local Plan, as at least equal to the site that has been included (GOO006), if not better given the lack of impact of flooding, and should be added to Dover District Council Local Plan.</p> <p>Thank you for your attention to this and I look forward to receiving confirmation that you have accepted my formal representation and will consider the matters during your Examination process.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>In summary, I believe it to be absolutely clear that The Glebe Plot site (TC4S067) should not have been eliminated from consideration for inclusion in the DDC HELAA at stage 1 desk top assessment, because it is not “isolated and in the countryside”. Further to this, I consider that the site would not have been excluded at the Site, Suitability, Availability and Achievability assessments as it meets the same standards as the site, GOO006, that has been included in the Local Plan on page 212, but with the added advantage of not being a site which is subject to flooding.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>

<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I believe the site TC4S067 has been omitted from the Local Plan when it should have been included as an allocation, this is because I believe the HELAA assessment carried out by DDC is incorrect. I would ask that during your examination process you consider my representation, confirm the failings of the HELAA assessment and add site TC4S067 to the Dover District Council Local Plan.</p> <p>I also want to confirm that should this be included under the Examination process that I would like to attend the examination process and, if it is felt necessary, to support this representation.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 50 - Land adjacent to short street Chillenden GOO0006
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I believe the proposal for development at SAP 50 is unsound due to flood risk that has not been properly evaluated. The site in question is lower than the surrounding roads and fields. Hence there is an increased risk of flooding to some properties due to the site being a run off for surface water from the road and surrounding fields. Station Road frequently floods and the surface water runs off into the development site. If the site was built on, the surface water would by necessity have no other run off, except into neighbouring properties off Short Street: (Yew Tree Barn, The Grange, West Barn, The Stables, The Bothy). Worryingly, the flood risk mitigations suggested within the Flood Risk Assessment were aimed solely at minimising risk to the proposed new development. There were no proposed mitigations to prevent flood risk to neighbouring properties. Also it should be noted that the only other point in the village at such a low elevation opposite the farm, there is a purpose built pond which acts as a soak away, proving the point about water volume accumulation. The pond itself has also been known to flood in the past due to the volume of water that runs down into the village from both the east and west during storms.</p> <p>There is also incorrect information stated as facts in the Local Plan Flood Risk Assessment document (pp127-128). The document states incorrectly that there has been no history of flooding in the area – there has been flooding in June 2022 affecting The Grange and flooding in June 2017 affecting West Barn and Yew Tree Barn, as well as numerous other occasions prior to this date.</p> <p>In addition any use of the current entrance will involve construction vehicles crossing over private land to access the site – this issue has not been addressed.</p> <p>Also even if an new access point is created in the hedge along the short street road this access point will be dangerous access to the site from an extremely narrow road off a shared junction with no visibility. I currently walk around the village at least twice a day and – this has not been addressed. It will also further destroy valuable habitat for wildlife in this area. The whole area is a natural habitat for bats who of a spring / summer evening at dusk can be seen flying around station road / short street area, roosting in The Grange and nearby trees.</p>

	<p>Development of the whole site would significantly harm the character and appearance of the area including the local landscape and setting of the village within the countryside. Any large scale removal of existing boundary trees or hedgerows would significantly erode existing landscape character of the area The development of this site would have a detrimental landscape impact that cannot be mitigated</p> <p>Development of the site would cause harm to the setting of listed buildings and the character of the CA. Site assessed as having a heritage impact that would cause significant detrimental harm to identified heritage assets</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	SAP50 Land adjacent to Short Street, Chillenden (GOO006)
<p>2 - Do you consider this part of the Plan sound?</p>	No
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	Justified Effective
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	No

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am a resident where this damaging of a rural hamlet by an unnecessary, unwarranted proposal development will be felt most strongly. I have received no contact or documentation about this proposal from Dover District Council to myself personally. I believe there is a legal responsibility on Dover District Council to have undertaken such contact, correspondence towards me.</p> <p>I also require feedback which again I believe you are legally responsible to do on the previous submission made by myself some months ago.</p> <p>I require you to confirm that due diligence has been applied including possible notifiable relationships between landowner selling the land for possible development and those involved in the constructing and advising on the local plan.</p> <p>The access to the proposed site is totally unsuitable (both from Short Street and Station Road) and as my land adjoins said site I will not allow incursions onto my land by any construction vehicles. Please advise when any council official makes an inspection on the major access problems because as a council tax payer to Dover District Council for the last 24 years I wish to verbally comment on the ill advised situation.</p> <p>In the Dover District Council Local Plan March 2021 Highway Comments showed that the removal of hedges would be required to create appropriate visibility splays. I understand a company advising the landowner state that the hedges should remain. I expect confirmation on what will happen to these hedges. There is no footpath on this very narrow road.</p> <p>I must advise that a flood study of the site has been compiled by QVA Consulting disputing your Flood Risk Level 1 grading that allowed the development to be put forward when clearly the risk is Level 2.</p> <p>I require you to explain to me how this proposed development will enhance the well being of the local council taxpayers and residents of this rural, unspoilt hamlet. What is the solid research and facts?</p> <p>I am delighted that the target for house building has been downgraded to an advisory rather than a compulsory one by the Levelling Up Secretary 'if it threatens the rural and suburban areas!' and in my opinion, along with many others, this proposed site most certainly does.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	GOO006 Land adjacent to Short Street, Chillenden CT3 1PR
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>a) The Dover Local Plan fails to achieve Legal validity due to the "Flood Risk Level 1" grading that permitted the proposed development, on the green field site adjacent to Short Street, Chillenden CT3 1PR (Site GOO006), to be put forward and consequently included in the draft Local Plan when clearly the risk is demonstrably Flood risk Level 2. This has been professionally and independently verified by QVA Consulting a copy of whose report is available. The risk of flooding of the plot (Site GOO006) is exceedingly high and this applies critically to the local residents already living on Short Street, who have previously suffered from flooding and whose risk of suffering fresh flooding will be dramatically increased should development of the low point in our valley be permitted. Obviously if development is permitted, future residents of permitted houses on the plot (GOO006) will have an extreme likelihood of future flooding as there is very minimal possibility of any developer being able to take effective action to counter the threat.</p> <p>b) The Dover Local Plan Review is unsound due to the Flood Risk Level 1 grading that allowed the development to be included when clearly the risk is demonstrably Flood risk Level 2. Dover District Council have failed to engage with the local community or seek reliable, unbiased representations. The BTF document is clearly unsound and contains dubious local information. One has to ask why? I have suspicions that it may be possible that there could well be an established relationship between BTF and the land owner.</p> <p>c) There has been no attempt by Dover District Council to engage in their Duty to Cooperate with the local community and the time scale for consultation is far too short allowing very little opportunity for the local community to take action. Fortunately one of our villagers has been able to engage, at very short notice and I suspect great personal expense QVA Consulting to undertake an indepth SURFACE WATER ASSESSMENT & FLOOD STUDY a copy of which will be submitted.</p> <p>d) I personally feel that Dover District Council seem to have engaged with everyone except the affected local community and would point out that the Secretary of State, Michael Gove, is presently changing the National Policy requirements for local housing development and I would suggest that the process should be suspended until such time as a clear way forward is put in place by the HM Government which I understand may include a legal requirement for councils to consult with local communities rather than dictate to them.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance	The Dover Local Plan fails to achieve Legal validity due to the Flood Risk Level 1 grading that permitted the proposed development on the green field site adjacent to Short Street, Chillenden CT3 1PR (Site GOO006) to be put forward and included in the Local Plan when clearly the risk is demonstrably Flood risk Level 2. This has been professionally and independently verified by QVA Consulting. The risk of flooding of the plot (Site GOO006) is very high and this applies especially to the local residents already living on Short Street, whose risk of suffering flooding will be dramatically increased should the low point in our valley be developed.

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	It will not be possible to render the Dover Local Plan legally compliant while it contains the green field site adjacent to Short Street, Chillenden CT3 1PR (Site GOO006) due to the misrepresentation of the flood risk.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Dover District Council appear to have failed in their statutory duties and can not be trusted to represent the will of the voters and residents of Chillenden.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	1. FLOOD RISK. Myself and all the residents surrounding this site are most anxious and concerned. We all know it to be a serious flood risk. It has flooded in the past (1984). And in more recently has water logged properties. We have employed a professional flood consultant expert to help support our concerns. Please find a comprehensive document attached below. 2. It is a very big risk to our National Heritage. Directly next to a Listed Medeival Hall house (The Grange), dating back to1287.. one of the oldest houses in England. Historically, agricultural farmland surrounds the site and is a busy working farm with limited access and road structure. Just single track lanes, which frequently break up with water damage and farm vehicles.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	I consider the plan is unsound in that it was put together by specifically targeting land owners and developers and asking them which sites they would like to have developed. This has led to a local landowner seeking to make money by proposing the development of a totally inappropriate

to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>site in Chillenden (SAP50). Justification for this was in a report from BTF Partnership, a company with family connections to the landowner. This illustrates the unsound nature of the proposal.</p> <p>The site is in the lowest part of the village, which is in effect a bowl with all roads and fields running down in to the village. I believe others will be covering the flood risk nature of the site.</p> <p>The Site is accessed off a single track road that Dover District Council as agents for Kent County Council have failed to maintain over the years. They have failed as the Highways Authority to repair it after the extreme use by heavy farm vehicles. It is unsatisfactory for the houses already there let alone for any additional ones. Also during construction it will be virtually impossible to access the site.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The inappropriate development of site SAP50 should be removed from the Local Plan at this consultation stage.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The evidence detailed in the Dover Local Plan regarding the potential to develop site SAP50 - Land adjacent to Short Street, Chillenden (GOO006) is flawed and inaccurate. It is further inconsistent with the Climate Emergency declaration of November 4th 2019 as it makes no consideration for the impact of this development on surrounding properties.</p> <p>An independent assessment of the site conducted by QVA Consulting (attached) provides an evidence based analysis of the site and identifies the following key conclusions</p> <ul style="list-style-type: none"> - current EA/SFRA surface water mapping does not reflect specific topography at the site - 98% of the site is at a high risk of surface water flooding - Conventional or SuDS drainage of the development is precluded by topography (no outfall), hydrogeology (no infiltration) and statutory flood risk obligations (increased flood risk offsite) - Measures required to pass the Exception Test would increase flood risk offsite. <p>As regards the Climate Emergency declaration and duty of care, I refer you to Section 19 (1A) of the Planning and Compulsory Purchase Act 2004, which states</p> <p>“Development plan documents must (taken as a whole) include policies designed to secure that the development and use of land in the local planning authority’s area contribute to the mitigation of, and adaptation to, climate change.”</p> <p>Clearly a development that has the potential in increase the impacts of climate change on the local area including neighbouring properties is contra to the clear direction of said Act and the Climate Emergency declaration by DDC.</p> <p>Also attached is the final report of the National Infrastructure Committee on Reducing the Risks of Surface Water Flooding. It states Climate change and urbanisation are set to put more properties at risk. The number of properties in areas at high risk is set to increase by 2055, including:</p> <ul style="list-style-type: none"> • an increase of around 20,000-135,000 properties in areas at high risk due to the impacts of climate change, which will increase the intensity and frequency of heavy rainfall • an increase of around 35,000-95,000 properties due to new development putting more pressure on drainage systems. <p>A further 50,000-65,000 properties may be put in areas at high risk due to unplanned increases in impermeable surfaces (e.g. front gardens being paved over), which, alongside new development, is part of ‘urbanisation’– the conversion of natural (often permeable) environments to urban ones where rainwater cannot enter natural drainage systems.</p> <p>The greenfield site off Short Street is a natural run off for surface water and as such a natural mitigator of flood risks for existing properties along Short Street as well the noted heritage site of The Grange.</p> <p>Recently reported changes to the Levelling Up an Regeneration Bill state that the former targets for Local Authorities will no longer be relevant or compulsory. This means an abandoning of damaging centralised mandatory housing targets that have led to needless, unaffordable and poorly designed greenfield developments in favour of an advisory system that takes local character and need into account.</p> <p>Despite further registered concerns at the Reg 18 stage regards heritage (proximity to a listed building of significant historical importance) , environment (removal of hedgerows, destruction of wildlife habitat and hunting grounds for owls and bats), access and egress (site is approached on a single track road and has 3 other access points for local inhabitants), it is disappointing that the comments of the local community and Parish Council have been ignored and disregarded without consultation or direct contact. This leads to the conclusion that the process is fundamentally a tick box exercise and does not have communities’ best interests as the central pillar.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Removal of SAP50 - Land adjacent to Short Street, Chillenden (GOO006) from the local plan. It is not required economically, it is not relevant to sustainability of the local community, it is contra to climate change requirements and is likely to cause immeasurable future harm to adjoining properties. It is based on flawed assumptions and should be disregarded as a potential development site.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Given the flawed evidence for the site's inclusion it is preferable to explain in person the potential impact on adjoining properties as a result of increased flood potential.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	Kenny Ingram [Redacted]

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

09 December 2022

Dear Sir/Madam,

Response to Dover Local Plan Review Submission Local Plan consultation (Regulation 19)

Please accept this letter as our representation to your Regulation 19 Submission Local Plan Consultation.

We consider the Local Plan Review to be unsound, because of the inclusion of Site SAP50 Land adjacent to Short Street Chillenden (site allocation reference: GOO006). The reasons for our representation are set out below.

Soundness

The Plan is not justified because:

Findings from the Sustainability Appraisal in which Chillenden scores “significant negative effect” on the following appear to have been disregarded:

- SA5 resources
 - SA7 flood risk
 - SA10 historic environment
-
- Site SAP50, which is an irregular shaped plot of arable land, lies between Short Street and Station Road, and is approximately 02 hectares in size. It would appear from the Dover District Council Housing and Economic Land Availability Assessment that there could be potential for up to 5 executive homes to be delivered on the site. The current number of dwellings in Chillenden is approximately 45 therefore it follows that if 5 further dwellings were built this would lead to an increase in homes of just over 11%.
-
- There is an old cart track (The Lane) which runs from Short Street to Station Road through the proposed site. The Lane is “unadopted” land and joins the road beside The Glebe (Station Road) and cuts through to Short Street. The exact location reference is GR 270538 to GR 272536. Southern Water own a pumping station on the perimeter of the proposed site and have a right of access along The Lane to the pumping station.
-
- The Lane has been utilised as a safe passage for pedestrians for The Goodnestone Parish Council Minutes often make comment about speeding in Chillenden and Station Road down from Knowlton to its junction with Goodnestone Road. Station Road has no speed limiting restrictions and no safety for pedestrians, horse riders or cyclists (without climbing onto the bank or hedgerow), from passing cars or farm vehicles. Therefore, using The Lane provides a significant amount of safety to this group of road users.
-
- The Lane does become overgrown as it is not designated as a Public Footpath or Bridleway and therefore it does not get “maintained” by either the Kent County Council or the Parish Council in the same way that designated Public Footpaths and Bridleways
-
- Research has established that The Lane or Cart Track is clearly shown on all historic and current OS maps and on ‘Mudges’ map (which dates from early C19th). However, it is not shown as a ‘public right of way’ on the Definitive Map published by Kent County Council who, I understand, are the highway authority. There is little doubt that it is an historic public right of Research is currently underway to establish if there is a mechanism for petitions to be made to the KCC for The Lane to be included on the Definitive Map.
-
- The proposed site SAP50 is shown on the Dover District Council Local Plan as one area, but it should be shown as two distinct areas either side of The Lane. Additionally, one side of the potential site is within a Conservation Area whilst the other side is not. Clearly, residents of Chillenden and the Parish, are concerned that The Lane would be “swallowed up” by any development.

1 SA5 Resources

- The key objective of the National Planning Policy Framework is a presumption in favour of sustainable development, which is the fundamental basis for the assessment of applications. This involves economic, social, and environmental considerations. The main aim of Policy SP1 is: “to develop sustainable communities and seek to ensure that adequate community facilities are provided.” The commission for Rural Communities’ State of the Countryside document sets out key services which it perceives as being important to the sustainability of a rural community. These are:
 - Banks
 - Petrol Station/ car sales/repairs
 - Shops
 - Post Office
 - GP surgeries
 - Dentists

Sustainable communities are defined as those possessing a range of services and alternative modes of transport, to minimise the daily use of the car.

- Chillenden does not comply with this definition by virtue of the lack of facilities in the hamlet. There are no community facilities other than the pub, the local church and village hall.
- There are poor transport links to and from The bus service is limited to a return bus route weekly on Wednesday, (Canterbury), Thursday (Sandwich) and Saturday (Canterbury). The service leaves Chillenden around 10:30 and returns around 13:30, and there are no services on Sundays or Bank Holidays. There is a school bus, which travels along Short Street, that services the village daily during school terms. This service is under review and is highly likely to be reduced in January 2023.
- There is very little employment within Chillenden meaning residents travel out of the area for work, and as the public transport is limited this means residents depend upon the use of a private vehicle which contributes to the number of vehicles within Chillenden and travelling on the district’s road network, with the resultant congestion and pollution.
- In order to gain access to the nearest Rural service centre at Aylesham, which provides a wider range of facilities and a better bus service, would involve an hours walk along roads without pavements or lighting. The nearest local train station is again at Aylesham; however, it has limited parking.
- Chillenden has been identified in the small villages and hamlets category in the settlement hierarchy where windfall infill development would be acceptable in principle. In order to ensure any windfall schemes are integrated properly within Chillenden, any development proposals would need to show how it can complement Chillenden’s existing settlement character in terms of its layout, design, scale, and appearance.

2.7 It is believed that the development of the site would:

- Create a significant adverse impact on the amenity of the existing residents of both Short Street and Station (14 households, approx. 33% of the total number of households).
- It would result in significant harm to the landscape and heritage
- It is not capable of having safe lighting and pedestrian access provided without a significant impact on neighbours or on the integrity of the street scene.

It is therefore argued that windfall infill development of the site cannot be satisfactorily integrated into the existing settlement.

2.8 Although only one of a wide range of background studies which fed into the Sustainability Appraisal and Growth Options work the document titled Topic Paper Rural Settlement Hierarchy (Regulation 18 Consultation on the draft local plan Dated August 2022) states that in terms of facilities Chillenden scored 6 and fell into the category of having low level sustainable facilities. This is a lower score than that stated in the December 2020 paper.

2.9 The study concluded:

The continued national policy emphasis on sustainable development means that housing development should, where possible, be concentrated in the three urban centres of the District, Dover, Deal and Sandwich, with new development in the rural areas focused on villages commensurate with their scale and position in the hierarchy, unless local factors, including flood risk and environmental designations, dictate otherwise.

Nothing has changed in respect to the amenities available in Chillenden since these Studies were published.

3.1 Access and egress to this site would be via either Short Street or Station Road which are both single lane with no pedestrian provision and with pinch points that could not be modified easily. Emergency access via the single-track roads would be problematic. Any road widening or highway improvements to facilitate access to housing on the site may require the purchase of land for such works.

3.2 Parts of Short Street are bordered by existing residential properties, which are situated directly adjacent to the highway, and the volume and nature of the increase in traffic would have a significant impact on their residential amenities.

3.3 A working farm, Yew Tree Farm, is situated at the junction of Short Street and the main road through Chillenden. Short Street is used regularly each day by agricultural vehicles travelling to and from the farmyard and the fields.

Short Street towards Station Road.

Short Street towards the village.

Short Street towards junction with Station Road

Station Road junction with Short Street

Station Road towards Cave Lane

1 SA7 Flood risk

4.1 The Level 2 Strategic Flood Risk Assessment categorises Site SAP50, as being a site in Flood Zone 1 with >40% of the site at risk from surface water flooding. 62% of the site is considered developable.

4.2 The SAP50 Site Allocation entry in the Reg 19 Consultation, indicates that a site-specific Flood Risk Assessment is required to guide development to areas of low flood risk, in accordance with the Sequential and Exception Tests

4.3 A locally commissioned Surface Water Assessment and Flood Study (ANNEX A) reviewed the Chillenden catchment hydrology, local topography and observed, historical flood events and demonstrates that the SFRA flood mapping used by Dover District Council in Site Allocation assumptions, does not reflect the topography, or observed flood behaviour, at the site. Specifically, this Flood Study concludes that:

- Current EA/SFRA surface water flood mapping does not reflect specific topography at the site.
- 98% of the site is at a high risk of surface water flooding.
- Conventional or SuDS drainage of the development is precluded by topography (no outfall), hydrogeology (no infiltration) and statutory flood risk obligations (increased flood risk offsite).
- Measures required to pass the Exception Test would increase flood risk offsite.

4.4 Site SAP50 falls into the category 'Sites in Flood Zone 1 and with a High Chance of Surface Water Flooding', which are listed in Table 2 of Dover District Council's Strategic Flood Risk Assessment Level 2, Sequential and Exception Test Summary and Review Note, May 2022.

4.5 Although site SAP50 is in Flood Zone 1 and would pass the Sequential test for residential land use, the known surface water flooding issues effectively put the flood risk into the categories of Flood Zone 2 (flood risk between 1 in 100 years and 1 in 1,000 years) and Flood Zone 3 (Flood Risk > 1 in 100 years).

1 SA10 Historic Environment.

5.1 Part of the site is adjacent to the Conservation Area and part within. It is also adjacent to a grade II listed building (The Grange) and is within an Area of Archaeological Protection.

5.2 Part of the site is visible from the grade II listed windmill due to the lack of vegetation and forms an important transition area between the village and the rural landscape.

5.3 The Conservation Area is characterised by large open spaces and very loose development grain. Many of the historic buildings have an agricultural character.

5.4 Development of the site at the number of units indicated would result in dense development which would be contrary to the character of the Conservation Area causing harm. The site has been assessed as having a heritage impact that would cause significant detrimental harm to identified heritage assets.

6.1 There are currently two empty dilapidated residential properties on Griffin Hill in Chillenden. These two properties are a depreciating asset and have a negative impact on their immediate surroundings. The Government has placed a responsibility on Local Authorities to bring empty homes back into use which in turn would reduce the need to build on green field sites.

6.2 Although the DDC have been informed regarding these properties it would appear they have not exercised their powers known as Empty Dwelling Management Orders to take over the management of these properties which have been unoccupied for a number of years.

6.3 These properties would provide affordable housing for two families as opposed to 5 executive type houses which would not generally be within the budget of young families.

1 Conflict of Interest

7.1 The landowner who is proposing to sell the land on which site SAP50 is deemed suitable for building on belongs to Lord FitzWalter. Lord FitzWalter's son is Edward Plumtre who in turn works for a company called BTF Partnership as an associate director.

7.2 BTF Partnership offer a wide range of professional services to meet the needs of both the rural and commercial land and property owners. In making representations on the Regulation 18 Local Planning Document Lord FitzWalter submitted a report to Dover District Council compiled by BTF in support of building on site SAP50.

7.3 Harry Kenton is also an associate director of BTF. Harry Kenton's father is Nicholas Kenton who is a serving Ward Councillor for a neighbouring ward to Chillenden, - Eastry rural. Cllr Kenton's responsibilities in relation to Dover District Council also include:

- Portfolio holder for planning & environment.
- Chairman of the Local Plan Project Advisory Group

7.4 The purpose of the Local Plan Project Advisory Group is to assist and support the Cabinet/Portfolio Holder for Environment, Waste and Planning regarding the preparation of the Local Plan and other associated documents and to advise Cabinet (via the Portfolio Holder for Environment, Waste and Planning) on the delivery of the Local Plan and other associated documents. The Group is not a decision-making body. Its recommendations are reported back to the Cabinet via the Portfolio Holder for Environment, Waste and Planning.

7.5 With regards to conflicts of interest, members of the Group are expected to declare a conflict of interest, and the precise nature of that interest, as soon as they become aware of its existence. Whilst the existence of an interest may not necessarily bar a member from participating in discussions, members are advised to refer to the relevant protocol of their organisation/governing body.

7.6 One can understand the concerns of local residents with regards to nepotism when you examine the direct links between Lord FitzWalter through BTF to the Chairman of the Local Plan Project Advisory Group.

	<p>8.1 Whilst it is accepted that some growth is required in small hamlets such as Chillenden, this should be proportionate to the relatively limited size of the settlement. However, due to:</p> <ul style="list-style-type: none"> • The location of the Site • The lack of facilities • The adverse impact on existing residents of Short Street • The adverse impact on the existing street scene • The significant harm to the Landscape and Heritage assets • The very real threat of flooding <p>8.2 In relation to the Chillenden site, it is believed that the Dover District Council have not properly considered all the comments within the Sustainability Appraisals but have relied upon a desk top exercise. It is our belief that the proposed site in Chillenden is not sustainable, nor can it be satisfactorily integrated into the existing settlement, nor does it offer the most appropriate strategy for delivering the required growth in housing.</p> <p>8.3 It is also anticipated that the Dover District Council take note of the Government's intention to amend the levelling up bill abolishing mandatory housebuilding targets for local councils.</p> <p>Kind Regards,</p> <p>Kenny Ingram & Joanna Bird</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Reassess SAP%) in relation to the locally commissioned FRA.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP50 - Land adjacent to Short Street, Chillenden (GOO006)
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The DDC Local Plan highlights proposed development in Short Street, Chillenden and specifically at Site GOO006. Regrettably there appears to be little reference to an Old Cart Track which proposed development GOO006 is split across.</p> <p>The Cart Track (known locally as "The Lane"), which is, I understand "unadopted" land, joins the road beside The Glebe (Station Road) and cuts through to Short Street. The exact location reference is GR 270538 to GR 272536</p> <p>The Lane has been utilised as a safe passage for pedestrians for generations. The Goodnestone PC Minutes often make comment about speeding in Chillenden and the road (Station Road) down from Knowlton to its junction with Goodnestone Road past The Glebe has no speed limiting restrictions and no safety for pedestrians (without climbing into the bank or hedgerow), from a passing car or farm vehicle. Therefore using The Lane provided and still provides a significant amount of safety.</p> <p>The Lane does become overgrown as it is not designated as a Public Footpath or Bridleway and therefore it does not get "maintained" by either Kent County Council or the Parish Council in the same way that designated Public Footpaths and Bridleways are. My father Ron Holyer who was clerk to the Parish Council for many years, amongst many other tasks, regularly maintained The Lane on behalf of the local community. What I can assure you is that on every visit I make to my Mum, who resides at The Glebe, I endeavour to clear a pathway. During my enforced time in Chillenden, as a result of Covid-19, I made a big effort to open up The Lane for all concerned and have seen a significant increase in its use.</p> <p>After some research I have found out that "The Lane" is clearly shown on all historic and current OS maps and on 'Mudges' map (which dates from early C19th). However, it is not shown as a 'public right of way' on the Definitive Map published by Kent County Council who, I understand, are the highway authority. There is little doubt that it is an historic public right of way. It provides access to The Glebe, The Grange, Chillenden House and the Water Company Pumping Station, all of which will need to be retained. I am already in communication with the requisite authorities to have "The Lane" classified as a Restricted Byway.</p>

	<p>I mentioned in my opening paragraph about the DDC Local Plan and the site in Chillenden (GO0006) that is marked Green as a potential development site. The potential site is shown on the DDC Local Plan as one area but actually it should be shown as 2 distinct areas either side of The Lane. Additionally one side of the potential site is within a Conservation Area whilst the other side is not. Clearly I and other residents of the Village and indeed Parish, are keen that The Lane is not "swallowed up" should Development eventually be allowed on the site.</p> <p>I attach some photographs which may be helpful.</p> <p>Please let me know if you need any further information or anything clarified</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Ensure that The Old Cart Track (The Lane) remains a safe passageway for pedestrians and that the historic "rights of way" for The Glebe, The Grange and Chillenden House are maintained</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>Agent Company / Organisation</p>	
<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	<p>Chillenden 4.291</p>
<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The evidence detailed in the Dover Local Plan regarding the potential to develop site SAP50 - Land adjacent to Short Street, Chillenden (GOO006) is flawed and inaccurate. It is further inconsistent with the Climate Emergency declaration of November 4th 2019 as it makes no consideration for the impact of this development on surrounding properties.</p> <p>An independent assessment of the site conducted by QVA Consulting (attached) provides an evidence based analysis of the site and identifies the following key conclusions</p> <ul style="list-style-type: none"> - current EA/SFRA surface water mapping does not reflect specific topography at the site - 98% of the site is at a high risk of surface water flooding - Conventional or SuDS drainage of the development is precluded by topography (no outfall), hydrogeology (no infiltration) and statutory flood risk obligations (increased flood risk offsite) - Measures required to pass the Exception Test would increase flood risk offsite. <p>As regards the Climate Emergency declaration and duty of care, I refer you to Section 19 (1A) of the Planning and Compulsory Purchase Act 2004, which states</p> <p>“Development plan documents must (taken as a whole) include policies designed to secure that the development and use of land in the local planning authority’s area contribute to the mitigation of, and adaptation to, climate change.”</p> <p>Clearly a development that has the potential in increase the impacts of climate change on the local area including neighbouring properties is contra to the clear direction of said Act and the Climate Emergency declaration by DDC.</p> <p>Also attached is the final report of the National Infrastructure Committee on Reducing the Risks of Surface Water Flooding. It states Climate change and urbanisation are set to put more properties at risk. The number of properties in areas at high risk is set to increase by 2055, including:</p> <ul style="list-style-type: none"> • an increase of around 20,000-135,000 properties in areas at high risk due to the impacts of climate change, which will increase the intensity and frequency of heavy rainfall • an increase of around 35,000-95,000 properties due to new development putting more pressure on drainage systems. <p>A further 50,000-65,000 properties may be put in areas at high risk due to unplanned increases in impermeable surfaces (e.g. front gardens being paved over), which, alongside new development, is part of ‘urbanisation’– the conversion of natural (often permeable) environments to urban ones where rainwater cannot enter natural drainage systems.</p> <p>The greenfield site off Short Street is a natural run off for surface water and as such a natural mitigator of flood risks for existing properties along Short Street as well the noted heritage site of The Grange.</p> <p>Recently reported changes to the Levelling Up an Regeneration Bill state that the former targets for Local Authorities will no longer be relevant or compulsory. This means an abandoning of damaging centralised mandatory housing targets that have led to needless, unaffordable and poorly designed greenfield developments in favour of an advisory system that takes local character and need into account.</p> <p>Despite further registered concerns at the Reg 18 stage regards heritage (proximity to a listed building of significant historical importance) , environment (removal of hedgerows, destruction of wildlife habitat and hunting grounds for owls and bats), access and egress (site is approached on a single track road and has 3 other access points for local inhabitants), it is disappointing that the comments of the local community and Parish Council have been ignored and disregarded without consultation or direct contact. This leads to the conclusion that the process is fundamentally a tick box exercise and does not have communities’ best interests as the central pillar.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The removal of the site from the Local Plan as suitable for development due to the location and heritage of the site as well as its importance as a surface water run-off.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To explain to the Inspector why the site is not suitable for development.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I wish to make a comment on a specific aspect of the proposal to allow five houses to be built on land in Chillenden reference as GOO006 in the final Local Plan. I have raised the same subject in a letter submitted for the Draft Plan but didn't get an acknowledgement and have only recently found out that the proposals have moved on. Having now read the current documents and the submitted report prepared for the landowners by BTF Partnership I think I need to comment further.

This letter is not to raise objections to the proposal outline but to reiterate the importance of a detailed applicants report on the methods of preventing flood risk not just to the site but to ensure no additional effect to the surrounding land, roads, and buildings around it.

I note that your own report stated that a Flood Risk Assessment will be required and that SUDS should be provided I would have preferred 'Must Be' – but the BTF report baldly states 'not affected by Flood Risk' which even if true for this piece of ground is not for its immediate surroundings. It may be it was where the Ordnance Survey sheet breaks but I notice that the Location Plan accompanying their report cuts out before it needs to show the large pond which sits less than 50 metres away from the proposed site on the lower ground and adjacent to my house and one other.

The pond is dry for most of its life, but it has filled more or less to its rim at least three times in the last 12 years. More often the limited number of working gully's and other inlets which it collects water from have filled or been blocked by mud and debris from the many roads it serves so that the pond stays less than half full while my drive is awash with muddy water coming to within an inch or so from my front door threshold and other openings. This happened twice last year and most recently at the end of August this one (the end of the drought). Both Short Street and Station Road which border around the site in question drain down to the single gully on the corner of Short Street and Griffin Hill.

Plot GPP006 falls gently South Westward towards the nearby properties with the ground continuing to slope slightly around the pond till it hits Griffin Hall where the road starts to rise steeply in both directions. Short Street and Station Road fall less steeply until its South West corner where the falls slows down to a minimum. As both are narrow country lanes there is no drainage other than gravity and there is already fall off from both hard and soft from most adjoining land. I would note that after heavy rainfall surface water continues to flow more steadily and much more muddily from Short/Station Roads than from either of the far steeper ends of Griffin Hill.

I don't believe that plot GOO006 presently contributes any measurable run off to this. The concrete path which runs along the majority of the South Western border is slightly higher than the adjoining grassed area which always seems to be well maintained. I would note that it remained green and lush looking throughout the drought so there is obviously some source of moisture there. Even with a limit of five houses with appendages, access roads, parking, patios etc., there will be a large amount of run off created with likely increases over the years in ways that the Council have no further legal control over (take the brickwork site as an example). On the other hand, the site is big enough to provide a solution. I would suggest the pragmatic Netherlands one of cutting a continuous drainage ditch along the concrete access road at the start of sitework but that is for others to decide. To ignore it will cause everyone involved a load of unnecessary problems for the future.

I hope this letter can be filed somewhere for future consideration and would be grateful if you could acknowledge receipt.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Rep Status	Processed
Consultee ID	1333333
Consultee Full Name	Mr Colin Tearle
Consultee Company / Organisation	Shepherdswell-with-Coldred Parish Council
Agent Full Name	
Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP51
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Coldred SHE013</p> <p>This development does not comply with Policy T12 – Transport Assessments and Travel Plans.</p> <p>This development should in so far as its size, characteristic and location be designed so that opportunities for sustainable transport modes are maximised and provide for a variety of forms of transport as alternative to travel by private motorised vehicle. The proposed development is within a conservation area which seems a contradiction to DDC's own conservation objectives and would negatively impact the landscape and historic environment that the Conservation Area is intended to protect.</p> <p>The only way to access the facilities of Shepherdswell, ie school, doctor, shop and railway station is along a narrow country lane with no pavements.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	If development of any kind is to be permitted it should be linked to a S106 agreement to improve the facilities within Shepherdswell and Coldred.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP51
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Having read the section of the Dover plan regarding the land in coldred, I have previously objected to the original planning permission submitted by the land owner. My objection still stands, however I have additional concerns that the Dover plan for coldred is not in keeping with the plan for climate change and sustainability.</p> <p>Bus routes through the village are currently under consideration and likely to be discontinued in the summer of 2023. This will result in an increase in vehicles increasing the carbon emissions as the need for transport is not met.</p> <p>The plan states that hedgerows and trees will remain, building on the site will cause destruction of a wild natural habitat in a conservation area.</p> <p>The building of 5 houses will increase the size of the hamlet by 10%, the roads in and around the Hamlet are small country lanes increasing the through traffic would be a hazard as there are no foot paths and increase the potential risk of accidents.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). Dear Local Plan Team SITE DELIVERY Response to blind email Proposed new housing SHE013 SAP51 refers

I am in receipt today 23.11.22 a copy of an email message which requests an update on the proposal to build 5 dwellings in Coldred. Land opposite the Conifers Coldred Road Coldred CT15 5AR submitted 21.5.21

The development is awaiting an 'all matters reserved' decision. If permitted the dwellings will progress immediately to the design code stage and detail design and be developed within the five-year window.

CURRENT SITE STATUS

Awaiting decision on Outline application 21/00882 (with all matters reserved) for the erection of 5no. detached dwellings submitted 21.5.2021

The architect HMMY standing ready to progress to the design code stage

Discussions undertaken with major developers over financials and project structure options

No external public infrastructure works or enlargements are required.

The developments internal infrastructure – utilities, may compromise a first phase, if requirement under 'reserved matters' (a single continuous phase is preferred by developers for this small site).

I am advised by interested developers that from breaking ground to broom clean this site requires 12 months assuming traditional methods of construction.

Soil investigation. A 2-metre-deep pit has been excavated to gain foundation requirement data and a 57-metre-deep borehole has been drilled and logged to enable heat pump well design. Site cleaning is on-going, and recommendations noted in the environmental report are being undertaken.

I am the sole freehold owner of the land

The land is not financially burdened nor has legal or physical constraints

All reports requested by the planning officer have been submitted. Including a Heritage report I trust this information is satisfactory. Please contact me if you require fleshing out of any of this information.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Developments of land around Aylesham, Nonington and Elvington
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>What planning discussions have happened with Nonington Parish Council and equivalents for Aylesham and Elvington? Exhibitions and requests for comments but not proper conversations and discussions. You cannot call this cooperation. The Duty to Cooperate has not been fulfilled - also evidenced by the councils' objections and surprise at these plans.</p> <p>Despite the plan strategically saying that most development is needed in Dover and that it has an imbalance of housing and is unattractive, DDC has decided to inappropriately "promote" Aylesham now a large village, isolated with few amenities, to the status equivalent to Sandwich, a town that has developed over centuries and has many facilities and bus routes based on it. This is not justified and so the plan is not positively prepared.</p> <p>Roads around Aylesham, Nonington and Elvington have already too much traffic. Where are the assessments? The attached map shows how poor the road infrastructure is. the roads are narrow, bendy and almost all without pavements. There are v few bus services - none in Nonington. The plan is not sound as there would be far too much new traffic. So the plan is ineffective, not positively prepared and not justified.</p> <p>Where is the employment to come from? We do not need more space - there are empty units. Snowdown Colliery site is going to remain leased to the NCB Residuary Body and not developed - as confirmed by the owner. Even if it were to be released, the costs of development, whilst preserving key buildings and on this brownfield site, would not be economic. In the plan, this is a pillar of justifying the developments and the need for more housing but it is very tenuous to say the least - so the plan is unjustified and unsound.</p> <p>The population of Dover District and surrounding districts is pretty static. There is not the robust evidence to justify the degree of planned housing expansion. The plan is not justified or positively prepared. Large developments in East Kent provide housing which looks cheap to London boroughs which can place people they are responsible for into East Kent. We have seen this already in several places. Those placed are unlikely to bring prosperity to the region given their dependence on local authorities for housing. This is not serving the needs or wishes of the existing local population so on these two counts the plan is not positively prepared, evidenced or has there been cooperation with locally elected bodies</p>

	<p>like parish councils who are only too aware of relatively large influxes from London into new developments. It is also not effective as many of these people will not have the skills to fill employment needs.</p> <p>The description of one of the areas as a "Country Park" yet it has 420 houses allocated is disingenuous. Is this an attempt to allay concerns? The areas around Aylesham are also earmarked by Canterbury City Council for major development. It would turn the whole area into an isolated housing estate, most people commuting for work elsewhere. The lack of facilities risks widening inequalities as it would be not be attractive to people with the resources to live elsewhere.</p> <p>Given the lack of soundness of this plan, I doubt that it is legally compliant.</p> <p>This is not just nimbyism - we should be planning something that we ourselves could well imagine being keen to move into. I really doubt many DDC planners or councillors or plan inspectors would wish to move into the new estates in the proposed locations and with the lack of facilities that this plan envisages. From the heart - do you really think that this is what you want to do? Create a big housing estate of poorer people? Almost an East Kent ghetto? Large housing estates carefully and optimistically planned and built elsewhere have gone quite wrong for similar reasons - poverty and isolation.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I cannot see how the current plans can go ahead. There needs to be a rethink, ideally abandoning plans to turn this area predominantly into a large housing estate.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Dear Planners and Politicians, I am writing to express my dismay at the plans to develop the area around Nonington, Aylesham and Adisham.</p> <p>1) This is a rural area where there are natural habitats which need to be preserved for wildlife and human regeneration. We need to preserve areas of trees and open spaces. People living here do not want an urban environment imposed on them. We should be preserving such areas for ecological reasons and farmland should be kept for food production. What has happened in Ukraine has brought home to us the problems of reliance on outside sources.</p> <p>2) The infrastructure is not adequate for the present population. We are already being told to limit our use of water. There are not enough schools, hospitals or schools for our needs. The sewage systems would not cope.</p> <p>3) The roads are already overcrowded, causing air pollution and the roads are not properly maintained. Many are country lanes hardly fit for present traffic flow.</p> <p>4) Public transport for our village of Nonington is practically non-existent. Even more cars would be needed.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<ul style="list-style-type: none"> • The construction of 35 new dwellings on land to the east of the Prima windows site would impinge on green land already identified as valuable rural pasture. In addition to the much larger developments proposed for Aylesham, Elvington, Eythorne and Eastry would contribute a very high volume of new traffic, both private vehicles and delivery transport - not to mention construction traffic to the narrow lanes through the village that are already used as a "rat-run" by surrounding settlements, with Mill Lane being particularly badly affected. Furthermore, the proposed new houses being taller than those in Mill Lane would cause exiting properties to be overlooked with the resultant loss of privacy and reduced quality of life. • In addition, there are many concerns locally about possible existing contamination to the industrial portion of the site and, • The inability of existing sewage/ drainage to cope with the greatly increased volume. • The unsuitability of the single access to the site situated as it is on a narrow but already busy road and close to a blind bend.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	There is no local requirement for additional housing in Nonington, the proposal should be refused.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Para 7.548 of the Sustainability Appraisal or Reg 19 states that for SAP52 (NON006) the effects identified throughout this chapter are likely to be particularly acutely felt given the size of potential development relative to the area. <i>This is very true and para 3.72 of this document says that developments will only be permitted at a scale that is appropriate to the size of the settlement and the range of services and community facilities that serve it. Yet here it is.</i></p> <p>To quote the table on page 53 of the SA document states, with my comments in italics</p> <p>"Nonington is identified in the small villages and hamlets category in the settlement hierarchy where windfall infill development would be acceptable in principle. <i>This land is clearly not windfall infill development as it is right on the edge of the village - this principle should not apply</i></p> <p>On this basis it was considered that it was only appropriate to continue with the existing undeveloped Land Allocations Local Plan allocation (NON006), and that to allocate further sites would not be sustainable in this location. NON004 and NON009 were therefore discounted. <i>There is no evidence to support this consideration to continue. As it is not infill there is no basis either. What is the link with further hypothetical sites on this location? Does that mean NON006 continued because the others were discontinued? NON006 needs to be considered on its own merits.</i></p>

This site should never have been allocated in 2005 for housing. It was allocated as brownfield, 60% of the land is paddock, previously orchard. No-one, including members of the Parish Council knew that it had been allocated or that there was even a Land Allocation Plan when development was mooted 6 yrs ago. Please see the section at the end for a summary of the Parish Council Minutes. The consultation for the 2005 plan did not work - this goes against the fundamental principles of planning and DDC's Core Strategy and current Statement of Community Involvement. A recent planning application has generated a huge number of objections. Were people to have been aware of plans to allocate this land in 2005 then DDC would have received very many objections and we would have all known about it. I think this makes the point that this land should be removed from the plan on the basis that the original allocation's consultation did not work. Inclusion in subsequent plans has occurred because there is a presumption to continue what was decided before, assuming that prior decisions were sound - "only appropriate" to use the words on page 53, only this time it wasn't appropriate.

Furthermore, I own part of the land allocated in the revised NON006r, a substantial strip across the whole SE boundary. The revision was to remove College Cottage as it was land unavailable for development. NON006r as it stands is not available for development as I own part of it. This is a second basis for removing this land from the plan.

A number of key considerations have been identified in relation to the proposed site allocation here and these will need to be addressed by the land owner as part of the planning process.

Furthermore, there is considered to be sufficient scope to avoid or significantly mitigate the significant adverse effects identified through the SA on the site here. *The SA has not fully identified the heritage aspects associated with this site. In particular heritage aspects to do with a historic wall and that the site includes part of a conservation area and affects the setting of several listed buildings which border the site. This is a third reason to remove this land from the plan.*

Please note that part of the land, the actual Prima site, brownfield, about 40%, is suitable for development - with a few exceptions, this is widely acknowledged. We have held community meetings in my house and discussed this in Parish Council Meetings so I have a good feel for local opinion.

Noningto Parish Council Minutes - evidence for consultation not working

5th July 2017

Prima Windows site had been advertised as a possible site for housing development. Several residents voiced their concerns particularly with regard to a possible conflict with an old wall which may have a preservation order on it. The PC advised that there was little they could do until an actual planning application was made. Parishioner Peter Hobbs may well have knowledge that would be useful.

6th Sept 2017

Following on from the Mill Lane residents attendance at the July meeting a further 3 residents brought up the issue of the Local Development Plan which showed the Prima site and orchard attached to be suitable for housing. The residents were concerned they had not been consulted. Cllr Manion pointed out that the LDP had been on the plan for a number of years and **a lengthy discussion ensued as to what was deemed 'consultation'**. It was agreed that the minutes should show the opposition to the LDP by some Mill Lane residents.

1st Nov 2017

The Prima site, according to the RPC website was now under offer and an outline plan of what 35 houses would look like was also there. The plan also showed College Cottage as demolished with 5 more houses on that plot.

April Newing, Senior Planner, at Dover District Council had emailed the Clerk stating that a review of all land identified in the Local Development Plan as suitable for development would be undertaken in 2018. However, any planning applications that were made before the review would be dealt with through the usual planning process.

The residents of Mill Lane are forming a group to fight any planning application **and also to highlight the perceived lack of consultation over the site when it was first identified over 15 years ago. The PC did not have any records of the site being included in the LDP or records of any consultation. A resident of Mill Lane argued that this was against democratic principles.**

It was stated that there was no need for affordable housing on the site as there were over 400 being built in Aylesham and more in Whitfield and also there were also no shops or school in the village.

Some did not object to suitable houses being built on the actual Prima site but on the piece of land adjoining to the south.

The status of College Cottage was discussed as to whether it was a listed building.

There were 17 parishioners present at the meeting who thought they would be affected by the planning application.

The PC said that they would need to take into account the views of all parishioners should any application for planning be made.

ACTION ITEM

Write to DDC regarding lack of consultation and highlighting the views of residents to this issue and enquire as to the status of College Cottage

6th Dec 2017

DDC had written to the local MP, Cllr Keen and the Clerk but the response was disappointing in that it gave no details of consultation and stated that any future planning application would go through the normal planning process. Further requests for information would be made.

Cllr Tee read some notes from Ash PC regarding DDC policy on housebuilding and it was stated that DDC had to build at least 510 houses per year for the next ten years. Cllr Tee gave a list of many sites in the Dover area earmarked for possible future housing, including green field sites.

College Cottage was not a listed building.

If a planning application was received then an extraordinary meeting would be called to discuss.

Some residents of Mill Lane backing onto the site had historical access onto the site to burn rubbish etc.

It was decided that producing a Neighbourhood Plan would be considered at an extraordinary meeting on a Saturday morning in February. A flyer would be delivered to all village residents to explain what was proposed and the date of the meeting.

Typical local Neighbourhood Plans can be found using this link:

<https://www.dover.gov.uk/Planning/Planning-Policy-and-Regeneration/Neighbourhood-Planning/Home.aspx>

ACTION ITEMS

Write to DDC again asking for more specific details on consultation

Produce a flyer for discussion and agreement

3rd Jan 2018

DDC had not been in contact since the last meeting.

Cllr Manion said that a Neighbourhood Plan was a lengthy process that would take several years to complete and would require 51% of the residents to agree to it. He also stated that Prima was a brownfield site and was therefore a typical site for development as part of Government policy. The paddock attached to it may be a better option for any objections to development.

Cllr Plumtre had produced a flyer to be distributed to all residents to get their opinions. There was a discussion about the actual wording and a revised flyer was being considered. Once agreed it would be distributed and a special meeting for all parishioners would be called one Saturday in February.

A parishioner stated that College Cottage was 'Under Offer'.

Cllr Plumtre said she would meet with Mill Lane residents to see the site for herself.

ACTION ITEMS

Produce a flyer for discussion and agreement Meet with Mill Lane residents

7th Feb 2018

The PC had now received a communication from Clagues, architects, regarding a planning proposal. They will be holding a public meeting on 22nd February from 3pm to 7pm at the village hall. The PC will try to meet the planners prior to this date. The PC will also deliver flyers about the meeting throughout the village.

7th March 2018

	<p>The open village meeting had taken place and about 100 people attended. Feedback was now being reviewed by Clagues, the architects, and a planning application was expected in April.</p> <p>Comments made by residents would be available online and a summary put into the village magazine.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Regarding this site - remove it from the plan.</p> <p>To include it is obviously not sound.</p> <p>It is also not legally compliant in that there is good evidence that the consultation in 2005 did not happen. Dover District Council has a duty to ensure that consultation is effective and cannot pass off that duty to another body.</p> <p>The Duty to Cooperate was also not fulfilled as there clearly was no effective liaison with Nonington Parish Council which has not memory or record of having been consulted - see attached document which includes some minutes.</p> <p>These errors have resulted in the site remaining in the plan, largely through presumption that what was done can stand unless there is a clear objection from a statutory body.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I wish to participate as I believe that there has been a miscarriage of justice involving consultation. The reasons should be clear from the arguments and evidence already included.</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	<p>SAP52 - Prima Windows, Nonington (NON006)</p>
<p>2 - Do you consider this part of the Plan sound?</p>	<p>Yes</p>
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>Yes</p>

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Yes</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Additional information is requested by DDC regarding availability and deliverability of the site - accordingly the following supporting material is detailed below</p> <p>SAP52 - Prima Windows, Nonington (NON006)</p> <p>A detailed planning application for the development of the site for 29 houses was submitted to the district council in October 2021. The application has been made by Roma Homes, who have an agreement with landowner to develop the site once planning permission has been obtained .</p> <p>The application, reference no. 21/01615, has been subject to public consultation and negotiation with the council's Planning Officers, and has proceeded to a point where agreement with officers has been reached that the scheme proposes an acceptable form of development in all respects and the application is now awaiting a report being made to the Planning Committee with a recommendation for approval. The case officer indicated in September that they would be looking towards reporting the application to the Planning Committee meeting in December 2022 or January 2023, at time of writing it is anticipated that the application would likely be reported to the January meeting.</p> <p>Once a resolution to grant planning permission has been obtained from the committee, the S106 agreement required in connection with the provision of affordable housing and development obligations, will need to be completed with the council, to allow the planning permission to be formally issued.</p> <p>The applicant's intention is to have commenced construction on site within 6 months of the planning permission being issued. This six month time frame will allow for the technical construction drawings to be produced and for any pre-commencement conditions to be discharged. It is anticipated that construction of the development will then take place over the following 22 month period.</p> <p>The application provides details of the proposed technical solutions for the development of the site. The development is not reliant on any off-site infrastructure improvements to allow it to come forward. The site itself has no ownership or infrastructure constraints or extraordinary development costs, the site is considered by the applicant to be viable to develop. For these reasons there are no known legal or technical reason to stop the site being brought forward in accordance with the timescale outlined above once planning permission has been granted.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>No changes required</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I write in support of the Parish Council's response, and summarise briefly the key points below.</p> <p>1. Validity and accuracy of the Local plan – the Parish Council identifies a number of worrying inaccuracies and inconsistencies (for example, Eythorne does NOT have a railway station), and is particularly critical, in considerable detail, about the UNSOUND Dover Council traffic impact surveys and studies. After extensive and careful analysis of the data, these appear to underestimate to a considerable extent, the real levels of the increased traffic flows in this rural area, resulting from the Plan. This is particularly significant as cumulative traffic impact is a key feature which should limit, to a far greater extent than the Plan indicates, the extent of house building in these rural areas.</p> <p>2. Cumulative impact - although there are only 35 houses to be built in this parish, this village is already suffering more and more from significantly increased traffic flows through the village because of the new developments which have already taken place at Sandwich and Aylesham, and the further Local Plan increases in housing provision both in these areas and other local villages such as Eythorne. To this, should be added the 3000 plus houses scheduled in the just published Canterbury Local Plan at Adisham, right next door to Aylesham. Because all these developments occur sporadically, insufficient attention is paid to the cumulative impact of them. The PC has faced considerable difficulties in getting any mitigation from these developments, which take place a bit at a time, and Nonington does not appear to qualify for any section 106 funding to reduce this adverse incrementally cumulative effect on traffic flows through the village.</p> <p>3. Duty to co-operate – in relation to the Canterbury local plan there appears to have been little or no dialogue, let alone co-operation, between the 2 councils about the cumulative impact of both their local plan house building proposals in this rural area. Moreover, while Canterbury City Council states that the traffic impacts of their proposed Aylesham/Adisham development will be limited by a new bypass, the Council has not provided evidence about the impact of this on the nearby rural roads in the Dover District area. There is an almost total absence of joined up working across the boundaries of the two Council Districts.</p>

	<p>4. Sustainability – given the totally inadequate level of local public transport (thus increasing car dependency), cycle tracks, pedestrian footways, plus the inadequate road infrastructure, loss of farming land, these greenfield developments (76% of all proposed housing is on greenfield sites) do not amount to ‘sustainable development’ as defined in the NPPF</p> <p>5. In conclusion, I quote directly from the Parish Council report’s succinct concluding statement:</p> <p>‘ The additional scale of Canterbury’s proposed development and proximity to Aylesham and the District’s boundary, means that DDC’s Reg 19 plans is not positively prepared as it is not informed by agreements with other authorities or consistent with achieving sustainable development.</p> <p>- It is not justified as it is clearly not based on proportionate traffic or sustainability evidence.</p> <p>- We would argue that this also compromises plan efficacy given the absence of effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Given all the problems identified above, I would argue that the proportions of housebuilding in the greenfield and brownfield sites should be reversed, and that only a small proportion of houses should be built in rural villages such as Nonington – until or unless all these sustainability issues can be resolved. In practice, they cannot because Dover Council has no control over Kent County or national Government spending (basically cutbacks) on highway infrastructure, public transport and other essential rural needs, and has no cash of its own to spend on them. Moreover, Developer contributions will be insufficient for alleviating these problems as well.</p> <p>Given that much of this development will probably be approved anyway, it is essential, that resources are allocated for more public trans[port provision, and traffic calming and speed restriction measures in Nonington – accidents have already happened on this road, and local pedestrian and cyclist safety in the village is already severely compromised. The PC has campaigned for years for these, but, despite accidents, KCC Highways refuse to do anything. And, please, resite the speed limit sign at the new cottages opposite Snowdown Colliery which needs to be placed BEFORE these houses, not mid-way along</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	SAP52
<p>2 - Do you consider this part of the Plan sound?</p>	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We have overlaid Turtle Dove territory data with the proposed sites in the Dover Draft Local Plan (using data from the 2021 National Turtle Dove survey and supporting data from BTO BirdTrack), to see if any developments pose a risk to known Turtle Dove territories.</p> <p>Two proposed sites for development contain recent records of Turtle Dove territories within a 1km area; SAP28 - Land between Eythorne and Elvington and Elvington and SAP52 - Prima Windows, Nonington. While we welcome the consideration of protecting trees and hedgerows within the site, further consideration needs to be provided for Turtle Doves, see below mitigation guidance.</p> <p>Turtle Dove Mitigation Guidance</p> <ol style="list-style-type: none"> 1. Detailed proposals should aim to protect areas of scrub and mature hedgerows suitable for nesting habitat. If destroyed, this habitat can take up to 20 years to establish and become suitable for nesting. 2. Detailed proposals should aim to ensure foraging habitat is available and managed correctly (food shortage is the main factor triggering its decline on their breeding grounds). Alongside this, fresh water sources should be retained and managed sympathetically. 3. Where known breeding birds occur, detailed proposals should feature; nesting habitat, foraging areas and a freshwater source within 350 metres. Studies have shown that recently fledged turtle doves will rarely venture more 350 metres from the nest site (Dunn et al. 2016) and at this stage are likely to: <ul style="list-style-type: none"> I. be very vulnerable to predation. With increased human habitation it is possible there may be adverse effects from generalist predators (e.g. cats) that tend to congregate near to human habitat. (Dunn et al. 2016) and II. incur poor body condition if there is insufficient food nearby in the form of natural arable plant species (as opposed to anthropogenic food resources such as garden bird seed mixes and brassicas) (Dunn et al. 2018). As well as maintaining what habitat is already present for Turtle Doves within the Dover TDFZs, we recommend looking at opportunities to further expand/create areas of suitable habitat to ensure the long-term preservation and prosperity of this species within the Dover district. Further information can be found; www.operationturtledove.org ('helping your turtle doves'). The RSPB can assist with this advice on a case-by-case basis. <p><i>(DDC note - this is an extract from full RSPB representation reference SDLP1435)</i></p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>1.0 INTRODUCTION</p> <ul style="list-style-type: none"> • These representations have been prepared by Esquire Developments Ltd, a multi-award-winning SME developer based in Longfield, Kent. • Esquire Development has a number of land interests in Dover, including <ol style="list-style-type: none"> 1 New Townsends Farm, St Margaret's (Appendix 01); 2 Appleton Farm, East Langdon (Appendix 02) and 3 Ringwould Nurseries, Ringwould (Appendix 03) • New Townsend Farm is identified as an emerging allocation identified as SAP40 (STM006) in the Regulation 19 Local Plan. Appleton Farm and Ring would Nurseries are not identified as emerging allocations but put forward as suitable alternative sites. • As a local SME Housebuilder, the development of these sites brings forward the opportunity to help diversify the housing market and offer a wide choice of housing from different developers.

2.0 RESPONSE TO THE REGULATION 19 PLAN

A. New Townsend Farm, St Margaret's-at-Cliffe

- St Margaret's-at-Cliffe is recognised in the Regulation 19 Local Plan as a Local Centre along with Eythorne and Elvington, Eastry, Kingsdown, Shepherdswell, Wingham and Ash. These Local Centres are noted to be the largest of the district's rural settlements. The Local Centres are characterised by the range of services and facilities that they offer, serving the needs of their own residents and those of adjoining small villages and hamlets. We support the recognition within the plan that in order to help sustain and strengthen the role of these local centres, additional housing is considered appropriate. A total of 96 dwellings are allocated within the Regulation 19 Local Plan in St Margaret's-at-Cliffe.
- New Townsend Farm has been identified as an allocated site for 10 dwellings under SAP40 which allocates all small sites in St Margaret's-at-Cliffe. We support the identification of the site for development, and we consider this site to be deliverable in the lifetime of the plan.
- SAP40 includes two sites within St Margaret's-at-Cliffe Land at New Townsend Farm (referred to as STM006) and Land located between Salisbury Road and The Drove Way (referred to as STM010). These are shown on the map at Figure 4.12 and are both referred to as SAP40. As a point of transparency, it would be beneficial to separately identify these allocations on the accompanying Plan in order to prevent any confusion.
- We consider that this area has the potential to deliver more dwellings than the allocated number of 10 dwellings as part of a more comprehensive form of development which would, overall, deliver a much enhanced scheme of approximately 20 dwellings alongside significant areas of open spaces offering net biodiversity gain and maintaining views and perceived areas of separation.
- The proposed development would be in keeping with the surrounding pattern of development, reflecting an extension of built form in an eastward direction away from Station Road/High Street in a linear character (see Nelson Park Road, Hardy Road, St Vincent Road and Kingsdown Road for example in **Appendix 04**)
- **Appendix 01** demonstrates how this could come forward and facilitates the ability to deliver this allocation which has a covenant constraint that whilst is not a showstopper, would benefit from an increased capacity of dwellings.
- St Margaret's-at-Cliffe is recognised within SP4 Residential Windfall Development as an area where residential development or infilling will be permitted within or immediately adjoining the settlement boundaries. We consider that the wording of this policy is too restrictive (see SME Network Representations for full position) where it seeks to limit development unless within or immediately adjoining the

settlement boundaries. We consider that the wording of this policy should be amended to reflect a more flexible approach. We would suggest that wording used by Ashford Borough Council in Policy HOU5 from the Ashford Local Plan 2030 adopted February 2019. A copy of this policy wording is provided at **Appendix 05**.

B. Appleton Farm, East Langdon

- East Langdon is recognised in the Regulation 19 Plan as a Larger Village and allocates Land adjacent Langdon Court Bungalow for 40 dwellings (LAN003). We consider that this site has a number of legal constraints that cannot be overcome and is therefore undeliverable. We suggest an alternative site should be proposed for allocation in Appleton Farm, East Langdon.
- East Langdon is categorised as a Larger Village within the Plan and distinguishes between the two distinct parts, the southern part and the northern part.
- East Langdon is recognised within SP4 Residential Windfall Development as an area where residential development or infilling will be permitted within or immediately adjoining the settlement boundaries.
- Paragraph 79 of the NPPF sets out that in order to promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities. It puts emphasis on the opportunities to grow where this will support local services. The key section of this paragraph is that where there are groups of smaller settlements, development in one village may support services in a village nearby. This is the case for East Langdon and Martin Mills, whereby services are interdependent on each other (by way of example the primary school is located in East Langdon, but the Railway Station is located in Martin Mills).
- We consider the allocated site in East Langdon, Land adjacent Langdon Court Bungalow (LAN003) to be undeliverable in the lifetime of the plan due to a number of restrictive covenants upon the land. The land is subject to restrictions which prevent the erection of any dwellinghouse or other buildings without consent from other parties. This is noted as a land charge and a copy can be found at **Appendix 06**. Our reading of the title indicates the following issues:
 - No sale is permitted until 30 September 2045 without consent of The Church Commissioners for England
 - Transfer dated 22 April 1970 contains Restrictive Covenants on over 5 parcels within the land to benefit and protect the part of the Langdon Court Farm House and farmlands adjoining the proposed land jointly and severally covenant with the personal representatives that they and their successors in title will not at any time erect or suffer to be erected any dwellinghouse or other buildings whatsoever upon the designated land without the written consent of the Personal Representatives.
- These restrictions are sufficient for a developer to not be able to purchase and develop the site.
- Accordingly, alternative sites should be found in East Langdon that are available, suitable and deliverable. Appleton Farm is such a site.
- Appleton Farm represents a parcel of land that is in total approximately 18.5 hectares. It extends from Holland Hill to the north to White Hill to the South. Whilst this is an extensive area, the site has the potential to deliver a modest scale of development of circa 30-35 dwellings on approximately 3.5ha that would offer a suitable alternative to the identified site – See **Appendix 02**.

- The proposal represent a reasonable alternative to the identified site and in a location that is recognised as being sustainable. Indeed, East Langdon and Martin Mills offer one of the few locations in the District outside of the main urban areas offering a railway connection and therefore a greater scale of development could be considered.

C. Ringwould Nurseries, Ringwould

- Ringwould is identified as a Smaller Village and Hamlet within the Plan. It is noted that although there is a limited range of services and facilities available, it is served by a regular bus service and there is a Church within Ringwould. It has close connections to the services and facilities in Kingsdown. Ringwould is located on the A258, the main road connecting Dover and Deal. We support the recognition that in order to help sustain and strengthen the role of smaller villages and hamlets, additional housing is considered appropriate. There is one emerging allocation within Ringwould for 10 units (Land at Ringwould, Alpines, Dover Road).
- Ringwould is identified in Policy SP4 Residential Windfall Development as a settlement appropriate for minor residential development or infilling of a scale that is commensurate with that of the existing settlement.
- The Nursery site is located to the west of Ringwould, with a long frontage to the A258. It comprises approximately 9.2ha and is considered suitable to deliver a wide mix of uses, including residential, retail, care and affordable homes and/or potentially education. Appendix 03 demonstrates how a care/retirement facility could be delivered.
- The mix of uses would help improve the services and facilities available to the existing community of Ringwould, as well as serve a wider catchment. The proposals would inherently improve the sustainability credentials of Ringwould as well as delving a mix of uses which are most in need, including care, affordable homes and potentially education.
- Consideration should be given by the Council as to the opportunity the site presents - including working with the Council's own Housing department to deliver locally required housing needs in partnership with the Council itself.

Please see attached full representations including appedices

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see above and attached representations in full

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I oppose what I believe to be the unsound selection of SAP53(incorporating RIN002 & RIN004) chiefly as it conflicts with DDC Policy SP3 and SP4. I would also take issue regarding the inclusion of RIN002 as its selection appears to conflict with stated objectives of the District Plan itself.</p> <p>SP3 states:</p> <p>"Minor residential development or infilling of a scale that is commensurate with that of the existing settlement will be permitted within the settlement boundaries, as shown on the Proposals Map, of the following settlements:</p> <p>Ashley, Barnsole, Betteshanger, Chillenden, Coldred, Denton, East Studdal, Elmstone, Finglesham, Martin, Martin Mill, Nonington, Ringwoud, Staple, Stourmouth, Sutton, Tilmanstone, West Hougham, West Langdon, Wingham Green, Woodnesborough and Wootton."</p> <p>However, Strategic Policy 3 also makes it clear that, with regard to residential windfall developments:</p> <p>"They tend to be small in scale and can offer a significant contribution to the supply of homes using previously developed land and vacant areas within settlement boundaries."</p> <p>In the document:</p> <p>The Selection of Site Allocations for the Regulation 19 Submission Local Plan September 2022.</p>

On P57. RIN004 is shown as selected for the following reasons:

“Ringwoud is identified in the small villages and hamlets category in the settlement hierarchy where windfall infill development would be acceptable in principle.

To allocate all the sites identified as suitable in Ringwoud would be in conflict with the position of the settlement in the settlement hierarchy and would not lead to sustainable development.

It was therefore considered that RIN004 was the least constrained of the sites and the best related to the settlement, compared to RIN002 and RIN003. These sites were therefore discounted.

A number of key considerations have been identified in relation to the proposed site allocation here and these will need to be addressed by the land owner as part of the planning process.

Furthermore, there is considered to be sufficient scope to avoid or significantly mitigate the significant adverse effects identified through the SA on the site here.”

However, as this site clearly lies outside the Ringwoud settlement boundary, any suggestion that “windfall infill development would be acceptable in principle” is incorrect as windfall infill development must be within the settlement boundary.

The reason for selection of RIN004 incorporates the reason why RIN002 and RIN003 were discounted, and therefore included in the ‘list of discounted sites’ on P68.

It is therefore unclear why RIN002 has been resurrected for inclusion, with RIN004, in SAP53?

The landowners have, for obvious financial reasons, suggested in their comments of support that RIN004 and RIN002 are both brownfield/pdl sites, despite DDC identifying them as greenfield. The landowners have also incorrectly suggested that failure to include RIN002 would render it ‘landlocked’, a statement which is also incorrect since any development of RIN004 could easily include access

I submit SAP53 is neither previously developed land nor within the settlement boundary and therefore, by definition, cannot be considered a ‘windfall development’.

I submit it is clear from this statement that SAP53, which is outside the Ringwoud settlement boundary, should not be considered as suitable for housing development.

The ‘Evidence Base’ is incomplete with regard to Landscape Sensitivity and Character Assessments.

33 sites were selected in the district, some being within AONB and some without. The former Ringwoud Alpines site, SAP53, was not included in the sites selected for assessment for reasons unknown. The selection criteria for those sites which were assessed has not been made known either.

In the case of SAP53, DDC have relied on a ‘specialist assessment’ by the Kent Downs, AONB Unit

“who agreed with the DDC Officer assessment that impacts on the landscape and AONB from the development of these two sites could be suitably mitigated with a sensitive landscaping scheme to the south and by the retention of the existing hedgerow to the eastern boundary.”

However, in all probability the AONB Units assessment would have been desk based and only addresses issues relating to daytime views from within the AONB.

	<p>There has been no comment relating to the northern boundary 'street view' of the site, as viewed from the A258, which has specifically been a bone of contention for previous DDC Planning Officers, creating serious issues with regard to providing appropriate levels of access to any proposed development. (E.g. Ref DDC Planning 16/00626). This relates to the existing, long established, dense hedging along the roadside boundary to the site, within the AONB, which is currently accessed via a wooden gate and single vehicle track. In the event of a housing development, this hedgerow screening would need to be, at least partially but substantially removed to accommodate a suitable road access. It should also be noted that current activities within the front (RIN004) part of the site are not visible above the hedge line, whereas 2 storey houses would be.</p> <p>I have appended a current image of the northern boundary street view to emphasise my comment.</p> <p>Issues relating to inevitable sound and light pollution within the AONB appear to have been completely ignored. The impact on existing neighbouring residents would be significant as the SAP53 site is currently a 'dark skies' area which also currently benefits from peace and solitude.</p> <p>Indeed, the impact upon neighbouring residents was one of the 2 reasons upon which the Planning Inspectorates' decision was based to dismiss the appeal with regard to the current landowners previous planning application for this site (DDC16/00626).</p> <p>I believe it is important to mention that in recent times the landowner has failed to responsibly steward the land, particularly with regard to RIN002 as a result of which it has become seriously degraded and is currently the subject of DDC Planning Enforcement action.</p> <p>I have appended 2 further images, the first showing the condition of the land adjacent to my property and the second, as it appears today.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>In accordance with my comments, I ask that SAP53(RIN004 & RIN002) be removed from the Local Plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP53
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I oppose the Unsound Selection of SAP53(RIN002/RIN004) as being Non-compliant with the NPPF Sustainability and Proportionate Evidence requirements and with DDC Policies SP3 and/or SP4</p> <p>Site History.</p> <p>I consider the Site History to be a material fact for consideration.</p> <p>Ringwould Alpines Plant Centre was a privately owned aprox.2.3 ha Horticultural Nursery situated in the Kent North Downs AONB with a vehicular access onto the A258 Dover road. The nursery activity serving commercial, corporate and public customers was centred around 10 Polytunnels on what is now referred to as RIN002 and 2 Polytunnels on RIN004. RIN004 housed a timber potting shed ,several raised timber beds for display of shrubs and bedding plants and a block built toilet/store room. There was also a small gravelled parking area adjacent to the Entrance on the A258 Dover Road. There was no external lighting so public access was limited to daylight hours and the site was closed to the Public throughout the Winter.</p> <p>The Plant Centre holding includes that section of Footpath ER14 which forms the boundary with my property, (DDC note: redacted), and a small strip of woodland the other side of Footpath ER14 lying between Landway and Popples Field.</p> <p>The whole site was purchased by the current owners Kingsdown Water in 2016/17 while they were seeking a Change of Use Planning Permission for the erection of a bottling plant with supporting infrastructure on the parts of the site now identified as RIN002 and RIN004.</p> <p>This PP Application was refused on Appeal and the site remains a Greenfield Agricultural site for Planning Purposes.</p> <p>Kingsdown Water have no Agricultural/Horticultural Interest in the site and have not put the site on the open market as a horticultural holding.</p> <p>The RIN002 and RIN004 parts of the site have been leased and apparently sub-leased to a succession of non Agricultural tenants carrying out a variety of non Agricultural Activities none of which have had the benefit of Planning Permission. The remainder of the site has been left unattended to and is becoming overgrown and untidy, including Footpath ER14.</p> <p>This has resulted in complaints from local residents and the site is now the subject of Enforcement Action which has yet to be resolved.</p> <p>Planning Contravention Notices completed by the owner and tenant(s) have revealed that various small businesses have been renting the land for builder's yard type purposes and that the mobile home on the site is for the night watchman.</p>

The activities on the site have resulted in considerable degradation and contamination of the land which would require considerable restitution measures to return it to its original state. See attached photos

In the first HELAA three parts of Ringwould Alpines identified as RIN002, RIN004 and RIN006 were put forward by Ringwould Alpines's Agent for inclusion as development sites in this Dover Local Plan.

In that HELAA RIN002 was put forward as a 1.19ha PDL site development site for 30 houses but this was considered to be unsuitable for development, RIN004 as a 0.22ha PDL site for 5 houses but was considered to be suitable RIN006 as a 0.7ha Greenfield site was considered to be unsuitable for development.

Only RIN004 was taken forward as a Reg 18 Consultation Proposal but RIN002 was added to RIN004 to form SAP53 in the Sect19 Consultation Proposal

RIN002 and RIN004 are now described in the HELAA2022 as being greenfield after representations were made about its earlier incorrect HELAA description as PDL.

Two remaining parts of Ringwould Alpines also owned by Kingsdown Water but not put forward for inclusion in the Local Plan proposals are a section of the Public Footpath ER14 running from Dover Road to Popples Field between Ringwould Alpines and my property (**DDC note: redacted**), and a small approx 0.1ha strip of woodland located on the other side of the footpath between Landway and grazing land known as Popples Field.

The only vehicular access to these parcels of land is through the rest of the Ringwould Alpines holding so these parcels of land will be landlocked unless vehicular access provisions are made over RIN002 and RIN004.

My property, (**DDC note: redacted**), is a 1.6ha Residential/Equine property the other side of the footpath which forms my boundary with Ringwould Alpines.

My reasons for opposing the selection of SAP53 follow below.

Unsound Site Selection

I consider the Site Selection of SAP53(RIN002/RIN004) to be **unsound** for the following reasons:

1. Non-compliant being not positively prepared as per the NPPF sustainable development and proportionate evidence requirements and non-compliant with either of DDC policies SP3 and P4.

The Settlement Hierarchy was reviewed to ensure that all Local plan development sites proposals were **sustainable**.

In the Settlement Hierarchy Ringwould is one of the small villages where only development **inside** the Village Settlement Boundary could be accepted but SAP53 is **outside** the Ringwould Settlement Boundary. See attached Ringwould Settlement Boundary Map

In SP3 and SP4 the overarching Sustainable Site Allocation Selection criteria is that " The distribution of housing and economic growth in the District will therefore primarily be based on the Settlement Hierarchy, and influenced by site availability, environmental constraints and factors of delivery"

I submit because SAP53 does not comply with the primary Settlement Hierarchy Selection criteria that this rendered the Influencing factors criteria on which the SP53 proposal appears to be based irrelevant.

I submit that ,because of non-compliance with the Sustainability Requirements of the NPPF and policies SP3 and SP4, the SAP53 proposal is **Unsustainable and Unsound**

1 Not justifiable as per the NPPF requirement for it to be based on proportionate evidence.

Inadequate Consideration of Representations made relating to RIN004 and RIN002 has resulted in unbalanced Council Responses and Reg19 Proposals because 21 respondents opposed the RIN004 proposal on issues also relevant to RIN002 and of these 6 directly referred also to RIN002 which was not a Reg 18 proposed site.

The scale of opposition to development of RIN002 is not reflected in the Council's summary of responses in respect of omitted sites because they were raised under the heading of the only Ringwould site proposed in the Reg18 proposal i.e. RIN004.

3 respondents supported the RIN004 proposal of whom 2 including the owner(s) of the site requested the addition of RIN002.

The Council's responses to all the proposed Sect 18 proposal representations is generic not site specific and are not set out alongside the individual Site Allocations proposals.

This " one size fits all" approach does not address site specific issues and results in generalised non-site specific Mitigation measures .

There were 21 opposing representations mainly from local residents and only 3 supporting representation of which 1 was factually incorrect from a local District Councillor claiming the existing site access was adequate for a large development on RIN002, RIN004 and RIN006 and the other was from the site owner, Messrs Bomer a.k.a. Kingsdown Water, seeking to have RIN002 added to RIN004 to maximise the potential housing capacity of his site asking for 41 dwellings and claiming incorrectly that the site was a brownfield site..

In the Reg 19 proposals. said to have taken into account all of the representations together with all other relevant factors, RIN002 has been added to RIN004 to form SAP53(RIN002/RIN004). It can only be concluded that the Council attach little value to the representations made by local residents but great importance to those from the site owner which does nothing to promote public confidence and participation in such Consultation exercises.

I consider the above constitutes **disproportionate** consideration being given to Reg 18 supporting comments resulting in the **unsustainable and unsound** SAP53(RIN002/RIN004) **Reg19 proposal** .

No new evidence emerged in the Regn 18 submissions to justify the addition of RIN002 to RIN004 at this final Reg19 stage of the Local Plan HELAA stage and the proposal itself contains no reason for the addition of RIN2 to SAP53.

Whatever evidence exists to justify the inclusion of RIN002 into the Local Plan at this final late stage must have existed and have been discounted right from the early HELAA stages.

Including RIN002 now at this last final stage of the Local Plan consultation stage makes submitting representations more difficult because of the discouraging, complicated and, to some residents, incomprehensible Reg19 Representation procedure format.

The site promoter now claims that selecting only RIN004 would landlock RIN002.

This potential landlocking issue has been apparent all the time and could be easily resolved..

What is different is that local residents have now discovered that, after being consulted at the Reg18 stage on RIN004 a 0.21 ha AONB site with a proposed indicative total of 5 houses and a capacity to accommodate 7 houses situated between 2 dwellings fronting onto the Dover Road, they are now faced with SAP53(RIN002/RIN004) a 1.41 ha AONB site with an indicative proposal for 10 houses but a capacity of 37 houses situated immediately between and behind several houses and intruding deep into the rest of the AONB on which they were not consulted.

Although there are common issues affecting both RIN002 and RIN004 the SAP53 proposal differs considerable in scale, character and impact on the AONB and neighbouring AONB properties than the earlier RIN004 proposal.

The site currently enjoys "dark skies" but the proposals would create a built up suburban street scene complete with power and telephone poles and wiring infrastructure together with street lighting where none exists which is inappropriate for the AONB setting.

The Site is in an area where >25% of the land is at least Grade 3 Agricultural Land.

The site would require construction of a new side turning serving the 10 new dwellings onto the busy A258 almost immediately opposite the existing Queens Rise side turning on the other side of this road causing increased risk of delays and accidents on this particular section of the A258.

RIN002 extends the SAP53 site further into the AONB making it visible from a popular Footpath ER14 see photos which is part of the Ringwold Alpines holding

and also from my property, **(DDC note: redacted)**,. RIN002 extends behind four Dover Road AONB properties and also has a boundary with my AONB property,**(DDC note: redacted)**,.

No account has been taken of the effects of RIN002 combined with RIN004 on these neighbouring properties.

Local residents who thought it was not necessary to make representations about RIN002 or those who made passing reference to RIN002 can now comment but to do so is rendered more difficult because of the **discouraging, complicated and, to some residents, incomprehensible Reg19 Consultation format** .

I submit the Council's RIN004 Reg 18 Consultation responses and the Reg 19 SAP53(RIN002/ RIN004) Representations format make this latest REG19 Proposal and Consultation **disproportionate, unsustainable and unsound and non-compliant with the Proportionate Evidence of the NPPF and Policies SP3 and SP4**..

3,The Evidence Base is Incomplete.

There are significant omissions in the Evidence Base covering the **Landscape Sensitivity Assessment (LSA) 2021 and Landscape Character Assessment (LCA) Sections** .

None of the Ringwoud Alpines AONB sites are included in either of these Sections of the Evidence Base.

DDC Landscape Character Assessment (LCA) does not include the AONB which is said to be covered by the North Kent Downs AONB Management Unit's own LCA 2020 but this LCA is being updated and has not yet been published on the AONB Unit's website..

The DDC commissioned Landscape Sensitivity Assessment(LSA) report does not include the Ringwoud Alpines AOB sites but because the selection criteria have not been published it has not been possible to identify why.

Many of the 33 Local Plan sites selected for a LSA are in neighbouring settlements and they include AONB and non AONB sites.

The Council claim that the AONB Management Unit were consulted and were satisfied with the proposed mitigation measures but this does not explain why RIN002 and RIN004 were not selected. .

These mitigation measures only address the Local Visual Impact (LVI) aspect of the Ringwoud Alpines sites whereas the LCA and LSA would have addressed not just the LVI impact but also a wide array of other factors affecting not just the AONB but also the wider surrounding landscape inside and outside the AONB.

Issues such as dark skies, ambient noise levels, built environment and the effect on the lives of neighbouring householders, properties etc.

I submit that, because the RIN002 and RIN004 evidence does not include an LCA or an LSA, the SAP53(RIN002/RIN004) element of the Evidence Base is incomplete and makes the SAP53 proposal unsound and non-compliant with with NPPF Sustainability and Proportionate Evidence Requirements and with DDC policies SP3 and SP4

4. The Ringwoud Alpines Plant Centre holding is currently the subject of Unresolved Planning Enforcement action.

This is in respect of non agricultural activities being carried out there without the benefit of Planning Permission. Various small businesses have been renting the land for builders yard type purposes and there is a mobile home on the site for a night watchman.

These activities have resulted in considerable degradation and contamination of the site. See attached photos.

The **Availability and Deliverability** of the Site would be affected by resolution of the Enforcement Action requiring a Planning Application and/or enforced reinstatement of the site to it's previous Agricultural/Horticultural state.

I understand the Enforcement Officer is seeking advice on this at the moment.

In these circumstances I submit that the RIN002 and RIN004 site should not have been included in the Dover Local Plan SAP53(RIN002/RIN004) proposal because all Local Plan sites should be **Available and Deliverable** and that this selection is **unsound because of reasonable doubt over the Site's Availability and Deliverability.**

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I ask that Reg19 Proposal SAP53(RIN004/RIN004) be removed in it's entirety.

The removal of SAP53 which is **unsound** because it does not comply with requirements of the NPPF nor with SP3 and SP4 will remove a proposal that is not **legally compliant and sound** from the Local Plan

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Now that RIN002 has been added to the Reg19 proposal I would like to express my dismay at its inclusion at this late stage. I, like many others, did not include RIN002 in my previous Reg18 submission and I wish to do so now.</p> <p>Any form of development on the Old Alpine Nursery Site, be it 5 – 10 or 40 houses, would necessitate a new widened road access with a wide splay of the type and width that serves Queens Rise which is almost directly opposite the nursery site.</p> <p>The proposed estate of two storey houses, with its accompanying pedestrian pavements, road signage, street lighting, fenced gardens, garden sheds, individual drives, parking for two cars, garages, parked vehicles, delivery vehicles and all the sounds that emanate from modern closely built properties - plus individual and street lighting, would be completely out of keeping with the ambience of the village and would also block views of the AONB. from the village.</p> <p>The width of the splay needed would displace the bus stop that serves that end of the village. At present the bus stop is positioned in the only safe place that is available and this safe place would no longer be available - meaning that the village would lose a vital amenity.</p> <p>The Nursery site itself is wholly within the AONB and is known to be greenfield, it has always been used for horticulture, no part of it has ever been previously developed. The owners/proposers insinuation that it has been previously developed and is therefore brown field is a deviation from the truth.</p>

DDCs wrongly declared status (PDL) of the site in its original SP18 documents did little to allay the confusion and uncertainty of the sites status and they failed to act quickly to correct the mistake, making the consultation unsound.

The proposed two storey houses would not only have a negative impact upon the village street scene but would be detrimental to the lives of all those living in close proximity. People who chose to live in the peace and beauty of an AONB would find themselves gazing at human activity and light pollution instead of stillness and Dark Skies - - and hearing the sounds of human habitation instead of the calls of owls and foxes.

The two storey houses would have an even greater impact on the wider AONB. – the view from the vantage point of the Freedown on the high North Downs would no longer be that of a sleepy village with a traditional church but dominated by the sight of two storey houses barely hidden behind a thin row of deciduous trees.

Viewed from this position it is obvious that no amount of mitigation could protect the AONB from the bustle of human habitat and of the inevitable noise pollution. Light pollution will be far reaching and all pervading.

I cannot understand why this clearly sensitive site was not subjected to a Landscape Sensitivity Assessment when other sites were. Was it a positive omission or just overlooked? Either way an important aspect of the sites assessment has not been completed, rendering the assessment unfinished and therefore unsound.

Again I cannot understand how the North Downs AONB Management could be satisfied with the proposed mitigation – did anyone from that organization stand atop of the downs and look down on the Nursery Site? If they had done so they would have realized the detrimental impact the sights, sounds and light pollution would have on the AONB – for an organization charged with it's protection – it appears to be a dereliction of duty. I suggest that this provides very strong grounds for refusal.

The public footpath ER14 (also owned by the Developers/Proposers) that runs parallel to the Old Nursery is at present screened from the Nursery by huge piles of earth, rubble, hardcore and dying vegetation. These mounds, once levelled, will reveal an open view of the proposed development of two storey houses. Soft screening is impractical as it will take many years to reach a meaningful height if indeed it is even viable in such impoverished compacted ground.

Has anyone assessed the impact on wildlife? The site was a known habitat for bats and reptiles and is a hunting ground for birds of prey (Owls, Sparrow Hawks, Kestrels, Buzzards etc.), **DDC Redacted** badger, although it is not clear if the present noisy earth moving activities have displaced these animals. I believe that the perpetrators are being investigated by DDC Planning Dept. who are expected to order that the land be returned to its previous state

The village is in a forty mile an hour zone and, within a relatively short space, there are several private drives onto the A258 as well as the much wider entrance splay to Queens Rise, each one of these brings it's own hazards and has the potential to slow/stop the flow of traffic.

The further addition of ten new dwellings, each possessing two/three cars will considerably increase the number of hold ups on the busy A258.

These hazards have been increased by a group of three new properties that all share the same entrance drive and which is directly opposite the Nursery entrance.

The larger estate of Queens Rise, with all of its comings and goings (and the scene of a 'sun-blinded' fatality) is opposite the proposed site and the two entrance splays are only slightly offset and both are close to the point where the road narrows, further increasing danger of serious accidents..

I also feel strongly that there is no good reason for houses to be built on this site. 5 – 10 or 40 family homes – built in a village with no shop and a poor bus service and are of no benefit many people. The DDC Local Plan Site Allocations proposals would meet the Govt's requirements without SAP53 and these houses are just an extra, an insurance if you like.

There is some concern within the village is that these houses will be very attractive to people seeking a second home 'in the country' especially in an AONB and are of little benefit to local people.

The Nursery Site has never been offered on the open market for agricultural use but sold directly to the present owners/proposers for development purposes, and in the interim, an assortment of lease holders have used it as they will. Within in the village there is some speculation as to whether a housing development would ever go ahead or would a reason be sought by the owners/ developers to revert to the original planning application for a Bottling Factory on this site.

DDC Planning Committee have already unanimously rejected an application by the owners/proposers for a Bottling factory on this site – which on appeal - was also rejected by the Planning Inspector who quoted many of the grounds that I have raised in this submission

However this site would benefit the whole of society if it were returned to much needed agricultural use, under the present circumstances it is clear that we need more agricultural land to enable us, as a country, to be more self sufficient.

Only three submissions have been in favour of developing the site, a joint one from the owners/proposers who have stated frequently that the site is brownfield, and another from a District Councillor who appears to think that there is already a suitable entrance when there is not.

Multiple Ringwold residents are known to have objected to this development but many more are confused by the complexity of making a submission, the procedure clearly favours the computer literate leaving others to struggle or give up, for this reason I feel that the consultation is unfair and confusing and unsafe.

The proposed development is outside the village settlement zone, in an AONB and now, declared by DDC. To be Greenfield in an AONB, should have been enough to have prevented its inclusion in the Plan. The decisions to put it forward are, to me, unclear and illogical giving the impression that for whatever reason this particular site has been singled out to allow guidelines to be bypassed.

To sum up –

- It is a Greenfield site in an AONB. And mitigation, i.e. screening, will not serve to prevent harming the AONB
- The new two storey high houses will be visible from the village – from the local footpath adjacent to the site and from further afield along the top of the North Downs and glimpsed at from various viewing points along The Lynch.
- The proposed development is greenfield and outside the village settlement and within an AONB so should have been rejected without question.
- The overall increased volume of traffic onto the 40 mph. busy A258 will interrupt/slow down the traffic flow causing unacceptable hazards to drivers and pedestrians alike.
- The proposed new estate will cause both sound and light pollution within the village and further afield in the wider AONB. In itself enough to reject the application.
- The ambience of the village will be destroyed for ever and the detrimental effect of a busy housing estate within the peaceful AONB. will be permanent.
- The new estate will impact heavily on the lives of those who live in close proximity to the site.
- The site's wildlife habitat will be gone forever and the negative impact on wild-life in the wider area will be contrary to the need to increase biodiversity.
- It is not clear if all the correct procedures have been rigorously followed, The site was not even selected for a Landscape Sensitivity Assessment. I for one have found the lack of reasoning behind this decision confusing and illogical and out of step with guidelines and decisions made for similar areas.
- Decisions made by North Downs AONB Management appear to be just a box ticking exercise without any details or substance. DDC's decision to include a Greenfield site in AONB and outside the Village settlement are incomprehensible, guidelines seem have been conveniently disregarded without due consideration of the obvious and permanent damage that would be inflicted on the village or the AONB. No clear reason has been given for overruling these guidelines.
- The proposed Nursery Site is not immediately ready for development as required. Changes have been made during the two years or so that the Heavy Earth Moving vehicles (some with caterpillar track) have been working on the site. I believe it is very probable that parts of the site is contaminated by crushed/buried unregulated building materials -see attached photos.. We have also witnessed, and frequently formally complained about the thick acrid black smoke, emanating.

Before any work could begin on this site proper screening for contamination should take place./

See attached photos.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I ask for SAP53(RIN002/RIN004) to be removed.

This will result the non-legally compliant and unsound SAP53 not being included in the Local plan

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP53 Ringwold Alpines (RIN002 RIN004)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	The site selection is unsound as it is not positively prepared as per the NPPF requirement to achieve sustainable development. The site is outside the village boundary, is greenfield and within the AONB. It is not justified as per NPPF as the site allocation has been changed since regulation 18 consultation and so this has skewed the responses. The scale of opposition to RIN002 is not reflected in the summary of responses

<p>possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>because they were raised under the heading of the only site proposed in regulation 18 ie RIN004. There has also been confusion throughout this process that the site is brownfield when in fact it is greenfield. There is no justification for the addition of RIN002 to RIN004 and this late stage of the consultation process. I submit that this renders the Reg 18 consultation and reg 19 proposals to mitigate issues to be based on disproportionate evidence and therefore unsound.</p> <p>The evidence base is incomplete. RIN002 and RIN004 have not been included as part of the LSA or LCA assessments which renders the evidence base incomplete and unsound.</p> <p>Residents consulted in Reg 18 on a 0.21 ha site with a capacity for 5 dwellings between the existing 2 dwellings that are part of the ribbon development fronting Dover rd. In Reg 19 they are now faced with a 1.41 ha site with a proposal for 10 houses intruding into the AONB on which they have not been previously consulted. This is not consistent with NE2 Landscape character and the Kent Downs; states in section 11.13 that DDC aims: <i>To ensure that all development coming forward over the plan period respects and reflects the character of the landscape in which it is located.</i> SP13 states that <i>the NPPF 2021 requires local plan policies to conserve and enhance the natural environment, to recognise the intrinsic character and beauty of the countryside and the wider benefits from natural capital and ecosystems.</i> It is unsound to include SAP53 in the LDP as it would detract from the beauty of the countryside particularly the adjacent AONB. The Kent Downs AONB management plan 2021-26 says <i>the Kent Downs AONB, perhaps more than any other of Britain's protected landscapes – AONBs, Heritage Coasts or National Parks, has experienced and is experiencing severe development pressure.</i> DEFRA evidence shows <i>'The Kent Downs AONB stands out as an area which has experienced major, but expected, change, showing a rate of urban growth of almost 10%.pa, with the urban area spreading by 14 ha over the decade.'</i> The AONB in Dover District has suffered development at a disproportionate rate which indicates that planning pressures on our district are unsustainable. This current proposal of Reg19 differs considerably in scale and the impact it would have on the AONB is unacceptable for a greenfield site. Due to its topography the site is also highly visible from the AONB. Any ribbon development along Dover Road would require heavy screening to ensure that it did not impact on the AONB.</p> <p>No consideration has been given to the legal right of neighbouring residents to enjoy their homes peacefully. The proposed development in Reg 19 would be considerably more intrusive than a ribbon development along Dover Rd.</p> <p>The site is currently the subject of unresolved planning enforcement action due to activities which have angered residents and resulted in considerable degradation of the site. The site should be cleared and returned to its original agricultural state.</p> <p>For all the above reasons I conclude that the inclusion of SAP53 in its current form is unsound.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The SAP53 site proposal should be limited to a ribbon development along the Dover Road commensurate with the scale of existing dwellings and should have sufficient screening to prevent the dwellings being seen from the AONB. Hedges and trees on site should be retained and full independent study of biodiversity carried out.</p> <p>The site should be cleared and renovated as per any planning enforcement action.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP53
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I consider the SAP53(RIN002/RIN004) Proposal to be Unsustainable and Unsound for the reasons set out as follows.</p> <p>Set out below are the reasons for my objections to the SAP53(RIN002/RIN004) proposal.</p> <p>My Reg18 submission, objecting to the proposed RIN0004 development of the Old Alpine Nursery site, did not cover RIN002. due to it's (in my opinion) unfair late entry.</p> <p>I now want the strength of my opposition to this addition to be made perfectly clear, the late inclusion by stealth, of five more houses, making it 10 houses in total, and the admission that it could lead to a further 30 or so more houses has caused concern and confusion.</p> <p>The impression given is that the Owners/Proposers have only just 'suddenly changed their minds about their intention' is a weak one, it is more probable that they have withheld their true intentions until the last minute. Misinformation springs to mind.</p> <p>Our local bus service is infrequent and householders choosing to live on the proposed site, will in the main, have to rely on their cars for most contacts outside Ringwoud. Clearly this would greatly increase the number of cars within the village and the effect would be to slow down/stop the already heavy flow of traffic through the village. This presents a valid reason for the proposed development to be dismissed.</p> <p>The proposed site is outside the village settlement, in a Greenfield site and within an AONB and in an area that has not been designated for development. These would have provided valid grounds for the dismissal of this application in the REG 18 proposals before it got this far.</p> <p>However there is more</p> <p>The Nursery site is located centrally on the A258 as it passes through the small village of Ringwoud This road is dangerous along it's entire length, there have been many accidents of varying severities including several fatalities, some within the village itself.</p> <p>The village, in spite of repeated requests from villagers to lower it, is a 40mph. zone.</p> <p>The proposed housing development will necessitate the building of a new splayed entrance/exit road that is wide enough to accommodate two way traffic, and further widened to accommodate pedestrian pavements. The new access road will line up perfectly with a new triple shared driveway directly opposite the required new splay, this in itself should be grounds for rejection.</p> <p>The new proposed splay will be of such a width that it will be almost opposite the Queens Rise splay, (itself the site of a fatality) which in turn, is very close to the point where the road narrows creating even further hazards.</p>

In addition to these obvious larger hazards there are several private drives whose owners have to negotiate exits/entrances onto the A258 on a daily basis and of which I am one.

I live on the seaward side of Ringwould – the same side (and next to) the Old Alpine Nursery, and I have first hand experience of the difficulties in exiting my own property. Indeed I often have to rely upon the kindness of strangers to allow me out and onto the road. This ritual, both for myself and others, takes place every morning and again on the return journey.

Very soon the A258 will be expected to accommodate many more cars as the New Builds in Walmer become occupied. This build up of extra traffic on a busy, fast and dangerous road, that cannot be widened, and is the main route between Dover and Deal, is reason enough to disallow the proposed development

I also feel very strongly that the procedural difficulties of objecting to the proposal are blocking the abilities of some of the villagers who are not fully computer literate, it also should be realized that not everyone has access to a computer. Meetings being organized in the village to help with this problem but time is short and not all can attend. Therefore can it truly be said that opinions have been fairly and accurately represented.

I suggest that the consultation procedure is unsound and that the proposed development should be rejected on those grounds.

I also feel that, misinformation by omission, has had a confusing and chaotic effect on people's ability to make their decisions. Many people do not realize that the Nursery Site is a Greenfield site, the site's status has not been made clear by DDC in some of its previous documents, this inaccuracy has furthered the confusion.

The owner/proposer/lessees have created large mounds of rubble, hardcore and stored building materials plus the burning of garden clearances and the removal of the poly tunnels has indeed caused the Nursery to have a brown appearance, and this has by some, been taken at face value without understanding that 'Brown Field' is a term used for Previously Developed Land, again I say again that this uncertainty would not have arisen if official documents had been correct.

Regretfully it has taken many months of pressing the DDC. Planning Dept. for a formal acknowledgement as to the sites undoubted Green Field status, but this was not put forward to the general public at the start of the consultation period.

The ongoing confusion has led some people into not realizing that they had grounds for objection thus giving the owners/proposers an unfair advantage and making the inclusion of development on this Site unsound.

It is claimed that AONB management are comfortable with the mitigation plans put forward and I feel that this is another example of the lack of knowledge and understanding of this very sensitive site.

Screening will not hide the proposed two storey houses from view either from the A258 or from the footpath that runs parallel to the site, which incidentally is also owned by the Owners/Proposers of the proposed development.

I can also testify, that as a regular horse rider in the AONB, that trees will not screen the two story dwellings from being seen from the Freedown bridleway at the top of the North Downs.– those same two storey dwellings will also be glimpsed at various points along the bridleway as it winds through The Lynch.

Screening will not prevent sound and light pollution from pervading the peace and tranquility of this AONB, our planning authorities should be acutely aware of the potential harm the AONB would suffer, and of their responsibility to protect this beautiful place.

I will continue with, and sum up, my objections.

1st Information is incomplete at best – at worst misleading.

2nd Lives will be put at risk with the addition of many more cars maneuvering onto/exiting from the A258 within a short stretch of this busy 40mph road.

3rd misinformation as to the status of the Old Alpines Nursery site i.e. Brownfield/Greenfield leading to chaotic misunderstandings and confusion.

4th The whole of the site is Greenfield and in an AONB and is in that part of the small village that has not been designated for development so therefore it should not have been included in the Plan.

5th Inadequate assessment by the AONB Management – no local knowledge of the area involved – no understanding of the sites sensitivity – no understanding of the far reaching impact development will have on the AONB. - no knowledge of the number of places that the site can be openly viewed from – no transparency for its surprising decision.

6th misleading late additions to the number of properties being proposed leading to confusion as to how/when/if to submit a new objection.

7th The undeniable impact on the lives/lifestyle of residents closest to the proposed houses.

	<p>8th Confusion over the complicated format of how to object, the effect being to deny some members of the public the ability to easily voice their objections. The elderly, non-computer literate and non-computer owners are at a disadvantage, leading to anxiety and a 'we can't do anything about it' frame of mind. Is this considered to be an open, fair and democratic consultation?</p> <p>9th The visual impact on the ambiance of the village, the introduction of sound pollution where there is presently none and the loss of dark skies where at present there are only stars.</p> <p>10th No transparency as to why the Old Ringwoud Alpine site was not submitted for a Landscape Sensitivity Assessment when other AONB sites have been selected. Why not ? No selection criteria has been published .</p> <p>(11) There is a question mark over the suitability for family homes on the 'much changed' Nursery Site. Large earth moving plant have been working on the land for the last couple of years. Unspecified builders rubble and 'hardcore' has been spread and possibly buried where once there was grass and scrub, large evil smelling fires have been seen and smelt where there were once poly tunnels and clean air. All this contaminated ground will need to be carefully assessed.</p> <p>For all the above reasons I consider the SAP53(RIN002/RIN004) to be Unsustainable and Unsound).</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I suggest SAP53(RIN002/RIN004) be removed in it's entirety to ensure that this Unsustainable and Unsound site selection is not included in the Dover Local Plan</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP53
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Village Settlement Boundaries The Ringwold Alpines (SAP53) site is ...</p> <ol style="list-style-type: none"> 1 . outside the Ringwold Village Settlement Boundaries, therefore cannot be considered as sustainable. 2 . the site is Greenfield and 3 . has never previously been developed <p>therefore this proposal is unsound.</p> <p>Area of Outstanding Natural Beauty The proposed SAP53 enclave/enclaves are wholly in contrast to the nature of the long established housing types on the south east side of the busy and dangerous A258. These houses of mixed type are all within the AONB. There are no housing estates leading to urbanisation on this side of the A258 and no housing enclaves/estates nor road exit/entrance visibility splays. Allowing such expansion will create precedents for this type of building on this side, well outside the village settlement boundaries and well inside the AONB. Looking at a map of the present housing layouts of the village it can be seen that all new building has been within the Ringwold Village Settlement Boundaries, all the buildings on the south east side of the A258 are well established by age. The AONB extends out to the centre of the A258 road, so all sides, corners and constituents of the Ringwold Alpines site are firmly within the AONB.</p> <p>The proposal will inevitably produce noise, light pollution, "dark skies" pollution, dust, dirt and general pollution where non has ever existed before. Following the recent trends for one family to own and use 2 cars, and often 3 cars, there will be pollution and disturbance from this source, where non has ever existed before.</p> <p>From the Kent Downs Area of Outstanding Natural Beauty (AONB) Management Plan 2021-2026, Overview ...</p> <p>"An Area of Outstanding Natural Beauty (AONB) is an exceptional landscape whose distinctive character and natural beauty are so precious that they are safeguarded in the national interest."</p> <p>Consultation Local residents were consulted only on RIN004 in the Local Plan Regulation 18 document , RIN002 not being mentioned. Therefore the proposals re SAP53 are of a different scale and nature to the RIN004 we were consulted on. Any housing enclave/estate on the SAP53 site would necessitate building behind several of the properties fronting the A258 road, vastly expanding the intrusion into the AONB.</p> <p>Amenities Ringwold has almost no amenities, no school, no shops, no jobs, no doctor, no post office, no cash machine.</p> <p>Previous Inquiries into this Ringwold Alpines Site There was a Government Inquiry (DOV/16/00626) into the appeal into the refused application to build a "water bottling factory" on this site in 2018. Among reasons for refusal stated were ...</p> <ol style="list-style-type: none"> 1. The proposal development, by virtue of its scale, form and materials, together with the level of lighting and outdoor commercial activity and the alterations to the vehicular access would lead to an unacceptable detrimental and harmful impact upon the open, natural and scenic beauty of the landscape and the character of the area which would be contrary to policies DM15 and DM16 of the Dover Core Strategy, Policy LLC1 of the AONB Management Plan, and the requirements of the National Planning Policy Framework – paragraphs 115 and 116.

	<p>2. The proposed development would result in additional noise and light spill that would result in a detrimental impact upon the residential amenity of neighbouring occupiers, over and above that expected within a rural locality, and within an Area of Outstanding Natural Beauty. The proposal would therefore prove to be contrary to paragraphs 17 and 115 of the National Planning Policy Framework.</p> <p>For the most part these reasons remain germane to the current proposal albeit this current proposal is for residential and not directly commercial use (in the sense of the original request being that a factory should be built here).</p> <p>Comments</p> <p>There has been a transformation of this ex Ringwoud Alpines site recently into what appears to be a builder's yard producing many complaints by local occupants about this illegal use and the noise, smell and pollution caused. The deliverability of this site is questionable.</p> <p>With regards to the type of dwellings Ringwoud really requires ... there is no mention in any proposal of affordable housing for local people.</p> <p>From the Dover District Council Planning > Planning Policy and Regeneration > Evidence Base > Evidence Base: Housing>Dover District Settlement Review and Hierarchy, under Ringwoud it states ...</p> <p>3.62 Ringwoud</p> <p>Retail; The settlement has one public house and an Alpine Plant Centre but there is no general store or post office.</p> <p>Community; There is a village hall and a local church.</p> <p>Transport; The settlement has three bus services, one runs hourly to Dover and Deal but the other two are less frequent and only run two or six journey's a day.</p> <p>Although the settlement is served by an hourly bus service, the lack of basic local facilities would make this settlement unsuitable for future development</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The Regulation19 Proposal SAP53(RIN004/RIN004) should be entirely removed because it is unsound and does not comply with elements of the NPPF or SP3 or SP4.</p> <p>It is not legally compliant and is unsound.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Landscape</p> <p>The <i>Kent Downs AONB Management Plan 2021</i> developed in partnership with Dover District Council and other planning authorities states in paragraph 2.2.2 that the status of the Management Plan combined with the thorough process of Management Plan making and review means that the AONB Management Plan is a material consideration in planning matters and should be afforded weight in decisions. The plan further notes in paragraph 3.1.3 the protection afforded to the AONB should be commensurate with the national and international status of the area and give appropriate weight to the AONB's importance.</p> <p>The individual site appraisal <i>HELLA Appendix 2d Landscape Assessments</i>) notes the biologically rich Local Wildlife Site DO02 The Lynch and Oxney Court Woods, within the AONB. A 2019 management plan by Kent Wildlife Trust for the parish council provides evidence of the environmental capital requiring protection. The assessment also mentions open space site within 400m, and notes the larger of the two areas is not developed.</p> <p>Given the above points it is difficult to understand why the proposal for a site actually in the AONB has been put forward seeing that there must be many potential alternatives for a small number of houses in the larger district allocations.</p> <p>Environment</p> <p><i>HELLA Appendix 3d Environment Assessments</i>.notes On site environmental constraints are present, which would need to be suitably mitigated to enable development, including contaminated land within 400m, groundwater source protection Zone 2, and risk of surface water flooding</p> <p>It is near the A258 road that generates noise pollution above 50/55dB at night.</p> <p>Regarding landscape and environment together, the proposal appears entirely contrary to paragraph 174a of the NPPF: 'protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan)'</p> <p>Sustainability</p> <p><i>The Sustainability Assessment Appendix F</i> makes several observations illustrating that the site is unsustainable:</p> <p>Poor access to the town centre, to secondary school and FE facilities, to a NHS GP surgery, or to the rail network. It is relatively accessible to the local Kingsdown primary school at over 1200m, however there is no safe walking route to the school. There is a footpath, but it is largely through woodland, with an unsafe crossing on the Ringwoud Road. The school is currently oversubscribed. Resident children will have to travel elsewhere by car, or if given preference will result in other schools overflowing from the current population.</p> <p>NPPF paragraph 11 states Plans and decisions should apply a presumption in favour of sustainable development. 11b (1) in particular points to a strong reason for restricting the overall scale, type or distribution of development in the plan area. It appears that this proposal fails to do so.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)	

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<ul style="list-style-type: none"> • For the old Alpine Gardens site to be adding numerous two storey houses on this plot is ridiculous. Ringwoud is a small village not a housing estate. • To have a large number of houses here will cause detriment to the whole of the village and will certainly cause detriment to the AONB as it will be able to be seen from a distance when people are walking with their dogs and enjoying the peace and quiet of this beautiful area. • The detriment to our wildlife would be considerable, foxes, badgers, pheasants, owls, bats, grass snakes, slow worms, to name just a few, which currently live in and around this site would be driven away by the noise and unwanted light of urban living. • What about all the additional cars coming in and out of this area? As we all know the A258 through the village is always busy and to have numerous extra cars and services coming in and out of this estate would mean considerably more disturbance and danger. There is a bus stop set near this proposed new road. What about the school children and shoppers, including a number of elderly citizens who regularly use buses and wait at the bus stop? Not only would they have to negotiate the heavy traffic of the A258; they would have to consider a new road entrance with the traffic coming and going into the road. Will this mean traffic lights or a roundabout near the Queens Rise entrance and the new estate road entrance? This would be, in my opinion highly dangerous for all bus users hoping to get to their place of work, school or shopping. • Many Ringwoud residents have no car. Basically, to live in Ringwoud you either have to have a car to get to and from the shops or be totally reliant on the bus service. • Consider the pollution that would occur for the people in houses off the A258 in the Ringwoud village. Currently we have traffic at least flowing steadily through the village at 40 miles per hour. The pollution caused by the cars and lorries having to slow down or stop to navigate either a traffic light or roundabout or even the extra traffic coming in and out of the new road for access to the houses will be additional. This will undoubtedly cause further pollution for the residents in the houses beside the A258. • Pollution caused by the houses within the old Alpine Gardens will be to the detriment of the existing houses and residents. At night, currently on a clear night, the stars and planets are a fantastic sight. From horizon to horizon you can currently see the whole sky in all its beauty. With the number of houses currently proposed this will be severely limited due to the additional lighting, not only in the houses but the road lights etc. Like many areas in England are we going to lose our beautiful countryside? • In summary, I believe this old Alpine Gardens should not be used for housing, it is in the AONB and should remain so. Let us keep as much as we can of this lovely area for future generations to come.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The Regulation 19 Proposal SAP53(RIN002/RIN004) should be entirely removed because it is unsound and does not comply. It is not legally compliant and is unsound.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Local Plan introduces significant light pollution into an AONB. The site extends beyond the boundary of the village settlement, a semi rural location lacking facilities and infrastructure to sustain this development. The site is not a brown site. Local public transport is limited and moreso since recent cuts to bus services, there will then be an inevitable marked increase in private transport use, rendering this environmentally and practically unsustainable. The late addition of the second site to this consultation has made it difficult for the public to meaningfully comment. The consultation process is itself complex and insufficiently accessible to members of the public, who may have valid concerns but lack the expertise required to adequately engage with the process.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). <p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Comment relating to SAP53 Ringwould.</p> <p>I oppose the proposal which I believe to be unsound as it is not justified, effective or consistent with national policy for the following reasons:-</p> <p>SAP53 is unsustainable because it lays outside the village settlement boundary. The 'Settlement Hierarchy' policy clearly and specifically states that, in the case of Ringwould and some other defined 'smaller villages', residential development will only be permitted within the settlement boundary.</p> <p>I can see no reason for the inclusion of the site SAP53 in this phase of the Dover Local Plan and question why SAP53 now includes RIN004 and also RIN002, a site which had been discounted during the selection of sites along with RIN003.</p> <p>There seems to be no explanation that I can find anywhere as to why RIN002 has been removed from the 'discounted sites' list and added to RIN004 apart from a suggestion by the landowner that its inclusion is essential to avoid RIN002 becoming 'landlocked'.....this is abject nonsense! As I mention later, an access route through RIN004 to RIN002 is easily achievable.</p> <p>It seems that RIN004 was only retained as it was judged to be the 'least constrained of the sites'. That said, all the Ringwould proposed sites, including RIN004, were/are unsustainable as they conflict with the position of the settlement in the 'settlement hierarchy' which clearly states that development will only be permitted within the settlement boundary.</p> <p>Under the 'initial review of sites', those under 0.25ha were deemed "too small to be allocated", however the site RIN004 has been described as having an area of 0.22ha which is beneath the threshold created by DDC. The size of the site, smaller than the desired minimum, becomes even smaller for development purposes once it incorporates an access route to the 'previously discounted' RIN002.</p> <p>The site, which is 'greenfield', lies entirely within the Kent Downs AONB and while 'screening' is apparently routinely given as a way to solve the problem of 'visual impact', this only relates to the southern site boundary. It is clear that the site frontage along the A258 (Dover Road) which currently comprises mature, extensive hedging, would have to be considerably diminished or removed to accommodate an appropriate entrance with visibility splays. This has historically been an issue for DDC Planning Officers who have stressed the importance of retaining the 'street scene' as it directly impacts views to the AONB.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>For all the above reasons, I ask that SAP53 be removed from the Local Plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - This Representation has been made by Iceni Projects on Behalf of Quinn Estates in relation to a Specific Site. Sections relating to strategic / DM Policies will be duplicated to the relevant locations within the Plan.)</p> <p>REPRESENTATIONS TO THE DOVER DISTRICT LOCAL PLAN REGULATION 19 CONSULTATION IN RESPECT OF LAND AT RINGWOULD ALPINES, DOVER</p> <p>On behalf of our client, Quinn Homes we provide comments on the Proposed Submission Version (Regulation 19) of the Draft Dover Local Plan to 2040 in respect of land at Ringwould Alpines, Dover (hereafter referred to as 'the Site'). The site is identified as RIN002 and RIN004 in the Regulation 19 draft Plan and is the sole development allocation at the settlement of Ringwould. A plan showing the extent of the Site and how a scheme of 12 homes could be accommodated on the landholding is contained at Appendix 1 of this representation.</p> <p>Quinn Homes supports the Site as a housing allocation within the new Local Plan to contribute towards meeting Dover District's housing needs over the Local Plan period to 2040. However, Quinn would recommend that the Site is allocated for a minimum of 12 homes instead of the indicative dwelling capacity number of 10.</p> <p>a. The Site and Surrounding Area</p> <p>The site is located east of Dover Road (A258) but within a central location at the settlement. Part of the site lies within the settlement confines and part of the site adjoins the settlement confines. The site is bounded by a mixture of mature trees and hedgerows to the east and south that provide a barrier between the connecting open fields and an obvious edge to the development.</p> <p>The site is relatively flat and does not contain any Public Right of Ways (PRoWs). Existing access to the site is from Dover Road to the north of the site. The closest train stations are Martin Hill and</p>

Walmer, both located approximately 3km to the south east and north of the Site. The closest bus stop is approximately 0.16km from the site on Dover Road and includes services to Canterbury, Tower Hamlets and Dover.

The site is wholly within Flood Zone 1, and is not subject to any designations in the emerging Proposals Map, however the Site just lies within the Area of Outstanding Natural Beauty, together with the adjoining development next to it.

b. Supporting allocation of the site within the Draft Dover District Local Plan

Quinn Homes considers that the approach taken to the delivery of housing in Dover as set out within Regulation 19 Submission Version of the Draft Local Plan is a result of sound plan-making. However, it is considered that the Site subject of this representation could and should be allocated to develop a higher number of houses, with the land having the capacity to deliver at least 12 homes. The number of homes to be delivered at this site could have a bearing as to the whether the site contributes to affordable housing, given the affordable housing threshold. Development in this location could certainly make a greater contribution to social objectives if the development quantum is increased.

Housing needs

Strategic Policy 3 (Housing Growth) addresses that Dover will make provision for at least 10,998 homes in the District over the Plan period, up to 2040. This target will be met through a mix of committed schemes, site allocations and suitable windfall proposals, however not all these are guaranteed to come through and be developed within this time. This along with the fact that the housing target is a minimum means that the Plan should be seeking to optimise development at designated settlements in Policy SP3 and SP4 such as Ringwoud.

The HELAA that was undertaken identifies that just one part of the site, that was previously referred to as RIN002, has the capacity to accommodate up to 30 homes on just that land alone at average density without the remainder of the site. The other section of the site, that was previously referred to as RIN004, was identified to have the capacity to accommodate 7 homes at average density. All together the Site was identified to have capacity for 37 homes at average density, yet the site is only allocated for 10 homes in the draft Local Plan. Quinn Homes aspires to deliver a minimum of 12 homes in this location to maximise the socio-economic benefits of development at this site.

The allocation area has the potential to be expanded directly south to the Site to bring in additional land that Quinn Homes is promoting. This land can be brought forward for development should the Council need additional dwellings to achieve its housing target. An option 2 plan is contained at Appendix 2 of this representation showing how a scheme of 18 homes could be successfully be delivered if the allocation area is extended to the south.

Of all the allocated sites in the Plan, 76.7% are greenfield sites and just 23.3% are brownfield. The subject land is part brownfield and therefore the site makes a positive contribution towards the brownfield: greenfield ratio in the District.

The site is located within the Area of Outstanding Natural Beauty (AONB), however parts of the landholding have previously been developed, the land is well screened through existing field boundaries and boundary hedges and trees and the visual harm to the AONB is therefore expected to be minimal, with the development seen against the backdrop of the existing settlement.

SAP53 - Land at Ringwoud Alpines (RIN002 and RIN004)

Under Policy SAP 53 in the draft Local Plan, the Site is allocated for an indicative dwelling capacity of 10 homes. This is the sole designation at Ringwoud and it is considered that a development of at least 12 homes would be more commensurate with the size of the settlement. Quinn Homes acknowledges the site-specific issues referenced in the policy and is happy to bring forward a proposal that addresses all of them, including the need to respect the AONB setting through a landscape buffer and make appropriate safeguarding for access to Southern Water infrastructure. Notwithstanding these infrastructure requirements, Quinn still considers that a dwelling capacity of at least 12 homes can be delivered in this location and that this quantum would be more commensurate with the size of the settlement.

c. Conclusion

On behalf of Quinn Homes, we thank you for the opportunity to input into the Dover District Local Plan Regulation 19 Consultation. Quinn Homes wishes to support Dover in adopting a sound Local Plan that can serve the District across the Plan period. In its current form, the Ringwoud Alpines designation at Ringwoud is supported, although it is considered that a development of at least 12 dwellings would deliver greater socio-economic benefits and a development of this amount would be more commensurate with the size and scale of the settlement. I trust that these comments are of assistance and that these representations will be taken into account. As the promoter of the only allocated site at Ringwoud, Quinn would welcome the opportunity to participate in the forthcoming Examination-in-Public into the Plan if there is to be a session on Ringwoud and contribute to the debate to ensure that the best strategy for the District is found.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Quinn Estates is a developer with significant land interests in the District, who has an important role in delivering the Plan strategy

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

Local Plan Consultation Point	SAP53 - Land at Ringwoud Alpines (RIN002 and RIN004)
Rep ID	SDLP1609
Rep Status	Processed
Consultee ID	1333265
Consultee Full Name	Cllr John Lonsdale
Consultee Company / Organisation	Walmer Town Council
Agent Full Name	
Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP53
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC Note (1) The text below is an extract from the original representation which is attached to SDLP1438. SAP 53 Ringwoud: The A258 is very dangerous for all Ringwoud residents, there is no footbridge or pelican crossing with lights, over the busy A258 that runs through the village. It is a greenfield site on the boundary of AONB, as such the Landscape Sensitivity Assessment should have ruled out both sites. We also believe Ringwoud is included in Landscape Character Type F – Open Arable Chalk Farmland with Woodland – described in Table 11.1 in NE 2.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP53
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective

	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note: The text below was extracted from the attached representation</p> <p>The inclusion of SAP 34 and SAP 15 especially, (but also SAP 53 and SAP 35) is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'. Also it is not compliant with the emerging govt policy announced 5 Dec 2022 by Mr Sunak on stopping compulsory housing targets on LPAs, and empowering LPAs to decide on local needs. DM Policies NE2 (Natural Environment) p.285: It is sound to designate the area inland from Kingsdown, west to Ringwoud, Ripple, Sutton, Studdal and Little Mongeham, south to Guston, as LCT F Open Arable Chalk Farmland with Woodland, F3 Ripple. But it is unsound, ineffective and contradictory to then ignore the designation when selecting the dangerously located, chalk farmland of SAP 34 for development. It is unsound and ineffective to a damaging extent, to list Kingsdown as being a 'Local Centre ; a village providing services for a local rural area and a secondary focus for development in the rural area' Any development at SAP 34 would do the opposite of 'reinforcing the role of the village'; it would in fact choke off the existing parish economy, reducing its attractiveness to tourists, a key location on the Deal Welcomes Walkers initiative. The number of 2nd homes and airB&B in the village proves that dwellings outnumber homes required, so there is NOT an 'objectively assessed need for housing a la NPPF 11' within the Parish'. (Gladman did a landgrab in 2017 in the parish 17/00487 An application rejected by DDC that Gladman took to Planning Inspectorate and won. Currently being built by Taylor Wimpey on A258 as 85 executive homes on land opposition 423-459 Dover Road to the endangerment of all road users of arterial A258 with refusal to put in pavements).</p> <p>SAP 53 Land at Ringwoud Alpines, Dover Road. The selection of the site is also unsound as being incompatible with the The Landscape Sensitivity Assessment (LSA) falling within the AONB . It is not Brownfield. It is surrounded by LCT F 3 arable chalk downland. Access would be from the very busy and dangerous A258 on which not only the settlement but also the larger conurbation depends.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Extracts from the 24-page submission on DDC Reg 19 Local Plan Consultation, Dover and Deal Green Party. Focused on sites affecting Ringwoud with Kingsdown Parish : The selection of the site is unsound as being incompatible with the Landscape Sensitivity Assessment (LSA) falling within the AONB. The A258 that runs through the middle of Ringwoud carries a heavy and dangerous amount of fast road traffic currently and the addition of more traffic at the access point to site would create yet another dangerous junction, hence the selection of this site is unsound.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>To whom it may concern, (Without prejudice)</p> <p>I would like to object to SAP 34 for the reasons as specified below. These reasons also apply to SAP 35, 53 and 15 .</p> <p>The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'. SAP 34 Kingsdown p. 163: The selection of SAP 34 is totally unsound, on 5 different grounds,.</p> <p>Firstly the Highways Assessment of Ringwould Road is inadequate and unsound as regards this site. The facts are that Ringwould Road is signposted as unsuitable for long vehicles, unsuitable for vehicles over 7.5tonnes unsuitable for wide vehicles, the road is painted SLOW in 3 places despite the 50mph signs, and there are 4 sections where the road narrows to single lane passing. The 1400 voters in Kingsdown village (population 2000 + 500? more in summer months due to holiday village + campsite) are all dependent on the Ringwould Road traffic flowing freely. So the selection of SAP 34 for any development is unsound firstly on the grounds of highways assessment unsoundness / inadequacy. Any development would cause dangerous gridlock, involving the cars of current residents, parents of children of the village primary school, construction vehicles and new residents' cars. It is a disgrace that KCC for years have refused to listen to requests to reduce the speed limit on this road and refused also to put in a kerbed pavement on the northern side of Ringwould Road. The economy of the village depends on visitors and residents walking, cycling and horse-riding on the Ringwould Road and any development of SAP 34 would increase the likelihood of fatalities exponentially.</p> <p>The selection of SAP 34 is unsound secondly on the grounds of landscape character, being incompatible with criteria described above in SP 4. the site is on the skyline with sea behind, an iconic view that greets all people arriving in Deal; its selection contradicts the comments in SP4 on individual village identity and character. DM Policies NE2 (Natural Environment) p.285: It is 'sound' to designate the area inland from Kingsdown, west to Ringwould, Ripple, Sutton, Studdal and Little Mongeham, south to Guston, as LCT F Open Arable Chalk Farmland with Woodland, F3 Ripple. But it is unsound, ineffective and contradictory to then ignore the designation when selecting the dangerously located chalk farmland of SAP 34 for development.</p> <p>The selection of SAP 34 is unsound thirdly on the grounds that the Deal / Walmer conurbation of 30,000 depends on the narrow – single lane in places - Ringwould Rd, carrying diverted traffic from the A258 every time A258 is blocked by an RTA or road works. The A258 is the only</p>

	<p>southern entrance to the 30,000 conurbation starting in Upper Walmer stretching to North Deal and Sholden. Diverted traffic is a dangerous nightmare for the village every time it happens, some diverted traffic uses Glen Rd / Liverpool road selected as site for SAP 15 Ray's Bottom in Walmer. This site too, if developed is likely to mean diverted traffic cannot get in / out of Deal /Walmer 30,000 conurbation. Neighbours working for emergency services say they oppose both developments for this reason. Unsound due to being incompatible with SP12, because its lanes periodically become part of the district Strategic Transport Infrastructure. Selection of these sites is completely unsound and non-compliant with all laws / planning regs relating to the prevention of accidents and protection of human life. SAP 34 would result in 'Traffic movements from the development resulting in severe impacts to the highway network that it would not be possible to mitigate', and as such contrary to SP4 2 j within the plan, thus unsound and highly ineffective.</p> <p>The selection of SAP 34 is unsound fourthly on the grounds that it borders the AONB and is valuable arable farmland, needed in times when national food security is of concern. Moreover 4.238 needs correcting, the parish council-owned, biodiversity-rich site of the Lynch / and Freedown woods (that run into Oxney Court Woods) was the subject of a survey by Kent Wildlife Trust in 2017 commissioned by the Ringwoud w/ Kingsdown parish council and paid for by DEFRA, which provides evidence of the natural capital within the boundary of the AONB to be protected on the boundary of this site.</p> <p>The selection of SAP 34 is unsound fifthly on the grounds that any development would remove a flood sponge on the top slope of the hill, below which is the Knight's Bottom pumping station and pond which drains towards Rays' Bottom SAP 15, so development here could contribute to flooding (see CC5 p. Flood Risk).</p> <p>Any development of SAP 34 is not legally compliant with emerging government policy, see Mr Sunak statement 5 Dec 2022 announcing dropping of compulsory housing targets for LPAs (Local Planning Authorities such as DDC)'. I would also like to object to SAP 35, 53 and 15 for the same reasons as above.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am a resident of Kingsdown. My concern is with the consequences of the housing developments at Woodhill Farm (SAP 34 - 50 dwellings) and Courtlands (SAP 35 - 5 dwellings), also adjacent developments at Ringwould Alpines (SAP 53 - 10 dwellings) and at Rays Bottom, Walmer (SAP 15 - 75 dwellings). These are connected by Ringwould Road between Kingsdown and Ringwould, by Glen Road between Kingsdown and Walmer (inland) and by Kingsdown Road between Kingsdown and Walmer (along the seafront). The first two, in particular, are narrow roads with inadequate width at many/most locations for passing traffic. Kingsdown Road is less restrictive. The number of dwellings will inevitably lead to increased car usage for Kingsdown village access, for school access, for work/employment access, for shopping and for general leisure access. There is no meaningful bus service to accommodate all these needs. Kingsdown Primary School will likely be the primary school of choice for the developments I have noted, putting particular strain on these roads. Children at secondary school (and those attending primary schools elsewhere) will all need to use these roads to move out of the referenced development areas. The whole village road network is generally narrow and unsuited for heavy traffic volumes. When discussing these aspects with DDC Planning representatives at the Deal open-day for the Plan, I was advised that the plan does not address these transport needs (and I have not found any text to contradict them.)</p> <p>My main comment therefore is that a full traffic analysis must be made to ensure adequate provision for the daily needs of the developments. Access for construction traffic will be an immediate concern. While not directly related to the quoted paragraphs of the Infrastructure Plan, the village primary school is probably too small to accommodate the likely increase in demand. Road access around it does fall within the reference and is similarly restrictive already.</p> <p>Additionally, for Ringwould Road between Kingsdown and Ringwould there should be pavement(s) (or alternative footpaths) to provide a safe pedestrian route to access the main bus route along the A258 (the Dover-Deal road). The current road is unsafe for pedestrians and cyclists. The junction of Ringwould Road with the A258 will need to be enhanced to accommodate the increased traffic. Similar safe access will be required for Glen Road.</p> <p>It is not clear to me how the narrow road network in Kingsdown can be modified to suit an increased volume of traffic. This might in itself be good reason to object to the developments, but a more positive attitude by the planners and developers is surely required?</p>

	(DDC note: This representation was originally made against the Infrastructure Delivery Plan consultation document but has been duplicated in relevant places against the Local Plan due to the specific site allocation references made)

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP53
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>After careful consideration of the Local Plan (LP) and on hearing comments from the residents in both Ringwoud and Kingsdown it is considered the LP is unsafe.</p> <p>The Settlement Hierarchy lists Ringwoud as a small village. There are no facilities, notwithstanding that there is a public house which opens intermittently, and the village has developed along the A258 which is the main access between Dover and Dwal. Any extra traffic movements will give an extra ordinary effect on the however small the number of properties.</p> <p>SAP53 is outside the village settlement boundary, is on the main road, is not a brownfield site, having been a plant nursery previously.</p> <p>RIN004 was initially the only site listed in the LP, however between the Regulation 18 and now the Regulation 19, the site RIN004 has been added which has not allowed people to make constructive comments.</p> <p>The 2014 an Inspectors Report stated light pollution should be prevented especially in the AONB areas, the development of this site would be contrary to this and Members see no reason why there should be any relaxation to that statement. The site was not selected for any assessments on landscape sensitivity. With the various issues surrounding the site it is considered contrary to the NPPF, major traffic issues, (even with the small number of properties, due to close proximity of other junctions and the poor layout of the main road), dark skies, AONB, good agricultural land.</p> <p>In addition, given that the site does not comply with the village hierarchy does nor comply with any sustainability and should be removed from the plan.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	That both sites are removed from the Local Plan
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To emphasise the position of the PC

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SAP34 not legally compliant with NPPF 20-21 items 11 DM policies NE2 (natural environment) P285 The chalk farmland of SAP34 is unsound/unsuitable for development. SAP34 is unsound on the grounds of landscape character being incompatible with criteria in SP4. SAP34 is unsound on the grounds that it borders the AONB and is valuable arable farmland. SAP34 – any development would remove a flood sponge on the top slop of the hill which drains toward Ray Bottom SAP15, so development here would contribute to flooding. SAP35 is unsound in that it involves loss of food producing farmland; destructive of the landscape character and it is in a BOA. SAP53 is unsounds as being incompatible with LSA falling within the AOB. SAP15 is unsounds as incompatible with SP4; 3.71 separation of settlements. Also, it is incompatible with statements in SP14 relating to biodiversity connectivity. The highways assessment of this site is unsound and inadequate. SAP15 4.160 fails to note that Liverpool Road, is a single lane road which becomes gridlocked with traffic from Kingsdown primary school twice a day
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	no comment
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP4 - settlement confines for Barnsole / Policies Map specifically for Barnsole
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Plan is unsound for failure to include Layham Garden Centre within the proposed settlement confines for Barnsole.</p> <p>Land at Layham Garden Centre is submitted for a low-density residential scheme together with improvements to the existing commercial offer.</p> <p>The proposed houses could be arranged around the creation of a single new access point to enable the existing access to be retained for the improved commercial offer.</p> <p>The site is located to the east of the village of Staple and within the hamlet of Barnsole. This Regulation 19 Submission Version of the Plan recognises that Barnsole is a settlement (as defined in Appendix E of the emerging Plan 'Settlement Hierarchy'), with defined boundaries as set out on the Proposals Map. Emerging Policy SP4 allows for 'Minor residential development or infilling' subject to 11 set criteria (a to k). The settlement confines should be amended to include Layham Garden Centre as part of Barnsole given that the Garden Centre is an important service/facility within the settlement. In amending the settlement confines for Barnsole to include Layham Garden Centre this would allow a small scale proposal, of approximately 10 dwellings, to be considered in line with the emerging Policy SP4.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Amending the proposed settlement confines for Barnsole to include Layham Garden Centre and/or the allocation of the land at Layham Garden Centre to enable a low-density residential scheme and improvements to the existing commercial offer

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	In order to demonstrate the suitability of the site for inclusion within the settlement confines, representing an important facility within Barnsole and to show how a scheme could be incorporated on site

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We refer to the above mentioned document that is currently available for public consultation. We act on behalf of the owner of the property [redacted] in relation to this matter.</p> <p>We wish to provide the following comments on the Councils proposed housing strategy: Policy DP3 Housing Supply and Growth</p> <p>We consider the policy is Unsound for the following reasons</p> <p>We are concerned that the Council will continue to rely heavily upon large strategic sites to deliver its housing land supply needs. Whilst we have no issue the housing land supply figures, as they are based upon the Government standard methodology calculations, we would advocate it necessary and prudent to provide an additional contingency buffer. We note that the majority of homes are anticipated to come forward in the Whitfield Urban Expansion area.</p> <p>The additional buffer supply or contingency should be brought forward by allocating smaller sites that do not require a large upfront investment in infrastructure costs to facilitate delivery. These smaller sites can also be brought forward by small medium sized (SME developers in the short term and will deliver earlier in the current plan period. Although this may be considered by some to be an over supply above the current housing land supply targets, it is necessary to factor in delays in the delivery of larger sites in the Council's area by the volume or national house builders; especially in the current economic climate.</p>

	<p>It is also an important consideration that Government advocates smaller sites for SME developers in the National Planning Policy Framework (2021) document (paragraph 68). The identification of these smaller sites in the local plan document as opposed to identifying a projected windfall figure allowance provides more certainty for SME developers in pursuing sites for planning permission.</p> <p>Our client has a site that would be suitable for inclusion as a site allocation in the village of Staple. The site itself currently forms part of an extended garden area of Warren House and is well screened from the surrounding rural area by mature trees and landscaping. This site is by definition previously developed land (PDL) as defined in the latest version of the NPPF (2021)</p> <p>Attached is a red line plan of the site and we consider the site is of sufficient size to accommodate a small residential development for between five- six dwellings (see plan 1 attached). Photographs attached for reference.</p> <p>At present, Staple has a very restricted tightly drawn settlement boundary surrounding the village as shown on the attached plans. There is already a small site within the settlement confines identified in the plan document as suitable for development. Therefore, the village is considered a suitable area by the Council for new housing development and is a sustainable location.</p> <p>We therefore ask for the settlement boundary to be expanded to include a residential site allocation as shown on the attached plan (reference plan 2).</p> <p>We trust these comments will be taken into consideration.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The site lies outside Staple settlement boundary and there is no evidence that it is an exception site. The new development which has been recently built alongside the site, qualified on the grounds of providing 'affordable housing in rural locations beyond the village confines (rural exception schemes)'. HS10 P.12, 2.49 Rural Housing Needs. Currently, the village offers no facilities to merit this new plan going ahead. The pilot bus scheme is to be axed, there is no local primary school within the village and no jobs available. Water pressure levels are dangerously low throughout the village and this road is subject to flooding.</p> <p>In order to build the new development, the proposed site had to be used as a compound for the building materials as there is no on-road parking due to access being onto the single track road.</p> <p>The proposed site was Grade 1 Agricultural Land which had been set aside for many years. During this period a rich habitat became established supporting numerous wildlife species. Since the new development alongside the site is unable to fulfil the net gain in biodiversity provision, there is every reason to see this site set aside permanently for an Offsetting Scheme to compensate for the loss of habitat on the adjacent site.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I refer to the new local plan for the development of houses in Durlock Road. This site lies outside Staple settlement boundary and there is no evidence that it is an exception site, therefore I cannot see the benefit of developing this land for several very important reasons: 1. At the moment, the village has no facilities to merit this new plan going ahead. The local bus scheme is to be discontinued, there is no local primary school and no jobs available. In addition, water pressure levels are very low throughout the village and the road is subject to flooding. 2. This land, which was damaged during the development of the affordable housing estate adjacent to it, supported a rich, biodiverse landscape. It has quickly begun to recover and I am sure I don't need to explain to you the importance of biodiversity, not only for its own sake but for the health of our environment. 3. An additional concern is the issue of space during the building of these houses. There is no where for materials, building vehicles and machinery to be stored. There is no on road parking. This site was in fact used as storage for the recent adjacent development. This is of great concern to local residents who will be significantly inconvenienced during the building of these houses. 4. Access to these

	properties will be directly opposite existing driveways across Durlock Road, creating traffic problems in an already narrow and busy road., I strongly object to building any further houses as proposed in the local plan.
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). SAP55 - Woodnesborough Small Housing Sites

Local Plan Consultation Point	SAP55 - Woodnesborough Small Housing Sites
Rep ID	SDLP1413
Rep Status	Processed
Consultee ID	1333243
Consultee Full Name	Mr and Mrs Tobin
Consultee Company / Organisation	
Agent Full Name	Mr Reece Lemon
Agent Company / Organisation	Lee Evans Partnership
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Omission Site for SAP55 (Intro / Conclusion)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Lee Evans On behalf of Mr and Mrs Tobin. Full Representation attached to SDLP1411. This document has been split across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1411.)</p> <p>4. POLICY SAP55 – ‘WOODNESBOROUGH SMALL HOUSING SITES’</p> <p>4.1 Policy SAP55 notes that in addition to the Strategic Housing Allocations and Non-Strategic Housing Allocations identified in the Plan, there are two smaller sites allocated for housing in Woodnesborough. These are listed as:</p> <ul style="list-style-type: none"> WOO005 Beacon Lane Nursery, Beacon Lane, Woodnesborough (est. 5 dwellings) WOO006 Land south of Sandwich Road, Woodnesborough (est. 10 dwellings) <p>4.2 The provisions of SAP55 as drafted therefore identify an estimated 15 additional dwellings in Woodnesborough over the plan period, subject to two criteria:</p> <ul style="list-style-type: none"> (a) Planning permission will be granted for proposals that accord with the policies in the Local Plan; and (b) Planning permission will be granted for proposals that address the site-specific issues and requirements for the site set out below <p>4.3 Detailed commentary relating specifically to the two identified sites above is not made here; rather commentary is made to SAP55 as a whole with due regard to its effectiveness and soundness as a policy seeking delivery of small housing sites in Woodnesborough.</p> <p>Estimated Dwelling Numbers</p> <p>4.4 Overall, only 15 dwellings are proposed in Woodnesborough over the plan period. This is seen as a low figure for Woodnesborough. Whilst the settlement is a ‘Smaller Village’, it is considered that</p>

there are other opportunities to support sustainable development in the village. It is recognised that SP4 seeks to support windfall development though – as above – this policy will be ineffective in delivering a reasonable level of growth to the settlement over the plan period given how tightly settlement boundaries have been drawn at Woodnesborough. There are thus limited opportunities to deliver housing at Woodnesborough outside of the above sites, and outside of an estimated 15 dwellings.

4.5 The estimated dwelling numbers directed to Woodnesborough should be first clarified as a minimum quantum of growth.

4.6 Second, the Landowner also considers that further sites should be allocated to provide greater assurance of the deliverability of proportionate growth to the settlement, with related uplift in estimated dwelling numbers.

4.7 The Site could be released for development in a timely fashion (between 1-5 years) in order to reinforce the sustainable growth aspirations for Woodnesborough, supporting local services and facilities whilst contributing to District housing targets.

Proposed Additional Site Allocation – Land off The Street, Woodnesborough (est. 10 dwellings)

4.8 To address the concerns raised above, the Landowner wishes to put forth its own interests as noted throughout this response.

4.9 The representation site is approximately 0.88 hectares of developable land and could provide approximately 10 no. dwellings. It should be noted that the Site was previously assessed in the 2021 Call for Sites Exercise under reference 'TC4S090 - Land off The Street, Woodnesborough, Sandwich'.

This assessment noted that an 'agreed housing number' of 27 dwellings, in excess of the 10 dwellings put forward by the Landowner both in 2021 and at the time of writing. It is noted that the Site was therefore assessed against a much higher quantum of development, and should be revisited at a more modest scale of 10 dwellings.

4.11 The LPA considered – on the basis of 27 dwellings – that the Site was unsuitable noting that:
there would be an unacceptable landscape impact
access is unachievable
footpath access is unachievable
impact on Old Hall Grade II would need assessment

4.12 The Landowner responds to these items below, noting throughout that the allocation of this additional site in Woodnesborough for 10 dwellings would serve to reinforce proportionate development in the village over the plan period as a whole, supporting existing services and facilities, and would be in keeping with the overall thrust of the Vision for the Plan, and would in turn serve to address the concerns surrounding whether SAP55 has been positively prepared and whether it represents a sound basis for planning over the plan period. It is emphasised that an Expression of Interest from a local developer is submitted as part of these representations, reinforcing both the availability and deliverability of the Site.

4.13 An indicative layout has also been included as part of this representation, which has taken into consideration the adjacent listed building, the surrounding countryside and the existing built form within this rural-setting. This is shown in extract below (Figure 3).

Figure 3. Extract of indicative site layout at Land off The Street, Woodnesborough

Character and appearance (including landscape matters)

4.14 The representation site is located on the northern side of The Street, Woodnesborough, directly adjacent to residential development on three sides, and other built development within the vicinity. Development of this site, at the amount proposed (an indicative capacity of circa 10no. dwellings) would be in keeping with, and at a scale proportionate to, the size and form of the existing settlement.

4.15 The location of the representation site sees it directly adjoin the extent of built form within the village of Woodnesborough, and it benefits from access to local services and facilities which are provided

in the locality. The site is not isolated (having consideration to Braintree District Council v SSCLG & ORS [2017] EWHC) by virtue of the presence of other dwellings immediately adjacent to it and cannot be considered as being separate, or remote from, the existing settlement.

4.16 The representation site is not considered to be valuable to the landscape, due to its enclosed nature and limited visual presence, containing no features of landscape value. The site has a different character to the agricultural land surrounding it, since it has been used for the keeping of horses for over 15 years.

4.17 The site is visually well contained in relation to the wider landscape, due to its position between and adjacent to other built form. Whilst the site may be visible from vantage points further to the north, it is considered that a development within the site, which could be set behind a dense landscape buffer, would be read with the existing development in the village and would not appear out of place or incongruous within the landscape.

4.18 As elsewhere, the Site would fall outside of the proposed settlement boundary and within the open countryside. Aside from commentary relating to windfall development at Policy SP4, it is noted that the Site is well-related to the existing village.

4.19 Potential impact(s) from development can be mitigated by ensuring development maintains, conserves and preserves the special qualities of the landscape and surrounding countryside. The visibility of the site from close range views, can be addressed through the high-quality design of buildings and setting buildings within a new landscape framework. Existing trees and planting which form boundary treatments can be retained and enhanced as part of the layout.

4.20 At site level, whilst there would be a change in the land use were the representation site to be developed, there are no rare or unique features within the site that would be impacted and that therefore the effect on site level landscape would not be significant due to the balance between new residential land uses alongside improved vegetation cover, biodiversity value and green infrastructure around the boundaries of the development, enhancing the visual amenity and value of the site within the village.

4.21 The development of this site would provide the opportunity to implement high quality, sustainable architectural design, a new landscape framework and an improved biodiversity value to the site. Crucially the site does not exhibit any rare or unique landscape features and its character is already influenced by its proximity to residential and recreational land uses which surround and enclose the site from the adjacent countryside.

4.22 An indicative landscape framework is shown on the submitted plan in support of this representation and its advocacy of additional allocations at Woodnesborough, showing, principally, additional planting to boundaries to enhance and strengthen the existing screening of the site and create new habitats, to enhance ecology opportunities across the site. The plan also shows new green open space along the site frontage to ensure that the amenities of the village are enhanced. The plan is conceptual at this stage but provides an indication of how the site could be developed in the future to ensure landscape impact is minimised and the ecological value enhanced.

4.23 The HELAA 2021 exercise is therefore considered inadequate in considering how matters of landscape impact(s) might be resolved in development management processes. A detailed LVA or LVIA could be prepared to reflect the above principles, supporting any future application(s). In addition, it is held that the LPA's assessment was flawed in focusing on a proposed capacity of circa 27 dwellings as an 'agreed' figure, contrary to the 10 dwelling capacity put forth by the Landowner, with relative implications for the assessment of landscape harm considered by the District Council at this stage which influenced its decision to exclude the site from further assessment.

4.24 In this regard, the Landowner considers the assessment of the Site under the HELAA 2021 exercise has been inadequately concluded, and thus SAP55 is not based on an effective or sound evidence base. This should be corrected through amendment to SAP55.

Access and Highways (including vehicular and pedestrian access)

4.25 The above drawing (Figure 3) indicates that access would be able to be provided directly off The Street.

4.26 This would require a new vehicular access be made through the bank, in a similar manner to the access created at Elmwood Park. The speed limit is 30mph in this location (Beacon Lane, Oak Hill, The Street). There is no reason to expect a departure from this speed limit.

4.27 Visibility onto The Street could be made good, providing the access is agreed with KCC Highways. Contrary to the findings of the LPA's evidence base (and specifically the HELAA 2021) the highways boundary is shown to include the necessary land to enable suitable access to the Site from The Street (Figure 4). This is confirmed in writing by letter dated 30 April 2004, appended to this letter for information (Appendix 1).

4.28 The capability of providing footpath access to and from the Site could be explored through development management processes though it is noted that the Landowner controls adjoining land.

4.29 In this regard, the Landowner considers the assessment of the Site under the HELAA 2021 exercise has been inadequately concluded, and thus SAP55 is not based on an effective or sound evidence base. This should be corrected through amendment to SAP55.

Figure 4. Highways Boundary extract from The Street, Woodnesborough (Appendix 1)

Heritage and Site Surroundings (including regard to the nearby Listed Building)

4.30 In terms of the relationship with neighbouring properties, the representation site is adjacent to The Old Hall and falls opposite a new development at Elmwood Park. The Site is spacious enough so as to distance development away from neighbouring properties and ensure a high standard of amenity is preserved for existing neighbouring occupants. In order to ensure that there would be no unacceptable impact upon site context and surroundings, it is envisaged that the development of the site would be designed to consider the privacy and amenity of neighbouring occupiers, and would include buildings of appropriate size and scale are provided in the right location with sufficient space from each other and the existing neighbouring properties. The site is well connected and is considered to be sustainably located so as to ensure the wellbeing of future occupants within the village.

4.31 It is anticipated that a heritage assessment could be provided under the context of a planning application to best assess the relationship of the Site to the Old Hall. It is however considered that sufficient set back and an appropriate landscape buffer would provide an appropriate relationship to this listed building. It is noted that the listed building already exists in the setting of two storey residential development, and the proposed site allocation – at 10 dwellings – would not fundamentally change this overall setting.

4.32 It is considered that revisiting the LPA's HELAA 2021 assessment referring to 10 dwellings – and not 27 dwellings as the LPA previously assessed against – would yield a different assessment, and may provide for closer consideration of the Site as an appropriate allocation in the Plan.

Sustainability

4.33 As an overall measure of sustainability, there are a number of key areas that are considered to be significant positives:

- Woodnesborough Village Hall, located within Elmwood Park, directly opposite the site.
- St Mary The Blessed Virgin Church is a 3 minute (0.1) mile away
- Regular bus services (Numbers 542, 43, 43A, 44 and 81) all pass through Woodnesborough and provide links to Dover, Deal and Sandwich.
- A range of shops, services and health care facilities are available in Sandwich, which is accessibly by public transport or by foot (1.6 miles/30 minute walk).
- The representation site is within Flood Zone 1 as identified on the Environment Agency's Flood Risk Map.
- The Site is not shown to fall within any other protected landscapes.

It is noted, that most services and facilities would require a need to travel into neighbouring villages, however, in this instance the development of this site would enhance and maintain the vitality of Woodnesbrough and other settlements such as Eastry, Ash and Sandwich, ensuring there is a need for vital local services.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

This document has been split across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1411.)

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Lee Evans Partnership LLP is instructed by Mr & Mrs Tobin (hereafter, the Landowner) to submit representations to the Regulation 19 Submission Draft of the Dover District Local Plan 2040.

1.2 The Plan outlines the scale and distribution of new development which is required to meet Dover District's needs to 2040. It further identifies the planning principles and policies to guide decisions on all new developments, including through a series of site allocations and detailed development management policies against which development proposals will be assessed during the plan period to 2040.

1.3 This representation identifies the Landowner's holding at Land Off of The Street, Woodnesborough (hereafter, 'the Site'), and makes a case in support of its allocation for residential development of circa 10 dwellings. It provides detailed comments on the Plan as drafted, including those relating to its soundness, legal compliance, and whether the plan has satisfied the Duty to Cooperate.

1.4 The Site comprises 0.88ha in total and sits within a central location within the village. Although detailed commentary is provided against the Plan as a whole, specific commentary is provided in respect of Emerging Policy SP55 – Woodnesborough Small Housing Sites.

1.5 These representations are supported by the following documents to provide reassurance of the availability, suitability and deliverability of residential development in this location:

Indicative Site Layout, prepared by Lee Evans Partnership LLP

Access Arrangement Technical Note, prepared by GSE

Expression of Interest, from GSE

Letter from Kent County Council Highways, dated 30 April 2004 (appended to this document, Appendix 1)

1.6 The following comments are therefore set out in a positive and constructive manner intended to aid the clarity and implementation of the Plan, structured around the following sections:

Section 2 of this Statement describes the representation site and its surroundings;

Section 3 sets out relevant Planning Policy considerations with reference to the Vision, Objectives and key emerging planning policies;

Section 4 sets out detailed commentary of Emerging Policy SP55 – Woodnesborough Small Housing Sites, and identifies the case for the allocation of the Site to further support the implementation of housing delivery in the village;

Section 5 provides a summary.

1.7 These representations conclude that the Plan can be found legally compliant, and can provide a sound evidence-based approach to planning in the District over the plan period subject to amendment. At present, the Landowner considers that whilst the Plan's overall Vision and Objectives are sound in their aspirations, the allocation of further sites – specifically under the 'small housing sites' policies – would more closely reflect the evidence base and provide a stronger basis for the delivery of housing in the District over the plan period.

1.8 Following review of the LPA's evidence base relating to sites in Woodnesborough, on behalf of Mr and Mrs Tobin we strongly advocate for the inclusion of Land off of The Street, Woodnesborough for residential development of up to 10 no. dwellings as a means of strengthening the effectiveness and overall soundness of Emerging Policies SP3, SP4, and SP55 specifically. The thrust of these policies in delivering high quality growth to meet identified need of at least 10,988 dwellings over the plan period is supported, though the detail of policy delivery mechanisms is not supported in its current form without the type of amendment suggested herein.

1.9 We welcome the opportunity to further assist or provide comment on the preparation of the Plan which will help shape future development in the area; and we welcome look forward to the opportunity to participate at later hearing sessions where appropriate.

2. SITE DESCRIPTION AND PLANNING CONTEXT

2.1 The Site is outlined red on the submitted drawing EMA-2021-49-02. It covers an area of approximately circa 0.88 hectares. The site is located to the north of The Street. There is existing and well-established built form to the north east, south east and south west on The Street, with a recent development being completed at Elmwood Park. Woodnesborough is a village comprising a variety of services and facilities including a church, a number of small businesses a village hall.

Figure 1. Site Location Plan

2.2 The Site, as existing, can be accessed off of Oak Hill past Fir Crest and the adjacent Stables via an existing right of access. Access opportunities are also available via The Street, which runs the length of the Site and through Woodnesborough. This would be the preferred access to any development, with ownership via The Street available without any hindrance (as addressed elsewhere re Kent County Council's ownership strip adjoining the highway).

2.3 A summary of the Site's baseline conditions is set out at Table 1, with further details following below.

Table 1. Site Summary

2.4 Woodnesborough is a small village situated a short distance north of Eastry. The village has a semirural

character, with a fairly consistent ribbon of development along the main road frontage, with agricultural land beyond, into the open countryside. The Site is adjacent to the property, Fir Crest and adjacent stables. The land is used for the keeping of horses. The Site is screened from The Street and the topography of the site is such that the representation site is on a higher ground level than The Street, with a raised bank and planting bounding the Site and The Street.

2.5 The Site is adjacent to a Grade II Listed Building, The Old Hall (Woodnesborough Village Hall), which is of significance to the Village.

2.6 The building's listing UID is 1070075 and the list entry for the building sets out that the building was once a school, then a village hall. The building is constructed of buff brick under a slate roof. It is one storey and plinth with parapet gables and belicote to right, and lozenge-set stack to rear left. Two four centred arched 3 light mullioned and transomed windows with sunk spandrels and label hoods. Boarded central door with four centred gauged head in gabled porch. The NGR is TR3095056976. It is considered that the significance of the building comes from the historical interest, given its previous uses as an important building within the village. The building is also highly detailed and is a good example of a building of its era (19th Century), which demonstrates some architectural significance in the building also.

2.7 In terms of services provided within the village, there is a church, a village hall and a number of small business located within the village, with the majority of services located in surrounding villages/towns of Eastry, Ash and Sandwich including supermarkets, banks, health care and leisure facilities.

2.8 In addition, there are a number of bus-stops located within walking distance of the representation site, providing regular bus services to Deal, Dover, Sandwich and beyond. The service numbers 43, 43A, 44, 91 and 542 run through Woodnesborough. The Sandwich Train Station operates a South Eastern Railway service and is located approximately 1.4 miles from the representation site (approximately a 30 minute walk) or an 8 minute bus ride (service number 81 from bus-stop Oak House) followed by a 3 minute walk.

3. REPRESENTATIONS TO REGULATION 19 LOCAL PLAN CONSULTATION

3.1 As above, the Dover District Local Plan Regulation 19 Submission ('the Plan') establishes the scale and distribution of new development required to meet Dover District's needs to 2040. It identifies a series of site allocations and detailed development management policies against which development proposals will be assessed during the plan period.

3.2 This follows a period of extensive evidence-gathering, and previous consultation on the Regulation 18 Draft Local Plan in 2020. It is emphasised that the Landowners participated in a targeted Call for Sites throughout 2021, advocating for the inclusion of the Site in the Plan.

3.3 Detailed commentary is otherwise provided herein on the Vision, Objectives, and Development Management Policies of the Plan. Commentary is not provided for all policies, and is instead reserved for those considered of most relevance to the Landowner's specific interests to Land off of The Street, Woodnesbrough.

3.4 Section 4 of this response looks in detail at the provisions of Emerging Policy SP55 -Woodnesborough Small Housing Sites, providing a site plan and site analysis in support of further small site allocations in Woodnesborough.

3.5 Commentary is provided principally on Emerging Policies as follows:

SP3- Housing Growth

SP4 – Residential Windfall Development

SP5 – Affordable Housing

CC8 – Tree Planting and Protection

PM1 - Achieving High Quality Design, Place Making and the provision of Design Codes

PM2 – Quality of Residential Development

H1 – Type and Mix of Housing

TI3 – Parking on New Developments

3.6 Commentary is provided using the references above and, where relevant, the paragraph numbers as used in the Regulation 19 Draft.

3.7 Due regard has been had to the wider evidence, and where necessary cross-reference has been made to the LPA's evidence as available as part of this consultation process.

5. CONCLUSION

5.1 These representations conclude that the Plan can be found legally compliant, and can provide a sound evidence-based approach to planning in the District over the plan period subject to amendment.

5.2 Emphasis is placed on the policies relating to residential development, namely those noted under Emerging Policies SP3, SP4, and SAP55. The thrust of these policies in delivering high quality growth in minimum quantities to meet identified need of 10,988 dwellings over the plan period is supported, though the detail of such is not supported in its current form.

5.3 Settlement boundaries are considered too tightly drawn and should be amended to maximise the potential for sustainable development in appropriate locations, specifically adjoining or close to settlements.

	<p>5.4 Windfall development should be recognised as an appropriate mechanism in supporting development potential not considered by the LPA in its HELAA assessment, or otherwise in situations where the LPA has inadequately considered such sites in its evidence base, as applies to Land off The Street, Woodnesborough.</p> <p>5.5 The provisions of SAP55 are considered to lack the necessary effectiveness in delivering on the Plan's overall vision by virtue of allocating sites for delivery of only 15 dwellings, with a lack of sufficient opportunities for meaningful development in otherwise sustainable locations within and adjacent to built form. Albeit the Landowner considers these provisions can be made sound through amendment.</p> <p>5.6 In particular, on behalf of the Landowner we strongly advocate for the inclusion of Land off of The Street, Woodnesborough for residential development of circa 10 dwellings, in the context of Emerging Policy SP55 – Woodnesborough Small Housing Sites.</p> <p>5.7 Specific to the Promoter's interests at Land off The Street, Woodnesborough it is noted that:</p> <p>The Site is well-related to the existing settlement and would not impact any of the special qualities of the surrounding countryside or landscape; Development achieved through either allocation or windfall development would be in the context of retained trees and landscape features which, where appropriate, could be enhanced;</p> <p>Access to the Site can be achieved directly from The Street via KCC Highways Ownership and Landowner Ownership, contrary to the LPA's initial assessment;</p> <p>The local highway network has capacity to accommodate the additional traffic associated with the development, without adverse impact;</p> <p>The Sites falls within the EA Flood Risk Zone 1 (i.e. land assessed as having a less than 1 in 1,000 annual probability, or <0.1% chance of flooding);</p> <p>There are no designated heritage assets within or immediately adjacent to the site, and the development is not considered to affect the setting of any Listed Buildings.</p> <p>5.8 With a view to assisting the LPA in the implementation of its Plan, we welcome the opportunity to further provide comment on the preparation of the Plan which will help shape future development in the area.</p> <p>5.9 We look forward to the opportunity to participate at later hearing sessions where appropriate, advocating for the matters raised here.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	E4
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Can't comment on legal compliance
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	There is no mention of Section 215 enforcement anywhere in the plan. This is an enforcement tool available to remedy the problem of existing properties, which was raised in our earlier response, but the Local Plan re buildings (H1 TO H7) concentrates upon requirements etc for new builds. This we feel needs to be remedied in connection with attractiveness of the public realm for locals and visitors, maintenance of conservation areas. We also urge increased use of Article 4 Directions in conservation areas and extension to deprived wards in Dover where necessary.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Development Management Policies
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The development management policies are silent in respect of non-residential schemes in open countryside which are not employment sites. EM1 provides a robust approach for new employment sites in the countryside but the same rigour and balance afforded by the policy would not be available in respect of development management of non-residential schemes which are not employment sites. Examples of such may include charity, club or private venues, entertainment and meeting places, sites for specialist leisure or sports activities, sportsgrounds, off-road motorsports, shooting grounds, general aviation sites, watersports, etc. Such uses may not be commercial enterprises or give rise to employment, but can bring particular issues of noise, visual impact, loss of BMV agricultural land, movement or activity which affects landscape character, loss of residential or landscape amenity, light spill, highways and transport issues, and so on.</p> <p>We believe such proposals should be subject to the same rigour as that set out in EM1 for employment sites in the countryside, and possibly be subject to greater restriction where they are not aligned with strategic interests of the wider plan, such as economic benefit and the rural economy. The NPPF requires the policies recognise the intrinsic beauty of the countryside, and we believe this should apply regardless of the class of development proposed.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	The plan should include policy safeguards that protect the countryside from inappropriate and unsustainable development for all potential non-residential schemes which are not considered employment sites.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>In order to combat climate change, we need to reduce vehicle use and maximise carbon sequestration by protecting farm land, green space, trees and hedging. Given that Dover is a net exporter of labour to towns such as Canterbury, Folkestone, Ashford et al, it make no sense to build ever more houses in the wider Dover region, where there are insufficient jobs. Building more houses just means their residents will increase traffic volumes to get to jobs, especially at Whitfield, where there is no nearby rail link. Each new build home emits 80 tons of CO2 in its construction, so we need to be really sure that we can justify each and every house in each and every area.</p> <p>In addition, building on farmland reduces the capacity of the area to sequester carbon and the increased hard surfaces from building augment the damaging impact of surface water run off. The consequent loss of arable land reduces the district's ability to supply its own food, food which therefore has to be brought in from elsewhere at additional cost to the environment.</p> <p>This is contrary to Section 2.8 and 2.11 of the NPPF as it is unsustainable development.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	<p>Reduce the number of houses proposed in Dover district, prioritise brownfield sites in Dover Town and only build houses where there are sufficient jobs for the local population.</p> <p>Take seriously the climate emergency, instead of merely paying lip service to this catastrophe.</p>

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	It is vital that this issue is taken seriously. Everyone needs to take steps immediately to tackle the problem. The Dover plan is totally inadequate in this respect and in fact can only exacerbate the problem of global warming. The issue of global warming and climate change must be given a much higher priority.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP1
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>In October 2021, Aylesham Parish Council supported the Climate and Ecological Emergency (CEE) Bill which address the full extent of the climate and nature crisis in the UK. As a result, any local plan should use up-to-date science to make sound recommendations.</p> <p>As the district is extremely water scarce, all possible measures should be implemented to help mitigate water scarcity. The use of Sustainable Urban Drainage systems (SUDs) is required to be prominent in all future developments. This will help to deal with surface water flooding. We welcome the Draft Local Plan's hierarchy of methods of discharge, with the use of combined sewers coming last.</p> <p>This relates to CC6 of SP1 – Surface Water Management.</p> <p>There are a number of options to ensure new homes produce the least possible carbon emissions. Aylesham Parish Council would like to see Dover District Council require the full 2025 Future Homes Standard to be delivered now (this will reduce emissions by between 75-80% compared to current standards), not at some point during the Local Plan's lifetime.</p>

	<p>This relates to CC1 of SP1 – Reducing Carbon Emissions.</p> <p>We welcome the commitment to planting trees within new developments that are native to Kent. This will help to keep the rural feel of Aylesham alive. Currently we often see newly planted trees dying within the first few years of their lives. There must be a comprehensive plan to ensure that these trees reach maturity (part d) and how this will be enforced by the local authority.</p> <p>This relates to CC8 of SP1 – Tree Planting and Protection.</p> <p>Aylesham Parish Council welcomes the commitment to planting larger numbers of trees but feels this must come with a long-term solution to maintaining the trees. Dover District Council must also commit to the full 2025 future homes standard now.</p> <p>Aylesham Parish Council welcomes the addition and enhancement of open spaces and play areas. However, there are two points to note in the IDP: why would S106 monies from Aylesham be spent upgrading play areas in Nonington?; and play areas and open spaces are last to be delivered in developments – this must not happen in the future.</p> <p>Aylesham Parish Council is identified as “Delivery Partners” on a number of projects due to be delivered: we have not been consulted on this prior to the Regulation 19 document being released.</p> <p>The HRA[1] suggests that AYL003 – Land South of Aylesham is “high” suitability for the European Golden Plover, and so all measures must be taken to ensure this SPA protected bird species is still able to migrate and flourish in the area. SAP 25 (mixed use employment) is considered “moderate”.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Kent Wildlife Trust support the mention of the climate emergency and the District's commitment working towards carbon neutral. We advocate for the full 2025 Future Homes Standard to be delivered now, requiring a 75-80% reduction in current emissions, which will help the District reach its net zero target by 2030. At the very least this standard should be introduced via a phased approach across the Plan period to ensure that Dover is meets its targets to be carbon neutral. To tackle the climate emergency, drastic actions will be required during the plan period to ensure that reliance on fossil fuels is phased out but 2050.</p> <p>Emission reduction should also be supported by considering the supply chains of goods and services used in Dover, and supporting the development of local work hubs to reduce commuting.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	CC1
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	CC1 is unsound as developers should be building to Future Homes Standard in Dover District now if climate emergency declaration commitments are to be met. All new buildings, domestic and business, should have solar water heating and PV's. Retrofitting of existing housing stock needs to be done ASAP, installing renewable energy options an insulating. This would go a long way to achieveing climate emergency declaration commitments. This would create green jobs. Too much development in the current weak LDP is on agricultural land (eg Whitfield), internationally rare chalk grassland (eg Wellington Paddocks, Walmer), and rewilded areas (eg Betteshanger), rather than brownfield. This is contrary to NPPF.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Build to Future Homes standard now and have solar thermal and solar PV's on all buildings. Retrofit existing housing stock for renewables and insulation. Do not build on agricultural land, chalk grassland or rewilded sites as this is unsustainable.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	1 Introduction
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan is unsound as it does not comply with the legally binding commitment made by DDC when they declared a climate emergency in 2020 and prepared their climate change strategy. The plan will not do enough to meet the target of the district being net zero by 2050. DDC should be much more ambitious about the green credentials of new housing. If new homes generated their own power, were insulated to the highest standards, and collected rain water, it would greatly help stretched local services and go a long way towards making the housing stock fit for the coming decades.</p> <p>The regulation 19 stage of the consultation is not fit for purpose as it is overly complicated and very difficult to use. The process has left many members of the public including me and my wife feeling overwhelmed and confused as to how to make a representation. For those who are working full time this has been a task for which they do not have enough time. As a result those who may have wanted to make a submission have not been able to. The format of the submission form is also difficult to navigate. Without prior experience of planning law it is difficult to say whether a part of the plan is legal or not. As to the duty to cooperate it is impossible to know. The unsound plan needs updating after the government announcement on 5/12/22 that mandatory housing targets are not to be imposed. The figure of nearly 11,000 is unsustainable and should now be reviewed, particularly with respect to allocated land around Station Rd Walmer and proposed developments around villages.</p> <p>The character and landscape value of the district is being rapidly eroded under the current plan and this must not continue as it is contrary to NPPF 21. It is not sustainable to build on agricultural land which is in short supply as we are only 50% self sufficient in producing food in the UK. The CPRE has found that almost 14,500 hectares of farmland has been permanently lost to development since 2010. The contribution</p>

	<p>from the districts agricultural land is of vital importance. Much of the agricultural land is also vital for flood protection, and field margins are important for wildlife and biodiversity, forming corridors between habitats for vertebrates and nesting and roosting sites for birds. Dover District also has a wealth of character landscapes, AONB, heritage coast, nature reserves, internationally rare chalk grassland and rewilded areas such as Betteshanger Park. Overdevelopment under the last weak plan has meant that these areas are under pressure and being denuded as their boundaries are eroded and wildlife corridors between sites are cut off. The new plan does not do enough to protect these areas, wildlife and biodiversity. Developments should not be allowed to remove ancient woodlands and trees and biodiverse rich habitats even if it is argued that this is for the greater good. This is not sustainable as all nature is interconnected and if it fails then we all fail. The UK is one of the worst countries in the world for biodiversity loss, we have lost half of our biodiversity since the 1970's.</p> <p>Development has been at such a pace that infrastructure cannot keep up. Buses have been cut recently, cycle and pedestrian routes have not been upgraded sufficiently to connect some developments to main bus and train routes without car dependence. Aylesham has not had a secondary school which would mean children could walk to school. Many rural communities are entirely car dependent due to lack of buses and the roads not being safe to use their bikes. Not enough emphasis is put on renovating existing housing stock to provide greener, insulated, fuel efficient homes. Each new build generates around 56 tonnes of embedded carbon. The NPPF states that we should prioritise brownfield sites over greenfield but although there are many opportunities to develop brownfield sites in Dover, this has not been prioritised. Many developments have been for larger houses in villages and there is not enough provision for affordable housing.</p> <p>The wording of the local plan is not definitive, it leaves too many loop holes and vague preferences which enable large developers to argue and get what they want, to maximise profits, not what the people of the Dover area need.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Better mapping and understanding of the Dover District, taking into account internationally rare areas of chalk grassland, woodland and trees wherever they occur.</p> <p>Large buffers around the AONB to protect its character from the built environment. Stronger protection for the AONB and the Ripple LCA F3.</p> <p>Tighter protections on our remaining biodiversity.</p> <p>Tighter definitions in the local plan so that developers have no room to argue what has been specified in the local plan.</p> <p>Hire several biodiversity officers to monitor closely and prevent loss of ancient woodland, chalk grassland, veteran trees, protected wildlife and rich habitats and to actively go out into the community, looking for ways to improve biodiversity by such things as accessing grants for hedge planting and the creation of ponds where ever possible in our district.</p> <p>Employ experts to liaise with farmers in our area to encourage the most environmentally friendly farming and land management practices which will encourage maximum biodiversity in the countryside and maximum sequestration of carbon in soils and biomass.</p> <p>Stop the use of agricultural land for development.</p> <p>Renovate and insulate rather than build new houses, brownfield not greenfield.</p> <p>Turn attention away from destroying village communities with unsustainable housing estates outside their village boundaries.</p> <p>Do not give developers the get out clause of financial mitigation for destruction of wildlife and habitat. No development should further deplete our critically low levels of biodiversity.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	CC1 Reducing Carbon Emissions
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DTC consider CC1 to be unsound (not justified) on the basis that it does not adequately consider the legally binding target for the UK to bring all greenhouse gas emissions to net zero by 2050. Given the unprecedented climate and ecological emergency, it is incumbent on local authorities to take bold action on climate change. The BREEAM 'very good' standard is unambitious and inconsistent with the need to decarbonise at pace and scale. There are two standards above 'very good' - 'excellent' and 'outstanding' - that deliver far greater carbon emissions reductions. New homes built at 'very good' standard will contribute to the need for expensive retrofit to make them fit for the twenty-first century. They will also contribute to increased greenhouse gas emissions making this policy inconsistent with Strategic Policy 1 g) Ensuring that development is designed to reduce vulnerability to, and provide resilience from, the impacts arising from a changing climate, whilst not increasing the potential for increased greenhouse gas emissions in doing so.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<i>We recommend the following modification: To require all new homes to be built to achieve net zero carbon. Where it can be demonstrated this cannot be delivered on-site, developers would then be expected to pay into a carbon off-set fund. This fund would be administered by the Council; and, to require new non-residential development to be built to achieve net zero carbon. Where it can be demonstrated this cannot be delivered on-site, developers would then be expected to pay into a carbon off-set fund.</i> There are precedents for such requirements, e.g. Reading Borough Council Local Plan 2019 Section 4.4.36(c): 'all major new build residential development should be designed to achieve zero carbon homes'.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<u>DM 5 Climate Change</u> 5.5 Unlike DDC we <u>do</u> consider local energy-efficiency standards stronger than those intended by the national government in its Future Homes building standards to be necessary and more sound and effective. 5.6 Building regulations and enforcement of planning conditions. In recent years in the district, it has taken sometimes years of pestering by dedicated members of the public to get DDC planning enforcement officers out to problems created by larger developers. So this policy will only become sound, effective, meaningful with a significant increase in the number of planning enforcement officers.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	5.7 BREEAM 'very good' standard is the middle of their range, to be sound, the policy needs uplift to BREEAM 'excellent' or 'outstanding'. CC 1 Reducing Climate Emissions The local plan would become compliant with Legality (legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008), if the steps we recommend in comment on SP1 were to be made requirements for all applicants, to note the transformation of existing homes into future-proof zero carbon home to lift residents out of fuel poverty and to mitigate climate crisis is a key measure.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Response by the Home Builders Federation to the consultation on the Dover District Local Plan.</p> <p>1. Thank you for consulting the Home Builders Federation (HBF) on the Dover District Local Plan that is being proposed for submission to the Secretary of State for examination. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.</p> <p>SP3 – Housing Growth</p> <p>The policy is unsound as it not effective and is not sufficiently justified by the evidence base</p> <p>Housing needs</p> <p>2. The housing requirement of 10,998 over the plan period 2022 to 2040 is consistent with the minimum number of homes the Council should plan for using the standard method. However, what is not clear from the Council's evidence is whether this level of growth will be sufficient to meet the growth aspirations of the Council. Strategic Policy 6 sets out the Council's aspiration to deliver a minimum of 117,290 sqm of additional employment floorspace over the plan period but we could not find evidence to indicate that this number of homes will be sufficient to support the level of economic growth the Council is aspiring to deliver. The NPPF sets out at paragraph 82c that the potential barriers to investment in an area, such as a lack of housing, needs to be addressed in the plan and the Council need to be certain that the housing requirement set out in SP3 is supportive of its aspirations around economic growth.</p> <p>Older people's housing needs</p> <p>3. The HBF is concerned with the limited references to the needs to provide special accommodation for older people. It is noted that the mix of homes on allocated sites will need to take account of the need for such accommodation but there appears to be no indication of whether this will be sufficient to meet the needs identified in the 2019 SHMA update. It also completely ignores the potential to allocate standalone sites to deliver homes for older people and there is no specific policy setting out the need for such accommodation and how the Council will support such development to come forward outside of the strategic allocations. The HBF would recommend that a policy setting out the Council's support for older people's accommodation is include in the plan. In order to be effective, we would suggest that this policy sets out the need for such accommodation and that there a presumption in favour of such development where needs are not being met.</p> <p>Housing supply</p> <p>4. Table 3.1 in the Local Plan states that overall housing supply to meet needs is 11,924, leaving a contingency buffer of 924 homes between housing needs and supply - around 8% of needs. Whilst the HBF welcomes the provision of a buffer between needs and supply we do not consider 8% to be sufficiently large to ensure that needs are met in full over the plan period, especially given that around half of the homes will come from the Whitfield Urban Expansion. In order to ensure the Council's needs are met in full the HBF recommends that a buffer of around 20% is necessary. The additional buffer should be brought forward through the allocation of smaller sites which will deliver earlier in the plan period and provide a buffer in overall supply should there be delays in the delivery of the larger strategic sites in Dover.</p> <p>Meeting affordable housing needs</p> <p>5. The most recent Strategic Housing Market Assessment undertaken by the Council is the 2019 update to the 2017 SHMA. This sets out hat there is a need for 3,387 new affordable homes between 2020 and 2040. No further assessments appear to have been undertaken since that period. However, the latest AMR indicates that 75 affordable homes were built in 2020/21 with permissions for a further 108 units which can be expected to come forward in 2021/22. As such if the SHMA update is used as the basis for affordable housing needs there remains a need for 3,204 homes over the plan period – around 30% of expected supply on sites that are likely to deliver affordable housing¹.</p> <p>6. Whilst this would appear to show that on the basis of SP5 the need for affordable housing would be addressed we note that the delivery of affordable housing in the past has been well below what has been expected. The 2020/21 Authority Monitoring Report indicates on page 19 that delivery since 2010/11, the year the Core Strategy was adopted, has been at around 20% of housing completions. In addition, the viability study indicates that the strategic sites will find it challenging to deliver 30% affordable housing. This would suggest that in order to meet needs the Council will need to allocate additional sites.</p> <p>¹ Total supply of 11,924 less small site windfall allowance of 1,050</p>

Conclusions on housing supply

7. To conclude on housing supply the HBF would recommend that further sites are allocated in this local plan. This would have the twin benefits of meeting the need for affordable housing in the district as well as providing an additional buffer between housing needs and supply.

SP5 – Affordable housing

The policy is unsound as it is not fully justified.

8. This policy requires residential development of 10 or more units to deliver 30% of the homes provided as affordable housing. The update notes on the viability study notes at paragraph 56 that this level of affordable housing requirement is deliverable in high and medium value areas alongside the other costs placed on development by the local plan. However, the study outlines that this level of provision will be challenging on the strategic sites and shows that it would not be viable in lower value areas and in the urban area of Dover. The Council recognises these concerns in part by removing the requirement to provide affordable housing in the urban area of Dover. However, no allowance is made with regard to the lower value areas or strategic sites.

9. Whilst the Council states that aside from the strategic allocation there is little planned development in the lower value area it is still necessary for the policy should reflect this evidence presented by the Council. Paragraph 58 of the NPPF recognises that decision makers should be able to assume that development that a policy compliant scheme is viable. This requires policies that place additional costs on development to reflect the evidence and in cases such as this set different requirements for different areas regardless of the development expectations in those areas. As such the HBF would recommend that the policy is amended to remove the requirement for affordable housing contributions in the lower value areas.

10. It is also notable in tables 10.17 and 10.18 of the Whole Plan Viability Study that the outside of greenfield sites at Deal extra care and sheltered housing for older people is not able to viably deliver affordable housing. Given that such development often comes forward on sustainable PDL sites close to services such development should be specifically excluded within SP5 from providing affordable housing contributions.

CC1 – Reducing Carbon Emissions

The policy is unsound as not consistent with national policy, justified or effective.

11. Through policy CC1 the Council indicate that they expect development to meet the Future Homes Standard (FHS) if this becomes a requirement that is delivered

through local plans. However, the expectation from Government is clear that FHS will be delivered through amendments to the Building Regulations and will not be an optional standard adopted as part of a local plan. The improvements to energy efficiency standards in new buildings and the transition to FHS has already started with the improvements to part L of the Building Regulations that came into force in June of 2022. These will see a circa 30% improvement in CO2 emissions prior to the introduction of FHS which will ensure that new homes are zero carbon ready from 2025. As such it is not necessary to refer to the Future Homes Standard and the Council should remove reference to the standard in policy which will be delivered as part of changes to part L of the Building Regulations.

12. The HBF is also concerned that the Council do not appear to have tested the Future Homes Standard within the update note on the viability assessment. The update note sets out at paragraph 23 that the initial improvements to the energy efficiency introduced in June of 2022 were included but no additional costings have been made with regard to the Future Homes Standard. The Government expects this to cost the house building industry an extra £100 million per year though this fails to recognise that there is likely to be additional electricity connection costs with the move away from gas and that the assumed reduction in the cost of air source heat pumps is unlikely. Given the significant increase in costs from these new standards will come into force in 2025, not long after the expected adoption of this local plan, these costs should have been considered through the viability assessment.

NE1 – Biodiversity Net Gain

Policy is not needed as this will be delivered through the Environment Act and support regulations.

13. Given that the requirement to provide a 10% Biodiversity Net Gain is set out in legislation and supporting regulations and guidance and will be in force when the plan is adopted, the HBF would question whether it is necessary to include a detailed policy on BNG. Including a detailed policy could lead to inconsistency between policy and legislation should this change either prior to the introduction of BNG at the end of 2023, or if there be changes to regulation and guidance in future. As council notes in para 11.6 the policy is intended to reflect the requirements of the Act and as we would suggest that it would be more appropriate to refer in policy SP14 to the need to deliver a 10% BNG in line with relevant legislation and guidance.

Conclusion

	<p>14. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, in the following key areas: Economic growth has not been take into account when considering the minimum number of homes to be planned for; Greater flexibility required in the local plan to ensure needs are met in full; No specific policy with reagrd to the needs of older people Affordable housing policy does not reflect the full evidence on viability References to Future Homes Standard in policy CC1 unnecessary and unjustified No need to include detailed policy on BNG given that this is a requirement of legislation with associated regulations and guidance</p> <p>15. We hope these representations are of assistance in taking the plan forward to the next stage of plan preparation and examination. I would also like to express my interest in attending any relevant hearing sessions at the Examination in Public. Should you require any further clarification on the issues raised in this representation please contact me.</p> <p>2 Building Homes in a changing business environment: an assessment of new and forthcoming additional costs of housing delivery. (DDC Note - Full Representation attached to SDLP1883. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1883.) Draft Policy CC1 – reducing Carbon Emissions - COMMENT Draft Policy CC1 states: In the event that the Future Homes Standard is required to be delivered through the planning system, all new residential dwellings must achieve, as a minimum, a reduction in carbon as required by this Standard The Government's response to The Future Homes Standard (January 2021) sets out that the Future Homes Standard will be delivered through amendments to the Building Regulations. In June 2022, some of these amendments came into force. Given this, it is not justified or effective to include a policy that is covered by other relevant legislation. The reference to the Future Homes Standard should be removed from the policy. Recommendation: Reference to the Future Homes Standard is removed from Draft Policy CC1.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Renewable energy sources should be expected as standard on all new developments. Further, we call for that developments to demonstrate how they have incorporated all positive principles of the energy hierarchy, including reducing emissions, renewables, increased energy efficiency and energy saving.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	We urge the council to look at local energy schemes and the retrofitting of renewable energies to existing commercial and residential buildings. Such models would benefit both the environment and the local community. Retrofitting of renewable energy has the added benefit of reduced land take for renewables. There is potential that if local renewable energy supply took off that it could serve as an alternative to replacing larger schemes, with reduced impacts on biodiversity if solar panels are being retrofitted to buildings. Crude estimates indicate that the retrofitting of solar panels to 10% of schools nationwide would be equivalent in energy generation to a scheme the size of the Cleve Hill Solar Park. We suggest adding: " <i>The retrofitting of renewable energy technologies to existing buildings, in a way that does not increase land take, will be prioritised</i> " to Policy CC3.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	<p>This section of the plan is not consistent with NPPF 21 - development must be sustainable - there is no mention of green economic growth.</p> <p>Quality of 'growth' is more important in crisis-ridden 2020 to 2040 than quantity of 'growth'. Because it is more sustainable as we look ahead to 2040 – 2060 and beyond.</p> <p>In the current economic climate energy prices, business rates, public sector cuts are making public and private sector employers (care homes, schools, health centres, hospitality, police (£30 million cut in Kent), buses, independent retail) fear for their survival.</p> <p>To be sound, effective and compliant with the realities of here and now, this is the direction DDC Local Plan should take. The local economy needs pump-priming, national fuel security needs to be enhanced, people need lifting out of fuel poverty. The local plan could do more than allocating sites and floor space.</p>

to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

Transition to a greener economy, a means of making us more resilient economically, will be helped considerably by the ambitions of Port of Dover to decarbonize its estate by 2025 and to take seriously its scope 3 corporate responsibility in an inclusive manner to support local communities and economic players as they transition to a greener business too.

There appears to be little mention of using the Local Plan to improve educational attainment by, for example, specific policies to

- forge deeper links with FE institutions (eg Dover Technical College) given the skills gap relating to the Green Homes agenda,
- encourage higher education establishments to develop facilities in the district, and thereby to develop a knowledge-based economy beyond the former Pfizer's site.
- encourage the long-promised incubation hubs for the newly qualified in the district. This would contribute to raising the average level of earnings in the district and to combating the high levels of deprivation experienced in some wards.

A glaring omission relates to new economic opportunities created by climate-friendly recovery sectors. Three are essential in Dover District. With a 70% rural economy, which is severely challenged by increased costs of imports, and climate problems including water shortage. Diversification into agri-forestry could become popular among the farming community. It is recommended by Nature-Friendly Farming Network. Examples include

- protecting arable yields in cases of drought, by planted strips of suitable, native, drought-tolerant trees, (which counter soil erosion, while increasing carbon sequestration) and,
- bringing back to life existing but neglected, traditionally coppiced woodland, causing it to be harvested for small-scale biomass on a rotational basis. Similarly, short rotation forestry would create rural income and mitigate climate change.

Another key to meeting climate targets is increasing the amount of land used for growing food for people rather than livestock. This would create new outdoor jobs as would replacing imported market-garden food, with locally grown fruit, vegetables and pulses, this is a growth sector too, and is especially sustainable where zero / minimal pesticides are used, and Nature Friendly Farming practices are used. So rural areas, fields and woodland should be valued as locations of employment in themselves.

The up-grading of all rented housing stock (both public and private sector) to zero homes standard, would mean, it doesn't need to be done again before the local and legally-binding national target of 2050, and is thus a pre-requisite for the Local Plan to become legally compliant, and this can be made to benefit the local economy. It will be necessary to ensure that publicly owned rented housing stock stays in public hands. To incentivise private landlords, DDC should set up a register of private landlords, and to qualify for registration, landlords should have to show that homes rented are EPC C in 2023, EPC B in 2024, and zero carbon in 2025. As this will push up the value of their property, landlords should not find it difficult to access cheap loans to carry out the retrofit, (DDC could plan an intermediary role or suggest sources of finance). Tenants will benefit in terms of heating costs saved and improved standards of health, which is also a saving to the public purse. The economy will benefit in terms of jobs created for local trades people.

A third sector would include the fitting and maintenance of renewable energy installations, e.g. small-scale on-shore wind, small and medium scale solar (on domestic or non-residential roofs or to be combined with grazing land below, also on car parks), micro-tidal (tidal currents we are advised are very suitable locally), or 'green gas' as pioneered by Ecotricity in Hampshire (as the grass-cuttings from Dover's many golf courses and campsites are likely to be suitable). To maintain the returns on investment in these sectors within the regional economy, and stop them being off-shored, a priority should be given to schemes which are 51% or more community-owned.

The Dept for Transport bought the site they wanted for Dover Inland Border Facility from a farmer in Guston for £22million, and in 2022 DfT publicly said the site would not be needed as Dover IBF. Could this become a combination of grazing under solar canopies? Near 2 schools and a sports centre, it is an unsuitable location for the HGV park that is needed at a site further outside the Dover urban area.

Tourism and Tourist / Visitor Accommodation.

It is very unsound, for DDC to fail to make AirB&B owners register with them, so that they can be charged business rate council tax. In terms of housing provision, AirB&B, both nationally, and in Kent's coastal towns especially, have a very negative effect of reducing the private rental market in 2022 and thus forcing up the average monthly rents for private tenants.

The local plan would be more compliant with legality, if DDC regeneration took the greening of the economy more seriously and looked at smaller zero-carbon tourism /transport activity projects within Dover town; harbour trips with zero carbon, solar-powered boats. Better coach and toilet facilities are needed to boost tourism in Dover.

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Public Works Loan Board or municipal loans could be used in Dover as in East Sussex, where they've invested in skilled jobs transforming existing homes into zero carbon homes across seven district councils. (The Lewes Model explained Green World).</p> <p>Businesses to be encouraged and helped to have more solar PV and Wind turbines.</p> <p>Solar canopies over the marshalling yards of Port of Dover, to generate energy that fridge trucks (whose engine-idling contaminates Dover) could plug into while waiting to board ferries.</p> <p>Rural economy growth through new farming initiatives (see above).</p> <p>Upgrade housing stock - so creating green jobs</p> <p>Improve facilities to promote tourism in Dover town.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	<p>CC2</p>
<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Positively prepared Justified Effective Consistent with National Policy</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>Not Applicable</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Not Applicable</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Paragraph 5.12 refers to the provision of adequate space for composting and paragraph 5.13 refers to green roofs, which are not carried through as policy requirements. Reference to growing food at CC2(d) is welcome, but CPRE queries how much agricultural land will be lost to development in the plan?
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	CPRE Kent would wish to participate at the examination hearings to explore these issues further.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	1 Introduction
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan is unsound as it does not comply with the legally binding commitment made by DDC when they declared a climate emergency in 2020 and prepared their climate change strategy. The plan will not do enough to meet the target of the district being net zero by 2050. DDC should be much more ambitious about the green credentials of new housing. If new homes generated their own power, were insulated to the highest standards, and collected rain water, it would greatly help stretched local services and go a long way towards making the housing stock fit for the coming decades.</p> <p>The regulation 19 stage of the consultation is not fit for purpose as it is overly complicated and very difficult to use. The process has left many members of the public including me and my wife feeling overwhelmed and confused as to how to make a representation. For those who are working full time this has been a task for which they do not have enough time. As a result those who may have wanted to make a submission have not been able to. The format of the submission form is also difficult to navigate. Without prior experience of planning law it is difficult to say whether a part of the plan is legal or not. As to the duty to cooperate it is impossible to know. The unsound plan needs updating after the government announcement on 5/12/22 that mandatory housing targets are not to be imposed. The figure of nearly 11,000 is unsustainable and should now be reviewed, particularly with respect to allocated land around Station Rd Walmer and proposed developments around villages.</p> <p>The character and landscape value of the district is being rapidly eroded under the current plan and this must not continue as it is contrary to NPPF 21. It is not sustainable to build on agricultural land which is in short supply as we are only 50% self sufficient in producing food in the UK. The CPRE has found that almost 14,500 hectares of farmland has been permanently lost to development since 2010. The contribution from the districts agricultural land is of vital importance. Much of the agricultural land is also vital for flood protection, and field margins are important for wildlife and biodiversity, forming corridors between habitats for vertebrates and nesting and roosting sites for birds. Dover District also has a wealth of character landscapes, AONB, heritage coast, nature reserves, internationally rare chalk grassland and rewilded areas such as Betteshanger Park. Overdevelopment under the last weak plan has meant that these areas are under pressure and being denuded as their boundaries are eroded and wildlife corridors between sites are cut off. The new plan does not do enough to protect these areas, wildlife and biodiversity. Developments should not be allowed to remove ancient woodlands and trees and biodiverse rich habitats even if it is argued that this is for the greater good. This is not sustainable as all nature is interconnected and if it fails then we all fail. The UK is one of the worst countries in the world for biodiversity loss, we have lost half of our biodiversity since the 1970's.</p> <p>Development has been at such a pace that infrastructure cannot keep up. Buses have been cut recently, cycle and pedestrian routes have not been upgraded sufficiently to connect some developments to main bus and train routes without car dependence. Aylesham has not had a secondary school which would mean children could walk to school. Many rural communities are entirely car dependent due to lack of buses and the roads not being safe to use their bikes. Not enough emphasis is put on renovating existing housing stock to provide greener, insulated, fuel efficient homes. Each new build generates around 56 tonnes of embedded carbon. The NPPF states that we should prioritise brownfield sites over greenfield but although there are many opportunities to develop brownfield sites in Dover, this has not been prioritised. Many developments have been for larger houses in villages and there is not enough provision for affordable housing.</p> <p>The wording of the local plan is not definitive, it leaves too many loop holes and vague preferences which enable large developers to argue and get what they want, to maximise profits, not what the people of the Dover area need.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Better mapping and understanding of the Dover District, taking into account internationally rare areas of chalk grassland, woodland and trees wherever they occur.</p> <p>Large buffers around the AONB to protect its character from the built environment. Stronger protection for the AONB and the Ripple LCA F3.</p> <p>Tighter protections on our remaining biodiversity.</p> <p>Tighter definitions in the local plan so that developers have no room to argue what has been specified in the local plan.</p> <p>Hire several biodiversity officers to monitor closely and prevent loss of ancient woodland, chalk grassland, veteran trees, protected wildlife and rich habitats and to actively go out into the community, looking for ways to improve biodiversity by such things as accessing grants for hedge planting and the creation of ponds where ever possible in our district.</p> <p>Employ experts to liaise with farmers in our area to encourage the most environmentally friendly farming and land management practices which will encourage maximum biodiversity in the countryside and maximum sequestration of carbon in soils and biomass.</p> <p>Stop the use of agricultural land for development.</p>

	<p>Renovate and insulate rather than build new houses, brownfield not greenfield.</p> <p>Turn attention away from destroying village communities with unsustainable housing estates outside their village boundaries.</p> <p>Do not give developers the get out clause of financial mitigation for destruction of wildlife and habitat. No development should further deplete our critically low levels of biodiversity.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	5.16 CC2
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The County Council was pleased to see that the text highlights the role that historic buildings can play in addressing climate change and refers to Historic England guidance. Old buildings can sometimes be energy efficient than newer ones and of course have already been built. Thus, it may take fewer overall resources to adapt an old building than to demolish it and build a completely new one.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance	

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	This land has had some work on pipes for the sewage system. It is not effective for the current number of houses as there is a regular sewage stench coming from the corner in your development plan for more housing. There are no places for any children who would move in to this development locally in primary schools. There will be no transport by the time this is built for children to be able to go to secondary schools. None of this housing will be financially achievable by local people or their extended families. The prospective buyers for these homes can only be the cash rich or business purchasers who can avoid many taxes to create income from rents that are unaffordable to local people. There is no infrastructure proposed for this section of the New Dormitory Town encompassing

	and extending both Aylesham and Adisham. No supermarket, no youth centre, no police, no doctors, no dentist, no focal point where communities can meet. No accomodation whatsoever for safeguarding the community. The ability of the land to absord heavy rainfall is compromised, the ability of the land to absorb CO2 emmissions is compromised, the ability of the land to grow food for our local people is removed entirely. We are in a cost of living and coming into an availability of purchasing food for our whole population crisis.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Upgrade the housing stock you have and that housing association has to be of a decent human habitable standard. You have a lot of homes that are damp and mouldy, your relevant departments do not respond adequately nor timely to emergencies such as boiler breakdowns or water leaking through houses. You could just as easily as another authority, have been sued for harm to babies from mould and damp as another local authority was. Build on brownfield sites. build to a good sustainable standard ie passive solar heating, heat pumps etc so that the tennants of the landlords the houses are sold to are warm without draughts and with a low carbon cost to heat. Properly update the water and sewage systems to cope with the massive extra load on systems that are failing with the current load. Put in protections so that our rivers and our seas are no longer discharging fecal matter into our local rivers and the channel where so many like to swim. build a school for our teenagers so poor families don't have to struggle to pay £450 for each child each year for the privelige of going to a secular state school, then being terrified that your children can't get transport to the school anyway. Your planning has a role in the educational and health comprehensive failure for SEND children and along with them secondary school children in your villages, but all this (8k in total) extra housing without any of the vital infrastructure,will make this place like a ghetto.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I consider that this would be a reasonable adjustment to make the consultation process accessible

Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The local plan will not be compliant with Legality (legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008), unless DDC adopts zero carbon homes standard. We note the list of councils building zero carbon homes includes; Exeter City Council, (200 finished, 1000 on the way), Leeds (1000 nearing completion), Norwich (100 finished), York, Wales (1400), Oxford (40), Enfield, Meridian Water development (10,000 homes). https://www.theguardian.com/artanddesign/2021/mar/06/eco-homes-become-hot-property-in-uks-zero-carbon-paradigm-shift So the draft wording of DDC nLP we find very weak.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	We recommend this (closely based on ReadingBC Local Plan Adopted 2019 and Oxford City Council Local Plan adopted 2016). ' <i>Given the scale of residential development in Dover up to 2040, achieving the aims of the Climate Change Strategy will not be possible without that development having a minimal impact on carbon emissions. Therefore, the requirement will be that major new housing is built to zero carbon homes standard. A revised Sustainable Design and Construction SPD to be produced in 2023 will contain more detail on achieving this requirement, but in general, where homes are not designed to be carbon neutral, this will mean as a minimum a 40% improvement in the dwelling emission rate over the 2013 Building Regulations plus a contribution of £1,800 per tonne towards carbon offsetting within Dover (calculated as £60 per tonne over a 30 year period). The requirement will increase from 31 March 2028 to at least a 50% reduction in carbon emissions. (based on Oxford City Council adopted local plan)</i> Where it is proposed to meet the zero carbon homes requirement in another way, clear evidence should be provided to demonstrate how it will be achieved at planning application stage. Zero carbon homes is an achievable standard that, until recently, was intended to be a national requirement in the Building Regulations.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	CC2
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Policy CC2 outlines the requirement for "All applications for new buildings should be accompanied by a Sustainable Design and Construction Statement demonstrating how the requirements of this Policy have been met". While Gladman are supportive of the requirements of Policy CC2, it would be more appropriate for detailed applications to be supported by a Sustainable Design and Construction Statements rather than all applications.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note <i>The text below is an extract from the original representation which is attached to SDLP1438.</i></p> <p>CC 2 Sustainable Design & Construction</p> <p>The local plan will not be compliant with Legality (legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008), unless DDC adopts zero carbon homes standard. We note the list of councils building zero carbon homes includes; Exeter City Council, (200 finished, 1000 on the way), Leeds (1000 nearing completion), Norwich (100 finished), York, Wales (1400), Oxford (40), Enfield, Meridian Water development (10,000 homes). https://www.theguardian.com/artanddesign/2021/mar/06/eco-homes-become-hot-property-in-uks-zero-carbon-paradigm-shift So the draft wording of DDC nLP we find very weak.</p> <p>We recommend this (closely based on Reading BC Local Plan Adopted 2019 and Oxford City Council Local Plan adopted 2016). 'Given the scale of residential development in Dover up to 2040, achieving the aims of the Climate Change Strategy will not be possible without that development having a minimal impact on carbon emissions. Therefore, the requirement will be that major new housing is built to zero carbon homes standard. A revised Sustainable Design and Construction SPD to be produced in 2023 will contain more detail on achieving this requirement, but in general, where homes are not designed to be carbon neutral, this will mean as a minimum a 40% improvement in the dwelling emission rate over the 2013 Building Regulations plus a contribution of £1,800 per tonne towards carbon offsetting within Dover (calculated as £60 per tonne over a 30 year period). The requirement will increase from 31 March 2028 to at least a 50% reduction in carbon emissions. (Based on Oxford City Council adopted local plan)</p> <p>Where it is proposed to meet the zero carbon homes requirement in another way, clear evidence should be provided to demonstrate how it will be achieved at planning application stage. Zero carbon homes is an achievable standard that, until recently, was intended to be a national requirement in the Building Regulations</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	CC3 - Renewable and Low Carbon Energy
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Renewable energy sources should be expected as standard on all new developments. Further, we call for that developments to demonstrate how they have incorporated all positive principles of the energy hierarchy, including reducing emissions, renewables, increased energy efficiency and energy saving.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	We urge the council to look at local energy schemes and the retrofitting of renewable energies to existing commercial and residential buildings. Such models would benefit both the environment and the local community. Retrofitting of renewable energy has the added benefit of reduced land take for renewables. There is potential that if local renewable energy supply took off that it could serve as an alternative to replacing larger schemes, with reduced impacts on biodiversity if solar panels are being retrofitted to buildings. Crude estimates indicate that the retrofitting of solar panels to 10% of schools nationwide would be equivalent in energy generation to a scheme the size of the Cleve Hill Solar Park. We suggest adding: " <i>The retrofitting of renewable energy technologies to existing buildings, in a way that does not increase land take, will be prioritised</i> " to Policy CC3.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP 6 Economic growth
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This section of the plan is not consistent with NPPF 21 - development must be sustainable - there is no mention of green economic growth. Quality of 'growth' is more important in crisis-ridden 2020 to 2040 than quantity of 'growth'. Because it is more sustainable as we look ahead to 2040 – 2060 and beyond.</p> <p>In the current economic climate energy prices, business rates, public sector cuts are making public and private sector employers (care homes, schools, health centres, hospitality, police (£30 million cut in Kent), buses, independent retail) fear for their survival.</p> <p>To be sound, effective and compliant with the realities of here and now, this is the direction DDC Local Plan should take. The local economy needs pump-priming, national fuel security needs to be enhanced, people need lifting out of fuel poverty. The local plan could do more than allocating sites and floor space.</p> <p>Transition to a greener economy, a means of making us more resilient economically, will be helped considerably by the ambitions of Port of Dover to decarbonize its estate by 2025 and to take seriously its scope 3 corporate responsibility in an inclusive manner to support local communities and economic players as they transition to a greener business too.</p> <p>There appears to be little mention of using the Local Plan to improve educational attainment by, for example, specific policies to</p> <ol style="list-style-type: none"> forge deeper links with FE institutions (eg Dover Technical College) given the skills gap relating to the Green Homes agenda, encourage higher education establishments to develop facilities in the district, and thereby to develop a knowledge-based economy beyond the former Pfizer's site. encourage the long-promised incubation hubs for the newly qualified in the district. This would contribute to raising the average level of earnings in the district and to combating the high levels of deprivation experienced in some wards.

A glaring omission relates to new economic opportunities created by climate-friendly recovery sectors. Three are essential in Dover District. With a 70% rural economy, which is severely challenged by increased costs of imports, and climate problems including water shortage. Diversification into agri-forestry could become popular among the farming community. It is recommended by Nature-Friendly Farming Network. Examples include

a) protecting arable yields in cases of drought, by planted strips of suitable, native, drought-tolerant trees, (which counter soil erosion, while increasing carbon sequestration) and,

b) bringing back to life existing but neglected, traditionally coppiced woodland, causing it to be harvested for small-scale biomass on a rotational basis. Similarly, short rotation forestry would create rural income and mitigate climate change.

Another key to meeting climate targets is increasing the amount of land used for growing food for people rather than livestock. This would create new outdoor jobs as would replacing imported market-garden food, with locally grown fruit, vegetables and pulses, this is a growth sector too, and is especially sustainable where zero / minimal pesticides are used, and Nature Friendly Farming practices are used. So rural areas, fields and woodland should be valued as locations of employment in themselves.

The up-grading of all rented housing stock (both public and private sector) to zero homes standard, would mean, it doesn't need to be done again before the local and legally-binding national target of 2050, and is thus a pre-requisite for the Local Plan to become legally compliant, and this can be made to benefit the local economy. It will

be necessary to ensure that publicly owned rented housing stock stays in public hands. To incentivise private landlords, DDC should set up a register of private landlords, and to qualify for registration, landlords should have to show that homes rented are EPC C in 2023, EPC B in 2024, and zero carbon in 2025. As this will push up the value of their property, landlords should not find it difficult to access cheap loans to carry out the retrofit, (DDC could plan an intermediary role or suggest sources of finance). Tenants will benefit in terms of heating costs saved and improved standards of health, which is also a saving to the public purse. The economy will benefit in terms of jobs created for local trades people.

A third sector would include the fitting and maintenance of renewable energy installations, e.g. small-scale on-shore wind, small and medium scale solar (on domestic or non-residential roofs or to be combined with grazing land below, also on car parks), micro-tidal (tidal currents we are advised are very suitable locally), or 'green gas' as pioneered by Ecotricity in Hampshire (as the grass-cuttings from Dover's many golf courses and campsites are likely to be suitable). To maintain the returns on investment in these sectors within the regional economy, and stop them being off-shored, a priority should be given to schemes which are 51% or more community-owned.

The Dept for Transport bought the site they wanted for Dover Inland Border Facility from a farmer in Guston for £22million, and in 2022 DfT publicly said the site would not be needed as Dover IBF. Could this become a combination of grazing under solar canopies? Near 2 schools and a sports centre, it is an unsuitable location for the HGV park that is needed at a site further outside the Dover urban area.

Tourism and Tourist / Visitor Accommodation.

It is very unsound, for DDC to fail to make AirB&B owners register with them, so that they can be charged business rate council tax. In terms of housing provision, AirB&B, both nationally, and in Kent's coastal towns especially, have a very negative effect of reducing the private rental market in 2022 and thus forcing up the average monthly rents for private tenants.

The local plan would be more compliant with legality, if DDC regeneration took the greening of the economy more seriously and looked at smaller zero-carbon tourism /transport activity projects within Dover town; harbour trips with zero carbon, solar-powered boats.

Better coach and toilet facilities are needed to boost tourism in Dover.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Public Works Loan Board or municipal loans could be used in Dover as in East Sussex, where they've invested in skilled jobs transforming existing homes into zero carbon homes across seven district councils. (The Lewes Model explained | Green World).

Businesses to be encouraged and helped to have more solar PV and Wind turbines.

Solar canopies over the marshalling yards of Port of Dover, to generate energy that fridge trucks (whose engine-idling contaminates Dover) could plug into while waiting to board ferries.

Rural economy growth through new farming initiatives (see above).

Upgrade housing stock - so creating green jobs

Improve facilities to promote tourism in Dover town.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>These representations to the Regulation 19 stage local plan consultation are made by Dover Harbour Board. The Harbour Board is responsible for the administration, maintenance and improvement of the harbour at the Port of Dover, which itself is the busiest international roll-on roll-off ferry port in the UK.</p> <p>The Port of Dover is one of the UK's most important strategic economic assets. The Port of Dover is the UK's busiest international ferry port, handling more lorries than all other UK ports. Its operation is capable of facilitating 120 ferry movements and 110 miles of freight per day. £144bn worth of UK trade and 33% of all trade with the EU is handled by the Port of Dover.</p> <p>Further, Dover is the UK's second busiest cruise port. Over 200,000 cruise passengers visit the Port of Dover, a number The Harbour Board is actively looking to grow. Embarkations on day trips and excursions directly boost the local and regional economy, with an average passenger spend equivalent to £322 pre-embarkation, and £84 during a port visit. The benefits to the local Dover economy are significant; it is estimated</p>

that this generates circa £47m of direct passenger spending annually in the local economy. The Port of Dover indirectly supports over 5,000 jobs, many of them in the local area, many of which would be affected by any reduction in cruise calls.

The Port of Dover therefore is a significant stakeholder in Dover District with a large influence on the local economy, both directly in terms of visitors, passenger throughput and employment, and indirectly by its impact on the highway network. The Harbour Board considers that the emerging Dover Local Plan needs to appropriately consider and account for the aspirations of The Harbour Board to improve operations more widely and plan for a low carbon future.

Sustainability and renewable energy

The Harbour Board is also actively taking a role in tackling and mitigating for climate change. Dover's already significant role as the UK's gateway to Europe is expected to grow over the coming years. Methods of transportation and supporting infrastructure needs to adapt and become less reliant on fossil fuels. The Harbour Board is exploring ways in which it can do this, and also provide for its own energy demands into the future.

Whilst the emerging local plan appears to broadly support the aspirations of the Harbour Board on the above points, we have identified two draft policies which require some amendment in order to assist The Harbour Board in delivering its goals for wider improvements to the management of freight and providing for a sustainable future for Port of Dover operations.

The Harbour Board considers that the emerging plan cannot be considered sound without the amendments outlined below, given the national strategic role of Dover Port and the importance of its continued effective operation.

Draft Policy CC3 – Renewable and Low Carbon Energy

Decarbonisation and a move toward green energy are national priorities and are clearly set out in the UK government's commitment to net zero by 2050. Freight and port operations have a large part to play and are directly addressed in the DfT's Transport Decarbonisation Plan (TDP) (2021)³.

The TDP sets out commitments to: consult on phasing out dates for the sale of all new non-zero emission HGVs; to end the sale of new non-zero emission HGVs from 3.5 – 26 tonnes by 2035; and the sale of all new non-zero emission HGVs by 2040. In addition it commits to investment into zero emission HGV technology and other measures to support efficiency improvements in the existing fleet and stimulate demand for zero-emission vehicles.

In terms of maritime freight, the TDP pledges to “Consult on the appropriate steps to support wider deployment of shore power, including potential regulatory interventions, for both vessels and ports”. It also states that the government will “Accelerate the development of zero emission maritime technology and infrastructure in the UK via a £23m Clean Maritime Demonstration Competition and explore establishing a UK Shipping Office for Reducing Emissions.”

A consultation was held this year (following another pledge in the TDP) on “Domestic maritime decarbonisation: the course to net zero emissions” and further commitments were made to exploring economic incentives to promote maritime decarbonisation.

Challenges for the Port of Dover

The Port of Dover is focused on reducing the carbon footprint of freight and ferry traffic in line with these national commitments and has signed an agreement with its partners at Calais and Dunkirk to deliver the world's first ‘Green Shipping Corridor’. Furthermore, decarbonising activity at the Port of Dover will play an important role in delivering Priority 2 ‘Enabling the transition to Net Zero’ as set out in DfT's Future of Freight.

This presents some challenges to the Port of Dover. Firstly, it will need to support the next generation of cleaner ferries with onshore maritime shore power (providing power from a land-based source to a vessel to cover its energy needs at berth). Modern green energy vessels, whether fully electric, hydrogen powered or hybrid, will change energy consumption and demand at the Port.

Secondly, the Port will also have a role to play in providing for electric or hybrid HGVs as they pass through. This will further change energy demands at the Port of Dover, whether that is done at the existing port or at an Inland Terminal.

The Harbour Board has undertaken studies to assess potential power needs over the next 40 years. The report tested two scenarios; ‘High electrification (80% of HGVs are electrified, 100% of ferries)’; and ‘Greater role for Hydrogen fuel’. The high electrification scenario predicts annual electricity consumption reaching 434,000 MWh. This reduces to 61,000 MWh in the scenario where Hydrogen plays a more significant part in future energy mix. The baseline at the time of the study was 17,000 MWh, so both scenarios represent a significant increase in demand for electricity.

The Harbour Board have aspirations to increase onsite renewable power generation capacity to help meet this need from green energy sources and are considering a range of options to ensure the Port of Dover can meet potential future demands and contribute to achieving net zero. This includes more conventional technologies but The Harbour Board also recognises the evolving nature of the renewable technology sector

where new and innovative solutions frequently appear. The possibility of changing government policy on these issues during the course of the plan period must also be taken into account.

The UK government does not currently support development of new on-shore wind, for example. This is by virtue of the Written Ministerial Statement (HCWS42) of 18th June 2015 which states planning permission for onshore wind power would be refused unless sites are identified in a local plan and have community support. However, this moratorium could be lifted during the Plan period, either under the existing government given its recent pledges to increase support for wind power, or through a general election win for Labour which has pledged to remove the ban.

The Local Plan must encourage renewable energy use and be flexible to allow for changes in this fast evolving sector.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy CC3 – Renewable and Low Carbon Energy Development

Draft Policy CC3 is broadly supported by The Harbour Board, but it should do more to enable the Port of Dover and others in the District to achieve clean energy goals and allow for future potential innovative technologies and development, including onshore wind power if the national policy position changes.

It is noted that Paragraph 155 of the NPPF states:

“To help increase the use and supply of renewable and low carbon energy and heat, plans should:

- 1 provide a positive strategy for energy from these sources, that maximises the potential for suitable development, while ensuring that adverse impacts are addressed satisfactorily (including cumulative landscape and visual impacts);*
- 2 consider identifying suitable areas for renewable and low carbon energy sources, and supporting infrastructure, where this would help secure their development; and*
- 3 identify opportunities for development to draw its energy supply from decentralised, renewable or low carbon energy supply systems and for co-locating potential heat customers and suppliers.”*

Draft Policy CC3 goes some way to achieving the goals of Paragraph 155, but some further direction is needed in order to promote opportunities for business to draw its energy supply from decentralised renewable sources.

As noted above, The Harbour Board is considering a range of traditional and innovative options to support both Port of Dover operations and at the future inland terminal. For example, it has noted with interest the intention in France to introduce solar canopies at car parks. Decarbonising Port of Dover Operations will require similar innovative approaches (including in conjunction with the facilities contemplated in Policy T14) and these should be encouraged in the Local Plan. This would benefit all businesses in Dover District who all have a part to play in achieving net zero.

The Harbour Board therefore considers the policy should be amended in the following ways:

“New development is encouraged to maximise opportunities for renewable energy by producing, storing and using renewable energy on-site. The Council will also take positive account of, and support development that provides further energy reductions, efficiencies, or delivers retrofitted renewable and low carbon energy measures on or near existing development sites, where measures comply with other policies of the plan.

The Council will encourage the use of Previously Developed Land to provide renewable energy generation or storage to support new and existing development.

Development to generate energy from renewable and low carbon sources will be supported where it is demonstrated that:

- 1 The environmental, social and economic benefits of their proposals are made clear;*
- 2 It will not result in significant harm to the surrounding area, landscape character, natural or heritage assets, habitats, biodiversity, or wildlife (particularly protected species), having special regard to the natural beauty of the Kent Downs AONB;*
- 3 There is no significant loss of amenity to local residents by virtue of visual impact, noise, disturbance or odour;*
- 4 The proposals will conserve and enhance the natural environment through measures such as improvements to biodiversity;*
- 5 There is no loss of the best and most versatile agricultural land, unless that it can be demonstrated that no alternative lower grade land is available;*
- 6 It will not result in an unacceptable impact on the local transport network that cannot be satisfactorily mitigated;*
- 7 Any fuel required is sustainably sourced.”*

Summary

The proposed additional Policy text provides additional certainty to those wishing to deliver renewable energy in Dover District. Importantly, it would provide a stronger policy baseline for the Port of Dover’s aspirations to decarbonise ferry and freight operations as part of the UK’s wider goal to achieve net zero emissions by 2050. The policy would be justified and consistent with National Policy and the UK’s drive to net zero.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	The Port of Dover is a significant stakeholder within Dover District. Matters which effect port operation have a wide impact on the local and national economy. Therefore the presense of the Dover Harbour Board at the Examination in pubic would be helpful for the Inspector.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Rainwater harvesting and grey water recycling are a must for all new homes and need to be retrofitted to existing homes where possible. There is a desperate shortage of water in our district so perhaps central government should not put so much pressure on this area to find new allocations of land for housing.</p> <p>The overall plan is unsound. Allowing more and more building in our district will only result in a water shortage crisis in the future. There is very little above ground water storage for our area and climate change effects are being felt already as we have drier summers. Over abstraction of water by Southern Water is already having negative effects on chalk aquifers in our area and many run dry in summer months where they did not a few years ago. Chalk streams are globally rare.</p> <p>Other councils (eg Reading) have strong policies to protect their water supplies.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Stronger policies for protection of water supplies and provision for more above ground storage.</p> <p>Retrofitting homes for greywater recycling - thus creating jobs. Greater protection of chalk aquifers from over abstraction of water.</p> <p>In addition to saying <i>All new dwellings must be built to the higher water efficiency...</i> it should also say that they must collect rainwater and specify minimum capacity of barrel required.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DTC considers CC4 to be unsound (not justified) as the most appropriate way to bring about increased water efficiency in our severely water-stressed area. The Water for Sustainable Growth Study 2017 correctly asserts that as Dover District is one of the most water scarce areas in the UK, it is appropriate to introduce higher standards than Building Regulations. If recycled properly, greywater can save approximately 70 litres of potable water per person per day in domestic households. These systems are best installed as a new build project or when undergoing major regenerations to a house. (https://www.thegreenage.co.uk/tech/rainwater-harvesting/)
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The junction of Nursery Lane and Singledge Lane in Whitfield has regularly flooded, because the topography directs the surface water run off to this lower lying junction from the fields to the north. Most of the time the water run off is contained within the pit to the northeast of the junction and the long drainage ditch in the field margin to the north west. However, global warming has increased rainfall in winter to such an extent that in recent years, water has had to be pumped out of the pit to prevent flooding. The large scale building of housing in this area will cause a far greater volume of run off than currently comes from the arable field. Such building is therefore unsustainable and contrary to the requirements of NPPF Section 169.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The development should be scaled back to prevent surface water flooding.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DTC consider CC 5 and CC to be unsound (not effective) on the basis that looking at developments in isolation, without regard to the 'big picture' for flooding and surface water management in the locality, is deeply flawed. For example, developments at Walmer and Sholden will impact on surface water management and flood risk in North Deal.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The steps being made which relate to water efficiency are welcomed . However the Water Authorities, the Parish Council and local landowners have tried to mitigate risk of flooding as the aquifer fills and manage surface water problems as they arise in Alkham. Sewage regularly backs up in the base of the valley in winter, indicates a lack of capacity for housing expansion, an infrastructure problem which requires addressing.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Sewerage and Drainage. The sewerage and foul water from the majority of properties in Shepherdswell drains into sewers connected to a pumping station at the rear of the East Kent Railway Station. Surface water from roads and paved areas also drain into these sewers and can add considerable load to the pumping station equipment . When the pumps cannot cope with this excess flow, foul flooding occurs in the houses and gardens of properties situated in The Glen. This has already been evidenced by frequent calls to DDC Environmental Services and Southern Water. Permitting the proposals at St Andrews Gardens will necessitate an immediate up-grade to this system to enable it to cope with the increased load, not even taking into account climate changes that result in increased rainfall.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	CC6
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The junction of Nursery Lane and Singledge Lane has regularly flooded, because the topography directs the run off from the fields to this lower lying junction. Most of the time the water run off is contained within the pit to the northeast of the junction and the long drainage ditch in the field margin to the north west. However, global warming has increased rainfall in winter to such an extent that in recent years, water has had to be pumped out of the pit to prevent flooding. The large scale building of housing in this area will cause a far greater volume of surface water than currently comes from the arable field. Such building is therefore unsustainable and contrary to the requirements of NPPF Section 169.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The development at Whitfield should be scaled back to prevent surface water flooding.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP1
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>In October 2021, Aylesham Parish Council supported the Climate and Ecological Emergency (CEE) Bill which address the full extent of the climate and nature crisis in the UK. As a result, any local plan should use up-to-date science to make sound recommendations.</p> <p>As the district is extremely water scarce, all possible measures should be implemented to help mitigate water scarcity. The use of Sustainable Urban Drainage systems (SUDs) is required to be prominent in all future developments. This will help to deal with surface water flooding. We welcome the Draft Local Plan's hierarchy of methods of discharge, with the use of combined sewers coming last.</p> <p>This relates to CC6 of SP1 – Surface Water Management.</p> <p>There are a number of options to ensure new homes produce the least possible carbon emissions. Aylesham Parish Council would like to see Dover District Council require the full 2025 Future Homes Standard to be delivered now (this will reduce emissions by between 75-80% compared to current standards), not at some point during the Local Plan's lifetime.</p> <p>This relates to CC1 of SP1 – Reducing Carbon Emissions.</p>

We welcome the commitment to planting trees within new developments that are native to Kent. This will help to keep the rural feel of Aylesham alive. Currently we often see newly planted trees dying within the first few years of their lives. There must be a comprehensive plan to ensure that these trees reach maturity (part d) and how this will be enforced by the local authority.

This relates to CC8 of SP1 – Tree Planting and Protection.

Aylesham Parish Council welcomes the commitment to planting larger numbers of trees but feels this must come with a long-term solution to maintaining the trees. Dover District Council must also commit to the full 2025 future homes standard now.

Aylesham Parish Council welcomes the addition and enhancement of open spaces and play areas. However, there are two points to note in the IDP: why would S106 monies from Aylesham be spent upgrading play areas in Nonington?; and play areas and open spaces are last to be delivered in developments – this must not happen in the future.

Aylesham Parish Council is identified as “Delivery Partners” on a number of projects due to be delivered: we have not been consulted on this prior to the Regulation 19 document being released.

The HRA[1] suggests that AYL003 – Land South of Aylesham is “high” suitability for the European Golden Plover, and so all measures must be taken to ensure this SPA protected bird species is still able to migrate and flourish in the area. SAP 25 (mixed use employment) is considered “moderate”.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	CC6 c
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>CC6 c is not sound and goes against Section 106 of the Water Industry Act (WIA) which states:</p> <p>"F1(1) Subject to the provisions of this section—</p> <p>(a) the owner or occupier of any premises, or</p> <p>(b) the owner of any private sewer which drains premises,</p> <p>shall be entitled to have his drains or sewer communicate with the public sewer of any sewerage undertaker and thereby to discharge foul water and surface water from those premises or that private sewer."</p> <p>This has been tested in the courts and the principle established that a development has the right to communicate with the sewer, regardless of classification. Whilst not totally unreasonable to allow sewer authorities time to upgrade networks to accept further flows following notification of intention to build. The LPA and LLFA also have a responsibility to ensure developments do not increase flood risk, and allowance for time is probably the most sensible route to manage additional flows rather than an absolute prevention.</p> <p>A pragmatic approach would be to have a ranging timescale based on size of development, rather than the blanket 2-years they currently quote and never meet! However, to completely dismiss connections for surface water to foul would make a high proportion of land unnecessarily unviable for development.</p> <p>The LLFA will ensure the discharge hierarchy is followed. If a connection to foul is the only option, the sewer authority will be consulted. The sewer authority has an obligation to adhere to the WIA. The Site-specific Guidance for Managing Flood Risk (2019) is a sensible approach and whilst it discourages surface water to foul only, does not prohibit it</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Remove the absolute prohibition at CC6c or amend to recognise that in some instances this type of connection is necessary and will need to be discussed and agreed with the sewer authority.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	CC6 Surface Water Management
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DTC consider CC 5 and CC to be unsound (not effective) on the basis that looking at developments in isolation, without regard to the 'big picture' for flooding and surface water management in the locality, is deeply flawed. For example, developments at Walmer and Sholden will impact on surface water management and flood risk in North Deal.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<i>We recommend the following modification be added to both policies: Consideration must be given to the area-wide cumulative impact of existing and planned developments, in addition to the application under consideration.</i>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><u>Heritage Conservation:</u> The County Council was pleased to see that the text identifies potential impacts on the historic environment from SUDS schemes. Sustainable Drainage Schemes (SuDS) may have both direct and indirect impacts on the historic environment. Direct impacts could include damage to known heritage assets – for example if a historic drainage ditch is widened and deepened as part of SuDS works. Alternatively, they may directly impact on unknown assets such as when SuDS works damage buried archaeological remains. Indirect impacts are when the ground conditions are changed by SuDS works, thereby impacting on heritage assets. For example, using an area for water storage, or improving an area's drainage can change the moisture level in the local environment. Archaeological remains are highly vulnerable to changing moisture levels which can accelerate the decay of organic remains and alter the chemical constituency of the soils. Historic buildings are often more vulnerable than modern buildings to flood damage to their foundations.</p> <p>When SuDS are planned it is important that the potential impact on the historic environment is fully considered and any unavoidable damage is mitigated. This is best secured by early consideration of the local historic environment following consultation with the Kent Historic Environment Record (HER) and by taking relevant expert advice. Kent County Council has recently produced advice for SUDS and the historic environment. It provides information about the potential impact of SuDS on the historic environment, the range of mitigation measures available and how developers should proceed if their schemes are believed likely to impact on heritage assets.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC is right to explain the needs*. *Extreme weather events of climate change include heavy downpours and wetter winters. Arable and grazing fields, especially those on an incline, are vital as flood sponges and need protection. But sometimes the run-off is such that roads are flooded. Both Dover and Deal (Mill Hill) include steep hilly urban areas where residents have witnessed water gushing up more than one meter high from manhole covers, following sudden downpours because the very aged infrastructure is very inadequate. In lower lying streets near the Deal level crossing houses have often been flooded.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Given the gross inadequacy of performance of privatized water companies, revealed in 2021 & 2022, an addition to policy should be made for the policy to become more sound and effective; additional criteria <i>(i) There should be public consultation with parish council and with residents living within 500 meters of the proposed development.</i> A sound DM would be to insist that no permission will be granted unless developers contribute to sustainable urban drainage systems. https://en.wikipedia.org/wiki/Sustainable_drainage_system ". Sustainable urban drainage systems being a mixture of both "hard" (physical infrastructure) & "natural". A sound DM would be to insist that no permission will be granted unless developer is making a contribution to enhance infrastructure, culverts and drains, e.g. through Community Infrastructure Levy.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

A sound DM would be to insist that no permission will be granted unless the developer is making a contribution to enhance infrastructure, culverts and drains, e.g., through Community Infrastructure Levy.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Add additional criteria (i) There should be public consultation with parish council and with residents living within 500 meters of the proposed development. A sound DM would also be to insist that no permission will be granted unless developers contribute to sustainable urban drainage systems.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>RE: RESPONSE TO CONSULTATION ON DOVER DISTRICT LOCAL PLAN TO 2040 - REGULATION 19 SUBMISSION: DRAFT POLICY CC7 – COASTAL CHANGE MANAGEMENT AREA</p> <p>REASON: INCONSISTENCY WITH NATIONAL PLANNING POLICY FRAMEWORK</p> <p>It is noted that the consultation draft policies map shows Coastal Change Management Area [CCMA] designations extending landwards along various parts of the District's coastline, beyond the current policy designation areas. Further to the publication of the Regulation 19 submission version of the plan, for sites falling within a CCMA designation, draft policy CC7 seeks to restrict all permanent development (including householder) and is permissive of temporary development subject to several criteria and where supported by a Vulnerability Assessment and Geotechnical Appraisal.</p> <p><i>(DDC Note - screenshot of policy removed - full representation available as an attachment.)</i></p> <p>The wording of the Regulation 19 CCMA policy is far more restrictive than the earlier Regulation 18 version of the policy (former policy DM8). The latter enabled a more site-specific approach to the assessment of applications within a CCMA designation, which we suggest is more consistent with relevant policies of the National Planning Policy Framework (paragraphs 170-173) and the associated NPPG (paragraphs 071 to 074).</p> <p>With reference to CCMA designations, the Framework states (at paragraph 172) that development in a CCMA will be appropriate only where it is demonstrated that: a) it will be safe over its planned lifetime and not have an unacceptable impact on coastal change; b) the character of the coast including designations is not compromised; c) the development provides wider sustainability benefits; and d) the development does not hinder the creation and maintenance of a continuous signed and managed route around the coast. If necessary to reduce risk to an acceptable level, the Framework suggests the use of time limited permissions (paragraph 173). The NPPG provides further guidance on appropriate development within a CCMA relative to the vulnerability of a site to coastal change and the vulnerability of the development type to that change.</p>

	<p>The NPPG (paragraph 073) identifies that the following forms of development may be appropriate within a CCMA designation, subject to the tests in the Framework (emphasis added):</p> <ul style="list-style-type: none"> • Within the short-term risk areas (i.e. losses are expected within 20-years), a limited range of development directly linked to the coastal strip, such as beach huts, cafes/tea rooms, car parks and sites used for holiday or short-let caravans and camping – all with time-limited planning permissions; • Within the medium (20 to 50-year) and long-term (up to 100-year) risk areas, a wider range of time-limited development, such as hotels, shops, office or leisure activities requiring a coastal location and providing substantial economic and social benefits to the community. Other significant development, such as key community infrastructure, is unlikely to be appropriate unless it has to be sited within the Coastal Change Management Area to provide the intended benefit to the wider community and there are clear, costed plans to manage the impact of coastal change on it and the service it provides; • Existing buildings, infrastructure and land-use subject to the relevant planning permission could adapt and diversify to changing circumstances, where it reduces vulnerability, increases resilience and raises funds to facilitate subsequent relocation • Permanent new residential development (including through change of use) will not be appropriate within a Coastal Change Management Area. <p>It is asserted that the current wording of draft Policy CC7 goes beyond the provisions of the NPPF and places a blanket restriction on all new permanent development (without qualification or definition), including extensions to existing buildings, and denies applicants the ability to respond to the objectives of the CCMA designation, taking into account factors that are relevant to a site and the proposal, including the vulnerability or otherwise of the development proposed and the specific conditions of the site and surroundings. Compliance with CCMA objectives, as expressed through the NPPF and NPPG would be more appropriately considered, where necessary, on a case-by-case basis through the submission of a vulnerability assessment with each application (where necessary) within this area. This approach is supported by National Planning Policy (NPPG paragraph 074). If the development fails to meet the exceptions identified by the NPPG or conflicts with the objectives of the NPPF, then planning permission can be reasonably refused.</p> <p>Collectively the NPPF and NPPG advocate a more nuanced approach to development within CCMA's in a manner that takes account of the nature, type, scale and location of development and hence provides a more site-specific approach to the issue – much like the approach to development within flood risk areas. In this regard, it is suggested that the original wording of the Regulation 18 policy DM8 (see below) was more consistent with national planning policy, for the reasons expressed above.</p> <p><i>(DDC Note - screenshot of Reg 18 policy removed - full representation available as an attachment.)</i></p> <p><i>Please take this representation into account when reviewing the draft local plan (regulation 19).</i></p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We have grave doubts that the 2018 Assessment in the DDC evidence base is adequate, we note NPPF doesn't seem have been updated on this issue since 2012. Since 2018, with the rapid melting of the Greenland Icecap, scientific evidence is that the situation is deteriorating rapidly https://www.forbes.com/sites/davidbressan/2022/08/29/greenlands-melting-ice-sheet-will-cause-major-sea-level-rise/ All along our coast there are homes, roads and other services close to the pebble beaches, at risk of rising sea levels.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	This plan would become more sound if any applicant planning a development of over 20 dwellings within 750 metres of the highwater shore line, and at an altitude of under 12 metres should expect to contribute to the cost of replacing groynes on our beaches / recharging beaches with shingle. The Goodwin Sands provide a natural protection from coastal erosion. As such the Goodwin Sands need protection too and should never be used as a source of gravel, they should never be dredged.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	RE: DRAFT POLICY CC7 – COASTAL CHANGE MANAGEMENT AREA & EXTENT OF DESIGNATION AS SHOWN ON DRAFT LOCAL PLAN POLICY MAP I am writing in response to the proposed expansion of the Coastal Change Management Area [CCMA] designations extending along parts of the district's coastline. My comments are two-fold: firstly, the proposed designation covers an area of coastline, adjacent to my property, that is currently protected by sea defences; and secondly, the wording of the draft policy is not consistent with the requirements of national planning policy. Extent of Designation The coastline adjacent to my property of Abbotscliff House is classified as 'hold the (existing defence) line' for the short and medium term on the National Coastal Erosion Map [NCEM] compiled by the Environment Agency. This predicts a 'retreat distance' of 0.00m along this stretch

of shoreline. Extracts from the NCEM are provided at the end of this letter. Furthermore, National Guidance (NPPG) advises that a CCMA should be defined where the shoreline management plan is anything other than hold or advance the line, at any time during its plan period (paragraph 072). I appreciate that the NPPG goes on to advise that where there is uncertainty about securing funding for the implementation of hold or advance the line, CCMA's can still be applied. However, I would suggest that there would be a high degree of certainty that a 'hold the line' policy will continue for this stretch of coastline by reason of the need to protect the main railway line (including the Highspeed service to London) that runs along the coastline at shore level. I would therefore question why the proposed CCMA designation includes this stretch of coastline.

Inconsistency with National Planning Policy

The proposed wording of proposed policy CC7 which prohibits all new permanent development within a CCMA designation would not enable a reasoned case to be presented to demonstrate that the particular characteristics of a site or proposal are such that development can, in certain circumstances be permitted. I believe that this overarching restriction on all permanent development within a CCMA, as suggested by policy CC7 is at odds with the approach set out within the national planning policy framework and national guidance which takes a more considered approach.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Tree planting takes many years before it becomes effective in sequestering carbon emissions, as this requires mature trees, not saplings. To cut mature trees down to facilitate buildings and then claim that these losses have been mitigated by planting new trees is completely inadequate and constitutes "greenwashing".
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The plan should require the retention of all trees and hedgerows when housing developments are planned, as only mature trees assist in the fight against global warming.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>In October 2021, Aylesham Parish Council supported the Climate and Ecological Emergency (CEE) Bill which address the full extent of the climate and nature crisis in the UK. As a result, any local plan should use up-to-date science to make sound recommendations.</p> <p>As the district is extremely water scarce, all possible measures should be implemented to help mitigate water scarcity. The use of Sustainable Urban Drainage systems (SUDs) is required to be prominent in all future developments. This will help to deal with surface water flooding. We welcome the Draft Local Plan's hierarchy of methods of discharge, with the use of combined sewers coming last.</p> <p>This relates to CC6 of SP1 – Surface Water Management.</p> <p>There are a number of options to ensure new homes produce the least possible carbon emissions. Aylesham Parish Council would like to see Dover District Council require the full 2025 Future Homes Standard to be delivered now (this will reduce emissions by between 75-80% compared to current standards), not at some point during the Local Plan's lifetime.</p> <p>This relates to CC1 of SP1 – Reducing Carbon Emissions.</p>

We welcome the commitment to planting trees within new developments that are native to Kent. This will help to keep the rural feel of Aylesham alive. Currently we often see newly planted trees dying within the first few years of their lives. There must be a comprehensive plan to ensure that these trees reach maturity (part d) and how this will be enforced by the local authority.

This relates to CC8 of SP1 – Tree Planting and Protection.

Aylesham Parish Council welcomes the commitment to planting larger numbers of trees but feels this must come with a long-term solution to maintaining the trees. Dover District Council must also commit to the full 2025 future homes standard now.

Aylesham Parish Council welcomes the addition and enhancement of open spaces and play areas. However, there are two points to note in the IDP: why would S106 monies from Aylesham be spent upgrading play areas in Nonington?; and play areas and open spaces are last to be delivered in developments – this must not happen in the future.

Aylesham Parish Council is identified as “Delivery Partners” on a number of projects due to be delivered: we have not been consulted on this prior to the Regulation 19 document being released.

The HRA[1] suggests that AYL003 – Land South of Aylesham is “high” suitability for the European Golden Plover, and so all measures must be taken to ensure this SPA protected bird species is still able to migrate and flourish in the area. SAP 25 (mixed use employment) is considered “moderate”.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	CC8 Tree planting and protection
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>All mature trees should have a tree preservation order. There is no point in needlessly cutting down mature trees to make way for developments as has often been the case (Aldi in Deal for example) only to replace them with young saplings that do not fare well if not cared for properly and can provide only limited carbon sequestration at the beginning of their lives. If we have only 8 years to mitigate the worst effects of climate change then we don't have the luxury of time to allow young trees to mature and start fixing significant amounts of carbon. Younger trees are going to suffer trying to get established with climate change and more drought.</p> <p>New planting should not be considered as an acceptable means by which to mitigate the felling of healthy mature trees. The carbon sequestration benefits and other amenity value of mature trees must be protected, whether under a formal Tree Preservation Order or not. Where it is absolutely unavoidable to remove a mature tree, 10 new trees should be planted with provision made for their ongoing care and protection.</p> <p>Where retaining mature trees on-site requires this to be within a garden of a new development, such trees should then be protected by the making of Tree Preservation Orders.</p> <p>There are a number of developments in the last few years which have been sadly lacking in tree planting – for example Richmond Park in Whitfield. There should be a presumption that new development will not result in the felling of any mature trees. In addition to the trees per dwelling and jobs there should be a requirement that new developments be tree-lined – planting for the benefit of future generations, but also shrubs and hedgerows for immediate carbon sequestration and amenity impact. Hedges sequester carbon both in woody growth above ground and in roots, leaf litter and other soil organic matter at and below ground level. In addition, hedges across slopes capture eroding soil and can increase soil organic carbon.</p> <p>All developments should include tree planting unless not possible (eg infill between houses may not yield enough space)</p> <p>A thorough mapping exercise of local tree cover in the District and a comprehensive strategy to increase it should be developed and published. DDC need to recruit and train staff and allocate money to ensure that staffing and resourcing is sufficient to manage the TPO system system and make sure that trees required for a development are actually planted and maintained properly.</p> <p>Mature trees should never be sacrificed for development. All trees are vital in the fight against climate change.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Map all trees in the Dover District and identify trees that have special significance. All trees need protecting and TPO's should be issued as a matter of course and new TPO officers employed.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	CC8 Tree Planting and Protection
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Tree planting should not be the main focus for reducing carbon emissions. We are concerned that the Plan portrays tree planting as an easy way out of reducing emissions. The net zero strategy for the council should include an assessment of the existing carbon stored within the council's estate and protecting it through appropriate land management methods. Tree planting should be used alongside other strategies, such as increase in renewable energy, protecting existing carbon stores (existing trees, woodlands, wetlands and coastal habitats).</p> <p>We are concerned that important habitats such as heathland, open mosaic priority habitat, coastal grasslands, unimproved grasslands and permanent pastures, which are typically void of trees, will be subject to inappropriate tree planting. Many rare botanical, invertebrate and bird species depend on these open habitats. These habitats and the species that rely on them, could be inadvertently destroyed with the planting of trees if tree planting is the main focus at reducing carbon emissions. In the wrong location, tree planting can be exceptionally damaging to wildlife. Dover District Council need to make sure areas designated for tree planting aren't already of value to wildlife.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)	Policy CC8 should focus on ensuring the right trees are planted in the right place in order to maximise the longevity of trees being planted and ensuring the protection of existing important biodiversity areas.

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The Plan should include natural regeneration. This is a low carbon way of establishing new woodland through natural seedling establishment. It results in more natural wildlife-rich woods with scrub, such as bramble, protecting growing trees from rabbits and deer without the need for the plastic tree guards or peat based composts that are damaging to the environment.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We strongly welcome this policy, and the robust approach to tree retention and replacement. We strongly welcome the requirement in para a) for a minimum of two new trees to be planted for each new dwelling. We further recommend setting a target for overall tree canopy cover as part of this policy. The Woodland Trust supports a target of 30% canopy cover for development sites, including tree-lined streets, community woods, parks and gardens, to be pursued through the retention of important trees, appropriate replacement of trees lost through development, ageing or disease, and by new planting to support green infrastructure.

	<p>We strongly support the policy in para b) that trees should be native Kent species of local provenance. Using native sourced and grown tree stock for new planting is vital to support biodiversity and resilience.</p> <p>We suggest strengthening para h) on tree replacement by saying "at least two trees" and recommend setting a proposed ratio of tree replacement, which reflects the Woodland Trust guidance on <i>Local Authority Tree Strategies</i> (July 2016) with a ratio of at least 2:1 for all but the smallest trees and ratios of up to 8:1 for the largest trees.</p> <p>Overall this is a very sound policy approach that we welcome.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Policy CC8 - Tree Planting and Protection
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Dover Harbour Board notes the requirement of Policy CC8 - Tree Planting and Protection that a minimum of two new trees will be required to be planted for each new dwelling, and a minimum of one new tree will be required to be planted for every 500 sqm of new commercial floorspace. We support the recognition that in exceptional circumstances a financial contribution towards the planting of trees elsewhere in the District may be acceptable, but this requirement could be potentially highly onerous in an area such as Dover Waterfront where there is a large area of blue infrastructure and limited opportunity for large areas of urban greening. The site offers significant opportunities for increased public access to the marina and waterfront and for enhanced public realm. The policy should reflect these opportunities and recognise that where other regeneration benefits are being delivered the policy will be applied more flexibly.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The policy wording or supporting text should be amended to recognise that on constrained sites which offer significant opportunities for enhanced public realm (and access to such areas) and where other regeneration benefits are being delivered the policy will be applied more flexibly and the need for either on site tree planting or a financial contribution towards the planting of trees elsewhere in the District will be reduced or may be waived entirely.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	N/A

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<u>CC8 - Tree Planting and Protection Tree Planting</u> Policy CC8 aims to increase tree planting and protect existing tress. NPPF para 16. identifies that 'Plans should.....b) be prepared positively, in a way that is aspirational but deliverable'. Para 131 provides guidance specifically associated with trees and states 'Trees make an important contribution to the character and quality of urban environments, and can also help mitigate and adapt to climate change. Planning policies and decisions should ensure that new streets are tree-lined, that opportunities are taken to incorporate trees elsewhere in developments (such as parks and community orchards), that appropriate measures are in place to secure the long-term maintenance of newly-planted trees, and that existing trees are retained wherever possible. Applicants and local planning authorities should work with highways officers and tree officers to ensure that the right trees are planted in the right places, and solutions are found that are compatible with highways standards and the needs of different users'.

	<p>PPG with respect to viability states that <i>"The role for viability assessment is primarily at the plan making stage. Viability assessment should not compromise sustainable development but should be used to ensure that policies are realistic, and that the total cumulative cost of all relevant policies will not undermine deliverability of the plan"</i> (Paragraph: 002 Reference ID: 10-002-20190509).</p> <p>Requiring 2 new trees per new dwelling on site especially for small brownfield sites is not deliverable or realistic and could compromise sustainability development and is therefore contrary to NPPF. The requirement also goes beyond the requirements of the NPPF. Any requirement would also need to be fully evidenced and the requirement incorporated into the viability study. The council should therefore reconsider this element and ensure any such policy approach introduces more flexibility or is deleted.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	To ensure that new trees planted as part of any development the policy needs to be enhanced, with regard to bullet point (d) landscaping schemes should require replacement of trees planted where they die or are vandalised. Whilst supporting the approach to tree protection and replacement consideration should also be given to safeguarding trees on rural allocations where they are not subject to or deemed to be worthy of a TPO.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DTC considers CC 8 to be unsound (not effective, not justified) with the legally binding target for the UK to bring all greenhouse gas emissions to net zero by 2050. DDC have not committed to the retention of mature trees - new planting does not have the same carbon sequestration qualities as mature trees and trees take many years to become effective carbon 'sinks'. DDC have not set out set their criteria for proactively making Tree Protection Orders, their Tree Strategy nor committed staff and resources to undertake this important work.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<i>We recommend the following modifications:</i> <i>New planting should not normally be considered as an acceptable means by which to mitigate the felling of mature trees, and mature trees should be retained wherever possible. The carbon sequestration benefits, and other amenity value of mature trees must be protected, whether under a formal Tree Preservation Order or not.</i> <i>DDC will set out an enhanced criteria for making TPOs, to cover biodiversity and ecosystem services as well as amenity value.</i> <i>DDC will provide appropriate staffing and resources to sustainably and effectively deliver this policy.</i>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

(DDC Note - Text Extracted from Document sent from Savills on Behalf of the Church Commissioners. Representation has been split across relevant areas of the Local Plan. Full attachment and introduction to Policy comments can be found under reference SDLP1265 for Shepherdswell Site and SDLP1266 for Eastry Site.) Policy CC8 requires 'A minimum of two new trees will be required to be planted for each new dwelling (this does not apply to applications for conversions and changes of use to residential), and a minimum of one new tree will be required to be planted for every 500sqm of new commercial floorspace created.' The wording of the policy should be made more flexible, particularly for smaller sites where there is less room for open space. DDC should also clarify whether Policy CC8 is in addition to the requirement for tree-lined streets. Recommendation: Amend Policy CC8 to be more flexible for smaller development sites and clarify the requirements of Policy CC8 in line with planning policy for tree-lined streets.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Experience has caused trust in the planning process to expire in the minds of many of the public. Without independent, robust auditing, and honesty, extracting promises from developers all too often results merely in employment for public relations practitioners. So, an addition to CC 8 is needed for it to become sound.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>This policy would become sound, effective and legally compliant, if the recommendations of KCC report 'Natural Solutions to Climate Change in Kent' of March 2021, paid for from the public purse, on the need for our district's (chalk) grasslands, wetlands, and woodlands to be retained and enhanced, were adopted as a planning guideline.</p> <p>We recommend that the points made be strengthened to become requirements. Also to become sound and effective CC8 needs the addition '<i>Existing trees which are capturing carbon in this decade 2020-2030 and the next 2030 -2040, must be protected. DDC will accelerate the rate of making Tree Preservation Orders and Woodland Preservation Orders and provide appropriate staffing and resources to sustainably and effectively deliver this policy, honest, independent evidence from an arboriculturalist will be required if felling is requested on grounds of tree disease.</i> Vague promises 'to facilitate tree planting and protection where possible' are a very inadequate response, non-compliant with legality, because replacing existing trees with trees that will only start their carbon capture career in 2040 will not allow the UK or Kent to meet its climate change targets.</p> <p>So, an addition to CC 8 is needed for it to become sound. 'Where permission is given subject to conditions regarding tree retention, tree planting and / or biodiversity enhancement, applicants will need to agree to abide by 'robust auditing' (as Wildlife Trusts insisted that the Environmental Bill legislate for). This means that honest, objective, before-and-after evaluations / baseline measurements must be used. DDC councillors on the planning cttee have in recent years pointed out how very inadequate and misleading the sketchy, google-map-based ecology reports paid for by developer applicants are. Developers are ill-placed to self-certify their own work in this area, and DDC need a DM policy requiring Environmental Impact Assessments on all planning applications for developments of over 15 dwellings on greenfield or rewilded brownfield sites.'</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Natural England welcome the inclusion of this tree planting policy within the Local Plan. We are particularly pleased to see the policy being for trees of local provenance. We further welcome the intention to incorporate a specific Tree Strategy into your Authority's Green Infrastructure Strategy to provide more detailed guidance on the delivery of this policy. This is important as consideration will need to be given to existing natural interest features (peat, priority habitat, priority species, protected sites etc) and public access in decisions about where trees are planted (on or off site), to ensure the Right Tree in the Right Place. We would encourage you to expand point 'd' in the 'Tree Planting' section of the policy to explicitly secure inclusion of aftercare for newly-planted trees in order to maximise survival rates and achieve desired outcomes for carbon, people and nature.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Representation submitted by Lee Evans On behalf of Mr and Mrs Tobin. Full Representation attached to SDLP1411. This document has been split across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1411.) POLICY CC8 – Tree Planting and Protection 3.30 Policy CC8 addresses tree planting and protection. Whilst the principles of such are supported in creating pleasant places to live and work, the detail of this policy is particularly onerous, and far too prescriptive to the extent of potentially constraining development. 3.31 In respect of criterion (a) there is not considered to be a robust evidence base in place to justify or otherwise explain why “a minimum of two new trees will be required to be planted for each new dwelling”. This directive is unnecessary as a development management policy, and is best

	<p>reserved for detailed consideration of any future applications in the District. The objective of increasing the natural character of sites is supported, but this must not simply be applied through blanket policy. The provision of trees on site should be informed by site specific assessment, including assessment of the existing trees on site. This criterion (a) should be deleted.</p> <p>3.33 Criterion (d) requires the provision of a detailed landscaping scheme and landscape management plan should be submitted for all major development schemes, including, but not limited to, details of the trees and shrubs to be planted, and proposals for how the landscaping scheme will be managed and maintained over the lifetime of the development. Again it is considered that the extent of landscaping details provided is sometimes best reserved for the development management process, including through agreement with officers at pre-application stages and the validation of applications as to the precise nature of information provided. It is often the case that the full details of a landscaping scheme are reserved for planning conditions.</p> <p>3.34 For completeness, criteria (b), (c), (e), (f), (g), (h) are otherwise agreed as a suitable basis for development management.</p> <p>In this regard, it is recommended that CC8 be amended to ensure its suitability in development management terms over the plan period. It is suggested that such amendment could be picked up as a Main Modification in due course.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Reference CC8 5.56: 'as part of the Council's Green Infrastructure Strategy a Tree Strategy will be prepared to accompany this Plan and provide detailed guidance on the delivery of this Policy.'</p> <p>A review of Canopy Coverage improvement over time and is one that is supported/endorsed by the UK Government.</p> <p>More tree officers are urgently needed, with an increase in resources DDC will accelerate the rate of making Tree Preservation Orders and Woodland Preservation Orders and sustainably and effectively deliver this policy.</p> <ol style="list-style-type: none"> 1 All healthy trees are 2 "All mature trees to be retained" - Wording to include retain all mature trees, Justification -Not all ancient woodland is carbon sequestration for 100 years. There is a need to be thinking of carbon sequestration for 100 years. <p>Veteran and Notable trees Veteran and notable trees throughout Dover District must be given better protection going forward otherwise we will never have ancient trees with all the habitat benefits that they provide as they gradually decay in the third stage of their life. Two online mapping systems, TreeZilla.org and the Woodland Trust Ancient Tree inventory.</p> <p>DDC must look at a longer time horizon and focus on tree life spans, planning for more than 50 -100 years ahead. Succession planting now for the trees that will be lost through old age.</p> <ol style="list-style-type: none"> 1 New development will be not permitted unless 80% of existing trees <p>Any trees or plants that within a period of 10 years from the completion of the development die, are removed or become seriously damaged or diseased, shall be replaced in the next planting season with others of similar size and species as those originally planted, unless the Local Planning Authority gives written approval to any variation. GROUND: To ensure that the work is carried out within a reasonable period in accordance with the NPPF.</p> <ol style="list-style-type: none"> 1 Trees that die from natural causes will be Only trees independently certified as dying or diseased to be felled and only subject to a suitable replacement being planted. Where trees are being felled because of overcrowding, thinning rather than removal of all trees should be considered wherever possible. <p>Independent evidence from an arboriculturist will be required if felling is requested on grounds of tree disease.</p> <ol style="list-style-type: none"> 1 Replanting -Although there is no statutory duty on the County Council to replace any diseased trees that are removed, there is a general duty on local authorities to 'conserve biodiversity 2 for 1 replanting policy to be supportable in the face of the climate emergency. 2 Trees should be native Kent species of local provenance. Species selection will be compatible with KC's plan B, pollinators, - consideration of appropriate selection to survive changes in the 100 Year horizon. 3 There will be consideration of chalk geology when selecting and planting trees, to ensure Hedges and shrubs may be more appropriate selection. 4 All applications for trees to be felled will be assessed by the DDC Environment & Horticulture Officer <p>/ The Tree Officer following a visit to the site and independent assessment.</p>

- 1 Works required for structural reasons i.e., impact of root damage to foundations and drains, must be supported by structural engineering evidence as well as a report from the DDC Environment & Horticulture Officer (The Tree Officer)
- 2 Where there are reports and evidence of pre-emptive tree felling and or habitat destruction which undermines the inadequate 10% biodiversity net gain. The applicant must be required to enhance biodiversity net gain by 30-50% as determined by the LPA
- 3 Remedial tree works e., Crown lift / Crown thin / Height reduction etc. to be kept to a maximum of

1.5m-2.0 m reduction unless the DDC Environment & Horticulture Officer / The Tree Officer authorises otherwise. All tree applications must contain full measurements in line with BS3998:2010, to make the requested percentage reduction meaningful. Sympathetic management and a fixed reduction of the canopy lost to pruning should not be exceeded. It is good practice according to British Standards document "BS 3998:2010 - Tree work. Recommendations" to include all tree measurements in applications – otherwise a percentage is meaningless.

- 1 There are not any set qualifications for a Tree Surgeon. Therefore DDC needs to set a policy that assessments and tree work should be undertaken only by Tree Surgeons holding City & Guilds, HND or BTEC in Forestry and Arboriculture, or a bachelor's or master's degree in forestry, arboriculture, countryside management, forest management or woodland ecology and conservation. Ideally and in addition they should be a member of a professional organisation such as the Arboricultural Association or The International Society of For Tree Inspection work other specific qualifications that should be considered are LANTRA awarded Tree Inspection qualifications at various levels and Diploma in Arboriculture & Forestry. Many councils around the UK operate a Preferred Supplier list.
- 2 It is an unfortunate part of the planning process that often it is the person applying for building permission work to trees, who contracts the Arboricultural survey that is appended to their The resulting surveys are often biased, and implausible, and trees are routinely given a category C and classed as not worthy of retention. Policy recommendations (above) would go some way towards mitigating this.
- 3 Re-define TPO legislation re "amenity" to encompass the benefits of Biodiversity and Ecoservices, pollution control, Mental health, cooling effect, access to green spaces, run-off, flooding infrastructure TPO about to go under consultation as part of England National Tree
- 4 Location of new trees- creation of shared spaces not just located in the gardens of new builds. Incorporation of new community green spaces for each larger development.
- 5 Street trees –avenues of native trees preferred; consideration of others more suitable for surviving on-going climate change, Climate adaption- trees for the Wider pavements for inclusion of trees (LP design section). Adequate tree pits. Use of geotextiles to separate infrastructure from tree roots. (green and blue company) <https://greenblue.com/gb/home/>
- 6 Hedgerow wildlife corridors

Hedgerows are hugely important in the environment as wildlife corridors – linking disparate areas of woodland and parks together. Fragmentation of tree covered areas, leads to a gradual diminution of biodiversity, the overrunning of one species, such as Ivy or Alexanders and reduction in flora and fauna supported by the area. Hedgehogs, for example, can travel 12 miles in one night along hedgerows linked to gardens and out to non-residential areas. source: <https://www.countryfile.com/wildlife/mammals/our-guide-to-hedgehogs-where-to-see-and-how-to-help-hedgehogs-in-your-garden/> accessed 19/11/2020. Hedges "are valued too for the major role they have to play in preventing soil loss and reducing pollution, and for their potential to regulate water supply and to reduce flooding. Hedgerows have a role to play in taking greenhouse gases out of circulation through carbon storage if they can expand in size. Certainly, any loss exacerbates climate change to some extent" (Hedgelink.org.uk – 24/09/2020). It will be quicker and easier to ameliorate the impact of climate change by planting hedgerows, in some location. They take up less space and provide an identified function (enclosure), whilst providing environmental services in respect of carbon capture and habitat provision.

- 1 Hedgerow maintenance

It is a criminal offence under the Wildlife and Countryside Act to disturb nesting birds.

However, birds can roost in any month of the year. We require the applicant to check for nesting or roosting birds before undertaking works to trees and if birds are found to be nesting, for works to be postponed until nesting is complete. If birds present on the site are of high conservation concern ('red list*' or 'amber list' birds**), permission for the works should be refused unless there are overwhelming reasons for it to be given.

- No tree works should be permitted to take place during the main nesting period from March until the end of August. Birds can nest or roost in any month of the year.

(* House Sparrow, Starling, Song Thrush, turtledoves, ** Hedge Sparrow (Dunnock)).

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Tree planting - (DDC plan - CC8 – 5.52-5.59).</p> <p>Tree planting is actively underway in the valley at 'Chilton Magic Garden'. Our aim is to educate children and families into the importance of trees and nature in our world, by engaging them in habitat creation and tree planting for wildlife and increase biodiversity, to develop climate change resilience and to reduce carbon emissions through carbon storage. Woodlands help to maintain air quality and aid water attenuation, they preserve soils and prevent flooding. The community of the valley are working towards increasing the AONB to make the Alkham Valley a beautiful, nature retreat for people to connect with nature and wildlife, which contributes to overall greater health and well-being for locals and visitors.</p>

	(DDC note - The full representation from Alkham PC is attached to representation SDLP1653. However, specific comments from the full representation document have been extracted into separate consultation points/policy areas, relevant to the comments made)
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	CC8
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note <i>The text below is an extract from the original representation which is attached to SDLP1438.</i></p> <p>If existing mature trees of a good size to capture carbon now, are replaced in 'urban expansion' areas (SAP 1, SAP 24, SAP 28) by young saplings that will not be able to capture a similar amount of carbon for 40 to 50 years, then the plan will not be legally compatible with Environment Act 2021. Therefore, to become sound and legally compliant SP14 should require that for every 10,000m2 (roughly 50 dwellings of 200m2 per dwelling) of housing, one open space of 150m2 and another woodland area of 150m2 should be provided, these allocations to be non-transferable between 10,000m2 sections. Moreover, development should only be permitted if 90% of existing trees are retained (These retained trees will account for the woodland areas referred to above, and will provide pockets of mature green infrastructure of amenity value to legally binding UK Net zero strategy 2019 and to new residents at little cost or inconvenience to the developer). Any new trees planted must be tended with a guarantee to ensure survival 4 years after development completed.</p> <p>Moreover, to become more sound and effective, we recommend adding, Retain all trees on the perimeter of large developments and pockets of existing trees within developments. Work with Kent Nature Partnership to evaluate, and match protection of all-natural capital. Work to retain and enhance natural capital generally, mindful of the KCC commitment to establish the growth of 1.5 million new planted trees across the county. Similarly, this policy would become sounder if the recommendations of KCC report 'Natural Solutions to Climate Change in Kent' of March 2021 paid for from the public purse, on the need for our district's (chalk) grasslands, wetlands, and woodlands to be retained and enhanced were adopted as a planning guideline.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1860.)</p> <p>d. Policy CC8 – Tree Planting and Protection</p> <p>While supportive of securing appropriate landscaping within new developments, Quinn Estates questions the evidence base that justifies a prescriptive policy requirement for a minimum of two new trees to be planted for each new dwelling and, similarly, a requirement of one new tree being planted for every 500sqm of new commercial floorspace created. The policy requirements appear to be arbitrary and, applied universally without consideration of site-specific characteristics, could compromise optimising the capacity of sites, especially previously developed land where the emphasis is on achieving higher densities. Given the Plan already has Policy NE1 requiring a minimum 10% net biodiversity gain, it is considered that the numeric tree planting requirement in Policy CC8 is not justified and may even hinder the ability to secure net biodiversity gain in certain instances, subject to the ecology baseline position.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Full Representation attached to SDLP1883. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1883.) Draft Policy CC8 – Tree Planting and Protection - COMMENT Draft Policy CC8 requires a minimum of two new trees to be planted for each new dwelling with a presumption of these to be planted on site. Where it is demonstrated that the new trees cannot be provided on site a financial contribution will be required. BDW support the delivery of new trees on site and respect the requirements of NPPF paragraph 131. However, concern is raised over the impact to design, landscape character and viability in relation to such a prescriptive requirement. It is also not clear whether these trees are sought over and above the national requirement for tree-lined streets. In respect of design, incorporating large amounts of trees on small - medium scale development with limited strategic open space, could directly impact the developable area and consequently,

impact on placemaking aspects. Furthermore, significant tree cover within a residential area can have impacts to daylighting levels and residential amenity. When considering landscape character, the NPPF paragraph 130 (c) states that planning policies should ensure that developments “are sympathetic to local character and history, including the surrounding built environment and landscape setting, while not preventing or discouraging appropriate innovation or change (such as increased densities)”. Trees make an important contribution to the landscape setting and have the ability to significantly change the character of an area. Thus, Draft Policy CC8 should take this into account. Whilst the Whole Plan Viability Study (2020) notes the two tree requirement at paragraph 8.52, the viability assessment is not clear how the inclusion of these impacts the development costs. BDW have concerns that this level of planting could impact the viability of a development alongside other policy requirements. Finally, where a financial contribution is sought, the contribution should be in accordance with the tests set out in NPPF paragraph 57. With the above in mind, it is considered that the policy should be updated to encourage two trees to be planted where there will be no design, landscaping, viability or other issues caused by doing so. A reasonable and proportionate contribution for off-site planting will be requested where on-site planting cannot be achieved on site unless there are viability issues which prohibit this.

Recommendation: Draft Policy CC8 is updated to read:

- a) A minimum of two new trees will be required encouraged to be planted for each new dwelling (this does not apply to applications for conversions and changes of use to residential), and one new tree will be required encouraged to be planted for every 500sqm of new commercial floorspace created.
- b) The planting of these trees should not impact the design quality or landscape character of the area.
- c) Trees should be native Kent species, of local provenance from a bio-secure source, and should be standard size in specification as a minimum.
- d) A presumption that the trees will be planted on-site rather than off-site will apply. For major development where it is demonstrated that new trees cannot be provided on-site, a proportionate financial contribution will be required towards the planting of trees off-site in accordance with the requirements of the Council's Green Infrastructure Strategy unless there are demonstrable viability concerns.

Additionally, the Council should seek to clarify the relationship of these trees to the national requirement to deliver tree-lined streets.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Policy PM1(2b) requires densities of between 30-50 net dwellings per hectare. CPRE as an organisation strongly believes that where land is given over to development, it should be used as efficiently as possible - as appropriate for that site's location. The higher the density, the more benefits accrue, and the more land is saved.</p> <p>High density building does not equate to high rise apartment blocks. CPRE London published a report in 2019 on this issue called "Double the density, halve the land needed"https://www.cprelondon.org.uk/wp-content/uploads/sites/10/2020/02/DoubleTheDensityHalveTheLandNeeded_1.pdf. This sets out both the benefits of higher density design along with providing examples of higher density developments being achieved by a variety of means. This includes a mixed-use residential development at Springhead Park, Ebbsfleet, Kent where 160dph is being achieved.</p> <p>Further research undertaken by CPRE and Place Alliance (A housing design audit for England, 2020) https://placealliance.org.uk/research/national-housing-audit/ concludes that housing schemes performed more poorly with distance from the urban core and with reduced density. The additional constraints imposed by stronger pre-existing urban context, were considered to encourage a more sensitive design response.</p>

	<p>Building at low density and on green fields is not being done well in terms of design quality. The most successful schemes (as audited in the study of 142 developments) were those at 56dph – which is almost double the national average of 31dph. Moreover, the National Design Code (July 2021) states that density is an essential component of an effective design code.</p> <p>DDC Edit (Link split to fit page)</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? <p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	Yes

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Yes</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Item SP8- Dover Town Centre.</p> <p>Additional suggestions:</p> <p>a) Greening the main high street via avenue of ornamental trees.</p> <p>b) Less licensing of gambling establishments</p> <p>c) Encourage more world cuisine eateries, in addition to traditional ones.</p> <p>d) More street art installations eg old Banksy wall as a nautical/ seascape backdrop to the anchor in situ-or even treat this site akin to Trafalgar Square's 4th plinth. This would create a continual cycle of interest from the art community.</p> <p>e) In time...the high street going down to the port, to transform into a 'La Rambla' type tourist destination. To include Bench Street, and surrounds, being regenerated simultaneously.</p> <p>f) Collaboration with the Premier Inn and the freeholder of the Gateway Flats & garages etc - in order to refurbish the currently shabby elevations facing the town centre.</p> <p>g) Collaboration with the stores in St James retail park which back onto the A20/ sea face, to reinvigorate the aesthetic appeal here and complement the regeneration of the town centre.</p> <p>h) Use of scenic printed hoarding panels to disguise dilapidated buildings etc pending renovations.</p> <p>i) Encourage the perception first, which will then transform into a reality that Dover is a destination of choice, rather than a mere place for transit.</p> <p>This will demand a holistic tourism strategy. Dover could certainly be marketed in terms of its unique heritage. It has one of the most iconic natural landforms in the whole of the UK - The white cliffs. The panoramic vistas from the coastal cliffs are unrivalled. The visitor is able to easily ascend the cliffs to take in the unrivalled panorama that is soon to be designated as a world Heritage site - the Dover Straits. Dover also contains not only one of the most spectacular, beautiful and historic castles in Europe, but it also contains the oldest building structure in England- the Roman lighthouse. A tourist strategy could easily be constructed around the huge Roman remains in the Town. The Roman house, somewhat tired, contains historic treasures.</p> <p>One could obviously then develop a whole complimentary strategy around the role Dover played in the defence of Britain. From Napoleon, to the central role in Dunkirk and ultimately being the frontline of Britain.</p> <p>Alternative tour interests could easily be developed. Dover's almost unique cliff top chalkland habitat would attract an array of nature enthusiasts. There are several rare species of flora and fauna found in this area - including many orchids and associated plants. There is the river Dour one of the rare chalk streams in the world.</p> <p>The historic Saxon-Shore way walk to the unique St Margaret's Bay. In addition to breathtaking views, this will take visitors past one of the largest colonies of Skylarks in the South East, Peregrine falcons, Red-billed Choughs, past the lighthouse -the first in the world to be powered by electricity etc, descend the subterranean tunnels to the unique Fan-Bay shelter, stopping off for brief refreshment at Britains closest pub to France. Children and adults can then indulge in rock pooling in the stunning bay which was home to both Noel Coward and the Ian Fleming.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Item SP8- Dover Town Centre.</p> <p>Additional suggestions:</p> <p>a) Greening the main high street via avenue of ornamental trees.</p> <p>b) Less licensing of gambling establishments</p> <p>c) Encourage more world cuisine eateries, in addition to traditional ones.</p> <p>d) More street art installations eg old Banksy wall as a nautical/ seascape backdrop to the anchor in situ-or even treat this site akin to Trafalgar Square's 4th plinth. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Text Extracted from Document sent from Savills on Behalf of the Church Commissioners. Representation has been split across relevant areas of the Local Plan. Full attachment and introduction to Policy comments can be found under reference SDLP1265 for Shepherdswell Site and SDLP1266 for Eastry Site.) Policy PM1 – Achieving High Quality Design, Place Making and the Provision of Design Codes – COMMENTS Policy PM1 focuses on design and states 'Development which is not well designed will not be supported. Where relevant and appropriate, new development must...' accord with a list of design criteria. This policy is not effective, nor is it justified. There is no information available to demonstrate what development would be 'relevant' or 'appropriate'. As such, there is scope for the policy to be interpreted inconsistently and leaves it open to challenge. Therefore, we request that the Council should clarify the parameters of these terms in the plan. Criteria b further states that new development must 'be well designed paying particular attention to scale, massing, rhythm, layout and use of materials appropriate to the locality'. In our view the reference to 'rhythm' should be removed from the policy as it is overly subjective and is not effective. We consider that the other considerations within the policy are capable of ensuring high quality design. Recommendation: DDC should provide further clarification on what is meant by 'relevant and appropriate' and remove any reference to 'rhythm'.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Policies PM1 (High Quality Design, Placing making and the provision of design codes), PM2 (Quality of Residential Development), PM3 (Providing Open Space), PM4 (Sports Provision) and H1 (Type and Mix of Housing) include prescriptive requirements for major housing developments.</p> <p>As a general principle, it is not evident that the Council has undertaken a review of the impact of such policies (which include minimum internal residential space standards and open space standards) on the deliverability and viability of housing alongside other requirements including affordable housing.</p> <p>In the context of existing policy and delivery of housing at WUE there also needs to be appropriate caveats in relation to how these policies are applied to Whitfield. For instance, Policy H1 (Type and Mix of Housing) requires proposals for 10 or more dwellings to demonstrate how the mix of tenure, type and size of housing reflects the Council's latest evidence on housing need and market demand. For WUE this and other policies need to cross refer to the adopted SPD and also take into account what has already been delivered and the pipeline of future development at Whitfield rather than apply district wide requirements.</p> <p>(DDC Note - Text Extracted from Document sent from Quod. Representation has been split across relevant areas of the Local Plan. Full attachment can be found under reference SDLP1232.)</p>

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

This document has been split across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1387.) POLICY PM1 – Achieving High Quality Design, Place Making and the provision of Design Codes

	<p>3.25 PM1 deals with high quality design for which the Promoter and Landowners are very supportive of. Its contents are not repeated here, though it is noted that the policy wording includes for a large number of criteria across seven topic areas spanning context, built form, and movement, among others.</p> <p>3.26 The Promoter and Landowners commit to delivering a lasting legacy for this Site with high quality design. There are already references to the aspirations of the Plan to achieve high quality design, place making and the provision of Design Codes elsewhere in the Plan's Vision and Strategic Objectives. As drafted, a number of PM1's criteria add little else to this information, and the granular level of detail alluded to might otherwise be best sought in Design Codes applied to specific areas, as also referenced in PM1 itself.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). (DDC Note - Representation submitted by Lee Evans On behalf of Mr and Mrs Tobin. Full Representation attached to SDLP1411. This document has been split across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1411.) POLICY PM1 – Achieving High Quality Design, Place Making and the provision of Design Codes 3.36 PM1 deals with high quality design. Its contents are not repeated here, though it is noted that the policy wording includes for a large number of criteria across seven topic areas spanning context, built form, and movement, among others. Many of these criteria are referenced throughout the Plan, and are otherwise subject to site-specific opportunities and constraints. 3.37 As drafted, PM1 appears highly prescriptive and as a checklist for developers – this runs the risk of stifling the design aspirations of applicants and, potentially, could lead to a situation in which a homogeneity of design emerges over the plan period to satisfy what could be read as a 'tick box' exercise. This interpretation of the policy would clearly be at odds with its objectives in securing high quality design. 3.38 In this regard, it is recommended that PM1 be amended to condense the volume of criteria applied. It is suggested that such amendment could be picked up as a Main Modification in due course.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? (DDC Note - Representation submitted by Rubix Estates. Full Representation attached to SDLP1624. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1624.) POLICY PM1 – Achieving High Quality Design, Place Making and the provision of Design Codes 3.30 PM1 deals with high quality design. Its contents are not repeated here, though it is noted that the policy wording includes for a large number of criteria across seven topic areas spanning context, built form, and movement, among others. 3.31 This is useful in guiding development, though care must be taken to ensure that this volume of criteria is not unduly onerous in the planning application process. There are already references to the aspirations of the Plan to achieve high quality design, place making and the provision of Design Codes elsewhere in the Plan's Vision and Strategic Objectives. As drafted, a number of PM1's criteria add little else to this information, and the granular level of detail alluded to might otherwise be best sought in Design Codes applied to specific

	<p>areas, as also referenced in PM1 itself.</p> <p>3.32 To ensure the effectiveness of the Plan – by way of its effective implementation in the application process - consideration should be given to a reduction in the volume of criteria attached to PM1, which is otherwise addressed in the overarching Vision and Objectives as drafted.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note (1) The text below is an extract from the original representation which is attached to SDLP1438.</p> <p>Dover District plan report on Development management</p> <p><i>I have been tasked with reviewing the Dover local plan in respect of design and development. This is a very large document, so I have tried to break it down into manageable portions.</i></p> <p><i>The Dover plan does acknowledge that there are constant improvements in design and the plan will need to evolve and to consider new technology, improvements in materials and methods of construction.</i></p> <p><i>I have therefore taken the policies which are attached at the end of this document and extracted sections which I think will be of interest the town council and where I believe comment is due.</i></p> <p><i>I believe that the planning committee needs to be aware of these points extracted. My comments in italics</i></p> <p>PM1 – Achieving High Quality Design, Place Making and provision of Design Codes</p> <p>Demonstrate an understanding and awareness of the context of the area (including historical character), appreciate existing built form and respond positively to it. <i>It is unclear how this will be demonstrated; planning applications will need to be expanded so that the committee has sufficient information when considering the application.</i></p> <p>Ensure that new streets are tree-lined and that opportunities are taken to incorporate trees elsewhere in the development in line with Policy CC8. <i>This looks like a planning consideration which we will need to be considered if looking at this type of development.</i></p> <p>Provide high quality multi-functional green open spaces with a variety of landscapes and activities, including play, that also deliver enhanced biodiversity and flood mitigation. <i>Up to now this appears to have been ignored by DDC planning particularly flooding, WTC needs to be aware.</i></p> <p>Ensure that existing features, including trees, natural habitats, boundary treatments and historic street furniture, that positively contribute to the quality and character of an area, are retained, enhanced, and protected. <i>Up to now this appears to have been ignored by DDC planning WTC needs to be aware</i></p> <p>Make appropriate provision for service areas, refuse storage (including waste and recycling bins), and collection areas in accordance with the nature of the development. Such areas and access to them should be appropriately sited and designed to ensure they can:</p> <ol style="list-style-type: none"> i. Perform their role effectively without prejudicing or being prejudiced by other functions and users. ii. Maintain an attractive and coherent street scene and protect visual amenity; and iii. Avoid creating risk to human health or an environmental nuisance. <i>This looks like a planning consideration which we will need to be considered, if looking at this type of development.</i> iv. Promote sustainable waste management solutions that encourage the reduction, re-use and recycling of waste. This should include ensuring that there is appropriate consideration for residents to be able to segregate their waste to allow for recycling opportunities, including those who live in apartments. <i>This looks like a planning consideration which we will need to be considered if looking at this type of development.</i> v. Ensure that the siting, layout and design of vehicle and cycle parking (including detached garage blocks) is sensitively integrated into the development so as not to dominate the landscape, maintains an attractive and coherent street scene, does not prejudice the wider functionality of public and private space, and creates an effective functional link and relationship with the buildings and areas they serve. To achieve this a range of parking solutions are likely to be required to avoid the dominance of frontage parking. <i>I do not believe that parking in front of the properties is subject to planning at present, this is a national issue so I am unclear as to how this will proceed. This looks like a planning consideration which we will need to be considered if looking at this type of development.</i> <p>Development proposals must provide evidence, through their design and access statements, to demonstrate how they have responded positively to the design policies in the Local Plan and associated guidance, including national and local design guidance, local Design Codes and the National Model Design Code, relevant Neighbourhood Plans, Village Design Statements, Conservation Area Appraisals, site specific development briefs, the Kent Design Guide, Secured by Design Guidance and where appropriate the Kent Downs AONB Landscape Design Handbook. <i>The planning committee will need access to the Kent Design</i></p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>(DDC Note - Full Representation attached to SDLP1883. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1883.)</p> <p>Draft Policy PM1 – Achieving High Quality Design placemaking and provision of Design Codes.- COMMENT BDW is generally supportive of the overarching vision set out within Chapter 4 of the Draft Local Plan. They support DDC's ambition to make Dover District a: "place of aspiration, providing outstanding opportunities for sustainable living". The determination to create places that are well-design and well-built is also supported and should be the basis of new development proposals coming forward in the District. BDW maintain a firm commitment that their development at the Land North of Sandwich Road will be a high quality, landscape-led development that provides a healthy and sustainable environment for future residents. Concern is raised regarding the reference to local design codes. Whilst the notion behind a local design code is supported to ensure that development is seamlessly integrated into the existing built form, it should be noted that design code can also be overly restrictive. This can result in a loss of architectural freedom resulting monotonous design if there is not enough flexibility. It can also negatively affect the viability of a scheme. As such, any design codes should allow for flexibility. It is noted that the Draft Design Policies do not include reference to design codes and instead reference a Local Design Guide which is considered more appropriate. Recommendation: Design codes are not taken forward and instead a Local Design Guide is produced which is used to inform development proposals but not restrict them.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. <p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>
<p>3 - If you consider the Plan is ‘unsound’, on which grounds do you consider this to be? (select all that apply)</p>	<p>Consistent with National Policy</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>Not Applicable</p>

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The County Council welcomes the commitment set out in PM2 and at section 6.9 which will enable people to remain in their homes and live independently throughout their lives as set out below.</p> <p>The Department for Levelling Up, Housing and Communities identified in June 2019 guidance <i>Housing for older and disabled people</i>, that the need to provide housing for older & disabled people is critical. Accessible and adaptable housing enables people to live more independently and safely, providing safe and convenient homes with suitable circulation space, bathrooms, and kitchens. Kent Adult Social Care requests these dwellings are built to Building Reg Part M4(2) standard (as a minimum) to ensure that they remain accessible throughout the lifetime of the occupants, meeting any changes in the occupant's requirements.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Kent Adult Social Care requests these dwellings are built to Building Reg Part M4(2) standard (as a minimum) to ensure that they remain accessible throughout the lifetime of the occupants, meeting any changes in the occupant's requirements.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	PM2 - Quality of Residential Accommodation
2 - Do you consider this part of the Plan sound?	No

<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Justified Effective Consistent with National Policy</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>Not Applicable</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Not Applicable</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p><u>PM2 - Quality of Residential Accommodation</u></p> <p>Policy PM2 d i and ii requires that 'On schemes of up to 19 dwellings, the Council will expect all new build development to be built in compliance with building regulation part M4(2)' and 'ii On schemes of 20 or more dwellings, the Council will require 5% of the development to be built in compliance with building regulation M4(3)(wheelchair accessible homes), with the remaining development to be built in compliance with building regulation part M4(2)'.</p> <p>The council should initially recognise that the proposed changes in building regulations will require all homes to be built to part M4(2) of the Building Regulations. This will remove the need to reference this in the local plan and should be removed.</p> <p>Whilst we acknowledge that PPG <i>Paragraph 003 Reference ID: 63-003-20190626</i> recognises that "the health and lifestyles of older people will differ greatly, as will their housing needs, which can range from accessible and adaptable general needs housing to specialist housing with high levels of care and support", the council should note that ensuring that residents have the ability to stay in their homes for longer is not, in itself, an appropriate manner of meeting the housing needs of older people.</p> <p>Adaptable houses do not provide the on-site support, care and companionship of specialist older persons' housing developments nor do they provide the wider community benefits such as releasing under occupied family housing as well as savings to the public purse by reducing the stress of health and social care budgets. The recently published Healthier and Happier Report by WPI Strategy (September 2019) calculated that the average person living in specialist housing for older people saves the NHS and social services £3,490 per year. A supportive local planning policy framework will be crucial in increasing the delivery of specialist older persons' housing and it should be acknowledged that although adaptable housing can assist it does not remove the need for specific older person's housing. Housing particularly built to M4(3) standard may serve to institutionalise an older persons scheme reducing independence contrary to the ethos of older persons and particularly extra care housing and this should be recognised within the plan.</p> <p>We would also like to remind the council of the increased emphasis on Local Plan viability testing in Paragraph 58 of the NPPF and that the PPG states that "The role for viability assessment is primarily at the plan making stage. Viability assessment should not compromise sustainable development but should be used to ensure that policies are realistic, and that the total cumulative cost of all relevant policies will not undermine deliverability of the plan" (Paragraph: 002 Reference ID: 10-002-20190509). M4 2 and 3 Housing has a cost implication and may serve to reduce the number of apartments that can be provided further reducing viability.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>To be effective and consistent with national policy the following amendments should be made to the plan:</p> <p>Delete Policy PM2 d i and ii</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note</p>	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Policies PM1 (High Quality Design, Placing making and the provision of design codes), PM2 (Quality of Residential Development), PM3 (Providing Open Space), PM4 (Sports Provision) and H1 (Type and Mix of Housing) include prescriptive requirements for major housing developments.</p> <p>As a general principle, it is not evident that the Council has undertaken a review of the impact of such policies (which include minimum internal residential space standards and open space standards) on the deliverability and viability of housing alongside other requirements including affordable housing.</p> <p>In the context of existing policy and delivery of housing at WUE there also needs to be appropriate caveats in relation to how these policies are applied to Whitfield. For instance, Policy H1 (Type and Mix of Housing) requires proposals for 10 or more dwellings to demonstrate how the mix of tenure, type and size of housing reflects the Council's latest evidence on housing need and market demand. For WUE this and other policies need to cross refer to the adopted SPD and also take into account what has already been delivered and the pipeline of future development at Whitfield rather than apply district wide requirements.</p> <p>(DDC Note - Text Extracted from Document sent from Quod. Representation has been split across relevant areas of the Local Plan. Full attachment can be found under reference SDLP1232.)</p>

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	Policy PM2 seeks for all residential development to meet the government's latest Nationally Described Space Standards in respect to internal accommodation. The Council should only apply the optional NDSS to all dwellings in accordance with paragraph 130f and footnote 49 of the NPPF. Footnote 29 confirms: '49. Planning policies for housing should make use of the Government's optional technical standards for accessible

<p>possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>and adaptable housing where this would address an identified need for such properties. Policies may also make use of the nationally described space standard, where the need for an internal space standard can be justified.' Further, with regard to NDSS, the PPG confirms: 'Where a need for internal space standards is identified, local planning authorities should provide justification for requiring internal space standards.' If this optional standard is to become planning policy, the Council must ensure it is justified by meeting the criteria set out in national policy, including need, viability and impact on affordability, Under section d, part ii, the Council require 5% of developments over 20 dwellings to be built in compliance with building regulation M4(3) and the remaining dwellings to be built in compliance with building regulations part M4(2). Again, Gladman support the principle of the policy requirement, but it must be clear that the requirement has been fully evidenced on an assessment of need and viability. The current evidence is provided in the Strategic Housing Market Assessment- Partial Update (2019) at paragraph 6.20 and the Council must ensure this remains up to date. To support the delivery of housing, Gladman also consider that the policy wording should include a mechanism to account for site specific circumstances.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

<p>Agent Company / Organisation</p>	Rubix Estates
<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	PM2

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Rubix Estates. Full Representation attached to SDLP1624. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1624.)</p> <p>POLICY PM2 – Quality of Residential Accommodation</p> <p>3.33 PM2 refines the aspirations of the Plan to reflect the quality of proposed residential development. It outlines the base criteria required in demonstrating how residents can expect to achieve a good quality of living, with regard to space standards, accessibility, and amenity space.</p> <p>3.34 The intention of this policy is supported in full in realising the Vision and Strategic Objectives set out elsewhere in the Plan.</p> <p>3.35 That said, there is refinement required in the policy wording. In particular, there should be greater recognition of the possibility that not all sites can deliver the full extent of PM2's requirements. This is best illustrated through Criterion (D) which requires a set percentage mix of dwellings to be built to Part M4(2) / M4(3) standards. It should be revised to recognise that not all sites will be capable of achieving such, sometimes owing to site-specific circumstances. Whilst retaining the aspiration and expectation of this policy to provide for accessible housing, amendment is proposed as follows [amendments in bold text]:</p> <p>(i) On schemes of up to 19 dwellings, the Council will expect all new build development to be built in compliance with building regulation part M4(2).</p> <p>ii On schemes of 20 or more dwellings, the Council will require where reasonably possible 5% of the development to be built in compliance with building regulation M4(3)(wheelchair accessible homes), with the remaining development to be built in compliance with building regulation part M4(2).</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP1
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>In October 2021, Aylesham Parish Council supported the Climate and Ecological Emergency (CEE) Bill which address the full extent of the climate and nature crisis in the UK. As a result, any local plan should use up-to-date science to make sound recommendations.</p> <p>As the district is extremely water scarce, all possible measures should be implemented to help mitigate water scarcity. The use of Sustainable Urban Drainage systems (SUDs) is required to be prominent in all future developments. This will help to deal with surface water flooding. We welcome the Draft Local Plan's hierarchy of methods of discharge, with the use of combined sewers coming last.</p> <p>This relates to CC6 of SP1 – Surface Water Management.</p> <p>There are a number of options to ensure new homes produce the least possible carbon emissions. Aylesham Parish Council would like to see Dover District Council require the full 2025 Future Homes Standard to be delivered now (this will reduce emissions by between 75-80% compared to current standards), not at some point during the Local Plan's lifetime.</p> <p>This relates to CC1 of SP1 – Reducing Carbon Emissions.</p> <p>We welcome the commitment to planting trees within new developments that are native to Kent. This will help to keep the rural feel of Aylesham alive. Currently we often see newly planted trees dying within the first few years of their lives. There must be a comprehensive plan to ensure that these trees reach maturity (part d) and how this will be enforced by the local authority.</p> <p>This relates to CC8 of SP1 – Tree Planting and Protection.</p>

	<p>Aylesham Parish Council welcomes the commitment to planting larger numbers of trees but feels this must come with a long-term solution to maintaining the trees. Dover District Council must also commit to the full 2025 future homes standard now.</p> <p>Aylesham Parish Council welcomes the addition and enhancement of open spaces and play areas. However, there are two points to note in the IDP: why would S106 monies from Aylesham be spent upgrading play areas in Nonington?; and play areas and open spaces are last to be delivered in developments – this must not happen in the future.</p> <p>Aylesham Parish Council is identified as “Delivery Partners” on a number of projects due to be delivered: we have not been consulted on this prior to the Regulation 19 document being released.</p> <p>The HRA[1] suggests that AYL003 – Land South of Aylesham is “high” suitability for the European Golden Plover, and so all measures must be taken to ensure this SPA protected bird species is still able to migrate and flourish in the area. SAP 25 (mixed use employment) is considered “moderate”.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<u>PM3 - Providing Open Space</u> Policy PM3 requires 'Residential development of ten or more dwellings will be required to provide or contribute towards the provision of open space that meets the needs of that development, in addition to appropriate maintenance cost'. The policy sets a quantity per 1000 population. The council should note that the open space needs of older people are much less than that presented in the plan. For older people the quality of open space either on site or easily accessible for passive recreation is much more important than formal open space. The council should therefore acknowledge this within the policy and add the following to policy PM3:
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	To make the plan effective the following amendment should be made to the plan: Add new point to policy PM3 to read: Older people's housing schemes will be exempt from the requirements of policy PM3 so long as high quality open spaces for passive recreation is provided on site or is available in an easily accessible.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Policies PM1 (High Quality Design, Placing making and the provision of design codes), PM2 (Quality of Residential Development), PM3 (Providing Open Space), PM4 (Sports Provision) and H1 (Type and Mix of Housing) include prescriptive requirements for major housing developments.</p> <p>As a general principle, it is not evident that the Council has undertaken a review of the impact of such policies (which include minimum internal residential space standards and open space standards) on the deliverability and viability of housing alongside other requirements including affordable housing. In the context of existing policy and delivery of housing at WUE there also needs to be appropriate caveats in relation to how these policies are applied to Whitfield. For instance, Policy H1 (Type and Mix of Housing) requires proposals for 10 or more dwellings to demonstrate how the mix of tenure, type and size of housing reflects the Council's latest evidence on housing need and market demand. For WUE this and other policies need to cross refer to the adopted SPD and also take into account what has already been delivered and the pipeline of future development at Whitfield rather than apply district wide requirements.</p> <p>(DDC Note - Text Extracted from Document sent from Quod. Representation has been split across relevant areas of the Local Plan. Full attachment can be found under reference SDLP1232.)</p>

Representation has been split across relevant areas of the Local Plan. Full attachment and introduction to Policy comments can be found under reference SDLP1265 for Shepherdswell Site and SDLP1266 for Eastry Site.)</p> <p>Policy PM3 – Providing Open Space - COMMENTS Policy PM3 sets out the requirements for the creation, enhancement and management of open space in new development, including parks and gardens, amenity greenspaces, allotments and equipped play spaces. Part C of the policy requests that a ‘Governance Strategy’ should support developments that propose open space which seeks to set out how the open space will be managed and maintained. Our client agrees with the importance to ensure the management and maintenance of open space and would normally detail how it will be managed via a planning obligation. It would be premature to enter into such agreements with the potential stakeholders before a planning application is determined and, as such, it is recommended that this policy is updated to reflect that a scheme to secure long term management and maintenance of the open space must be secured via planning obligation. Policy PM3 sets out a requirement for a Local Area of Plan (LAP) to be provided on site for development of 25 dwellings or more. Open Space requirements should be allowed to be included for consideration as part of any viability assessments conducted for a development proposal. Therefore, greater flexibility for open space requirements should be made, particularly in regards to smaller development sites.</p> <p>Recommendation: DDC should update Draft Policy PM3 to reflect that a scheme to secure long term management and maintenance of the open space must be secured via planning obligation. DDC should also provide greater flexibility for open space requirements for smaller development sites.</p>

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

Consultee Full Name	Cllr John Lonsdale

Consultee Company / Organisation	Walmer Town Council
Agent Full Name	
Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	PM3
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC Note The text below is an extract from the original representation which is attached to SDLP1438. PM 1 – 4 and 6 The statements here are sound. Experience indicates that only a bias in favour of public transparency, full consultation with the public and community organizations, and more effective democratic accountability will ensure that powerful, influential, high-profit developers do not cause the statements to be circumvented
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1860.)</p> <p>e. Policy PM3 – Open Space Quinn Estates wishes to support Policy PM3, but in its current form, the need to have a governance strategy agreed upfront is questioned. This is not considered to be effective, as there will be plenty of instances where the end operator and/or open space management company is yet to be established. In these circumstances, it is requested that Policy PM3 be amended to enable a governance strategy to be conditioned until such the detailed phase of the planning process, where sufficient detail is known as to the detailed layout of space, its function, how spaces will be managed and by whom. Such information is rarely established at outline application stage, because it is usually impractical and undesirable to attempt to do so.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1883.)</p> <p>Draft Policy PM3 – Providing open space - COMMENT PM3 sets out the requirements for the creation, enhancement and management of open space in new development, including parks and gardens, amenity greenspaces, allotments and equipped play spaces. Part C of the policy requests that a 'Governance Strategy' should support developments that propose open space which seeks to set out how the open space will be managed and maintained. BDW agree with the importance to ensure the management and maintenance of open space and would normally detail how it will be managed via a planning obligation. It would be premature to enter into such agreements with the potential stakeholders before a planning application is determined and as such, it is recommended that this policy is updated to reflect that a scheme to secure long term management and maintenance of the open space must be secured via planning obligation.</p> <p>Recommendation: Draft Policy PM3 is updated to reflect that a scheme to secure long term management and maintenance of the open space must be secured via planning obligation.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	PM4 Sports Provision Sections 6.66 & 6.67
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The plan makes reference to a "Playing Pitch Strategy" from 2019. The DDC Website only has details of a Playing Pitch Strategy dated February 2015. If there is an updated document then this should be available on the DDC Website for public viewing in order to consider in conjunction with the proposed local plan policy.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Clarification of the date of the last Playing Pitch Strategy. If this was indeed February 2015 (data gathered in 2014) then there is a clear need for this to be updated as a significant amount of the data provided regarding Cricket is now inaccurate (club mergers, dissolutions, junior sections, playing facility quality etc.). Any update should also include details in relation to the new Kent Cricket Tiered structure from 2023 which confirms the club position within the pyramid structure and therefore the potential quality of facilities required to participate.</p> <p>As an example, we at Walmer Cricket Club (referred to a Hull Park Sports Club which is now historic as the lease to the ground is now solely in the name of Walmer Cricket Club as hockey is no longer played there due to the absence of a synthetic pitch) now has 2 Saturday, Sunday & Mid-week adult teams plus 3 Junior age group teams. This will also require the amendment of your pitch use allocation data; in 2022 41 Senior and 18 Junior home matches were played on our 10 pitch square, meaning average of 5.9 matches per pitch - nearly double the recommended usage.</p> <p>Despite the large number of housing developments within Sholden where we are based, we have yet to see any direct benefit in terms of Section 106 monies in order to assist bringing our facilities up to the required standard needed to support the provision of sport that we provide e.g. extending the cricket square by at least 2 pitches, re-configuration of the clubhouse to accommodate a separate female changing room with toilet and shower facilities.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	PM4
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Most of the existing sports facilities are expensive to use, particularly for families. Obesity is more prevalent in the most socially deprived and financially poorest groups, so most of these plans will not help those in the greatest need. It is of concern that the preservation of the free to use public rights of way network gets no more than a token acknowledgement that it will be protected and enhanced. To surround public rights of way by building renders them useless and unattractive.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Where large scale building is proposed, developers should be required to create new and attractive multi use public rights of way to compensate for those lost in the development.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Sport England broadly supports this section however, in accordance with our guidance for the preparation of the PPS and keeping it up to date, and also in accordance with paragraph 98 of the NPPF, we would strongly recommend that the Council reviews the PPS (stage E of the PPS assessment method) as the data on which the recommendations are made is becoming out of date. The PPS data should be reviewed in consultation with the playing pitch NGBs who report significant additional sports participation and demand locally that should be considered, and with Sport England.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	No changes to the DLP are required at present however the evidence base needs to be brought up to date.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	PM4 - Sports Provision Policy PM4 requires 'contribute to the provision of new, or enhancement of existing, indoor sports facilities and outdoor playing pitch and sports facilities, to meet the needs of the development, and maintenance of those facilities'. The council should note that needs of older people for sport provision are much less than younger people. For older people the quality of open space either on site or easily accessible for passive

	recreation is much more important than formal sports pitches. The council should therefore acknowledge this within the policy and add the following to policy PM4:
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The following amendment should be made to the plan to ensure it is effective. Add new point to policy PM4: Older people's housing schemes will be exempt from the requirements of policy PM4 so long as high quality open spaces for passive recreation is provided on site or is available in an easily accessible.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Policies PM1 (High Quality Design, Placing making and the provision of design codes), PM2 (Quality of Residential Development), PM3 (Providing Open Space), PM4 (Sports Provision) and H1 (Type and Mix of Housing) include prescriptive requirements for major housing developments.</p> <p>As a general principle, it is not evident that the Council has undertaken a review of the impact of such policies (which include minimum internal residential space standards and open space standards) on the deliverability and viability of housing alongside other requirements including affordable housing.</p> <p>In the context of existing policy and delivery of housing at WUE there also needs to be appropriate caveats in relation to how these policies are applied to Whitfield. For instance, Policy H1 (Type and Mix of Housing) requires proposals for 10 or more dwellings to demonstrate how the mix of tenure, type and size of housing reflects the Council's latest evidence on housing need and market demand. For WUE this and other policies need to cross refer to the adopted SPD and also take into account what has already been delivered and the pipeline of future development at Whitfield rather than apply district wide requirements.</p> <p>(DDC Note - Text Extracted from Document sent from Quod. Representation has been split across relevant areas of the Local Plan. Full attachment can be found under reference SDLP1232.)</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am commenting on Policy P5 as, in my view, issues in the district, relating to this policy, may mean the policy is not deliverable and therefore may not be effective over the period of the Plan. My comments relate to Betteshanger Country Park.</p> <p>Under the Reg 19 version of the Local Plan Betteshanger Country Park is assessed as semi/natural green space in both the 2019 Open Space Assessment and the Open Space and Sports Topic Paper 2022. It is shown on the policies map as Protected Open Space (Policy P5) The Council notes the submission of planning applications for this site in the above Topic paper. These are planning applications 22/01152 for a luxury Hotel at the Country Park and DOV22/01158 for a Surfing Lagoon.</p> <p>Related to these applications is the change of use at the Country Park, that has become apparent since 2019 when the Park was bought by Quinn Estates. There is evidence that up until 2015 the saved policy AS2 (from the 2002 Local Plan) was determining how the Country Park should be used. In the past few years it appears that this policy is being ignored. How, when, and if, this change was approved, is unclear.</p> <p>In the document entitled Local Development Scheme. Preparation of the Local Plan Sept 2022. Saved Local Plan policies 2002 it states in 2.3 '2.3 The Dover District Local Plan was adopted in 2002 and covered the period to 2006. In September 2007 the Secretary of State confirmed that a number of the existing Local Plan policies could be 'saved' until they are subsequently superseded by new or revised policies. All of 'saved' 2002 Local Plan policies would be reviewed and replaced as part of the Local Plan review.'</p> <p>It is unclear from the Reg 19 version of the Local Plan how saved policy AS2 was reviewed and what it was replaced with.</p> <p>In the Open Space and Sports Topic Paper 2022 in Appendix 4 it states at 388. Betteshanger Country Park formerly Fowlmead. Recommendation. Retain as it contributes to semi natural/natural green space quantum. It is listed under Protected Open Space.</p> <p>Is this the result of the review? If so it is unfortunate there are no details in this as to what uses will now be acceptable for the Park.</p> <p>The requirement of saved policy AS2 is that the Park should be used for 'low key recreation' that will only be permitted if 'nature conservation interests are safeguarded (and) there is no damage to the ecological value of the site.'</p> <p>Low key recreation is defined under the heading Colliery Spoil Tip:</p>

15.11 'Low key recreational uses such as walking and cycling would be acceptable... this may involve the creation of cycle paths, bridleways, picnic areas and interpretation facilities.' Such a recreational facility would serve some of the informal recreation needs of the Deal Urban area, while providing environmental benefits.'

It should be noted that the Country Park is a site of high biodiversity value, hence the emphasis on protecting its conservation interests. When the Park was first set up a S106 agreement attached to planning permission 02/00905 obliged the Council and the owner to designate the whole Park as a Local Nature Reserve. (see Ref 1) This never happened and the Council is unable to explain why.(see attached S106)

Given the Park's importance for biodiversity and the potential damage to its value under the proposed planning applications, what uses the Council will permit is a crucial issue.

Up until 2015,when planning permission was applied for a Visitor Centre at the Park (DOV1400262 and DOV15/00157) the Council was still abiding by the terms of AS2. At this time Dover District Council was still specifying that the Park should be used for 'low key recreation' as shown below in conditions 13 and 15 attached to the planning permission:

- 1 'The development hereby permitted shall be used for the purposes of a Visitor Centre in accordance with the details shown on drawing number 1750_022-P1 and for no other purpose, including any other purpose within Class D2 of the schedule to the Town & Country Planning (Use Classes) Order 1987 (as amended), or in any provision equivalent to that Class in any statutory instrument revoking and re-enacting that Order with or without modification. Reason: **To ensure the proper development of the area and continued use of the Country Park for 'low key recreation purposes.'**

15 'Any retail use on the site shall be confined to within the Visitor Centre building hereby permitted and it shall be solely ancillary to the functioning of the Visitor Centre as defined by condition 13 above. Reason: **To ensure the proper development of the area and continued use of the Country Park for low key recreation purpose.'**

Since Quinn Estates has owned the Park this has changed and it appears that AS2 is being ignored and a different set of priorities are being used. In 2019 Dover District Council issued a press release which stated:

'We always recognised that the regeneration of the Betteshanger site had huge potential as a tourism, community and sporting hub and we're pleased that the new owners have committed to finishing the exciting new Visitor Centre and Kent Mining Museum. We look forward to working with Quinn Estates to realise the full potential of Betteshanger Country Park.' (see Ref 2)

The 'full potential' has resulted not only in a new Visitor Centre and Mining Museum but the introduction of 4 wheeled swincars to the Park, motorbike events and of course the planning applications. What has happened to saved policy AS2?

There is also a reference in p105 of the Green and Blue Infrastructure Strategy Evidence report of May 2022, to the possibility of the Park being used to 'attract visitors away from coastal areas where there is high pressure on protected nature conservation sites.'

This is also referred to on Page 167 where it states:

'Betteshanger Country Park is a hub for a range of outdoor recreation and leisure activities. The Park could also help to attract visitors away from sensitive coastal areas.'

Does this mean that the Council is looking favourably on further development at the Park in the hope that people will spend their time there rather than visiting the protected sites at Sandwich and Pegwell Bay ?

Despite the listing of Betteshanger Country Park as Protected Open Space in the Reg 19 Local Plan, it appears there may have been a change of heart at the Council. Saved policy AS2 is no longer being adhered to. What exactly, in policy terms has it been replaced with? And what are the uses that the Council now proposes for the Park?

The local community needs to know and effective delivery of Policy P5 will depend upon it,

Ref 1. The S106 agreement attached to the original planning permission of the Park (DOV 02/00905)

See attached document

Dover District Council has welcomed today's announcement that the future of Betteshanger Country Park has been secured.

Nadeem Aziz, Chief Executive of Dover District Council, said: "We've been involved with the Betteshanger project since the start, so we're delighted that its future has been secured with new owners and that the Country Park will remain open and fully operational.

	<p>"We always recognised that the regeneration of the Betteshanger site had huge potential as a tourism, community and sporting hub, and we're pleased that the new owners have committed to finishing the exciting new Visitor Centre and Kent Mining Museum.</p> <p>"We look forward to working with Quinn Estates to realise the full potential of Betteshanger Country Park."</p> <p>Posted on 02 December 2019</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The Local Plan should specify how policy changes are made and how they inform the public of such changes. If the policy for uses of Betteshanger Country Park has been changed then the Local Plan should give a clear explanation and detail how, when, and by whom, these changes were authorised. It should also set out what new uses have been agreed on.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I consider this to be necessary in the interests of transparency when it comes to Council decisions/changes of emphasis</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	<p>P. 260, para 6.81: "...facility which demonstrably provides a net benefit to the community"</p>
<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Justified Effective</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>Not Applicable</p>

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>To allow a small loss of Open Space as outlined below will provide a greater net benefit to the community as it will enable a larger area of Open Space to be restored and improved. The Evidence Base does not justify the current designation which will prevent recommended site improvements (see DDC Evidence Base OPEN SPACE AND PLAY STANDARDS PAPER Dec. 2019 p.17 Table 4.1.4: Rural Analysis Area Quality Summary).</p> <p>The site Off Mill Lane Eastry (site ref 393) is quite large at 0.53 ha and is designated as Amenity Greenspace but with the exception of several trees towards the north of the site. Visually (see pictures attached) this former builders yard and tile manufacturing site is more akin to a brown field site. The site is overgrown by brambles and covered with roof tiles and slag heaps of several tons of building rubble. We argue that while the trees must be protected, the rest of the site has been wrongly classified. This position is also supported by the DDC Evidence Reports: out of all the 120 Open Space sites assessed in the 2019 Open Space Assessment Report, this site is identified as the very lowest scoring amenity green-space in terms of quality (34.4%) and second lowest in terms of value (28.0%).</p> <p>Additional text insert by DDC from comment SDLP468</p> <p>This comment is an amendment to my previous comment in relation to PM5:</p> <p>If the proposed amendment to the Local Plan is approved and subsequent planning application to Dover district Council for a single dwelling is also authorised, provisions will be made to alleviate the current congestion on Mill Lane traffic by providing a car parking space for the adjacent property to the site's East access road, Bushley house. This will result in a further measurable and concrete net benefit to the community.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>This representation seeks to remove a small area from the open space designation of that site. This would enable a single dwelling unit to come forward (self build) under Strategic Policy 3 and taking account of all other Development Management Policies at the time of making the application. Living on site would enable us to restore, improve and manage the remaining open space, improve the quality of the overall site, including both access roads belonging to the site and tree maintenance, resulting in a measured enhancement to Eastry's open space provision and in a net benefit to the community.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	<p>The Open Space and Play Standards Paper (2019, page 17, table 4.1.4) rates 10 Amenity Greenspace sites, including the site "Off Mill Lane Eastry" as being "below quality" and recommends "Enhancing site quality should be explored where possible (e.g. exploring options for improved maintenance, drainage and enhancement of general appearance)."</p> <p>We wish to participate in the oral part of the examination to present how this amendment to the Plan will enhance the site quality and appearance of the area.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>6.69 - The evidence base does not support this paragraph which references 'valued open spaces' Particularly with reference to semi/natural greenspace .</p> <p>The KKP 2019 Open Space Assessment (the Assessment) Report notes at the top of page 27 that "Most natural and semi-natural provision has not received a quality or value rating as per the project brief specification." No explanation is given as to why not.</p> <p>The Open Space and Sport Topic Paper Sept 2022 (the Topic Paper) notes that "This Topic Paper [therefore] forms an informal update to the 4 reports and should be considered the most up to date position when considering proposals for new open space, enhancements to existing open space and loss of open space, and as the Council's priorities for the delivery of new or open space improvements."</p> <p>At 4.9 and 10 the Topic Paper sets out that each type of space and each individual site was given a separate quality and value score. This leads to the conclusion at 4.12 that with reference to value, the majority of sites were above the threshold reflecting the role and importance of open space provision to local communities and environments. Given the statement at the top of page 27 of the Assessment, this is demonstrably not the case.</p> <p>Specifically, in relation to the sub area of Dover in which site WHI009/open space 280 (with reference the Assessment) sits, only 4 sites out of 28 were assessed individually and given a quality and value score. The results are not representative of the quality and value of all of the identified sites. Those scores relate to just 14% of those sites.</p> <p>The designation of sites of semi/natural grassland to 'ensure that valued open spaces within the District are retained and protected' has not been undertaken based on sound evidence. Assumptions have been made based on the quality and value findings of just 14% of the identified sites.</p> <p>It is also relevant that the Assessment confirms at table 5.1 that semi/natural greenspace provision within Dover District is "sufficient" against the Fields In Trust (FIT) suggested 1.80 hectares per 1,000 population as a guideline quantity standard. In fact its provision is nearly double that of the suggested standard.</p>

	<p>Site WHI009 (HELAA) has been identified as being protected open space - semi/natural greenspace where policy PM5 is applicable. To retain site 280 as protected open space where an over provision is identified and where an individual quality or value score has not been given is not a sound approach and its need for protection is not evidenced or justified.</p> <p>It also does not acknowledge or reflect that planning permission has been granted for development of the site to include improved quality and type of open space that would meet shortfalls in other types of open space.</p> <p>Allocation of the site for development under SAP 13 would ensure that both the previous permission granted and its contribution to informal and formal public space could be secured by the LPA without the applicant needing to undertake further assessment as required under PM5 a to demonstrate surplus in the event that a further permission is required. This assessment has already been undertaken by KKP but has fallen short in terms of assessing this individual piece of land.</p> <p>SITE 376 - Land on the East of Marlborough Road Deal CT14 9LE - this site is identified as amenity greenspace on the policies map. The Assessment notes at Section 6 that Dover District is above the FIT guideline quality standard for provision - more than double the amount suggested exists and in Deal double.</p> <p>Site 376 is not included or mapped in the Assessment and therefore we conclude that it was not assessed for quality or value. Planning permission has been granted for development of the site for housing to include an area of open space. The value of the space has been considered to be in its visual amenity and it does not offer what the Assessment considers to be Amenity Greenspace <i>“Opportunities for informal activities close to home or work or enhancement of the appearance of residential or other areas.”</i>The sole reason this site remains as an open space allocation is to ensure that its area can count toward an identified shortfall in amenity greenspace in this part of the District. That is just a numbers game and is not a sound approach to designation of land.</p> <p>The permission granted for the site recognises that a qualitative improvement to the open space through play area and public access would result from development. This demonstrates the point that retaining the site as desinated open space to 'make up the numbers' is a meaningless approach. The quality of open space and the benefit it can bring to the community is what is of value, not its size. The Open Space and Play Standards Paper confirms that what is needed across the board are quality improvements to existing space.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Remove site 280 as protected open space given there is an overprovision of this type of space in this location, its quality and value has not been soundly assessed and it has planning permission for redevelopment.</p> <p>Whether or not the above amendment is agreed:</p> <p>Amend policy PM5 to acknowledge that not all designated open spaces are of good quality or value and that not all sites have been fully assessed. Given this, a degree of flexibility must be introduced into the policy to allow for a case to be made for alternative type and size of provision given the flaws in the evidence base.</p> <p>Amend PM5 b to remove the requirement net benefit in terms of QUANTITY. A hectare of unusable, overgrown and inaccessible open land is of less value than half a hectare of well maintained, available, accessible and biodiversity rich play space in an area of underprovision, for example. This point is wholly demonstrated through the discussion re site 376.</p> <p>Site 376 - remove the designation of amenity grassland. Its inclusion is solely to make up numbers rather than being based on any quantitative and value assessment. The approach to allocation is not sound.</p> <p>There is also no recognition that planning permission has been granted for development of half of the site and at a minimum this half should be removed from the designation.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	PM5 - Nomination for Local Green Space Designation
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	(DDC Note - Attachment includes comments from 8 local residents - names have been redacted) Dear Local Plan Team I am writing on behalf of the Friends of Betteshanger Group to apply for Local Green Space Designation for Betteshanger Country Park. (See attached map) This relates to Policy P5 in the Local Plan. The address of the Park is Betteshanger Country Park, Sandwich Road, Deal CT14 0BF The reasons for nomination are as follows: 1) Tranquillity. The Park is sited away from built up areas and many people use its green space for walking, appreciating nature and enjoying the views over the marshes 2. Richness of Wildlife. The Park is a site of high biodiversity value. In fact when the Park was first set up a S106 agreement attached to the permission obliged the Council and the owner to designate the whole Park as a Local Nature Reserve. This never happened. Recently it has been shown just how important the site still is for wildlife. For example the second most important colony of Lizard orchids in the Country grows there. Lizard orchids are a protected plant and are nationally rare. There are also many birds including Turtle Doves the UK's fastest declining bird, Beavers, reptiles such as Slow worms and Common Lizard, Invertebrates of County importance and over 300 species of native plant. 3) Recreational Value. The Park has great recreational value with walking and cycling trails and a variety of family activities and events. 4) Close proximity. The Park was set up to benefit the local community, especially the mining community at Betteshanger. It is within reasonable walking distance of Sholden, Betteshanger Circle, Hacklinge and Deal. There are footpaths from Sholden and Deal. 5) Demonstrably Special. The Park is demonstrably special in a number of ways: a) Beauty. Much of the Park is visually attractive with trees, open water and marsh views. b) Historical significance. This is a site of great value to the ex mining community and

<p>to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>their descendants hence the provision of the Mining Museum. c) It is very special to local naturalists and people who use it to benefit their physical and mental health. Please see the attachment below which shows the value local people attach to the Park as a local green space. 6). Existing designations. The Park has no existing designations. 7) Size. The Park is large with clear and defensible boundaries. 8) Planning history. The Park was set up in 2004 under planning application 02/00905. Planning granted under applications 14/00262 and 15/00157 for the Visitor Centre including the Cafe and Mining Museum. Two planning applications have been submitted for a Hotel and Surf Lagoon on the site. (22/01152 and 22/01158.) Thank you for considering this request.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	PM5
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am commenting on Policy P5 as, in my view, issues in the district, relating to this policy, may mean the policy is not deliverable and therefore may not be effective over the period of the Plan. My comments relate to Betteshanger Country Park.</p> <p>Under the Reg 19 version of the Local Plan Betteshanger Country Park is assessed as semi/natural green space in both the 2019 Open Space Assessment and the Open Space and Sports Topic Paper 2022. It is shown on the policies map as Protected Open Space (Policy P5) The Council notes the submission of planning applications for this site in the above Topic paper. These are planning applications 22/01152 for a luxury Hotel at the Country Park and DOV22/01158 for a Surfing Lagoon.</p> <p>Related to these applications is the change of use at the Country Park, that has become apparent since 2019 when the Park was bought by Quinn Estates. There is evidence that up until 2015 the saved policy AS2 (from the 2002 Local Plan) was determining how the Country Park should be used. In the past few years it appears that this policy is being ignored. How, when, and if, this change was approved, is unclear.</p> <p>In the document entitled Local Development Scheme. Preparation of the Local Plan Sept 2022. Saved Local Plan policies 2002 it states in 2.3 '2.3 The Dover District Local Plan was adopted in 2002 and covered the period to 2006. In September 2007 the Secretary of State confirmed that a number of the existing Local Plan policies could be 'saved' until they are subsequently superseded by new or revised policies. All of 'saved' 2002 Local Plan policies would be reviewed and replaced as part of the Local Plan review.'</p> <p>It is unclear from the Reg 19 version of the Local Plan how saved policy AS2 was reviewed and what it was replaced with.</p> <p>In the Open Space and Sports Topic Paper 2022 in Appendix 4 it states at 388. Betteshanger Country Park formerly Fowlmead. Recommendation. Retain as it contributes to semi natural/natural green space quantum. It is listed under Protected Open Space.</p> <p>Is this the result of the review? If so it is unfortunate there are no details in this as to what uses will now be acceptable for the Park.</p> <p>The requirement of saved policy AS2 is that the Park should be used for 'low key recreation' that will only be permitted if 'nature conservation interests are safeguarded (and) there is no damage to the ecological value of the site.'</p> <p>Low key recreation is defined under the heading Colliery Spoil Tip:</p> <p>15.11 'Low key recreational uses such as walking and cycling would be acceptable... this may involve the creation of cycle paths, bridleways, picnic areas and interpretation facilities.' Such a recreational facility would serve some of the informal recreation needs of the Deal Urban area, while providing environmental benefits.'</p> <p>It should be noted that the Country Park is a site of high biodiversity value, hence the emphasis on protecting its conservation interests. When the Park was first set up a S106 agreement attached to planning permission 02/00905 obliged the Council and the owner to designate the whole Park as a Local Nature Reserve. (see Ref 1) This never happened and the Council is unable to explain why.</p> <p>Given the Park's importance for biodiversity and the potential damage to its value under the proposed planning applications, what uses the Council will permit is a crucial issue.</p> <p>Up until 2015, when planning permission was applied for a Visitor Centre at the Park (DOV1400262 and DOV15/00157) the Council was still abiding by the terms of AS2. At this time Dover District Council was still specifying that the Park should be used for 'low key recreation' as shown below in conditions 13 and 15 attached to the planning permission:</p> <p>13. 'The development hereby permitted shall be used for the purposes of a Visitor Centre in accordance with the details shown on drawing number 1750_022-P1 and for no other purpose, including any other purpose within Class D2 of the schedule to the Town & Country Planning (Use Classes) Order 1987 (as amended), or in any provision equivalent to that Class in any statutory instrument revoking and re-enacting that Order with or without modification. Reason: To ensure the proper development of the area and continued use of the Country Park for 'low key recreation purposes.'</p> <p>15 'Any retail use on the site shall be confined to within the Visitor Centre building hereby permitted and it shall be solely ancillary to the functioning of the Visitor Centre as defined by condition 13 above. Reason: To ensure the proper development of the area and continued use of the Country Park for low key recreation purpose.'</p>

Since Quinn Estates has owned the Park this has changed and it appears that AS2 is being ignored and a different set of priorities are being used. In 2019 Dover District Council issued a press release which stated:
 'We always recognised that the regeneration of the Betteshanger site had huge potential as a tourism, community and sporting hub and we're pleased that the new owners have committed to finishing the exciting new Visitor Centre and Kent Mining Museum. We look forward to working with Quinn Estates to realise the full potential of Betteshanger Country Park.' (see Ref 2)
 The 'full potential' has resulted not only in a new Visitor Centre and Mining Museum but the introduction of 4 wheeled swincars to the Park, motorbike events and of course the planning applications. What has happened to saved policy AS2?
 There is also a reference in p105 of the Green and Blue Infrastructure Strategy Evidence report of May 2022, to the possibility of the Park being used to 'attract visitors away from coastal areas where there is high pressure on protected nature conservation sites.'
 This is also referred to on Page 167 where it states:
 'Betteshanger Country Park is a hub for a range of outdoor recreation and leisure activities. The Park could also help to attract visitors away from sensitive coastal areas.'
 Does this mean that the Council is looking favourably on further development at the Park in the hope that people will spend their time there rather than visiting the protected sites at Sandwich and Pegwell Bay ?
 Despite the listing of Betteshanger Country Park as Protected Open Space in the Reg 19 Local Plan, it appears there may have been a change of heart at the Council. Saved policy AS2 is no longer being adhered to. What exactly, in policy terms has it been replaced with? And what are the uses that the Council now proposes for the Park?
 The local community needs to know and effective delivery of Policy P5 will depend upon it,
 There is a second related issue that of the Nature Conservation Management Plan for the Country Park.
 The planning permissions for the Visitor Centre at Betteshanger Country Park (DOV 14/00262 and 15/00157) have a condition (no.4) attached that states the following: 4 'The development shall be carried out in accordance with the approved Nature Conservation Management Plan (JBA Consulting, issue 03 approved under application DOV/14/00262) and agreed Ecological Management Plan Final Report dated October 2015. Reason: In the interests of nature conservation and protection.'
 Why was permission granted for the Visitor Centre when condition 4 had not been met and what has happened to the requirement that a Nature Conservation Management Plan should be in place for the Country Park ? According to the JBA Consulting issue 03 , approved under application DOV14/00262, there is meant to be a further issue 04. Where is it and why isn't it being implemented? This is particularly relevant in the light of the current planning applications for a Hotel and Surf Lagoon at the Park. Looking at the objectives of the Nature Conservation Management Plan issue 03, it is clear that the development proposals would be in direct conflict with the NCMP.
 Issue surrounding Betteshanger Country Park need to be investigated particularly in the light of the Local Plan recommendation that the Park should be retained as semi/natural green space and Protected Open Space.
 Ref 1. The S106 agreement attached to the original planning permission of the Park (DOV 02/00905)
 This is attached to the email accompanying the Representation form

 Ref 2 DDC Welcomes Betteshanger Parks Announcement
 Dover District Council has welcomed today's announcement that the future of Betteshanger Country Park has been secured.
 Nadeem Aziz, Chief Executive of Dover District Council, said: "We've been involved with the Betteshanger project since the start, so we're delighted that its future has been secured with new owners and that the Country Park will remain open and fully operational.
 "We always recognised that the regeneration of the Betteshanger site had huge potential as a tourism, community and sporting hub, and we're pleased that the new owners have committed to finishing the exciting new Visitor Centre and Kent Mining Museum.
 "We look forward to working with Quinn Estates to realise the full potential of Betteshanger Country Park."
 Posted on 02 December 2019

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful

Explanations for the apparent change of policy in relation to Betteshanger Country Park and explicit plans for its future need to be included in the Plan in the interests of transparency and for the benefit of the local community.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I consider it to be necessary to secure the future of the Park as Protected Open space and part of the semi/natural green space quantum of the district.

<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Positively prepared Justified Effective Consistent with National Policy</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>No</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	One glaring omission is Betteshanger Country Park formerly Fowlmead. This site was formerly publicly-owned by SEEDA and under SEEDA, designation as Local Nature Reserve was applied for in 2004, but the application got lost. Then the now defunct Hadlow College took it on until their financial problems caused the current developer to snap it up. The site has long been designated as 'low key recreation' by DDC.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The site has rewilded over 30 years and DDC planning portal holds evidence (applications 22/01158 and 22/01152 refer) of how Kent nature / wildlife-concerned NGOs and the Kent Recorder, agree this is a well-loved biodiversity hotspot, a habitat of a number of endangered species. As such, all this site must be designated as a Local Green Space for the Plan to become sound and effective.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Lander Planning sent a PDF document which has been split across the relevant sections of the Plan. See Original Attachment on SDLP1346)</p> <p>The wording of this policy relating to the protection of 'open space' could be very broadly interpreted and this policy wording should be more tightly drawn to avoid ambiguity. Developments within settlements are generally sustainably located and to restrict development in these areas would be contrary to national planning policy.</p> <p>Other policies in the Local Plan should seek to protect the setting of heritage assets for example. The circumstances set out in the policy are quite far reaching and could preclude many sustainable developments within settlements. This policy should be re-worded to only include outdoor recreation facilities, playing fields and allotments and sites that are designated Local Green Space.</p> <p>This policy wording is not effective or justified in that regard and is not supported.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Local Green Space Designation Proposal: Almonry Meadow, Northbourne</p> <p>Northbourne Parish Council proposes the following site for Local Green Space Designation within the new Dover District Local Plan which is currently under preparation at the Regulation 19 stage.</p> <p>Site Details</p> <p>Almonry Meadow, The Drove, Northbourne, Kent The proposed site is wholly owned in title by Northbourne Parish Council</p> <p>Summary of Site Proposal</p> <p>The Almonry Meadow is a community green space of some 1.45ha comprising a playing field, recreation ground, outdoor gym and children's play area.</p> <p>The majority of the site is of open mown grass, the site is bordered by mature, specimen trees, hedgerow and, on its southeastern boundary, by the c19th red brick wall of the listed gardens at Northbourne Court. The site is located to the north of The Street in the historic village of Northbourne. Adjoining the site to the southwest is the Church of St Augustine.</p> <p>The site is proposed to secure formal recognition of its recreation and wellbeing value to the community, its historic setting and links with Northbourne village, and its visual attractiveness and tranquillity.</p> <p>Planning Policy for Local Green Space Designation Consideration has been given to the requirements for Local Green Space Designation within the National Planning Policy Framework (1).</p> <p><i>101. The designation of land as Local Green Space through local and neighbourhood plans allows communities to identify and protect green areas of particular importance to them. Designating land as Local Green Space should be consistent with the local planning of sustainable development and complement investment in sufficient home, jobs and other essential services. Local Green Space should only be designated when a plan is prepared or updated, and be capable of enduring beyond the end of the plan period.</i></p> <p><i>102. The Local Green Space designation should only be used where the green space is: a) in reasonably close proximity to the community it serves; b) demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife; and c) local in character and is not an extensive tract of land.</i></p> <p><i>103. Policies for managing development within a Local Green Space should be consistent with those for Green Belts.</i></p> <p>Assessment of Proposed Site Against NPPF Greenspace Criteria</p> <p><i>i. Proximity to the community served The Almonry Meadow is an integral and historic part of Northbourne Village. Located centrally it provides a valued local green space for recreation, village events, relaxation, and wellbeing. The Almonry Meadow is also used by residents of the wider Parish, particularly those living in the former mining community at Circular Road, Betteshanger and residents in nearby Finglesham. The Meadow is both close to and integral to the community it serves. Access to the site is well provided for by various public rights of way to/from the village, via the churchyard, and onwards via the public rights of way through wider registered parkland at Northbourne Court. Vehicle access is provided via The Drove with good car parking provision in the adjacent Northbourne Parish Hall</i></p> <p><i>ii. Significance to the community</i></p> <p>The Meadow has strong historic links to Northbourne where it served as part of the farmstead Almonry Farm, the former Almonry Farmhouse being a listed building adjacent to the meadow. The meadow also has long historic links with the adjacent grade I listed Church of St Augustine², the former St. Augustine's Abbey and the adjoining grade II* registered Parkland and Gardens at Northbourne Court³.</p>

The Almonry Meadow has been a distinct open area within the village for centuries, and more recently has transferred into the ownership of the Parish Council for the long-term benefit of the Parish. The Almonry Meadow serves the community as a multi-purpose green space, used for exercise, recreation, sports, and relaxation in a peaceful, historic and tranquil setting. The Meadow also offers a dedicated children's play area and an exercise space with outdoor gym equipment. The Meadow adjoins the Parish Hall and provides an outside space for summer parties, fetes, and outdoor community events.

The attractive setting and tranquillity of the Meadow is recognised as a particular quality. Northbourne is noted as being strongly tranquil in the Dover District 2020 Landscape Character Assessment⁴ and the location of the Meadow away from roads or major development makes it a valuable local resource for residential wellbeing, unencumbered by noise and disturbance.

iii. Local Character and Site Extent

The Meadow is centrally located in relation to the village, the Church of St Augustine and Northbourne Court. The site is not excessively large, measuring some 1.45ha in area. The Meadow is a well-defined site with clear borders and a strong functional relationship with the village. It is considered that the proposed site is both local in character and is not an extensive tract of land

Planning Practice Guidance – Local Green Space

Government Planning Practice Guidance⁵ provides further considerations for Local Green Space designation. We consider that the proposed site at Almonry Meadow meets these criteria. The proposed Local Green Space does not conflict with site allocations in the draft local plan, nor do we see conflict with the plan in respect of policy making. There are no planning consents on the proposed site and none of significance close to the site where conflict could arise.

It noted that the proposed site is contained within the Northbourne Conservation Area. Planning Practice Guidance recognises this situation where other designations may apply and provides advice:

Different types of designations are intended to achieve different purposes. If land is already protected by designation, then consideration should be given to whether any additional local benefit would be gained by designation as Local Green Space

The Conservation Area is a heritage designation which seeks to protect the significance of the historic village, listed buildings and their shared setting. The proposed Local Green Space site at Almonry Meadow is considered to have some existing protection in respect of heritage value through the Conservation Area designation. However, our submission proposes that the Almonry Meadow has significance and value to the community beyond heritage with particular importance for recreation, exercise and community events along with the provision of a calm, tranquil green space which promotes wellbeing. The designation as Local Green Space would recognise and protect these qualities in addition to the heritage designation offered by the Conservation Area. We consider that Local Green Space would be an appropriate designation providing additional local benefit.

(DDC note - see attachment for full representation with images and references.)

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	As Aylesham has already had hundreds of houses built since 2016 in our village, it no longer has the village 'feel', surrounded by houses on all sides. AYL002 is the last remaining green area within the village where children run and play, and walkers / dog walkers can enjoy a safe walk, where they can be seen, so will not be attacked or accosted. I don't think it is too much to ask to leave this space, we as an area have, and are having so many houses built, it is changing the ethos, with no infrastructure being put in the builders plans - yes, done? No!! where AYL004 has 500 homes removed, thank you, but we desperately need a secondary school, a proper supermarket, and another doctors surgery. Persimmons and Barratts should be putting a proper sum in to accomplish this, that 500 homes space could be used for this with their financial help.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance	I don't think it is sound planning or justified to take the last green space away from the village. It is not effective for mental health, exercise space for children to run or play or adults to walk. Your local plan does not even state how many houses, so I cant state what modification is needed, none is the preferred amount.

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	PM6
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>During public consultation the council has been made aware that while there is a recognised need for limited housing growth there are very strong concerns regarding the proposed sites in both Shepherdswell and Coldred and the consequential impact of proposed housing developments in the neighbouring villages of Eythorne and Elvington.</p> <p>New housing without adequate local infrastructure puts significant strain on local amenities such as medical services, school and playgroup places as well as increasing traffic on our roads. The existing sewerage system is already overloaded and any future developments will only exacerbate this problem.</p> <p>Transport. Whilst we are fortunate to have a railway station it does not offer reasonable access to disabled persons or those with limited mobility- it is difficult to envisage how access can be improved.</p> <p>Most bus services have now been withdrawn apart from school services so residents will have to rely on cars for shopping etc. There are no dedicated cycle paths and many cyclists are reluctant to use their bikes because of this traffic congestion.</p> <p>Those residents who want to use the train services must endure walking to the station on roads with limited or no footpaths. Residents in Eythorne and Elvington will have to either use cars to get to the station or walk along a very busy main road - again without footpaths.</p>

	<p>Village Services. The surgery situated in Mill Lane is oversubscribed and patients are very often referred to the Dover branch . There is no “walk in “ service .</p> <p>The village school is again nearly full with no current plans for extending present facilities. The location of the school causes severe traffic congestion at core times. Many parents taking their children to school have to walk up Church Hill which is a narrow, busy road with no footpath. The nearest secondary schools are located in Dover and parents experience considerable difficulty in transporting their children to school.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>If development of any kind is to be permitted it should be linked to a S106 agreement to improve the facilities within Shepherdswell and Coldred. The plan indicates that Dover District Council can fund parish councils from S106 monies when a case is made that this is a good use of funds. Shepherdswell with Coldred Parish Council would like to make a case for funding of community facilities, including improvements to the village hall, its parking facilities, the recreation ground, the cemeteries and improvements to the local school.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Aylesham Parish Council agrees that there is a need to increase housing stock both nationally and within the Dover district.</p> <p>Over recent years, Aylesham has greatly assisted in helping to increase the numbers of homes within the local community (having delivered 917 homes so far with a further 443 to come). However, it is felt that any future development should be kept to a minimum.</p> <p>This relates to SP3 – Housing Growth.</p> <p>South Aylesham (SAP24) includes a large number of positives (such as inclusion of play parks, open spaces, cycle links and protecting and enhancing wildlife) but there is a lack of firm commitments to facilities. The development makes reference to “a new small convenience shop” which is wholly insufficient for the proposed number of new homes.</p> <p>Dover District Council is looking at updating its parking policy for future developments. Currently the Kent Design Guide and the Kent Design Guide Review: Interim Guidance Note 3 to apply planning constraints. It is welcome to see this referenced in the Draft Local Plan. It is important that future developments allow for independently accessible parking spaces (as opposed to tandem spaces) and that car ports or garages are not included as parking.</p> <p>This will greatly improve parking, especially in rural developments.</p> <p>More considerate parking will greatly improve access for pedestrians as well as safety for pedestrians and cyclists.</p> <p>Aylesham Parish Council believes that a new small convenience shop in any new development would be wholly insufficient. Dover District Council should also look to adopt more stringent parking policy reform.</p> <p>It has been noted on previous planning applications that the sewerage pipes in the village may be at their capacity, so any further developments could push them past their breaking point.</p> <p>This should be addressed before any further development can be considered.</p>

	Current planes for housing development do not go far enough in providing homes that are suitable for disable people or homes that can be easily adapted in the future to meet the needs of home owners. An increase in the number of dwellings built to an accessible standard would be welcomed
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>7.3 Detail is also given within the current SHMA on the dwelling sizes by tenure, with an overall mix sought of 12.2% from one bedroom, 20.4% from two bedrooms, 35.2% from three bedrooms, and 32.2% four or more bedroom dwellings. These tenures may be subject to change in future SHMAs.</p> <p>I consider this unsound as Dover District has an ageing population and therefore requires many more 1 bed retirement flats. There are also many youngsters who cannot afford the prices locally as they are inflated by the many homes snapped up in Deal and on the coast for holiday homes and airbnb's. They also need 1 bed flats. It is ridiculous that over 2/3 of the housing mix proposed are over 3 bedroom. It begs the question who are these actually for? They are not affordable and not for local people. If tasteful, well insulated, green tech, affordable flats were built on the same footprint as these massive executive homes we wouldn't have a housing crisis.</p> <p>These figures should be driven by local demand and not the needs of investors or developers.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	7.3 should read 33% 1 bedroom flats, 33% 2 bed houses and flats, 20% 3 bedroom houses and 14% four or more bedroom houses.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Because it is close to London and the area's natural attractions local economically active people are priced out of the housing market for housing they could otherwise afford.</p> <p>Planning conditions should impose a "local connection test" so that the housing can only be bought by people who fulfil the test.</p> <p>The Local and Neighbourhood Plans should contain a proper assessment of the scarcity and cost of housing for locally economically active residents and suitable remedial measures. Accordingly planning law would require applications for planning permission to be determined in line with the development plan reflecting these issues. (There would be no effect on existing housing except, maybe to increase its value).</p> <p>Any section 106 agreement should require a proportionate contribution to the demands imposed by the development on existing and future local infrastructure.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	H1 - type and mix of housing - section 7.3
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Section 7.3 indicates that the district plan seeks an overall housing mix of "12.2% from one bedroom, 20.4% from two bedrooms, 35.2% from three bedrooms, and 32.2% four or more bedroom dwellings". This mix feels very unsound - and simply does not meet the current or future housing challenges we face, especially in southern England. The proposed mix will inhibit the sustainable and effective growth of housing needed in the future. With young people finding it increasingly hard to get on the housing ladder at all - the pressing need is for small one or two bedroom starter homes and flats. Similarly - we face significant societal and other changes - including longer life expectancy and many marriages now ending when couples reach their 50s and 60s. These mean a growing need for small one or two bedroom retirement homes and apartments.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The proposed overall housing mix proposed in the current draft district plan should be comprehensively revised - with a very considerable increase in the goal for new one and two bedroom flats and housing. And a reduction in the number of larger three, four and more bedroom dwellings.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>See attached supporting statement</p> <p>Text below (copied from attached statement) added by DDC</p> <p>Policy H1: Type and Mix of Housing</p> <p>4.2.1 No objection in principle is raised in respect of Policy H1, which seeks to ensure a mix of housing is provided which meets identified needs in the District. However, the wording of the policy must be amended to provide greater flexibility to allow for individual site circumstances. This is to ensure the mix is in keeping and reflective of the local character of the area, ensures the most efficient use of Sites, and provides flexibility for developments to respond to changes in market conditions.</p> <p>4.2.2 It is proposed that the policy is amended as follows:</p> <p>Proposals for 10 or more dwellings will be required to demonstrate how the mix of tenure, type and size of housing proposed on site has had regard to reflects the Council's latest evidence of housing need and market demand and contributes towards meeting the varied needs of different households including single person households, couples, families with children, older people, people with disabilities and people wishing to build their own homes. The housing mix should be balanced against meeting other design requirements, such as in Policy PM1.against meeting other design requirements, such as in Policy PM1.</p> <p>Development proposals for standalone older persons housing or other specialist housing are exempt from this requirement and will be supported in principle where the need has been identified by extensive and robust evidence, and where they can be located in a suitable and sustainable way.</p>

	4.2.3 The above change is necessary to ensure the policy aligns with other design considerations in the Reg 19 Local Plan and is "Consistent with National Policy", which also requires other design considerations to be taken into account (NPPF, Sections 11 & 12), to ensure the delivery of high-quality sustainable developments
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	See attached supporting statement Text below (copied from attached statement) added by DDC 4.2.2 It is proposed that the policy is amended as follows: Proposals for 10 or more dwellings will be required to demonstrate how the mix of tenure, type and size of housing proposed on site has had regard to reflects the Council's latest evidence of housing need and market demand and contributes towards meeting the varied needs of different households including single person households, couples, families with children, older people, people with disabilities and people wishing to build their own homes. The housing mix should be balanced against meeting other design requirements, such as in Policy PM1.against meeting other design requirements, such as in Policy PM1. Development proposals for standalone older persons housing or other specialist housing are exempt from this requirement and will be supported in principle where the need has been identified by extensive and robust evidence, and where they can be located in a suitable and sustainable way. 4.2.3 The above change is necessary to ensure the policy aligns with other design considerations in the Reg 19 Local Plan and is "Consistent with National Policy", which also requires other design considerations to be taken into account (NPPF, Sections 11 & 12), to ensure the delivery of high-quality sustainable developments
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	In order to ensure that our case is properly put forward and understood, and to provide the opportunity to respond to any questions/points raised by the Council and Local Plan Inspector which might result outside the written representations made and following discussion at the EiP.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The 2018-based ONS sub-regional population projections for the district estimate that the 65 and over population will both grow in number, from 28,260 in 2020 to 40,938 in 2040, and in percentage terms rise from 23.6% of the total population in 2020 to 29.4% in 2040. It will be important that future housing provision provides for their needs, be that bungalows or sheltered accommodation. This would help release 3-bedroom homes onto the market.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	CPRE Kent would wish to participate at the examination hearings to explore these issues further.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Please see supporting statement attached Text below (copied from attached statement) added by DDC Policy H1: Type and Mix of Housing <i>4.2.1 No objection in principle is raised in respect of Policy H1, which seeks to ensure a mix of housing is provided which meets identified needs in the District. However, the wording of the policy must be amended to provide greater flexibility to allow for individual site circumstances. This is to ensure the mix is in keeping and reflective of the local character of the area, ensures the most efficient use of Sites, and provides flexibility for developments to respond to changes in market conditions.</i>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Please see supporting statement Text below (copied from attached statement) added by DDC 4.2.2 It is proposed that the policy is amended as follows: Proposals for 10 or more dwellings will be required to demonstrate how the mix of tenure, type and size of housing proposed on site has had regard to reflects the Council's latest evidence of housing need and market demand and contributes towards meeting the varied needs of different households including single person households, couples, families with children, older people, people with disabilities and people wishing to build their own homes. The housing mix should be balanced against meeting other design requirements, such as in Policy PM1. Development proposals for standalone older persons housing or other specialist housing are exempt from this requirement and will be supported in principle where the need has been identified by extensive and robust evidence, and where they can be located in a suitable and sustainable way. 4.2.3 The above change is necessary to ensure the policy aligns with other design considerations in the Reg 19 Local Plan and is "Consistent with National Policy", which also requires other design considerations to be taken into account (NPPF, Sections 11 & 12), to ensure the delivery of high-quality sustainable developments.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	In order to ensure that our case is properly put forward and understood, and to provide the opportunity to respond to any questions/points raised by the Council and Local Plan Inspector which might result outside the written representations made and following discussion at the EIP.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>H1– Type and Mix of Housing</p> <p>Policy H1 was previously policy DM11 in the regulation 18 consultation. We responded to the previous consultation recommending amendments to the policy but this appears to have been disregarded and therefore it is still felt that this policy is not justified, effective or consistent with national policy and therefore unsound.</p> <p>As noted above in our response to para 7.4, whilst the identified need for Housing with Care is low and therefore ought to be reviewed, overall it identifies a considerable need that equates to over 5% of the overall housing requirement. Yet, and mindful of the PPG guidance, the only reference to addressing the housing need of older people is within H1 that states:</p> <p><i>“Development proposals for stand alone older persons housing or other specialist housing are exempt from this requirement and will be supported in principle where the need has been identified by extensive and robust evidence, and where they can be located in a suitable and sustainable way”.</i></p> <p>As detailed in our regulation 18 response, given the identified high level of need, the policy should not require applicants for older peoples housing to prove need. We still believe that given the difficulties in delivering market retirement housing as evidenced by the low levels of delivery in Dover District historically, a stand alone policy should be drafted which actively encourages older persons housing, acknowledging the already proven need and not seeking to restrict it by need or unnecessary locational factors.</p> <p>Although it is acknowledged that the council is seeking to deliver some older persons' housing on allocations (3 allocations), the policy as drafted also infers that the housing needs of older people can simply be met by any housing development over 10 units, including a required proportion (i.e 5% or 1 unit in a 20 unit scheme) being older persons housing. This approach misunderstands the concept of older person housing (which the SHMA identifies and as defined in the PPG) which are group/communities based around shared services. Schemes are normally at least 30 units in order to support those services. Developers should not be required to demonstrate need given the many benefits that such developments bring.</p> <p>Benefits of Older Persons' Housing</p> <p>Older peoples housing produces a large number of significant benefits which can help to reduce the demands exerted on Health and Social Services and other care facilities – not only in terms of the fact that many of the residents remain in better health, both physically and mentally,</p>

but also doctors, physiotherapists, community nurses, hairdressers and other essential practitioners can all attend to visit several occupiers at once. This leads to a far more efficient and effective use of public resources.

Economic

A report '*Healthier and Happier' An analysis of the fiscal and wellbeing benefits of building more homes for later living*' by WPI Strategy for Homes for Later Living explored the significant savings that Government and individuals could expect to make if more older people in the UK could access this type of housing. The analysis showed that:

- 'Each person living in a home for later living enjoys a reduced risk of health challenges, contributing to fiscal savings to the NHS and social care services of approximately £3,500 per year.
- Building 30,000 more retirement housing dwellings every year for the next 10 years would generate fiscal savings across the NHS and social services of £2.1bn per year.
- On a selection of national well-being criteria such as happiness and life satisfaction, an average person aged 80 feels as good as someone 10 years younger after moving from mainstream housing to housing specially designed for later living.'

Each person living in a home for later living enjoys a reduced risk of health challenges, contributing fiscal savings to the NHS and social care services of approximately £3,500 per year (*Homes for Later Living September 2019*). More detail on these financial savings is set out within the report.

A further report entitled *Silver Saviours for the High Street: How new retirement properties create more local economic value and more local jobs than any other type of residential housing* (February 2021) found that retirement properties create more local economic value and more local jobs than any other type of residential development. For an average 45 unit retirement scheme, the residents generate £550,000 of spending a year, £347,000 of which is spent on the high street, directly contributing to keeping local shops open.

As recognised by the PPG, Retirement housing releases under-occupied family housing and plays a very important role in recycling of housing stock in general. There is a 'knock-on' effect in terms of the whole housing chain enabling more effective use of existing housing. In the absence of choice, older people will stay put in properties that are often unsuitable for them until such a time as they need expensive residential care. A further Report "*Chain Reaction" The positive impact of specialist retirement housing on the generational divide and first-time buyers (Aug 2020)*" reveals that about two in every three retirement properties built, releases a home suitable for a first-time buyer. A typical Homes for Later Living development which consists of 40 apartments therefore results in at least 27 first time buyer properties being released onto the market.

Social

Retirement housing gives rise to many social benefits:

- Specifically designed housing for older people offers significant opportunities to enable residents to be as independent as possible in a safe and warm environment. Older homes are typically in a poorer state of repair, are often colder, damper, have more risk of fire and fall hazards. They lack in adaptations such as handrails, wider internal doors, stair lifts and walk in showers. Without these simple features everyday tasks can become harder and harder
- Retirement housing helps to reduce anxieties and worries experienced by many older people living in housing which does not best suit their needs by providing safety, security and reducing management and maintenance concerns.
- The Housing for Later Living Report (2019) shows that on a selection of wellbeing criteria such as happiness and life satisfaction, an average person aged 80 feels as good as someone 10 years younger after moving from mainstream housing into housing specifically designed for later living.

Environmental

The proposal provides a number of key environmental benefits by:

- Making more efficient use of land thereby reducing the need to use limited land resources for housing.
- Providing housing in close proximity to services and shops which can be easily accessed on foot thereby reducing the need for travel by means which consume energy and create emissions.
- Providing shared facilities for a large number of residents in a single building which makes more efficient use of material and energy resources.

It is therefore clear there will be a significant increase in older persons' over the Plan Period and the provision of suitable housing and care to meet the needs of this demographic should be a priority of the emerging Local Plan in line with the draft plan's evidence especially given national policy requirements and benefits such schemes provide.

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Recommendation:</p> <p>Policy H1 is considered unsound as it is not justified, effective or consistent with national policy unless the following amendments are made.</p> <ol style="list-style-type: none"> 1 That Policy H1 be amended to delete reference to the housing needs of older people and is replaced by a standalone policy that encourages the provision of such housing in acknowledgement of the already identified need, referring to the types of older persons housing identified in the NPPG and the SHMA. <p>While we appreciate that no single planning approach will be appropriate for all areas, an example policy is provided that, we hope, will provide a useful reference:</p> <p><i>“The Council will encourage the provision of specialist housing for older people across all tenures in sustainable locations. The Council aims to ensure that older people are able to secure and sustain independence in a home appropriate to their circumstances by providing appropriate housing choice, particularly retirement housing and Extra Care Housing/Housing with Care. The Council will, through the identification of sites, allowing for windfall developments, and / or granting of planning consents in sustainable locations, provide for the development of retirement accommodation, residential care homes, close care, Extra Care and assisted care housing and Continuing Care Retirement Communities.”</i></p>

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Older person's need – Para 7.4</p> <p>The council identifies at para 7.4 of the draft plan that <i>“The SHMA also prescribes that 576 units of housing for older people and 66 units of housing with care should be provide within the identified need and identifies a need for 990 additional spaces of Registered Care for housing those aged 65 and over between 2020 and 2040. This forms part of the institutional population and is in addition to the housing supplied within the local housing need identified above”.</i></p> <p>We identified in our response to the previous consultation that the very low Housing with Care (also known or Extra Care) requirement is surprising as generally there is a high level of need for such accommodation and active encouragement should be provided given that housing for older people aims to maintain independence with the help of care tailored to the needs of the individual. This is an attractive alternative to the formalised living environment of a Care Home. We recommended through the regulation 18 consultation that the evidence should be reviewed. This has not been undertaken as the same need figures have been taken forward. We also recommended that the housing requirement for older persons housing even at the low figure is some 5% of the overall housing requirement and therefore a significant consideration and housing need that the Local Plan should address which again doesn't appear to have been considered fully.</p> <p>Government's policy, as set out in the revised NPPF, is to boost significantly, the supply of housing. Paragraph 60 reads <i>“To support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, that the needs of groups with specific housing requirements are addressed and that land with permission is developed without unnecessary delay.”</i></p> <p>The revised NPPF looks at delivering a sufficient supply of homes, Paragraph 62 identifies within this context, the size, and type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policies including older people.</p> <p>In June 2019 the PPG was updated to include a section on Housing for Older and Disabled People, recognising the need to provide housing for older people. <i>Paragraph 001 Reference ID: 63-001-20190626 states:</i></p> <p><i>“The need to provide housing for older people is critical. People are living longer lives and the proportion of older people in the population is increasing. In mid-2016 there were 1.6 million people aged 85 and over; by mid-2041 this is projected to double to 3.2 million. Offering older people a better choice of accommodation to suit their changing needs can help them live independently for longer, feel more connected to their communities and help reduce costs to the social care and health systems. Therefore, an understanding of how the ageing population affects housing needs is something to be considered from the early stages of plan-making through to decision-taking”</i> (emphasis added)</p> <p><i>Paragraph 003 Reference ID: 63-003-20190626 recognises that:</i></p> <p><i>“the health and lifestyles of older people will differ greatly, as will their housing needs, which can range from accessible and adaptable general needs housing to specialist housing with high levels of care and support.”</i></p> <p>Thus, a range of provision needs to be planned for. Paragraph 006 <i>Reference ID: 63-006-20190626</i> sets out;</p> <p><i>“plan-making authorities should set clear policies to address the housing needs of groups with particular needs such as older and disabled people. These policies can set out how the plan-making authority will consider proposals for the different types of housing that these groups are likely to require.”</i></p> <p>Therefore, recognising that housing for older people has its own requirements and cannot be successfully considered against criteria for general family housing is important.</p> <p>Although the council has indicated the level of housing need for older within para 7.4 of the plan we do not feel that the evidence used is fully justified. The figures are derived (or summarised) from the Dover Strategic Housing Market Assessment Partial Update Part 2 update, Peter Brett Associates, December 2019. Para 6.7 describes the methodology used to identify older persons needs and at para 6.7 states:</p> <p><i>“The model examines the future requirement of two types of specialist housing; housing for older people and housing with care. Currently there are an estimated 1,056 units of housing for older people and 121 units of housing with care in Dover District. The current prevalence of housing for older people is 95 per thousand head of population aged 75 in Dover District, whilst the prevalence of housing with care is 11 per thousand head of population aged 75 in the District. The SHOP model presumes that, given the significant projected growth in the future population of those aged 75 or over, it is appropriate for authorities to plan to deliver these two types of accommodation at the national prevalence rates in the future, which are 121 units of housing for older people per thousand head of population aged 75 or over, and 15.5 units of housing with care</i></p>

	<p><i>per thousand head of population aged 75 or over. However, the original SHMA found that this approach led to an overestimate of the likely future requirement of this type of housing and it was more suitable to presume that current occupation rates are likely to continue, which more closely reflect the current expectations of local households".</i></p> <p>If the national figures had been used to try and overcome what appears to be an existing shortfall in older person's housing the need figures identified would be higher. It should also be noted that the original SHMA, part 2 entitled 'OAN for affordable housing' by HDH planning and development at para 6.11 says 'If it is presumed that occupation patterns remain at current levels then there is a requirement for 1,178 additional specialist units of which 1,055 should be sheltered housing and 123 extracare housing' and para 7.6 states 'In terms of specialist dwellings for older persons (class C3b), as set out in Chapter 6, it is evidenced that in Dover District an additional 353 affordable and 825 market sheltered and extracare housing units should be provided over the plan period within the identified Objectively Assessed Need'.</p> <p>It is therefore unclear as to how the need figures in para 7.4 has been derived and appears to be low and this figures should be reconsidered. Nevertheless, the housing requirement for older persons housing even at that low figure is some 5% of the overall housing requirement and therefore a significant proportion of housing need that the Local Plan should address fully to be consistent with national policy, effective and justified.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Recommendation:</p> <p>The housing requirement for older people's housing as expressed in para 7.4 should be reconsidered and amended in line with a realistic level of need.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>Unless the housing requirement for older people's housing is reconsidered and justified we feel it is necessary to explain our position as our previous representaiton has been disregarded by the council.</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Policies PM1 (High Quality Design, Placing making and the provision of design codes), PM2 (Quality of Residential Development), PM3 (Providing Open Space), PM4 (Sports Provision) and H1 (Type and Mix of Housing) include prescriptive requirements for major housing developments.</p> <p>As a general principle, it is not evident that the Council has undertaken a review of the impact of such policies (which include minimum internal residential space standards and open space standards) on the deliverability and viability of housing alongside other requirements including affordable housing.</p> <p>In the context of existing policy and delivery of housing at WUE there also needs to be appropriate caveats in relation to how these policies are applied to Whitfield. For instance, Policy H1 (Type and Mix of Housing) requires proposals for 10 or more dwellings to demonstrate how the mix of tenure, type and size of housing reflects the Council's latest evidence on housing need and market demand. For WUE this and other policies need to cross refer to the adopted SPD and also take into account what has already been delivered and the pipeline of future development at Whitfield rather than apply district wide requirements.</p> <p>(DDC Note - Text Extracted from Document sent from Quod. Representation has been split across relevant areas of the Local Plan. Full attachment can be found under reference SDLP1232.)</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP45 CAP011 - Land known as the former Archway Filling Station, New Dover Road, Capel-le-Ferne
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<ul style="list-style-type: none"> • The NPPF is explicit in its requirement for strategic policy-making authorities to meet their needs in Paragraph 11 makes clear that: • “Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that: <ul style="list-style-type: none"> 1 <i>All plans should promote a sustainable pattern of development that seeks to: meet the development needs of their area; align growth and infrastructure; improve the environment; mitigate climate change (including making effective use of land in urban areas) and adapt to its effects;</i> 1 <i>Strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:</i> <ul style="list-style-type: none"> 1 <i>the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or</i> 1 <i>any adverse impacts of doing so would significantly and demonstrably outweigh the benefits</i> <ul style="list-style-type: none"> • Paragraph 20 goes on to state that: <p>“Strategic policies should set out an overall strategy for the pattern, scale and design quality of places, and make sufficient provision for:</p>

- 1 *housing (including affordable housing), employment, retail, leisure and other commercial development;*
 - 1 infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat);
 - 1 *community facilities (such as health, education and cultural infrastructure); and*
 - 1 *conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation.”*
- Given this context, the Local Plan review should set out a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic
 - National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making This number should be kept under review and revised where appropriate.
 - In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.
 - Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned
 - The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover District of 596 dwellings per annum However, the affordability ratio which factors into the local housing need assessment is updated For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total housing need of 10,998 dwellings for the Plan period to 2040. We understand that the Regulation 19 Local Plan seeks to meet this need in full and In addition to the minimum figures, Dover District Council have a set an appropriate contingency buffer of 926 dwellings of the Plan period, equating to 8.4% of the total Plan period figure.
 - For context, the current adopted Core Strategy requirement is 700 dwellings per This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.
 - For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate land sufficient to accommodate a minimum of 6,642 new homes over the remaining plan period to It is understood that this will be derived from the following sources:
 - Whitfield Urban Expansion Allocation: 2,200 dwellings
 - Local Plan Allocations (excluding Whitfield): 3,392 dwellings

	<ul style="list-style-type: none"> • Windfall Allowance (70 a year from year 4): 1,050 dwellings • On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target, and, due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, environmental constraints and the limited capacity of the district's remaining mid and lower order settlements to accommodate significant levels of growth, to meet Dover's housing needs suitable brownfield sites will be the best sites to consider irrespective of the need to release greenfield
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Please refer to the attached consultation response submitted on behalf of Guardian Parks Ltd.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	See below
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>To become sound and effective the statement needs to be amended so that it reads 'increase choice by providing substantially more social rented council houses' and also widen opportunities for home ownership'.</p> <p>7.3 The percentages cited are strange and unsound given that most of the population increase expected is due to aging population and smaller households are needed. High profit developers want to build 4 bed exec homes, which also sell as investment; is this why the overall mix sought is 35.2% three bedroom and 32.2% 4 or more bedroom properties ? The statement would be more effective and sound with a higher percentage of 1 and 2 bedroom houses.</p> <p>7.4 Sound</p> <p>Type and Mix of Housing – Affordable Housing As stated above on Strategic Policy 5, we and most residents are entirely opposed to the strategy of Dover Urban Area nil provision of affordable housing. We therefore want to see an amendment in Strategic Policy 4 Residential Windfall Development as follows <i>In the case of planning applications on developments of over 8 dwellings on windfall development sites, within 3 miles of the outer boundaries of Deal / Walmer, permission will only be given if the developer applicant has previously undertaken a development of a similar scale within Dover Urban area which provides a minimum of 30% affordable housing.</i> It would be better if 'affordable housing' were genuine rather than including the Equity grabbing half sales for the over 50s.</p> <p>7.9 We note some small DDC council house developments in Rokesley and Middle Deal wards, but these are nowhere near enough. This would be more sound if PWLB cheap loans were accessed to build 5 – 10 times as many (40 x 10 = 400) new council homes, covenanted so that they (or at least the freehold) would remain publicly owned in perpetuity and available to those who cannot manage home ownership. Social housing tenants should be protected from fuel poverty by building zero carbon, this would make policy more compliant with legality (legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008). Some of the Affordable Dover Town provision needed, should be low rise apartment blocks, between three and five stories high. With balconies, decent floor space for the occupants, good quality design, and with trees to cool. Many people don't have time for gardening and these sort of homes will help build a "15 minute" neighbourhood; one where people can meet most of their needs within a quarter hour walk.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Gladman recognise the importance of new development opportunities to provide appropriate mixes of housing types, sizes, and tenures to meet the identified housing needs of the area. The Council should be mindful that the housing mix identified in the SHMA Update (2019) only represents a snapshot in time in relation to current housing needs. As such, Gladman consider that the policy is sufficient in providing flexibility going forward so that the Plan can accommodate changes in circumstance at the time of an application being submitted. This allows development opportunities to make best use of land whilst responding to the needs at that time by not being overly prescriptive and allowing applications to respond to local plan monitoring. (DDC Note - Text Extracted from Document sent from Gladman Developments Ltd. Full attachment can be found under the introduction comment reference SDLP1192)

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>H1 addresses matters of housing type and mix, and as drafted provides a clear objective for new development in responding to need.</p> <p>3.44 Nevertheless it lacks the necessary specificity as to what this mix should reflect. To ensure the soundness and effective implementation of this policy – and therefore the Plan's overarching vision and objectives – Emerging Policy H1 must directly signpost applicants to an appropriate evidence base or other source of information, first to ensure consistency in approach from all applicants and second to ensure that the LPA retains an up to date record of precisely the need that must be reflected in new development.</p> <p>3.45 The Plan must be capable of implementation and to achieve such, it is important that Applicants have the confidence – at any given time – that an appropriate evidence base can be referred to when informing commercially sensitive decisions at the early stages of site feasibility assessments.</p> <p>3.46 As drafted, the Landowner considers this policy cannot be sound for the reasons above, but can otherwise be made sound with greater specificity as above.</p> <p>3.47 In this regard, it is recommended that H1 be amended to adequately signpost to an evidence base underpinning the LPA's identified housing need. It is suggested that such amendment could be picked up as a Main Modification in due course.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note: The text below is an extract from the original representation which is attached to SDLP1438.</p> <p>Dover District plan report on Development management</p> <p><i>I have been tasked with reviewing the Dover local plan in respect of design and development. This is a very large document, so I have tried to break it down into manageable portions.</i></p> <p><i>The Dover plan does acknowledge that there are constant improvements in design and the plan will need to evolve and to consider new technology, improvements in materials and methods of construction.</i></p> <p><i>I have therefore taken the policies which are attached at the end of this document and extracted sections which I think will be of interest the town council and where I believe comment is due.</i></p> <p><i>I believe that the planning committee needs to be aware of these points extracted. My comments in italics</i></p> <p><i>There is no mention of prefabricated housing, which a way of constructing suitable housing in a short time at reduced cost, particularly for affordable housing. The designs these days are well made and not at all like the old prefabs. This is missed opportunity in my mind.</i></p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)	

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Full Representation attached to SDLP1624. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1624.)</p> <p>Type and Mix of Housing is important in responding to the needs of the District over the Plan Period. It is essential that the mix is not prescriptive or otherwise onerous in what it seeks to impose on new development.</p> <p>3.37 As drafted, H1 provides a clear objective for new development in responding to need.</p> <p>3.38 However, to support the implementation of Policy H1 it is essential that the LPA retains an updated SHMA and is able to clearly direct Applicants to readily available information at any given period.</p> <p>3.39 It is recommended that the LPA commits – in the final wording of Policy H1 – to a signposting to the SHMA as the appropriate record of up to date housing need in the District.</p> <p>3.40 Without further clarity, the smooth implementation of Policy H1 is at risk given what otherwise ascribes too much uncertainty to applicants. It is unrealistic to expect applicants to prepare commercially viable proposals without sufficient direction as to what type and mix of dwellings the LPA expects to be delivered, and therefore what it may support. To better facilitate the implementation of the housing delivery mechanisms of the Plan, certainty must be better provided.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Text Extracted from Document sent from Savills on Behalf of the Church Commissioners. Representation has been split across relevant areas of the Local Plan. Full attachment and introduction to Policy comments can be found under reference SDLP1265 for Shepherdswell Site and SDLP1266 for Eastry Site.) Policy H2 – Rural Local Housing Needs – COMMENTS Our Client is supportive of the inclusion of a rural exceptions policy in principle, however, it is considered that the wording relating to the proportion of market housing be amended to make the policy justified and more consistent with national policy. Policy H2 states that: 'Proposals which promote market housing as a means of enabling local housing need will not normally be supported as it is expected that all local needs housing coming forward will be delivered without the need for cross market subsidy. Where this is not possible, robust evidence will be required to demonstrate the need for market housing'. The requirements of the policy are not consistent with national policy. Paragraph 78 of the National Planning Policy Framework is supportive of 'some market housing' where it would facilitate the delivery of rural exception sites. As such, Policy H2 should be amended to reflect this and read as follows: 'Subject to a viability assessment, proposals which promote market housing as means of enabling local affordable housing need will not normally be supported as it is expected that all local needs housing coming forward will be delivered without the need for cross market subsidy. Where

	<p>this is not possible, robust evidence will be required to demonstrate the need for market housing'. be supported. The amount of market housing should be limited to that which would make the scheme viable'.</p> <p>Recommendation: DDC should adopt the wording changes suggested in Section 4 of this representation in relation to viability assessments.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	See below
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	(cross ref with E4 below) It is very unsound, for DDC to fail to make AirB&B owners register with them, so that they can be charged Business rate council tax. In terms of housing provision, AirB&B both nationally, and in Kent's coastal / rural towns especially, have a very negative effect of reducing the private rental market and thus forcing up the average monthly rents for private tenants, while we have a cost-of-living crisis. 7.13 Sound. More sound with the addition, ' <i>The work of Kent Community Housing Hub which provides a genuine alternative to developer-led housing schemes designed for high profit, will be brought to the attention of all of the District's parish and town councils, as will the initiative of Shepherdswell and Coldred Community Land Trust</i> '.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The piece of land in question was in the local plan at reg 18 stage and unfortunately was withdrawn at reg 19 stage. Without out no real justification in my opinion.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I would like to see a site in Ewell minnis for gypsy and travelling people. Ewell minnis has had GandT resdesints in this hamlet for over 100 years, in my opinion this was the only area within the local plan that would of actually benefited the original families within this committee within Dover. It was sad to see this piece of land be withdrawn especially after giving the local plan pag group all me knowledge and experience due to be part of this community. Unfortunately I don't feel like I was listened to in this area. I believe I was a person to listen to regarding this part of the policy. No different to how we would listen to other professionals in their field.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Taking into account the site's relationship with existing built development at Alkham we do not object in principle to the allocation in this location for a traveller site. Despite being located within the bottom of a valley, the site is relatively open to views from Public Rights of Way that extend up both valley sides, in particular Public Footpath ER165 to the south and Restricted Byway ER177 to the east and Public Footpath ER163 to the north which is also likely to offer views over the site because of the undulating topography. It will therefore be essential for strong vegetative screening along the southern boundary and bolstered screening along the northern boundary to ensure compliance with the requirements in paragraph 176 of the NPPF.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	Para 7.24- The need for 42 pitches has been demonstrated at appeal to underestimate the true need in this district. The Evidence Base relies on the ARC4 GTAA 2018 which was based on field work carried out Oct-Dec 2017. It is now out of date. The Council claim the study has been updated as part of Site Options review but this was not a proper update. The Council has never provided information to show that turnover on sites can be relied on to meet need. The study does not meet the requirements in PPTs (par 7 (c) for a robust evidence base and the Council

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

has been made aware of this at appeals for sites in this district. It is disheartening to once again be making these comments and discover that no one is listening or paying attention to these concerns. Very few agents are willing/ able to work on behalf of Travellers. Most of those who do so, do not have the time or inclination to also respond to local plan consultations. Yet the Travelling community relies on agents like myself to submit representations to local plans. This is an incredibly time consuming process. I am not funded to do this. The system expects and relies on Councils to be honest, transparent and fair. The Travelling community should not feel disenfranchised by the cost of generating evidence to refute the policies proposed by Councils but from experience I am aware that EIP Inspectors will not question the submitted policies if no one makes representations.

The 2018 GTAA identified a need for 30 pitches of which 18 would be PPTS 2017-2037 and a need to front load this with provision of 15 pitches (of which 12 PPTS) within the first 5 years. The number of pitches granted since 2018 has already exceeded that recommended in the 2018 report for those complying with the PPTS need and there remains outstanding need.

It is not clear if the approach taken by Dover Council incorporates the findings of the Lisa Smith judgment October 2022 which found that the Planning Definition in Annex 1 PPTS discriminates against all Travellers and allocations should be made to address the needs of all Travellers. However according to the 2018 GTAA there was a significant need for those who did not meet the PPTS planning permission and who have not to date been provided for on any sites granted permission since 2018.

In 2018 only 23% of those surveyed were Irish Travellers. The ARC4 study assumed 6 pitches for in migration in the first 5 years and nothing for the remainder of the plan period. Yet since 2017 the following permissions granted have been for Irish Travellers who have moved into the district from elsewhere ie

DDC note: Names redacted. Available to the Inspector on request.

-Westmarsh 8 pitches (various Irish Traveller families, different to original appeal decision)

-(name redacted) The Meadows Alkham +16 statics claimed for family

-(name redacted) plot 2b Hay Hill

-(name redacted) plot 2a Hay Hill

-(name redacted) Strawberry Place, Hay Hill, Eastry 12 statics

This exceeds the assumptions in the GTAA and is further evidence that the 2018 assessment greatly underestimated the need for more pitches in this District.

PARA 7.25-Whilst I agree that a pitch should be approximately 600sq m in size, there should be room for more than a static caravan. Many Travellers want twin unit mobile homes which are much larger than a static caravan. Also pitches should have space for 2 vehicles of which one will often be a larger works vehicle eg transit van. Given the acceptance that pitches should be around 600sqm in size does the Council now acknowledge that permissions granted for additional static caravans at sites on Hay Hill and Alkham Valley should not count as pitches as they were not for additional self contained pitches as now defined by the Council and should not count towards meeting the need in Dover for additional pitches?

7.26-It is not clear why the council is only proposing to allocate sites for 5 pitches. This will be insufficient to meet the need identified in 2020 for proper Traveller pitches. There is an outstanding appeal 8 pitches at Westmarsh for a site previously granted temporary permission. There is a site with 2 pitches due for renewal in 2023 at Alkham, there are current applications pending for 8 pitches at Ash Rd Sandwich, 4 pitches at Falconsview and 3 pitches at Sherleys Farm. Permission has been refused for 3 pitches at Ferne Lane Alkham and an appeal dismissed for another site at Barnsole Rd Staple for 1 pitch. This would suggest an immediate need for as many as 29 pitches not 5 pitches-and that is just the cases that I am aware of. Since this policy was drafted the Council has granted an additional 8 pitches at Waldershare (8th December 2022) that are not included in this policy. The council appear to be acknowledging that this policy approach is wrong before it has even been examined. Policy as prepared fails to address the need identified in 2018 and as such it is not PPTS compliant.

H3/ H4 criteria-Is there a need to two policies when they appear to seek/ address the same matters?

Given that that the Council has failed to follow some of this guidance for infill development on plots at Hay Hill Eastry, the Inspector should visit these sites and be provided with details of what has been approved by the Council on these sites to decide if the permissions granted should count towards meeting the needs of genuine Gypsy Travellers or whether the intensification granted has resulted in layouts that fail to meet site licencing requirements and are sub standard, cramped and unacceptable.

	Table 7.1-The site at Half Acres Alkham was granted permission on appeal earlier in 2022. It is surprising that the Council is now conceding that a site refused permission for 1 pitch is now suitable for 3 pitches. This is a private family site. The additional pitches would be for a need not identified in the 2018 ARC study.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>The policy needs to be informed by a robust up-to-date need assessment.</p> <p>Policy needs to reflect the Lisa Smith judgment issued October 2022 and revisions to the planning definition in PPTS. (see attachment)</p> <p>The Council needs to decide if permissions previously granted for intensification (ie additional caravans not pitches) on land at Hay Hill addresses the needs for Travellers and are suitable for occupation by Travellers given the acceptance at para 7.25 of what a pitch should provide.</p> <p>Additional pitches need to be allocated to address existing and future need in Dover.</p> <p>There is a need for transit provision. Many Travellers pass through Dover to the continent.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note: Please see detailed representation (attached at 1770) which has been divided against numerous consultation points. The representation has images within the test. The text below is an extract from the detailed representation 'by an Alkham resident'.</p> <p>5 Housing Growth</p> <p>5.1 The Green Integration Plan and the local housing plan originally identified considerable growth for Dover District with land initially to be allocated for 14,000 new homes with a target to complete 10,100 homes by 2026. This target now appears to have been reduced and the new plan identifies the broad areas where the growth of the additional homes will be located; notably sites within the Dover urban area, Whitfield, Deal, Sholden and Sandwich.</p> <p>5.2 The Dover District Council Plan justifies its housing allocation growth on the grounds of identified need in line with NPPF and the Department of Levelling Up Housing and Communities criteria and as such has identified a number of choices for housing based on supply, demand, windfall sites etc. As a result a number of small development sites have been identified throughout the District including one in Alkham as well as a plan for a major Urban expansion site at Whitfield.</p> <p>5.3 The District Plan identifies a requirement for an additional 42 traveller pitches throughout the district and identifies two such pitches in Alkham and three others elsewhere.</p> <p>Comment 5</p> <p>a) I welcome the fact that the Plan wishes to increase the types of housing built, encouraging designs to maximise climate benefits and I take no issue with the site for ten houses identified within Alkham and would welcome the development of more affordable housing to encourage more families into the village.</p> <p>b) Alkham has many traveller residents who partake in village life I but would query where the other 37 sites will be accommodated as windfall proposals sites have not been identified. Information on this would be welcome .</p> <p>c) However I must raise severe concerns re the planned development at Whitfield</p> <ul style="list-style-type: none"> • The DDC highlights the requirement for 6350 homes at Whitfield stating that this will be supported by education, primary health and social care , utility services retail and leisure provision as well as the development of the Whitecliff Business Park area at Whitfield which will not only have retail but also light industrial and haulage uses. • The Plan talks at length on the landscaping and it highlights transport networks and in particular references the upgrades required for the Whitfield and the Duke of York Roundabouts It also says that consideration must be given to the local transport links , the Alkham road , the A256 and Whitfield Hill • This matter was raised in 2014 when the Transport Plan for 2015 -2030 was adopted and no action was taken. • Since that time traffic along the Alkham Valley has hugely increased. Representations have been made to the local MP, KCC and a Highway improvement plan submitted all to no avail. • The current plan makes a flawed assumption that householders and businesses will access routes to London via the A20/M20 or A2/M2 whereas in reality they use the Alkham Valley Road , a DECLASSIFIED Road to access the M20. This matter is the subject of more detailed comment later in the report under transport <p>D) As housing increases traffic will continue to expand and radical options to consider the Valley a green space in the middle of urban development with road only open for business residents leisure use and emergency vehicles offering a range of bridleways, walks, cycle routes should be explored. This type of scheme has been successfully carried out in other areas such as the Goyt Valley Derbyshire and can lead to vibrant rural community improved air quality and improved traffic management</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	Please see appended report

<p>matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	While safeguards are included in the policy wording in respect of proposals that come forward within the AONB , we are concerned that these do not align with the requirement contained within the NPPF that 'great weight' be given to the conservation and enhancement of landscape and scenic beauty in AONBs and instead reflects lesser requirements set out in the NPPF for proposals within the AONB setting. The nature of gypsy sites is such that they do not always conserve and/or enhance landscape character. Gypsy sites should only be permitted within the AONB when impact can be appropriately mitigated and the AONB conserved and enhanced. Request criterion (e) is amended.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<ul style="list-style-type: none"> In the case of proposals in, or adjacent to, the AONB or Heritage Coasts, the scale and extent of development is limited, sensitively located and designed to avoid or minimise adverse impacts on these designated landscapes, THAT THE PROPOSAL COMPLIES IN THE FIRST INSTANCE WITH THE PRIMARY REQUIREMENT OF CONSERVING AND ENHANCING LANDSCAPE AND SCENIC BEAUTY, AND WHERE THIS IS DEMONSTRATED, THAT THE SCALE AND EXTENT OF DEVELOPMENT IS LIMITED, SENSITIVELY LOCATED AND DESIGNED TO AVOID OR MINIMISE ADVERSE IMPACT ON THE DESIGNATED LANDSCAPE;
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	To ensure AONB impacts are thoroughly considered.

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

The system expects and relies on Councils to be honest, transparent and fair. The Travelling community should not feel disenfranchised by the cost of generating evidence to refute the policies proposed by Councils but from experience I am aware that EIP Inspectors will not question the submitted policies if no one makes representations.</p> <p>The 2018 GTAA identified a need for 30 pitches of which 18 would be PPTS 2017-2037 and a need to front load this with provision of 15 pitches (of which 12 PPTS) within the first 5 years. The number of pitches granted since 2018 has already exceeded that recommended in the 2018 report for those complying with the PPTS need and there remains outstanding need.</p> <p>It is not clear if the approach taken by Dover Council incorporates the findings of the Lisa Smith judgment October 2022 which found that the Planning Definition in Annex 1 PPTS discriminates against all Travellers and allocations should be made to address the needs of all Travellers.</p>

However according to the 2018 GTAA there was a significant need for those who did not meet the PPTS planning permission and who have not to date been provided for on any sites granted permission since 2018.

In 2018 only 23% of those surveyed were Irish Travellers. The ARC4 study assumed 6 pitches for in migration in the first 5 years and nothing for the remainder of the plan period. Yet since 2017 the following permissions granted have been for Irish Travellers who have moved into the district from elsewhere ie

DDC note: Names redacted. Available to the Inspector on request.

-Westmarsh 8 pitches (various Irish Traveller families, different to original appeal decision)

-(name redacted) The Meadows Alkham +16 statics claimed for family

-(name redacted) plot 2b Hay Hill

-(name redacted) plot 2a Hay Hill

-(name redacted) Strawberry Place, Hay Hill, Eastry 12 statics

This exceeds the assumptions in the GTAA and is further evidence that the 2018 assessment greatly underestimated the need for more pitches in this District.

PARA 7.25-Whilst I agree that a pitch should be approximately 600sq m in size, there should be room for more than a static caravan. Many Travellers want twin unit mobile homes which are much larger than a static caravan. Also pitches should have space for 2 vehicles of which one will often be a larger works vehicle eg transit van. Given the acceptance that pitches should be around 600sqm in size does the Council now acknowledge that permissions granted for additional static caravans at sites on Hay Hill and Alkham Valley should not count as pitches as they were not for additional self contained pitches as now defined by the Council and should not count towards meeting the need in Dover for additional pitches?

7.26-It is not clear why the council is only proposing to allocate sites for 5 pitches. This will be insufficient to meet the need identified in 2020 for proper Traveller pitches. There is an outstanding appeal 8 pitches at Westmarsh for a site previously granted temporary permission. There is a site with 2 pitches due for renewal in 2023 at Alkham, there are current applications pending for 8 pitches at Ash Rd Sandwich, 4 pitches at Falconsview and 3 pitches at Sherleys Farm. Permission has been refused for 3 pitches at Ferne Lane Alkham and an appeal dismissed for another site at Barnsole Rd Staple for 1 pitch. This would suggest an immediate need for as many as 29 pitches not 5 pitches-and that is just the cases that I am aware of. Since this policy was drafted the Council has granted an additional 8 pitches at Waldershare (8th December 2022) that are not included in this policy. The council appear to be acknowledging that this policy approach is wrong before it has even been examined. Policy as prepared fails to address the need identified in 2018 and as such it is not PPTS compliant.

H3/ H4 criteria-Is there a need to two policies when they appear to seek/ address the same matters?

Given that that the Council has failed to follow some of this guidance for infill development on plots at Hay Hill Eastry, the Inspector should visit these sites and be provided with details of what has been approved by the Council on these sites to decide if the permissions granted should count towards meeting the needs of genuine Gypsy Travellers or whether the intensification granted has resulted in layouts that fail to meet site licencing requirements and are sub standard, cramped and unacceptable.

Table 7.1-The site at Half Acres Alkham was granted permission on appeal earlier in 2022. It is surprising that the Council is now conceding that a site refused permission for 1 pitch is now suitable for 3 pitches. This is a private family site. The additional pitches would be for a need not identified in the 2018 ARC study.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful

The policy needs to be informed by a robust up to date need assessment.

Policy needs to reflect the Lisa Smith judgment issued October 2022 and revisions to the planning definition in PPTS. (see attachment)

The Council needs to decide if permissions previously granted for intensification (ie additional caravans not pitches) on land at Hay Hill addresses the needs for Travellers and are suitable for occupation by Travellers given the acceptance at para 7.25 of what a pitch should provide.

Additional pitches need to be allocated to address existing and future need in Dover.

There is a need for transit provision. Many Travellers pass through Dover to the continent.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Would be more sound if residents undertaking zero carbon / low carbon self build were supported or incentivised.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1860.)</p> <p>f. Policy H5 – Self Build and Custom Housebuilding Quinn Estates supports the Council's positive policy on self and custom build housing for the District. Quinn Estates (incorporating Quinn Homes) is the leading developer of self/custom build housing in Kent and the company has a number of landholdings where self and custom build housing can realistically be delivered. The self-build market is considered to be strong in the Dover District and there are a host of locations where self and custom build housing can viably be delivered. However, a number of these locations are semi-rural in nature and the limited amount of affordable housing that could be triggered through a small-scale self-build scheme is considered to be low. The policy on affordable housing as part self-build development is ambiguous. The assumption based on the policy framework as set out in the Reg 19 draft is that affordable housing will be triggered on self-build schemes that exceed the threshold of 10/0.5Ha or 6 homes depending upon location. The problem for schemes that are marginally in excess of the threshold is that a small number of affordable properties in an isolated location is unappealing to most Housing Associations, whilst the construction of a small number of properties within a self-build development is difficult to secure. The policy should recognise the practical difficulties under this scenario and the barrier to delivery this creates. In order to address this issue, self and custom housebuilding schemes should exceptionally be permitted to provide an off-site contribution to affordable housing through a financial contribution facilitating a more appropriate, better located affordable housing by a specialist</p>

	Housing Association. The flexibility for self/custom housing developers to agree a commensurate off-site affordable housing contribution would make a positive difference, it would ensure the opportunities to deliver self/custom build are being taken and would increase the delivery of affordable in the District.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Gladman broadly support the inclusion of a policy in respect of self-build and custom housebuilding in line with current government thinking and objectives. However, Gladman consider it is essential that the policy is worded to state that once a self-build and/or custom-build plot has been marketed for twelve months but failed to sell, it will be considered by the Council for development as conventional market housing. (DDC Note - Text Extracted from Document sent from Gladman Developments Ltd. Full attachment can be found under the introduction comment reference SDLP1192)

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>(DDC Note - Full Representation attached to SDLP1731. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1731.)</p> <p>Self and Custom build Policy H5 of the Draft Local Plan states that the Council will support Self and Custom House Building schemes on housing sites allocated in the Local Plan and on non-allocated windfall developments subject to compliance with the other Policies in the Local Plan, and where overall this would not result in an over-provision of this type of housebuilding when compared to the Council's supply/demand evidence.</p> <p>The Self-Build and Custom Housebuilding Act 2015 requires relevant authorities, including District Councils, to keep a register of individuals and associations of individuals who are seeking to acquire serviced plots of land for Self-build and Custom Housebuilding. Council's are also required under sections 2 and 2A of the Act to have regard to this and to give enough suitable development permissions to meet the identified demand. The benefits of Self and Custom Build Housing are recognised as diversifying the housing market and increasing customer choice. The NPPF supports the delivery of a variety of land coming forward to meet the needs of groups with specific housing requirements including for those wishing to commission to build their own homes.</p> <p>The Self-Build and Custom House building need as identified from the Council's register is reported annually through the Authority Monitoring Report. The latest Authority Monitoring Report (2019-20) states that since the introduction of the Self-Build and Custom House Building requirements in 2015, there has been 1 plot allowed at appeal, where at appeal it was identified as Self-Build (planning ref. DOV/16/01101). There have also been 18 plots marketed as Self-Build since April 2020 by the developer from planning application 16/01026, however these were not identified as Self-Build on the planning application. On 31st October 2020, there has only been one approved planning application identified as including Self-Build and customhouse building, reference 20/00419, which is also a Quinn site, for which a reserved matters application (ref: 22/01379) is currently pending determination.</p> <p>The Self-Build Need Assessment submitted as part of the application (22/01379), points towards a very strong relative demand for self-build plots in Dover and also identifies Dover as being one of the authorities with the highest demand per capita in the country. Moreover, it is important to highlight that when considering demand in the context of the Local Authority's Self-build register; an Ipsos Mori poll undertaken for NaCSBA in 2016 found that only one in eight people interested in Self-Build were aware of the introduction of Right to Build Registers in England. As a result, the number of expressions of interest on a Local Authority's Self-Build register may substantially underestimate demand.</p> <p>Crucially, the Council's method of updating the Self and Custom Build Register, and resultant understanding of demand within the District, is flawed. The Council reviewed and updated its register in March 2020. All persons and organisations on the first (2016) version of the register were invited to re-register in February 2020, with reminders sent out in March 2020. Those who re-registered and passed the local connectivity and financial solvency tests, had their interest back dated to their original registration date and were placed on part 1 of the register. Those who did not pass the tests but still wished to register their interest in Self and Custom House Building were placed on part 2 of the register.</p> <p>It is not clear from the Council's Authority Monitoring Report and evidence base for the draft Local Plan</p>

	<p>whether additional independent survey work has been undertaken to fully understand the demand for Self and Custom Build housing in the District. As mentioned previously, public knowledge and understanding of Right to Build in England is generally low. The method of the Council to understand demand has wholly relied upon people who had joined the register in 2016 and has not sought to further publicise Right to Build or develop a clearer understanding of demand in the District through additional surveys. This results in an incomplete picture of demand in the local area and resultant lack of allocations for Self-Build or Custom Build sites within the draft Local Plan. Quinn Homes are the leading provider of Self-build in Kent and have assembled their own database of interested Self and Custom Builders. Having facilitated Self and Custom Build development in East Kent, the company is ideally positioned to understand the market requirements and best placed to assist the District in meeting its growing demand for plots. Quinn Homes propose the land subject to this representation as suitable for a Self-build site of 16 dwellings which would assist with addressing the Council's underestimated demand for this housing type.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Iceni Projects, on behalf of Quinn Estates, welcomes the opportunity to submit representations to the Dover District Council Local Plan Regulation 19 Consultation in respect of land at St Edmunds Road, Deal. These representations should be considered alongside the following documents appended to this letter:</p> <ul style="list-style-type: none"> • Appendix 1 – Site Layout Plan <p>The land subject to this representation was previously assessed through the Call for Sites process as part of a significantly larger land parcel (GTM008 – Land North of Ellens Hill). Quinn Estates consider that the revised, smaller site makes a logical extension to Deal in this area, and that site specific constraints can be overcome to deliver housing in Deal. The Site borders the Deal settlement boundary and presents a logical extension to the town in this area. Quinn Estates considers that the land should be allocated for residential development of approximately 16 self-build and 7 affordable homes with associated access and parking, within a landscaped setting. It is considered that the scheme presents an opportunity to provide high-quality family homes, in a highly sustainable location and that the resultant effect of this redevelopment will lead to societal benefits for the local community and a more sustainable development strategy</p> <p>It is Quinn Estate's view that the current suite of allocations in the draft Plan will fail to provide a sufficient level of growth in and around Deal, and that it is over reliant upon a single urban extension to Dover to meet local housing needs, which does nothing to address local affordability issues in Deal. To ensure the soundness of the plan, further Sites, such as the one advocated in this representation, should be allocated to ensure that the Plan's ambitions for the District are delivered.</p> <p><u>a. Land at St Edmunds Road, Deal (the 'Site')</u></p> <p>The Site comprises approximately 1.83ha of land adjoining the Deal settlement boundary. The Site is located on the south-western edge of Deal, bound to the north-east and north-west by residential properties, and to the south-east and south-west by open farmland. The southern boundaries of the site comprise existing hedge and trees. The site is currently in use as grazing land for horses.</p> <p>A public right of way (ref: 0340/ED38/12) bisects the north-eastern corner of the site from northwest to south-east. Access to the site is via an existing gate in the hedgerow joining St Edmunds Road. The closest bus stop is approximately 180m from the Site on St Richards Road and includes services</p> <p>Our services include: archaeology design engagement heritage & townscape landscape planning sustainable development transport Iceni Projects is the trading name of Iceni Projects Limited. Registered in England No. 05359427 to Deal town centre, Walmer, Sandwich, and Kingsdown. St Richard's Road GP Surgery, Payden Pharmacy, St Mary's primary School and the Betteshanger Sports and Social Club are also within approximately 500m of the Site on St Richards Road. The Site is considered to be a sustainable location for residential development.</p> <p>The north-western boundary of the Site adjoins the southern edge of the Mongeham Road Conservation Area. Within the Conservation area are several Grade II listed buildings including 110 and 112 Mongeham Road, Manor Farmhouse and Brewer's Farmhouse. The Site is within Flood Zone 1. Wildlife Trust mapping identifies the Lower Stour Wetlands to the north-west of the Site beyond Mongeham Road, overlain with the Sandwich Bay to Hacklinge Marshes SSSI. There are no other wildlife designations either in the Site or in proximity.</p> <p><u>b. Objection to Tables 3.3 and 4.2 (under the auspices of Policy SP3)</u></p> <p>Quinn Estates suggest that the emerging spatial strategy for the District, as detailed in Tables 3.3 and 4.2 of the Regulation 19 Submission Version of the Draft Local Plan is not based on sound plan-making. The current approach does not acknowledge the sustainability of the town nor its position within the settlement hierarchy. As such, additional sites should be allocated to the town in Table 4.2. Quinn considers that the Site subject to this representation presents an ideal housing site within Deal which is able to overcome the identified constraints to contribute to sustainable housing growth within the settlement.</p> <p>Sustainable distribution of growth</p>

Sustainable development is a key aim of the National Planning Policy Framework at Paragraph 8. In terms of housing delivery, the Council should seek to encourage housing growth in the most sustainable locations, especially when they can ensure the achievement of societal improvements, economic benefits and positive environmental outcomes. In choosing sites, the Council should ensure that new residents can reach established nearby town centres using sustainable modes of transport, to limit pollution arising from motor travel and to support the vitality of the existing community and local economy, without creating environmental harm.

Deal is vibrant coastal town which benefits from access to a wide range of local services within a relatively contained urban environment. The vast majority of the town's facilities lie within walk, cycle and public transport distances. Services include a range of education provision, including primary, secondary and tertiary education. The town benefits from ample leisure opportunities at the sports centre and swimming pool, along with less formal outdoor activities on the seafront and at the Betteshanger Country Park. In addition, the town is highly sustainable in regard to public transport accessibility, being served by mainline rail, the high-speed train service to London and numerous bus routes.

Throughout the evolution of the draft Local Plan, Deal has failed to be allocated sufficient levels of growth commensurate with the sustainable nature of the town. The justification for channelling so little growth to Deal is not considered to be justified by evidence, when all the evidence points to the settlement being such a logical and sustainable location to channel growth to. The principles of sustainability and sound plan making appear to have been absent in key decision taking over spatial choices at the heart of the spatial strategy presented in the draft Plan.

Market and affordable housing delivery

Paragraph 35 of the NPPF outlines how plans are effective where they are found to be deliverable over the plan period. The disproportionately high dependence on Whitfield Strategic Allocation (SAP1) results in a plan which raises considerably uncertainty as to this key soundness test.

Quinn Estates has no objection to large-scale housing development at strategic sites playing an important role in meeting housing need. However, what looks good on paper needs to deliver in practice. However, in a District like Dover where there is a need for the benefits of growth to translate across the District, the spatial strategy should be seeking to unlock growth and inward investment at other key settlements, such as Deal, and this is a significant weakness of the Plan in its current form.

Spatial strategies should reflect that building homes is a complex and risky business. Stronger local markets have higher annual delivery rates, and where there are variations within districts, this should be factored into spatial strategy choices. Further, although large sites can deliver more homes per year over a longer time period, they also have longer lead-in times. Research by Lichfield¹ found the average lead in time for large sites prior to the submission of the first planning application is 3.9 years

This issue with delivery is found to be the case with Whitfield. Of the 5,750 dwellings proposed for the allocation, 3,483 dwellings are considered deliverable in the emerging Plan period. The Council acknowledges that the 2010 Core Strategy included provision for the Site to deliver 5,750 dwellings. Phase 1 of the SAP1 allocation (Dover ref. 10/01010) is underway and as of the 2020/2021 monitoring year, 185 dwellings had been completed with a delivery rate of approximately 50dpa for the past three years. Given this slow progress, it seems likely that although the existing outline planning permission should be completed over the Plan period, a more cautious approach should be taken in terms of the remaining dwellings allocated for the site given its proven issues in delivering housing to date.

Without clear evidence by way of a planning application for these additional dwellings, it is questioned whether Whitfield will ramp up to delivery of 120dpa from 2023/24 and then up to 200dpa from 2026/27 for the remainder of the Plan period. More consideration should therefore be made to the current planning position of the Site and the length of time it has taken so far to deliver housing. Paragraph 73D of the NPPF recommends the inclusion of realistic delivery rates within Local Plans, and the Council should therefore review those proposed for Whitfield and consider building more flexibility and more volume into the pipeline to be able to respond to delivery issues.

It is considered that, particularly with the deliverability issues of the Whitfield Urban Extension to date, additional sites should be allocated for housing to ensure that there is sufficient choice and flexibility in the supply so that the Council can meet its housing requirement throughout the Plan period, as well as to meet the Government's objective to significantly boost the supply of housing as set out in Paragraph 60 of the NPPF.

The delivery of affordable housing also paints a bleak picture within the District. The Council's existing policy on affordable housing, DM5 of the Core Strategy (2010), requires residential development of 15 or more dwellings to provide 30% of the total homes as affordable homes and the Council's affordable housing strategy remains unchanged, save for reducing the requirement to deliver affordable housing within Dover town.

The latest Authority Monitoring Report (2020-2021) profiles how the affordable housing policy has consistently struggled to deliver sufficient levels of affordable housing, with the average being 20%. The failure to deliver sufficient affordable housing is set against a backdrop of worsening affordability in the District. Affordability ratios for Deal show a continued trend of worsening to 9.25 in 2021, with year-on-year worsening from 2012-2018. For the lowest earners, this reaches 9.62 in 2021. The District is less affordable than the national average of 9.05. Median house prices in the District have soared to £285,000, compared to the UK average of £278,000.² In addition, statutory homelessness within the District sits at 137 people and 136 households, 68 with children, are in temporary accommodation within the District as of 2021.³ Whilst there may be

a number of factors contributing to these outcomes, a new spatial strategy that identifies limited housing at Deal is going to deliver limited affordable housing at Deal and the absence of housing will only exacerbate local affordability pressures.

The proposed allocation at Land at St Edmunds Road would therefore assist with relieving local affordability pressures with the proposed 7 affordable units.

Self and custom build

Policy H5 of the Draft Local Plan states that the Council will support self-build and custom house building schemes on housing sites allocated in the Local Plan and on non-allocated windfall developments subject to compliance with the other Policies in the Local Plan, and where overall this would not result in an over-provision of this type of housebuilding when compared to the Council's supply/demand evidence.

The Self-Build and Custom Housebuilding Act 2015 requires relevant authorities, including District Councils, to keep a register of individuals and associations of individuals who are seeking to acquire serviced plots of land for self-build and custom housebuilding. Council's are also required under sections 2 and 2A of the Act to have regard to this and to give enough suitable development permissions to meet the identified demand. The benefits of self and custom build housing are recognised as diversifying the housing market and increasing customer choice. The NPPF supports the delivery of a variety of land coming forward to meet the needs of groups with specific housing requirements including for those wishing to commission to build their own homes.

The Self-Build and Custom House building need as identified from the Council's register is reported annually through the Authority Monitoring Report. The latest Authority Monitoring Report (2019-20) states that since the introduction of the self-build and custom house building requirements in 2015, there has been 1 plot allowed at appeal, where at appeal it was identified as self-build (planning reference 16/01101). There have also been 18 plots marketed as self-build since April 2020 by the developer from planning application 16/01026, however these were not identified as self-build on the planning application. On 31st October 2020, there has only been one planning application identified as including self-build and customhouse building, reference 20/00419, which is also a Quinn site, for which a reserved matters application (ref: 22/01379) is currently pending determination.

The Self-Build Need Assessment submitted as part of the application (22/01379), points towards a very strong relative demand for self-build plots in Dover and also identifies Dover as being one of the authorities with the highest demand per capita in the country. Moreover, it is important to highlight that when considering demand in the context of the Local Authority's self-build register; an Ipsos Mori poll undertaken for NaCSBA in 2016 found that only one in eight people interested in self-build were aware of the introduction of Right to Build Registers in England. As a result, the number of expressions of interest on a Local Authority's self-build register may substantially underestimate demand.

Crucially, the Council's method of updating the self and custom build register, and resultant understanding of demand within the District, is flawed. The Council reviewed and updated its register in March 2020. All persons and organisations on the first (2016) version of the register were invited to re-register in February 2020, with reminders sent out in March 2020. Those who re-registered and passed the local connectivity and financial solvency tests, had their interest back dated to their original registration date and were placed on part 1 of the register. Those who did not pass the tests but still wished to register their interest in self-build customhouse building were placed on part 2 of the register.

It is not clear from the Council's Authority Monitoring Report and evidence base for the draft Local Plan whether additional independent survey work has been undertaken to fully understand the demand for self and custom build housing in the District. As mentioned previously, public knowledge and understanding of Right to Build in England is generally low. The method of the Council to understand demand has wholly relied upon people who had joined the register in 2016 and has not sought to further publicise Right to Build or develop a clearer understanding of demand in the District through additional surveys. This results in an incomplete picture of demand in the local area and resultant lack of allocations for self-build sites within the draft Local Plan.

Quinn Estates are the leading provider of self-build in Kent and have assembled their own database of interested self-builders. Having facilitated self-build development in East Kent, the company is ideally positioned to understand the market requirements and best placed to assist the District in meeting its growing demand for plots. Quinn Estates propose the land subject to this representation as suitable for a self-build site of 16 dwellings which would assist with addressing the Council's underestimated demand for this housing type.

Land at St Edmunds Road

The land subject to this representation was previously assessed through the Call for Sites process as part of a significantly larger land parcel (GTM008 – Land North of Ellens Hill). The Call for Sites Submission proposed 450 dwellings across a 10.74ha land parcel, and was assessed to be unsuitable due to heritage and landscape impact.

	<p>Quinn Estates are pleased to submit for consideration a revised proposal for the smaller land parcel which would deliver much needed new homes, including self-build and affordable homes, for Deal, whilst respecting and responding to the site constraints, namely the sensitive historic setting of the surrounding area to the north-west.</p> <p>Vehicular and pedestrian access to the Site is proposed from the end of St Edmunds Road, utilising the existing gap in the hedgerow serving the field. The indicative site layout plan submitted with this representation details the proposed scheme which would comprise 16 self and custom build plots and 7 affordable units, set within a landscaped setting. The public right of way to the eastern edge of the site is retained, forming part of the landscaped, spacious entrance to the Site. In addition, the existing hedgerows are retained and enhanced, along with an enhanced tree buffer to the north-western boundary of the site where it adjoins the Mongeham Road Conservation Area. Overall, the proposal represents a</p> <p><u>c. Conclusion</u></p> <p>On behalf of Quinn Estates, we thank you for the opportunity to contribute to the Dover District Local Plan Regulation 19 Consultation.</p> <p>The current approach to the spatial strategy in the Draft Local Plan requires amendment to address a significant soundness issue concerning the level of growth identified for Deal, the District's second largest settlement. It is considered that the Plan currently fails to positively plan for a commensurate level of housing and employment at the settlement, as expressed in Policy SP3 and that the available evidence does not support or justify this approach. Moreover, the evidence does support channelling a greater quantum of growth to Deal.</p> <p>Quinn's proposal at the Land at St Edmunds Road presents a sustainable location for growth due to its existing connections to the public transport network and close proximity to a range of services on St Richards Road. The small nature of the site would provide early and accelerated delivery and would assist with reducing the current over reliance on the Whitfield Urban Expansion to provide housing growth for the District. In addition, the site would deliver self-build and affordable housing to address local affordability issues, which the current Plan fails to address.</p> <p>I trust that these comments are of assistance and that these representations will be taken into account in consideration of the current consultation. Quinn would also welcome the opportunity to participate in the forthcoming Examination-in-Public into the Plan and contribute to the debate to ensure that the best strategy for the District is found.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Include GTM008 in the Local Plan for approx 16 self-build and 7 affordable dwellings</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

This is a very large document, so I have tried to break it down into manageable portions.</i></p> <p><i>The Dover plan does acknowledge that there are constant improvements in design and the plan will need to evolve and to consider new technology, improvements in materials and methods of construction.</i></p> <p><i>I have therefore taken the policies which are attached at the end of this document and extracted sections which I think will be of interest the town council and where I believe comment is due.</i></p> <p><i>I believe that the planning committee needs to be aware of these points extracted. My comments in italics</i></p> <p>H7 – Houses in Multiple Occupation</p>

	<p>Proposals for Houses in Multiple Occupation will be supported where the proposed development, taken by itself or in combination with existing HMOs in the vicinity of the site, would not result in any of the following: Planning committee need to be aware of the following:</p> <p>a) An adverse impact on the living conditions of existing adjoining residents.</p> <p>b) An unacceptable impact on highway safety, caused by insufficient on-site parking provision thereby resulting in an unacceptable increase in on street parking.</p> <p>c) An adverse impact on the visual amenity and character of the area, including that from inappropriate or insufficient arrangements for refuse and cycle storage.</p> <p><i>It is unclear if this includes Air BnB, there have been a number of planning applications which do not state if this is the purpose, however the committee suspects this is the case. Dover needs a policy on Air BnB like Ramsgate.</i></p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	And a second minor question: Where the Housing policy mentions HMO and the constraints could it be added to the existing problem of large single houses in large grounds which apply for mixed development status to , possibly, pack a mix of house types onto the site to be in 'accord' with the housing needs set by Council?? A current case in point might be the redevelopment of the Deal Police station? Apologies for the ocular acuity problem!!and hope the Police station does get 'tastefully' converted!!

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The development management policies are silent in respect of non-residential schemes in open countryside which are not employment sites. EM1 provides a robust approach for new employment sites in the countryside but the same rigour and balance afforded by the policy would not be available in respect of development management of non-residential schemes which are not employment sites. Examples of such may include charity, club or private venues, entertainment and meeting places, sites for specialist leisure or sports activities, sportsgrounds, off-road motorsports, shooting grounds, general aviation sites, watersports, etc. Such uses may not be commercial enterprises or give rise to employment, but can bring particular issues of noise, visual impact, loss of BMV agricultural land, movement or activity which affects landscape character, loss of residential or landscape amenity, light spill, highways and transport issues, and so on.</p> <p>We believe such proposals should be subject to the same rigour as that set out in EM1 for employment sites in the countryside, and possibly be subject to greater restriction where they are not aligned with strategic interests of the wider plan, such as economic benefit and the rural economy. The NPPF requires the policies recognise the intrinsic beauty of the countryside, and we believe this should apply regardless of the class of development proposed.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	The plan should include policy safeguards that protect the countryside from inappropriate and unsustainable development for all potential non-residential schemes which are not considered employment sites.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	See below
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>This would become sound and compliant with legality (legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008), if following added, a priority will be given to the creation of jobs in the climate-friendly recovery sectors with land allocations designated for various forms of agri-forestry, market gardening, and renewable energy projects.</p> <p>More sound if floor space under solar panelled roofs incentivized, with lower business rates.</p> <p>Also more sound with the addition of <i>'all large out-of-town developments should include of co-working spaces, (of interest to all parents who have had to work from home and home school during the pandemic), directly adjacent to car-club spaces and electric bike parking.</i> 8.10 Sound.</p> <p>Employers who are the SMEs in our coastal towns and villages struggle to survive in Nov 2022, because of shortage of staff, and sky-high energy prices. So it would make sense to help existing SME employers survive by directing them to rock-bottom loans to install solar roof panels, so that they became more self-sufficient in energy during daylight hours.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Full Representation attached to SDLP1860. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1860.)</p> <p>g. Policy E1 – New Economic Development The approach outlined in Policy E1 is supported, but the concession in Paras 8.8 and 3.119 of Plan that employment development is needed at Deal, does highlight why the Plan is not positively and proactively allocating land for employment at Deal. Given the high reliance commercial development has on road access, it is considered that a minor addition is required to the draft policy to positively support proposals on land adjoining a major road entering a settlement, and not just land adjoining a settlement boundary, as most land adjoining settlement boundaries does not have suitable road access. Accordingly, the following amendment is proposed to Part 1 of Policy E1:</p> <p>“1. At Designated settlements New employment development (office, (E(g)(i), research and development (E(g)(ii), light industrial (E(g)(ii), B2 and B8 uses) will be supported in the following locations and subject to criteria i) to ix) below:</p> <p>a Within existing employment sites as identified on the Policies Map.</p> <p>b On the employment sites allocated in this Plan.</p> <p>c On land within or immediately adjoining the settlement confines of designated settlements or a main road leading into a designated settlement.</p> <p>In the case of proposals for office development (E(g)(i)) in these locations outside of designated town centre boundaries, they will need to satisfy the requirements of the sequential test and impact assessment in accordance with Policy R2...”</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at	

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Quinn Estates is a developer with significant land interests in the District, who has an important role in delivering the Plan strategy

The representation has images within the text. The text below is an extract from the detailed representation 'by an Alkham resident'.</p> <p>6 EMPLOYMENT</p> <p>6.1 In years gone by the village traditionally had predominately rural employment but this has now declined. No reference is made to the proposed growth of rural enterprises or rural workshop spaces in the Alkham area within the Dover Plans.</p> <p>6.2 The area currently supports a number of SMEs which contribute to the neighbourhood and surrounding economy. These range from the development of a local vineyard ,building contractors, a garden centre, garden services and design, tourism bed and breakfasts, tearoom, hotels and restaurant , electrical business, education coaching, livery and riding tuition, building services, dog grooming, loft conversions to cake decoration</p>

	<p>Comment 6</p> <p>I welcome the proposals within the plan for the development and diversification and encouragement of rural businesses as this will lead to a more sustainable rural economy</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object to the proposal in the 2040 Local Plan that Eythorne and Elvington become a "Local Centre". I also object to the proposed building around Elvington. The reasons for both objections are set out below.</p> <p>Elvington and Eythorne, although geographically close, have their own distinct heritage, character, culture and community. Elvington was mostly built in the early 20th century to serve the nearby coal mine at Tilmanstone. Eythorne is very much older, with evidence of occupation from the stone age and in the heart of the village are many buildings from the 18th and 19th century. Eythorne is essentially a community founded on agriculture and it is not, and has never been, a mining village. The development of Tilmanstone colliery did not lead to significant housebuilding in Eythorne. In the late 1960s and early 1970s, however, small housing developments sprang up on land originally used for farming and latterly used by the local school and community.</p> <p>There are no existing problems, or conceivable future ones, that would be better served by combining these two individual communities as opposed to keeping them separate. Indeed, it might well be the case that better, more consensual, decision making would occur if the communities were kept unique (for example Coldred and its community driven management of the village centre). It is also evidentially the case that communities that keep their identities have less societal problems and better mental health because of the developed relationships and contacts within the community (people looking out for each other etc). As it stands the countryside is in easy walking or cycling distance for anyone no matter where they live in either community, young or old, and this access is enjoyed by many to the benefit of their mental wellbeing. Where there is urban sprawl, loss of green space and loss of identity, quality of life plummets (cf Thanet). Unnecessary and unsympathetic "planning" has irrevocably harmed many communities, villages and towns over the years, resulting in poor and problematic living environments for future generations to inherit.</p>

There is also no conceivable opportunity that could arise that would only be possible by combining the two communities rather than keeping them as they are now.

The issues facing these communities are many but none are due to them not being combined.

It is proposed that the two separate villages of Eythorne and Elvington are developed as a "Local Centre" based on them "having a very good range of services and facilities". This is a considerable overstatement as the two villages have, in fact, a very limited range of both.

In terms of existing GP services, the nearest is Shepherdswell which is only open between 8.30-10.30 a.m., Monday to Friday, and does not routinely offer an actual GP surgery but only "administrative" or nurse appointments. Overall, the other GP services in the area are stretched to the limit and will struggle to take up the amount of new patients that will arise with significant further new house building in this area. Additional patient numbers will introduce further frustration from the community with getting GP appointments when wanted. Unless GP provision is significantly improved, is properly delivered to time, and is written into the DDC plan then there will be a healthcare crisis in this District.

As well as insufficient GP provision, the area also suffers from inadequate response times from the Ambulance Service, SECAMB. April 2022 saw the worse response times on record for SECAMB. Although things have improved slightly since then, it is still poor and inadequate. Hospital waiting times especially for A&E are also poor. In part, the long waiting times for both hospital appointments and for A&E, as well as poor ambulance response times, are due to the inadequate GP primary care driving people to attend hospital rather than their own GP.

It is practically impossible to get an NHS dentist in this area and most surgeries are not taking on any new patients. This means new arrivals into the area are forced to go private pushing up their cost of living and ultimately leading to further degradation of the NHS provision even though we have all paid for it and it should be readily available.

Local policing is entirely absent in the main and incidences of anti social behaviour, vandalism and theft (for example frequent van break-ins for tools) that have occurred in both villages are largely not dealt with at all by the Police. Most certainly the Police are not being proactive in preventing such crimes. There is also a local drug taking and drug dealing problem, again not tackled.

The bus service for Elvington and Eythorne was always poor and inadequate for it to be used to commute to work. Now KCC has cut bus services further, there will be no public transport serving the villages. This has caused a major problem for school children attending secondary education in Canterbury, Dover and Sandwich and great difficulties for parents in trying to find alternative transport methods that also accommodate their need to attend work. Many in the village have mentioned considering moving away from this area to one that does have public transport for the school trip.

In Section 4.2.11 it mentions a range of tourist attractions available including Wingham Wildlife park, The "Historic park and Garden of Waldershare" and the EKR (East Kent (Heritage) Railway). The first is certainly an excellent attraction. Waldershare Park is, however, a private estate not open to the public. The heritage EKR line runs only one day a week (Sunday) and some bank holidays (not just "a few times a year" as stated in 4.216) from approximately April to October. Although it has a charm of its own and continues to be developed, it is currently of very limited appeal to the general public as it has a short track length and no steam engines.

In the Section on Eythorne and Elvington, and as shown in the plan in Section 4.214, land is shown "Allocated for Employment". This is all very laudable but the employment opportunities must be such that they provide opportunities, careers and suitable salaries for the local population. To date, attracting blue chip employers into this area has not met with tangible success. The Pike Road Industrial Estate businesses such as Tilmanstone Salads, which is a minimum wage employer, are not likely to be attractive to the majority of residents of employable age. More of the same is not going to adequately provide opportunities to deliver a sustainable community. The biggest employers for the communities will probably remain Dover docks and first responders, with others working for service industries from home.

Section 4.218 listing services and facilities has several errors. Eythorne does not have two village halls. It has one pre-cast concrete structure which could be considered a village hall behind Ss Peter and Pauls' Church. It is at the border of Eythorne and Elvington and hence poorly placed for Eythorne residents. It is barely used because of that and is most noted for being a polling station. Eythorne does not have a Cafe and to the best of my knowledge hasn't had one since the last century. It does have a village shop and Post Office combined (they are not separate amenities as might be supposed from the text as written in 4.218). Thus the actual "amenities" in Eythorne are one pub, one "village hall", and one Post Office/shop. It does have two churches (Baptist and CoE) but these are used by a tiny minority of residents and so can hardly be considered to be a significant amenity. According to the Church of England's own figures (2019), less than 1 % of the population attend church regularly. Over 50 % of the UK population are irreligious.

In terms of Elvington, it does not have a church as stated. The rest of the statement regarding Elvington amenities is correct. However, with the advent of services such as Uber Eats, Deliveroo and "Just Eat" etc the community attractiveness of the takeaways is diminished.

Regarding the statement in 4.219, and as clarified above, the settlements do not have much in the way of services and facilities that make them stand out as a place to create a new "Local Centre" unless the critical criteria you are using are possession of a pub, a shop, and unused churches.

Tilmanstone Colliery Welfare Sports Ground, as mentioned in 4.221, is a good facility for sports in the Eythorne and Elvington communities. As a non-profit making charity, however, it requires membership fees or hire fees for use of its facilities and the facilities are thus not freely available. These fees are not onerous however.

The entrance to the primary school which sits on the boundary between lower Eythorne and Elvington, and serves both communities, is on a corner and is a blind bend coming up Church Hill which is problematic for parents dropping off and picking up their children. Church Hill itself is narrow in parts, permitting passage of a vehicle only in one direction at a time, and is a bottle neck. Children arriving by foot from Upper Eythorne have to travel along Shooters hill which already has issues with child safety due to the narrowness of the road and traffic density, resulting in vehicles mounting the pavements to pass. Additional vehicle movements due to more house building will only exacerbate the problem. Traffic build up is also a problem at the staggered junction between Wigmore Lane, Shooters hill and Church hill which has visibility issues. If the new estate exits through Elvington, there will be a build up of traffic on Church Hill trying to exit onto Wigmore Lane using the Staggered junction. If the estate exits through Wigmore Lane then the increased traffic will cause problem trying to cross the staggered junction from Shooters Hill or Church Hill directions.

For sustainability of the community any new building must contain a large component of genuinely affordable housing. At the moment new houses are beyond the reach of the local young and are being bought up by people outside the community, diluting the community common values, or by buy-to-let investors.

It goes without saying that any new development must have searches done to ensure that subsidence and any ground contamination from the extensive Tilmanstone mining activity will not be an issue. Also the area around Elvington village has been found to contain much live WWII ordnance from troops stationed here during the war and this needs to be factored in to pre-building work.

The building on the proposed area will substantially diminish an important green corridor for wildlife movement (especially insects) and a source of food for many types of wildlife.

It is very disappointing to read in Section 4.2.11 that Dover District Council believe that "Shepherdswell, Eythorne and Elvington have their roots in the short-lived East Kent coalfields". Whilst it is certainly the case that Elvington is a (model) colliery village, the roots of both Shepherdswell and Eythorne precede the development of the coal fields by a considerable margin. Both have been occupied since the stone age, have evidence of Roman occupation, are mentioned in the doomsday book and have recorded history since then. Incidentally, it is stated in section 4.211 (and repeated in 4.216) that the EKR line was originally built to serve the Colliery at Tilmanstone. This is factually incorrect as the line was built to

	<p>serve any colliery in the area that might prove to be productive and reached as far as Wingham and also to Richborough at its peak. http://www.dover-kent.com/VILLAGES/18-Eythorne.html</p> <p>In conclusion there is clearly not the necessary infrastructure to support the proposed development and nowhere near enough amenities to justify development as a Local Centre. Progressing with the latter is wholly unnecessary. It would be much better if new villages were developed to support increased population, as was done when coal mining took off, to stop urban sprawl.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>For one, it needs to have guarantees on increases in health care, public transport, policing and schooling written in, commensurate with the increased number of houses, for it to be creditable as a plan to deliver sustainable communities.. Rather than continue "urban sprawl" by having "Local Centres" and diminishing sense of community etc, a much better policy would be to build new villages/towns to accomodate the additional housing as was done when mining started in Kent.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	8.33 and E4
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	8.33 The focus of building so many houses and large retail outlets at Whitfield has resulted in the degeneration of the historic town centre. It is unattractive and unwelcoming and the resulting footfall is much lower than it should be. E4 There are 3 Certificated Locations for touring caravans on Singledge Lane and several others to the East of the proposed Whitfield Urban Expansion. Many users of these sites merely stay overnight before travelling through the port of Dover. Others stay much longer to visit local historic sites, walking in the countryside or just to enjoy a peaceful countryside location. All will be seriously affected by the urban expansion by either the loss of easy access to the port or the loss of peaceful enjoyment of the countryside. This will result in a loss of sustainable rural tourism, contrary to Section 84 of the NPPF.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Focus the building and development on Dover Town Centre and reduce the focus of development at Whitfield.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	There is no mention of Section 215 enforcement anywhere in the plan. This is an enforcement tool available to remedy the problem of existing properties, which was raised in our earlier response, but the Local Plan re buildings (H1 TO H7) concentrates upon requirements etc for new builds. This we feel needs to be remedied in connection with attractiveness of the public realm for locals and visitors, maintenance of conservation areas. We also urge increased use of Article 4 Directions in conservation areas and extension to deprived wards in Dover where necessary.

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP 6 Economic growth
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	<p>This section of the plan is not consistent with NPPF 21 - development must be sustainable - there is no mention of green economic growth. Quality of 'growth' is more important in crisis-ridden 2020 to 2040 than quantity of 'growth'. Because it is more sustainable as we look ahead to 2040 – 2060 and beyond.</p> <p>In the current economic climate energy prices, business rates, public sector cuts are making public and private sector employers (care homes, schools, health centres, hospitality, police (£30 million cut in Kent), buses, independent retail) fear for their survival.</p> <p>To be sound, effective and compliant with the realities of here and now, this is the direction DDC Local Plan should take. The local economy needs pump-priming, national fuel security needs to be enhanced, people need lifting out of fuel poverty. The local plan could do more than allocating sites and floor space.</p> <p>Transition to a greener economy, a means of making us more resilient economically, will be helped considerably by the ambitions of Port of Dover to decarbonize its estate by 2025 and to take seriously its scope 3 corporate responsibility in an inclusive manner to support local communities and economic players as they transition to a greener business too.</p>

to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

There appears to be little mention of using the Local Plan to improve educational attainment by, for example, specific policies to

- a) forge deeper links with FE institutions (eg Dover Technical College) given the skills gap relating to the Green Homes agenda,
- b) encourage higher education establishments to develop facilities in the district, and thereby to develop a knowledge-based economy beyond the former Pfizer's site.
- c) encourage the long-promised incubation hubs for the newly qualified in the district. This would contribute to raising the average level of earnings in the district and to combating the high levels of deprivation experienced in some wards.

A glaring omission relates to new economic opportunities created by climate-friendly recovery sectors. Three are essential in Dover District. With a 70% rural economy, which is severely challenged by increased costs of imports, and climate problems including water shortage. Diversification into agri-forestry could become popular among the farming community. It is recommended by Nature-Friendly Farming Network. Examples include

- a) protecting arable yields in cases of drought, by planted strips of suitable, native, drought-tolerant trees, (which counter soil erosion, while increasing carbon sequestration) and,
- b) bringing back to life existing but neglected, traditionally coppiced woodland, causing it to be harvested for small-scale biomass on a rotational basis. Similarly, short rotation forestry would create rural income and mitigate climate change.

Another key to meeting climate targets is increasing the amount of land used for growing food for people rather than livestock. This would create new outdoor jobs as would replacing imported market-gardened food, with locally grown fruit, vegetables and pulses, this is a growth sector too, and is especially sustainable where zero / minimal pesticides are used, and Nature Friendly Farming practices are used. So rural areas, fields and woodland should be valued as locations of employment in themselves.

The up-grading of all rented housing stock (both public and private sector) to zero homes standard, would mean, it doesn't need to be done again before the local and legally-binding national target of 2050, and is thus a pre-requisite for the Local Plan to become legally compliant, and this can be made to benefit the local economy. It will be necessary to ensure that publicly owned rented housing stock stays in public hands. To incentivise private landlords, DDC should set up a register of private landlords, and to qualify for registration, landlords should have to show that homes rented are EPC C in 2023, EPC B in 2024, and zero carbon in 2025. As this will push up the value of their property, landlords should not find it difficult to access cheap loans to carry out the retrofit, (DDC could plan an intermediary role or suggest sources of finance). Tenants will benefit in terms of heating costs saved and improved standards of health, which is also a saving to the public purse. The economy will benefit in terms of jobs created for local trades people.

A third sector would include the fitting and maintenance of renewable energy installations, e.g. small-scale on-shore wind, small and medium scale solar (on domestic or non-residential roofs or to be combined with grazing land below, also on car parks), micro-tidal (tidal currents we are advised are very suitable locally), or 'green gas' as pioneered by Ecotricity in Hampshire (as the grass-cuttings from Dover's many golf courses and campsites are likely to be suitable). To maintain the returns on investment in these sectors within the regional economy, and stop them being off-shored, a priority should be given to schemes which are 51% or more community-owned.

The Dept for Transport bought the site they wanted for Dover Inland Border Facility from a farmer in Guston for £22million, and in 2022 DfT publicly said the site would not be needed as Dover IBF. Could this become a combination of grazing under solar canopies? Near 2 schools and a sports centre, it is an unsuitable location for the HGV park that is needed at a site further outside the Dover urban area.

Tourism and Tourist / Visitor Accommodation.
It is very unsound, for DDC to fail to make AirB&B owners register with them, so that they can be charged business rate council tax. In terms of housing provision, AirB&B, both nationally, and in Kent's coastal towns especially, have a very negative effect of reducing the private rental market in 2022 and thus forcing up the average monthly rents for private tenants.

The local plan would be more compliant with legality, if DDC regeneration took the greening of the economy more seriously and looked at smaller zero-carbon tourism /transport activity projects within Dover town; harbour trips with zero carbon, solar-powered boats.

Better coach and toilet facilities are needed to boost tourism in Dover.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness

Public Works Loan Board or municipal loans could be used in Dover as in East Sussex, where they've invested in skilled jobs transforming existing homes into zero carbon homes across seven district councils. (The Lewes Model explained | Green World).

<p>matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Businesses to be encouraged and helped to have more solar PV and Wind turbines. Solar canopies over the marshalling yards of Port of Dover, to generate energy that fridge trucks (whose engine-idling contaminates Dover) could plug into while waiting to board ferries. Rural economy growth through new farming initiatives (see above). Upgrade housing stock - so creating green jobs Improve facilities to promote tourism in Dover town.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	8.33
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Alkham Valley is an AONB with many ROWs, BOATS and Bridleways and SSSI. Alkham village itself, along with Bussy Ruff and Kersney Abbey provide important tourist attractions for Walkers, Cyclists and Horseriders as well as residents. Visitors are well catered and accommodated for by local business securing local employment. However, the plan needs to address the safety and enjoyment of users and plan for the preservation of the very natural beauty that attracts the visitors in the first place and wins them back again.</p> <p>Horesriding tourism is a very precious disabled and mental health resource and potential source of growth as long as its safe to do so.</p> <p>The sat nav phenomom is encouraging speeding delivery drivers on to inappropriate single lane roads which are also nominated KCC horse riding routes severely compromising the horse tourism.</p> <p>If the uncalssified rural Alkham valley road becomes a major thoroughfare the valley's attractiveness will be further damaged and soon lost as it will not be safe or enjoyable to visit. Trying to ride walk or cycle is already dangerous and would get worse.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	E4

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Dover District Council, in common with many local authorities, pursue policies and strategies on improvements to economic and social indicators based on supporting activities that generate increased numbers of tourists to their district. The reality is that this creates pressures on landscapes and habitats, provides only seasonal or temporary work for local people, places additional demands on existing infrastructure i.e. road networks, refuse and sewage, increases the number of second homes, (a particular problem in Deal and Walmer) thereby pushing up house prices and erodes community cohesion.</p> <p>Dover District Council has indicated its support for the development of Betteshanger Country Park. A proposal to build a surf lagoon and a 120 bed hotel on this site is currently being considered by the Council. In 2004 the Council signed a Section 106 Agreement agreeing to designate the country park a Local Nature Reserve. The Council failed to do this and now the country park is in the ownership of a private property developer who appears to want to turn a place of immense biodiversity and solace for local people into an adventure playground. If the Council approve this development, it will be contrary to its own and national policies on biodiversity and nature conservation.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Improvements to social and economic indicators based on increasing tourists puts pressures on landscapes, habitats, provides only seasonal work and places demands on infrastructure. Dover District has indicated its support for development of Bettshanger country Park (hotel and surf lagoon) but in 2004 a S106 was agreed to designate a local nature reserve.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	It is necessary to participate in the oral part of the examination because often matters can be articulated more effectively this way.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>It is very unsound, for DDC to fail to make AirB&B owners register with them, so that they can be charged Business rate council tax. In terms of housing provision, AirB&B both nationally, and in Kent's coastal towns especially, have a very negative effect of reducing the private rental market and thus forcing up the average monthly rents for private tenants, while we have a cost-of-living crisis. It is unsound for DDC not to cause all private landlords to register with the council, so that DDC could promote to private landlords, schemes allowing them to protect their tenants from the worst of fuel poverty, enhance the intrinsic value of their properties, and provide employment for newly qualified tradespersons in insulation skills graduating from EK Colleges, especially Dover College (FE).</p> <p>The local plan would be more compliant with Legality (legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008), if DDC regeneration took the greening of the economy more seriously and looked at smaller zero-carbon transport activity projects within Dover town; harbour trips with zero carbon, solar-powered boats (like La Rochelle has had for 15 years), like electric hopper mini-buses (like the ones which have been coping with the 1 in 6 gradients of Aix-en-Provence for over 15 years).</p> <p>Economic Growth in Dover, a coastal town aspiring to attract tourists, would be unsound unless it included trebling the number of toilets installed. Tourists as well as residents have toilet needs. For a town with the iconic, historical importance of Dover NOT to have any coach park with lavatorial comfort facilities is a disgrace. The ratio of inhabitants to toilet blocks in Dover town is treble the ratio in other urban areas in the District, 1 : 10,000 or higher. The only coach park in Dover Town has, for 5 years, had 2 signs on Maison Dieu Road telling coach drivers and visiting cardrivers that a toilet exists when in fact it doesn't. At this location in Maison Dieu car park, behind the police station, visitors get out, pay to park and find nothing, merely a sign to a 15 minute walk to Pencester Gardens, difficult when legs are crossed. The DDC website misleads the public on this issue. The lack of toilets is a public health problem which we have referred to Kent Director of Public health.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	E4
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>REPRESENTATIONS TO THE DOVER DISTRICT LOCAL PLAN REGULATION 19 CONSULTATION IN RESPECT OF BETTESHANGER COUNTRY PARK HOTEL AND SPA, DEAL</p> <p>This representation to the Dover District Local Plan (Regulation 19 Consultation) is made on behalf of our client, Betteshanger Country Park, who have submitted a planning application for a luxury hotel and spa at the Betteshanger Country Park site (LPA Ref: 22/01152) and is currently awaiting determination. A site location plan of the site and a layout plan are attached at Appendices 1 and 2 of this representation.</p> <p>Betteshanger Country Park objects to Policy E4 – Tourist Accommodation and Attractions in its current form, which seeks to boost the tourism and visitor economy of Dover District, but in respect of serviced visitor accommodation, only on sites within or adjoining existing designated settlement confines. This approach constitutes a significant deviation from the Regulation 18 Local Plan Policy E4, which supported tourism proposals where they are located within or adjacent to an existing visitor attraction or accommodation site. There has been no justified or evidenced reason for the deviation in policy between Regulation 18 and Regulation 19. Support for tourist accommodations and visitor attractions across the District should be strongly supported, particularly of the high quality and unique nature of our proposal, which would boost visitors to both the local and wider area. The District currently has a high proportion of day trips. Providing accommodation to convert these into overnight stays will significantly boost the local economy, highlighted in Paragraph 7.14 of the Regulation 18 Local Plan which stated that 'overnight trips are worth seven times more to the local economy than that of a day tripper'.</p> <p>a. Betteshanger Country Park Hotel and Spa ('The site')</p> <p>Betteshanger Country Park submitted a planning application for a luxury Hotel and Spa at</p>

Betteshanger Country Park, Deal ('the site') under the local planning authority reference 22/01152, which is currently awaiting decision from the Council.

The application was submitted in 'full' and seeks permission for the following development:

'Erection of a 120 bed hotel (C1) building with associated spa facilities, gym, restaurant/bar, access, landscaping and parking.'

The site is located to the west of Deal at Betteshanger Country Park on the site of a former spoil tip of the former Betteshanger Colliery. The site is in a well located and sustainable location, with Deal situated approximately c 3 km south of the site where Deal station provides connections into London via Ashford International or Folkestone Central. Bus services into the town centre operate twice an hour, taking 10-15 minutes. There are footpaths and cycle paths directly from the site leading onto Sandwich Road.

The planning application was informed by a series of technical reports and assessments covering matters including air quality and noise, arboriculture, archaeology, ecology, economic benefits, flood risk and drainage, heritage, land contamination, landscape and visual impact, a sequential test and transport.

The proposals for the design of the hotel and spa have been locally inspired, of sustainable and modern design that respectfully sits within a unique landscape environment surrounded by open green space. The proposals have set out to meet the aspirations of paragraph 126 of the NPPF in achieving the creation of high quality, beautiful and sustainable development, that will be acceptable to the community and a place of enjoyment.

A compelling planning case exists to support the planning application being approved and at the heart of this is a strong quantitative and qualitative need for additional visitor accommodation in the District, especially for a luxury hotel at the higher end of the market. This is justified by the declining number of holiday trips to the District as well as the falling value of holiday trips. Both the 'Destination White Cliffs Country – A Growth Strategy for Tourism and the Visitor Economy 2020 to 2030' and the Dover Economic Growth Strategy target growth, investment and development in the District's tourism industry so that the range of visitor accommodation stock is improved and longer stays and higher spend are encouraged. There is a demonstrated need to increase the number of high-quality 4- and 5-star visitor accommodation in Dover District.

This type of accommodation has not been delivered within settlement confines, as currently supported in adopted policy, due to the absence of a signature setting within which to site a hotel of this nature. However, there is a market opportunity for a luxury hotel at Betteshanger Country Park, given the unique selling point of it being sited within a Country Park with growing recreation and leisure appeal for both visitors and existing residents.

The benefits associated with the delivery of the proposed development identify with the three dimensions of sustainable development, comprising economic, social and environmental, as set out in paragraph 8 of the NPPF. The proposed development, as set out in the Economic Benefits Statement will create employment opportunities of around 243 direct and a further 77 indirect construction jobs, 75 direct jobs on site during the peak season and support of around 111 net additional jobs across the South East. Around £22.6 million will be generated in construction GVA across the construction period. The development will significantly boost the number of visitors to Betteshanger Country Park, helping to provide the investment the Country Park needs to thrive and fulfil its potential as an education, sport and tourism destination.

There is an opportunity to improve social interaction between families and friends, connect people to nature and open space and educate visitors on the ecology and history of the Country Park. Job opportunities and training will improve livelihoods and the proposed green and blue infrastructure's connection with nature will provide positive benefits for the health and welfare of visitors. The proposed development would enhance the existing open space and recreational offering of Betteshanger Country Park and increase investment into the landscaping in and around the site to deliver a highly attractive environment that can achieve a biodiversity net gain and ensure maintenance and stewardship of the Country Park for the long-term.

Amendment to Draft Policy E4 – Tourist Accommodation and Attractions to include support for tourism proposals that are located within or adjacent to an existing visitor attraction or accommodation site

Betteshanger Country Park aspires to be able to support the Dover District Local Plan and is supportive of the Plan's objective to support new tourism accommodation and attractions in the District. However, an objection is raised to the policy deviation made from the last Draft Local Plan iteration, which supported tourism proposals located within or adjacent to existing visitor attractions or accommodation sites. The proposed retrogressive policy removes positive policy support for visitor accommodation at existing visitor attractions that happen to lie outside of settlement confines. This policy change is considered to result in significant harm to the tourism strategy for the District, by creating a policy conflict to proposals for luxury hotels, which can only come forward at a signature setting site such as Betteshanger Country Park, which happens to lie beyond a settlement boundary.

To be able to deliver the much-needed high quality tourist accommodation, it is recommended that Policy E4 – Tourist Accommodation and Attractions be amended back to the Regulation 18 draft, which supported visitor accommodation proposals that are located within or adjacent to an existing visitor attraction or accommodation site. For clarity, the policy has reduced the ability to deliver serviced visitor accommodation

from its previous text which stated 'within or adjacent to an existing visitor attraction or accommodation site' to the revised text which only states 'within or adjoining designated settlement confines'.

The 'Destination White Cliffs Country – A Growth Strategy for Tourism and the Visitor Economy 2020 to 2030' published in May 2021 and the 'Dover District Economic Growth Strategy' published in November 2021 make it clear that despite NPPF policy support, there has not been enough high-quality visitor accommodation delivered in the District to support its tourism objectives. It is therefore vital to allow for serviced visitor accommodation in appropriate locations such as adjacent to visitor attractions to enhance and diversify the visitor economy and harness the potential of the District to grow the economy. Not doing so would be disastrous for the District's visitor economy.

There is no evidence to justify the deviation from the Regulation 18 Plan, but there are considerable real-world implications associated with this change in policy wording. The planning application that is awaiting determination by the Council is unnecessarily brought into conflict with the proposed new policy, despite the clear direction of the Regulation 18 Plan and the supporting evidence for the Local Plan clearly highlighting the need for high quality visitor accommodation at existing visitor attractions.

Betteshanger Country Park already attracts people from the local area who are looking to use the existing cycle paths, walk the many trails or visit the recently delivered Visitor Centre, including The Lamp Room restaurant and The Kent Mining Museum. The Country Park has also built a reputation for hosting a variety of public events such as shows, markets, competitions and sporting events, amongst others. A separate Application for a surfing lagoon with a pump track, yoga hub, education hub and holiday pods (LPA Ref: 22/01158) is also awaiting a decision from the Authority that would enhance the role of the Country Park as a unique visitor destination with direct and indirect economic benefits for the District and wider County. The sister applications complement each other and would deliver for Dover District an exciting and distinctive tourism destination unlike anything that currently exists in the District, County or wider Region.

In order to remedy the soundness deficiency with Policy E4, which is considered unsound on the basis of it being ineffective and not positively prepared, the following amendment is requested to section 1 b), which if agreed, would render the policy sound:

"1 Provision of new, improved, upgraded or extended accommodation and attractions

a Proposals for visitor attractions will be supported in appropriate locations across the District where it increases the range and/or quality of tourist facilities and accords with criteria i) to x) below.

b Proposals for serviced visitor accommodation (hotels and B&B development) will be supported within and adjoining designated settlement confines (as defined in Policy SP4) and within or adjacent to an existing visitor attraction or accommodation site subject to criteria i) to x) below..."

c. Conclusion

Betteshanger Country Park aspires to support the District in delivering a sound, justified and effective Local Plan. However, Betteshanger Country Park objects to Policy E4 in its current form, which in respect of serviced visitor accommodation, only supports developments on sites within or adjoining existing designated settlement confines. This approach constitutes a significant deviation from the Regulation 18 Local Plan Policy E4, which supported tourism proposals where they are located within or adjacent to an existing visitor attraction or accommodation site. There has been no justified or evidenced reason for the deviation in policy between Regulation 18 and Regulation 19. Support for tourist accommodation and visitor attractions across the District should be strongly supported, particularly of the high quality and unique nature of our proposal, which would boost visitors to both the local and wider area and make the average overnight visitor worth seven times more to the local economy compared to that of a day tripper. Not amending the policy wording will make it incredibly difficult for the District to meet its tourism and economic objectives for the future, as top-of-the-market hotels cannot be delivered within settlement boundaries, as evidenced through their longstanding non-delivery in the District. However, a luxury hotel can be delivered at the Betteshanger Park existing visitor attraction, due to its signature setting, and the resultant effects of a policy that enables this form of development are as follows:

- Deliver a unique, locally inspired, sustainably designed modern hotel of the highest quality;
- Generate significant direct and indirect economic benefits for the local and regional area, supporting the aspirations established in the 'Destination White Cliffs Country – A Growth Strategy for Tourism and the Visitor Economy 2020 to 2030' and the Dover District Economic Growth Strategy for longer stays, dwell time and spending;
- Connect people with nature, open space and allow the opportunity to educate visitors on the ecology and history of Betteshanger Country Park while enjoying the recreational amenities that are currently provided.

In addition to amending Policy E4 as requested, Betteshanger Country Park also respectfully requests that the Plan formally allocates Betteshanger Country Park for a luxury hotel.

Betteshanger Country Park would welcome the opportunity to participate in the forthcoming Examination-in-Public into the plan and contribute to the debate to ensure the best strategy for the District is found.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Betteshanger Country Park has land interests in the District and has an important role in delivering the Plan strategy

REPRESENTATIONS TO THE DOVER DISTRICT LOCAL PLAN REGULATION 19

CONSULTATION IN RESPECT OF BETTESHANGER COUNTRY PARK: THE SEAHIVE, DEAL

This representation to the Dover District Local Plan (Regulation 19 Consultation) is made on behalf of our client, The SEAHIVE, who have submitted a planning application for The SEAHIVE, Holiday Pods and Hub at Betteshanger Country Park, Deal, (hereafter referred to as 'the site') validated 28th September 2022 and at the time of this submitted representation, awaiting decision from the Council (LPA Application Ref: 22/01158). A location plan is provided at Appendices 1 of this representation accordingly.

The SEAHIVE are delighted that the Draft Local Plan supports the tourism and visitor economy with proposed Policy E4 – Tourist Accommodation and Attractions. Support for visitor attractions across the District should be strongly supported, particularly of the high quality and unique nature of the SEAHIVE proposal, which would boost visitors to both the local and wider area and help to boost the number of overnight stays in the District, which is very low in relation to the numbers of people passing through the District. SEAHIVE considers that the Local Plan should be even more proactive than the position outlined in the draft Plan, through a corresponding development allocation for a visitor attraction on the Betteshanger Country Park.

The submitted planning application for this proposal (LPA Ref: 22/01158) sets out how the proposal is in total compliance and sync with the tourism objectives of the 'Destination White Cliffs Country – A Growth Strategy for Tourism and the Visitor Economy 2020 to 2030' as well as the Dover District Economic Growth Strategy. There is a clear demonstrated need for a unique tourism offering in Dover that can improve and diversify existing attractions in the District, support longer stays, dwell time and spending. Betteshanger Country Park is designated as Open Space and has already established itself as a destination offering visitor amenities and attractions in the form of a café/restaurant, Mining Museum, meeting space, cycle and pedestrian paths as well as holding large entertainment events throughout the year. The SEAHIVE would enable the site's community value, as well as tourism value, to be realised.

a. The SEAHIVE, Holiday Pods and Hub ('The site')

The SEAHIVE submitted a planning application for The SEAHIVE, Holiday Pods and Hub at Betteshanger Country Park, Deal ('the site') under the local planning authority reference 22/01158, which is currently awaiting decision from the Council. The application was submitted in 'full' and seeks permission for:

'Erection of a surfing lagoon and pools, hub building (to include café/restaurant/bar lounge, shop, hiring and changing facilities and multi-use space), 15 overnight holiday pods, learning hive, yoga studio, fitness/health and wellbeing facilities, bike/pumptrack and associated roads, paths, car and cycle parking, together with landscaping and necessary access works and associated site infrastructure.'

The site is located to the west of Deal at Betteshanger Country Park on the site of a former spoil tip of the former Betteshanger Colliery. The site is in a well located and sustainable location, with Deal situated approximately c 3 km south of the site where Deal station provides connections into London via Ashford International or Folkestone Central. Bus services into the town centre operate twice an hour, taking 10-15 minutes.

There are footpaths and cycle paths directly from the site leading onto Sandwich Road.

The planning application was informed by a series of technical reports and assessments covering matters including air quality and noise, arboriculture, archaeology, ecology, economic benefits, flood risk and drainage, geotechnical, heritage, land contamination, landscape and visual impact, and transport.

The proposals for the design of the buildings and lagoon will be unique and set a precedent for the highest quality rural architecture for a sports and recreational facility and have been informed by contextual analysis and environmental considerations. The proposals have set out to meet the aspirations of paragraph 126 of the NPPF in achieving the creation of high quality, beautiful and sustainable development, that will be acceptable to the community and a place they will enjoy.

The Economic Benefits Statement submitted as part of the application highlights the declining number of holiday trips to the District as well as the falling value of holiday trips. Both the 'Destination White Cliffs Country – A Growth Strategy for Tourism and the Visitor Economy 2020 to 2030' and the Dover Economic Growth Strategy target growth, investment and development in the District's tourism industry so that visitor experiences are improved and longer stays and higher spend are encouraged. The development proposal offers the opportunity to significantly boost the number of visitors to Deal and Dover, supporting the growing surf community in Kent, as well as attracting visitors from further afield.

There is a unique selling point to this sporting-led tourist attraction that will allow it to compete and differentiate itself from other destinations and complement the tourism offer both in the District and wider County.

The benefits associated with the delivery of the proposed development identify with the three dimensions of sustainable development, comprising economic, social and environmental, as set out in paragraph 8 of the NPPF. The proposed development will create employment opportunities of around 153 direct and a further 194 indirect construction jobs, 100 direct jobs on site during the peak season and support of around 45 to 74 net additional jobs across the South East. Around £14.2 million will be generated in construction GVA across the construction period and at the development site itself, £6 million could be generated in visitor spending with an additional £2 million from those overnight visits at the holiday pods.

Socially, there is an opportunity to engage people in outdoor physical activity that has proven to have positive health and well-being benefits. Working with local businesses, schools and communities, particularly directing efforts at those social groups who are disadvantaged will be possible under this proposal. The proposed development would enhance the existing open space and recreational offering of Betteshanger Country Park with a high quality sport activity that should be of significant community benefit to existing residents, as well as economic benefit in providing a valuable attraction to the District to encourage greater numbers of visitors to visit and stay in the District.

b. Amendment to Draft Policy E4 – Tourist Accommodation and Attractions to include an allocation for tourist attractions at Betteshanger Country Park

The Dover District Local Plan Regulation 19 supports the provision of new, improved, upgraded or extended accommodation and attractions in the District. The SEAHIVE is therefore supportive of the Draft Local Plan's positive approach to supporting new tourism accommodation and attractions in the District. However, it is considered that the Plan could and should be more positively prepared and more specific in its support for the SEAHIVE development at Betteshanger Country Park.

A site-specific allocation for SEAHIVE at Betteshanger Country Park would provide public support to the principle of SEAHIVE being located within the District in a highly suitable, accessible and sustainable location for the infrastructure. Betteshanger Country Park is best placed to accommodate the proposed development of this scale and type within the District, not only because of its proximity to Deal, but also because the land lies in Flood Zone 1, which is rare within the coastal parts of the District. The setting of the site within a 200-acre Country Park offers an opportunity for the management and enhancement of habitats.

Betteshanger Country Park already attracts people from the local area who are looking to use the existing cycle paths, walk the many trails or visit the recently delivered Mining Museum. The Country Park has also built a reputation for hosting a variety of public events such as shows, markets, competitions and sporting events, amongst many others. The addition of the surfing lagoon with a pump track, yoga hub, education hub and holiday pods would accentuate the value of the Country Park as a visitor destination however, as well as a recreational resource of high community value.

Chapter 6 of the NPPF concerns building a strong, competitive economy and Para 81 outlines how planning policies should help build strong and competitive economies where businesses can invest. The allocation of the SEAHIVE at Betteshanger Country Park would create a more positive and proactive Plan that supports innovative and unique proposals such as SEAHIVE and increases the likelihood of important new tourism infrastructure being delivered through a Plan allocation.

c. Conclusion

The SEAHIVE supports in principle a positively prepared, justified, effective, consistent and sound Dover Local Plan and considers there to be much to commend with the existing draft Plan. While SEAHIVE supports the inclusion of a policy that directly targets tourism accommodation and attractions in the District, the Plan could and should be more positively prepared through the allocation of the subject site of Betteshanger Country Park for the SEAHIVE visitor attraction, to cement the Country Park as a unique visitor destination for the District and support the District's economy in the following ways:

- Deliver a unique, innovative and inspiring visitor attraction, setting the precedence for the highest quality rural architecture seen anywhere for a sports and recreational facility;*
- Generate significant economic benefits for the local and regional area, supporting the aspirations established in the 'Destination White Cliffs Country – A Growth Strategy for Tourism and the Visitor Economy 2020 to 2030' and the Dover District Economic Growth Strategy for longer stays, dwell time and spending;*
- Engage people in outdoor physical activity that has proven health and wellbeing benefits.*

The SEAHIVE would welcome the opportunity to participate in the forthcoming Examination-in-Public into the Plan and contribute to the debate to ensure a sound and high quality Local Plan for the District to be delivered.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	DDC Note (1) The text below is an extract from the original representation which is attached to SDLP1438. E4 Tourist Accommodation and Attractions: It is very unsound for DDC to fail to make Airbnb owners register with them, so that they can be charged Business rate council tax. In terms of housing provision, Airbnb both nationally, and in Kent's coastal towns especially, have a very

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

negative effect of reducing the private rental market and thus forcing up the average monthly rents for private tenants, while we have a cost-of living crisis. It is unsound for DDC not to cause all private landlords to register with the council, so that DDC could promote to private landlords, schemes allowing them to protect their tenants from the worst of fuel poverty, enhance the intrinsic value of their properties, and provide employment for newly qualified tradespersons in insulation skills graduating from EK Colleges, especially Dover College (FE).

Green tourism, and 'safe' country lanes, are East Kent assets that it would be very unsound to degrade.

The local plan would be more compliant with Legality (legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008), if DDC regeneration took the greening of the economy more seriously and looked at smaller zero-carbon transport activity projects within Dover town; harbour trips with zero carbon, solar-powered boats (like La Rochelle has had for 15 years), like electric hopper mini-buses (like the ones which have been coping with the 1 in 6 gradients of Aix-en Provence for over 15 years).

Economic Growth in Dover, a coastal town aspiring to attract tourists, would be unsound unless it included trebling the number of toilets installed. Tourists as well as residents have toilet needs. For a town with the iconic, historical importance of Dover NOT to have any coach park with lavatorial comfort facilities is a disgrace. The ratio of inhabitants to toilet blocks in Dover town is treble the ratio in other urban areas in the District, 1 : 10,000 or higher. The only coach park in Dover Town has, for 5 years, had 2 signs on Maison Dieu Road telling coach drivers and visiting car drivers that a toilet exists when in fact it doesn't. At this location in Maison Dieu car park, behind the police station, visitors get out, pay to park and find nothing, merely a sign to a 15 minute walk to Pencester Gardens, difficult when legs are crossed. The DDC website misleads the public on this issue. The lack of toilets is a public health problem which we have referred to Kent Director of Public health.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination? Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>(DDC Note - Full Representation attached to SDLP1860. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1860.)</p> <p>h. Policy E4 – Tourism Accommodation and Attractions</p> <p>Whilst Quinn is broadly supportive of Policy E4, objection is raised to the policy deviation made from the last Draft Local Plan iteration, which supported tourism proposals located within or adjacent to existing visitor attractions or accommodation sites. The proposed retrogressive amendment removes positive policy support for visitor accommodation at existing visitor attractions that happen to lie outside of settlement confines. This policy change is considered to result in significant harm to the tourism strategy for the District, by creating a policy conflict to proposals at existing visitor attractions, which provide the scope to deliver new visitor accommodation where existing settlements are unable to. For example, there is no market requirement for a luxury hotel within an existing settlement, but there is a requirement for a luxury hotel at Betteshanger Park, where a signature setting forms a unique selling point.</p> <p>In order to remedy the soundness deficiency with Policy E4, which is considered unsound on the basis of it being ineffective and not positively prepared, the following amendment is requested to section 1 b), which if agreed, would render the policy sound:</p> <p>“1 Provision of new, improved, upgraded or extended accommodation and attractions</p> <p>a Proposals for visitor attractions will be supported in appropriate locations across the District where it increases the range and/or quality of tourist facilities and accords with criteria i) to x) below.</p> <p>b Proposals for serviced visitor accommodation(hotels and B&B development)will be supported within and adjoining designated settlement confines(as defined in Policy SP4) and within or adjacent to an existing visitor attraction or accommodation site subject to criteria i) to x) below...”</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note</p>	<p>Quinn Estates is a developer with significant land interests in the District, who has an important role in delivering the Plan strategy</p>

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Dover Harbour Board supports the objectives of Policy R2 - Sequential Test and Impact Assessment to restrict retail development and other main town centre uses to existing town centres unless they are supported by other policies in the Plan. However, we request that the policy recognises or clarifies that in locations (such as Dover Waterfront) where there is already a significant amount of floorspace in retail and town centre uses, proposals for the development/reprovision of equivalent floorspace for such uses will not be required to satisfy the Sequential Test requirements of Policy R2.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	More sound if the recommendation about SMEs and electric hopper buses (our comments E4 above) incentivized. To note E1 above, on floor space / new employment could include out-of-town park for hopper buses with solar canopy so proportion of electrical charging for hopper buses from direct solar.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I feel that the plan is unsound because the solutions are not addressing the long term issues, the priority if Dover District is ever to successfully develop into a thriving long term community is to separate the local community and their communication routes from the high volume of vehicles and HGV's using the Port of Dover permanently.</p> <p>(This text moved from question 9):</p> <p>Traffic generated by additional development should normally be targeted towards the primary and secondary route network in the District. Other routes should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements.</p> <p>I consider that in three areas the current plan to 2040 has not effectively addressed the issues surrounding road safety and traffic congestion.</p> <ol style="list-style-type: none"> 1. The Alkham Valley Road traffic projections indicate that there will be an unacceptably high volume of vehicles using the route through an unclassified through an AONB to join the A20/M20 at the Roundhill Tunnel rather than the A20 from Dover. 2. Increasing the lane widths around the Whitfield roundabout and Duke of York roundabout on the Main A2 route to Dover port is not a safe or viable solution, especially as the new Thames crossing will encourage much more traffic to use the A20 route significantly increasing traffic volumes. <p>The only practical solution that I can identify as a Qualified Chartered Engineer is to separate local and through traffic for the port by installing flyover bridges or underpasses at each site, the projected flow at both sites is unlikely improve road safety for local traffic or access to local facilities.</p> <ol style="list-style-type: none"> 3. The District Council is recommended to review the Gothenburg Model in Sweden to see how that city took action to give the sea front back to the community, again I feel that the solution is an underpass as constructed in Gothenburg. Also nearer to home another very successful project at Conway, North Wales to gave the town back to the community and diverted all Irish Sea ferry traffic underground across the harbour. An access tunnel from the A20 under the western docks across the Dover harbour into the Eastern docks is the only long term solution if Dover

	<p>is ever to be developed into a prosperous town for it's residents. A major Development that needs serious consideration for the next 100 years not just to 2040.</p> <p>These outline comments sound radical but I feel need serious investigation by Dover District Council and ther UK Government before significant investment costs are wasted trying to adapt unsuitable roundabouts and traffic flow systems.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>An undertaking to assess and discuss with government the real requirements required to ensure the proper regeneration and development of the East Kent area ensuring realistic transport flow for vehicles, cycles and pedestrians. Segregating all Port traffic flow requirements far into the future not just 2040.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC EDIT: Please see attachment in response to the following email: "I completed the above submission on Wednesday 7th December, it proved to be a bit of a nightmare as the data record will probably show, with the databases freezing and missing key strokes etc. I suspect due to poor internet connectivity in Alkham or the DDC website becoming overloaded? Once I got to the end of the form, there were clearly multipole grammar and spelling corrections to address and several sections the English needed editing. Unfortunately the document froze, so I could not edit sections previously completed. I tried last night to edit the document once registered which according to the guidance should have been possible by amending it to a Ver 2 but I could not find out how to edit it. I think the text on my submission is understandable, but if possible would appreciate if the attached improved text could be considered along with my submission"</p> <p>REFERENCE TO POLICY T12.</p> <p>Unfortunately this policy has clearly identified the primary routes from Dover district to be the A2 to the North and the A20 to the west. No consideration seems to have been given to the regular traffic disruption on the A20 through the Town and A20 between Dover and Folkestone due to regular the inability to manage ferry traffic within the ports infrastructure.</p> <p>The outcome of which is heavy usage of the Unclassified Alkham Valley Road, an unclassified road between the London Road Dover and Hawkinge entry roundabout to the A20. This road is within the AONB for the entire length of its route</p> <p>The councils own modelling data shows clearly that today at the Alkham Valley to London Road the Junctiuon is over capacity during rush hour traffic. Causing traffic to divert onto narrow roads through River and Temple Ewell villages.</p> <p>This problem will be exacerbated when additional housing is constructed in Whitfield and Dover.</p> <p>A document written by Alkham Valley Speedwatch is attached is attached to detail the concerns of Alkham Speedwatch. They cover a significant number of concerns which exist at present and will become major problems in the future. Although the document references numerous areas of the plan the key point is that there is no evidence that the Alkham Valley Road has been considered during the plans development.</p> <p>(This text copied from question 9):</p> <p>Alkham Valley Speedwatch are a group of 10 Volunteers. Speedwatch has significant experience of observing driver behaviour and traffic flow through the Alkham Valley, having been requested in 2017 by the Parish Council to develop a safe traffic management plan for the route for an unclassified road passing through an AONB along it's entire length. Following a survey of residents who were unanimously concerned about speed, traffic volumes, road safety, use by low height heavy HGV's and road kill along the valley road the attached TAG report was published but never actioned. At the request of KCC the Parish Council produced a highways HIP Plan but unfortunately most of the content was mostly rejected by KCC due to lack of funding and the remaining mostly unaffordable from a parish Council Budget.</p> <p>The Alkham Valley road safety issue is not new and has been a source of concern in the Parish for over 30 years. The historic position is described in the attached document. The Plan 2040 needs agreement for a realistic and safe solution for the ANOB & SSI plus the inhabitants of the Alkham Valley Road until at least 2040. It is unacceptable to ignore a road with an overloaded traffic flow for an AONB and projections to increase traffic flow by at least 50% by 2040, denying safe access to cyclists, horse riders, villagers and visitors in the Dover 2040 Plan.</p> <p>DDC EDIT: Please see attachment in response to the following email: "I completed the above submission on Wednesday 7th December, it proved to be a bit of a nightmare as the data record will probably show, with the databases freezing and missing key strokes etc. I suspect due to poor internet connectivity in Alkham or the DDC website becoming overloaded? Once I got to the end of the form, there were clearly multipole grammar and spelling corrections to address and several sections the English needed editing. Unfortunately the document froze, so I could not edit sections previously completed. I tried last night to edit the document once registered which according to the guidance should</p>

	<i>have been possible by amending it to a Ver 2 but I could not find out how to edit it. I think the text on my submission is understandable, but if possible would appreciate if the attached improved text could be considered along with my submission"</i>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Dover District Council needs to fully consider the impact of the Dover District Traffic plan on the ALKHAM VALLEY ROAD, to assess methods to resolve the A20 traffic congestion problems and implement deterrent methods to prevent commuters overloading the unclassified route through the Alkham Valley by using the Alkham Valley as a "commuter rat run" to the M20.</p> <p>The traffic management plan for the Alkham Valley road needs ensure that Alkham Valley Road to complies with the for normal traffic flow expectations and guidance for an unclassified road passing through an AONB a large area of SSI to the North, plus a small village with a notoriously dangerous z bend in the middle of the village with few safe crossing points for pedestrians. It also needs consider the poor road safety and road traffic accident record of the road, speedwatch, police traffic cameras and prosecution records along a narrow road with has multiple bends, a village with no connecting pavements, poor driver vision and a lane width slightly narrower than the guideline road width between properties in the middle of the village. It should also take into consideration the access requirements for cyclists, horse riders and walkers to the AONB. Also the safety of residents trying to exit blind drives onto a road designed for horse and carts and occasional vehicles.</p> <p>Where vehicles frequently exceed the speedlimit by 40% to 50% and have been prosecuted entering the village 30mph limit at up to 70 mph especially in commuter rush hours as drivers try to avoid traffic disruption on the A20 dual carriageway. There have been at numerous major accidents along the Alkham Valley every year since records began.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	TI1
2 - Do you consider this part of the Plan sound?	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Whilst supporting the intentions of criteria (a), (b) and (c) and safeguarding the rights of way network it will also be important that allocated sites both residential and employment are in locations that support active travel. It will also be important that there are active travel routes from residential development to nearby facilities and that they are safe, lit (to be safe for women. Children and young people) and have firm surfaces (not mud paths).
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	CPRE Kent would wish to participate at the examination hearings to explore these issues further.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We note that TI1 formed DM Policy 4 of the Regulation 18 consultation. We support this policy which notes the need for new developments to provide opportunities to maximise the use of sustainable transport modes which is in line with the NPPF 2021. We recognise that DDC declared a Climate Emergency in 2020 and this policy intervention can help to minimise the need for costly, disruptive and carbon intensive highway infrastructure to mitigate developments, and will better meet the UK's net zero commitments and the need to improve air quality for local communities. We recently published 'Net zero highways: our 2030 / 2040 / 2050 plan.' The document covers our commitment to developing and implementing a programme to improve public transport operations on the SRN, promotion of walking and cycling and measures to reduce the need to travel. We are committed to working with DDC to ensure that the Local Plan development comes forward sustainably.</p> <p>Representation: National Highways are content with Policy TI1</p> <p><i>(Note - This is an extract of the Full National Highways representation which can be located at SDLP1152)</i></p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We have commented above on specific SAPs where the Highways Assessment is inadequate and the reality on the ground is different. This being the case, the Plan would not be sound or compliant with the Localism Act 2011 if local parish-wide public consultation on travel impact of all developments over 15 dwellings were not required.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	T11 would not be sound without : <i>"All new homes must be readily accessible by sustainable transport modes through the provision of high-quality, engineered, safe and direct walking and cycling routes within the permeable site layout.."</i> This would make clear that cycle ways, for example, must be more than a painted line on the road surface (Badly painted lines can be fatal). Also to be rendered more sound by the following final statement: <i>"The Council will safeguard and enhance the rights of way network and other cycle and walking routes from developments that would otherwise compromise their use."</i>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>10 Footpaths, Cycleways, Bridleways and BOATS</p> <p>The Dover District Plan clearly identifies a wish to achieve a modal shift from car to public transport and develop a network of cycle routes and walkways through the district and I believe Alkham can help the District achieve its aims in this respect.</p> <p>10.1 The Parish is crisscrossed by a series of bridleways and footpaths. Several walks have been written up in detail and can be downloaded from the village web site. <i>(see map in attachment)</i></p> <p>10.2 Several problems have been experienced with some of the footpaths, particularly the Bull Run and Pimlico owing to the misuse by vehicles.</p> <p>10.3 A comprehensive plan is therefore required for maintenance, preservation and use of this amenity as part of the local planning proposal.</p> <p>Comment 10</p> <p>In line with the proposals contained within the District Plan I believe thought could also be given to additional paths and cycle routes which should be created to give access safely along the Valley and to develop it as a recreational resource bearing in mind the points raised above about the need to conserve the AONB and SSSIs. If new routes are proposed, it is important to consider the ongoing maintenance costs given the problems encountered already on existing routes. This would go some way to achieving the modal shift referenced within the plan.</p> <p>11 Bridleways</p> <p>11.1 Horse riding is a popular pastime within the parish Figure 2 shows the abundance of bridle paths throughout the parish but again difficulties have been experienced in maintaining these to an acceptable standard. <i>(see attachment for map)</i></p> <p>Comment 11</p> <p>Sustainable Transport and Travel – DDC Plan - TI1)</p>

	<p>Again, in line with the Dover Plan this could further be developed as part of a recreational plan for a conservation Area It should be noted that there are four crossing sites along the Alkham Valley Road. Risk assessments by the Traffic Action Group identified these crossings and the short length of Alkham Valley Road between Pimlico and Megget Lane used by riders as very dangerous given current traffic volumes</p> <p><i>(DDC note - The full representation from Alkham PC is attached. However, specific comments from the full representation document have been extracted into separate consultation points/policy areas, relevant to the comments made)</i></p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Not Applicable
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Positively prepared Justified</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>No</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Reg 19 T12 - Transport Statements, Assessments and Travel Plans</p> <p>In item 10.7 set out their goal of 'promoting the delivery of sustainable development' stating that 'Traffic generated by development should normally be targeted towards the primary and secondary route network in the District. Other routes should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements'.</p> <p>Although KCC Highways consulted with DDC on policy (T12) they haven't published benchmark traffic levels or defined 'inappropriate' or 'unsuitable' traffic impacts because 'baseline conditions vary considerably from location to location'. Nor does NPPF para 111 provide a definition of 'severe' or 'unacceptable'. DDC also seek discretionary power over:</p> <ul style="list-style-type: none"> • When or whether Transport Assessments and Travel Plans are required.

- **And to decide what constitutes a severe residual cumulative impact on the local highway on a case by case basis.**

Without the robust benchmark data on existing traffic (as required by MHCLG and DDC's Sustainability Appraisal of Growth Options), it unclear how this will work in practice. Especially given the pressure to deliver on housing targets and the local government financial incentives to facilitate housing inherent the New Homes Bonus which we understand paid £1,728,587 to DDC in 2019.

- The Reg 19 proposed Aylesham South and Snowdown sites are accessed directly from the C195 / Holt Street, which is also the direct route to the A2 from Elvington. This will increase our traffic issues.
- While recognising the 'porosity' of the contiguous rural road network the traffic impacts from the proposed Aylsham site on to Holt Street, WSP data and modelling is restricted to the observation that '*Holt Street is not modelled but anticipated trips for Aylesham Development will leave the network here*'.
- No ACT data has been collected or for traffic heading North on Adelaide Road from Elvington to the A2 or from Aylesham heading south east to Sandwich, Discovery Park and South Thanet

PAS state good evidence should contain reliable, objectively collected recent data and will not contain unjustified assumptions. For the area bounded by the A2, B2046, A256 and A257, we believe the patchy 2018 ACT traffic evidence fails this test as it does not include:

- 1 Disaggregated SERTM data.
- 2 Node Impedance Calculation (ICA)
- 3 VISUM Network Map of existing and proposed roads
- 4 Detailed benchmark capacity PCU per Lane per lane data for Links types including for Rural Roads and Minor Road Rural Village (30mph).
- 5 Education Cat Trips prior matrices .

In assessing whether the Reg 19 sites in Aylesham and Elvington likely to result in inappropriate levels of traffic generation or unsuitable traffic movements' on the C195 route, we reviewed the following data to establish the likely impact:

- 2011 ONS Census data,
- ONS - Nomos data, labor market statistics and DataShine ESRC BODMAS conclusions in the Sustainability Assessment,
- WSP's DDTM and Reg 19 traffic data,
- the Office of rail and Road Estimates of station usage and
- Onsite employment assumptions
- Education commuting data.
- AA Route Planner

The key findings are itemised in Section 4.1 below.

Reg 19 T12 - Conclusions

Reg 19 SA Appendix B confirms the District's residents '*rely heavily on cars to...access employment, education, amenities and services*' and predicts an increase of commuting from Aylesham to Sandwich (the district's 2nd commuting hub) as well as to Thanet and Deal. In addition to reduced onsite employment at Aylesham (reduced in WSP modelling from 1013 in Reg 18 to 263 in Reg 19) and the absence of any direct public transport links to Discovery Park, Deal or Thanet; the absence of Secondary education facilities and the primary education capacity issues in Aylesham will also continue to drive increases in commuting road traffic on the C195.

The conclusions are clear, Aylesham will increase traffic on the surrounding rural road network but what is not clear is how DDC propose to deliver their goal of 'promoting the delivery of sustainable development' or ensure 'Other routes should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements'.

DDC have failed to engage with the conclusions from existing evidence base or commission a sufficiently robust traffic data for the area bounded by A2, B2046, A256 and A257 containing >78% of all Dover Districts Reg 19 housing allocations outside Dover and Whitfield. Consequently there are no clear thresholds against which future applications can be measured. If, as a result, unsound policies are included in the LDP, then no subsequent s106 developer contribution led mitigation will be achievable.

Therefore, we conclude the policy is unsound because:

- 1 This plan is not consistent with achieving sustainable development and therefore cannot be called **positively prepared**.
- 1 Ignoring the area-specific evidence itemized in 4.0 and below, this policy cannot claim to be based on proportionate evidence and., so, cannot be considered

The Duty to Co-operate

DDC were only made aware of Canterbury City Council's (CCC's) Reg 18 plan for 3200 houses north of B2046 and the 420 dwellings on land contiguous to SW Aylesham in September 2022, shortly before the publication of their Reg 19 plan.

We haven't seen a statement of common ground or any evidence of the active ongoing constructive engagement and co-operation required to maximise the effectiveness of local plan in the context of strategic cross boundary matters or of any coherent strategy based on agreements between them.

As all authorities are required to reach agreement on strategic matters before submission we expect this is under review but – based on the absence of co-operation evident to date –we questions whether the legal duty to co-operate can be complied with in a meaningful way.

Scale of Cross Boundary Development Impact on DDC Reg 19 Evidence Base and Plan Soundness

Although DOV/07/01081 and DOV/13/0120 promoted Aylesham as a 'Garden Village', in their Reg 19 plan Dover District Council propose that Aylesham becomes a small Garden Town of 15,000 (LDP 4.196 and **4.199**). Canterbury City Council propose another 3,620 dwelling adjoining Aylesham to create a single 'new town' or Freestanding Garden City with a population of 25-30,000 people. A development of this scale requires realistic assumptions about self-containment, a strong foundation of employment and appropriate infrastructure to avoid creating an unacceptable severe cumulative impact on adjacent road network.

The consideration and mitigation of transport impacts is an essential part of Government's wider policy objectives for sustainable development. The objectives set out in NPPF para 111, DDC's Reg 19 Policy T12 10.8 can only be effective delivered against a robust evidence base that provides the clear benchmarks and thresholds that a planning application can be measured against.

Canterbury City Council's stated Reg 18 position is that the traffic impacts of their proposed new town joining Adisham to Aylesham are mitigated by the planned south Canterbury bypass which, they claim, will reduce traffic impacts as measured across their district. No evidence has been provided to establish how this will mitigate the impact of 3,620 additional dwellings on the rural road network in Dover District.

As highlighted in 1.2.1 (i) above, in relation to DDC's Reg 19 plan, we have existing concerns regarding the absence of a robust transport evidence base for the area bounded by A2, B2046, A256 and A257, collected in advance and benchmarking existing traffic levels so the cumulative impacts of proposed developments on transport networks can be subsequently measured.

- The additional scale of Canterbury's proposed development and proximity to Aylesham and the District's boundary, means that DDC's Reg 19 plans is not positively prepared as it is not informed by agreements with other authorities or consistent with achieving sustainable development.
- It is not justified as it is clearly not based on proportionate traffic or sustainability evidence.

We would argue that this also compromises plan efficacy given the absence of effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground

Traffic Evidence Summary

- 1 Despite the Ministry of Housing, Communities & Local Government 2020 LDP guidance stressing the importance of contextual data such as travel to work areas (and that evidence needs to inform what is in the plan and shape its development rather than being collected retrospectively). Although referenced at a District level in the Sustainability Assessment, none of this contextual or empirical evidence has been considered in the LDP strategic site allocation process in relation to the impact of Aylesham and Elvington on the road network.
- 2 From ONS data to SA commuter patterns and to SHMA 2017 all highlight a strong trend of out-commuting. ONS data shows high car reliance in all major strategic site locations.
- 1 WSP's DDTM (Reg 18 Traffic Plan Assessment 2020 / Regulation 19 Transport Modelling Forecast Main Report or Appendices) report conducted detailed modelling of the Dover and Deal traffic. Other areas were '**modelled in significantly less detail**'.
- 2 Despite recognising the LDP will 'lead to large increases in flow' in Aylesham, WSP's analysis is limited to a handful of ATC's (automatic traffic counters) on the B2046 in 2019. WSP's report offered no conclusions on the area north of the A256 as it was outside the DDTM area. Although concerns were raised at Reg 18 no new traffic data or modelling has been introduced at Reg19. We understand KCC Highways have 'requested projected development flows leaving the currently modelled areas in that direction to sense check on any need to extend the models'. However, given the site-specific impact focus of S106 means it is not an effective framework for mitigating cumulative impacts from multiple spatially distributed developments on a rural road network, we believe a specific LDP policy is required.
- 3 '*Critical locations on the road network with poor accident records should be identified in order to determine if the proposed land allocations will exacerbate existing problems and whether highway mitigation works or traffic management measures will be required to alleviate such problems. The accident records should be compared with accident rates on similar local roads*'. (MHCGL guidance on traffic evidence for LDP)
There have been 4 deaths on Holt / Easole Street within 1.5 miles of the Aylesham Road junction. How many deaths are required in order for Holt Street to qualify as having a poor accident record and to be included in the detailed traffic modelling?
- 1 The Elvington data consists of ATC and manual data counts. By citing proximity to A256, the implicit study assumption is that the A256 is the primary route used. No empirical data collected on the traffic heading to the A2 / M2 / M26 or M25 from Elvington.
- 1 WSP recognised the porosity between the B2046 and the adjacent rural road network, yet provided no analysis of (1) the rural road capacity restrictions or (2) of baseline cumulative traffic from development to date or (3) the projected increase on the road network from the LDP.
- 2 According to WSP, Highways England approved matrix information from the South East Regional Transport Model (SERTM) used by WSP in Deal was only disaggregated using the 2011 Census data for the DDTM area. As noted in 2.2.13 of WSP's 2018 DDTM the

SERTM data is very coarse and with no disaggregation would provide little insight into Elvington and Aylesham commuting patterns via the rural road network

- 3 There is an extensive resource of rural road network ATC data from Aylesham's s106 TA's (2007/ 2014/2018 etc.) that could have been consulted. KCC Highways confirm the ACT data used for Phase 2b of the Aylesham Village Expansion has not been considered.
- 4 WSP's observation on likely traffic impacts of proposed Aylesham Development on the rural road network is restricted to '*Holt Street is not modelled but anticipated trips for Aylesham Development will leave the network here*'. WSP implicitly assumed all traffic for Aylesham will access and leave the site from Dorman Ave North. ATC and modelling evidence shows this assumption to be unsound.
- 1 In their Reg 18 comments on Aylesham KCC raised concerns over '*the impact of the development on the highway network, particularly as Aylesham has no secondary education provision so the need for travel by private vehicle for secondary school age children may be higher than in other areas of the district*'. No modelling of the associated traffic impacts has been provided.
Note - During the development of the 2015 DTM and 2018 DDTM car trips which are made to schools were modelled by WSP. Despite the absence of a Secondary School no similar exercise has been conducted on
- 2 By highlighting the need to expand St Joseph's primary, KCC's Reg 19 comment identify the shortfall of primary places in Aylesham. Unlike in the DDTM area WSP has not modelled car trips which are made to schools for Aylesham or Elvington. There are 378 primary places in Aylesham for a current population of 6,000 with a further 630 houses proposed in this LDP. This is below the national average. As a result the pupils attend schools across the area. For example at Goodnestone & Nonington CE Primary School 43% of pupils come from Aylesham and 30% Elvington creating up to 4 car trips of 1-3 miles each per day.
- 3 KCC Highways informs us that education commuting will be dealt in a Transport Assessment. We have been unable to locate any education commuting evidence in the Transport Assessment evidence for (App no 07/01081) for either Phase 1 or 2 in Aylesham or a School Travel Plan as recommended in Managing Our Roads (DfT, 2003) and The Future of Transport – a Network for 2030 (DfT) White Paper, 2004.
- 1 In Reg 18 comments, KCC raised concerns regarding the additional flow anticipated on Shepherdswell Road due to the narrow, rural nature of the road. Holt Street / Easole St / Sandwich Rd are similar in terms of their physical constraints and traffic levels. Both are 'rat runs' between the A2 A256 and significant coastal settlements. In relation to application 19/00381, Richard Smith (Senior Development Planner - KCC Highways) accepted a reduced vision splay from 45m to 25 metres on Easole Street based on an independent highways report describing Easole Street as being a narrow road, '*in a rural location with a tight bend to the west and a junction to the east. The road has no footways, with high hedges bordering each side of the road, creating an extremely constrained environment. There is evidence of vehicles crossing the centre line; the markings are very worn and hardly visible*'.
 - Passenger entries and exits increased by 19.6%. 2016-17 to 2019-20.
 - Aylesham Population increased by 30% over the same period.
- 1 ORR Passenger entries and exits for Aylesham data shows passenger numbers per head of population dropping Jan 2016- Dec 2020.
NOTE _ 20-21 data discounted because of Covid. 2016 Population=4,980. By March 2018, 493 new dwellings had been completed. Estimated mean new dwelling occupied by 2019- 2020 = 500. Estimated population increase = 1,500.
- 1 WSP's Reg 19 Traffic Report is based on the 2018 DDTM study which undertook a detailed analysis of the rural road network the other (western) side of the A256 using disaggregated SERTM data, Node Impedance Calculation (ICA), mapped out on a VISUM Network map. This established benchmark capacity PCU per Lane data for a range of defined link types including 'Rural Roads' and 'Minor Road Rural Village (30mph)'.
1 In their Sustainability Appraisal of Growth Options in the Dover District Council Local Plan Topic Paper: Overarching Strategy (Part 1) point 1.5. DDC undertook to '*assess growth options in terms its likely effects on environmental...using available evidence including commuting patterns, transport infrastructure, traffic congestion (and related air quality and carbon emissions issues)*'. Although some data was considered, the detailed data was not considered when evaluating the impact of the Aylesham or Elvington sites.
1 In the SA LUC use ONS - Nomos data, labor market statistics and DataShine ESRC BODMAS (using 2011 ONS Census data) to establish commuter patterns. Based on this the Reg 19 SA Appendix B confirms the District's residents '*rely heavily on cars to...access employment, education, amenities and services*' and predicts an increase of commuting from Aylesham to Sandwich (the district's 2nd commuting hub) as well as Thanet and Deal.
1 DDC's LDP Sustainability Appraisal identifies Sandwich as the District's key centre for inbound commuting. The Reg 19 provision of employment sites in Aylesham have been reduced by 85% from 1013 jobs in Reg 18 to 263 jobs in Reg 19. (source WSP main Report (i) Reg 18 and (ii) Reg 19. Reduced onsite employment will increase site generated commuting traffic.
(NOTE The Reg 19 Sustainability Assessment has not been revised to reflect the 85% reduction of onsite jobs, calling its conclusion about Aylesham site sustainability into question).

- 1 The Local Plan (Reg 18 and Reg 19) Sustainability Appraisal for the proposed sites in Aylesham and Elvington is – for traffic purposes - limited to recording the proximity of proposed dwellings to a bus stop and / or train station. The ONS - Nomos data, labor market statistics and DataShine ESRC BODMAS conclusions in the Sustainability Assessment, analysis of car dependency and commuting patterns or journey to work data was considered on the site assessments. This appears to limit real world applicability.
 - 1 None of the evidence base on car dependency in Greenfield ex-urban developments nor car-dependency and the commuting pattern evidence appears to have been considered.
 - 2 SA Section 6.207 states that Eythorne and Elvington already have ‘relatively good access to existing local rail and bus services’. However Eythorne railway station closed to passenger traffic in 1948. In response to our Reg 18 RFI DDC stated that the SA did not claim Elvington ‘already have relatively good access to existing local rail and bus services’. However, this is a direct quote from the SA - 6.207. This claim is factually false but is a base assumption used to justify Aylesham and Elvington’s compliance with SA 4: To reduce the need to travel and encourage sustainable and active alternatives to road vehicles.
-
- 1 MHCGL guidance on traffic evidence for LDP states ‘Critical locations on the road network with poor accident records should be identified in order to determine if the proposed land allocations will exacerbate existing problems and whether highway mitigation works or traffic management measures will be required to alleviate such problems. The accident records should be compared with accident rates on similar local roads’. There have been 4 deaths on Holt / Easole Street within 1.5 miles of the Aylesham Road junction. How many deaths are required in order for Holt Street to qualify as having a poor accident record?

Base Data Availability

One problem we encountered is availability of the granular base data that forms the building blocks for the LDP traffic and commuting evidence. We can’t find base data. For example

- The Dover Transport Model (DTM) Local Model Validation Report November 2016 is not available. So we have to rely on DDTM for the base modelling data for additional trips zonal distribution.
- In the SA LUC use ONS - Nomis data, labour market statistics and DataShine ESRC BODMAS (using 2011 ONS Census data) to establish commuter patterns. However, this data set is not available for review.

The SA conclusions suggest a data granularity (e.g. the availability of Aylesham to Deal commuting numbers), that is absent from the methodology employed in LUC’s site-specific sustainability assessments. This would matter less were LUC’s Reg 19 report not used inflated employment assumptions for Aylesham creating unsound sustainability conclusions.

Employment Evidence Driving Commuting

- 1 The Reg 19 SA 51 (Reg 19 Strategic employment allocation policies) and Table 7.6 include former Snowdown Colliery as a strategic site. This incorrect. Aylesham site employment has been reduced from 1,013 onsite jobs in Reg 18 to 267. The sustainability conclusions have not been reassessed. This clearly undermines the deliverability NPPF para 72 b.
- 1 DDC provided site employment estimates to both LUC and WSP for SA and Traffic modelling purposes. Aylesham’s employment modelling conclusions in the 2022 SA are contradictory and misleading. They don’t align with the WSP’s modelling numbers, which **reduced by 84%** from **1,013** onsite jobs in Reg 18 to **267** on site jobs in Reg 19.
- 2 In the Reg 19 SA main report (3: 4.75, SA 3 - 7.160 and table Table 7.6) still cite Aylesham as a 2nd largest employment hub with Land off Holt Street identified as ++ positive effect against. Also true for Reg 19 Appendix B growth and spatial options findings by SA objective, which offer conclusions based on inflated on site employment numbers numbers In Appendix F Snowdown employment drops to a ‘Minor positive (+)’. This looks like a revised assessment that hasn’t then been added into the main report.
 - 1 Why is the discrepancy in Aylesham employment number in the SA?
 - 2 Has the South Aylesham site’s sustainability been reassessed by LUC to reflect the reduction in onsite employment?
 - 3 Why is WSP using a different employment assumption to LUC?
- 1 Trip generation for employment sites (approach agreed with NH and KCC) the potential jobs were calculated using the SQM area of the site and dependant on the land use type an employment number was provided have not been used in the SA. As onsite employment is a key indices of sustainability:

	<p>2 Has the council assessed the financial viability of the development proposal for Snowdown Colliery? The land owner informs us their existing tenant has a substantial remediation liability and is unaware of any ongoing discussions about reassigning this not have they aware of any detailed financial backing that would fund the redevelopment of this site. Obviously a site needs to be deliverable. Has it passed deliverability benchmarking test to justify the site's continued inclusion in the LDP?</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>1 For the area bounded by A2, B2046, A256 and A257 which has significantly less robust traffic evidence, the LDP should provide effective mitigation enshrined in a Local Plan policy for the non-primary and secondary routes that - in accordance with Reg 19 TI2 10.7 - 'should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements' rather than deferring this to an ineffectual S106 negotiation at the planning application stage.</p> <p>2 Use robust traffic evidence that is reliable, proportionate, objectively collected and recent, based on an understanding of the road network and identified contextual commuter and journey to work data of the A2, B2046, A256 and A257 plan area without relying on unjustified assumptions or unsupported assertions.</p> <p>3 Adopt detailed traffic benchmarks and thresholds for road types and junctions based on robust baseline data to provide the empirical basis against which to assess or define 'inappropriate', 'unsuitable', 'severe' or 'unacceptable' traffic impacts. With political pressures to deliver on housing targets and the budgetary incentives in the New Homes Bonus, checks and balances are required to prevent the current site by site approach and DDC's discretionary power over when Transport Assessments and Travel Plans are required, undermining the nominal protection of non-primary or secondary routes from the cumulative or inappropriate traffic impacts from proposed developments. Real world experience in Dover District - and nationally - does not show effective outcomes from a policy commitment (like Reg 19 Housing Policy 4.21) that requires the cumulative impact all sites allocated in this Plan on common road links must be considered. Our experience on Aylesham (DOV/07/01081 and DOV/13/0120), is typical in concluding that no impact could be attributed to the development because the identified increases were in line with ONS data showing road traffic increased by 29% from 1990 to 2018 while greenfield site developments (like that Aylesham, with unrealistic assumptions of self-containment were – in turn – identified as a key driver national car use increases.</p> <p>4 Recognising the scale of Canterbury's plans, initiate active ongoing constructive engagement with Canterbury City Council to maximise the effectiveness of local plan in the context of strategic cross boundary traffic planning to generate a coherent evidence-based strategy that will ensure a deliverable plan that is actually sustainable rather than ignoring the evidence of car dependency.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>Having raised concerns about the robustness, consistency and impartiality of the evidence base at Reg 18, our concerns have been ignored. In Feb 2021 DDC confirmed that more detailed traffic evidence would be collected prior to a Reg 19 submission. This hasn't happened. KCC now suggest an iterative data collection process that - we believe - doesn't comply MHCGL guidance on traffic evidence for LDP. Whilst the accusations of nimbyism may be levelled, we are not seeking to block all development. Just to ensure that the decisions are made on good data, with effective checks and balances that deliver good planning outcomes. Based on the outcome from our Reg 18 comments, we now believe vested interests mean that - it is only by engaging with the Planning Inspectorate directly that our voice - and the voices of the other villages in this largely rural area - will be given a fair hearing. The complexity of the LDP, the sheer volume of information and the byzantine balkanisation of the online comment portal are collectively a disincentive to public engagement. Disenfranchised and with trust in the system eroding, it is unsurprising that the idea of community consent is met with such scepticism.</p> <p>The C195 is badly impacted by the cumulative impact of traffic from Sandwich, Deal, Eastry, Woodnesborough, Sholden (via Drainless Road, Heronden Rd and Thornton Road), Elvington and Aylesham, with pre-pandemic baseline traffic of 90,800 vehicles a month. (MLM / K & M SURVEYS 2018 - 7 day total (East and West) = 20,888 traffic movements)</p> <p>KCC Highways confirm Holt Street, Easole Street and Sandwich Road route (Linking B2046 and Sandwich) is classified as the C195 and is "not a secondary route, as defined in our road hierarchy, and 'for reasons of various highway constraints along the corridor". It should, therefore, be protected from the cumulative or inappropriate traffic impacts. However, having failed to collect or consider any traffic impact evidence for this route, the Reg 19 proposes to rely on s106 funding on an application by application basis. Based on our experience on Aylesham (DOV/07/01081 and DOV/13/0120), Nonington Parish Council believe that the site-specific impact focus of S106 means it is not an effective framework for mitigating cumulative impacts from multiple spatially distributed developments on a rural road network. It is impossible to disaggregate traffic flow to attribute the increase to specific site.</p> <p>For the area bounded by A2, B2046, A256 and A257 which has significantly less robust traffic evidence, we believe the LDP should provide effective mitigation enshrined in a Local Plan policy for the non-primary and secondary routes that uses clear benchmarks and thresholds that</p>

	applications can be measured against so that - in accordance with Reg 19 TI2 10.7 - 'should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements' rather than deferring this to an ineffectual S106 negotiation at the planning application stage.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The impact of developments in neighbouring settlements (and districts) directly on the parish of Wingham, namely traffic and transport. Wingham is a pinch point for traffic coming from the A2, A256 and A257 and suffers congestion daily at peak times. The Parish is and will continue to be directly affected by developments in neighbouring settlements in both the Dover and Canterbury districts, especially in Aylesham, Preston, Ash, Adisham and Littlebourne. The Council's primary concern relates to the provision of adequate traffic assessments and travel plans when considering new developments which do not currently recognise traffic impacts in Wingham and this needs to be addressed in the Local Plan to ensure decisions are based on accurate data. The Council is concerned that residential developments will be approved where highways issues have not been fully considered and the resulting impact on Wingham village. This situation has already arisen in the months and years preceding the Draft District Local Plan. One of the areas currently undergoing significant residential development is Aylesham. Given the piecemeal manner in which Aylesham has been developed, our view is that the cumulative impact of traffic on Wingham has never been fully, or adequately, assessed. Of particular concern is the junction of the B2046 (Adisham Road) and the A257 in Wingham, otherwise known as Red Lion Corner. This junction has for some time been unable to cope with traffic volume or LGV movements. Incidents relating to LGVs in this area are numerous and well documented and include the striking of listed buildings and inadequate width to prevent vehicles mounting the pavements when passing. In August 2020 the approach to Red Lion Corner and LGV incidents made national news. Councillors do not consider that the severity of impact of development of areas outside Wingham has been adequately considered to date and, as a result of DDC's continued proposal to decide what constitutes "severe impact" on a case-by-case basis, considers that the Draft District Local Plan does not adequately define when travel plans and traffic assessments should be undertaken. This will have severe safety implications in Wingham village if not addressed. In summary, Wingham Parish Council is generally supportive of the allocated sites for the parish, though not the number of dwellings

	allocated to SAP41 , and request that development includes suitable affordable housing to meet the local need. Councillors also seek assurance that adequate provision is made to prevent severe traffic impact in Wingham and that policies in relation to traffic assessments and travel plans will be clarified.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	TI2
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>We note that TI2 formed DM Policy 29 of the Regulation 18 consultation. We note that, following advice from KCC, the policy now includes further detail on the requirements for assessment to support planning applications. For example, it includes notes on what a robust Travel Plan should consist of and signposts readers to further guidance in the Kent Design Guide, and where a Transport Statement would be acceptable rather than a Transport Assessment. We welcome this clarification.</p> <p>Representation: National Highways are content with Policy TI2, subject to the further representations below</p> <p>With regards to Transport Assessments, we would suggest that wording is included in the Policy supporting text to note that, where a proposed development may impact the SRN, a Transport Assessment should be submitted and carried out in accordance with DfT Circular 02/2013. We would also suggest text is included to recommend that applicants engage with us at the earliest opportunity to agree the scope of Transport Assessment.</p> <p>Representation: Wording should be included in the policy supporting text to note that, where a proposed development may impact the SRN, a Transport Assessment should be submitted and carried out in accordance with DfT Circular 02/2013. The text should also recommend that applicants engage with us at the earliest opportunity to agree the scope of Transport Assessment</p> <p>With regards to Travel Plans, we support the continued use of Travel Plans as a way of promoting sustainable travel and we would expect the promoters of any development to put forward initiatives that reduce the traffic impact of their proposals by supporting the promotion of sustainable transport and the development of accessible sites. This is particularly necessary where the potential impact is on sections of the SRN that could experience capacity problems in the foreseeable future. We would recommend that wording is included in the Policy supporting text to note that the Travel Plan must include:</p> <ul style="list-style-type: none"> • Firm financial commitments with regards to funding for the measures proposed • Targets for vehicle trip generation, which should be the same as the vehicle trips assessed in the TA • Monitoring strategy to confirm that vehicle trip targets are being met • A plan should be provided detailing the proposals in the event that targets are not being met <p>Representation: Policy supporting text to include specific information which we would require to be included in Travel Plans as above.</p> <p><i>(Note - This is an extract of the Full National Highways representation which can be located at SDLP1152)</i></p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	See below
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p><i>This DM would become more sound if the following wording replaces the final sentence in DM Policy 29, in order to clarify levels of significance or severity of increased traffic: "A Travel Plan or Transport Assessment will be required for all residential developments of more than 15 units, the requirements of which will be secured by planning conditions, Section 106 agreement or through the Community Infrastructure Levy as is appropriate."</i></p> <p>Road improvements (especially on the A2, A20 and A256) to separate local traffic from through freight traffic must be done to save lives, road improvements that central govt must pay for, especially as regards SAP 1 Whitfield Urban Expansion, SAP 24 & SAP 25 Aylesham and SAP 28 Elvington and Eythorne. The separation needed must include flyovers and underpasses for local traffic at the Whitfield Roundabout (fatality Oct 2021) and the Duke of York roundabout.</p> <p>Improvements to the highway network must also include underpasses for (electric) bikes and real dutch-style, protected cycle-paths so that cycling commuters from Whitfield can get safely to Kearsney rail station and Martin Mill Stns. There should be a safe, engineered, dedicated cyclepath from Aylesham to Elvington, and another from Elvington to Shepherds Well rail station. Safe kerbed pavements must be provided running from bus stops on A roads to any new development of 8 homes or more in rural village settlements to prevent old and young being trapped by car dependence up unsafe B-roads, which costs KCC money for taxis from schools, (see Kent active travel strategy). <i>Applicants must demonstrate that their plan includes the installation and cost of installation of the protected cycle-paths and kerbed pavements described above.</i> Dept for Transport consultation Feb 2021 on trends in innovation in rural transport is relevant.</p> <p>(cross referenced with NE 4 Air Quality) Air pollution is exacerbated in 2022 because KCC have stopped subsidising buses and some rural bus routes have disappeared or been reduced (e.g. Elvington). Level 1 councils and Kent Ass of Local Council are looking to have a stronger voice on Joint Transportation boards so that they are able to help residents with public transport and thus respect Kent and Medway Energy and Low Emissions Strategies. It would be sound if no new builds were allowed in villages without bus links to schools and workplaces, unless conditional on funding of bus services.</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC Note (1) The text below is an extract from the original representation which is attached to SDLP1438. We have commented above on specific SAPs where the Highways Assessment is inadequate and the reality on the ground is different. This being the case, the Plan would not be sound or compliant with the Localism Act 2011 if local parish-wide public consultation on travel impact of all developments over 15 dwellings were not required. TI 2 Transport statements, Assessments and Travel Plans

Road improvements (especially on the A2, A20 and A256) to separate local traffic from through freight traffic must be done to save lives, road improvements that central govt must pay for, especially as regards SAP 1 Whitfield Urban Expansion, SAP 24 & SAP 25 Aylesham and SAP 28 Elvington and Eythorne. The separation needed must include flyovers and underpasses for local traffic at the Whitfield Roundabout (fatality Oct 2021) and the Duke of York roundabout.

Improvements to the highway network must also include underpasses for (electric) bikes and real Dutch-style, protected cycle-paths so that cycling commuters from Whitfield can get safely to Kearsney rail station and Martin Mill Stns.

There should be a safe, engineered, dedicated cycle path from Aylesham to Elvington, and another from Elvington to Shepherds Well rail station. Safe kerbed pavements must be provided running from bus stops on A roads to any new development of 8 homes or more in rural village settlements to prevent old and young being trapped by car dependence up unsafe B-roads, which costs KCC money for taxis from schools, (see Kent active travel strategy). Applicants must demonstrate that their plan includes the installation and cost of installation of the protected cycle-paths and kerbed pavements described above. Dept for Transport consultation Feb 2021 on trends in innovation in rural transport is relevant.

(Cross referenced with NE 4 Air Quality) Air pollution is exacerbated in 2022 because KCC have reduced its support in subsidising bus services and some rural bus routes have disappeared or been much reduced (e.g. Elvington). Level 1 councils and Kent Ass of Local Council are looking to have a stronger voice on Joint Transportation boards so that they can assist residents with public transport and thus respect Kent and Medway Energy and Low Emissions Strategies. It would be sound if no new builds were allowed in villages without bus links to schools and workplaces, unless conditional on funding of bus services.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	N/A Edit: DDC copied the following from attachment <i>TI3 - Parking Provision on new Development Policy TI3 represents an opportunity missed. It retains the 2006 KCC parking standard which for rural areas is obsolete. (That is, 1.5 spaces for one and two bedroom dwellings). Car ownership in villages has increased substantially in the past 20 years and is leading to congestion and parking problems in many rural roads. The cause is the poor and reducing provision of rural public transport which is inadequate for commuting to work. For example, a young couple move into a 1 bedroom dwelling in the village but as they work in different towns and cannot get to and from work by public transport they need 2 cars. Larger families, where the grown up sons or daughters have to live at home, may require 3 or 4 cars to enable travel to work. The parking provision policy urgently needs updating to match demographic development and for rural areas should be 1 space per bedroom. Therefore we object to this policy.</i>

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Aylesham Parish Council agrees that there is a need to increase housing stock both nationally and within the Dover district. Over recent years, Aylesham has greatly assisted in helping to increase the numbers of homes within the local community (having delivered 917 homes so far with a further 443 to come). However, it is felt that any future development should be kept to a minimum.</p> <p>This relates to SP3 – Housing Growth.</p> <p>South Aylesham (SAP24) includes a large number of positives (such as inclusion of play parks, open spaces, cycle links and protecting and enhancing wildlife) but there is a lack of firm commitments to facilities. The development makes reference to “a new small convenience shop” which is wholly insufficient for the proposed number of new homes.</p> <p>Dover District Council is looking at updating its parking policy for future developments. Currently the Kent Design Guide and the Kent Design Guide Review: Interim Guidance Note 3 to apply planning constraints. It is welcome to see this referenced in the Draft Local Plan. It is important that future developments allow for independently accessible parking spaces (as opposed to tandem spaces) and that car ports or garages are not included as parking.</p> <p>This will greatly improve parking, especially in rural developments.</p> <p>More considerate parking will greatly improve access for pedestrians as well as safety for pedestrians and cyclists.</p>

	<p>Aylesham Parish Council believes that a new small convenience shop in any new development would be wholly insufficient. Dover District Council should also look to adopt more stringent parking policy reform.</p> <p>It has been noted on previous planning applications that the sewerage pipes in the village may be at their capacity, so any further developments could push them past their breaking point.</p> <p>This should be addressed before any further development can be considered.</p> <p>Current plans for housing development do not go far enough in providing homes that are suitable for disabled people or homes that can be easily adapted in the future to meet the needs of home owners. An increase in the number of dwellings built to an accessible standard would be welcomed</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 2 - Do you consider this part of the Plan sound?	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Can't comment on legal compliance
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The draft sticks to the present (KCC) policy for new builds of supporting no parking provision in favour of "easy walking distance of a range of services and facilities". Whilst to allow developments with no parking provision may be environmentally attractive, it is simply not realistic in terms of people's behaviour and lifestyle.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Dover Harbour Board supports Policy T13 – Parking Provision on new Development and its recognition that parking requirements should take account of local circumstances and that parking standards will be applied flexibly.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	N/A
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	N/A

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	See below
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Addition needed; to comply with the Kent and Medway Energy and Low Emissions Strategy, <i>applicants should limit off-street parking to space for a maximum of 2 cars per dwelling, and in some congested coastal town sites, 1 car per dwelling.</i>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>These representations to the Regulation 19 stage local plan consultation are made by Dover Harbour Board. The Harbour Board is responsible for the administration, maintenance and improvement of the harbour at the Port of Dover, which itself is the busiest international roll-on roll-off ferry port in the UK.</p> <p>The Port of Dover is one of the UK's most important strategic economic assets. The Port of Dover is the UK's busiest international ferry port, handling more lorries than all other UK ports. Its operation is capable of facilitating 120 ferry movements and 110 miles of freight per day. £144bn worth of UK trade and 33% of all trade with the EU is handled by the Port of Dover.</p> <p>Further, Dover is the UK's second busiest cruise port. Over 200,000 cruise passengers visit the Port of Dover, a number The Harbour Board is actively looking to grow. Embarkations on day trips and excursions directly boost the local and regional economy, with an average passenger spend equivalent to £322 pre-embarkation, and £84 during a port visit. The benefits to the local Dover economy are significant; it is estimated that this generates circa £47m of direct passenger spending annually in the local economy. The Port of Dover indirectly supports over 5,000 jobs, many of them in the local area, many of which would be affected by any reduction in cruise calls.</p> <p>The Port of Dover therefore is a significant stakeholder in Dover District with a large influence on the local economy, both directly in terms of visitors, passenger throughput and employment, and indirectly by its impact on the highway network. The Harbour Board considers that the emerging Dover Local Plan needs to appropriately consider and account for the aspirations of The Harbour Board to improve operations more widely and plan for a low carbon future.</p>

Port Operations

Port activity and operations can have a wide impact on the District and County. This is particularly the case in terms of highways given the volume of freight and passenger traffic experienced each year. This results in logistical challenges to ensure effective port operations which safeguard the economic benefits delivered by the Port, whilst also ensuring any adverse impacts on the locality are limited.

In recent years the Port of Dover has experienced more periods of travel disruption (outside of The Harbour Board's control) than has previously been the case, resulting in national and international media coverage. This has had an adverse impact on the Port itself and Dover District. The Harbour Board is therefore committed to reducing wider impacts on both the highway network and the amenity of local residents from future disruptions to channel crossings.

Draft Policy TI4 – Overnight Lorry Parking Facilities

Paragraph 109 of the National Planning Policy Framework (NPPF) notes that “*Planning policies and decisions should recognise the importance of providing adequate overnight lorry parking facilities, taking into account any local shortages, to reduce the risk of parking in locations that lack proper facilities or could cause a nuisance.*”

A lack of overnight parking in Dover District has been identified by Kent County Council and Draft Policy TI4 seeks to address this issue through a criteria-based policy for a lorry park and associated facilities. The Harbour Board supports the principle of such provision to remove HGVs from the highway, but the provision of a truck stop alone deals with only part of the identified problem, especially at times of channel crossing disruption.

Dover District Council are aware of the Harbour Board's intention to deliver an Inland Terminal. This is considered a vital piece of Port infrastructure which will need to come online during the plan period (see below for further detail). Lorry parking facilities and the Inland Terminal are compatible and complementary land uses (as evidenced by the facilities provided at Sevington in Ashford) and The Harbour Board considers that there are significant benefits of co-joining these facilities.

Inland Terminal

Dover Harbour Board needs to deliver an Inland Terminal Facility. This is required to ease pressure on the Port of Dover by supplementing existing facilities or, in some cases, relocating them entirely to the inland site. There are a number of reasons why the Port needs this facility.

EU Entry/Exit System (EES)

The Council will be very aware of the Dover Traffic Assessment Project (TAP) and the associated Brexit Operations Across Kent, otherwise known as Operation Brock. These are measures put in place to deal with HGV traffic when Port operations have been disrupted, for example as a result of delays to channel crossings. The aim is to regulate the flow of HGVs into Dover along the A20 and M20 to ease congestion and allow residents and other users of the strategic road network to access Dover and go about their business.

The measures include left hand lane only use of the A20 by HGVs, queuing on the A20, contraflows on the M20, separation of traffic between Euro Tunnel and the Port, and the use of Manston Airport as a temporary lorry park.

TAP and Operation Brock are emergency measures to keep non-freight traffic moving and allow HGVs and their drivers to be safely located whilst the problems causing issues at the Port are dealt with, and until such time as crossings and travel return to normal. However, events in the past 12 months have demonstrated that significant disruption can still occur, particularly at times of prolonged delays. This results in an economic cost in terms of time lost by both freight business and other road users, and also a social cost given the number of lorry drivers held for long periods on motorway and trunk road verges with no welfare facilities.

The Harbour Board have been looking at more permanent solutions. However, the pending introduction of the EU Entry/Exit System (EES) is a further driver to pursue this goal. EES is a large-scale IT system that is being implemented as part of the European Union's 'Smart Borders Package', and is due to launch in May 2023. It will enable automatic monitoring of border crossings by 'third-country nationals' into and out of the EU. This includes UK nationals in addition to all members of non-EU states outside the Schengen Area.

The system will register a person's name, type of travel document, biometric data (fingerprints and captured facial images) and the date and place of entry and exit, and will fully replace the system of manually stamping passports. The Port of Dover has undertaken an assessment of the impacts of EES and has concluded it is very likely to have a profound effect on its operations if undertaken within the bounds of the Port itself. In a worst case scenario this would include excessive queues outside the Port for up to 365 days per year, necessitating the permanent operation of TAP and Operation Brock.

The provision of an appropriately located Inland Terminal facility would help to alleviate pressure on the Port and A20 given it would allow certain checks to be undertaken prior to entry to the main Port facility, speeding up operations whilst also removing large numbers of HGVs off the road and allowing drivers to rest and use welfare facilities.

Facilities/Welfare

An Inland Terminal facility would allow provision of significant improvements to HGV driver facilities in the District. This would enable the Port of Dover to contribute toward the wider government objective of improving conditions for HGV drivers and logistics workers more generally.

The Government's Road Freight Supply Chain Transport Committee¹ noted the difficulties the sector has had with recruitment and retention of staff, both of which contributed to the wider supply chain shocks experienced since the start of the pandemic. The committee heard evidence that one of the key reasons drivers do not stay in the sector is the lack of high-quality rest facilities, especially on key road freight routes.

Therefore improving the working conditions of HGV drivers is an important element of both retaining staff and encouraging others to choose transport logistics as a career.

This issue is also raised in the Department for Transport's publication "Future of Freight: a long-term plan" (June 2022)² which includes 'People and Skills' as one of its priority areas. One strategic goal is to ensure "*the freight and logistics sector will be seen as an industry of choice for a diverse group of talented and skilled people at all stages of their career and will have the people and skills that it needs to thrive*". Improving general working conditions through the provision of better facilities for drivers will be an important part of the wider strategy to improve the UK's freight and logistics sector.

Sustainability

The Inland Terminal would also be an important element of The Harbour Board plans to decarbonise Port of Dover activity and respond to wider changes in logistics such as the predicted increase in electric vehicles. This is explored more generally later in this representation, but the Inland Terminal would provide opportunities for on-site microgeneration of power and opportunities for electric vehicles to recharge where necessary before proceeding to the port.

Co-location of Inland Terminal and Overnight Lorry Park

An overnight lorry park and the Inland Terminal facility share a common set of site search criteria. They both require a large, level site which can be appropriately accessed from the Strategic Highway Network without causing disruption for other road users. They should also be located in close proximity to the Port, provide opportunities for landscaping to limit visual impact, be able to deliver biodiversity net gains and be located an appropriate distance from sensitive receptors such as residential properties.

There is a need to deliver the Inland Terminal and overnight Lorry Parking in Dover, but the very specific site criteria noted above reduces the amount of suitable sites in the District. The Local Plan should therefore seek to co-locate these facilities in order to increase the chances of delivery of both pieces of important infrastructure.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Recommended Policy

The Harbour Board proposes amendments to Policy T14 so that it includes an area of search for the co-joined Inland Terminal and Lorry Park.

The most appropriate location for an Inland Terminal would be to the east of the Roundhill Tunnels. This would ensure the facility is located wholly within Dover District and reduces the potential for conflict with Eurotunnel traffic and operations. It would also allow The Harbour Board to manage Port traffic more efficiently (through use of traffic cameras etc).

Land within the Kent Downs Area of Outstanding Natural Beauty (AONB) should not be excluded from the Area of Search. The NPPF provides a high degree of protection against inappropriate development in AONBs. Paragraph 177 notes applications for major development (such as an Inland Terminal/Lorry Park) should only be allowed in "*exceptional circumstances*" and where it can be demonstrated that "*the development is in the public interest*".

The need for the Inland Terminal within the area of search suggested by The Harbour Board is significant and could meet these tests, which set a high bar for development proposals. This should be tested at Planning Application stage rather than excluded by Local Plan Policy.

The Harbour Board is therefore proposing an area of search along the A20 corridor, east of the Roundhill Tunnels.

An amended criteria-based policy should then be applied to potential development sites which come forward. The following amended Policy text is recommended:

T14 – Inland Terminal and Overnight Lorry Parking Facilities

Inland Terminal Facilities to serve the Port of Dover to include overnight lorry parking facilities will be supported, subject to other policies in the Local Plan, within the following areas of search:

- *A20 corridor east of the Roundhill Tunnels*
- *A2/M2 Corridor*

Development will be subject to the following criteria:

- 1 *The site must be accessed from the Strategic Road Network (A20);*
- 2 *Applications must be supported by a Landscape and Visual Impact Assessment which informs the site layout, capacity and mitigation requirements;*
- 3 *A comprehensive landscape scheme should be provided to conserve and enhance the AONB and/or its setting;*
- 4 *Proposals for the mitigation of noise and air quality impacts from lorry movements and any associated commercial, welfare and support services will need to be provided as part of any application;*
- 5 *A lighting strategy must be submitted with any application and suitable mitigation will be required to deal with artificial lighting, to restrict the impact of the development on neighbouring residential properties or vulnerable uses;*
- 6 *Adequate space for access, sight lines, turning and manoeuvring must be provided in addition to the required parking spaces*

The inclusion of a Policy which seeks to deliver inland terminal facilities will ensure Dover District Council retains control over the provision and location of these facilities.

Summary

The NPPF sets out that the purpose of the planning system is to contribute to the achievement of sustainable development. Achieving sustainable development includes an economic objective – to help build a strong responsive competitive economy. Local planning policies and decisions are expected to help create the conditions in which businesses can invest, expand and adapt.

The NPPF makes clear that planning policies and decisions should recognise and address the specific locational requirements of different sectors and that planning policies should also provide for large scale transport facilities, located in areas of need, taking into account any local shortages.

The 'Future of Freight' document notes that *"In 2021, the Department for Transport made a Written Ministerial Statement with the Department for Levelling Up, Housing and Communities, which made clear that in preparing local plans and deciding planning applications, the specific locational requirements of different industrial sectors should be recognised and addressed by local planning authorities."*

The Inland Terminal will be needed by Dover Harbour Board during the life of the plan. It is a key piece of infrastructure required to support The Port of Dover and its continued substantial contribution to the local and national economy. There is a need to provide significantly improved driver welfare facilities as part of the wider government strategy to create attractive working conditions within the transport and logistics sector. Further, there is an identified local need for a facility to take HGVs off local roads.

Delivery of a site that can provide a co-located facility would represent a positively prepared, justified and effective strategy consistent with national policy. The plan would be unsound without these proposed amendments to the policy.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

The Port of Dover is a significant stakeholder within Dover District. Matters relating to its effective operation have a direct impact on the wider district with implications to the national economy. Therefore it would benefit the Inspector to have Dover Harbour Board present at the examination in public.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	TIF - Overnight Lorry Parking Facilities
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Dear Sir/Madam,</p> <p>Dover District Council Local Plan Publication Stage (Regulation 19) Consultation</p> <p>Comments in relation to Policy T14</p> <p>Strutt and Parker's planning team has been instructed by HW Snape and son to make representations to the Regulation 19 Dover District Council Local Plan consultation. Our clients are farmers in the District with land holdings located to the west of Dover town.</p> <p>Our clients are aware that the Regulation 19 Stage Consultation is seeking comment on whether the Plan is 'Sound' in planning terms, meaning that it has been positively prepared, is justified, effective and consistent with national policy. We are instructed to respond to the consultation in relation to Draft Policy T14 in relation to two matters; firstly the soundness of the policy as written; and secondly as to how our clients could facilitate its delivery during the plan period.</p> <p>Draft Policy T14 – Overnight Lorry Parking Facilities</p> <p><u>Soundness</u></p> <p>Our clients have noted Draft Policy T14 – Overnight Lorry Parking Facilities with interest given their own experiences with HGV movements associated with the Port of Dover. There is no doubt that poorly parked HGVs causes problems in and around Dover. This issues worsens considerably when ferry crossings are delayed or cancelled (as has happened numerous times in the past 12 months). Problems with HGVs generally exacerbates when Operation Stack is implemented with HGVs backed up out of the town along all major routes into Dover.</p> <p>The supporting text for the Policy notes at Paragraph 10.31 that "<i>KCC surveys of overnight lorry parking have determined that the Dover area and A2/M2 corridor has significant numbers of HGVs parked inappropriately overnight, and that there are local shortages in parking provision to address this.</i>" Our clients are concerned that the A20 has not been specifically referenced in this work.</p> <p>Our clients land interests are to the west of Dover predominantly adjacent to and accessed by the A20 which also suffers from the same problems identified by Kent County Council surveys of the A2/M2 corridor. An appropriate site to deliver facilities which could offer HGVs a place to park overnight, or indeed to provide additional welfare for drivers as they approach Dover, should also be considered along the A20 corridor.</p> <p>Our clients consider that Policy T14 (a) should therefore be amended as follows in order to make it properly effective:</p> <p><i>"The site must be accessed from the Strategic Road Network (A2/M2 corridor or A20). Sites along the A2/M2 corridor should also be complimentary to the A2 Improvements.</i></p> <p>The A20 passes through the Kent Downs Area of Outstanding Natural Beauty (AONB) and our clients support policies which seek to protect its special character and landscape value. However, the problems associated with HGV movements along the A20 corridor are acute and have wider impacts than just within the boundaries of Dover District. The national and international news stories earlier this year in respect of HGV queues into the port, for example, resulted in significant reputational damage for Dover.</p> <p>Protection is offered to the AONB by way of the National Planning Policy Framework (NPPF) which states at Paragraph 177 that applications for major development should only be allowed in "<i>exceptional circumstances</i>" and where it can be demonstrated that "<i>the development is in the</i></p>

	<p><i>public interest'</i>. It is possible that the development of a facility for HGV parking could meet these tests provided a site could be delivered together with all appropriate measures to address and mitigate potential harm to the landscape.</p> <p>Our clients consider that the NPPF provides significant protection against harmful development in the AONB, and therefore the policy should not specifically exclude such sites from consideration.</p> <p>Our clients consider that Policy T14 (b) should therefore be amended as follows in order for it to align with National Policy related to major developments in the AONB:</p> <p><u><i>Planning applications must be supported by a Landscape and Visual Impact Assessment which in turn should support the proposed layout of the site and its capacity. Development with the AONB will be supported where it complies with the provisions of the NPPF relating to major development in the AONB.</i></u></p> <p>Our clients consider that the above proposed changes to Policy T14 are necessary in order to make it effective, justified and consistent with National Policy.</p> <p><u><i>Delivery</i></u></p> <p>As noted above, our clients have first-hand experience of the problems associated with HGV movements to and from the Port of Dover. They support the delivery of facilities which would help to alleviate these problems, subject to the amendments proposed in this representation.</p> <p>Our clients feel that they could contribute directly to delivering such a facility given their land ownership interests along the A20 corridor. Our client owns land within the area shown in the image attached:</p> <p>The land is located immediately adjacent to the A20 and, significantly, a short distance from the Court Wood Interchange. The location adjacent to the interchange means the Site is uniquely able to provide access to both east and westbound HGVs using the A20 via upgrades of the existing junction rather than the provision of new highways infrastructure. This would therefore significantly reduce the costs of developing a facility in this location.</p> <p>Furthermore, the site itself is relatively flat with screening provided by existing trees on its southern and western boundaries. The site topography provides opportunities for further landscaping which could appropriately screen the facility from longer range views. The site is not in close proximity with receptors who would be sensitive to noise impacts.</p> <p>Our clients are keen to put this site forward into the local plan process to help facilitate delivery of this important piece of infrastructure.</p> <p>Our client would be keen to take part in the oral examination of the plan if it would help the Inspector consider the deliverability of the facility.</p> <p>Yours sincerely, Paul Carnell BA (Hons) MA MRTPI Associate Director</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Our clients consider that Policy T14 (a) should therefore be amended as follows in order to make it properly effective:</p> <p><i>"The site must be accessed from the Strategic Road Network (A2/M2 corridor or A20). Sites along the A2/M2 corridor should also be complimentary to the A2 Improvements.</i></p> <p>Our clients consider that Policy T14 (b) should therefore be amended as follows in order for it to align with National Policy related to major developments in the AONB:</p> <p><u><i>Planning applications must be supported by a Landscape and Visual Impact Assessment which in turn should support the proposed layout of the site and its capacity. Development with the AONB will be supported where it complies with the provisions of the NPPF relating to major development in the AONB.</i></u></p> <p>Our clients consider that the above proposed changes to Policy T14 are necessary in order to make it effective, justified and consistent with National Policy.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Our client would be keen to take part in the oral examination of the plan if it would help the Inspector consider the deliverability of the facility

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We previously requested that the NPPF 2021 be referenced in relation to this policy. We note that the accompanying policy wording for TI4 now notes that the NPPF requires that planning policies should recognise the importance of providing adequate overnight lorry parking facilities, taking into account any local shortages, to reduce the risk of parking in locations that lack proper facilities or could cause a nuisance. The accompanying wording also now sets out the need for private sector overnight lorry parking sites to complement the strategic transport objectives of the A2 Dover Access project (should this come forward).</p> <p>We also note that the policy wording itself states that lorry parking and associated facilities must be accessed from the SRN (A2/M2 corridor) and be complimentary to the A2 improvements. We support these updates.</p> <p>Representation: National Highways are content with Policy TI4</p> <p><i>(Note - This is an extract of the Full National Highways representation which can be located at SDLP1152)</i></p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DIGITAL TECHNOLOGY – TI15 (DDC Plan – 10.37-10.49) I believe that a key issue which has been omitted is the development of a WIRED District to support the business and housing growth required. At the current time broadband within Alkham Parish is insufficient to meet the demands upon it. Any successful growth economy whether urban or rural requires adequate digital infrastructure. Furthermore, although a form of high-speed internet connects to the terminal at Short Lane in Alkham, the rest of the valley receives a sub-functional broadband through a copper wire as far away as Whitfield. So, any attempt to install high-speed broadband will always be limited by this. We would need a new fibre optic installation with hubs along the length of the whole valley, at Chilton, Wolverton, Ewell Minis, South Alkham. <i>(DDC note - The full representation from Alkham PC is attached to representation SDLP1653. However, specific comments from the full representation document have been extracted into separate consultation points/policy areas, relevant to the comments made)</i>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	DDC Note: Please see detailed representation (attached at 1770) which has been divided against numerous consultation points. The representation has images within the text. The text below is an extract from the detailed representation. 3 SECTION 1.46 of the DDC Plan - Key Issues and Objectives

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>3.1 In section 1.46 a number of key issues have been included for the District namely climate change, the move to carbon neutrality, flood management, sustainable development, the Whitfield Urban Expansion, combating the impact of Covid, economic growth, strategic transport growth, sustainable transport initiatives, appropriate infrastructure development, conservation, net gain biodiversity, achieving a balance between conservation and restoration. Wide ranging objectives have been set for each of these targets.</p> <p>I believe that a key issue which has been omitted is the development of a WIRED District to support the business and housing growth required . At the current time broadband within Alkham Parish is insufficient to meet the demands upon it. Any successful growth economy whether urban or rural requires adequate digital infrastructure.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Please see appended report
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I can speak to any of the points raised in the attached document

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>. This is the Council's BNG aim:</p> <p>The implementation of these new initiatives will ensure that all new development contributes towards the delivery of net gains in biodiversity, so that the natural environment, across the District as a whole, is improved by the end of the Local Plan period</p> <p>. I believe that the Biodiversity Net Gain policy will be ineffective and undeliverable within the time scale of the plan. This view is based upon evidence from planning applications in the Dover District which have incorporated BNG into their plans.</p> <p>Firstly planning application 20/00419 at Betteshanger Grove. This application promised a BNG of 10% but only a 2.23% gain was eventually claimed. This BNG included trying to recreate Open Mosaic Habitat on Previously Developed Land at Betteshanger Country Park. As there is no evidence that this has been achieved before its success is doubtful. This recreated habitat was also meant to provide forage and nesting opportunities for Turtle Doves recorded at the Park. This was to compensate for the loss of Turtle Dove territory at Betteshanger Grove. The ecologists working for the developer claimed that the mitigation sites for Turtle Doves were in relatively undisturbed parts of the Park and therefore gave the Doves the best chance of thriving. However two planning applications for a Hotel (22/01152) and a Surfing Lagoon (22/01158) have now been submitted for Betteshanger Country Park. Both are immediately adjacent to the Turtle Dove mitigation sites and the noise, light and human disturbance, if the plans are passed, look likely to jeopardise the whole Turtle Dove mitigation scheme. This is significant especially as the scheme is the subject of condition 54 of the 20/00419 planning permission. It is also significant as Dover District Council is a supporter of the Kent Biodiversity Strategy and Turtle Doves are a target species of that Strategy.</p> <p>How can BNG possibly be counted as a success if sites set up to achieve it are then put at risk?</p> <p>The two applications for Betteshanger Country Park are claiming a BNG of 11%. This will be achieved at the expense of important biodiversity at the Park. The Surf Lagoon will involve the digging up of 800 nationally rare and protected Lizard Orchids to be translocated elsewhere in the Park. Orchid experts tell us this is unlikely to succeed because of the precise growing conditions that these plants demand. The Kent Plant Recorders for the BSBI believe the Park would qualify for SSSI status because of the colony of Lizard Orchids. Extensive areas of Open Mosaic Habitat will be removed along with its associated rare invertebrates. Red listed Skylarks will be impacted as their nest areas will be removed.</p>

	BNG of 11% will be claimed. If BNG is really going to improve the natural environment of the Dover District surely we cant keep allowing important habitat and species to be destroyed in order to claim a gain?
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Category: Soundness: Effective There may be circumstances where net gain would be beneficial to deliver (partially off-site) – Natural England have supported such an approach. The policy could support the net gain provision off-site, where this takes place within the parish – and in line with the Biodiversity Gain Sites Register. Note the NDP being prepared by the Parish Council may include areas where biodiversity enhancements would be beneficial, so an amendment to end would make the policy more effective at the local level.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I consider NE1 unsound and not effective as it gives developers too many get out clauses.a- Only if it can be demonstrated that ecologically meaningful biodiversity net gain cannot be achieved within the site boundary will the Council consider off-site alternatives this has been weak in the current plan and allowed developers to try and move wholesale, endangered species and habitats with no consideration for the delicate interconnection of ecosystems. This often results in failure. I consider the mitigation hierarchy approach to be flawed. Development should not be allowed that compromises biodiversity.e- suitably qualified professionals these must be chosen by the DDC biodiversity officer and NOT by the developer to ensure that the results are meaningful and sound.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	No development should be permitted that allows harm to biodiversity.Developers should not be allowed to choose a suitably qualified professional to survey for biodiversity - the DDC officer should decide this.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	See attached supporting statement attached Policy NE1: Biodiversity Net Gain Text below (copied from attached statement) added by DDC <i>4.1.1 The requirement to deliver 10% BNG is already covered by other legislation and is pending the secondary legislation to determine how this will take effect. To avoid confusion and potential conflicts, the same approach should be adopted, as with Policy CC1 (Reducing Carbon Emissions), which notes that the standards it outlines only comes into effect if the Future Homes Standard is required to be delivered through the planning system. Policy NE1 should similarly be amended to acknowledge the Environment Act 2021 and that the 10% requirement should only come into effect should it be required by legislation.</i> <i>4.1.2 Criterion 1 a) of the policy advises that "...Only if it can be demonstrated that ecologically meaningful biodiversity net gain cannot be achieved within the site boundary will the Council consider off-site alternatives in line with the mitigation hierarchy approach". Whilst on-site provision is to remain the preference, for small to medium sized sites, this can be particularly challenging, especially where they do not have large areas of associated open space. The requirement to deliver BNG on site can therefore significantly reduce housing nos. on sustainable sites, which could undermine delivery and/or reduce community benefits such the provision of affordable housing. A more flexible approach must therefore be taken to ensure suitable and sustainable sites remain deliverable and to prevent their inefficient development, which could undermine wider housing delivering.</i>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	See attached supporting statement attached Text below (copied from attached statement) added by DDC <i>Criterion 1 a) must therefore be amended as follows: Only if it can be demonstrated that ecologically meaningful biodiversity net gain cannot be achieved within the site boundary or its provision on site is demonstrated to undermine the site's delivery and/or prevent its efficient development, then the will the Council will consider off-site alternatives in line with the mitigation hierarchy approach</i> <i>4.1.3 Criterion 2 must be removed. As currently drafted it suggests that the BNG calculation "must be in addition to any form of compensation". The need to provide compensation is already built into the BNG metric and therefore is already accounted for.</i> <i>4.1.4 The above changes are necessary to ensure the policy is "Consistent with National Policy" and to ensure the Plan is deliverable and therefore "Effective".</i>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	In order to ensure that our case is properly put forward and understood, and to provide the opportunity to respond to any questions/points raised by the Council and Local Plan Inspector which might result outside the written representations made and following discussion at the EIP.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Council should be aiming for 20% biodiversity. The State of Nature in Kent report (July 2022) https://kentnature.org.uk/state-of-nature/ (funded by LWT, KCC and KPOG) sets out how we need to recognise that nature is vital for a happy, healthy society. How it reduces pollution and flooding and supports adaptation to climate change – including locking up carbon. How every effort needs to be taken to ensure no further loss or deterioration of key habitats. How bigger landscape-scale projects need to be delivered to join-up fragmented habitats and secure more land in conservation management - in order to help deliver an ambitious Nature Recovery Network, as enshrined in the new Environment Act.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	See attached supporting statement attached Text below (copied from attached statement) added by DDC Policy NE1: Biodiversity Net Gain <i>4.1.1 The requirement to deliver 10% BNG is already covered by other legislation and is pending the secondary legislation to determine how this will take effect. To avoid confusion and potential conflicts, the same approach should be adopted, as with Policy CC1 (Reducing Carbon Emissions), which notes that the standards it outlines only comes into effect if the Future Homes Standard is required to be delivered through the planning system.</i>

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>See attached supporting statement attached Text below (copied from attached statement) added by DDC Policy NE1: Biodiversity Net Gain <i>Policy NE1 should similarly be amended to acknowledge the Environment Act 2021 and that the 10% requirement should only come into effect should it be required by legislation.</i> 4.1.2 <i>Criterion 2 must be removed. As currently drafted it suggests that the BNG calculation “must be in addition to any form of compensation”. The need to provide compensation is already built into the BNG metric and therefore is already accounted for.</i> 4.1.3 <i>The above changes are necessary to ensure the policy is “Consistent with National Policy” and to ensure the Plan is deliverable and therefore “Effective”.</i></p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>In order to ensure that our case is properly put forward and understood, and to provide the opportunity to respond to any questions/points raised by the Council and Local Plan Inspector which might result outside the written representations made and following discussion at the EIP.</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	<p>NE1 Biodiversity Net Gain</p>
<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>
<p>3 - If you consider the Plan is ‘unsound’, on which grounds do you consider this to be? (select all that apply)</p>	<p>Not Applicable</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>No</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as</p>	<p>DTC considers NE 1 to be unsound (not justified) on the basis that a 10% Biodiversity Net Gain requirement is not the most appropriate target for the area given the particular pressures facing the county’s biodiversity. The Kent Nature Partnership (KNP) suggests a Biodiversity Net Gain requirement of 20% is ‘a proportionate response and one that illustrates the county’s commitment to tackling the ecological crisis that faces</p>

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Kent. Furthermore, the scale of previous biodiversity losses require aspirational levels of gain to make up for them.' The KNP also state that the 10% minimum gain set by the Environment Bill is the lowest level that Defra consider would actually deliver biodiversity gains. https://kentnature.org.uk/wp-content/uploads/2022/07/Justification-for-biodiversity-net-gain-in-Kent-Sept-2020.pdf
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<i>We recommend the following modification: The greater ambition of 20% should be set to provide greater confidence in genuine gains for biodiversity and ensure the successful recovery of nature in our part of Kent.</i>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>NE1 Biodiversity Net Gain</p> <p>Recent planning applications in the Dover District have highlighted problems with the way BNG is being used. Permission granted for planning application 20/00419 will involve the removal of Turtle Dove territory on the development site. Mitigation areas have been allocated at Betteshanger Country Park to maintain and increase the numbers of Turtle Doves there. These areas were in relatively undisturbed parts of the Park when allocated to give the birds the best chance of thriving. This scheme is now threatened by a further two planning applications at the Park for a Hotel and a Surf Lagoon. Both of these would be directly adjacent to the mitigation areas. The noise, light and human disturbance from very large numbers of visitors threatens to jeopardise the whole scheme. This view is shared by the RSPB, CPRE and Kent Wildlife Trust.</p> <p>This mitigation scheme, together with recreation and enhancement of Open Mosaic Habitat was part of the BNG for 20/00419. Achieving it now seems doubtful.</p> <p>With regards to the two planning applications at the Park, 22/01152 for a Hotel and 22/00158 for the Surf Lagoon, an 11% BNG is being claimed, despite the fact that the proposals involve the digging up of 800 Lizard Orchids from the second most important colony in the UK. Lizard Orchids are nationally rare and protected under the Wildlife and Countryside Act. It is also despite the removal of Skylark nesting habitat (Skylarks are Red Listed) and despite the removal of extensive areas of the priority habitat Open Mosaic Habitat and its associated invertebrates.</p> <p>To mitigate the effects of the proposals it is proposed to establish 2 offsite enhancement areas in other parts of the Park. These support, scrub, grassland and OMH. The biodiversity value of these sites has not been adequately established. For example scrub is known to be a very valuable habitat for a range of species such as birds, mammals, bats, invertebrates etc. but its specific value on this site has not been established and large amounts would be removed to create OMH.</p> <p>So if these applications are granted large amounts of priority habitat and habitat known to be of high biodiversity value would be destroyed. An attempt would be made to translocate 800 Lizard Orchids, but Orchid experts tell us that this is fraught with risk because of the very precise growing conditions they require. We may lose a large proportion of the colony.</p> <p>So much damage and destruction in order to claim a Biodiversity Net Gain.</p> <p>How can this possibly help with Nature's recovery and the stemming of species decline?</p> <p>PLEASE NOTE THE REPRESENTATION FORM HAS A FAULT SO THAT THE BOX FOR ALTERNATIVE WORDING CANNOT BE EASILY USED.</p> <p>I would like the following included in Policy N1.</p> <p>"Biodiversity Net Gain measures should not involve the destruction of priority habitat and habitat known to have high biodiversity value. Neither should it involve damage to or destruction of protected habitat or species."</p> <p>" Mitigation areas should be protected from future developments so that the aim of the mitigation scheme is secured."</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>I would like the following included in Policy N1. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	NE1 – Biodiversity Net Gain As stated in our statutory Regulation 18 response we remain fully supportive of the inclusion of a standalone Biodiversity Net Gain (BNG) policy and also welcome your Authority's intention to produce a Dover District Biodiversity Net Gain Strategy as a Supplementary Planning Document (SPD). We hope to see this SPD provide further detail on key aspects of BNG provision including an illustrative map outlining the approach to BNG provision in the District and an overview of locations for habitat creation and enhancement. Some of this detail around targeting BNG is also likely to come as the Kent Local Nature Recovery Strategy (LNRS) progresses. Although we are still awaiting the detailed LNRS Regulations and Guidance we are pleased to see the hooks for this already included in this policy and supporting text. In particular we welcome the following policy commitments: • For development proposals to provide a minimum of 10% biodiversity net gain above the ecological baseline and in accordance with the Biodiversity Net Gain SPD – leaving the door open to the Kent-wide work led by the Kent Nature Partnership to investigate the viability of seeking 20% BNG. • Prioritisation of on-site provision over off-site to help avoid heavily developed areas potentially seeing a reduction in their overall biodiversity. • That development must still adhere to the mitigation hierarchy with net gain measures being delivered in addition to this. • Reference to use of "the applicable and most up-to-date DEFRA metric" – confirmed in the supporting text as currently being Metric 3.0 NE2 – Landscape Character and the Kent Downs AON

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC EDIT: Detailed representation attached to SDLP0447 with figures and maps. Representation reproduced in box 7 below (as originally done by the agent).
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	1. Introduction 1.1. Following the publication of the Dover District Council Local Plan (Regulation 18 Draft) and the Targeted Call for Sites on the 20th of January 2021, the Land Trust submitted representations in relation to the development of their own appropriate strategy for the possible future

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

use and regeneration of **Fort Burgoyne, Fort Burgoyne Road, Guston, Dover, CT15 5LP**. These representations are included as **Appendix A** of this Statement, however, can be summarised as follows:

· The site at Fort Burgoyne extends across an area of approximately 42 hectares and includes a recreation ground, a substantial area of chalk grassland and the main buildings and immediate surrounding grounds (including the Parade Ground). Fort Burgoyne is also a designated Schedule Monument, confirming that the site is of national importance.

· Fort Burgoyne was built in the 1860s to protect Dover Castle and was used to defend the South Coast of England as one of the “Palmerston Forts” built to defend against invasion. The polygonal system on which the building is built was used to defend and watch from the highest strategic point in Dover. After the First World War, Fort Burgoyne was used a military depot/store for Connaught Barracks before it ceased to be used for military purposes in 2006. In 2014 the Land Trust, a national charity, acquired the site from Homes England and since then has been considering a variety of options for the future development of Fort Burgoyne. This includes the submission of two pre-application enquiries relating to the future use of the site to DDC in July 2019 (DDC Ref: PE/19/00127) and July 2020 (DDC Ref: PE/20/00234), which serve to demonstrate that the Land Trust has a clear commitment to bringing Fort Burgoyne back into use for public benefit at the earliest opportunity.

· DDC’s adopted Core Strategy 2010, recognised the importance of Fort Burgoyne within the criterion vii of “Strategic Allocation” policy CP10 (Former Connaught Barracks Complex), which stated that alongside the allocation for around 500 dwellinghouses, *“the condition of Fort Burgoyne is stabilised, if possible new uses are accommodated, a public access strategy is agreed and a management arrangement is incorporated that secures a sustainable future for the Fort”*. The Dover District Local Plan Regulation 18 Draft appeared to “down-grade” of the Former Connaught Barracks site from a “Strategic Allocation” to a “Non-Strategic Housing Allocation”. The Regulation 18 draft no longer made any specific reference to Fort Burgoyne with no strategic policy objective to deliver the future of the Fort, a Scheduled Monument of national historic interest that is included on the Historic England at risk register.

· The representation therefore sought to raise that the Draft Local Plan needed to provide clarification as to how the regeneration of the two separate elements (being the residential development of Connaught Barracks and the regeneration of Fort Burgoyne) will be delivered to allow for proposals for Fort Burgoyne to be brought forward under a set of key objectives, independent of the Connaught Barracks housing development. It was subsequently suggested within the representation that the Fort’s future is secured through other means within the new Local Plan, either through its own strategic policy in other sections of the plan (such as the Employment and the Local Economy section), or through the re-wording of Site GUS002 or through other Development Management policies.

· Finally, given that, in a “Strategic Futures” Report (included as part of **Appendix A**) prepared by WYG and commissioned by the Land Trust, it was identified that there is circa 3,000 square metres of floorspace within existing buildings at Fort Burgoyne that would be potentially suitable for a wide variety of uses. It was also suggested that in order to secure a long-term future use for Fort Burgoyne and secure its regeneration, it would be wholly appropriate for it to be allocated within Strategic Policy 9 for business and employment purposes, in order for more flexibility to be given to the types of uses that might be permissible at the site.

1.2. Dover District Council (DDC) has subsequently published the Regulation 19 Submission of the Dover District Council Local Plan which sets out the vision, strategic objectives and overarching development strategy for future growth in the district over the period to 2040. The Land Trust have therefore instructed Bloomfields Chartered Town Planners to prepare further representations in relation to the Regulation 19 submission and the regeneration and future use of the Scheduled Monument, Fort Burgoyne.

2. Regulation 19 Submission of the Dover District Council Local Plan

2.1. It is welcomed that the aforementioned representations have been taken into account within the Regulation 19 Submission of the Dover District Council Local Plan.

SAP5 - Fort Burgoyne, Dover

2.2. In particular, the Trust is pleased to see the inclusion of Fort Burgoyne for Mixed Employment Use in table 4.1 and a positive site-specific policy to support site regeneration at Fort Burgoyne within Chapter 4: Housing and Employment Site Allocations at Strategic Allocation Policy SAP5 which states the following:

Figure 1: SAP 5- Fort Burgoyne, Dover as of Regulation 19 Submission, DDC Local Plan

2.3. The Land Trust also notes the pre-amble to Policy SAP5 which, at 4.109, recognises that Fort Burgoyne has the potential to accommodate new uses, provided that they are compatible with its status as a scheduled monument. The Trust continues to explore suitable uses for the reuse of the Fort, as evidenced by the grant of planning permission 21/01000 on the 7th July 2022 for the change of use of 4no. casemates to Use Class E with associated ancillary works.

2.4. The Land Trust remains committed to attracting uses for the Fort that will fit in with the long-term sustainable vision for investment in its re-use, as required by the preamble to Policy SAP5. The uses being explored, as evidenced in the previous Regulation 18 representations, are all being considered with the aim of supporting local business growth and ensuring at the same time that any mixture of uses at the site are compatible in respect of access, servicing, general amenity and crucially with the aims of conserving the Scheduled Monument.

2.5. While the inclusion of this policy is largely supported, The Trust has a number of comments in respect of the criteria:

2.6. Criterion h sets out that a Surface Water Management strategy should be produced for the site. The Trust recognises the importance of surface water management; however, it is highlighted that the Fort already benefits from an existing surface water drainage system which was built in the 1860s as part of the construction of the site. This system has always discharged directly to the ditch of the Fort where it soaks into the ground.

2.7. Given the Scheduled Ancient Monument status of the site, establishing an alternative strategy for managing surface water may not be practical and could result in harm. As such it is suggested that this criterion should be removed.

2.8. Notwithstanding this, where relevant, any future planning applications for uses or development at the Fort can demonstrate if required how it would be compatible with the existing surface water drainage system and not require any alternative arrangements for its disposal.

2.9. In respect of criterion j which suggests that *“development within the boundary of Fort Burgoyne which would have a detrimental impact on the heritage significance, setting, views, biodiversity, character of coherence of the components and elements of the complex will not be permitted”*.

2.10. While the Trust acknowledges the need to avoid development which will have a detrimental impact on the range of criteria identified in this policy, any development within Fort Burgoyne would be restricted by the requirement for Scheduled Monument Consent approved by Historic England which is considered to negate the need for this criterion. Draft Local Plan policies in respect of landscape (NE2), ecological (SP13) and historic environment (HE1, SP15) further negate the need for this criterion.

2.11. It is therefore respectfully suggested that criteria h and j are removed from policy SAP 5.

Chapter 2 - Vision and Objectives

2.12. Chapter 2 sets out the overarching vision for Dover District, including that *“through careful stewardship of its world class landscapes, thriving natural environments and wealth of historic sites, Dover District will be a destination of choice for people of all ages to make their home, for businesses to invest in and for visitors to explore and experience.”*

2.13. It is appreciated that the vision highlights the *“Sensitive restoration of elements of its rich built heritage, will enhance the attractiveness of the town, while improved connections to its seafront will have been delivered by high quality design and investment in place making.”* Together with the strategic objective (echoed in Strategic Policy 15) to conserve and enhance heritage assets in the district *“in a manner appropriate to their significance, recognising their intrinsic value as a finite resource as well as their contribution to the character of the District and the positive role they can play in the regeneration of the District.”*

2.14. The Trust also welcomes the identification of Fort Burgoyne on the Local Plan key diagram (Figure 2 below) alongside other Regeneration Sites covered by policy SP6 as set out further over the page.

Figure 2: Figure 2.1, Local Plan Key Diagram

Chapter 3 - Strategic Policies

2.15. Chapter 3 sets out the districts strategic policies to achieve the aforementioned strategic objectives.

SP6 Economic Growth

2.16. Strategic Policy 6 seeks to grow and diversify the Dover District economy by providing additional employment floorspace through the regeneration of brownfield sites in key locations in the district, such as Fort Burgoyne, to deliver flexible employment uses, achieve a higher level of job growth, and help provide additional flexibility and choice to the market over the Plan period.

Figure 3: SP6- Economic Growth, Dover as of Regulation 19 Submission, DDC Local Plan

2.17. The Trust welcomes the inclusion of Fort Burgoyne at criterion 2 of policy SP6 as site where regeneration for a mix of uses to secure their future will be supported by Dover District Council.

2.18. It is noted that paragraph 3.117 sets out that no floorspace allowance has been included for Fort Burgoyne (and other sites allocated under criterion 2) as they are *“brownfield sites allocated for regeneration, and the mix of development and floorspace requirements will need to be determined through the planning application process in accordance with the policies in the Local Plan.”*

2.19. Given the complexities of the site we support this position but anticipate that employment floorspace will amount to circa 3,000 sqm.

Chapter 11 - The Natural Environment

Policy NE1 Biodiversity Net Gain

2.20. The Trust agrees with the requirements of Natural Environment Policy 1 for development proposals to provide a minimum of 10% biodiversity net gain above the ecological baseline within the development boundary. And notes criterion (a) which states that where it can

be demonstrated that ecologically meaningful biodiversity net gain cannot be achieved within the site boundary, the Council will consider off-site alternatives in line with the mitigation hierarchy approach.

2.21. Given that a large portion of the 42 hectares at Fort Burgoyne has the potential to provide for significant biodiversity offering, in responding to this consultation The Trust wishes to record interest in working with the Council in developing its Dover District Biodiversity Net Gain Strategy with a view to Coombe Hole providing opportunity for off-site net gain whilst maximising the value of this Local Wildlife Site.

Figure 4: NE1- Biodiversity Net Gain, Dover as of Regulation 19 Submission, DDC Local Plan

2.22. In a similar vein to the BNG potential at Fort Burgoyne, the Land Trust has extensive experience of working with developers to create and provide in perpetuity management of Suitable Alternative Natural Greenspace (SANG), areas of greenspace that are of a quality and type that are suitable to divert recreational activities associated with new residential development away from protected sites (such as Special Protection Areas or Special Areas of Conservation).

2.23. In noting the requirement of Draft Policy SAP1(I) (Whitfield Urban Expansion) which requires a need for SANG to mitigate potential impacts upon the Lydden and Temple Ewell SAC, the Trust wishes to express interest in discussions with the Council and/or the developers of this site with a potential view to assisting them with meeting the policy requirements.

3. Summary

3.1. The overall objective of the Trust remains to seek to deliver a strong, sustainable future for the Fort, that secures its long-term status as a nationally and locally important historic site that will make a vital contribution to the district. The Land Trust supports the Regulation 19 Submission Version of the Dover District Local Plan and welcomes the inclusion of Fort Burgoyne as a strategic allocation site for regeneration subject to the comments set out in this representation.

4. Appendices

Appendix A- Representations on the Regulation 18 Draft Dover District Local Plan 2021 and Targeted Call for Sites

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Experience has caused trust in the planning process to expire in the minds of many of the public. Without independent, robust auditing, and honesty, extracting promises from developers all too often results merely in employment for public relations practitioners. So, an addition to NE 1 is needed for it to become sound. 'Where permission is given subject to conditions regarding tree retention, tree planting and / or biodiversity enhancement, applicants will need to agree to abide by 'robust auditing' (as Wildlife Trusts insist that the Environmental Bill legislate for). This means that honest, objective-because-independent, before-and-after evaluations / baseline measurements must be used. DDC councillors on the planning cttee have recently pointed out how very inadequate and misleading the sketchy, google-map-based ecology reports paid for by developer applicants are.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	<i>(see comments in SP14, and SP13 above)</i> To become sound, effective and legally compliant with 2021 Environment Act this addition is needed. <i>'Enhance biodiversity in line with Kent Nature Partnership commitment to 20% enhancement to restore Kent's depleted natural capital and mitigate 6th mass extinction.</i>

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<i>Developers are ill-placed to self-certify their own work in this area, and DDC need a DM policy requiring Environmental Impact Assessments on all planning applications for developments of over 15 dwellings on greenfield or rewilded brownfield sites.'</i> 11.20 Tilmanstone Colliery Tip should be landscaped to become a local nature reserve and an amenity of Elvington and SAP 28.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<i>DDC Note The text below is an extract from the original representation which is attached to SDLP1438.</i> SP14 Enhancing Green Infrastructure & Biodiversity The Environment Act of 2021 has a legally binding 2030 species abundance target, whose professed aim is to help reverse the drastic decline in wildlife and put the nation on track to protecting 30% of land and sea for nature by 2030; also, there is a new requirement for planning

applications to provide Biodiversity net gain and for Local Nature Recovery Strategies to create a framework for a national system of interconnected sites for nature.

In SP14 the words about Local Nature Recovery Strategy and the Kent Biodiversity Strategy are impressive and reassuring. But the very restricted BOAs (Biodiversity Opportunity Areas), to which they are applied, render them less than effective. Residents' local knowledge (members of Sandwich Bay Bird Observatory, Kent Wildlife Trust, local members British Trust for Ornithology, etc, etc), could increase DDC's awareness of more potential BOAs by approx. ten times at a conservative estimate.

Net Gain should be measured using the latest DEFRA measurement tool The Biodiversity Metric 3.1 - JP039 - GOV.UK and also an additional metric should also be used consisting of a list of all species to be established in consultation with Kent nature concerned NGOs, (Kent Wildlife Trusts and others). The DEFRA metric favour the developer as it only takes into consideration protected species and habitats. In the proposed Local Plan, the Appendices give an Evidence Base. This predominantly deals with species and habitats protected in Law and ignores all the other species in the district which are in decline. To be sound and effective, all Biodiversity net gain policies must join up the living dots.

The UK is one of the world's most nature-depleted countries, in the bottom 10% globally and last among the G7 group of nations, new data shows. It has an average of about half its biodiversity left, far below the global average of 75%, a study has found. In contrast, a figure of 90% is considered the "safe limit" to prevent the world from tipping into an "ecological meltdown", according to researchers.

Planning policies which single out building development for "improvement" and avoid the other causes of this dramatic biodiversity loss, are inadequate and need strengthening to become effective. In a report entitled "The state of nature: 41 percent of UK species have declined since 1970s" (NHM 2019) the main drivers of decline are as follows –

Changing agricultural management , Habitat fragmentation , Pollution , Urbanisation , Woodland management , Invasive non-native species , Fisheries degradation

All of these areas should be considered in any Plan including the DDC one.

SP 14 Under the Hunting Act 2004 foxhunting became illegal, DDC should include in its SP14 encouragement for the rural Police to uphold the law in this respect and discourage any drag-hunting which results in the 'accidental' tearing apart of wild animals.

Examples of wildlife needing protection from loss of habitat around the boundaries to the north, west and south of Deal (e.g. SAP 16 sites Ground Water source protection 2 or Flood Zone 3), which is itself representative of the larger district. Evidence (BTO Initial Sites Review recorded as accepted) shows: Much of the area is in Flood Zone 3, farmland and has an extensive biodiversity value – briefly, to name a few, breeding Mute Swan, Moorhen, Collared Dove, Cuckoo, Skylark, Meadow Pipit, Blackbird, Cetti's, Reed and Sedge Warblers, Wren, Linnet and Reed Bunting. It is also a partial feeding area for a number of species such as Heron, Little Grebe, Grey Partridge, Kestrel, Buzzard, Black-headed and Herring Gulls, Woodpigeon, Stock Dove, Barn Owl, Swift, Swallow, House Martin, Yellow Wagtail, Dunnock, Song Thrush, Carrion Crow, Rook, Starling, House Sparrow and Chaffinch. Historically Redshank, Lapwing, Snipe and Yellow Wagtail used to nest here. Many species of native plant and habitat for invertebrates, mammals such as bats, Hedgehogs, Harvest Mice and Water Voles will also be lost. Losing these species will be a considerable biodiversity loss and contrary to the requirement for a minimum of 10% biodiversity gain. How will this loss be calculated? There two other plots in this designation - Sholden to Betteshanger roundabout surrounding Cottington Court Farm and Betteshanger Country Park access road to Foulmead Cottages behind farm shop which are both deemed unsuitable, which is correct – they are both farmland and would create chaos on the A258 in addition to the loss of biodiversity, open space, increase in light pollution, disturbance, etc.

The statement SP14 b must be made real and effective, and rendered sound by robust auditing and independent baseline assessments and recruitment of a much larger planning enforcement team. Only then will 'Every development will be required to connect to and improve the wider ecological networks'. would become effective and sound instead of token.

SP14 3.290 Kent County Council requires 20% biodiversity net gain, and it is unsound for DDC to undermine this commitment. DDC local plan will only be sound if 20% biodiversity net gain replaces the 10% specified. The Kent Nature Partnership commits to 20% biodiversity enhancement. An addition to the Plan is therefore needed: 'Enhance biodiversity in line with Kent Nature Partnership's commitment to 20% enhancement to restore Kent's depleted natural capital and to mitigate 6th mass extinction. Natural Capital is the world's stocks of natural assets including soil, minerals, air, water and biodiversity. These provide a range of ecosystem services' that enable us all to survive and thrive. The most obvious services include the food we eat, the water we drink and timber we use for building. Less visible ecosystem services include climate regulation, carbon sequestration, natural flood defence, water filtration, species habitat, health and wellbeing. The Goodwin Sands nurture marine fauna and flora and provide a natural protection from coastal erosion. As such the Goodwin Sands are part of the district's natural capital and need protection too.

To become sound and effective and legally compliant bird boxes, bat boxes, swift bricks, street trees, garden trees should be required on all new builds.

If existing mature trees of a good size to capture carbon now, are replaced in 'urban expansion' areas (SAP 1, SAP 24, SAP 28) by young saplings that will not be able to capture a similar amount of carbon for 40 to 50 years, then the plan will not be legally compatible with Environment Act 2021. Therefore, to become sound and legally compliant SP14 should require that for every 10,000m2 (roughly 50 dwellings of 200m2 per dwelling) of housing, one open space of 150m2 and another woodland area of 150m2 should be provided, these allocations to be non-transferable between 10,000m2 sections. Moreover, development should only be permitted if 90% of existing trees are retained (These retained trees will account for the woodland areas referred to above, and will provide pockets of mature green infrastructure of amenity value to legally binding UK Net zero strategy 2019 and to new residents at little cost or inconvenience to the developer). Any new trees planted must be tended with a guarantee to ensure survival 4 years after development completed.

Moreover, to become more sound and effective, we recommend adding, Retain all trees on the perimeter of large developments and pockets of existing trees within developments. Work with Kent Nature Partnership to evaluate, and match protection of all-natural capital. Work to retain and enhance natural capital generally, mindful of the KCC commitment to establish the growth of 1.5 million new planted trees across the county. Similarly, this policy would become sounder if the recommendations of KCC report 'Natural Solutions to Climate Change in Kent' of March 2021 paid for from the public purse, on the need for our district's (chalk) grasslands, wetlands, and woodlands to be retained and enhanced were adopted as a planning guideline.

As with SP 13, to become sound and effective, SP 14 must be underpinned with a requirement for robust auditing, and honesty, otherwise extracting promises from developers all too often results merely in employment for public relations practitioners, and developers later apply for conditions to be removed. 'Where permission is given subject to conditions regarding tree retention, tree planting and / or biodiversity enhancement, applicants will need to agree to abide by 'robust auditing' (as Wildlife Trusts insisted was in Environmental Act 2021). This means that honest, objective because independent, before-and-after evaluations / baseline measurements must be used. Sketchy, google-map-based ecology reports paid for by developer applicants are deceptive. Developers are ill-placed to self-certify their own work in this area, and DDC need a policy requiring Environmental Impact Assessments on all planning applications for developments of over 15 dwellings on greenfield or rewilded brownfield sites.'

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Policy NE1 outlines the Council's aspiration for development proposals to provide a minimum of 10% biodiversity net gain above the ecological baseline. Gladman accept that whilst the Environment Act 2021 introduces a mandatory requirement for development to deliver a net gain for biodiversity of at least 10%, the secondary legislation to enact this is yet to come into force. Therefore, until such time as the mandatory provisions of the Environment Act come into force, the Council cannot require developments to achieve at least a 10% net gain, and certainly could not withhold planning permission if a proposal did not achieve a 10% gain. Gladman would therefore suggest that Policy NE1 should be tempered to make clear the 10% target is aspirational and not an absolute target. At criteria 3 there is a stated requirement for a dedicated BNG plan to be submitted for all applications and that the BNG plan will be subject to approval and secured through a condition or S106 as part of any application. Gladman note this aspiration however, as example an outline application may only seek to approve the principle of development, therefore such a requirement would be more relevant at reserved matters stage. We would therefore suggest greater flexibility based on the matters submitted for approval at outline stage and potentially use of planning conditions secure BNG at reserved matters stage.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Response by the Home Builders Federation to the consultation on the Dover District Local Plan.</p> <p>1. Thank you for consulting the Home Builders Federation (HBF) on the Dover District Local Plan that is being proposed for submission to the Secretary of State for examination. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.</p> <p>SP3 – Housing Growth</p> <p>The policy is unsound as it not effective and is not sufficiently justified by the evidence base</p> <p>Housing needs</p> <p>2. The housing requirement of 10,998 over the plan period 2022 to 2040 is consistent with the minimum number of homes the Council should plan for using the standard method. However, what is not clear from the Council's evidence is whether this level of growth will be sufficient to meet the growth aspirations of the Council. Strategic Policy 6 sets out the Council's aspiration to deliver a minimum of 117,290 sqm of additional employment floorspace over the plan period but we could not find evidence to indicate that this number of homes will be sufficient to support the level of economic growth the Council is aspiring to deliver. The NPPF sets out at paragraph 82c that the potential barriers to investment in an area, such as a lack of housing, needs to be addressed in the plan and the Council need to be certain that the housing requirement set out in SP3 is supportive of its aspirations around economic growth.</p> <p>Older people's housing needs</p>

3. The HBF is concerned with the limited references to the needs to provide special accommodation for older people. It is noted that the mix of homes on allocated

sites will need to take account of the need for such accommodation but there appears to be no indication of whether this will be sufficient to meet the needs identified in the 2019 SHMA update. It also completely ignores the potential to allocate standalone sites to deliver homes for older people and there is no specific policy setting out the need for such accommodation and how the Council will support such development to come forward outside of the strategic allocations. The HBF would recommend that a policy setting out the Council's support for older people's accommodation is include in the plan. In order to be effective, we would suggest that this policy sets out the need for such accommodation and that there a presumption in favour of such development where needs are not being met.

Housing supply

4. Table 3.1 in the Local Plan states that overall housing supply to meet needs is 11,924, leaving a contingency buffer of 924 homes between housing needs and supply - around 8% of needs. Whilst the HBF welcomes the provision of a buffer between needs and supply we do not consider 8% to be sufficiently large to ensure that needs are met in full over the plan period, especially given that around half of the homes will come from the Whitfield Urban Expansion. In order to ensure the Council's needs are met in full the HBF recommends that a buffer of around 20% is necessary. The additional buffer should be brought forward through the allocation of smaller sites which will deliver earlier in the plan period and provide a buffer in overall supply should there be delays in the delivery of the larger strategic sites in Dover.

Meeting affordable housing needs

5. The most recent Strategic Housing Market Assessment undertaken by the Council is the 2019 update to the 2017 SHMA. This sets out that there is a need for 3,387 new affordable homes between 2020 and 2040. No further assessments appear to have been undertaken since that period. However, the latest AMR indicates that 75 affordable homes were built in 2020/21 with permissions for a further 108 units which can be expected to come forward in 2021/22. As such if the SHMA update is used as the basis for affordable housing needs there remains a need for 3,204 homes over the plan period – around 30% of expected supply on sites that are likely to deliver affordable housing¹.

6. Whilst this would appear to show that on the basis of SP5 the need for affordable housing would be addressed we note that the delivery of affordable housing in the past has been well below what has been expected. The 2020/21 Authority Monitoring Report indicates on page 19 that delivery since 2010/11, the year the Core Strategy was adopted, has been at around 20% of housing completions. In addition, the viability study indicates that the strategic sites will find it challenging to deliver 30% affordable housing. This would suggest that in order to meet needs the Council will need to allocate additional sites.

¹ Total supply of 11,924 less small site windfall allowance of 1,050

Conclusions on housing supply

7. To conclude on housing supply the HBF would recommend that further sites are allocated in this local plan. This would have the twin benefits of meeting the need for affordable housing in the district as well as providing an additional buffer between housing needs and supply.

SP5 – Affordable housing

The policy is unsound as it is not fully justified.

8. This policy requires residential development of 10 or more units to deliver 30% of the homes provided as affordable housing. The update notes on the viability study notes at paragraph 56 that this level of affordable housing requirement is deliverable in high and medium value areas alongside the other costs placed on development by the local plan. However, the study outlines that this level of provision will be challenging on the strategic sites and shows that it would not be viable in lower value areas and in the urban area of Dover. The Council recognises these concerns in part by removing the requirement to provide affordable housing in the urban area of Dover. However, no allowance is made with regard to the lower value areas or strategic sites.

9. Whilst the Council states that aside from the strategic allocation there is little planned development in the lower value area it is still necessary for the policy should reflect this evidence presented by the Council. Paragraph 58 of the NPPF recognises that decision makers should be able to assume that development that a policy compliant scheme is viable. This requires policies that place additional costs on development to reflect the evidence and in cases such as this set different requirements for different areas regardless of the development expectations in those areas. As such the HBF would recommend that the policy is amended to remove the requirement for affordable housing contributions in the lower value areas.

10. It is also notable in tables 10.17 and 10.18 of the Whole Plan Viability Study that the outside of greenfield sites at Deal extra care and sheltered housing for older people is not able to viably deliver affordable housing, Given that such development often comes forward on

sustainable PDL sites close to services such development should be specifically excluded within SP5 from providing affordable housing contributions.

CC1 – Reducing Carbon Emissions

The policy is unsound as not consistent with national policy, justified or effective.

11. Through policy CC1 the Council indicate that they expect development to meet the Future Homes Standard (FHS) if this becomes a requirement that is delivered

through local plans. However, the expectation from Government is clear that FHS will be delivered through amendments to the Building Regulations and will not be an optional standard adopted as part of a local plan. The improvements to energy efficiency standards in new buildings and the transition to FHS has already started with the improvements to part L of the Building Regulations that came into force in June of 2022. These will see a circa 30% improvement in CO2 emissions prior to the introduction of FHS which will ensure that new homes are zero carbon ready from 2025. As such it is not necessary to refer to the Future Homes Standard and the Council should remove reference to the standard in policy which will be delivered as part of changes to part L of the Building Regulations.

12. The HBF is also concerned that the Council do not appear to have tested the Future Homes Standard within the update note on the viability assessment. The update note sets out at paragraph 23 that the initial improvements to the energy efficiency introduced in June of 2022 were included but no additional costings have been made with regard to the Future Homes Standard. The Government expects this to cost the house building industry an extra £100 million per year though this fails to recognise that there is likely to be additional electricity connection costs with the move away from gas and that the assumed reduction in the cost of air source heat pumps is unlikely². Given the significant increase in costs from these new standards will come into force in 2025, not long after the expected adoption of this local plan, these costs should have been considered through the viability assessment.

NE1 – Biodiversity Net Gain

Policy is not needed as this will be delivered through the Environment Act and support regulations.

13. Given that the requirement to provide a 10% Biodiversity Net Gain is set out in legislation and supporting regulations and guidance and will be in force when the plan is adopted, the HBF would question whether it is necessary to include a detailed policy on BNG. Including a detailed policy could lead to inconsistency between policy and legislation should this change either prior to the introduction of BNG at the end of 2023, or if there be changes to regulation and guidance in future. As council notes in para 11.6 the policy is intended to reflect the requirements of the Act and as and we would suggest that it would be more appropriate to refer in policy SP14 to the need to deliver a 10% BNG in line with relevant legislation and guidance.

Conclusion

14. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, in the following key areas:

Economic growth has not been take into account when considering the minimum number of homes to be planned for;

Greater flexibility required in the local plan to ensure needs are met in full;

No specific policy with regard to the needs of older people

Affordable housing policy does not reflect the full evidence on viability

References to Future Homes Standard in policy CC1 unnecessary and unjustified

No need to include detailed policy on BNG given that this is a requirement of legislation with associated regulations and guidance

15. We hope these representations are of assistance in taking the plan forward to the next stage of plan preparation and examination. I would also like to express my interest in attending any relevant hearing sessions at the Examination in Public. Should you require any further clarification on the issues raised in this representation please contact me.

² Building Homes in a changing business environment: an assessment of new and forthcoming additional costs of housing delivery. (HBF, 2022) [https://www.hbf.co.uk/documents/12117/HBF report - Building Homes in a Changing Business Environment.pdf](https://www.hbf.co.uk/documents/12117/HBF_report_-_Building_Homes_in_a_Changing_Business_Environment.pdf)

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance

To conclude on housing supply the HBF would recommend that further sites are allocated in this local plan. This would have the twin benefits of meeting the need for affordable housing in the district as well as providing an additional buffer between housing needs and supply.

It is also notable in tables 10.17 and 10.18 of the Whole Plan Viability Study that the outside of greenfield sites at Deal extra care and sheltered housing for older people is not able to viably deliver affordable housing. Given that such development often comes forward on sustainable PDL sites close to services such development should be specifically excluded within SP5 from providing affordable housing contributions.

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The HBF is also concerned that the Council do not appear to have tested the Future Homes Standard within the update note on the viability assessment. Given that the requirement to provide a 10% Biodiversity Net Gain is set out in legislation and supporting regulations and guidance and will be in force when the plan is adopted, the HBF would question whether it is necessary to include a detailed policy on BNG. Including a detailed policy could lead to inconsistency between policy and legislation should this change either prior to the introduction of BNG at the end of 2023, or if there be changes to regulation and guidance in future. As council notes in para 11.6 the policy is intended to reflect the requirements of the Act and as and we would suggest that it would be more appropriate to refer in policy SP14 to the need to deliver a 10% BNG in line with relevant legislation and guidance.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I would also like to express my interest in attending any relevant hearing sessions at the Examination in Public.

<p>to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>(See comments in SP14, and SP13 above) To become sound, effective and legally compliant with 2021 Environment Act this addition is needed. <i>'Enhance biodiversity in line with Kent Nature Partnership commitment to 20% enhancement to restore Kent's depleted natural capital and mitigate 6th mass extinction</i></p> <p>Adverse experience of the planning process has reduced trust in that process in the minds of many of the public. Without independent, robust auditing, and honesty, extracting promises from developers all too often results merely in employment for public relations practitioners. So, an addition to NE 1 is needed for it to become sound. 'Where permission is given subject to conditions regarding tree retention, tree planting and / or biodiversity enhancement, applicants will need to agree to abide by 'robust auditing' (as Wildlife Trusts insist that the Environmental Bill legislate for). This means that honest, objective-because-independent, before-and-after evaluations / baseline measurements must be used. DDC councillors on the planning cttee have recently pointed out how very inadequate and misleading the sketchy, google-map-based ecology reports paid for by developer applicants are. Developers are ill-placed to self-certify their own work in this area, and DDC need a DM policy requiring Environmental Impact Assessments on all planning applications for developments of over 15 dwellings on greenfield or rewilded brownfield sites.'</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><i>Major development proposals within the AONB will only be permitted in exceptional circumstances and where it is demonstrated they are in the public interest. I consider this to be unsound. It can never be in the public interest to degrade the AONB for future generations. This is unsustainable and contrary to NPPF 21 and the Kent Downs AONB Management Plan 2021-26.</i></p> <p>The Kent Downs AONB management plan 2021-26 says <i>the Kent Downs AONB, perhaps more than any other of Britain's protected landscapes – AONBs, Heritage Coasts or National Parks, has experienced and is experiencing severe development pressure.</i></p> <p>DEFRA evidence shows <i>'The Kent Downs AONB stands out as an area which has experienced major, but expected, change, showing a rate of urban growth of almost 10%.pa, with the urban area spreading by 14 ha over the decade'</i>. The AONB in Dover District has suffered development at a disproportionate rate which indicates that planning pressures on our district are unsustainable. It is considered an outlier in the amount of growth it has accommodated. In view of this DDC has a duty to double its efforts in protecting the AONB within its area.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness	<p><i>Major development proposals within the AONB will only be permitted in exceptional circumstances and where it is demonstrated they are in the public interest.</i></p> <p>This should be rewritten to include what is considered a major development eg more than 3 dwellings. In such cases major developments should then NOT be considered.</p>

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Developments which renovate and rebuild existing dwellings along the same footprint and using prescribed local materials and methods with sustainability at the core ONLY should be encouraged. Clear landscape buffers should be maintained between the AONB boundaries and the built environment of settlements to protect the setting of the AONB. Landscape character areas abutting the AONB should be carefully managed.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The supporting paragraphs to NE2 emphasise the particular importance and quality of the District's landscape however we consider the proposed policy wording to provide inadequate protection to landscape character. There are two issues with NE2 as proposed (note these apply to the first section of the policy and not the second portion which relates specifically to proposals within AONBs): 1. The draft wording does not provide a sufficiently robust test. A development application could assert that "particular regard" for landscape character is made but could still fail to adequately address material arising harms. To prevent unacceptable harm to landscape character would require stronger, more conclusive policy wording. 2. The proposed policy wording links to the 2020 Landscape Character Assessment but indicates that particular emphasis be given to a list of generalised characteristics which mostly relate to landform attributes (items a. to g. in the policy wording). It can be interpreted that characteristics

	not listed are therefore secondary where in fact these may actually be of greater or greatest importance. Within the 2020 assessment of each landscape character area, the most valuable or sensitive characteristics vary considerably between areas, as does the development management guidance. The policy should require that development proposals respect the specific landscape character identified within the LCA, respecting the sensitivities and values, and the development guidance. It is important that this policy allows landscape character implications to be assessed against the specific context and attributes of the area rather than particularly against a generalised list of landform attributes which may not be of greatest importance.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>We propose that the list of general landscape attributes considered for particular regard should be removed to avoid these taking precedence over potentially more important characteristics and values in a given character area. Further, we propose that the policy should be made more robust and decisive to ensure that development management can adequately safeguard the District's highly valued landscape character</p> <p>The following is proposed to replace the first section of NE2:</p> <p>Proposals should demonstrate particular regard to the Landscape Character Area as defined by the Dover District Landscape Character Assessment 2020 and the Kent Downs AONB Landscape Character Assessment Review, in which they are located, respecting the identified sensitivities and values, and be in accordance with development management guidance. Proposals which would result in unacceptable harm to landscape character will be refused.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan is unsound as it does not comply with the legally binding commitment made by DDC when they declared a climate emergency in 2020 and prepared their climate change strategy. The plan will not do enough to meet the target of the district being net zero by 2050. DDC should be much more ambitious about the green credentials of new housing. If new homes generated their own power, were insulated to the highest standards, and collected rain water, it would greatly help stretched local services and go a long way towards making the housing stock fit for the coming decades.</p> <p>The regulation 19 stage of the consultation is not fit for purpose as it is overly complicated and very difficult to use. The process has left many members of the public including me and my wife feeling overwhelmed and confused as to how to make a representation. For those who are working full time this has been a task for which they do not have enough time. As a result those who may have wanted to make a submission have not been able to. The format of the submission form is also difficult to navigate. Without prior experience of planning law it is difficult to say whether a part of the plan is legal or not. As to the duty to cooperate it is impossible to know. The unsound plan needs updating after the government announcement on 5/12/22 that mandatory housing targets are not to be imposed. The figure of nearly 11,000 is unsustainable and should now be reviewed, particularly with respect to allocated land around Station Rd Walmer and proposed developments around villages.</p> <p>The character and landscape value of the district is being rapidly eroded under the current plan and this must not continue as it is contrary to NPPF 21. It is not sustainable to build on agricultural land which is in short supply as we are only 50% self sufficient in producing food in the UK. The CPRE has found that almost 14,500 hectares of farmland has been permanently lost to development since 2010. The contribution from the districts agricultural land is of vital importance. Much of the agricultural land is also vital for flood protection, and field margins are important for wildlife and biodiversity, forming corridors between habitats for vertebrates and nesting and roosting sites for birds. Dover District also has a wealth of character landscapes, AONB, heritage coast, nature reserves, internationally rare chalk grassland and rewilded areas such as Betteshanger Park. Overdevelopment under the last weak plan has meant that these areas are under pressure and being denuded as their boundaries are eroded and wildlife corridors between sites are cut off. The new plan does not do enough to protect these areas, wildlife and biodiversity. Developments should not be allowed to remove ancient woodlands and trees and biodiverse rich habitats even if it is argued that this is for the greater good. This is not sustainable as all nature is interconnected and if it fails then we all fail. The UK is one of the worst countries in the world for biodiversity loss, we have lost half of our biodiversity since the 1970's.</p> <p>Development has been at such a pace that infrastructure cannot keep up. Buses have been cut recently, cycle and pedestrian routes have not been upgraded sufficiently to connect some developments to main bus and train routes without car dependence. Aylesham has not had a secondary school which would mean children could walk to school. Many rural communities are entirely car dependent due to lack of buses and the roads not being safe to use their bikes. Not enough emphasis is put on renovating existing housing stock to provide greener, insulated, fuel efficient homes. Each new build generates around 56 tonnes of embedded carbon. The NPPF states that we should prioritise brownfield sites over greenfield but although there are many opportunities to develop brownfield sites in Dover, this has not been prioritised. Many developments have been for larger houses in villages and there is not enough provision for affordable housing.</p> <p>The wording of the local plan is not definitive, it leaves too many loop holes and vague preferences which enable large developers to argue and get what they want, to maximise profits, not what the people of the Dover area need.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Better mapping and understanding of the Dover District, taking into account internationally rare areas of chalk grassland, woodland and trees wherever they occur.</p> <p>Large buffers around the AONB to protect its character from the built environment. Stronger protection for the AONB and the Ripple LCA F3.</p> <p>Tighter protections on our remaining biodiversity.</p> <p>Tighter definitions in the local plan so that developers have no room to argue what has been specified in the local plan.</p> <p>Hire several biodiversity officers to monitor closely and prevent loss of ancient woodland, chalk grassland, veteran trees, protected wildlife and rich habitats and to actively go out into the community, looking for ways to improve biodiversity by such things as accessing grants for hedge planting and the creation of ponds where ever possible in our district.</p>

	<p>Employ experts to liaise with farmers in our area to encourage the most environmentally friendly farming and land management practices which will encourage maximum biodiversity in the countryside and maximum sequestration of carbon in soils and biomass.</p> <p>Stop the use of agricultural land for development.</p> <p>Renovate and insulate rather than build new houses, brownfield not greenfield.</p> <p>Turn attention away from destroying village communities with unsustainable housing estates outside their village boundaries.</p> <p>Do not give developers the get out clause of financial mitigation for destruction of wildlife and habitat. No development should further deplete our critically low levels of biodiversity.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	NE2
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	NE2 – Landscape Character and the Kent Downs AONB Natural England provided extensive comments on this policy in our statutory Regulation 18 response. In summary we advised that: • The special qualities of the AONB should be acknowledged and included in the policy. • Specific mention and requirements of the two Heritage Coasts to be included. • That your Authority seek advice from the AONB Unit in developing the

<p>possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>policy further. • That the policy should be strengthened to provide more robust protection and reflect the great weight afforded to AONBs in the NPPF. We note from our review of your Authority's Regulation 22 Consultation Statement (Appendix E) that you have generally responded positively to the above points but would encourage you to consider whether the policy could be further strengthened, in line with the NPPF, by:</p> <ul style="list-style-type: none"> • Making clear that only 'limited' development (in terms of scale and extent) will be acceptable within the AONB. • Clearly defining what your Authority considers to be 'major' development within the AONB when applying the tests of exceptional circumstances and public interest. <p>Finally, we are slightly unclear as to why paragraph 11.20 in the supporting text makes reference to Dover District's three Regionally Important Geological Sites (RIGS) which then do not appear to be referenced in the policy at all. Natural England is supportive of policy protection being given to geodiversity as well as biodiversity (including protection of local sites) but we have more commonly seen this included within designated site / biodiversity policies. Given that NE2 doesn't currently appear to provide any actual policy protection to the sites we would suggest that they are included with other types of local site in Policy SP13 (requirement 'h') and that the supporting text is also moved to this policy.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. <p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	For many in Dover, especially those living in harsh economic circumstances, being able to look up to our green hills, brings peace and assuages grief in dark times. The same applies throughout the district. Protecting landscape character, for those on all incomes, for those of all ages, across the district, is intrinsically linked to mental and physical wellbeing. Landscape character both within the Kent Downs Area of Outstanding Natural Beauty (AONB), and in all other places, also underpins our green tourism economy.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Losing landscape character to satisfy the demand for 30% profit margins of volume developers whose have the ear of London ministers, would be shooting ourselves in the East Kent foot, and cost us dear. This Local Plan would be unsound if it allows any development within the AONB, or allows any development over 5 dwellings within a mile of the boundaries of the Kent Downs AONB. Food security is a key concern in 2022 and the public expect food producing, carbon capturing soils and farmland to be protected.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	NE3 – Thanet Coast and Sandwich Bay SPA Mitigation and Monitoring Strategy Natural England considers the inclusion of this policy, setting out the overarching principles of this strategic mitigation approach, as an essential element supporting the conclusion of your Local Plan's HRA that the additional housing growth set out in the Plan will not result in an adverse effect on the integrity of the Thanet Coast and Sandwich Bay SPA. It is our view that removal of this policy could be considered to render the Plan unsound. Natural England will provide detailed advice on this policy in due course but this will first require further review of the Local Plan HRA and the Strategic Access Mitigation and Monitoring Strategy documents.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Predicted traffic congestion during holiday periods, which at key holiday departure times becomes gridlock, is likely to increase not decrease, as EU Schengen area brings in biometric passport checks in 2023 for non-EU traffic. So we fear gridlock impacting well-being and livelihoods, not only in Dover town and Aycliffe but also on villages around A2, A20 roundabouts (Guston, Whitfield). This leads to slower HGV and car journeys and longer periods of emissions from queuing vehicles, Air pollution is exacerbated in 2022 because KCC have stopped subsidising buses and some rural bus routes have disappeared or been reduced (e.g. Elvington). Level 1 councils and Kent Ass of Local Council are looking to have a stronger voice on Joint Transportation boards so that they are able to help residents with public transport and thus respect Kent and Medway Energy and Low Emissions Strategies.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will	It would be sound if no new builds were allowed in villages without bus links to schools and workplaces, unless bus links were provided, so the statement re Initiatives which 'encourage' public transport needs strengthening to become sound. there is a need for an increase in Air Quality Monitoring Zones, Dover Town A256 Barton road by Barton School, DGGS & Charlton School, at Aycliffe, in Guston, on the Duke of Yorks roundabout near DYRMS school, on the Whitfield roundabout. There are Air Quality issues on both one-way A256 roads in Dover (London Rd and Barton Road / Maison Dieu Rd - see comments in SP 8 above) and there is an urgent need for vertical living walls, urban hedging to absorb air pollution for residents and school children along these

make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	road, especially in view of the Air Pollution laws coming through parliament now, in order for Plan to become legally compliant. These should be a requirement on any application for residential, non-residential development and for change of use, within Dover town.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	NE4
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC Note (1) The text below is an extract from the original representation which is attached to SDLP1438. NE 4 Air Quality Predicted traffic congestion during holiday periods, which at key holiday departure times becomes gridlock, is likely to increase not decrease, as EU Schengen area brings in biometric passport checks in 2023 for non-EU traffic. So, we fear gridlock impacting well-being and livelihoods, not only in Dover town and Aycliffe but also on villages around A2, A20 roundabouts (Guston, Whitfield). This leads to slower HGV and car journeys and longer periods of emissions from queuing vehicles, there is a need for an increase in Air Quality Monitoring Zones, Dover Town A256 Barton Road by Barton School, DGGS & Charlton School, at Aycliffe, in Guston, on the Duke of York's roundabout near DYRMS school, on the Whitfield roundabout.

	<p>There are Air Quality issues on both one-way A256 roads in Dover (London Rd and Barton Road / Maison Dieu Rd - see comments in SP 8 above) and there is an urgent need for vertical living walls, urban hedging to absorb air pollution for residents and school children along these roads, especially in view of the Air Pollution laws coming through parliament now, in order for Plan to become legally compliant. These should be a requirement on any application for residential, non-residential development and for change of use, within Dover town.</p> <p>Air pollution is exacerbated in 2022 because KCC have stopped subsidising buses and some rural bus routes have disappeared or been reduced (e.g., Elvington). Level 1 councils and Kent Ass of Local Council are looking to have a stronger voice on Joint Transportation boards so that they can help residents with public transport and thus respect Kent and Medway Energy and Low Emissions Strategies. It would be sound if no new builds were allowed in villages without bus links to schools and workplaces, unless bus links were provided, so the statement re Initiatives which 'encourage' public transport needs strengthening to become sound.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Appendix B Detailed Sustainability and policy Content. Habitats Regs. Assessment, chapter 5 appropriate Assessment.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	This comment refers to the policy on water supply and quality. Appendix B , B192 to B202 plus the the contents of chapter 5, Appropriate Assessment, 5.136 to 146 all indicate that water is a serious problem for the district. Considering that Kent is the most driest county in England and Wales and that Dover District is classed as severely water stressed, yet housing development continues unabated. The aim of the Local Plan is to build 10,998 houses which more or less equates to a town the size of Walmer and Deal, population approximately 30,000. In view of the climate change emergency whereby we are expected to endure much wetter winters and drier summers, it appears that in the summer months there could be a prolonged and severe drought. Dover District is over-abstracting its resource of water just for the existing number of houses and population. New housing developments will exacerbate the problem of this water supply, despite the attempts to reduce consumption down from 154 litres per perso per day to 110 lpd.. That is a very large reduction.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	In view of the question of water resource and supply, a moratorium on further housing development should be sought from the Government until such time there is in place infrastructure to ensure there is a quantity of water available to cover a prolonged and severe drought.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	There exists the danger that too much greenfield development / concrete will speed up runoff during wetter winters and lead to soil erosion. Since the Reg 18 Consultation in early 2021, the issue of river contamination at Stourmouth and Stodmarsh caused by inadequate sewage infrastructure upstream has peaked. Residents are very aware of the problems caused by Southern water failing to invest in either new water collection infrastructure or in adequate treatment infrastructure.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	Conversely, to protect our production of food from suffering drought in more extreme summers, it is essential that rainwater and grey water harvesting be a prerequisite on new homes, and shade from existing retained trees be ensured.

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	This DM will not be unless robust, stringent and measured enforcement of adequate water treatment for all new build sites are required, as well as rainwater harvesting. Moreover over-use of nitrates on farmland will reduce the supply of water that can be used by residents, and pollute streams, rivers, ponds and aquifers and endanger wildlife.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Policy NE6 (DDC note assigned to NE5): Encouraging to see a policy dedicated to aspects of water quality. Instance 3 <i>11.48 In the areas of the district which are not on mains drainage, water treatment package plants can be installed, subject to the approval of the Environment Agency in the first instance.</i>

11.48 In the areas of the district which are not on mains drainage, water treatment package plants may potentially be installed if they can meet non mains drainage design criteria. If they cannot they should be consulted on with the Environment Agency in the first instance, as they may require a formal Environment Permit for any discharges.

Instance 4

11.51 For residential and commercial developments where there is no mains connection within a reasonable distance, applicants will be required to provide details of a water treatment package plant or equivalent that is compliant and has been approved by Environment Agency guidance, as part of a planning application. Applications for residential extensions will not be required to provide such details.

For residential and commercial developments where there is no mains connection within a reasonable distance, applicants will be required to provide details of a water treatment package plant or equivalent that is compliant with Non-mains drainage regulations as part of a planning application. Discharges to ground that do not meet relevant exemption criteria will also require an environment permit from the Environment Agency. Further guidance is on [.go.uk](http://www.environment-agency.gov.uk). Applications for residential extensions may not be required to provide such details under planning, but will still have to ensure that drainage systems comply with Non-mains drainage regulations and meet Building regulations.

Instance 5

11.51 For residential and commercial developments where there is no mains connection within reasonable distance, applicants will be required to provide details of a water treatment package plant or equivalent that is compliant with, and has been approved by Environment Agency guidance, as part of a planning application. Applications for residential extensions will not be required to provide such details.

11.51 For residential and commercial developments where there is no mains connection within reasonable distance, applicants will be required to provide details of a water treatment package plant or equivalent that is compliant with Non Mains Drainage regulations and aligns with Environment Agency risk assessment guidance, as part of a planning application. In some instances a separate Environmental Permit may be required from the EA. Applications for residential extensions will be required to provide details to show any risks are not exacerbated and current systems comply with NMD Regulations.

Aside from the aforementioned alterations, we approve of the importance placed on Groundwater protection in a number of policies, and explanatory text. The plan covers everything reasonably well from our view point. While there is no explicit policy on land affected by contamination, brownfield sites and other potentially pollution development is mentioned in various policies under water infrastructure and the like are mentioned adequately.

(DDC note - This is an extract from the full Environment Agency representation SDLP1458)

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Not Applicable

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Can't comment on legal compliance
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>We feel that in these critical areas certain verbs should be strengthened for tighter regulation and control. We suggest all words in bold need addressing: all shoulds to be replaced with more enforceable wording eg will, have to, must; recommended replace with eg insist; need to be replaced by 'must to include details'; 'may be accepted' may to be replaced with must.</p> <p>Page 327 et seq we strongly support the aspirations for the river, but the wording needs to be strengthened to assist DDC planning staff. It is an important feature in the town of Dover. Public access to the river, however, is fragmented and many existing developments have turned their frontages away from it, rather than making it an integral feature. For example in the St James' area (a recent development)- the river has been canalised and locals wished it to be a feature. Unless anyone knows it is there, it can be easily ignored.</p> <p>The river poses flood risk issues which need to be addressed in development proposals. Water quality is also an issue for this river, with historic culverting over the river having a harmful effect on water quality and wildlife. As a result, there is a need to protect the fragile and important ecosystem of this river, improve its water quality, and to enable it to contribute to the enhancement of the green infrastructure and distinctive environment of Dover town.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	NE6
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	RIVER DOUR The River Dour (DDC Plan – NE6 - 11.52-11.57)

<p>to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The source of the River Dour springs from the Alkham Valley, so it is essential to ensure it is free from pollution and wastewater infiltration. At present this is not the case. There is substantial sewage weaking into the water course particularly when the ground water rises. Sewage trucks are regularly stationed in Alkham village, at Wolverton, Chilton Farm and the Kearsney Parks to clear the sewage spillages which pollutes the River Dour. Children and families are at risk of being contaminated and the Parks to have to prevent children and families from visiting or being in contact with the water due to human sewage pollution. These issues need to be urgently addressed and Alkham residents and council needs to be in the picture with respect to plans discussed with DDC. We are in continuous contact with Southern Water for cleanup, monitoring sewage levels and finding solutions to these ongoing problems.</p> <p><i>(DDC note - The full representation from Alkham PC is attached to representation SDLP1653. However, specific comments from the full representation document have been extracted into separate consultation points/policy areas, relevant to the comments made)</i></p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>

Agent Full Name	
Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	HE1
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	It is proposed to increase the size of the development for the Whitfield Urban expansion. The development proposed to the north west of Nursery Lane will include 3 Grade 11 listed buildings, about 3 ancient woodlands and also the Historic Park and Gardens of Waldershare. The land proposed for development is high grade arable land currently used for food production. The 3 Grade II buildings were ancient farmsteads, whose setting was always and should be retained as farmland. To surround these historic assets with a housing development will harm their setting contrary to Sections 20, 190 and 195 of the NPPF.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	To reduce the scale of the Whitfield Urban expansion to protect these historic assets and comply with the NPPF.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	It was agreed in Section 4.50 of the Core Strategy 2010 that the setting of listed buildings should not be harmed (in accordance with the requirements of Section 20 of the NPPF) and the current plan countermands this. This has to be challenged at every level.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Can't comment on legal compliance
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	There is no mention of Section 215 enforcement anywhere in the plan. This is an enforcement tool available to remedy the problem of existing properties, which was raised in our earlier response, but the Local Plan re buildings (H1 TO H7) concentrates upon requirements etc for new builds. This we feel needs to be remedied in connection with eg attractiveness of the public realm for locals and visitors, maintenance of conservation areas. We urge increased use of Article 4 Directions in conservation areas and extension to deprived wards in Dover where necessary.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The County Council welcomes the clear description of the purpose and need for a good Heritage Statement to accompany relevant applications. In paragraph 12.8, though, KCC would suggest that in addition to the Heritage Strategy, reference is made to consulting relevant Conservation Area Appraisals (CAA) and to the Dover Archaeological Characterisation for applications in Dover town centre. Both CAAs and the Characterisation should contribute directly to helping applicants reach the understanding necessary to write an effective Heritage Statement.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>To note: the 2022 cuts in Kent Police funding of £30million and the cuts to PCSOs is likely to result in an increase in crime affecting all assets including heritage assets.</p> <p>The Wantsum Channel is generally assumed to have been an open channel between the mainland of Kent and the Isle of Thanet, but how that channel arose in the first place is unknown. Given recent research into the creation of the English Channel, it may well be that the Wantsum Channel was created by the same tsunami, caused by the Storrega underwater rock slide, that obliterated Doggerland and carved out the present English Channel around 8,000 BC. The area potentially has immense national and international importance for understanding the late Palaeolithic and Mesolithic periods as well the development and use of the landscape in more recent periods.</p> <p>The inclusion of a specific statement and policy for the Lydden Valley/Wantsum Channel and its margins would appear appropriate, matching that for the Dover Western Heights and the Dover Town Centre SPD.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>1 We recommend adding the following : Dover Western Heights Fortifications Scheduled Ancient Monument and Conservation Area rightly emphasises the importance of the intervisibility of features both within the monument and with the wider landscape in order to fully understand the historic significance of the monument.</p> <p>2 The DM policy would be more sound if strengthened by explicitly requiring conservation of an asset by recording. A suggested addendum to this policy would be at the end of the third paragraph: "... securing the optimum viable use of the heritage asset or ensuring its preservation through appropriate recording." affected. The whole building approach to developments involving energy conservation improvements sound.</p> <p>3 We recommend adding the following : The Lydden Valley/former Wantsum Channel is identified in Chapter 11 as forming a group of Landscape Character Types ((LCTs A, B and C) paragraph 11.42 and Table 11.1). Elsewhere in Chapter 11 (Fig. 11.1) the concentration of National Nature reserves, SSSIs and Special Protection Areas where the Wantsum meets the English Channel is demonstrated in map form. Historically, it is known that the Wantsum Channel provided a route for water borne traffic avoiding the more difficult waters around the North Foreland. Little is known of the evolution of this Channel and its silting up. As an area of more or less open water at different periods in the past various historic artefacts might be expected, such as fish traps, landing stages, salt working sites, temporary or permanent settlements taking advantage of the varied environments, and perhaps water craft. Ground disturbance along the line of the Wantsum Channel and its edges are likely to produce organic palaeo-environmental evidence which will add to the limited inorganic palaeo-environmental evidence from sites on chalk downland. This material could include timber structures and artefacts, vertebrate and invertebrate fauna, pollen, and aSedDNA.</p> <p>It is suggested that the following statement is inserted after paragraph 12.29:</p> <p>The Lydden Valley/Wantsum Channel provided a water route south of the Isle of Thanet avoiding the more difficult waters around the North Foreland at various times in the historic past. The origin of the Wantsum is unknown but may be linked to the formation, around 8,000 BC, of the English Channel as we know it today. Ground disturbance within the Wantsum and along its ancient shore line is likely to reveal evidence of the origin and development of this important landscape feature as well as evidence of its use from the Mesolithic through to the present day.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.</p>

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Comments on Local Plan</p> <p>My concern for the future and plea to DDC is safeguarding of and maximising Dover Town's historic assets. Dover's history is rich but not fully appreciated with some developments since the war showing a disregard for that past and its worth.</p> <p>The objects within the proposed plan HE1, HE2 and HE3 look fine but do have let outs for the overriding of conservation of historic and architectural assets. If these assets and their settings are to be preserved it does depend on the attitude and approach of DDC – something appearing absent on occasions in the past. It is hoped that the restoration of the Maison Dieu is a signal that for Dover Town things are looking up. At the very least DDC should recognise the value of Dover's history for promoting tourism. It also requires Council staff resources to be sufficient to manage the implementation of standards.</p> <p>I understand that the following sites are on Historic England's risk register: Fort Burgoyne, The Western Heights Fortifications and the Heights and The London Road Conservation Area.</p> <p>The way in which these sites/ areas are restored and brought back into use will be a test of the Plan and the Council's integrity. A further test will be the development of Bench Street, a site with a history ranging from Bronze age, Roman and Medieval times to the present</p> <p>A town that looks after its conservation areas and historic assets is also a much more attractive and interesting place to live in and visit</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note (1) The text below is an extract from the original representation which is attached to SDLP1438.</p> <p>To note: the 2022 cuts in Kent Police funding of £30million and the cuts to PCSOs is likely to result in an increase in crime affecting all assets including heritage assets.</p> <p>1 We recommend adding the following : Dover Western Heights Fortifications Scheduled Ancient Monument and Conservation Area rightly emphasises the importance of the intervisibility of features both within the monument and with the wider landscape in order to fully understand the historic significance of the monument.</p> <p>2 The DM policy would be more sound if strengthened by explicitly requiring conservation of an asset by recording. A suggested addendum to this policy would be at the end of the third paragraph: "... securing the optimum viable use of the heritage asset or ensuring its preservation through appropriate recording." affected. The whole building approach to developments involving energy conservation improvements sound.</p> <p>3 We recommend adding the following : The Lydden Valley/former Wantsum Channel is identified in Chapter 11 as forming a group of Landscape Character Types ((LCTs A, B and C) paragraph 11.42 and Table 11.1). Elsewhere in Chapter 11 (Fig. 11.1) the concentration of National Nature</p>

reserves, SSSIs and Special Protection Areas where the Wantsum meets the English Channel is demonstrated in map form. Historically, it is known that the Wantsum Channel provided a route for water borne traffic avoiding the more difficult waters around the North Foreland. Little is known of the evolution of this Channel and its silting up. As an area of more or less open water at different periods in the past various historic artefacts might be expected, such as fish traps, landing stages, salt working sites, temporary or permanent settlements taking advantage of the varied environments, and perhaps water craft. Ground disturbance along the line of the Wantsum Channel and its edges are likely to produce organic palaeo-environmental evidence which will add to the limited inorganic palaeo-environmental evidence from sites on chalk downland. This material could include timber structures and artefacts, vertebrate and invertebrate fauna, pollen, and aSedDNA. The Wantsum Channel is generally assumed to have been an open channel between the mainland of Kent and the Isle of Thanet, but how that channel arose in the first place is unknown. Given recent research into the creation of the English Channel, it may well be that the Wantsum Channel was created by the same tsunami, caused by the Storrega underwater rock slide, that obliterated Doggerland and carved out the present English Channel around 8,000 BC. The area potentially has immense national and international importance for understanding the late Palaeolithic and Mesolithic periods as well the development and use of the landscape in more recent periods.

The inclusion of a specific statement and policy for the Lydden Valley/Wantsum Channel and its margins would appear appropriate, matching that for the Dover Western Heights and the Dover Town Centre SPD.

It is suggested that the following statement is inserted after paragraph 12.29:

The Lydden Valley/Wantsum Channel provided a water route south of the Isle of Thanet avoiding the more difficult waters around the North Foreland at various times in the historic past. The origin of the Wantsum is unknown but may be linked to the formation, around 8,000 BC, of the English Channel as we know it today. Ground disturbance within the Wantsum and along its ancient shore line is likely to reveal evidence of the origin and development of this important landscape feature as well as evidence of its use from the Mesolithic through to the present day

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Can't comment on legal compliance
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	There is no mention of Section 215 enforcement anywhere in the plan. This is an enforcement tool available to remedy the problem of existing properties, which was raised in our earlier response, but the Local Plan re buildings (H1 TO H7) concentrates upon requirements etc for new builds. This we feel needs to be remedied in connection with eg attractiveness of the public realm for locals and visitors, maintenance of conservation areas. We urge increased use of Article 4 Directions in conservation areas and extension to deprived wards in Dover where necessary.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	HE2 seeks to enhance and conserve conservation areas, and to protect their significance. To meet this objective the policy should apply to development within the conservation area and within its setting. The setting of a conservation area can be very material to its significance, development within the setting could therefore give rise to harm. The policy has been revised since the regulation 18 draft and we note the reference to the setting has been removed. We believe the policy is now considerably weaker and is unsound in meeting its objective. The reference to development within the setting should be restored so that development which would otherwise materially harm the setting and the significance of conservation areas can be controlled by this policy.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	We propose that the first sentence of the policy be re-worded "Applications for development or redevelopment in Conservations Areas and their settings...."

<p>to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>My concern for the future and plea to DDC is safeguarding of and maximising Dover Town's historic assets. Dover's history is rich but not fully appreciated with some developments since the war showing a disregard for that past and its worth.</p> <p>The objects within the proposed plan HE1, HE2 and HE3 look fine but do have let outs for the overriding of conservation of historic and architectural assets. If these assets and their settings are to be preserved it does depend on the attitude and approach of DDC – something appearing absent on occasions in the past. It is hoped that the restoration of the Maison Dieu is a signal that for Dover Town things are looking up. At the very least DDC should recognise the value of Dover's history for promoting tourism. It also requires Council staff resources to be sufficient to manage the implementation of standards.</p> <p>I understand that the following sites are on Historic England's risk register: Fort Burgoyne, The Western Heights Fortifications and the Heights and The London Road Conservation Area.</p> <p>The way in which these sites/ areas are restored and brought back into use will be a test of the Plan and the Council's integrity. A further test will be the development of Bench Street, a site with a history ranging from Bronze age, Roman and Medieval times to the present</p> <p>A town that looks after its conservation areas and historic assets is also a much more attractive and interesting place to live in and visit</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	HE3 12.32
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The County Council welcomes the commitment to a Dover Town Archaeology SPD. This will help ensure that the outputs of the Dover UAD Project are fully integrated into Local Plan policy and thereby support the protection and enhancement of Dover's internationally important archaeological remains. It will also help disseminate the understanding of Dover's archaeology reached in the project, in particular via the Dover Archaeological Characterisation. The SPD should also provide an important toolkit for developers preparing their proposals, planners who need to assess them, and the community wishing to comment on them. This should underpin the management of Dover's archaeology for many years.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Comments on Local Plan My concern for the future and plea to DDC is safeguarding of and maximising Dover Town's historic assets. Dover's history is rich but not fully appreciated with some developments since the war showing a disregard for that past and its worth. The objects within the proposed plan HE1, HE2 and HE3 look fine but do have let outs for the overriding of conservation of historic and architectural assets. If these assets and their settings are to be preserved it does depend on the attitude and approach of DDC – something appearing absent on occasions in the past. It is hoped that the restoration of the Maison Dieu is a signal that for Dover Town things are looking

	<p>up. At the very least DDC should recognise the value of Dover's history for promoting tourism. It also requires Council staff resources to be sufficient to manage the implementation of standards.</p> <p>I understand that the following sites are on Historic England's risk register: Fort Burgoyne, The Western Heights Fortifications and the Heights and The London Road Conservation Area.</p> <p>The way in which these sites/ areas are restored and brought back into use will be a test of the Plan and the Council's integrity. A further test will be the development of Bench Street, a site with a history ranging from Bronze age, Roman and Medieval times to the present</p> <p>A town that looks after its conservation areas and historic assets is also a much more attractive and interesting place to live in and visit</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Evidence Base, Appendix 2a TC4S Initial Assessment Housing Sites - TC4S072 Hare & Hounds Pub
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Appendix is unsound as it refers to the site TC4S072 as 'isolated' and is rejected as it is 'isolated in the countryside'. The site is brownfield, a car park where there used to be houses. It is within the settlement, it is not isolated, it is on the main street of the village & is close to a main line bus stop withing 100m.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	'proportionate' as there were originally houses on the site 'accepted' as it meets all the original criteria for a windfall site & is 'Within settlement confine'.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Not justified as we were not contacted about the ownership of the land as 'it would appear that the required sightlines for an access onto the highway could not be achieved within land that the site promotor has control over'. In Appendix 1a HELAA 2022 it says ' Unsuitable site: - Unacceptable access visibility preventing on site parking' There is plenty of onsite parking which is controlled by the site promotor. These changes were approved by Highways under Dover plans 18/00157 & 19/01584
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Highway access is achievable Highways concerns have been identified in relation to access and/or highway impact and further assessment is required to demonstrate whether this can be mitigated.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I believe the proposal for development at SAP 50 is unsound due to flood risk that has not been properly evaluated. The site in question is lower than the surrounding roads and fields. Hence there is an increased risk of flooding to some properties due to the site being a run off for surface water from the road and surrounding fields. Station Road frequently floods and the surface water runs off into the development site. If the site was built on, the surface water would by necessity have no other run off, except into neighbouring properties off Short Street: (Yew Tree Barn, The Grange, West Barn, The Stables, The Bothy). Worryingly, the flood risk mitigations suggested within the Flood Risk Assessment were aimed solely at minimising risk to the proposed new development. There were no proposed mitigations to prevent flood risk to neighbouring properties. Also it should be noted that the only other point in the village at such a low elevation opposite the farm, there is a purpose built pond which acts as a soak away, proving the point about water volume accumulation. The pond itself has also been known to flood in the past due to the volume of water that runs down into the village from both the east and west during storms.</p> <p>There is also incorrect information stated as facts in the Local Plan Flood Risk Assessment document (pp127-128). The document states incorrectly that there has been no history of flooding in the area – there has been flooding in June 2022 affecting The Grange and flooding in June 2017 affecting West Barn and Yew Tree Barn, as well as numerous other occasions prior to this date.</p> <p>In addition any use of the current entrance will involve construction vehicles crossing over private land to access the site – this issue has not been addressed.</p>

	<p>Also even if an new access point is created in the hedge along the short street road this access point will be dangerous access to the site from an extremely narrow road off a shared junction with no visibility. I currently walk around the village at least twice a day and – this has not been addressed. It will also further destroy valuable habitat for wildlife in this area. The whole area is a natural habitat for bats who of a spring / summer evening at dusk can be seen flying around station road / short street area, roosting in The Grange and nearby trees.</p> <p>Development of the whole site would significantly harm the character and appearance of the area including the local landscape and setting of the village within the countryside. Any large scale removal of existing boundary trees or hedgerows would significantly erode existing landscape character of the area The development of this site would have a detrimental landscape impact that cannot be mitigated</p> <p>Development of the site would cause harm to the setting of listed buildings and the character of the CA. Site assessed as having a heritage impact that would cause significant detrimental harm to identified heritage assets</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>DOVER DISTRICT COUNCIL LOCAL PLAN CONSULTATION: REGULATION 19 REPRESENTATION TO REVIEW SITE TC4S067 THE GLEBE PLOT, STATION ROAD (OFF SHORT STREET) CHILLENDEEN, CT3 1PR AND INCLUDE IN THE LOCAL PLAN</p> <p>Representation</p> <p>I am making a representation against the Dover District Council (DDC) Local Plan, which is currently subject to Regulation 19 Local Plan Consultation. I believe it is unsound and that The Glebe Plot Station Road (off Short Street) Chillenden (TC4S067) has been wrongly omitted from the Local Plan. I believe the site TC4S067 has been omitted from the Local Plan when it should have been included as an allocation, this is because I believe the HELAA assessment carried out by DDC is incorrect. I would ask that during your examination process you consider my representation, confirm the failings of the HELAA assessment and add site TC4S067 to the Dover District Council Local Plan.</p> <p>I also want to confirm that should this be included under the Examination process that I would like to attend the examination process and, if it is felt necessary, to support this representation.</p> <p>Background to Representation</p> <p>The Glebe Plot, Station Road (off Short Street) Chillenden (TC4S067) submission was made to DDC, following its Call for Sites in 2021. The submission was sent to the DDC Local Plans team and receipt acknowledged on 15th March 2021.</p> <p>When the Regulation 19 Local Plan Consultation was released in October 2022, by DDC, the Glebe Plot (TC4S067) was referenced by inclusion on the list of eliminated sites. The reason for the elimination is set out in the Evidence Base as having been eliminated at the Stage 1 Assessment, which is the initial desktop study, the reason stated is that the site is "isolated in the Countryside". This meant that there was no further consideration of the site and its suitability, availability and achievability to bring forward much needed housing in a sustainable and sympathetic location for the local community.</p> <p>My representation is that the Stage 1 assessment is wrong, and that The Glebe Plot (TC4S067) is clearly within the boundaries and confines of Chillenden Village and represents an opportunity for the development of an infill site for the village.</p> <p>To support this view, in addition to the absolute fact that The Glebe Plot is within the village and is not "isolated in the Countryside" I present the evidence of DDCs own information. Four sites were submitted for consideration from Chillenden village. These are set out on the Settlement maps for Goodnestone and Chillenden sites which were included at Stage 1 Assessment. This map is shown below.</p> <p>This shows clearly that The Glebe Plot (TC4S067) sits between two sites that were not eliminated at stage 1, if these plots were not eliminated for being "isolated in the countryside" it cannot be correct that The Glebe Plot was eliminated for that reason, and it should have been carried forward for further assessment.</p> <p>This first stage assessment also considered the following criteria and sites could have been eliminated if they were:</p> <ul style="list-style-type: none"> • Too small • Covered by National designations <p>and/or</p> <ul style="list-style-type: none"> • Contrary to policy.

None of these criteria were identified as the reason for the elimination of The Glebe Plot, and I can confirm that the plot could not be eliminated for these reasons because:

- The site area extends to 0.38 hectares (3,800 metres squared). As part of the targeted call for sites 2021, the evidence base states that Housing sites would be considered between 0.25 and 1 hectare in size and therefore, The Glebe Plot, TC4S067 meets these criteria.
- The Glebe Plot TC4S067 is not covered by any National designations.
- Following discussions and e mail correspondence with DDC Local Plans team in November 2022, I understand that the reason The Glebe Plot TC4S067 was rejected is that it was considered that the site was "Isolated in the countryside". This is the reason given and why the Glebe Plot, TC4S067 was included in the HELAA document Appendix 2a (Initial assessment housing sites eliminated on page 3. Please see the link below.

<https://www.doverdistrictlocalplan.co.uk/uploads/pdfs/appendix-2a-tc4s-initial-assessment-housing-sites-eliminated.pdf>

In preparing to make this representation, on 21st November 2022, I asked the DDC Local Plan team to confirm the definition they had used of "Isolated in the Countryside". On 1st December 2022, DDC Local Plans team responded stating that the term "Isolated in the countryside" is explained in Paragraph 3.73 of the Local Plan (Page 39) and is also set out within National Guidance - See NPPF National Planning Policy Framework - 5. Delivering a sufficient supply of homes - Guidance - GOV.UK (www.gov.uk) Paragraphs 78 onwards. I have also researched numerous legal cases around the interpretation of the term 'isolated' in the NPPF.

I have read the explanation on Strategic Policy 4 (SP4) on page 39 Paragraph 3.73. The Local Plan states "National Policy is clear that new isolated dwellings in the countryside, outside of settlement boundaries are only permissible in exceptional circumstances"

The Local plan identifies in SP4 2, Chillenden "as a settlement suitable for minor residential development or infilling of a scale that is commensurate with that of the existing settlement and that "residential development or infilling will be permitted within the settlement boundaries, as shown on the Policies Map of the settlements" and which includes the settlement of Chillenden subject to criteria a) to k) being met (reference SP4 page 39 of the Local Plan).

With the above in mind, I would request that the Planning Inspector reviews the conclusion reached by the Stage 1 assessment that the Glebe Plot TC4S067 is "Isolated in the Countryside" for the following reasons:

- As can be seen from the map, The Glebe Plot TC4067 site is quite clearly within the well-defined settlement confines and boundary of the settlement of Chillenden.
- The TC4S067 site meets NPPF and SP4 policy subject to criteria 2a-k) being met.
- The Glebe Plot Site TC4S067 is just 50m from the GOO006 site, (Land adjacent to short street, Chillenden) which has been included in the Consultation Local plan Regulation 19 submission on page 211.
- From further research, I understand that the definition of "isolated in the countryside" is a dwelling that is physically separate or remote from a settlement (Court of appeal judgement Lord Justice Lindblom). The Glebe Plot TC4S067 is neither physically separate nor remote from the settlement of Chillenden.

In summary, I believe it to be absolutely clear that The Glebe Plot site (TC4S067) should not have been eliminated from consideration for inclusion in the DDC HELAA at stage 1 desk top assessment, because it is not "isolated and in the countryside". Further to this, I consider that the site would not have been excluded at the Site, Suitability, Availability and Achievability assessments as it meets the same standards as the site, GOO006, that has been included in the Local Plan on page 212, but with the added advantage of not being a site which is subject to flooding.

In summary The Glebe Plot TC4S067 site is:

- Highly accessible to Chillenden Village, being centrally located.
- Not affected by Flood Risk
- Suitably accessed from an existing access point off Station Road with the ability to improve the access further.
- Visually contained by surrounding topography and existing mature hedgerow and trees and will be seen against the backdrop of the existing neighbouring dwellings.
- Not affected by any recognised landscape designations.
- Adjacent to a sole Heritage asset, with significant screening between them and the ability to further mitigate the impacts.
- Not subject to any ecological constraint.

We have engaged fully with Goodnestone Parish Council (GPC) regarding the proposal to include, The Glebe Plot site, as part of the HELAA process and we are sympathetic to the comments made in the GPC letter dated 11th March 2021 as part of their response to the District Plan consultation. Due to its unique location in the middle of the settlement of Chillenden, The Glebe Plot site will not impact adversely on the

	<p>surrounding landscape. It does not suffer from surface water flooding. The site is well screened by mature trees, hedgerows and bushes and a preliminary study has been undertaken by a heritage expert, to ensure that any heritage concerns of the nearby Grade 2 listed building can be mitigated. Importantly, The Glebe Plot site benefits from its own access off Station Road with no other shared properties or driveways.</p> <p>In addition to the documents submitted on 15th March 2021 as part of the targeted call for sites 2021, I would request that the details of the site's suitability, achievability and availability appended to this representation to be considered (Appendix 1).</p> <p>In conclusion, my representation is that the Glebe Plot was wrongly excluded at the first stage assessment, because it is not "isolated in the Countryside" as it is within the confines and boundary of the village of Chillenden, and it should have been considered suitable for inclusion in the Local Plan, as at least equal to the site that has been included (GOO006), if not better given the lack of impact of flooding, and should be added to Dover District Council Local Plan.</p> <p>Thank you for your attention to this and I look forward to receiving confirmation that you have accepted my formal representation and will consider the matters during your Examination process.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I am making a representation against the Dover District Council (DDC) Local Plan, which is currently subject to Regulation 19 Local Plan Consultation. I believe it is unsound and that The Glebe Plot Station Road (off Short Street) Chillenden (TC4S067) has been wrongly omitted from the Local Plan. I believe the site TC4S067 has been omitted from the Local Plan when it should have been included as an allocation, this is because I believe the HELAA assessment carried out by DDC is incorrect. I would ask that during your examination process you consider my representation, confirm the failings of the HELAA assessment and add site TC4S067 to the Dover District Council Local Plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I also want to confirm that should this be included under the Examination process that I would like to attend the examination process and, if it is felt necessary, to support this representation.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP53(RIN004 & RIN002)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I oppose what I believe to be the unsound selection of SAP53(incorporating RIN002 & RIN004) chiefly as it conflicts with DDC Policy SP3 and SP4. I would also take issue regarding the inclusion of RIN002 as its selection appears to conflict with stated objectives of the District Plan itself.</p> <p>SP3 states:</p> <p>"Minor residential development or infilling of a scale that is commensurate with that of the existing settlement will be permitted within the settlement boundaries, as shown on the Proposals Map, of the following settlements:</p> <p>Ashley, Barnsole, Betteshanger, Chillenden, Coldred, Denton, East Studdal, Elmstone, Finglesham, Martin, Martin Mill, Nonington, Ringwould, Staple, Stourmouth, Sutton, Tilmanstone, West Hougham, West Langdon, Wingham Green, Woodnesborough and Wootton."</p> <p>However, Strategic Policy 3 also makes it clear that, with regard to residential windfall developments:</p> <p>"They tend to be small in scale and can offer a significant contribution to the supply of homes using previously developed land and vacant areas within settlement boundaries."</p> <p>In the document:</p> <p>The Selection of Site Allocations for the Regulation 19 Submission Local Plan September 2022.</p> <p>On P57. RIN004 is shown as selected for the following reasons:</p> <p>"Ringwould is identified in the small villages and hamlets category in the settlement hierarchy where windfall infill development would be acceptable in principle.</p> <p>To allocate all the sites identified as suitable in Ringwould would be in conflict with the position of the settlement in the settlement hierarchy and would not lead to sustainable development.</p> <p>It was therefore considered that RIN004 was the least constrained of the sites and the best related to the settlement, compared to RIN002 and RIN003. These sites were therefore discounted.</p> <p>A number of key considerations have been identified in relation to the proposed site allocation here and these will need to be addressed by the land owner as part of the planning process.</p> <p>Furthermore, there is considered to be sufficient scope to avoid or significantly mitigate the significant adverse effects identified through the SA on the site here."</p>

However, as this site clearly lies outside the Ringwoud settlement boundary, any suggestion that “windfall infill development would be acceptable in principle” is incorrect as windfall infill development must be within the settlement boundary.

The reason for selection of RIN004 incorporates the reason why RIN002 and RIN003 were discounted, and therefore included in the ‘list of discounted sites’ on P68.

It is therefore unclear why RIN002 has been resurrected for inclusion, with RIN004, in SAP53?

The landowners have, for obvious financial reasons, suggested in their comments of support that RIN004 and RIN002 are both brownfield/pdl sites, despite DDC identifying them as greenfield. The landowners have also incorrectly suggested that failure to include RIN002 would render it ‘landlocked’, a statement which is also incorrect since any development of RIN004 could easily include access

I submit SAP53 is neither previously developed land nor within the settlement boundary and therefore, by definition, cannot be considered a ‘windfall development’.

I submit it is clear from this statement that SAP53, which is outside the Ringwoud settlement boundary, should not be considered as suitable for housing development.

The ‘Evidence Base’ is incomplete with regard to Landscape Sensitivity and Character Assessments.

33 sites were selected in the district, some being within AONB and some without. The former Ringwoud Alpines site, SAP53, was not included in the sites selected for assessment for reasons unknown. The selection criteria for those sites which were assessed has not been made known either.

In the case of SAP53, DDC have relied on a ‘specialist assessment’ by the Kent Downs, AONB Unit

“who agreed with the DDC Officer assessment that impacts on the landscape and AONB from the development of these two sites could be suitably mitigated with a sensitive landscaping scheme to the south and by the retention of the existing hedgerow to the eastern boundary.”

However, in all probability the AONB Units assessment would have been desk based and only addresses issues relating to daytime views from within the AONB.

There has been no comment relating to the northern boundary ‘street view’ of the site, as viewed from the A258, which has specifically been a bone of contention for previous DDC Planning Officers, creating serious issues with regard to providing appropriate levels of access to any proposed development. (E.g. Ref DDC Planning 16/00626). This relates to the existing, long established, dense hedging along the roadside boundary to the site, within the AONB, which is currently accessed via a wooden gate and single vehicle track. In the event of a housing development, this hedgerow screening would need to be, at least partially but substantially removed to accommodate a suitable road access. It should also be noted that current activities within the front (RIN004) part of the site are not visible above the hedge line, whereas 2 storey houses would be.

I have appended a current image of the northern boundary street view to emphasise my comment.

Issues relating to inevitable sound and light pollution within the AONB appear to have been completely ignored. The impact on existing neighbouring residents would be significant as the SAP53 site is currently a ‘dark skies’ area which also currently benefits from peace and solitude.

Indeed, the impact upon neighbouring residents was one of the 2 reasons upon which the Planning Inspectorates’ decision was based to dismiss the appeal with regard to the current landowners previous planning application for this site (DDC16/00626).

	<p>I believe it is important to mention that in recent times the landowner has failed to responsibly steward the land, particularly with regard to RIN002 as a result of which it has become seriously degraded and is currently the subject of DDC Planning Enforcement action.</p> <p>I have appended 2 further images, the first showing the condition of the land adjacent to my property and the second, as it appears today.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>In accordance with my comments, I ask that SAP53(RIN004 & RIN002) be removed from the Local Plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Sport England broadly supports this section however, in accordance with our guidance for the preparation of the PPS and keeping it up to date, and also in accordance with paragraph 98 of the NPPF, we would strongly recommend that the Council reviews the PPS (stage E of the PPS assessment method) as the data on which the recommendations are made is becoming out of date. The PPS data should be reviewed in consultation with the playing pitch NGBs who report significant additional sports participation and demand locally that should be considered, and with Sport England.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	No changes to the DLP are required at present however the evidence base needs to be brought up to date.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Positively prepared Justified Effective Consistent with National Policy</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>No</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Yes</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The site selection is unsound as it is not positively prepared as per the NPPF requirement to achieve sustainable development. The site is outside the village boundary, is greenfield and within the AONB. It is not justified as per NPPF as the site allocation has been changed since regulation 18 consultation and so this has skewed the responses. The scale of opposition to RIN002 is not reflected in the summary of responses because they were raised under the heading of the only site proposed in regulation 18 ie RIN004. There has also been confusion throughout this process that the site is brownfield when in fact it is greenfield. There is no justification for the addition of RIN002 to RIN004 and this late stage of the consultation process. I submit that this renders the Reg 18 consultation and reg 19 proposals to mitigate issues to be based on disproportionate evidence and therefore unsound.</p> <p>The evidence base is incomplete. RIN002 and RIN004 have not been included as part of the LSA or LCA assessments which renders the evidence base incomplete and unsound.</p> <p>Residents consulted in Reg 18 on a 0.21 ha site with a capacity for 5 dwellings between the existing 2 dwellings that are part of the ribbon development fronting Dover rd. In Reg 19 they are now faced with a 1.41 ha site with a proposal for 10 houses intruding into the AONB on which they have not been previously consulted. This is not consistent with NE2 Landscape character and the Kent Downs; states in section 11.13 that DDC aims: <i>To ensure that all development coming forward over the plan period respects and reflects the character of the landscape in which it is located.</i> SP13 states that <i>the NPPF 2021 requires local plan policies to conserve and enhance the natural environment, to recognise the intrinsic character and beauty of the countryside and the wider benefits from natural capital and ecosystems.</i> It is unsound to include SAP53 in the LDP as it would detract from the beauty of the countryside particularly the adjacent AONB. The Kent Downs AONB management plan 2021-26 says <i>the Kent Downs AONB, perhaps more than any other of Britain's protected landscapes – AONBs, Heritage Coasts or National Parks, has experienced and is experiencing severe development pressure.</i> DEFRA evidence shows <i>'The Kent Downs AONB stands out as an area which has experienced major, but expected, change, showing a rate of urban growth of almost 10%.pa, with the urban area spreading by 14 ha over the decade'</i>. The AONB in Dover District has suffered development at a disproportionate rate which indicates that planning pressures on our district are unsustainable. This current proposal of Reg19 differs considerably in scale and the impact it would have on the AONB is unacceptable for a greenfield site. Due to its topography the site is also highly visible from the AONB. Any ribbon development along Dover Road would require heavy screening to ensure that it did not impact on the AONB.</p> <p>No consideration has been given to the legal right of neighbouring residents to enjoy their homes peacefully. The proposed development in Reg 19 would be considerably more intrusive than a ribbon development along Dover Rd.</p> <p>The site is currently the subject of unresolved planning enforcement action due to activities which have angered residents and resulted in considerable degradation of the site. The site should be cleared and returned to its original agricultural state.</p> <p>For all the above reasons I conclude that the inclusion of SAP53 in its current form is unsound.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance</p>	<p>The SAP53 site proposal should be limited to a ribbon development along the Dover Road commensurate with the scale of existing dwellings and should have sufficient screening to prevent the dwellings being seen from the AONB. Hedges and trees on site should be retained and full independent study of biodiversity carried out.</p> <p>The site should be cleared and renovated as per any planning enforcement action.</p>

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	P. 260, para 6.81: "...facility which demonstrably provides a net benefit to the community"
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	To allow a small loss of Open Space as outlined below will provide a greater net benefit to the community as it will enable a larger area of Open Space to be restored and improved. The Evidence Base does not justify the current designation which will prevent recommended site improvements (see DDC Evidence Base OPEN SPACE AND PLAY STANDARDS PAPER Dec. 2019 p.17 Table 4.1.4: Rural Analysis Area Quality Summary). The site Off Mill Lane Eastry (site ref 393) is quite large at 0.53 ha and is designated as Amenity Greenspace but with the exception of several trees towards the north of the site. Visually (see pictures attached) this former builders yard and tile manufacturing site is more akin to a brown field site. The site is overgrown by brambles and covered with roof tiles and slag heaps of several tons of building rubble. We argue that while the trees must be protected, the rest of the site has been wrongly classified. This position is also supported by the DDC Evidence Reports: out of all the 120 Open Space sites assessed in the 2019 Open Space Assessment Report, this site is identified as the very lowest scoring amenity green-space in terms of quality (34.4%) and second lowest in terms of value (28.0%).

	<p>Additional text insert by DDC from comment SDLP468</p> <p>This comment is an amendment to my previous comment in relation to PM5:</p> <p>If the proposed amendment to the Local Plan is approved and subsequent planning application to Dover district Council for a single dwelling is also authorised, provisions will be made to alleviate the current congestion on Mill Lane traffic by providing a car parking space for the adjacent property to the site's East access road, Bushley house. This will result in a further measurable and concrete net benefit to the community.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>This representation seeks to remove a small area from the open space designation of that site. This would enable a single dwelling unit to come forward (self build) under Strategic Policy 3 and taking account of all other Development Management Policies at the time of making the application. Living on site would enable us to restore, improve and manage the remaining open space, improve the quality of the overall site, including both access roads belonging to the site and tree maintenance, resulting in a measured enhancement to Eastry's open space provision and in a net benefit to the community.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>The Open Space and Play Standards Paper (2019, page 17, table 4.1.4) rates 10 Amenity Greenspace sites, including the site "Off Mill Lane Eastry" as being "below quality" and recommends "Enhancing site quality should be explored where possible (e.g. exploring options for improved maintenance, drainage and enhancement of general appearance)."</p> <p>We wish to participate in the oral part of the examination to present how this amendment to the Plan will enhance the site quality and appearance of the area.</p>

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>1.0 Summary Top down housing targets, geography and an historic underinvestment in the strategic road network have created genuine constraints in the Dover District. Nevertheless, an LDP where 76% of all proposed housing is on greenfield sites is inherently unsustainable. From the loss of irreplaceable agricultural land and habitat, to reinforcing the district's car dependency by creating greenfield sprawl that will significantly change the rural character of the north west of Dover District, DDC's Reg 19 LDP DDC's will deliver the wrong houses in the wrong locations. It won't improve the environment or mitigate climate change. If the purpose of the planning system is (as set out in the NPPF) to ensure that sustainable development is pursued in a positive way, we believe this plan cannot be considered to be justified and it will not enable the delivery of sustainable development.</p> <p>1.1 Objective Overarching concerns about the sustainability of the adopted land allocation strategy were raised in our Reg 18 comments (see attached). Our Reg 19 response is focuses on mitigating the traffic impacts from the proposed development that (as a small village located on one of the 2 main rural routes between the A256 / 7 and the A2) will have a direct, severe and devastating impact on our community. These impacts are outlines in Section 2.0 below. Based on our experience on Aylesham (DOV/07/01081 and DOV/13/0120), Nonington Parish Council believe that the site-specific impact focus of S106 means it is not an effective framework for mitigating cumulative impacts from multiple spatially distributed developments on a rural road network. It is impossible to disaggregate traffic flow to attribute the increase to specific site. We note that Reg 19 Housing Policy 4.21 states that cumulative impact all sites allocated in this Plan on common road links must be considered. However, in judging how this might work in practice, we reviewed how the cumulative traffic impacts from the current plan period developments (in Aylesham, Sholden, Woodnesborough, Sandwich, Sholden, Eastry, Betteshanger, Discovery Park) have been considered in relation to the C195 route on which the village is located. To date only Aylesham has been required to measure traffic impacts (DOV/13/0120 – Variation of Conditions 76 of Planning Permission DOV/07/01081) to identify the traffic impact arising from the cumulative occupation'. Conducted in April 2018 with 380 of 447 units occupied, the traffic consultants, MLM, concluded that no impact could be attributed to the development because the identified increases were in line with ONS data showing road traffic increased by 29% from 1990 to 2018. It is noteworthy that greenfield housing, like that Aylesham, with unrealistic assumptions of self- containment were – in turn – identified as a key driver national car use increases. Combined with our concerns about the robustness of the employment, sustainability and traffic baseline evidence (outlined below), we are seeking effective mitigation enshrined in a Local Plan policy rather than deferring this to a S106 negotiation at the planning application stage.</p> <p>1.2 Basis for Objecting 1.2.1 Inconsistent and Insufficient Traffic Evidence undermining Plan Soundness and Sustainability MHCLG's guidance states that an LDP should be based on robust transport evidence base collected in advance that should encompass: the cumulative impacts of existing and proposed development on transport networks, a review journey purpose and accident records as well contextual data such as travel to work areas in order to measure the impact on the locality in economic, social and environmental terms. I. Detailed traffic evidence has been collected for the DDTM area in the REGULATION 19 TRANSPORT MODELLING FORECASTING REPORT but the strategic housing and employment sites outside the DDTM area have only been modelled 'in significantly less detail'. The result is that the area bounded by A2, B2046, A256 and A257 has significantly less robust traffic evidence, undermining the scope for an effective analysis of cumulative impacts of existing and proposed development on transport networks in this area. This area includes Sandwich, Aylesham, Elvington, Eythorne, Eastry, Wingham, Shepherdsweil and Ash and has 1554 of the Reg 19 plan new dwellings allocated within it(Source: Distribution of Housing Site Allocations by Settlement). This accounts for 78% of all Dover District's Reg 19 housing allocations outside</p>

Dover and Whitfield. This area also encompasses the strategic employment sites at Discovery Park and the Aylesham Development Area. Detailed Analysis of Traffic Evidence is set out in Section 4.1

II. The sustainability evidence base uses 'unrealistic assumptions about self-containment' and unfounded onsite employment assumptions that are not supported by contextual travel and commuting pattern data. For example in SA 7.51 LUC incorrectly include Snowdown Colliery as a strategic site inflating site employment sustainability and under estimating outbound commuting from Aylesham.

III. There are inconsistencies in the sustainability evidence base. For example SA Section 6.207 states that Eythorne (and Elvington) has 'relatively good access to existing local rail...services'. Eythorne railway station closed to passenger traffic in 1948.

IV. The Office of Road and Rail passenger data for Aylesham between 01/01/2016 – 01/01/2020 show rail journeys per head of population in Aylesham fell as the first phases of the 'garden village' were occupied. Transport in Aylesham has actually become less, not more sustainable.

1.2.2 The Duty to Co-operate

DDC were only made aware of Canterbury City Council's (CCC's) Reg 18 plan for 3200 houses north of B2046 and the 420 dwellings on land contiguous to SW Aylesham in September 2022, shortly before the publication of their Reg 19 plan.

We haven't seen a statement of common ground or any evidence of the active ongoing constructive engagement and co-operation required to maximise the effectiveness of local plan in the context of strategic cross boundary matters or of any coherent strategy based on agreements between them.

As all authorities are required to reach agreement on strategic matters before submission we expect this is under review but – based on the absence of co-operation evident to date –we questions whether the legal duty to co-operate can be complied with in a meaningful way.

1.2.3 Scale of Cross Boundary Development Impact on DDC Reg 19 Evidence Base and Plan Soundness

Although DOV/07/01081 and DOV/13/0120 promoted Aylesham as a 'Garden Village', in their Reg 19 plan Dover District Council propose that Aylesham becomes a small Garden Town of 15,000 (LDP 4.196 and 4.199). Canterbury City Council propose another 3,620 dwelling adjoining Aylesham to create a single 'new town' or Freestanding Garden City with a population of 25-30,000 people. A development of this scale requires realistic assumptions about self-containment, a strong foundation of employment and appropriate infrastructure to avoid creating an unacceptable severe cumulative impact on adjacent road network.

The consideration and mitigation of transport impacts is an essential part of Government's wider policy objectives for sustainable development. The objectives set out in NPPF para 111, DDC's Reg 19 Policy T12 10.8 can only be effectively delivered against a robust evidence base that provides the clear benchmarks and thresholds that a planning application can be measured against.

Canterbury City Council's stated Reg 18 position is that the traffic impacts of their proposed new town joining Adisham to Aylesham are mitigated by the planned south Canterbury bypass which, they claim, will reduce traffic impacts as measured across their district. No evidence has been provided to establish how this will mitigate the impact of 3,620 additional dwellings on the rural road network in Dover District.

As highlighted in 1.2.1 (i) above, in relation to DDC's Reg 19 plan, we have existing concerns regarding the absence of a robust transport evidence base for the area bounded by A2, B2046, A256 and A257, collected in advance and benchmarking existing traffic levels so the cumulative impacts of proposed developments on transport networks can be subsequently measured.

The additional scale of Canterbury's proposed development and proximity to Aylesham and the District's boundary, means that DDC's Reg 19 plans is not positively prepared as it is not informed by agreements with other authorities or consistent with achieving sustainable development.

It is not justified as it is clearly not based on proportionate traffic or sustainability evidence.

We would argue that this also compromises plan efficacy given the absence of effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.

2.0 Location - Background

Nonington is set along a 1.2 mile stretch of a rural road with constrained widths, a number of single lane pinch points and long stretches (including in the heart of the Easole Conservation area) with no pavements. This route connects Sandwich and the A257 to the A2. A 'rat run', the C195 is badly impacted by the cumulative impact of traffic from Sandwich, Deal, Eastry, Woodnesborough, Sholden (via Drainless Road, Heronden Rd and Thornton Road), Elvington and Aylesham, with pre-pandemic baseline traffic of 90,800 vehicles a month. (MLM / K & M SURVEYS 2018 - 7 day total (East and West) = 20,888 traffic movements)

KCC Highways confirm Holt Street, Easole Street and Sandwich Road route (Linking B2046 and Sandwich) is classified as the C195 and is "not a secondary route, as defined in our road hierarchy, and "for reasons of various highway constraints along the corridor". It should, therefore,

be protected from the cumulative or inappropriate traffic impacts. However, as detailed in item 1.1 above, in the current plan period no actual measures have been put in place to mitigate development traffic impacts on the C195 route.

We have had several accidents, 6 road accident deaths on the C195 since 2014 and multiple crashes in the village mostly unrecorded by the police.

Multiple single lane pinch points with no pavements. On street parking and private driveways used as passing points

We have a problem with speeding in excess of the speed limit of 30mph. MLM's s106 surveys 2014 and 2018 showed Holt Street Nonington speeds heading SE 38 mph and NW 37 mph.

Applications directly increasing C195 local traffic in the current LDP:

Aylesham 1320 dwellings (DOV/07/01081), Sholden 230 residential dwellings (DOV/10/01065), Sandwich 120 residential dwellings (DOV/19/00243), Hammil 29 residential dwellings (DOV/16/01026). Woodnesborough 24 residential dwellings (DOV/11/00965) with a number of application to be decided including a 120 bedroom hotel and 210 residential dwellings in Betteshanger Country Park.

3.0 TI1 - Sustainable Transport and Travel

Item 10.1 seeks to 'facilitate a shift away from petrol and diesel powered vehicles over the lifetime of the Plan and promote sustainable forms of transport and travel'.

The evidence doesn't support the deliverability of this goal on a Reg 19 housing allocation with over 76% of all new dwellings on greenfield sites. These are known to have significantly higher car dependency than brownfield sites. If we take Aylesham as an example, DOV/07/01081 and DOV/13/0120 committed to the expansion of Aylesham Garden Village and promoting sustainable transport predicated on the rail service. Yet, the Office of Road and Rail passenger data show rail journeys per head of population in Aylesham dropped between 01/01/2016 – 01/01/2020. Despite the 'garden village' aspirations, transport in Aylesham has actually become less, not more sustainable.

Public transport, cycling and walking uptake is highest in metropolitan and dense urban areas where use of public transport is typically 35%-50%. This falls dramatically in greenfield developments in ex-urban and rural sites. Research also shows significant sustainable transport adoption variations exist within settlement types driven by socio-economic and topographical factors. (Source - Bennett Institute for Public Policy at the University of Cambridge 2020.) None of this appears to be considered.

KEY FACTS

Elvington and Whitfield don't have rail connections. Stagecoach have cancelled the 38 bus service.

ONS Travel to Work Census data for Elvington showing 95.8% of journeys were made in cars, vans and motorbikes while only 2.7% were by bus.

ONS Travel to Work Census data for Whitfield, Elvington and Aylesham combined: 82.5% of all journeys were in a Car. Only 5.8% on public transport.

The 'Dover Fast Track' represents the largest infrastructural investment in the district. At £50-£70 million, is it an effective use of scarce capital investment or a white elephant?

ORR Passenger entries and exits for Aylesham data shows passenger numbers per head of population dropping Jan 2016- Dec 2020.

- Passenger entries and exits increased by 19.6%. 2016-17 to 2019-20.

- Aylesham Population increased by 30% over the same period.

NOTE _ 20-21 data discounted because of Covid. 2016 Population=4,980. By March 2018, 493 new dwellings had been completed. Estimated mean new dwelling occupied by 2019- 2020 = 500. Estimated population increase = 1,500.

Aylesham Elvington Whitfield Combined

Conclusion

This policy cannot be said to be 'positively prepared' when the evidence shows it is not consistent with achieving sustainable development; This policy cannot be said to be 'justified' as it is not based on proportionate evidence if we accept the PAS definition as 'evidence obtained with an understanding of the way in which issues arise within a plan area to enable an understanding of the issue/topic in question thereby leading to clear analysis and a consequential strategic or policy position within the plan'.

As non-planners, we are struck by the fact that plan making appears to focus on assigning 'sustainability' labels to plan policies without evaluating the evidence for how well these deliver in the real world. What is the local evidence that garden villages or towns actually deliver improvements in sustainable travel? Has the 900 house garden village expansion of Aylesham delivered the expected uptake of cycling and public transport use? Has the provision of employment space delivered the expected expansion in the local employment base, in shops, services, and local business employment (within new office space) capable of accommodating supporting 40% of the population? Or does the evidence show that it is a dormitory commuter suburbs – the antithesis of the Garden City idea.

Failure to assess the performance of policies risk creating confirmation bias and recycle poor policies that deliver poor outcomes. So is this plan policy 'consistent with national policy'? Does it enable 'the delivery of sustainable development in accordance with the policies in this Framework? Based on the evidence and judged against the policies set out in NPPF para 7, 8, 9 and 10 then the answer is no.

The absence of evidence is not evidence of absence. PAS state good evidence should contain reliable, objectively collected recent data and will not contain unjustified assumptions. If the evidence shows assumptions about 'self-containment' are unrealistic and that the offer of plentiful land for industry has not delivered the expected employment, then these are unjustified assumptions.

4.0 Reg 19 T12 - Transport Statements, Assessments and Travel Plans

In item 10.7 set out their goal of 'promoting the delivery of sustainable development' stating that 'Traffic generated by development should normally be targeted towards the primary and secondary route network in the District. Other routes should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements'.

Although KCC Highways consulted with DDC on policy (T12) they haven't published benchmark traffic levels or defined 'inappropriate' or 'unsuitable' traffic impacts because 'baseline conditions vary considerably from location to location'. Nor does NPPF para 111 provide a definition of 'severe' or 'unacceptable'. DDC also seek discretionary power over:

- When or whether Transport Assessments and Travel Plans are required.

- And to decide what constitutes a severe residual cumulative impact on the local highway on a case by case basis.

Without the robust benchmark data on existing traffic (as required by MHCLG and DDC's Sustainability Appraisal of Growth Options), it unclear how this will work in practice. Especially given the pressure to deliver on housing targets and the local government financial incentives to facilitate housing inherent the New Homes Bonus which we understand paid £1,728,587 to DDC in 2019.

- The Reg 19 proposed Aylesham South and Snowdown sites are accessed directly from the C195 / Holt Street, which is also the direct route to the A2 from Elvington. This will increase our traffic issues.

- While recognising the 'porosity' of the contiguous rural road network the traffic impacts from the proposed Aylesham site on to Holt Street, WSP data and modelling is restricted to the observation that 'Holt Street is not modelled but anticipated trips for Aylesham Development will leave the network here'.

- No ACT data has been collected or for traffic heading North on Adelaide Road from Elvington to the A2 or from Aylesham heading south east to Sandwich, Discovery Park and South Thanet

PAS state good evidence should contain reliable, objectively collected recent data and will not contain unjustified assumptions. For the area bounded by the A2, B2046, A256 and A257, we believe the patchy 2018 ACT traffic evidence fails this test as it does not include:

1. Disaggregated SERTM data.
2. Node Impedance Calculation (ICA)
3. VISUM Network Map of existing and proposed roads
4. Detailed benchmark capacity PCU per Lane per lane data for Links types including for Rural Roads and Minor Road Rural Village (30mph).
5. Education Cat Trips prior matrices .

In assessing whether the Reg 19 sites in Aylesham and Elvington likely to result in inappropriate levels of traffic generation or unsuitable traffic movements' on the C195 route, we reviewed the following data to establish the likely impact:

- 2011 ONS Census data,

- ONS - Nomos data, labor market statistics and DataShine ESRC BODMAS conclusions in the Sustainability Assessment,

- WSP's DDTM and Reg 19 traffic data,
- the Office of Rail and Road Estimates of station usage and
- Onsite employment assumptions
- Education commuting data.
- AA Route Planner

The key findings are itemised in Section 4.1 below.

Reg 19 T12 - Conclusions

Reg 19 SA Appendix B confirms the District's residents 'rely heavily on cars to...access employment, education, amenities and services' and predicts an increase of commuting from Aylesham to Sandwich (the district's 2nd commuting hub) as well as to Thanet and Deal. In addition to reduced onsite employment at Aylesham (reduced in WSP modelling from 1013 in Reg 18 to 263 in Reg 19) and the absence of any direct public transport links to Discovery Park, Deal or Thanet; the absence of Secondary education facilities and the primary education capacity issues in Aylesham will also continue to drive increases in commuting road traffic on the C195.

The conclusions are clear, Aylesham will increase traffic on the surrounding rural road network but what is not clear is how DDC propose to deliver their goal of 'promoting the delivery of sustainable development' or ensure 'Other routes should not be subject to inappropriate levels of traffic generation or unsuitable traffic movements'.

DDC have failed to engage with the conclusions from existing evidence base or commission a sufficiently robust traffic data for the area bounded by A2, B2046, A256 and A257 containing >78% of all Dover Districts Reg 19 housing allocations outside Dover and Whitfield. Consequently there are no clear thresholds against which future applications can be measured. If, as a result, unsound policies are included in the LDP, then no subsequent s106 developer contribution led mitigation will be achievable.

Therefore, we conclude the policy is unsound because:

1. This plan is not consistent with achieving sustainable development and therefore cannot be called positively prepared.
2. Ignoring the area-specific evidence itemized in 4.0 and below, this policy cannot claim to be based on proportionate evidence and, so, cannot be considered justified.

4.1 Traffic Evidence Summary

1. Despite the Ministry of Housing, Communities & Local Government 2020 LDP guidance stressing the importance of contextual data such as travel to work areas (and that evidence needs to inform what is in the plan and shape its development rather than being collected retrospectively). Although referenced at a District level in the Sustainability Assessment, none of this contextual or empirical evidence has been considered in the LDP strategic site allocation process in relation to the impact of Aylesham and Elvington on the road network.
2. From ONS data to SA commuter patterns and to SHMA 2017 all highlight a strong trend of out-commuting. ONS data shows high car reliance in all major strategic site locations.
3. WSP's DDTM (Reg 18 Traffic Plan Assessment 2020 / Regulation 19 Transport Modelling Forecast Main Report or Appendices) report conducted detailed modelling of the Dover and Deal traffic. Other areas were 'modelled in significantly less detail'.
4. Despite recognising the LDP will 'lead to large increases in flow' in Aylesham, WSP's analysis is limited to a handful of ATC's (automatic traffic counters) on the B2046 1n 2019. WSP's report offered no conclusions on the area north of the A256 as it was outside the DDTM area. Although concerns were raised at Reg 18 no new traffic data or modelling has been introduced at Reg19.

We understand KCC Highways have 'requested projected development flows leaving the currently modelled areas in that direction to sense check on any need to extend the models'. However, given the site-specific impact focus of S106 means it is not an effective framework for mitigating cumulative impacts from multiple spatially distributed developments on a rural road network, we believe a specific LDP policy is required.

5. 'Critical locations on the road network with poor accident records should be identified in order to determine if the proposed land allocations will exacerbate existing problems and whether highway mitigation works or traffic management measures will be required to alleviate such problems. The accident records should be compared with accident rates on similar local roads'. (MHCGL guidance on traffic evidence for LDP)

There have been 4 deaths on Holt / Easole Street within 1.5 miles of the Aylesham Road junction. How many deaths are required in order for Holt Street to qualify as having a poor accident record and to be included in the detailed traffic modelling?

6. The Elvington data consists of ATC and manual data counts. By citing proximity to A256, the implicit study assumption is that the A256 is the primary route used. No empirical data collected on the traffic heading to the A2 / M2 / M26 or M25 from Elvington.
7. WSP recognised the porosity between the B2046 and the adjacent rural road network, yet provided no analysis of (1) the rural road capacity restrictions or (2) of baseline cumulative traffic from development to date or (3) the projected increase on the road network from the LDP.
8. According to WSP, Highways England approved matrix information from the South East Regional Transport Model (SERTM) used by WSP in Deal was only disaggregated using the 2011 Census data for the DDTM area. As noted in 2.2.13 of WSP's 2018 DDTM the SERTM data is very coarse and with no disaggregation would provide little insight into Elvington and Aylesham commuting patterns via the rural road network
9. There is an extensive resource of rural road network ATC data from Aylesham's s106 TA's (2007/ 2014/2018 etc.) that could have been consulted. KCC Highways confirm the ACT data used for Phase 2b of the Aylesham Village Expansion has not been considered.
10. WSP's observation on likely traffic impacts of proposed Aylesham Development on the rural road network is restricted to 'Holt Street is not modelled but anticipated trips for Aylesham Development will leave the network here'. WSP implicitly assumed all traffic for Aylesham will access and leave the site form Dorman Ave North. ATC and modelling evidence shows this assumption to be unsound.
11. In their Reg 18 comments on Aylesham KCC raised concerns over 'the impact of the development on the highway network, particularly as Aylesham has no secondary education provision so the need for travel by private vehicle for secondary school age children may be higher than in other areas of the district'. No modelling of the associated traffic impacts has been provided.
- Note - During the development of the 2015 DTM and 2018 DDTM car trips which are made to schools were modelled by WSP. Despite the absence of a Secondary School no similar exercise has been conducted on
12. By highlighting the need to expand St Joseph's primary, KCC's Reg 19 comment identify the shortfall of primary places in Aylesham. Unlike in the DDTM area WSP has not modelled car trips which are made to schools for Aylesham or Elvington. There are 378 primary places in Aylesham for a current population of 6,000 with a further 630 houses proposed in this LDP. This is below the national average. As a result the pupils attend schools across the area. For example at Goodnestone & Nonington CE Primary School 43% of pupils come from Aylesham and 30% Elvington creating up to 4 car trips of 1-3 miles each per day.
13. KCC Highways informs us that education commuting will be dealt in a Transport Assessment. We have been unable to locate any education commuting evidence in the Transport Assessment evidence for (App no 07/01081) for either Phase 1 or 2 in Aylesham or a School Travel Plan as recommended in Managing Our Roads (DfT, 2003) and The Future of Transport – a Network for 2030 (DfT) White Paper, 2004.
14. In Reg 18 comments, KCC raised concerns regarding the additional flow anticipated on Shepherdswell Road due to the narrow, rural nature of the road. Holt Street / Easole St / Sandwich Rd are similar in terms of their physical constraints and traffic levels. Both are 'rat runs' between the A2 A256 and significant coastal settlements. In relation to application 19/00381, Richard Smith (Senior Development Planner - KCC Highways) accepted a reduced vision splay from 45m to 25 metres on Easole Street based on an independent highways report describing Easole Street as being a narrow road, 'in a rural location with a tight bend to the west and a junction to the east. The road has no footways, with high hedges bordering each side of the road, creating an extremely constrained environment. There is evidence of vehicles crossing the centre line; the markings are very worn and hardly visible'.
15. ORR Passenger entries and exits for Aylesham data shows passenger numbers per head of population dropping Jan 2016- Dec 2020.
 o Passenger entries and exits increased by 19.6%. 2016-17 to 2019-20.
 o Aylesham Population increased by 30% over the same period.
 NOTE _ 20-21 data discounted because of Covid. 2016 Population=4,980. By March 2018, 493 new dwellings had been completed. Estimated mean new dwelling occupied by 2019- 2020 = 500. Estimated population increase = 1,500.
16. WSP's Reg 19 Traffic Report is based on the 2018 DDTM study which undertook a detailed analysis of the rural road network the other (western) side of the A256 using disaggregated SERTM data, Node Impedance Calculation (ICA), mapped out on a VISUM Network map. This established benchmark capacity PCU per Lane data for a range of defined link types including 'Rural Roads' and 'Minor Road Rural Village (30mph)'.
17. In their Sustainability Appraisal of Growth Options in the Dover District Council Local Plan Topic Paper: Overarching Strategy (Part 1) point 1.5. DDC undertook to 'assess growth options in terms its likely effects on environmental...using available evidence including commuting patterns, transport infrastructure, traffic congestion (and related air quality and carbon emissions issues)'. Although some data was considered, the detailed data was not considered when evaluating the impact of the Aylesham or Elvington sites
18. In the SA LUC use ONS - Nomos data, labor market statistics and DataShine ESRC BODMAS (using 2011 ONS Census data) to establish commuter patterns. Based on this the Reg 19 SA Appendix B confirms the District's residents 'rely heavily on cars to...access employment,

education, amenities and services' and predicts an increase of commuting from Aylesham to Sandwich (the district's 2nd commuting hub) as well as Thanet and Deal.

19. DDC's LDP Sustainability Appraisal identifies Sandwich as the District's key centre for inbound commuting. The Reg 19 provision of employment sites in Aylesham have been reduced by 85% from 1013 jobs in Reg 18 to 263 jobs in Reg 19. (source WSP main Report (i) Reg 18 and (ii) Reg 19. Reduced onsite employment will increase site generated commuting traffic.

(NOTE The Reg 19 Sustainability Assessment has not been revised to reflect the 85% reduction of onsite jobs, calling its conclusion about Aylesham site sustainability into question).

20. The Local Plan (Reg 18 and Reg 19) Sustainability Appraisal for the proposed sites in Aylesham and Elvington is – for traffic purposes - limited to recording the proximity of proposed dwellings to a bus stop and / or train station. The ONS - Nomos data, labor market statistics and DataShine ESRC BODMAS conclusions in the Sustainability Assessment, analysis of car dependency and commuting patterns or journey to work data was considered on the site assessments. This appears to limit real world applicability.

21. None of the evidence base on car dependency in Greenfield ex-urban developments nor car-dependency and the commuting pattern evidence appears to have been considered.

22. SA Section 6.207 states that Eythorne and Elvington already have 'relatively good access to existing local rail and bus services'. However Eythorne railway station closed to passenger traffic in 1948. In response to our Reg 18 RFI DDC stated that the SA did not claim Elvington 'already have relatively good access to existing local rail and bus services'. However, this is a direct quote from the SA - 6.207. This claim is factually false but is a base assumption used to justify Aylesham and Elvington's compliance with SA 4: To reduce the need to travel and encourage sustainable and active alternatives to road vehicles.

23. MHCGL guidance on traffic evidence for LDP states 'Critical locations on the road network with poor accident records should be identified in order to determine if the proposed land allocations will exacerbate existing problems and whether highway mitigation works or traffic management measures will be required to alleviate such problems. The accident records should be compared with accident rates on similar local roads'. There have been 4 deaths on Holt / Easole Street within 1.5 miles of the Aylesham Road junction. How many deaths are required in order for Holt Street to qualify as having a poor accident record?

4.2 Base Data Availability

One problem we encountered is availability of the granular base data that forms the building blocks for the LDP traffic and commuting evidence. We can't find base data. For example

The Dover Transport Model (DTM) Local Model Validation Report November 2016 is not available. So we have to rely on DDTM for the base modelling data for additional trips zonal distribution.

In the SA LUC use ONS - Nomis data, labour market statistics and DataShine ESRC BODMAS (using 2011 ONS Census data) to establish commuter patterns. However, this data set is not available for review.

The SA conclusions suggest a data granularity (e.g. the availability of Aylesham to Deal commuting numbers), that is absent from the methodology employed in LUC's site-specific sustainability assessments. This would matter less were LUC's Reg 19 report not used inflated employment assumptions for Aylesham creating unsound sustainability conclusions.

4.3 Employment Evidence Driving Commuting

1. The Reg 19 SA 7.51 (Reg 19 Strategic employment allocation policies) and Table 7.6 include former Snowdown Colliery as a strategic site. This incorrect. Aylesham site employment has been reduced from 1,013 onsite jobs in Reg 18 to 267. The sustainability conclusions have not been reassessed. This clearly undermines the deliverability NPPF para 72 b.

2. DDC provided site employment estimates to both LUC and WSP for SA and Traffic modelling purposes. Aylesham's employment modelling conclusions in the 2022 SA are contradictory and misleading. They don't align with the WSP's modelling numbers, which reduced by 84% from 1,013 onsite jobs in Reg 18 to 267 on site jobs in Reg 19.

3. In the Reg 19 SA main report (3: 4.75, SA 3 - 7.160 and table Table 7.6) still cite Aylesham as a 2nd largest employment hub with Land off Holt Street identified as ++ positive effect against. Also true for Reg 19 Appendix B growth and spatial options findings by SA objective, which offer conclusions based on inflated on site employment numbers numbers In Appendix F Snowdown employment drops to a 'Minor positive (+)'. This looks like a revised assessment that hasn't then been added into the main report.

4. Trip generation for employment sites (approach agreed with NH and KCC) the potential jobs were calculated using the SQM area of the site and dependant on the land use type an employment number was provided have not been used in the SA. As onsite employment is a key indices of sustainability:

- a. Why is the discrepancy in Aylesham employment number in the SA?
 - b. Has the South Aylesham site's sustainability been reassessed by LUC to reflect the reduction in onsite employment?
 - c. Why is WSP using a different employment assumption to LUC?
5. Has the council assessed the financial viability of the development proposal for Snowdown Colliery? The land owner informs us their existing tenant has a substantial remediation liability and is unaware of any ongoing discussions about reassigning this not have they aware of any detailed financial backing that would fund the redevelopment of this site. Obviously a site needs to be deliverable. Has it passed deliverability benchmarking test to justify the site's continued inclusion in the LDP?

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- 1 For the area bounded by A2, B2046, A256 and A257 has significantly less robust traffic evidence, **effective mitigation enshrined in a Local Plan policy** rather than deferring this to a S106 negotiation at the planning application stage.
- 2 **Use robust evidence** that is reliable, objectively collected recent data based on an understanding of the data collected and the characteristics of the plan area without relying on unjustified assumptions or unsupported assertions. Engage with the significant body of evidence that clearly shows that an LDP with **76%** of all proposed housing is on Greenfield sites is inherently unsustainable. From the loss of irreplaceable agricultural land and habitat, to reinforcing the district's car dependency by creating greenfield sprawl that will significantly change the rural character of the north west of Dover District. DDC's Reg 19 LDP DDC's will deliver the wrong houses in the wrong locations. It won't improve the environment or mitigate climate change.
If the purpose of the planning system is (as set out in the NPPF) to ensure that sustainable development is pursued in a positive way, we believe this plan cannot be considered to be justified and it will not enable the delivery of sustainable development.
- 3 Initiate active ongoing constructive engagement with Canterbury City Council to maximise the effectiveness of local plan in the context of strategic cross boundary matters and generate a coherent evidence-based strategy that deliverable plan that is not predicated on nebulous or unsupported claims of sustainability enabled by a failure to engage with a robust, impartial and objective evidence base.

As this section is supposed to be about the evidence base, listed below (and in our Comments Report attached) are key issues identified with the evidence base used highlighting inconsistencies, a failure to consider sufficiently detailed traffic data, identifying unjustified assumptions and unsupported assertions that underpin the Reg 19 LDP, undermining plan soundness.

Traffic Evidence Summary

- 1 Despite the Ministry of Housing, Communities & Local Government 2020 LDP guidance stressing the importance of contextual data such as travel to work areas (and that evidence needs to inform what is in the plan and shape its development rather than being collected retrospectively). Although referenced at a District level in the Sustainability Assessment, none of this contextual or empirical evidence has been considered in the LDP strategic site allocation process in relation to the impact of Aylesham and Elvington on the road network.
- 2 From ONS data to SA commuter patterns and to SHMA 2017 all highlight a strong trend of out-commuting. ONS data shows high car reliance in all major strategic site locations.
 - 1 WSP's DDTM (Reg 18 Traffic Plan Assessment 2020 / Regulation 19 Transport Modelling Forecast Main Report or Appendices) report conducted detailed modelling of the Dover and Deal traffic. Other areas were '**modelled in significantly less detail**'.
 - 2 Despite recognising the LDP will 'lead to large increases in flow' in Aylesham, WSP's analysis is limited to a handful of ATC's (automatic traffic counters) on the B2046 1n 2019. WSP's report offered no conclusions on the area north of the A256 as it was outside the DDTM area. Although concerns were raised at Reg 18 no new traffic data or modelling has been introduced at Reg19.
We understand KCC Highways have 'requested projected development flows leaving the currently modelled areas in that direction to sense check on any need to extend the models'. However, given the site-specific impact focus of S106 means it is not an effective framework for mitigating cumulative impacts from multiple spatially distributed developments on a rural road network, we believe an specific LDP policy is required.
- 3 '*Critical locations on the road network with poor accident records should be identified in order to determine if the proposed land allocations will exacerbate existing problems and whether highway mitigation works or traffic management measures will be required to alleviate such problems. The accident records should be compared with accident rates on similar local roads*'. (MHCGL guidance on traffic evidence for LDP)
There have been 4 deaths on Holt / Easole Street within 1.5 miles of the Aylesham Road junction. How many deaths are required in order for Holt Street to qualify as having a poor accident record and to be included in the detailed traffic modelling?
- 1 The Elvington data consists of ATC and manual data counts. By citing proximity to A256, the implicit study assumption is that the A256 is the primary route used. No empirical data collected on the traffic heading to the A2 / M2 / M26 or M25 from Elvington.

- 1 WSP recognised the porosity between the B2046 and the adjacent rural road network, yet provided no analysis of (1) the rural road capacity restrictions or (2) of baseline cumulative traffic from development to date or (3) the projected increase on the road network from the LDP.
- 2 According to WSP, Highways England approved matrix information from the South East Regional Transport Model (SERTM) used by WSP in Deal was only disaggregated using the 2011 Census data for the DDTM area. As noted in 2.2.13 of WSP's 2018 DDTM the SERTM data is very coarse and with no disaggregation would provide little insight into Elvington and Aylesham commuting patterns via the rural road network
- 3 There is an extensive resource of rural road network ATC data from Aylesham's s106 TA's (2007/ 2014/2018 etc.) that could have been consulted. KCC Highways confirm the ACT data used for Phase 2b of the Aylesham Village Expansion has not been considered.
- 4 WSP's observation on likely traffic impacts of proposed Aylesham Development on the rural road network is restricted to '*Holt Street is not modelled but anticipated trips for Aylesham Development will leave the network here*'. WSP implicitly assumed all traffic for Aylesham will access and leave the site form Dorman Ave North. ATC and modelling evidence shows this assumption to be unsound.
- 1 In their Reg 18 comments on Aylesham KCC raised concerns over '*the impact of the development on the highway network, particularly as Aylesham has no secondary education provision so the need for travel by private vehicle for secondary school age children may be higher than in other areas of the district*'. No modelling of the associated traffic impacts has been provided.
Note - During the development of the 2015 DTM and 2018 DDTM car trips which are made to schools were modelled by WSP. Despite the absence of a Secondary School no similar exercise has been conducted on
- 2 By highlighting the need to expand St Joseph's primary, KCC's Reg 19 comment identify the shortfall of primary places in Aylesham. Unlike in the DDTM area WSP has not modelled car trips which are made to schools for Aylesham or Elvington. There are 378 primary places in Aylesham for a current population of 6,000 with a further 630 houses proposed in this LDP. This is below the national average. As a result the pupils attend schools across the area. For example at Goodnestone & Nonington CE Primary School 43% of pupils come from Aylesham and 30% Elvington creating up to 4 car trips of 1-3 miles each per day.
- 3 KCC Highways informs us that education commuting will be dealt in a Transport Assessment. We have been unable to locate any education commuting evidence in the Transport Assessment evidence for (App no 07/01081) for either Phase 1 or 2 in Aylesham or a School Travel Plan as recommended in Managing Our Roads (DfT, 2003) and The Future of Transport – a Network for 2030 (DfT) White Paper, 2004.
- 1 In Reg 18 comments, KCC raised concerns regarding the additional flow anticipated on Shepherdswell Road due to the narrow, rural nature of the road. Holt Street / Easole St / Sandwich Rd are similar in terms of their physical constraints and traffic levels. Both are 'rat runs' between the A2 A256 and significant coastal settlements. In relation to application 19/00381, Richard Smith (Senior Development Planner - KCC Highways) accepted a reduced vision splay from 45m to 25 metres on Easole Street based on an independent highways report describing Easole Street as being a narrow road, '*in a rural location with a tight bend to the west and a junction to the east. The road has no footways, with high hedges bordering each side of the road, creating an extremely constrained environment. There is evidence of vehicles crossing the centre line; the markings are very worn and hardly visible*'.
- 1 ORR Passenger entries and exits for Aylesham data shows passenger numbers per head of population dropping Jan 2016- Dec 2020.
 - Passenger entries and exits increased by 19.6%. 2016-17 to 2019-20.
 - Aylesham Population increased by 30% over the same period.

NOTE _ 20-21 data discounted because of Covid. 2016 Population=4,980. By March 2018, 493 new dwellings had been completed. Estimated mean new dwelling occupied by 2019- 2020 = 500. Estimated population increase = 1,500.

- 1 WSP's Reg 19 Traffic Report is based on the 2018 DDTM study which undertook a detailed analysis of the rural road network the other (western) side of the A256 using disaggregated SERTM data, Node Impedance Calculation (ICA), mapped out on a VISUM Network map. This established benchmark capacity PCU per Lane data for a range of defined link types including 'Rural Roads' and 'Minor Road Rural Village (30mph)'
- 1 In their Sustainability Appraisal of Growth Options in the Dover District Council Local Plan Topic Paper: Overarching Strategy (Part 1) point 1.5. DDC undertook to '*assess growth options in terms its likely effects on environmental...using available evidence including commuting patterns, transport infrastructure, traffic congestion (and related air quality and carbon emissions issues)*'. Although some data was considered, the detailed data was not considered when evaluating the impact of the Aylesham or Elvington sites.
- 1 In the SA LUC use ONS - Nomos data, labor market statistics and DataShine ESRC BODMAS (using 2011 ONS Census data) to establish commuter patterns. Based on this the Reg 19 SA Appendix B confirms the District's residents '*rely heavily on cars to...access employment, education, amenities and services*' and predicts an increase of commuting from Aylesham to Sandwich (the district's 2nd commuting hub) as well as Thanet and Deal.

- 1 DDC's LDP Sustainability Appraisal identifies Sandwich as the District's key centre for inbound commuting. The Reg 19 provision of employment sites in Aylesham have been reduced by 85% from 1013 jobs in Reg 18 to 263 jobs in Reg 19. (source WSP main Report (i) Reg 18 and (ii) Reg 19. Reduced onsite employment will increase site generated commuting traffic. (NOTE The Reg 19 Sustainability Assessment has not been revised to reflect the 85% reduction of onsite jobs, calling its conclusion about Aylesham site sustainability into question).
- 1 The Local Plan (Reg 18 and Reg 19) Sustainability Appraisal for the proposed sites in Aylesham and Elvington is – for traffic purposes - limited to recording the proximity of proposed dwellings to a bus stop and / or train station. The ONS - Nomos data, labor market statistics and DataShine ESRC BODMAS conclusions in the Sustainability Assessment, analysis of car dependency and commuting patterns or journey to work data was considered on the site assessments. This appears to limit real world applicability.
- 1 None of the evidence base on car dependency in Greenfield ex-urban developments nor car-dependency and the commuting pattern evidence appears to have been considered.
- 2 SA Section 6.207 states that Eythorne and Elvington already have 'relatively good access to existing local rail and bus services'. However Eythorne railway station closed to passenger traffic in 1948. In response to our Reg 18 RFI DDC stated that the SA did not claim Elvington 'already have relatively good access to existing local rail and bus services'. However, this is a direct quote from the SA - 6.207. This claim is factually false but is a base assumption used to justify Aylesham and Elvington's compliance with SA 4: To reduce the need to travel and encourage sustainable and active alternatives to road vehicles.
- 1 MHCGL guidance on traffic evidence for LDP states 'Critical locations on the road network with poor accident records should be identified in order to determine if the proposed land allocations will exacerbate existing problems and whether highway mitigation works or traffic management measures will be required to alleviate such problems. The accident records should be compared with accident rates on similar local roads'. There have been 4 deaths on Holt / Easole Street within 1.5 miles of the Aylesham Road junction. How many deaths are required in order for Holt Street to qualify as having a poor accident record?

Base Data Availability

One problem we encountered is availability of the granular base data that forms the building blocks for the LDP traffic and commuting evidence. We can't find base data. For example

- The Dover Transport Model (DTM) Local Model Validation Report November 2016 is not available. So we have to rely on DDTM for the base modelling data for additional trips zonal distribution.
- In the SA LUC use ONS - Nomis data, labour market statistics and DataShine ESRC BODMAS (using 2011 ONS Census data) to establish commuter patterns. However, this data set is not available for review.

The SA conclusions suggest a data granularity (e.g. the availability of Aylesham to Deal commuting numbers), that is absent from the methodology employed in LUC's site-specific sustainability assessments. This would matter less were LUC's Reg 19 report not used inflated employment assumptions for Aylesham creating unsound sustainability conclusions.

Employment Evidence Driving Commuting

- 1 The Reg 19 SA 51 (Reg 19 Strategic employment allocation policies) and Table 7.6 include former Snowdown Colliery as a strategic site. This incorrect. Aylesham site employment has been reduced from 1,013 onsite jobs in Reg 18 to 267. The sustainability conclusions have not been reassessed. This clearly undermines the deliverability NPPF para 72 b.
- 1 DDC provided site employment estimates to both LUC and WSP for SA and Traffic modelling purposes. Aylesham's employment modelling conclusions in the 2022 SA are contradictory and misleading. They don't align with the WSP's modelling numbers, which **reduced by 84%** from **1,013** onsite jobs in Reg 18 to **267** on site jobs in Reg 19.
- 2 In the Reg 19 SA main report (3: 4.75, SA 3 - 7.160 and table Table 7.6) still cite Aylesham as a 2nd largest employment hub with Land off Holt Street identified as ++ positive effect against. Also true for Reg 19 Appendix B growth and spatial options findings by SA objective, which offer conclusions based on inflated on site employment numbers numbers. In Appendix F Snowdown employment drops to a 'Minor positive (+)'. This looks like a revised assessment that hasn't then been added into the main report.

	<p>1 Trip generation for employment sites (approach agreed with NH and KCC) the potential jobs were calculated using the SQM area of the site and dependant on the land use type an employment number was provided have not been used in the SA. As onsite employment is a key indices of sustainability:</p> <ol style="list-style-type: none"> 1 Why is the discrepancy in Aylesham employment number in the SA? 2 Has the South Aylesham site's sustainability been reassessed by LUC to reflect the reduction in onsite employment? 3 Why is WSP using a different employment assumption to LUC? <p>2 Has the council assessed the financial viability of the development proposal for Snowdown Colliery? The land owner informs us their existing tenant has a substantial remediation liability and is unaware of any ongoing discussions about reassigning this not have they aware of any detailed financial backing that would fund the redevelopment of this site. Obviously a site needs to be deliverable. Has it passed deliverability benchmarking test to justify the site's continued inclusion in the LDP?</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	<p>Having raised concerns about the robustness, consistency and impartiality of the evidence base at Reg 18, our concerns have been ignored. In Feb 2021 DDC confirmed that more detailed traffic evidence would be collected prior to a Reg 19 submission. This hasn't happened. KCC now suggest an iterative data collection process that - we believe - doesn't comply MHCGL guidance on traffic evidence for LDP.</p> <p>The C195 is badly impacted by the cumulative impact of traffic from Sandwich, Deal, Eastry, Woodnesborough, Sholden (via Drainless Road, Heronden Rd and Thornton Road), Elvington and Aylesham, with pre-pandemic baseline traffic of 90,800 vehicles a month. (MLM / K & M SURVEYS 2018 - 7 day total (East and West) = 20,888 traffic movements)</p> <p>KCC Highways confirm Holt Street, Easole Street and Sandwich Road route (Linking B2046 and Sandwich) is classified as the C195 and is "not a secondary route, as defined in our road hierarchy, and 'for reasons of various highway constraints along the corridor". It should, therefore, be protected from the cumulative or inappropriate traffic impacts. However, having failed to collect or consider any traffic impact evidence for this route, the Reg 19 proposes to rely on s106 funding on an application by application basis. Based on our experience on Aylesham (DOV/07/01081 and DOV/13/0120), Nonington Parish Council believe that the site-specific impact focus of S106 means it is not an effective framework for mitigating cumulative impacts from multiple spatially distributed developments on a rural road network. It is impossible to disaggregate traffic flow to attribute the increase to specific site.</p> <p>We note that Reg 19 Housing Policy 4.21 states that cumulative impact all sites allocated in this Plan on common road links must be considered. However, in judging how this might work in practice, we reviewed how the cumulative traffic impacts from the current plan period developments . The ourcome of this is set out in the attached report.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Dover and Deal Transport Model Local Plan Forecasting Report

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><u>Highways and Transportation</u>: The general methodology for the forecasting work has been agreed with the Local Highway Authority. This report provides the high-level impact assessment of the Local Plan growth on the existing highway network in focussed locations. However, it does not at this stage explore potential mitigation measures, which will need to be resolved before a full steer can be provided in relation to the acceptability of the proposed sites.</p> <p>It is noted that the Dover VISUM model does not include coverage of the entire geographical area of Dover and as such some of the proposed allocation sites are located outside of the area of coverage are subsequently assessed using a spreadsheet model approach. Whilst from a consistency basis, ideally, the VISUM model would have been extended to encompass the entire district, in this case a hybrid modelling methodology is an acceptable form of assessment as most of the Local Plan growth is located within the VISUM simulation area and the routing through the network outside of the can be identified relatively efficiently.</p> <p>The Local Highway Authority has the following comments to make on the contents of the report: -</p> <p><i>Executive Summary</i></p> <p>The current methodology of focussing on capacity improvements at Whitfield Roundabout and the Duke of York Roundabout is necessary so that the resulting redistribution of traffic can be considered in full before the scope of further assessment on other parts of the network can be fully scoped and explored. Therefore, the Local Highway Authority would like to reserve the right to review the required scope of further highway assessment.</p> <p>It is understood that Local Junction Modelling was also to include the A258/Deal Rd junction.</p> <p>KCC requires an outline of the strategy for each of the junctions listed in Table 5.</p> <p><i>1 - Introduction</i></p> <p>1.5.1 Manston Airport – It is relevant to highlight the recent DCO decision to reopen and develop Manston Airport in Thanet into a dedicated air freight facility able to handle at least 10,000 air cargo movements per year. The examination process for this development has highlighted that this will generate a material level of additional traffic within the Dover District (particularly on the A256 corridor), although the forecast report is currently silent on this point. Consequently, further sensitivity testing for the airport may now be required to enhance the robustness of this assessment.</p> <p>Consideration should also be given to the impacts of bifurcation of HGV traffic arising from the Lower Thames Crossing and with the potential reassignment of traffic how this could impact Dover's network and create a need for further junction modelling.</p> <p><i>2 - Forecasting Approach</i></p> <p>2.2.1 – The inclusion of just a single forecast year (2040) is noted at this stage, however as the process continues and any further highway mitigation is identified, it may be necessary for interim year assessment to be provided to assist in the identification of necessary infrastructure triggers.</p> <p>2.4.7 – This methodology has been agreed, however it is important to consider the cumulative impact of settlements where there are numerous smaller development sites (less than 100 dwellings) are within close proximity, as this could have a disproportionate impact on certain junctions within a polygon zone. This may include clusters of smaller sites in Wingham, Sandwich, Eastry, Walmer/Kingsdown and St Margaret's-at-Cliffe, which could respectively have unseen impacts on the A257, A256 and A258 corridors.</p> <p><i>3 - Forecast Transport Infrastructure</i></p> <p>3.2.6 – The wording should be updated to reflect that Albert Road link scheme (Court Marsh Road, Deal) has been completed and may need to be included in the forecast scenarios.</p>

4 - Forecasting Demand

Table 4-2 – Whitfield Phase 1 (planning reference 10/01010) appears to be missing from this list – Whilst the position stated in section 3.3.6 & 3.3.7 is understood clarification is required as to why the balance of housing up to 800 dwellings is not included in this table. E_1004 (planning reference 10/01011) also requires clarification as the table suggests that this includes new access road on the A256 and link to Archers Court Road, whereas the highway authority understands that this was secured under planning reference 10/01010. Furthermore, S_104 and S_129 have been dropped from the DM scenario whereas they were included previously in the Reg. 18 DM.

4.4.7 – 4.4.10 – The proposed growth factors for HGV's are noted and agreed for the purpose of the forecasting report, however it is evident that the longer-term impacts of Brexit and the potential arrangements for associated infrastructure such as the DEFRA Border Control Post may have a bearing on future distribution of HGV traffic on the strategic and local highway network, especially at the Whitfield and Duke of York Roundabouts. Therefore, port-based growth forecasts may need to be reviewed.

5 - Local Plan Assessment

5.2.19 - 5.2.23 – The diagram shows areas of the WUE under the potential control of the land promotor, however, does not outline how the remaining sections of the allocation will be accessed. It is recommended that a full access plan is produced to clarify exactly how the entire allocation will come forward. It is essential that access agreements are reached between local plan stakeholders. It is also relevant to point out that no technical drawings have been submitted to ascertain whether the new junction onto A256 is achievable. The stopping up of the existing A256/Sandwich Road priority junction should also be included within this scenario.

6 - Results

Figures 6-56 and 6-84 – The DS1 and DS2 assessments indicated that mitigation at the Whitfield Roundabout will lead to the transfer of trips onto less congested routes through Lydden in the AM peaks. Whilst this route is theoretically capable of accommodating some additional traffic flow at a link level, there is a concern that this could lead to strategic port bound HGV traffic rerouting through this part of the road network, which would not be appropriate.

8 – Local Junction Models

8.1.1 - It is understood that Local Junction Modelling was also to include the A258/Deal Rd junction.

8.1.55 – The proposal for signalling the London Road/Alkham Valley Road would be subject to further technical approval by KCC Highways, although further consideration should be given to the implications of a left-turn ban from Alkham Valley to fully address the departures from design guidance. This would include potential delay, geometry at the London Road/Whitfield Hill roundabout and any foreseen impacts on capacity from U-turns.

8.1.76 – The proposal for signalling the Dover Road/Station Road junction would again be subject to further technical approval by KCC Highways.

8.2.7 and 8.2.8 – Noted that further discussion is required between DDC and KCC Highways to determine potential improvements at these junctions, we would anticipate that mitigation is agreed prior to publishing the IDP.

9 - External Local Plan Sites

Cluster 1 (Aylesham and Wingham)

The Junction of Staple Road/B2046 is not included within the network diagram. This junction is subject to peak hour traffic queueing and there are two allocations proposed that access the B2046 via this junction, as such this should be included within the assessment.

KCC maintains that the A257/B2046 junction, although limited in what can be achieved in the way of mitigation, should be modelled to inform KCC's position on the allocations within this cluster. All options for mitigation should be considered and discounted with appropriate commentary. An important factor in the consideration of these sites is the significant amount of growth proposed in the Draft Canterbury Local Plan, and we would recommend that Dover District Council works with Canterbury City Council and KCC as Local Highways Authority to fully scope the cumulative impact of both Local Plans on local network, along with the additional options this may present for effective mitigation at Wingham.

KCC would recommend that the cluster also incorporates the A257/Preston Hill junction, and that trips leaving/joining the network at Holt Street should be quantified to assess impact on this route to Sandwich.

Cluster 2 (Sandwich North & Ash)

KCC has concerns that provision of just one point of access in Ash means that turning movements at the Sandwich Road/A257 junction are underestimated.

Cluster 3 (Sandwich South)

	<p>It would seem prudent to extend the model network into Sandwich to assess the cumulative impact of proposed developments in the town. The increase of flows at the A258/Deal Road junction in the PM peak would in my view warrant further modelling to test the capacity of this junction with Local Plan growth.</p> <p>Cluster 5 (Elvington)</p> <p>The increase of flows at the Shooters Hill junction would in my view warrant further modelling to test the capacity of this junction with Local Plan growth.</p> <p>KCC would also recommend that traffic routing from the Elvington and Shepherdsweil allocations via the Sandwich Road/Mill Lane junction is quantified to assess the impact of this route into Sandwich.</p> <p>Cluster 6 (Alkham Valley Road/Hawkinge)</p> <p>Dover Local Plan impacts at the A260/Spitfire Way junction (outside of the Dover District) should warrant proportionate contributions from the sites identified to be adding the most traffic to the Alkham Valley corridor.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The County Council welcomes the inclusion of this document in the evidence base for the Local Plan. The archaeological characterisation represents the most up-to-date attempt to tell the story of Dover's development over time and assess the significance of this story and the heritage assets that underpin it. It will serve as a very useful tool for developers trying to assess the impact of their proposals and for planners who will draw upon it to inform their decision-making. It will also be of great interest to the community who may wish to learn more about the history of the town and the archaeological remains both beneath their feet and in some cases still visible in front of them. This is a once in a generation document of great importance.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP53
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I oppose the Unsound Selection of SAP53(RIN002/RIN004) as being Non-compliant with the NPPF Sustainability and Proportionate Evidence requirements and with DDC Policies SP3 and/or SP4</p> <p>Site History.</p> <p>I consider the Site History to be a material fact for consideration.</p> <p>Ringwould Alpines Plant Centre was a privately owned aprox.2.3 ha Horticultural Nursery situated in the Kent North Downs AONB with a vehicular access onto the A258 Dover road. The nursery activity serving commercial, corporate and public customers was centred around 10 Polytunnels on what is now referred to as RIN002 and 2 Polytunnels on RIN004. RIN004 housed a timber potting shed ,several raised timber beds for display of shrubs and bedding plants and a block built toilet/storeroom. There was also a small gravelled parking area adjacent to the Entrance on the A258 Dover Road. There was no external lighting so public access was limited to daylight hours and the site was closed to the Public throughout the Winter.</p> <p>The Plant Centre holding includes that section of Footpath ER14 which forms the boundary with my property, (DDC note: redacted), and a small strip of woodland the other side of Footpath ER14 lying between Landway and Popples Field.</p> <p>The whole site was purchased by the current owners Kingsdown Water in 2016/17 while they were seeking a Change of Use Planning Permission for the erection of a bottling plant with supporting infrastructure on the parts of the site now identified as RIN002 and RIN004.</p> <p>This PP Application was refused on Appeal and the site remains a Greenfield Agricultural site for Planning Purposes.</p> <p>Kingsdown Water have no Agricultural/Horticultural Interest in the site and have not put the site on the open market as a horticultural holding.</p> <p>The RIN002 and RIN004 parts of the site have been leased and apparently sub-leased to a succession of non Agricultural tenants carrying out a variety of non Agricultural Activities none of which have had the benefit of Planning Permission. The remainder of the site has been left unattended to and is becoming overgrown and untidy, including Footpath ER14.</p> <p>This has resulted in complaints from local residents and the site is now the subject of Enforcement Action which has yet to be resolved.</p> <p>Planning Contravention Notices completed by the owner and tenant(s) have revealed that various small businesses have been renting the land for builder's yard type purposes and that the mobile home on the site is for the night watchman.</p> <p>The activities on the site have resulted in considerable degradation and contamination of the land which would require considerable restitution measures to return it to it's original state. See attached photos</p> <p>In the first HELAA three parts of Ringwould Alpines identified as RIN002, RIN004 and RIN006 were put forward by Ringwould Alpines's Agent for inclusion as development sites in this Dover Local Plan.</p> <p>In that HELAA RIN002 was put forward as a 1.19ha PDL site development site for 30 houses but this was considered to be unsuitable for development, RIN004 as a 0.22ha PDL site for 5 houses but was considered to be suitable RIN006 as a 0.7ha Greenfield site was considered to be unsuitable for development.</p> <p>Only RIN004 was taken forward as a Reg 18 Consultation Proposal but RIN002 was added to RIN004 to form SAP53 in the Sect19 Consultation Proposal</p>

RIN002 and RI004 are now described in the HELAA2022 as being greenfield after representations were made about it's earlier incorrect HELAA description as PDL.

Two remaining parts of Ringwoud Alpines also owned by Kingsdown Water but not put forward for inclusion in the Local Plan proposals are a section of the Public Footpath ER14 running from Dover Road to Popples Field between Ringwoud Alpines and my property (**DDC note: redacted**), and a small approx 0.1ha strip of woodland located on the other side of the footpath between Landway and grazing land known as Popples Field.

The only vehicular access to these parcels of land is through the rest of the Ringwoud Alpines holding so these parcels of land will be landlocked unless vehicular access provisions are made over RIN002 and RIN004.

My property, (**DDC note: redacted**), is a 1.6ha Residential/Equine property the other side of the footpath which forms my boundary with Ringwoud Alpines.

My reasons for opposing the selection of SAP53 follow below.

Unsound Site Selection

I consider the Site Selection of SAP53(RIN002/RIN004) to be **unsound** for the following reasons:

1.Non-compliant being not positively prepared as per the NPPF sustainable development and proportionate evidence requirements and non-compliant with either of DDC policies SP3 and P4.

The Settlement Hierarchy was reviewed to ensure that all Local plan development sites proposals were **sustainable**.

In the Settlement Hierarchy Ringwoud is one of the small villages where only development **inside** the Village Settlement Boundary could be accepted but SAP53 is **outside** the Ringwoud Settlement Boundary. See attached Ringwoud Settlement Boundary Map

In SP3 and SP4 the overarching Sustainable Site Allocation Selection criteria is that " The distribution of housing and economic growth in the District will therefore primarily be based on the Settlement Hierarchy, and influenced by site availability, environmental constraints and factors of delivery"

I submit because SAP53 does not comply with the primary Settlement Hierarchy Selection criteria that this rendered the Influencing factors criteria on which the SP53 proposal appears to be based irrelevant.

I submit that ,because of non-compliance with the Sustainability Requirements of the NPPF and policies SP3 and SP4, the SAP53 proposal is **Unsustainable and Unsound**

1 Not justifiable as per the NPPF requirement for it to be based on proportionate evidence.

Inadequate Consideration of Representations made relating to RIN004 and RIN002 has resulted in unbalanced Council Responses and Reg19 Proposals because 21 respondents opposed the RIN004 proposal on issues also relevant to RIN002 and of these 6 directly referred also to RIN002 which was not a Reg 18 proposed site.

The scale of opposition to development of RIN002 is not reflected in the Council's summary of responses in respect of omitted sites because they were raised under the heading of the only Ringwoud site proposed in the Reg18 proposal i.e. RIN004.

3 respondents supported the RIN004 proposal of whom 2 including the owner(s) of the site requested the addition of RIN002.

The Council's responses to all the proposed Sect 18 proposal representations is generic not site specific and are not set out alongside the individual Site Allocations proposals.

This " one size fits all" approach does not address site specific issues and results in generalised non-site specific Mitigation measures .

There were 21 opposing representations mainly from local residents and only 3 supporting representation of which 1 was factually incorrect from a local District Councillor claiming the existing site access was adequate for a large development on RIN002, RIN004 and RIN006 and the other was from the site owner, Messrs Bomer a.k.a. Kingsdown Water, seeking to have RIN002 added to RIN004 to maximise the potential housing capacity of his site asking for 41 dwellings and claiming incorrectly that the site was a brownfield site..

In the Reg 19 proposals. said to have taken into account all of the representations together with all other relevant factors, RIN002 has been added to RIN004 to form SAP53(RIN002/RIN004). It can only be concluded that the Council attach little value to the representations made by local residents but great importance to those from the site owner which does nothing to promote public confidence and participation in such Consultation exercises.

I consider the above constitutes **disproportionate** consideration being given to Reg 18 supporting comments resulting in the **unsustainable and unsound** SAP53(RIN002/RIN004) **Reg19 proposal** .

No new evidence emerged in the Regn 18 submissions to justify the addition of RIN002 to RIN004 at this final Reg19 stage of the Local Plan HELAA stage and the proposal itself contains no reason for the addition of RIN2 to SAP53.

Whatever evidence exists to justify the inclusion of RIN002 into the Local Plan at this final late stage must have existed and have been discounted right from the early HELAA stages.

Including RIN002 now at this last final stage of the Local Plan consultation stage makes submitting representations more difficult because of the discouraging, complicated and, to some residents, incomprehensible Reg19 Representation procedure format.

The site promoter now claims that selecting only RIN004 would landlock RIN002.

This potential landlocking issue has been apparent all the time and could be easily resolved..

What is different is that local residents have now discovered that, after being consulted at the Reg18 stage on RIN004 a 0.21 ha AONB site with a proposed indicative total of 5 houses and a capacity to accommodate 7 houses situated between 2 dwellings fronting onto the Dover Road, they are now faced with SAP53(RIN002/RIN004) a 1.41 ha AONB site with an indicative proposal for 10 houses but a capacity of 37 houses situated immediately between and behind several houses and intruding deep into the rest of the AONB on which they were not consulted.

Although there are common issues affecting both RIN002 and RIN004 the SAP53 proposal differs considerable in scale, character and impact on the AONB and neighbouring AONB properties than the earlier RIN004 proposal.

The site currently enjoys "dark skies" but the proposals would create a built up suburban street scene complete with power and telephone poles and wiring infrastructure together with street lighting where none exists which is inappropriate for the AONB setting.

The Site is in an area where >25% of the land is at least Grade 3 Agricultural Land.

The site would require construction of a new side turning serving the 10 new dwellings onto the busy A258 almost immediately opposite the existing Queens Rise side turning on the other side of this road causing increased risk of delays and accidents on this particular section of the A258.

RIN002 extends the SAP53 site further into the AONB making it visible from a popular Footpath ER14 see photos which is part of the Ringwold Alpines holding

and also from my property, (DDC note: redacted),. RIN002 extends behind four Dover Road AONB properties and also has a boundary with my AONB property,(DDC note: redacted),.

No account has been taken of the effects of RIN002 combined with RIN004 on these neighbouring properties.

Local residents who thought it was not necessary to make representations about RIN002 or those who made passing reference to RIN002 can now comment but to do so is rendered more difficult because of the **discouraging, complicated and, to some residents, incomprehensible Reg19 Consultation format** .

I submit the Council's RIN004 Reg 18 Consultation responses and the Reg 19 SAP53(RIN002/ RIN004) Representations format make this latest REG19 Proposal and Consultation **disproportionate, unsustainable and unsound and non-compliant with the Proportionate Evidence of the NPPF and Policies SP3 and SP4**..

3,The Evidence Base is Incomplete.

There are significant omissions in the Evidence Base covering the Landscape Sensitivity Assessment (LSA) 2021 and Landscape Character Assessment (LCA) Sections .

None of the Ringwold Alpines AONB sites are included in either of these Sections of the Evidence Base.

DDC Landscape Character Assessment (LCA) does not include the AONB which is said to be covered by the North Kent Downs AONB Management Unit's own LCA 2020 but this LCA is being updated and has not yet been published on the AONB Unit's website..

The DDC commissioned Landscape Sensitivity Assessment(LSA) report does not include the Ringwold Alpines AOB sites but because the selection criteria have not been published it has not been possible to identify why.

Many of the 33 Local Plan sites selected for a LSA are in neighbouring settlements and they include AONB and non AONB sites.

The Council claim that the AONB Management Unit were consulted and were satisfied with the proposed mitigation measures but this does not explain why RIN002 and RIN004 were not selected. .

	<p>These mitigation measures only address the Local Visual Impact (LVI) aspect of the Ringwoud Alpines sites whereas the LCA and LSA would have addressed not just the LVI impact but also a wide array of other factors affecting not just the AONB but also the wider surrounding landscape inside and outside the AONB.</p> <p>Issues such as dark skies, ambient noise levels, built environment and the effect on the lives of neighbouring householders, properties etc.</p> <p>I submit that, because the RIN002 and RIN004 evidence does not include an LCA or an LSA, the SAP53(RIN002/RIN004) element of the Evidence Base is incomplete and makes the SAP53 proposal unsound and non-compliant with with NPPF Sustainability and Proportionate Evidence Requirements and with DDC policies SP3 and SP4</p> <p>4. The Ringwoud Alpines Plant Centre holding is currently the subject of Unresolved Planning Enforcement action.</p> <p>This is in respect of non agricultural activities being carried out there without the benefit of Planning Permission. Various small businesses have been renting the land for builders yard type purposes and there is a mobile home on the site for a night watchman.</p> <p>These activities have resulted in considerable degradation and contamination of the site. See attached photos.</p> <p>The Availability and Deliverability of the Site would be affected by resolution of the Enforcement Action requiring a Planning Application and/or enforced reinstatement of the site to it's previous Agricultural/Horticultural state.</p> <p>I understand the Enforcement Officer is seeking advice on this at the moment.</p> <p>In these circumstances I submit that the RIN002 and RIN004 site should not have been included in the Dover Local Plan SAP53(RIN002/RIN004) proposal because all Local Plan sites should be Available and Deliverable and that this selection is unsound because of reasonable doubt over the Site's Availability and Deliverability.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I ask that Reg19 Proposal SAP53(RIN004/RIN004) be removed in it's entirety.</p> <p>The removal of SAP53 which is unsound because it does not comply with requirements of the NPPF nor with SP3 and SP4 will remove a proposal that is not legally compliant and sound from the Local Plan</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	HELAA - GTM003
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Housing and Economic Land Availability Assessment (October 2022)</p> <p>4.12. The Housing and Economic Land Availability Assessment (HELAA) (October 2022) identifies a future supply of land in the District which is suitable, available and achievable for housing and economic development uses over the Plan period to 2040. Whilst our Client supports the HELAA's proposed housing allocation at the Land at Northbourne Road, it is considered that there is justification to allocate the wider site for approximately 30 dwellings.</p> <p>4.13. The Suitability Assessment within the HELAA identifies the Site within ref. GTM003 justifies the allocation of the smaller site area, stating that the development of the entire site would have an unacceptable impact on the landscape and character of the settlement and that there are highways concerns regarding accessibility that would need to be overcome. The Sustainability Assessment identifies that the Site is within 55m of a conservation Area and adjacent to a Grade II Listed Building and therefore a Heritage Assessment would be required.</p> <p>4.14. The HELAA is generally supportive of the low density frontage development following the grain of those properties to the west could be accommodated without significant wider landscape impact. However it is stated that the development of the entire site at Northbourne Road, Great Mongeham would however have an unacceptable impact on the landscape and character of the settlement. The risk of surface water flooding is also identified as a reason as to why development is partly inappropriate on the Site. This is not an issue which was picked up within the 2020 HELAA (Appendix 3a HELAA 2020 Housing Sites Landscape Assessment). Furthermore, the Surface Water assessment on the Environment Agency website states that extent of flooding from surface water for the area is proposed to be very low on the Site. It is therefore unclear why the risk of surface water flooding has been raised as a concern.</p> <p>(DDC Note: Image removed - see attachment)</p> <p>The Landscape Appraisal states that as a greenfield site, any development would result in an inherent loss of rural landscape resource (as would be the case for other greenfield development). However, as the Site lies outside of any landscape designation, it is likely that the larger proposal can be accommodated within</p>

	<p>a sensitive scheme. In addition, the Landscape Appraisal states that whilst the remainder of the Site is considered 'unsuitable', given the high-level nature of the HELAA appraisal, there is scope for different assessment rankings to be concluded.</p> <p>4.16. Pertinently, the appended Sketch Design Document highlights that the development of approximately 30 dwellings can be accommodated across the wider site at an appropriate density without causing unacceptable impacts on the landscape and character of Great Mongeham.</p> <p>4.17. With regards to the transport, the appended Access Appraisal highlights that the Site has been assessed to ensure that the level of development can be accommodated via a single point of access, in the form of a priority junction.</p> <p>Comment: It is unclear why the risk of surface water flooding has been raised on the Site when this was not identified as an issue previously. It is recommended that this is removed as a reason as to why the Site is unsuitable.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). <p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	Level 2 Strategic Flood Risk Assessment

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Text Extracted from Document sent from Savills on Behalf of the Church Commissioners. Representation has been split across relevant areas of the Local Plan. Full attachment and introduction to Policy comments can be found under reference SDLP1265 for Shepherdswell Site and SDLP1266 for Eastry Site.) Page 92 of the Strategic Flood Risk Assessment uses the EA's 'Risk of Flooding from Surface Water' map to conclude that sections of the site are a 'high risk scenario'. Technical flooding and drainage work conducted on the site suggests that the EA may have over-estimated the risk of the flooding on this site. As discussed in paragraph 2.11 of this representation, due to the geology of the area, the site is likely to be only a low to medium risk of flooding. Recommendation: Amend the Level 2 Strategic Flood Risk Assessment so that the Land west of Coxhill Road has only a medium and low risk scenario of surface water flooding.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Regulation 19 Transport Modelling Forecasting Main Report
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Importantly, we would firstly note that we are unable to access the Appendices on the DDC website. We note that Appendix A, B, C and M contain relevant information to us. We would request that this information is supplied to us at the earliest opportunity to enable us to review and provide further response. Nonetheless, we have provided comments on the information that is available in the main report.</p> <p>Representation: DDC to supply copies of Appendices to National Highways for review</p> <p>We recognise that we have already agreed the future year model development, including trip generation, trip distribution, growth and committed development, as well as the forecasting approach as part of the Regulation 18 consultation.</p> <p>We see that Chapter 7 presents the results of the forecast 2040 Dover District Travel Model assignments, providing network statistics, impacted junctions and links and convergence of the forecast scenarios, with and without the Local Plan allocations, in the forecast year (2040).</p> <p>Representation: National Highways have reviewed the strategic results and are content that these are acceptable.</p> <p>We acknowledge that there are elements of the detailed modelling analysis at specific junctions where we requested additional detail but we note that, in general, these have been actioned within separate responses and will be resolved going forwards. The results presented are sufficient to make comments on the expected implication of highway changes on the SRN in relation to the delivery of the Local Plan</p> <p>It is identified in the report that the strategic model calculates the following SRN network junctions would exceed 85% volume to capacity in at least one scenario or time period. • A2 Whitfield roundabout • A2 Duke of York roundabout • A2 Whitfield interchange • A20 / Union Street • A20 / A256 York Street</p> <p>Following ongoing work between all parties, including outside of that reported in the Modelling Forecasting Report, the summary below outlines our current understanding and position with regards to mitigation requirements and ongoing work at each of these junctions.</p> <p><u>A2 Whitfield roundabout and A2 Duke of York roundabout</u></p> <p>The mitigation associated with these junctions has been agreed as per the above, with the design being reported in the Regulation 19 Transport Forecasting Main Report. As above, all parties are working together to further develop a delivery plan for the implementation of these mitigation measures and any further schemes which are be required to mitigate the Local Plan growth. DDC has committed to producing a detailed guidance note on developer contributions, which we have requested to be consulted on at the earliest opportunity above.</p> <p>Representation: National highways are content to proceed as per the process set out above</p> <p><u>New A2 junction – West of Whitfield</u></p> <p>The mitigation associated with this junction has been agreed as per the above, with the design being reported in the Regulation 19 Transport Forecasting Main Report. It is understood that this scheme is to be delivered by the Whitfield extension development. As noted above, this scheme should be referenced in the Infrastructure Delivery Report and Delivery Schedule.</p> <p>Representation: National highways are content to proceed as per the process set out above</p> <p><u>A2 Whitfield Interchange</u></p> <p>No mitigation is required at this junction in relation to the safe operation of the SRN, however we would note that the local highway network approaches to this junction operate over capacity. We would request to be consulted on any proposed mitigation requested by DDC/KCC</p> <p>Representation: National Highways be consulted on any proposed mitigation requested by DDC/KCC at the A2 Whitfield Interchange</p> <p><u>A20 Union Street</u></p>

It is not envisaged that significant mitigation will be required at this junction, however we would note that the strategic model assessments do not offer a level of consideration to demonstrate detailed signal operation. As per the section outlining other ongoing work below, we are awaiting information from WSP relating to the potential for the right turn movements from the A20 into Union Street to block the A20 mainline.

We would suggest that developments that are shown to impact this junction will require detailed junction analysis with particular consideration given to the likelihood of right turn movements from the A20 into Union Street, which have the potential to block back to the mainline.

Representation: Developments that are shown to impact this junction will require detailed junction analysis with particular consideration given to the likelihood of right turn movements from the A20 into Union Street.

A20 / A256 York Street

It is not envisaged that significant mitigation will be required at this junction, however we would note that the strategic model assessments do not offer a level of consideration to demonstrate detailed signal operation. Therefore, developments that are shown to impact this junction will require detailed junction analysis and potential mitigation.

Representation: Developments that are shown to impact this junction will require detailed junction analysis and potential mitigation

Other ongoing work

We have previously been consulted on Technical Note 1 (TN1), undertaken by WSP, which sought to address comments we raised in response to the Regulation 18 consultation. We responded to this consultation on 16 September 2022 and noted that it directly responds to questions previously raised by us and raises the need for further investigation into transport impacts of the Local Plan proposals on a number of key A2 and A20 junctions, namely: • The A2 Geddinge Lane / Coxhill and Lydden Hill signalised junctions • The A20 / A256 Woolcomber Street • The A20 / Union Street

We note that both the Infrastructure Delivery Plan and the Delivery Schedule make reference to the A2 Geddinge Lane/ Coxhill and Lydden Hill signalised junctions. The documents note how further discussions are required with us in relation to the A2 Lydden Hill and Coxhill Road junctions on the A2 to determine whether the ongoing transport modelling identifies mitigation being required at these junctions. We would request similar wording is included in the Infrastructure Delivery Plan and the Delivery Schedule in relation to the other two SRN junctions identified above where work is ongoing between all parties.

Representation: Infrastructure Delivery Plan and the Delivery Schedule should also reference that further discussions are required with us in relation to the A20 / A256 Woolcomber Street junction and the A20 / Union Street junction to determine whether mitigation is required at these junctions.

It is noted that more recently, there has been ongoing discussion in relation to these junctions and this was covered in both email responses and meetings. We issued a response with “action” points for WSP to resolve in relation to the above three junctions and these “actions” remain outstanding.

Representation: WSP should update the Forecasting Report in line with previous action points outlined by us in relation to the A2 Whitfield interchange, the A20 / A256 Woolcomber Street junction and the A20 / Union Street junction

(Note - This is an extract of the Full National Highways representation which can be located at SDLP1152)

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	HELAA
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Text Extracted from Document sent from Savills on Behalf of the Church Commissioners. Representation has been split across relevant areas of the Local Plan. Full attachment and introduction to Policy comments can be found under reference SDLP1265 for Shepherdswell Site and SDLP1266 for Eastry Site.)</p> <p>Housing and Economic Land Availability Assessment – SUPPORT WITH COMMENTS</p> <p>The Housing and Economic Land Availability Assessment (HELAA) (October 2022) identifies a future supply of land in the district which is suitable, available and achievable for housing and economic development uses over the Plan period to 2040. The assessment of the site (SHE006) makes the following comments in which Savills has provided a response to provide the Council that the site is suitable:</p> <p>Site is relatively well contained</p> <p>It is agreed that the site is well contained with defensible boundaries to the south-west, north-east and south-east. A new landscape buffer is proposed on the north-west boundary as per the attached Vision Document.</p> <p>Soft landscaping required to mitigate impact</p> <p>As shown within the attached Vision Document, a natural landscape buffer already exists on site. There is opportunity to reinforce the existing hedgerow and incorporate new tree and hedge planting to soften the development edges.</p> <p>Suitable access and connectivity will need to be demonstrated for the site to be taken forward as the track from Westcourt Lane is private and therefore access may not be achievable. Appears suitable visibility available for access off Coxhill. Road would need widening at access point. A Transport Technical note and drawings are attached to this representation. This confirms that suitable access can be achieved from Coxhill.</p> <p>No footway serving site.</p>

	<p>An existing footway ends on Coxhill at the north-eastern corner of the site. It is proposed that a footpath within the proposed development connects to this existing footway as set out within the attached Vision Document.</p> <p>A Transport Assessment will be required.</p> <p>It is agreed that a Transport Assessment will be required with any application that is submitted in accordance with NPPF paragraph 113. Included with this representation is a Transport Technical Note that demonstrates that the proposed development is achievable in transport terms.</p> <p>Access arrangements have since been clarified but there is still concern over footway provision. Concern also over cumulative impact on the road network</p> <p>See comments above.</p> <p>Our Client supports the HELAA's proposed housing allocation for site SHE006 (Land West of Coxhill Road, Shepherdswell). The technical work has been completed to create suitable flooding mitigation solutions to allow a higher capacity of dwellings on site. It is considered that there is justification to allocate site SHE006 for 25 dwellings if the additional land is also allocated. It is also recommended that the names of the sites in the HELAA should be consistent with the Local Plan policies.</p> <p>Recommendation: Increase the capacity of site SHE006 to 25 dwellings and update the name of the site to 'Land at Botolph Street Farm'.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP15
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SAP15. Rays bottom</p> <p><u>Sustainability Concerns.</u> Transport. This site is on a bus route into Deal. But this site is not well served by public transport into and from Deal. The service is limited, infrequent, does not operate throughout the day, and Stagecoach recently threatened to cut the service completely, as it is not profitable, but then has ended up reducing the service, and may reduce it further. It is a slow service as well, visiting many roads around Deal.</p> <p>There is a poor bus service for children going to secondary schools, and many parents from this area drive their children there, adding to the road congestion in the narrow country lanes. E.g. to get to Walmer station, to catch a train to Sandwich schools, have to cross the busy junction at station road/A258, which is currently undergoing road works to improve access. No traffic lights there, so there will be long waits to cross the road. The nearest secondary school, Goodwin Academy, is likely to be full as there are many hundreds of houses being planned in this and the Mill Hill area. If it is full, what then? There is a general lack of infrastructure., with local schools being nearly full, and GP surgeries with closed waiting lists, and no local NHS dentists.</p> <p>The Kingsdown primary school is fairly nearby, but it is far too dangerous to walk along the single lane Glen road to get to the school. No footpath. Glen road is very busy at school start and end. (I happened to go along here at school close times and had to wait for 23 cars and mini vans coming away from Kingsdown on the road) . If SAP 34 is permitted and built on, it is likely that this primary school will get full, and children living at Rays Bottom would have a longer journey to school, also by car, as the next nearest primary school (if there is room) is over 1,200 m away.</p> <p>The site is not within 1,200 m of an NHS GP surgery The site is not within 2,000 m of a further/higher education facility The site is not within 2,000 m of a strategic employment site. The site is not within 1,200 m of a town centre.</p> <p>The site has been judged by council officers to have the potential to moderately affect the district's historic environment. (a WW1 Site of an airfield)</p> <p>The site is very near, and overlooks the Hawks Hill free down. An area managed for its biodiversity by Walmer Town council and is surrounded on 2 sides by trees. The trees are full of birds, some migratory, and many bats can be seen there. It is an area with low level of light disturbance at night, which would be disturbed by the light coming from an estate of 75 houses, affecting bats roosting and feeding. (bats are a protected species).</p> <p><u>Highways Concerns</u> The highways assessment says that concerns have been identified in relation to access and/or highway impact and further assessment is required to demonstrate whether this can be mitigated. (Hella Appendix 3b Highways Assessments).</p> <p>The main problem is that it would increase the traffic along the narrow Liverpool road, Grams Road, and single lane Glen road. , which the irregular bus service uses. As already mentioned, Glen road has no space or accommodation for people on foot. Any access to the site would need localised road widening , and a reduction in the speed limit from Liverpool rd. .</p>

The residents of these proposed houses will need to have cars, (2 per family, so an extra 150 cars on local roads and they would join the stream of traffic on the overcrowded Deal to Dover road, which has problems at the Duke of York's Roundabout.

Landscape Concerns

Quoting from HELLA Appendix 2d Landscape Assessments. The development of this site would have an impact on the landscape and further assessment is required to demonstrate whether this can be mitigated.

The valley that the site is in at the bottom is subject to flooding. It drains in a northerly direction to an area north of Walmer Castle, which also floods in wet weather.

As mentioned already, the site is opposite Hawks Hill, an area of Priority habitat. The site is directly open to the neighbouring agricultural field on one side. One concern is the separation of Walmer from Kingsdown, as building here would reduce the separation of these settlements contrary to the SP4 policy.

This site is also in the LCA F3 Ripple area defined in the district *Landscape Character Assessment 2020* which defines on page 118 under Development Management that (developments should) **Conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB.**

Environmental Concerns

The Environmental Assessment notes that "on site environmental constraints are present, which would need to be suitably mitigated to enable development. See HELLA Appendix 3d Environmental Assessments

This assessment mentions it is a brownfield site and has contaminated land. Not sure why it is being used for agricultural purposes with this. Risk of surface water flooding... already mentioned above.

Overall, I consider this site unsuitable for building on, for the reasons above.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP53
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I oppose the Unsound Selection of SAP53(RIN002/RIN004) as being Non-compliant with the NPPF Sustainability and Proportionate Evidence requirements and with DDC Policies SP3 and/or SP4</p> <p>Site History.</p> <p>I consider the Site History to be a material fact for consideration.</p> <p>Ringwould Alpines Plant Centre was a privately owned aprox.2.3 ha Horticultural Nursery situated in the Kent North Downs AONB with a vehicular access onto the A258 Dover road. The nursery activity serving commercial, corporate and public customers was centred around 10 Polytunnels on what is now referred to as RIN002 and 2 Polytunnels on RIN004. RIN004 housed a timber potting shed ,several raised timber beds for display of shrubs and bedding plants and a block built toilet/storeroom. There was also a small gravelled parking area adjacent to the Entrance on the A258 Dover Road. There was no external lighting so public access was limited to daylight hours and the site was closed to the Public throughout the Winter.</p> <p>The Plant Centre holding includes that section of Footpath ER14 which forms the boundary with my property, (DDC note: redacted), and a small strip of woodland the other side of Footpath ER14 lying between Landway and Popples Field.</p> <p>The whole site was purchased by the current owners Kingsdown Water in 2016/17 while they were seeking a Change of Use Planning Permission for the erection of a bottling plant with supporting infrastructure on the parts of the site now identified as RIN002 and RIN004.</p> <p>This PP Application was refused on Appeal and the site remains a Greenfield Agricultural site for Planning Purposes.</p> <p>Kingsdown Water have no Agricultural/Horticultural Interest in the site and have not put the site on the open market as a horticultural holding.</p> <p>The RIN002 and RIN004 parts of the site have been leased and apparently sub-leased to a succession of non Agricultural tenants carrying out a variety of non Agricultural Activities none of which have had the benefit of Planning Permission. The remainder of the site has been left unattended to and is becoming overgrown and untidy, including Footpath ER14.</p> <p>This has resulted in complaints from local residents and the site is now the subject of Enforcement Action which has yet to be resolved.</p> <p>Planning Contravention Notices completed by the owner and tenant(s) have revealed that various small businesses have been renting the land for builder's yard type purposes and that the mobile home on the site is for the night watchman.</p> <p>The activities on the site have resulted in considerable degradation and contamination of the land which would require considerable restitution measures to return it to it's original state. See attached photos</p>

In the first HELAA three parts of Ringwould Alpines identified as RIN002, RIN004 and RIN006 were put forward by Ringwould Alpines's Agent for inclusion as development sites in this Dover Local Plan.

In that HELAA RIN002 was put forward as a 1.19ha PDL site development site for 30 houses but this was considered to be unsuitable for development, RIN004 as a 0.22ha PDL site for 5 houses but was considered to be suitable RIN006 as a 0.7ha Greenfield site was considered to be unsuitable for development.

Only RIN004 was taken forward as a Reg 18 Consultation Proposal but RIN002 was added to RIN004 to form SAP53 in the Sect19 Consultation Proposal

RIN002 and RIN004 are now described in the HELAA2022 as being greenfield after representations were made about it's earlier incorrect HELAA description as PDL.

Two remaining parts of Ringwould Alpines also owned by Kingsdown Water but not put forward for inclusion in the Local Plan proposals are a section of the Public Footpath ER14 running from Dover Road to Popples Field between Ringwould Alpines and my property (**DDC note: redacted**), and a small approx 0.1ha strip of woodland located on the other side of the footpath between Landway and grazing land known as Popples Field.

The only vehicular access to these parcels of land is through the rest of the Ringwould Alpines holding so these parcels of land will be landlocked unless vehicular access provisions are made over RIN002 and RIN004.

My property, (**DDC note: redacted**), is a 1.6ha Residential/Equine property the other side of the footpath which forms my boundary with Ringwould Alpines.

My reasons for opposing the selection of SAP53 follow below.

Unsound Site Selection

I consider the Site Selection of SAP53(RIN002/RIN004) to be **unsound** for the following reasons:

1. Non-compliant being not positively prepared as per the NPPF sustainable development and proportionate evidence requirements and non-compliant with either of DDC policies SP3 and P4.

The Settlement Hierarchy was reviewed to ensure that all Local plan development sites proposals were **sustainable**.

In the Settlement Hierarchy Ringwould is one of the small villages where only development **inside** the Village Settlement Boundary could be accepted but SAP53 is **outside** the Ringwould Settlement Boundary. See attached Ringwould Settlement Boundary Map

In SP3 and SP4 the overarching Sustainable Site Allocation Selection criteria is that " The distribution of housing and economic growth in the District will therefore primarily be based on the Settlement Hierarchy, and influenced by site availability, environmental constraints and factors of delivery"

I submit because SAP53 does not comply with the primary Settlement Hierarchy Selection criteria that this rendered the Influencing factors criteria on which the SP53 proposal appears to be based irrelevant.

I submit that ,because of non-compliance with the Sustainability Requirements of the NPPF and policies SP3 and SP4, the SAP53 proposal is **Unsustainable and Unsound**

1 Not justifiable as per the NPPF requirement for it to be based on proportionate evidence.

Inadequate Consideration of Representations made relating to RIN004 and RIN002 has resulted in unbalanced Council Responses and Reg19 Proposals because 21 respondents opposed the RIN004 proposal on issues also relevant to RIN002 and of these 6 directly referred also to RIN002 which was not a Reg 18 proposed site.

The scale of opposition to development of RIN002 is not reflected in the Council's summary of responses in respect of omitted sites because they were raised under the heading of the only Ringwould site proposed in the Reg18 proposal i.e. RIN004.

3 respondents supported the RIN004 proposal of whom 2 including the owner(s) of the site requested the addition of RIN002.

The Council's responses to all the proposed Sect 18 proposal representations is generic not site specific and are not set out alongside the individual Site Allocations proposals.

This " one size fits all" approach does not address site specific issues and results in generalised non-site specific Mitigation measures .

There were 21 opposing representations mainly from local residents and only 3 supporting representation of which 1 was factually incorrect from a local District Councillor claiming the existing site access was adequate for a large development on RIN002, RIN004 and RIN006 and

the other was from the site owner, Messrs Bomer a.k.a. Kingsdown Water, seeking to have RIN002 added to RIN004 to maximise the potential housing capacity of his site asking for 41 dwellings and claiming incorrectly that the site was a brownfield site..

In the Reg 19 proposals. said to have taken into account all of the representations together with all other relevant factors, RIN002 has been added to RIN004 to form SAP53(RIN002/RIN004). It can only be concluded that the Council attach little value to the representations made by local residents but great importance to those from the site owner which does nothing to promote public confidence and participation in such Consultation exercises.

I consider the above constitutes **disproportionate** consideration being given to Reg 18 supporting comments resulting in the **unsustainable and unsound** SAP53(RIN002/RIN004) **Reg19 proposal** .

No new evidence emerged in the Regn 18 submissions to justify the addition of RIN002 to RIN004 at this final Reg19 stage of the Local Plan HELAA stage and the proposal itself contains no reason for the addition of RIN2 to SAP53.

Whatever evidence exists to justify the inclusion of RIN002 into the Local Plan at this final late stage must have existed and have been discounted right from the early HELAA stages.

Including RIN002 now at this last final stage of the Local Plan consultation stage makes submitting representations more difficult because of the discouraging, complicated and, to some residents, incomprehensible Reg19 Representation procedure format.

The site promoter now claims that selecting only RIN004 would landlock RIN002.

This potential landlocking issue has been apparent all the time and could be easily resolved..

What is different is that local residents have now discovered that, after being consulted at the Reg18 stage on RIN004 a 0.21 ha AONB site with a proposed indicative total of 5 houses and a capacity to accommodate 7 houses situated between 2 dwellings fronting onto the Dover Road, they are now faced with SAP53(RIN002/RIN004) a 1.41 ha AONB site with an indicative proposal for 10 houses but a capacity of 37 houses situated immediately between and behind several houses and intruding deep into the rest of the AONB on which they were not consulted.

Although there are common issues affecting both RIN002 and RIN004 the SAP53 proposal differs considerable in scale, character and impact on the AONB and neighbouring AONB properties than the earlier RIN004 proposal.

The site currently enjoys "dark skies" but the proposals would create a built up suburban street scene complete with power and telephone poles and wiring infrastructure together with street lighting where none exists which is inappropriate for the AONB setting.

The Site is in an area where >25% of the land is at least Grade 3 Agricultural Land.

The site would require construction of a new side turning serving the 10 new dwellings onto the busy A258 almost immediately opposite the existing Queens Rise side turning on the other side of this road causing increased risk of delays and accidents on this particular section of the A258.

RIN002 extends the SAP53 site further into the AONB making it visible from a popular Footpath ER14 see photos which is part of the Ringwold Alpines holding

and also from my property, **(DDC note: redacted)**,. RIN002 extends behind four Dover Road AONB properties and also has a boundary with my AONB property,**(DDC note: redacted)**..

No account has been taken of the effects of RIN002 combined with RIN004 on these neighbouring properties.

Local residents who thought it was not necessary to make representations about RIN002 or those who made passing reference to RIN002 can now comment but to do so is rendered more difficult because of the **discouraging, complicated and, to some residents, incomprehensible Reg19 Consultation format** .

I submit the Council's RIN004 Reg 18 Consultation responses and the Reg 19 SAP53(RIN002/ RIN004) Representations format make this latest REG19 Proposal and Consultation **disproportionate, unsustainable and unsound and non-compliant with the Proportionate Evidence of the NPPF and Policies SP3 and SP4..**

3,The Evidence Base is Incomplete.

There are significant omissions in the Evidence Base covering the **Landscape Sensitivity Assessment (LSA) 2021 and Landscape Character Assessment (LCA) Sections** .

None of the Ringwold Alpines AONB sites are included in either of these Sections of the Evidence Base.

	<p>DDC Landscape Character Assessment (LCA) does not include the AONB which is said to be covered by the North Kent Downs AONB Management Unit's own LCA 2020 but this LCA is being updated and has not yet been published on the AONB Unit's website..</p> <p>The DDC commissioned Landscape Sensitivity Assessment(LSA) report does not include the Ringwoud Alpines AOB sites but because the selection criteria have not been published it has not been possible to identify why.</p> <p>Many of the 33 Local Plan sites selected for a LSA are in neighbouring settlements and they include AONB and non AONB sites.</p> <p>The Council claim that the AONB Management Unit were consulted and were satisfied with the proposed mitigation measures but this does not explain why RIN002 and RIN004 were not selected. .</p> <p>These mitigation measures only address the Local Visual Impact (LVI) aspect of the Ringwoud Alpines sites whereas the LCA and LSA would have addressed not just the LVI impact but also a wide array of other factors affecting not just the AONB but also the wider surrounding landscape inside and outside the AONB.</p> <p>Issues such as dark skies, ambient noise levels, built environment and the effect on the lives of neighbouring householders, properties etc.</p> <p>I submit that, because the RIN002 and RIN004 evidence does not include an LCA or an LSA, the SAP53(RIN002/RIN004) element of the Evidence Base is incomplete and makes the SAP53 proposal unsound and non-compliant with with NPPF Sustainability and Proportionate Evidence Requirements and with DDC policies SP3 and SP4</p> <p>4. The Ringwoud Alpines Plant Centre holding is currently the subject of Unresolved Planning Enforcement action.</p> <p>This is in respect of non agricultural activities being carried out there without the benefit of Planning Permission. Various small businesses have been renting the land for builders yard type purposes and there is a mobile home on the site for a night watchman.</p> <p>These activities have resulted in considerable degradation and contamination of the site. See attached photos.</p> <p>The Availability and Deliverability of the Site would be affected by resolution of the Enforcement Action requiring a Planning Application and/or enforced reinstatement of the site to it's previous Agricultural/Horticultural state.</p> <p>I understand the Enforcement Officer is seeking advice on this at the moment.</p> <p>In these circumstances I submit that the RIN002 and RIN004 site should not have been included in the Dover Local Plan SAP53(RIN002/RIN004) proposal because all Local Plan sites should be Available and Deliverable and that this selection is unsound because of reasonable doubt over the Site's Availability and Deliverability.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I ask that Reg19 Proposal SAP53(RIN004/RIN004) be removed in it's entirety.</p> <p>The removal of SAP53 which is unsound because it does not comply with requirements of the NPPF nor with SP3 and SP4 will remove a proposal that is not legally compliant and sound from the Local Plan</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I consider the SAP34 proposal is non-compliant with the NPPF requirement to objectively assess the positive and negative impacts of the proposal for the following reasons:</p> <p>1. The SAP34 proposal is non-compliant with the NPPF requirement to objectively assess the positive and negative impacts effect of a proposal.</p> <p>There are no identifiable benefits for local residents, the only benefits would be for house buyers seeking a new property in a suburban type development with a prestigious address.</p> <p>There are many negative impacts on local residents particularly for Glen Road residents. Local shops will not benefit significantly because the site is remote form their location. Pedestrian access to the village proper is via Kingsdown Road which is the main access to Kingsdown for the A258. The route is narrow and unsafe with no pavements at any point. Vehicular access is similarly constrained and exacerbated by lack of parking and there is no Public Transport. The new residents will be house buyers looking for a house in a suburban style new development with a prestigious Postal Address and reasonably close to nearby Deal and Dover shopping centres and Railway stations. Local residents will experience more traffic on Kingsdown Road and other minor local roads and congestion in the village centre as newcomers try to navigate their way through the narrow village streets.</p> <p>I consider the SAP34 Proposal does not comply with the NPPF requirement that the positive and negative impacts of a site should be objectively assessed.</p> <p>2. The SAP34 Proposal is non-compliant with the NPPF requirements for development proposals in, or in the settings of, an AONB.</p> <p>DDC Commissioned a Landscape Character Assessment (LCA)survey . This showed SAP34 was a site in the Ripple Landscape Area which is identified as an Area of Open Chalk Arable Farming. As such the site provided a Buffer between the built Lanscape of Kingsdown village and</p>

the surrounding farmland and AONB. This proposal would substantially lessen this buffer with particular impact on the adjacent AONB. **DDC also commissioned a Landscape Sensitivity Assessment (LSA) which was a site specific assessment covering a much wider range factors than an LCA and covered the impact on both the the immediate Landscape around a site but also the impact of the wider landscape. DDC selected only 33 sites and for some reason none of the sites in Kingsdown or the neighbouring village Ringwould were selected. The Ringwould site SAP53 was inside the AONB and the Kingsdown site SAP34 was adjacent to the AONB. The selection criteria is unexplained.**

There has therefore been no site specific assessment of the Landscape Sensitivity of SAP 34.

I consider the SAP34 Proposal is non-compliant with the NPPF requirements for sites in or adjacent to an AONB.

3. I consider the SAP 34 Proposal is non-compliant with the Requirements of DDC Site Selection Policies SP3 and/or SP4.

DDC have not indicated under which of the above policies SP3 and SP4 they have selected SAP 34. This omission is not limited to this proposal and appears to be general for all proposals.

This omission makes representations against the selection of sites such as SAP34 because both policies could have been used, However SP4 proposals have to comply with SP3 requirements.

Any development under either SP policy should be compatible in scale, design and appearance of the Settlement in or next to which it is situated. A new build housing estate in this particular location is not compatible with any of these.

The scale is disproportionate to the existing adjacent properties and the village as whole, the design would be quite unlike any of the neighbouring houses or the general range of mixed styles and ages of property in this village with its conservation area and appearance would be incompatible with its location in open arable farmland adjacent to an AONB.

I consider that the SAP34 Proposal is non-compliant with DDC Site Selection Policies.

For all the above reasons I consider the SAP34 Proposal to be **UN SOUND**.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I request the removal of the SAP34 proposal from the Local Plan.
I consider this will help to make the Local Plan less **unsafe**.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

(Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>RE: Omission Site- Land on the South West side of Hillside Road, Dover Proposed for residential development - Indicative capacity 10-15 units.</p> <p>Previous Reference Numbers: DOV011; TC4S100</p> <p>I've been instructed by my client, Mr Virtue, to provide representation against the non-inclusion of a site in his ownership in the final Local Plan Regulation 19 document.</p> <p>I did not act as agent in the previous submissions of the site but following correspondence with the Planning Policy Team at Dover District Council, it is my understanding that the site was originally put forward for housing development and assessed as part of the Housing and Employment Land Availability Assessment (HELAA) under site reference DOV011. The site was also submitted for potential employment use, my client thought this to be a care home, during the 2021 Call for Sites. At this stage, the site was given the reference number TC4S100. Despite the submission of the site to the Council, the site was not included as an allocation in the Regulation 19 Local Plan or a 'reasonable alternative', and therefore, the site has not undergone a Sustainability Appraisal.</p> <p>On the basis of lack of sustainability assessment and in accurate HELAA assessment, we object to the non-inclusion of the site and request that the site is reconsidered as an omission site. It is the intention of this submission to reduce the size of the site and the housing numbers proposed to an indicative capacity of 10-15 units. The site is no longer promoted for employment use.</p> <p>1.Sustainability of the Site:</p> <p>The site should be reconsidered for inclusion in the Local Plan as it is sustainable.</p>

Firstly, the site is in one of the most sustainable locations in the built-up area of Dover. It has access to sustainable transport links, health services and community and shopping facilities all within walking distance.

Further to this, and reflecting its sustainable location, the site previously had outline planning permission for 28 dwellings approved under application 87/00081. This scheme was for outline consent and included 8 x semi-detached, 19 x terraced and one detached dwelling with associated.

This submission would reduce the number of proposed dwellings to an indicative number of 10-15. Any future scheme would be low-density and provide green links and access for people to enjoy the wider green spaces and the setting of the AONB and the neighbouring local wildlife site.

2. Inaccuracies in the DDC Assessments:

The site was dismissed as 'unsuitable' in the HELAA. This assessment has inaccuracies which should be reconsidered.

The reasons for being deemed unsuitable are summarised below:

- **The site is dense wood and scrubland. This includes the access point to the site in the northeast. Any development of the site would require the removal of this dense woodland.**
- **Unacceptable impact on biodiversity.**
- **The site is on a slope that raises away from the access point to the highway.**
- **The raised position of the site would create development at a higher elevation than the existing residential to the east and would likely impact on the AONB immediately adjacent to the west AONB setting.**
- **Potentially development of the scale proposed could have an impact on nearby roads in terms of vehicular traffic.**

The above assessment is inaccurate as the site is only self-seeded woodland, with the historic use of the site being allotment gardens, which served the properties on Hillside Road. Discussions with long-standing residents of these properties, and historic photography, has identified that the site was still being utilised as allotment gardens as late as in the 1980s. On this basis the woodland identified on site is self-seeded with many saplings and very few mature specimens. By virtue of the habitat created in this nature, the site does not have any biodiversity or ecological designations.

The site being on a slope should not have been a reason for non-inclusion. The town of Dover, including large areas of development, is built on a slope and the design of any future scheme could reflect the topography of the land and take into consideration the existing development on Hillside Road. For example, future design proposals could ensure that there is no impact on the residential amenity, by designing layout and the massing and scale of any new dwellings to acknowledge and respect the existing development.

Any concern raised regarding the potential of the scheme impacting on neighbouring roads will be rectified by reducing the number of dwellings proposed on the site.

3. Deliverability of the site:

In accordance with the definition of the National Planning Policy Framework, the site is available for immediate delivery and would be a positive contribution to Dover District Council's Housing Land Supply, it could be delivered in the first 1-5 years of the Dover District Local Plan period. In consideration of this, the NPPF acknowledges the positive contributions that smaller sites can make to the supply of housing in the local area.

It is for the above reasons that the site should be reconsidered for inclusion in the Local Plan. Should you require any further information do not hesitate to contact me.

<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I wish to attend any future hearings relating to omission sites. Specifically regarding the potential for their inclusion in the Local Plan.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP35
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SAP 35- Courtlands</p> <p>The Courtlands site was only introduced to the local plan after reg 18, and was poorly advertised , so few people knew about it.</p> <p><u>Highways considerations.</u></p> <p>These need mitigation.</p> <p>The road into Courtlands is now adopted by KCC, but there is no footpath at the side.</p> <p>The likely residents of these proposed houses are likely to have cars, and would join the stream of traffic going through the single lane narrow roads of Kingsdown , onto the Ringwould road, and join the overcrowded Deal to Dover road, which has problems at the Duke of York's Roundabout. There is also a problem returning to Kingsdown from the main Dover Deal road, as at the turn off at Ringwould, the road is only 2 lanes wide , so when a car turns right to go to Kingsdown, all the traffic behind has to wait. This part of the road needs to be made 3 lanes wide.</p> <p><u>Sustainability considerations.</u></p> <p>Sustainability is poor because:</p> <p>Kingsdown is not well served by public buses. There is no direct bus to Dover, and the Ringwould road up to the A258 does not have a path, and is only just 2 lanes wide, so it is a dangerous road for pedestrians, or bikes. There is a service into and from Deal. The service is limited, infrequent, does not operate throughout the day, and Kent County council recently threatened to cut the funding for Stagecoach, who run the service. as it is not profitable, Th end result has reduced the service, and may reduce it further. From Deal there is a bus connection to Dover, but the times of arrival and departure from the bus station do not coincide.</p> <p>There is a poor bus service for children going to secondary schools, and many parents from the village drive their children at least part way, adding to the road congestion in the narrow country lanes. E.g. to get to Walmer station, to catch a train to Sandwich schools , they drive along the single lane Glen road.</p> <ul style="list-style-type: none"> • The site is not within 1,200m of an NHS GP Surgery.

- The site is within 200m of a Public Right of Way/Cycle Path, but the cycle path is not lit at night .
- The site is not within 2,000m of a secondary school.
- The site is not within 2,000m of further/higher education facilities.
- The site is not within 2,000m of Strategic Employment Sites/Enterprise Zones.
- The site is not within 1,200m of a town centre.

Landscape

The proposal does not take account of how the building of these five houses and the loss of this part of the field contravenes Section 15 of the National Planning Policy Framework in terms of the following paragraphs

Para 174. Planning policies and decisions should contribute to and enhance the natural and local environment by:

a) protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan) - the assessment makes a light mention of biodiversity when locals know the field is visited by nesting skylarks in the summer and the field edge across the Channel that is widely enjoyed by locals and tourists who walk between Walmer and Kingsdown over the free down contains the burrows of bumble bees. There are many bats which flit about and can be seen at dusk here (low levels of lighting here favours this). The field is also regarded as a valued landscape with open views

b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services –including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland- building over a quarter or more of the field will make it less sustainable for agriculture. The field is regularly used for arable crops. There is very little confidence that there will not be pressure of build over the rest of the field despite the plan. It is likely that the old hedge, (at edge of the old estate), at one side of the property would be removed. It needs to be protected, as it is full of wildlife .

c) maintaining the character of the undeveloped coast, while improving public access to it where appropriate - the building of these five homes further develops the coast, as it is up a bit higher. Given how other parts of the south coast have been ruined by dense coastal developments this development doesn't comply at all. The homes will be viewable from Kingsdown beach and the sea.

In addition , This site is in the LCA F3 Ripple area defined in the district *Landscape Character Assessment 2020* which defines on page 118 under Development Management that (developments should) *Conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB.*

In the HELLA Appendix 2c Landscape Assessments it says "Any development of the site would have to mitigate the impact on the hilly countryside and due to this hilly nature it is difficult to see how the impact can be mitigated.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

SAP 35- Courtlands

The Courtlands site was only introduced to the local plan after reg 18, and was poorly advertised , so few people knew about it.

Highways considerations

The road into Courtlands is now adopted by KCC, but there is no footpath at the side.

The likely residents of these proposed houses are likely to have cars, and would join the stream of traffic going through the single lane narrow roads of Kingsdown, onto the Ringwould Road, and join the overcrowded Deal to Dover road, which has problems at the Duke of York's Roundabout. There is also a problem returning back to Kingsdown from the main Dover Deal road, as at the turn off at Ringwould, the road is only 2 lanes wide , so when a car turns right to go to Kingsdown, all the traffic behind has to wait. This part of the road needs to be made 3 lanes wide.

Sustainability

Kingsdown is not well served by public transport into and from Deal. The service is limited, infrequent, does not operate throughout the day, and Kent County council recently threatened to cut the service completely, as it is not profitable, but then has ended up reducing the service, and may reduce it further. From Deal there is a bus connection to Dover, but the times of arrival and departure from the bus station do not coincide.

There is a poor bus service for children going to secondary schools, and many parents from the village drive their children there, adding to the road congestion in the narrow country lanes. E.g. to get to Walmer station, to catch a train to Sandwich schools , drive along the single lane Glen road.

- The site is not within 1,200m of an NHS GP Surgery.
- The site is within 200m of a Public Right of Way/Cycle Path, but the cycle path is not lit at night .
- The site is not within 2,000m of a secondary school.

- The site is not within 2,000m of further/higher education facilities.
- The site is not within 2,000m of Strategic Employment Sites/Enterprise Zones.
- The site is not within 1,200m of a town centre.

Landscape

The proposal does not take account of how the building of these five houses and the loss of this part of the field contravenes Section 15 of the National Planning Policy Framework in terms of the following paragraphs

Para 174. Planning policies and decisions should contribute to and enhance the natural and local environment by:

a) protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan) - the assessment makes a light mention of biodiversity when locals know the field is visited by nesting skylarks in the summer and the field edge across the Channel that is widely enjoyed by locals and tourists who walk between Walmer and Kingsdown over the free down contains the burrows of bumble bees. There are many bats which flit about and can be seen at dusk here. The field is also regarded as a valued landscape with open views

b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services –including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland- building over a quarter or more of the field will make it less sustainable for agriculture. The field is regularly used for arable crops. There is little confidence that there will not be pressure of build over the rest of the field despite the plan

c) maintaining the character of the undeveloped coast, while improving public access to it where appropriate - the building of these five homes further develops the coast. Given how other parts of the south coast have been ruined by dense coastal developments this development doesn't comply at all. The homes will be viewable from Kingsdown beach and the sea.

In addition, this site is in the LCA F3 Ripple area defined in the district *Landscape Character Assessment 2020* which defines on page 118 under Development Management that (developments should) *Conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB.*

In the HELLA Appendix 2c Landscape Assessments it says *The development of this site would have an impact on the landscape and further assessment is required to demonstrate whether this can be mitigated.*

A general point about this site being suitable for 5 houses. This site is 0.71 hectares. There is a site opposite, over the Kingsdown Road called Beach Mews, which has been built on fairly recently. It is 0.265 hectares and has 7 luxury 3 & 4 bed houses built on it. My suspicion is, that the owner of site SAP 35 will not be content with just 5 houses in a large area, but will apply for more houses in due course, badly affecting the landscape. Any houses built on SAP 35 will be luxury houses to fit into the area. Finally, this area does not need more luxury houses, but it badly needs houses for young families at an affordable price. This will not happen here

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	See below
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Landscape Character Types, 17 identified. To become sound there should be an addition. The area inland from Kingsdown, west to Ringwould, Ripple, Sutton, Studdal and Little Mongeham should all be included as LFT F Open Arable Chalk Farmland with Woodland, as an extension to F3 Ripple. The Landscape Character Types (LCT) are a sound and helpful classification. Two amendments that would make Table 11.1 more sound and effective would be: for there to be a commitment to protect and expand Horticultural Belt LCT D in north of district, especially for pesticide-free, Nature-Friendly farming enterprises (see our comment SP 6) ; and for LCT F Open Arable Chalk Farmland with Woodland – F3 Ripple to be expanded to include all land west of Kingsdown village in a 3 mile band, to include Ringwould, Ripple, Sutton, Studdal, Little Mongeham to Northbourne and Tilmanstone.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object to KIN002 (SAP 34) being included in the draft LDP for the following reasons:</p> <p>The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii '<i>SPs should provide for objectively assessed needs for housing & other uses, . . . unless (ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole</i>'.</p> <p>The following arguments show why this development would have more adverse impacts than benefits and would not be sustainable.</p> <p>Kingsdown is a quiet village which has not developed into a larger settlement because it is isolated by its geography (see my later comments on local centres). Allocated money from developers would not 'improve' the infrastructure of the village as there is no space to provide parking or for widening roads or for improving any other physical infrastructure. The narrow single track roads through the village which are an inherent part of the character and charm of the village are also a limiting factor for the village in terms of further development. The roads in the village are already adorned with parked cars wherever possible, and there are very limited pavements in the village, this means pedestrians are often forced to walk in the middle of the roads and duck in-between cars when traffic approaches. Some parts of the roads have high walls and no pavements which, with current traffic levels, make walking perilous. Any increase in cars trying to park to use services or passing through the village, would be very dangerous. Residents of KIN002 would have to use their cars for almost all of their journeys, creating pollution and congestion.</p> <p>Furthermore, as the UK government have decided on 5/12/22 to stop putting pressure on local authorities to authorise unsustainable housing targets the LDP now needs reviewing in light of the new directives. The Dover District Area has, in recent years, been subject to considerable housing development, higher than that allowed for by the current local plan, and this development has been unsustainably concentrated into certain specific areas, because much of our district is either already overdeveloped, or not suitable for large scale development as it is either designated as an area of outstanding natural beauty (AONB), or it is heritage coast, or it is very low lying and liable to flooding or needed as floodplain.</p> <p>The continued inclusion of SAP34/ KIN002 land at Woodhill Farm, Kingsdown in the LDP is unsound, because, despite many concerns and reasoned arguments from residents the only concession seems to have been to reduce the housing numbers from 90 to 50; Due to the weak wording of the local plan that only suggests what would be 'preferred' by the district council, it is highly likely that the final number of houses would be in excess of 50 and possibly in excess of 90, if the proposal were to go ahead.</p>

The site has now been given a green allocation in the HELAA report despite its many issues and the fact that an adequate highways assessment has not yet been carried out and the HELAA highways assessment remains amber. The latest HELAA report states that the many failings can be mitigated for within the LDP. I argue that this is unsound and not justified nor consistent with National Policy NPPF 21. The evidence from DDC has not been used correctly. NE2 Landscape character and the Kent Downs; states in section 11.13 that DDC aims: *To ensure that all development coming forward over the plan period respects and reflects the character of the landscape in which it is located.* The DDC landscape character assessment of 2020 (LCA) shows that SAP34 / KIN002 falls within Ripple F3, *open chalk farmland and woodland.* **NE2** states; *the classification identifies 17 LCAs and defines issues of landscape management and development management which should be delivered over the plan period.*

Development Management guidelines include:

- Conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB.-Seek to reduce lighting and noise impacts on this landscape and in longer views through sensitive highway design/management. Conserve the distinctive narrow winding lanes and grassy verges.

SAP 34 would not *'conserve the rural character of the landscape'*

SAP 34 would be right next to the AONB so would clearly not *'provide a rural setting for the Kent Downs AONB'*.

SAP 34 would, in direct contravention of the guidelines, increase *'lighting and noise impacts on this landscape'*.

SAP 34 would, in direct contravention of the guidelines, due to the raised setting of the site, negatively affect the rural setting of the AONB on *'longer views'* of this landscape, both looking into and out from the AONB.

SAP 34 would also, according to the HELLA Highways assessment, require the alteration of and therefore not *'conserve the narrow winding lane and grassy verges'* which form the main entrance to and help to define the character of, the quiet village of Kingsdown.

The Development Management guidelines also include:

- Conserve the open skyline, avoiding the introduction of vertical elements such as pylons, telecommunications masts etc.- Protect and enhance views from more elevated areas and from the coast out to sea and towards landmark features such as Walmer Castle.

SAP 34 is in an elevated position so it would not *'Conserve the open skyline'* of this landscape area of open chalk fields with woodland.

SAP 34 is in an elevated position so it would not *'Protect and enhance views from more elevated areas'* of this special landscape area of Ripple F3.

SAP 34 is clearly visible from many viewpoints within both the AONB and the Ripple F3 special landscape area, from along the A258 and the network of footpaths, and from the locally renowned 'Nelsons seat viewpoint'. I contend that it would therefore not *'protect and enhance the views of this landscape'*.

SAP 34 can, as I have mentioned be seen from within the Ripple F3 landscape area, and from certain directions it would be in the foreground of views out to sea, it would therefore not *'Protect and enhance views out to sea'*

SAP 34 has views out to the picturesque Ripple windmill, which I contend is a *'landmark feature'*, therefore this development would contravene the development guidelines, by not protecting nor enhancing views towards *'landmark features'*, which would be lost.

The development of SAP34 would result in the loss of an important buffer between the built environment of Kingsdown and the AONB. Ringwould Rd would lose part of its character and the main entrance to the village would be deprived of its character. Part of the AONB would be lost as would part of the character of the AONB. From within The Ripple F3, views across to Kingsdown and the sea would be negatively impacted and the open character of the landscape would be lost and pollution from light and traffic would increase. The HELAA sustainability appraisal states; *The site has been judged by Council officers to have the potential to moderately affect the District's landscapes, townscapes or seascapes.* I argue that this is not supported by the facts, and is not a fair appraisal of the probable impact of this development, especially when considered in the light of the site forming part of the LCA F3, the proximity to the nationally important AONB and the suggested necessary alterations to the *'distinctive narrow winding lane and verges'* which lead into what is at present a quiet rural village.

NE2 11.19 states *'The setting of the AONB comprises land adjacent to or within close proximity of its boundary, including but not limited to land which is visible from the AONB and from which the AONB can be seen.....Within the setting of the AONBs, priority will be given over other planning considerations to the conservation or enhancement of natural beauty, including landscape, wildlife habitats, tranquillity, dark skies, and geological features'*.

NE2 11.19 clearly and accurately describes the proposed site for SAP34. It is adjacent to and within close proximity of the AONB, it is visible from the AONB and the AONB can be seen from it. By allowing this development to go ahead, *'conservation of natural beauty, including*

landscape, wildlife habitats, tranquillity and dark skies' would not have been given 'priority over other planning considerations' I therefore contend that the development is not sound.

SP13 states that *the NPPF 2021 requires local plan policies to conserve and enhance the natural environment, to recognise the intrinsic character and beauty of the countryside and the wider benefits from natural capital and ecosystems.* Including SAP34 in the LDP is therefore in direct contravention of the NPPF, which means it is unsound as it would detract from the beauty of the countryside particularly the adjacent AONB. The Kent Downs AONB management plan 2021-26 says *the Kent Downs AONB, perhaps more than any other of Britain's protected landscapes – AONBs, Heritage Coasts or National Parks, has experienced and is experiencing severe development pressure.* DEFRA evidence shows *'The Kent Downs AONB stands out as an area which has experienced major change, showing a rate of urban growth of almost 10%.pa, with the urban area spreading by 14 ha over the decade'*. The AONB in Dover District has suffered development at a disproportionate rate which indicates that planning pressures on our district are unsustainable as they are overflowing into this nationally important landscape area. National Planning Practice Guidance (NPPG) confirms that the Duty of Regard is *'relevant in considering development proposals that are situated outside National Park or Area of Outstanding Natural Beauty boundaries, but which might have an impact on the setting of, and implementation of, the statutory purposes of these protected areas'*. I would argue that because the entrance onto Ringwould Rd requires widening and changing of the road which will encroach into the AONB, to mitigate for it being unsafe, this will be detrimental to the setting and directly upon the AONB.

NPPF 2021 11 – making effective use of land - Planning policies and decisions should: 120 b *recognise that some undeveloped land can perform many functions, such as for wildlife, recreation, flood risk mitigation, cooling/shading, carbon storage or food production.* As food security is such a national issue, including SAP34 for development is unsound and unsustainable as good agricultural land would be better served in producing food. I would add that the local plan talks about sustainability for future generations, but as the UK only produces around half of the food we need domestically, and the world population is growing and with global warming crops around the world are beginning to fail, it is highly likely that in the future we will need all the agricultural land we have to feed ourselves. Developing agricultural land is not sustainable.

Allocated money from the developers would not improve things as there is no space to provide parking in the village or for widening roads or for improving infrastructure. The narrow single track roads through the village which are an inherent part of the character and charm of the village are also a limiting factor for the village in terms of further development. The roads in the village are already adorned with parked cars wherever possible, and there are very limited pavements in the village, this means pedestrians are often forced to walk in the middle of the roads and duck in-between cars when traffic approaches. Any increase in cars trying to park to use services or passing through the village would be very dangerous. Residents of KIN002 would therefore have to use their cars for everything, creating pollution and congestion

Local Centres:

I would argue that the designation of Kingsdown as a local centre is unsound. Due to the nature of its location, with the undeveloped AONB, heritage coast and cliffs to the south, with no roads for access from this direction, the Sea to the east, with no villages, inhabitants nor roads, only Walmer to the north, which is closer to the town of Deal than to Kingsdown, but in any case, itself has better facilities than Kingsdown. To the west there are several small villages, such as East and West Langdon, but they are closer to and have better links to Dover, to the north west are Studdle, Ripple and Mongeham, but they are closer to and have better links to Deal. This leaves the small settlement of Ringwould, which is close to Kingsdown, but is cut off by the Arterial A258. Ringwould Road, which joins the two settlements, is steep and narrow in parts and not suitable for occasional cyclists or walkers, so most people would tend to drive between the two villages, however, there is very limited parking and limited facilities in Kingsdown, so even people from Ringwould are much more likely to frequent Dover, Walmer or Deal for everyday needs or services. All of this probably goes a long way to explain why Kingsdown has never developed wide roads and modern infrastructure.

The high proportion of second homes and Air b and bs in the village demonstrates that dwellings outnumber homes required, so there is not an *'objectively assessed need for housing within the Parish'*. If largescale development were to take place in Kingsdown, it is highly likely that, many of them would become second homes or Air b and bs. Unless houses used for these purposes are owned by local people who already live in the village, which is unlikely, such houses would bring very little to the village. To include SAP34 /KIN002 is therefore unsound and not consistent with NPPF 21.

NPPF 2021, Paragraph 73. b) states that suitable land for development should; *'ensure that their size and location will support a sustainable community, with sufficient access to services and employment opportunities within the development itself (without expecting an unrealistic level of self-containment), or in larger towns to which there is good access;* However SAP34 is unsound because there are extremely limited opportunities for employment within Kingsdown and there is not *'good access'* to larger towns. There is no rail link, the bus service is very limited and reduced since Reg 18, and the roads are narrow and already at certain times, dangerously busy.

NPPF 2021 Paragraph 79, states; *To promote sustainable development in rural areas, 'housing should be located where it will enhance or maintain the vitality of rural communities. Planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. Where there are groups of smaller settlements, development in one village may support services in a village nearby'*.

Because as I have outlined, Kingsdown is not at the heart of other rural settlement, the development of SAP34 will not *'enhance or maintain the vitality of rural communities'*.

The HELLA highways assessment commented that the scale of KIN002 was too small to create enough new footfall to improve the bus service, I suggest it would also be insufficient to warrant any other new services either.

I have mentioned that Kingsdown is isolated by distance and due to poor public transport, due to the position of the A258 and due to the narrow roads leading to and from the village. For these reasons, it cannot be said to be part of a *'group of smaller settlements'*, where *'development in one village may support services in a village nearby'*. New residents at KIN002 would mostly have to use their cars to visit Dover, Deal or Walmer for services, contributing to Carbon emissions and making the roads more congested and dangerous. For these reasons I believe the KIN002 is unsound and unsustainable.

For all of the above reasons I contend that classifying Kingsdown as a 'village centre' is not justified by the facts. It should be reclassified as a 'larger village', which would mean the only development permitted would be windfall development within the village boundary.

If Kingsdown were to be classified as a larger village, which I have shown is demonstrably appropriate, then there would be strict criteria limiting developments such as KIN002, which would not be allowed to proceed as it is outside the village boundary.

When using the criteria of the draft local plan SAP34 is not sustainable and unsound for the following reasons:

T11 Development should, in so far as its size, characteristic and location -Give priority to the needs of pedestrians, cyclists, users of public transport, car sharers and users of low and ultra-low emission vehicles.

The location and size of SAP34 means it will give priority to car drivers only so it will not be in line with T11. The HELLA appraisal said it will not be large enough to warrant improvement of public transport. It is not on a train route. There are poor footpath routes to the village and only narrow and winding lanes to the village and to local towns. There is a cycle route to Deal along the seafront, but this joins Kingsdown at the other side of the village and the route would probably be too far for most casual cyclists. It is probably too far for people to walk to Deal or Dover in order to use the facilities at these towns. Any attempt to improve the cycling and walking routes to the village would result in loss of the distinctive character of the winding lanes which the 2020 LCA F3 Ripple seeks to preserve.

T12 New accesses and intensified use of existing accesses onto the road network will not be permitted if it would result in a clear risk of crashes or traffic delays unless the proposals can incorporate measures that provide sufficient mitigation. I consider this site to be unsound as there would be an increase in crashes and traffic delays. Widening the junction at the exit would not do anything to improve the narrow dangerous access through Kingsdown village. It would also not improve the access from Ringwoud Road onto the very busy A258 at Ringwoud. Widening the road at the access point on Ringwoud Road, would mean losing part of the Kent Downs AONB and would also effect the character of the winding lane entering the village, which as I have mentioned the 2020 LCA F3 Ripple seeks to preserve. Land either side of Ringwoud Road is not owned by the same party as KIN002 and so cannot make up part of this development. Furthermore, any attempt to alter Ringwoud Road at any point would also result in the loss of the charming character of the road. The access is also complicated. It is used by visitors to the play area and the landowner to the left as you enter the field from the road. No mention is made in the HELAA highways assessment of the landowner needing access. ER5 also crosses the entrance which would therefore be dangerous to pedestrians crossing from the field back to the village. ER5 is a very busy path used by dog walkers on a daily basis. The sight lines onto Ringwoud Road in both directions are poor. Ringwoud Rd is very narrow in places and in places, 2 vehicles cannot pass each other. Turning left out of the site would be onto a narrow road going into a 20mph zone. Turning right is in a 50mph zone with a bridleway and footpath crossing with poor visibility and slow tractors turning out onto the road. There has already been an RTC resulting in a fatality and serious injury on Ringwoud Rd. I would argue that issues with access alone mean that this site is not suitable and unsound for development. A medium pressure gas main crosses KIN002 diagonally and crosses the road at this access point which would require careful consideration when changing the access. This would cause a lot of disruption to the villagers as this is the only classified road in and out of the village and as poor as it is, is the main route to the A258. If traffic had to divert via Deal this would create extra pollution and congestion for a protracted period of time which would be contrary to SP1 and the climate emergency declaration by DDC.

T13 Applicants must demonstrate that traffic movements to and from the development can be accommodated, resolved, or mitigated to avoid severe cumulative residual impacts.

As I have already pointed out, traffic movements to and from the site would be on to Ringwoud Road. This road is narrow, in places steep, in places it has high banks and hedgerows which preclude views along it, it sometimes floods in the dip before the hill towards Ringwoud and I have known many winters when it has been impassable because of snow. If cars from the proposed development SAP34 were to turn left onto Ringwoud Road they would soon enter the narrow streets of Kingsdown where there are many parked cars and very little pavement for pedestrians. If they were to turn right they would find themselves on the narrow, twisting, steep, liable to flooding and with poor sight lines, high banks and hedges, Ringwoud Road. After this they would have to try to get onto the busy, at times extremely busy A258 at Ringwoud.

	<p>Ringwould Road is crossed by an official footpaths, and an official footpath/bridalway, both are on bends where it is difficult for pedestrians and horse riders to see what traffic is coming or to be seen by drivers. Pedestrians also use Ringwould Road to access the special needs school and Ringwould Village Hall which are both situated on the road close to the junction with the A258.</p> <p>Any increase in traffic on this Road would be impossible to mitigate for without damaging the character of the 'distinctive winding narrow lane' which the 2020 LCA F3 Ripple seeks to preserve.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>SAP34 should not be included in the LDP.</p> <p>DDC should now reconsider the housing allocation targets in light of the government announcement of 5/12/22, particularly with respect to rural settlements.</p>

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Iceni Projects, on behalf of Quinn Estates, welcomes the opportunity to submit representations to the Dover District Council Local Plan Regulation 19 Consultation in respect of land to the north-east of Southwall Road, Deal (the 'Site'). This representation should be considered alongside and with regard to the following appended documents which comprise:</p> <ul style="list-style-type: none"> • Appendix 1 – Site Location Plan <p>The vision for the Draft Local Plan reflects the growing importance of new challenges facing local communities in regard to climate and ecological emergency, and greater emphasis on the protection and enhancement of retail, leisure, cultural and commercial development across the district area, and promoting the health and social wellbeing of communities. The corresponding objectives strive for a more prosperous economy, as well as vibrant new communities. Quinn Estates considers that there is much to welcome in the new Plan, however, the company considers the opportunity to deliver an appropriate and badly needed quantum of growth at Deal has not been positively planned for, and that the Plan would be strengthened by promoting additional growth at Deal.</p>

Quinn Estates considers that the proposal at Southwall Road presents a suitable site for locating employment growth for Deal adjacent to an existing and successful employment site, which would be easily accessible by public transport and be commensurate with the size of the settlement. Given the unique characteristics of the site, it is considered that it would logically lend itself to development of approximately 130,000 sq. ft. of employment uses compatible with those alongside. As such, the site would in particular suit smaller light industrial occupiers (Use Class E(g)) benefiting from the sustainable town centre location. This would provide logical and tempered expansion of the town's employment provision thereby helping address the district's needs, at a location where demand for such uses is proven.

Quinn Estates has a proven track record of providing purpose-built employment space for wide range of end users, from smaller artisanal start-ups to larger established operators; and it is considered that this site would provide opportunities for end users from across that range.

a. The site and surroundings

The Site comprises approximately 3.3 acres of land lying to the north-east of Southwall Road, Deal. The Site is bound to the south-east by Minters Industrial Estate and Deal Business Park on Court Marsh Road and to the south-west by residential properties. The Southwall Industrial Estate encloses the Site to the north-west, separated by an open field; and to the north-east, Hutchings Timber lies beyond a wooded field. The land adjoins the Deal settlement boundary along its southern edge and is located on the north-western edge of the town.

The Site does not contain any Public Right of Ways (PRoWs). Existing access to the Site is via a gate on Southwall Road. Deal train station is located approximately 0.6 miles walking/cycling distance to the east within Deal town centre.

The Site is neither within or near a designated Conservation Area, nor are there any listed buildings or other heritage assets nearby. The land is classified as Flood Zone 2/3. The Kent Habitat Survey 2012 identifies the entirety of the Site as Neutral grassland. There are no significant ecological designations affecting the Site or in the vicinity which would restrict development at this location.

The Site has an uncertain history with regard to assessment under previous Local Plan work. The HELAA 2020 Appendix 1 'Housing Long list' references the site; however, it does not state whether it was proposed for housing or employment as it does with other sites. Appendix 3b 'Housing Sites Highways Assessment' references the DEA049 code as the previous code for another site in Walmer. Appendix 3e 'Initial Assessment Housing Sites Eliminated' notes the site, however, states it is for employment and will be assessed separately. Appendix 3f 'Initial Assessment – Employment Sites Eliminated' has no reference to the site under the DEA049 code, the postcode, or any of the site addresses.

b. Objection to Tables 4.2 of the Draft Local Plan

Quinn Estates considers that the economic growth strategy for Dover, as detailed in Table 3.5 of the Regulation 19 Submission Version of the Draft Local Plan cannot be considered sound plan-making. In its current form, the Plan fails to positively plan for economic growth in Deal under Policies SP6 and E1. Quinn Estates considers that the Plan should proactively support employment growth in Deal through the allocation of additional sites.

Sustainable patterns of growth

Sustainability lies at the heart of good strategic planning and is a core tenet of the National Planning Policy Framework at Paragraph 8. When determining the spatial strategy for employment growth, the Council should direct employment land to the most sustainable locations, namely those which reduce the need for access via private vehicle and are near key population centres.

Deal is the second largest town within the District and is home to approximately 30,000 people. Deal is recognised in the Draft Local Plan as the second largest settlement in the District, benefitting from a vibrant town centre, which benefits from a good level of accessibility and an attractive environment. It's well used by residents and visitors and has a low vacancy rate, as a result of the diverse retail offer. In addition, the town is highly sustainable in regard to public transport accessibility, being served by mainline rail, the high-speed train service to London and numerous bus routes.

Quinn Estates posit that the amount of employment land allocated to Deal within the draft Local Plan is wholly inconsistent with relation to its position as the second most sustainable location in the District for future growth. No new employment land is allocated to the town. The Deal Business Park is offered policy protection through draft Policy E2. Employment allocations have instead been directed to Dover, Aylesham and Eastry, a principal town, rural service centre and local centre within the Settlement Hierarchy, respectively. Table 3.1 of 2021 EDNA update (copied below) succinctly summarises the spatial distribution of employment land across the district, and outlines the strange situation the District faces, where rural areas and smaller settlements hold more employment space than the second largest settlement within the District.

[See attachment]

Evidently, successive Local Plans have failed to plan proactively for employment in Deal, resulting in the picture painted above. Similar to the spatial approach to housing within the Draft Local Plan, the Council's proposed strategy looks to further cement this position, skewing economic growth away from one of the most sustainable locations in the District to areas that are far less sustainable and would require employees to

largely arrive by private vehicle to work. The justification for channelling so little growth to Deal is not considered to be justified by evidence, when all the evidence points to the settlement being such a logical and sustainable location to channel growth to. The principles of sustainability and sound plan making appear to have been absent in key decision taking over spatial choices at the heart of the spatial strategy presented in the Draft Plan.

Ensuring the delivery of employment land

For a plan to be considered effective, the objectives and identified requirements must be deliverable and achievable. It is considered that, in its current form, the plan fails to accord with this part of the soundness test, in part due to over reliance on the White Cliffs Business Park to provide the majority of the District's employment land requirement across the Plan period. Therefore, to ensure the balanced and steady delivery of employment floorspace, further Sites should be allocated to meet the needs of the District, and in particular, the previously identified need of Deal.

The EDNA 2017, and the 2022 update, both highlight how the District has not been able to deliver, to date, the level of growth identified in the 2010 Core Strategy and there is a great deal of 'catching up' to do over the next ten years if there is any prospect that the overall job growth target of 6,500 is to be reached.

Policy CP2 of the existing Core Strategy (2010) seeks to provide approximately 200,000 sqm of employment floorspace and 35,000 sqm of retail floorspace between 2006-2026. The Authority Monitoring Report 2020-21 scores progress against Policy CP2 as amber – where 'progress has been made towards meeting the target however further work is required'. Over the monitoring period (2020- 21), the following net-gains in employment floorspace are found:

[See attachment]

To address this difficulty with delivery of employment land, the Draft Local Plan proposed the White Cliffs Business Park to deliver the bulk of the employment floorspace requirement in the plan and is expected to deliver a total of 120,000 sqm across four phases. However, there is uncertainty regarding the availability of part of Phase 2 and Phase 3 of White Cliffs Business Park which was proposed to be used as an Inland Border Facility, subject to a Special Development Order which is in place. In addition, the Council's own EDNA 2017 assesses the issues with the site, stating that 'the site has struggled to come forward for new B class development over recent years, in part due to viability issues limiting interest by investors to promote B class uses within the site. Retail development has started to erode the longer-term employment potential of parts of the site.' Given the uncertain nature of this site, the Council should seek to broaden the employment base through additional allocations across the District where there is an identified need, in the most sustainable settlements i.e., Deal.

Addressing Flood Zone constraint

The site lies within Flood Zone 3, as shown on the Environment Agency's flood zone map and as such, has the potential to be at risk of flooding from the sea. In partnership with the Environment Agency, the Council completed the Deal Coastal Defence Scheme, which provides a 1 in 300-year (0.33%) standard of protection to this area from coastal flooding and only at risk in the extremely unlikely event that the flood defence infrastructure was to fail (i.e. a breach).

Notwithstanding the unlikelihood of a breach, the NPPF requires a site-specific FRA to be submitted for all development located within Flood Zone 3. The NPPF states that development in areas at risk of flooding should be avoided by directing it in the first instance away from areas of highest risk. Where development within areas at risk of flooding is proposed, Para 161 of the NPPF requires that the Sequential Test is applied and, if necessary, that the Exception Test is applied (Para 163-165).

The Council's Strategic-Flood-Risk-Assessment (2019) provides an up-to-date appraisal of the flood risk in Deal, prepared in conjunction with the Environment Agency, Lead Local Flood Authority, Internal Drainage Board and Southern Water. One of the aims of this report is to provide sufficient data and information to enable the Council to apply the Sequential Test to land use allocations and to identify whether the application of the Exception Test is likely to be necessary. It is significant to note that the Site proposes to develop employment floorspace, which is considered to be a less vulnerable use.

A live application (ref: 22/00916) on an adjacent site 64-66 Southwall Road) is currently seeking permission in principle for up to 7 dwellings, along with a replacement place of worship with a community hub and nursery. The application site also lies within Flood Zone 3 and therefore faces the same constraint as the Site subject to these representations. As of 24th November 2022, the Environment Agency have responded to consultation with no objection to the scheme following clarification of residual flood risk on site. This demonstrates that the designation of land as Flood Zone 3 should not be considered as an absolute constraint affecting the principle of development in this location, and that suitable growth for Deal can be supported subject to the necessary technical work being undertaken through site specific FRA's, and the Sequential and Exception Tests in accordance with NPPF guidance.

c. Conclusion

	<p>Quinn Estates wishes to support Dover in bringing forward a successful, effective and sound Local Plan that can serve the District across the Plan period. However, Quinn Estates considers that the current approach to the spatial strategy in the Draft Local Plan requires amendment to address a significant soundness issue concerning the level of growth identified for Deal, the District's second largest settlement. It is considered that the Plan currently fails to positively plan for a commensurate level of housing and employment at the settlement, as expressed in Policy SP3 and that the available evidence does not support or justify this approach. Moreover, the evidence does support channelling a greater quantum of growth to Deal.</p> <p>The Council has struggled with delivery of employment floorspace across the District within the last plan period, and there is a recognised need for additional employment in Deal within the evidence base for the Draft Local Plan. To combat the current over reliance on the White Cliffs Business Park, which is facing delivery issues, the Council should seek to explore additional avenues for employment growth, through identifying suitable sites in Deal, such as the Site subject to this representation.</p> <p>We trust that the above amendments is acceptable to the Council and that these representations will be taken into account in consideration of the current consultation. We also confirm that Quinn Estates would welcome the opportunity to be involved in the forthcoming Examination-in-Public and contribute to the debate to ensure that the best strategy for the District is found.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><i>DDC Note: The text below was extracted from the attachment. Names and addresses redacted. Will be made available to the Inspector on request. Group rep 111 Shepherdswell residents</i></p> <p>6.4 To be sound, the proposal must comply with the Council's Sustainability Assessment objectives. SA 10 is to 'conserve or enhance the significant qualities, fabric, setting and accessibility of the District's historic environment'. SA 11 is to 'conserve and enhance the special qualities, accessibility, local character and distinctiveness of the District's settlements, coastline and countryside'. In relation to SA10, the Draft Plan recognises 'minor negative effects' (7.207). 3 In relation to SA11, the Draft Plan concedes that the proposed site has 'potential to moderately affect the District's landscapes, townscapes and seascapes'. It is our contention that these desk-top surveys underestimate the negative effects of SA10 and the 'potential' damage in relation to SA11. They ignore evidence provided from local residents during the Regulation 18 consultation.</p> <p>6.5 Definitions of 'historic environment' include not only historic buildings, but a sense of location, of space and of past historical events. The proposed site contains these qualities. It is one of the few remaining spots in the Dover district granting residents easy access to view the eastern and northern Kentish coastline (See figure 1). The historical record shows the significance of this – or nearby now inaccessible vantage points – for Kentish history – some examples going back ten centuries. More recently, in 2012 the site was the assembly point for many local residents to view the demolition of the Richborough Power Station towers. The inclusion of the site would obliterate this historical viewpoint for the community, at best turning it into a private place for particular residents.</p> <p>6.6 The site, as the Draft Plan notes, opens onto 'open rural countryside'. In so doing, it enables a sense of space that provides character and distinctiveness, as well as a sense of well-being. These qualities have previously been recognised by planners and Her Majesty's Inspectorate. Rejecting a proposal for building on the site in 1991, the Inspector noted: From my visit to the site and its surroundings and from the representations made, I consider the principal issue to be the impact of the development on the character and appearance of the countryside around Shepherdswell</p>

	<p>[...] If the development were permitted, it would expand the confines of the village into the open surrounding downland. [...] In my view, the scheme would create a harmful, visual intrusion into this attractive area, spoiling its character and appearance. (D.G. Hayes, Planning Inspectorate, Department of the Environment, 31 October 1991)</p> <p>An earlier assessment noted: The development of this site would involve the sacrifice of considerable assets in respect of landscape. From a distance such development would be plainly seen occupying what is now open hillside upon which only very limited skyline building impinges, and the development on the site would also add to this to a limited degree, but the more serious loss would be in respect of the magnificent outward views now enjoyed from the 2 public footpaths which cross the site one of which is of national importance. S. M. J. Wallis, Department of the Environment, 22 May 1974, DDC CH/6/72/195.</p> <p>Despite changes in planning laws, these assessments remain relevant. They are not 'outdated'. The inclusion of site SAP36 would be an inappropriate development that would have – not a moderate – but a serious effect on local character, distinctiveness and the landscape. The photos in the Appendix taken from the site are testimony to this fact. 4</p> <p>See attachment for photographs</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The changes proposed to make the Plan sound and legally compliant are to delete SAP36, which allocates land for 50 houses to the north and east of St Andrews Gardens and adjacent to Mill House, and all other references to this site from the Plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	HELAA
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Full Representation attached to SDLP1883. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1883.)</p> <p>Housing and Economic Land Availability Assessment (HELAA) (2022) The Housing and Economic Land Availability Assessment (HELAA) (October 2022) identifies a future supply of land in the District which is suitable, available and achievable for housing and economic development uses over the Plan period to 2040. The HELAA (2022) document does not identify the site (Land North of Sandwich Road, Ash) within its assessment. It had previously been assessed in the 2020 HELAA under Reference ASH006. Appendix 4 of the HELAA 2022 assesses sites that were submitted in the initial Call for Sites and then again in the Targeted Call for Sites. The assessment of the Land North of Sandwich Road within Appendix 4 sets out that the initial assessment of the site within the HELAA 2020 was still valid. The 2020 HELAA states that the development of the site would project a spur of intensive development into the countryside and would be disconnected from the existing settlement, therefore compromising the rural character of the north of Ash.</p> <p>The HELAA (2020) therefore states that this would have an impact on the landscape and further assessment is required to demonstrate whether this can be mitigated or not. SLR Consulting Limited (SLR) was instructed by BDW to carry out a high level landscape and visual appraisal of the above site and to provide landscape and visual advice. SLR considered that developments in the area are beginning to infill parts of the settlement to account for the Housing Land Supply (HLS) requirements, and the setting will change over time. It is likely that this infill development, along with any other developments which come along via site allocations, will result in setting of the site changing over time. This would therefore mean that the impact of the proposed development at Land North of Sandwich Road would not result in a detrimental impact on the character of the area. The Housing Site Assessments (2022) document states that the site would be unsuitable for the following reasons:</p> <p>Development of this site would urbanise the northern part of Ash which is predominantly characterised by open countryside and acts as an undeveloped arc and a buffer for the A257 Ash Bypass and would encourage the urbanisation of neighbouring undeveloped parcels. As per comments above, the context of the site is changing due to recently approved developments to the 'Land north of Orchard View. Thus this area of Ash is already becoming more urbanised. Furthermore, the Council's Landscape Sensitivity Assessment 2021 explains that "to the south of the site, development would relate quite well to the form of the village" and "although development would extend to the north of Sandwich Road, it would relate quite well to adjacent urban edges". It is also noted that the assessment of the site notes that the open rural setting is not particularly distinctive and the separation between the village and the bypass is screened from view by continuous roadside woodland. The A257 provides a defensible boundary to the development separating the village from the wider agricultural land in the parish. As such, the development in the area would not encourage development outside this boundary. Given the above context, it is considered that the site should not be considered unsuitable on these grounds.</p> <p>Low – medium landscape sensitivity</p> <p>The Council's Landscape Sensitivity Assessment 2021 explains that a low- medium landscape sensitivity does not prohibit development. In fact, the summary of the assessment of the site concludes:</p> <p>"The site is able to accommodate residential development in some situations without significant landscape/ visual change. Many aspects of development (with appropriate design and mitigation) could potentially relate to the area."</p> <p>Furthermore, it is also noted that on page 2 of Appendix 1a HELAA 2022 – Housing Sites Assessment Document, that Land to the south of Spinney Lane, Aylesham (HELAA ref. AYL003) is found to have a high landscape sensitivity, however the site is still considered suitable subject to mitigation and screening. The same can be said for the site at Land known as the former Archway Filling Station, New Dover Road,</p>

Capel-Le-Ferne (HELAA ref. CAP011) which was also found to have a medium-high landscape sensitivity, whilst also being suitable for development. It is therefore unclear as to why the same cannot be said for Land North of Sandwich Road. With this in mind, the site should be considered suitable for development.

No access concerns

Details submitted with this representation demonstrate that suitable access can be achieved. As the HELAA also considers that there are no access concerns. Therefore, this should not be a reason to find the site unsuitable. PPG Paragraph 010 (ref: 3-010-20190722), explains that plan-makers need to be:

“proactive in identifying as wide a range of sites and broad locations for development as possible (including those existing sites that could be improved, intensified or changed)”. Moreover, this paragraph sets out that it is important to identify sites and their constraints rather than simply rule out sites which are known to have constraints. It is considered that the assessment of the Land North of Sandwich Road has not been thorough and instead dismissed immediately. The information provided for the Site is much shorter and in less detail than most other sites examined through the HELAA. As set out within these Representations, BDW consider that the key constraints that resulted in the refusal of a planning application and the dismissal of the Appeal can be overcome through sensitive landscape-led design. Therefore, the assessment of the Site should be assessed again, considering the potential for improvements, intensification and change.

Recommendations:

1. The Land North of Sandwich Road is reconsidered to take account of potential improvements, intensification and change that could result in a widely benefiting development for the Local Area.
2. The Site is put forward for allocation subject to landscape mitigation and screening techniques.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Without independent, robust auditing, and honesty, extracting promises from developers all too often results merely in employment for public relations practitioners. So, additions to SP13, SP14 and DM policies NE is needed for it to become sound. 'Where permission is given subject to conditions regarding tree retention, tree planting and / or biodiversity enhancement, applicants will need to agree to abide by 'robust auditing' (as Wildlife Trusts insisted that the Environmental Bill legislate for). This means that honest, objective-because-independent, before-and-after evaluations / baseline measurements must be used. DDC councillors on the planning ctee have recently pointed out how very inadequate and misleading the sketchy, google-map-based ecology reports paid for by developer applicants are. Developers are ill-placed to self-certify their own work in this area, and DDC need a DM policy requiring Environmental Impact Assessments on all planning applications for developments of over 15 dwellings on greenfield or rewilded brownfield sites.'</p>

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

The Council have calculated a housing land supply of 6.16 years, including 10% buffer to reflect the preparation of a Local Plan and account for any market fluctuations. This is reflected in the first five years of the housing trajectory, with most new homes delivered during this period a result of extant planning permissions across the district and the Whitfield Urban Expansion. We have raised concerns about the over-reliance of extant consents and strategic allocations to deliver a robust housing supply in the early years of the plan period, and these concerns carry across to the housing trajectory.

Throughout years 1 to 5 (2022/23 – 2026/27), 3,424 new dwellings will be provided through extant permissions which equates to c.85% of the total supply across all vehicles of delivery in the strategy. As noted previously, there are a wide array of reasons causing planning permissions to not be built out in their entirety, or in a timely manner including commercial viability, lapse of consents and shift in market trends. We are concerned that there is too much reliance on extant permissions to deliver homes in the early years of the plan period. The supply of housing through site 4 | P a g e allocations doesn't kick in until year 4 of the trajectory. If there are any delays to the delivery of the consented units, the district may see a serious shortfall in housing delivery in the first five years of the plan period.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please refer to accompanying representations.

Text below (copied from attached statement) added by DDC. See attachment for full representation.

This is an alarming and unsound approach to the housing trajectory, and we urge the Council to bring forward smaller sites in the immediate years of the plan period to ensure delivery doesn't stall, and much needed housing is provided locally in the short term. Smaller sites such as The Former Packhouse can help make the Plan sound by ensuring an appropriate strategy is implemented, and the housing strategy is able to deliver small amounts of housing to rapidly respond to any challenges with the delivery of extant permissions in the first five years of the plan period.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

To provide representations on the housing trajectory, and ensure there is a great distribution and delivery of smaller sites in the first five years of the plan period, with less reliance on extant supply and larger sites.

This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1525.)</p> <p>Housing Trajectory We confirm that DDC Estates will be looking to deliver this site, along with the adjoining landowner, early on in the Plan period. Work being undertaken to develop a more detailed masterplan will be undertaken in conjunction with the Council's Planning Department, which will allow for an early stage of pre-application discussions so a planning application can be submitted upon receipt of an Inspector's letter or upon adoption of the Plan. In broad terms it is anticipated development could commence within 2 years following adoption, and first units delivered 6-9 months later. For example, if the Plan is adopted in December 2023, the first units could be delivered Autumn 2026. It is anticipated this site could deliver 50-60 units a year.</p> <p>The proposed rewording or reinforcement of the policy wording of Policy SAP28 is set out below. It is also noteworthy that this omits the referencing of the undergrounding of the pylons across the site which has been investigated, but the cost would make this option unviable and on this basis the masterplan shows a generous 20m buffer on either side of the line of pylons.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Settlement Hierarchy. (SP3 and SP10)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Aylesham is designated as a "Rural Service Centre" on par with the town of Sandwich. Although Sandwich and Aylesham have equal weighting in the settlement hierarchy, they are not getting an equal weighting in housing development or in terms of investment. The Site Allocations refer to the district's "existing larger settlements of Dover, Deal and Sandwich" but in reality Aylesham is now likely to have a larger population than Sandwich.</p> <p>Aylesham is receiving 649 new homes (SAP24 and SAP27), whilst Sandwich has a proposed development of just over 200 homes.</p> <p>The Draft Local Plan proposes investment in Sandwich to improve the town and protect its historic environment. In addition, it will see investment in culture. This is not the same for Aylesham.</p> <p>This relates to SP3 – Housing Growth and SP10 – Sandwich Town Centre.</p> <p>The residents of Aylesham should also see their cultural capital widened and enriched in such an extensive Draft Local Plan. Other than house building, there seems to be little else on offer. Funding should be provided for organisations such as cinemas, museums, galleries etc that will help to enrich people's lives.</p> <p>For a rural settlement, a further 640 houses, on top of a recent development of 1,360 seems to be somewhat excessive.</p> <p>Aylesham Parish Council believes that Aylesham is being left behind. Aylesham must receive equal investment in comparison to other Rural Service centres to ensure the village thrives.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at	

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Ripple Parish Council objects to the Rural Settlement Hierarchy allocating Ripple village a score of 11 and so classifying the village as having "Tertiary focus for development in the rural area; suitable for a scale of development that would reinforce its role as a provider of services to essentially its home village".</p> <p>The premise for this Hierarchy score is, in the view of Ripple Parish Council, flawed as it is based on inaccurate information used to achieve a score of 11 for the village.</p> <p>There is a very limited bus service visiting the village 6 days a week, serving different destinations – one bus out and back 3 days a week and two buses out and one bus returning on the other 3 days. Such an irregular service cannot be relied on for day to day travel to and from work, nor does the timing of the service support leisure travel.</p> <p>The inclusion of a score of 2 for "other shop" requires clarification as there is no retail outlet in Ripple serving groceries and vital provisions to the residents.</p>

	<p>Similarly the inclusion and score of 2 for “<i>other community facilities</i>” requires clarification. Given that the village hall and the land around it have been separately scored it is not clear what these “<i>other community facilities</i>” actually are. The caravan park is not a community facility.</p> <p>The inclusion of the Church is also questionable as most services are now held in other, more populated areas of the diocese.</p> <p>A score in the Hierarchy of 7 or 6 placing Ripple in the category of “<i>Smaller Villages and Hamlets</i>” would be much more appropriate.</p> <p>Such a change is significant in that whilst development decisions are not taken solely on the Rural Settlement Hierarchy the lower score would mean that Ripple “<i>is not suitable for further development unless it functionally requires a rural location</i>”. The population figures used from the 2011 population census and included in the draft Rural Settlement Hierarchy would appear to support this suggested position for Ripple, with the village being the second smallest local population in the Dover district (at 372) after Stourmouth parish (268 residents). Such a debate is very important in the discussion around the appropriateness and viability of sites and their inclusion in the Housing and Economic Land Availability Assessment (HELAA). In the current draft Ripple has no such land availability for housing and nor did it in the 2015 Land Allocation Local Plan.</p> <p>Ripple Parish Council therefore submits that a correct definition of Ripple as a small village or hamlet based on population and community facilities would mean that they are “<i>not deemed suitable for further development unless such development functionally requires a rural location</i>”.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Reassess and/or substantiate the Settlement Hierarchy score allocated to Ripple.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	E Settlement Hierarchy
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The settlement hierarchy is important in deciding where development is best placed. Aylesham, an isolated village with very few facilities is placed alongside Sandwich a historic centre with many facilities and is also a local transport hub. Sandwich is much more desirable to live in because of these facilities - cinema, art galleries, good library, schools, many societies etc. St Margarets at Cliffe has more facilities including theatre productions, and other cultural activities. Eastry too has more about the place than Aylesham. Aylesham is misclassified. Therefore the plan is not sound as it is unjustified and so ineffective and not based on reality - not positively prepared.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The plan would need to reclassify Aylesham and accept that development there has already gone too far in relation to the facilities there. The plan would concentrate not on housing there but on improving facilities and the quality of life there.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Chapter 4 SAP34, Land at Woodhill Farm, Kingsdown (KIN002)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The inclusion of SAP34bis not legally compliant with NPPF 2021 item 11,(b11 '<i>SP should provide for objectivity assessed needs for housing & other uses...unless(11)any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this framework taken as a whole</i>'</p> <p>the following arguments show why this development would not be sustainable as is a requirement of the NPPF and would have more adverse impacts then benefits.</p> <p>NE2 Landscape Character and The kent Downs sections states in section11.13 that DDC aims: 'To ensure that all development coming forward over the plan period respects and reflects the character of the landscape in which it is located. The LCA(2020) from DDC LCA F3 Ripple map shows that KIN002 is within the area of Open Arable Chalk Farmland with Woodland. Proximity of this site to the boundary of the AONB means that it must be kept as an important buffer between the village built enviroment and open countryside in order that the special character of the area is maintained.</p> <p>Kingsdown should not be designated as a local centre. It is unsound and ineffective to a damaging extent. ' a village providing services for a local area and a secondary focus for development in the rural area' - it does not serve other settlements and is confined by the sea and AONB, is small and has lots of character and has a rural setting.</p> <p>SP4 Windfall Development. a)- The scale must be appropriate to the size of the settlement and existing facilities. -the village has lots of character, conservation area, narrow roads, small svhoo;, no doctors, much reduced bus service,no access to rail, and is car dependence.</p> <p>b)- development must be compatible with the layout, density, fabric, and appearance of the existing settlement and would not result in merging separate settlements.. this would set the tone as you drive in the village, impacts the AONB, need buffer between village boundary and AONB. Widening the road here to make it suitable for highways would ruin the entrance to the village.</p> <p>c & d)- There must not be harm to important green spaces. - the site is directly opposite the AONB which is highlighted throughout the Draft LDP(NE2) as being an important constraint to development, important to village for health and happiness, dog walking, amenity value,. There is Footpath ER5 round the field.</p> <p>f & g) - It would not result in the loss of best and most vesatile agricultural land currently used for agriculture and - it includes an appropriately sized and designed landscape buffer to the open countryside;</p> <p>NE2 states that proposals affecting the setting of the AONB will only be supported where the development is sensitively located and designed to avoid or minimise adverse impacts on the AONB and its setting and the development would enhance the special qualities, distinctive character and tranquility of the AONB.</p>

	<p>This development would impact the AONB due to entrance needing to use some of AONB to widen the road, houses seen from the AONB. The site is better put to use in growing food. We need all the agricultural land we have to grow food for future generations. All development must be sustainable NPPF 21 states. To use growing land is not.</p> <p>h) - it would not have a significant adverse impact on the living condition of existing adjoining residents - but Glen Road is affected.</p> <p>i) - Where development would result in the loss of active employment, open space, sport or community facilities within the settlement that such development is consistent with the requirements of policies EN2, PM5, and PM6 of the plan; visitors are less likely to want to come to Kingsdown if the entrance is blighted by this development and roads are gridlocked.</p> <p>j) - Traffic movements generated from the development do not result in severe impacts to the highway network that cannot be mitigated. - Ringwould Road is very dangerous - fatality recorded near Pumping Station. Large tractorsturn out into the road, a bridleway and fottpaths cross in two points. Ringwould Road has a 7.5 tonne weight limit. There is dangerous gridlock in village during busy periods, namely school run etc.. Ringwould Road would have to be closed for long periods to facilitate work being carried out tomake entrance to development safe.</p> <p>T11 - Development should , in so far as its size, characteristic and location , give priority to the needs of pedestrians, cyclists, users of public transport, car sharers, and users of ultra-low emission vehicles. This site is outsidethe village boundary and not well served by footpaths or cycle paths. The site is crossed by a footpath ER5 which connects to the village along a dirt track with no lighting. Bus services have been reduced and this development is said by HELAA hghways assessment to be unlikely to lead to more buses being laid on.</p> <p>T12. - New accesses and intensified use of existing accesses onto the road network will not be permitted if it would result in a clear risk of crashes or traffic delays unless proposals can incorporate mearsures that provide sufficient mitigation. It is considered this site to be unsound as there would be an increase in crashes and traffic delays. Shared access - poor park users, ER5 footpath, land owner to the left, gas main under the entrance and poor sight lines in both directions.</p> <p>T12 - Applicants must demonstrate that traffic movements to and from the development can be accommodated, resolved, or mitigated to avoid severe cumulative residual impacts. - Kingsdown village has narrow roads few footpaths in main streets. Lorries passing through or delivering/collecting cause long hold-ups beside adding to chaos and doing damage.</p> <p>Kigsdown settlement already has a significant number of 2nd homes and airb&b's, plus the holiday camp. This development of some 50 dwellings could increase this number which would negate the purpose of this development.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Delete site for development KIN002 (50 houses) from the Local Plan. The field needs to be kept as agricultural land as there too many factors against any development</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	4.267 SAP43 - Land at Short Lane, Alkham (ALK003)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Alkham Parish Council challenges the classification as a “Larger Village” as defined in the Local Plan. “Each of these villages has a good range of services and facilities which serve their own residents and those of nearby hamlets. Capel-le-Ferne, Lydden, Preston, Worth and East Langdon have primary schools and Capel-le-Ferne, Lydden, Worth, Alkham are served by frequent regular bus routes. Retail facilities are not as available however as at the Local Centres, with only Preston and Capel-le-Ferne having a village shop, and only East Langdon having Post Office facilities”</p> <p>Alkham does not have a frequent or regular bus service, there are no shops, no school, no GP surgery therefore we do not have a good range of facilities which serve our own residents and those of nearby hamlets. The parish council requests that Alkham is reclassified as a smaller village.</p> <p>The parish council again raises concerns with Dover District Council's wanton disregard for the protection of the AONB. We note with interest that none of the other Non Strategic Housing Allocation sites are within the AONB. We consider it a fundamental duty of DDC to protect the AONB , not to encourage and actively promote its erosion.</p> <p>The parish council are astonished to see this site included in the local plan when in January 2017 outline planning permissions for six homes on this site was refused by DDC. The grounds given were:</p> <p><i>TAKE NOTICE that Dover District Council, the Local Planning Authority, HAS REFUSED Outline Planning Permission for the proposal in accordance with the application and accompanying plans received on 21/10/2016</i></p> <p><i>The reasoning underlying such refusal is as follows:-</i></p> <p><i>1 The proposed development would result in an obtrusive urban form of development in the open countryside, beyond the settlement confines, which would detract from the unspoiled rural character of the area and the setting of the village of Alkham and the character and appearance of the Area of Outstanding Natural Beauty within which the site lies. In particular, the proposal would be contrary to Dover District Core Strategy Policies DM1, DM15 and DM16, paragraphs 109 and 115 of the National Planning Policy Framework and Policies SD1, SD2 and SD03 of the Kent Downs Area of Outstanding Natural Beauty Management Plan</i></p> <p><i>2014-2019</i></p> <p><i>In accordance with paragraphs 186 and 187 of the NPPF, Dover District Council (DDC) takes a positive and proactive approach to development proposals focused on solutions.</i></p> <p><i>DDC works with applicants/agents in a positive and proactive manner by: Offering a pre-application advice service; where possible, suggesting solutions to secure a successful outcome; and, as appropriate, updating applicants/agents of any issues that may arise in the processing of their application. In this instance:</i></p>

1 The application does not accord with the development plan and no material considerations are apparent to outweigh these matters.

Alkham parish council asserts that the AONB remains unchanged and that this 'development' of 10 houses would result in an obtrusive urban form of development in the open countryside, beyond the settlement confines, which would detract from the unspoiled rural character of the area and the setting of the village of Alkham and the character and appearance of the Area of Outstanding Natural Beauty within which the site lies. In particular, the proposal would be contrary to Dover District Core Strategy Policies DM1, DM15 and DM16, paragraphs 109 and 115 of the National Planning Policy Framework and Policies SD1, SD2 and SD03 of the Kent Downs Area of Outstanding Natural Beauty Management Plan 2014-2019

A subsequent appeal to the Planning Inspectorate was unsuccessful.

Appeal Decision

Site visit made on 21 November 2017

by Grahame Gould BA MPhil MRTPI

an Inspector appointed by the Secretary of State for Communities and Local Government

Decision date: 11th December 2017

Appeal Ref: APP/X2220/W/17/3180321 Land at Short Lane, Alkham CT15 7BZ

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.*
- The appeal is made by Mr S Barnes against the decision of Dover District Council.*
- The application Ref DOV/16/01216, dated 20 October 2016, was refused by notice dated 25 January 2017.*
- The development proposed is the erection of up to 6 dwellings with garaging.*

1 The appeal is

- 1 The application was made in outline form and sought permission for up to six dwellings, with matters relating to access, appearance, landscaping, layout and scale all being reserved for future consideration.*
- 1 The main issue is the effect of the development on the character and appearance of the Kent Downs Area of Outstanding Natural Beauty (the AONB).*
- 1 The dwellings would occupy part of a field, currently used as grazing land, which slopes gently from north to south. To the west, on the opposite side of Short Lane, there is housing, while to the east and south there are gently rolling open fields. Immediately to the north of the site there are four pairs of semi-detached houses, 1 to 8 Short Lane (Nos 1 to 8) granted planning permission in 1993. A little to the south of the site there is a public right of way (PROW) extending eastwards from Short Alkham is a small village mainly characterised by housing, with very few local services and facilities being available within it.*
- 2 Given that the site is situated in the AONB there is a general duty to have regard to the purpose of conserving and enhancing the AONB's natural beauty¹.*

Alkham parish council asserts that none of the above reasons for refusal have changed. Further that Policy DM16 of the Core Strategy states that development that would harm the character of the landscape will only be permitted if: it accords with a development plan allocation and incorporates any necessary avoidance or mitigation measures; or it can be sited to avoid or reduce the harm and/or its design would incorporate measures to mitigate the impact to an acceptable level. The parish council asserts that this development does not incorporate any necessary avoidance of mitigation measures and its siting will harm the nature of the AONB.

We would refer you to point 10 of the Inspectors response:

- 1 While the site's roadside boundary is marked by an established hedgerow it would only provide limited screening for the development, not least because an opening or openings would be needed for access purposes. I recognise that there would be scope to undertake soft landscaping along the eastern boundary and immediately to the south of the site. However, it would take a considerable period of time before any new planting would provide any meaningful mitigation for the development when it was viewed from Short Lane or the PROW.*

Alkham parish council asserts that the observations of the Inspector are still valid and there will not be suitable screening of this development.

The parish council concurs and supports the inspectors decisions point 12:

	<p>1 <i>I consider that the development would neither conserve nor enhance the AONB's natural beauty and I therefore conclude that it would be harmful to the character and appearance of the AONB. There would therefore unacceptable conflict with Policies DM1, DM15 and DM16 of the Core Strategy and paragraphs 109 and 115 of the Framework. In relation to Policy DM15 I consider that the development would not come within any of this policy's stated exceptions. I also consider that the Kent Downs Area of Outstanding Natural Beauty Management Plan 2014 to 2019 does not provide support for this development.</i></p> <p>Alkham parish council fully supports all reason given by the Inspector in his refusal of the appeal for six houses on the site in November 2017. We are therefore astounded that Dover District Council has completely ignored not only the Planning Inspectorates Decision (November 2017) but its own refusal (December 2017)for six properties and now suggests that ten houses on the same site would be acceptable.</p> <p>Further DDC have identified that the site is liable to flood and that a flood risk assessment is required. The constraints of the existing infrastructure with regards sewage and flooding is insufficient for a development of this size.</p> <p>The parish council would urge Dover District Council to reconsider this site and act in a manner that is both consistent and to protect the AONB.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	This development will have a significant impact on the residents of Alkham and is damaging to the AONB. The Parish Council would wish to make the voice of our residents known to the Inspector. The Parish Council is passionate in its resolve to maintain the character of the AONB.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	1) Local Centres : Paragraph 4.209 and following, with specific reference to Shepherdswell and 2) Housing Site Allocations : paragraph 4.242 and following, with reference to site SAP36

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>1) LOCAL CENTRES</p> <p>Shepherdswell is designated as a local centre [para 4.209], alongside Eythorne & Elvington, Eastry, Ash, Wingham, St Margaret's and Kingsdown. This paragraph contains a particularly egregious error in stating that <i>"Shepherdswell is located to the north of Dover just to the west of the A2."</i> Shepherdswell, in fact, lies to the east of the A2, and it is distressing that a Local Plan could be so geographically inaccurate.</p> <p>Unfortunately, this is not the only inaccuracy in assessing Shepherdswell as a "local Centre." When this exercise was first presented under the Regulation 18 consultation, various mistakes in the scoring of Shepherdswell were identified and reported by consultees. It appears that only some have these have been corrected in the latest draft. The following errors and inconsistencies remain :</p> <ul style="list-style-type: none"> • The local bus service is described as "infrequent" in para 5.1 of the Rural Settlement Hierarchy Supporting Document, but has been strangely up-graded to "regular daily" in the scores table presented in para 5.2. There is also no acknowledgement that two services have subsequently been withdrawn • The "pop-up" Post Office which visits the village briefly on two days per week is accorded the same score as permanent Post Offices in other villages • Two points are "awarded" for unspecified services, without further explanation • There is no recognition that neither the local pub nor café serve food in the evening <p>In para 4.4 of the document, it is acknowledged that the village survey data is taken from the Council's Authority Monitoring Report of 2018/2019, which was not up-dated due to Covid restrictions, and they have relied on Parish Council input for any up-dates and corrections. Such an ad-hoc approach to data collection and verification is neither reliable nor sound.</p> <p>The Settlement Hierarchy scoring system only records the "advantages" of the different communities ; there is no consideration of the negatives. In that context, the road infrastructure for Shepherdswell and Eythorne/Elvington is markedly inferior that of the other "local centres." The other centres are either directly crossed by main "A" roads, or have such roads in close proximity and running parallel to the main axis of the community – thereby providing easy access.</p> <p>All access to Shepherdswell and Eythorne/Elvington is by small rural lanes, particularly the narrow, tortuous and congested road known variously along its course as Coxhill, Eythorne Road, Shepherdswell Road, Wigmore Lane and Barville Road. The problems with this route are well known, but are almost wholly ignored in the draft Local Plan. Indeed, the silence of the Plan on the critical subject of the area's rural road network is another example of why it is "unsound."</p> <p>2) HOUSING SITE ALLOCATIONS</p> <p>In the previous version of the draft Local Plan, submitted for Regulation 18 consultation, two large sites (then designated SHE003 and SHE004) were ear-marked for housing development. Whilst it is pleasing to see that SHE003 has now been dropped, it is illogical and unsound to that the other site (now renamed SAP36) has been retained, and, indeed, quietly enlarged, even though it was opposed on the same grounds as SHE003.</p> <p>SAP36 has, in fact, been considered – and rejected – for housing development in the past, with previous DoE inspectors highlighting the potential damage to the landscape and environment, and the problems with the transport infrastructure. Over the years, the environmental issues have not changed, but the transport problems have got worse.</p> <p>The proposed access to SAP36 would be via St Andrew's Gardens. St Andrew's Gardens can only be accessed from Mill Lane. Mill Lane itself, at its north-eastern end, is a narrow single track lane, whilst, at its south-western extremity, it connects, at the village green, with the narrow and congested Church Hill and the small back road from Coldred. It is, therefore, impossible to access St Andrew's Gardens other than by single-lane, constricted roads that are inadequate for existing levels of traffic. St Andrew's Gardens currently contains approximately 50 dwellings, meaning that the planned development would double the volume of traffic needing to use this route. An on-site traffic survey conducted on 11 November 2022 suggested that, based on current volumes, an extra 250 vehicles would enter/leave St Andrew's Garden's during peak times.</p>

	<p>In rejecting a previous planning application, a DoE inspector wrote that “the layout of St Andrew’s Gardens is too constricted and too tortuous to provide free and safe access to any considerable number of dwellings.” Nothing has changed since that comment was made.</p> <p>It has also become clear that the actual carriageway within St Andrew’s Gardens itself was constructed to a very basic standard, and, as a result, the tarmac surface is noticeable pitted and pot-holed, and in need of regular repair. It is inadequate for current levels of usage, and would not be capable of supporting a doubling of traffic volumes, nor, indeed, the passage of the heavy machinery that would inevitably be part of any construction project.</p> <p>The draft Local Plan, in its existing form, makes no attempt to address these issues, although they have been extensively explained in the past.</p> <p>The traffic problems are not confined to the immediate vicinity of the proposed development site. Vehicular access to Shepherdswell is, with the exception of a couple of small country lanes, confined to the road running from the A2, just west of the Lydden junction, through the villages of Shepherdswell and Eythorne to the A256, south of Tilmanstone, and known variously along its course as Coxhill / Eythorne Road / Shepherdswell Road / Wigmore Lane / Barville Road. This road is itself a minor route – narrow, frequently tortuous, beset by poor sight lines, and, in many places, unable to accommodate two lines of traffic at the same time. It is deemed unsuitable for heavy goods vehicles. The road is already over-used and heavily congested, with daily instances of traffic queuing at the various bottlenecks, and the occasional “confrontation.” The local topography and the proximity of existing dwellings to the road’s edge excludes any possibility of a significant up-grade.</p> <p>This is the same route that would have to serve the 300 new houses proposed for Eythorne and Elvington (SAP28 and SAP29).</p> <p>The draft plan blandly suggests that “a review of the impact on the surrounding rural road network” should be undertaken as part of any planning application. Surely, any review should be conducted before the sites are accepted for possible development.</p> <p>Similarly, alongside the transport infrastructure problems, any substantial housing development in Shepherdswell would put extra strain on a sewerage and waste water system that is already unable to cope, a local primary school that is currently over-subscribed, and a doctor’s surgery that is having to send patients to Dover for treatment. Again, the draft local plan is silent on how such problems can be handled.</p> <p>It is again necessary to draw attention to inaccuracies and misinformation contained on the Plan’s evidence base. For example, the Sustainability Appraisal Appendix contains – in more than one place – the assertion that site SAP36 is within 500 metres of the local railway station. It is not. GPS data clearly shows that it is almost one kilometre from the site to the station utilising the most direct road and footpaths.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<ul style="list-style-type: none"> - Correction of persisting errors in the Local Centre scoring system, and correction of errors in the evidence base - Recognition of not only the advantages, but also the negatives, in assessing whether a community qualifies as a Local Centre (e.g. deficiencies in the local infrastructure) - The removal from the Plan of site SAP36 as a suitable location for future housing development.
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>In the responses to the Regulation 18 consultation of the draft Local Plan, numerous inaccuracies and mistakes were reported to DDC. These were not matters of opinion, but matters of fact. It has become apparent that not all of these have been corrected in the document now under consultation. I am not, therefore, confident that the Council can be relied upon to present to the Inspector a document that is 100% accurate, and that members of the local community must have the opportunity to challenge such failings in a public forum.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Eythorne Parish Council's attached representation relates to Strategic Policy SAP29 on page 170.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Edit - Text extracted from attachment to SDLP484 and 486. See that attachment for full text</p> <p>2.4 To explore the sustainable aspects further, the following table is a comparison of the facilities and amenities which actually exist within Eythorne and Elvington to those which the local plan site allocations policies of SAP28 and SAP29 state and on which the sustainability assessment was based.</p> <p>DDC Edit: See attachment for table which compares 'actual' and 'local plan' amenities / facilities</p> <p>It can therefore be seen that the statement of facilities/amenities within the local plan is somewhat inaccurate given that, of the 17 categories identified, 7 were quoted incorrectly, i.e. 41%. Significantly the overstatement in the local plan accounts for 24% of the total number of categories and therefore results in a negative outcome when judging how sustainable the new developments can be.</p> <p>2.5 Although the local plan emphasises the local amenities which exist within Eythorne and Elvington what it doesn't do is identify the services and facilities which do not exist nor are available in close proximity thus adding a significant negative outcome on the sustainability, and indeed suitability, of SAP28 and SAP29. For example there is no GP surgery, no conveniently located secondary education or higher education, no nearby supermarket outlet and no public transport provision. Consequently, the major services required by families e.g. education, health and food shopping, and in particular those of any new developments, all will need to be accessed using non sustainable forms of transport. Crucially at the end of October 2022 the bus service for Elvington and Eythorne to Dover was withdrawn removing all public transport provision from the two villages. This only serves to exacerbate the need for motor vehicle usage and strengthens the traffic predictions noted in 3.2 below.</p> <p>2.6 Since the withdrawal of the bus service at the end of October 2022, there are already signs of this having a devastating impact on the local community. The service was relied upon by some to get to work, travel to university, visit Dover leisure centre to utilise a membership, access medical services and visiting family and friends. All these activities have been curtailed with no other safe and viable travelling alternatives available. Under such circumstances it is impossible to imagine how any new developments in the area can be regarded as sustainable growth and not have significant detrimental impacts on the existing community and its infrastructure.</p> <p>2.7 To suggest the sites are within 200m of a Public Right of Way or cycle path in the sustainability assessment is a misleading metric as not only does this not consider if the PROW/Cycle path is suitable for the destination required, the actual number of PROW's and cycle paths are limited and indeed some PROW's prohibit cycling thus resulting in very limiting value to new development.</p> <p>2.8 Given also that the Eythorne Elvington CP School is already over subscribed in school places, this will promote the need to travel well beyond the village settlements to gain primary education and only serves to highlight how absurd it is to promote new development on the scale suggested.</p>

	2.9 The proximity of the Pike Road Industrial Estate does provide some opportunity for local employment however there has not been any new development, and hence increased employment opportunity, at the site since the 2002 local plan. In fact a granted planning application in 2013 for new development has not to this day been implemented
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	No

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Yes</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>I object to KIN002 (SAP 34) being included in the draft LDP for the following reasons:</p> <p>The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii <i>'SPs should provide for objectively assessed needs for housing & other uses, . . unless (ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'</i>.</p> <p>The following arguments show why this development would have more adverse impacts than benefits and would not be sustainable.</p> <p>Kingsdown is a quiet village which has not developed into a larger settlement because it is isolated by its geography (see my later comments on local centres). Allocated money from developers would not 'improve' the infrastructure of the village as there is no space to provide parking or for widening roads or for improving any other physical infrastructure. The narrow single track roads through the village which are an inherent part of the character and charm of the village are also a limiting factor for the village in terms of further development. The roads in the village are already adorned with parked cars wherever possible, and there are very limited pavements in the village, this means pedestrians are often forced to walk in the middle of the roads and duck in-between cars when traffic approaches. Some parts of the roads have high walls and no pavements which, with current traffic levels, make walking perilous. Any increase in cars trying to park to use services or passing through the village, would be very dangerous. Residents of KIN002 would have to use their cars for almost all of their journeys, creating pollution and congestion.</p> <p>Furthermore, as the UK government have decided on 5/12/22 to stop putting pressure on local authorities to authorise unsustainable housing targets the LDP now needs reviewing in light of the new directives. The Dover District Area has, in recent years, been subject to considerable housing development, higher than that allowed for by the current local plan, and this development has been unsustainably concentrated into certain specific areas, because much of our district is either already overdeveloped, or not suitable for large scale development as it is either designated as an area of outstanding natural beauty (AONB), or it is heritage coast, or it is very low lying and liable to flooding or needed as floodplain.</p> <p>The continued inclusion of SAP34/ KIN002 land at Woodhill Farm, Kingsdown in the LDP is unsound, because, despite many concerns and reasoned arguments from residents the only concession seems to have been to reduce the housing numbers from 90 to 50; Due to the weak wording of the local plan that only suggests what would be 'preferred' by the district council, it is highly likely that the final number of houses would be in excess of 50 and possibly in excess of 90, if the proposal were to go ahead.</p> <p>The site has now been given a green allocation in the HELAA report despite its many issues and the fact that an adequate highways assessment has not yet been carried out and the HELAA highways assessment remains amber. The latest HELAA report states that the many failings can be mitigated for within the LDP. I argue that this is unsound and not justified nor consistent with National Policy NPPF 21. The evidence from DDC has not been used correctly. NE2 Landscape character and the Kent Downs; states in section 11.13 that DDC aims: <i>To ensure that all development coming forward over the plan period respects and reflects the character of the landscape in which it is located.</i> The DDC landscape character assessment of 2020 (LCA) shows that SAP34 / KIN002 falls within Ripple F3, <i>open chalk farmland and woodland.</i> NE2 states; <i>the classification identifies 17 LCAs and defines issues of landscape management and development management which should be delivered over the plan period.</i></p> <p>Development Management guidelines include:</p> <ul style="list-style-type: none"> - <i>Conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB.-Seek to reduce lighting and noise impacts on this landscape and in longer views through sensitive highway design/management. Conserve the distinctive narrow winding lanes and grassy verges.</i> <p>SAP 34 would not <i>'conserve the rural character of the landscape'</i></p> <p>SAP 34 would be right next to the AONB so would clearly not <i>'provide a rural setting for the Kent Downs AONB'</i>.</p> <p>SAP 34 would, in direct contravention of the guidelines, increase <i>'lighting and noise impacts on this landscape'</i>.</p> <p>SAP 34 would, in direct contravention of the guidelines, due to the raised setting of the site, negatively affect the rural setting of the AONB on <i>'longer views'</i> of this landscape, both looking into and out from the AONB.</p>

SAP 34 would also, according to the HELLA Highways assessment, require the alteration of and therefore not *conserve the narrow winding lane and grassy verges* which form the main entrance to and help to define the character of, the quiet village of Kingsdown.

The Development Management guidelines also include:

- *Conserve the open skyline, avoiding the introduction of vertical elements such as pylons, telecommunications masts etc. - Protect and enhance views from more elevated areas and from the coast out to sea and towards landmark features such as Walmer Castle.*

SAP 34 is in an elevated position so it would not *Conserve the open skyline* of this landscape area of open chalk fields with woodland.

SAP 34 is in an elevated position so it would not *Protect and enhance views from more elevated areas* of this special landscape area of Ripple F3.

SAP 34 is clearly visible from many viewpoints within both the AONB and the Ripple F3 special landscape area, from along the A258 and the network of footpaths, and from the locally renowned 'Nelsons seat viewpoint'. I contend that it would therefore not *protect and enhance the views of this landscape*.

SAP 34 can, as I have mentioned be seen from within the Ripple F3 landscape area, and from certain directions it would be in the foreground of views out to sea, it would therefore not *Protect and enhance views out to sea*

SAP 34 has views out to the picturesque Ripple windmill, which I contend is a *'landmark feature'*, therefore this development would contravene the development guidelines, by not protecting nor enhancing views towards *'landmark features'*, which would be lost.

The development of SAP34 would result in the loss of an important buffer between the built environment of Kingsdown and the AONB. Ringwould Rd would lose part of its character and the main entrance to the village would be deprived of its character. Part of the AONB would be lost as would part of the character of the AONB. From within The Ripple F3, views across to Kingsdown and the sea would be negatively impacted and the open character of the landscape would be lost and pollution from light and traffic would increase. The HELAA sustainability appraisal states; *The site has been judged by Council officers to have the potential to moderately affect the District's landscapes, townscapes or seascapes.* I argue that this is not supported by the facts, and is not a fair appraisal of the probable impact of this development, especially when considered in the light of the site forming part of the LCA F3, the proximity to the nationally important AONB and the suggested necessary alterations to the *'distinctive narrow winding lane and verges'* which lead into what is at present a quiet rural village.

NE2 11.19 states *'The setting of the AONB comprises land adjacent to or within close proximity of its boundary, including but not limited to land which is visible from the AONB and from which the AONB can be seen.....Within the setting of the AONBs, priority will be given over other planning considerations to the conservation or enhancement of natural beauty, including landscape, wildlife habitats, tranquillity, dark skies, and geological features'*.

NE2 11.19 clearly and accurately describes the proposed site for SAP34. It is adjacent to and within close proximity of the AONB, it is visible from the AONB and the AONB can be seen from it. By allowing this development to go ahead, *'conservation of natural beauty, including landscape, wildlife habitats, tranquillity and dark skies'* would not have been given *'priority over other planning considerations'* I therefore contend that the development is not sound.

SP13 states that *the NPPF 2021 requires local plan policies to conserve and enhance the natural environment, to recognise the intrinsic character and beauty of the countryside and the wider benefits from natural capital and ecosystems.* Including SAP34 in the LDP is therefore in direct contravention of the NPPF, which means it is unsound as it would detract from the beauty of the countryside particularly the adjacent AONB. The Kent Downs AONB management plan 2021-26 says *the Kent Downs AONB, perhaps more than any other of Britain's protected landscapes – AONBs, Heritage Coasts or National Parks, has experienced and is experiencing severe development pressure.* DEFRA evidence shows *'The Kent Downs AONB stands out as an area which has experienced major change, showing a rate of urban growth of almost 10%.pa, with the urban area spreading by 14 ha over the decade'*. The AONB in Dover District has suffered development at a disproportionate rate which indicates that planning pressures on our district are unsustainable as they are overflowing into this nationally important landscape area. National Planning Practice Guidance (NPPG) confirms that the Duty of Regard is *'relevant in considering development proposals that are situated outside National Park or Area of Outstanding Natural Beauty boundaries, but which might have an impact on the setting of, and implementation of, the statutory purposes of these protected areas'*. I would argue that because the entrance onto Ringwould Rd requires widening and changing of the road which will encroach into the AONB, to mitigate for it being unsafe, this will be detrimental to the setting and directly upon the AONB.

NPPF 2021 11 – making effective use of land - Planning policies and decisions should: 120 b *recognise that some undeveloped land can perform many functions, such as for wildlife, recreation, flood risk mitigation, cooling/shading, carbon storage or food production.* As food security is such a national issue, including SAP34 for development is unsound and unsustainable as good agricultural land would be better served in producing food. I would add that the local plan talks about sustainability for future generations, but as the UK only produces around half of the

food we need domestically, and the world population is growing and with global warming crops around the world are beginning to fail, it is highly likely that in the future we will need all the agricultural land we have to feed ourselves. Developing agricultural land is not sustainable.

Allocated money from the developers would not improve things as there is no space to provide parking in the village or for widening roads or for improving infrastructure. The narrow single track roads through the village which are an inherent part of the character and charm of the village are also a limiting factor for the village in terms of further development. The roads in the village are already adorned with parked cars wherever possible, and there are very limited pavements in the village, this means pedestrians are often forced to walk in the middle of the roads and duck in-between cars when traffic approaches. Any increase in cars trying to park to use services or passing through the village would be very dangerous. Residents of KIN002 would therefore have to use their cars for everything, creating pollution and congestion

Local Centres:

I would argue that the designation of Kingsdown as a local centre is unsound. Due to the nature of its location, with the undeveloped AONB, heritage coast and cliffs to the south, with no roads for access from this direction, the Sea to the east, with no villages, inhabitants nor roads, only Walmer to the north, which is closer to the town of Deal than to Kingsdown, but in any case, itself has better facilities than Kingsdown. To the west there are several small villages, such as East and West Langdon, but they are closer to and have better links to Dover, to the north west are Studdle, Ripple and Mongeham, but they are closer to and have better links to Deal. This leaves the small settlement of Ringwould, which is close to Kingsdown, but is cut off by the Arterial A258. Ringwould Road, which joins the two settlements, is steep and narrow in parts and not suitable for occasional cyclists or walkers, so most people would tend to drive between the two villages, however, there is very limited parking and limited facilities in Kingsdown, so even people from Ringwould are much more likely to frequent Dover, Walmer or Deal for everyday needs or services. All of this probably goes a long way to explain why Kingsdown has never developed wide roads and modern infrastructure.

The high proportion of second homes and Air b and bs in the village demonstrates that dwellings outnumber homes required, so there is not an '*objectively assessed need for housing within the Parish*'. If largescale development were to take place in Kingsdown, it is highly likely that, many of them would become second homes or Air b and bs. Unless houses used for these purposes are owned by local people who already live in the village, which is unlikely, such houses would bring very little to the village. To include SAP34 /KIN002 is therefore unsound and not consistent with NPPF 21.

NPPF 2021, Paragraph 73. b) states that suitable land for development should; '*ensure that their size and location will support a sustainable community, with sufficient access to services and employment opportunities within the development itself (without expecting an unrealistic level of self-containment), or in larger towns to which there is good access;*' However SAP34 is unsound because there are extremely limited opportunities for employment within Kingsdown and there is not '*good access*' to larger towns. There is no rail link, the bus service is very limited and reduced since Reg 18, and the roads are narrow and already at certain times, dangerously busy.

NPPF 2021 Paragraph 79, states; '*To promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities. Planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. Where there are groups of smaller settlements, development in one village may support services in a village nearby*'. Because as I have outlined, Kingsdown is not at the heart of other rural settlement, the development of SAP34 will not '*enhance or maintain the vitality of rural communities*'.

The HELLA highways assessment commented that the scale of KIN002 was too small to create enough new footfall to improve the bus service, I suggest it would also be insufficient to warrant any other new services either.

I have mentioned that Kingsdown is isolated by distance and due to poor public transport, due to the position of the A258 and due to the narrow roads leading to and from the village. For these reasons, it cannot be said to be part of a '*group of smaller settlements*', where '*development in one village may support services in a village nearby*'. New residents at KIN002 would mostly have to use their cars to visit Dover, Deal or Walmer for services, contributing to Carbon emissions and making the roads more congested and dangerous. For these reasons I believe the KIN002 is unsound and unsustainable.

For all of the above reasons I contend that classifying Kingsdown as a 'village centre' is not justified by the facts. It should be reclassified as a 'larger village', which would mean the only development permitted would be windfall development within the village boundary.

If Kingsdown were to be classified as a larger village, which I have shown is demonstrably appropriate, then there would be strict criteria limiting developments such as KIN002, which would not be allowed to proceed as it is outside the village boundary.

When using the criteria of the draft local plan SAP34 is not sustainable and unsound for the following reasons:

TI1 Development should, in so far as its size, characteristic and location -Give priority to the needs of pedestrians, cyclists, users of public transport, car sharers and users of low and ultra-low emission vehicles.

The location and size of SAP34 means it will give priority to car drivers only so it will not be in line with T11. The HELLA appraisal said it will not be large enough to warrant improvement of public transport. It is not on a train route. There are poor footpath routes to the village and only narrow and winding lanes to the village and to local towns. There is a cycle route to Deal along the seafront, but this joins Kingsdown at the other side of the village and the route would probably be too far for most casual cyclists. It is probably too far for people to walk to Deal or Dover in order to use the facilities at these towns. Any attempt to improve the cycling and walking routes to the village would result in loss of the distinctive character of the winding lanes which the 2020 LCA F3 Ripple seeks to preserve.

T12 New accesses and intensified use of existing accesses onto the road network will not be permitted if it would result in a clear risk of crashes or traffic delays unless the proposals can incorporate measures that provide sufficient mitigation. I consider this site to be unsound as there would be an increase in crashes and traffic delays. Widening the junction at the exit would not do anything to improve the narrow dangerous access through Kingsdown village. It would also not improve the access from Ringwould Road onto the very busy A258 at Ringwould. Widening the road at the access point on Ringwould Road, would mean losing part of the Kent Downs AONB and would also effect the character of the winding lane entering the village, which as I have mentioned the 2020 LCA F3 Ripple seeks to preserve. Land either side of Ringwould Road is not owned by the same party as KIN002 and so cannot make up part of this development. Furthermore, any attempt to alter Ringwould Road at any point would also result in the loss of the charming character of the road. The access is also complicated. It is used by visitors to the play area and the landowner to the left as you enter the field from the road. No mention is made in the HELAA highways assessment of the landowner needing access. ER5 also crosses the entrance which would therefore be dangerous to pedestrians crossing from the field back to the village. ER5 is a very busy path used by dog walkers on a daily basis. The sight lines onto Ringwould Road in both directions are poor. Ringwould Rd is very narrow in places and in places, 2 vehicles cannot pass each other. Turning left out of the site would be onto a narrow road going into a 20mph zone. Turning right is in a 50mph zone with a bridleway and footpath crossing with poor visibility and slow tractors turning out onto the road. There has already been an RTC resulting in a fatality and serious injury on Ringwould Rd. I would argue that issues with access alone mean that this site is not suitable and unsound for development. A medium pressure gas main crosses KIN002 diagonally and crosses the road at this access point which would require careful consideration when changing the access. This would cause a lot of disruption to the villagers as this is the only classified road in and out of the village and as poor as it is, is the main route to the A258. If traffic had to divert via Deal this would create extra pollution and congestion for a protracted period of time which would be contrary to SP1 and the climate emergency declaration by DDC.

T13 Applicants must demonstrate that traffic movements to and from the development can be accommodated, resolved, or mitigated to avoid severe cumulative residual impacts.

As I have already pointed out, traffic movements to and from the site would be on to Ringwould Road. This road is narrow, in places steep, in places it has high banks and hedgerows which preclude views along it, it sometimes floods in the dip before the hill towards Ringwould and I have known many winters when it has been impassable because of snow. If cars from the proposed development SAP34 were to turn left onto Ringwould Road they would soon enter the narrow streets of Kingsdown where there are many parked cars and very little pavement for pedestrians. If they were to turn right they would find themselves on the narrow, twisting, steep, liable to flooding and with poor sight lines, high banks and hedges, Ringwould Road. After this they would have to try to get onto the busy, at times extremely busy A258 at Ringwould. Ringwould Road is crossed by an official footpaths, and an official footpath/bridleway, both are on bends where it is difficult for pedestrians and horse riders to see what traffic is coming or to be seen by drivers. Pedestrians also use Ringwould Road to access the special needs school and Ringwould Village Hall which are both situated on the road close to the junction with the A258.

Any increase in traffic on this Road would be impossible to mitigate for without damaging the character of the 'distinctive winding narrow lane' which the 2020 LCA F3 Ripple seeks to preserve.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

SAP34 should not be included in the LDP.

DDC should now reconsider the housing allocation targets in light of the government announcement of 5/12/22, particularly with respect to rural settlements.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>I would argue that the designation of Kingsdown as a local centre is unsound, unjustified, ineffective and inaccurate. Due to the unique nature of its location with AONB to the South as a border, the Sea to the East, heritage coast and cliffs to the South. The 3 narrow access roads serving Kingsdown do not link up easily to other hamlets and smaller villages to provide services. The main settlement of Ringwould is the other side of the A258 arterial road from Kingsdown and better served by Deal or Dover. There is no doctors, a recently reduced bus service, poor transport links for pedestrians and cyclists, no train station. A small village shop with post office and butchers. It is necessary to run a car to get to Deal or Dover for a food shop. It is not best served by large scale development and can only cope with a windfall developments due to its very poor but characterful roads.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Iceni Projects Limited ('Iceni') is writing on behalf of Quinn Estates Ltd ('Quinn Estates') to submit representations to the Dover District Local Plan Regulation 19 Consultation in respect of land to the east of Great Cauldham Farm, Capel-le-Ferne ('the Site').</p> <p>These representations should be considered alongside the following supporting documents appended to this letter:</p> <ul style="list-style-type: none"> • Appendix 1 - Indicative Site Layout Plan; • Appendix 2 - Landscape Briefing Note; • Appendix 3 – Transport Note; and • Appendix 4 – Cultural Heritage and Archaeology Note. <p>Quinn Estates supports the allocation of the Site within the new Local Plan for 70 dwellings in order to support the Council's target of 11,924 homes over the Local Plan period to 2040. Nevertheless, as set out in further detail below, the Site can sustainably accommodate additional housing to deliver further dwellings in the Plan period, as demonstrated by the documents appended to this letter.</p> <p>The vision for the Draft Local Plan reflects the growing importance of new challenges facing local communities in regard to climate and ecological emergency, and greater emphasis on the protection and enhancement of retail, leisure, cultural and commercial development across the district area, and promoting the health and social wellbeing of communities. The corresponding objectives strive for a more prosperous economy, as well as vibrant new communities. Nevertheless, Quinn Estates considers that the approach to assessing settlements, and the resultant amount of housing allocated to settlements, is based on an ineffective method of understanding the sustainability of villages. Quinn Estates considers that the Plan would be strengthened by increasing the amount of housing allocated to settlements which can suitably accommodate such growth.</p> <p><u>a. Relevant Background</u></p> <p>Quinn Estates Quinn Estates is the south east's foremost mixed-use developer with numerous development interests within Dover District, Kent and the wider South East area. The company has delivered both successful community extension schemes and stand-alone development sites both within rural and urban</p> <p>Our services include: archaeology design engagement heritage & townscape landscape planning sustainable development transport</p> <p>Iceni Projects is the trading name of Iceni Projects Limited. Registered in England No. 05359427</p> <p>locations within the District. Quinn Estates' track record of housing delivery should be a material consideration that should inform key planning decisions, including which sites to allocate for development. Furthermore, Quinn has demonstrated through its' actions that it can formulate and deliver development solutions of high community value, always working hard to identify through community engagement how the company's developments can support and strengthen communities by delivering community infrastructure needed. They have a track record of delivery in Dover, with over 200 new homes and 45,000 sq.ft of commercial space delivered.</p> <p>Site and Surroundings The Site adjoins the existing settlement of Capel le Ferne, though it is centrally located within the settlement given the proposed Site lies between Capel Street and Cauldham Lane. The Site is approximately 4ha and currently comprises farmland. It is located outside the settlement boundary as defined by the Core Strategy 2010.</p> <p>The Site is well connected to the local footway network with a footway running alongside Capel Street. The path is approximately 2.0m in width and provides links to the north and to the south as well as excellent connectivity to the centre of the village, including a network of interconnected public rights of way and bridleways.</p> <p>The Kent Downs Area of Outstanding Natural Beauty (AONB) borders the Site to the west and the Capel le Ferne settlement boundary bounds the site to the east. Notably, the landholding comprises the only land adjoining the settlement that lies outside of the AONB, which makes the land the best suited and the most sequentially preferable development option for the settlement. The Site is not located within a Conservation Area and there are no heritage assets or Scheduled Ancient Monuments within the site boundary. The whole of the Site is located within Flood Zone 1.</p> <p>To the north-west, the Site is bound by agricultural fields whilst the north-east corner is bound by residential properties. To the south and east of the site are further existing residential dwellings fronting onto Cauldham Lane and Capel Street. Existing dwellings also border the western boundary of the Site on the southern section and farmland on the northern section. The existing settlement is characterised by one and two</p>

storey dwellings. The rear gardens of the existing dwellings directly adjoin the Site. The gardens are generally substantial in size and therefore setback from Site.

The Site is well located in proximity to services, facilities, amenities and public transport making it a sustainable location for residential development. Capel le Ferne Primary School and Village Hall are located approximately 200m north-east of the Site (less than 5-minute walk), a convenience store is located less than 200m from the Site to south-east and so the most important components of a sustainable settlement are already in situ. In addition, the Site is served via nearby bus stops located on New Dover Road, approximately 200m to the south of the Site. The bus service runs every 15 minutes between Dover, Folkestone, New Romney, Rye and Littlestone-on-Sea and as such, there is a frequent and reliable public transport option to access a variety of high order settlements. This connectivity is an important and sometimes overlooked factor in determining the sustainability credentials of settlements such as Capel.

Capel le Ferne is defined in the adopted Dover District 2010 Core Strategy as a Local Centre providing a range of shops and services for the local communities and surroundings. There are also a variety of nearby employment areas including Folkestone and Dover that provide work opportunities for residents of Capel le Ferne and surrounding areas. Dover is the principal town in the District and therefore hosts a range of employment opportunities including those relating to the international port and retail related employment, whilst Folkestone is a sub-regional town in the Folkestone & Hythe Local Plan which provides “(inter-) national transport links, and a good choice of employment, retail, cultural/leisure and public services for the whole of the district, adjoining districts and visitors.”.

b. Response to Draft Dover District Local Plan

The draft Dover District Local Plan Regulation 19 Consultation seeks comments on the legal compliance, soundness, and compliance with the duty to cooperate of the Submission Version of the plan. This section responds to the draft Local Plan and assesses its soundness in relation to the housing growth strategy (Policy SP3) and proposed allocation at Great Cauldham Farm (Policy SAP44).

Quinn Estates welcomes the inclusion of the Site within the Draft Local Plan for residential development. However, Quinn Estates consider that the Settlement Hierarchy, particularly for Capel- le-Ferne, is based on an assessment methodology which fails to appropriately assess the sustainability of the village. Accordingly, the village could accommodate additional growth and the Table 4.12 should be amended to propose a minimum of 70 dwellings on the site. The current approach to the development strategy raises several issues which can be addressed through the allocation of additional housing growth to Capel le Ferne, including the Site subject to this representation.

Housing Need and Supply

Table 3.1 of the draft Local Plan outlines an overall supply of 11,924 dwellings across the plan period. This equates to an 8% buffer over the minimum housing requirement derived from the standard method. This is proposed to be met through a combination of committed schemes, site allocations and windfall sites. This is not considered to be sufficient due to the over reliance on one strategic site - the Whitfield Urban Expansion.

Quinn Estates has no objection to large-scale housing development at strategic sites playing an important role in meeting housing need. However, what looks good on paper needs to deliver in practice. However, in a District like Dover where there is a need for the benefits of growth to translate across the District, the spatial strategy should be seeking to unlock growth and inward investment at other settlements, such as Capel le Ferne, and this is a significant weakness of the Plan in its current form. Paragraph 35 of the NPPF outlines how plans are effective where they are found to be deliverable over the plan period. The disproportionately high dependence on Whitfield Strategic Allocation (SAP1) results in a plan which raises considerably uncertainty as to this key soundness test.

Strategic scale sites typically have long lead-in times and often require infrastructure to be delivered up-front. As a result, they may not begin to deliver housing until the later in the Plan period. Smaller scale sites, such as the subject Site at Great Cauldham Lane, which is rightly allocated to ensure the plan is positively prepared in line with the requirements of the NPPF is supported. In this regard, Paragraph 60 of the NPPF highlights that “to support the Government’s objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed”. The allocation of the site at Great Cauldham Lane is supported by Quinn Estates, it can come forward early in the period, it is capable of delivering a mix of housing types and tenures and therefore makes an important contribution to local housing needs in the near future.

Quinn therefore encourages Dover District Council (DDC) to make every effort to meet, and if possible, exceed this target to ensure the Government’s objective to significantly boost the supply of housing can be met. As part of this a wide range of sites of different sizes and locations should be allocated to ensure choice and flexibility in the supply, in accordance with paragraph 67 of the NPPF. Sites such as Great Cauldham Farm should therefore be utilised to their full extent to reduce this over reliance on the Whitfield Urban Expansion to deliver housing across the plan period.

Settlement Hierarchy

Quinn Estates considers that the approach taken to the delivery of housing in Dover as set out within Table 3.3 of the Regulation 19 Submission Version of the Draft Local Plan is not a result of sound plan-making. It is considered that the Settlement Hierarchy inappropriately assesses settlements using a bizarre matrix system which does not reflect how residents use services, and the resultant ability for a settlement to support additional residential development and deliver benefits to existing residents.

The Council's evidence base for the Local Plan comprises a range of technical reports and topic papers including a Rural Settlement Hierarchy Study (2022). Quinn Estates are disappointed to note that the previous comments made at Regulation 18 stage have not been taken into account, and that Capel le

Ferne remains downgraded to a 'Larger Village' rather than as a 'Local Centre' as the 2010 Dover Core Strategy currently acknowledges. Within the 2010 Dover Core Strategy Capel le Ferne was identified as a Local Centre and therefore a secondary focus for development in the rural area; suitable for a scale of development that would reinforce its role as a provider of services to its home and adjacent communities.

The Rural Settlement Hierarchy Study is an important document, as it has clearly directly led to the spatial approach presented in the Plan. However, the methodology to assess the sustainability of settlements is flawed and consequently this undermines the soundness of the whole spatial strategy. A simple matrix exercise has been used to count the number of facilities within the settlement, yet limited consideration is given to the level or value of service these facilities provide or any objective and balanced measure of sustainability of settlement based on critical elements such as their characteristics or spatial relationship in relation to other settlements and connections to them. It is disappointing to note that this matrix exercise has been used again for the Regulation 19 draft of the Local Plan.

A quantified points system has been used in which each service is awarded a certain number of points based on the amount and range of facilities provided within the settlement. It is clear there are some significant shortcomings in using this inventory method to assess the sustainability of a settlement and thus determining its position within the settlement hierarchy. For example, each shop unit is worth one point whilst a primary school or train station is only worth three points in total. The result of this is a settlement could score points if it contains shops that do not provide an everyday service to the settlement, for example a car dealership or a furniture store. It is clear that these uses will make a limited contribution to sustainability, they have a limited day to day function, they make a negligible contribution to day-to-day sustainable travel patterns and indeed, if anything, they could serve to weaken the potential to achieve more sustainable travel patterns if such uses are sited at remote settlements. As such, the methodology inflates the sustainability credentials of some settlements, whilst failing to identify the high sustainability credentials of others. When considering the sustainability of the site, the Council should consider a settlement's respective connectivity to other settlements and the way that settlements inter-relate to support and foster sustainable development. This more nuanced qualitative approach was taken through the previous Local Plan Review, but appears to have been discarded in the current Plan review for no discernible reason. As such, the method used to review settlements calls into question the soundness of the Local Plan as it would not be considered appropriately justified under Paragraph 35B of the NPPF.

In the case of Capel le Ferne, the settlement is supported by its own services, as detailed the Housing and Economic Land Availability Assessment submission for the subject site in 2022, and the Sustainability Appraisal Appendix F 2022.

These services include regular bus services to Dover and Folkestone, general public store, public house, café, village hall, two churches, weekly farmers market and a primary school. This range of services meets the everyday needs of existing and future residents of Capel le Ferne and a new residential population would ensure that the vitality and viability and the range of local service provision is enhanced. Focusing growth at the settlement offers the potential to achieve highly sustainable development through a combination of the existing facilities at the settlement to meet a day-to-day convenience function, and the settlement's superb connectivity and proximity to the main town of Dover and the Sub-Regional town of Folkestone to provide sustainable access to a host of major employment opportunities. No other rural settlement boasts such connectivity to the two primary towns in this part of the County, yet this factor has been entirely overlooked.

Quinn Estates currently have land under option adjacent to the existing primary school for expansion. A larger allocation could provide the opportunity to include additional services, such as GP surgery, which is identified as lacking in the village. Nevertheless, this can only be delivered in tandem with additional housing allocation to support it.

The downgrading of Capel le Ferne from a Local Centre to a Larger Village is unsound and appears to have resulted in the development allocation at Great Cauldham Lane being reduced in size, to the detriment of the settlement and the District. Within the existing Dover Local Plan Capel le Ferne was identified as a Local Centre to 'reinforce its role as provider of services to its home and adjacent communities'. Therefore, the settlement was presumed to support the retention of existing services and attract new services within the area. The proposed downgrading of the settlement implies this objective has been met, although there is no evidence to support this. Capel Le Ferne should therefore continue to be identified as a Local Centre to continue to support this objective, with allocations such as that at Land east of Great Cauldham Lane being able to come forward to support this.

Given the range and suitability of the services available to residents in Capel le Ferne, along with its strong connections to employment centres via public transport, the settlement should be re-designated as a Local Centre. Moreover, the allocation of Land east of Great Cauldham Farm amended to a minimum of 70 dwellings to make full use of the site, strengthen the sustainability of the village and enable Quinn Estates to explore the delivery of additional services which would further enhance the settlement for existing and future residents.

Site Allocation Policy SAP44 – Land to the east of Great Cauldham Farm (CAP006)

Quinn Estates supports the allocation of the land to the east of Great Cauldham Farm within the draft Policy SAP44 for residential development. The site is available, suitable and achievable, as confirmed by the Housing and Economic Land Availability Assessment 2022. There are no obvious barriers to delivery, including that there are no constraints on the site such as ecology, trees, flooding and heritage, and the site is not dependent on the delivery of infrastructure before coming forward.

Quinn Estates consider that the land to the east of Great Cauldham Lane can comfortably accommodate additional housing. The appended Indicative Site Layout Plan details the ability of the site to accommodate up to 100 homes whilst retaining existing trees and hedgerows and providing sufficient screening along the western boundary of the Site, in accordance with the above assessment under the HELAA.

The Landscape Briefing Note submitted confirms that the site is more closely associated with the settlement edge than the open countryside to the north-west. It is considered that views are highly localised, and the visual envelope of the site is limited to a small area to the north. The site is not considered to be reflective of the special qualities or characteristics of the AONB, nor would the proposal bear any significant or detrimental impact on its setting. Furthermore, its redevelopment provides an opportunity to reinstate hedgerow planting that was lost due to intensive agricultural use and therefore a more sensitive transition to the AONB can be achieved.

Finally, it is considered to be a logical approach to extend the allocation further to the north, due to a localised dip in the land here meaning this part of the site is far less prominent and can ensure that a robust landscape buffer can be provided. Additional dwellings in this location are therefore suitable in landscape and visual terms, and the amendment of the allocation to 'minimum 70' can be supported. It is also significant to note that the site is the only site at the settlement outside of the AONB which can deliver housing, therefore, it is imperative that the Council makes best use of the site by expanding the allocation, or at the least revising the policy wording to a minimum of 70 dwellings.

A Cultural Heritage and Archaeological Scoping Report has been prepared in relation to the site and is appended to these representations. This Report confirms that there are no heritage assets on or near the site that would be directly affected by development. It is however considered that there may be archaeological remains, however it is not clear due to the limited archaeology works undertaken in the area. As such it is proposed that as part of any planning permission, a programme of archaeological evaluation would be agreed to confirm whether any remains exist, and any mitigation required.

This provision would enable greater benefits for the wider local community to be delivered, including:

- Contributing further to the local housing need;
- More affordable housing provision;
- Provision for community facilities;
- Increased amount of open space;
- Financially enables the delivery of the additional school land and potential GP surgery; and
- Opportunities to meet local self/custom build need

c. Conclusion

Quinn Estates wishes to support Dover in bringing forward a successful, effective and sound Local Plan that can serve the District across the Plan period. The allocation of the Site within the draft local plan is welcomed by Quinn and they are committed to delivering a successful housing scheme. However, Quinn seeks a minor amendment to the wording of the policy to support additional housing numbers on site, of which it has been demonstrated that the Site is suitable to do so.

It is considered that Capel le Ferne should be reconsidered as a Local Centre due to a number of factors including the facilities and services it currently provides, its proximity to Dover and Folkestone and its sustainable transport links to these settlements and the potential for future development to support existing and new facilities in the village. The matrix exercise used to determine the settlement hierarchy has taken a very narrow view on settlement sustainability and its position in the hierarchy must be reviewed. In this regard, it is recommended that the Council exercise planning judgement to ensure that the settlement hierarchy for the District reflects the potential to achieve and deliver a sustainable growth strategy.

The benefits of increasing the size of the allocation have been detailed as providing a more significant contribution to the housing needs for the local area, provision for a community facility and enhanced provision of open space. Given the range of benefits a larger allocation would be

	<p>able to provide, Quinn Estates request the wording of the allocation in Table 4.12 to be amended to a minimum of 70 dwellings to enable these significant benefits to be utilised by new and existing residents.</p> <p>We trust that the above amendment is acceptable to the Council and that these representations will be taken into account in consideration of the current consultation. We also confirm that Quinn Estates would welcome the opportunity to be involved in the forthcoming Examination-in-Public and contribute to the debate to ensure that the best strategy for the District is found.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The site is promoted for 100 dwellings and requests the policy wording is amended to minimum 70 dwellings on the present site boundary, or expanding the site to the north to include 100 dwellings</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Coal Authority records indicate that within the Dover area there are coal mining features present at surface and shallow depth including; mine entries and reported surface hazards. These features pose a potential risk to surface stability and public safety. The NPPF, at paragraph 183, requires planning policies to ensure that a site is suitable for its proposed use, taking account of the ground conditions and land instability, which includes risks from former activities such as mining.</p> <p>Although coal mining features are present in the Dover area, which may pose a risk to surface stability, requirements to submit a Coal Mining Risk Assessment for those sites which fall within the defined Development High Risk Area have been omitted from the Local Validation List.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Suggested changes to part F4 are set out below in bold and italics.</p> <p>F.4 Others types of supporting documents may also be required to support applications in certain locations or certain types of application:</p> <ul style="list-style-type: none"> • Land contamination reports • <i>Coal Mining Risk Assessment</i> • Wintering Bird Surveys • Environment Assessment Study – SPA • Environment Statement – EIA Development • Minerals Assessment • Odour Mitigation Assessment • Noise and Vibration Assessment / Survey • Arboricultural Impact Assessment / Tree Surveys • Ecological Surveys / Habitats surveys • Structural Surveys • Parking, cycle storage and refuse storage plans

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note (1) The text below is an extract from the original representation which is attached to SDLP1438.</p> <p>• Response to Appendix C Local Plan monitoring indicators & Appendix F Local Plan Policies; Supporting Documentary requirements for planning applications</p> <p>Experience has caused trust in the planning process to expire in the minds of many of the public. Without independent, robust auditing, and honesty, extracting promises from developers all too often results merely in employment for public relations practitioners. So, additions to SP13, SP14 and DM policies NE is needed for it to become sound. 'Where permission is given subject to conditions regarding tree retention, tree planting and / or biodiversity enhancement, applicants will need to agree to abide by 'robust auditing' (as Wildlife Trusts insisted that the Environmental Bill legislate for). This means that honest, objective-because-independent, before-and-after evaluations / baseline measurements must be used. DDC councillors on the planning cttee have recently pointed out how very inadequate and misleading the sketchy, google-map-based ecology reports paid for by developer applicants are. Developers are ill-placed to self-certify their own work in this area, and DDC need a DM</p>

	policy requiring Environmental Impact Assessments on all planning applications for developments of over 15 dwellings on greenfield or rewilded brownfield sites.'

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Planning policies and decisions should contribute to and enhance the natural and local environment.</p> <p>The proposed site is next to an Area of Outstanding Natural Beauty and any development would have a detrimental effect on the surrounding area. Mature hedgerows would be torn down destroying habitats for wildlife which makes the area such a special place. In the case of the policy SAP35 Skylarks currently nest at the site of the proposed development and in a species who's habitat is already at risk any further loss would be a disaster.</p> <p>The development of 50 new homes is unlikely to improve local environmental conditions. It is likely to bring an extra 100 plus cars into the village. Ringwould Road is completely unsuitable to cope with this extra traffic. It is extremely narrow and has no footpaths for pedestrians or cyclists nor is there any space for these to be added. Added to the existing village, school, campsite and holiday park traffic, the already struggling village roads would cease to cope. The situation would be made even worse if the proposed development of 75 houses SAP15 were to go ahead.</p> <p>Kingsdown is a small village and does not have the infrastructure to support such developments.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP40 (STM010)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>STM010 sits outside the settlement confines of St Margaret's and is within an area designated as AONB, adjacent to National Trust land which has special scientific interest. The inclusion of STM010 in the Local Plan for housing development would contravene national policy with regards to AONB's (NPPF 117) since there are no "exceptional circumstances" which would justify its inclusion. This therefore brings into question the legal compliance of the local plan.</p> <p>Its inclusion is also completely unjustified. The following extracts from the SHLAA assessment of this site in the preparation of the 2012 version of the local plan explain why this site was not deemed suitable for inclusion in 2012. Since that time there has been no lessening or mitigation of the reasons given; indeed the reasons for not including this site for housing development have been further heightened.</p> <p>"Landscape Impact: The site lies within the AONB and close to the Heritage Coast. It abuts National Trust land to the NE. The site is on a crest of a hill and, despite the screening, would be visible from a long distance. Any development on this site would, therefore, have a highly detrimental impact on the designated landscape."</p> <p>"Biodiversity: The site is identified as chalk grassland to the NE which is a priority habitat under the Natural Environment and Rural Communities Act 2006 and is a material consideration..... The arable land is chalk based and maybe amenable to reversion to chalk grassland with appropriate management. The site could provide foraging and flight lines for bats."</p>

	<p>“Green Infrastructure: The site provides a wide range of recreational walking opportunities, together with the biodiversity associated with chalk grassland and its associated hedges and scrub. The ambience of the area is demonstrated by the numbers of visitors to the coastal area and the levels of usage of paths, both public and permissive. The site is within the “Restore and Conserve” area of the GI network, reflecting the real opportunities for GI. Development would harm the existing GI and the opportunities for enhancement.”</p> <p>“Proximity to Road Networks: The two roads that lead to this site appear to be unadopted and not well maintained. There is no access onto the site. The site is located in the area between Salisbury Road and The Droveaway. Salisbury Road is a single track unadopted road and there are no footways along its length. The Droveaway is also a single track road but is adopted. However, the road already serves a large number of dwellings and there are no footways beyond the junction with Salisbury Road. Pedestrian access to services, including the local bus stop, is therefore poor and reliance on the car is likely to be high as a consequence.”</p> <p>“Access to Services: This site is located on the edge of the Bay area, and as a consequence the majority of the services and facilities would be over a ten minute walk.”</p> <p>“Analysis: The site is located in the AONB in a highly visible location at the top of a hill on a plateau. Any development would have a detrimental impact on this designation. Access to the site is unsuitable on unadopted roads.”</p> <p>There has been a noticeable increase in local traffic in the area of The Droveaway since 2012 and an increase in the amount of on-street parking. In recent years there have been a number of minor accidents resulting from this. Indeed, the September 2022 HELAA report for this site recognises the issues with access:</p> <p>“The Droveaway is geometrically constrained and is subject to a large amount of on street parking which reduces effective width, whilst in theory waiting restrictions could be imposed, this would have a significant impact on local parking amenity. The junction of The Droveaway/Sea Street is subject to constrained visibility (southbound), as such an increase in turning movements at this junction will increase the likelihood of vehicle conflict and there is limited scope to provide meaningful improvements.”</p> <p>The issues regarding access are therefore greater than when the 2012 study was undertaken. Similarly, the potential impact of any development of STM010 on the surrounding area has been heightened since 2012 due to the increased loss of chalkland nationally (a loss of 80% in the past 60 years) and hence the increased scarcity value of this land in terms of rare habitat.</p> <p>STM010 was considered unsuitable for inclusion in the local plan in 2012. To now propose that STM010 is suitable for inclusion in the 2022 plan is contradictory and unjustified.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Remove site STM010 from the Local Plan</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I believe that it would be beneficial to have someone present to highlight the points that I have made to ensure that they are not overlooked.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP49
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SITE "WOR006" Jubilee Road:</p> <p>This site is unsuitable for inclusion in the Dover Local Plan because:</p> <p>1) This plan to initially build 10 houses on this site is not in accordance with the Worth Neighbourhood Plan (currently in force until 2026) relative to future housing development. The Worth Village Neighbourhood Plan is likely to be renewed and reinforced prior to 2026.</p> <p>INFRASTRUCTURE INADEQUACY:</p> <p>2) The foul sewage system of Worth has been a source of problems for years and the Bisley Nursery Fields (Planning number DOV15/00749) more than exhausted its capacity to take more house building without Southern Water undertaking major sewage infrastructure investment, which Southern Water has repeatedly refused to undertake.</p> <p>3) The surface water drainage of Jubilee Road where it feeds into Worth Village Pond will put Worth Primary School at greater risk of surface water flooding when the pond cannot cope with the increased volume of surface water and overflows. The school has already been evacuated in the past due to flooding problems arising from the pond.</p> <p>4) Jubilee Road is too narrow for two cars to pass in numerous long sections already, and the bus already struggles to get through, so much so that the initial review of this site by DDC in the Local Plan suggested banning parking in Jubilee Road, but this does not appear in the final draft. Banning parking would leave some households with no option but to concrete over their front gardens, adding to the surface water going into the village pond. Even if all parking were banned, two cars will struggle to pass one another without mounting the pavement, putting pedestrians at risk. 10 new houses would generate a significant increase in vehicle movements, arising from this site and potentially from 20 more houses at Site WOR009, and the bus service may not be prepared to continue along such a restricted width road with increased traffic volumes.</p> <p>AMENITY VALUE:</p> <p>5) The RSPB has developed the Lydden Valley wildlife park with new lakes and ponds. To develop houses on this site will deny residents and visitors their only real chance to look over the resulting visually improved countryside. It will also create an urban ribbon development street scene, out of character with a country village.</p> <p>SITE "WOR009" Nursery Fields/Bisley site off The Street. (Allied to planning number DOV15/00749)</p> <p>This site is unsuitable for inclusion in the Dover Local Plan because:</p>

	<p>1) This plan to build a further 20 houses on this site is not in accordance with the Worth Neighbourhood Plan (currently in force until 2026) relative to future housing development. The Worth Village Neighbourhood Plan is likely to be renewed and reinforced prior to 2026. The Worth Neighbourhood Plan originally supported the construction of 32 houses on the Bisley nursery site which was to include integral on-site green space in the form of two "paddocks". In the end 35 houses have been built and finished. The Dover Local Plan should not now allow building on the reserved green space of the "paddocks". In addition the housing proposal for this site WOR009 envisages a significantly higher density of building than the original Bisley development, by proposing to build a further 20 houses on just 0.86 of a hectare, being the overall surface area of the designated green space paddocks. This site has already been artificially raised by several feet using the soil spoil from digging out the foundations of the recently constructed houses on the Bisley site. The land is therefore unstable for construction.</p> <p>INFRASTRUCTURE INADEQUACY:</p> <p>2) The foul sewage system of Worth has been a source of problems for years and the Bisley Nursery Fields (Planning number DOV15/00749) more than exhausted its capacity to take more house building in Worth, without Southern Water undertaking major sewer infrastructure investment, which Southern Water has repeatedly refused to undertake.</p> <p>3) The surface water drainage from this site, which feeds directly into The Street's surface water drains, and from there, straight into Worth Village Pond, will exacerbate and put Worth Primary School at far greater risk of surface water flooding when the pond cannot cope and overflows. The Primary School has been evacuated in the past due to flooding, and another 20 houses will make flooding even more likely, especially when violent downpours become more frequent due to climate change.</p> <p>4) Exiting The Street and Jubilee Road onto the main Sandwich-Deal road has become very difficult and dangerous since the Nursery Fields site added traffic from its 35 new houses. Any more houses will require KCC or DDC to install a roundabout on the main road at the end of The Street to both avoid accidents and enable the buses to re-join the main road quickly and safely, so as to keep to its timetable. Extra vehicles leaving this site and heading towards Deal via Jubilee Road will further add to the difficulties of two cars trying to pass one another on Jubilee Road.</p> <p>5) Access: How is this site to be accessed for construction? The only current access is over PRIVATE ROADS owned and maintained by residents of the Bisley site, and access permission is unlikely to be forthcoming.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Not Applicable
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 35 Land adjacent to Courtlands (TC4S074)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Comment is a duplicate of SDLP1305)</p> <p>I consider it to be unsound because there are many controversial issues arising from it eg-lack of Infrastructure Development Planning, (open spaces, for example) Also this site has just been added on to the Regulation 18 plan ;therefore the local community and neighbouring residents did not have the opportunity to comment on it .</p> <p>It is also unsound because it involves loss of food-producing farmland.A;so it would be destructive of the Landscape Character. The site is within a Biodiversity Opportunity Area. (SAP 35)-Landscape Assessment. There is also a Protected Right of Way across the field to the north , up a long slope , which is used continually by hikers and dog walkers , for the benefits of fresh air and open landscapes across the Channel (so vital for mental health), The development of this site would have an uncalled for impact on the landscape and further assessment is required to demonstrate whether this can be mitigated.HELLA Appendix 2c Landscape assessments.</p> <p>SP 13 is non - compliant with the Environmental Act .Well established hedges and trees on the east boundary are important stops for migrating birds.(they are protecting and enhancing)valued landscapes.</p> <p>SAP35 Highways assessment (TC4SO74) The bus stops do not promise a reasonably frequent service any longer. There are no footpaths on the Courtlands site (which is not a wide road ,like most roads in the village) There are 12 properties in Courtlands and a further 5 along the 'lane ' which leads along the east side of the site .There are also 2 dwellings at the top of the PROW which runs along the west side of the site. These already generate a surprising amount of vehicle movements not just from the residents but also from commercial traffic.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	In my opinion , to make it sound, there needs to be a reduction to the number of dwellings proposed and even more important, an in depth look at the present situation with regard to traffic movement in the narrow village roads.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.
