Local Plan Consultation Point	Introduction
Rep ID	SDLP11
Rep Status	Processed
Consultee ID	1264821
Consultee Full Name	Mr Martin Brandon
Consultee Company / Organisation	
Agent Full Name	
Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Introduction Paragraph 1.35 Monitoring and Review
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan includes land allocations for various purposes. Each site has a set of checks or conditions that have to be satisfied for development to proceed to planning consent and implementation.</p> <p>Past experience (from a development underway at Station Road Walmer) suggests that these conditions are not rigorously carried through to the planning application stage or implementation on site. The council itself has allowed the developer to disregard them.</p> <p>I am looking for the council to be much more robust in ensuring developments meet all the requirements of the Local Plan at both planning application and implementation stage , and that checks on this are included in Appendix C monitoring indicators.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	As above a more robust commitment from the council and modification of the monitoring indicators.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To me this issue is quite fundamental. I would like the opportunity, briefly, to demonstrate how key requirements of the previous Local Plan were allowed to be disregarded by the council. This is relevant to the examination of the current Local Plan because if the requirements of the plan are to be disregarded by the council itself then the validity of the plan itself is undermined. And those of us who have contributed to it via consultation responses will feel their input is not valued.

Agent Full Name	
Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	The development within the Aylesham village
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Population within Aylesham has almost trebled over the last 6 years with no additional employment opportunities, education facilities, roads or public transport or medical facilities so to,include Aylesham in the plan with no improvements to the already insufficient resources is not sound. Development within Aylesham has already satisfied the government's requirements. Aylesham has not been given what has been promised in the last lot of development. with regard to its to duty to cooperate - the plan has only been advertised via the internet which is insufficient plus it has put the onus on the community to advertise. The open events should have been better publicised and support should have been given to the community who wish to comment. The system is not user friendly and it is complicated. more time should be given for the public to respond, specifically as this has come out at the same time as the Canterbury plan and it is over the Christmas period.

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Remove the proposed new developments from Aylesham until sufficient infrastructure is already in place. Do the consultation in a tick box (poll) type form. Advertise it locally in person as well as the internet.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I feel it's important to have representation from those that live in Aylesham.</p>

<p>Agent Company / Organisation</p>	
<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	<p>Introduction</p>
<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Positively prepared Justified Effective Consistent with National Policy</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>No</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Yes</p>

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The plan is unsound as it does not comply with the legally binding commitment made by DDC when they declared a climate emergency in 2020 and prepared their climate change strategy. The plan will not do enough to meet the target of the district being net zero by 2050.</p> <p>The regulation 19 stage of the consultation is not fit for purpose as it is overly complicated and difficult to use. The process has left many members of the public including myself feeling overwhelmed and confused as to how to make a representation. For those who are working full time this has been a task for which they do not have enough time. As a result those who may have wanted to make a submission have not been able to. The format of the submission form is also difficult to navigate. Without prior experience of planning law it is difficult to say whether a part of the plan is legal or not. As to the duty to cooperate it is impossible to know.</p> <p>The unsound plan needs updating after the government announcement on 5/12/22 that mandatory housing targets are not to be imposed. The figure of nearly 11,000 is unsustainable and should now be reviewed, particularly with respect to allocated land around Station Rd Walmer and proposed developments around villages. The character and landscape value of the district is being rapidly eroded under the current plan and this must not continue as it is contrary to NPPF 21. It is not sustainable to build on agricultural land which is in short supply as we are only 50% self sufficient in producing food in the UK. The CPRE has found that almost 14,500 hectares of farmland has been permanently lost to development since 2010. The contribution from the districts agricultural land is of vital importance. Much of the agricultural land is also vital for flood protection, and field margins are important for wildlife and biodiversity, forming corridors between habitats for vertebrates and nesting and roosting sites for birds. Dover District also has a wealth of character landscapes, AONB, heritage coast, nature reserves, internationally rare chalk grassland and rewilded areas such as Betteshanger Park. Overdevelopment under the last weak plan has meant that these areas are under pressure and being denuded as their boundaries are eroded and wild lifecorridors between sites are cut off. The new plan does not do enough to protect these areas, wildlife and biodiversity. Developments should not be allowed to remove ancient woodlands and trees and biodiverse rich habitats even if it is deemed for the greater good. This is not sustainable as all nature is interconnected and if it fails then we all fail. The UK is one of the worst countries in the world for biodiversity loss, we have lost half of our biodiversity since the 1970's.</p> <p>Development has been at such a pace that infrastructure cannot keep up. Buses have been cut recently, cycle and pedestrian routes have not been upgraded sufficiently to connect new large developments like Whitfield to main bus and train routes without car dependence. Aylesham has not had a secondary school which would mean children could walk to school. Many rural communities are entirely car dependent due to lack of buses and the roads not being safe to use their bikes.</p> <p>Not enough emphasis is put on renovating existing housing stock to provide greener, insulated, fuel efficient homes. Each new build generates around 56 tonnes of embedded carbon.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Better mapping of the Dover District taking into account internationally rare areas of chalk grassland.</p> <p>Large buffers around the AONB to protect its character from the built environment.</p> <p>Tighter protections on our remaining biodiversity, hire several biodiversity officers to monitor closely and prevent loss of ancient woodland, chalk grassland, veteran trees, protected wildlife and rich habitats.</p> <p>Stop the use of agricultural land for development.</p> <p>Renovate and insulate rather than build new, brownfield not greenfield.</p> <p>Turn attention away from destroying village communities with unsustainable housing estates outside their village boundaries.</p> <p>Do not give developers the get out clause of financial mitigation for destruction of wildlife and habitat. No development should further deplete our critically low levels of biodiversity.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

Agent Full Name	
Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP 34 Site name HELLA
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The online proposal and complaint forms are impenetrable and difficult to find. They are far too complex. The You Tube video is of poor quality and not easy to comprehend. I suggest that your proposal is not easily read, is too dense and too convoluted to respond to and it is difficult knowing where to respond to. It is not accessible and therefore how can it be a sound proposal if it prevents people from responding to it. You deny participation from people. It is Kafkaesque.</p> <p>The proposal does not take into consideration the impact the proposed new buildings will have on the existing community - the roads are already inadequate and dangerously insufficient for the existing community and the proposed exit from the new estate onto Ringwould Road is dangerous and thoughtless. Ringwould road is at times made a single track by passing vans and SUV's. The route from Upper Street through to Chalk Hill Road onto Ringwould Road has no passing places and again is dangerous already to existing road users. Ringwould Road leading to A253 is hazardous and A253 needs to be widened completely if it were to cope with additional traffic.</p> <p>The infrastructure proposals are clearly not thought through. The proposed building of new housing in Walmer, Ringwould and Kingsdown is creeping sprawl - it holds no respect for the lay of the land and the areas of outstanding natural beauty.</p> <p>There is no reference to the landscaping of these new builds. Already a poor precedent has been created by recent builds where no landscaping has been considered (although promised). If a new build is to be put on that hill then a forest should be planted around it.</p> <p>No real consideration is given to the impact on the existing community. This proposal will have a devastating effect on our existing inadequate roads. It is an area of outstanding beauty. Also no real support is offered to the existing or proposed community - pharmacies, shops, creative outside spaces, thoughtful well considered landscaping. You are offering the building of what exactly? Define the type of properties. It seems to me you are proposing creeping sprawl. You are offering up a triangular pincer movement of sprawl from Deal, Walmer and Kingsdown.</p> <p>Recently, executive homes in Walmer and Deal have been built that are rammed together, small gardens, lack of privacy, no landscaping (not even trees). Yet these green community ideas were all in the original proposals - so what happened? If recent builds were proven to be a success in providing real support for cohesive, happy communities this might set a positive precedent but that is not the case. Already a negative precedent has been created by recent past mistakes. There is not enough mention of social housing. However, by the time houses do get built the percentage of social housing magically seems to diminish. Faith is built on trust and belief for the good of all - not just erecting</p>

	<p>too many houses on an area of outstanding beauty and making a profoundly negative impact of the existing community and the extraordinary landscape.</p> <p>On a final note, your online forms are far too complex and impenetrable for people to tackle and therefore without real true consultation this whole proposal is non valid and unsound. The YouTube Video is of poor quality and difficult to understand - this is profoundly unfair.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Make your plan more accessible so that it is easy to reply to. These online forms are impossible, dense and not created for the general public. The You tube video is of poor quality - redo it please.</p> <p>The infrastructure proposals are weak and lacking real comprehension of the impact on the existing community as the existing roads leading to Kingsdown are dangerous and deadly. Tweaking them with a few passing places will not work. If you cannot tackle the infrastructure you must scrap the plan completely. The A253 is not fit to support the traffic leading from Deal to Dover and it is a perilous twisting road that cannot hold additional traffic.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	1 Introduction
<p>2 - Do you consider this part of the Plan sound?</p>	No
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	Positively prepared Justified Effective Consistent with National Policy

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan is unsound as it does not comply with the legally binding commitment made by DDC when they declared a climate emergency in 2020 and prepared their climate change strategy. The plan will not do enough to meet the target of the district being net zero by 2050. DDC should be much more ambitious about the green credentials of new housing. If new homes generated their own power, were insulated to the highest standards, and collected rain water, it would greatly help stretched local services and go a long way towards making the housing stock fit for the coming decades.</p> <p>The regulation 19 stage of the consultation is not fit for purpose as it is overly complicated and very difficult to use. The process has left many members of the public including me and my wife feeling overwhelmed and confused as to how to make a representation. For those who are working full time this has been a task for which they do not have enough time. As a result those who may have wanted to make a submission have not been able to. The format of the submission form is also difficult to navigate. Without prior experience of planning law it is difficult to say whether a part of the plan is legal or not. As to the duty to cooperate it is impossible to know. The unsound plan needs updating after the government announcement on 5/12/22 that mandatory housing targets are not to be imposed. The figure of nearly 11,000 is unsustainable and should now be reviewed, particularly with respect to allocated land around Station Rd Walmer and proposed developments around villages.</p> <p>The character and landscape value of the district is being rapidly eroded under the current plan and this must not continue as it is contrary to NPPF 21. It is not sustainable to build on agricultural land which is in short supply as we are only 50% self sufficient in producing food in the UK. The CPRE has found that almost 14,500 hectares of farmland has been permanently lost to development since 2010. The contribution from the districts agricultural land is of vital importance. Much of the agricultural land is also vital for flood protection, and field margins are important for wildlife and biodiversity, forming corridors between habitats for vertebrates and nesting and roosting sites for birds. Dover District also has a wealth of character landscapes, AONB, heritage coast, nature reserves, internationally rare chalk grassland and rewilded areas such as Betteshanger Park. Overdevelopment under the last weak plan has meant that these areas are under pressure and being denuded as their boundaries are eroded and wildlife corridors between sites are cut off. The new plan does not do enough to protect these areas, wildlife and biodiversity. Developments should not be allowed to remove ancient woodlands and trees and biodiverse rich habitats even if it is argued that this is for the greater good. This is not sustainable as all nature is interconnected and if it fails then we all fail. The UK is one of the worst countries in the world for biodiversity loss, we have lost half of our biodiversity since the 1970's.</p> <p>Development has been at such a pace that infrastructure cannot keep up. Buses have been cut recently, cycle and pedestrian routes have not been upgraded sufficiently to connect some developments to main bus and train routes without car dependence. Aylesham has not had a secondary school which would mean children could walk to school. Many rural communities are entirely car dependent due to lack of buses and the roads not being safe to use their bikes. Not enough emphasis is put on renovating existing housing stock to provide greener, insulated, fuel efficient homes. Each new build generates around 56 tonnes of embedded carbon. The NPPF states that we should prioritise brownfield sites over greenfield but although there are many opportunities to develop brownfield sites in Dover, this has not been prioritised. Many developments have been for larger houses in villages and there is not enough provision for affordable housing.</p> <p>The wording of the local plan is not definitive, it leaves too many loop holes and vague preferences which enable large developers to argue and get what they want, to maximise profits, not what the people of the Dover area need.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Better mapping and understanding of the Dover District, taking into account internationally rare areas of chalk grassland, woodland and trees wherever they occur.</p> <p>Large buffers around the AONB to protect its character from the built environment. Stronger protection for the AONB and the Ripple LCA F3.</p> <p>Tighter protections on our remaining biodiversity.</p> <p>Tighter definitions in the local plan so that developers have no room to argue what has been specified in the local plan.</p> <p>Hire several biodiversity officers to monitor closely and prevent loss of ancient woodland, chalk grassland, veteran trees, protected wildlife and rich habitats and to actively go out into the community, looking for ways to improve biodiversity by such things as accessing grants for hedge planting and the creation of ponds where ever possible in our district.</p> <p>Employ experts to liaise with farmers in our area to encourage the most environmentally friendly farming and land management practices which will encourage maximum biodiversity in the countryside and maximum sequestration of carbon in soils and biomass.</p> <p>Stop the use of agricultural land for development.</p>

	<p>Renovate and insulate rather than build new houses, brownfield not greenfield.</p> <p>Turn attention away from destroying village communities with unsustainable housing estates outside their village boundaries.</p> <p>Do not give developers the get out clause of financial mitigation for destruction of wildlife and habitat. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Overarching Vision
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<ul style="list-style-type: none"> Deal Town Council Planning Committee <p>Deal Town Council wishes to comment specifically on the implementation of the legal requirements for drawing up the plan. regret that both the Deal Town Council Planning Committee and the Full Council were not parts of the process of consulting about and writing the plan.</p> <p>The arrangement to have one KALC member to liaise with local town and parish councils was not at all satisfactory; we received no feedback from our "delegate", and were never explicitly consulted on matters germane to this Council.</p>

	<p>While taking into account the need for confidentiality, the chaos around proposed changes to national planning policy, and the impact of Covid-19 on the process, we nevertheless still reach the conclusion that there was inadequate consultation.</p> <p>However well councillors and officials in Whitfield think they know local needs and likely reactions, it is nevertheless parish and town councillors who connect closely with their electorates. There should have been greater efforts to devise robust systems and accountability so as to make the process genuinely participatory and the outcome more sensitive to local voices.</p> <p>On that basis we would therefore question the legitimacy of the Regulation 18 and 19 drafts of the Dover Local Plan.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>We would appreciate the reasoning behind your lack of consultation with all the elected members of Deal Town Council.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Kent County Council (KCC) is committed to working with the District Council and other key stakeholders to ensure that sustainable growth is supported by necessary infrastructure – that is planned for, funded and delivered in a timely manner, ahead of housing / commercial growth where required – ensuring an 'Infrastructure First' approach to development. An “Infrastructure First” approach is embedded in the Kent and Medway Infrastructure Proposition, a proposal that seeks to enable accelerated housing delivery, which is focussed on building the right homes in the right places and providing the public services, transport infrastructure, jobs and homes that residents will need now and in the future. To deliver sustainable development, close working and a collaborative approach with all key stakeholders will be crucial – taking in to account all necessary infrastructure and services required to deliver robust and resilient communities during the plan period and beyond within the District – whilst also considering any cross boundary, strategic implications of growth. The County Council would therefore welcome continued engagement.</p> <p>As the Local Plan progresses, the County Council would value timely engagement in the shaping and inputting, as appropriate, into the draft Statement of Common Ground to ensure that all cross-boundary and strategic matters are properly and clearly addressed.</p> <p>Please see a summary of the strategic issues raised:</p> <ul style="list-style-type: none"> • KCC is encouraged by the fact that Heritage features so prominently in the Vision. • It welcomes the amendments to reflect the Rights of Way Network. • It supports the vision that necessary infrastructure is required to support the housing growth. • KCC have recommended amendments to wording and have also suggested additions to some of the policies put forward. We hope these changes either help to make policies clear and in some cases provide more flexibility. • They have suggested that reference to a number of the following Council’s documents should be included: <ul style="list-style-type: none"> • the County Council’s Right of Way Improvement Plan • Kent and Medway Low Emissions Strategy • County Council’s Environment Strategy • Kent’s Plan Bee • KCC would also encourage further car free development. • They would hope that the Dover Fastrack project is reflected in policy. • They also raise some concerns in regard to safeguarding and waste linked to Policy SA3 and Policy DM8. • They would like further dialogue in regard to how further highway related evidence is produced. • They consider that an historic landscape characterisation assessment is carried out in order to fully appreciate the landscape character and incorporate it into green Infrastructure effectively. • KCC would suggest a Transport Strategy for the District. • They would also ask that further discussions took place with Kent Highways before the IDP is published. <p>As a general statement, the County Council is keen to ensure that their interests are represented within the local policy frameworks of the Districts and Boroughs in Kent. KCC is committed to working in partnership with Local District Councils to achieve the aims contained within the 'Rights of Way Improvement Plan 2018 – 2028 (ROWIP)'. As the Local Highway Authority, KCC promotes the protection and enhancement of the PRoW network and, experience shows that local planning policy support for the work it does is mutually beneficial in both protecting the network and negotiating enhancements to it, through new development.</p> <p>In respect of PRoW, the County Council supports the draft Regulation 19 Local Plan and it welcomes the amendments made to reflect the PRoW network following the County Council’s response to the Regulation 18 Consultation on 17 March 2021. However, there is still no reference to the County Council’s Rights of Way Improvement Plan (ROWIP) and KCC would emphasise again that reference to the ROWIP is included to enable the successful partnership working to continue to deliver improvements to the District’s PRoW network.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Representation Appeal</p> <p>The "desktop sift assessment" was inaccurate, given that the ground for the rejection was due to an "Unsuitable site: - Site is not well located in relation to the existing village". The postcode presented by the council against site reference WOR005, is that of another property further away (Upton house) on Deal Road.</p> <p>The desktop sift assessment, failed to identify the correct postcode, existing access, ownership boundaries, road widening proposal, footpath proposal, access to the immediate bus stops, and proximity to Worth village.</p> <p>The decision to drop this site from the local plan was unsound and was not legal, it was not given due diligence and consideration, in-spite of many attempts by the applicant, to communicate with the Council, regarding the draft Local Plan, via, telephone calls, emails, and previous representations, without a response, except that it was valid. The post code presented by the Council against the Land, is that of another property further away (Upton house) on Deal Road.</p> <p>The site presented is in an excellent position for the village and the offering of a footpath and widening the road, it will be a great help for the village. The site has access to three bus stops, two at the entrance to Deal Road and one just opposite at The Street, Worth and with a footpath it will be easy access to the villagers to use public transportation rather than using a car.</p> <p>The site has access to electricity, water, telephone lines, and internet as well as the main drain running just across its edge with Mill Lane. The site is vacant since the applicant's ownership in 1996. The site is kept tidy by cutting the grass once a year and has no constraints. The site is not in a flood-risk area. The site is flat and not in an area of outstanding natural beauty. The site is privately owned and is available immediately if successful. There have been few interested in developing this site, including a large property company as well as few local builders, and hence could employ few locals if the council agrees.</p> <p>The Dover Local Plan is not compliant, is unsound, and fails to comply with the Duty to Cooperate.</p> <p>This includes public participation in the preparation of the Local Plan.</p> <p>The process for public engagement for the Local Plan should be in general accordance with the Statement of Community Involvement (SCI)</p> <p>The Local Plan should have regard to national planning policy. The National Planning Policy Framework (NPPF)</p> <p>Soundness</p> <p>To ensure the local plan is sound, it should meet the following criteria</p> <p>Positively prepared</p> <p>Provides a strategy which, as a minimum, seeks to meet Dover District's objectively assessed needs and is informed by agreements with other authorities so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development</p> <p>Justified</p> <p>An appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence</p> <p>Effective</p> <p>Deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and</p> <p>Consistent with national policy</p> <p>Enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant.</p> <p>Compliance with the Duty to Co-operate</p> <p>The Local Plan should comply with the Duty to Cooperate.</p> <p>Section 33A of the Planning & Compulsory Purchase Act requires the Council to engage constructively, actively, and on an ongoing basis with neighbouring authorities and certain</p>

	<p>other bodies over strategic matters during the preparation of the Plan. The Council is expected to provide evidence of how they have complied with the Duty. Non-compliance with the Duty to Cooperate cannot be rectified after the submission of the Plan. Therefore, the Inspector has no power to recommend modifications in this regard. Where the Duty has not been complied with, the Inspector cannot recommend adoption of the Plan.</p> <p>Strategic Policy 4 - Residential Windfall Development Site_Origin HELAA, HELAA Reference WOR005, Origin_Ref HELAA213, Page 21.</p> <p>The “desktop sift assessment” was inaccurate and failed to identify the correct postcode, existing access, ownership boundaries, road widening proposal, footpath proposal, access to the immediate bus stops, and proximity to Worth village.</p> <p>The decision to drop this site from the local plan was unsound and was not legal, it was not given due diligence and consideration, in spite of many attempts by the applicant, to communicate with the Council.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Thank you for enabling Tunbridge Wells Borough Council (TWBC) to comment on the Regulation 19 Submission Local Plan. Set out below are the comments that TWBC wishes to make in response to the consultation, which are made having regard to matters of legal compliance, tests of soundness and the Duty to Cooperate.</p> <p>TWBC is generally supportive of the Plan, which seeks to meet growth needs over the plan-period to 2040, on matters relating to housing, the economy, community facilities and infrastructure. The Plan seeks to conserve and enhance the natural and historic environment, mitigate and adapt to climate change as well as to achieve well-designed places. The Local Plan sets out a strategy that meets the District's housing needs as well as its aspirations for economic growth.</p> <p>Accordingly, TWBC supports the vision and strategic policies of the Local Plan.</p> <p>The Strategy:</p> <p>The Plan comprises policies and site allocations to ensure a greater choice, and high-quality housing, and focusses new development at accessible and sustainable locations, utilising existing infrastructure, facilities and services and making the best use of brownfield land.</p> <p>The proposed growth strategy focusses growth at the least sensitive areas of the district, which TWBC supports in principle. This means Dover Town with an urban expansion at Whitfield, with some further dispersed growth at local centres/smaller villages.</p> <p>Transport Infrastructure:</p> <p>TWBC welcomes the plan to enhance modes of transport, delivering targeted improvements to the local and strategic road network, including the M20 at Maidstone.</p> <p>Development Management policies:</p> <p>TWBC notes the proposed Development Management policies that cover matters relating to climate change, place-making, new homes, employment and the local economy, retail and town centres, transport and infrastructure as well as the natural and historic environment.</p> <p>Conclusion – Tests of Soundness:</p> <p>Given the above, TWBC considers that the Dover District Council Submission Local Plan has been positively prepared. TWBC considers the growth strategy to be appropriate and justified, as well as effective and consistent with national policy.</p> <p>Duty to Cooperate:</p> <p>TWBC does not wish to comment on this aspect, which will be considered in detail at the forthcoming Local Plan Examination.</p> <p>Legal compliance:</p> <p>TWBC has considered the published Local Development Scheme, Statement of Community Involvement and Sustainability Appraisal and Habitats Regulations Assessment, and considers the Plan meets with the tests of legal compliance.</p>

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Regulation 19 consultation. Although this plan applies to our neighbouring district the plans for Aylesham significantly impact Adisham. Adisham Parish Council congratulates the council on a well thought out and mainly sympathetic revised local plan.</p> <p>Under Policy 14 we welcome the proposed Priority Habitat Inventory on the fringes of this parish and would be happy to assist if required. Adisham Parish is fortunate to have within its boundary several SSSI status woodlands. Geographically they should be considered within the context of the DDC Draft Local Plan.</p> <p>Adisham Parish council welcome the removal of 500 homes from DDC Draft Local Plan, however we have concerns over the proposal to build 640 houses linking Aylesham to Snowdown.</p> <p>Particular concerns: Traffic- There is already a considerable strain on local roads particularly on the B2046 Adisham to Aylesham and further on as it joins the A257 at Wingham. Further development in the area would see a significant increase to traffic. This applies to the minor roads and lanes that connect Adisham and Aylesham. It is very likely that Adisham will be used to bypass the major routes into cant A2. The B2046 has had an increase in traffic incidents some fatal.</p>

	<p>Public transport - Bus and train services are limited. There are no firm proposals to improve these services. Currently one school bus, 89b, operates. The bus travels from Aylesham to Adisham, by the time it gets to Adisham there is standing room only. Children from Adisham and Bekesbourne are not provided with a safe form transport at present, with more development assurances of safe transport must be in place.</p> <p>Adisham village has limited facilities/amenities and relies on Aylesham's local facilities. Recent building has increased the demand for these amenities. Medical services, leisure facilities and early years amenities need to be increased and improved to support further development.</p> <p>Within the requirements of the NPPF we welcome the district councils target of providing affordable housing @20% above the national proposal of 10% outside of urban areas</p> <p><i>(DDC note - this is the full representation from Adisham Parish Council. Some extracts have been made and placed against specific policies / consultation points, where relevant)</i></p>

Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Whole Plan
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>. Thank you for your email of 21 October 2022 inviting comments on the above consultation document.</p> <p>General Comments</p> <p>As the Government's adviser on the historic environment Historic England is keen to ensure that the protection of the historic environment is fully taken into account at all stages of the planning process. This includes formulation of local development policy and plans, supplementary planning documents, area and site proposals, and the on-going review of policies and plans.</p> <p>There are many issues and matters in the consultation document that are beyond the remit and concern of Historic England and our comments are, as required, limited to matters relating to the historic environment and heritage assets. In our previous comments (by letter dated 16 March 2021), Historic England focused on the objective of the National Planning Policy Framework to set out a positive strategy for the conservation, enjoyment and enhancement of the historic environment (now Paragraph 190, NPPF); and contain policies to deliver the conservation and enhancement of the historic environment (revised Paragraph 190 a, NPPF).</p> <p>Our comments on the Regulation 18 stage draft Local Plan largely have been addressed in the current Publication version or are, in our view, not now likely to affect the soundness of the Local Plan. However, we have a number of general comments and points of detail relating to some aspects of the draft Submission Local Plan that, if incorporated, may help to strengthen or better elucidate the policies relating to the historic environment and heritage assets, or relate to site specific policies with a high degree of heritage significance.</p> <p><i>(DDC Note: Specific comments have been extracted and assigned against relevant policy areas - full representation is attached for information)</i></p> <p>Summary</p> <p>We welcome the inclusion of policies for the historic environment in the local plan that meet the obligation for preparing the positive strategy required by the paragraph 190, NPPF. The key test of the soundness of the plan and the achievement of sustainable development as defined in the NPPF in respect of the elements that relate to the historic environment, in our view, have been met with the exception of the inclusion of a policy addressing heritage at risk.</p>

	We should like to stress that this opinion is based on the information provided by the Council in its consultation. To avoid any doubt, this does not affect our obligation to provide further advice and, potentially, object to specific proposals which may subsequently arise where we consider that these would have an adverse effect upon the historic environment. We hope that these comments are useful.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Inclusion of a policy addressing heritage at risk.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

Thank you for your notification dated 21 October 2022 inviting National Highways to comment on the Dover District Council (DDC) Regulation 19 consultation, seeking a response no later than 5pm on 9 December 2022.

Strategic Overview

As you may be aware, we are responsible for the operation and maintenance of the strategic road network (SRN) in England. We are committed to supporting Government objectives on economic growth and sustainable transport and recognise the need for closer integration of transport and land use planning as set out in the Department for Transport (DfT) Circular 02/2013 'The Strategic Road Network and the Delivery of Sustainable Development'.

Paragraph 33 of the Circular states that "development proposals are likely to be acceptable if they can be accommodated with the existing capacity of a section (link or junction) of the strategic road network, or they do not increase demand for use of a section that is already operating at over-capacity levels" taking account of any travel plan, traffic management and/or capacity enhancement measures that may be agreed.

Paragraph 34 of the Circular states that "where the Circular tests are not satisfied, additional assessment will be required to enable all parties to understand the scope and scale of the impact that the proposals are likely to have on the SRN. This assessment should:

- Demonstrate how the proposals will reduce the need to travel, especially by car
- Demonstrate how the proposals will improve accessibility by all modes of travel and influence travel behaviours
- Assess the likely impact of residual trips (i.e. after measures above have been considered)
- Identify appropriate and proportionate mitigation measures, and ensure that what is proposed promotes sustainable transport outcomes and avoids unnecessary works to the SRN"

Our general approach to reviewing Local Plans

As a statutory consultee, a Duty to Co-operate consultee and in order to safeguard the SRN, we will fully engage with all parties (the Council, development promoters, the public etc) in the production, adoption, and implementation of the Local Plan. Our approach to engagement in the Local Plan process is set out in detail in "The strategic road network: Planning for the Future".

Our involvement in the Local Plan process provides us and you with the confidence that the development within the Plan is acceptable and sustainable in terms of management of the SRN, and that a long-term strategy for development location, scale and associated necessary infrastructure is developed and agreed with us. This will ensure that the development management process is grounded in agreed principles and is as smooth and efficient as possible.

We welcome the opportunity to help identify the most suitable locations for development in order to encourage sustainable travel behaviour and make the best use of public transport capacity. This will minimise the need for costly, disruptive and carbon intensive highway infrastructure to mitigate developments, and will better meet the UK's net zero commitments and the need to improve air quality for local communities.

In our assessment of development proposals within Local Plans, we welcome engagement on the preparation and assessment of the evidence base that will demonstrate the impact of individual sites and the cumulative impact of the Plan, utilising our knowledge of the SRN and sharing any existing evidence we might hold. This will allow us to work together to develop an Infrastructure Delivery Plan for the Local Plan, in order to accommodate the development safely, effectively, and sustainably.

We are also keen to review and engage in the preparation of planning policies, ensuring that they are sustainable and meeting the needs of the SRN, its users, and the communities it serves and passes through.

Background to Regulation 19 Consultation

With regards to this DDC Regulation 19 consultation, we are concerned with plans or proposals that have the potential to impact the safe and operation of the SRN, in this case, the M20/A20 and the A2, and in particular the area around the A2 Whitfield roundabout, the A2 Whitfield Interchange and the A2 Duke of York Roundabout.

We, Dover District Council (DDC) and Kent County Council (KCC) have been working together on a continuous basis since the start of, and prior to DDC commencing work on the Local Plan in 2017. We acknowledge that the Regulation 19 Submission document is intended to be submitted to the Planning Inspectorate for Examination. It is the version that the Council will seek to adopt, subject to the outcome of the Examination and it will replace the Core Strategy 2010 and the Land Allocations Plan 2015.

While not specifically stated in the Consultation email dated 21 October 2022, we understand that DDC is also consulting on the Regulation 19 Transport Modelling Forecasting Main Report.

We have reviewed the information submitted in association with the Regulation 19 consultation and offer the following comments.

(DDC Note - The detailed comments made within the representation letter have been assigned to the relevant consultation point in relation to policy/part of the Local Plan and/or background documents - See letter attachment for full representation)

Conclusion

Subject to the detail set out above we have no major objections to the Dover District R19 Local Plan. However, as also set out we recommend that various amendments or additions are made to ensure the Local Plan is clear and complete with regards any further work to discern impacts or deliver required mitigations in connection with the SRN.

We are committed to continuing to work with DDC, KCC and all other parties as appropriate to ensure that the traffic impacts of the Local Plan on the SRN are accurately identified and assessed, with the development of appropriate mitigation measures as required.

Our normal requirement is for all technical assessment and appropriate mitigation for the SRN to be agreed prior to the formal submission of the plan, or prior to the Examination in Public where the former is not achievable. Towards this aim, once you have had opportunity to assess the various representations received, please feel free to contact me to discuss and progress matters.

I hope that our responses assist, but if you have any queries, please contact me via *(email address)*.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.

SP3, SP4

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Introductory text on this rep, points split between SP3 (SDLP1204) and SP4 (SDLP796)</p> <p>1.0 INTRODUCTION</p> <p>1 i) About the Kent SME Developers Network</p> <p>These representations have been prepared by the Kent SME Developer Network (the Network) a consortium of Small and Medium (SME) Developers who are located in or operate within Kent and Medway. The Group is currently chaired by Paul Henry, Managing Director of Esquire Developments, an SME Housebuilder based in Longfield near Dartford, Kent.</p> <p>The Network was formed in November 2019 and presently comprises approximately 30 participants including SME Housebuilders and Developers (of varying size and scale) and Registered Providers. In addition, the Network includes representatives of Local Planning Authorities including Medway Council, Swale Borough Council, Tonbridge and Malling Borough Council, Tunbridge Wells Borough Council and Maidstone Borough Council. It is the intention that the Network grows over time to cover all of Kent including additional SME Developers and Local Planning Authorities. The Network has recently engaged with Dover District Council.</p> <p>The Network was set up to provide a platform for SMEs to discuss relevant planning and delivery issues associated with bringing forward smaller developments and to positively and proactively engage with Local Planning Authorities at the plan making and decision taking stages.</p> <p>The Government has recognised the need to support existing SMEs and encourage more into the market in order to diversify the housing market from the volume housebuilders and generate choice and improve quality of homes being built. The Government has described SMEs as being of 'National Importance'. Appendix 1 sets out the narrative behind the support and role for SME Housebuilders.</p> <p>The Network meets on a quarterly basis to discuss and explore relevant SME related issues, including working through planning related matters. Notable attendees at past meetings including Steve Quartermain (prior to his retirement as Chief Planner at the then MHCLG) and Homes England.</p> <p>In addition to the meetings acting as a discussion platform, the SME Network is also designed to act as a support and mentoring network, where land opportunities can be shared, or knowledge/experiences drawn from in-house teams in order to help each other and strengthen the SMEs. The Network can also act as a collective voice in the preparation of Local Plans or other consultations - such as this.</p> <p>The Network comprises the following:</p> <p><u>SME Housebuilders and Developers</u></p> <p>Esquire Developments Fernham Homes Wealden Homes Fernfield Homes Meridian Construction Aile Homes King and Johnstone Clarkmores</p>

The Network welcomes ongoing engagement with Dover District Council and any other interested party.

For clarity, the representation contained in this response relate to the Members of the Network that are SME Housebuilders and Developers and not the Registered Providers, LPAs or Agents.

1 ii) Content of Representations

These representations have been prepared by the Network which seek to address strategic matters. Any site-specific matters will be addressed by individual SMEs within their own representations.

The representations are structured to respond to each relevant question posed within the document.

In summary the headline points are as follows:

We support the council identifying the need to meet the small sites requirements and support SME developers.

However, we are not convinced that the requirements of Paragraph 69 have been met in respect of 10% of allocations being on 1ha or less:

We support the principle of a Policy such as SP4, however we consider that amendments to the policy wording and the defined policies map are required in order to ensure it is 'effective' and therefore 'sound'.

We encourage the Council to continue to work with the Network, including the consideration of a small sites policy to help support SME developers within the plan period.

RESPONSE

Requirement of Paragraph 69

Paragraph 69 of the NPPF requires Local Planning Authorities to identify land to accommodate at least 10% of their housing requirement on sites no larger than one hectare. This is a clear requirement and therefore 1,099 dwellings need to be allocated on sites of this nature.

Central Government recognises the problem of bringing SMEs into the market and has sought to 'level the playing field' in the context of supporting small and medium sized sites at the plan making stage. Crucially, the NPPF 2019 confirms in paragraph 68 that:

Small and medium sized sites can make an important contribution to meeting the housing requirement of an area and are often built-out relatively quickly. To promote the development of a good mix of sites local planning authorities should:

- 1 a) identify, through the development plan and brownfield registers, land to accommodate at least 10% of their housing requirement on sites no larger than one hectare; unless it can be shown, through the preparation of relevant plan policies, that there are strong reasons why this 10% target cannot be achieved;
- 2 b) use tools such as area-wide design assessments and Local Development Orders to help bring small and medium sized sites forward;
- 3 c) support the development of windfall sites through their policies and decisions – giving great weight to the benefits of using suitable sites within existing settlements for homes; and
- 4 d) work with developers to encourage the sub-division of large sites where this could help to speed up the delivery of homes.

The NPPF provides for a clear direction to LPAs, that it must identify land to accommodate at least 10% of their housing requirement that are 1ha or less.

Paragraph 3.52 of the Reg 19 plan sets out that 11.4% of the housing requirement are on small sites. These sites are listed out in Appendix 3 of the Housing Topic Paper September 2022 and the table shows that the total of 1,249 dwellings are considered to be identified for delivery on small sites.

The Local Plan states (para. 3.52) that these small sites have been identified through the Local Plan and the brownfield register. Of the 1,249 dwellings, a total of 516 dwellings are allocated under 'small sites' within the Regulation 19 plan.

The remaining dwellings (733 dwellings) are to be found in the Brownfield Register. The Register is available on the Dover District Council website and was last updated in February 2021- nearly 2 years ago. Shown at Appendix 02 of this statement is the list of sites that make up the 11.4% as suggested by the council which fulfils this requirement, alongside comments taken from the Brownfield Register. A number of the sites listed in the Brownfield Register are noted to be 'complete' or 'built out'. This equates to a total of 313 units.

We consider a site that has been noted as complete or built out can no longer be counted as a site that will contribute towards meeting the housing need. Accordingly, this element should be removed from the total supply which would reduce the figure to 936 dwellings or 8.8% of the total requirement of 10,998 dwellings.

Further to this figure, there are a number of sites that are listed as 'under construction' (209 in total). It is not clear when these comments have been added to the Brownfield Register, but for a number of the sites listed, it is clear from sold house price data that a number of these dwellings have now been completed.

We consider it important, therefore for Dover District Council acknowledge that there could be as many as 522 dwellings on the Brownfield Register that are no longer available and that the Brownfield Register should be re-assessed.

We expect that following this review, the number would fall from 1,249 dwellings to 727 dwellings or 6.6% of the required total.

The SHLAA is a critical piece of work in this regard and it is crucial that sites of this scale are identified and that they are being promoted by SME developers (or capable of being delivered by an SME developer). It is not simply a numbers game but a qualitative exercise to ensure that a sufficient number of these small sites are identified to support the intent of paragraph 69 – which is to support SME developers.

Small sites have a significant advantage as they can deliver quickly. Accordingly, in allocating smaller sites (of 1ha), or indeed supporting SME developers in bringing forward larger 'small sites' (there are a number of SME Developers capable of delivering sites in excess of 1ha and up to 100 dwellings or more per site), it will help deliver housing in the short term and firstly seek to rectify the existing housing land supply issue and deliver in early years of the plan period whilst the larger, longer term sites move through the planning and delivery process.

It is critical to have a good blend of sites and small site and SME developers are key to the success of delivery. SMEs also seek to deliver good design and set a good standard in the Borough.

Support for SME's/Small Sites

We support the principle of Policy SP4- Residential Windfall Development which seeks to deliver small scale windfall development in certain locations. This allows SME's to come forward with development in sustainable locations.

However, we consider the wording of the policy is too restrictive and will not result in an effective policy. This is in part because the wording is too restrictive when referencing land that is within our immortally adjacent to settlement boundaries and that the settlement boundaries themselves are tightly drawn around these areas. The Regulation 19 Policy Map settlement boundaries do not include all existing built form and the proposed new allocations are also excluded from within the boundaries.

In order for this policy to be effective and to meet the windfall requirement (1,050 dwellings) we consider amendments are required to the wording of the policy and that the settlement boundaries as shown on the Policies Map should be modified to include the existing built form and the built form proposed in the Local Plan.

The wording of Policy SP4 should be amended as follows:

SP4 - Residential Windfall Development

1 Residential development or infilling of a scale that is commensurate with that of the existing settlement will be permitted within, or immediately adjoining or close to the existing built up confines of the settlement boundaries, as shown on the Policies Map, of the following settlements:

Ash, Alkham, Aylesham, Capel-le-Ferne, Deal, Dover, East Langdon, Eastry, Elvington, Eythorne, Guston, Goodnestone, Kingsdown, Lydden, Northbourne, Preston, Ripple, Sandwich, Shepherdswell, St Margarets at Cliffe, Wingham, and Worth.

1 Minor residential development or infilling or adjoining or close to the existing built up confines of the settlement boundaries of a scale that is commensurate with that of the existing settlement will be permitted within the settlement boundaries, as shown on the Policies Map, of the following settlements:

Ashley, Barnsole, Betteshanger, Chillenden, Coldred, Denton, East Studdal, Finglesham, Great Mongeham, Martin, Martin Mill, Nonington, Ringwould, Staple, East Stourmouth, Sutton, Tilmanstone, West Hougham, Wingham Green, Woodnesborough and Wootton.

Subject to all of the following criteria being met:

1 a) It is of a scale that is appropriate to the size of the settlement and the range of services and community facilities that serve it, taking account of the cumulative impact of any allocated sites and committed development;

1 b) It is compatible with the layout, density, fabric and appearance of the existing settlement and individually or cumulatively, would not result in the coalescence or merging of two (or more) separate settlements, or the significant erosion of a gap between settlements, so as to result in the loss of individual settlement identity or character;

1 c) In the case of settlements in, adjoining or surrounded by, the Kent Downs AONB or Heritage Coasts, that the proposal complies in the first instance with the primary requirement of conserving and enhancing landscape and scenic beauty, and, where this is demonstrated, that the scale and extent of development is limited, sensitively located and designed to avoid or minimise adverse impacts on these designated landscapes;

1 d) It would conserve and enhance landscape character and biodiversity and not result in an unacceptable intrusion into the open countryside or the loss of, important green spaces within the confines that contribute positively to the existing character of that settlement;

1 e) It would preserve or enhance any heritage assets within its setting;

2 f) It would not result in the significant loss of best and most versatile agricultural land currently used for agriculture;

1 g) Where the site adjoins open countryside, an appropriately designed landscape buffer is included;

2 h) It would not have an adverse impact on the living conditions of existing adjoining residents;

3 i) Where development would result in the loss of active employment, open space, sport or community facilities within the settlement that such development is consistent with the requirements of policies EN2, PM5 and PM6 of this Plan;

1 j) Traffic movements generated from the development do not result in severe impacts to the highway network that cannot be mitigated. This should be considered through transport assessments carried out in accordance with Policy TI2 which must take account of the cumulative impact of sites allocated for development. Proposals must not prejudice the ability of sites allocated for development to come forward due to limited highway capacity; and

1 k) It would be in accordance with all other relevant policies in the Plan.

2 New dwellings (both isolated and non-isolated) elsewhere in the countryside outside of settlement

boundaries will only be permitted in exceptional circumstances under one or more of the criteria

1 to v), and subject to meeting criteria a) to k) above:

2 i) there is an essential need for a rural worker, including those taking majority control of a farm business, to live permanently at or near their place of work in the countryside;

1 ii) the development would represent the optimal viable use of a heritage asset or would be appropriate enabling development to secure the future of heritage assets;

iii) the development would re-use redundant or disused buildings and enhance its immediate setting;

1 iv) the development would involve the subdivision of an existing residential building; or

2 v) the design is of exceptional quality, in that it: - is truly outstanding, reflecting the highest standards in architecture, and would help to raise standards of design more generally in rural areas; and – would significantly enhance its immediate setting, and be sensitive to the defining characteristics of the local area

In order to help meet housing needs as well as support SMEs and Self and Custom Builders, we consider the Council could still include a small sites policy or a policy which recognises the role of rural communities and supports windfall developments.

The Network is championing a small sites policy, which is presently being endorsed by a number of LPAs including Swale and Medway Council.

Any future plan should provide for a policy framework to allow SMEs to deliver throughout the lifetime of the plan, particularly in rural areas.

As part of the Network's objective, it has sought to introduce a policy into emerging Local Plans that seeks to support small and medium sized developments that builds on the 1ha site requirement but expands this into a policy framework that can allow SMEs to successfully operate within the policy framework of a Local Plan where there are limited opportunities through the allocations in which the Council has made (i.e. on larger sites).

In this respect, there is often a large windfall figure required to be met, or LPAs find themselves in a position where the presumption in favour of sustainable development is applicable. The SME policy set out below is a policy in which the Network considers would provide the opportunity for SME sites to come forward, whilst offering the LPA an enhanced development coming forward that is typically delivered by an SME – i.e. in respect of design quality or for instance carbon efficiencies.

Whilst the ideal scenario would be for the same policy to be adopted by each Council (and therefore apply a level of consistency in understanding and application of the policy), we also recognise that each LPA has a specific set of circumstances that may require the policy wording to be tweaked. This maybe the case in DDC and the Network would welcome further discussions as to how such a policy could be introduced into the Plan.

The suggested wording of the policy is as follows, but can be tailored to suite each LPA.

Policy [insert Policy Number] Small Sites

In order to recognise the value of SMEs and small scale sites, the Council will support development of unallocated or windfall small scale housing (C3) and approve applications providing the harm does not demonstrably outweigh the benefits; and where:

- 1 The site does not exceed 60 dwellings (net) and is of an appropriate scale to its location;
- 1 The site is being brought forward by a recognised SME Developer and is not part of a larger site;

III. The proposed development delivers;

- 1 A bespoke design approach;
- 2 A high quality design that is locally distinctive;
- 3 Is sympathetic to the character of its location;
- 4 All dwellings meet National Design Standards and endeavor to deliver a range of Carbon reduction build techniques;

1 The proposed development preserves residential amenity, designated heritage assets and core environmental assets and increase net biodiversity.

1 A flexible approach will be encouraged to the delivery of Affordable Housing assessed on a site by site basis. Where on site provision is demonstrated through evidence to be unviable or unattractive (less than 70% Open Market Value) to recognised Registered Providers, the Council will permit alternative levels of Affordable Housing or alternative forms of tenure, including First Homes, payment in-lieu of on site provision or another form of recognised Affordable Product as defined in the NPPF.

It is recognised that SMEs can deliver quickly and applicants are encouraged to explore if a reduced implementation period is appropriate.

A Small Sites policy will allow for SMEs to operate within the Plan Led system and will allow both Small and Medium sites to come forward (i.e. sites above 1ha and up to 60 dwellings). Such a policy will allow an SME to come forward with a planning application that meets locally defined specific criteria, such as high-quality design, low carbon footprint, reduced time limits for implementation etc and a flexible approach to the delivery of Affordable Housing. On the other side of the coin, the Council will receive higher quality developments being submitted that are in character with more rural fringe locations (remembering the SME site typology), but that those Rural Fringe locations can be supported with an appropriate amount of growth that will assist in preventing, slowing or reversing their cycle of decline.

Such a policy would provide for additional weight to be afforded to an SME application, and thus allow greater weight to be applied to the application in the overall planning balance. This would reduce risk to an SME and increase certainty at the planning stages, as the SME can tailor their scheme to meet the specific criteria. The LPA also recognises that it would result in a development that meets Building Better Building Beautiful objectives and potentially addressing Climate Change issues.

Crucially, the policy is designed to deliver up to 60 dwellings (and thus meet the M of SME as much as the S) but is worded in a way that seeks to ensure the development coming forward in any given location is consistent and respectful to the area that it is in i.e. a scheme of 60 dwellings may not be appropriate for a small village, but 20 maybe, and therefore a policy that refers up to a figure of 60 dwellings is deemed acceptable ? i.e. the policy is fully flexible.

In addition, the 60 dwelling threshold is very much seen as the scale of developments where larger SME's start to compete with Volume housebuilders on sites. A volume housebuilder will tend not to drop below 60 dwellings and thus the Policy is designed to really assist SME delivery and support the delivery of bespoke high-quality development, but also directly respond to certain SME challenges, such as how to deliver small numbers of Affordable Housing on any given site.

The Network recognises that other Kent LPAs are seeking to introduce a Small Sites Policy and a key aim for the policy is that there is a level of consistency in the wording across a number of LPAs, in order that the interpretation and understanding of the policy is also consistent on a cross boundary level – again seeking to reduce the risk at the planning stages to an SME.

In addition to the Policy itself, we also consider that an SME protocol should be prepared which provides guidance and clarity for SMEs at the pre-application and post-submission stages. The protocol would recognise the need to engage with SMEs and understand that a flexible approach is needed to certain issues (such as site typology/affordable housing provision).

The protocol could include a standard PPA timeframe and fixed cost to ensure that sufficient officer time is allocated to an SME application. Whilst SME applications tend to be on the smaller scale (when compared to larger volume housebuilder submissions), those applications are critical to the SME themselves, and accordingly the Network often discusses the frustration at the lack of engagement from LPAs on their applications – often perceived by SMEs in the Network as being at the bottom of the pile.

This position is especially so at the pre-application stage, where often paid pre-application advice is sought, but either never received or delayed, in some cases up to 9 months. Whilst this is a matter that may extend beyond Dover District Council, this is a 'real life' significant issue as a pre-application response is so important to an SME to determine the extent of risk that a site may carry.

The importance of a planning consent is vital to the success of an SME, no matter how small (or large) that scheme is, and greater engagement is always encouraged. This works both ways and greater engagement can improve the submission material of an SME and thus also reducing risk.

A further burden on SME's, and a point that the above policy is seeking to assist with is delivery of Affordable Housing. This is a wider matter than DDC, but it is well recognised that Registered Providers are rarely interested in sites unless the number of affordable homes being offered equates to at least 20 affordable dwellings. For DDC, this means that any site that falls under a 67-dwelling threshold will likely struggle to gain interest in a registered provider (at 30% AH requirement). The policy seeks a flexible approach to how Affordable Housing can be delivered by an SME in instances where it is the RP that is not interested, not that the SME does not wish to provide affordable homes.

Please see attached representations with appendices in full

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness

See above and attached representations in full

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<u>Dover Local Plan – Section 19 Consultation</u> SAP 44 SOUNDNESS The revised Local Plan is not sound for the following reasons:

It has not been justified and is not effective. It has not been positively prepared to meet 'objectively assessed' needs and for this reason is not consistent with National Policy.

Why have the reasonable, sustainable alternatives for additional housing previously suggested in larger development centres such as North Aylesham, Elvington and Ethorne and Farthingloe and included within the original plan have now been removed? At the same time the proposed allowance for housing has been increased in Capel-le-Ferne and will not be deliverable.

The original draft Local Plan has been changed so that 900 fewer houses are proposed overall and yet the number of houses proposed in Capel-le-Ferne has increased to 95.

This is on top of recent planning permission for 34 houses off Capel Street, 15 dwellings at Longships on Cauldham Lane and 40 new dwellings in a recently completed development at Grasslands.

Why is Dover District Council spreading development across numerous small sites which is uneconomic and unsustainable rather than concentrating in larger developments where existing services, facilities and infrastructure are already available?

Why Dover District Council persist with this policy in relation to Capel-le-Ferne when it clearly is not in keeping with the council's stated objectives?

SP2 - Planning for Healthy and Inclusive Communities and

SP3 – Housing growth

SP2 - Planning for Healthy and Inclusive Communities and

SP3 – Housing growth

SP2 states that *'The Council will support the creation of healthy, inclusive and safe communities in the District by ensuring that new development is well served by services and facilities (for example education, health care, community, cultural facilities, play, youth, recreation, sports, faith and emergency facilities) and that a mix of uses are provided in new development that support daily life.'*

SP3 states that what they are trying to achieve is *'To focus new development at accessible and sustainable locations which can utilise existing infrastructure, facilities and services, and to ensure development contributes to the sustainability of local communities and services, supporting regeneration and wherever possible make the best use of brownfield land'.*

But the proposals for Capel-le-Ferne do not meet any of the objectives in the above Strategic Policies as follows:

- 1 The location of the proposed development in SAP 44 will connect to existing overloaded roads using Capel Street as its primary access point.
- 2 The proposed development is on arable land, currently in use and not brownfield land.
- 3 The development of the village is clearly not sustainable – Capel-le-Ferne has little or no facilities and services – only one small shop, no post office, no health care facilities, no doctor, no dentist, no pubs within the village confines and only a primary school. Therefore, in order to access services, residents need to drive to either Folkestone or Dover which is clearly at odds with SP1 – Planning for Climate Change.
- 4 The addition of 40 dwellings recently completed at Grasslands has not led to any benefit to the community in terms of new services or facilities.
- 5 Trying to 'grow the villages' by increasing the number of houses, but not having any plans to help develop services and facilities is unsustainable, uneconomic and unethical. It will only lead to more unnecessary travel.
- 6 There is only a single bus service and no train service at all.
- 7 The strategic policy SP6 – Economic Growth identifies areas distant from Capel-le-Ferne for economic development. Capel-le-Ferne has little opportunity for employment generation so cannot be seen to contribute to SP6.
- 8 The agreed number of number of houses for the site was originally set at 100, then reduced to 50 to allow a single point of access to the site. It has now been increased to 70 and is deemed achievable. This is not realistic and undeliverable. It would appear that the increase in the number of houses is being driven by economic needs to cover developer contributions which are likely to be substantial rather than by any need by Dover District Council to provide more housing. The development at Longships under SAP45, which has been granted planning permission, exceeds the allocated housing number by 5 dwellings on the basis that sticking to the SAP45 allocation of 10 houses would be uneconomic. The development of SAP44 is likely to encounter similar cost problems and is unlikely to be achievable in the proposed timetable (2021-2026)

Consultation With Statutory Consultees (Reg 22)

Dover Council has not fully consulted with statutory consultees to ensure that the existing facilities where present are sufficient or that plans are in place for future development of infrastructure.

SP11 – Infrastructure and Developer Contributions states: *Supporting infrastructure should be provided in advance of, or alongside, the development, unless there is sufficient existing capacity. The appropriate phasing for the provision of infrastructure will be determined on a case-by-case basis with reference to the most up to date Infrastructure Delivery Plan (IDP) and the priority classification along with other relevant evidence, and in consultation with the relevant providers.*

It is noted that the site at Aylesham North (AYL004) has been removed for transport reasons – essentially Kent County Council objected on transport grounds. However, given 500 homes in a sustainable location (two rail stations, large settlement), that would seem to be the obvious logical focus for development and the Council has failed its Duty to Cooperate with Kent County Council by failing to ensure the relevant transport assessments are undertaken and potential mitigation identified and agreed; rather than simply removing the large site from the plan and increasing allocations on the edge of villages (such as Capel-le-Ferne) that they hope are small enough to slip under the radar at Examination. This is not ethical.

The existing infrastructure in Capel-Le-Ferne is already struggling to cope with the existing level of housing. Water supply is weak throughout the village, power outages are common, and drainage has insufficient capacity and frequently blocks.

The addition of 90 houses along with the 49 already given planning permission will make this worse. Access to the site is proposed via Capel Street, an already congested road (little off street parking, busy cut through, primary school).

Note also the checkered history of road traffic accidents and injuries caused at the congested at the junction of Capel Street/Cauldham Lane from New Dover Road.

Looking through the supporting Infrastructure Delivery Plan (IDP), no mention is made of any suggested improvements to facilities/services or for any proposed improvements to be carried out by Kent Highways, Southern Water (drainage) or Affinity Water (water supply) in Capel-le-Ferne.

Incremental development such as extensions to villages are more difficult to plan for with respect to infrastructure as they are too fragmented and should therefore be avoided.

Transport modelling has been carried out for developments in other areas, but nothing has been done for Capel-le-Ferne where there will be over 100 new houses accessing Capel Street, a narrow congested road. This was highlighted as a significant problem during the long drawn out process of granting planning permission for 34 dwellings off Capel Street. The revised Local Plan is proposing to add a further 70 houses along with 20 dwellings on Cauldham Lane. All the traffic from these developments will exit onto the New Dover Road at the junction of Capel Street/Cauldham Lane – a poorly designed junction which has been identified in numerous surveys as a real problem for development in the area. **The Local Plan does not include any transport modelling for this area.**

Kent County Council have reservations about access to the site SAP44 indicating that it is not ideal. Given the current frequent traffic congestion in the area, this is not surprising. Particular concern was raised regarding emergency vehicle access, hence the requirement for a secondary access to SAP44 and further consultation with the emergency services. However, it should be noted that this secondary access is via a single track lane. Clearly insufficient consultation has been carried out at this stage.

Although Dover District Council have consulted with Capel-le-Ferne Parish Council as required, they have not engaged fully with the parish council as the objections raised by the council to overdevelopment of the village have been ignored both in this local plan and in planning permissions granted in the past. If the purpose of consultation is to incorporate the views of the local population, Dover District Council have clearly failed in this regard.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful

Changes I would make:

Take SAP 44 out of the plan completely as it is not following the policies that the council say they are trying to Achieve and not following their own policies.

Choose one of the alternative sites for additional housing in larger development centres such as North Aylesham, Elvington and Ethorne and Farthingloe and included within the original plan. In particular, Aylesham North (AYL004) is far more appropriate, given 500 homes in a sustainable location (two rail stations, large settlement), that would seem to be the obvious logical focus for development

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I would like to participate as I represented the Village Council in recent Planning Committee meetings.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	1.14, 1.15, 3.267.
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Thank you for the opportunity to comment on the Dover District Local Plan, we were pleased to see inclusion of the South East Marine Plan in this consulted document. Although in this response we have selected 'Yes' to question 5 we have some key development points for the plan in relation to Duty to Cooperate.</p> <p>The inspector may seek to see that the plan lay out the statutory duty of the Local Authority to take account of Marine Plans and Marine Planning documents when developing local plans in accordance with the Marine and Coastal Access Act 2009. The current reference to Marine Plans in section 3.267 correctly refers to the marine plans but does not explicitly demonstrate this requirement being met. A simple fix, we would hope to see reference to this in this section.</p> <p>In addition, the Marine Management Organisation would hope to be included as a consulted body in the duty to cooperate section under sections 1.14 and 1.15 due to the jurisdictional overlap between the terrestrial and marine planning systems. The MMO is keen to maintain strategic cooperation with colleagues in Dover District Council to support an integrated planning system.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP28 - Land between Eythorne and Elvington (EYT003/EYT009/EYT012
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	Development proposals in villages such as those proposed for Eythorne, Elvington and Shepherdsweil should be considered very carefully therefore I OBJECT to this application for the following reasons:

<p>possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<ol style="list-style-type: none"> 1 Infilling the areas of green fields around Eythorne, Elvington and Shepherdsweil will ruin the character of the villageS. 2 The proposed building of this huge number of additional new homes in these developments along with its inhabitants would overwhelm the villages and the limited amenities they have to offer. The village amenities, providing basic needs are already oversubscribed. The adequacy of these amenities to accommodate future demand should have been determined- I do not believe they are in any way adequate. 3 The protection of villages' visual, historic, archaeological and environmental qualities are at serious risk should these developments go ahead. 4 The developments, both during construction and once completed will result in a significant increase in traffic and the noise and pollution associated with this increase. Road widening to reduce the inevitable congestion is not an option in the roads leading in and out of the villages. 5 The proposed siting of the developments are particularly ill-considered: being on a greenfield sites, and building here would both diminish the striking views from the villages and have an irreversible impact on flora and fauna and the local biodiversity. I think it's fair to say that many villagers are proud, if not very protective of the many and varied wildlife that choose to make these villages their home. 6 The importance of protecting our rural communities and the benefits that they provides in terms of both our physical and mental well-being should not be underestimated. 7 We need to make it our priority to protect the natural environment and habitats so that they remain undisturbed and thriving for future generations to enjoy. 8 The development in Eythorne with some 350+ new homes on top of the proposed 39+ at St Andrews Gardens will have a significant impact on the roads in Shepherdsweil especially the main routes in and out of the village. I have personally abandoned my journey exiting the village via Coxhill due to congestion on numerous occasions. Our village roads simply cannot accommodate this significant increase in traffic. Traffic, particularly at peak times already causes major problems; a) sufficient pedestrian/vehicle segregation due to a lack of suitable foot paths and, b) speed and volume of traffic. 9 Being able to comment on the Local Plan has been quite difficult. This process should have been made far more straightforward than this Similar to how objections can be made on the planning portal.
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Look at using former brownfield sites before carving up and concreting over virgin agricultural land. Far too many new houses are being built in Kent at this time. Our roads, water/waste infrastructure is already overstretched. There are insufficient amenities available to accommodate the additional inhabitants of these small villages.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Whole Plan
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Thank you for consulting us on this stage of the proposed Dover Local Plan.</p> <p>We broadly support the adoption of the regulation 19 document, provided it is updated to include the following comments and recommendations in regards to environmental constraints within the areas detailed.</p> <p>Fisheries, Biodiversity and Geomorphology</p> <p>The importance of ecological networks of linked habitat corridors (both within the District and linking to adjacent District) to allow the movement of species between suitable habitats, and to promote the expansion of biodiversity is defined in the NPPF and the Local Nature Recovery Strategy commitment of the government's 25-year Environment Plan and enacted by the Environment Act 2021.</p> <p>The connectivity of Local Wildlife Sites and other designated sites should not be disrupted through the allocation of sites for development and should aim to promote further connectivity of the ecological blue and green network through habitat creation and improvement. A numerical commitment to biodiversity net gain is required in order to be in line with the Environment Act 2021 and should be realised equally in both terrestrial and aquatic habitats using the Natural England Biodiversity and Rivers Metrics.</p> <p>Allocated sites should not encroach on any watercourse, and we urge a minimum 10m buffer zone to development proposals that contain or are adjacent to watercourses.</p> <p>Where there is opportunity for river restoration, such as habitat enhancement/creation, remeandering, improved fish/Eel passage and the restoration of culverted watercourses to open channels, we would like to see a commitment to actively pursue these aims.</p> <p>Special focus could be aimed at culverted sections of any watercourse. If/where the watercourse is toe-boarded site allocations should consider opportunities for removal.</p> <p>With reference to Paragraph 185 of the NPPF (2021) which states that planning policies and decisions should "limit the impact of light pollution from artificial light on ... dark landscapes and nature conservation." We would urge appropriate lighting design in line with best practice guidance set out by the Bat Conservation Trust as riparian corridors are essential for many migrating and nocturnal species.</p> <p>As an informative point, allocations should take into consideration the use of sustainable urban drainage systems (SuDS) and Natural Flood Management (NFM) measures for flow attenuation, filtration, and water conservation.</p> <p>We welcome engagement at the earliest opportunity to identify opportunities through development proposals for securing measurable gains for biodiversity.</p> <p>Groundwater and Contamination Land</p> <p>The wording on the water efficiency policy confirms the optional higher water efficiency standard for all new dwellings of 110 litres per person per day and is one that we support, it is also encouraging that the Local Planning Authority "strongly support" proposals seeking more stringent water efficiency measures. We have the following recommended corrections an alterations that should be made before the Regulation 19 documents are implemented.</p>

Instance 1 Page 232 CC4 - Water Efficiency

“All new dwellings must be built to the higher water efficiency standard under Regulation 36(3) of the Building Regulations, to achieve a maximum use of 110 litres per person per day. The Council will strongly support proposals that seek to reduce daily water consumption even further, through the use of additional measures such as rainwater harvesting. For non-residential development, development must achieve BREEAM ‘Very Good’ standard overall, including Very Good for addressing maximum water efficiencies under the mandatory water credits, unless it can be demonstrated that it is not technically feasible and viable”

S 4.38 Where sites are identified as being on contaminated land, then a land contamination assessment will be required. Where sites are in close proximity to noise generating sources like busy road, railways or commercial uses then a noise survey and appropriate mitigation will be required. Where sites are in areas of poor air quality or close to an Air Quality Management Area then an air quality assessment will be required in accordance with Policy NE4 - Air Quality and suitable mitigation should be provided.

The wording contaminated land has a legal definition under Part IIa S 78A. There are no current determined Contaminated Land sites in Dover as far as I know, the wording here needs to be changed to land affected by contamination .

Instance 2

4.110 The site is located within Ground source Protection Zone 3; contaminated land is registered at the site and part of the site falls within the AONB. These issues need to be addressed within any proposal.

This section is incorrect. Land contamination may have been logged at the site and it may be on the planning brownfield register perhaps, but we have not been notified by Dover that it has been determined formally as **Contaminated Land**.

The following sections need minor corrections

Instance 3

11.48 In the areas of the district which are not on mains drainage, water treatment package plants can be installed, subject to the approval of the Environment Agency in the first instance.

11.48 In the areas of the district which are not on mains drainage, water treatment package plants may potentially be installed if they can meet non mains drainage design criteria. If they cannot they should be consulted on with the Environment Agency in the first instance, as they may require a formal Environment Permit for any discharges.

Instance 4

11.51 For residential and commercial developments where there is no mains connection within a reasonable distance, applicants will be required to provide details of a water treatment package plant or equivalent that is compliant and has been approved by Environment Agency guidance, as part of a planning application. Applications for residential extensions will not be required to provide such details.

For residential and commercial developments where there is no mains connection within a reasonable distance, applicants will be required to provide details of a water treatment package plant or equivalent that is compliant with Non-mains drainage regulations as part of a planning application. Discharges to ground that do not meet relevant exemption criteria will also require an environment permit from the Environment Agency. Further guidance is on .go.uk. Applications for residential extensions may not be required to provide such details under planning, but will still have to ensure that drainage systems comply with Non-mains drainage regulations and meet Building regulations.

Instance 5

11.51 For residential and commercial developments where there is no mains connection within reasonable distance, applicants will be required to provide details of a water treatment package plant or equivalent that is compliant with, and has been approved by Environment Agency guidance, as part of a planning application. Applications for residential extensions will not be required to provide such details.

11.51 For residential and commercial developments where there is no mains connection within reasonable distance, applicants will be required to provide details of a water treatment package plant or equivalent that is compliant with Non Mains Drainage regulations and aligns with Environment Agency risk assessment guidance, as part of a planning application. In some instances a separate Environmental Permit may be required from the EA. Applications for residential extensions will be required to provide details to show any risks are not exacerbated and current systems comply with NMD Regulations.

Aside from the aforementioned alterations, we are approve of the importance placed on Groundwater protection in a number of policies, and explanatory text. The plan covers everything reasonably well from our view point. While there is no explicit policy on land affected by contamination, brownfield sites and other potentially pollution development is mentioned in various polices under water infrastructure and the like are mentioned adequately.

Flood Risk

Policy CC5

We would recommend a slight amendment to the wording in this policy in order to comply with the NPPF's guidance's definition of a "design flood" Paragraph:002 Reference ID: 7- 002-20220825 Flood risk and coastal change - GOV.UK (www.gov.uk)

Where development does go ahead, all floor levels for living and sleeping accommodation should be set at a minimum of 300mm and 600mm above the design flood level for Flood Zones 2 and 3 respectively, including an allowance for climate change.

We have reviewed the **new sites** for housing allocation included in the Reg 19 Submission Summary of Site Allocations and would draw your attention to 3 of these sites that lie within FZ3: Northwall Road & Ethelbert Road, Deal Stonar Close, Sandwich

These site lie within Flood Zone 3a; this is an area considered to be at 'high risk' from flooding in the absence of tidal defences. Whilst we appreciate that both Sandwich and Deal are well defended from tidal flooding, there is always a 'residual' risk from inundation in such areas. Accordingly, we would request that your Authority initially considers whether these sites suitably address the requirements of the flood risk Sequential Test before allocating them in the local plan.

The updated PPG to the NPPF places more emphasis on residual risk; therefore when considering these allocations it should be understood that in order for development to be made safe, it is likely that the ground floor would not be suitable for any form of living accommodation. Detailed design would be subject to a site-specific FRA but given the potential depths of flooding in the event of failure or breach of defences, development is unlikely to meet the requirements of Policy CC5 or the Exception Test, unless all living and sleeping accommodation is set at first floor or above. If this is would be unacceptable to the LPA, then these sites should not be allocated.

Environment Management

Local Plan to 2040

The government's 25 year plan to improve the environment should possibly be referenced in the Local Plan (25-year-environment-plan.pdf (publishing.service.gov.uk). Although many items mentioned in the 25 year plan are covered in the Local Plan, it makes sense to align government plans with local plans.

Policy NE6: Encouraging to see a policy dedicated to aspects of water quality.

Water Cycle Study: Although the water cycle study has been updated, not all information contained in this report is the most recent available. There is a reference to the SE River Basin Management Plan (2016). This is currently being updated with more recent information now available at the following links:

Updated RBMP 2022 <https://www.gov.uk/guidance/south-east-river-basin-district-river-basin-management-planupdated-2022>

River basin management plans, updated 2022: challenges for the water environment

<https://www.gov.uk/government/publications/river-basin-management-plans-updated-2022-challenges-for-the-water-environment>

The link on challenges for the water environment includes important information on the climate emergency and the biodiversity crisis. It would be useful to consider this latest information in the Local Plan and Water Cycle Study and include links in the documents. Even though many of the items have been covered in the Local Plan and associated documents, it would add value to the plan by including links to the latest information.

Water Cycle Study, Point 6.5 Nutrient Neutrality - *As a result of the mitigation measures for demonstrating this being difficult to deliver it has effectively resulted in an embargo on the granting of permissions for new housing in the areas affected, since the advice was issued nearly two years ago.*

This statement possibly gives the wrong message about nutrient neutrality and may not show the importance to protecting European sites such as Stodmarsh. Although it might be difficult in some cases to achieve nutrient neutrality for developments, the concept of nutrient neutrality is to protect the environment so that future generation will be able to enjoy the benefits. The intention of nutrient neutrality is not to stop development, but rather to allow for sustainable development.

Should you require any additional information, or wish to discuss these matters further, please do not hesitate to contact me via the email below

(DDC note - this is the full representation from Environment Agency on the Local Plan. Extracts have been made from this to create additional representations against relevant consultation points/policies)

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination? Not Applicable

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Whole Plan
2 - Do you consider this part of the Plan sound?	Yes

<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>Not Applicable</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Not Applicable</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>It must be remembered that much of the work on this was done under the difficult circumstances of COVID restrictions. The Parish meeting @DDC way back in February 2019 when the first draft of the site allocation document was being prepared.</p> <p>Since then the sites have been visited and assessed. Some rejected and some retained. Since then there has been a further 'call for sites' each new site requiring assessment.</p> <p>Alongside all of this the other elements of the Local Plan have been worked on . A considerable body of work in addition to the day to day work of the planning and enforcement departments.</p> <p>Tilmanstone Village is not mentioned by name anywhere in the documents probably because there are no identified sites within the village confines. The part of our Parish that adjoins Whitfield is still in the plan but as part of the Whitfield expansion.</p> <p>Tilmanstone Village is included ,but not by name, when 'other' settlements are referred to especially when it comes to the drainage element of the infrastructure document and it is a stated aim that settlements dependent on cesspool drainage should be especially considered for improvement. Small, infill development within the confines of 'other' settlements will still be considered under the current NPPF .</p> <p>Tilmanstone will be affected by the expansion of Elvington. Doubling the size of Elvington which already scores highly on the indices of deprivation will put a great strain on existing services and infrastructure. New housing without adequate local infrastructure puts significant strain on local amenities such as medical services, school and playgroup places as well as increasing traffic on our roads. The existing sewerage system is already overloaded and any future developments will only exacerbate this problem.</p> <p>It should be noted with some concern that the expansion of the employment opportunities at Pike Road Industrial Estate is not substantiated by figures - it's marked N/A in the document. Barville Road was identified for improvement even before the A256 was built - improvements to this very busy, nominated HGV route have never been done and the increase in domestic traffic accessing the A256 as a result of the Elvington expansion will need to be addressed.</p> <p>Traffic measurement flows were taken just post pandemic and clearly show a flow much lower than the parish's normal traffic volume.</p> <p>If development is to be permitted it should be linked to a S106 agreements to improve the facilities within the parish, parishioners have mentioned that they "have a bus pass, but have no buses to use it on" The Parish Council should be consulted on allocation of funding to provide Road improvements to Barville Road. Greater consideration to prevent ad hoc use of 'windfall sites' which do not meet specified road safety or other material standards.</p> <p>In view of DDC's declaration of a climate emergency and cost of living crisis we are disappointed to see that the Council does not intend to use its powers under the Planning and Energy Act 2008 to set energy efficiency standards which go beyond the minimum required by Building Regulations for new homes.</p> <p>The Parish council welcome the proposals to protect and enhance the character, fabric, features, setting or views into and from Historic Parks and Gardens, especially in relation to Waldershare Park, a significant portion of which falls within our parish.</p> <p>Proposed developments will put additional strain on the current drainage system and inevitably cause traffic congestion with resulting increase in pollution levels.</p> <p>Whilst we acknowledge that the parish must grow, future developments should not put additional strain on the current infrastructure</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful</p>	

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Introduction / Conclusion
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Introduction</p> <p>Context</p> <p>Gladman welcome the opportunity to comment on the Dover District Local Plan consultation, and request to be updated on future consultations and the progress of the New Dover District Local Plan. Gladman specialise in the promotion of strategic land for residential development and associated community infrastructure and have considerable experience in contributing to the development plan preparation process having made representations on numerous planning documents throughout the UK, alongside participating in many Examinations in Public. The Council will need to carefully consider its policy choice and ensure that the proposed approach positively responds to the revised National Planning Policy Framework (2021). There will also be a need to take consideration of changing circumstances associated with national planning policy and guidance over the course of the plan preparation period, including the Government's emerging proposals for the planning system. Gladman Developments have land interests in Dover and support the inclusion of SAP 14 - Land off Cross Road (DEA008) and Policy SAP46 - Land adjacent Langdon Court Bungalow, The Street, East Langdon (LAN003) as allocations for residential development. This representation provides additional information regarding the suitability and deliverability of these sites to support their continued inclusion. However, Land at Cross Road</p>

(DEA020) has been removed from the plan, with the only explanation offered being that the site already has permission (Dover DC Application reference: 20/01125). Gladman disagree with this approach and consider that the site should be recognised in the Local Plan as either an allocation or committed development. The site is not currently included on the Policies Map as either committed or future development, nor through the redrawing of the settlement boundary. Gladman looks forward to engaging further with the Council as the plan making process progresses.

Plan Making

The National Planning Policy Framework sets out the four tests that must be met for Local Plans to be considered sound. In this regard, we submit that in order to prepare a sound plan it is fundamental that:

- Positively Prepared – The Plan should be prepared on a strategy which seeks to meet objectively assessed development and infrastructure requirements including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development.
- Justified – the plan should be an appropriate strategy, when considered against the reasonable alternatives, based on a proportionate evidence base.
- Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and
- Consistent with National Policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.

Legal Compliance

Duty to Cooperate

The Duty to Cooperate is a legal requirement established through Section 33(A) of the Planning and Compulsory Purchase Act 2004, as amended by Section 110 of the Localism Act. It requires local authorities to engage constructively, actively and on an ongoing basis with neighbouring authorities on cross-boundary strategic issues throughout the process of Plan preparation. As demonstrated through the outcome of the 2020 Sevenoaks District Council Local Plan examination and subsequent Judicial Review, if a Council fails to satisfactorily discharge its Duty to Cooperate, this cannot be rectified through modifications and an Inspector must recommend non-adoption of the Plan. Whilst Gladman recognise that the Duty to Cooperate is a process of ongoing engagement and collaboration, as set out in the Planning Practice Guidance (PPG) it is clear that it is intended to produce effective policies on cross-boundary strategic matters. In this regard, Dover must be able to demonstrate that it has engaged and worked with neighbouring authorities, alongside their existing joint working arrangements, to satisfactorily address cross-boundary strategic issues, and the requirement to meet any unmet housing needs. This is not simply an issue of consultation but a question of effective cooperation. The revised Framework has introduced a number of significant changes to how local planning authorities are expected to cooperate, including the preparation of Statement(s) of Common Ground (SoCG) which are required to demonstrate that a plan is based on effective cooperation and agreements made by neighbouring authorities where cross boundary strategic issues are likely to exist¹. The SoCG(s) should provide a written record of the progress made by the strategic planning authorities during the process of planning for strategic cross-boundary matters and will need to demonstrate the measures local authorities have taken to ensure cross. boundary matters have been considered and what actions are required to ensure issues are proactively dealt with.

Sustainability Appraisal -

In accordance with Section 19 of the 2004 Planning and Compulsory Purchase Act, policies set out in Local Plans must be subject to Sustainability Appraisal (SA). Incorporating the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004, SA is a systematic process that should be undertaken at each stage of the Plan's preparation, assessing the effects of the Local Plan's proposals on sustainable development when judged against reasonable alternatives. Gladman note that the Proposed Submission Local Plan is accompanied by a Sustainability Appraisal dated September 2022. The Council should ensure that the results of the SA process clearly justify its policy choices. In meeting the development needs of the area, it should be clear from the results of the assessment why some policy options have been progressed, and others have been rejected. Undertaking a comparative and equal assessment of each reasonable alternative, the Local Plan's decision-making and scoring should be robust, justified, and transparent.

National Planning Guidance

National Planning Policy Framework The National Planning Policy Framework sets out the Government's planning policies for England and how these should be applied. It provides a framework within which locally prepared plans for housing and other development can be produced. The NPPF requires that plans set out a vision and a framework for future development and seek to address the strategic priorities for the area. Local Plans should be prepared in line with procedural and legal requirements and will be assessed on whether they are considered 'sound'. The NPPF reaffirms the Government's commitment to ensuring up-to-date plans are in place which provide a positive vision for the areas which

they are responsible for, to address housing, economic, social, and environmental priorities and to help shape the development of local communities for future generations. In particular, paragraph 16 of the NPPF states that Plans should:

“a) Be prepared with the objective of contributing to the achievement of sustainable development; b) Be prepared positively, in a way that is aspirational but deliverable; c) Be shaped by early, proportionate and effective engagement between plan-makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees; d) Contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals; e) Be accessible through the use of digital tools to assist public involvement and policy presentation; and f) Serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).” To support the Government’s continued objective of significantly boosting the supply of homes, it is important that the Dover District Local Plan provides a sufficient and variety of land that can be brought forward, without delay, to meet housing needs. In determining the minimum number of homes needed, strategic plans should be based upon a local housing needs (LHN) assessment defined using the standard method. LHN sets the minimum number of homes required and this is the starting point for determining the number of homes required in any local planning authority area, unless there are circumstances to justify an alternative approach. Once the minimum number of homes that are required is identified, the strategic planning authority should have a clear understanding of the land available in their area through the preparation of a strategic housing land availability assessment. In this regard, paragraph 68 sets out specific guidance that local planning authorities should consider when identifying and meeting their housing needs, with Annex 2 of the NPPF providing definitions for the terms “deliverable” and “developable”. Once a local planning authority has identified its LHN, these needs should be met as a minimum, unless any adverse impacts would significantly and demonstrably outweigh the benefits of doing so, or the application of certain policies in the Framework would provide a strong reason for restricting the overall scale, type and distribution of development (paragraph 11b).). Where it is found that full delivery of housing needs cannot be achieved (owing to conflict with specific policies of the NPPF), local authorities are required to engage with their neighbours to ensure that identified housing needs can be met in full (see paragraph 35). Paragraph 22 of the NPPF expects that local plans should look ahead over a minimum 15-year period from adoption. The Local Plan will need to be adopted at the latest by 2025 for the requisite 15-year period to be met. Gladman recommend that the Council keep abreast of the Levelling Up and Regeneration Bill (LURB) which is currently making its way through Parliament. The LURB contains some significant changes in respect of local plan production including the introduction of a set of national development management policies, a new Infrastructure Levy and design codes to be prepared by each individual local planning authority.

Planning Practice Guidance

The Planning Practice Guidance (PPG) was first published by the Government to provide clarity on how specific elements of the NPPF should be interpreted. The PPG has been updated to reflect the changes introduced by the revised NPPF to national planning policy and provides further clarity on how specific elements of the Framework should be interpreted when preparing Local Plans.

(DDC Note: This comment is the Introduction and Conclusion extracted from the Document provided by Galdman Development Ltd - Attached - The rest of the document has been divided up across the relevant sections of the Local Plan document.)

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Not Applicable

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Please accept Alkham Parish comments and suggestions for DDC Local Plan. This submission is a representative view of much of the community in Alkham. It is submitted as a word document by email, as there have been problems with the system accepting entries online. Furthermore, the document stands alone and gives a good picture for the vision of the rural Alkham Valley working towards being an active partner in nature regeneration of the UK. This will be brought about by increasing wildlife biodiversity and conservation, through actioning habitat creation with wildflower regeneration and tree planting and rewilding, for climate change resilience in this AONB within the District of Dover. We thank you for your kind consideration and look forward to further discussions and plans moving forward.</p> <p><i>(DDC note - the text above is taken from covering email sent with the representation)</i></p> <p>1 Introduction</p> <p>1.1 This report examines the Dover District Local Plan to 2040 and tries to highlight the impact and effects of the proposals on the village of Alkham from a resident's perspective. The report therefore considers each theme of the Dover District plan from an Alkham viewpoint .</p> <p><i>'Neighbourhood planning is a right for communities introduced through the Localism Act 2011. Communities can shape the development in their areas through the production of Neighbourhood Development Plans, Neighbourhood Development Orders and Community Right to Build Orders'. (Royal Town Planning Institute)</i></p> <p>1.2 Whilst neighbourhood plans cannot block developments which form part of the Local Plan i.e. the Dover District Plan, they can shape where development will go and what it will look like. Neighbourhood plans can also be used to shape the future focus of an area. Whilst Ash and Worth produced Neighbourhood Plans which have been incorporated into the DDC Plan, Alkham Parish Council took a decision prior to Covid not to develop a Neighbourhood Plan but through the community considerable work has been undertaken to identify key issues within the Parish boundary and I have tried to incorporate these views in the comments I have made.</p> <p>1.3 For purposes of the DDC Local Plan Alkham Parish sits within the Neighbourhood Area of West Dover, but for purposes of this report the comments only relate to the impact upon the Parish of Alkham and not to other parishes within the same identified neighbourhood area.</p> <p>1.4 Alkham is a village and civil parish in the Dover district of Kent, situated about four miles west of Dover. As well as the village itself, the parish contains the settlements of Chalksole and Ewell Minis.</p>

1.5 Alkham did not appear in the Domesday Book but in 1093 appeared as a subordinate church to Folkestone. It has therefore existed as a settlement for nearly 1000 years. The 2021 Census lists a population of 708 between 2011 and 2021. It covers an area of 13.00km² with a population density of 5454.44/km², a growth of 2.9%. The 2021 Census reflects that the population consists of 347 males and 361 females of which 682 were born in UK, 8 in EU, 2 in other parts of Europe, 9 in Middle East and Asia 4 in Africa and 2 in other countries. The population as it stands is predominately of retirement age.

Comment 1

I consider it essential that for the parish to grow and attract more young families through a balance between conservation, recreation and planned development to ensure the heritage, the SSSI green space of the valley, and a rural community can thrive in any plans being taken forward by the District Council. As can be seen later in the report I would ask that the Parish be considered for Conservation Area Status to ensure the natural resources offered by the Green Space can be maximised for the District as a whole.

2 Basic Conditions and Development Plan Status –

2.1 In order to meet the basic conditions set out in law in the 2011 Localism Act the District Plan must:

- • Have regard to national policies and advice contained in guidance issued by the Secretary of State.
- Contribute to the achievement of sustainable development in general conformity with the strategic policies of the development plan for the area.
- Be compatible with all current legislation and Human Rights Obligations.

Comment 2

I take no issue with the way in which the plan has been developed and its adherence to national planning guidance, land allocations and other strategies relevant to plan development at the current time. However, I note that the District Plan mentions 7 Neighbourhood areas and has formed 5 Neighbourhood Fora and makes a statement that communities have been part of the development process. I would ask for information on how Alkham is represented through the Neighbourhood Forum Framework and the consultation process both to develop the Plan thus far and to take it from inception to delivery be provided, as no one locally including the Parish Council Clerk seems to be aware of how Alkham is represented in the consultation process.

3 SECTION 1.46 of the DDC Plan - Key Issues and Objectives

3.1 In section 1.46 a number of key issues have been included for the District namely climate change, the move to carbon neutrality, flood management, sustainable development, the Whitfield Urban Expansion, combating the impact of Covid, economic growth, strategic transport growth, sustainable transport initiatives, appropriate infrastructure development, conservation, net gain biodiversity, achieving a balance between conservation and restoration. Wide ranging objectives have been set for each of these targets.

12 Conclusion

Whilst accepting the broad principles of the plan for the District as a whole the impact of the urban development planned is significant for the village of Alkham lying as it does between the planned growth areas of Hawkinge and Whitfield

Transport links are problematic, the fact that the road is unclassified does little to ensure adequate maintenance, the rising number of cars is untenable long term but there is a strong local community who wish to make the Parish a sustainable place for the future. Continued public transport is seen as a vital part of the solution.

I have tried to show the potential of the area of Alkham and the way it could be used to give a balance between recreation and conservation ensuring a major natural amenity in the area is protected yet becomes a green asset within the planning parameters and government targets and look forward to assisting DDC achieve these objectives.

Written by an Alkham resident which is supported by the Alkham Community

(DDC note - The full representation from Alkham PC is attached to this representation for information. However, specific comments from that main representation document have been extracted into separate consultation points/policy areas, relevant to the comments made. The comments extracted to this section are relevant to the Introduction / whole plan process)

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness

matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Local Plan Consultation Point	Introduction
Rep ID	SDLP1428
Rep Status	Processed
Consultee ID	1333264
Consultee Full Name	National Grid (Avison Young)
Consultee Company / Organisation	
Agent Full Name	
Agent Company / Organisation	
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Whole Plan
2 - Do you consider this part of the Plan sound?	Yes

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>National Grid has appointed Avison Young to review and respond to local planning authority Development Plan Document consultations on its behalf. We are instructed by our client to submit the following representation with regard to the current consultation on the above document.</p> <p>About National Grid</p> <p>National Grid Electricity Transmission plc (NGET) owns and maintains the electricity transmission system in England and Wales. The energy is then distributed to the electricity distribution network operators, so it can reach homes and businesses. National Grid Gas plc (NGG) owns and operates the high-pressure gas transmission system across the UK. In the UK, gas leaves the transmission system and enters the UK's four gas distribution networks where pressure is reduced for public use. National Grid Ventures (NGV) is separate from National Grid's core regulated businesses. NGV develop, operate and invest in energy projects, technologies, and partnerships to help accelerate the development of a clean energy future for consumers across the UK, Europe and the United States.</p> <p><i>(DDC Note - Comment here extracted to Policy PM1)</i></p> <p>Further Advice</p> <p>National Grid is happy to provide advice and guidance to the Council concerning their networks. Please see attached information outlining further guidance on development close to National Grid assets. If we can be of any assistance to you in providing informal comments in confidence during your policy development, please do not hesitate to contact us. To help ensure the continued safe operation of existing sites and equipment and to facilitate future infrastructure investment, National Grid wishes to be involved in the preparation, alteration and review of plans and strategies which may affect their assets. Please remember to consult National Grid on any Development Plan Document (DPD) or site-specific proposals that could affect National Grid's assets.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Not Applicable
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I would also add the following as discussed at the PC last meeting. The website and the online portal have been very difficult to follow, after an hour going through all the 'click here' bits I gave up. I am rather disappointed that a response form could not have been placed in an easy to reach position on the DDC website. Given that some of the first consultations were carried out during the Covid-19 pandemic I am rather surprised about the number of comments you received. However there is more concern with the amount of people that did not have any access to the internet at all, or who were not used to it, and therefore could not make any comments, that the council has received a large enough cross section of the public comments to be fair and transparent
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Introduction
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>1. The format of the consultation and requirement for on line comment is overly complex for the ordinary citizen to comment. Hence this representation being made via PSF rather than on line. Many people would already have given up there comment!</p> <p>2.Representation has already been made with regard to this site by many local residents in the first round of consultation. Despite very considerable opposition from local residents I cannot see any material change in the policy for this site. What is the point of local consultation if residents comments are totally ignored?</p> <p>3.The main objections to use of this site for residential use are numerous:-</p> <p>* The land is Grade 3 agricultural land- this is defined as good/moderate quality agricultural land with moderate limitations. Food security in the UK has been highlighted articularly since the war in Ukraine and has recently been highlighted by none other than th eHead of MI5 as a matter of national security. There is no present justification for th e loss of prime agricultural land.</p> <p>*Although on the OS map the site forms a completion of a development block between Dover Road and Liverpool Road, the topograhly of the siteis such that it forms an important part of the Glen Road valley, on steep ground with areas to the bottom liable to flooding.</p> <p>*The site is devoid of any local services, the nearest being in Woolmer village which is a walk up the steep Grams Road which doe not even have a continuous pavement. The nearest Primary school at Kingsdown is over subscribed. Most of the Local GP surgeries are over subscribed and not taking on new patients. Downs Cof E School may well be within 1200m as the crow flies but more than 1.5miles by road. Note that Castle Community College is now Walmer Beacon.</p> <p>*We would question whether the site is within 1000m of Walmer Station- even as the Crow flies. The site is served by a single track road – Liverpool Rd /Glen Rd which themselves are served off a network of very narrow roads with no or limited footpaths. A walk to the main bus stop at Walmer Village is up the steep Grams Road with only partial footpathing.</p> <ul style="list-style-type: none"> • Almost without doubt all movements to and from this site will be by car – hardly Climate Change Mitigation even with electric cars whose embodied carbon is higher than conventional combustion engines. • Little mention is made of the adjacent Hawkshill Down site which is and important public open space which will be undoubtedly adversely affected by a development at Rays Bottom.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I would be happy to partake in the oral part of the examination to help put across the above reasoning and the feelings of the local community.

The representation has images within the text. The text below is an extract from the detailed representation.</p> <p>I take no issue with the way in which the plan has been developed and its adherence to national planning guidance, land allocations and other strategies relevant to plan development at the current time. However I note that the District Plan mentions 7 Neighbourhood areas and has formed 5 Neighbourhood Fora and makes a statement that communities have been part of the development process. I would ask for information on how Alkham is represented through the Neighbourhood Forum Framework and the consultation process both to develop the Plan thus far and to take it from inception to delivery be provided, as no one locally including the Parish Council Clerk seems to be aware of how Alkham is represented in the consultation process</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Monitoring & Review
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The plan was compliant until the day before the Regulation 19 consultation was authorised Canterbury City Council published their Regulation 18 consultation including significant development adjacent to the authority boundary at Aylesham.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	If this proceeds it makes some of the conditions proposed for SAP24 irrelevant and the reasons for not including proposed development north of Aylesham outdated. There needs to be significant consultation with Canterbury City Council on the future of Aylesham to ensure the provision of employment land, retail etc. in line with a masterplan that provides effective local planning.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	By the time Public Examination takes place, Canterbury's local plan will have progressed to the point that comments need to be updated/

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Site STM010 Policy SAP40 Reg 19 Local Plan (2022)</p> <p>This is additional to the group submission made by residents in The Droveaway, St Margaret's Bay to which I am a signatory.</p> <p>This is the first practical opportunity for me to comment on the draft local plan for this site due to STM010 being removed from allocation in SAP40 Reg 18 by Dover DC before being re-allocated in Reg 19. I live within 30 meters of the site.</p> <p>The DDC 2012 assessment form, which informed the adopted Land Allocation Local Plan 2015, said no to the inclusion of land site SAD28 (the same site as SMT010 in Policy SAP40 of the draft Local Plan to 2040). I largely concur with its findings and quote some of them below along with my comments.</p> <p>(The quotations are from the above mentioned assessment form, obtained by a Freedom Of Information Request, and released for public viewing by DDC Freedom Of Information Office)</p>

From the section entitled "Landscape Impact":

"The site lies within the AONB and close to the Heritage Coast. It abuts National Trust land to the NE. The site is on a crest of a hill and, despite the screening, would be visible from a long distance (Redevelopment of a house adjacent to this, but lower, on The Drove way had to undergo numerous changes before it was considered acceptable) Any development on the site would, therefore, have a highly detrimental impact on the designated landscape."

Comment: Actually the site lies not only in an AONB, but also within the Heritage Coast and a BOA, and several hundred yards from an SSSI and an SAC. The development of 78 and 80 The Drove way, immediately adjoining STM010, included the removal of vast amounts of chalk to allow the two chalet bungalows to sit low enough so that their rooflines did not impinge on the AONB landscape (I was a daily eyewitness to that). It must also be noted that DDC's Regulation 18 draft, as well as documents related to the Local Plan 2015, referred to STM010 as being adjacent to rather than in the AONB—a significant error on DDC's part and one which could be construed as influencing its decisions regarding STM010's eligibility for housing.

From the section entitled: "Biodiversity":

"The site is identified as chalk grassland to the NE(STM09), which is a priority habitat under the Natural Environment and Rural Communities Act 2006 and is a material consideration under PPS 9. That section of the site is not amenable to development. Apart from a small area of scrub to the SW, the rest of the site is arable with some hedging along boundaries. The arable is chalk-based and maybe amenable to reversion to chalk grassland with appropriate management.

The site could provide foraging and flight lines for bats. EIA Screen: Essential due to sensitive location Appropriate Assessment: The site is within 300m of the Dover to Kingsdown Cliff SAC and screening would be necessary. There would also be a requirement to contribute to the Thanet Coast Mitigation strategy."

Comment: I concur with the conclusions of the above quotation.

From the section entitled: "Green Infrastructure":

"The site is bounded by footpath ER26 along the SW, the vehicular cul-de-sacs of the Drove way to the NW, Salisbury Road to the SE and by National Trust land to the NE, providing a wide range of recreational walking, together with the biodiversity associated with chalk grassland and its associated hedges and scrub. The ambience of the area is demonstrated by the numbers of visitors to the coastal areas and the levels of usage of paths, both public and permissive. The site is within the 'restore and conserve' area of the GI network, reflecting the real opportunities for GI. Development would harm the existing GI and the opportunities for enhancement."

Comment: I concur with the conclusions of the above quotation.

From the section entitled "Proximity to Road Network"

"The two roads that lead to the site appear to be unadopted and not well maintained. There is no access onto the site. The site is located in the area between Salisbury Road and The Drove way. Salisbury Road is a single track unadopted road and there are no footways along its length. The Drove way is also a single track road but is adopted. However, the road already serves a large number of dwellings and there are no footways beyond the junction with Salisbury Road. Pedestrian access to services including the local bus stop is therefore poor and reliance on the car is likely to be high as a consequence."

Comment: The Droveaway is adopted. Cars are parked all along the Droveaway allowing single lane access and nothing more. I concur with the above quotation otherwise.

From the section entitled "Analysis":

"The site is located in the AONB in a highly visible location at the top of a hill on a plateau. Any development would have a detrimental impact on this designation. Access to the site is unsuitable on unadopted roads.

Comment: The Droveaway is adopted but very unsuitable. Otherwise I concur with the above quotation.

From the section entitled: "Consider for inclusion in the Submission Document?"

(Answer) "No"

Comment: I have lived at the end of The Droveaway for thirteen years. The land in question is a thirty seconds walk from my house. The above mentioned council document faithfully reflects the present situation except that now there are even more parked cars on The Droveaway and its size and condition have not changed. That DDC's present Planning Office have allocated STM010 as a building plot, thus radically negating their own past assessment, is understandably shocking.

I can only think that they have failed to consult their own archives —e.g. how could they otherwise have mistakenly identified the land as 'adjoining' the AONB? I also fear that they failed to visit and visibly assess the land, its setting and its accessibility. If they have failed to, it is crucial that they do visit in order to understand the error of their recent judgment. The DDC Planning Office must be made to understand that the construction of at least ten 'executive' houses on the highest point of our local AONB, no matter what attempts are made to screen, disguise, or 'landscape', can in no way be construed as a beauty enhancement or a road improvement. It would be unmistakably an insult to the designation AONB and the Heritage Coast, a dangerous precedent for future assaults on our protected environments, and a further deterioration of existing road difficulties.

I find the inclusion of Site SMT010 in policy SAP40 of the DDC Local Plan to be, as a decision, unsound, not justified, inconsistent with National Policy, and not legally compliant, and therefore I object strongly to its inclusion in the proposed Local Plan.

Thank you for the opportunity to submit my opinion.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The removal of STM010 as an allocation from policy SAP40 of the DDC Local Plan for the reasons given above

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The latest Authority Monitoring Report dated 2020/21 states that Dover District Council is in the process of agreeing a Statement of Common Ground with Canterbury City Council and Thanet District Council. It is not clear that these have been agreed. In the recent consultations for this new plan, I was informed by Dover District Council officers that they had not known of the 2 very large developments on the borders of Aylesham ie in Womenswold and Adisham by Canterbury City Council. Together with DDC's land allocation plans his would create a continuous large housing area - effectively a new town eventually three or four bigger than Sandwich but without anything like the facilities. There has evidently been a lack of discussion, consultation and collaboration between DDC and CCC. This forms a major part of DDCs plan and so it is obvious that overall the plan cannot be sound. The late removal of a few hundred houses from DDC's plan shows a late attempt to adapt to CCC's plans but that is not sufficient. There needs to be joint planning and joint consultation rather than fragmentation between 2 local authorities.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Section 1
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The NPPF Section 2 requires development to be sustainable and to use natural resources prudently. Section 20 requires conservation of the natural and historic environment. Section 73 requires that sites should be well located and supported by the necessary infrastructure. This plan fails in many respects. One of the attractions of Dover District has always been its rural and historic nature. This will be destroyed with the large scale of expansion at Whitfield. The town centre of Dover is already unattractive and semi derelict as a direct result of the existing expansion at Whitfield. It has a very fragmented shopping area, which results in most people preferring to shop in the superstores of Whitfield or the attractive small stores in Canterbury. If no one wishes to visit the town, they miss out on the historic elements, which are currently under promoted. The district is a net exporter of labour, so the need to travel to jobs outside the district is unsustainable in terms of carbon footprint. Unlike Dover town, Whitfield has no rail connection.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Development should be centred on the town of Dover to make it a vibrant and welcoming place. Brownfield sites should be prioritised, rather than taking the easy option of building on high grade arable land, Derelict buildings should be converted into high quality housing in order to turn around the decline of Dover town. In view of the Climate Emergency, housing should only be built with good access to the rail network in order to reduce the carbon footprint.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I have already made these points at the Regulation 18 stage, but they have been ignored

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	My comments relate to 1.46, 2.2, 3.17 and SP2
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am confining my comments to the area in which I live, and make my representation as a concerned citizen who believes the plan is unsound and possibly not legally compliant.</p> <p>- I fail to see how the sustainability report can be adequate. The buildings proposed at the back of St Andrews will interfere with the habitat of significant numbers of bats. This has not been taken into account.</p> <p>-The plan does not meet the stated goal of mitigating climate change (1.46). Building in and around Shepherdswell (and other villages) will result in a large number of additional journeys by car. There are virtually no employment opportunities in Shepherdswell or these areas, and the large majority of journeys will be by car.</p> <p>- The plans fails to address its stated aim of ensuring safe air quality (SP2). The extra buildings in shephedswell will inevitably increase pollution. More particularly, exhaust fumes will increase given that the roads in the village are mostly single track with passing places. There is already much congestion at rush hour times. Extra journeys will make this worse.</p> <p>- Extra houses in Shepherdswell, and the additional traffic that will follow, contradicts the Council's aim to 'Promote sustainable transport initiatives' (1.46 and 2.2). Traffic levels are already such as to make cycling and walking difficult (the roads in and around Shepherdswell are often without pavements. Many school children use Church Hill to walk to and from school / bus stops taking them to school. They compete with cars for space, often having to duck in between parked cars. The road is not safe as things stand. More building resulting in more car journeys would make this worse)</p> <p>- The plan contradicts the council's aim to ensure the health and well being of communities. My reaosning here is as above i.e. Traffic levels are already such as to make cycling and walking difficult (the roads in and around Shepherdswell are often without pavements. Many school children use Church Hill to walk to and from school / bus stops taking them to school. They compete with cars for space, often having to duck</p>

	<p>in between parked cars. The road is not safe as things stand. There are no pavements on this road, and no room for a pavement to be built. More building resulting in more car journeys would make this worse)</p> <p>- I fail to see that the plan meets its objective of 'conserving and enhancing' the district's 'natural environment.' Building behind St. Andrews in Shepherdswell will destroy an outstanding view which stretches presently to the sea.</p> <p>- It does not seem to take into account covenants on the plots of land earmarked for building. For example, I understand the plot of land in Mill Lane, Shepherdswell, on which 10 houses are planned has attached to it a covenant stating that the maximum houses built should be two.</p> <p>- In addition to these objections I am concerned that the District has not provided adequate means for those affected by the plan to express their views. This website has proven unreliable (I had to phone for guidance approx 3.45pm 14 November) and the features on the site enabling comment were not functioning. The site would not register me (I followed the steps and was only registered after phoning for help). I feel these problems will have made it unreasonably difficult for people to contribute their comments.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 2 - Do you consider this part of the Plan sound?	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Not Applicable
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Comments on the Regulation 19 Submission Local Plan</p> <p>A considered approach to the Natural environment has been adequately presented in DM Policy 39 but there is a lack of research and presentation of the current role of the farmland, looking at rural employment food production, and current carbon capture. Farmland forms the greater part of the district's green areas although a photo of arable fields is used to introduce the section there has been no analysis of the impact on the local farming industry if farmland is continued to be developed.</p> <p>Although the district has below-average rainfall and water resources the rainwater is badly managed around Aylesham.</p> <p>The B2046 is a dangerous road with a high number of accidents, Dover district has above-average accident rates. https://www.crashmap.co.uk/Search shows a high number of accidents on the B2046, particularly at the Spinney Lane junction with numerous fatalities and serious injuries recorded along the length of the road. The B2046 is in poor condition with vehicles frequently leaving the road and ending up in our hedgerows and fields. The road surface is folding into ruts increasing its camber to the Canterbury side under the current impact, particularly on the stretch between Aylesham and Adisham junctions.</p> <p>Dover district has below-average job opportunities, we have seen London boroughs buying up batches of the new builds in Aylesham. London currently has over 87,000 empty houses. There are shortages of appointments for doctors dentists, vets and secondary school places. There is a lack of adequate buses and the local shops run low on some food daily. In Aylesham to date, 785 units have been delivered with 575 remaining.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Show a convincing argument for housing needs and employment opportunities in the District , in-depth study of B2046 ,study of flood water from Aylesham Northside development onto road and farmland</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	As local farmers of the land opposite the current new development, we have an understanding of the impact of new developments and how they could be improved to have less of an impact on the rural environment.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Speaking to local residents, time and again, they point to details later in the plan where the effectiveness of policies and the degree to which they are justified (SP or DM) and residents' experience of DDC previous actions are incompatible with the Key Issues listed on page 18, and as such they need to be made more sound.</p> <p>Overarching Vision and Strategic objectives are designed to be, and are, emotionally inspiring. But we note numerous areas where the policies are not compatible with the aspirations described in Vision and Objectives. It is striking how very often the first comment from the public when planning is mentioned, is that the big developers run the LPA, and other LPAs in Kent, because of the strength of the developer lobby and its donations to the party in power and there is little local political backbone to prevent high profit ribbon suburban development overrunning the beautiful district that residents love, causing dangerous gridlock in our compact coastal towns. Prime Minister Sunak's announcement on 5 Dec 2022 about dropping compulsory housebuilding targets, means this Plan's SP3 and DM-H1 are unsound and not compliant with emerging govt policy. We note a prevalent belief among the public that well-meaning young planners are subject to a culture that puts satisfying 'developer partners' above the pleas of the electorate. Before Reg 18 DDC expelled community groups such as the Deal Society and The Dover Society and representatives of level 1 councils from the Local Plan Working Group (raising a question about the compliance with the Localism Act of 2011, and whether the Plan was positively prepared). This is tragic in terms of expectations of local democratic accountability and a dangerous form of disaffection. The public expect any local plan to be implemented by a planning committee, from which any local councillor/ businessman who has any contractual links with developers (or insider, friendly shared-knowledge of plans) must be excluded, there should not be even a sniff of conflict of interest issues.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at	

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC Note <i>The text below is an extract from the original representation which is attached to SDLP1438.</i> Key Issues for Local Plan. P18 Speaking to local residents, time and again, they point to details later in the plan where the effectiveness of policies and the degree to which they are justified (SP or DM) and residents' experience of DDC previous actions are incompatible with the Key Issues listed on page 18, and as such they need to be made more sound.

Overarching Vision and Strategic objectives are designed to be, and are, emotionally inspiring. But we note numerous areas where the policies are not compatible with the aspirations described in Vision and Objectives. It is striking how very often the first comment from the public when planning is mentioned, is that the big developers run the LPA, and other LPAs in Kent, because of the strength of the developer lobby and its donations to the party in power and there is little local political backbone to prevent high profit ribbon suburban development overrunning the beautiful district that residents love, causing dangerous gridlock in our compact coastal towns. Prime Minister Sunak's announcement on 5 Dec 2022 about dropping compulsory housebuilding targets, means this Plan's SP3 and DM-H1 may now be unsound and not compliant with emerging govt policy. We note a prevalent belief among the public that well meaning young planners are subject to a culture that puts satisfying 'developer partners' above the pleas of the electorate. Before Reg 18 DDC expelled community groups such as the Deal Society and The Dover Society and representatives of level 1 councils from the Local Plan Working Group (raising a question about the compliance with the Localism Act of 2011, and whether the Plan was positively prepared). This is tragic in terms of expectations of local democratic accountability and a dangerous form of disaffection.

The public are aware of the Nolan principles which should underpin any local plan to be implemented by a planning committee. This requires any local councillor/ businessman who has any contractual links with developers (or insider, friendly shared-knowledge of plans) to be excluded, as there should not be even a sniff of conflict of interest issues.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Key issues for the Local Plan
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note: Please see detailed representation (attached at 1770) which has been divided against numerous consultation points. The representation has images within the test. The text below is an extract from the detailed representation.</p> <p>3 SECTION 1.46 of the DDC Plan - Key Issues and Objectives</p> <p>3.1 In section 1.46 a number of key issues have been included for the District namely climate change, the move to carbon neutrality, flood management, sustainable development, the Whitfield Urban Expansion, combating the impact of Covid, economic growth, strategic transport growth, sustainable transport initiatives, appropriate infrastructure development, conservation, net gain biodiversity, achieving a balance between conservation and restoration. Wide ranging objectives have been set for each of these targets.</p> <p>I believe that a key issue which has been omitted is the development of a WIRED District to support the business and housing growth required . At the current time broadband within Alkham Parish is insufficient to meet the demands upon it. Any successful growth economy whether urban or rural requires adequate digital infrastructure.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Please see appended report
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I can speak to any of the points raised in the attached document

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Section 1 Overarching Vision
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>One of the attractions of Dover District has always been its rural and historic nature. This will be destroyed with the large scale of expansion at Whitfield. The town centre of Dover is already unattractive and semi derelict as a direct result of the existing expansion at Whitfield. It has a very fragmented shopping area, which results in most people preferring to shop in the superstores of Whitfield or the attractive small stores in Canterbury. If no one wishes to visit the town, they miss out on the historic elements, which are currently under promoted. It needs to be explained how Dover Town can be made vibrant when priority is given to Whitfield Urban Expansion.</p> <p>The district is a net exporter of labour, so the need to travel to jobs outside the district is unsustainable in terms of carbon footprint.</p> <p>It is not protective of the natural environment to build thousands of houses on arable land, especially when there are already 1448 vacant properties in the district. Local food production can only decrease if this is allowed to happen and more and more food has to be brought in from other parts of this country and abroad. We will thereby lose biodiversity and increase pollution and global warming. Given that Dover District is a net exporter of labour the houses should be built where the jobs are.</p> <p>The public right of way network will be affected by development in many areas, so it is incorrect to say that this will be enhanced. A footpath or bridleway is effectively destroyed by being encased in housing developments, since they are no longer attractive to use. These rights of way are free to use and very important in the fight against obesity. I am also concerned that equestrian users are not mentioned in the vision, horse riding being a very important activity, supportive of local businesses and tourism. It is also a healthy activity available to middle aged women and disabled people, who are particularly underrepresented in sports facilities in the district.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	<p>To recognise that overdevelopment at Whitfield will further destroy the town centre.</p> <p>To recognise that it is not sustainable to build houses where there are insufficient employment opportunities.</p>

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	To recognise that productive arable land needs to be protected at all costs. To recognise that to encase a public right of way in a housing development effectively destroys it. To include equestrian use when talking about public rights of way.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	The plan talks about the problem, but its proposals exacerbate it. Opposing voices must be heard.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Overarching Vision
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	The overarching vision is a pipedream. As central government has failed to make any positive contribution at COP27 we are not on track to avoid the worst of climate change and any "mitigation" will be pointless as most of Deal and the lower lying areas will be under water.

<p>possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>“The climate change emergency will have resulted in increased local food production, extensive tree planting, and the adoption of sustainable design and construction methods.” Unsound in the extreme as DDC are allocating land which is needed NOW to grow crops to development. The term sustainable is therefore not understood in this context.</p> <p>Central government have just announced 5/12/22 that the house targets are unrealistic due to a large number of concerned conservatives rebelling. This is because their constituents are fed up with unreasonable house building targets being pushed on them and their communities. It is unacceptable to all, the unsustainable damage that this is doing to our countryside and future ability to grow food and Dover District Council must now use this u-turn to halt these unsound plans.</p> <p>Everyone is annoyed and dismayed at the congestion, pollution, haphazard development and loss of countryside. In the future the very economy that towns like Deal and Sandwich, villages like St Margarets and Kingsdown relies on - tourism, may be destroyed. This is not legally compliant as it is contrary to NPPF 2021 item 11. (b)ii ‘SPs should provide for objectively assessed needs for housing & other uses, . . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole’.</p> <p>Thriving communities:There will be no housing opportunities for young local people as developers have no interest in building affordable homes when they could be making 30% profit.</p> <p>Future homes standard need to be implemented now. There will be a massive retrofit required for Dover District to achieve its climate change aspirations. Most jobs are in Dover due to the port and the town needs to supply the needs of these workers to avoid car journeys from elsewhere and conform with SP1.</p> <p>Rural communities must now be protected and plans to foist a large development on each of them dropped as no proper planning has been put in place in terms of infrastructure. The beauty, charm and community spirit of these settlements must not be destroyed for profit. As the overarching vision states <i>Kent Downs AONB, international, national and locally protected heritage assets, landscapes, wildlife sites, habitats and species will have been protected and enhanced.</i> The LDP seems to be at odds with this vision and is not justified - building on the boundary of the AONB is contrary to NPPF 21.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>In line with the government announcement on 5/12/22 DDC should now re-evaluate the unrealistic target imposed by central government and take time to have a proper plan based on green initiatives, retrofitting existing housing stock with insulation and renewables, renovating existing stock, focussing on Dover which is in dire need of an uplift. The damage that has already been done to communities like Walmer (Station Road) needs to be assessed and mitigated for. Detrimental plans to foist a large development on each of the larger villages need to be dropped as the infrastructure is groaning under the overdevelopment already inflicted on the area.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Overarching vision. Spectacular and Sustainable Environment
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Vision states: From the iconic White Cliffs to the nationally valued chalk downlands of the Kent Downs AONB, international, national and locally protected heritage assets, landscapes, wildlife sites, habitats and species will have been protected and enhanced.</p> <p>I find it very difficult to believe that this will be delivered as it relates to priority habitats and protected and priority species. This view is based on my experience of planning applications to Dover District Council within the past 3 years. It has shown that the avoidance part of the mitigation hierarchy is not used as intended and 'mitigation' is largely seen as the answer to the problem of biodiversity getting in the way of development. Thus with application 20/00419 we are witnessing the removal of habitat for Turtle Doves the UK's fastest declining bird species. Subsequent planning applications 22/01152 and 22/00158 now threaten the mitigation areas that were set set up to compensate for this loss. The same applications will, if passed, see the digging up of 800 of the rare and protected Lizard Orchid. There is nothing in this Local Plan that convinces me that we shall see any meaningful changes to the way the Council approaches development and priority habitats and species.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Avoid allocating sites of high biodiversity value for development.</p> <p>Insist on the mitigation hierarchy being used as intended.</p> <p>Protect priority habitats and protected and priority species from the effects of development.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I wish to participate as I believe that the current planning system is failing wildlife and habitats and that unless changes are forthcoming there will be no chance of the Government halting the decline in species abundance by 2030.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Overarching Vision
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We are supportive of the inclusion of conserving biodiversity and net gain within the last paragraph of the vision: <i>Spectacular and Sustainable Environment</i> . However, examples of how the District will reach net zero carbon, and by when, should be included within the Overarching Vision. To reflect national policies relating to the natural environment, the Vision should seek to enhance the natural environment throughout urban areas, as well as rural areas. Creation, enhancement and retrofitting of high quality green infrastructure will play a key role in establishing urban areas as desirable places to live and work, whilst contributing to the government's commitment to achieve a nature recovery network.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	In addition to the protection and enhancement of habitats (mentioned within the Overarching Vision), we urge the council to include the creation of a coherent ecological network within the vision, to promote increased extent and connectivity of habitats within the District, in line with the Governments 25 Year Environment Plan and the upcoming Environment Bill. Strategic planning of Local Nature Recovery Strategies will be fundamental to informing development and biodiversity net gain delivery and thus should underpin the vision.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP5 - Fort Burgoyne, Dover
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC EDIT: Detailed representation attached to SDLP0447 with figures and maps. Representation reproduced in box 7 below (as originally done by the agent).
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at	1. Introduction 1.1. Following the publication of the Dover District Council Local Plan (Regulation 18 Draft) and the Targeted Call for Sites on the 20th of January 2021, the Land Trust submitted representations in relation to the development of their own appropriate strategy for the possible future use and regeneration of Fort Burgoyne, Fort Burgoyne Road, Guston, Dover, CT15 5LP . These representations are included as Appendix A of this Statement, however, can be summarised as follows:

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- The site at Fort Burgoyne extends across an area of approximately 42 hectares and includes a recreation ground, a substantial area of chalk grassland and the main buildings and immediate surrounding grounds (including the Parade Ground). Fort Burgoyne is also a designated Schedule Monument, confirming that the site is of national importance.

- Fort Burgoyne was built in the 1860s to protect Dover Castle and was used to defend the South Coast of England as one of the “Palmerston Forts” built to defend against invasion. The polygonal system on which the building is built was used to defend and watch from the highest strategic point in Dover. After the First World War, Fort Burgoyne was used a military depot/store for Connaught Barracks before it ceased to be used for military purposes in 2006. In 2014 the Land Trust, a national charity, acquired the site from Homes England and since then has been considering a variety of options for the future development of Fort Burgoyne. This includes the submission of two pre-application enquiries relating to the future use of the site to DDC in July 2019 (DDC Ref: PE/19/00127) and July 2020 (DDC Ref: PE/20/00234), which serve to demonstrate that the Land Trust has a clear commitment to bringing Fort Burgoyne back into use for public benefit at the earliest opportunity.

- DDC’s adopted Core Strategy 2010, recognised the importance of Fort Burgoyne within the criterion vii of “Strategic Allocation” policy CP10 (Former Connaught Barracks Complex), which stated that alongside the allocation for around 500 dwellinghouses, *“the condition of Fort Burgoyne is stabilised, if possible new uses are accommodated, a public access strategy is agreed and a management arrangement is incorporated that secures a sustainable future for the Fort”*. The Dover District Local Plan Regulation 18 Draft appeared to “down-grade” of the Former Connaught Barracks site from a “Strategic Allocation” to a “Non-Strategic Housing Allocation”. The Regulation 18 draft no longer made any specific reference to Fort Burgoyne with no strategic policy objective to deliver the future of the Fort, a Scheduled Monument of national historic interest that is included on the Historic England at risk register.

- The representation therefore sought to raise that the Draft Local Plan needed to provide clarification as to how the regeneration of the two separate elements (being the residential development of Connaught Barracks and the regeneration of Fort Burgoyne) will be delivered to allow for proposals for Fort Burgoyne to be brought forward under a set of key objectives, independent of the Connaught Barracks housing development. It was subsequently suggested within the representation that the Fort’s future is secured through other means within the new Local Plan, either through its own strategic policy in other sections of the plan (such as the Employment and the Local Economy section), or through the re-wording of Site GUS002 or through other Development Management policies.

- Finally, given that, in a “Strategic Futures” Report (included as part of **Appendix A**) prepared by WYG and commissioned by the Land Trust, it was identified that there is circa 3,000 square metres of floorspace within existing buildings at Fort Burgoyne that would be potentially suitable for a wide variety of uses. It was also suggested that in order to secure a long-term future use for Fort Burgoyne and secure its regeneration, it would be wholly appropriate for it to be allocated within Strategic Policy 9 for business and employment purposes, in order for more flexibility to be given to the types of uses that might be permissible at the site.

1.2. Dover District Council (DDC) has subsequently published the Regulation 19 Submission of the Dover District Council Local Plan which sets out the vision, strategic objectives and overarching development strategy for future growth in the district over the period to 2040. The Land Trust have therefore instructed Bloomfields Chartered Town Planners to prepare further representations in relation to the Regulation 19 submission and the regeneration and future use of the Scheduled Monument, Fort Burgoyne.

2. Regulation 19 Submission of the Dover District Council Local Plan

2.1. It is welcomed that the aforementioned representations have been taken into account within the Regulation 19 Submission of the Dover District Council Local Plan.

SAP5 - Fort Burgoyne, Dover

2.2. In particular, the Trust is pleased to see the inclusion of Fort Burgoyne for Mixed Employment Use in table 4.1 and a positive site-specific policy to support site regeneration at Fort Burgoyne within Chapter 4: Housing and Employment Site Allocations at Strategic Allocation Policy SAP5 which states the following:

Figure 1: SAP 5- Fort Burgoyne, Dover as of Regulation 19 Submission, DDC Local Plan

2.3. The Land Trust also notes the pre-amble to Policy SAP5 which, at 4.109, recognises that Fort Burgoyne has the potential to accommodate new uses, provided that they are compatible with its status as a scheduled monument. The Trust continues to explore suitable uses for the reuse of the Fort, as evidenced by the grant of planning permission 21/01000 on the 7th July 2022 for the change of use of 4no. casemates to Use Class E with associated ancillary works.

2.4. The Land Trust remains committed to attracting uses for the Fort that will fit in with the long-term sustainable vision for investment in its re-use, as required by the preamble to Policy SAP5. The uses being explored, as evidenced in the previous Regulation 18 representations,

are all being considered with the aim of supporting local business growth and ensuring at the same time that any mixture of uses at the site are compatible in respect of access, servicing, general amenity and crucially with the aims of conserving the Scheduled Monument.

2.5. While the inclusion of this policy is largely supported, The Trust has a number of comments in respect of the criteria:

2.6. Criterion h sets out that a Surface Water Management strategy should be produced for the site. The Trust recognises the importance of surface water management; however, it is highlighted that the Fort already benefits from an existing surface water drainage system which was built in the 1860s as part of the construction of the site. This system has always discharged directly to the ditch of the Fort where it soaks into the ground.

2.7. Given the Scheduled Ancient Monument status of the site, establishing an alternative strategy for managing surface water may not be practical and could result in harm. As such it is suggested that this criterion should be removed.

2.8. Notwithstanding this, where relevant, any future planning applications for uses or development at the Fort can demonstrate if required how it would be compatible with the existing surface water drainage system and not require any alternative arrangements for its disposal.

2.9. In respect of criterion j which suggests that *“development within the boundary of Fort Burgoyne which would have a detrimental impact on the heritage significance, setting, views, biodiversity, character of coherence of the components and elements of the complex will not be permitted”*.

2.10. While the Trust acknowledges the need to avoid development which will have a detrimental impact on the range of criteria identified in this policy, any development within Fort Burgoyne would be restricted by the requirement for Scheduled Monument Consent approved by Historic England which is considered to negate the need for this criterion. Draft Local Plan policies in respect of landscape (NE2), ecological (SP13) and historic environment (HE1, SP15) further negate the need for this criterion.

2.11. It is therefore respectfully suggested that criteria h and j are removed from policy SAP 5.

Chapter 2 - Vision and Objectives

2.12. Chapter 2 sets out the overarching vision for Dover District, including that *“through careful stewardship of its world class landscapes, thriving natural environments and wealth of historic sites, Dover District will be a destination of choice for people of all ages to make their home, for businesses to invest in and for visitors to explore and experience.”*

2.13. It is appreciated that the vision highlights the *“Sensitive restoration of elements of its rich built heritage, will enhance the attractiveness of the town, while improved connections to its seafront will have been delivered by high quality design and investment in place making.”* Together with the strategic objective (echoed in Strategic Policy 15) to conserve and enhance heritage assets in the district *“in a manner appropriate to their significance, recognising their intrinsic value as a finite resource as well as their contribution to the character of the District and the positive role they can play in the regeneration of the District.”*

2.14. The Trust also welcomes the identification of Fort Burgoyne on the Local Plan key diagram (Figure 2 below) alongside other Regeneration Sites covered by policy SP6 as set out further over the page.

Figure 2: Figure 2.1, Local Plan Key Diagram

Chapter 3 - Strategic Policies

2.15. Chapter 3 sets out the districts strategic policies to achieve the aforementioned strategic objectives.

SP6 Economic Growth

2.16. Strategic Policy 6 seeks to grow and diversify the Dover District economy by providing additional employment floorspace through the regeneration of brownfield sites in key locations in the district, such as Fort Burgoyne, to deliver flexible employment uses, achieve a higher level of job growth, and help provide additional flexibility and choice to the market over the Plan period.

Figure 3: SP6- Economic Growth, Dover as of Regulation 19 Submission, DDC Local Plan

2.17. The Trust welcomes the inclusion of Fort Burgoyne at criterion 2 of policy SP6 as site where regeneration for a mix of uses to secure their future will be supported by Dover District Council.

2.18. It is noted that paragraph 3.117 sets out that no floorspace allowance has been included for Fort Burgoyne (and other sites allocated under criterion 2) as they are *“brownfield sites allocated for regeneration, and the mix of development and floorspace requirements will need to be determined through the planning application process in accordance with the policies in the Local Plan.”*

2.19. Given the complexities of the site we support this position but anticipate that employment floorspace will amount to circa 3,000 sqm.

Chapter 11 - The Natural Environment

Policy NE1 Biodiversity Net Gain

2.20. The Trust agrees with the requirements of Natural Environment Policy 1 for development proposals to provide a minimum of 10% biodiversity net gain above the ecological baseline within the development boundary. And notes criterion (a) which states that where it can be demonstrated that ecologically meaningful biodiversity net gain cannot be achieved within the site boundary, the Council will consider off-site alternatives in line with the mitigation hierarchy approach.

2.21. Given that a large portion of the 42 hectares at Fort Burgoyne has the potential to provide for significant biodiversity offering, in responding to this consultation The Trust wishes to record interest in working with the Council in developing its Dover District Biodiversity Net Gain Strategy with a view to Coombe Hole providing opportunity for off-site net gain whilst maximising the value of this Local Wildlife Site.

Figure 4: NE1- Biodiversity Net Gain, Dover as of Regulation 19 Submission, DDC Local Plan

2.22. In a similar vein to the BNG potential at Fort Burgoyne, the Land Trust has extensive experience of working with developers to create and provide in perpetuity management of Suitable Alternative Natural Greenspace (SANG), areas of greenspace that are of a quality and type that are suitable to divert recreational activities associated with new residential development away from protected sites (such as Special Protection Areas or Special Areas of Conservation).

2.23. In noting the requirement of Draft Policy SAP1(I) (Whitfield Urban Expansion) which requires a need for SANG to mitigate potential impacts upon the Lydden and Temple Ewell SAC, the Trust wishes to express interest in discussions with the Council and/or the developers of this site with a potential view to assisting them with meeting the policy requirements.

3. Summary

3.1. The overall objective of the Trust remains to seek to deliver a strong, sustainable future for the Fort, that secures its long-term status as a nationally and locally important historic site that will make a vital contribution to the district. The Land Trust supports the Regulation 19 Submission Version of the Dover District Local Plan and welcomes the inclusion of Fort Burgoyne as a strategic allocation site for regeneration subject to the comments set out in this representation.

4. Appendices

Appendix A- Representations on the Regulation 18 Draft Dover District Local Plan 2021 and Targeted Call for Sites

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Vision and Objectives
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Lee Evans On behalf of Mr and Mrs Tobin. Full Representation attached to SDLP1411. This document has been split across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1411.)</p> <p>The Landowner generally supports the Overarching Vision for the District in providing "outstanding opportunities for sustainable living", as outlined in the Regulation 19 draft. The Plan aspires to position Dover District as a destination of choice for people to make their home, achieved "...through careful stewardship of its world class landscapes, thriving natural environments and wealth of historic sites". These high level and aspirational principles which inform the direction of the Plan are supported, notwithstanding detailed comments on the policies contained within.</p> <p>3.9 The Vision goes on to outline aspirations for 'Vibrant Communities', which emphasises how "new developments will blend seamlessly with existing townscapes to embody the best of local distinctiveness and will have created places that are well-designed and well-built. Built to local design codes, they will respect the spectacular natural environments and rich heritage of the District achieves significant progress to becoming net zero carbon." In a similar manner, this level of ambition for the Plan is supported as an overall vision and related set of objectives, subject to the following detailed comments below. It is considered that the objectives are appropriate in supporting the implementation of the Vision over the plan period up to 2040.</p>

	3.11 The objectives themselves are reflected across the strategic policies as proposed, albeit with some amendment proposed to ensure the sound and effective implementation of such namely relating to the more confident delivery of housing across identified available, suitable, and achievable sites. This is most salient to the Landowner's interests with reference to the SAP55 – Woodnesborough Small Housing Sites which is – at present – not considered to have been positively prepared, and is considered unsound in its current iteration. Amendment is proposed herein to render the policy sound, specifically identified in Section 4 of this response.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><i>DDC Note The text below is an extract from the original representation which is attached to SDLP1438.</i></p> <p>Overarching Vision and Strategic objectives are designed to be, and are, emotionally inspiring. But we note numerous areas where the policies are not compatible with the aspirations described in Vision and Objectives. It is striking how very often the first comment from the public when planning is mentioned, is that the big developers run the LPA, and other LPAs in Kent, because of the strength of the developer lobby and its donations to the party in power and there is little local political backbone to prevent high profit ribbon suburban development overrunning the beautiful district that residents love, causing dangerous gridlock in our compact coastal towns. Prime Minister Sunak's announcement on 5 Dec 2022 about dropping compulsory housebuilding targets, means this Plan's SP3 and DM-H1 may now be unsound and not compliant with emerging govt policy. We note a prevalent belief among the public that well meaning young planners are subject to a culture that puts satisfying 'developer partners' above the pleas of the electorate. Before Reg 18 DDC expelled community groups such as the Deal Society and The Dover Society and representatives of level 1 councils from the Local Plan Working Group (raising a question about the compliance with the Localism Act of 2011, and whether the Plan was positively prepared). This is tragic in terms of expectations of local democratic accountability and a dangerous form of disaffection.</p> <p>The public are aware of the Nolan principles which should underpin any local plan to be implemented by a planning committee. This requires any local councillor/ businessman who has any contractual links with developers (or insider, friendly shared-knowledge of plans) to be excluded, as there should not be even a sniff of conflict of interest issues.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? (DDC Note - Text Extracted from Document sent from Nicole Burnett on Behalf of Dean Lewis Estates. Representation has been split across relevant areas of the Local Plan. Attachments can be found under reference SDLP1254.) Vision and Objectives 2.1.1 The new Local Plan once adopted will replace the Core Strategy 2010 and the Land Allocations Plan 2015, and will set out the vision strategic objectives and overarching development strategy for growth in the district over the period up to 2040. 2.1.2 DLE believe it is fundamental that the new Local Plan is aspirational, and growth orientated whilst also capable of being delivered over the plan period. The Overarching Vision notes that "Dover District will be a destination of choice for people of all ages to make their home, for businesses to invest and for visitors to explore and experience." Whilst DLE agree and support this vision, it is critical that the policies contained within the Local Plan enable sufficient growth in the right locations to be able to achieve this. 2.1.3 The Local Plan sets out a series of Strategic Objectives to support the overall vision for Dover District up to 2040. DLE are supportive of the strategic objectives particularly those under the sub heading 'Vibrant Communities', which seek to provide a greater choice of high quality housing to meet the needs of the district and address affordability issues. DLE agree that the focus of new development should be accessible and sustainable locations which can utilise existing infrastructure, facilities and services.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	DDC Note - Representation added by applicant directly to objective as well as via email - email includes Vision and Objectives and is attached. Rep also connected to rep SDLP874) Vision and objectives (overarching vision) The central aims set out in Chapter 2 - 'Vision and objectives (Overarching vision)' misses both the main housing challenges this part of south east England faces and misses the huge opportunity to revitalise the town of Dover itself. Taken overall, the plans for new housing in the whole plan show a depressing and unsustainable reliance on building on greenfield and agricultural land. And the housing mix proposed indicates a large part of this new housing will be three / four or more bedroom large houses. Section 7.3 indicates that the district plan seeks an overall housing mix of "12.2% from one bedroom, 20.4% from two bedrooms, 35.2% from three bedrooms, and 32.2% four or more bedroom dwellings". This mix feels very unsound - and simply does not meet the current or future housing challenges we face, especially in southern England. The proposed mix will

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

inhibit the sustainable and effective growth of housing needed in the future. However - south east England faces a massive housing crisis. This manifests itself in a dire shortage of decent and affordable rental property. And a related shortage of affordable 'starter' flats and homes for young people. Yet staring Dover District Council in the face is the opportunity to revitalise the town of Dover itself. Dover is potentially a very fine town with a remarkable history. Sadly - for a number of reasons - much of the town is neglected and in urgent need of investment and growth. The image and reputation of the town has suffered as a result of this neglect. Indeed, the future prosperity of the wider district is held back by the decline of the town. The local district plan is a huge opportunity to grab hold of this long term failure and rebuild and renovate this key historic town. Key steps should include: building affordable flats and homes for purchase and rent on both brown field sites and on derelict sites much of the older housing may be suitable for 'retrofitting' with modern insulation standards and other improvements looking to increase the number of flats above retail premises where a retail premises is simply now unviable - appropriate and sensitive redevelopment should be enabled to turn the former retail unit into good quality housing existing car park provision should be reviewed to see if any could be used to build new housing Such steps would meet the actual housing needs of local people as well as improving both the visual appearance and the image of the town. Other benefits would include bringing life back into the economic life of existing high street which otherwise faces continuing decline. The superb asset of the highspeed rail link into Dover Priory remains a massive - but largely unrealised - opportunity to rejuvenate Dover Dover District Council should focus like a laser beam on the rejuvenation and improvement of the town of Dover. Plans to build considerable new housing on green field agricultural land on the edge of rural villages are largely not sustainable and fail to meet both current urgent needs and challenges of the future. I highlight two proposed sites in my village.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

OVERARCHING VISION & OBJECTIVES

3.5 The Overarching Vision for the District in providing “outstanding opportunities for sustainable living” is supported as a high level principle underpinning the aspirations of the Plan.

3.6 The ambition of the Plan to position the District as a destination of choice for people to make their home, achieved “...through careful stewardship of its world class landscapes, thriving natural environments and wealth of historic sites” is also supported as a matter of principle as a reasonable basis for the Plan.

3.7 The Vision goes on to outline aspirations for ‘Vibrant Communities’, which emphasises how “new developments will blend seamlessly with existing townscapes to embody the best of local distinctiveness and will have created places that are well-designed and well-built. Built to local design codes, they will respect the spectacular natural environments and rich heritage of the District achieves significant progress to becoming net zero carbon”.

3.8 It further underscores how the Plan should seek to provide greater choice of high-quality housing to meet the needs of Dover District’s growing population and changing demographic, and address affordability issues, as well as highlighting the focus of new development at accessible and sustainable locations which can utilise existing infrastructure, facilities and services, and to ensure development contributes to the sustainability of local communities and services. This objective is consistent with the thrust of the National Planning Policy Framework in its pursuit of sustainable development. Again, this is supported overall at the District-wide level as an appropriate and realistic vision for Dover over the Plan period.

3.10 Whilst commentary is not provided for each of these objectives, due regard has been had to their content.

3.11 It is considered that the objectives are generally appropriate in supporting the implementation of the Vision, and that the objectives themselves are adequately reflected across the strategic policies as proposed, albeit subject to any refinement that may follow during the Examination process and later ‘Main Modifications’.

3.12 In this regard the Promoter supports to the overarching Vision for Elvington & Eythorne.

3.13 In accordance with the relevant Local Plan policies and development of the site and wider area would provide:

- A wide mix of housing typologies including affordable housing, housing for the older demographic and plots of land to contribute to meeting the demand for self and custom build housing.

- Design Codes will be developed to guide and ensure the delivery of beautiful, eco friendly homes that are affordable for local people;

- Formal and informal open spaces for leisure and recreation, including play areas, sports fields, allotments and community orchards, or enhancements to nearby facilities, to meet the needs of the development

Open spaces will be multi-functional contributing to the wider public networks with sustainable drainage. All new and existing residents will have access to upgraded routes for walkers and cyclists. This sustainable development will improve connections between and enhancements to existing habitats; provide safe routes for wildlife, protecting and enhancing wildlife assets

- Sustainable access arrangements will be in place from Adelaide Road with associated improvements and traffic calming measures to Adelaide Road and where necessary improvements to the Public Right of Way network to increase connectivity in the area.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	My comments relate to 1.46, 2.2, 3.17 and SP2
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am confining my comments to the area in which I live, and make my representation as a concerned citizen who believes the plan is unsound and possibly not legally compliant.</p> <ul style="list-style-type: none"> - I fail to see how the sustainability report can be adequate. The buildings proposed at the back of St Andrews will interfere with the habitat of significant numbers of bats. This has not been taken into account. - The plan does not meet the stated goal of mitigating climate change (1.46). Building in and around Shepherdswell (and other villages) will result in a large number of additional journeys by car. There are virtually no employment opportunities in Shepherdswell or these areas, and the large majority of journeys will be by car. - The plans fails to address its stated aim of ensuring safe air quality (SP2). The extra buildings in shephedswell will inevitably increase pollution. More particularly, exhaust fumes will increase given that the roads in the village are mostly single track with passing places. There is already much congestion at rush hour times. Extra journeys will make this worse. - Extra houses in Shepherdswell, and the additional traffic that will follow, contradicts the Council's aim to 'Promote sustainable transport initiatives' (1.46 and 2.2). Traffic levels are already such as to make cycling and walking difficult (the roads in and around Shepherdswell are often without pavements. Many school children use Church Hill to walk to and from school / bus stops taking them to school. They compete with cars for space, often having to duck in between parked cars. The road is not safe as things stand. More building resulting in more car journeys would make this worse)

- The plan contradicts the council's aim to ensure the health and well being of communities. My reasoning here is as above i.e. Traffic levels are already such as to make cycling and walking difficult (the roads in and around Shepherdswell are often without pavements. Many school children use Church Hill to walk to and from school / bus stops taking them to school. They compete with cars for space, often having to duck in between parked cars. The road is not safe as things stand. There are no pavements on this road, and no room for a pavement to be built. More building resulting in more car journeys would make this worse)

- I fail to see that the plan meets its objective of 'conserving and enhancing' the district's 'natural environment.' Building behind St. Andrews in Shepherdswell will destroy an outstanding view which stretches presently to the sea.

- It does not seem to take into account covenants on the plots of land earmarked for building. For example, I understand the plot of land in Mill Lane, Shepherdswell, on which 10 houses are planned has attached to it a covenant stating that the maximum houses built should be two.

- In addition to these objections I am concerned that the District has not provided adequate means for those affected by the plan to express their views. This website has proven unreliable (I had to phone for guidance approx 3.45pm 14 November) and the features on the site enabling comment were not functioning. The site would not register me (I followed the steps and was only registered after phoning for help). I feel these problems will have made it unreasonably difficult for people to contribute their comments.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Strategic Objectives 2.2
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The building of nearly 11,000 new homes in the Dover District is unsound. The embedded carbon in each new home is around 56 tonnes. Rather than build new, existing stock should be retrofitted with renewables and properly insulated. I would suggest that building new rather than renovating existing is contrary to NPPF Section 2 8c <i>adapting to climate change including moving to a low carbon economy</i> . This would go a long way towards achieving the climate commitments of DDC (SP1) and get residents out of fuel poverty. New development should insist on the highest Future Homes Standards now to avoid expensive retrofitting of homes. Flooding is a real concern in an area which is coastal and has already seen pressure to build on its flood plains and low lying land, particularly around Deal.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Retrofit where possible. Future Homes Standard now. Protect all flood risk areas.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Strategic Objectives
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><i>Spectacular and Sustainable Envriomet</i> - We support the Council's commitment to reduce carbon emissions and the mention of the climate emergency. The climate crisis should be a priority, and tackling it should include more than making sure "new development is designed to adapt to, and mitigate, the effects of climate change". We encourage the council to use nature based solutions to help tackle the climate emergency, such as restoring coastal wetlands, allowing degraded habitats to recover and switching to restorative agricultural practices. This can help reduce climate change by capturing carbon dioxide from the air and sequestering it in plants, soils, and sediments.</p> <p>Nature based solutions should also be a priority for flood management, such as wilding river catchments and restoring wetlands to provide multiple benefits in terms of reduced flood risk and benefits for biodiversity.</p> <p>We support the inclusion of increasing habitat connectivity in this objective. We encourage the council to include the protection and enhancement of locally important habitats, such as Local Wildlife Sites, and rare and threatened species too (not just protected species).</p> <p>Prosperous Economy - We encourage the inclusion of sustainable tourism, to protect the environment, natural resources, and wildlife and by creating inclusive and accessible tourist opportunities.</p> <p><i>Vibrant Communities</i> - Daily contact with nature is linked to better health, reduced levels of chronic stress, reductions in obesity and improved concentration. The provision of high quality green infrastructure and access to nature should be at the heart of creating vibrant communities.</p> <p><i>Thriving Places</i> - We support the inclusion of improving the health and wellbeing of residents, however this should be linked with nature and how there are a multitude of health and wellbeing benefits with daily contact with nature.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Prioritising nature based solutions to help halt the climate crisis aligns with the Government's Net Zero Strategy. For example, low carbon farming practices such as switching to restorative agricultural practices, which includes incorporating field buffers, no-till to reduce soil disturbance, diversified crop rotations, green manures and restrict the use of pesticide, is encouraged in the 'Key Commitments' of the Net Zero Strategy. It will also help achieve reaching net zero and the goals of the 25 Year Environment Plan.</p> <p>Policy SP1 – Planning for Climate Change solely focuses on how new developments will tackle climate change. In order to effectively deliver on its commitments to tackle the nature and climate crisis it is essential that the Plan addresses both the need to reduce Dover's use of fossil fuels, as well as in/offsetting residual carbon emissions. A policy requirement and target for in/offsetting residual carbon should be included for Policy SP1 in order to ensure that this Plan contributes and aligns with its own target of "becoming a net zero carbon emitter by 2030 at the latest" as mentioned in paragraph 3.7 of the Local Plan Regulation 19 Submission. Appropriate locations for the inseting and offsetting of residual carbon should be informed by a detailed Local Nature Recovery Strategy, ensuring that such schemes benefit biodiversity.</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Strategic Objectives
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><i>Spectacular and Sustainable Environment</i> - We support the Council's commitment to reduce carbon emissions and the mention of the climate emergency. The climate crisis should be a priority, and tackling it should include more than making sure "new development is designed to adapt to, and mitigate, the effects of climate change". We encourage the council to use nature based solutions to help tackle the climate emergency, such as restoring coastal wetlands, allowing degraded habitats to recover and switching to restorative agricultural practices. This can help reduce climate change by capturing carbon dioxide from the air and sequestering it in plants, soils, and sediments.</p> <p>Nature based solutions should also be a priority for flood management, such as wilding river catchments and restoring wetlands to provide multiple benefits in terms of reduced flood risk and benefits for biodiversity.</p> <p>We support the inclusion of increasing habitat connectivity in this objective. We encourage the council to include the protection and enhancement of locally important habitats, such as Local Wildlife Sites, and rare and threatened species too (not just protected species).</p> <p><i>Prosperous Economy</i> - We encourage the inclusion of sustainable tourism, to protect the environment, natural resources, and wildlife and by creating inclusive and accessible tourist opportunities.</p> <p><i>Vibrant Communities</i> - Daily contact with nature is linked to better health, reduced levels of chronic stress, reductions in obesity and improved concentration. The provision of high quality green infrastructure and access to nature should be at the heart of creating vibrant communities.</p> <p><i>Thriving Places</i> - We support the inclusion of improving the health and wellbeing of residents, however this should be linked with nature and how there are a multitude of health and wellbeing benefits with daily contact with nature.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>Prioritising nature based solutions to help halt the climate crisis aligns with the Government's Net Zero Strategy. For example, low carbon farming practices such as switching to restorative agricultural practices, which includes incorporating field buffers, no-till to reduce soil disturbance, diversified crop rotations, green manures and restrict the use of pesticide, is encouraged in the 'Key Commitments' of the Net Zero Strategy. It will also help achieve reaching net zero and the goals of the 25 Year Environment Plan.</p> <p>Policy SP1 – Planning for Climate Change solely focuses on how new developments will tackle climate change. In order to effectively deliver on its commitments to tackle the nature and climate crisis it is essential that the Plan addresses both the need to reduce Dover's use of fossil fuels, as well as in/offsetting residual carbon emissions. A policy requirement and target for in/offsetting residual carbon should be included for Policy SP1 in order to ensure that this Plan contributes and aligns with its own target of "becoming a net zero carbon emitter by 2030 at the latest" as mentioned in paragraph 3.7 of the Local Plan Regulation 19 Submission. Appropriate locations for the insetting and offsetting of residual carbon should be informed by a detailed Local Nature Recovery Strategy, ensuring that such schemes benefit biodiversity.</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We have compiled a 25 page submission on all SPs, most DMs and some SAPs. And updated it on 6 Dec 2022 in the light of the Mr Sunak's dropping of compulsory housebuilding targets and empowerment of LPAs. We are uploading it and sending our whole Word document to DDC localplan@dover.gov.uk to go to the Planning Inspectorate. to make sure it is included.</p> <p>We have grave doubts that the SPs, SAPs, and DM policies will meet the aspirations, vision and objectives announced, and that they will deliver a bright future of <u>equitably distributed</u> prosperity for the district. Throughout the Reg 19 Local Plan there are references to the secretive 'pre-application process' which excludes the public, We submit that this process can exacerbate problems referred to in the 2020 report on England's planning processes from Transparency Intl UK; 'Permission Accomplished : Assessing corruption risks in local government planning'; problems TIUK recommend resolving with 'increased transparency, tighter rules, and strengthened oversight'.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant	We have made precise suggestions in our word document.

and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

New build houses are generally seen as having a life span of 100 years. I am concerned that many houses being built in the area are planned to go on flood plains, and are not designed so as to have a longer life on view of projections of sea level rises. Builders are also permitted by DDC to put up too many houses and this is making a negative impact on air quality (too much traffic). Building to existing specifications and not having renewable accessories installed as part of the design is a lost opportunity and will not give buyers a "level playing field" when it comes to energy bills. Thus poorer people will not be benefitting as will richer buyers. The area needs new well designed social housing, which we are simply not seeing at all.

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1. Introduction

1.1. Following the publication of the Dover District Council Local Plan (Regulation 18 Draft) and the Targeted Call for Sites on the 20th of January 2021, the Land Trust submitted representations in relation to the development of their own appropriate strategy for the possible future use and regeneration of **Fort Burgoyne, Fort Burgoyne Road, Guston, Dover, CT15 5LP**. These representations are included as **Appendix A** of this Statement, however, can be summarised as follows:

- The site at Fort Burgoyne extends across an area of approximately 42 hectares and includes a recreation ground, a substantial area of chalk grassland and the main buildings and immediate surrounding grounds (including the Parade Ground). Fort Burgoyne is also a designated Schedule Monument, confirming that the site is of national importance.

- Fort Burgoyne was built in the 1860s to protect Dover Castle and was used to defend the South Coast of England as one of the “Palmerston Forts” built to defend against invasion. The polygonal system on which the building is built was used to defend and watch from the highest strategic point in Dover. After the First World War, Fort Burgoyne was used a military depot/store for Connaught Barracks before it ceased to be used for military purposes in 2006. In 2014 the Land Trust, a national charity, acquired the site from Homes England and since then has been considering a variety of options for the future development of Fort Burgoyne. This includes the submission of two pre-application enquiries relating to the future use of the site to DDC in July 2019 (DDC Ref: PE/19/00127) and July 2020 (DDC Ref: PE/20/00234), which serve to demonstrate that the Land Trust has a clear commitment to bringing Fort Burgoyne back into use for public benefit at the earliest opportunity.

- DDC’s adopted Core Strategy 2010, recognised the importance of Fort Burgoyne within the criterion vii of “Strategic Allocation” policy CP10 (Former Connaught Barracks Complex), which stated that alongside the allocation for around 500 dwellinghouses, *“the condition of Fort Burgoyne is stabilised, if possible new uses are accommodated, a public access strategy is agreed and a management arrangement is incorporated that secures a sustainable future for the Fort”*. The Dover District Local Plan Regulation 18 Draft appeared to “down-grade” of the Former Connaught Barracks site from a “Strategic Allocation” to a “Non-Strategic Housing Allocation”. The Regulation 18 draft no longer made any specific reference to Fort Burgoyne with no strategic policy objective to deliver the future of the Fort, a Scheduled Monument of national historic interest that is included on the Historic England at risk register.

- The representation therefore sought to raise that the Draft Local Plan needed to provide clarification as to how the regeneration of the two separate elements (being the residential development of Connaught Barracks and the regeneration of Fort Burgoyne) will be delivered to allow for proposals for Fort Burgoyne to be brought forward under a set of key objectives, independent of the Connaught Barracks housing development. It was subsequently suggested within the representation that the Fort’s future is secured through other means within the new Local Plan, either through its own strategic policy in other sections of the plan (such as the Employment and the Local Economy section), or through the re-wording of Site GUS002 or through other Development Management policies.

- Finally, given that, in a “Strategic Futures” Report (included as part of **Appendix A**) prepared by WYG and commissioned by the Land Trust, it was identified that there is circa 3,000 square metres of floorspace within existing buildings at Fort Burgoyne that would be potentially suitable for a wide variety of uses. It was also suggested that in order to secure a long-term future use for Fort Burgoyne and secure its regeneration, it would be wholly appropriate for it to be allocated within Strategic Policy 9 for business and employment purposes, in order for more flexibility to be given to the types of uses that might be permissible at the site.

1.2. Dover District Council (DDC) has subsequently published the Regulation 19 Submission of the Dover District Council Local Plan which sets out the vision, strategic objectives and overarching development strategy for future growth in the district over the period to 2040. The Land Trust have therefore instructed Bloomfields Chartered Town Planners to prepare further representations in relation to the Regulation 19 submission and the regeneration and future use of the Scheduled Monument, Fort Burgoyne.

2. Regulation 19 Submission of the Dover District Council Local Plan

2.1. It is welcomed that the aforementioned representations have been taken into account within the Regulation 19 Submission of the Dover District Council Local Plan.

SAP5 - Fort Burgoyne, Dover

2.2. In particular, the Trust is pleased to see the inclusion of Fort Burgoyne for Mixed Employment Use in table 4.1 and a positive site-specific policy to support site regeneration at Fort Burgoyne within Chapter 4: Housing and Employment Site Allocations at Strategic Allocation Policy SAP5 which states the following:

Figure 1: SAP 5- Fort Burgoyne, Dover as of Regulation 19 Submission, DDC Local Plan

2.3. The Land Trust also notes the pre-amble to Policy SAP5 which, at 4.109, recognises that Fort Burgoyne has the potential to accommodate new uses, provided that they are compatible with its status as a scheduled monument. The Trust continues to explore suitable uses for the reuse of the Fort, as evidenced by the grant of planning permission 21/01000 on the 7th July 2022 for the change of use of 4no. casemates to Use Class E with associated ancillary works.

2.4. The Land Trust remains committed to attracting uses for the Fort that will fit in with the long-term sustainable vision for investment in its re-use, as required by the preamble to Policy SAP5. The uses being explored, as evidenced in the previous Regulation 18 representations, are all being considered with the aim of supporting local business growth and ensuring at the same time that any mixture of uses at the site are compatible in respect of access, servicing, general amenity and crucially with the aims of conserving the Scheduled Monument.

2.5. While the inclusion of this policy is largely supported, The Trust has a number of comments in respect of the criteria:

2.6. Criterion h sets out that a Surface Water Management strategy should be produced for the site. The Trust recognises the importance of surface water management; however, it is highlighted that the Fort already benefits from an existing surface water drainage system which was built in the 1860s as part of the construction of the site. This system has always discharged directly to the ditch of the Fort where it soaks into the ground.

2.7. Given the Scheduled Ancient Monument status of the site, establishing an alternative strategy for managing surface water may not be practical and could result in harm. As such it is suggested that this criterion should be removed.

2.8. Notwithstanding this, where relevant, any future planning applications for uses or development at the Fort can demonstrate if required how it would be compatible with the existing surface water drainage system and not require any alternative arrangements for its disposal.

2.9. In respect of criterion j which suggests that *“development within the boundary of Fort Burgoyne which would have a detrimental impact on the heritage significance, setting, views, biodiversity, character of coherence of the components and elements of the complex will not be permitted”*.

2.10. While the Trust acknowledges the need to avoid development which will have a detrimental impact on the range of criteria identified in this policy, any development within Fort Burgoyne would be restricted by the requirement for Scheduled Monument Consent approved by Historic England which is considered to negate the need for this criterion. Draft Local Plan policies in respect of landscape (NE2), ecological (SP13) and historic environment (HE1, SP15) further negate the need for this criterion.

2.11. It is therefore respectfully suggested that criteria h and j are removed from policy SAP 5.

Chapter 2 - Vision and Objectives

2.12. Chapter 2 sets out the overarching vision for Dover District, including that *“through careful stewardship of its world class landscapes, thriving natural environments and wealth of historic sites, Dover District will be a destination of choice for people of all ages to make their home, for businesses to invest in and for visitors to explore and experience.”*

2.13. It is appreciated that the vision highlights the *“Sensitive restoration of elements of its rich built heritage, will enhance the attractiveness of the town, while improved connections to its seafront will have been delivered by high quality design and investment in place making.”* Together with the strategic objective (echoed in Strategic Policy 15) to conserve and enhance heritage assets in the district *“in a manner appropriate to their significance, recognising their intrinsic value as a finite resource as well as their contribution to the character of the District and the positive role they can play in the regeneration of the District.”*

2.14. The Trust also welcomes the identification of Fort Burgoyne on the Local Plan key diagram (Figure 2 below) alongside other Regeneration Sites covered by policy SP6 as set out further over the page.

Figure 2: Figure 2.1, Local Plan Key Diagram

Chapter 3 - Strategic Policies

2.15. Chapter 3 sets out the districts strategic policies to achieve the aforementioned strategic objectives.

SP6 Economic Growth

2.16. Strategic Policy 6 seeks to grow and diversify the Dover District economy by providing additional employment floorspace through the regeneration of brownfield sites in key locations in the district, such as Fort Burgoyne, to deliver flexible employment uses, achieve a higher level of job growth, and help provide additional flexibility and choice to the market over the Plan period.

Figure 3: SP6- Economic Growth, Dover as of Regulation 19 Submission, DDC Local Plan

2.17. The Trust welcomes the inclusion of Fort Burgoyne at criterion 2 of policy SP6 as site where regeneration for a mix of uses to secure their future will be supported by Dover District Council.

2.18. It is noted that paragraph 3.117 sets out that no floorspace allowance has been included for Fort Burgoyne (and other sites allocated under criterion 2) as they are *"brownfield sites allocated for regeneration, and the mix of development and floorspace requirements will need to be determined through the planning application process in accordance with the policies in the Local Plan."*

2.19. Given the complexities of the site we support this position but anticipate that employment floorspace will amount to circa 3,000 sqm.

Chapter 11 - The Natural Environment

Policy NE1 Biodiversity Net Gain

2.20. The Trust agrees with the requirements of Natural Environment Policy 1 for development proposals to provide a minimum of 10% biodiversity net gain above the ecological baseline within the development boundary. And notes criterion (a) which states that where it can be demonstrated that ecologically meaningful biodiversity net gain cannot be achieved within the site boundary, the Council will consider off-site alternatives in line with the mitigation hierarchy approach.

2.21. Given that a large portion of the 42 hectares at Fort Burgoyne has the potential to provide for significant biodiversity offering, in responding to this consultation The Trust wishes to record interest in working with the Council in developing its Dover District Biodiversity Net Gain Strategy with a view to Coombe Hole providing opportunity for off-site net gain whilst maximising the value of this Local Wildlife Site.

Figure 4: NE1- Biodiversity Net Gain, Dover as of Regulation 19 Submission, DDC Local Plan

2.22. In a similar vein to the BNG potential at Fort Burgoyne, the Land Trust has extensive experience of working with developers to create and provide in perpetuity management of Suitable Alternative Natural Greenspace (SANG), areas of greenspace that are of a quality and type that are suitable to divert recreational activities associated with new residential development away from protected sites (such as Special Protection Areas or Special Areas of Conservation).

2.23. In noting the requirement of Draft Policy SAP1(l) (Whitfield Urban Expansion) which requires a need for SANG to mitigate potential impacts upon the Lydden and Temple Ewell SAC, the Trust wishes to express interest in discussions with the Council and/or the developers of this site with a potential view to assisting them with meeting the policy requirements.

3. Summary

3.1. The overall objective of the Trust remains to seek to deliver a strong, sustainable future for the Fort, that secures its long-term status as a nationally and locally important historic site that will make a vital contribution to the district. The Land Trust supports the Regulation 19 Submission Version of the Dover District Local Plan and welcomes the inclusion of Fort Burgoyne as a strategic allocation site for regeneration subject to the comments set out in this representation.

	4. Appendices Appendix A- Representations on the Regulation 18 Draft Dover District Local Plan 2021 and Targeted Call for Sites
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<i>DDC Note The text below is an extract from the original representation which is attached to SDLP1438.</i> Overarching Vision and Strategic objectives are designed to be, and are, emotionally inspiring. But we note numerous areas where the policies are not compatible with the aspirations described in Vision and Objectives. It is striking how very often the first comment from the public when planning is mentioned, is that the big developers run the LPA, and other LPAs in Kent, because of the strength of the developer lobby and its donations to the party in power and there is little local political backbone to prevent high profit ribbon suburban development overrunning the

	<p>beautiful district that residents love, causing dangerous gridlock in our compact coastal towns. Prime Minister Sunak's announcement on 5 Dec 2022 about dropping compulsory housebuilding targets, means this Plan's SP3 and DM-H1 may now be unsound and not compliant with emerging govt policy. We note a prevalent belief among the public that well meaning young planners are subject to a culture that puts satisfying 'developer partners' above the pleas of the electorate. Before Reg 18 DDC expelled community groups such as the Deal Society and The Dover Society and representatives of level 1 councils from the Local Plan Working Group (raising a question about the compliance with the Localism Act of 2011, and whether the Plan was positively prepared). This is tragic in terms of expectations of local democratic accountability and a dangerous form of disaffection.</p> <p>The public are aware of the Nolan principles which should underpin any local plan to be implemented by a planning committee. This requires any local councillor/ businessman who has any contractual links with developers (or insider, friendly shared-knowledge of plans) to be excluded, as there should not be even a sniff of conflict of interest issues.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Key Diagram
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	See below
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	(The rail line from Dover Priory through Kearsney (close to Whitfield Urban development) to Canterbury East and Faversham, the Victoria Line, should be added to graphic page 17, it underpins siting of some large developments.)
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP5 - Fort Burgoyne, Dover
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC EDIT: Detailed representation attached to SDLP0447 with figures and maps. Representation reproduced in box 7 below (as originally done by the agent).
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>1. Introduction</p> <p>1.1. Following the publication of the Dover District Council Local Plan (Regulation 18 Draft) and the Targeted Call for Sites on the 20th of January 2021, the Land Trust submitted representations in relation to the development of their own appropriate strategy for the possible future use and regeneration of Fort Burgoyne, Fort Burgoyne Road, Guston, Dover, CT15 5LP. These representations are included as Appendix A of this Statement, however, can be summarised as follows:</p> <ul style="list-style-type: none"> • The site at Fort Burgoyne extends across an area of approximately 42 hectares and includes a recreation ground, a substantial area of chalk grassland and the main buildings and immediate surrounding grounds (including the Parade Ground). Fort Burgoyne is also a designated Schedule Monument, confirming that the site is of national importance. • Fort Burgoyne was built in the 1860s to protect Dover Castle and was used to defend the South Coast of England as one of the "Palmerston Forts" built to defend against invasion. The polygonal system on which the building is built was used to defend and watch from the highest strategic point in Dover. After the First World War, Fort Burgoyne was used a military depot/store for Connaught Barracks before it ceased to be used for military purposes in 2006. In 2014 the Land Trust, a national charity, acquired the site from Homes England and since then has

been considering a variety of options for the future development of Fort Burgoyne. This includes the submission of two pre-application enquiries relating to the future use of the site to DDC in July 2019 (DDC Ref: PE/19/00127) and July 2020 (DDC Ref: PE/20/00234), which serve to demonstrate that the Land Trust has a clear commitment to bringing Fort Burgoyne back into use for public benefit at the earliest opportunity.

- DDC's adopted Core Strategy 2010, recognised the importance of Fort Burgoyne within the criterion vii of "Strategic Allocation" policy CP10 (Former Connaught Barracks Complex), which stated that alongside the allocation for around 500 dwellinghouses, *"the condition of Fort Burgoyne is stabilised, if possible new uses are accommodated, a public access strategy is agreed and a management arrangement is incorporated that secures a sustainable future for the Fort"*. The Dover District Local Plan Regulation 18 Draft appeared to "down-grade" of the Former Connaught Barracks site from a "Strategic Allocation" to a "Non-Strategic Housing Allocation". The Regulation 18 draft no longer made any specific reference to Fort Burgoyne with no strategic policy objective to deliver the future of the Fort, a Scheduled Monument of national historic interest that is included on the Historic England at risk register.

- The representation therefore sought to raise that the Draft Local Plan needed to provide clarification as to how the regeneration of the two separate elements (being the residential development of Connaught Barracks and the regeneration of Fort Burgoyne) will be delivered to allow for proposals for Fort Burgoyne to be brought forward under a set of key objectives, independent of the Connaught Barracks housing development. It was subsequently suggested within the representation that the Fort's future is secured through other means within the new Local Plan, either through its own strategic policy in other sections of the plan (such as the Employment and the Local Economy section), or through the re-wording of Site GUS002 or through other Development Management policies.

- Finally, given that, in a "Strategic Futures" Report (included as part of **Appendix A**) prepared by WYG and commissioned by the Land Trust, it was identified that there is circa 3,000 square metres of floorspace within existing buildings at Fort Burgoyne that would be potentially suitable for a wide variety of uses. It was also suggested that in order to secure a long-term future use for Fort Burgoyne and secure its regeneration, it would be wholly appropriate for it to be allocated within Strategic Policy 9 for business and employment purposes, in order for more flexibility to be given to the types of uses that might be permissible at the site.

1.2. Dover District Council (DDC) has subsequently published the Regulation 19 Submission of the Dover District Council Local Plan which sets out the vision, strategic objectives and overarching development strategy for future growth in the district over the period to 2040. The Land Trust have therefore instructed Bloomfields Chartered Town Planners to prepare further representations in relation to the Regulation 19 submission and the regeneration and future use of the Scheduled Monument, Fort Burgoyne.

2. Regulation 19 Submission of the Dover District Council Local Plan

2.1. It is welcomed that the aforementioned representations have been taken into account within the Regulation 19 Submission of the Dover District Council Local Plan.

SAP5 - Fort Burgoyne, Dover

2.2. In particular, the Trust is pleased to see the inclusion of Fort Burgoyne for Mixed Employment Use in table 4.1 and a positive site-specific policy to support site regeneration at Fort Burgoyne within Chapter 4: Housing and Employment Site Allocations at Strategic Allocation Policy SAP5 which states the following:

Figure 1: SAP 5- Fort Burgoyne, Dover as of Regulation 19 Submission, DDC Local Plan

2.3. The Land Trust also notes the pre-amble to Policy SAP5 which, at 4.109, recognises that Fort Burgoyne has the potential to accommodate new uses, provided that they are compatible with its status as a scheduled monument. The Trust continues to explore suitable uses for the reuse of the Fort, as evidenced by the grant of planning permission 21/01000 on the 7th July 2022 for the change of use of 4no. casemates to Use Class E with associated ancillary works.

2.4. The Land Trust remains committed to attracting uses for the Fort that will fit in with the long-term sustainable vision for investment in its re-use, as required by the preamble to Policy SAP5. The uses being explored, as evidenced in the previous Regulation 18 representations, are all being considered with the aim of supporting local business growth and ensuring at the same time that any mixture of uses at the site are compatible in respect of access, servicing, general amenity and crucially with the aims of conserving the Scheduled Monument.

2.5. While the inclusion of this policy is largely supported, The Trust has a number of comments in respect of the criteria:

2.6. Criterion h sets out that a Surface Water Management strategy should be produced for the site. The Trust recognises the importance of surface water management; however, it is highlighted that the Fort already benefits from an existing surface water drainage system which was built in the 1860s as part of the construction of the site. This system has always discharged directly to the ditch of the Fort where it soaks into the ground.

- 2.7. Given the Scheduled Ancient Monument status of the site, establishing an alternative strategy for managing surface water may not be practical and could result in harm. As such it is suggested that this criterion should be removed.
- 2.8. Notwithstanding this, where relevant, any future planning applications for uses or development at the Fort can demonstrate if required how it would be compatible with the existing surface water drainage system and not require any alternative arrangements for its disposal.
- 2.9. In respect of criterion j which suggests that *“development within the boundary of Fort Burgoyne which would have a detrimental impact on the heritage significance, setting, views, biodiversity, character of coherence of the components and elements of the complex will not be permitted”*.
- 2.10. While the Trust acknowledges the need to avoid development which will have a detrimental impact on the range of criteria identified in this policy, any development within Fort Burgoyne would be restricted by the requirement for Scheduled Monument Consent approved by Historic England which is considered to negate the need for this criterion. Draft Local Plan policies in respect of landscape (NE2), ecological (SP13) and historic environment (HE1, SP15) further negate the need for this criterion.
- 2.11. It is therefore respectfully suggested that criteria h and j are removed from policy SAP 5.

Chapter 2 - Vision and Objectives

- 2.12. Chapter 2 sets out the overarching vision for Dover District, including that *“through careful stewardship of its world class landscapes, thriving natural environments and wealth of historic sites, Dover District will be a destination of choice for people of all ages to make their home, for businesses to invest in and for visitors to explore and experience.”*
- 2.13. It is appreciated that the vision highlights the *“Sensitive restoration of elements of its rich built heritage, will enhance the attractiveness of the town, while improved connections to its seafront will have been delivered by high quality design and investment in place making.”* Together with the strategic objective (echoed in Strategic Policy 15) to conserve and enhance heritage assets in the district *“in a manner appropriate to their significance, recognising their intrinsic value as a finite resource as well as their contribution to the character of the District and the positive role they can play in the regeneration of the District.”*
- 2.14. The Trust also welcomes the identification of Fort Burgoyne on the Local Plan key diagram (Figure 2 below) alongside other Regeneration Sites covered by policy SP6 as set out further over the page.

Figure 2: Figure 2.1, Local Plan Key Diagram

Chapter 3 - Strategic Policies

- 2.15. Chapter 3 sets out the districts strategic policies to achieve the aforementioned strategic objectives.
- SP6 Economic Growth*
- 2.16. Strategic Policy 6 seeks to grow and diversify the Dover District economy by providing additional employment floorspace through the regeneration of brownfield sites in key locations in the district, such as Fort Burgoyne, to deliver flexible employment uses, achieve a higher level of job growth, and help provide additional flexibility and choice to the market over the Plan period.
- Figure 3: SP6- Economic Growth, Dover as of Regulation 19 Submission, DDC Local Plan
- 2.17. The Trust welcomes the inclusion of Fort Burgoyne at criterion 2 of policy SP6 as site where regeneration for a mix of uses to secure their future will be supported by Dover District Council.
- 2.18. It is noted that paragraph 3.117 sets out that no floorspace allowance has been included for Fort Burgoyne (and other sites allocated under criterion 2) as they are *“brownfield sites allocated for regeneration, and the mix of development and floorspace requirements will need to be determined through the planning application process in accordance with the policies in the Local Plan.”*
- 2.19. Given the complexities of the site we support this position but anticipate that employment floorspace will amount to circa 3,000 sqm.

Chapter 11 - The Natural Environment

Policy NE1 Biodiversity Net Gain

- 2.20. The Trust agrees with the requirements of Natural Environment Policy 1 for development proposals to provide a minimum of 10% biodiversity net gain above the ecological baseline within the development boundary. And notes criterion (a) which states that where it can be demonstrated that ecologically meaningful biodiversity net gain cannot be achieved within the site boundary, the Council will consider off-site alternatives in line with the mitigation hierarchy approach.

2.21. Given that a large portion of the 42 hectares at Fort Burgoyne has the potential to provide for significant biodiversity offering, in responding to this consultation The Trust wishes to record interest in working with the Council in developing its Dover District Biodiversity Net Gain Strategy with a view to Coombe Hole providing opportunity for off-site net gain whilst maximising the value of this Local Wildlife Site.

Figure 4: NE1- Biodiversity Net Gain, Dover as of Regulation 19 Submission, DDC Local Plan

2.22. In a similar vein to the BNG potential at Fort Burgoyne, the Land Trust has extensive experience of working with developers to create and provide in perpetuity management of Suitable Alternative Natural Greenspace (SANG), areas of greenspace that are of a quality and type that are suitable to divert recreational activities associated with new residential development away from protected sites (such as Special Protection Areas or Special Areas of Conservation).

2.23. In noting the requirement of Draft Policy SAP1(l) (Whitfield Urban Expansion) which requires a need for SANG to mitigate potential impacts upon the Lydden and Temple Ewell SAC, the Trust wishes to express interest in discussions with the Council and/or the developers of this site with a potential view to assisting them with meeting the policy requirements.

3. Summary

3.1. The overall objective of the Trust remains to seek to deliver a strong, sustainable future for the Fort, that secures its long-term status as a nationally and locally important historic site that will make a vital contribution to the district. The Land Trust supports the Regulation 19 Submission Version of the Dover District Local Plan and welcomes the inclusion of Fort Burgoyne as a strategic allocation site for regeneration subject to the comments set out in this representation.

4. Appendices

Appendix A- Representations on the Regulation 18 Draft Dover District Local Plan 2021 and Targeted Call for Sites

<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Strategic Policies - specifically SP1, SP3, SP12
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am commenting on the draft Local Plan in relation to soundness, since it is my belief that, at various points, this long and convoluted document fails to meet the specified criteria of being "positively prepared, justified, effective and consistent with national policy."</p> <p>I would contend that, in both its objectives and details, the Local Plan contains numerous omissions and contradictions, and that there is incorrect information contained in both the Plan itself and in its evidence base. These failings, of which examples are provided in my text, render the Plan unsound.</p> <p>In making my submission, I am making some observations about the general objectives and the Plan, and their possible implementation. However, in the examples that I cite, I have – inevitably – focused on my own community of Shepherdswell, and the neighbouring villages of Eythorne and Elvington. Others will be better placed than me to comment on shortcomings in relation to their specific neighbourhoods.</p> <p>The Overarching Vision sets out a number of lofty objectives, including :</p> <ul style="list-style-type: none"> • "Above all, the District will be defined by its enviable countryside and coastal environments" • "New developments will respect the spectacular natural environments" • The towns and villages of the District will enjoy improved infrastructure and services" • "New developments in accessible locations"

	<ul style="list-style-type: none"> • “Reducing the need to travel”– to meet climate change objectives • “Development that would result in disproportionate growth to any of the District’s settlements which cannot be supported by the necessary infrastructure and services.....will be resisted” <p>Unfortunately, the policies then put forward directly contradict these worthy aims. For example, Strategic Policy 3 (Housing Growth) foresees [para 3.51] that 76% of new housing stock will be built on greenfield sites, and only 23% on brownfield sites. This is clearly incompatible with, and in direct contradiction to, the vision of preserving the local countryside and reducing the need to travel.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	It is difficult to know where to begin. Perhaps a good starting point would be the inherent contradictions between the draft Plan's lofty strategic aims (of which I have highlighted a few above), and the planning policies that it then goes on to propose. Clearly the only way to meet many of the strategic objectives would be to focus on the redevelopment and regeneration of the town centre of Dover itself to create a proper urban centre that can generate prosperity for the whole district. This is where the plan should be focused, and not on cheap building developments in open countryside without the necessary infrastructure to support them.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	In the responses to the Regulation 18 consultation of the draft Local Plan, numerous inaccuracies and mistakes were reported to DDC. These were not matters of opinion, but matters of fact. It has become apparent that not all of these have been corrected in the document now under consultation. I am not, therefore, confident that the Council can be relied upon to present to the Inspector a document that is 100% accurate, and that members of the local community must have the opportunity to challenge such failings in a public forum.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>In October 2021, Aylesham Parish Council supported the Climate and Ecological Emergency (CEE) Bill which address the full extent of the climate and nature crisis in the UK. As a result, any local plan should use up-to-date science to make sound recommendations.</p> <p>As the district is extremely water scarce, all possible measures should be implemented to help mitigate water scarcity. The use of Sustainable Urban Drainage systems (SUDs) is required to be prominent in all future developments. This will help to deal with surface water flooding. We welcome the Draft Local Plan's hierarchy of methods of discharge, with the use of combined sewers coming last.</p> <p>This relates to CC6 of SP1 – Surface Water Management.</p> <p>There are a number of options to ensure new homes produce the least possible carbon emissions. Aylesham Parish Council would like to see Dover District Council require the full 2025 Future Homes Standard to be delivered now (this will reduce emissions by between 75-80% compared to current standards), not at some point during the Local Plan's lifetime.</p> <p>This relates to CC1 of SP1 – Reducing Carbon Emissions.</p> <p>We welcome the commitment to planting trees within new developments that are native to Kent. This will help to keep the rural feel of Aylesham alive. Currently we often see newly planted trees dying within the first few years of their lives. There must be a comprehensive plan to ensure that these trees reach maturity (part d) and how this will be enforced by the local authority.</p> <p>This relates to CC8 of SP1 – Tree Planting and Protection.</p>

	<p>Aylesham Parish Council welcomes the commitment to planting larger numbers of trees but feels this must come with a long-term solution to maintaining the trees. Dover District Council must also commit to the full 2025 future homes standard now.</p> <p>Aylesham Parish Council welcomes the addition and enhancement of open spaces and play areas. However, there are two points to note in the IDP: why would S106 monies from Aylesham be spent upgrading play areas in Nonington?; and play areas and open spaces are last to be delivered in developments – this must not happen in the future.</p> <p>Aylesham Parish Council is identified as “Delivery Partners” on a number of projects due to be delivered: we have not been consulted on this prior to the Regulation 19 document being released.</p> <p>The HRA[1] suggests that AYL003 – Land South of Aylesham is “high” suitability for the European Golden Plover, and so all measures must be taken to ensure this SPA protected bird species is still able to migrate and flourish in the area. SAP 25 (mixed use employment) is considered “moderate”.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP1 planning for climate change

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The local plan is not compliant with legality (legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008), in that it is too weak. eg section 3.14 "are expected to . . ." encourages tokenism from developers. Developers must adhere to future homes standard now. Retrofitting housing stock afterwards will be too costly and difficult and will be at the cost of the homeowner.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>To become effective and sound and compliant with the law to make Dover and UK zero carbon by 2050, the following should be added: (based on Plymouth and South Devon Joint Local Plan 27 adopted 2019 by 3 LPAs West Devon BC, South Hams DC, Plymouth CC)</p> <p>Delivering low carbon development</p> <p>The need to deliver a low carbon future for Dover district should be considered in the design and implementation of all developments, in support of a 2019 commitment to make Dover district net zero carbon emissions by 2050, it is necessary to halve 2005 levels of carbon emissions by 2034, and to increase the use and production of decentralised energy. The following provisions apply:</p> <p>Developments should identify opportunities to minimise the use of natural resources in the development over its lifetime, such as water, minerals and consumable products, by reuse or recycling of materials in construction, and by making best use of existing buildings and infrastructure. Major development should take account of projected changes in temperature, rainfall, wind and sea level in its design with the aim of mitigating and remaining resilient to the effects of changing climate.</p> <p>Development proposals will be considered in relation to the 'energy hierarchy' set out below:</p> <ul style="list-style-type: none"> Reducing the energy load of the development. Maximising the energy efficiency of fabric. Delivering on-site low carbon or renewable energy systems. Delivering carbon reductions through off-site measures. <p>Developments should reduce the energy load of the development by good layout, orientation and design to maximise natural heating, cooling and lighting, and reduce the heat loss area. For major developments, a solar master plan should show how access to natural light has been optimised in the development, aiming to achieve a minimum daylight standard of 27 per cent Vertical Sky Component and 10 per cent Winter Probable Sunlight Hours.</p> <p>All major development proposals should incorporate low carbon or renewable energy generation to achieve regulated carbon emissions levels of 20 per cent less than that required to comply with Building Regulations Part L.</p> <p>Developments will be required to connect to existing district energy networks in the locality or, where there is a future network planned, to be designed to be capable of connection to that network. Where appropriate, proportionate contributions will be sought to enable a network to be established or completed.</p> <p>(This is stronger than Mitigation a, b, c, d. and nothing less will put DDC on track to meet its legal commitment to be net zero by 2050, or be compliant with UK legal commitment to be net zero by 2050).</p> <p>There needs to be a stronger commitment to replace car use with walking and cycling and the network needs to be in place to support this. Particularly to connect to rail and bus services. Bus services need to be reinstated.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP 1 Planning for Climate Change
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>To plan for Climate Change the LP states it will be "Reducing the need to travel and maximising opportunities for smarter sustainable transport modes". This is rightly in line with National Transport and Land Use Policy, yet throughout your Local Plan much land for housing is earmarked for greenfield sites and edge of rural villages which will require fossil fuel car based developments where day to day trips for shopping, employment or medical facilities will only be made only by car.</p> <p>Climate friendly new housing necessitates accessibility by sustainable modes of transport - rail, bus or cycling. Yet there seems to be no joined up LU & Transport planning? For example:</p> <p>SAP32 Eastry 80 homes adjacent to land already granted permission for 100 homes (old Eastry hospital site) making approx. 200 additional new homes and 400 additional people into a village will a population of 2400. That's 25% of the current population. I do not see any sustainable transport plans to reduce the need to travel by car not any additional communities facilities.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will	<ol style="list-style-type: none"> 1 Be bold, be visionary. 2 Transport and LU polices must integrate. 3 Create th 15-min neighbourhood. Community facilities including shops, GPs and schools must be part of all additional housing plan. 4 Seek every opportunity to encourage sustainable & active travel.

make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I live between several beautiful villages in East Kent. Sady ruined by the volume, speed of additional traffic. More greenfiled development encourages additional car use. I find it extremely disappointing that the laudable words in the introduction to the LP do not translate to sustainable development in practice.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP1 - Planning for Climate Change
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Policy SP1 – Planning for Climate Change solely focuses on how new developments will tackle climate change. In order to effectively deliver on its commitments to tackle the nature and climate crisis it is essential that the Plan addresses both the need to reduce Dover's use of fossil fuels, as well as in/offsetting residual carbon emissions.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance	A policy requirement and target for in/offsetting residual carbon should be included for Policy SP1 in order to ensure that this Plan contributes and aligns with its own target of "becoming a net zero carbon emitter by 2030 at the latest" as mentioned in paragraph 3.7 of the Local Plan Regulation 19 Submission. Appropriate locations for the inseting and offsetting of residual carbon should be informed by a detailed Local Nature Recovery Strategy, ensuring that such schemes benefit biodiversity.

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Policy SP1 should also incorporate the use of nature based solutions into the policy, as they are vital to help reduce the impacts of climate change as well as to protect ecosystems and biodiversity. Nature based solutions can be incorporated into new developments, therefore for Policy SP1 we propose adding “ Incorporating sustainable nature based solutions, such as green roofs, rain gardens, or constructed wetlands to reduce flood risks and safeguard communities, habitats and species ”.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Strategic Policy 1 - Planning for Climate Change
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We welcome the priority given to the Council's commitment to being carbon neutral by 2050 and in particular the inclusion of policy seeking to maximise multi-functional green infrastructure for climate mitigation and adaptation. We would further encourage adding specific wording in support of new tree planting and woodland creation. A rapid increase in the rate of woodland creation has been proposed by the UK's Committee on Climate Change, to provide a key mechanism to lock up carbon in trees and soils, provide an alternative to fossil fuel energy and resource-hungry building material, and importantly to stem the declines in biodiversity. We welcome the approach set out later in the Plan (section 5.56) to increase tree canopy cover in the District and help sequester carbon from the atmosphere and feel this could usefully be referenced as part of SP1.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	We request that "and increasing tree canopy cover" be added after the bullet point "Maximising green infrastructure". While not required to achieve legal compliance, it would make the policy sounder by joining up with national policy on increasing tree cover in response to climate change.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The Dover Local Plan does not consider prevention as part of its climate change strategy, just mitigation and adaptation.</p> <p>It is well documented that cities and urban area are more environmentally-friendly than smaller rural dwelling patterns. This is primarily because of the impacts of transport of people and goods to and from these areas. Heating can also be provided more economically on a district basis. Dover should be concentrating on developing existing towns more such as Dover, Deal and Sandwich - not Aylesham.</p> <p>In terms of mitigation and adaptation similar considerations apply. Energy usage, likely to be more and more expensive, needs to be minimised. Again heating and transport are the two key uses of energy and promotion of urban dwelling opportunities needs to be the priority.</p> <p>Building houses uses a lot of energy in the production of materials such a concrete and tiles as well as in the construction process. The council should be planning on reusing and upgrading the rather poor housing stock there is in Dover in particular but also in north Deal. There is a lot of unoccupied housing in Dover.</p> <p>Just as all new houses should be ready to fit electric car chargers, new houses should all have solar panels on their roofs and designed to have roofs which are sufficiently south facing.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The modification would be to shift large scale development from Aylesham to Dover primarily but also to Deal and Sandwich. Development should not be primarily new houses but large scale refurbishment of run-down unoccupied houses. This would reduce the carbon impact of housing people and the impact of these people would be less in an urban area.</p> <p>I think this would be a big change to the plan but it is a "climate emergency".</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The local plan is not compliant with legality (legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008), in that it is too weak. 'contributes to . . . ' encourages tokenism from developers. Developers would not starve if their return on investment were reduced from 29 or 30%.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>To become effective and sound and compliant with the law to make Dover and UK zero carbon by 2050, the following should be added: (based on Plymouth and South Devon Joint Local Plan 27 adopted 2019 by 3 LPAs West Devon BC, South Hams DC, Plymouth CC)</p> <p>Delivering low carbon development</p> <p>The need to deliver a low carbon future for Dover district should be considered in the design and implementation of all developments, in support of a 2019 commitment to make Dover district net zero carbon emissions by 2050, it is necessary to halve 2005 levels of carbon emissions by 2034, and to increase the use and production of decentralised energy. The following provisions apply:</p> <p>Developments should identify opportunities to minimise the use of natural resources in the development over its lifetime, such as water, minerals and consumable products, by reuse or recycling of materials in construction, and by making best use of existing buildings and infrastructure.</p> <p>Major development should take account of projected changes in temperature, rainfall, wind and sea level in its design with the aim of mitigating and remaining resilient to the effects of changing climate.</p> <p>Development proposals will be considered in relation to the 'energy hierarchy' set out below:</p> <p>Reducing the energy load of the development.</p> <p>Maximising the energy efficiency of fabric.</p> <p>Delivering on-site low carbon or renewable energy systems.</p> <p>Delivering carbon reductions through off-site measures.</p> <p>Developments should reduce the energy load of the development by good layout, orientation and design to maximise natural heating, cooling and lighting, and reduce the heat loss area. For major developments, a solar master plan should show how access to natural light has been optimised in the development, aiming to achieve a minimum daylight standard of 27 per cent Vertical Sky Component and 10 per cent Winter Probable Sunlight Hours.</p> <p>All major development proposals should incorporate low carbon or renewable energy generation to achieve regulated carbon emissions levels of 20 per cent less than that required to comply with Building Regulations Part L.</p> <p>Developments will be required to connect to existing district energy networks in the locality or, where there is a future network planned, to be designed to be capable of connection to that network. Where appropriate, proportionate contributions will be sought to enable a network to be established or completed.</p> <p><i>(This is stronger than Mitigation a, b, c, d. and nothing less will put DDC on track to meet its legal commitment to be net zero by 2050, or be compliant with UK legal commitment to be net zero by 2050) Cross referenced with DM policies CC1 and CC2 and CC3.</i></p> <p>'Mitigation f' must include following in order to become effective and sound. ' All new developments of over 40 dwellings must contribute to a Community Infrastructure Levy so that engineered kerbed cycle routes can enhance cycle paths 1, 2,15,16,17, and new engineered cycle tracks must be made safe in winter dark afternoons, new engineered cycle routes must link Whitfield Urban Development with Kearsney and Martin Mill stations and Elvington with Snowdown and Aylesham and Shepherdswell Stations, especially given the rural bus cuts implemented in these</p>

	villages in 2022. Also trains and buses on the key commuter routes must be equipped to carry (electric + cargo) bikes. Cross referenced with DM policy TI1. CIL is also needed to pay for other infrastructure essential for the local plan to be sound which is referred to below.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Srtategic Policy 1 Planning for climate Change
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC appears to have developed a plan that will increase the carbon footprint of the District rather than reduce it. It has developed the Green Village Concept. This appears to be based on fine intentions and hope rather than reasoned rational and common sense. In all likelihood, this will result in large housing estates in the middle of the country, from which residents will have to travel for their every need. In ignoring the settlement hierarchy, DDC has ensured that large sections of the district's residents will have to travel more miles to get what they need and will be less likely to use more environmentally friendly forms of transport. DDC has also developed a plan which would seem to require school children from Deal, Dover, and Thanet to travel to Sandwich for secondary education and the residents of Sandwich to travel to Deal or Dover for some of their leisure and recreational needs. Surely it is better for the children of Deal and Dover to be educated in or close to where they live and the residents of Sandwich to have their sports and leisure needs to be met in the town.

	<p>NB There appear to be no plans to expand secondary school places in Deal or Dover, where there has been and continues to be a considerable expansion of the housing provision.</p> <p>DDC has also embarked on a plan to centralize sources of employment, allowing smaller sites to be converted to housing use, often with the idea of tidying up an area. This reduces the ability of small businesses to locate in the community it serves. The larger managed, sites are not always a good fit for smaller businesses and those that want to work for themselves and so in some sense, the policy is also exclusionary to the smallest of businesses.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>DDC should seek to develop a plan that sticks more closely to its claimed climate credentials, in order for it to comply with national legislation. It should reconsider the Garden Village Concept.</p> <p>Make provision for educational needs to be met where the need arises,</p> <p>Be mindful that centralising the provision of sports and leisure facilities, dissuades many from taking regular exercise and excludes those in the community that have neither the means nor the ability to travel to centralised to the other end of the district.</p> <p>Be mindful of the needs of the smaller businesses that need to be embedded in the communities they serve and allow them the means to do so, by restricting the number of small employment spots that are converted to housing. DDC should move away from viewing employment space solely in terms of square meterage within the district.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>2 - Do you consider this part of the Plan sound?</p>	No
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Positively prepared</p> <p>Justified</p> <p>Effective</p> <p>Consistent with National Policy</p>

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We are CPRE, the countryside charity. Formed in 1926, CPRE is a registered charity and one of the longest established and most respected environmental groups in England, with over 40,000 members and supporters living in our cities, towns, villages and the countryside. CPRE Kent is the largest of the CPRE County branches</p> <p>Our vision is of a beautiful and thriving countryside that enriches all our lives, and our mission is to promote, enhance and protect that countryside. We believe that the planning system is a toolbox for achieving better – for people, for nature and for the economy – while supporting the delivery of more badly-needed homes to end the housing crisis.</p> <p>In general, CPRE Kent supports a development strategy which meets the following criteria:</p> <ol style="list-style-type: none"> 1 brownfield first, especially in urban areas and not in rural areas where it would result in unsustainable patterns of development 2 development should result in sustainable communities 3 housing provision in rural areas where there is an identified local need, and the scale of development is appropriate for the size of the settlement 4 plans should promote development in locations: <ol style="list-style-type: none"> 1 that are well supported by, or that will support, sustainable transport and active travel and 2 that are well served by regular public transport services and social and community facilities, that are in safe walking and cycling distance or would support, or result in, a sustainable settlement. <p>Overall, it is our position that local planning authorities should seek to ensure that the impact of development on the countryside, both directly and indirectly, is kept to a minimum and that development is sustainable in accordance with national planning policy.</p> <p>This response has been prepared jointly by the Kent Branch office of CPRE Kent and by the Dover District Committee of CPRE Kent, but for brevity our comments are expressed as being from ‘CPRE Kent’ throughout.</p> <p>We would welcome attending the examination to provide additional clarity on any of the points which we have raised.</p> <p>SP1 Planning for Climate Change</p> <p>CPRE Kent welcomes the fact that the first strategic policy relates to climate change, but queries whether climate change is actually at the heart of the Council's spatial strategy?</p> <p>SP1(f) refers to climate change mitigation, by “reducing the need to travel and maximising opportunities for ‘smarter’ sustainable travel” and at SP1(e) reference is made to climate mitigation by “maximising green infrastructure”.</p> <p>It is not clear how the Council's spatial strategy addresses the aim of reducing the need to travel – especially as a one of the proposed strategic allocations is at the rural villages of Eythorne and Elvington – which are car dependent communities, as evidenced by the huge issues they face in terms of rat running (in combination with pinch points in the local rural road network). In addition, funding has been withdrawn from the 92/92A bus service, and in terms of public transport these two villages are served only by a heritage railway line giving connectivity to nearby Shepherdswell, but not to places of local employment, such as Whitfield or Dover.</p> <p>We would query what the effectiveness of climate change mitigation (by maximising green infrastructure) will be, when the majority of the plan's allocations are on greenfield land – which already plays a huge role in carbon sequestration (SP14 Enhancing Green Infrastructure and Biodiversity). With a brownfield first strategy and a bold understanding of the benefits of increased densities, more greenfield sites could be retained for the contribution they already make towards carbon sequestration, food security and the health and wellbeing of the community.</p> <p>It is not clear from policy SP1 how the energy load of developments will be reduced to maximise natural heating, cooling and lighting – if this is the intention of SP1(a), then it should be more clearly stated.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)	

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	CPRE Kent would wish to participate at the examination hearings to explore these issues further.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	1 Introduction
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	The plan is unsound as it does not comply with the legally binding commitment made by DDC when they declared a climate emergency in 2020 and prepared their climate change strategy. The plan will not do enough to meet the target of the district being net zero by 2050. DDC should be much more ambitious about the green credentials of new housing. If new homes generated their own power, were

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

insulated to the highest standards, and collected rain water, it would greatly help stretched local services and go a long way towards making the housing stock fit for the coming decades.

The regulation 19 stage of the consultation is not fit for purpose as it is overly complicated and very difficult to use. The process has left many members of the public including me and my wife feeling overwhelmed and confused as to how to make a representation. For those who are working full time this has been a task for which they do not have enough time. As a result those who may have wanted to make a submission have not been able to. The format of the submission form is also difficult to navigate. Without prior experience of planning law it is difficult to say whether a part of the plan is legal or not. As to the duty to cooperate it is impossible to know. The unsound plan needs updating after the government announcement on 5/12/22 that mandatory housing targets are not to be imposed. The figure of nearly 11,000 is unsustainable and should now be reviewed, particularly with respect to allocated land around Station Rd Walmer and proposed developments around villages.

The character and landscape value of the district is being rapidly eroded under the current plan and this must not continue as it is contrary to NPPF 21. It is not sustainable to build on agricultural land which is in short supply as we are only 50% self sufficient in producing food in the UK. The CPRE has found that almost 14,500 hectares of farmland has been permanently lost to development since 2010. The contribution from the districts agricultural land is of vital importance. Much of the agricultural land is also vital for flood protection, and field margins are important for wildlife and biodiversity, forming corridors between habitats for vertebrates and nesting and roosting sites for birds. Dover District also has a wealth of character landscapes, AONB, heritage coast, nature reserves, internationally rare chalk grassland and rewilded areas such as Betteshanger Park. Overdevelopment under the last weak plan has meant that these areas are under pressure and being denuded as their boundaries are eroded and wildlife corridors between sites are cut off. The new plan does not do enough to protect these areas, wildlife and biodiversity. Developments should not be allowed to remove ancient woodlands and trees and biodiverse rich habitats even if it is argued that this is for the greater good. This is not sustainable as all nature is interconnected and if it fails then we all fail. The UK is one of the worst countries in the world for biodiversity loss, we have lost half of our biodiversity since the 1970's.

Development has been at such a pace that infrastructure cannot keep up. Buses have been cut recently, cycle and pedestrian routes have not been upgraded sufficiently to connect some developments to main bus and train routes without car dependence. Aylesham has not had a secondary school which would mean children could walk to school. Many rural communities are entirely car dependent due to lack of buses and the roads not being safe to use their bikes. Not enough emphasis is put on renovating existing housing stock to provide greener, insulated, fuel efficient homes. Each new build generates around 56 tonnes of embedded carbon. The NPPF states that we should prioritise brownfield sites over greenfield but although there are many opportunities to develop brownfield sites in Dover, this has not been prioritised. Many developments have been for larger houses in villages and there is not enough provision for affordable housing.

The wording of the local plan is not definitive, it leaves too many loop holes and vague preferences which enable large developers to argue and get what they want, to maximise profits, not what the people of the Dover area need.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Better mapping and understanding of the Dover District, taking into account internationally rare areas of chalk grassland, woodland and trees wherever they occur.

Large buffers around the AONB to protect its character from the built environment. Stronger protection for the AONB and the Ripple LCA F3.

Tighter protections on our remaining biodiversity.

Tighter definitions in the local plan so that developers have no room to argue what has been specified in the local plan.

Hire several biodiversity officers to monitor closely and prevent loss of ancient woodland, chalk grassland, veteran trees, protected wildlife and rich habitats and to actively go out into the community, looking for ways to improve biodiversity by such things as accessing grants for hedge planting and the creation of ponds where ever possible in our district.

Employ experts to liaise with farmers in our area to encourage the most environmentally friendly farming and land management practices which will encourage maximum biodiversity in the countryside and maximum sequestration of carbon in soils and biomass.

Stop the use of agricultural land for development.

Renovate and insulate rather than build new houses, brownfield not greenfield.

Turn attention away from destroying village communities with unsustainable housing estates outside their village boundaries.

Do not give developers the get out clause of financial mitigation for destruction of wildlife and habitat. No development should further deplete our critically low levels of biodiversity.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>(DDC Note - Text Extracted from Document sent from Savills on Behalf of the Church Commissioners. Representation has been split across relevant areas of the Local Plan. Full attachment and introduction to Policy comments can be found under reference SDLP1265 for Shepherdswell Site and SDLP1266 for Eastry Site.)</p> <p>Policy SP1 – Planning for Climate Change – COMMENTS</p> <p>Our client is supportive of the principle of a climate change policy in general but believe there needs to be greater quantifiability regarding 'applications for qualifying new built development'. With the policy and the supporting text, there is no explicit reference to what constitutes 'qualifying development' and as such, we consider that draft Policy SP1 is not measurable and is not effective. To ensure that Policy SP1 is effective and in accordance with Paragraph 35(c) of the NPPF, we submit the wording should be amended to read as follows:</p> <p>'Applications for qualifying new major, built development must be supported by a climate change statement'. Furthermore, greater clarity needs to be provided within the policy regarding what a 'climate change statement' encompasses. Given that what could constitute 'qualifying development' is broad, this could impact the scope of what is required within a climate change statement. Providing greater detail as to the Council's expectations of a climate change statement will ensure the policy is effective and in accordance with the NPPF. Additionally, further flexibility should be provided to the policy to allow for statements to be reflective of the scale and type of development by amending the wording as follows:</p> <p>"Applications for qualifying new built development must should be supported by a climate change statement which is proportionate to the scale and type of the development proposed." Policy SP1 recognises the need to mitigate and adapt to climate change. However, it is considered that Policy SP1 is lacking reference to the role of the reuse of buildings in tackling climate change and as such, the policy is not consistent with national policy. It is our view that an additional criteria should be included under climate change mitigation which explicitly references the reuse of existing buildings, including the conversion of existing buildings, and in accordance with paragraph 152 of the NPPF.</p> <p>Recommendation: DDC should clarify the meaning of what constitutes as 'qualifying development' and what a 'climate change statement' constitutes. It is recommended that the proposed wording changes suggested in Section 4 are adopted.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP50 - Land adjacent to Short Street, Chillenden (GOO006)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The evidence detailed in the Dover Local Plan regarding the potential to develop site SAP50 - Land adjacent to Short Street, Chillenden (GOO006) is flawed and inaccurate. It is further inconsistent with the Climate Emergency declaration of November 4th 2019 as it makes no consideration for the impact of this development on surrounding properties.</p> <p>An independent assessment of the site conducted by QVA Consulting (attached) provides an evidence based analysis of the site and identifies the following key conclusions</p> <ul style="list-style-type: none"> - current EA/SFRA surface water mapping does not reflect specific topography at the site - 98% of the site is at a high risk of surface water flooding - Conventional or SuDS drainage of the development is precluded by topography (no outfall), hydrogeology (no infiltration) and statutory flood risk obligations (increased flood risk offsite) - Measures required to pass the Exception Test would increase flood risk offsite. <p>As regards the Climate Emergency declaration and duty of care, I refer you to Section 19 (1A) of the Planning and Compulsory Purchase Act 2004, which states</p> <p>“Development plan documents must (taken as a whole) include policies designed to secure that the development and use of land in the local planning authority’s area contribute to the mitigation of, and adaptation to, climate change.”</p> <p>Clearly a development that has the potential in increase the impacts of climate change on the local area including neighbouring properties is contra to the clear direction of said Act and the Climate Emergency declaration by DDC.</p> <p>Also attached is the final report of the National Infrastructure Committee on Reducing the Risks of Surface Water Flooding. It states Climate change and urbanisation are set to put more properties at risk. The number of properties in areas at high risk is set to increase by 2055, including:</p> <ul style="list-style-type: none"> • an increase of around 20,000-135,000 properties in areas at high risk due to the impacts of climate change, which will increase the intensity and frequency of heavy rainfall • an increase of around 35,000-95,000 properties due to new development putting more pressure on drainage systems. <p>A further 50,000-65,000 properties may be put in areas at high risk due to unplanned increases in impermeable surfaces (e.g. front gardens being paved over), which, alongside new development, is part of ‘urbanisation’– the conversion of natural (often permeable) environments to urban ones where rainwater cannot enter natural drainage systems.</p>

	<p>The greenfield site off Short Street is a natural run off for surface water and as such a natural mitigator of flood risks for existing properties along Short Street as well the noted heritage site of The Grange.</p> <p>Recently reported changes to the Levelling Up an Regeneration Bill state that the former targets for Local Authorities will no longer be relevant or compulsory. This means an abandoning of damaging centralised mandatory housing targets that have led to needless, unaffordable and poorly designed greenfield developments in favour of an advisory system that takes local character and need into account.</p> <p>Despite further registered concerns at the Reg 18 stage regards heritage (proximity to a listed building of significant historical importance) , environment (removal of hedgerows, destruction of wildlife habitat and hunting grounds for owls and bats), access and egress (site is approached on a single track road and has 3 other access points for local inhabitants), it is disappointing that the comments of the local community and Parish Council have been ignored and disregarded without consultation or direct contact. This leads to the conclusion that the process is fundamentally a tick box exercise and does not have communities' best interests as the central pillar.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Removal of SAP50 - Land adjacent to Short Street, Chillenden (GOO006) from the local plan. It is not required economically, it is not relevant to sustainability of the local community, it is contra to climate change requirements and is likely to cause immeasurable future harm to adjoining properties. It is based on flawed assumptions and should be disregarded as a potential development site.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>Given the flawed evidence for the site's inclusion it is preferable to explain in person the potential impact on adjoining properties as a result of increased flood potential.</p>

2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Original Rep with Attachment. Lander Planning sent the attached document which has been split across the relevant sections of the Plan.) Planning for climate change is consistent with national policy and this policy is 'effective' and 'justified'. This policy is supported.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Chillenden 4.291
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The evidence detailed in the Dover Local Plan regarding the potential to develop site SAP50 - Land adjacent to Short Street, Chillenden (GOO006) is flawed and inaccurate. It is further inconsistent with the Climate Emergency declaration of November 4th 2019 as it makes no consideration for the impact of this development on surrounding properties.</p> <p>An independent assessment of the site conducted by QVA Consulting (attached) provides an evidence based analysis of the site and identifies the following key conclusions</p> <ul style="list-style-type: none"> - current EA/SFRA surface water mapping does not reflect specific topography at the site - 98% of the site is at a high risk of surface water flooding - Conventional or SuDS drainage of the development is precluded by topography (no outfall), hydrogeology (no infiltration) and statutory flood risk obligations (increased flood risk offsite) - Measures required to pass the Exception Test would increase flood risk offsite. <p>As regards the Climate Emergency declaration and duty of care, I refer you to Section 19 (1A) of the Planning and Compulsory Purchase Act 2004, which states</p> <p>“Development plan documents must (taken as a whole) include policies designed to secure that the development and use of land in the local planning authority’s area contribute to the mitigation of, and adaptation to, climate change.”</p> <p>Clearly a development that has the potential in increase the impacts of climate change on the local area including neighbouring properties is contra to the clear direction of said Act and the Climate Emergency declaration by DDC.</p> <p>Also attached is the final report of the National Infrastructure Committee on Reducing the Risks of Surface Water Flooding. It states Climate change and urbanisation are set to put more properties at risk. The number of properties in areas at high risk is set to increase by 2055, including:</p> <ul style="list-style-type: none"> • an increase of around 20,000-135,000 properties in areas at high risk due to the impacts of climate change, which will increase the intensity and frequency of heavy rainfall • an increase of around 35,000-95,000 properties due to new development putting more pressure on drainage systems. <p>A further 50,000-65,000 properties may be put in areas at high risk due to unplanned increases in impermeable surfaces (e.g. front gardens being paved over), which, alongside new development, is part of ‘urbanisation’– the conversion of natural (often permeable) environments to urban ones where rainwater cannot enter natural drainage systems.</p> <p>The greenfield site off Short Street is a natural run off for surface water and as such a natural mitigator of flood risks for existing properties along Short Street as well the noted heritage site of The Grange.</p> <p>Recently reported changes to the Levelling Up an Regeneration Bill state that the former targets for Local Authorities will no longer be relevant or compulsory. This means an abandoning of damaging centralised mandatory housing targets that have led to needless, unaffordable and poorly designed greenfield developments in favour of an advisory system that takes local character and need into account.</p>

	Despite further registered concerns at the Reg 18 stage regards heritage (proximity to a listed building of significant historical importance) , environment (removal of hedgerows, destruction of wildlife habitat and hunting grounds for owls and bats), access and egress (site is approached on a single track road and has 3 other access points for local inhabitants), it is disappointing that the comments of the local community and Parish Council have been ignored and disregarded without consultation or direct contact. This leads to the conclusion that the process is fundamentally a tick box exercise and does not have communities' best interests as the central pillar.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The removal of the site from the Local Plan as suitable for development due to the location and heritage of the site as well as its importance as a surface water run-off.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To explain to the Inspector why the site is not suitable for development.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SP1- Planning for Climate Change Gladman recognise the increasing importance of tackling climate change and encourage the recognition of sustainable development to mitigate the impacts. The Council should continue to take account of climate change in its plan-making, monitoring updates to the NPPF and PPG. Mitigating and adapting to climate change must be compatible with the vision and objectives of the District, the wider objectives of the planning system and the overarching aim to boost housing delivery and build a strong, competitive economy. Dover District Council have declared a climate emergency, and Gladman is committed to contributing to solutions to address these concerns. Our sites at Cross Road, Deal and East Langdon can deliver numerous environmental commitments to assist the Council in meeting its climate change objectives. In line with the criteria identified within draft policy SP1, the schemes will include multifunctional green infrastructure (h), reducing vulnerability to the impacts of climate change through tree shading and CO2 absorption (g). All our sites deliver a comprehensive package of pedestrian and cycle infrastructure including a suite of measures to reduce traffic impact and the need to travel (f). All sites could potentially deliver renewable and low carbon technologies (c) through new electric vehicle charging points and low carbon design approaches (a) and sustainable construction techniques (b) can be considered at the detailed design stage.</p> <p>(DDC Note - Text Extracted from Document sent from Gladman Developments Ltd. In view of DDC's declaration of a climate emergency and cost of living crisis we are disappointed to see that the Council does not intend to use its powers under the Planning and Energy Act 2008 to set energy efficiency standards which go beyond the minimum required by Building Regulations for new homes. <i>(DDC note - this is an extract of full representation SDLP1639)</i>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note: Please see detailed representation (attached at 1770) which has been divided against numerous consultation points. The representation has images within the text. The text below is an extract from the detailed representation 'by an Alkham resident'.</p> <p>4 Planning for Climate Change</p> <p>The Plan identifies several measures , including sustainable design, reduction of NOX emissions, modal transport shifts etc</p> <p>Comment 4: I support the broad principles of low carbon design , incorporating low carbon technologies , maximising green infrastructure and consideration of sustainable transport modes and will return to this latter point later in the transport section</p> <p>No comment is made on the introduction of wind turbine development nor on the potential for solar hillside panels on the south facing sides of the valley, as I am not aware of any locally planned development in this respect.</p> <p>I welcome the steps being made which relate to water efficiency and would advise that through local action, the Water Authorities, the Parish Council and local landowners have tried to mitigate risk of flooding as the aquifer fills and manage surface water problems as they arise in Alkham. However I have concerns that as sewage regularly backs up in the base of the valley in winter, this possibly indicates a lack of capacity for housing expansion, an infrastructure problem which requires addressing.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP1
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SP1 Planning for Climate Change</p> <p>The local plan is not compliant with legality (legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008), in that it is too weak. 'contributes to . . .' encourages tokenism from developers. Developers would not starve if their return on investment were reduced from 29 or 30%.</p> <p>To become effective and sound and compliant with the law to make Dover and UK zero carbon by 2050, the following should be added: (based on Plymouth and South Devon Joint Local Plan 27 adopted 2019 by 3 LPAs West Devon BC, South Hams DC, Plymouth CC)</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>The following should be added:</p> <p><u>Delivering low carbon development</u></p> <p>The need to deliver a low carbon future for Dover district should be considered in the design and implementation of all developments, in support of a 2019 commitment to make Dover district net zero carbon emissions by 2050, it is necessary to halve 2005 levels of carbon emissions by 2034, and to increase the use and production of decentralised energy. The following provisions apply:</p> <p>Developments should identify opportunities to minimise the use of natural resources in the development over its lifetime, such as water, minerals and consumable products, by reuse or recycling of materials in construction, and by making best use of existing buildings and infrastructure.</p> <p>Major development should take account of projected changes in temperature, rainfall, wind and sea level in its design with the aim of mitigating and remaining resilient to the effects of changing climate.</p> <p>Development proposals will be considered in relation to the 'energy hierarchy' set out below:</p> <p>Reducing the energy load of the development.</p> <p>Maximising the energy efficiency of fabric.</p>

	<p>Delivering on-site low carbon or renewable energy systems.</p> <p>Delivering carbon reductions through off-site measures.</p> <p>Developments should reduce the energy load of the development by good layout, orientation and design to maximise natural heating, cooling and lighting, and reduce the heat loss area.</p> <p>For major developments, a solar master plan should show how access to natural light has been optimised in the development, aiming to achieve a minimum daylight standard of 27 per cent Vertical Sky Component and 10 per cent Winter Probable Sunlight Hours.</p> <p>All major development proposals should incorporate low carbon or renewable energy generation to achieve regulated carbon emissions levels of 20 per cent less than that required to comply with Building Regulations Part L.</p> <p>Developments will be required to connect to existing district energy networks in the locality or, where there is a future network planned, to be designed to be capable of connection to that network. Where appropriate, proportionate contributions will be sought to enable a network to be established or completed.</p> <p>(This is stronger than Mitigation a, b, c, d. and nothing less will put DDC on track to meet its legal commitment to be net zero by 2050, or be compliant with UK legal commitment to be net zero by 2050) Cross referenced with DM policies CC1 and CC2 and CC3.</p> <p>'Mitigation' should include the following in order to become effective and sound. ' All new developments of over 40 dwellings must contribute to a Community Infrastructure Levy so that engineered kerbed cycle routes can enhance cycle paths 1, 2,15,16,17, and new engineered cycle tracks must be made safe in winter dark afternoons, new engineered cycle routes must link Whitfield Urban Development with Kearsney and Martin Mill stations and Elvington with Snowdown and Aylesham and Shepherdswell Stations, especially given the rural bus cuts implemented in these villages in 2022. Also trains and buses on the key commuter routes should be equipped to carry (electric + cargo) bikes. Cross referenced with DM policy TI1. CIL is also needed to pay for other infrastructure essential for the local plan to be sound which is referred to below.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP2
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	It is not sufficient to talk about tackling the 20% obesity levels, actions speak louder than words. Despite the requests for an ice rink or bowling alley when the St James' development was open for consultation, it was decided to build a multiplex cinema and fast food outlets! Public Rights of Way get very little mention in this plan, despite walking, cycling and horse riding being excellent activities for health and outdoor exercise. Public rights of way are free to use, but become totally pointless and unattractive when surrounded by a housing estate.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	To actually do something to tackle obesity by promoting activity, such as a bowling alley or ice rink when planning new developments. The pop up ice rinks at Christmas were exceedingly popular. An ice rink or bowling alley would also help to regenerate the town centre, making it a "go to" place.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	My comments relate to 1.46, 2.2, 3.17 and SP2
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I am confining my comments to the area in which I live, and make my representation as a concerned citizen who believes the plan is unsound and possibly not legally compliant.</p> <ul style="list-style-type: none"> - I fail to see how the sustainability report can be adequate. The buildings proposed at the back of St Andrews will interfere with the habitat of significant numbers of bats. This has not been taken into account. -The plan does not meet the stated goal of mitigating climate change (1.46). Building in and around Shepherdswell (and other villages) will result in a large number of additional journeys by car. There are virtually no employment opportunities in Shepherdswell or these areas, and the large majority of journeys will be by car. - The plans fails to address its stated aim of ensuring safe air quality (SP2). The extra buildings in shephedswell will inevitably increase pollution. More particularly, exhaust fumes will increase given that the roads in the village are mostly single track with passing places. There is already much congestion at rush hour times. Extra journeys will make this worse. - Extra houses in Shepherdswell, and the additional traffic that will follow, contradicts the Council's aim to 'Promote sustainable transport initiatives' (1.46 and 2.2). Traffic levels are already such as to make cycling and walking difficult (the roads in and around Shepherdswell are often without pavements. Many school children use Church Hill to walk to and from school / bus stops taking them to school. They compete with cars for space, often having to duck in between parked cars. The road is not safe as things stand. More building resulting in more car journeys would make this worse)

- The plan contradicts the council's aim to ensure the health and well being of communities. My reasoning here is as above i.e. Traffic levels are already such as to make cycling and walking difficult (the roads in and around Shepherdswell are often without pavements. Many school children use Church Hill to walk to and from school / bus stops taking them to school. They compete with cars for space, often having to duck in between parked cars. The road is not safe as things stand. There are no pavements on this road, and no room for a pavement to be built. More building resulting in more car journeys would make this worse)

- I fail to see that the plan meets its objective of 'conserving and enhancing' the district's 'natural environment.' Building behind St. Andrews in Shepherdswell will destroy an outstanding view which stretches presently to the sea.

- It does not seem to take into account covenants on the plots of land earmarked for building. For example, I understand the plot of land in Mill Lane, Shepherdswell, on which 10 houses are planned has attached to it a covenant stating that the maximum houses built should be two.

- In addition to these objections I am concerned that the District has not provided adequate means for those affected by the plan to express their views. This website has proven unreliable (I had to phone for guidance approx 3.45pm 14 November) and the features on the site enabling comment were not functioning. The site would not register me (I followed the steps and was only registered after phoning for help). I feel these problems will have made it unreasonably difficult for people to contribute their comments.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP2 - planning for healthy and inclusive communities
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	3.18, 3.19 The plan is unsound in this respect. The physical and mental health of communities in Dover District is being compromised by the excessive rate of development. Air quality is suffering due to congested roads and idling traffic. Green spaces are being lost which have a high amenity value. Cycling and walking are becoming more difficult as increased development increases traffic to dangerous levels on our arterial roads. Infrastructure is not being put in place to connect rural communities to main public transport hubs. 3.21 - The plan is unsound - As the population is aging, small manageable homes and retirement complexes are needed, not huge 5 and 6 bedrooomed executive homes which are springing up around Whitfield, resulting in maximum profits for developers. I agree that more access and provision of green spaces for peoples physical and mental health are necessary.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	More facilities for cyclists and pedestrians, better connectivity of rural communities to transport hubs.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Strategic Policy 2
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Many laudable objectives - that communities are well-served can participate in active travel etc. This is undone by developing large housing estates in rural areas like Elvington and Aylesham. There are not many facilities or services there be it health, schooling, public transport or safe bike lanes to Dover, Canterbury or Sandwich for those who could be more active or use ebikes.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The solution from the housing development point of view is to have more housing at scale in Dover, Deal or Sandwich where there already are community facilities and where you can walk and take a bus. For those already in rural areas it would be good to see more safe cycle routes already being built or on the drawing board. Bus services seem not to be viable - how can we make them so and attractive to car drivers?
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	There is a large proportion of people living in unhealthy, damp, outdated housing within Dover town's most deprived wards, sometimes owner-occupied, sometimes privately rented, less often council housing. As AirB&Bs push tenants out of coastal Deal, the demand for poor housing, EPC rated E, F, G, is increasing and the rising rental price traps people in fuel and food poverty. Any Strategic Policy on Planning for Healthy communities has to address this, or be judged as very ineffective, unsound and non-compliant with NPPF and legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The SP2 encourages developers of new mostly greenfield sites to make them healthy, (it should word this more strongly to compel developers to do what is in the public interest to become effective and sound). But it fails conspicuously to provide a plan to replace or transform unhealthy, damp, outdated housing within deprived wards so that they become future-proofed zero carbon homes on those same streets of our deprived wards, thus saving the public purse costly curative health bills. For those who pretend the impoverished residents of deprived wards will be able to move to the new Whitfield Urban Development, we have to ask what do they expect to happen to the unhealthy properties they move out of in town? Is a ghetto or a ghost town envisaged? In the case of private rented properties, either compulsory purchase or schemes to incentivise private landlords would be needed, to upgrade these properties. Without such a plan, claims about planning for healthy communities ring hollow. We recognise that the DDC planning team have had to do much of the preparation of the Local Plan before the cost-of-living crisis and economic turmoil of autumn 2022 crashed upon us all. But harsh realities are upon us and changes are needed. (See our comment below on SP5, on the policy of Dover Urban Area nil provision of affordable housing which we consider both unsound and non-legally compliant, and unjustified on 'viability' / developers expected return on investment grounds). Specifically it does not apply to the proposal to build houses over the catchment area of the aquifer to the south of Deal (SAP 14 / 15), or a number of similar proposals, or with the scale of internal migration into the area as shown in Evidence base.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The Local Plan seems set on centralising employment, education, and leisure facilities. To such an extent that residents are less able to work within their communities and will need to travel more, meaning more cars on the roads and more stress to the individual. Likewise, by centralising sports and leisure facilities, fewer residents will be encouraged to take regular exercise, particularly those that need more encouragement to take exercise and those that do not have the means of the ability to travel to sites at the other end of the district.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Provide facilities where there is a need. Reconsider the change of allocation for site SAP21

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	AIR QUALITY: Strategic Policy 2 - Planning for Healthy and Inclusive Communities point 8
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>AIR QUALITY</p> <p>Strategic Policy 2 - Planning for Healthy and Inclusive Communities point 8, is "Seeking to improve the District's air quality, reducing public exposure to poor air quality and minimising inequalities in levels of exposure to air pollution."</p> <p>By its failure to consider the additional air pollution from the future additional traffic congestion on local roads, the implementation of this laudable aspiration of the Plan is not consistent with paragraph 174e) of the NPPF, and therefore unsound. Paragraph 11.38 of the Plan mentions "Measures can include adhering to high quality design standards in the development. These can include preventing the creation of new "street canyons", ..." but this only relates to <i>within</i> the development: it does nothing about the creation of new "street canyons" in <i>existing</i> streets from traffic in nearby developments.</p> <p>NE4 - Air Quality puts the onus on developers, when required, to submit an Air Quality Assessment and/or "to demonstrate a shift to the use of sustainable low emission transport", consciously postponing any consideration of the additional air pollution from the future additional traffic congestion on local roads.</p>

	<p>As an example (see representation submitted on REGULATION 19 TRANSPORT MODELLING FORECASTING REPORT), traffic on the (relatively) main road between the A2 and A256, through Shepherdswell and Eythorne, is projected to grow at 67-91% on the DS1 (do something 1) scenario. In rush hour, this route is already noticeably congested at the pinch points (see appendix for example) and increases of 67% and 91% respectively will jam at each: a classic illustration of 'bottlenecks' in traffic flow.</p> <p>Note that the first four pinch points in point 3 of the aforementioned representation are places surrounded by homes, many of which are very close to the carriageway, and these are where additional pollution caused by the jams will be.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>A full assessment of traffic (of all varieties) on local roads, taking into account an up-to-date assessment of traffic now and of likely growth in the scenarios of minimal, some and maximum planned building growth should be made; in co-operation with KCC plans should then be developed for the appropriate infrastructure enhancements and the planned growth reassessed in the light of this (an iterative process). These plans should not only consider the consequences of traffic growth when building is completed but also take into account</p> <p>a) traffic during construction & b) traffic from completed construction before the enhancements from S106 contributions are made.</p> <p>For each of the likely pinch points, for each of the scenarios, likely air quality should be modelled and fed in to the iterative process of developing the Plan.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>to provide any necessary clarification</p>

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The County Council welcomes paragraph 1 of this policy, and the County Council commits to providing assessment of County infrastructure contributions in order to mitigate the impact of new development on existing services.</p> <p>The County Council requests that the wording paragraph 1 of the policy is broadened to encompass social care – a service which is requiring ever greater investment as a result of our ageing population and one which is not necessarily covered by the reference to health care and community. The inclusion is demonstrated below.</p> <p>1 <i>Ensuring that new development is well served by services and facilities (for example, education, health and social care, community, cultural facilities, play youth, recreation, sports, faith and emergency facilities) and that a mix of uses are provided in new development that support daily lift.</i></p> <p>The County Council emphasises the importance of ensuring that all new and existing community facilities are made as accessible as possible – for example through the provision or retro-fit of Changing Places.</p> <p>With reference to paragraph 3 of the policy, the County Council will consider the use of county developer contributions to increase the capacity of existing community facilities if they are considered appropriate to deliver services which meet the needs of local residents at the time of needs.</p> <p>The County Council also supports the policy that seeks to ensure that new developments are designed to be safe and accessible, to minimise the threat of crime and improve public safety.</p> <p>The County Council supports the objective of promoting quality design in the built environment and would recommend reference is made to the emerging County Council Design Guide which promotes the principles of quality design in new development.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP2
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note: Please see detailed representation (attached at 1770) which has been divided against numerous consultation points. The representation has images within the text. The text below is an extract from the detailed representation 'by an Alkham resident'.</p> <p>10 Footpaths, Cycleways, Bridleways and BOATS</p> <p>The Dover District Plan clearly identifies a wish to achieve a modal shift from car to public transport and develop a network of cycle routes and walkways through the district and I believe Alkham can help the District achieve its aims in this respect.</p> <p>10.1 The Parish is crisscrossed by a series of bridleways and footpaths . Several walks have been written up in detail and can be downloaded from the village web site.</p> <p>10.2 Several problems have been experienced with some of the footpaths, particularly the Bull Run and Pimlico owing to the misuse by vehicles.</p> <p>10.3 A comprehensive plan is therefore required for maintenance, preservation and use of this amenity as part of the local planning proposal.</p>

	<p>Comment 10 In line with the proposals contained within the District Plan I believe thought could also be given to additional paths and cycle routes which should be created to give access safely along the Valley and to develop it as a recreational resource bearing in mind the points raised above about the need to conserve the AONB and SSSIs. If new routes are proposed it is important to consider the ongoing maintenance costs given the problems encountered already on existing routes. This would go some way to achieving the modal shift referenced within the plan.</p> <p>11 Bridleways</p> <p>11.1 Horse riding is a popular pastime within the parish. Figure 2 shows the abundance of bridle paths throughout the parish but again difficulties have been experienced in maintaining these to an acceptable standard.</p> <p>Comment 11</p> <p>Again in line with the Dover Plan this could further be developed as part of a recreational plan for a conservation Area</p> <p>It should be noted that there are four crossing sites along the Alkham Valley Road. Risk assessments by the Traffic Action Group identified these crossings and the short length of Alkham Valley Road between Pimlico and Megget Lane used by riders as very dangerous given current traffic volumes</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Please see appended report.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I can speak to any of the points raised in the attached document</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP3 Housing Growth Table 3.1. Paragraph 3.51.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Paragraph 3.51 indicates 76% of homes proposed will be on greenfield land. The government is quite clear there is a 'brownfield first' policy with respect to housing. Why does Dover Council think this doesn't apply to them. If the brownfield land isn't large enough to accommodate the required number of houses then at least there should be a policy of developing the brownfield land first which is not in the plan..</p> <p>Developers obviously prefer greenfield sites. By including so many greenfield sites in the plan all that will happen is developers will pick these off leaving the brownfield sites undeveloped while green spaces disappear. This is totally wrong and completely contrary to the brownfield first policy.</p> <p>The plan envisages 10998 new homes to 2040 . It is patently absurd to suggest the district requires this many houses. I appreciate the NPPF leads to this calculation but as the plan itself says the council can depart from this in 'exceptional circumstances' that reflect 'market signals'.</p> <p>The fact we have just suffered a pandemic, and are in the midst of an economic and cost of living crisis is ample evidence of 'exceptional circumstances'. We need a reasonable provision of new homes not the wholly absurd number the council is proposing.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>A reasonable assessment of new home requirements given prevailing market conditions that is far less than the 10998 proposed.</p> <p>Implementation of the governments brownfield first policy via site allocations or constraints on timing and sequence of development. As it stands the Local Plan fails totally in this regard and so is unacceptable.</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	N

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object to the proposal in the 2040 Local Plan that Eythorne and Elvington become a "Local Centre". I also object to the proposed building around Elvington. The reasons for both objections are set out below.</p> <p>Elvington and Eythorne, although geographically close, have their own distinct heritage, character, culture and community. Elvington was mostly built in the early 20th century to serve the nearby coal mine at Tilmanstone. Eythorne is very much older, with evidence of occupation from the stone age and in the heart of the village are many buildings from the 18th and 19th century. Eythorne is essentially a community founded on agriculture and it is not, and has never been, a mining village. The development of Tilmanstone colliery did not lead to significant housebuilding in Eythorne. In the late 1960s and early 1970s, however, small housing developments sprang up on land originally used for farming and latterly used by the local school and community.</p> <p>There are no existing problems, or conceivable future ones, that would be better served by combining these two individual communities as opposed to keeping them separate. Indeed, it might well be the case that better, more consensual, decision making would occur if the communities</p>

were kept unique (for example Coldred and its community driven management of the village centre). It is also evidentially the case that communities that keep their identities have less societal problems and better mental health because of the developed relationships and contacts within the community (people looking out for each other etc). As it stands the countryside is in easy walking or cycling distance for anyone no matter where they live in either community, young or old, and this access is enjoyed by many to the benefit of their mental wellbeing. Where there is urban sprawl, loss of green space and loss of identity, quality of life plummets (cf Thanet). Unnecessary and unsympathetic "planning" has irrevocably harmed many communities, villages and towns over the years, resulting in poor and problematic living environments for future generations to inherit.

There is also no conceivable opportunity that could arise that would only be possible by combining the two communities rather than keeping them as they are now.

The issues facing these communities are many but none are due to them not being combined.

It is proposed that the two separate villages of Eythorne and Elvington are developed as a "Local Centre" based on them "having a very good range of services and facilities". This is a considerable overstatement as the two villages have, in fact, a very limited range of both.

In terms of existing GP services, the nearest is Shepherdsweil which is only open between 8.30-10.30 a.m., Monday to Friday, and does not routinely offer an actual GP surgery but only "administrative" or nurse appointments. Overall, the other GP services in the area are stretched to the limit and will struggle to take up the amount of new patients that will arise with significant further new house building in this area. Additional patient numbers will introduce further frustration from the community with getting GP appointments when wanted. Unless GP provision is significantly improved, is properly delivered to time, and is written into the DDC plan then there will be a healthcare crisis in this District.

As well as insufficient GP provision, the area also suffers from inadequate response times from the Ambulance Service, SECAMB. April 2022 saw the worse response times on record for SECAMB. Although things have improved slightly since then, it is still poor and inadequate. Hospital waiting times especially for A&E are also poor. In part, the long waiting times for both hospital appointments and for A&E, as well as poor ambulance response times, are due to the inadequate GP primary care driving people to attend hospital rather than their own GP.

It is practically impossible to get an NHS dentist in this area and most surgeries are not taking on any new patients. This means new arrivals into the area are forced to go private pushing up their cost of living and ultimately leading to further degradation of the NHS provision even though we have all paid for it and it should be readily available.

Local policing is entirely absent in the main and incidences of anti social behaviour, vandalism and theft (for example frequent van break-ins for tools) that have occurred in both villages are largely not dealt with at all by the Police. Most certainly the Police are not being proactive in preventing such crimes. There is also a local drug taking and drug dealing problem, again not tackled.

The bus service for Elvington and Eythorne was always poor and inadequate for it to be used to commute to work. Now KCC has cut bus services further, there will be no public transport serving the villages. This has caused a major problem for school children attending secondary education in Canterbury, Dover and Sandwich and great difficulties for parents in trying to find alternative transport methods that also accommodate their need to attend work. Many in the village have mentioned considering moving away from this area to one that does have public transport for the school trip.

In Section 4.2.11 it mentions a range of tourist attractions available including Wingham Wildlife park, The "Historic park and Garden of Waldershare" and the EKR (East Kent (Heritage) Railway). The first is certainly an excellent attraction. Waldershare Park is, however, a private estate not open to the public. The heritage EKR line runs only one day a week (Sunday) and some bank holidays (not just "a few times a year" as stated in 4.216) from approximately April to October. Although it has a charm of its own and continues to be developed, it is currently of very limited appeal to the general public as it has a short track length and no steam engines.

In the Section on Eythorne and Elvington, and as shown in the plan in Section 4.214, land is shown "Allocated for Employment". This is all very laudable but the employment opportunities must be such that they provide opportunities, careers and suitable salaries for the local population. To date, attracting blue chip employers into this area has not met with tangible success. The Pike Road Industrial Estate businesses such as Tilmanstone Salads, which is a minimum wage employer, are not likely to be attractive to the majority of residents of employable age. More of the same is not going to adequately provide opportunities to deliver a sustainable community. The biggest employers for the communities will probably remain Dover docks and first responders, with others working for service industries from home.

Section 4.218 listing services and facilities has several errors. Eythorne does not have two village halls. It has one pre-cast concrete structure which could be considered a village hall behind Ss Peter and Pauls' Church. It is at the border of Eythorne and Elvington and hence poorly placed for Eythorne residents. It is barely used because of that and is most noted for being a polling station. Eythorne does not have a Cafe and to the best of my knowledge hasn't had one since the last century. It does have a village shop and Post Office combined (they are not separate amenities as might be supposed from the text as written in 4.218). Thus the actual "amenities" in Eythorne are one pub, one "village hall", and one Post Office/shop. It does have two churches (Baptist and CoE) but these are used by a tiny minority of residents and so can hardly be considered to be a significant amenity. According to the Church of England's own figures (2019), less than 1 % of the population attend church regularly. Over 50 % of the UK population are irreligious.

In terms of Elvington, it does not have a church as stated. The rest of the statement regarding Elvington amenities is correct. However, with the advent of services such as Uber Eats, Deliveroo and "Just Eat" etc the community attractiveness of the takeaways is diminished.

Regarding the statement in 4.219, and as clarified above, the settlements do not have much in the way of services and facilities that make them stand out as a place to create a new "Local Centre" unless the critical criteria you are using are possession of a pub, a shop, and unused churches.

Tilmanstone Colliery Welfare Sports Ground, as mentioned in 4.221, is an good facility for sports in the Eythorne and Elvington communities. As a non-profit making charity, however, it requires membership fees or hire fees for use of its facilities and the facilities are thus not freely available. These fees are not onerous however.

The entrance to the primary school which sits on the boundary between lower Eythorne and Elvington, and serves both communities, is on a corner and is a blind bend coming up Church Hill which is problematic for parents dropping off and picking up their children. Church Hill itself is narrow in parts, permitting passage of a vehicle only in one direction at a time, and is a bottle neck. Children arriving by foot from Upper Eythorne have to travel along Shooters hill which already has issues with child safety due to the narrowness of the road and traffic density, resulting in vehicles mounting the pavements to pass. Additional vehicle movements due to more house building will only exacerbate the problem. Traffic build up is also a problem at the staggered junction between Wigmore Lane, Shooters hill and Church hill which has visibility issues. If the new estate exits through Elvington, there will be a build up of traffic on Church Hill trying to exit onto Wigmore Lane using the Staggered junction. If the estate exits through Wigmore Lane then the increased traffic will cause problem trying to cross the staggered junction from Shooters Hill or Church Hill directions.

For sustainability of the community any new building must contain a large component of genuinely affordable housing. At the moment new houses are beyond the reach of the local young and are being bought up by people outside the community, diluting the community common values, or by buy-to-let investors.

It goes without saying that any new development must have searches done to ensure that subsidence and any ground contamination from the extensive Tilmanstone mining activity will not be an issue. Also the area around Elvington village has been found to contain much live WWII ordnance from troops stationed here during the war and this needs to be factored in to pre-building work.

	<p>The building on the proposed area will substantially diminish an important green corridor for wildlife movement (especially insects) and a source of food for many types of wildlife.</p> <p>It is very dissapointing to read in Section 4.2.11 that Dover Dictict Council believe that "Shepherdswell, Eythorne and Elvington have their roots in the short-lived East Kent coalfields". Whilst it is certainly the case that Elvington is a (model) colliery village, the roots of both Shepherswell and Eythorne precede the development of the coal fields by a considerbale margin. Both have been occupied since the stone age, have evidence of Roman occupation, are mentioned in the doomeday book and have recorded history since then. Incidentally, it is stated in section 4.211 (and repeated in 4.216) that the EKR line was originally built to serve the Colliery at Tilmansstone. This is factually incorrect as the line was built to serve any colliery in the area that might prove to be productive and reached as far as Wingham and also to Richborough at its peak. http://www.dover-kent.com/VILLAGES/18-Eythorne.html</p> <p>In conclusion there is clearly not the necessary infrastructure to support the proposed development and nowhere near enough amenities to justify development as a Local Centre. Progressing with the latter is wholly unnecessary. It would be much better if new villages were developed to support increased population, as was done when coal mining took off, to stop urban sprawl.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>For one, it needs to have guarantees on increases in health care, public transport, policing and schooling written in, commensurate with the increased number of houses, for it to be creditable as a plan to deliver sustainable communities.. Rather than continue "urban sprawl" by having "Local Centres" and diminishing sense of community etc, a much better policy would be to build new villages/towns to accomodate the additional housing as was done when mining started in Kent.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	CC1
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	In order to combat climate change, we need to reduce vehicle use and maximise carbon sequestration by protecting farm land, green space, trees and hedging. Given that Dover is a net exporter of labour to towns such as Canterbury, Folkestone, Ashford et al, it make no sense to build ever more houses in the wider Dover region, where there are insufficient jobs. Building more houses just means their residents will increase traffic volumes to get to jobs, especially at Whitfield, where there is no nearby rail link. Each new build home emits 80 tons of CO2 in its construction, so we need to be really sure that we can justify each and every house in each and every area. In addition, building on farmland reduces the capacity of the area to sequester carbon and the increased hard surfaces from building augment the damaging impact of surface water run off. The consequent loss of arable land reduces the district's ability to supply its own food, food which therefore has to be brought in from elsewhere at additional cost to the environment. This is contrary to Section 2.8 and 2.11 of the NPPF as it is unsustainable development.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Reduce the number of houses proposed in Dover district, prioritise brownfield sites in Dover Town and only build houses where there are sufficient jobs for the local population. Take seriously the climate emergency, instead of merely paying lip service to this catastrophe.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	It is vital that this issue is taken seriously. Everyone needs to take steps immediately to tackle the problem. The Dover plan is totally inadequate in this respect and in fact can only exacerbate the problem of global warming. The issue of global warming and climate change must be given a much higher priority.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP3 Housing growth
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Aylesham Parish Council agrees that there is a need to increase housing stock both nationally and within the Dover district. Over recent years, Aylesham has greatly assisted in helping to increase the numbers of homes within the local community (having delivered 917 homes so far with a further 443 to come). However, it is felt that any future development should be kept to a minimum. This relates to SP3 – Housing Growth.</p> <p>South Aylesham (SAP24) includes a large number of positives (such as inclusion of play parks, open spaces, cycle links and protecting and enhancing wildlife) but there is a lack of firm commitments to facilities. The development makes reference to “a new small convenience shop” which is wholly insufficient for the proposed number of new homes.</p> <p>Dover District Council is looking at updating its parking policy for future developments. Currently the Kent Design Guide and the Kent Design Guide Review: Interim Guidance Note 3 to apply planning constraints. It is welcome to see this referenced in the Draft Local Plan. It is important that future developments allow for independently accessible parking spaces (as opposed to tandem spaces) and that car ports or garages are not included as parking.</p> <p>This will greatly improve parking, especially in rural developments.</p> <p>More considerate parking will greatly improve access for pedestrians as well as safety for pedestrians and cyclists.</p> <p>Aylesham Parish Council believes that a new small convenience shop in any new development would be wholly insufficient. Dover District Council should also look to adopt more stringent parking policy reform.</p> <p>It has been noted on previous planning applications that the sewerage pipes in the village may be at their capacity, so any further developments could push them past their breaking point.</p> <p>This should be addressed before any further development can be considered.</p> <p>Current planes for housing development do not go far enough in providing homes that are suitable for disable people or homes that can be easily adapted in the future to meet the needs of home owners. An increase in the number of dwellings built to an accessible standard would be welcomed</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

Due to the governments announcement 5/12/22 the plan is not positively prepared as the development needs must be reassessed. This means it is no longer justified as there now is the room without central government pressure to find reasonable alternatives. It is also not effective as the pressure put on local communities and existing infrastructure is unreasonable and means that it is not deliverable. The plan is also not consistent with NPPF 2021 as the many landscape and heritage assets in Dover District are being compromised by the level of unsustainable overdevelopment which the current plan has allowed.

The Housing Growth statement that the aim is to , “provide a greater choice of high-quality housing to meet the needs of Dover districts’s growing population and changing demographic and address affordability issues”, does not seem internally consistent with the details provided in the plan which underestimates the evidence showing a large part of district population growth is due to aging. The details thus render SP 3 and SP 5 less effective and less sound.

Under the current LDP developers have shied away from the badly needed regeneration of Dover and concentrated on building maximum profit, minimum affordability developments of large homes around the more desirable town of Deal and out in Whitfield. The supposed regeneration of Dover has resulted in another generic shopping centre and a more depressed high street and has not lifted the rest of Dover. The promenade area is uplifted but there seems to be little connectivity to the rest of Dover.

The government department (DLUHC) decision that Dover needs 611 new dwellings a year and a minimum of 10,998 new homes between now and 2040 we find very incompatible with legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008, and unsound. We should be transforming existing housing stock into zero carbon homes as is happening in East Sussex, led by Lewes DC. Combining these numbers with 3.51 and the statement ‘76.7% of the new homes are on greenfield sites, while 23.3% are on brownfield sites’ is unsound and unacceptable to the public.

We feel that our communities are being harvested by developers and our worries are not being heard or needs met in terms of infrastructure. Thanks to certain national newspaper Sunday supplements, Deal is desired as a 2nd home location by the wealthy from London and elsewhere. Holiday homes which spend most of the year empty in Deal, Dover and coastal villages of Kingsdown and St Margarets are stopping locals from buying affordable homes in their own area from existing housing stock.

It must also be pointed out that at least one of the sites included in the 23.3% of brownfield sites is actually a site intended by SEEDA as local nature reserve having rewilded on unstable slag (only rendered stable by tree-planting, a site which DDC forgot to make a local nature reserve in 2004, and it has become a biodiversity hotspot well known to genuine ecologists nationally; Betteshanger Park.

Central government in London, according to Housing Today is imposing a disproportionate amount of housing growth on Kent and the SE. There is a grievous lack of democratic accountability across Kent. So the chances of protecting Kent, of achieving a Growth Strategy that creates climate-friendly jobs and suitably sized, suitably-priced zero-carbon homes for the next generation of local families, are not good. The space available for infrastructure, functions well for compact coastal towns of the size that Deal / Walmer and Sandwich were 5 years ago.

The level of greenfield overdevelopment which has been disastrous under the current weak LDP is putting Deal infrastructure under strain now, so in-fill should make up the majority of the allocations for Deal and that the housing growth specified for District Centre of Deal and around its boundaries needs to be stopped or radically reduced. Either or both of SAP 15 / SAP 34 would destroy the only road access alternative for diverted traffic. (See detailed comments under SAP 15/ SAP 34 below). Housing Growth that threatens gridlock, blocking off a conurbation of 30,000 from access by emergency vehicles, commuters, school buses is not sustainable housing growth and is very unsound.

3.29 I note and welcome a degree of shift from the Reg 18 draft, in that more sites have been selected with a view to using ‘existing infrastructure, facilities and services, with a greater professed purpose to ensure development contributes to the sustainability of local communities and services’.

I note with appreciation both the increase in the number of sites in Dover town SAP 6 – SAP 13, and the SAP 26 Former Snowdown Colliery, Aylesham near a rail station for example. It should be possible to state a determination to ‘make best use of brownfield – non-rewilded – land) without giving developers the opt-out qualification ‘wherever possible’.

On Five Year Housing Land Supply. 3.39 Having stated the Council had 6.03 years land supply plus a 5% buffer; it is not sound, effective or legally compliant to then state ‘the provision of additional sites within the first 5 years of plan period is needed to ensure resilience and promote flexibility;’! Instead of ensuring resilience, it will create exactly the destructive suburbanisation of a rural district that many, many of the resident electorate are most worried about.

3.46 It is the conspicuous lack of a secondary school in Aylesham that prevents Aylesham becoming the small garden town planners aspire to. The provision of a secondary school by 2028 should be a condition of SAP 23. There seems to be a complete lack of planning in the statement that now

3.48 Many, many of the current residents of ex mining village Elvington were / are dependent on buses that have recently (2022) been cut, (following KCC cut to bus subsidies) to get to work in Canterbury, Folkestone, Sandwich, Thanet or Dover, or to get to secondary school, or to get to doctors, or to shop. These people had environmentally sustainable public transport service that has been cut. KCC is saying it is looking

	<p>at potential bankruptcy in 2023, so promises of new services and facilities are met with some disbelief. The selection of this site is ONLY sound with cast-iron conditions to provide all of the services we mention below, including new drainage infrastructure. Council housing in Elvington has been subject to flooding from the sewage system, long overdue for replacement. As in Dover deprived wards, there are unhealthy EPC EFG homes in Elvington that need to be transformed into zero carbon home to lift residents out of fuel and therefore food poverty.</p> <p>3.68 Windfall. Unless existing settlement boundaries are respected, there is suburban ribbon development creep from field to field to field. To render the plan sound it should contain a statement 'Previously existing settlement boundaries will be respected, until such time as town and parish councils may have agreed changes with Dover District Council, in accordance with the principles of Localism Act 2011.' In the current economic climate, it seems very naïve to hope that 'new housing in villages can help them retain existing services such as public transport, retail (many pubs are going under because lack of staff and sky high energy bills) and schools'. Indeed we have lost a large proportion of our bus services in the district.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Push back to central government and demand a reduction in the housing allocation of 10,998 new homes. Now possible after announcements 5/12/22 from Prime Minister.</p> <p>Regenerate Dover as a priority, retrofitting existing housing stock to provide well insulated renewable energy powered homes. Windfall development only should be allowed in Deal, Sandwich and surrounding villages. Create a self sufficient sustainable garden village at Aylesham with secondary school and green infrastructure and homes far beyond future homes standard.</p> <p>Provide better facilities and transport links for Whitfield to ensure that homeowners are not car dependent.</p> <p>Lobby central government for changes to the rules for ownership of second homes. Priority should be given to locals.</p> <p>Make the wording in the plan stronger in favour of brownfield sites eg 3.32 <i>sufficient amount and variety of land</i> should also state that brownfield must be used before greenfield as per stated in NPPF 21.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>2 - Do you consider this part of the Plan sound?</p>	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Aylesham is designated as a “Rural Service Centre” on par with the town of Sandwich. Although Sandwich and Aylesham have equal weighting in the settlement hierarchy, they are not getting an equal weighting in housing development or in terms of investment. The Site Allocations refer to the district’s “existing larger settlements of Dover, Deal and Sandwich” but in reality Aylesham is now likely to have a larger population than Sandwich.</p> <p>Aylesham is receiving 649 new homes (SAP24 and SAP27), whilst Sandwich has a proposed development of just over 200 homes.</p> <p>The Draft Local Plan proposes investment in Sandwich to improve the town and protect its historic environment. In addition, it will see investment in culture. This is not the same for Aylesham.</p> <p>This relates to SP3 – Housing Growth and SP10 – Sandwich Town Centre.</p> <p>The residents of Aylesham should also see their cultural capital widened and enriched in such an extensive Draft Local Plan. Other than house building, there seems to be little else on offer. Funding should be provided for organisations such as cinemas, museums, galleries etc that will help to enrich people’s lives.</p> <p>For a rural settlement, a further 640 houses, on top of a recent development of 1,360 seems to be somewhat excessive.</p> <p>Aylesham Parish Council believes that Aylesham is being left behind. Aylesham must receive equal investment in comparison to other Rural Service centres to ensure the village thrives.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	SP3 - Housing Growth makes no reference to biodiversity. It is essential that the Plan be prepared with biodiversity at its core, allocating development in locations that avoid harm to existing assets, and that development contributes to the creation and enhancement of habitats to create robust ecological networks. The NPPF and the Environment Act makes provisions for the creation of these networks in the form of Local Nature Recovery Strategies.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Langdon Parish remains concerned about the categorisation of East Langdon as a 'Large Village'— see comments below this table. It is unclear as to whether the settlement confines are to be amended to incorporate the proposed site allocation at East Langdon (Policy SAP46 - Land adjacent Langdon Court Bungalow, The Street, East Langdon (LAN003)). The Parish Council would like to see clarity on this, as extending the boundary would potentially open up additional countryside to windfall development. As an aside, the Policies map describes these as the 'settlement confines' as opposed to the 'settlement boundaries'
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	12Settlement hierarchy- East Langdon as a 'larger village': The Parish Council remains concerned about the categorisation of East Langdon as a 'larger village' The criteria for this category states that larger villages have a good range of services and facilities, which serve their own residents and those of nearby hamlets. East Langdon village has no retail facilities. There is a Post Office operated from the village hall two mornings per week. One bus serves the village 5 times a day, although there is no evening service. The main facility is the primary school, however it is unclear as to the viability of the school. The KCC Schools Plan states that there is likely to be a surplus of spaces in the coming years:

<p>if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p><u>“District commentary:</u> We forecast a significant surplus of Year R and Year R-6 places over the Plan period. This surplus is the result of the falling birth rate, with some planning groups having around one quarter increase of Year R surplus in the coming years. As schools are primarily funded on the number of pupils on roll, low Year R numbers will impact on future budgets with some schools choosing to reduce their published admissions numbers.”</p> <p><u>“Dover East Planning Group:</u> Surplus places are forecast throughout the Plan period. However, in the longer term places will be required to support the planned development of Connaught Barracks. Ideally this will be via the expansion of Guston Church of England Primary School. We are continuing to work with interested parties to secure the additional land that will be required to enable the expansion to happen.”</p> <p>The supporting text for the policy says that to help sustain and strengthen the role of these larger villages, additional housing over the lifetime of this Plan is considered appropriate. Criteria (a) of the policy itself states that any development is to be of “a scale that is appropriate to the size of the settlement and the range of services and community facilities that serve it, taking account of the cumulative impact of any allocated sites and committed development”.</p> <p>This is further emphasised in Policy SP2 (Planning for Healthy and Inclusive Communities) which includes the following text: “Ensuring that new development is well served by services and facilities (for example education, health care, community, cultural facilities, play, youth, recreation, sports, faith and emergency facilities) and that a mix of uses are provided in new development that support daily life.”</p> <p>East Langdon currently comprises some 87 dwelling, 69 being concentrated central to the village in the vicinity of The Street, a narrow through-route to other hamlets of the parish. The proposed land allocation SAP46 at East Langdon is for 40 dwellings adjacent to the current north-eastern settlement boundary on BMV quality agricultural land.</p> <p>This location would be accessed via the network of narrow country lanes which lead from the A258 – A256 – A2 district highways into East Langdon Road and The Street. Although SAP46 has been identified as the most suitable allocation site in East Langdon, increasing the village core from 69 to 109 dwellings (58%) would have a profound impact on the local infrastructure, road network and access to services.</p> <p>It is considered that there is a discrepancy between the allocation of 40 additional dwellings to the village (with no requirement for mixed development to include space for other services/ retail/ economic use etc.) in the context of Policy SP2 and clause (a) of Policy SP4 particularly in the context of lack of certainty over the school, which is the primary service in the village, and the rural nature of the road network. The Parish Council consider that either the categorisation of East Langdon as a larger village should be reconsidered, or the number of dwellings in the proposed site allocation should be reconsidered to ensure that it is sustainable in the context of the lack of local services.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>Langdon Parish Council wishes the opportunity to explain the specific issues with East Langdon being categorised as a "Large Village" and the consequential issues it raises if a development was proposed which would increase the dwellings by nearly 60% on the infrastructure, road safety and infrastructure services.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34 - Land at Woodhill Farm, Kingsdown (KIN002)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object strongly to KIN002 being included in the draft LDP for the following reasons:</p> <p>The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii '<i>SPs should provide for objectively assessed needs for housing & other uses, . . . unless(ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole</i>'. The following arguments show why this development would not be sustainable as is a requirement of the NPPF and would have more adverse impacts than benefits. Also as the government have decided on 5/12/22 to stop putting pressure on local authorities with their unsustainable housing targets; the LDP now needs reviewing with respect to how it is putting pressure on rural communities to accept unreasonable developments of this nature.</p> <p>The continued inclusion of SAP34 / KIN002 land at Woodhill Farm, Kingsdown in the LDP is unsound. Despite many concerns and reasoned arguments from residents the only concession seems to have been to reduce the housing numbers from 90 to 50; and it is doubtful that 50 would be the maximum if the proposal were to go ahead. Developers would likely try to negotiate the number back up to 90. The site has now been given a green allocation in the HELAA report despite its many issues and the fact that an adequate full highways assessment has not yet been carried out and the HELAA highways assessment remains amber. The latest HELAA report states that the many failings can be mitigated for within the LDP. I would argue that this is unsound and not justified or consistent with National Policy NPPF 21. The evidence from DDC has not been used correctly. NE2 Landscape character and the Kent Downs; states in section 11.13 that DDC aims: <i>To ensure that all development coming forward over the plan period respects and reflects the character of the landscape in which it is located.</i> The DDC landscape character assessment of 2020 (LCA) shows that SAP34 / KIN002 falls within Ripple F3, <i>open chalk farmland and woodland</i>. NE2 states <i>The classification identifies 17 LCAs and defines issues of landscape management and development management which should be delivered over the plan period.</i></p> <p>Development Management guidelines for LCA F3 include:</p> <ul style="list-style-type: none"> -<i>Conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB.-Seek to reduce lighting and noise impacts on this landscape and in longer views through sensitive highway design/management. Conserve the distinctive narrow winding lanes and grassy verges.</i> - <i>Conserve the open skyline, avoiding the introduction of vertical elements such as pylons, telecommunications masts etc.- Protect and enhance views from more elevated areas and from the coast out to sea and towards landmark features such as Walmer Castle.</i> - <i>Protect the open character of the chalk landscape, preserving elements of tranquillity associated with it.</i> <p>The development of SAP34 would result in the loss of an important buffer between the built environment of Kingsdown along Glen Rd and the AONB. The mitigation measures proposed would also include changes to Ringwould Rd to provide a better access to the site. Guidance for F3 suggests that the narrow winding lanes and grassy verges should be preserved. Ringwould Rd would certainly lose its character and the main entrance to the village would be altered. From within F3 views across to Kingsdown and the sea would be altered by the development of SAP34, the open character of the landscape would be lost and pollution from light and traffic would increase. The HELAA sustainability appraisal incorrectly states; <i>The site has been judged by Council officers to have the potential to moderately affect the District's landscapes, townscapes or seascapes.</i> I would argue that this is not justified due to inclusion in LCA F3 and proximity to the AONB.</p>

NE2 11.19 states *The setting of the AONB comprises land adjacent to or within close proximity of its boundary, including but not limited to land which is visible from the AONB and from which the AONB can be seen.....Within the setting of the AONBs, priority will be given over other planning considerations to the conservation or enhancement of natural beauty, including landscape, wildlife habitats, tranquillity, dark skies, and geological features.*

SAP34 is on the boundary of the AONB and within F3 Ripple on land which should provide a clear buffer between Kingsdown built environment and the setting of the AONB. Priority should therefore be given to conservation of the natural beauty of the AONB.

SP13 states that *the NPPF 2021 requires local plan policies to conserve and enhance the natural environment, to recognise the intrinsic character and beauty of the countryside and the wider benefits from natural capital and ecosystems.* It is unsound to include SAP34 in the LDP as it would detract from the beauty of the countryside particularly the adjacent AONB. The Kent Downs AONB management plan 2021-26 says *the Kent Downs AONB, perhaps more than any other of Britain's protected landscapes – AONBs, Heritage Coasts or National Parks, has experienced and is experiencing severe development pressure.* DEFRA evidence shows *'The Kent Downs AONB stands out as an area which has experienced major, but expected, change, showing a rate of urban growth of almost 10%.pa, with the urban area spreading by 14 ha over the decade'*. The AONB in Dover District has suffered development at a disproportionate rate which indicates that planning pressures on our district are unsustainable. National Planning Practice Guidance (NPPG) confirms that the Duty of Regard is "relevant in considering development proposals that are situated outside National Park or Area of Outstanding Natural Beauty boundaries, but which might have an impact on the setting of, and implementation of, the statutory purposes of these protected areas." I would argue that because the entrance onto Ringwold Rd requires widening and changing of the road which will encroach into the AONB, to mitigate for it being unsafe, this will be detrimental to the setting and indeed directly upon the AONB.

NPPF 2021 11 – making effective use of land - Planning policies and decisions should: 120 b *recognise that some undeveloped land can perform many functions, such as for wildlife, recreation, flood risk mitigation, cooling/shading, carbon storage or food production.* As food security is such a national issue, including SAP34 for development is unsound and unsustainable as good agricultural land would be better served in producing food.

Local Centres: I would argue that the designation of Kingsdown as a local centre is unsound and not justified. Due to the unique nature of its location with AONB to the South as a border, the Sea to the East, heritage coast and cliffs to the South. The 3 narrow access roads serving Kingsdown do not link up easily to other hamlets and smaller villages to provide services. The main settlement of Ringwold is the other side of the A258 arterial road from Kingsdown and better served by Deal or Dover. There is no doctors, a recently reduced bus service, poor transport links for pedestrians and cyclists, no train station. A small village shop with post office and butchers. It is necessary to run a car to get to Deal or Dover for a food shop. The services within the village are by no means comprehensive and running a car is necessary.

The number of 2nd homes and Air BandB's in the village proves that dwellings outnumber homes required, so there is NOT an 'objectively assessed need for housing within the Parish'. To include SAP34 /KIN002 is therefore unsound and not consistent with NPPF 21.

SAP 34 /KIN002 is outside the village boundary and is part of the green space surrounding the village. In the housing section of the draft LDP strategic policy SP4 which refers to residential windfall developments -ie small scale developments there are strict criteria with regards to development.

a -The scale must be appropriate to the size of the settlement and existing facilities - This development would create problems for Kingsdown as the school is small and oversubscribed, we do not have a doctors surgery and few shops. Inadequate public transport makes travelling to secondary schools difficult as well. Between the Regulation 18 and 19 consultations bus services have been further cut. The HELAA highways assessment indicates it is unlikely that the proposed development will generate enough additional patronage to lead to an increase in bus service provision. This contravenes SP1 as the need to travel by private car would be increased.

Allocated money from the developers would not do any good as there is no space and parking in the village for improving infrastructure. The narrow single track roads through the village which are an inherent part of the character and charm of the village are also a limiting factor for the village in terms of further development. Residents of KIN002 would therefore have to use their cars for everything, creating pollution and congestion.

b - development must be compatible with the layout, density, fabric and appearance of the existing settlement and would not result in merging of separate settlements - Kingsdown has a sizeable conservation area and is a pretty seaside village with a shingle beach, woodland, chalk grassland and AONB. This would be a blight on the character and heritage of the village and would set the tone for people as they drive into the village. The HELAA assessment indicates that the entrance to the site would require the road to be widened at this point. Land is apparently available on the other side of the road. I would argue that this contravenes NE2 – the AONB would be compromised by

taking a section of it to widen the road. This would also be detrimental to the character of the village as it would be the first thing that is seen as you drive into the village and would go against the development guidance for Ripple F3 in the LCA 2020.

C and d- There must not be harm to important green spaces - the site is directly opposite the AONB which is highlighted throughout the draft LDP (NE2) as being an important constraint to development. The AONB must be protected. Green fields around the village are very important to the communities health and happiness and this field is surrounded by busy footpaths and bridleways. This has been shown during the current pandemic to be of vital importance. There is also an area of land on Ringwold Rd in front of the site which is managed for nature by the owner and has a large number of nesting birds in the spring and overwintering birds. To the west of the site is an area of managed rare chalk grassland and woodland which has been the nesting and roosting site for many bird species including buzzards and skylarks.

f and g. It would not result in the loss of best and most versatile agricultural land currently used for agriculture and ...It includes an appropriately sized and designed landscape buffer to the open countryside;

NE2 states that proposals affecting the setting of the AONB will only be supported where the development is sensitively located and designed to avoid or minimise adverse impacts on the AONB and its setting and the development would enhance the special qualities, distinctive character and tranquillity of the AONB.

Having a wide access for good sight lines and widening Ringwold Rd using part of the AONB would be contrary to this. Also due to the contours of the land it would be very difficult to adequately screen the site from the AONB and therefore would have a negative impact on it. The site would also be visible from the Dover Road and would change the character of the landscape which is LCA Ripple F3.

h It would not have a significant adverse impact on the living conditions of existing adjoining residents;-

All residents of Glen Road would have their gardens overlooked and their privacy compromised. This would be contrary to their legal human right to enjoy their homes peacefully. During the building phase there would be a lot of noise, disruption and dust. Their views across the AONB would be blighted. The large number of cars would also create localised pollution and noise once such a development was completed. There would also be an increase in light pollution.

i Where development would result in the loss of active employment, open space, sport or community facilities within the settlement that such development is consistent with the requirements of policies EN2, PM5 and PM6 of this Plan; This development would not be sustainable as it would result in the loss of active employment in the village as the special character of the village would be affected and it would not be as desirable to visitors from outside the area.

j. Traffic movements generated from the development do not result in severe impacts to the highway network that cannot be mitigated

- residents of this proposal would all have to use their cars to travel to nearby towns or to join trains or bus routes safely for work. This would create extra pollution contrary to the SP1 climate change strategy. The HELAA highways assessment shows that the site is still designated as orange. However the viability assessment shows it is now green so that the site can be pushed forward to reg 19 stage and concerns can be mitigated within the LDP. I consider this to be unsound. The mitigation is chiefly concerned with using some of the AONB to widen the road. This contravenes the NPPF as it would cause more adverse impacts than benefits to the village and AONB. It is unsound to put any more pressure on the 3 narrow, characterful roads into the village as emergency vehicles will not be able to safely gain access. When the A258 is closed as it was recently due to a fatal accident and traffic diverted into our village the gridlock in Kingsdown is dangerous. The HELAA assessment is also assuming that there is a good bus service; however, this has been cut. The HELAA assessment is underestimating the number of car movements that a development of this size would generate at 60 – 70 at peak times. It is more likely with the large 4 or 5 bed homes that would be built here that this would be in excess of 100.

TI1 Development should, in so far as its size, characteristic and location -Give priority to the needs of pedestrians, cyclists, users of public transport, car sharers and users of low and ultra-low emission vehicles. This site is outside the village boundary and not well served by footpaths or cycle paths. The site is crossed by a footpath ER5 which connects to the village along a dirt track with no lighting. The site will exit onto Ringwold Rd which is not safe for children to cycle down and does not have any footpaths. The HELAA Sustainability appraisal is incorrect with its summation of minor negative with regards to climate change mitigation and sustainable transport. This has not taken into account the cutting of bus services to the village and the fact that it is not easy to walk or cycle to Deal or Dover.

TI2 New accesses and intensified use of existing accesses onto the road network will not be permitted if it would result in a clear risk of crashes or traffic delays unless the proposals can incorporate measures that provide sufficient mitigation. I consider this site to be unsound as there would be an increase in crashes and traffic delays. Widening the junction at the exit would not do anything for the rest of Ringwold Rd. Land either side (opposite the AONB) is not owned by the same party as KIN002 and so cannot make up part of this development. The access is also very complicated. It is used by visitors to the play area and the landowner to the left as you enter the field from the road. No mention is made in the HELAA highways assessment of the landowner needing access. ER5 also crosses the entrance which would therefore be dangerous to pedestrians crossing from the field back to the village. ER5 is a very busy path used by dog walkers on a daily basis. The sight

lines onto Ringwould road from either direction are poor. Ringwould Rd is very narrow in places and in places, 2 vehicles cannot pass each other. Turning left out of the site would be onto a narrow road going into a 20mph zone. Turning right is in a 50mph zone with a bridleway and footpath crossing with poor visibility and slow tractors turning out onto the road. There has already been an RTC resulting in a fatality and serious injury on Ringwould Rd. I would argue that issues with access alone mean that this site is not suitable and unsound for development. A medium pressure gas main crosses KIN002 diagonally and crosses the road at this access point which would require careful consideration when changing the access. This would cause a lot of disruption to the villagers as this is the only classified road in and out of the village and as poor as it is, is the main route to the A258. If traffic had to divert via Deal this would create extra pollution and congestion for a protracted period of time which would be contrary to SP1 and the climate emergency declaration by DDC.

T12 Applicants must demonstrate that traffic movements to and from the development can be accommodated, resolved, or mitigated to avoid severe cumulative residual impacts.

The streets of Kingsdown particularly in the conservation areas are narrow and some unmade and unadopted. There are no footpaths in Upper Street where pedestrians are often to be found walking down the road to the shops. Lorries have repeatedly damaged property in Upper Street and the Rise and this is why there is a weight limit of 7.5 tonnes on Ringwould Rd. During the development phase the construction traffic would not safely be able to get in and out of the site. Also how can construction traffic get to the site if there is a 7.5 tonne weight limit on Ringwould Rd? An increase in 50 houses would result in far more car movements than the 60 – 70 car movements in rush hour predicted by the HELAA highways assessment. There would also be all the delivery vans, workmen etc. If these then turn left down the village to avoid the difficult junction at Ringwould onto the A258 they would cause gridlock in the village. The current windfall developments of a few homes per year is enough to cause problems within the village due to vehicle movements.

These criteria refer to windfall developments which is how Kingsdown has grown slowly over the last planning period. These criteria are very sensible when applied to a rural settlement with poor infrastructure such as this. Any large scale development other than windfall would have a devastating effect on the community and could be considered as a disproportionate and unsustainable development in terms of this settlement.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove SAP34 from the LDP.
Housing targets particularly with respect to characterful rural settlements need to be renegotiated in light of new government rulings.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	3.80, 3.82, 3.85, SP5.2
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	N/A
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>In relation to policy 3.80 the evidence to discount Dover Centre from any and all obligations to provide affordable housing seems weak. The area is a large one, and developments can be assessed individually for viability and the timespan of this local plan means that developments to have no contribution to affordable housing is both unjustified. This policy will only create an imbalance of house pricing in the area, one deeper than if the 30% was beholden too. Shared ownership and Intermediate Rent are other forms of affordable housing that would not impact viability. By not providing affordable housing there is an inherent discrimination between who is able to live in Dover Centre. Those not able to live in the centre how had previously done so will be pushed away from their jobs, childrens schools etc. There is also a shorter term consideration - the impact of the cost of living crisis which will likely push more towards needing affordable housing. If there is no provision for affordable housing in the centre the issues I raised above about being forced out will affect these people.</p> <p>In regards to policy 3.82 the need for affordable housing continues to grow and therefore the possibility of all-affordable housing schemes become more and more important. With the grant funding that can be tapped into with all-affordable developments they can be both financially viable for the developer and provide the type of social development that only all-affordable schemes can.</p> <p>Policy 3.85 - Stress if the local connection/key worker/income cap requirements will or will not be implemented rather than it being discussed as possibility. A feature like that needs to be concrete. It also needs to be drafted without affecting mortgageability of intermediate (SO or rent) for Registered providers and prospective purchasers.</p> <p>Policy SP5.2 - Stress the necessity of social rented housing over affordable rented, SR can gain higher grant funding and therefore can be both competitive to the developer and more affordable to those moving into the units.</p> <p>To summarise:</p> <ul style="list-style-type: none"> • S106 levels to be maintained at policy (national policy) levels. • Tenure split should again follow. • Affordable Home Ownership Shared Ownership to have option to convert to Intermediate Rent to Homebuy • SP5 to stipulate Social rent not Affordable Rent • First Homes should not be introduced at the expense of rented housing. • First Homes technically are not as affordable as SO in our opinion. • Management/Estate charges should be apportioned on a floor area and not on a unit basis. • 100% affordable projects should be prioritised and supported through the local plan.

	<ul style="list-style-type: none"> • Large sites should be broken into smaller parcels to allow SME's and RP's to develop – thereby allowing a competitive position against housebuilders and to increase the rate of construction.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	N/A

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Housing Requirement (Paras 3.30 - 3.38 inclusive of Table 3.1) The Regulation 19 Local Development Plan (LDP) proposes to cover the eighteen year period from 2022 up to 2040. This approach is line with paragraph 22 of the NPPF and is supported. For the purposes of calculating housing needs, DDC have used the 2022 standard method calculation results, which equates to 611 dwellings per annum (dpa). This results in a total Local Housing Need figure of 10,998 dwellings. Whilst this is line with paragraph 61 of the NPPF, it

represents the minimum figure, and the evidence base suggests that no consideration has been given to uplifting this to support economic growth.

The Regulation 18 LDP suggested a 10% supply resilience buffer to the Local Plan housing target (Table 6.1 of the Regulation 18 LDP) in order “to maintain a healthy supply of housing”. It was confirmed in the supporting text that this was justified in order to “provide flexibility and choice, and to account for changing circumstances and under-delivery”.

There is a history of under-delivery of housing in the authority. The adopted Core Strategy established a housing requirement of 10,100 homes over a 20-year plan period. The most recent Authority Monitoring Report (AMR) identifies that housing delivery up to March 2021 has seen 5,388 dwellings delivered over the 15-year period up to that point. This equates to an average of 359 dpa against an annual requirement of 505 dpa. There has been just one year in fifteen when the housing target has been met.

One of the principal reasons for the lack of delivery is due to strategic allocations being slow to come forward. As a result of this, the Regulation 18 LDP also included a 10% non-implementation discount to the extant supply.

Richborough raised concern with these figures as part of the consultation exercise and suggested a higher rate of 20% was more appropriate for both the supply resilience buffer and the non-implementation discount.

The Housing Topic Paper 2022 states at paragraph 8.7 that an 8.4% contingency buffer is to be added to the total housing need figure for the 18 year plan period to allow for supply resilience. Whilst Richborough supports the intention of DDC to plan to meet the Local Housing Need figure calculated using the standard method, as required by paragraph 61 of the NPPF, poor housing delivery over the last fifteen years (both district-wide and specifically at the Whitfield urban extension) means 8.4% supply resilience buffer is insufficient and not justified. Given the level of infrastructure which is required to deliver the allocation combined with the conclusions of the Whole Plan Viability Study and the track record of the supply trajectory, Richborough remain of the view that this should be increased to 20%.

Paragraph 9.6 of the Housing Topic Paper and Table 3.1 of the LDP confirm that a 5% non-implementation discount has been applied (with the exception of the extant permissions for the Whitfield Urban Expansion). The Housing Topic Paper seeks to justify this lower discount by referring to completions data for the 4 year period 2018/19 - 2021/22. Richborough does not consider this approach to be justified as there are too few sample years and the period mostly covers the period of significant market fluctuation caused by the Covid 19 pandemic.

The calculation for the non-implementation discount should include a greater timeframe, including years prior to 2018/19. Richborough considers a higher non-implementation discount of 20% should be applied to ensure the Local Plan is sound. This is in addition to increasing the non-implementation discount to 20%.

Housing Distribution (Paragraphs 3.41 - 3.48)

DDC established the principle of the current settlement hierarchy in order to support the preparation of the adopted Dover District Core Strategy (DDCS). It was deemed that a clear approach towards planning for the variety of settlements was required which was based upon an understanding of current characteristics and function as well as any aspirations for the future. The stated intention at paragraph 3.7 of the DDCS is that the settlement hierarchy should set out the general role of individual settlements and provide a basis for the distribution of development across the District.

DDC therefore carried out the ‘Dover District Settlement Review and Hierarchy’ (2008) in order to develop the settlement hierarchy. This assessed the facilities, functions and accessibility of the District’s towns and villages and the resultant hierarchy was set out in DDCS Policy CP1.

Dover was identified as a ‘Secondary Regional Centre’ through the Regional Spatial Strategy and comprises the major focus for development in the district.

It was also identified that the town of Deal (incorporating the built-up parts of the parishes of Sholden, Walmer and Great Mongeham) comprises the only District Centre and that its function was to act as a ‘secondary focus for development’.

The supporting text to Policy CP1 (paragraph 3.9 of the DDCS) highlights that the rural area is a strong feature of the District and outside of the top two settlements of Dover and Deal, the remaining tiers provide a focus for development outside of the urban areas. Sandwich was identified as a Rural Service Centre, with the remaining settlements comprising Local Centre, Village or Hamlet.

Policy CP1 reiterated that the location and scale of development in the District must comply with the Settlement Hierarchy.

Updated Settlement Hierarchy

In order to inform the preparation of the Regulation 18 Local Development Plan (LDP), DDC undertook an updated Settlement Hierarchy Study (2020) with the aim of identifying the most sustainable settlements based on the range of facilities and services present. However, the assessment focuses principally on the rural area settlements, given that the sustainability credentials of the three main centres of Dover, Deal and Sandwich

are well established. Richborough is of the view that the LDP would be more effective had Dover, Deal and Sandwich been included within the study and the LDP was therefore informed as to the comparative sustainability of these top three settlements.

An updated Settlement Hierarchy is provided within Appendix E of the Regulation 19 LDP and is referenced within the supporting text to Strategic Policy 3: Housing Growth. This retains Deal as the sole District Centre above Sandwich and Aylesham, but below Dover as the Regional Centre. Deal is therefore a strategic location for new development with a range of sustainable transport options, as well as extensive services and facilities accessible within the town. Paragraph 1.13 of the updated 2022 Settlement Study highlights that Deal is the 'second town in the District' with a population in 2020 of 30,824. This comprises 26% of the district's population, which is significantly more than Sandwich with around 5%.

Richborough supports the principle of reviewing the settlement hierarchy based on sustainability, as well as including the hierarchy within policy in the Local Plan. Richborough also supports the inclusion of Sholden within Deal. This approach is supported by paragraph 79 of the NPPF which highlights that *"housing should be located where it will enhance or maintain the vitality of rural communities. Planning Policies should identify opportunities for villages to grow and thrive, especially where this will support local services. Where there are groups of smaller settlements, development in one village may support services in a village nearby"*.

As noted elsewhere in these representations, Richborough has an interest in Land South West of Sandwich Road, Sholden. Part of this site secured outline planning permission (Ref: 21/00402) for up to 110 dwellings in March 2022. However, Richborough is of the view that the draft allocation should be expanded to include a larger area of land, which is also under their control, to deliver approximately 250 new dwellings. The deliverability of the wider site and benefits associated with the development are covered in response to Chapter 4 (Housing and Employment Allocations) of the Regulation 19 LDP.

Distribution of Development

Core Strategy Approach

Policy CP2 of the DDCCS addresses the overall development requirements and confirms that the strategy sought to allocate land for up to 14,000 homes and to deliver a minimum of 10,100 homes (equivalent to 505dpa) by 2026, as required by the South East Plan. The table provided in the policy confirms that of the 14,000 homes, land for 7,750 is allocated through the strategic allocations and that land to accommodate the balance of 6,250 was to be allocated through the Site Allocations Document, which followed.

Policy CP3 of the DDCCS is titled 'Distribution of Housing Allocations' and sought to establish where the housing requirement set out in CP2 will be met. Paragraph 3.27 confirms that the broad distribution will be guided by the strategy objectives and the settlement hierarchy. Paragraph 3.28 highlights that whilst further investigation into the Middle/North Deal area will be undertaken, the provision in Deal will be of a 'lower order', geared around meeting the local rather than strategic needs. This approach clearly went against the findings of the Settlement Hierarchy which supported the DDCCS, as it identified Deal as the 'secondary focus for development in the District; suitable for urban scale development'.

Policy CP3 identified the following distribution:

"Land will be allocated to meet the housing provisions of Policy CP2 in accordance with the following distribution:

Dover: 9,700 (70%)

Deal: 1,600 (10%)

Sandwich: 500 (5%)

Aylesham: 1,000 (7%)

Rural: 1,200 (8%)

Total: 14,000 (100%)"

The DDCCS therefore placed an emphasis on housing delivery within the Dover Town area, with the strategic urban extension at Whitfield being the primary focus. Based on this distribution, delivery of less than a third of all dwellings was allowed for within the other settlement areas and rural hinterland of the District.

Historic Housing Delivery

DDCCS established a housing requirement of 10,100 homes over a 20-year plan period. However, Figure 4.3 of the 2020/21 AMR confirms that housing delivery to date has seen 5,388 dwellings delivered over the 15-year period of the DDCCS. This equates to an average of 359 dpa against a requirement of 505 dpa. There has been just one year in fifteen when the housing target has been met.

There is evidence of the negative social impact of the failure to deliver sufficient housing in the DDC over this period, with the median house price to income ratio in the District deteriorating from 6.1 in 2009 to 9.25 in 2021 (ONS 2022) and a worsening by 30% in the year 2020/21

alone. The under-delivery of housing has contributed to deteriorating affordability in the District. Affordability is a critical social component of sustainable development that acts as a barrier to local people being able to access housing. It should be accepted that there is an urgent need to boost housing delivery within DDC.

Analysis within the Housing Topic Paper (2022) confirms that the delivery of housing since 2010 has largely been through windfall development with a significant deviation away from the planned distribution set out in the DDCS. Over a 10-year period from 2010, windfall development has accounted for nearly half of all completed dwellings within the district (44%) and that 71% of these were new builds.

Paragraph 3.33 of the DDCS seeks to ensure that maximum use is made of suitable brownfield land in order to reduce the use of greenfield land wherever possible. Paragraph 3.34 provides more detail on the expected split between greenfield and brownfield and states:

“The Council has extensively researched the availability of brownfield land that could be suitable for housing redevelopment. The Strategic Housing Land Availability Assessment has been used to inform the expected contribution from brownfield land (around 43%) and therefore also the scale of greenfield land (around 57%), that would be needed to meet the overall requirements.”

Figure 7 of the Housing Topic Paper (2022) provides a breakdown of brownfield / greenfield completions between 2010/11 and 2020/21. This table confirms that during that period, 4,241 were completed with 2,241 (53%) on greenfield sites and 2,000 (47%) on brownfield sites. This demonstrates that brownfield sites overdelivered as a proportion of completions based on the expectation at the time of adoption.

The Whitfield Urban Expansion is a greenfield site located on the edge of Dover and was allocated for development in the DDCS and anticipated to deliver 5,750 new homes before the end of the plan period in 2026. Although planning permission has been granted for 1,483 dwellings, as of April 2021, only 363 dwellings have been completed on the site. Whilst the delivery of required infrastructure has been a constraint to development (including upgrades to the Whitfield and Duke of York roundabouts) the Housing Delivery Forum presentation also highlights the fact that the land is controlled by only a few landowners. There are clearly issues with viability given that an application was recently approved on Phase 1C for 249 dwellings (22/00029) and only 4 dwellings are to be provided as affordable.

As acknowledged in the Housing Topic Paper (2022), and highlighted above, windfall development has made an important and sustained contribution to the provision of additional homes in DDC. The level of windfall development in settlements such as Deal has taken up much of the slack in regard to housing delivery, rather than plan led development, since the adoption of the DDCS. Figure 4 of the Housing Topic Paper highlights that overall housing delivery in Deal (28%) falls only slightly short of Dover (31%) in spite of the distribution pattern established by Policy CP3. It is clear that the failure of the DDCS to meet the housing targets is not due to overreliance on brownfield sites, but the proportion of development which was skewed unnecessarily towards to unviable locations in and around Dover. This is further evidence by the fact that draft Policy SP5 confirms that schemes within the Dover Urban Area cannot viably provide affordable housing and is therefore not required.

There was a lack of justification for the proportions set out in Policy CP3, particularly in light of the conclusions drawn by the Settlement Hierarchy Study, which highlighted that Deal should accommodate development of an ‘urban scale’.

Sustainability Appraisal

Paragraph 3.33 of the Regulation 19 LDP confirms that as part of the preparation of the Local Plan, DDC identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA). These are set out below:

- Spatial Option A: Distributing growth to the District’s suitable and potentially suitable housing and employment site options (informed by the HELAA and ELR).
- Spatial Option B: Distributing growth proportionately amongst the District’s existing settlements based on their population.
- Spatial Option C: Distributing growth proportionately amongst the District’s existing settlements based on the District’s defined settlement hierarchy (informed by the Settlement Hierarchy Topic Paper).
- Spatial Option D: Distributing growth in the same way as the adopted Local Plan, focussing most growth in and around Dover.
- Spatial Option E: Distributing growth more equally across the District’s settlements: Dover, Deal, Sandwich and Aylesham, as well as the rural villages.

Paragraph 5.8 of the Housing Topic Paper (2022) states that *“the conclusion of the SA was that Spatial Options C (settlement hierarchy) and D (adopted Plan Dover focus) generally perform the most strongly against the SA objectives, particularly when delivering the baseline growth scenario”*. After undertaking its own review of the SA, Richborough strongly rebuts this assertion.

Table 4.2 of the SA provides a summary of the likely sustainability effects when the Sustainability Appraisal objectives are considered. This clearly demonstrates that by any measure Spatial Option C performs much more strongly than any other spatial option. For the preferred growth option (medium), Spatial Option C scores significant positive effects (without significant negative effects) in six of the eleven categories. This is twice as many as any other option.

Spatial Objective 1 (SA1) relates to housing, and specifically the aim: 'to help ensure that everyone has the opportunity to live in a decent, sustainable and affordable home'.

Paragraph 4.67 of the SA highlights the issue that providing new housing in areas of the District where house prices are currently highest would respond positively to areas of highest demand. Sandwich and Deal are more expensive than Dover and provision in these locations will help to address affordability by increasing housing choice and providing new affordable homes (paragraph 4.66 of the 2022 SA). Richborough agrees with this assumption and that Spatial Option C scores highest as it will spread delivery evenly across the district, particularly in areas where there is certainty that delivery is viable.

However, it is also worth noting that paragraph 4.68 states that *"the provision of housing at larger sites, most likely through urban extensions in the case of Dover District, will provide most opportunities for the delivery of higher numbers of affordable dwellings"*.

The large strategic locations and the ability to provide affordable housing has been tested as part of the Whole Plan Viability Study (2020). Table 12.6a of the Study demonstrates that when including the recommended policy mix of affordable housing as well as other matters such as bio-diversity net gain and Future Homes Standard, the strategic locations at Aylesham and Whitfield are either not viable or only marginally viable. The Regulation 19 LDP addresses this point in paragraph 3.82 and states the following:

"In terms of the rest of the district, there are three different value areas which impact upon the ability of development to deliver affordable housing. Within the higher and medium value areas the viability evidence demonstrates that development can support a requirement for 30% affordable housing. Within the lower value areas, the delivery of 30% is more marginal and would depend upon the level of developer contribution being sought for other infrastructure. However, the 30% requirement for the rest of the District outside of the Dover Urban Area is the starting point for the policy position."

Richborough is of the view that the viability of sites and the ability to contribute affordable housing is crucial to the selection of growth options and specific sites in DDC. The failure of the DDCS in meeting housing needs was the result of not rigorously testing the viability of the strategic allocations, combined with the skewed distribution towards Dover.

DDC has also failed to fully update the Whole Plan Viability Assessment for the Regulation 19 LDP, and merely produced an update note. Many factors relating to the cost of construction, including the availability of labour, price of materials, increased interest rates and the availability of development finance have altered significantly since that time and warrants a full update to understand the consequences.

Richborough is therefore of the view that the SA has not correctly assessed the options against SA1. The significant negative effects associated with Spatial Options A and D should be noted accordingly as they would be unlikely to meet the overall housing needs for the District. Given the infrastructure costs associated with urban extensions and based on the specific findings of the Whole Plan Viability Study, Richborough is of the view that the SA is incorrect to assume that larger sites will deliver higher numbers of affordable dwellings.

SA4 relates to reducing travel and encouraging sustainable alternatives. Paragraph 4.78 highlights that where new development has easy access to services and facilities and employment opportunities it is more likely that there will be a reduced need for travel. It is concluded that the options that perform the best against SA4 are those that deliver growth in close proximity to major settlements and sustainable transport links and the more even the spread of growth the less likely that road congestion will be generated. Similar conclusions can be drawn for SA6, which relates to air pollution. Richborough agree that Spatial Option C is clearly the highest scoring option in this case for SA4 and SA6.

Whilst the SA highlights significant effects on natural resources, climate change, biodiversity, historic environment and landscape, this is most likely the case for any spatial option that is selected. Richborough is therefore of the view that the results of the SA assessment should clearly highlight Spatial Option C as the strongest performing option. This should be carried through more definitively into the distribution of development set out in the Local Plan at Strategic Policy 3. A more even spread of development which is focused on the results of Settlement Hierarchy and the SA would be more effective and would ensure the Local Plan is justified.

Preferred Spatial Option

Paragraph 5.9 of the Housing Topic Paper 2022 confirms that despite the preferred Spatial Options in the Sustainability Appraisal being Options C and D: *"given the environmental constraints that exist around Deal and Sandwich, very few suitable and potentially suitable sites have been identified in these towns. Given this, the Council's preferred option for the distribution of housing and economic growth will comprise a combination of options A (HELAA sites), C (settlement hierarchy) and D (Dover focus). The distribution of housing and economic growth in the District will therefore primarily be based on the settlement hierarchy, and influenced by site availability, environmental constraints and factors of delivery."*

Paragraph 9.19 of the Housing Topic Paper relates to the 'distribution of housing across the district'. This states that Table 10 provides a percentage breakdown of the distribution of housing to each settlement and includes Local Plan Allocations and the Ash Neighbourhood Plan. However, this is incorrect as it only provides a breakdown of distribution for the allocations, which total 5,788 dwellings. Richborough is of the view that the distribution of the claimed supply of 11,924 dwellings (from Table 3.1 of the Regulation 19 LDP) should be provided.

Deal (including Walmer, Sholden, Gt Mongeham), the second most sustainable settlement in the District as a District Centre is identified as contributing only 3.85% of the total housing to be delivered through allocations, up to 2040. This apportionment of housing growth sees Deal receive less housing growth through allocations than the settlements in the tier below, Rural Service Centres. This figure is only 0.46% higher than Ash which is identified as a Local Centre in the settlement hierarchy, and which are defined as providing “*services for a local rural area and a secondary focus for development in the rural area at a scale that would reinforce their roles*” (Regulation 19 LDP Appendix E)

Richborough considers the preferred Spatial Option to be inconsistent with the supporting evidence base, the Sustainability Appraisal, and the Local Plan is therefore not justified or legally compliant and may not deliver sustainable development in compliance with national policy. The LDP fails to provide sufficient evidence as to why Deal cannot accommodate more housing during the plan period. Deal is a District Centre in DDC’s settlement hierarchy, is highly sustainable and is referenced as being a secondary focus for development in the District (Appendix E). Despite this, Deal and its supporting centres are apportioned less than 4% of the housing allocations across the next 18 year period.

We note that Option C is the only option that scores significantly positively for transport of the five options tested and is clearly the best option in transport terms. This option would distribute growth proportionally amongst the settlements based on the settlement hierarchy.

As a secondary focus for development Deal, by definition, must be well served by active and sustainable travel options. Deal is well served by rail, with direct train services to London, Deal and destinations towards Faversham. As expected for a settlement of the scale of Deal it is also well served by buses.

By concentrating development in Dover, the Regulation 19 LDP will also concentrate traffic impacts on a network that is already under pressure at certain key locations. By way of example, it is noted from the latest WSP Regulation 19 Transport Modelling Forecasting Report that, even after mitigation is put in place, drivers approaching the roundabout from the A256 Whitfield Hill in the ‘Do Something’ scenario during the PM peak hour are forecast to experience delays of over 13 minutes in 2040. By distributing the housing in a manner more proportional to the settlement hierarchy, the traffic impact of the development would also be more evenly spread.

It is also clear that the highway network in Deal is forecast to be under far less pressure than that in Dover as shown at Table 6-13 of the WSP Regulation 19 Transport Modelling Forecasting Report clearly indicates. The table shows the forecast 2040 Do-Minimum scenario of the Dover and Deal Traffic Model.

Table 6-13 highlights those links and junctions (nodes) within the model that are beyond (red) or approaching (amber) capacity in one or other of the peak hours. The great majority of those links are within Dover and only one link in Deal is identified as having a volume/capacity ratio that exceeds 100%. The District Council’s preferred distribution of so little housing to Deal is, in transport terms, illogical.

Commentary in Table 6-16 of the WSP Regulation 19 Transport Modelling Forecasting Report seems to suggest that the sole transport reason for directing growth away from Deal relates to the future forecast operation of the London Road/Manor Road and London Road/Mongeham Road junctions in one or other of the peak periods. It is also suggested that no network mitigation would be possible. This is despite evidence that the highway network taken across Deal as a whole will operate more efficiently than the highway network in Dover where growth is concentrated.

If DDC is so concerned about the operation of the highway network in Deal, despite evidence to the contrary, then more detailed consideration should have been given to the Deal Bypass/Relief Road option which it is understood was discussed and dismissed at an early stage of the Local Plan review without due thought and investigation. Furthermore, there are network management options that could be pursued to give further priority along London Road and reduce delay at both the Manor Road and Mongeham Road junctions. No such options have been sufficiently investigated by DDC through the plan-making process.

To ensure the LDP is justified and effective, greater weight should be given to Spatial Option C in the Sustainability Appraisal and the housing land supply should reflect the adopted and emerging settlement hierarchy with a more appropriate and sustainable apportionment of new houses to Deal and Sholden.

Table 3.1 of the Regulation 19 Local Development Plan (LDP) confirms that the claimed overall supply figure of 11,924 dwellings exceeds the housing requirement figure of 10,998, by 926 dwellings. This includes 3,829 dwellings from the Extant Supply, which is defined as permitted development not yet built. However, the sites which make up the extant supply are not listed anywhere within the evidence base and isn’t broken down sufficiently within the Housing Trajectory provided at Appendix D of the Regulation 19 LDP. Richborough is of the view that this supply, and how it contributes to the housing trajectory, should be clearly evidenced and broken down site by site. The evidence should also demonstrate how the supply reflects the defined settlement hierarchy by confirming where development has been distributed.

Policy SP3 confirms that the majority of housing will be in Dover Town and Whitfield Urban Extension. Reliance on these areas is evidenced in the Regulation 19 Local Development Plan (LDP) which states that additional land beyond the existing commitments has been identified with an approximate capacity of 1,112 dwellings.

Whitfield Urban Extension (UE) is estimated to deliver 6,350 dwellings (including emerging allocations and existing allocations partly built out). The adopted Whitfield UE is the subject of an adopted Masterplan (adopted April 2011). Despite this allocation and the adopted Masterplan there have been only 363 completions on site. DDC suggest an expected increase in the rate of delivery at the Whitfield UE once key infrastructure is complete or construction has begun.

Richborough has concerns with the proposed spatial strategy and the distribution of such significant levels of development to Whitfield UE and Dover town, particularly as the DDC evidence base highlights viability issues within these areas.

The Whole Plan Viability Study provides the following description of the various value areas across the District:

- Higher – north of the District
- Medium – Coastal towns to the east of the District and the rural areas and settlements to the south of the District
- Lower – sites within and adjacent to Aylesham, sites adjacent to wider Dover, principally to the north and west of the built-up area and Whitfield.
- Dover Town – relatively tightly defined built-up area

Whitfield and Dover are in lower value areas, with Dover Town being the lowest value area. The previous under delivery of housing in the Whitfield UE is likely to have been impacted by viability concerns, which have not improved.

Deal and supporting settlements, including Sholden, are within the medium viability area and the only District Centre with the function of acting as a 'secondary focus for development'. Despite this, the proportion of housing site allocations to this location is only 4% of the total for the District (Referencing figures from Table 3.3 of the Regulation 19 LDP).

The identified supply of housing is not effective or justified and it has not been sufficiently demonstrated that the identified housing allocations are viable. Additional allocations are required in Medium and Higher zones and in accordance with the adopted settlement hierarchy. Significantly more growth should be focussed within Deal and outlying settlements including Sandwich.

Table 3.2 (page 32) of the Regulation 19 LDP explains that DDC considers it can demonstrate a deliverable 5 year housing land supply (5YHLS) of 4,143 dwellings which against the proposed housing requirement and a 10% buffer equates to 6.16 years. We make the following comments.

- The base date of the 5YHLS calculation is the date the requirement and the supply relate to. Table 3.2 and the trajectory set out at Appendix D use a base date for calculating the 5YHLS of 1st April 2022. However, by the time the Local Plan is examined, it is likely that the most up to date position will be at 1st April 2023 and therefore we respectfully request the opportunity to comment on the Council's position at the most up to date base date through the examination of the Local Plan.
- In terms of the requirement, in accordance with paragraph 74 of the Framework, the proposed housing requirement of 611 dwellings should be used. However, any shortfall from the base date of the plan period of 1st April 2022 should also be added to the 5YHLS requirement. This should be addressed in full in the five year period (i.e. the Sedgefield method) in accordance with paragraph 68-031 of the PPG. This will need to be reassessed at the new base date during the examination.
- In accordance with paragraphs 74 and 75 of the Framework, the 10% buffer should be used if the Council's 5YHLS is confirmed through the Local Plan unless the latest Housing Delivery Test (HDT) result when the Local Plan is adopted is less than 85% and then the 20% buffer would apply.
- On the supply side, we note that table 3.2 of the draft Local Plan states that the deliverable supply at 1st April 2022 is 4,143 dwellings. This does not align with the trajectory in Appendix D, which is 3,993 dwellings. It is also different to the position set out in the Council's latest 5YHLS statement, which is 3,868 dwellings. Nevertheless, it is likely to change again by the time the Local Plan is examined when the base date is changed.
- Whilst we respectfully request the opportunity to comment on the latest 5YHLS figure at the time of the Local Plan examination, the Council will need to provide clear evidence for any sites that it seeks to rely on in its 5YHLS which are within category b) of the definition of deliverable as set out in the Glossary on page 66 of the Framework. This would include sites with outline planning permission for major development, allocations without planning permission as well as other sites such as those pending S106 agreements. Once the clear evidence the Council relies on for the inclusion of these sites has been published, we respectfully request the opportunity to comment on it.
- In terms of the windfall allowance, the Council will need to provide compelling evidence in accordance with paragraph 71 of the Framework to justify the inclusion of a windfall allowance of 70 dwellings in years 4 and 5 of the 5YHLS period on sites of less than 5 dwellings. This is based on an annual average of past delivery rates on such sites. Therefore, the Council will need to ensure that the combination of a windfall allowance and small sites with planning permission for less than 5 dwellings does not exceed past trends otherwise there would be double counting.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The calculation for the non-implementation discount (as shown in Table 3.1) should include a greater timeframe, including years prior to 2018/19. The supply contingency buffer referenced in Table 3.1, as well as the non-implementation discount, should both be increased to 20% respectively. To make the LDP sound, the distribution of housing land needs to reflect the clear preferred Spatial Option within the SA (Spatial Option C), and allocate new housing sites in line with the settlement hierarchy at Appendix E of the LDP. Additional allocations are also required in Medium and Higher zones in order to accord with and justify the adopted settlement hierarchy. Significantly more growth should be focussed within Deal.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Richborough has a strong track record of promoting sites through the local plan system and believe they can assist the Inspector in exploring the issues with the most up to date information and therefore wish to participate orally in the examination.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	<u>Comments on the Dover District Draft Local Plan from Womenswold Parish Council</u> Womenswold Parish Council is submitting comments based on discussion at the Parish Council meeting on 8th November 2022.

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

The Council wishes to comment as follows on the proposed housing estate SAP 24 of 640 houses on land between Aylesham and Snowdown:-

Rural Nature

- The proposed site of the housing estate is on a greenfield site in a rural community. This proposal would severely impact on the rural nature of the area. In addition, valuable farm land will be lost to the production of food. This is clearly much needed in these difficult times

Water

- The area in question lies in a drought stricken part of the South East. This summer and most summers we have water shortages. This development can only exacerbate the problem. In addition, Canterbury City Council is planning a total of 3620 (minimum) houses in the adjacent area, adding to the burden of water shortage.

Sewage

- The whole of the South East suffers from extremely poor infrastructure for the disposal of raw sewage. There have been many recent instances whereby Water Companies have pumped raw sewage into the sea which has resulted in large fines. Clearly the addition of nearly 4000 home will only add to this problem.

Traffic

- The proposal, together with Canterbury City Council's proposal will increase the strain on the rural road infrastructure. In particular, the B2046 is already extremely busy. There have been many accidents at the junction to the entrance to Womenswold Parish. In addition the slip road on the A2 (London Bound) is far too short. The increase in traffic created by these developments will only make this worse.
- The roundabout on the A260 by the A2 was built to deal with the huge increase in traffic coming from Aylesham under the current Aylesham expansion. It does not take into account the further proposed increases.

Infrastructure

- Currently there is a major shortage of facilities which contribute to facilitate supporting the community:-
 - Doctor surgeries.
 -
 - There are no secondary schools in the area. The nearest schools are in Canterbury, Sandwich and Dover. This necessitates a bus ride on overcrowded and unreliable buses. This also contributes to increased Greenhouse gasses and increased traffic congestion. The addition of so many houses will seriously exacerbate the problem.
 - There is only one small Coop in Aylesham which hardly copes with current levels of business.

Public Transport

- Buses: The bus service is already poor with little sight of improvement
- Trains: There is a station at Snowdown but the service is slow, once an hour to London for a 2 hour journey. The stations at Snowdown and Aylesham also do not cope with current levels of use. Parking is an issue and walking is difficult along narrow country lanes with no footway.

Summation

Womenswold Parish Council objects to the proposed Housing Estate SAP 24.

It is too large, and when the adjacent Canterbury City Council plans (R20 and R1) are taken into account, it effectively creates an Aylesham/Womenswold Conurbation in a very rural area of Outstanding Natural Beauty.

There is currently little infrastructure to support existing communities. The proposal would seriously impact on this.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance

Comments on the Dover District Draft Local Plan from Womenswold Parish Council

Womenswold Parish Council is submitting comments based on discussion at the Parish Council meeting on 8th November 2022.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Lack of Amenities - Busses have been stopped to our area due to spend cuts. Isolating many villagers already, before the proposal to bring hundreds more people here. Closest GP surgery is Shepherdswell. Due to GP shortages their opening hours have been reduced. More potential patients will not enable them to reach GPs that aren't there. Roads - I myself have moved from Thanet where it can take an hour to get from one side to the other, to live in the countryside. Many people living here have done the same, having bought houses to live here, they would now be plagued by 700 + more cars than we currently have living in the area. Not only that the roads through the villages are small and where historical old buildings line them cannot be widened.

	<p>Quality of life - People who live here use the proposed area for excersize, walking dogs, running, cycling close to their homes where they do not need to drive to get there. Should this area become houses, they will be forced to travel further to do this which many may not do, or will find themselves having to drive to a green space.</p> <p>Schools. Local schools are small and full to capacity. Secondary schools are only in the towns which is a long drive for families.</p> <p>People who buy houses in the new development will likely need to comute. meaning likely driving to Dover and parking near the train station all day. overloading roads and carparks there.</p> <p>We are currently in a cost of living crisis. the houses proposed would not be affordable by the people already living in the area and only by people who are already wealthy.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>I would recomend redeveloping areas in the towns where building have fallen into disrepair or derelict land. Pottentially for appartments mixed with small houses for people of lower incoms and first time buyers. where he build would put less strain on wildlife. roads and amenities are already bigger and can be made to better cope with the increased population.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>1 - Which Part of the Local Plan does this comment relate to?Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	<p>Chapter 2 - Vision and objectives (Overarching vision)</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The central aims set out in Chapter 2 - 'Vision and objectives (Overarching vision)' misses both the main housing challenges this part of south east England faces and misses a huge opportunity to revitalise the town of Dover itself.</p> <p>Taken overall, the plans for new housing in the whole plan show a depressing and unsustainable reliance on building on greenfield and agricultural land. And the housing mix proposed indicates a large part of this new housing will be three / four or more bedroom large houses.</p> <p>However - south east England faces a massive housing crisis. This manifests itself in a dire shortage of decent and affordable rental property. And a related shortage of affordable 'starter' flats and homes for young people.</p> <p>Yet staring Dover District Council in the face is the opportunity to revitalise the town of Dover itself. Dover is potentially a very fine town with a remarkable history. Sadly - for a number of reasons - much of the town is neglected and in urgent need of investment and growth. The image and reputation of the town has suffered as a result of this neglect.</p> <p>Indeed, the future growth and prosperity of the wider district is held back by the decline of the town. The local district plan is a huge opportunity to grab hold of this long term failure and rebuild and renovate this key historic town.</p> <p>Key steps should include:</p> <ul style="list-style-type: none"> • building affordable flats and homes for purchase and rent on both brown field sites and on derelict sites (including some locations where existing buildings are of poor quality) • much of the older housing may be suitable for 'retrofitting' with modern insulation standards and other improvements • looking to increase the number of flats above retail premises • where a retail premises is simply now unviable - appropriate and sensitive redevelopment should be enabled to turn the former retail unit into good quality housing • existing car park provision should be reviewed to see if any could be used to build new housing. <p>Such steps would meet the actual housing needs of local people as well as improving both the visual appearance and the image of the town. Other benefits would include bringing life back into the economic life of existing high street which otherwise faces continuing decline. The superb asset of the highspeed rail link from London; Ashford and Canterbury into Dover Priory remains a massive - and still largely unrealised - opportunity to rejuvenate Dover.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Dover District Council should focus instead like a laser beam on the rejuvenation and improvement of the town of Dover. Plans to build considerable new housing on green field agricultural land on the edge of rural villages are largely not sustainable and fail to meet both current urgent needs and challenges of the future.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	All SPs (Strategic Policies), most DMs (Development Management policies) some SAPs
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Housing Growth statement that the aim is to , “provide a greater choice of high-quality housing to meet the needs of Dover districts’s growing population and changing demographic and address affordability issues”, does not seem internally consistent with the details provided in the plan which underestimates the evidence showing a large part of district population growth is due to aging. The details thus render SP 3 and SP 5 ineffective, unsound. Moreover with the announcement by Prime Minister Sunak on 5 Dec 2022 that compulsory housebuilding targets are to be dropped, the DDC numbers are not compliant with emerging government policy.</p> <p>The government department (DLUHC) decision that Dover needs 611 new dwellings a year and a minimum of 10,998 new homes between now and 2040 we find very incompatible with legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008, and unsound. We should be transforming homes into zero carbon homes as is happening in East Sussex, led by Lewes DC. Combining these numbers with 3.51 and the statement ‘76.7% of the new homes are on greenfield sites, while 23.3% are on brownfield sites’ is unsound and unacceptable to the public. It must also be pointed out that at least one of the sites included in the 23.3% of brownfield sites is actually a site intended by SEEDA as local nature reserve having rewilded on unstable slag (only rendered stable by tree-planting), a site which DDC forgot to make a local nature reserve in 2004, and it has become a biodiversity hotspot well known to genuine ecologists nationally, Betteshanger Park, and ought to be designated a Biodiversity Opportunity Area.</p> <p>We note that central government in London, according to Housing Today is imposing a disproportionate amount of housing growth on Kent and the SE. The FT has shown a quarter of Con party donation come from the property developer lobby. We note that the supposed national New</p>

	<p>Homes Ombudsman, is not neutral in this matter and gets on well with volume developers and there is with a grievous lack of democratic accountability across Kent. So the chances, of protecting Kent, of achieving a Growth Strategy that creates climate-friendly jobs and suitably-sized, suitably-priced zero-carbon homes for the next generation of local families, are not good. The space available for infrastructure, functions well for compact coastal towns of the size that Deal / Walmer and Sandwich were 5 years ago. The level of greenfield overdevelopment is putting Deal infrastructure under strain now, so in-fill should make up the majority of the allocations for Deal and that the housing growth specified for District Centre of Deal and around its boundaries needs to be stopped or radically reduced. For example either or both of SAP 15 / SAP 34 would destroy the only road access alternative for diverted traffic. (See detailed comments under SAP 15/ SAP 34 below). Housing Growth that threatens gridlock, blocking off a conurbation of 30,000 from access by emergency vehicles, commuters, school buses is not sustainable housing growth and is very unsound.</p> <p>3.29 We note and welcome a degree of shift from the Reg 18 draft, in that more sites have been selected with a view to using 'existing infrastructure, facilities and services, with a greater professed purpose to ensure development contributes to the sustainability of local communities and services'. We note with appreciation both the increase in the number of sites in Dover town SAP 6 – SAP 13, and the SAP 26 Former Snowdown Colliery, Aylesham near a rail station for example.</p> <p>On Five Year Housing Land Supply. 3.39 Having stated the Council had 6.03 years land supply plus a 5% buffer; it is not sound, effective or legally compliant to then state 'the provision of additional sites within the first 5 years of plan period is needed to ensure resilience and promote flexibility;'. Instead of ensuring resilience, it will create exactly the destructive suburbanisation of a rural district that many, many of the resident electorate are most worried about. The 10 year buffer proposed, 3.40 is worse and demonstrates the culture of 'whatever developer partners ask for' referred to above.</p> <p>In Nov 2022, it seems very naïve to hope that 'new housing in villages can help them retain existing services such as public transport, retail (many pubs are going under because lack of staff and sky high energy bills) and schools (again oversubscribed local schools fear they will go bankrupt with sky-high energy bills).</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>It should be possible to state a determination to 'make best use of brownfield – non-rewilded – land) without giving developers the opt-out qualification 'wherever possible'.</p> <p>3.68 Windfall. Unless existing settlement boundaries are respected, there is suburban ribbon development creep from field to field to field. To render the plan sound it should contain a statement '<i>Previously existing settlement boundaries will be respected, until such time as town and parish councils may have agreed changes with Dover District Council, in accordance with the principles of Localism Act 2011.</i>'</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Policy SP3, paragraph 3.29, paragraph 3.42
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	We object to an over-reliance of the Plan to deliver dwellings in the medium and long term parts of the Plan. There appears to be little delivery of dwellings in the early part of the Plan period and this will not make a positive contribution to the Council's housing land supply. The strategic, urban extensions will take time to deliver due to the requirement for a masterplan and prolonged planning process. This will not aid 'upfront' delivery for dwellings in the district. Please see representations for further information
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The lack of housing delivery in the early part of the Plan period should be rectified by allocating new, smaller sites for development in appropriate locations in the district. This includes development at Ash, for which we have promoted a site which is cognisant with its classification as a 'Local Centre'. Please see representations for further information
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To contribute to the assessment of housing demand and potential requirement to assess when housing across the deistrict would be delivered.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan deviates from the settlement hierarchy because it claims that suitable land for development cannot be found in Sandwich. However, it has excluded SAN019 and SAN 010 from the plan for reasons that are not well evidenced and in some cases, contrary to the evidence in the hands of DDC (planning documents for part of SAN010 (Rose Nursery) local planning reference 21/01309. Sandwich Town Council asked DDC to reevaluate the evidence on these two sites in its response to the Regulation 18 draft Document, but it seems that DDC had made up its mind by that stage.</p> <p>DDC recognised the potential of site SAN024 to substantially increase the housing provision to the district, however, this land has yet to be made available for development.</p> <p>For some reason, DDC seems hell-bent on excluding the two neighboring sites SAN010 and SAV019 from the plan, even though they are sequentially the next best options and the development of those two sites would likely encourage some of SAN024 to come forward for development in the future. This has had wide-ranging implications for the plan as a whole, Particularly in terms of reducing the need to travel, reducing the district's carbon footprint, and supporting and enhancing the vitality of the town of Sandwich.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We note that previous comments in relation to this site made by Chris Moore (same agent) were not taken on board. His comments noted that if the minimum OAN number is adhered to, there is no backup option to come forwards should any of the proposed elements of housing supply not come forwards or be delayed.</p> <p>An example of this is reliance on larger strategic allocations. It is already acknowledged that the delivery of the WUE is some 3 to 4 years behind the Core Strategy 2010 timetable.</p> <p>The HELAA discounts sites with planning permission from further consideration to avoid double counting for the purposes of supply calculations. However, the fact that a site has planning permission for development has not been taken into account and has not been carried forward to the Selection of Site Allocations Reg 19 Sept 2022 to address the matter of DELIVERY.</p> <p>The Selection of Site Allocations document notes that of the 365 sites in the existing HELAA, 46 have gained planning permission or are subject to permission and are awaiting completions of a S106 agreement. These sites are automatically set aside from further consideration.</p> <p>Taking numbers from Appendix 1a HELAA 2022-Housing Site Assessments and Appendix 3e HELAA 2020 Initial Assessment Housing Sites Eliminated, shows that planning permission has been granted for a total of 2,182 dwellings on these eliminated sites (excluding sites on brownfield registers or site that are unimplemented allocations).</p> <p>Clearly not all sites will be suitable for allocation perhaps due to size or location, but not allocating those sites that are suitable, and waiting to see if they are built out rather than proactively and positively planning for their future could have significant impact on housing delivery.</p>

	<p>The authority has a track record of underdelivery shown through Housing Delivery Test Results. In 2018 Dover was at 131% of housing delivery with no further action required, in 2019 this fell to 92% requiring an action plan then it fell again to 80% in 2020 again requiring an action plan and 20% buffer on the LPA 5 Year Housing Land Supply Requirements. In 2021 housing delivery was at 88%.</p> <p>The HDT Action plan July 2022 identifies that Whitfield, 2010 Core Strategy allocation for 5,750 dwellings, has had minimal delivery, circa 250 completions up to 2020/21.</p> <p>This 'ignoring' of sites with planning permission is a shortsighted approach. Particularly in the current economic climate. While build, labour and lending costs are so high, delays in bringing forward development may result. Allocating sites which already have planning permission can underpin the likelihood of delivery in difficult economic times. It also underpins the LPA's housing supply.</p> <p>The growth strategy is not sound in that it is not positively prepared. Sites with planning permission must be considered for allocation within the local plan to underpin housing delivery and supply.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Mr Moore's reg 18 representation set out that the LPA must attempt to meet a higher growth figure to ensure a robust housing supply available in the event of strategic allocation delays and to ensure that opportunities for speculative development are restricted to suitable and sustainable windfall sites. This could be achieved by utilising suitable sites identified in the HELAA, particularly those within existing settlement boundaries or immediately adjacent to them. More sites should be allocated for development.</p> <p>WHI009 is a clear example of where allocation is a suitable approach given its location. The Site has outline planning permission for up to 28 units with reserved matters currently under consideration. It is already accepted that the site is suitable for development and there is an opportunity to positively reinforce that through allocation. A suggested change is proposed to policy SAP 13 to reflect the above</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>CPRE Kent questions whether this strategy meets the Council's vision of a creating spectacular and sustainable environment and whether it is sound, on the basis that:</p> <ul style="list-style-type: none"> • the strategy is a continuation of the 2010 strategy of concentrating development at Whitfield – which has a proven track record of failure; • failure to deliver on the 2010 strategy has resulted in Deal being overwhelmed by windfall development; and • this has resulted in the political decision to set aside the findings of the updated settlement hierarchy and focus development at lower order, less sustainable locations, including development at the two villages of Eythorne and Elvington which have been incorrectly elevated to the status of local centres. <p>CPRE Kent welcomes development that will underpin sustainable communities. While the Council sets out that its strategy for the distribution of growth is primarily based on the settlement hierarchy and influenced by site availability, environmental constraints and delivery factors, we would query whether this has actually resulted in a sustainable strategy.</p> <p>Our concern is that too much reliance has been placed on development that is purported to be deliverable (and may not be suitably located in terms of sustainability and environmental constraints) – such that the Council's stated vision with the aim of a “spectacular and sustainable environment” may well be undermined.</p> <p>Instead, the Council should be working with landowners to bring forward development in the most sustainable locations.</p> <p>While strategic development is welcomed, in principle, at Whitfield (being a regional centre), it is not clear whether the previous delivery issues have been resolved. Allocating almost half of the required dwellings to meet housing need at Whitfield will place the Council's strategy at huge risk, if delivery continues to be delayed.</p> <p>Since Whitfield was originally allocated for development (2010 Core Strategy – 5,570 dwellings), the SPD approved (2011) and planning permissions granted, only 363 homes have been delivered to date. Carrying forward the original allocation, plus an additional 2,200 dwellings (6,350 total) in the current local plan means that Council's spatial strategy is being underpinned by a site that has a proven record of failure in terms of delivery. Issues around fragmented land ownership, ransom strips and the resolution of highways issues will need to be resolved before this strategy can be considered sound.</p> <p>As the Council is placing its housing delivery in a basket of three strategic allocations, if one fails to deliver this will impact on the strategy as a whole and place the Council at the whim of the unintended consequences of speculative development to fill the housing need gap.</p> <p>This has already happened in respect of the 2010 Core Strategy, whereby Deal has been subject to a high number of windfall developments. The town has borne the brunt of the unintended consequences of windfall development (in response to unmet need/the failure of Whitfield to deliver as anticipated). As Deal occupies a key position in the settlement hierarchy, it should be at the heart of the Council's planned strategy for growth.</p> <p>However, no strategic allocations are planned at Deal. Instead, development is being focussed at the rural service centre of Aylesham, which is lower down the settlement hierarchy - despite the fact that satisfactory mitigation of environmental and highway constraints remains unresolved; and at the two villages of Eythorne and Elvington.</p> <p>The purported commensurate scale development in rural areas will result, in the case of Eythorne and Elvington, in the coalescence of two separate villages – with the intention that these two villages become one combined, larger, local centre. It is noted that these two separate villages are subject to environmental and highway constraints.</p> <p>With facilities being shared between the two existing communities, CPRE Kent is very concerned that opportunities for active travel will be hazardous – particularly when the narrow pavement flanking one side of the Adelaide Road would not seemingly allow two-way pedestrian traffic to safely pass (including mobility scooters, prams/buggies and children's scooters); and changes in topography across the allocation will make connectivity that avoids Adelaide Road exceptionally challenging.</p>

While development that would facilitate the retention and strengthening of existing services and community facilities is welcomed, it is not clear how – in the case of Eythorne and Elvington - this fits with climate change aspirations, when interconnectivity using Adelaide Road does not offer an safe/welcoming travelling environment; such that reliance on car travel is likely to be the norm. The sustainability of this strategic allocation is further called into question now that KCC has withdrawn its bus funding subsidy and access to secondary school education, GP/dental services and weekly food shopping outlets are not possible without a car.

The growing (ie merging) of the adjacent villages of Eythorne and Elvington will mean a loss of their individual communities/character, which could have a major impact on social cohesion. The strategy of placing roughly half of all local centre development at these two villages – which currently sit below the level of local centre in the settlement hierarchy - is likely to lead to devastating impacts. That is, of the 774 dwellings proposed at local centres, 355 (46%) would be provided at Eythorne and Elvington – which will outperform Deal as a district centre, which is set to accommodate just 223 dwellings.

Almost half of the Council's proposed local centre development is at Eythorne and Elvington. These settlements are currently considered to be large villages – by virtue of shared services - and will only be elevated to the local centre tier of the settlement hierarchy on completion of development.

CPRE disagrees with this assessment and believes for the reasons stated above that both settlements should be considered small villages by virtue of the lack of safe, sustainable active travel routes between the two.

While paragraph 79 of the NPPF states that “development in one village may support services in a village nearby” this should not be interpreted as a one size fits all justification for growth, particularly when accessing the services and facilities of a nearby village involves an unpleasant/unsafe walking environment, with no local bus service. The reasonable expectation will be that development will car dependant in the case of Eythorne and Elvington, which does not align with the Council's climate change aspirations.

[See paragraph 4.5 of the settlement hierarchy topic paper settlement-hierarchy-and-confines-topic-paper-aug-2022.pdf.]

As can be seen at page 24 of the settlement hierarchy topic paper, Eythorne scores 20; and Elvington 22 (with Elvington being reliant on Eythorne for services, which is not justified for the reasons stated above) – see table at 5.1 (scores on p.24).

CPRE queries whether this strategic allocation would still be promoted, if in fact the interconnectivity between Eythorne and Elvington was re-assessed and reflected in the scoring matrix. That is, that the two settlements be assessed as two separate settlements, instead of a combined village – if so, the current Elvington score of 22, may well dictate that it falls into the next, lower tier.

CPRE queries what evidence there is that there should be a change in the status of the two villages of Eythorne and Elvington from being categorised as villages in the 2010 settlement hierarchy, to being elevated to a local centre in the current local plan.

While CPRE Kent notes that the Council states it has made every effort made to use brownfield sites, but was hampered by them being constrained, with viability issues, deliverability problems and being limited in supply – it is disappointing that more cannot be done by the Council to proactively unlock these sites. Of the 69 sites allocated, 45 are greenfield (76.7%) and just 24 brownfield (23.3%).

The breakdown of housing numbers in reveals the extent to which the spatial strategy which seeks to distribute development in accordance with the settlement hierarchy, doesn't actually pay regard to the settlement hierarchy, as a proxy for sustainable development.

Sites at Dover and Whitfield will provide 3,381 dwellings (as would be expected from a regional centre), even though there is risk associated with actual delivery at Whitfield.

Below this tier, the rural service centres (Sandwich and Aylesham) will contribute 876 dwellings; the local centres 774 and the larger villages 265, which means all these lower order settlements take a greater portion of the district's housing requirement than Deal (223) as set out at table 3.3 at paragraph 3.53 of the plan.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	CPRE Kent would wish to participate at the examination hearings to explore these issues further.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP1
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We are CPRE, the countryside charity. Formed in 1926, CPRE is a registered charity and one of the longest established and most respected environmental groups in England, with over 40,000 members and supporters living in our cities, towns, villages and the countryside. CPRE Kent is the largest of the CPRE County branches</p> <p>Our vision is of a beautiful and thriving countryside that enriches all our lives, and our mission is to promote, enhance and protect that countryside. We believe that the planning system is a toolbox for achieving better – for people, for nature and for the economy – while supporting the delivery of more badly-needed homes to end the housing crisis.</p> <p>In general, CPRE Kent supports a development strategy which meets the following criteria:</p> <ol style="list-style-type: none"> 1 brownfield first, especially in urban areas and not in rural areas where it would result in unsustainable patterns of development 2 development should result in sustainable communities 3 housing provision in rural areas where there is an identified local need, and the scale of development is appropriate for the size of the settlement 4 plans should promote development in locations:

- 1 that are well supported by, or that will support, sustainable transport and active travel and
- 2 that are well served by regular public transport services and social and community facilities, that are in safe walking and cycling distance or would support, or result in, a sustainable settlement.

Overall, it is our position that local planning authorities should seek to ensure that the impact of development on the countryside, both directly and indirectly, is kept to a minimum and that development is sustainable in accordance with national planning policy.

This response has been prepared jointly by the Kent Branch office of CPRE Kent and by the Dover District Committee of CPRE Kent, but for brevity our comments are expressed as being from 'CPRE Kent' throughout.

We would welcome attending the examination to provide additional clarity on any of the points which we have raised.

SP1 Planning for Climate Change

CPRE Kent welcomes the fact that the first strategic policy relates to climate change, but queries whether climate change is actually at the heart of the Council's spatial strategy?

SP1(f) refers to climate change mitigation, by "reducing the need to travel and maximising opportunities for 'smarter' sustainable travel" and at SP1(e) reference is made to climate mitigation by "maximising green infrastructure".

It is not clear how the Council's spatial strategy addresses the aim of reducing the need to travel – especially as a one of the proposed strategic allocations is at the rural villages of Eythorne and Elvington – which are car dependent communities, as evidenced by the huge issues they face in terms of rat running (in combination with pinch points in the local rural road network). In addition, funding has been withdrawn from the 92/92A bus service, and in terms of public transport these two villages are served only by a heritage railway line giving connectivity to nearby Shepherdswell, but not to places of local employment, such as Whitfield or Dover.

We would query what the effectiveness of climate change mitigation (by maximising green infrastructure) will be, when the majority of the plan's allocations are on greenfield land – which already plays a huge role in carbon sequestration (SP14 Enhancing Green Infrastructure and Biodiversity). With a brownfield first strategy and a bold understanding of the benefits of increased densities, more greenfield sites could be retained for the contribution they already make towards carbon sequestration, food security and the health and wellbeing of the community.

It is not clear from policy SP1 how the energy load of developments will be reduced to maximise natural heating, cooling and lighting – if this is the intention of SP1(a), then it should be more clearly stated.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

CPRE Kent would wish to participate at the examination hearings to explore these issues further.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	1 Introduction
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan is unsound as it does not comply with the legally binding commitment made by DDC when they declared a climate emergency in 2020 and prepared their climate change strategy. The plan will not do enough to meet the target of the district being net zero by 2050. DDC should be much more ambitious about the green credentials of new housing. If new homes generated their own power, were insulated to the highest standards, and collected rain water, it would greatly help stretched local services and go a long way towards making the housing stock fit for the coming decades.</p> <p>The regulation 19 stage of the consultation is not fit for purpose as it is overly complicated and very difficult to use. The process has left many members of the public including me and my wife feeling overwhelmed and confused as to how to make a representation. For those who are working full time this has been a task for which they do not have enough time. As a result those who may have wanted to make a submission have not been able to. The format of the submission form is also difficult to navigate. Without prior experience of planning law it is difficult to say whether a part of the plan is legal or not. As to the duty to cooperate it is impossible to know. The unsound plan needs updating after the government announcement on 5/12/22 that mandatory housing targets are not to be imposed. The figure of nearly 11,000 is unsustainable and should now be reviewed, particularly with respect to allocated land around Station Rd Walmer and proposed developments around villages.</p> <p>The character and landscape value of the district is being rapidly eroded under the current plan and this must not continue as it is contrary to NPPF 21. It is not sustainable to build on agricultural land which is in short supply as we are only 50% self sufficient in producing food in the UK. The CPRE has found that almost 14,500 hectares of farmland has been permanently lost to development since 2010. The contribution from the districts agricultural land is of vital importance. Much of the agricultural land is also vital for flood protection, and field margins are important for wildlife and biodiversity, forming corridors between habitats for vertebrates and nesting and roosting sites for birds. Dover District also has a wealth of character landscapes, AONB, heritage coast, nature reserves, internationally rare chalk grassland and rewilded areas such as Betteshanger Park. Overdevelopment under the last weak plan has meant that these areas are under pressure and being denuded as their boundaries are eroded and wildlife corridors between sites are cut off. The new plan does not do enough to protect these areas, wildlife and</p>

	<p>biodiversity. Developments should not be allowed to remove ancient woodlands and trees and biodiverse rich habitats even if it is argued that this is for the greater good. This is not sustainable as all nature is interconnected and if it fails then we all fail. The UK is one of the worst countries in the world for biodiversity loss, we have lost half of our biodiversity since the 1970's.</p> <p>Development has been at such a pace that infrastructure cannot keep up. Buses have been cut recently, cycle and pedestrian routes have not been upgraded sufficiently to connect some developments to main bus and train routes without car dependence. Aylesham has not had a secondary school which would mean children could walk to school. Many rural communities are entirely car dependent due to lack of buses and the roads not being safe to use their bikes. Not enough emphasis is put on renovating existing housing stock to provide greener, insulated, fuel efficient homes. Each new build generates around 56 tonnes of embedded carbon. The NPPF states that we should prioritise brownfield sites over greenfield but although there are many opportunities to develop brownfield sites in Dover, this has not been prioritised. Many developments have been for larger houses in villages and there is not enough provision for affordable housing.</p> <p>The wording of the local plan is not definitive, it leaves too many loop holes and vague preferences which enable large developers to argue and get what they want, to maximise profits, not what the people of the Dover area need.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Better mapping and understanding of the Dover District, taking into account internationally rare areas of chalk grassland, woodland and trees wherever they occur.</p> <p>Large buffers around the AONB to protect its character from the built environment. Stronger protection for the AONB and the Ripple LCA F3.</p> <p>Tighter protections on our remaining biodiversity.</p> <p>Tighter definitions in the local plan so that developers have no room to argue what has been specified in the local plan.</p> <p>Hire several biodiversity officers to monitor closely and prevent loss of ancient woodland, chalk grassland, veteran trees, protected wildlife and rich habitats and to actively go out into the community, looking for ways to improve biodiversity by such things as accessing grants for hedge planting and the creation of ponds where ever possible in our district.</p> <p>Employ experts to liaise with farmers in our area to encourage the most environmentally friendly farming and land management practices which will encourage maximum biodiversity in the countryside and maximum sequestration of carbon in soils and biomass.</p> <p>Stop the use of agricultural land for development.</p> <p>Renovate and insulate rather than build new houses, brownfield not greenfield.</p> <p>Turn attention away from destroying village communities with unsustainable housing estates outside their village boundaries.</p> <p>Do not give developers the get out clause of financial mitigation for destruction of wildlife and habitat. No development should further deplete our critically low levels of biodiversity.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Strategic Policy 3 - Housing Growth
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Harris Lamb have been instructed by the owner of proposed residential allocation STM003 to submit this representation in support of the Council's Housing Growth strategy.</p> <p>It is our view that the proposed housing requirement and proposed distribution of these houses represent an appropriate strategy in accordance with Paragraph 35 b) of the National Planning Policy Framework (NPPF).</p> <p>Paragraph 35 b) of the NPPF sets out that for plans to be justified local planning authorities need to determine an appropriate strategy. It does not require the most appropriate strategy, rather that on balance an appropriate strategy is being proposed. It may well be that others present a case for higher/lower housing requirement and/or an alternate distribution strategy for these dwellings. These alternatives may also generate certain benefits, but there will also be down sides through reducing the benefits generated by the proposed strategy. However, none of these things mean the proposed strategy is not an acceptable strategy. Instead, these are just other strategies that might be appropriate and so the question remains is this an appropriate strategy, and the answer is unquestionably yes.</p> <p>The housing target set within the plan is based on the Standard Method figure. This generates a requirement of 611 houses per annum when the latest affordability ratio is applied or 10,998 houses across the plan period. There may be an argument for more or less houses presented by others, but it cannot be argued that progressing with a housing target based on the Standard Method is not an appropriate strategy. There might be other strategies, but that does not make this one inappropriate.</p> <p>In seeking to meet this housing requirement, the proposed submission Plan sets out a settlement hierarchy which sees different settlements take on different levels of housing allocations depending on their role and function within the Local Authority area. In the rural area this continues to allocate housing at the largest villages to sustain their role and function as Local Centres. These are settlements that have an appropriate level of services and facilities to support an element of housing growth. This approach sees new housing directed towards the more sustainable locations within the District and will help to support the important role and function the Local Centres perform in providing services and facilities for residents in the surrounding countryside and hamlets. Villages like St Margaret's at Cliffe are in the Kent Downs AONB and the South Forelands Heritage Coast, but these designations do not restrict development as evidenced by Paragraph 177 of the NPPF. Instead, it sets out when development can be appropriate, which includes respecting the special landscape qualities in these areas. At this juncture it is important to remember that the larger villages are a longstanding part of these landscapes. Housing in these locations is therefore an established part of the landscape and so new development should not automatically be seen as a negative addition. Indeed, there will be opportunities to better integrate some of the villages into the surrounding landscape where there is currently a stark relationship between the two. For example this could be where the existing village edge is exposed, forms an abrupt transition with the surrounding countryside and/or uses inappropriate materials that draw the eye and make these edges more prominent than they need to be.</p> <p>The proposed distribution does, therefore, represent an appropriate strategy for delivering the housing target identified. There may be other strategies that seek to push and pull the numbers slightly between the different settlements, and they may also be an appropriate strategy, but that does not make the strategy proposed within the pre-submission plan unacceptable.</p> <p>It is, therefore, our view that the emerging housing target and spatial distribution of these homes is clearly an appropriate strategy and meets the statutory and policy tests in this regard</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. 3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

Para 7.24- The need for 42 pitches has been demonstrated at appeal to underestimate the true need in this district. The Evidence Base relies on the ARC4 GTAA 2018 which was based on field work carried out Oct-Dec 2017. It is now out of date. The Council claim the study has been updated as part of Site Options review but this was not a proper update. The Council has never provided information to show that turnover on sites can be relied on to meet need. The study does not meet the requirements in PPTs (par 7 (c) for a robust evidence base and the Council has been made aware of this at appeals for sites in this district. It is disheartening to once again be making these comments and discover that no one is listening or paying attention to these concerns. Very few agents are willing/ able to work on behalf of Travellers. Most of those who do so, do not have the time or inclination to also respond to local plan consultations. Yet the Travelling community relies on agents like myself to submit representations to local plans. This is an incredibly time consuming process. I am not funded to do this. The system expects and relies on Councils to be honest, transparent and fair. The Travelling community should not feel disenfranchised by the cost of generating evidence to refute the policies proposed by Councils but from experience I am aware that EIP Inspectors will not question the submitted policies if no one makes representations.

The 2018 GTAA identified a need for 30 pitches of which 18 would be PPTS 2017-2037 and a need to front load this with provision of 15 pitches (of which 12 PPTS) within the first 5 years. The number of pitches granted since 2018 has already exceeded that recommended in the 2018 report for those complying with the PPTS need and there remains outstanding need.

It is not clear if the approach taken by Dover Council incorporates the findings of the Lisa Smith judgment October 2022 which found that the Planning Definition in Annex 1 PPTS discriminates against all Travellers and allocations should be made to address the needs of all Travellers. However according to the 2018 GTAA there was a significant need for those who did not meet the PPTS planning permission and who have not to date been provided for on any sites granted permission since 2018.

In 2018 only 23% of those surveyed were Irish Travellers. The ARC4 study assumed 6 pitches for in migration in the first 5 years and nothing for the remainder of the plan period. Yet since 2017 the following permissions granted have been for Irish Travellers who have moved into the district from elsewhere ie

DDC Note: Names redacted. Available on request.

-Westmarsh 8 pitches (various Irish Traveller families, different to original appeal decision)

-(name redacted) The Meadows Alkham +16 statics claimed for family

-(name redacted) plot 2b Hay Hill

-(name redacted) plot 2a Hay Hill

-(name redacted) Strawberry Place, Hay Hill, Eastry 12 statics

This exceeds the assumptions in the GTAA and is further evidence that the 2018 assessment greatly underestimated the need for more pitches in this District.

PARA 7.25-Whilst I agree that a pitch should be approximately 600sq m in size, there should be room for more than a static caravan. Many Travellers want twin unit mobile homes which are much larger than a static caravan. Also pitches should have space for 2 vehicles of which one will often be a larger works vehicle eg transit van. Given the acceptance that pitches should be around 600sqm in size does the Council now acknowledge that permissions granted for additional static caravans at sites on Hay Hill and Alkham Valley should not count as pitches as they were not for additional self contained pitches as now defined by the Council and should not count towards meeting the need in Dover for additional pitches?

7.26-It is not clear why the council is only proposing to allocate sites for 5 pitches. This will be insufficient to meet the need identified in 2020 for proper Traveller pitches. There is an outstanding appeal 8 pitches at Westmarsh for a site previously granted temporary permission. There is a site with 2 pitches due for renewal in 2023 at Alkham, there are current applications pending for 8 pitches at Ash Rd Sandwich, 4 pitches at Falconview and 3 pitches at Sherleys Farm. Permission has been refused for 3 pitches at Ferne Lane Alkham and an appeal dismissed for another site at Barnsole Rd Staple for 1 pitch. This would suggest an immediate need for as many as 29 pitches not 5 pitches-and that is just the cases that I am aware of. Since this policy was drafted the Council has granted an additional 8 pitches at Waldershare (8th December 2022) that are not included in this policy. The council appear to be acknowledging that this policy approach is wrong before it has even been examined. Policy as prepared fails to address the need identified in 2018 and as such it is not PPTS compliant.

H3/ H4 criteria-Is there a need to two policies when they appear to seek/ address the same matters?

	<p>Given that that the Council has failed to follow some of this guidance for infill development on plots at Hay Hill Eastry, the Inspector should visit these sites and be provided with details of what has been approved by the Council on these sites to decide if the permissions granted should count towards meeting the needs of genuine Gypsy Travellers or whether the intensification granted has resulted in layouts that fail to meet site licencing requirements and are sub standard, cramped and unacceptable.</p> <p>Table 7.1-The site at Half Acres Alkham was granted permission on appeal earlier in 2022. It is surprising that the Council is now conceding that a site refused permission for 1 pitch is now suitable for 3 pitches. This is a private family site. The additional pitches would be for a need not identified in the 2018 ARC study.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>The policy needs to be informed by a robust up to date need assessment.</p> <p>Policy needs to reflect the Lisa Smith judgment issued October 2022 and revisions to the planning definition in PPTS. (see attachment)</p> <p>The Council needs to decide if permissions previously granted for intensification (ie additional caravans not pitches) on land at Hay Hill addresses the needs for Travellers and are suitable for occupation by Travellers given the acceptance at para 7.25 of what a pitch should provide.</p> <p>Additional pitches need to be allocated to address existing and future need in Dover.</p> <p>There is a need for transit provision. Many Travellers pass through Dover to the continent.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	No
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	See supporting statement attached. Text below (copied from attached statement) added by DDC <i>Settlement Hierarchy & Spatial Strategy</i> <i>2.2.1 The "Settlement Hierarchy and Confines Topic Paper" confirms that Kingsdown enjoys a wide range of services that are regularly identified as key indicators of sustainability, offering a good and sustainable range of facilities, including all key services (para 5.10). Kitewood therefore support its identification as a "Local Centre", within the settlement hierarchy, identified as a tertiary focus for development that would reinforce its role. The village of Kingsdown is therefore well positioned to support the Council's spatial strategy, which owing environmental constraints in the District, seeks to combine a number of spatial options (as confirmed in the "Housing Topic Paper"), based on dispersing development across the district, informed by the spatial hierarchy, but with a focus on development in Dover. The general distribution of development across the settlement hierarchy, as set out in Table 3.3. is therefore also supported.</i>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	See supporting statement attached. Text below (copied from attached statement) added by DDC <i>Settlement Hierarchy & Spatial Strategy</i> <i>2.2.2 However, for the reasons set out below and in Section 3 of this Statement, the indicative number of dwellings allocated to Kingsdown as identified in table 3.3, should be increased from 55 to 95 dwellings. Compared to the overall quantum of development allocated to the "Local Centres" the level of increase is not significant and would not be contrary to the settlement hierarchy, with the overall levels of growth still being less than is planned for in Dover (inc Whitfield) as well as the District and Rural Centres, which are higher up the hierarchy. For a "Local Centre" the level of development is also not disproportionate, being comparable with and not more than the level of growth supported in the Plan in other "Local Centre" villages, such as St Margate and Wingham.</i>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	In order to ensure that our case is properly put forward and understood, and to provide the opportunity to respond to any questions/points raised by the Council and Local Plan Inspector which might result outside the written representations made and following discussion at the EIP.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Please refer to supporting statement attached</p> <p>Text below (copied from attached statement) added by DDC</p> <p>Housing Need & Delivery – Policy SP3</p> <p>2.1.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover District of 596 dwellings per annum. The affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest calculation is 611 dwellings per annum (dpa), equating to a total housing need of 10,998 dwellings for the Plan period to 2040. The Reg 19 Local Plan seeks to meet this need in full. In addition to the minimum figures, DDC has set a contingency buffer of 926 dwellings (8.4%) over the Plan period.</p> <p>2.1.2 For context, the current adopted Core Strategy, 2010 requirement is 700dpa. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based on the recommendations of the Dover Regeneration Strategy. This was above the minimum 10,100 required across the same period, as set out in the emerging (at the time) Regional Spatial Strategy. This relied heavily on the delivery of the Whitfield expansion, intended to deliver “at least” 5,750 homes. As set out in the “Housing Topic Paper, September 2022”, to date planning permission has only been granted for just 1,483 homes (25.7%) of which 363 homes have been completed (just 6.3% of the total allocation).</p> <p>2.1.3 Accounting for the committed supply of 5,282 dwellings, the Plan allocates 6,642 new homes over the remaining plan period to 2040. This is derived from the following sources: - Whitfield Urban Expansion Allocation: 2,200 dwellings - Local Plan Allocations (excluding Whitfield): 3,392 dwellings - Windfall Allowance (70 a year from year 4): 1,050 dwellings</p> <p>2.1.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan housing target with a significant proportion of greenfield land due to the dwindling brownfield supply, especially in the Dover Town Centre.</p> <p>2.1.5 The release of sustainable and accessible sites logically located in Sandwich, a higher order settlement (Rural Service Centre), represent a sustainable and reliable source of growth for the Plan Period. The continued allocation of “Land adjacent to Sandwich Technology School, Deal Road, Sandwich” (Policy SAP21) for residential development, therefore remains entirely appropriate, adding to the supply and variety of allocations as a medium sized site (NPPF, para 69). Catesby Estates therefore fully supports the allocation and the spatial strategy set out in Policy</p> <p>SP3. 2.1.6 Notwithstanding, it objects to the reliance placed on Whitfield and the windfall allowance for the following reasons:</p> <ul style="list-style-type: none"> • Over a 13 year period, since its allocation Whitfield has consistently underdelivered, delivering just 363 new homes or 28dpa. There is no objection in principle to the development at Whitfield, but the Council places to high a reliance in its delivery, where it equates to circa 42% of its allocated supply (excluding commitments). The delivery issues around Whitfield are clearly complex, both in respect of landownership but also infrastructure delivery. It is noted in the Infrastructure Delivery Plan (IDP, 2022), that delivery in Whitfield is already limited by Whitfield roundabout which is already at capacity (IDP para 3.21). Whilst short term improvements are proposed, significant highway mitigation schemes are required, at a cost of £6million each, to be delivered by KCC Highways or National Highways. In the absence of secured funding, significant delivery at Whitfield cannot be relied upon in the short term.

	<ul style="list-style-type: none"> • Whilst it is noted that the windfall allowance is based on past trends having excluded sites of 5 units and above. The continuation of the previous delivery trends fails to take into account the changed policy context. The Reg 19 Plan now introduces a new “Residential Infilling policy” (Policy SP4). which significantly restricts where development can occur adjacent to and within settlement boundaries (limited to certain settlements) and subject to meeting 11 separate criterion. Development, which is not within or adjoining the listed settlements, is further even more severally restricted. It therefore cannot be assumed that a past annual delivery rate of 70dpa from windfall sites will and can continue through the introduction of a more restrictive policy framework. <p>2.1.7 Whilst it is noted that the total proposed housing supply (Table 3.1) secures a contingency buffer of 926 homes (8.5%), this is not considered sufficient or suitability flexible to account for potential under delivery. Generally, at least a 10% buffer is required. This is especially essential taking into account the above.</p> <p>2.1.8 The development potential of existing/proposed allocations should therefore be maximised, such as “Land adjacent to Sandwich Technology School, Deal Road, Sandwich”, to ensure that the Plan is “Sound” in satisfying the following tests:</p> <ul style="list-style-type: none"> • “Positively Prepared”: Ensuring the identified objectively assessed need is met, by optimising the potential of proposed housing land allocations and increasing their proportion of the housing land supply. • “Justified”: The evidence base does not support the reliance being placed on Whitfield Urban Expansion, with the Local Plan relying on housing being delivered early in the Plan period (based on the Local Plan Housing Trajectory). Moreover, it does not support the proposed windfall allowance, for the reasons above. • “Effective”: Ensuring there is sufficient deliverable sites, where their development potential has been optimised. This is on sites that have already been allocated. Their efficient development can secure a suitable housing buffer meaning identified housing needs are met over the Plan period, so the Plan is effective in meeting its objectives. It further provides flexibility, should other elements of the Council’s housing land supply be delayed in coming forward. • “Consistent with National Policy”: The NPPF (Section 11), expressly requires planning policies to support the efficient use of land (para 124). For the reasons set out in the following section, the proposed allocation of “Land adjacent to Sandwich Technology School, Deal Road, Sandwich”, does not make the most efficient use of this greenfield site.
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Please refer to supporting statement attached</p> <p>Text below (copied from attached statement) added by DDC</p> <p>2.9 To make the Plan “Sound” the following changes are necessary: • Supporting Tables 3.1 and 3.3 should be adjusted to account for the more efficient use of allocated sites and increase the proportion of homes which make up the “allocated” part of the housing supply. • The above changes are reflected in the Policy SP3.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>In order to ensure that our case is properly put forward and understood, and to provide the opportunity to respond to any questions/points raised by the Council and Local Plan Inspector which might result outside the written representations made and following discussion at the EIP.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Strategic Policies, Policy SP3, tables 3.1 and 3.3.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>See supporting statement attached.</p> <p>Text below (copied from attached statement) added by DDC</p> <p>Housing Supply & Delivery</p> <p>2.3.1 Accounting for the committed supply of 5,282 dwellings, the Plan allocates 6,642 new homes over the remaining plan period to 2040. This is derived from the sources listed below, as taken from Table 3.1 and Policy SP3: - Whitfield Urban Expansion Allocation: 2,200 dwellings - Local Plan Allocations (excluding Whitfield): 3,392 dwellings - Windfall Allowance (70 a year from year 4): 1,050 dwellings</p> <p>2.3.2 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan housing target with a significant proportion of greenfield land required due to reducing available supply of brownfield sites especially in Dover Town Centre.</p> <p>2.3.3 The release of sustainable and accessible sites logically located across sustainable settlements in the District, therefore provide a sustainable and reliable source of growth for the Plan Period and supports the reinforcement of the settlement hierarchy considered above. As considered under Section 3 of this Statement, any such uplift has previously been assessed as part of the Reg18 Sustainability Appraisal and found acceptable.</p> <p>2.3.4 In this context, the allocation "Land at Woodhill Farm, Ringwould Road" (allocation SAP34) is fully supported and is considered appropriate, especially taking into account its sustainable location. Furthermore, as noted in the Regulation 19 Sustainability Appraisal, it was the only site that was identified in HELAA as being potentially suitable for development and this is best placed to support Kingsdown's role as a "Local Centre".</p> <p>2.3.5 Notwithstanding the above, Kitewood objections to the reliance placed on Whitfield and the windfall allowance, as part of the overall housing land supply set out in Policy SP3 for the following reasons:</p> <ul style="list-style-type: none"> • There is no objection in principle to the allocation of development at Whitefield. It is acknowledged that in part this already benefits from Outline planning permission and the strategy for development here has long since been established via the currently adopted Core Strategy. However, it has been allocated for over 13 yrs. Over this time, it has delivered 363 new homes, equating to 28dpa. Whilst it is acknowledged that the delivery issues around Whitfield are complex and inevitably with a development of the scale proposed, sites such as this take longer to secure consistent and higher delivery rates, normally due to the need to deliver a lot of infrastructure upfront to support the wider development. Based on past delivery and noting that in the "Infrastructure Delivery Plan" (IDP, 2022), that development here is currently limited by Whitfield roundabout which is already at capacity and the Duke of York Roundabout (IDP para 3.21), it is considered that the Council places to high a reliance in its delivery. Whilst short term highway improvements are proposed, significant highway mitigation schemes are required, at a cost of £6million

	<p>each, to be delivered by KCC Highways or National Highways. In the absence of secured funding, significant delivery at Whitfield cannot be relied upon in the short term and based on delivery performance to date. Whilst it is acknowledged that Kingsdown and other settlements within a defined zone could be restricted until these highway improvements are secured (which they will also contribute to), the nature of strategic developments is such that these take longer to mobilise, unlike smaller developments that are also less constrained by infrastructure.</p> <ul style="list-style-type: none"> • It is acknowledged that the proposed windfall allowance of 1,050 homes is based on past trends having excluded sites of 5 units and above. The continuation of the previous delivery trends however, fails to take into account the changed policy context introduced through the Reg 19 Local Plan, via Policy SP4: Residential Infilling Policy”, which significantly restricts where development can occur adjacent to and within settlement boundaries (limited to certain settlements) and subject to meeting 11 separate criterion. Development, which is not within or adjoining the listed settlements, is further even more severally restricted. It therefore cannot be assumed that a past annual delivery rate of 70dpa from windfall sites will and can continue through the introduction of a more restrictive policy framework. <p>2.3.6 The housing supply Table 3.1 identifies that a contingency buffer of 926 homes (8.5%) is secured. However, in the context of the above, this is not considered sufficient or suitability flexible to account for potential under delivery. More generally, at least a 10% buffer is required.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>See supporting statement attached.</p> <p>Text below (copied from attached statement) added by DDC</p> <p>Compliance with the Tests of Soundness</p> <p>2.4.1 To secure a reliable and robust housing supply, which ensures the Plan is deliverable, the development potential of proposed allocations must therefore be maximised, especially sustainably located Sites, such as that at “Land at Woodhill Farm, Ringwould Road” (allocation SAP34) and therefore the level of development which makes up the allocated proportion of the housing land supply, must be increased to satisfy the tests of “Soundness” as identified below:</p> <ul style="list-style-type: none"> • “Positively Prepared”: Ensuring the identified objectively assessed need is met, by optimising the potential of proposed housing land allocations and increasing their proportion of the housing land supply. • “Justified”: The evidence to date does not support the reliance being placed on the Whitfield Urban Expansion, with the Local Plan relying on housing being delivered early in the Plan period (based on the Local Plan Housing Trajectory). Moreover, it does not support the proposed windfall allowance, for the reasons above. • “Effective”: Ensuring there is sufficient deliverable sites, where their development potential has been optimised. The efficient development of sites can secure a suitable housing buffer meaning identified housing needs are met over the Plan period, so the Plan is effective in meeting its objectives. It further provides flexibility, should other elements of the Council’s housing land supply be delayed in coming forward. • “Consistent with National Policy”: The NPPF (Section 11) requires planning policies to support the efficient use of land (para 124). For the reasons setout in the following section, the proposed allocation of “Land at Woodhill Farm, Ringwould Road” (allocation SAP34) does not make the most efficient use of this greenfield site and the proposed reduction in the indicative capacity of the Site, is unjustified, taking into account the available evidence. <p>2.5 Required Changes</p> <p>2.5.1 To make the Plan “Sound” the following changes are necessary:</p> <ul style="list-style-type: none"> • Supporting Tables 3.1 and 3.3 should be adjusted to account for the more efficient use of allocated sites and increase the proportion of homes which make up the “allocated” part of the housing supply. • The above changes are reflected in the Policy SP3.
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Please refer to the accompanying representations.</p> <p>Text below (copied from attached statement) added by DDC. See attachment for full representation.</p> <p>SP3 – Housing Growth Draft Policy</p> <p><i>SP3 (Housing Growth) uses the Standard Method to calculate the housing need for DDC up to 2040, seeking to deliver a minimum of 10,988 net additional homes over the plan period throughout the district, equating to the delivery of a minimum of 3,381 homes per annum once existing commitments are accounted for.</i></p> <p><i>The National Planning Policy Framework (NPPF) makes clear at paragraph 60, that use of the Standard Method to calculate a Local Authority's housing requirements is the preferred methodology, unless exceptional circumstances apply. The draft Plan draws reference to the NPPF in this regard and is explicit in the use of the Standard Method to calculate the housing requirements for DDC over the Plan period.</i></p> <p><i>The Planning Practice Guidance (PPG) (ref: Paragraph: 002 Reference ID: 2a-002-20190220) provides further detail on how it expects the Standard Method to be applied. The PPG makes it clear that the Standard Method is used to, explicitly, identify the minimum number of homes to be planned for across an LPA over the plan period. It recognises that in applying a minimum figure, other factors such as historic under-delivery and unmet housing need within neighbouring areas should also be considered in determining the actual need.</i></p> <p><i>SP3 is also expressly clear that the identified housing requirements for Dover represents a minimum figure for delivering housing over the Plan period, consistent with the aims and objectives of the NPPF to significantly boost housing supply. The draft Plan, and the approach to calculating its housing needs through the Standard Method whilst applying the need as a minimum figure is consistent with national policy and considered sound in this regard.</i></p> <p><i>Whilst we support the housing requirement being a minimum figure, it is concerning to see the significant reliance on existing commitments (i.e., extant permissions) in their contribution to the Council's proposed housing supply to meet their Local Plan housing need of 10,988 homes. The extant supply comprises a significant portion of extant supply from the Whitefield Urban Expansion and other permitted development not yet built. We have concerns over the soundness of such reliance on extant permissions, as planning permissions can lapse, become commercial</i></p>

unviable or undeliverable in response to rapid changes in market conditions and can often stall / become delayed. Overreliance on the extant supply of the Whitfield Urban Expansion i.e., one location for growth can stall the delivery of housing if problems arise with the delivery of the outstanding homes as consented. We do not consider this a sound approach.

We would urge the Council to place less reliance on extant supply to meet its housing need over the plan period and ensure sufficient land to bring forward residential development of all scales is accounted for in the spatial strategy to ensure the Local Plan and its approach to housing growth and delivery can be found sound. Smaller Sites such as The Former Packhouse can help ease the reliance on extant supply and can form an immediate deliverable part of the housing supply and trajectory in the early years of the plan period.

The Council propose a buffer of 8.5% as a contingency buffer to maintain a healthy supply of housing, provide flexibility and choice and to account for changing circumstances and under-delivery.

Use of a buffer is also consistent with national policy, with the NPPF not only requiring a Local Plan to meet its objectively assessed development needs in full but to do so through a considered strategy which engenders sufficient flexibility to adapt and respond to rapid change. To ensure sufficient flexibility, the Local Plan must account for the fact that both housing need and housing supply will inevitably fluctuate throughout the plan period due to several factors, including changes to population projections and affordability ratios, and sites failing to come forward as anticipated. Sufficient headroom is required over the Plan period to respond rapidly to these changes. A buffer is therefore important to account for these fluctuations, and overall housing need / supply and is necessary to ensure the Local Plan is effective, consistent with national policy, and positively prepared. It is for these reasons the application of a buffer is considered sound.

We do however have concerns over whether an 8% buffer is the most appropriate buffer to be applied to ensure the Plan, and its ability to deliver its housing need in full, is robust, and therefore an appropriate strategy.

We also have concerns over the appropriateness of the spatial distribution of housing growth across the district. SP3 proposes to direct the majority of new housing development in Dover Town and at Whitfield (through the proposed allocation SAP 1) with development then focused in the District Centre of Deal and the Rural Centres of Sandwich and Aylesham. Development in the rural areas will be of a scale consistent with the relevant settlement's accessibility, with land allocated to deliver in the region of 1,112 homes in addition to existing commitments.

Whilst we recognise the importance of focusing development towards urban settlements, such as Dover Town and Whitfield we have major concerns that approximately half of the district's new housing development is planned here with the majority to be delivered through SAP 1. Notwithstanding the concerns we have over the reliance on strategic allocations and its reliability in delivering all the extant supply, there is a risk of skewing most of the growth towards only several large locations across the district and disproportionately away from rural areas, resulting in an unsustainable pattern of growth. This is further exacerbated through the remaining housing growth to be delivered through the strategic expansion of Aylesham (draft allocation SAP 23).

Paragraph 78 of the NPPF makes clear that to promote sustainable development in rural locations, new housing should be located where it will enhance or maintain the vitality of rural communities, and that planning policies should support and identify opportunities for rural villages to grow and thrive, especially where it will support local services.

Whilst we recognise that the distribution of growth to rural areas in supporting the continued rural vitality and choice of housing must be balanced with the sustainability of settlements across the district (access to services, proximity to facilities, strategic road network etc.), we consider that insufficient housing has been allocated for rural areas, including but not limited to, Larger Villages, as per the Settlement Hierarchy. One should not slavishly adhere to the Settlement Hierarchy as a blunt tool to determine the sustainability of a settlement and its appropriateness for additional housing growth.

There is also an imbalance between the proposed scale of growth and number of dwellings various rural settlements have been proposed to accommodate, with some smaller villages receiving a greater portion of housing growth than some larger villages, and notable differences between settlement growth within the same category. We also note that not all large villages have been apportioned housing growth through residential site allocations, such as Northbourne, and therefore is a very real risk that in apportioning such low levels of housing to larger villages over the plan period could stagnate these communities, and stunt future growth essential for the continued vitality and prosperity of these thriving rural settlements.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance

Please refer to the accompanying representations.

Text below (copied from attached statement) added by DDC. See attachment for full representation.

As such, we urge the Council to revisit its spatial distribution of housing as it is currently unsound, ensuring that there is a great proportion of the housing supply directed to rural areas across the borough and less of a reliance on extant supply in a smaller concentration of larger urban

with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	settlements. Sites such as The Former Packhouse can help to deliver additional housing in sustainable rural villages such as Northbourne, ensuring modest and sympathetic housing is delivered in the early years of the plan period.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To ensure that that the spatial strategy and distribution of growth is amended to rebalance the portionality of housing growth across the district, requiring additional smaller rural sites that are deliverable.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Please refer to the accompanying representations. Text below (copied from attached statement) added by DDC. See attachment for full representation. SP3 – Housing Growth Draft Policy <i>Draft Policy SP3 (Housing Growth) uses the Standard Method to calculate the housing need for DDC up to 2040, seeking to deliver a minimum of 10,988 net additional homes over the plan period throughout the district, equating to the delivery of a minimum of 3,381 homes per annum once existing commitments are accounted for.</i>

The National Planning Policy Framework (NPPF) makes clear at paragraph 60, that use of the Standard Method to calculate a Local Authority's housing requirements is the preferred methodology, unless exceptional circumstances apply. The draft Plan draws reference to the NPPF in this regard and is explicit in the use of the Standard Method to calculate the housing requirements for DDC over the Plan period.

The Planning Practice Guidance (PPG) (ref: Paragraph: 002 Reference ID: 2a-002-20190220) provides further detail on how it expects the Standard Method to be applied. The PPG makes it clear that the Standard Method is used to, explicitly, identify the minimum number of homes to be planned for across an LPA over the plan period. It recognises that in applying a minimum figure, other factors such as historic under-delivery and unmet housing need within neighbouring areas should also be considered in determining the actual need.

SP3 is also expressly clear that the identified housing requirements for Dover represents a minimum figure for delivering housing over the Plan period, consistent with the aims and objectives of the NPPF to significantly boost housing supply. The draft Plan, and the approach to calculating its housing needs through the Standard Method whilst applying the need as a minimum figure is consistent with national policy and considered sound in this regard.

Whilst support the housing requirement being a minimum figure, it is concerning to see the significant reliance on existing commitments (i.e., extant permissions) in their contribution to the Council's proposed housing supply to meet their Local Plan housing need of 10,988 homes. The extant supply comprises a significant portion of extant supply from the Whitefield Urban Expansion and other permitted development not yet built. We have concerns over the soundness of such reliance on extant permissions, as planning permissions can lapse, become commercial unviable or undeliverable in response to rapid changes in market conditions and can often stall / become delayed. Overreliance on the extant supply of the Whitfield Urban Expansion i.e., one location for growth can stall the delivery of housing if problems arise with the delivery of the outstanding homes as consented. We do not consider this a sound approach.

We would urge the Council to place less reliance on extant supply to meet its housing need over the plan period and ensure sufficient land to bring forward residential development of all scales is accounted for in the spatial strategy to ensure the Local Plan and its approach to housing growth and delivery can be found sound. Smaller Sites such as Land at Jubilee Road can help ease the reliance on extant supply and can form an immediate deliverable part of the housing supply and trajectory in the early years of the plan period.

The Council propose a buffer of 8.5% as a contingency buffer to maintain a healthy supply of housing, provide flexibility and choice and to account for changing circumstances and under-delivery.

Use of a buffer is also consistent with national policy, with the NPPF not only requiring a Local Plan to meet its objectively assessed development needs in full but to do so through a considered strategy which engenders sufficient flexibility to adapt and respond to rapid change. To ensure sufficient flexibility, the Local Plan must account for the fact that both housing need and housing supply will inevitably fluctuate throughout the plan period due to several factors, including changes to population projections and affordability ratios, and sites failing to come forward as anticipated. Sufficient headroom is required over the Plan period to respond rapidly to these changes. A buffer is therefore important to account for these fluctuations, and overall housing need / supply and is necessary to ensure the Local Plan is effective, consistent with national policy, and positively prepared. It is for these reasons the application of a buffer is considered sound.

We do however have concerns over whether an 8% buffer is the most appropriate buffer to be applied to ensure the Plan, and its ability to deliver its housing need in full, is robust, and therefore an appropriate strategy.

We also have concerns over the appropriateness of the spatial distribution of housing growth across the district. SP3 proposes to direct the majority of new housing development in Dover Town and at Whitfield (through the proposed allocation SAP 1) with development then focused in the District Centre of Deal and the Rural Centres of Sandwich and Aylesham. Development in the rural areas will be of a scale consistent with the relevant settlement's accessibility, with land allocated to deliver in the region of 1,112 homes in addition to existing commitments

Whilst we recognise the importance of focusing development towards urban settlements, such as Dover Town and Whitfield we have major concerns that approximately half of the district's new housing development is planned here with the majority to be delivered through SAP 1. Notwithstanding the concerns we have over the reliance on strategic allocations and its reliability in delivering all the extant supply, there is a risk of skewing most of the growth towards only several large locations across the district and disproportionately away from rural areas, resulting in an unsustainable pattern of growth. This is further exacerbated through the remaining housing growth to be delivered through the strategic expansion of Aylesham (draft allocation SAP 23).

Paragraph 78 of the NPPF makes clear that to promote sustainable development in rural locations, new housing should be located where it will enhance or maintain the vitality of rural communities, and that planning policies should support and identify opportunities for rural villages to grow and thrive, especially where it will support local services.

Whilst we recognise that the distribution of growth to rural areas in supporting the continued rural vitality and choice of housing must be balanced with the sustainability of settlements across the district (access to services, proximity to facilities, strategic road network etc.), we consider that

	<p><i>insufficient housing has been allocated for rural areas, including but not limited to, Larger Villages, as per the Settlement Hierarchy. One should not slavishly adhere to the Settlement Hierarchy as a blunt tool to determine the sustainability of a settlement and its appropriateness for additional housing growth.</i></p> <p><i>There is also an imbalance between the proposed scale of growth and number of dwellings various rural settlements have been proposed to accommodate, with some smaller villages receiving a greater portion of housing growth than some larger villages, and notable differences between settlement growth within the same category.</i></p> <p><i>For example, the 'large' village of Worth is proposed to deliver 25 homes, whereas the 'smaller' village of Norrington is proposed to deliver 35 dwellings. Equally the larger villages of East Langdon, Preston, Lydden and Capel le Ferne all have significantly higher portions of housing growth, with Capel le Ferne expected to deliver 380% more housing than Worth.</i></p> <p><i>Worth benefits from access to the Strategic Road Network onto the A265 via Deal Road, and benefits from proximity to Sandwich and Sandwich train station. Worth as a larger village is therefore capable of accommodating greater levels of growth as a sustainable location benefitting from its relationship with Sandwich and the nearby highways network.</i></p> <p><i>There is a very real risk that in apportioning such low levels of housing to larger villages over the plan period the Council stagnate these communities, and stunt future growth essential for the continued vitality and prosperity of these thriving rural settlements.</i></p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Please refer to the accompanying representations.</p> <p><i>Text below (copied from attached statement) added by DDC. See attachment for full representation.</i></p> <p><i>As such, we urge the Council to revisit its spatial distribution of housing as it is currently unsound, ensuring that there is a great proportion of the housing supply directed to rural areas across the borough and less of a reliance on extant supply in a smaller concentration of larger urban settlements. Sites such as Land at Jubilee Road can help to deliver additional housing in sustainable rural villages such as Worth, ensuring modest and sympathetic housing is delivered in the early years of the plan period.</i></p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>To ensure that that the spatial strategy and distribution of growth is amended to rebalance the portionality of housing growth across the district, requiring additional smaller rural sites that are deliverable.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP34
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This area is within Open Arable Chalk Farmland with Woodland. Proximity of this site to the boundary of the AONB requires it to be kept as a buffer between the existing built environment and open countryside in order that the special character of the area is maintained.</p> <p>The village has lots of character, includes a conservation area, has narrow roads, a small school, limited amenities such as no medical services, limited bus service, recently reduced, no immediate access to rail services and therefore very dependent on car use. This results in frequent congestion in the village. There are limited footpaths in the village, unlit so access becomes increasingly dependent on motor transport.</p> <p>The site is opposite the AONB where there is normally pedestrian access for health and wellbeing.</p> <p>The proposal would result in the loss of agricultural land, recently becoming a topic of concern as continuity of food supply is threatened.</p> <p>Access is compromised and becomes dangerous on an already difficult road.</p> <p>This village has narrow roads which are already congested and at times blocked, as heavy vehicles try to gain access.</p> <p>My question is why there is a proposal for development here when it is within the zone of influence of both an SSI and AONB.</p> <p>The elevated views from routes to and from Wood Hill cannot be mitigated against with planting alone. Sensitive view points are 25m above the site from both the lynch and the woods. A screen of planting cannot satisfactorily mitigate the impact on these sensitive views from a nationally important designated sites.</p> <p>I think the access is also a major issue. The Ringwould road is not suitable for pedestrians and cyclists - unsafe for both modes given the bend in the road on the approach to the village and lack of forward visibility. With no pavement there is no safe active travel route to the village, and therefore the entire development will be based on car travel, and is therefore unsustainable.</p> <p>It is not suitable to redesign/ provide offsite 'improvements' - lights/tarmac etc to pedestrian path through the trees as it is an important bat corridor (must remain dark) and important ecological corridor (that makes a strategic green link to the green corridor at Knights bottom and along the Glen)</p> <p>Moreover, the access to the site will require tree/hedge/scrub removal and impede movement of wildlife from the Butts ecological zone and the woodland to the west of the site.</p> <p>With regards to site access, given the high banks and bend in the road, the junction is poorly located, particularly given the speed of peoples approach from the A 258 and the width of the carriageway.</p> <p>I would also question the principle of development in Kingsdown to this scale as there is no public transport or jobs/services in the village. It will change the character of the village- rural, historic, coastal village etc, particularly when viewed from the special zones that they have identified.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful	

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Full Representation attached to SDLP1698. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1698.) 3.1 In our view the Spatial Strategy adopted by Dover District Council is flawed by virtue of; 3.1.1 The new housing provision to the Secondary Regional Centre's of Dover and Whitfield, makes up some 60.5% of Housing Allocations across the borough, providing a minimum of 3,381 homes. Policy SP3 states that the majority of housing will be in Dover Town and at Whitfield. While this is the case, 60.5% of the District's growth located either in Dover or adjacent to Dover at Whitfield, is not a sustainable

strategy for the District's Growth going forward.

3.1.2 This level of Growth in a single location over an 18 year period from 2022 to 2040 would not only result in an oversupply of housing within Dover, most likely resulting in the sales of these homes to struggle. Additionally, from these Regulation 19 alterations housing delivery in Rural Service Centres and Local Centres has fallen by 7% of the total allocations within the Borough. This will lead to an undersupply of housing in these areas, negatively affect residents who wish to remain within the villages in which they are brought up within and a subsequent further increase in housing prices to these locations.

3.1.3 The changes from the Regulation 18 version of the Local Plan Review to Regulation 19, have resulted in 530 fewer homes in Rural Service Centres, 195 fewer homes in Local Centres and 95 fewer homes in Larger Villages.

3.1.4 These revisions will result in 820 less homes within the Rural Locations of the District. This will sufficiently harm the growth of the Borough going forward in the Plan Period and does not meet with the outlined Spatial Strategy at SP3. We would argue that 60% of housing located in the Secondary Regional Centre,

while representing a 'majority' of new housing development, is an excessive amount of housing growth in one location, that will prove to be undeliverable at the annual rate advocated by the Council.

3.1.6 It is commonly accepted that urban expansions that are akin to Garden Village scale proposals will not deliver at the rate the Council expects due to the quantum of new homes being located in one location, where developments will compete against each other for housing sales.

3.1.7 Additionally locating the relevant proportion of affordable homes within the Whitfield expansion area will lead to future residents being isolated from Dover centre and again prevent residents from being able to remain within the villages from which they are from.

3.1.8 Given that Rural Services Centres are noted as being 'the secondary focus for housing development' we are unable to countenance as to why such low numbers of new homes have been identified within the Allocated Sites for these highly sustainable locations.

3.1.9 Para's 68 & 69 of the NPPF states;

Para 68. Strategic policy-making authorities should have a clear understanding of the land available in their area through the preparation of a strategic housing land availability assessment. From this, planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability. Planning policies should identify a supply of:

- a) specific, deliverable sites for years one to five of the plan period³⁴; and
- b) specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15 of the plan.

Para 69. Small and medium sized sites can make an important contribution to meeting the housing requirement of an area, and are often built-out relatively quickly. To promote the development of a good mix of sites local planning authorities should:

- a) identify, through the development plan and brownfield registers, land to accommodate at least 10% of their housing requirement on sites no larger than one hectare; unless it can be shown, through the preparation of relevant plan policies, that there are strong reasons why this 10% target cannot be achieved;
- b) use tools such as area-wide design assessments and Local Development Orders to help bring small and medium sized sites forward;

c) support the development of windfall sites through their policies and decisions – giving great weight to the benefits of using suitable sites within existing settlements for homes; and d) work with developers to encourage the sub-division of large sites where this could help to speed up the delivery of homes.

3.1.10 It is our opinion that the Council is not able to identify sites in accordance with Para 69 of the NPPF given that the sites identified have not been proven to be deliverable or viable, as required under Para 68 of the NPPF.

3.1.11 It is important to refer to analyse the build-out rate to Garden Villages of the 2000+, noting that this scale of delivery is accepted as being 130 per annum when there are more than 3 outlets operating at one time. This is evidenced by the Lichfields Feb 2020 'Start to Finish' document at Page 14, a copy of which is attached at Appendix 1 below.

3.1.12 Given our understanding of delivery, evidence provided by Lichfields and the historic slow rate at which homes are delivered within the urban area of Dover, we are of the view that the proposed strategy is unsound, that the Council has too great a reliance on the Whitfield urban expansion and that greater focus to Rural Services Centres, Local Centres and Larger Villages is required to meet the Housing Land Supply for the Plan Period.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Hume Planning. Full Representation attached to SDLP1525. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1525.)</p> <p>SP3: Housing Growth</p> <p>We welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period. Within the Policy, reference is made to the Council's overall spatial strategy i.e. the majority of growth will be focused towards the principal town, Dover, and the further expansion of Whitfield. Reference is made to growth then being focusing on the next layer of settlements, Deal (district centre), Sandwich and Aylesham (both rural service centres). It is noted that Eythorne and Elvington, as a designated local centre, will be allocated for up to 300 dwellings under Policy SAP 28. Accordingly, we consider it would provide greater transparency if Policy SP3 made reference to the growth proposed in this location within the spatial hierarchy referenced at Policy SP3.</p> <p>We consider it is appropriate to direct development towards the land between Eythorne and Elvington which will be separated by the central playing fields and open space known as the Tilmanstone Colliery Sports and Welfare Club which is situated adjacent to the south of the allocation. Housing along with community facilities and local convenience store in this central position separated by the open space will enhance the sustainable credentials and degree of containment of the adjoining settlements. Both Eythorne and Elvington are well served by local facilities including, amongst other things, village halls, a primary school, public house, post office and local shops. There is also an established employment area to the east. The growth proposed, along with the expansion of Pike Industrial Estate, will also create a sustainable expanded settlement within the district. As well as improved cycleway and footpath linkages delivered by the allocations bus linkages will be improved and the villages are also served by the nearby railway stations 2 miles away at Shepherdsweil and 2.3 miles away at Snowdown.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails	(DDC Note: Text has been extracted from PDF document sent by Savills - Attachment and Full Rep on SDLP1324) Strategic Policy 3: Planning for Housing growth 5.2. Table 6.1 sets out the Council's current housing supply position and shows that in order to meet the Local Housing Need for the District, the Council will need to allocate housing sites in the Local Plan to deliver 5,288 homes over the Plan period. 5.3. DDC has outlined that their proposed growth strategy will focus on the development and regeneration of Dover Town, with further development concentrated towards Aylesham. The remainder of the housing growth will then be distributed across Local Centres and Villages in the rural area. In accordance with this, c. 0.84% of the housing growth will be distributed to smaller villages and hamlets. 5.4. Whilst our Client broadly agrees with the proposed housing strategy set out in the Local Plan, it is pertinent that it is very similar to the adopted Local Plan. 5.5. While this does not amount to the current strategy being flawed, the adopted growth strategy has been ineffective in delivering the requisite housing in the past, establishing a precedent of under delivery within the District – as highlighted in paragraph 3.67 of the Regulation 19 Draft Plan which states the following of

<p>to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>windfall permissions: “Over this period, the spatial distribution of windfall development has largely followed the settlement hierarchy, with 39% of windfall permissions being located at Dover, 31% at Deal and 12% within the defined settlement confines of rural villages.” 5.6. The Council should consider the influence of market signals on housing in the relevant plan policies – as set out in policy 31 of the National Planning Policy Framework (NPPF) – and increase the proportion of housing growth allocated within the rural areas to reflect this. 5.7. This representation highlights the capacity to deliver additional dwellings at the Site in a sympathetic manner, demonstrating that there is scope to increase housing provision across the Site and improve its contribution to the requisite growth in the District.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. (DDC Note - Representation submitted by Hume Planning. Full Representation attached to SDLP1502. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1502.) SP3: Housing Growth Whilst we welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period, it is considered additional sites if suitable and available should be included within the Plan. A large proportion of growth is being directed towards the new settlement at Whitfield (over 2,000), and with large strategic sites delivery rates can easily slow down during the plan period and under-deliver. Whilst there is a buffer within the Plan, it is considered appropriate not use this as a limit, and allocate other suitable sites in sustainable locations where available. In this respect, it is noted that Sandwich sits towards the top of the settlement hierarchy, alongside Aylesham, as a rural service centre. Only Deal, Dover/ Whitfield sit above. Yet, due to the constraints in Sandwich, only 227 units are being allocated in this settlement compared to over 600 in Aylesham. As detailed above, land at Whitefriars, HEELA site SAN014 is considered suitable for residential development. It is also available and can be delivered within the short to medium term, and in our view this site should be allocated within the Plan.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Policy SAP16 - Deal Small Housing Sites Policy SP3 - Housing Growth Policy SP4 - Windfall Development
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>*Comments on SP3 here, SP4 comments are on SDLP1290 and omission site reps are on SDLP1291*</p> <p>Our client supports DDC's new Local Plan in principle, however our client objects to a component of the Plan, such that the Plan should be considered 'unsound'. It is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound'. These objections are set out in the consultation response submitted on behalf of Persimmon Homes South East (ref DHA/30289)</p> <p>1 Introduction</p> <p>1.1 Context</p> <p>1.1.1 This representation has been prepared by DHA Planning on behalf of Persimmon Homes South East in response to the Dover District Council 'DDC' Local Plan (Regulation 19) consultation which runs until 9th December 2022.</p> <p>1.1.2 We understand that DDC is in the process of preparing a new Local Plan to set out a strategy for development for the period to 2040 and that the Council are presently seeking comments on the pre-submission Plan prior to its submission for examination in early 2023.</p> <p>1.1.3 The new Local Plan will set out the vision, strategic objectives and overarching development strategy for the growth of the District over the period to 2040. It provides the planning policy framework to guide the future development of the area, addressing needs and opportunities for housing, the economy, community facilities and infrastructure, as well as the basis for conserving and enhancing the natural and historic environments, mitigating and adapting to climate change, and achieving well designed places.</p> <p>1.1.4 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. This submission will comment with reference to the above, highlighting where we believe any areas of concern lie or where modifications may be required.</p> <p>1.2 Purpose of this Representation</p> <p>1.2.1 Our client controls 'Land Golf Road, Deal' (hereafter referred to as 'Land at Golf Road' or 'the Site') and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site was submitted as an available, suitable and deliverable location for residential development with capacity for approximately 60 dwellings as part of the new Local Plan preparation, however the Site has not been taken forward within the Regulation 19 Pre- submission Plan.</p> <p>1.2.2 The purpose of this representation is to support DDC's new Local Plan in principle, however our client objects to a component of the Plan, such that the Plan should be considered 'unsound'. It is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound', in which the quantum of Plan-led housing delivery within Deal should be increased to accurately reflect its second tier settlement status. Our client considers that given historic strategic under delivery in the district and wider uncertainties in the planning system,</p>

the Council should sensibly demonstrate an oversupply of reliable, deliverable sites early in the Plan period to ensure sufficient flexibility in housing delivery, should extant permissions or larger allocated sites not come forward or deliver as anticipated.

1.2.3 To be clear, Persimmon Homes South East support the premise of DDC's growth strategy, which includes further Plan-led development within Deal in line with its higher-order settlement status. However, we are concerned that DDC have planned at a significantly reduced level of growth in Deal, citing a dwindling supply of available land within and around the settlement. Consequently, the Plan fails to appropriately maximise the sustainable credentials of Deal and has resulted in a marginal supply of available, deliverable small and medium sites, insufficient to provide the flexibility in housing delivery that is required in accordance with national planning policy.

1.2.4 The Plan is predicated on the delivery of a major urban extension at Whitfield, Dover comprising a new community and a minimum of 2,200 homes within the Plan period. It is anticipated that Whitfield will deliver a significant quantum of new homes primarily towards the latter half of the forthcoming Plan period. Consequently, DDC must demonstrate a sufficient supply of reliable small and medium sized sites capable of delivery early in the Plan period to ensure consistent housing delivery in accordance with national planning policy and Plan-making guidance.

1.2.5 This representation provides comment on the consistency of our client's proposed allocation site with the proposed strategy, draft policies and sets out our client's position in respect of the 'soundness' of the Plan. To reiterate, whilst our client is supportive of DDC's new Local Plan in principle, Persimmon Homes South East object to a component of the Plan, such that the Plan is considered 'unsound'. Our client is concerned that the growth strategy as drafted fails to fully maximise available sites within the higher order settlement of Deal and by extension, our client objects to the exclusion of Land at Golf Road within the Regulation 19 Local Plan.

1.2.6 Our client is also concerned that given the recent constraints to housing delivery associated with nutrient neutrality in East Kent, the historic under delivery previously experienced at Whitfield and the wider uncertainty within the planning system more generally, the growth strategy as drafted may not include sufficient small and medium sites to demonstrate the necessary flexibility should allocated sites not come forward or deliver as anticipated.

1.2.7 In this regard, our client remains wholly supportive of the premise of further residential development within Deal and agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole. However, it is submitted that Deal is capable of making a far greater contribution to the delivery of new homes within the forthcoming Plan period than drafted. In line with its higher-order status within the settlement hierarchy and excellent access to day-to-day services and amenities, it is put forward that Deal is wholly capable of delivery significantly greater than the 223 dwellings allocated.

1.2.8 For the reasons set out within this representation, we say that available and suitable sites do exist, including that of our client's Land at Golf Road, Deal capable of delivering logically located, highly sustainable new homes in accessible location early in the Plan period, sufficient to provide greater flexibility and assurance of steady and sustained housing delivery across the Plan period, balance the scale of delivery from strategic urban extensions and further assist in reducing the need to develop into more rural, typically less accessible and more sensitive locations within the district to otherwise deliver the growth that is required.

1.2.9 The inclusion of Golf Road, Deal would provide a medium sized site for the Council that could come forward quickly, complying with the Framework's requirement to provide a mix of sites and include specific sites for years 1-5 of the Plan period. Accordingly, we say that Land at Golf Road, Deal can further assist the Council in meeting the growing need for new homes in the district and is necessary to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full as well as delivering wider public benefits to the local community within Deal.

1.2.10 Based on the current national and local planning context, we consider the Site to be a highly suitable edge-of-settlement location to allocate land for housing to help meet the need for new homes in the district. Its effective use should therefore be appropriately maximised in accordance with national policy objectives.

1.2.11 Further details regarding the Site and commentary on the consistency of the Site with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan are set out in the following sections of this document.

1.3 About Persimmon Homes

1.3.1 Building over 13,500 beautifully-designed new homes a year in more than 350 prime locations nationwide, Persimmon is proud to be one of the UK's most successful housebuilders, committed to the highest standards of design, construction and service. As a reflection of their commitment to delivering excellence always and delivering great customer care, the Home Builder's Federation (HBF) have awarded Persimmon 5 stars. Persimmon have a track record of delivery, and have been building new homes for over 50 years. Local Authorities up and down the country rely on national-scale housebuilders to deliver significant quantities of new homes each year, to meet the ever growing demand for new housing. Persimmon Homes remains committed to building new houses in the Dover District area and has over the last few years been developing two sites in the district, one in Aylesham which is a joint venture with Barratt Homes and one in Deal.

1.3.2 Persimmon's approach is to work positively and proactively with local planning authorities (LPAs), both during the preparation of local plans and at planning application stage. Persimmon Homes South East are fully committed to engaging with Dover District Council in the preparation of its Local Plan, and firmly subscribe to the national policy approach set out in paragraphs 15 and 16 c) of the NPPF that "the planning system should be genuinely plan-led" and should be shaped by early, proportionate and effective engagement between LPAs and others, including businesses and developers. Accordingly, Persimmon Homes South East would welcome the opportunity to discuss the matters contained in this representation, including the availability, suitability, deliverability and capacity of Land at Golf Road, Deal directly with Dover District Council members and officers, ahead of the submission of the Local Plan for examination.

1.4 Representation Structure

1.4.1 The representation structure is outlined below for ease of reference:

Chapter 2 (Housing Need) - Consideration of market and affordable housing need and assessment of proposed housing allocations and supply sources.

Chapter 3 (Assessment of Suitability) - Re-introduces our client's Site and provides a summary of planning constraints and opportunities, including the quantum of development that could be accommodated, why the Site is suitable for development and why the principle of the draft allocation for residential development is both justified and consistent with the Council's strategy for growth in the district. It also sets out why we consider there is scope for a higher number of dwellings at the site. This consideration amounts to an objection to one element of the strategy – namely that those sites around the most sustainable settlements should be maximised.

Chapter 4 (Conclusion) - Summarises the key points raised throughout the representation and re-affirms our client's support for the Site's allocation and proposed strategy ahead of the submission of the Plan for examination.

2 Housing Need

2.1 Context

2.1.1 Paragraph 11 of the NPPF is explicit in its requirement for strategic policy-making authorities to promote a sustainable pattern of development that seeks to meet the need in full.

2.1.2 Paragraph 20 of the Framework is equally clear that strategic policies should set out an overall strategy for the pattern, scale and design quality of places. Policies should make sufficient provision for the development that is required as well as associated infrastructure, community facilities and should set out a strategy for the conservation and enhancement of the natural, built and historic environment.

2.1.3 Given this national planning context, the emerging Local Plan should provide a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic environment.

2.1.4 National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate.

2.1.5 In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.

2.1.6 Paragraph 68 is clear in its requirement that strategic policy-making authorities should have a clear understanding of the land available in their area and should ensure that planning policies identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability. Planning policies should identify a supply of:

a) specific, deliverable sites for years one to five of the plan period

b) specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15 of the plan.

2.1.7 In this vein, paragraph 69 of the Framework goes on to stress that small and medium sized sites (such as that of our client's land at Golf Road) can make an important contribution to meeting the housing requirement of an area, and are often built-out relatively quickly.

2.1.8 Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.

2.2 DDC's Housing Need

2.2.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover

District of 596 dwellings per annum. However, the affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total minimum housing need of 10,998 dwellings for the Plan period to 2040. We understand that the Regulation 19 Local Plan seeks to meet this need in full and in addition to the minimum figures, DDC have a set a contingency buffer of 926 dwellings for the Plan period, equating to 8.4% of the total Plan period figure.

2.2.2 For context, the current adopted CS requirement is 700 dwellings per annum. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.

2.2.3 For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate sufficient land to accommodate a minimum of 6,642 new homes over the remaining plan period to 2040. It is understood that this will be derived from the following sources:

- Whitfield Urban Expansion Allocation: 2,200 dwellings
- Local Plan Allocations (excluding Whitfield): 3,392 dwellings
- Windfall Allowance (70 a year from year 4): 1,050 dwellings

2.2.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target. Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs AONB, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, meeting Dover's housing needs inevitably will require the release of significant greenfield land.

2.2.5 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan period, consistent with the overarching strategic objectives of draft policy SP3 within the emerging Plan.

2.2.6 Such sites are best placed to deliver the significant number of new homes that are required and are most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the District as well as further balancing the role of strategic- scale development at Whitfield within the emerging Plan's proposed growth pattern in the event that Whitfield or indeed any of the major allocations upon which DDC seek to rely to not come forward or do not deliver as anticipated.

2.2.7 On this basis, we set out below why our client's site Land at Golf Road, Deal is suitable to be included within the submission Dover Local Plan and is necessary for inclusion in order for DDC to demonstrate sufficient supply and flexibility within the early phase of the housing trajectory as required by national planning policy, such that the Plan may be considered 'sound'.

3 Site Specific Assessment

3.1 Overview

3.1.1 The previous chapters of this representation outline our client's position relating to the soundness of the Plan in which our client is confirmed to be supportive in principle of the Local Plan as a strategy for the growth of the district to 2040, however our client objects to a component of the Plan, such that the Plan should be considered 'unsound'. It is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound', in which the quantum of Plan-led housing delivery within Deal should be increased to accurately reflect its second tier settlement status.

3.1.2 Paragraph 4.146 of the Local Plan states that the urban area of Deal encompasses the built-up areas of the parishes of Walmer and Sholden. Deal is identified in the Settlement Hierarchy and Confines Topic Paper (2022) as a 'District Centre', where there is a secondary focus for development.

3.1.3 It is clear that Deal must continue to form a principal location for focusing sustainable housing delivery in Dover district and will assist in ensuring an appropriate balance of sites are identified, capable of supporting the strategic role of Whitfield within the forthcoming Plan Period and minimising the need for housing growth in typically less accessible and more sensitive rural settlement with limited development capacity.

3.1.4 As introduced in the preceding sections, our client controls 'Land Golf Road, Deal' and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site was submitted for residential development with capacity for approximately 60 units as part of the new Local Plan preparation, however the Site has not been taken forward within the Regulation 19 Pre-submission Plan.

3.1.5 Land at Golf Road represents an excellent opportunity for the delivery of approximately 60 high-quality new homes in a logical, highly accessible location in north Deal with capability to deliver a policy compliant quantum of much-needed affordable housing, a mix of house types, sizes and tenures and ability to make a significant contribution to wider public infrastructure through developer contributions. The land itself is of no particular ecological value and is in private ownership, offering limited public benefit. The Site is capable of delivering strong biodiversity net gain, attractive internal and boundary landscaping, open space, play facilities and a development pattern which facilitates pedestrian permeability and encourages active travel in north Deal.

3.1.6 Given the dwindling supply of available sites within the District and the growing housing need, it is imperative that the sustainable credentials of these higher-order settlement sites are appropriately maximised to deliver the housing that is required in accordance with the underlying objectives of draft policy SP3, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and our client objects solely on the basis that the growth strategy component of the Plan as drafted is 'unsound'.

3.1.7 Consequently, our clients object to policy SP3 as drafted. On the basis that there is a clear need to maximise the delivery of housing sites within Deal, our clients consider the Plan 'unsound'. Our site, Land at Golf Road, Deal, has been excluded from the Plan primarily on flood risk grounds, without further consideration or detailed evidence; without acknowledging the presence of high-quality 1 in 200 year flood defences and without any regard to the prevalence of recent residential developments permitted nearby (having passed the Sequential and Exception test with Environment Agency support on flood risk). Additionally, we submit that the Site is capable of providing a residential development which would be safe for its lifetime, owing to the high-quality flood defences and on-site mitigation measures.

3.1.8 The consequent omission of potentially circa 60 units, in our view fails to make effective use of Dover's second tier settlement and will otherwise require further new homes to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

3.1.9 Without prejudice to our client's support to the premise of the growth strategy, which primarily directs growth at higher order settlements, we would urge the Council to re-visit its growth strategy and proposed allocations to allow a greater quantum of development within Deal, by including suitable sites such as Land at Golf Road to fully reflect its excellent sustainability credentials and provide a pragmatic oversupply of reliable, deliverable small and medium sites capable of delivery early in the Plan period.

3.1.10 We submit that Deal is wholly capable of delivering significantly greater than the 223 dwellings allocated. We say that available and suitable sites do exist, including that of our client's Land at Golf Road, Deal which is being promoted by a national housebuilder fully committed to the Site and with an excellent track record of delivery.

3.1.11 It is put forward that Deal is capable of delivering further logically located, highly sustainable new homes in accessible locations early in the Plan period. An additional supply would; provide greater assurance of steady and sustained housing delivery across the Plan period, balance the scale of delivery from strategic urban extensions and, further assist in reducing the need to develop into more rural, less accessible and sensitive locations within the district to otherwise deliver the growth that is required.

3.1.12 We agree that Deal represents a logical and sustainable location to direct the growth required within the district and consider that the land promoted at Golf Road, Deal should be included as a future housing allocation within the Dover District emerging Local Plan. The Site is considered to be wholly consistent with the objectives of the Plan and would form part of a sound growth strategy for the district to 2040 whilst delivering policy compliant affordable homes, a mix of house types and tenures and wider ecological, landscape and public benefits.

3.1.13 Our client is firmly of the view that the allocation of additional housing sites is necessary to ensure that balanced growth strategy put forward within the Pre-submission Dover District Local Plan is 'sound', comprising an appropriate balance of small, medium and strategic-scale sites deliverable across the Plan period. The allocation of well-located, reliable, greenfield sites such as our client's at Land at Golf Road is necessary for DDC to meet the growing housing need. The Site is being promoted by Persimmon, a firmly committed national housebuilder with an excellent track record for delivery, and the inclusion of the Site would ensure that DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan in the event that identified sources of housing do not come forward or fail to deliver as anticipated.

3.2 Site and Surroundings

3.2.1 The Site is situated to the west of Golf Road, north of West Lea and west of the Fairway on the north-western edge of Deal.

Figure 3.1: Approximate Site Location (courtesy of Google Earth)

3.2.2 The Site comprises an undeveloped regular parcel of land in agricultural use totalling approximately 1.9 hectares. The site is bound by residential development on three sides which detached the site from the wider open countryside to the west. The Site is consequently characterised by its edge-of-settlement location with typical suburban residential development the predominant development pattern in the area.

3.2.3 In terms of overarching planning constraints, the site is not subject to any overarching landscape or ecological designations and is not itself subject to any heritage constraints. The site is located within defended Flood Zone 3, albeit this covers the majority of this part of north Deal which is subject to coastal flood defences.

3.2.4 In terms of accessibility, the Site enjoys excellent access to a number of day-to-day facilities and services which are within a reasonable walk distance, including primary and secondary schools, local shops, healthcare, employment, and public transport links within Deal and Walmer including Deal mainline station and frequent buses along Dover Road between Dover, Deal, Sandwich and Canterbury.

Consideration of Flood Risk

3.2.5 The site is located entirely within Flood Zone 3a as defined by the Environment Agency Flood Risk mapping.

3.2.6 Owing to its strategic nature, Deal is subject to significant coastal defences. These defences provide protection from coastal erosion as much as they do flooding, and are actively maintained, as part of a 'hold the line' policy in this Shoreline Management Plan area (SMP).

3.2.7 As part of the Deal Coastal Flood Defence Scheme (completed in 2013), a recurved concrete sea wall was constructed from Sandown Castle to Deal Castle. Beach renourishment provides an additional level of protection to this frontage.

3.2.8 The NPPF requires the actual risk of flooding to a development to be appraised. The actual risk considers the likelihood of flooding under extreme conditions (e.g. the design flood event), whilst considering the influence of any defence infrastructure, or drainage systems, which may provide a level of protection to the site. Given the presence of high-quality defences at Deal, it is evident that the actual risk of flooding under the design event is reduced, leaving only the residual risk, which falls outside of the scope of the NPPF and relates to extreme circumstances in the event the defences, or drainage system were to fail (i.e. due to a breach or a blockage), or if an event greater than the design flood event was to occur and overtop the defences.

3.2.9 The Strategic Flood Risk Assessment (2019) prepared by Herringtons Consulting is included within the DDC Local Plan Evidence Base and has identified that the coastal towns of Deal and Dover are protected from sea flooding under an extreme storm event with a 1 in 200 year return period (0.5% AEP) and the construction of the defence infrastructure has significantly reduced the actual risk of flooding at these coastal locations. The risk of coastal flooding to these two towns is therefore limited to a residual risk event only, which would require a catastrophic failure of the new defence infrastructure (e.g. a failure in the seawall).

3.2.10 On account of the above, we do not consider it appropriate for the Plan-led growth of north Deal to be automatically excluded on account of flood risk. DDC acknowledge that following high-levels of windfall development within the previous (adopted) Plan period, there are limited available and suitable sites for development within Deal and consequently have sought to reduce the level of Plan-led growth within the forthcoming Plan period, with a greater reliance on strategic development at Whitfield and alternative third tier settlements in response. Our client's disagree with this approach and object to the proposed growth strategy as an unsound basis on which to reliably deliver the growth that is required in the district.

3.2.11 Our client's site, Land at Golf Road, Deal is evidence that suitable small and medium sites are available in Deal and are being promoted for delivery early in the Plan period. It is accepted that sites such as that of our client's will be subject to Flood Risk Assessment and be required to pass both the Sequential and Exception tests.

3.2.12 Taking each test in turn, the Sequential Test is a risk-based test which aims to steer development to areas at the lowest risk of flooding. DDC already acknowledge that there is a dwindling supply of available sites in Deal. Moreover, we emphasise that two small sites within Deal have been allocated for residential development under policy SAP16 'Deal Small Housing Sites' (Ethelbert Road Garages (5 units) and 104 Northwall Road, Deal (8 units)). Both sites as shown in figure 3.2 below are in close proximity to our client's site. Both sites are in Flood Zone 3a and protected by the Deal coastal defences. Land at 104 Northwall Road is plainly highly comparable to our client's site and there appears no sound justification for the exclusion of Land at Golf Road on this basis. For the purposes of the Sequential Test, the allocation of sites within Flood Zone 3a is clear acknowledgment that sequentially preferable sites do not exist in Deal and some development within the defended flood zone is required in order to deliver the growth that is required.

Figure 3.2: Extract of Reg 19 Policies Map showing our client's site (red line) and proposed residential allocations (green shading). Flood Zone 3 shown in blue.

3.2.13 In addition to the Sequential Test, the Exception Test must also be passed which requires proposals to demonstrate
a) the development would provide wider sustainability benefits to the community that outweigh the flood risk; and

b) the development will be safe for its lifetime taking account of the vulnerability of its users, without increasing flood risk elsewhere, and, where possible, will reduce flood risk overall.

3.2.14 In this regard, the provision of the housing that is required, in addition to wider biodiversity, accessibility, open space and public infrastructure benefits is considered sufficient to outweigh the flood risk. With respect to (b), exact details would be provided as part of a detailed planning application, however in combination with the existing flood defences, it is anticipated that any future development could be subject to land level raising and all living and sleeping accommodation is proposed above the ground floor level, above the predicted design flood level. Further early flood warning systems, evacuation plans and a raised area of safe refuge could be included to ensure the development would be safe for its lifetime.

3.2.15 Further to the above, we note the following planning applications for residential development have also been permitted recently in north Deal, within Flood Zone

3a and without Environment Agency objection having passed both the Sequential and Exception tests without issue. Examples of granted planning applications within Flood Zone 3a include:

- 21/01233 – 17 Godwyn Road, Deal (1no. dwelling)
- 20/00341 – 269 Sandown Road, Deal (1no. dwelling)
- 20/00787 – Land adjacent 56 Golf Road, Deal (1no. dwelling)
- 19/00425 – Land rear of 92 & 94 Northwall Road, Deal (1no. dwelling)
- 15/00176 – Site at 90 Golf Road, Deal (2no. dwellings)
- 14/01211 – Land off Ark Lane, Deal (14no. dwellings)
- 14/00852 - 22 Harold Road, Deal (1no. dwelling)
- 13/00522 – Bede and Dunstan Houses, College Road, Deal (16no. dwellings)

3.3 Development Capacity

3.3.1 At this early stage, significant design work has not yet progressed. However, for the purposes of this representation, Land at Golf Road, Deal is submitted with capacity for approximately 60 residential dwellings (subject to detailed design and flood risk assessment) deliverable early in the Plan period.

3.3.2 The scale and nature of the Site is considered highly conducive to the delivery of a high-quality, landscape-led scheme capable of making a significant contribution to the delivery of market and affordable housing in a logically contained location that would assimilate with the existing pattern of development.

3.3.3 Land at Golf Road represents an excellent opportunity for the delivery of approximately 60 high-quality new homes in a logical, highly accessible location in north Deal with capability to deliver a policy compliant quantum of much-needed affordable housing, a mix of house types, sizes and tenures and ability to make significant developer contributions to support existing and future public infrastructure.

3.3.4 The land itself is of no particular ecological value and is in private ownership, offering limited public benefit. To the contrary, the Site is capable of delivering strong biodiversity net gain, attractive internal and boundary landscaping, opening up public access to open space, play facilities and a development pattern that facilitates pedestrian permeability and encourages active travel in north Deal.

3.3.5 Detailed proposals have not yet been advanced, however it is anticipated that any future development of the site will be of an appropriate density, reflecting the local character of development and responding to local needs for housing. Any future development will be sensitively designed to respect the existing character and materiality of the area, the topography of the site and to allow a positive transition to the rural landscape and respond to its coastal location.

3.3.6 It is acknowledged that the site is located within Flood Zone 3a, however this is true of the majority of north Deal which is nonetheless protected by coastal flood defences. Subject to detailed flood risk assessment and site layout design, for the reasons set out above, flood risk is not considered to represent an absolute constraint preventing the future development of the site.

3.3.7 Exact flood risk design details would be provided as part of a detailed planning application, however in combination with the existing flood defences, it is anticipated that any future development could be subject to land level raising and all living and sleeping accommodation is proposed above the ground floor level, above the predicted design flood level. Further early flood warning systems, evacuation plans and a raised area of safe refuge could be included to ensure the development would be safe for its lifetime.

3.3.8 Particular care will also be taken with regard to opportunities for biodiversity habitat creation and enhancement, publicly accessible open space and high-quality play space to serve the local community.

3.3.9 In terms of access, opportunities for safe, direct and convenient primary vehicular, pedestrian and cycle access are achievable onto the adopted highway. The Site will be capable of facilitating a permeable pattern of development in northwest Deal, providing convenient access for future and existing residents to a range of day-to-day facilities including grocery stores, medical facilities and Deal train station.

3.3.10 To be clear, our client agrees that Deal represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of available land within Deal can be made – and therefore object to policy SP3 'housing growth strategy' and the exclusion of Land at Golf Road on this basis.

3.3.11 Accordingly, we say that Land at Golf Road is not subject to any absolute development constraints and can further assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.

3.4 Strategic Justification for Development

Spatial Strategy

3.4.1 The proposed Housing Distribution for the district across the Plan period is established within Policy SP3 'Housing Growth' which sets out that the distribution of housing growth in the district is primarily based on the settlement hierarchy and influenced by site availability, environmental constraints and factors of delivery.

3.4.2 Rightly, a key aim of the growth strategy is to focus development in the least sensitive areas of the district in order to conserve and enhance the Dover's rich natural and historical environment.

3.4.3 A retained theme from the adopted Plan, is that DDC's settlement strategy continues to focus on the development and regeneration of Dover Town and Whitfield (3381 dwellings). Approximately half of the district's planned housing is in this location, the majority of which again is to come forward as part of the strategic urban expansion of Whitfield 'SAP1' (2200 minimum dwellings).

3.4.4 Development will then be focused in the District Centre of Deal (223 dwellings), and the Rural Service Centres of Sandwich (227 dwellings) and Aylesham (649 dwellings). Following the settlement hierarchy rigidly would distribute housing in the preceding order, however the Plan recognises that housing delivery in Deal and Sandwich continues to be constrained by a number of factors including flood risk, ecological designations, heritage and highways. Further, Deal has experienced generally high levels of windfall development across the previous Plan period and accordingly there is now a dwindling supply of available, suitable sites in both settlements. On account of this context, DDC have sought to direct the majority of the remaining higher order settlement growth (outside of Dover & Whitfield) to Aylesham, through the strategic expansion to the town.

3.4.5 Outside of the four principal district settlements, the Rural Settlement Hierarchy (August 2022) identified that the majority of lower-order settlements in the district emerge as having a low level of facilities within the hierarchy and six settlements having none of the key indicators of sustainable services. Plainly, these settlements offer very limited opportunities for growth and it is evident that the forthcoming Plan will be reliant on the settlements of Dover (including Whitfield), Deal, Sandwich and Aylesham to deliver the housing growth that is required.

3.4.6 Given this context, it is clear that where available and suitable opportunities for residential development do exist within the district's higher order settlements, such as our client's site Land at Golf Road, which can provide a policy compliant level of affordable housing, it is imperative that the effective use of these sites are secured and appropriately maximised consistent with draft policy SP3 of the emerging Plan and national policy objectives.

3.4.7 Notwithstanding our client's in support of the premise of the proposed strategy, we are concerned that highly sustainable, edge-of-settlement sites, particularly in higher tier settlements such as Deal have been omitted to reflect their accessible location and capability to accommodate a significant quantum of high-quality development. On this basis, our client is concerned that the strategic objectives underlying draft policy SP3 'Housing Growth' may not be fully realised, to the detriment of market and affordable housing delivery and the wider policies seeking to conserve and enhance the district's natural and historic environment.

3.4.8 Consequently, our client objects to policy SP3 which is considered 'unsound' as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Deal, and this has not been undertaken – for example at Land at Golf Road, where the Site has the site has been omitted despite clear justification for the suitability of development in Flood Zone 3a and indeed site allocations being included for residential development in the immediate vicinity. The Site has sufficient capacity to deliver approximately 60 additional units over the draft allocations for Deal, which will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

Greenfield Development and Consistency with Housing Trajectory

3.4.9 Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs Area of Outstanding Natural Beauty, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, release will be required if DDC is to meet its housing and development commitments moving forward.

3.4.10 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan period, to support the role and timescales of strategic urban extensions and to deliver the significant number of new homes that are required within the forthcoming Plan period.

3.4.11 In terms of housing delivery within Deal, just 223 new dwellings are proposed to be delivered, the fourth most number of dwellings despite Deal's secondary status within the settlement hierarchy. We understand this reflects the previously high levels of growth seen within the previous (adopted) Plan period and the reduced supply of sites now available in the town. However, our client's site is testament to the continuing availability of sites and in our view, delivery within the previous Plan period does not preclude further development within the following Plan period, particularly where a settlement has proven to provide a reliable and sustainable source of much-needed new housing in a highly accessible location.

3.4.12 Moreover, greenfield edge-of-settlement sites are, in our experience, typically most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the district.

3.4.13 The Sustainability Appraisal Scoping Report (2018) sets out that over the course of the adopted Plan period, the key sustainability issues facing Dover District in relation to housing are as follows:

Population growth, household growth and demographic change will place additional demand on key services and facilities such as housing, health, education and social care. The Local Plan offers a new opportunity to manage these pressures, encouraging mixed communities;

There is a need for affordable housing across the District. At present, the mean price of dwellings is higher than the national average. The Local Plan will help to expedite its delivery; and,

There is the need for a mix of housing types that cater for the needs of a range of people, including the growing number of single person and elderly households. Without an up-to date Local Plan, the required housing is less likely to be delivered.

3.4.14 It is evident that the new Dover Local Plan must allocate a mix of reliable sites capable of steadily delivering not only the quantum of housing that is required, but also the associated public infrastructure, affordable housing and a mix of unit types and tenures suitable for a wide range of future occupants.

3.4.15 The Housing Topic Paper (September 2022) provides further context and summarises under Chapter 7 'Historical Housing Delivery' that Dover has historically placed significant reliance on windfall development over the current adopted Plan period, with windfall sites accounting for 44% of all completed dwellings over the preceding 10-year period.

3.4.16 Moreover, it is highlighted that at the beginning of the 10 year period, the majority of new dwellings were being built on brownfield land. However, from the monitoring year 2013-14 onward development on greenfield land began to play a much greater part in the location for new development as show in figure 1 below. This trend of increased housing development on greenfield land is a result of the allocations within the CS and Land Allocation DPD being built out and is associated with an approximate doubling of completions in the district. From 2013-14 onwards the average number of completed dwellings per annum has doubled to that of the early years of the CS, as the strong delivery rates of greenfield sites form the predominant source of housing. This is despite an overall declining trend of brownfield completions towards the latter half of the Plan period. This is generally not an uncommon trend in the majority of local planning authority areas, where opportunities for available and suitable sites in urban centres dwindle throughout the Plan period.

Figure 1: DDC Brownfield / Greenfield Completions 2010/11 to 2020/21 (source: Housing Topic Paper September 2022)

3.4.17 In light of the above context, it is clear that the adopted Dover Local Plan suffered from an initial under delivery of Plan-led housing growth in which windfall development sources were largely required to take up the slack in the early phases of the Plan period, as major allocated sites failed to deliver at the rates initially expected.

3.4.18 It is equally apparent that initial slow completion rates were quickly addressed once greenfield allocations commenced development, feeding into strong completions in the latter half of the Plan period. In our experience, greenfield sites are typically

associated with stronger delivery rates and provide a reliable source of housing growth. The allocation of an appropriate mix of sites and scales is required in order to ensure steady and sustained Plan-led housing delivery across the Plan period and to avoid a reliance on windfall development to address the shortfall.

3.4.19 Consequently, given all of the above, it is imperative that the new Local Plan allocates a sufficient variety and scales of site capable of both ensuring steady and sustained housing completions and capable of making necessary contributions to public infrastructure and services, affordable housing and mix of unit types to address the key issues raised in the Sustainability Appraisal.

3.4.20 In our view, edge-of-settlement greenfield sites such as our client's Site, Land at Golf Road, represents one of the most reliable and sustainable source of housing delivery for the Plan period. Such sites are typically less constrained by wider factors and less affected by unforeseen delays such as land contamination. Moreover, greenfield sites typically are more capable of delivering the policy compliant affordable housing, unit mix and developer contributions that are urgently needed.

3.4.21 It is understood that the Plan is predicated on the delivery of strategic scale development at Whitfield comprising the development of circa 2,200 new homes. Consequently, in order to avoid a repetition of the previous Plan, the Council have sought to ensure that a pool of reliable greenfield allocation, including sites not dissimilar to that of our client are included within the Plan, capable of delivering the early growth that is required within the housing trajectory prior to the commencement of major allocations later in the Plan period.

3.4.22 We note that within the Housing Trajectory 'Appendix D', the Council have included allocated units from Years 4 onwards, with extant permissions (accounting for 5% non-implementation) demonstrated to be solely capable of delivering the growth required in Years 1-3. Notwithstanding our client's commitment to the Site, we support this pragmatic approach and suggest this represents a sound basis on which to set the district's housing trajectory. We note also the inclusion of an appropriate windfall allowance and the included contingency buffer to further ensure reasonable flexibility in the housing supply.

3.4.23 On account of all of the above, we submit that Land at Golf Road, Deal is required as a minor modification to form part of a sound strategy for growth in the district for the forthcoming Plan period. Land at Golf Road is capable of delivery early in the Plan period, representing a reliable source of housing growth in a highly sustainable and accessible location adjacent to the existing settlement boundary of Deal, consistent with the Council's preferred settlement strategy.

3.4.24 Our client objects to the omission of the Site and objects to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites within Deal, and this has not been undertaken – for example at Land at Golf Road, Deal.

3.4.25 Without prejudice to our client's support in for the premise of the proposed growth strategy which primarily directs growth at higher order settlements, we would urge the Council to re-visit its growth strategy and proposed allocations through a minor modification to allow a greater quantum of development within Deal to fully reflect its excellent sustainability credentials.

Policy SP4 'Windfall Development'

3.4.26 Separately, we note the provisions of policy SP4 windfall development. Proposals at Land at Golf Road would likely be acceptable in principle under this provision and we support the policy inclusion for appropriate, proportionate windfall development.

3.4.27 Our client is fully committed to the delivery of the Site which is available and suitable for delivery early in the Plan period. Notwithstanding the provisions of SP4, it is reiterated that our client fully supports the promotion of the Site for allocation as the most appropriate mechanism for delivery of the Site. The inclusion of Land at Golf Road would provide the opportunity for genuinely Plan-led development in Deal and the provision of associated benefits to public services and infrastructure, contribution to affordable housing supply and the delivering of a mix of house types and tenures.

Alignment with Sustainability Appraisal Findings

3.4.28 As part of the preparation of the Local Plan, the Council has identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA) which provides an assessment of how different options perform in environmental, social and economic terms, to help inform which option should be taken forward and combined with wider evidence documents, have been used to determine the growth and spatial strategy set out in the Plan.

3.4.29 Five potential distributions of growth were identified during preparation of the draft Regulation 18 Local Plan:

- Spatial Option A: Distributing growth to the District's suitable and potentially suitable housing and employment site options (as needed to deliver the scale of growth required).
- Spatial Option B: Distributing growth proportionately amongst the District's

existing settlements based on their population.

- **Spatial Option C:** Distributing growth proportionately amongst the District's existing settlements based on the District's defined settlement hierarchy.
- **Spatial Option D:** Distributing growth in the same way as the adopted Local Plan, focussing most growth in and around Dover town.
- **Spatial Option E:** Distributing growth more equally across the District's settlements: Dover, Deal, Sandwich and Aylesham, as well as the rural villages.

3.4.30 The conclusion of the SA was that Spatial Options C (settlement hierarchy) and D (adopted Core Strategy with Dover focus) generally perform the most strongly against the SA objectives, particularly when delivering the baseline growth scenario. However, given the environmental constraints that exist around Deal and Sandwich, very few suitable and potentially suitable sites have been identified in these towns. Given this, the Council's preferred option for the distribution of housing and economic growth comprises a combination of options A (HELAA sites), C (settlement hierarchy) and D (Dover focus). The distribution of housing and economic growth in the District is therefore primarily based on the settlement hierarchy, and influenced by site availability, environmental constraints and factors of delivery.

3.4.31 On account of the above, our client agrees that the proposed growth strategy, and by extension, policy SP3 in principle represents a sound and evidence-led strategy for growth. However, given the clear acknowledgement of the dwindling supply of available sites in the higher order settlements of Deal and Sandwich, which has necessitated a minor deviation from the strongest performing spatial options, we submit that where sites are available and suitable for development in Deal and Sandwich, these must be fully maximised, reflecting their accessible location and their ability to reduce the need to develop into less accessible and more sensitive sites elsewhere in the district to accommodate the growth that is required.

3.5 Site Specific Justification for Allocation

3.5.1 Land at Golf Road is considered highly conducive to the delivery of a high-quality, landscape-led scheme capable of making a significant contribution to the delivery of market and affordable housing in a logically contained location that would assimilate with existing patterns of development and is demonstrated to be acceptable in terms of flood risk.

3.5.2 Land at Golf Road represents an excellent opportunity for the delivery of approximately 60 high-quality new homes in a logical, highly accessible location in north Deal with capability to deliver a policy compliant quantum of much-needed affordable housing, a mix of house types, sizes and tenures and ability to make significant developer contributions to support existing and future public infrastructure.

3.5.3 The land itself is of no particular ecological value and is in private ownership, offering limited public benefit. To the contrary, the Site is capable of delivering strong biodiversity net gain, attractive internal and boundary landscaping, opening up public access to open space, play facilities and a development pattern that facilitates pedestrian permeability and encourages active travel in north Deal.

3.5.4 In terms of flood risk, it is apparent that no sequentially preferable sites are available and the allocation of sites in this location is justified. We note that two other sites in north Deal have been allocated under policy SAP16 'Deal Small Housing Sites'. However, neither of these sites meet the threshold of 'major development' and are highly unlikely to deliver affordable housing or meaningful developer contributions and are not of a scale conducive to delivering a genuine mix of house types, tenures and sizes. Moreover, neither site is anticipated to deliver any further public benefit beyond housing, with no capacity for open space, play space and limited scope of significant biodiversity or landscape enhancement. To the contrary, our client's site is capable of delivering significant benefits in all of the above areas and can assist in achieving the government's objectives of creating mixed and balanced communities as set out within the Framework and is the only site capable of delivering direct benefits to existing and future residents of north Deal.

Site Specific Sustainability Appraisal

3.5.5 Land at Golf Road, Deal was removed from consideration following the 2022 HELAA assessment (ref: DEA004) which defined the site 'unsuitable' primarily due to flood risk. The Site consequently was not considered against the SA objectives, however for the purposes of this representation, we consider the Site in the context of the SA objectives below.

3.5.6 We consider that the Site would generally perform strongly, with particular positives associated with SA Objectives related to housing, accessibility, the economy, sustainable transport and climate change mitigation, in large parts due to the edge-of-settlement location and proximity of the site to key services in Deal.

3.5.7 We accept likely disbenefits associated with the development of a greenfield site, including loss of agricultural land, however this would be true of the majority of greenfield sites and it is abundantly clear that Dover's housing need cannot be met solely on brownfield sites. We suggest that potential minor negatives / uncertainty associated with biodiversity and landscape, however these could be overcome via high-quality design, biodiversity enhancement and landscape mitigation proposed under a future planning application. Irrespective, these would not be

considered to outweigh the clear and tangible sustainability benefits associated with edge-of-settlement development and the site's consistency with the preferred spatial options.

Summary

3.5.8 Taking all of the above into consideration, our client is supportive of the premise of the growth strategy, however objects to the quantum of allocations within Deal, which in our view fails to fully maximise the sustainability credentials of the settlement and the capacity for growth, such that the Plan is unsound as drafted and requires minor modification to the growth strategy component. Land at Golf Road is considered wholly consistent with the objectives of the Plan and would form part of a sound evidence-led growth strategy consistent with the recommendations of the Sustainability Appraisal for the district to 2040, sufficient to ensure the Plan is found sound.

3.6 Deliverability

3.6.1 There are not considered to be any impediments to the Site being allocated for development commencing within the first five years of the Plan period. Combined with an appropriate number and scale of wider allocations in Deal and elsewhere across the district, this would ensure steady delivery of housing in Dover district across the majority of the Plan period and support the role and timescales of strategic housing delivery at Whitfield towards the latter half of the Plan period.

3.6.2 Persimmon Homes South East – a national housebuilder with a strong history and track record of delivery, together with an adopted and robust business plan for growth – has control over the site, and are committed to delivery of the site for residential development early in the Plan period.

3.6.3 For the reasons set out in this representation, the Site is considered suitable for the residential development of approximately 60 dwellings. The Site is adjacent and well contained by the urban area of Deal, one of the four higher order settlements in the district and the Council's preferred locations for Plan-led growth within the district. Development at Land at Golf Road would form a natural and logical development in Deal with excellent accessibility to day-to-day services and amenities via active travel modes within Deal itself and convenient access to public transport infrastructure (including Deal train station) for onward travel to key neighbouring settlements including Dover, Ramsgate, Canterbury and Ashford.

3.6.4 Finally, in respect of suitability, there are no physical limitations or problems such as access, infrastructure, hazardous risks, pollution, flood risk or contamination that would prevent development coming forward. It is acknowledged that the site is located within Flood Zone 3a, however this is true of the majority of north Deal which is protected by coastal flood defences. For the reasons set out within this representation, flood risk is not considered to represent an absolute constraint preventing the future development of the site, subject to detailed flood risk assessment and site layout design.

3.6.5 On behalf of our client, we submit that there are no known financial restrictions that would impact upon the viability of a future housing scheme or that would prohibit development coming forward within the early stages of the Plan period. To the contrary, we consider there to be an opportunity to deliver a high-quality, sustainably located residential development scheme consistent with the Council's proposed growth strategy comprising an appropriate mix of market and affordable housing and capable of contributing to a range of community facilities, public infrastructure and services locally.

3.6.6 At the time of writing, proposals at Land at Golf Road, Deal remain at an early stage, however our clients are firmly committed to progressing work on a future planning application in the short term and have a strong record of steady and sustained housing delivery once permission is secured.

3.6.7 The Site is in single ownership and there are no complicated legal agreements or covenants that would prohibit the ability to bring forward the Site early in the Plan period. The Site is therefore considered available and achievable for the purposes of the tests of deliverability.

4 Conclusion

4.1 Summary

4.1.1 This representation has been prepared by DHA Planning on behalf of Persimmon Homes South East in response to the Dover District Council Local Plan (Regulation 19) consultation which runs until 9th December 2022.

4.1.2 Our client controls 'Land Golf Road, Deal' and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site was submitted for residential development with capacity for approximately 60 units as part of the new Local Plan preparation, however the Site has not been taken forward within the Regulation 19 Pre-submission Plan.

4.1.3 Taking all of the above into consideration, we consider that the Site promoted at Land at Golf Road should have been included as a future housing allocation within the Dover District emerging Local Plan. The Site is considered, in principle, wholly consistent with the objectives of the Plan and would form part of a sound growth strategy for the district to 2040.

4.1.4 Our client is supportive of DDC's new Local Plan in principle, however our client objects to a component of the Plan, such that the Plan should be considered 'unsound'. It is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound', in which the quantum of Plan-led housing delivery within Deal should be increased to accurately reflect its second tier settlement status. Our client considers that given historic strategic under delivery in the district and wider uncertainties in the planning system, the Council should sensibly demonstrate an oversupply of reliable, deliverable sites early in the Plan period to ensure sufficient flexibility in housing delivery, should extant permissions or larger allocated sites not come forward or deliver as anticipated.

4.1.5 To be clear, Persimmon Homes South East support the premise of DDC's growth strategy, which includes further Plan-led development within Deal in line with its higher-order settlement status. However, we are concerned that DDC have planned at a significantly reduced level of growth in Deal, citing a dwindling supply of available land within and around the settlement. Consequently, the Plan fails to appropriately maximise the sustainable credentials of Deal and has resulted in a marginal supply of available, deliverable small and medium sites, insufficient to provide the flexibility in housing delivery that is required in accordance with national planning policy.

4.1.6 Given the dwindling supply of available sites within the District and the growing housing need, it is imperative that the sustainable credentials of these higher-order settlement sites are appropriately maximised to deliver the housing that is required in accordance with draft policy SP3 of the emerging Plan, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and object solely on this basis.

4.1.7 Consequently, our clients object to the growth strategy component as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites within Deal, and this has not been undertaken – for example at Land at Golf Road, Deal, where it the Site has been excluded primarily on flood risk ground without further consideration of detailed evidence or the capability of suitable mitigation to be put in place. The consequent omission of potentially circa 60 units, will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

4.1.8 Without prejudice to our client's support in principle of the proposed growth strategy which primarily directs growth at higher order settlements, we would urge the Council to re-visit its growth strategy and proposed allocations to allow a greater quantum of development within Deal to fully reflect its excellent sustainability credentials.

4.1.9 We submit that Deal is wholly capable of delivery significantly greater than the 223 dwellings allocated. We say that available and suitable sites exist, including that of our client's at Land at Golf Road, Deal capable of delivering logically located, highly sustainable new homes in accessible location early in the Plan period, sufficient to provide greater assurance of steady and sustained housing delivery across the Plan period, balance the scale of delivery from strategic urban extensions and further assist in reducing the need to develop into more rural, typically less accessible and more sensitive locations within the district to otherwise deliver the growth that is required.

4.1.10 Accordingly, we submit that the inclusion of Golf Road, Deal would provide a medium sized site for the Council that could come forward quickly, complying with the Framework's requirement to provide a mix of sites and include specific sites for years 1-5 of the Plan period. Accordingly, we say that Land at Golf Road, Deal can further assist the Council in meeting the growing need for new homes in the district and is necessary to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full as well as delivering wider public benefits to the local community within Deal.

4.1.11 In addition to being a highly sustainable and logical edge-of-settlement allocation, the Site is deliverable in a single land ownership with no viability issues, legal or third-party constraints present. Our client is fully committed to the delivery of Land at Golf Road and there are no impediments to the Site being capable of delivery within the initial 0-5 years of the Plan period.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful

For the reasons set out in the consultation response submitted on behalf of Persimmon Homes South East, it is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound'. These suggest modifications are set out in the consultation response submitted on behalf of Persimmon Homes South East (ref DHA/30289).

Allocate additional land in Deal

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Please refer to the consultation response submitted on behalf of Persimmon Homes South East (ref DHA/30289).

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP3 (RE: Land at Ringwoud Alpines)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Text relating to Strategic Policy Extracted from SDLP1298. For Full representation including attachments please see original representation.) Housing needs Strategic Policy 3 (Housing Growth) addresses that Dover will make provision for at least 10,998 homes in the District over the Plan period, up to 2040. This target will be met through a mix of committed schemes, site allocations and suitable windfall proposals, however not all these are guaranteed to come through and be developed within this time. This along with the fact that the housing target is a minimum means that the Plan should be seeking to optimise development at designated settlements in Policy SP3 and SP4 such as Ringwoud. The HELAA that was undertaken identifies that just one part of the site, that was previously referred to as RIN002, has the capacity to accommodate up to 30 homes on just that land alone at average density without the remainder of the site. The other section of the site, that was previously referred to as RIN004, was identified to have the capacity to accommodate 7 homes at average density. All together the Site was identified to

	<p>have capacity for 37 homes at average density, yet the site is only allocated for 10 homes in the draft Local Plan. Quinn Homes aspires to deliver a minimum of 12 homes in this location to maximise the socio-economic benefits of development at this site.</p> <p>The allocation area has the potential to be expanded directly south to the Site to bring in additional land that Quinn Homes is promoting. This land can be brought forward for development should the Council need additional dwellings to achieve its housing target. An option 2 plan is contained at Appendix 2 of this representation showing how a scheme of 18 homes could be successfully be delivered if the allocation area is extended to the south.</p> <p>Of all the allocated sites in the Plan, 76.7% are greenfield sites and just 23.3% are brownfield. The subject land is part brownfield and therefore the site makes a positive contribution towards the brownfield: greenfield ratio in the District.</p> <p>The site is located within the Area of Outstanding Natural Beauty (AONB), however parts of the landholding have previously been developed, the land is well screened through existing field boundaries and boundary hedges and trees and the visual harm to the AONB is therefore expected to be minimal, with te development seen against the backdrop of the existing settlement.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	P. 260, para 6.81: "..facility which demonstrably provides a net benefit to the community"
<p>2 - Do you consider this part of the Plan sound?</p>	No

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>To allow a small loss of Open Space as outlined below will provide a greater net benefit to the community as it will enable a larger area of Open Space to be restored and improved. The Evidence Base does not justify the current designation which will prevent recommended site improvements (see DDC Evidence Base OPEN SPACE AND PLAY STANDARDS PAPER Dec. 2019 p.17 Table 4.1.4: Rural Analysis Area Quality Summary).</p> <p>The site Off Mill Lane Eastry (site ref 393) is quite large at 0.53 ha and is designated as Amenity Greenspace but with the exception of several trees towards the north of the site. Visually (see pictures attached) this former builders yard and tile manufacturing site is more akin to a brown field site. The site is overgrown by brambles and covered with roof tiles and slag heaps of several tons of building rubble. We argue that while the trees must be protected, the rest of the site has been wrongly classified. This position is also supported by the DDC Evidence Reports: out of all the 120 Open Space sites assessed in the 2019 Open Space Assessment Report, this site is identified as the very lowest scoring amenity green-space in terms of quality (34.4%) and second lowest in terms of value (28.0%).</p> <p>Additional text insert by DDC from comment SDLP468</p> <p>This comment is an amendment to my previous comment in relation to PM5:</p> <p>If the proposed amendment to the Local Plan is approved and subsequent planning application to Dover district Council for a single dwelling is also authorised, provisions will be made to alleviate the current congestion on Mill Lane traffic by providing a car parking space for the adjacent property to the site's East access road, Bushley house. This will result in a further measurable and concrete net benefit to the community.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	This representation seeks to remove a small area from the open space designation of that site. This would enable a single dwelling unit to come forward (self build) under Strategic Policy 3 and taking account of all other Development Management Policies at the time of making the application. Living on site would enable us to restore, improve and manage the remaining open space, improve the quality of the overall site, including both access roads belonging to the site and tree maintenance, resulting in a measured enhancement to Eastry's open space provision and in a net benefit to the community.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	<p>The Open Space and Play Standards Paper (2019, page 17, table 4.1.4) rates 10 Amenity Greenspace sites, including the site "Off Mill Lane Eastry" as being "below quality" and recommends "Enhancing site quality should be explored where possible (e.g. exploring options for improved maintenance, drainage and enhancement of general appearance)."</p> <p>We wish to participate in the oral part of the examination to present how this amendment to the Plan will enhance the site quality and appearance of the area.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SAP50 - Land adjacent to Short Street, Chillenden (GOO006)
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The evidence detailed in the Dover Local Plan regarding the potential to develop site SAP50 - Land adjacent to Short Street, Chillenden (GOO006) is flawed and inaccurate. It is further inconsistent with the Climate Emergency declaration of November 4th 2019 as it makes no consideration for the impact of this development on surrounding properties. An independent assessment of the site conducted by QVA Consulting (attached) provides an evidence based analysis of the site and identifies the following key conclusions

	<p>- current EA/SFRA surface water mapping does not reflect specific topography at the site</p> <p>- 98% of the site is at a high risk of surface water flooding</p> <p>- Conventional or SuDS drainage of the development is precluded by topography (no outfall), hydrogeology (no infiltration) and statutory flood risk obligations (increased flood risk offsite)</p> <p>- Measures required to pass the Exception Test would increase flood risk offsite.</p> <p>As regards the Climate Emergency declaration and duty of care, I refer you to Section 19 (1A) of the Planning and Compulsory Purchase Act 2004, which states</p> <p>“Development plan documents must (taken as a whole) include policies designed to secure that the development and use of land in the local planning authority’s area contribute to the mitigation of, and adaptation to, climate change.”</p> <p>Clearly a development that has the potential in increase the impacts of climate change on the local area including neighbouring properties is contra to the clear direction of said Act and the Climate Emergency declaration by DDC.</p> <p>Also attached is the final report of the National Infrastructure Committee on Reducing the Risks of Surface Water Flooding. It states</p> <p>Climate change and urbanisation are set to put more properties at risk. The number of properties in areas at high risk is set to increase by 2055, including:</p> <ul style="list-style-type: none"> • an increase of around 20,000-135,000 properties in areas at high risk due to the impacts of climate change, which will increase the intensity and frequency of heavy rainfall • an increase of around 35,000-95,000 properties due to new development putting more pressure on drainage systems. <p>A further 50,000-65,000 properties may be put in areas at high risk due to unplanned increases in impermeable surfaces (e.g. front gardens being paved over), which, alongside new development, is part of ‘urbanisation’– the conversion of natural (often permeable) environments to urban ones where rainwater cannot enter natural drainage systems.</p> <p>The greenfield site off Short Street is a natural run off for surface water and as such a natural mitigator of flood risks for existing properties along Short Street as well the noted heritage site of The Grange.</p> <p>Recently reported changes to the Levelling Up an Regeneration Bill state that the former targets for Local Authorities will no longer be relevant or compulsory. This means an abandoning of damaging centralised mandatory housing targets that have led to needless, unaffordable and poorly designed greenfield developments in favour of an advisory system that takes local character and need into account.</p> <p>Despite further registered concerns at the Reg 18 stage regards heritage (proximity to a listed building of significant historical importance) , environment (removal of hedgerows, destruction of wildlife habitat and hunting grounds for owls and bats), access and egress (site is approached on a single track road and has 3 other access points for local inhabitants), it is disappointing that the comments of the local community and Parish Council have been ignored and disregarded without consultation or direct contact. This leads to the conclusion that the process is fundamentally a tick box exercise and does not have communities’ best interests as the central pillar.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Removal of SAP50 - Land adjacent to Short Street, Chillenden (GOO006) from the local plan. It is not required economically, it is not relevant to sustainability of the local community, it is contra to climate change requirements and is likely to cause immeasurable future harm to adjoining properties. It is based on flawed assumptions and should be disregarded as a potential development site.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Given the flawed evidence for the site's inclusion it is preferable to explain in person the potential impact on adjoining properties as a result of increased flood potential.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	TC4S023 SA33 Land adjacent to Cross Farm, Eastry
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p><i>DDC Note: Document titled 'Facebook: Eastry Community Watch – Lower Street Traffic Complaints' was removed from objective for Data Protection reasons. It contains comments from Facebook and names. The comments relate to traffic on Lower Street (18 pages) and will be made available to the Inspector on request.</i></p> <p>I object to the inclusion of the land adjacent to Cross Farm (TC4S023), Lower Street, Eastry, in the Dover District Council Local Plan for the following reasons:</p> <ol style="list-style-type: none"> 1. Cross Farm (TC4S023) was not included in the previous Local Plan so there has been no consultation on it, as there was with the previous Local Plan, which has led to significant site allocations being removed from the plan. This is inconsistent with the spirit of this consultation process, is undemocratic and unjust. This shows total disregard for the views of the residents of Dover District Council. 2. The location of access to Cross Farm (TC4S023) is dangerous as it's on a busy road, one of the main ones into the village, which is largely single lane due to the parking of cars, making it hard to exit the site, and adjacent to a dangerous blind corner and is likely to lead to serious injury to the public or fatalities. For this reason, this location is unsuitable for additional houses, which is probably why none were built here in the past – see the attached 175 comments on the Eastry Community Watch Facebook page about traffic congestion and the danger to lives on Lower Street. 3. Developing Cross Farm (TC4S023) will have a detrimental effect on an area of significant amenity value to the village with listed buildings, including Cross Farm, the adjoining conservation area, and the Saxon burial ground. It will also adversely impact views from the public footpath that runs along the top of The Lynch and overlooks the site. 4. Once developed Cross Farm (TC4S023) will add to the already significant traffic congestion on a busy single lane (because of parked cars) bus route into the village and will impact the rest of the village, which only has single lane traffic due to parked cars. If the parking is to be banned there is nowhere for residents to park in the village and it will cause huge inconvenience to residents – see the attached 175 comments on the Eastry Community Watch Facebook page about traffic congestion and the danger to lives on Lower Street. 5. It will be impossible to develop Cross Farm (TC4S023) without causing huge inconvenience to the village because of the narrowness of Lower Street and the large number of construction vehicles involved – see the attached 175 comments on the Eastry Community Watch Facebook page about traffic congestion and the danger to lives on Lower Street. 6. Cross Farm (TC4S023) is not served by utilities, such as gas and sewerage, and given the limited size of it, connecting them is unlikely to be economically viable. 7. These additional houses will put huge stress on the village resources, given that it has limited schooling and no medical practices, and all roads in the village are single lane due to parked cars. 8. With the 178 houses that have been granted planning permission, Eastry will already be overdeveloped. There is no room for a further 10 houses or the 95 in this Local Plan. Eastry is a village not a town. All of its streets have single file traffic, not two way. 9. Given that the government is no long setting targets for numbers of houses built by local authorities, there is no need for this development which will have a detrimental impact on Lower Street and Eastry. 10. The whole Local Plan consultation process is unsound and probably illegal. (a) The public exhibition events were poorly promoted and occurred prior to the village receiving an excellent leaflet from the Parish Council, so very few people knew about them as is evidenced by just 300 people attending. (b) Most of the marketing has been web based, excluding many people from participating, such as my parents. (c) The web-based mechanism for providing feedback is over complicated and beyond most people's ability, including mine, to raise objections or comment.
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Classify the land adjacent to Cross Farm (TSC4S023) as unsuitable for development.</p> <p>In Section 6, I have commented on why I think the Local Plan is not legally compliant but I'm not a lawyer and am not qualified to comment on changes that would make it legally compliant.</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I have no idea what this means but if it helps classify the land adjacent to Cross Faarm (TSC4S023) as unsuitable for development, I would like to attend.

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This land has had some work on pipes for the sewage system. It is not effective for the current number of houses as there is a regular sewage stench coming from the corner in your development plan for more housing.</p> <p>There are no places for any children who would move in to this development locally in primary schools. There will be no transport by the time this is built for children to be able to go to secondary schools. None of this housing will be financially achievable by local people or their extended families. The prospective buyers for these homes can only be the cash rich or business purchasers who can avoid many taxes to create income from rents that are unaffordable to local people. There is no infrastructure proposed for this section of the New Dormitory Town encompassing and extending both Aylesham and Adisham. No supermarket, no youth centre, no police, no doctors, no dentist, no focal point where communities can meet. No accommodation whatsoever for safeguarding the community. The ability of the land to absorb heavy rainfall is compromised, the ability of the land to absorb CO2 emissions is compromised, the ability of the land to grow food for our local people is removed entirely. We are in a cost of living and coming into an availability of purchasing food for our whole population crisis.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)	Upgrade the housing stock you have and that housing association has to be of a decent human habitable standard. You have a lot of homes that are damp and mouldy, your relevant departments do not respond adequately nor timely to emergencies such as boiler breakdowns or water

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	leaking through houses. You could just as easily as another authority, have been sued for harm to babies from mould and damp as another local authority was. Build on brownfield sites. build to a good sustainable standard ie passive solar heating, heat pumps etc so that the tennants of the landlords the houses are sold to are warm without draughts and with a low carbon cost to heat. Properly update the water and sewage systems to cope with the massive extra load on systems that are failing with the current load. Put in protections so that our rivers and our seas are no longer discharging fecal matter into our local rivers and the channel where so many like to swim. build a school for our teenagers so poor families don't have to struggle to pay £450 for each child each year for the privilege of going to a secular state school, then being terrified that your children can't get transport to the school anyway. Your planning has a role in the educational and health comprehensive failure for SEND children and along with them secondary school children in your villages, but all this (8k in total) extra housing without any of the vital infrastructure, will make this place like a ghetto.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I consider that this would be a reasonable adjustment to make the consultation process accessible

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The evidence detailed in the Dover Local Plan regarding the potential to develop site SAP50 - Land adjacent to Short Street, Chillenden (GOO006) is flawed and inaccurate. It is further inconsistent with the Climate Emergency declaration of November 4th 2019 as it makes no consideration for the impact of this development on surrounding properties.</p> <p>An independent assessment of the site conducted by QVA Consulting (attached) provides an evidence based analysis of the site and identifies the following key conclusions</p> <ul style="list-style-type: none"> - current EA/SFRA surface water mapping does not reflect specific topography at the site - 98% of the site is at a high risk of surface water flooding - Conventional or SuDS drainage of the development is precluded by topography (no outfall), hydrogeology (no infiltration) and statutory flood risk obligations (increased flood risk offsite) - Measures required to pass the Exception Test would increase flood risk offsite. <p>As regards the Climate Emergency declaration and duty of care, I refer you to Section 19 (1A) of the Planning and Compulsory Purchase Act 2004, which states</p> <p>“Development plan documents must (taken as a whole) include policies designed to secure that the development and use of land in the local planning authority’s area contribute to the mitigation of, and adaptation to, climate change.”</p> <p>Clearly a development that has the potential in increase the impacts of climate change on the local area including neighbouring properties is contra to the clear direction of said Act and the Climate Emergency declaration by DDC.</p> <p>Also attached is the final report of the National Infrastructure Committee on Reducing the Risks of Surface Water Flooding. It states Climate change and urbanisation are set to put more properties at risk. The number of properties in areas at high risk is set to increase by 2055, including:</p> <ul style="list-style-type: none"> • an increase of around 20,000-135,000 properties in areas at high risk due to the impacts of climate change, which will increase the intensity and frequency of heavy rainfall • an increase of around 35,000-95,000 properties due to new development putting more pressure on drainage systems. <p>A further 50,000-65,000 properties may be put in areas at high risk due to unplanned increases in impermeable surfaces (e.g. front gardens being paved over), which, alongside new development, is part of ‘urbanisation’– the conversion of natural (often permeable) environments to urban ones where rainwater cannot enter natural drainage systems.</p> <p>The greenfield site off Short Street is a natural run off for surface water and as such a natural mitigator of flood risks for existing properties along Short Street as well the noted heritage site of The Grange.</p> <p>Recently reported changes to the Levelling Up an Regeneration Bill state that the former targets for Local Authorities will no longer be relevant or compulsory. This means an abandoning of damaging centralised mandatory housing targets that have led to needless, unaffordable and poorly designed greenfield developments in favour of an advisory system that takes local character and need into account.</p> <p>Despite further registered concerns at the Reg 18 stage regards heritage (proximity to a listed building of significant historical importance) , environment (removal of hedgerows, destruction of wildlife habitat and hunting grounds for owls and bats), access and egress (site is approached on a single track road and has 3 other access points for local inhabitants), it is disappointing that the comments of the local community and Parish Council have been ignored and disregarded without consultation or direct contact. This leads to the conclusion that the process is fundamentally a tick box exercise and does not have communities’ best interests as the central pillar.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful</p>	<p>The removal of the site from the Local Plan as suitable for development due to the location and heritage of the site as well as its importance as a surface water run-off.</p>

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To explain to the Inspector why the site is not suitable for development.

(DDC Note - Text Extracted from Document sent from Savills on Behalf of the Church Commissioners. Representation has been split across relevant areas of the Local Plan. Full attachment and introduction to Policy comments can be found under reference SDLP1265 for Shepherdswell Site and SDLP1266 for Eastry Site.) Representations This section provides Representations on the Regulation 19 Local Plan and includes observations regarding the supporting evidence base. Comments are provided on the published evidence base documents which are listed below. <ul style="list-style-type: none"> • Sustainability Appraisal (September 2022) • Housing and Economic Land Availability Assessment (October 2022) • Infrastructure Delivery Plan (October 2022)

• Level 2 Strategic Flood Risk Assessment
 Observations on the Regulation 19 Draft Local Plan Policies

Strategic Policy 3 – Housing Growth - COMMENTS Paragraph 3.31 of the draft Regulation 19 Local Plan sets out that according to DLUHC and based on the baseline 2014-based Household projections:
 “for Dover District the latest housing need calculation is 611 dwellings per annum (dpa); a minimum of 10,998 new homes over the remaining plan period to 2040”. Table 3.1 (see Figure 4.1) in the draft Local Plan demonstrates a proposed Local Plan housing supply of 11,925 homes, which meets the housing need requirement of 10,998 new homes with a buffer of 926 homes. However, 926 homes create a buffer of only 8% of the required housing need. It is recommended that a larger buffer is adopted to allow for flexibility to ensure the housing need can be delivered across the plan period. Once made, Dover District Council will be able to demonstrate a 5 Year Housing Land Supply of 6.16 years, in accordance with paragraph 74b of the NPPF.

(DDC Note - Unable to display image - see attachment for full representation)

In the latest Housing Delivery Test (2021), Dover District Council only scored 88%. This means that the Council delivered 12% fewer homes over the last 3 years than it was required to do so. The majority of this under-delivery was at the Whitfield Urban Expansion as set out within Dover’s latest Authority Monitoring Report 2020-2021 in which only 278 dwellings had been delivered of the allocated 5,750. Table 3.3 in the Regulation 19 Local Plan illustrates that the Council plans to rely heavily on Secondary Regional Centres for the distribution of housing site allocations, with 3381 of the 5592 new required dwellings located just in Dover and Whitfield. A minimum of 2,200 new homes have been allocated to the Whitfield Expansion which equates to 39% of the total housing allocations for the emerging Local Plan to be located in just one development. There is a risk that the Council’s over-reliance on large, strategic sites such as the Whitfield Urban Expansion, will result in similar under-delivery of housing as historically present. Instead, there should be a wider range of smaller sites allocated as they are quicker to come forward in the earlier parts of the Local Plan Period. This philosophy is supported in paragraph 69 of the NPPF where it is stated that: “small and medium sized sites can make an important contribution to meeting the housing requirement of an area, and are often built-out relatively quickly”.

Recommendation: DDC should allocate more smaller sites in order to reduce the reliance on the Whitfield Urban Expansion and provide a larger buffer in order to more reliably meet their housing need across the plan period.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Text relating to Strategic Policy Extracted from SDLP1294. For Full representation including attachments please see original representation.) Housing Need and Supply Strategic Policy 3 (Housing Growth) states that Dover will make provision for at least 10,998 homes (611dpa) in the District over the Plan period, up to 2040. This target will be met through a mix of committed schemes, site allocations and suitable windfall proposals, however not all these commitments will be delivered and arguably a higher quantum with a larger buffer should be planned for to negate those sites that will not be developed in the plan period. Of all the new homes positively allocated in the Plan, 76.7% are on greenfield sites and just 23.3% are on brownfield sites. The low ratio of brownfield housing compared to greenfield reinforces the need to optimise the development of suitable brownfield sites such as the subject land. This is considered to be a valid consideration in relation to this representation's request for increased capacity on the site. The focus of the NPPF is to achieve sustainable development (Paragraph 8) and the Council should seek to encourage housing growth in the most sustainable locations, especially when they can ensure the achievement of societal improvements, economic benefits and positive environmental outcomes. The Site is well located with various other residential developments nearby, providing the opportunity for further social and economic growth in a settlement that would benefit from housing. In this regard, the site is the only land allocation at Preston, which is designated as a larger village in the settlement hierarchy, where a commensurate level of growth should be delivered, in accordance with Strategic Policies SP3 and SP4. The requirements of the draft Local Plan must be deliverable and achievable whilst meeting the local need in order for the plan to be effective for the district. It is considered that, in its current form, the plan strategy is over reliant on the Whitfield (SAP1) Strategic Allocation to provide the district's housing needs over the plan period and that optimising the capacity of allocated sites elsewhere within the District will help to reduce the District's reliance on Whitfield whilst assisting the Council in exceeding the minimum housing number.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Hi, the pictures you have sent out for each beautiful area just show what we are losing every time you plant houses on what was fields and woodland. The loss of habitats is shocking and the loss of agricultural land is scary. The rural village as we know it is not going to exist if we continue in this manner. Your local plan should show houses being built on brownfield sites only, renovating present buildings and using up land that is already ruined by concrete. A lot of small houses can be built in a small space, if we are short of homes. Yet most developments seem to be a small number of massive properties which don't house many families, but I understand make more profit. You should stop people having empty properties and second homes. This would cut the need for so many houses.

	Please don't ruin our land. Please.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The recent policy change on mandatory numbers for new housing means that individual developments for houses should be reviewed and that current plans are not sound, they do not comply with policy.</p> <p>The South east is under pressure and does not have the infrastructure to cope with the demands that new housing developments bring. It is one of the driest counties and so water stress will become a more serious issue.</p> <p>In Shepherdswell access from the A2 is by two narrow lanes. Both are unsafe for pedestrians, cyclists and horses. There is nowhere local for people to ride. I often struggle to walk the 50 m from the village hall to the shop with my two dogs. There is no traffic calming and cars do not slow down.</p> <p>The many extra houses expected at Elvington will increase this traffic as will the houses planned for the village itself. This is a major concern. I support the Green Party proposal for safe, well lit cycle lanes to link villages with stations but this does not help dog walkers. People move to the countryside to be able to access and enjoy green spaces but this is difficult with so many cars. We don't see children playing out as they used to.</p> <p>I am concerned about the destruction of hedges for new build projects. Tho the plan proposes to maintain as many as possible we have recently seen the ripping out of a perimeter hedge for the community trust housing next to the village hall. I do not trust that hedges and trees will be maintained and emphasise that mature hedging and trees offer so much more habitat than new planting which would need to be on a much greater scale if it is to offer the same benefits in terms of carbon capture as well as habitat.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Policy on housing has changed and so plans should change to comply with this. The housing which our village needs is sheltered housing for the elderly, many of whom are single, living alone, wanting to stay in the village. Providing purpose built accommodation for them would free up many houses for families. Have the needs of the often ageing population of villages been considered? A limited number of affordable housing is included in larger developments but this does not meet the needs of our ageing villagers.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>I object to KIN002 (SAP 34) being included in the draft LDP for the following reasons:</p> <p>The inclusion of SAP 34 is not legally compliant with NPPF 2021 item 11. (b)ii 'SPs should provide for objectively assessed needs for housing & other uses, . . . unless (ii) any adverse impacts of doing so would significantly & demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'.</p> <p>The following arguments show why this development would have more adverse impacts than benefits and would not be sustainable.</p> <p>Kingsdown is a quiet village which has not developed into a larger settlement because it is isolated by its geography (see my later comments on local centres). Allocated money from developers would not 'improve' the infrastructure of the village as there is no space to provide parking or for widening roads or for improving any other physical infrastructure. The narrow single track roads through the village which are an inherent part of the character and charm of the village are also a limiting factor for the village in terms of further development. The roads in the village are already adorned with parked cars wherever possible, and there are very limited pavements in the village, this means pedestrians are often forced to walk in the middle of the roads and duck in-between cars when traffic approaches. Some parts of the roads have high walls and no pavements which, with current traffic levels, make walking perilous. Any increase in cars trying to park to use services or passing through the village, would be very dangerous. Residents of KIN002 would have to use their cars for almost all of their journeys, creating pollution and congestion.</p> <p>Furthermore, as the UK government have decided on 5/12/22 to stop putting pressure on local authorities to authorise unsustainable housing targets the LDP now needs reviewing in light of the new directives. The Dover District Area has, in recent years, been subject to considerable housing development, higher than that allowed for by the current local plan, and this development has been unsustainably concentrated into certain specific areas, because much of our district is either already overdeveloped, or not suitable for large scale development as it is either designated as an area of outstanding natural beauty (AONB), or it is heritage coast, or it is very low lying and liable to flooding or needed as floodplain.</p> <p>The continued inclusion of SAP34/ KIN002 land at Woodhill Farm, Kingsdown in the LDP is unsound, because, despite many concerns and reasoned arguments from residents the only concession seems to have been to reduce the housing numbers from 90 to 50; Due to the weak wording of the local plan that only suggests what would be 'preferred' by the district council, it is highly likely that the final number of houses would be in excess of 50 and possibly in excess of 90, if the proposal were to go ahead.</p> <p>The site has now been given a green allocation in the HELAA report despite its many issues and the fact that an adequate highways assessment has not yet been carried out and the HELAA highways assessment remains amber. The latest HELAA report states that the many failings can be mitigated for within the LDP. I argue that this is unsound and not justified nor consistent with National Policy NPPF 21. The evidence from DDC has not been used correctly. NE2 Landscape character and the Kent Downs; states in section 11.13 that DDC aims: <i>To ensure that all development coming forward over the plan period respects and reflects the character of the landscape in which it is located.</i> The DDC landscape</p>

character assessment of 2020 (LCA) shows that SAP34 / KIN002 falls within Ripple F3, *open chalk farmland and woodland*. **NE2** states; *the classification identifies 17 LCAs and defines issues of landscape management and development management which should be delivered over the plan period.*

Development Management guidelines include:

- *Conserve the rural character of the landscape ensuring that it continues to play a role in providing a rural separation between Deal and Kingsdown as well as a rural setting for the Kent Downs AONB.-Seek to reduce lighting and noise impacts on this landscape and in longer views through sensitive highway design/management. Conserve the distinctive narrow winding lanes and grassy verges.*

SAP 34 would not *'conserve the rural character of the landscape'*

SAP 34 would be right next to the AONB so would clearly not *'provide a rural setting for the Kent Downs AONB'*.

SAP 34 would, in direct contravention of the guidelines, increase *'lighting and noise impacts on this landscape'*.

SAP 34 would, in direct contravention of the guidelines, due to the raised setting of the site, negatively affect the rural setting of the AONB on *'longer views'* of this landscape, both looking into and out from the AONB.

SAP 34 would also, according to the HELLA Highways assessment, require the alteration of and therefore not *'conserve the narrow winding lane and grassy verges'* which form the main entrance to and help to define the character of, the quiet village of Kingsdown.

The Development Management guidelines also include:

- *Conserve the open skyline, avoiding the introduction of vertical elements such as pylons, telecommunications masts etc.- Protect and enhance views from more elevated areas and from the coast out to sea and towards landmark features such as Walmer Castle.*

SAP 34 is in an elevated position so it would not *'Conserve the open skyline'* of this landscape area of open chalk fields with woodland.

SAP 34 is in an elevated position so it would not *'Protect and enhance views from more elevated areas'* of this special landscape area of Ripple F3.

SAP 34 is clearly visible from many viewpoints within both the AONB and the Ripple F3 special landscape area, from along the A258 and the network of footpaths, and from the locally renowned 'Nelsons seat viewpoint'. I contend that it would therefore not *'protect and enhance the views of this landscape'*.

SAP 34 can, as I have mentioned be seen from within the Ripple F3 landscape area, and from certain directions it would be in the foreground of views out to sea, it would therefore not *'Protect and enhance views out to sea'*

SAP 34 has views out to the picturesque Ripple windmill, which I contend is a *'landmark feature'*, therefore this development would contravene the development guidelines, by not protecting nor enhancing views towards *'landmark features'*, which would be lost.

The development of SAP34 would result in the loss of an important buffer between the built environment of Kingsdown and the AONB. Ringwould Rd would lose part of its character and the main entrance to the village would be deprived of its character. Part of the AONB would be lost as would part of the character of the AONB. From within The Ripple F3, views across to Kingsdown and the sea would be negatively impacted and the open character of the landscape would be lost and pollution from light and traffic would increase. The HELAA sustainability appraisal states; *The site has been judged by Council officers to have the potential to moderately affect the District's landscapes, townscapes or seascapes.* I argue that this is not supported by the facts, and is not a fair appraisal of the probable impact of this development, especially when considered in the light of the site forming part of the LCA F3, the proximity to the nationally important AONB and the suggested necessary alterations to the *'distinctive narrow winding lane and verges'* which lead into what is at present a quiet rural village.

NE2 11.19 states *'The setting of the AONB comprises land adjacent to or within close proximity of its boundary, including but not limited to land which is visible from the AONB and from which the AONB can be seen.....Within the setting of the AONBs, priority will be given over other planning considerations to the conservation or enhancement of natural beauty, including landscape, wildlife habitats, tranquillity, dark skies, and geological features'*.

NE2 11.19 clearly and accurately describes the proposed site for SAP34. It is adjacent to and within close proximity of the AONB, it is visible from the AONB and the AONB can be seen from it. By allowing this development to go ahead, *'conservation of natural beauty, including landscape, wildlife habitats, tranquillity and dark skies'* would not have been given *'priority over other planning considerations'* I therefore contend that the development is not sound.

SP13 states that *the NPPF 2021 requires local plan policies to conserve and enhance the natural environment, to recognise the intrinsic character and beauty of the countryside and the wider benefits from natural capital and ecosystems.* Including SAP34 in the LDP is therefore in direct contravention of the NPPF, which means it is unsound as it would detract from the beauty of the countryside particularly the adjacent AONB.

The Kent Downs AONB management plan 2021-26 says *the Kent Downs AONB, perhaps more than any other of Britain's protected landscapes – AONBs, Heritage Coasts or National Parks, has experienced and is experiencing severe development pressure.* DEFRA evidence shows *'The Kent Downs AONB stands out as an area which has experienced major change, showing a rate of urban growth of almost 10%.pa, with the urban area spreading by 14 ha over the decade'*. The AONB in Dover District has suffered development at a disproportionate rate which indicates that planning pressures on our district are unsustainable as they are overflowing into this nationally important landscape area. National Planning Practice Guidance (NPPG) confirms that the Duty of Regard is *'relevant in considering development proposals that are situated outside National Park or Area of Outstanding Natural Beauty boundaries, but which might have an impact on the setting of, and implementation of, the statutory purposes of these protected areas'*. I would argue that because the entrance onto Ringwould Rd requires widening and changing of the road which will encroach into the AONB, to mitigate for it being unsafe, this will be detrimental to the setting and directly upon the AONB.

NPPF 2021 11 – making effective use of land - Planning policies and decisions should: 120 b *recognise that some undeveloped land can perform many functions, such as for wildlife, recreation, flood risk mitigation, cooling/shading, carbon storage or food production.* As food security is such a national issue, including SAP34 for development is unsound and unsustainable as good agricultural land would be better served in producing food. I would add that the local plan talks about sustainability for future generations, but as the UK only produces around half of the food we need domestically, and the world population is growing and with global warming crops around the world are beginning to fail, it is highly likely that in the future we will need all the agricultural land we have to feed ourselves. Developing agricultural land is not sustainable.

Allocated money from the developers would not improve things as there is no space to provide parking in the village or for widening roads or for improving infrastructure. The narrow single track roads through the village which are an inherent part of the character and charm of the village are also a limiting factor for the village in terms of further development. The roads in the village are already adorned with parked cars wherever possible, and there are very limited pavements in the village, this means pedestrians are often forced to walk in the middle of the roads and duck in-between cars when traffic approaches. Any increase in cars trying to park to use services or passing through the village would be very dangerous. Residents of KIN002 would therefore have to use their cars for everything, creating pollution and congestion

Local Centres:

I would argue that the designation of Kingsdown as a local centre is unsound. Due to the nature of its location, with the undeveloped AONB, heritage coast and cliffs to the south, with no roads for access from this direction, the Sea to the east, with no villages, inhabitants nor roads, only Walmer to the north, which is closer to the town of Deal than to Kingsdown, but in any case, itself has better facilities than Kingsdown. To the west there are several small villages, such as East and West Langdon, but they are closer to and have better links to Dover, to the north west are Studdle, Ripple and Mongeham, but they are closer to and have better links to Deal. This leaves the small settlement of Ringwould, which is close to Kingsdown, but is cut off by the Arterial A258. Ringwould Road, which joins the two settlements, is steep and narrow in parts and not suitable for occasional cyclists or walkers, so most people would tend to drive between the two villages, however, there is very limited parking and limited facilities in Kingsdown, so even people from Ringwould are much more likely to frequent Dover, Walmer or Deal for everyday needs or services. All of this probably goes a long way to explain why Kingsdown has never developed wide roads and modern infrastructure.

The high proportion of second homes and Air b and bs in the village demonstrates that dwellings outnumber homes required, so there is not an *'objectively assessed need for housing within the Parish'*. If largescale development were to take place in Kingsdown, it is highly likely that, many of them would become second homes or Air b and bs. Unless houses used for these purposes are owned by local people who already live in the village, which is unlikely, such houses would bring very little to the village. To include SAP34 /KIN002 is therefore unsound and not consistent with NPPF 21.

NPPF 2021, Paragraph 73. b) states that suitable land for development should; *'ensure that their size and location will support a sustainable community, with sufficient access to services and employment opportunities within the development itself (without expecting an unrealistic level of self-containment), or in larger towns to which there is good access;* However SAP34 is unsound because there are extremely limited opportunities for employment within Kingsdown and there is not *'good access'* to larger towns. There is no rail link, the bus service is very limited and reduced since Reg 18, and the roads are narrow and already at certain times, dangerously busy.

NPPF 2021 Paragraph 79, states; *To promote sustainable development in rural areas, 'housing should be located where it will enhance or maintain the vitality of rural communities. Planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. Where there are groups of smaller settlements, development in one village may support services in a village nearby'*. Because as I have outlined, Kingsdown is not at the heart of other rural settlement, the development of SAP34 will not *'enhance or maintain the vitality of rural communities'*.

The HELLA highways assessment commented that the scale of KIN002 was too small to create enough new footfall to improve the bus service, I suggest it would also be insufficient to warrant any other new services either.

I have mentioned that Kingsdown is isolated by distance and due to poor public transport, due to the position of the A258 and due to the narrow roads leading to and from the village. For these reasons, it cannot be said to be part of a 'group of smaller settlements', where 'development in one village may support services in a village nearby'. New residents at KIN002 would mostly have to use their cars to visit Dover, Deal or Walmer for services, contributing to Carbon emissions and making the roads more congested and dangerous. For these reasons I believe the KIN002 is unsound and unsustainable.

For all of the above reasons I contend that classifying Kingsdown as a 'village centre' is not justified by the facts. It should be reclassified as a 'larger village', which would mean the only development permitted would be windfall development within the village boundary.

If Kingsdown were to be classified as a larger village, which I have shown is demonstrably appropriate, then there would be strict criteria limiting developments such as KIN002, which would not be allowed to proceed as it is outside the village boundary.

When using the criteria of the draft local plan SAP34 is not sustainable and unsound for the following reasons:

T11 Development should, in so far as its size, characteristic and location -Give priority to the needs of pedestrians, cyclists, users of public transport, car sharers and users of low and ultra-low emission vehicles.

The location and size of SAP34 means it will give priority to car drivers only so it will not be in line with T11. The HELLA appraisal said it will not be large enough to warrant improvement of public transport. It is not on a train route. There are poor footpath routes to the village and only narrow and winding lanes to the village and to local towns. There is a cycle route to Deal along the seafront, but this joins Kingsdown at the other side of the village and the route would probably be too far for most casual cyclists. It is probably too far for people to walk to Deal or Dover in order to use the facilities at these towns. Any attempt to improve the cycling and walking routes to the village would result in loss of the distinctive character of the winding lanes which the 2020 LCA F3 Ripple seeks to preserve.

T12 New accesses and intensified use of existing accesses onto the road network will not be permitted if it would result in a clear risk of crashes or traffic delays unless the proposals can incorporate measures that provide sufficient mitigation. I consider this site to be unsound as there would be an increase in crashes and traffic delays. Widening the junction at the exit would not do anything to improve the narrow dangerous access through Kingsdown village. It would also not improve the access from Ringwould Road onto the very busy A258 at Ringwould. Widening the road at the access point on Ringwould Road, would mean losing part of the Kent Downs AONB and would also effect the character of the winding lane entering the village, which as I have mentioned the 2020 LCA F3 Ripple seeks to preserve. Land either side of Ringwould Road is not owned by the same party as KIN002 and so cannot make up part of this development. Furthermore, any attempt to alter Ringwould Road at any point would also result in the loss of the charming character of the road. The access is also complicated. It is used by visitors to the play area and the landowner to the left as you enter the field from the road. No mention is made in the HELAA highways assessment of the landowner needing access. ER5 also crosses the entrance which would therefore be dangerous to pedestrians crossing from the field back to the village. ER5 is a very busy path used by dog walkers on a daily basis. The sight lines onto Ringwould Road in both directions are poor. Ringwould Rd is very narrow in places and in places, 2 vehicles cannot pass each other. Turning left out of the site would be onto a narrow road going into a 20mph zone. Turning right is in a 50mph zone with a bridleway and footpath crossing with poor visibility and slow tractors turning out onto the road. There has already been an RTC resulting in a fatality and serious injury on Ringwould Rd. I would argue that issues with access alone mean that this site is not suitable and unsound for development. A medium pressure gas main crosses KIN002 diagonally and crosses the road at this access point which would require careful consideration when changing the access. This would cause a lot of disruption to the villagers as this is the only classified road in and out of the village and as poor as it is, is the main route to the A258. If traffic had to divert via Deal this would create extra pollution and congestion for a protracted period of time which would be contrary to SP1 and the climate emergency declaration by DDC.

T13 Applicants must demonstrate that traffic movements to and from the development can be accommodated, resolved, or mitigated to avoid severe cumulative residual impacts.

As I have already pointed out, traffic movements to and from the site would be on to Ringwould Road. This road is narrow, in places steep, in places it has high banks and hedgerows which preclude views along it, it sometimes floods in the dip before the hill towards Ringwould and I have known many winters when it has been impassable because of snow. If cars from the proposed development SAP34 were to turn left onto Ringwould Road they would soon enter the narrow streets of Kingsdown where there are many parked cars and very little pavement for pedestrians. If they were to turn right they would find themselves on the narrow, twisting, steep, liable to flooding and with poor sight lines, high banks and hedges, Ringwould Road. After this they would have to try to get onto the busy, at times extremely busy A258 at Ringwould. Ringwould Road is crossed by an official footpaths, and an official footpath/bridleway, both are on bends where it is difficult for pedestrians and horse riders to see what traffic is coming or to be seen by drivers. Pedestrians also use Ringwould Road to access the special needs school and Ringwould Village Hall which are both situated on the road close to the junction with the A258.

	Any increase in traffic on this Road would be impossible to mitigate for without damaging the character of the 'distinctive winding narrow lane' which the 2020 LCA F3 Ripple seeks to preserve.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	SAP34 should not be included in the LDP. DDC should now reconsider the housing allocation targets in light of the government announcement of 5/12/22, particularly with respect to rural settlements.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP3, SP4
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

SP3 relevant wording in bold below

1.0 INTRODUCTION

1 i) About the Kent SME Developers Network

These representations have been prepared by the Kent SME Developer Network (the Network) a consortium of Small and Medium (SME) Developers who are located in or operate within Kent and Medway. The Group is currently chaired by Paul Henry, Managing Director of Esquire Developments, an SME Housebuilder based in Longfield near Dartford, Kent.

The Network was formed in November 2019 and presently comprises approximately 30 participants including SME Housebuilders and Developers (of varying size and scale) and Registered Providers. In addition, the Network includes representatives of Local Planning Authorities including Medway Council, Swale Borough Council, Tonbridge and Malling Borough Council, Tunbridge Wells Borough Council and Maidstone Borough Council. It is the intention that the Network grows over time to cover all of Kent including additional SME Developers and Local Planning Authorities. The Network has recently engaged with Dover District Council.

The Network was set up to provide a platform for SMEs to discuss relevant planning and delivery issues associated with bringing forward smaller developments and to positively and proactively engage with Local Planning Authorities at the plan making and decision taking stages.

The Government has recognised the need to support existing SMEs and encourage more into the market in order to diversify the housing market from the volume housebuilders and generate choice and improve quality of homes being built. The Government has described SMEs as being of 'National Importance'. Appendix 1 sets out the narrative behind the support and role for SME Housebuilders.

The Network meets on a quarterly basis to discuss and explore relevant SME related issues, including working through planning related matters. Notable attendees at past meetings including Steve Quartermain (prior to his retirement as Chief Planner at the then MHCLG) and Homes England.

In addition to the meetings acting as a discussion platform, the SME Network is also designed to act as a support and mentoring network, where land opportunities can be shared, or knowledge/experiences drawn from in-house teams in order to help each other and strengthen the SMEs. The Network can also act as a collective voice in the preparation of Local Plans or other consultations - such as this.

The Network comprises the following:

SME Housebuilders and Developers

Esquire Developments

Fernham Homes

Wealden Homes

Fernfield Homes

Meridian Construction

Aile Homes

King and Johnstone

Clarkmores

Clarendon Homes

Gillcrest Group

A&E Property Ltd

Country House Homes

Classicus Estates

Woodcroft Developments

Provectus Developments

Penenden Heath Developments

Grandera Homes

Windmill Construction
Jarvis Homes
Aspire Designer Homes
Kentish Projects
Woolbro Homes
Cooper and Cole
Hillstone Homes
RJC New Homes
Wedgewood Homes
TG Designer Homes
Endeavour Construction Limited
Unique Land

Registered Providers

Hyde Housing
MHS

Local Planning Authorities

Medway Council
Maidstone Borough Council
Swale Borough Council
Tunbridge Wells Borough Council
Tonbridge and Malling Borough Council
Dover District Council
Folkestone District Council
Canterbury City Council

Agents

Tetlow King Planning
David Hicken Associates
Barton Willmore now Stantec

The Network welcomes ongoing engagement with Dover District Council and any other interested party.

For clarity, the representation contained in this response relate to the Members of the Network that are SME Housebuilders and Developers and not the Registered Providers, LPAs or Agents.

1 ii) Content of Representations

These representations have been prepared by the Network which seek to address strategic matters. Any site-specific matters will be addressed by individual SMEs within their own representations.

The representations are structured to respond to each relevant question posed within the document.

In summary the headline points are as follows:

We support the council identifying the need to meet the small sites requirements and support SME developers.

However, we are not convinced that the requirements of Paragraph 69 have been met in respect of 10% of allocations being on 1ha or less:

We support the principle of a Policy such as SP4, however we consider that amendments to the policy wording and the defined policies map are required in order to ensure it is 'effective' and therefore 'sound'.

We encourage the Council to continue to work with the Network, including the consideration of a small sites policy to help support SME developers within the plan period.

RESPONSE

Requirement of Paragraph 69

Paragraph 69 of the NPPF requires Local Planning Authorities to identify land to accommodate at least 10% of their housing requirement on sites no larger than one hectare. This is a clear requirement and therefore 1,099 dwellings need to be allocated on sites of this nature.

Central Government recognises the problem of bringing SMEs into the market and has sought to 'level the playing field' in the context of supporting small and medium sized sites at the plan making stage. Crucially, the NPPF 2019 confirms in paragraph 68 that:

Small and medium sized sites can make an important contribution to meeting the housing requirement of an area and are often built-out relatively quickly. To promote the development of a good mix of sites local planning authorities should:

- 1 a) identify, through the development plan and brownfield registers, land to accommodate at least 10% of their housing requirement on sites no larger than one hectare; unless it can be shown, through the preparation of relevant plan policies, that there are strong reasons why this 10% target cannot be achieved;
- 2 b) use tools such as area-wide design assessments and Local Development Orders to help bring small and medium sized sites forward;
- 3 c) support the development of windfall sites through their policies and decisions – giving great weight to the benefits of using suitable sites within existing settlements for homes; and
- 4 d) work with developers to encourage the sub-division of large sites where this could help to speed up the delivery of homes.

The NPPF provides for a clear direction to LPAs, that it must identify land to accommodate at least 10% of their housing requirement that are 1ha or less.

Paragraph 3.52 of the Reg 19 plan sets out that 11.4% of the housing requirement are on small sites. These sites are listed out in Appendix 3 of the Housing Topic Paper September 2022 and the table shows that the total of 1,249 dwellings are considered to be identified for delivery on small sites.

The Local Plan states (para. 3.52) that these small sites have been identified through the Local Plan and the brownfield register. Of the 1,249 dwellings, a total of 516 dwellings are allocated under 'small sites' within the Regulation 19 plan.

The remaining dwellings (733 dwellings) are to be found in the Brownfield Register. The Register is available on the Dover District Council website and was last updated in February 2021- nearly 2 years ago. Shown at Appendix 02 of this statement is the list of sites that make up the 11.4% as suggested by the council which fulfils this requirement, alongside comments taken from the Brownfield Register. A number of the sites listed in the Brownfield Register are noted to be 'complete' or 'built out'. This equates to a total of 313 units.

We consider a site that has been noted as complete or built out can no longer be counted as a site that will contribute towards meeting the housing need. Accordingly, this element should be removed from the total supply which would reduce the figure to 936 dwellings or 8.8% of the total requirement of 10,998 dwellings.

Further to this figure, there are a number of sites that are listed as 'under construction' (209 in total). It is not clear when these comments have been added to the Brownfield Register, but for a number of the sites listed, it is clear from sold house price data that a number of these dwellings have now been completed.

We consider it important, therefore for Dover District Council acknowledge that there could be as many as 522 dwellings on the Brownfield Register that are no longer available and that the Brownfield Register should be re-assessed.

We expect that following this review, the number would fall from 1,249 dwellings to 727 dwellings or 6.6% of the required total.

The SHLAA is a critical piece of work in this regard and it is crucial that sites of this scale are identified and that they are being promoted by SME developers (or capable of being delivered by an SME developer). It is not simply a numbers game but a qualitative exercise to ensure that a sufficient number of these small sites are identified to support the intent of paragraph 69 – which is to support SME developers.

Small sites have a significant advantage as they can deliver quickly. Accordingly, in allocating smaller sites (of 1ha), or indeed supporting SME developers in bringing forward larger 'small sites' (there are a number of SME Developers capable of delivering sites in excess of 1ha and up to 100 dwellings or more per site), it will help deliver housing in the short term and firstly seek to rectify the existing housing land supply issue and deliver in early years of the plan period whilst the larger, longer term sites move through the planning and delivery process.

It is critical to have a good blend of sites and small site and SME developers are key to the success of delivery. SMEs also seek to deliver good design and set a good standard in the Borough.

Support for SME's/Small Sites

We support the principle of Policy SP4- Residential Windfall Development which seeks to deliver small scale windfall development in certain locations. This allows SME's to come forward with development in sustainable locations.

However, we consider the wording of the policy is too restrictive and will not result in an effective policy. This is in part because the wording is too restrictive when referencing land that is within our immortally adjacent to settlement boundaries and that the settlement boundaries themselves are tightly drawn around these areas. The Regulation 19 Policy Map settlement boundaries do not include all existing built form and the proposed new allocations are also excluded from within the boundaries.

In order for this policy to be effective and to meet the windfall requirement (1,050 dwellings) we consider amendments are required to the wording of the policy and that the settlement boundaries as shown on the Policies Map should be modified to include the existing built form and the built form proposed in the Local Plan.

The wording of Policy SP4 should be amended as follows:

SP4 - Residential Windfall Development

1 Residential development or infilling of a scale that is commensurate with that of the existing settlement will be permitted within, or immediately adjoining or close to the existing built up confines of the settlement boundaries, as shown on the Policies Map, of the following settlements:

Ash, Alkham, Aylesham, Capel-le-Ferne, Deal, Dover, East Langdon, Eastry, Elvington, Eythorne, Guston, Goodnestone, Kingsdown, Lydden, Northbourne, Preston, Ripple, Sandwich, Shepherdswell, St Margarets at Cliffe, Wingham, and Worth.

1 Minor residential development or infilling or adjoining or close to the existing built up confines of the settlement boundaries of a scale that is commensurate with that of the existing settlement will be permitted within the settlement boundaries, as shown on the Policies Map, of the following settlements:

Ashley, Barnsole, Betteshanger, Chillenden, Coldred, Denton, East Studdal, Finglesham, Great Mongeham, Martin, Martin Mill, Nonington, Ringwould, Staple, East Stourmouth, Sutton, Tilmanstone, West Hougham, Wingham Green, Woodnesborough and Wootton.

Subject to all of the following criteria being met:

1 a) It is of a scale that is appropriate to the size of the settlement and the range of services and community facilities that serve it, taking account of the cumulative impact of any allocated sites and committed development;

1 b) It is compatible with the layout, density, fabric and appearance of the existing settlement and individually or cumulatively, would not result in the coalescence or merging of two (or more) separate settlements, or the significant erosion of a gap between settlements, so as to result in the loss of individual settlement identity or character;

1 c) In the case of settlements in, adjoining or surrounded by, the Kent Downs AONB or Heritage

Coasts, that the proposal complies in the first instance with the primary requirement of conserving and enhancing landscape and scenic beauty, and, where this is demonstrated, that the scale and extent of development is limited, sensitively located and designed to avoid or minimise adverse impacts on these designated landscapes;

1 d) It would conserve and enhance landscape character and biodiversity and not result in an unacceptable intrusion into the open countryside or the loss of, important green spaces within the confines that contribute positively to the existing character of that settlement;

1 e) It would preserve or enhance any heritage assets within its setting;

2 f) It would not result in the significant loss of best and most versatile agricultural land currently used for agriculture;

1 g) Where the site adjoins open countryside, an appropriately designed landscape buffer is included;

2 h) It would not have an adverse impact on the living conditions of existing adjoining residents;

3 i) Where development would result in the loss of active employment, open space, sport or

community facilities within the settlement that such development is consistent with the requirements of policies EN2, PM5 and PM6 of this Plan;

1 j) Traffic movements generated from the development do not result in severe impacts to the highway network that cannot be mitigated. This should be considered through transport assessments carried out in accordance with Policy TI2 which must take account of the cumulative impact of sites allocated for development. Proposals must not prejudice the ability of sites allocated for development to come forward due to limited highway capacity; and

1 k) It would be in accordance with all other relevant policies in the Plan.

2 New dwellings (both isolated and non-isolated) elsewhere in the countryside outside of settlement

boundaries will only be permitted in exceptional circumstances under one or more of the criteria

1 to v), and subject to meeting criteria a) to k) above:

2 i) there is an essential need for a rural worker, including those taking majority control of a farm business, to live permanently at or near their place of work in the countryside;

1 ii) the development would represent the optimal viable use of a heritage asset or would be appropriate enabling development to secure the future of heritage assets;

iii) the development would re-use redundant or disused buildings and enhance its immediate setting;

1 iv) the development would involve the subdivision of an existing residential building; or

2 v) the design is of exceptional quality, in that it: - is truly outstanding, reflecting the highest standards in architecture, and would help to raise standards of design more generally in rural areas; and – would significantly enhance its immediate setting, and be sensitive to the defining characteristics of the local area

In order to help meet housing needs as well as support SMEs and Self and Custom Builders, we consider the Council could still include a small sites policy or a policy which recognises the role of rural communities and supports windfall developments.

The Network is championing a small sites policy, which is presently being endorsed by a number of LPAs including Swale and Medway Council.

Any future plan should provide for a policy framework to allow SMEs to deliver throughout the lifetime of the plan, particularly in rural areas.

As part of the Network's objective, it has sought to introduce a policy into emerging Local Plans that seeks to support small and medium sized developments that builds on the 1ha site requirement but expands this into a policy framework that can allow SMEs to successfully operate within the policy framework of a Local Plan where there are limited opportunities through the allocations in which the Council has made (i.e. on larger sites).

In this respect, there is often a large windfall figure required to be met, or LPAs find themselves in a position where the presumption in favour of sustainable development is applicable. The SME policy set out below is a policy in which the Network considers would provide the opportunity for SME sites to come forward, whilst offering the LPA an enhanced development coming forward that is typically delivered by an SME – i.e. in respect of design quality or for instance carbon efficiencies.

Whilst the ideal scenario would be for the same policy to be adopted by each Council (and therefore apply a level of consistency in understanding and application of the policy), we also recognise that each LPA has a specific set of circumstances that may require the policy wording to be tweaked. This maybe the case in DDC and the Network would welcome further discussions as to how such a policy could be introduced into the Plan.

The suggested wording of the policy is as follows, but can be tailored to suite each LPA.

Policy [insert Policy Number] Small Sites

In order to recognise the value of SMEs and small scale sites, the Council will support development of unallocated or windfall small scale housing (C3) and approve applications providing the harm does not demonstrably outweigh the benefits; and where:

- 1 The site does not exceed 60 dwellings (net) and is of an appropriate scale to its location;

- 1 The site is being brought forward by a recognised SME Developer and is not part of a larger site;

III. The proposed development delivers;

- 1 A bespoke design approach;
- 2 A high quality design that is locally distinctive;
- 3 Is sympathetic to the character of its location;
- 4 All dwellings meet National Design Standards and endeavor to deliver a range of Carbon reduction build techniques;

- 1 The proposed development preserves residential amenity, designated heritage assets and core environmental assets and increase net biodiversity.

- 1 A flexible approach will be encouraged to the delivery of Affordable Housing assessed on a site by site basis. Where on site provision is demonstrated through evidence to be unviable or unattractive (less than 70% Open Market Value) to recognised Registered Providers, the Council will permit alternative levels of Affordable Housing or alternative forms of tenure, including First Homes, payment in-lieu of on site provision or another form of recognised Affordable Product as defined in the NPPF.

It is recognised that SMEs can deliver quickly and applicants are encouraged to explore if a reduced implementation period is appropriate.

A Small Sites policy will allow for SMEs to operate within the Plan Led system and will allow both Small and Medium sites to come forward (i.e. sites above 1ha and up to 60 dwellings). Such a policy will allow an SME to come forward with a planning application that meets locally defined specific criteria, such as high-quality design, low carbon footprint, reduced time limits for implementation etc and a flexible approach to the

delivery of Affordable Housing. On the other side of the coin, the Council will receive higher quality developments being submitted that are in character with more rural fringe locations (remembering the SME site typology), but that those Rural Fringe locations can be supported with an appropriate amount of growth that will assist in preventing, slowing or reversing their cycle of decline.

Such a policy would provide for additional weight to be afforded to an SME application, and thus allow greater weight to be applied to the application in the overall planning balance. This would reduce risk to an SME and increase certainty at the planning stages, as the SME can tailor their scheme to meet the specific criteria. The LPA also recognises that it would result in a development that meets Building Better Building Beautiful objectives and potentially addressing Climate Change issues.

Crucially, the policy is designed to deliver up to 60 dwellings (and thus meet the M of SME as much as the S) but is worded in a way that seeks to ensure the development coming forward in any given location is consistent and respectful to the area that it is in i.e. a scheme of 60 dwellings may not be appropriate for a small village, but 20 maybe, and therefore a policy that refers up to a figure of 60 dwellings is deemed acceptable ? i.e. the policy is fully flexible.

In addition, the 60 dwelling threshold is very much seen as the scale of developments where larger SME's start to compete with Volume housebuilders on sites. A volume housebuilder will tend not to drop below 60 dwellings and thus the Policy is desgnd to really assist SME delivery and support the delivery of bespoke high-quality development, but also directly respond to certain SME challenges, such as how to deliver small numbers of Affordable Housing on any given site.

The Network recognises that other Kent LPAs are seeking to introduce a Small Sites Policy and a key aim for the policy is that there is a level of consistency in the wording across a number of LPAs, in order that the interpretation and understanding of the policy is also consistent on a cross boundary level – again seeking to reduce the risk at the planning stages to an SME.

In addition to the Policy itself, we also consider that an SME protocol should be prepared which provides guidance and clarity for SMEs at the pre-application and post-submission stages. The protocol would recognise the need to engage with SMEs and understand that a flexible approach is needed to certain issues (such as site typology/affordable housing provision).

The protocol could include a standard PPA timeframe and fixed cost to ensure that sufficient officer time is allocated to an SME application. Whilst SME applications tend to be on the smaller scale (when compared to larger volume housebuilder submissions), those applications are critical to the SME themselves, and accordingly the Network often discusses the frustration at the lack of engagement from LPAs on their applications – often perceived by SMEs in the Network as being at the bottom of the pile.

This position is especially so at the pre-application stage, where often paid pre-application advice is sought, but either never received or delayed, in some cases up to 9 months. Whilst this is a matter than may extend beyond Dover District Council, this is a 'real life' significant issue as a pre-application response is so important to an SME to determine the extent of risk that a site may carry.

The importance of a planning consent is vital to the success of an SME, no matter how small (or large) that scheme is, and greater engagement is always encouraged. This works both ways and greater engagement can improve the submission material of an SME and thus also reducing risk.

A further burden on SME's, and a point that the above policy is seeking to assist with is delivery of Affordable Housing. This is a wider matter than DDC, but it is well recognised that Registered Providers are rarely interested in sites unless the number of affordable homes being offered equates to at least 20 affordable dwellings. For DDC, this means that any site that falls under a 67-dwelling threshold will likely struggle to gain interest in a registered provider (at 30% AH requirement). The policy seeks a flexible approach to how Affordable Housing can be delivered by an SME in instances where it is the RP that is not interested, not that the SME does not wish to provide affordable homes.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	DDC Edit - Text extracted from attachment to SDLP484 and 486. See that attachment for full text Eythorne Parish Council Regulation 19 Consultation Response 1. Introduction 1.1 The Local Plan document interestingly contains a Leaders Forward in which is stated "there's a need for a substantial number of new homes to be built within the district". It goes on to state that "we can enjoy a wonderful, world class countryside and the protection of it is fundamental to achieving successful, sustainable growth for existing and new residents, businesses and visitors". It is therefore critical that such a 'need' is met with due consideration of the actual needs of any specific area and a comprehensive assessment completed to ensure sympathy to and protection of the area in which existing residents have lived and enjoyed for decades. To get this wrong will mean any new development will carry detrimental outcomes in perpetuity and have significant negative effects for a lifetime.

	<p>1.2 It is the opinion of Eythorne Parish Council that the above considerations, including the Leaders Forward, have been overlooked in putting forward development proposals in the new Local Plan for areas SAP28 and SAP29 and, as was its position at Regulation 18 consultation, objects to these two areas being included in the Local Plan 2040.</p> <p>2. Housing Allocations Suitability</p> <p>2.1 Both SAP28 and SAP29 areas are currently open countryside and consequently would be classed as greenfield development. Why develop greenfield land when a brownfield land stock of some 174 hectares already exists within the Dover district supporting some 5000 new homes, 10 years worth of the new local plan period. The geographical location of Elvington and Eythorne means they currently enjoy a valuable rural outlook between them (see photos below), overlooking productive agricultural land which provides a welcome relief between the built up areas of both villages. Such a valuable attribute will be lost as a result of SAP28 and the two villages will very much become one with the potential 300 homes identified, creating a sprawl of the existing built up areas and converting a part of our world class countryside into tarmac, bricks and mortar, without any credible justification.</p> <p>2.2 More than ever before is the importance of greater self sufficiency in food production and hence the Government Food Strategy policy paper. The headline to this paper states, this strategy sets out what we will do to create a more prosperous agri-food sector that delivers healthier, more sustainable and affordable diets for all. To fulfil such a vision requires investment and development but more importantly to retain existing resources and production. The local plan proposals for SAP28 and SAP29 flies directly in the face of such a vision and the Parish Council strongly opposes DDC in casting aside any consideration of the food strategy intentions and the opportunity for food security.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The previous consultation outlined a minimum requirement of 11,920 homes across the plan period, based on the standard method. However, in this iteration of the Local Plan, the housing requirement has fallen to 10,998, equating to 611 homes per annum as per the 2022 Local Housing Need Assessment. While the Local Plan has a total supply 11,924, dwellings, Gladman consider the reduction of the minimum housing requirement inappropriate and unjustified. The standard methodology and local housing need is simply the starting point for establishing the housing requirement. To safeguard the delivery of housing, Gladman suggest that a sufficient buffer be included in the housing supply. Whilst there is no rule for what this should be, Gladman support the Home Builders Federation's recommendation that local plans should seek to identify a 20% buffer between the housing requirement and supply.</p> <p>(DDC Note - Text Extracted from Document sent from Gladman Developments Ltd. 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Text Extracted from Document sent from Nicole Burnett on Behalf of Dean Lewis Estates. Representation has been split across relevant areas of the Local Plan. Full attachment can be found under reference SDLP1254.)</p> <p>SP3 – Housing Growth</p> <p>3.1.1 Policy SP3 'Housing Growth' sets out that provision is made for at least 10,998 net additional homes in Dover District over the plan period. The majority of this housing development will be in Dover Town and at Whitfield, with land identified to deliver a minimum of 3,381 homes in addition to existing commitments. Development will then be focused in the District Centre of Deal, and the Rural Service Centres of Sandwich and Aylesham. The policy goes on to note that development in Deal, Sandwich and Aylesham will be at a more limited scale than Dover Town, and that land is allocated to deliver in the region of 1,099 homes in addition to existing commitments.</p> <p>3.1.2 Table 3.3 of the Local Plan (included below) sets out the overall distribution of growth for the district</p> <p>DDC Note - TABLE AVAILABLE TO VIEW IN ATTACHMENT</p> <p>In order to deliver the necessary scale of housing growth over the plan period it is of fundamental importance that the spatial strategy is fit for purpose. DLE note that a crucial element of the spatial strategy focusses on the delivery of housing on a few large sustainable urban extensions (in particular Whitfield and south of Aylsham). The urban expansion of Whitfield was identified as a Strategic Allocation in the 2010 Core Strategy for the delivery of at least 5,750 new homes. The Local Plan notes that in addition the extant permission an estimated 2,200 homes can be delivered at Whitfield over the plan period. Policy SAP1 of the new Local Plan notes that this will be a new neighbourhood comprising in the region of 6,350 homes.</p> <p>3.1.5 Whilst DLE do not dispute the inclusion of these SUEs within the Local Plan concern is raised over the scale of delivery and the significant focus placed on these developments. Any delays would jeopardise delivery of the plan as a whole. DLE note that other site allocations considered within the previous iteration of the plan could be included to increase the level of flexibility and ensure delivery over the course of the plan period. DLE make specific reference to Aylesham North, which was previously identified for the delivery of 500 dwellings, however has not been included in the Regulation 19 version of the plan. In this regard DLE refer to later sections of this submission providing further details regarding the omission of this site.</p> <p>3.1.6 When allocating sites, the Council should be mindful that to increase delivery the widest possible range of sites, by both size and market location are critical to ensure that house builders of all types and sizes have access to suitable land in order to deliver the widest range of products.</p> <p>3.1.7 As detailed later in this submission, Aylesham is a highly sustainable location and capable of delivering a greater level of housing growth within the plan period. DLE believe that a further allocation to the north of Aylesham would help provide flexibility and choice and ensure the delivery of much needed housing over the plan period.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). Please be as precise as possible.	Edit: DDC amendment: See attached representation for full test. Detailed comments on Housing Needs as follows: "4 Housing Need

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

4.1 Context

4.1.1 The NPPF is explicit in its requirement for strategic policy-making authorities to meet their needs in full. Paragraph 11 makes clear that:

4.1.2 "Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that: (1) All plans should promote a sustainable pattern of development that seeks to: meet the development needs of their area; align growth and infrastructure; improve the environment; mitigate climate change (including making effective use of land in urban areas) and adapt to its effects; (2) Strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless: i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or ii. any adverse impacts of doing so would significantly and demonstrably outweigh the benefits

4.1.3 Paragraph 20 goes on to state that: "Strategic policies should set out an overall strategy for the pattern, scale and design quality of places, and make sufficient provision for: (1) housing (including affordable housing), employment, retail, leisure and other commercial development; (2) infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat); (3) community facilities (such as health, education and cultural infrastructure); and (4) conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation."

4.1.4 Given this context, the Local Plan review should set out a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic environment.

4.1.5 National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate.

4.1.6 In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.

4.1.7 Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.

4.2 Dover District Council's Housing Need

4.2.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover District of 596 dwellings per annum. However, the affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total housing need of 10,998 dwellings for the Plan period to 2040. In addition to the minimum figures, Dover District Council have a set a contingency buffer of 926 dwellings of the Plan period, equating to 8.4% of the total Plan period figure.

4.2.2 For context, the current adopted Core Strategy requirement is 700 dwellings per annum. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.

4.2.3 For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate land sufficient to accommodate a minimum of 6,642 new homes over the remaining plan period to 2040. It is understood that this will be derived from the following sources: - Whitfield Urban Expansion Allocation: 2,200 dwellings - Local Plan Allocations (excluding Whitfield): 3,392 dwellings - Windfall Allowance (70 a year from year 4): 1,050 dwellings

4.2.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target, and, due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs Area of Outstanding Natural Beauty, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, meeting Dover's housing needs inevitably will require the release of significant greenfield land.

4.2.5 In our view, sustainable and accessible sites logically located adjacent to existing settlements (such as Shepherdswell), represent the most sustainable and reliable sources of growth for the Plan Period, to deliver the significant number of new homes that are required and are most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the District"

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	To be able to respond to any matters raised in relation to amendments to Draft Policy SAP36. Any changes to the allocation directly impact the ability for the site at Land Adjacent to Mill Lane to be able to be delivered by our client, thus impacting the Council's housing delivery targets.

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>(DDC Note - Representation submitted by Lee Evans On behalf of Mr and Mrs Labin and Rubix Estates. Full Representation attached to SDLP1387. This document has been split across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1387.)</p> <p>This policy deals with the housing strategy for the plan period. It expresses clear linkages to the overarching vision for the Plan, and its objectives in focusing growth at sustainable locations providing greater choice of high-quality housing to meet identified needs.</p> <p>3.16 Need is derived from household projections and targets set by central government, here identified as at least 611 dwellings per annum, with a minimum of 10,998 new dwellings over the plan period. The housing growth strategy at SP3 is geared towards delivery of such. This baseline position of meeting identified need is wholly supported.</p> <p>3.17 It is noted that the policy wording recognises 'a minimum of 10,998 dwellings over the plan period'. It is considered that this wording is most appropriate in encouraging sustainable growth; a cap should not be applied.</p> <p>3.18 The Plan allocates a number of sites to ensure a consistent supply of housing to facilitate demonstration of a continuous five-year housing land supply. Again, it is pleasing that the Plan seeks to clearly satisfy this basic requirement. It is essential that the Plan is able to meet identified need, and the allocation of multiple sites across the plan area at different scales should enable a reliable supply of dwellings to meet need – again as a minimum target only, rather than a capped 'ceiling' figure.</p> <p>3.19 The Settlement Hierarchy is supported, particularly as far as it concerns the higher order settlements of Dover, Whitfield, and Deal.</p> <p>3.20 It is useful that the hierarchy clarifies that – for planning purposes – Walmer is included within Deal, alongside Sholden, and Mongeham. In recognition of its role as a District Centre, Deal is ranked third in the hierarchy. It benefits from high connectivity and a range of services and facilities. It is a highly sustainable location for development and it is agreed that its place in the Settlement Hierarchy sufficiently recognises this.</p> <p>3.21 It is considered that the apportionment of growth across the hierarchy is appropriate in distributing sustainable growth to support communities in multiple locations in the District. Table 3.3. of the Plan identifies that an indicative 223 dwellings will be delivered in Deal under the Plan. As an indicative figure, this level of growth is supported in realising the overarching vision for the District. Detailed commentary on the precise quantum of development to the settlements is not provided here, though it is emphasised that the aspiration of meeting growth in sustainable locations such as Deal gains significant support from the Promoter. Assessment of the precise scale and quantum of development should be undertaken at the application stage, though the indicative capacity of circa 223 dwellings across multiple sites in Deal is supported.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP3
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note <i>The text below is an extract from the original representation which is attached to SDLP1438.</i></p> <p>SP3 Housing Growth</p> <p>The Housing Growth statement that the aim is to , “provide a greater choice of high-quality housing to meet the needs of Dover district’s growing population and changing demographic and address affordability issues”, does not seem internally consistent with the details provided in the plan which underestimates the evidence showing a large part of district population growth is due to aging. The details thus render SP 3 and SP 5 ineffective, unsound. Moreover, with the announcement by Prime Minister Sunak on 5 Dec 2022 that compulsory housebuilding targets are to be dropped, the DDC numbers may not be compliant with emerging government policy.</p> <p>The government department (DLUHC) decision that Dover needs 611 new dwellings a year and a minimum of 10,998 new homes between now and 2040 we find very incompatible with legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008, and unsound. We should be transforming homes into zero carbon homes as is happening in East Sussex, led by Lewes DC. Combining these numbers with 3.51 and the statement ‘76.7% of the new homes are on greenfield sites, while 23.3% are on brownfield sites’ is unsound and unacceptable to the public. It must also be pointed out that at least one of the sites included in the 23.3% of brownfield sites is actually a site intended by SEEDA as local nature reserve having rewilded on unstable slag (only rendered stable by tree-planting), a site which DDC forgot to make a local nature reserve in 2004, and it has become a biodiversity hotspot well known to genuine ecologists nationally, Betteshanger Park, and ought to be designated a Biodiversity Opportunity Area.</p> <p>We note that central government in London, according to Housing Today is imposing a disproportionate amount of housing growth on Kent and the SE. The FT has shown a quarter of Con party donation come from the property developer lobby. We note that the supposed national New Homes Ombudsman, is not neutral in this matter and gets on well with volume developers and there is with a grievous lack of democratic accountability across Kent. So the chances, of protecting Kent, of achieving a Growth Strategy that creates climate-friendly jobs and suitably-sized, suitably-priced zero carbon homes for the next generation of local families, are not good. The space available for infrastructure, functions well for compact coastal towns of the size that Deal / Walmer and Sandwich were 5 years ago. The level of greenfield overdevelopment is putting Deal infrastructure under strain now, so in-fill should make up the majority of the allocations for Deal and that the housing growth specified for District Centre of Deal and around its boundaries needs to be stopped or radically reduced.</p> <p>For example, either or both of SAP 15 / SAP 34 would destroy the only road access alternative for diverted traffic. (See detailed comments under SAP 15/ SAP 34 below). Housing Growth that threatens gridlock, blocking off a conurbation of 30,000 from access by emergency vehicles, commuters, school buses are not sustainable housing growth and is very unsound.</p>

	<p>3.29 We note and welcome a degree of shift from the Reg 18 draft, in that more sites have been selected with a view to using 'existing infrastructure, facilities and services, with a greater professed purpose to ensure development contributes to the sustainability of local communities and services. We note with appreciation both the increase in the number of sites in Dover town SAP 6 – SAP 13, and the SAP 26 Former Snowdown Colliery, Aylesham near a rail station for example. It should be possible to state a determination to 'make best use of brownfield – non-rewilded – land) without giving developers the opt-out qualification 'wherever possible'.</p> <p>On Five Year Housing Land Supply. 3.39 Having stated the Council had 6.03 years land supply plus a 5% buffer; it is not sound, effective, or legally compliant to then state 'the provision of additional sites within the first 5 years of plan period is needed to ensure resilience and promote flexibility;'. Instead of ensuring resilience, it will create exactly the destructive suburbanisation of a rural district that many, many of the resident electorate are most worried about. The 10 year buffer proposed, 3.40 is worse and demonstrates the culture of 'whatever developer partners ask for' referred to above.</p> <p>3.46 It is the conspicuous lack of a secondary school in Aylesham that prevents Aylesham becoming the small garden town planners aspire to. The provision of a secondary school by 2028 should be a condition of SAP 23.</p> <p>3.48 Many, many of the current residents of ex mining village Elvington were / are dependent on buses that have recently (2022) been cut, (following KCC cut to bus subsidies) to get to work in Canterbury, Folkestone, Sandwich, Thanet or Dover, or to get to secondary school, or to get to doctors, or to shop. These people had an environmentally sustainable public transport service that has been cut. Kent CC is saying it is looking at potential bankruptcy in 2023, so promises of new services and facilities are met with some disbelief.</p> <p>SAP 28 is planned on the cricket field next to the Tilmanstone Welfare club, The selection of this site can only be sound if cast-iron conditions to provide all of the services mentioned , are included as well as new drainage infrastructure. Council housing in Elvington has been subject to flooding from the sewage system, long overdue for replacement. As in Dover deprived wards, there are unhealthy EPC EFG homes in Elvington that need to be transformed into zero carbon home to lift residents out of fuel and therefore food poverty.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p><u>Dover Local Plan – Section 19 Consultation</u></p> <p>SAP 44</p> <p>SOUNDNESS</p> <p>The revised Local Plan is not sound for the following reasons:</p> <p>It has not been justified and is not effective. It has not been positively prepared to meet 'objectively assessed' needs and for this reason is not consistent with National Policy.</p> <p>Why have the reasonable, sustainable alternatives for additional housing previously suggested in larger development centres such as North Aylesham, Elvington and Ethorne and Farthingloe and included within the original plan have now been removed? At the same time the proposed allowance for housing has been increased in Capel-le-Ferne and will not be deliverable.</p> <p>The original draft Local Plan has been changed so that 900 fewer houses are proposed overall and yet the number of houses proposed in Capel-le-Ferne has increased to 95.</p> <p>This is on top of recent planning permission for 34 houses off Capel Street, 15 dwellings at Longships on Cauldham Lane and 40 new dwellings in a recently completed development at Grasslands.</p> <p>Why is Dover District Council spreading development across numerous small sites which is uneconomic and unsustainable rather than concentrating in larger developments where existing services, facilities and infrastructure are already available?</p> <p>Why Dover District Council persist with this policy in relation to Capel-le-Ferne when it clearly is not in keeping with the council's stated objectives?</p> <p>SP2 - Planning for Healthy and Inclusive Communities and</p> <p>SP3 – Housing growth</p> <p>SP2 - Planning for Healthy and Inclusive Communities and</p> <p>SP3 – Housing growth</p> <p>SP2 states that <i>'The Council will support the creation of healthy, inclusive and safe communities in the District by ensuring that new development is well served by services and facilities (for example education, health care, community, cultural facilities, play, youth, recreation, sports, faith and emergency facilities) and that a mix of uses are provided in new development that support daily life.'</i></p>

SP3 states that what they are trying to achieve is 'To focus new development at accessible and sustainable locations which can utilise existing infrastructure, facilities and services, and to ensure development contributes to the sustainability of local communities and services, supporting regeneration and wherever possible make the best use of brownfield land'.

But the proposals for Capel-le-Ferne do not meet any of the objectives in the above Strategic Policies as follows:

- 1 The location of the proposed development in SAP 44 will connect to existing overloaded roads using Capel Street as its primary access point.
- 2 The proposed development is on arable land, currently in use and not brownfield land.
- 3 The development of the village is clearly not sustainable – Capel-le-Ferne has little or no facilities and services – only one small shop, no post office, no health care facilities, no doctor, no dentist, no pubs within the village confines and only a primary school. Therefore, in order to access services, residents need to drive to either Folkestone or Dover which is clearly at odds with SP1 – Planning for Climate Change.
- 4 The addition of 40 dwellings recently completed at Grasslands has not led to any benefit to the community in terms of new services or facilities.
- 5 Trying to 'grow the villages' by increasing the number of houses, but not having any plans to help develop services and facilities is unsustainable, uneconomic and unethical. It will only lead to more unnecessary travel.
- 6 There is only a single bus service and no train service at all.
- 7 The strategic policy SP6 – Economic Growth identifies areas distant from Capel-le-Ferne for economic development. Capel-le-Ferne has little opportunity for employment generation so cannot be seen to contribute to SP6.
- 8 The agreed number of number of houses for the site was originally set at 100, then reduced to 50 to allow a single point of access to the site. It has now been increased to 70 and is deemed achievable. This is not realistic and undeliverable. It would appear that the increase in the number of houses is being driven by economic needs to cover developer contributions which are likely to be substantial rather than by any need by Dover District Council to provide more housing. The development at Longships under SAP45, which has been granted planning permission, exceeds the allocated housing number by 5 dwellings on the basis that sticking to the SAP45 allocation of 10 houses would be uneconomic. The development of SAP44 is likely to encounter similar cost problems and is unlikely to be achievable in the proposed timetable (2021-2026)

Consultation With Statutory Consultees (Reg 22)

Dover Council **has not fully consulted with statutory consultees** to ensure that the existing facilities where present are sufficient or that plans are in place for future development of infrastructure.

SP11 – Infrastructure and Developer Contributions states: *Supporting infrastructure should be provided in advance of, or alongside, the development, unless there is sufficient existing capacity. The appropriate phasing for the provision of infrastructure will be determined on a case-by-case basis with reference to the most up to date Infrastructure Delivery Plan (IDP) and the priority classification along with other relevant evidence, and in consultation with the relevant providers.*

It is noted that the site at Aylesham North (AYL004) has been removed for transport reasons – essentially Kent County Council objected on transport grounds. However, given 500 homes in a sustainable location (two rail stations, large settlement), that would seem to be the obvious logical focus for development and the Council has failed its Duty to Cooperate with Kent County Council by failing to ensure the relevant transport assessments are undertaken and potential mitigation identified and agreed; rather than simply removing the large site from the plan and increasing allocations on the edge of villages (such as Capel-le-Ferne) that they hope are small enough to slip under the radar at Examination. This is not ethical.

The existing infrastructure in Capel-Le-Ferne is already struggling to cope with the existing level of housing. Water supply is weak throughout the village, power outages are common, and drainage has insufficient capacity and frequently blocks.

The addition of 90 houses along with the 49 already given planning permission will make this worse. Access to the site is proposed via Capel Street, an already congested road (little off street parking, busy cut through, primary school).

Note also the checkered history of road traffic accidents and injuries caused at the congested at the junction of Capel Street/Cauldham Lane from New Dover Road.

Looking through the supporting Infrastructure Delivery Plan (IDP), no mention is made of any suggested improvements to facilities/services or for any proposed improvements to be carried out by Kent Highways, Southern Water (drainage) or Affinity Water (water supply) in Capel-le-Ferne.

Incremental development such as extensions to villages are more difficult to plan for with respect to infrastructure as they are too fragmented and should therefore be avoided.

	<p>Transport modelling has been carried out for developments in other areas, but nothing has been done for Capel-le-Ferne where there will be over 100 new houses accessing Capel Street, a narrow congested road. This was highlighted as a significant problem during the long drawn out process of granting planning permission for 34 dwellings off Capel Street. The revised Local Plan is proposing to add a further 70 houses along with 20 dwellings on Cauldham Lane. All the traffic from these developments will exit onto the New Dover Road at the junction of Capel Street/Cauldham Lane –a poorly designed junction which has been identified in numerous surveys as a real problem for development in the area. The Local Plan does not include any transport modelling for this area.</p> <p>Kent County Council have reservations about access to the site SAP44 indicating that it is not ideal. Given the current frequent traffic congestion in the area, this is not surprising. Particular concern was raised regarding emergency vehicle access, hence the requirement for a secondary access to SAP44 and further consultation with the emergency services. However, it should be noted that this secondary access is via a single track lane. Clearly insufficient consultation has been carried out at this stage.</p> <p>Although Dover District Council have consulted with Capel-le-Ferne Parish Council as required, they have not engaged fully with the parish council as the objections raised by the council to overdevelopment of the village have been ignored both in this local plan and in planning permissions granted in the past. If the purpose of consultation is to incorporate the views of the local population, Dover District Council have clearly failed in this regard.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Changes I would make:</p> <p>Take SAP 44 out of the plan completely as it is not following the policies that the council say they are trying to Achieve and not following their own policies.</p> <p>Choose one of the alternative sites for additional housing in larger development centres such as North Aylesham, Elvington and Ethorne and Farthingloe and included within the original plan. In particular, Aylesham North (AYL004) is far more appropriate, given 500 homes in a sustainable location (two rail stations, large settlement), that would seem to be the obvious logical focus for development</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I would like to participate as I represented the Village Council in recent Planning Committee meetings.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Policy SAP15 - Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002) Policy SP3 - Housing Growth Policy SP4 - Windfall Development Policy SP11 - Infrastructure and Developer Contributions Policy SP12 - Strategic Transport Infrastructure
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We consider that the plan is sound, but object to elements of Policy SAP15 - Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002) and Policy SP3 - Housing Growth. These objections are set out in the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359).</p> <p>1 Introduction</p> <p>1.1 Purpose of this Representation</p> <p>1.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited in response to the Dover District Council 'DDC' Local Plan (Regulation 19) consultation which runs until 9th December 2022.</p> <p>1.1.2 We understand that DDC is in the process of preparing a new Local Plan to set out a strategy for development for the period to 2040 and that the Council are presently seeking comments on the pre-submission Plan prior to its submission for examination in early 2023.</p> <p>1.1.3 Our client is promoting 'Land at Rays Bottom, Walmer, Deal' (hereafter referred to as 'Land at Rays Bottom' or 'the site') for the residential allocation of the site as part of the new Dover District Local Plan preparation process. The site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 75 dwellings under policy reference 'SAP15'.</p> <p>1.1.4 It is highlighted that as part of the Regulation 18 Local Plan, the Site was allocated under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' for approximately 100 dwellings (reference WAL 002).</p> <p>1.1.5 The purpose of the representation is to support the allocation of Land at Rays Bottom as a suitable and deliverable location for residential development and provide comment on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan but to object to the indicative capacity set out in the policy.</p> <p>1.1.6 In this regard, we remain wholly supportive of the principle of the residential allocation of Land at Rays Bottom and agree that the Site represents a logical and sustainable location to direct growth in Deal consistent with the growth strategy of the Plan as a whole.</p> <p>1.1.7 Accordingly, we say that the allocation of Land at Rays Bottom is necessary in order for the Council in meeting the growing need for new homes in the district and help to ensure the DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan.</p> <p>1.1.8 It is submitted that the SAP15 policy wording should be amended to reflect the capability of the Site to accommodate approximately 80 dwellings, deliverable early in the Plan period.</p> <p>1.1.9 Based on the current national and local planning context, we consider the Site to be a highly suitable edge-of-settlement location to allocate land for housing to help meet the need for new homes in the district and its effective use should be appropriately maximised in accordance with national policy objectives.</p> <p>1.1.10 Further details regarding the Site and commentary on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan are set out in the following sections of this document.</p> <p>1.2 About Fernham Homes</p>

1.2.1 Fernham Homes Ltd are a local award winning small and medium sized (SME) housebuilder, established in 1997 and has a strong track record of delivering high quality residential and mixed use developments in Kent over the last 25 years. This has been acknowledged through the receipt of nationally recognised awards, including the gold Evening Standard Awards best family home 2022 and 2019 bronze WhatHouse Best Small Housebuilder.

1.2.2 SME housebuilders are recognised in the National Planning Policy Framework ('NPPF') at paragraph 69 as making an important contribution to meeting the housing requirements of an area, and being able to build out relatively quickly. Similarly, this has also been recognised by the Planning Inspectorate. This is particularly the case with Fernham Homes, which is privately owned with access to significant resources. This provides significantly more flexibility than national and other regional housebuilders, and allows Fernham Homes to deliver housing rapidly and to a high quality, beautiful and sustainable standard (para 126 of the NPPF).

1.2.3 Fernham Homes has embarked on a sustained period of growth, with an adopted and robust business plan to deliver around 300 houses per year in five years time.

1.2.4 A key element of Fernham Homes' operations is to take a careful approach to site selection: a huge amount of due diligence is undertaken as part of this, and therefore Fernham Homes only invests in those sites which meet the NPPF requirements of being available, suitable, and deliverable. As set out below land at Rays Bottom, Walmer ('SAP15') is firmly considered to be such a site.

1.2.5 Similarly, a key feature of Fernham Homes' approach is to work positively and proactively with local planning authorities (LPAs), both during the preparation of local plans and at planning application stage. Fernham Homes are fully committed to engaging with DDC in the preparation of its Local Plan, and firmly subscribe to the national policy approach set out in paragraphs 15 and 16 c) of the NPPF that "the planning system should be genuinely plan-led" and should be shaped by early, proportionate and effective engagement between LPAs and others, including businesses and developers. Accordingly, Fernham Homes would welcome the opportunity to discuss the matters contained in this representation, including the availability, suitability, deliverability and capacity of land Rays Bottom, Walmer ('SAP15') directly with DDC members and officers, ahead of the submission of the Local Plan for examination.

1.3 Representation Structure

1.3.1 The representation structure is outlined below for ease of reference:

Chapter 2 (Consultation Background) – Sets out the context of the Dover District new Local Plan preparation, relevant national planning requirements and a summary of our current position.

Please refer to paragraph 52 of Appeal Decisions: APP/M2270/W/21/3283924 & APP/M2270/W/21/3288645

Chapter 3 (Legal Tests of Soundness) - Assessing whether the plan is sound, having regard to the tests of soundness outlined by paragraph 35 of the NPPF.

Chapter 4 (Duty to Co-operate) - Assessing whether the plan is sound, having regard to the duty to cooperate outlined by paragraph 24 of the NPPF.

Chapter 5 (Housing Need) - Consideration of market and affordable housing need and assessment of proposed housing allocations and supply sources.

Chapter 6 (Assessment of Suitability) - Re-introduces our client's Site and provides a summary of planning constraints and opportunities, including the quantum of development that could be accommodated, why the Site is suitable for development and why the principle of the draft allocation for residential development is both justified and consistent with the DDC's strategy for growth in the district.

Chapter 7 (Conclusion) - Summarises the key points raised throughout the representation and re-affirms our client's support for the principle of the Site's allocation and the principle of proposed strategy ahead of the submission of the Plan for examination, and the objections in terms of capacity.

2 DDC – Draft for Submission Local Plan (Regulation 19)

2.1 Consultation Background

2.1.1 DDC are required to prepare a new Local Plan, as the current suite of development plan documents were adopted in 2002, 2010 and 2015. The Core Strategy (CS) (adopted 2010) in particular has a time horizon up to 2026. The plans, and the policies contained within, pre-date current national policy, practice guidance and local evidence and consequently require updating.

2.1.2 The new Local Plan will set out the vision, strategic objectives and overarching development strategy for the growth of the District over the period to 2040. It provides the planning policy framework to guide the future development of the area, addressing needs and opportunities

for housing, the economy, community facilities and infrastructure, as well as the basis for conserving and enhancing the natural and historic environments, mitigating and adapting to climate change, and achieving well designed places.

2.1.3 For the avoidance of doubt, the new Local Plan, on adoption, will replace the CS 2010 and the Land Allocations Plan 2015, as well as saved policies from the 2002 Local Plan.

2.1.4 DDC's Regulation 19 Local Plan outlines the key issues that need to be addressed between now and 2040. In particular, the Plan sets out the following key planning issues for the District:

- Ensuring that new development in the District contributes to the mitigation of, and adaptation to, climate change.
- Supporting DDC to deliver its intention to be a carbon neutral district by 2050.
- Managing flood risk and coastal change.
- Ensuring that a sufficient amount and variety of land is identified to deliver a continuous supply of housing across the Plan period and that DDC maintains a five-year housing land supply.
- Delivering growth in a way that focuses development in the least sensitive areas of the District in order to conserve and enhance the District's rich natural and historic environments.
- Supporting sustainable development in rural areas to enhance the vitality of rural communities.
- Working with partners to facilitate the delivery of the Whitfield Urban Expansion. Ensuring a range of housing tenures, types and sizes are provided across the District to meet the needs of the local community and provide choice and flexibility in the housing market.
- Promoting economic growth, tourism, and investment in the District's Town Centres in line with DDC's Economic Growth Strategy.
- To address the impact of the COVID-19 pandemic.
- Delivering strategic transport improvements, including upgrades to the Duke of York and Whitfield roundabouts to support the scale of housing and economic growth identified in the Plan.
- Promoting sustainable transport initiatives to encourage a modal shift to more sustainable forms of transport like walking and cycling.
- Ensuring that infrastructure is delivered, in the right place, at the right time, to meet the needs of the District and support the levels of development identified in the Local Plan.
- Supporting the delivery of attractive, high-quality, design led developments and the creation of healthy, inclusive and safe communities, that are well served by good quality services and facilities to support people's lives.
- Conserving and enhancing the District's rich and diverse natural landscape, including the five international sites within the district, the Kent Downs Area of Outstanding Natural Beauty (AONB), five Sites of Special Scientific Interest (SSSIs), two National Nature Reserves (NNRs), two stretches of Heritage Coasts and two Marine Conservation Zones.
- Delivering a net gain in biodiversity in the District over the plan period.
- To promote the conservation, restoration and where appropriate the enhancement of the District's heritage assets, in order to protect their significance and to ensure that they can be best appreciated and enjoyed by current and future generations.

2.1.5 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'.

2.1.6 This submission will comment on each of the above, highlighting where we believe any areas of concern lie or where modifications may be required.

2.2 DDC's Local Development Scheme

2.2.1 The District Council has a duty to review the policies contained within the development plan every five years. The 2014/2015 Authority Monitoring Report signalled the need to review key parts of DDC's adopted CS evidence base.

2.2.2 DDC's Local Development Scheme (LDS) first outlined the delivery timetable for the Local Plan Review (LPR) in the March 2017 publication. Since then, the LDS has been updated on an annual basis. The most recent September 2022 LDS summarises that following the preparation of the principal evidence base

documents, the Local Plan Review Regulation 18 consultation took place for 8 weeks in January 2021. The Regulation 19 consultation was scheduled for 7 weeks during Q4 of 2022 and is the subject of this representation.

2.2.3 Moving forward, submission of the Plan is anticipated in Q1-2 2023 with the Examination in Public in Q3-4 2023. The new Local Plan is currently scheduled for adoption in 2024.

2.2.4 As planned, DDC are now undertaking the Regulation 19 Draft Local Plan Consultation, for which this submission is made

3 Legal Test of Soundness

3.1 Legislation and Guidance

3.1.1 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. It is a statutory requirement that every development plan document must be submitted for independent examination to assess when it is "sound", as well as whether other statutory requirements have been satisfied (s.20(5) of the 2004 Act). By s.19 of the 2004 Act, in preparing a development plan document a local planning authority must have regard to several matters including national policies and advice contained in guidance issued by the Secretary of State. Such guidance currently exists in the form of the NPPF and is summarised below. This states that Plans must be:

(a) Positively Prepared: based on a strategy which seeks to meet objectively assessed development and infrastructure requirements

3.1.2 This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The NPPF set out principles through which the Government expects sustainable development can be achieved.

(b) Justified: an appropriate strategy when considered against the reasonable alternatives, based on proportionate evidence

3.1.3 This sets out the requirement that the Local Plan should be based on a robust and credible evidence base involving:

I. Research/fact finding: the choices made in the plan are backed up by facts.

II. Evidence of participation of the local community and others having a stake in the area.

3.1.4 The Local Plan should demonstrate an appropriate strategy, taking into account reasonable alternatives and based on proportionate evidence. These alternatives should be realistic and subject to sustainability appraisal. The Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.

(c) Effective: deliverable over its period based on effective joint working on cross-boundary strategic priorities

3.1.5 This makes clear that the Local Plan should be deliverable, requiring evidence of:

- Sound infrastructure delivery planning;
- Having no regulatory or national planning barriers to delivery;
- Delivery partners who are signed up to it; and
- Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.
- The new Local Plan should be flexible and able to be monitored.

3.1.6 The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the Local Plan should make clear that major changes may require a formal review including public consultation. Any measures which DDC has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.

d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national policy.

3.1.7 This submission comments on each of the above in further detailing, highlighting areas of support and where modifications are required as appropriate.

3.2 Legal Compliance

3.2.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

3.2.2 In addition to the above, the NPPF states² that: "Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that:

- a) All plans should promote a sustainable pattern of development that seeks to: meet the development needs of the area; align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effect.
- b) Strategic policies should as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:
 - (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or

Paragraph 11, National Planning Policy Framework 2021

(ii) Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole."

3.2.3 In addition, to the above, the NPPF states³ that Plans should:

- a) be prepared with the objective of contributing to the achievement of sustainable development;
- b) be prepared positively, in a way that is aspirational but deliverable;
- c) be shaped by early, proportionate and effective engagement between planmakers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;
- d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;
- e) be accessible through the use of digital tools to assist public involvement and policy presentation; and
- f) serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).

3.2.4 It is important to note that the NPPF⁴ requires strategic policies to set out an overall strategy for the pattern, scale, and design quality of places, and make sufficient provision for:

- a) housing (including affordable housing), employment, retail, leisure and other commercial development;
- b) infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat);
- c) community facilities (such as health, education and cultural infrastructure); and;
- d) conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation.

3.2.5 It is clear from the above, that any local plan should set out a comprehensive and cohesive approach to future development.

Paragraph 16, NPPF 2021

Paragraph 20, NPPF 2021

4 Duty to Co-Operate

4.1 Legal and NPPF Requirements

4.1.1 Section 33A of the Planning and Compulsory Purchase Act 2004 sets out a statutory 'Duty to Cooperate' (DtC) – i.e. a legal obligation - to all bodies as prescribed by Regulation 4 of the Town and Country Planning (Local Planning) England Regulations 2012 (the Regulations).

4.1.2 The duty requires DDC to cooperate with other persons to 'maximise the effectiveness' with which named activities are undertaken. Those activities include the preparation of development plan documents (such as this local plan) and activities that support that activity 'so far as relating to a strategic matter'.

4.1.3 A strategic matter is defined by S33A(4) in summary as: (a) 'sustainable development or use of land that has or would have a significant impact on at least two planning areas' (a planning area in this case is the area of a borough or district council); and (b) 'sustainable development or use of land in a two tier area' (as this is) 'if the development or use (i) is a county matter, or (ii) has or would have a significant impact on a county matter'. County matters broadly relate to minerals and waste and associated developments as defined by Paragraph 1 of schedule 1 to the Town and Country Planning Act 1990 (as amended).

4.1.4 Section 33A (7) requires DDC (and persons subject to the DtC) to have regard to any guidance issued by the Secretary of State about how the duty is to be complied with. In that regard Paragraph ID 9-004-29140306 of the Government's Planning Practice Guidance (PPG) confirms amongst other things that the DtC is not a duty to agree (albeit that local planning authorities should make every effort to secure the necessary cooperation on strategic cross border matters before they submit local plans for examination).

4.1.5 The NPPF establishes that effective and on-going joint working is an integral part of the plan making process that will, amongst other things, determine whether development needs that cannot be met wholly within a plan can be met elsewhere. The NPPF goes on to state at paragraph 27 that in order to demonstrate effective and on-going joint working strategic policy making authorities should: "... prepare and maintain one or more statements of common ground documenting the cross-boundary matters being addressed".

4.1.6 In addition to the District's own housing pressures, part of the DtC involves considering whether neighbouring authorities' unmet housing need can be accommodated. It is worth highlighting that recent amendments to the London Plan have identified that the City's housing need has become increasingly more difficult to deliver and therefore areas outside London will be faced with having to absorb more of London's housing need. Consequently, DDC has a duty to explore whether it can accommodate some of this overspill of London's unmet need.

4.2 Assessment of DDC's discharging of the Duty to Co-operate

4.2.1 It is recognised that work to discharge the DtC remains ongoing by DDC and will continue prior to submission as part of the preparation of the Local Plan evidence base.

4.2.2 Notwithstanding the above, at this stage it is understood that DDC have engaged with the members of the East Kent Regeneration Board including neighbouring East Kent planning authorities, Kent County Council (KCC) and its subsidiary departments:

- Folkestone and Hythe District Council
- Canterbury City Council
- Thanet District Council
- KCC
 - KCC Highways & Transportation
 - KCC Minerals & Waste
 - KCC Heritage Conservation
 - KCC Flood & Water Management
 - KCC Natural Environment & Coast
 - KCC Infrastructure including Education

4.2.3 In February 2016, DDC adopted a Memorandum of Understanding (MOU) in respect of the DtC between the East Kent Regeneration Board members. A review of the MOU took place and was agreed in January 2021.

4.2.4 The East Kent MOU sets out the framework in which the authorities will work together on strategic issues and will actively engage. It forms the overarching framework and context within which Statements of Common Ground (SoCG) will be agreed between individual authorities.

4.2.5 Further engagement is also confirmed to have taken place between the following prescribed bodies and other relevant bodies:

- Environment Agency
- National Highways
- Historic England
- Natural England
- Network Rail
- NHS Kent and Medway Clinical Commissioning Group (CCG) – now known as Integrated Care Board (ICB) since July 2022
- Kent Downs AONB Unit
- Other infrastructure providers

4.2.6 Whilst work remains ongoing, at this stage it is understood that SoCGs have been agreed and signed between the following parties:

DDC and Folkestone & Hythe District Council

DDC and Canterbury City Council

DDC and Thanet District Council

DDC and Kent County Council

DDC and National Highways

4.2.7 As part of the DtC Evidence Base documents, DDC prepared a detailed DtC Statement (dated September 2022) which sets out a summary of the engagement that has taken place, firstly by organisation, and then by issue. Whilst the statement focuses on strategic issues and duty to co-operate bodies it also includes information relating to engagement on non-strategic issues and co-operation with other bodies that are not prescribed by the regulations. In addition, Appendices 1, 3 and 4 identify the main meetings and other correspondence that has taken place throughout the plan making process.

4.3 Summary

4.3.1 On account of the above and the documents published within the DDC's Local Plan Evidence Base, we are satisfied that DDC as the strategic policy making authority has demonstrated effective and on-going joint working with neighbouring authorities, the county council, prescribed bodies and other relevant bodies. Further, we agree that DDC has prepared and maintained SoCG documenting the cross-boundary matters being addressed in accordance with the Framework and the DtC may be discharged by the Planning Inspector under Section 20(5) (c) of the Planning and Compulsory Purchase Act 2004.

4.3.2 Without prejudice to the above, should ongoing work by DDC result in significant changes in circumstances such that the signed SoCGs may be amended or withdrawn, our client reserves the right to alter their consultation response accordingly and be present at the examination of the Plan to discuss further.

5 Housing Need

5.1 Context

5.1.1 Paragraph 11 of the NPPF is explicit in its requirement for strategic policy-making authorities to promote a sustainable pattern of development that seeks to meet the need in full.

5.1.2 Paragraph 20 of the Framework is equally clear that strategic policies should set out an overall strategy for the pattern, scale and design quality of places. Policies should make sufficient provision for the development that is required as well as associated infrastructure, community facilities and should set out a strategy for the conservation and enhancement of the natural, built and historic environment.

5.1.3 Given this national planning context, the emerging Local Plan should provide a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic environment.

5.1.4 National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate.

5.1.5 In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.

5.1.6 Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.

5.2 DDC's Housing Need

5.2.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover District of 596 dwellings per annum. However, the affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total housing need of 10,998 dwellings for the Plan period to 2040. We understand that the Regulation 19 Local Plan seeks to meet this need in full and in addition to the minimum figures, DDC have set an appropriate contingency buffer of 926 dwellings of the Plan period, equating to 8.4% of the total Plan period figure.

5.2.2 For context, the current adopted CS requirement is 700 dwellings per annum. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.

5.2.3 For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate sufficient land to accommodate a minimum of 6,642 new homes over the remaining plan period to 2040. It is understood that this will be derived from the following sources:

- Whitfield Urban Expansion Allocation: 2,200 dwellings

- Local Plan Allocations (excluding Whitfield): 3,392 dwellings

- Windfall Allowance (70 a year from year 4): 1,050 dwellings

5.2.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target. Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs AONB, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, meeting Dover's housing needs inevitably will require the release of significant greenfield land.

5.2.5 In our view, sustainable and accessible sites logically located adjacent to existing higher-order urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan Period, to deliver the significant number of new homes that are required and are most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the District.

6 Site Specific Assessment

6.1 Overview

6.1.1 The previous chapters of this representation (Chapter 3-5) outline our client's position relating to the soundness of the Plan in which our client is confirmed to be supportive of the Local Plan as a sound strategy for the growth of the district to 2040.

6.1.2 Paragraph 4.146 of the Local Plan states that the urban area of Deal encompasses the built-up areas of the parishes of Walmer and Sholden. Deal is identified in the Settlement Hierarchy and Confines Topic Paper (2022) as a 'District Centre', where there is a secondary focus for development. This position is reinforced by draft policy SP3 which states that development in Deal will be at a more limited scale than Dover Town, compatible with the more limited range of job opportunities, shops, services, and other facilities available in these locations.

6.1.3 As introduced in the preceding sections, Fernham Homes Limited are supporting the residential allocation of the Site 'Land at Rays Bottom, Walmer' and. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan with an indicative capacity of 75 dwellings under policy reference 'SAP15' (WAL002).

6.1.4 Appendix 1a of the Housing and Economic Land Availability Assessment (HELAA) 2022 provides the following summary:

- No heritage concerns other than archaeology.
- Site will need to reflect character of surrounding area – low density, generous landscaping, well designed.
- Potential site for executive homes.
- Risk of surface water flooding.
- Transport Assessment required.

6.1.5 The Site was considered 'Green' in the red/amber/green (RAG) rating in terms of suitability, availability and achievability, with an anticipated timescale for delivery in the medium term (2027-2031). The information contained in the summary could be addressed as part of any future planning application.

6.1.6 We agree that the Site represents a logical and sustainable location to direct the growth required within Deal and consider that the land promoted at Rays Bottom, Walmer must remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered to be wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040.

6.1.7 We are firmly of the view that the allocation of Land at Rays Bottom is a necessary component of the balanced growth strategy put forward within the Pre-submission

DDC Settlement hierarchy (2022): <https://www.doverdistrictlocalplan.co.uk/uploads/pdfs/settlement-hierarchy-and-confines-topic-paper-aug-2022.pdf>

Dover District Local Plan, comprising an appropriate mix of small, medium and strategic-scale sites deliverable across the Plan period. The allocation of well-located, reliable, greenfield sites such as our client's at Land at Rays Bottom is necessary in order for DDC to meet the growing need for new homes in the district and ensure that DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan.

6.1.8 Notwithstanding our client's support of the draft allocation within the Regulation 19 Plan in principle, we suggest that the policy text be re-visited prior to submission, to allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential. It is submitted that the SAP15 policy wording should be amended to more accurately reflect the capability of the Site to accommodate approximately 80 dwellings deliverable early in the Plan period. Further commentary on this point is provided below in section 6.3.

6.2 Site and Surroundings

6.2.1 The Site is situated to the south of Walmer, Deal between Liverpool Road to the east and Hawksdown to the west immediately adjacent to existing residential development.

6.2.2 The Site comprises an undeveloped regular parcel of land in arable use totalling approximately 4.43 hectares, forming part of a larger arable unit to the south. The Site is bound primarily by hedgerow vegetation to the east along Liverpool Road with dense woodland and mid-storey vegetation to the north. The west boundary comprises a mix of hedgerows and trees set along the perimeter abutting residential development on Hawksdown.

Figure 6.1: Approximate Site Location (courtesy of Google Earth)

6.2.3 The wider surroundings are characterised by its edge-of-settlement location with low density existing residential development along Hawksdown to the north and west and undeveloped agricultural land to the east and south. The landscape assessment which informed the HELAA recognises that the site is:

"...relatively discrete, having housing on two sides and being located on the side of a dry valley. The sensitivity of the site is moderate as views in are limited and the flow of housing down the slope would not detract. The impact of development on the wider landscape would be minimal and this could be reduced further by providing additional buffer of landscaping along the southern boundary".

6.2.4 The Site enjoys access to a number of day-to-day facilities and services which are within a reasonable walk distance, including primary and secondary schools, local shops, healthcare, employment, and public transport links within Walmer and Deal including Walmer mainline station and frequent buses along Dover Road between Dover, Deal, Sandwich and Canterbury.

6.2.5 In terms of overarching planning constraints, the site is not subject to any overarching landscape or ecological designations and is not itself subject to any heritage constraints.

6.2.6 To the north east of the site – with intervening land - is the grade II Registered Park and Garden of Walmer Castle which is a scheduled monument, and nearby to the east is an undesignated historic First World War Aerodrome and Second World War radar station within an area of Archaeological Potential.

6.2.7 There is a low risk of a surface water flow path through the non-wooded area of the site, and along the western boundary – both of which can be easily accommodated in a residential layout.

6.3 Development Capacity

6.3.1 As set out above, the proposed allocation is for 75 dwellings, reduced from 100 dwellings at the Regulation 18 stage. The reasoning set out in the "selection of Site Allocations" (September 2022) supporting document for the reduction in capacity is "To enable a scheme to come forward which reflects the character of the surrounding area, and enable sufficient landscaping to be provided". Excluding the wooded area to the north of the site, the provision of 75 dwellings would equate to a density of 21 dwellings per hectare, with 100 dwellings equating to 28 dwellings per hectare. For the reasons set out subsequently, we consider that sites located in sustainable locations such as Land at Rays Bottom, adjacent to Deal, should take opportunities to maximise the potential for housing – whilst respecting the context and character of the area. For this reason we consider that the appropriate capacity is a little greater at approximately 80 dwellings, as part of a high-quality, landscape-led residential scheme capable of delivery within the early phase of the Plan period.

6.3.2 At this early stage, detailed proposals have not yet been advanced, however it is anticipated that any future development of the site – at 80 dwellings - will be of appropriate density, reflecting local patterns of development and sensitively designed to respect the existing character of the area, the topography of the site and to allow transition to the rural landscape and respond to its coastal location.

6.3.3 Particular care will be taken with regard to the low-risk surface flow route, impact on nearby heritage assets and ecologically sensitive sites with a particular emphasis on opportunities for biodiversity habitat creation and enhancement. Fernham Homes have a strong track record of delivering high quality housing whilst respecting such characteristics and constraints.

6.3.4 In terms of access, primary vehicular, pedestrian and cycle access to the site shall be provided from Liverpool Road. Road widening and traffic management should be provided to Liverpool Road along the frontage of the site and where possible up to the junction with Gram's Road; along with an extension to the 30mph speed limit zone. Appendix 1 indicates how this can be achieved, with the provision of a footway and suitable carriage width which meets relevant highways requirements. Alternatively, the footway could not be provided, and instead a wider carriage way could be provided. Appendix 1 also clearly shows how the required visibility splays can be achieved on land either within the site, or within the public highway.

6.4 Draft Policy Allocation 'Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer' (SAP15)

6.4.1 As introduced in the preceding sections, our client's Site at Land at Rays Bottom is allocated for residential development within the Dover Pre-submission (Regulation 19) Local Plan. For ease of reference, the draft policy wording is as follows:

"SAP15 - Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002)

The site, Land at Rays Bottom between Liverpool Road and Hawksdown, as shown on the policies map is allocated for an indicative capacity of 75 dwellings.

Development proposals for the site shall include the following:

- a) Development should be low density and sensitively designed to respect the existing character of the area, the topography of the site and to allow transition to the rural landscape;
- b) A sensitive landscaping scheme and appropriate landscape buffer to the south, determined by a Landscape Visual Impact Assessment is required to mitigate the impact of development on the wider countryside and to provide opportunities for biodiversity habitat creation and enhancement responding to the nearby BOA and local wildlife site;
- c) The existing wooded area to the north of the site and the tree and shrub line along the western boundary, shall be maintained and enhanced as areas for biodiversity habitat creation.
- d) Primary vehicular, pedestrian and cycle access to the site shall be provided from Liverpool Road. Road widening and traffic management should be provided to Liverpool Road along the frontage of the site and where possible up to the junction with Gram's Road; along with an extension to the 30mph speed limit zone;
- e) The Transport Assessment that is required to be carried out in accordance with Policy TI2, must consider and identify mitigation (potential widening/traffic management measures/junction improvements) for the surrounding local road network, taking into account the cumulative impact of this and other sites allocated in this Plan, including (but not limited to) Liverpool Road and Gram's Road up to and including the Gram's Road/Dover Road junction.
- f) A site-specific Flood Risk Assessment must be carried out in accordance with Policy CC5. This shall also inform the application of the Sequential Approach to the layout of the site by locating the most vulnerable elements in the lowest risk areas;
- g) In accordance with Policy SP13, a wintering bird survey must be undertaken in advance of a planning application on the site. If the bird survey identifies that the development will exceed the threshold of significance, mitigation will be required. A suitable scheme of mitigation will need to be submitted with the planning application for the site;
- h) An Archaeological Assessment for the site must be carried out in accordance with Policy HE3 Archaeology, the results of which should inform the layout and design of the development which is necessary to avoid harm to any archaeological assets identified through the assessment;
- i) A Heritage Assessment carried out in accordance with Policy HE1 is required to identify any necessary measures to avoid or minimise harm to the nearby heritage assets; and
- j) The occupation of the development should be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider. Development should provide a connection to the sewerage system at the nearest point of adequate capacity and ensure future access to the existing sewerage infrastructure for maintenance and upsizing purposes."

6.4.2 To be clear, our client remains wholly supportive of the principle of the allocation of the Site for residential development. Fernham Homes has a strong track record of swift delivery, and commits to being able to deliver the Site within the early phase of the Plan period. We agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client's Site can be made – and therefore object to the capacity identified.

6.4.3 Accordingly, we say that the allocation of Land at Rays Bottom is necessary in order for DDC deliver proportionate and high-quality sustainable growth within Deal, meet the growing need for new homes in the district and ensure that DDC can have greater confidence in meeting its market and affordable housing targets in full.

6.4.4 It is submitted that the SAP15 policy wording is sound and appropriately reflects the capability of the site to deliver a sensitive, landscape-led residential development but the wording should be amended to reflect the capability of the Site to accommodate approximately 80 dwellings, deliverable with the early phase of the forthcoming Plan period.

6.4.5

6.5 Strategic Justification for Development

Spatial Strategy

6.5.1 The proposed Housing Distribution for the district across the Plan period is established within Policy SP3 'Housing Growth' which sets out that the distribution of housing growth in the district is primarily based on the settlement hierarchy and influenced by site availability, environmental constraints and factors of delivery.

6.5.2 Rightly, a key aim of the growth strategy is to focus development in the least sensitive areas of the district in order to conserve and enhance the Dover's rich natural and historical environment.

6.5.3 A retained theme from the adopted Plan, is that DDC's settlement strategy continues to focus on the development and regeneration of Dover Town and Whitfield (3381 dwellings). Approximately half of the district's planned housing is in this location, the majority of which again is to come forward as part of the strategic urban expansion of Whitfield 'SAP1' (2200 minimum dwellings).

6.5.4 Development will then be focused in the District Centre of Deal (223 dwellings), and the Rural Service Centres of Sandwich (227 dwellings) and Aylesham (649 dwellings). Following the settlement hierarchy rigidly would distribute housing in the preceding order, however the Plan recognises that housing delivery in Deal and Sandwich continues to be constrained by a number of factors including flood risk, ecological designations, heritage and highways. Further, Deal has experienced generally high levels of windfall development across the previous Plan period and accordingly there is now a dwindling supply of available, suitable sites in both settlements. On account of this context, DDC have sought to direct the majority of the remaining higher order settlement growth (outside of Dover & Whitfield) to Aylesham, through the strategic expansion to the town.

6.5.5 Outside of the four principal district settlements, the Rural Settlement Hierarchy (August 2022) identified that the majority of lower-order settlements in the district emerge as having a low level of facilities within the hierarchy and six settlements having none of the key indicators of sustainable services. Plainly, these settlements offer very limited opportunities for growth and it is evident that the forthcoming Plan will remain reliant on the settlements of Dover (including Whitfield), Deal, Sandwich and Aylesham to deliver the housing growth that is required.

6.5.6 Given this context, it is clear that where available and suitable opportunities for residential development do exist within the district's higher order settlements, including our client's Site at Land at Rays Bottom, Walmer which can provide a policy compliant level of much-needed affordable housing, it is imperative that the effective use of these sites are appropriately maximised in accordance with national policy objectives.

6.5.7 Notwithstanding our client's in principle support of the proposed strategy, we are concerned that highly sustainable, edge-of-settlement sites, particularly in higher tier settlements such as Deal have not been fully maximised to reflect their accessible location and capability to accommodate a greater quantum of development. On this basis, we are concerned that the strategic objectives underlying draft policy SP3 'Housing Growth' may not be fully realised, to the detriment of market and affordable housing delivery and the wider policies seeking to conserve and enhance the district's natural and historic environment.

6.5.8 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Deal (whilst ensuring that sensitive characteristics are reflected), and this has not been undertaken – for example at Rays Bottom, Liverpool Road. It is our view that the site has sufficient capacity to deliver approximately 5 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

6.5.9

Greenfield Development and Consistency with Housing Trajectory

6.5.10 Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs Area of Outstanding Natural Beauty, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, greenfield development will inevitably be required if DDC is to meet its housing and development commitments in full moving forward.

6.5.11 In our view, sustainable and accessible unconstrained sites logically located adjacent to existing urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan period, to support the role and timescales of strategic urban extensions and to deliver the significant number of new homes that are required within the forthcoming Plan period.

6.5.12 Within Deal itself, meaningful housing growth is inherently constrained on three sides due to the restrictive effect of the coast to the east and Flood Zone 2/3 land and ecologically sensitive sites including SSSIs to the north and west. Alongside overarching objectives to minimise the incursion of widespread development into the rural countryside, the scope for significant Plan-led development in Deal is becoming increasingly limited. Accordingly, we firmly agree that sites to the south of Deal, including that of our clients in Walmer, represent the least sensitive and most logical locations for future Plan-led growth, making effective use of the availability of sites in close proximity to the Urban Area and key infrastructure including Walmer train station.

6.5.13 In terms of housing delivery in Deal, the development of Land at Rays Bottom (75 dwellings) is anticipated to deliver completions with Years 9-11 of the Plan period, although as detailed above our clients have a strong track record of swift delivery, and consider that it could be delivered ahead of this. When combined with extant permissions within Deal and nearby allocations at Land off Cross Road, Deal (SAP14) and Deal Small Housing Sites (SAP16) totalling 100 dwellings and 48 dwellings respectively, our client's site will assist in delivering a steady supply of new homes within Deal across the majority of the early and middle phases of the Plan period and contribute to providing genuine choice in the market.

6.5.14 Moreover, in our experience, greenfield edge-of-settlement sites are typically most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that are urgently needed in the district.

6.5.15 The Sustainability Appraisal Scoping Report (2018) sets out that over the course of the adopted Plan period, the key sustainability issues facing Dover District in relation to housing are as follows:

Population growth, household growth and demographic change will place additional demand on key services and facilities such as housing, health, education and social care. The Local Plan offers a new opportunity to manage these pressures, encouraging mixed communities;

There is a need for affordable housing across the District. At present, the mean price of dwellings is higher than the national average. The Local Plan will help to expedite its delivery; and,

There is the need for a mix of housing types that cater for the needs of a range of people, including the growing number of single person and elderly households. Without an up-to date Local Plan, the required housing is less likely to be delivered.

6.5.16 It is evident that the new Dover Local Plan must allocate a mix of reliable sites capable of steadily delivering not only the quantum of housing that is required, but also the associated public infrastructure, affordable housing and a mix of unit types and tenures suitable for a wide range of future occupants.

6.5.17 The Housing Topic Paper (September 2022) provides further context and summarises under Chapter 7 'Historical Housing Delivery' that Dover has historically placed significant reliance on windfall development over the current adopted Plan period, with windfall sites accounting for 44% of all completed dwellings over the preceding 10-year period.

Figure 1: DDC Brownfield / Greenfield Completions 2010/11 to 2020/21
(source: Housing Topic Paper September 2022)

6.5.18 Moreover, it is highlighted that at the beginning of the 10 year period, the majority of new dwellings were being built on brownfield land. However, from the monitoring year 2013-14 onward development on greenfield land began to play a much greater part in the location for new development as show in figure 1 above. This trend of increased housing development on greenfield land is a result of the

allocations within the CS and Land Allocation DPD being built out and is associated with an approximate doubling of completions in the district. From 2013-14 onwards the average number of completed dwellings per annum has doubled to that of the early years of the CS, as the strong delivery rates of greenfield sites formed the predominant source of housing. This is despite an overall declining trend of brownfield completions towards the latter half of the Plan period. This is not an uncommon trend whereby in the majority of local planning authorities areas, opportunities for available and suitable sites in urban centres typically dwindle throughout the Plan period.

6.5.19 In light of the above context, it is clear that the adopted Dover Local Plan suffered from an initial under delivery of Plan-led housing growth in which windfall development sources were largely required to take up the slack in the early phases of the Plan period, as major allocated sites failed to deliver at the rates initially expected.

6.5.20 It is equally apparent that initial slow completions rates were quickly renewed once greenfield allocations commenced development, feeding into strong completions in the latter half of the Plan period. In our experience, greenfield sites are typically associated with stronger delivery rates and provide a reliable source of housing growth. The allocation of an appropriate mix of sites and scales is required in order to ensure steady and sustained Plan-led housing delivery across the Plan period and to avoid a reliance on windfall development to address the shortfall.

6.5.21 Consequently, given all of the above, it is imperative that the new Local Plan allocates a sufficient variety and scales of site capable of both ensuring steady and sustained housing completions and capable of making necessary contributions to public infrastructure and services, affordable housing and mix of unit types to address the key issue raised in the Sustainability Appraisal.

6.5.22 In our view, edge-of-settlement greenfield sites such as our client's Site Land at Rays Bottom, Walmer represents the most reliable and sustainable source of housing delivery for the Plan period. Such sites are typically less constrained by wider factors and less affected by unforeseen delays such as land contamination. Moreover, greenfield sites typically are more capable of delivering the policy compliant affordable housing, unit mix and developer contributions that are urgently needed.

6.5.23 It is understood that the Plan is predicated on the delivery of strategic scale development at Whitfield comprising the development of circa 2,200 new homes. Consequently, in order to avoid a repetition of the previous Plan, DDC have sought to ensure that a pool of reliable greenfield allocation, including that of our client's are included within the Plan, capable of delivering the early and middle phase growth that is required within the housing trajectory prior to the commencement of stronger delivery from major allocations later in the Plan period.

6.5.24 We note that within the Housing Trajectory 'Appendix D', DDC have included allocated units from Years 4 onwards, with extant permissions (accounting for 5% non-implementation) demonstrated to be solely capable of delivering the growth required in Years 1-3. Notwithstanding our client's considerations that it can deliver at Land at Rays Bottom early in the plan period, we support this pragmatic approach and suggest this represents a sound basis on which to set the district's housing trajectory. We note also the inclusion of an appropriate windfall allowance and the included contingency buffer to further ensure reasonable flexibility in the housing supply.

6.5.25 On account of all of the above, we submit that the allocation of Land at Rays Bottom, Walmer forms part of a sound strategy for growth in the district for the forthcoming Plan period. The Site is capable of delivery within the early phase of the Plan period. The Site represents a reliable source of housing growth in a highly sustainable and accessible location adjacent to the existing settlement boundary of Deal and Walmer mainline station, consistent with DDC's preferred settlement strategy. Proposals remain at an early stage, however the Site is unconstrained and is considered capable of providing a high-quality landscape-led residential development including a mix of unit types and tenures, a meaningful contribution to the supply of affordable housing and contributions to public services and infrastructure, benefiting both existing residents and future occupiers. However, we object on the submission that the Site is capable of making a greater contribution to the district's housing need and suggest an amended wording of the policy to allocate the Site for approximately 80 dwellings.

Policy SP4 'Windfall Development'

6.5.26 Separately, we note the provisions of policy SP4 windfall development. Proposals at Rays Bottom, Walmer would likely be acceptable in principle under this policy and we support the inclusion within the Plan for appropriate, proportionate windfall development.

6.5.27 Our client is fully committed to the delivery of the Site which is available and anticipated for delivery in the early phase of the Plan period. Notwithstanding the provisions of SP4, it is reiterated that our client fully supports the allocation of the Site under SAP15 as the most appropriate mechanism for delivery of the Site and the opportunity for genuinely Plan-led development in Deal, the provision of associated benefits to public services and infrastructure, contribution to affordable housing supply and the delivering of a mix of house types and tenures.

Infrastructure Delivery

6.5.28 Paragraph 11 of the Framework is clear that all plans should promote a sustainable pattern of development. This includes aligning growth and infrastructure. Paragraph 20 goes on to confirm that strategic polices will be expected to make sufficient provision for associated development infrastructure.

6.5.29 In this regard, draft policies SP11 'Infrastructure and Developer Contributions' and SP12 'Strategic Transport Infrastructure' of the emerging Plan form the key strategic polices for infrastructure delivery. We agree that where development would create a need, or would have an impact, or would exacerbate an existing deficiency in infrastructure provision, appropriate developer contributions may be sought.

6.5.30 It is however emphasised that in all developments, infrastructure requirements must be demonstrated to be necessary through assessment during determination of the application on a case-by-case basis. Where new development is proposed, it does not automatically follow that major infrastructure contributions are always required or contribution to strategic infrastructure proposals are appropriate. For instance, it is our client's view that any infrastructure requirements must be demonstrated through a robust and transparent assessment at application stage, taking into account the submission of detailed supporting evidence, for example following consideration of the Transport Assessment in the case of highway infrastructure contributions.

Alignment with Sustainability Appraisal Findings

6.5.31 As part of the preparation of the Local Plan, the Council has identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA) which provides an assessment of how different options perform in environmental, social and economic terms, to help inform which option should be taken forward and combined with wider evidence documents, have been used to determine the growth and spatial strategy set out in the Plan.

6.5.32 Five potential distributions of growth were identified during preparation of the draft Regulation 18 Local Plan:

- **Spatial Option A: Distributing growth to the District's suitable and potentially suitable housing and employment site options (as needed to deliver the scale of growth required).**
- **Spatial Option B: Distributing growth proportionately amongst the District's existing settlements based on their population.**
- **Spatial Option C: Distributing growth proportionately amongst the District's existing settlements based on the District's defined settlement hierarchy.**
- **Spatial Option D: Distributing growth in the same way as the adopted Local Plan, focussing most growth in and around Dover town.**
- **Spatial Option E: Distributing growth more equally across the District's settlements: Dover, Deal, Sandwich and Aylesham, as well as the rural villages.**

6.5.33 The conclusion of the SA was that Spatial Options C (settlement hierarchy) and D (adopted Core Strategy with Dover focus) generally perform the most strongly against the SA objectives, particularly when delivering the baseline growth scenario. However, given the environmental constraints that exist around Deal and Sandwich, very few suitable and potentially suitable sites have been identified in these towns. Given this, the Council's preferred option for the distribution of housing and economic growth comprises a combination of options A (HELAA sites), C (settlement hierarchy) and D (Dover focus). The distribution of housing and economic growth in the District is therefore primarily based on the settlement hierarchy, and influenced by site availability, environmental constraints and factors of delivery.

6.5.34 On account of the above, our client agrees that the proposed growth strategy, and by extension, policy SP3 in principle represents a sound and evidence-led strategy for growth. However, given the clear acknowledgement of the dwindling supply of available sites in the higher order settlements of Deal and Sandwich, which has necessitated a minor deviation from the strongest performing spatial options, we submit that where sites are available and suitable for development in Deal and Sandwich, these must be fully maximised, reflecting their accessible location and their ability to reduce the need to develop into less accessible and more sensitive sites elsewhere in the district to accommodate the growth that is required.

Site Specific Sustainability Appraisal

6.5.35 Land at Rays Bottom between Liverpool Road and Hawksdown is included under HELAA reference 'WAL002' within the SA Site Assessment (Appendix F). The site generally performs strongly, with particular positives identified with regards to SA Objectives related to housing and the economy.

6.5.36 We contest the assessment of 'minor negative' in regard to sustainable transport. To the contrary, the site is well-located adjacent to the settlement boundary of Deal with access to a range of high-quality day-to-day services and access to Walmer train station for convenient access to larger settlements. In what is otherwise a largely rural district, we strongly disagree with the suggestion that an edge-of-settlement site represents a less than preferable location in respect of sustainable travel and day-to-day access to amenities.

6.5.37 We also note negatives associated with the development of a greenfield site, including loss of agricultural land, however this would be true of the majority of greenfield sites and it is abundantly clear that Dover's housing need cannot be met solely on brownfield sites. We note also minor negatives / uncertain associated with biodiversity, the historic environment and landscape, however it is not clear whether these take into account the potential for high-quality design, biodiversity enhancement and landscape mitigation. Irrespective, these are not considered to outweigh the clear and tangible sustainability benefits associated with edge-of-settlement development, the site's consistency with the preferred

spatial options and the wider benefits associated with reducing the need to develop into lesser accessible, more sensitive sites to otherwise deliver the housing growth that is required.

Summary

6.5.38 Taking all of the above into consideration, our client is wholly supportive of the inclusion of land promoted at Rays Bottom, Walmer as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040.

6.6 Deliverability

6.6.1 Prior to the current appeal proposal, the Site has had no recent planning history of a residential nature or a history of unimplemented permissions. There are not considered to be any impediments to the Site being allocated for development commencing within the early (or mid) phase of the Plan period.

6.6.2 Fernham Homes – a local SME with a strong history and track record of delivery, together with an adopted and robust business plan for growth – is promoting the site, and are poised to commence work on its residential development promptly after the adoption of the Local Plan.

6.6.3 Combined with the delivery of extant permissions, an appropriate number and scale of wider allocations within Deal (including SAP 14 and SAP 16) and elsewhere across the district, this would ensure the steady delivery of housing both in Deal and in Dover district across the majority of the Plan period and support the role and timescales of strategic housing delivery at Whitfield towards the latter half of the Plan period.

6.6.4 For the reasons set out in this representation, the Site is considered suitable for the residential development of approximately 80 dwellings. The Site is adjacent to the overarching urban area of Deal, one of the four higher order settlements in the district and DDC's preferred locations for Plan-led growth within the district. Development at land at Rays Bottom would form a natural and logical development south of Walmer, Deal with excellent accessibility to day-to-day services and amenities via active travel modes within Deal itself and convenient access to public transport infrastructure including Walmer train station for onward travel to key neighbouring settlements including Dover, Ramsgate, Canterbury and Ashford.

6.6.5 Finally, in respect of suitability there are no physical limitations or problems such as access, infrastructure, flood risk, hazardous risks, pollution or contamination.

6.6.6 On behalf of the landowner, we submit that there are no known financial restrictions that would impact upon the viability of a future housing scheme or that would prohibit development coming forward within the mid-stages of the Plan period. To the contrary, we consider there to be an opportunity to deliver a high-quality, sustainably located residential development scheme consistent with DDC's proposed growth strategy comprising an appropriate mix of market and affordable housing and capable of contributing to a range of community facilities, public infrastructure and services locally.

6.6.7 At the time of writing, proposals at Rays Bottom, Walmer remain at an early stage, however our clients are firmly committed to progressing the delivery of the Site on adoption of the Plan. The project team therefore does not anticipate any absolute constraints to the commencement of delivery on-site early in the plan period (potentially 2025-26) and completion by 2028/9).

6.6.8 The Site is in single ownership and there are no complicated legal agreements or covenants that would prohibit the ability to bring forward the Site in line with DDC's housing trajectory within the mid-phase of the Plan period. The Site is therefore considered available and achievable for the purposes of the tests of deliverability.

7 Conclusion

7.1 Summary

7.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited in response to the DDC Local Plan (Regulation 19) consultation which runs until 9th December 2022.

7.1.2 Our client is promoting 'Land at Rays Bottom, Walmer, Deal' for the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan within an indicative capacity of 75 dwellings under policy reference 'SAP15'.

7.1.3 Taking the above representation contents into consideration, we remain wholly supportive of the principle of the allocation of Land at Rays Bottom and agree that the Site represents a logical and sustainable location to direct necessary growth within Deal.

7.1.4 Accordingly, we consider that the land promoted at Rays Bottom, Walmer must remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered to be wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040. However, it is imperative that the effective use of these higher-order settlement sites are appropriately maximised in accordance with draft policy SP3 of the emerging Plan, and wider policies seeking

to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and object solely on this basis.

7.1.5 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Deal, and this has not been undertaken – for example at Land at Rays Bottom, where it is considered that the site has sufficient capacity to deliver approximately 5 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

7.1.6 Outside of the point regarding capacity, it is submitted that the SAP15 policy wording is sound and appropriately reflects the capability of the site to deliver a sensitive, landscape-led residential development with an indicative capacity of 80 dwellings, deliverable with the early phase of the forthcoming Plan period. Without prejudice to our client's support in principle of the proposed allocation, we would urge the Council to re-visit the allocation policy text and allow a higher dwelling capacity.

7.1.7 Accordingly, we say that the allocation of Land at Rays Bottom forms part of a balanced growth strategy comprising an appropriate mix of small, medium and strategic-scale sites deliverable across the Plan period. The allocation of well-located, reliable, greenfield sites such as our client's at Land at Rays Bottom is necessary in order for DDC to meet the growing need for new homes in the district and ensure that DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan.

7.1.8 In addition to being a highly sustainable and logical edge-of-settlement allocation, the Site is deliverable in a single land ownership with no viability issues, legal or third-party constraints present. Our client is fully committed to the delivery of land at Rays Bottom Farm and there are no impediments to the Site being capable of delivery within the mid-phase of the Plan period.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

For the reasons set out in the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359), the capacity of Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002) and Policy SP3 - Housing Growth should be increased to approximately 80 dwellings.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please refer to the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359).

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Representation submitted by Hume Planning. Full Representation attached to SDLP1522. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1522.) SP3: Housing Growth Whilst we welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period, it is considered additional sites if suitable and available should be included within the Plan. A large proportion of growth is being directed towards the expansion of Dover/Whitfield (over 2,000), and a large proportion to land to the south of Aylesham (640). Large strategic sites delivery rates can easily slow down during the plan period and under-deliver. Whilst there is a buffer within the Plan, it is considered appropriate not use this as a limit and allocate other suitable sites in sustainable locations where available. As detailed above, the employment site at Ratling Road, is considered suitable for residential development. It is also available and can be delivered within the short to medium term, and in our view this site should be allocated within the Plan.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1606.) SP3: Housing Growth We welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period. Within the Policy, reference is made to the Council's overall spatial strategy i.e. the majority of growth will be focused towards the principal town, Dover, and the expansion/planned new settlement at Whitfield. It is appropriate that smaller settlements in the district, i.e. the larger and smaller villages, receive some growth to sustain their role in the settlement hierarchy over the plan period.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We consider that the plan is sound, but object to elements of Policy SAP22 - Land at Archers Low Farm, St Georges Road Sandwich (SAN023) and Policy SP3 - Housing Growth. These objections are set out in the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245).</p> <p>1 Introduction</p> <p>1.1 Purpose of this Representation</p> <p>1.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited and Walker Residential Limited in response to the Dover District Council 'DDC' Local Plan (Regulation 19) consultation which runs until 9th December 2022.</p> <p>1.1.2 We understand that DDC is in the process of preparing a new Local Plan to set out a strategy for development for the period to 2040 and that the Council are presently seeking comments on the pre-submission Plan prior to its submission for examination in early 2023.</p> <p>1.1.3 Our client controls 'Land at Archers Low Farm, Sandown Road, St Georges Road, Sandwich' (hereafter referred to as 'Land at Archers Low' or 'the Site') and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.</p>

1.1.4 It is highlighted that as part of the Regulation 18 Local Plan, the Site was allocated under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' for approximately 40 dwellings (reference SAN023).

1.1.5 The purpose of the representation is to support the allocation of 'Land at Archers Low' for a greater quantum of development and provide comment on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan, but to object to the indicative capacity set out in the policy.

1.1.6 In this regard, we remain wholly supportive of the principle of the residential allocation of the Site and agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client's Site can be made – and object (solely) to this element of the policy.

1.1.7 Accordingly, we say that Land at Archers Low can further assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.

1.1.8 Based on the current national and local planning context, we consider the Site to be a highly suitable edge-of-settlement location to allocate land for housing to help meet the need for new homes in the district and its effective use should be appropriately maximised in accordance with national policy objectives.

1.1.9 Further details regarding the Site and commentary on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan are set out in the following sections of this document.

1.2 About Fernham Homes

1.2.1 Fernham Homes Limited are a local award winning small and medium sized (SME) housebuilder, established in 1997 and has a strong track record of delivering high quality residential and mixed use developments in Kent over the last 25 years. This has been acknowledged through the receipt of nationally recognised awards, including the gold Evening Standard Awards best family home 2022 and 2019 bronze WhatHouse Best Small Housebuilder.

1.2.2 SME housebuilders are recognised in the National Planning Policy Framework ('NPPF') at paragraph 69 as making an important contribution to meeting the housing requirements of an area, and being able to build out relatively quickly. Similarly, this has also been recognised by the Planning Inspectorate. This is particularly the case with Fernham Homes, which is privately owned with access to significant resources. This provides significantly more flexibility than national and other regional housebuilders, and allows Fernham Homes to deliver housing rapidly and to a high quality, beautiful and sustainable standard (para 126 of the NPPF).

1.2.3 Fernham Homes Limited has embarked on a sustained period of growth, with an adopted and robust business plan to deliver around 300 houses per year in five years time.

1.2.4 A key element of Fernham Homes' operations is to take a very careful approach to site selection: a huge amount of due diligence is undertaken as part of this, and therefore Fernham Homes Limited only invests in those sites which meet the NPPF requirements of being available, suitable, and deliverable. As set out below land at Archers Low Farm, Sandwich ('SAP22') is firmly considered to be such a site.

1.2.5 Similarly, a key feature of Fernham Homes' approach is to work positively and proactively with local planning authorities (LPAs), both during the preparation of local plans and at planning application stage. Fernham Homes Limited are fully committed to engaging with Dover District Council in the preparation of its Local Plan, and firmly subscribe to the national policy approach set out in paragraphs 15 and 16 c) of the NPPF that "the planning system should be genuinely plan-led" and should be shaped by early, proportionate and effective engagement between LPAs and others, including businesses and developers. Accordingly, Fernham Homes Limited would welcome the opportunity to discuss the matters contained in this representation, including the availability, suitability, deliverability and capacity of land at Archers Low Farm, Sandwich ('SAP22') directly with Dover District Council members and officers, ahead of the submission of the Local Plan for examination.

1.3 Representation Structure

1.3.1 The representation structure is outlined below for ease of reference:

Chapter 2 (Consultation Background) – Sets out the context of the Dover District new Local Plan preparation, relevant national planning requirements and a summary of our current position.

Please refer to paragraph 52 of appeal decisions: APP/M2270/W/21/3283924 and APP/M2270/W/21/3288645

Chapter 3 (Legal Tests of Soundness) - Assessing whether the plan is sound, having regard to the tests of soundness outlined by paragraph 35 of the NPPF.

Chapter 4 (Duty to Co-operate) - Assessing whether the plan is sound, having regard to the duty to cooperate outlined by paragraph 24 of the NPPF.

Chapter 5 (Housing Need) - Consideration of market and affordable housing need and assessment of proposed housing allocations and supply sources.

Chapter 6 (Assessment of Suitability) - Re-introduces our client's Site and provides a summary of planning constraints and opportunities, including the quantum of development that could be accommodated, why the Site is suitable for development and why the principle of the draft allocation for residential development is both justified and consistent with the Council's strategy for growth in the district. It also sets out why we consider there is scope for a higher number of dwellings at the site. This consideration amounts to an objection to one element of the strategy – namely that those sites around the most sustainable settlements should be maximised.

Chapter 7 (Conclusion) - Summarises the key points raised throughout the representation and re-affirms our client's support for the principle of the Site's allocation and the principle of the proposed strategy ahead of the submission of the Plan for examination, and the objections in terms of capacity.

2 Dover District Council – Draft for Submission Local Plan (Regulation 19)

2.1 Consultation Background

2.1.1 DDC are required to prepare a new Local Plan, as the current suite of development plan documents were adopted in 2002, 2010 and 2015. The Core Strategy (CS) (adopted 2010) in particular has a time horizon up to 2026 and requires updating.

2.1.2 The new Local Plan will set out the vision, strategic objectives and overarching development strategy for the growth of the District over the period to 2040. It provides the planning policy framework to guide the future development of the area, addressing needs and opportunities for housing, the economy, community facilities and infrastructure, as well as the basis for conserving and enhancing the natural and historic environments, mitigating and adapting to climate change, and achieving well designed places.

2.1.3 For the avoidance of doubt, the new Local Plan, on adoption, will replace the CS 2010 and the Land Allocations Plan 2015, as well as saved policies from the 2002 Local Plan.

2.1.4 DDC's Regulation 19 Local Plan outlines the key issues that need to be addressed between now and 2040. In particular, the Plan sets out the following key planning issues for the District:

- Ensuring that new development in the District contributes to the mitigation of, and adaptation to, climate change.
- Supporting the Council to deliver its intention to be a carbon neutral district by 2050.
- Managing flood risk and coastal change.
- Ensuring that a sufficient amount and variety of land is identified to deliver a continuous supply of housing across the Plan period and that the Council maintains a five-year housing land supply.
- Delivering growth in a way that focuses development in the least sensitive areas of the District in order to conserve and enhance the District's rich natural and historic environments.
- Supporting sustainable development in rural areas to enhance the vitality of rural communities.
- Working with partners to facilitate the delivery of the Whitfield Urban Expansion.
- Ensuring a range of housing tenures, types and sizes are provided across the District to meet the needs of the local community and provide choice and flexibility in the housing market.
- Promoting economic growth, tourism, and investment in the District's Town Centres in line with the Council's Economic Growth Strategy.
- To address the impact of the COVID-19 pandemic.
- Delivering strategic transport improvements, including upgrades to the Duke of York and Whitfield roundabouts to support the scale of housing and economic growth identified in the Plan.
- Promoting sustainable transport initiatives to encourage a modal shift to more sustainable forms of transport like walking and cycling.
- Ensuring that infrastructure is delivered, in the right place, at the right time, to meet the needs of the District and support the levels of development identified in the Local Plan.
- Supporting the delivery of attractive, high-quality, design led developments and the creation of healthy, inclusive and safe communities, that are well served by good quality services and facilities to support people's lives.
- Conserving and enhancing the District's rich and diverse natural landscape, including the five international sites within the district, the Kent Downs Area of Outstanding Natural Beauty (AONB), five Sites of Special Scientific Interest (SSSIs), two National Nature Reserves (NNRs), two stretches of Heritage Coasts and two Marine Conservation Zones.
- Delivering a net gain in biodiversity in the District over the plan period.

- To promote the conservation, restoration and where appropriate the enhancement of the District's heritage assets, in order to protect their significance and to ensure that they can be best appreciated and enjoyed by current and future generations.

2.1.5 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. This submission will comment on each of the above, highlighting where we believe any areas of concern lie or where modifications may be required.

2.2 DDC's Local Development Scheme

2.2.1 The District Council has a duty to review the policies contained within the development plan every five years. The 2014/2015 Authority Monitoring Report signalled the need to review key parts of the Council's adopted CS evidence base.

2.2.2 The Council's Local Development Scheme (LDS) first outlined the delivery timetable for the Local Plan Review (LPR) in the March 2017 publication. Since then, the LDS has been updated on an annual basis. The most recent September 2022 LDS summarises that following the preparation of the principal evidence base documents, the Local Plan Review Regulation 18 consultation took place for 8 weeks in January 2021. The Regulation 19 consultation was scheduled for 7 weeks during Q4 of 2022 and is the subject of this representation.

2.2.3 Moving forward, submission of the Plan is anticipated in Q1-2 2023 with the Examination in Public in Q3-4 2023. The new Local Plan is currently scheduled for adoption in 2024.

2.2.4 As planned, DDC are now undertaking the Regulation 19 Draft Local Plan Consultation, for which this submission is made

3 Legal Test of Soundness

3.1 Legislation and Guidance

3.1.1 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. It is a statutory requirement that every development plan document must be submitted for independent examination to assess when it is "sound", as well as whether other statutory requirements have been satisfied (s.20(5) of the 2004 Act). By s.19 of the 2004 Act, in preparing a development plan document a local planning authority must have regard to several matters including national policies and advice contained in guidance issued by the Secretary of State. Such guidance currently exists in the form of the NPPF and is summarised below. This states that Plans must be:

(a) Positively Prepared: based on a strategy which seeks to meet objectively assessed development and infrastructure requirements

3.1.2 This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The NPPF set out principles through which the Government expects sustainable development can be achieved.

(b) Justified: an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence

3.1.3 This sets out the requirement that the Local Plan should be based on a robust and credible evidence base involving:

I. Research/fact finding: the choices made in the plan are backed up by facts.

II. Evidence of participation of the local community and others having a stake in the area.

3.1.4 The Local Plan should demonstrate an appropriate strategy, taking into account reasonable alternatives and based on proportionate evidence. These alternatives should be realistic and subject to sustainability appraisal. The Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.

(c) Effective: deliverable over its period based on effective joint working on cross-boundary strategic priorities

3.1.5 This makes clear that the Local Plan should be deliverable, requiring evidence of:

- Sound infrastructure delivery planning;
- Having no regulatory or national planning barriers to delivery;
- Delivery partners who are signed up to it; and
- Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.
- The new Local Plan should be flexible and able to be monitored.

3.1.6 The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the Local Plan should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.

d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national policy.

3.1.7 This submission comments on each of the above in further detailing, highlighting areas of support and where modifications are required as appropriate.

3.2 Legal Compliance

3.2.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

3.2.2 In addition to the above, the NPPF states² that: "Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that:

- a) all plans should promote a sustainable pattern of development that seeks to: meet the development needs of their area; align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects;
- b) Strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:
 - (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or

Paragraph 11, NPPF 2021

(ii) Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole."

3.2.3 In addition, to the above, the NPPF states³ that Plans should:

- a) be prepared with the objective of contributing to the achievement of sustainable development;
- b) be prepared positively, in a way that is aspirational but deliverable;
- c) be shaped by early, proportionate and effective engagement between plan- makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;
- d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;
- e) be accessible through the use of digital tools to assist public involvement and policy presentation; and
- f) serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).

3.2.4 It is important to note that the NPPF⁴ requires strategic policies to set out an overall strategy for the pattern, scale, and design quality of places, and make sufficient provision for:

- a) housing (including affordable housing), employment, retail, leisure and other commercial development;
- b) infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat);
- c) community facilities (such as health, education and cultural infrastructure); and;
- d) conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation.

3.2.5 It is clear from the above, that any local plan should set out a comprehensive and cohesive approach to future development.

Paragraph 16, NPPF 2021

Paragraph 20, NPPF 2021

4 Duty to Co-Operate

4.1 Legal and NPPF Requirements

4.1.1 Section 33A of the Planning and Compulsory Purchase Act 2004 sets out a statutory 'Duty to Cooperate' (DtC) – i.e. a legal obligation - to all bodies as prescribed by Regulation 4 of the Town and Country Planning (Local Planning) England Regulations 2012 (the Regulations).

4.1.2 The duty requires DDC to cooperate with other persons to 'maximise the effectiveness' with which named activities are undertaken. Those activities include the preparation of development plan documents (such as this Local Plan document) and activities that support that activity 'so far as relating to a strategic matter'.

4.1.3 A strategic matter is defined by S33A(4) in summary as: (a) 'sustainable development or use of land that has or would have a significant impact on at least two planning areas' (a planning area in this case is the area of a borough or district council); and (b) 'sustainable development or use of land in a two tier area' (as this is) 'if the development or use (i) is a county matter, or (ii) has or would have a significant impact on a county matter'. County matters broadly relate to minerals and waste and associated developments as defined by Paragraph 1 of schedule 1 to the Town and Country Planning Act 1990 (as amended).

4.1.4 Section 33A (7) requires DDC (and persons subject to the DtC) to have regard to any guidance issued by the Secretary of State about how the duty is to be complied with. In that regard Paragraph ID 9-004-29140306 of the Government's Planning Practice Guidance (PPG) confirms amongst other things that the DtC is not a duty to agree (albeit that local planning authorities should make every effort to secure the necessary cooperation on strategic cross border matters before they submit local plans for examination).

4.1.5 The NPPF establishes that effective and on-going joint working is an integral part of the plan making process that will, amongst other things, determine whether development needs that cannot be met wholly within a plan can be met elsewhere. The NPPF goes on to state at paragraph 27 that in order to demonstrate effective and on-going joint working strategic policy making authorities should: "... prepare and maintain one or more statements of common ground documenting the cross-boundary matters being addressed".

4.1.6 In addition to the District's own housing pressures, part of the DtC involves considering whether neighbouring authorities' unmet housing need can be accommodated. It is worth highlighting that recent amendments to the London Plan have identified that the City's housing need has become increasingly more difficult to deliver and therefore areas outside London will be faced with having to absorb more of London's housing need. Consequently, DDC has a duty to explore whether it can accommodate some of this overspill of London's unmet need.

4.2 Assessment of DDC's discharging of the Duty to Co-operate

4.2.1 It is recognised that work to discharge the DtC remains ongoing by DDC and will continue prior to submission as part of the preparation of the Local Plan evidence base.

4.2.2 Notwithstanding the above, at this stage it is understood that DDC have engaged with the members of the East Kent Regeneration Board including neighbouring East Kent planning authorities, Kent County Council (KCC) and its subsidiary departments:

- Folkestone and Hythe District Council
- Canterbury City Council
- Thanet District Council
- KCC
 - KCC Highways & Transportation
 - KCC Minerals & Waste
 - KCC Heritage Conservation
 - KCC Flood & Water Management
 - KCC Natural Environment & Coast
 - KCC Infrastructure including Education

4.2.3 In February 2016, the Council adopted a Memorandum of Understanding (MOU) in respect of the DtC between the East Kent Regeneration Board members. A review of the MOU took place and was agreed in January 2021.

4.2.4 The East Kent MOU sets out the framework in which the authorities will work together on strategic issues and will actively engage. It forms the overarching framework and context within which Statements of Common Ground (SoCG) will be agreed between individual authorities.

4.2.5 Further engagement is also confirmed to have taken place between the following prescribed bodies and other relevant bodies:

- Environment Agency
- National Highways
- Historic England
- Natural England
- Network Rail
- NHS Kent and Medway Clinical Commissioning Group (CCG) – now known as Integrated Care Board (ICB) since July 2022
- Kent Downs AONB Unit
- Other infrastructure providers

4.2.6 Whilst work remains ongoing, at this stage it is understood that SoCGs have been agreed and signed between the following parties:

DDC and Folkestone & Hythe District Council

DDC and Canterbury City Council

DDC and Thanet District Council

DDC and Kent County Council

Dover District Council and National Highways

4.2.7 As part of the DtC Evidence Base documents, DDC prepared a detailed DtC Statement (dated September 2022) which sets out a summary of the engagement that has taken place, firstly by organisation, and then by issue. Whilst the statement focuses on strategic issues and duty to co-operate bodies it also includes information relating to engagement on non-strategic issues and co-operation with other bodies that are not prescribed by the regulations. In addition, Appendices 1, 3 and 4 identify the main meetings and other correspondence that has taken place throughout the plan making process.

4.3 Summary

4.3.1 On account of the above and the documents published within the Council's Local Plan Evidence Base, we are satisfied that the Council as the strategic policy making authority has demonstrated effective and on-going joint working with neighbouring authorities, the county council, prescribed bodies and other relevant bodies. Further, we agree that DDC has prepared and maintained SoCG documenting the cross-boundary matters being addressed in accordance with the Framework and the DtC may be discharged by the Planning Inspector under Section 20(5) (c) of the Planning and Compulsory Purchase Act 2004.

4.3.2 Without prejudice to the above, should ongoing work by the Council result in significant changes in circumstances such that the signed SoCGs may be amended or withdrawn, our client reserves the right to alter their consultation response accordingly and be present at the examination of the Plan to discuss further.

5 Housing Need

5.1 Context

5.1.1 Paragraph 11 of the NPPF is explicit in its requirement for strategic policy-making authorities to promote a sustainable pattern of development that seeks to meet the need in full.

5.1.2 Paragraph 20 of the Framework is equally clear that strategic policies should set out an overall strategy for the pattern, scale and design quality of places. Policies should make sufficient provision for the development that is required as well as associated infrastructure, community facilities and should set out a strategy for the conservation and enhancement of the natural, built and historic environment.

5.1.3 Given this national planning context, the emerging Local Plan should provide a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic environment.

5.1.4 National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate.

5.1.5 In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.

5.1.6 Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.

5.2 DDC's Housing Need

5.2.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover District of 596 dwellings per annum. However, the affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total housing need of 10,998 dwellings for the Plan period to 2040. We understand that the Regulation 19 Local Plan seeks to meet this need in full and in addition to the minimum figures, DDC have set an appropriate contingency buffer of 926 dwellings of the Plan period, equating to 8.4% of the total Plan period figure.

5.2.2 For context, the current adopted CS requirement is 700 dwellings per annum. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.

5.2.3 For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate sufficient land to accommodate a minimum of 6,642 new homes over the remaining plan period to 2040. It is understood that this will be derived from the following sources:

- Whitfield Urban Expansion Allocation: 2,200 dwellings

- Local Plan Allocations (excluding Whitfield): 3,392 dwellings

- Windfall Allowance (70 a year from year 4): 1,050 dwellings

5.2.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target. Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs AONB, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, meeting Dover's housing needs inevitably will require the release of significant greenfield land.

5.2.5 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Sandwich, represent the most sustainable and reliable sources of growth for the Plan period, consistent with the overarching strategic objectives of draft policy SP3 within the emerging Plan. Such sites are best placed to deliver the significant number of new homes that are required and are most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the District as well as further balancing the role of strategic-scale development at Whitfield within the emerging Plan's proposed growth pattern.

6 Site Specific Assessment

6.1 Overview

6.1.1 The previous chapters of this representation (Chapter 3-5) outline our client's position relating to the soundness of the Plan in which our client is confirmed to be supportive in principle of the Local Plan as a sound strategy for the growth of the district to 2040. It is clear that Sandwich must continue to form a principal location for focusing sustainable housing delivery in Dover district and will assist in ensuring an appropriate balance of sites are identified, capable of supporting the strategic role of Whitfield within the forthcoming Plan Period.

6.1.2 As introduced in the preceding sections, Fernham Homes Limited and Walker Residential Limited control 'Land at Archers Low, Sandwich' and are continuing to promote the residential allocation of the Site. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.

6.1.3 As aforementioned, the Site was allocated in the Regulation 18 Local Plan for approximately 40 dwellings under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' (reference SAN023).

6.1.4 Notwithstanding our client's support of the draft allocation within the Regulation 19 Plan in principle, we suggest that the policy text be re-visited prior to submission, to allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential. It is submitted that the SAP22 policy wording should be amended to more accurately reflect the capability of the Site to accommodate approximately 40 - 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.

6.1.5 Fernham Homes Limited and Walker Residential Limited are fully committed to the delivery of the Site within the next five years, and subject to a grant of planning permission in Spring 2023 – please see below – anticipate starting developing on site in 2023. Indeed, for the avoidance of doubt it is confirmed that Fernham Homes Limited and Walker Residential Limited have previously submitted a planning application ('ref: 22/00274') for the residential development of the Site for 44no. dwellings with associated access, parking, open space, landscaping, drainage, and infrastructure. (Amended plans and details).

6.1.6 Following a positive recommendation to grant planning permission by Officers at the DDC Planning Committee, the application was refused following consideration at Planning Committee on 31st March 2022. The application is now the subject of an appeal with a date confirmed for a two day hearing on the 17th - 18th January 2023. The site layout is shown in Figure 6.2.

6.1.7 For the avoidance of doubt, our client's support of the proposed allocation, subject to their objection to the capacity and considerations that it can accommodate an increased capacity of approximately 40 – 45 dwellings, is made without prejudice to the ongoing appeal. Should the appeal be allowed, this would realise the delivery of the residential allocation in accordance with the policy requirement (albeit more dwellings), which is consistent in its key elements with the submitted appeal scheme.

6.2 Site and Surroundings

6.2.1 The Site is situated to the southeast of St. George's Road and southwest of Sandown Road, on the southern edge of Sandwich.

6.2.2 The Site is a predominately undeveloped parcel of land totalling approximately 2.37 hectares, with tall and dense hedge and tree planting around the perimeter of the Site and an existing agricultural access point off St Georges Road to the north-west of the Site

6.2.3 The Site comprises a level enclosed field mainly formed of uniform improved grassland bounded on all sides by trees mixed in age, species, condition and character. There are also semi-derelict agricultural buildings in the southwest corner.

Figure 6.1: Site Location Plan (Drawing no. 29923A/01)

6.2.4 The Site comprises a level enclosed field mainly formed of grassland bounded on all sides by trees mixed in age, species, condition and character. There are also semi derelict agricultural buildings in the southwest corner.

6.2.5 The Site is bounded by existing residential development along St Georges Road to the north and west, undeveloped land to the east and south, Sandown Road to the north-east and a small area of residential development fronting Sandown Road further to the east of the Site.

6.2.6 The Site enjoys access to a number of local facilities and services which are within a reasonable walking distance, including schools, local shops, healthcare, employment, and public transport links. The Sir Roger Manwood Secondary School, Sandwich railway station and the historic town centre (including convenience stores) are all located within 800m of the Site. Sandwich Junior School and the local supermarket are located just over 800m from the Site. Larger shops and supermarkets are available in the local area, including Westwood Cross 8 miles to the north and Deal, 6 miles to the south. In terms of planning constraints, a Tree Preservation Order (TPO) protects trees on the northwest boundary of the Site and the belt of trees bounding the northeast and southeast.

6.3 Development Capacity

6.3.1 For the purposes of this representation, Land at Archers Low Farm, Sandwich is submitted with capacity for approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), as part of a high- quality, landscape-led residential scheme capable of delivery early in the Plan period.

6.3.2 Significant work has already been advanced by the project team as part of the submitted planning application and the subsequent appeal in which the proposed development has been informed following a thorough analysis of the Site opportunities, constraints and surroundings. The key design principles have been to create an attractive, permeable and legible layout set with a strong landscape framework, utilising existing landscape features, to accommodate a mixture of high-quality and attractive homes, of a scale and design that reflect its setting and surroundings.

6.3.3 In summary the vision for the Site is to create a high quality residential development which includes:

Circa 40 – 45 no. residential dwellings, comprising 30% Affordable Housing and a mixture of 2, 3 and 4 bedroom properties.

A series of open spaces that perform multiple functions including informal space, a local area of play (LAP), ecological mitigation areas and incorporation of native and wildflower meadow planting.

Retention of trees on the northern and southern boundaries and the provision of new woodland planting. This will include proactive management of the retained and proposed woodland belts to encourage structural and species diversity and improve the overall health and longevity of these

assets. The provision of significant biodiversity net gain is envisaged, and has been demonstrated can be delivered through the application and appeal.

Low key principle vehicular access point onto Sandown Road through landscaped entrance with trees and vegetation maintained, introduction of wildflower planting.

Footpath connectivity onto St Georges Road.

Tree lined connecting avenue creating strong legibility and navigation throughout the layout.

Figure 6.2: Proposed Site Plan as amended in December 2021 (Produced by Clague Architects – Drawing no. 29923A/11)

6.3.4 For context, at the time of determination of application ref: '22/00274', full planning permission was sought for the erection of 44 dwellings, together with associated access to Sandown Road, a pedestrian crossing point on St Georges Road, parking, open space, landscaping, drainage, and infrastructure works.

6.3.5 It is highlighted that draft policy PM1 seeks to provide a density typically between 30-50 net dwellings per hectare (dph). In this respect, it is highlighted that at 45 dwellings, the Site would provide a density of approximately 22.5 dph. Whilst it is acknowledged that lower density development may be more appropriate in edge of settlement locations, this demonstrates that even at a capacity 45 dwellings, the density is relatively low. Furthermore, as part of the previous application 22/00274, DDC confirmed at paragraph 2.23 of the Committee Report that subject to a detailed assessment of visual impacts, a proposed scheme of 44 dwellings on the Site is considered appropriate.

6.3.6 The above proposed Site plan submitted during the determination of the application demonstrates the capability of the Site to comfortably accommodate circa 40 – 45 residential units, together with significant boundary and internal landscaping elements.

Draft Allocation in the Regulation 18 Local Plan:

6.3.7 As aforementioned, the Site was proposed to be allocated for a capacity of approximately 40 dwellings in the Regulation 18 Local Plan under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' (reference SAN023).

6.3.8 The Site was considered as part of DDC's Housing and Economic Land Availability Assessment (HELAA) (December 2020) for the development of approximately 40 dwellings. The summary of suitability as provided by DDC is summarised as follows:

- The Site is in an Area of Archaeological potential and a Heritage Assessment will be required.
- The Site clips Flood Zone 2 and 4, along the boundary and an FRA would need to be undertaken.
- The Site was removed from the LALP (Local Allocations Local Plan) by the Inspector on landscape grounds, however, with the provision of an enhanced landscape buffer to the east, south and west of the site to provide year-round screening, it is considered that the impact on the landscape can be mitigated. The housing number on the site has also been reduced to address landscape concerns.
- Access to this site would be possible via Sandown Road, however vehicle access onto St Georges Road is likely to be challenging due to limited footway width and subsequent sightline requirements, so would need to be restricted to emergency/pedestrian access only.
- The provision of 40 dwellings is unlikely to create a severe impact on the surrounding highway network, however St Georges Road and Sandown Road (including Knightrider Street and the route to the High Street/Quay) are subject to constrained geometry due to on street parking, as such, a review on-street parking controls may be required to manage any increase in traffic-flow.
- There is a general concern over the potential cumulative impact of development in and around Sandwich and on routes within the town, which should be considered as part of future traffic modelling exercises.
- A Transport Assessment is required.
- Further information should be provided to demonstrate that access is achievable. However, cumulative impact on the highways network needs to be assessed.

6.3.9 At the time, owing to the matters set out above the Site was considered 'Amber' in the reg/amber/green (RAG) rating. However the clients have since demonstrated within the planning application and subsequent appeal submission that the proposed development for 44 dwellings would address the queries above.

6.4 Draft Policy Allocation 'Land at Archers Low Farm, Sandwich Road, Sandwich' (SAP22)

6.4.1 As introduced in the preceding sections, our client's Site at Archers Low is allocated for residential development within the Dover Pre-submission (Regulation 19) Local Plan. For ease of reference, the draft policy wording is as follows:
"SAP22 – Land at Archers Low Farm, St Georges Road, Sandwich (SAN023)

The Site, Land at Archers Low Farm, St Georges Road, Sandwich, as shown on the policies map is allocated for an indicative capacity of 35 dwellings.

Development proposals for the Site shall include the following:

- a) Development should be laid out to protect the residential amenity of the existing residential properties to the north-east and designed to take account of the character of the Sandwich Walled Town Conservation Area;
- b) The existing trees on the boundaries of the site should be retained and enhanced to mitigate the impact of development on the landscape and provide opportunities for biodiversity habitat creation and enhancement;
- c) Trees which need to be removed to enable an access to be provided to the site, shall be kept to the minimum needed to provide necessary visibility, and will be required to be replaced on-site;
- d) The layout of the scheme should provide a sufficient buffer between the existing mature trees on the site and residential properties, to ensure appropriate residential amenity for future residents and the protection of existing trees once the site is developed;
- e) A site-specific Flood Risk Assessment must be carried out in accordance with Policy CC5, including a comprehensive investigation into surface water flood risk. This shall also inform the application of the Sequential Approach to the layout of the site by locating the most vulnerable elements in the lowest risk areas;
- f) Primary vehicular, pedestrian and cycle access to the site shall be provided from Sandown Road;
- g) In accordance with Policy SP13 a wintering bird survey must be undertaken in advance of a planning application on the site. If the bird survey identifies that the development will exceed the threshold of significance, mitigation will be required. A suitable scheme of mitigation will need to be submitted with the planning application for the site;
- h) Environment assessment study required to address any potential impact on the Sandwich Bay SPA and Ramsar;
- i) A Heritage Assessment, to include appropriate archaeological investigations must be carried out in accordance with Policy HE1 and Policy HE3, the results of which should inform the layout and design of the development which is necessary to avoid harm to any heritage assets identified through the assessment; and
- j) The occupation of the development should be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider. Development should provide a connection to the sewerage system at the nearest point of adequate capacity."

6.4.2 To be clear, our client remains wholly supportive of the allocation of the Site for residential development and is committed to delivering the Site early in the Plan period (start on site in 2023). We agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client's Site can be made – and therefore object to the capacity identified.

6.4.3 Accordingly, we say that Land at Archers Low can further assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.

6.4.4 It is submitted that the SAP22 policy wording should be amended to reflect the capability of the Site to accommodate approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.

6.5 Strategic Justification for Development

Spatial Strategy

6.5.1 The proposed Housing Distribution for the district across the Plan period is established within Policy SP3 'Housing Growth' which sets out that the distribution of housing growth in the district is primarily based on the settlement hierarchy and influenced by site availability, environmental constraints and factors of delivery.

6.5.2 Rightly, a key aim of the growth strategy is to focus development in the least sensitive areas of the district in order to conserve and enhance the Dover's rich natural and historical environment.

6.5.3 A retained theme from the adopted Plan, is that the Council's settlement strategy continues to focus on the development and regeneration of Dover Town and Whitfield (3381 dwellings). Approximately half of the district's planned housing is in this location, the majority of which again is to come forward as part of the strategic urban expansion of Whitfield 'SAP1' (2200 minimum dwellings).

6.5.4 Development will then be focused in the District Centre of Deal (223 dwellings), and the Rural Service Centres of Sandwich (227 dwellings) and Aylesham (649 dwellings). Following the settlement hierarchy rigidly would distribute housing in the preceding order, however the Plan recognises that housing delivery in Deal and Sandwich continues to be constrained by a number of factors including flood risk, ecological designations, heritage and highways. Further, Deal has experienced generally high levels of windfall development across the previous Plan period and accordingly there is now a dwindling supply of available, suitable sites in both settlements. On account of this context, the Council have sought to direct the majority of the remaining higher order settlement growth (outside of Dover & Whitfield) to Aylesham, through the strategic expansion to the town.

6.5.5 Outside of the four principal district settlements, the Rural Settlement Hierarchy (August 2022) identified that the majority of lower-order settlements in the district emerge as having a low level of facilities within the hierarchy and six settlements having none of the key indicators of sustainable services. Plainly, these settlements offer very limited opportunities for growth and it is evident that the forthcoming Plan will be reliant on the settlements of Dover (including Whitfield), Deal, Sandwich and Aylesham to deliver the housing growth that is required.

6.5.6 We further note the findings of the Strategic Housing Market Assessment (2017) which identified that Sandwich and the north is the most expensive part of district with median property prices for all sizes of homes significant in excess of prices in Deal and Dover town and the south. It is suggested that issues of unaffordability are most likely to effect entry-level properties and result in existing residents being forced to seek more affordable properties elsewhere in Dover district or neighbouring authority areas.

6.5.7 Given this context, it is clear that where available and suitable opportunities for residential development do exist within the district's higher order settlements, including our client's Site at Land at Archers Low which can provide a policy compliant level of affordable housing, it is imperative that the effective use of these sites are appropriately maximised in accordance with draft policy SP3 of the emerging Plan and national policy objectives.

6.5.8 Notwithstanding our client's in principle support or the proposed strategy, we are concerned that highly sustainable, edge-of-settlement sites, particularly in higher tier settlements such as Sandwich have not been fully maximised to reflect their accessible location and capability to accommodate a greater quantum of development. On this basis, we are concerned that the strategic objectives underlying draft policy SP3 'Housing Growth' may not be fully realised, to the detriment of market and affordable housing delivery and the wider policies seeking to conserve and enhance the district's natural and historic environment.

6.5.9 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Sandwich, and this has not been undertaken – for example at Land at Archers Low, where it has previously been demonstrated that the site has sufficient capacity to deliver approximately 5-10 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

Greenfield Development and Consistency with Housing Trajectory

6.5.10 Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs Area of Outstanding Natural Beauty, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, release will be required if the Council is to meet its housing and development commitments moving forward.

6.5.11 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Sandwich, represent the most sustainable and reliable sources of growth for the Plan period, to support the role and timescales of strategic urban extensions and to deliver the significant number of new homes that are required within the forthcoming Plan period.

6.5.12 Moreover, greenfield edge-of-settlement sites are, in our experience, typically most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the district.

6.5.13 The Sustainability Appraisal Scoping Report (2018) sets out that over the course of the adopted Plan period, the key sustainability issues facing Dover District in relation to housing are as follows:

Population growth, household growth and demographic change will place additional demand on key services and facilities such as housing, health, education and social care. The Local Plan offers a new opportunity to manage these pressures, encouraging mixed communities;

There is a need for affordable housing across the District. At present, the mean price of dwellings is higher than the national average. The Local Plan will help to expedite its delivery; and,

There is the need for a mix of housing types that cater for the needs of a range of people, including the growing number of single person and elderly households. Without an up-to date Local Plan, the required housing is less likely to be delivered.

6.5.14 It is evident that the new Dover Local Plan must allocate a mix of reliable sites capable of steadily delivering not only the quantum of housing that is required, but also the associated public infrastructure, affordable housing and a mix of unit types and tenures suitable for a wide range of future occupants.

6.5.15 The Housing Topic Paper (September 2022) provides further context and summarises under Chapter 7 'Historical Housing Delivery' that Dover has historically placed significant reliance on windfall development over the current adopted Plan period, with windfall sites accounting for 44% of all completed dwellings over the preceding 10-year period.

6.5.16 Moreover, it is highlighted that at the beginning of the 10 year period, the majority of new dwellings were being built on brownfield land. However, from the monitoring year 2013-14 onward development on greenfield land began to play a much greater part in the location for new development as show in figure 1 below. This trend of increased housing development on greenfield land is a result of the allocations within the CS and Land Allocation DPD being built out and is associated with an approximate doubling of completions in the district. From 2013-14 onwards the average number of completed dwellings per annum has doubled to that of the early years of the CS, as the strong delivery rates of greenfield sites form the predominant source of housing. This is despite an overall declining trend of brownfield completions towards the latter half of the Plan period. This is generally not an uncommon trend in the majority of local planning authorities areas, where opportunities for available and suitable sites in urban centres dwindle throughout the Plan period.

Figure 1: DDC Brownfield / Greenfield Completions 2010/11 to 2020/21 (source: Housing Topic Paper September 2022)

6.5.17 In light of the above context, it is clear that the adopted Dover Local Plan suffered from an initial under delivery of Plan-led housing growth in which windfall development sources were largely required to take up the slack in the early phases of the Plan period, as major allocated sites failed to deliver at the rates initially expected.

6.5.18 It is equally apparent that initial slow completion rates were quickly addressed once greenfield allocations commenced development, feeding into strong completions in the latter half of the Plan period. In our experience, greenfield sites are typically associated with stronger delivery rates and provide a reliable source of housing growth. The allocation of an appropriate mix of sites and scales is required in order to ensure steady and sustained Plan-led housing delivery across the Plan period and to avoid a reliance on windfall development to address the shortfall.

6.5.19 Consequently, given all of the above, it is imperative that the new Local Plan allocates a sufficient variety and scales of site capable of both ensuring steady and sustained housing completions and capable of making necessary contributions to public infrastructure and services, affordable housing and mix of unit types to address the key issues raised in the Sustainability Appraisal.

6.5.20 In our view, edge-of-settlement greenfield sites such as our client's Site Land at Archers Low represents the most reliable and sustainable source of housing delivery for the Plan period. Such sites are typically less constrained by wider factors and less affected by unforeseen delays such as land contamination. Moreover, greenfield sites typically are more capable of delivering the policy compliant affordable housing, unit mix and developer contributions that are urgently needed and in the case of our client's Site, have already been demonstrated within the present planning application and appeal submission.

6.5.21 It is understood that the Plan is predicated on the delivery of strategic scale development at Whitfield comprising the development of circa 2,200 new homes. Consequently, in order to avoid a repetition of the previous Plan, the Council have sought to ensure that a pool of reliable greenfield allocation, including that of our client's are included within the Plan, capable of delivering the early growth that is required within the housing trajectory prior to the commencement of major allocations later in the Plan period.

6.5.22 We note that within the Housing Trajectory 'Appendix D', the Council have included allocated units from Years 4 onwards, with extant permissions (accounting for 5% non-implementation) demonstrated to be solely capable of delivering the growth required in Years 1-3. Notwithstanding our client's commitment to commencement on site in 2023 and the initial delivery of units at Land at Archers Low in 2024 (subject to successful appeal), we support this pragmatic approach and suggest this represents a sound basis on which to set the district's housing trajectory. We note also the inclusion of an appropriate windfall allowance and the included contingency buffer to further ensure reasonably flexibility in the housing supply.

6.5.23 On account of all of the above, we submit that the allocation of Land at Archers Low forms part of a sound strategy for growth in the district for the forthcoming Plan period. Land at Archers Low is capable of delivery early in the Plan period, representing a reliable source of housing growth in a highly sustainable and accessible location adjacent to the existing settlement boundary of Sandwich, consistent with the Council's preferred settlement strategy. However, we object on the submission that the Site is capable

of making a greater contribution to the district's housing need and suggest an amended wording of the policy to allocate the Site for approximately 40-45 dwellings. Nonetheless, the Site is unconstrained and capable of providing a high-quality residential development including a mix of unit types and tenures, a meaningful contribution to the supply of affordable housing and contributions to public services and infrastructure, benefiting both existing residents and future occupiers.

Policy SP4 'Windfall Development'

6.5.24 Separately, we note the provisions of policy SP4 windfall development. Proposals at Land at Archers Low would likely be acceptable in principle under this provision and we support the policy inclusion for appropriate, proportionate windfall development.

6.5.25 Our client is fully committed to the delivery of the Site which is available and suitable for delivery early in the Plan period and is presently pursuing an appeal on the Site for a greater quantum of units than the allocation in the Regulation 19 Plan. There is consequently little to be gained from potentially delaying delivery of the Site by withdrawing the allocation. Notwithstanding the provisions of SP4, it is reiterated that our client fully supports the allocation of the Site under SAP22 for residential development as the most appropriate mechanism for delivery of the Site and the opportunity for genuinely Plan-led development in Sandwich and the provision of associated benefits to public services and infrastructure, contribution to affordable housing supply and the delivering of a mix of house types and tenures.

Infrastructure Delivery

6.5.26 Paragraph 11 of the Framework is clear that all plans should promote a sustainable pattern of development. This includes aligning growth and infrastructure. Paragraph 20 goes on to confirm that strategic polices will be expected to make sufficient provision for associated development infrastructure.

6.5.27 In this regard, draft policies SP11 'Infrastructure and Developer Contributions' and SP12 'Strategic Transport Infrastructure' of the emerging Plan form the key strategic polices for infrastructure delivery. We agree that where development would create a need, or would have an impact, or would exacerbate an existing deficiency in infrastructure provision, appropriate developer contributions may be sought.

6.5.28 It is however emphasised that in all developments, infrastructure requirements must be demonstrated to be necessary through assessment during determination of the application on a case-by-case basis. Where new development is proposed, it does not automatically follow that major infrastructure contributions are always required or contribution to strategic infrastructure proposals are appropriate. For instance, it is our client's view that any infrastructure requirements must be demonstrated through a robust and transparent assessment at application stage, taking into account the submission of detailed supporting evidence, for example following consideration of the Transport Assessment in the case of highway infrastructure contributions.

Alignment with Sustainability Appraisal Findings

6.5.29 As part of the preparation of the Local Plan, the Council has identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA) which provides an assessment of how different options perform in environmental, social and economic terms, to help inform which option should be taken forward and combined with wider evidence documents, have been used to determine the growth and spatial strategy set out in the Plan.

6.5.30 Five potential distributions of growth were identified during preparation of the draft Regulation 18 Local Plan:

- **Spatial Option A: Distributing growth to the District's suitable and potentially suitable housing and employment site options (as needed to deliver the scale of growth required).**
- **Spatial Option B: Distributing growth proportionately amongst the District's existing settlements based on their population.**
- **Spatial Option C: Distributing growth proportionately amongst the District's existing settlements based on the District's defined settlement hierarchy.**
- **Spatial Option D: Distributing growth in the same way as the adopted Local Plan, focussing most growth in and around Dover town.**
- **Spatial Option E: Distributing growth more equally across the District's settlements: Dover, Deal, Sandwich and Aylesham, as well as the rural villages.**

6.5.31 The conclusion of the SA was that Spatial Options C (settlement hierarchy) and D (adopted Core Strategy with Dover focus) generally perform the most strongly against the SA objectives, particularly when delivering the baseline growth scenario. However, given the environmental constraints that exist around Deal and Sandwich, very few suitable and potentially suitable sites have been identified in these towns. Given this, the Council's preferred option for the distribution of housing and economic growth comprises a combination of options A (HELAA sites), C (settlement hierarchy) and D (Dover focus). The distribution of housing and economic

growth in the District is therefore primarily based on the settlement hierarchy, and influenced by site availability, environmental constraints and factors of delivery.

6.5.32 On account of the above, our client agrees that the proposed growth strategy, and by extension, policy SP3 in principle represents a sound and evidence-led strategy for growth. However, given the clear acknowledgement of the dwindling supply of available sites in the higher order settlements of Deal and Sandwich, which has necessitated a minor deviation from the strongest performing spatial options, we submit that where sites are available and suitable for development in Deal and Sandwich, these must be fully maximised, reflecting their accessible location and their ability to reduce the need to develop into less accessible and more sensitive sites elsewhere in the district to accommodate the growth that is required.

Site Specific Sustainability Appraisal

6.5.33 Land at Archers Low Farm, St George's Road, Sandwich is included under HELAA reference 'SAN23' within the SA Site Assessment (Appendix F). The site performs strongly, with particular positives identified with regards to SA Objectives related to housing, accessibility, the economy, sustainable transport and climate change mitigation, in large parts due to the edge-of-settlement location and proximity of the site to key services in Sandwich.

6.5.34 We note negatives associated with the development of a greenfield site, including loss of agricultural land, however this would be true of the majority of greenfield sites and it is abundantly clear that Dover's housing need cannot be met solely on brownfield sites. We note also minor negatives / uncertain associated with biodiversity, the historic environment and landscape, however it is not clear whether these take into account the high-quality design, biodiversity enhancement and landscape mitigation proposed under the application/appeal. Irrespective, these are not considered to outweigh the clear and tangible sustainability benefits associated with edge-of-settlement development and the site's consistency with the preferred spatial options.

Summary

6.5.35 Taking all of the above into consideration, our client is wholly supportive of the inclusion of land promoted at Archers Low, as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered wholly consistent with the objectives of the Plan and forms part of a sound evidence-led growth strategy consistent with the recommendations of the Sustainability Appraisal for the district to 2040, subject to the sole objection in relation to capacity.

6.6 Deliverability

6.6.1 Prior to the current appeal proposal, the Site has had no planning history of a residential nature or a history of unimplemented permissions. There are not considered to be any impediments to the Site being allocated for development commencing within the first five years of the Plan period. Combined with an appropriate number and scale of wider allocations in Sandwich and elsewhere across the district, this would ensure steady delivery of housing in Dover district across the majority of the Plan period and support the role and timescales of strategic housing delivery at Whitfield towards the latter half of the Plan period.

6.6.2 Fernham Homes Limited – a local SME with a strong history and track record of delivery, together with an adopted and robust business plan for growth – has control over the site, and are poised to commence work on its residential development very promptly after the receipt of planning permission, potentially (subject to the successful outcome of the current appeal) in 2023. Delivery of housing is expected from 2024.

6.6.3 For the reasons set out in this representation, the Site is considered suitable for the residential development of approximately 40 – 45 dwellings. The Site is adjacent to the urban area of Sandwich, one of the four higher order settlements in the district and the Council's preferred locations for Plan-led growth within the district. Development at Land at Archers Low would form a natural and logical development east of Sandwich with excellent accessibility to day-to-day services and amenities via active travel modes within Sandwich itself and convenient access to public transport infrastructure (including Sandwich train station) for onward travel to key neighbouring settlements including Dover, Ramsgate, Canterbury and Ashford.

6.6.4 Finally, in respect of suitability, there are no physical limitations or problems such as access, infrastructure, flood risk, hazardous risks, pollution or contamination.

6.6.5 On behalf of the landowner, we submit that there are no known financial restrictions that would impact upon the viability of a future housing scheme or that would prohibit development coming forward within the early stages of the Plan period. To the contrary, we consider there to be an opportunity to deliver a high-quality, sustainably located residential development scheme consistent with the Council's proposed growth strategy comprising an appropriate mix of market and affordable housing and capable of contributing to a range of community facilities, public infrastructure and services locally.

	<p>6.6.6 Given the advanced nature of the proposals by virtue of the submitted planning application, in terms of specific timescales, should the ongoing appeal be allowed, we understand that Fernham Homes Limited and Walker Residential Limited are capable of commencing work on-site in early 2023, with delivery in 2024 and completion of the Site anticipated in 2025.</p> <p>6.6.7 The Site is in single ownership and there are no complicated legal agreements or covenants that would prohibit the ability to bring forward the Site early in the Plan period. The Site is therefore considered available and achievable for the purposes of the tests of deliverability.</p> <p>7 Conclusion</p> <p>7.1 Summary</p> <p>7.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited and Walker Residential Limited, in response to the Dover District Council Local Plan (Regulation 19) consultation which runs until 9th December 2022.</p> <p>7.1.2 Our client controls 'Land at Archers Low Farm, Sandown Road, St Georges Road, Sandwich' and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.</p> <p>7.1.3 Taking all of the above into consideration, we consider that the Site promoted at Land at Archers Low should remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered, in principle, wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040. However, it is imperative that the effective use of these higher-order settlement sites are appropriately maximised in accordance with draft policy SP3 of the emerging Plan, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and object solely on this basis.</p> <p>7.1.4 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Sandwich, and this has not been undertaken – for example at Land at Archers Low, where it has previously been demonstrated that the site has sufficient capacity to deliver approximately 5-10 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.</p> <p>7.1.5 Without prejudice to our client's support in principle of the proposed allocation at Land at Archers Low, we would urge the Council to re-visit the allocation policy text and allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential and the objectives of draft policy SP3 are most effectively realised. It is submitted that the SAP22 policy wording should be amended to more accurately reflect the capability of the Site to accommodate approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.</p> <p>7.1.6 In addition to being a highly sustainable and logical edge-of-settlement allocation, the Site is deliverable in a single land ownership with no viability issues, legal or third-party constraints present. Our client is fully committed to the delivery of Land at Archers Low and there are no impediments to the Site being capable of delivery within the initial 0-5 years of the Plan period.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>For the reasons set out in the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245), the capacity of Land at Archers Low Farm, St Georges Road Sandwich (SAN023) should be increased to 40 - 45 dwellings.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note</p>	<p>Please refer to the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245).</p>

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP3
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Iceni Projects, on behalf of Quinn Estates, welcomes the opportunity to submit representations to the Dover District Council Local Plan Regulation 19 Consultation in respect of land at St Edmunds Road, Deal. These representations should be considered alongside the following documents appended to this letter:</p> <ul style="list-style-type: none"> • Appendix 1 – Site Layout Plan <p>The land subject to this representation was previously assessed through the Call for Sites process as part of a significantly larger land parcel (GTM008 – Land North of Ellens Hill). Quinn Estates consider that the revised, smaller site makes a logical extension to Deal in this area, and that site specific constraints can be overcome to deliver housing in Deal. The Site borders the Deal settlement boundary and presents a logical extension to the town in this area. Quinn Estates considers that the land should be allocated for residential development of approximately 16 self-build and 7 affordable homes with associated access and parking, within a landscaped setting. It is considered that the scheme presents an opportunity to provide high-quality family homes, in a highly sustainable location and that the resultant effect of this redevelopment will lead to societal benefits for the local community and a more sustainable development strategy</p> <p>It is Quinn Estate's view that the current suite of allocations in the draft Plan will fail to provide a sufficient level of growth in and around Deal, and that it is over reliant upon a single urban extension to Dover to meet local housing needs, which does nothing to address local affordability issues in Deal. To ensure the soundness of the plan, further Sites, such as the one advocated in this representation, should be allocated to ensure that the Plan's ambitions for the District are delivered.</p> <p><u>a. Land at St Edmunds Road, Deal (the 'Site')</u></p>

The Site comprises approximately 1.83ha of land adjoining the Deal settlement boundary. The Site is located on the south-western edge of Deal, bound to the north-east and north-west by residential properties, and to the south-east and south-west by open farmland. The southern boundaries of the site comprise existing hedge and trees. The site is currently in use as grazing land for horses.

A public right of way (ref: 0340/ED38/12) bisects the north-eastern corner of the site from northwest to south-east. Access to the site is via an existing gate in the hedgerow joining St Edmunds Road. The closest bus stop is approximately 180m from the Site on St Richards Road and includes services

Our services include: archaeology | design | engagement | heritage & townscape | landscape | planning | sustainable development | transport
Iceni Projects is the trading name of Iceni Projects Limited. Registered in England No. 05359427
to Deal town centre, Walmer, Sandwich, and Kingsdown. St Richard's Road GP Surgery, Payden Pharmacy, St Mary's primary School and the Betteshanger Sports and Social Club are also within approximately 500m of the Site on St Richards Road. The Site is considered to be a sustainable location for residential development.

The north-western boundary of the Site adjoins the southern edge of the Mongeham Road Conservation Area. Within the Conservation area are several Grade II listed buildings including 110 and 112 Mongeham Road, Manor Farmhouse and Brewer's Farmhouse. The Site is within Flood Zone 1. Wildlife Trust mapping identifies the Lower Stour Wetlands to the north-west of the Site beyond Mongeham Road, overlain with the Sandwich Bay to Hacklinge Marshes SSSI. There are no other wildlife designations either in the Site or in proximity.

b. Objection to Tables 3.3 and 4.2 (under the auspices of Policy SP3)

Quinn Estates suggest that the emerging spatial strategy for the District, as detailed in Tables 3.3 and 4.2 of the Regulation 19 Submission Version of the Draft Local Plan is not based on sound plan-making. The current approach does not acknowledge the sustainability of the town nor its position within the settlement hierarchy. As such, additional sites should be allocated to the town in Table 4.2. Quinn considers that the Site subject to this representation presents an ideal housing site within Deal which is able to overcome the identified constraints to contribute to sustainable housing growth within the settlement.

Sustainable distribution of growth

Sustainable development is a key aim of the National Planning Policy Framework at Paragraph 8. In terms of housing delivery, the Council should seek to encourage housing growth in the most sustainable locations, especially when they can ensure the achievement of societal improvements, economic benefits and positive environmental outcomes. In choosing sites, the Council should ensure that new residents can reach established nearby town centres using sustainable modes of transport, to limit pollution arising from motor travel and to support the vitality of the existing community and local economy, without creating environmental harm.

Deal is vibrant coastal town which benefits from access to a wide range of local services within a relatively contained urban environment. The vast majority of the town's facilities lie within walk, cycle and public transport distances. Services include a range of education provision, including primary, secondary and tertiary education. The town benefits from ample leisure opportunities at the sports centre and swimming pool, along with less formal outdoor activities on the seafront and at the Betteshanger Country Park. In addition, the town is highly sustainable in regard to public transport accessibility, being served by mainline rail, the high-speed train service to London and numerous bus routes.

Throughout the evolution of the draft Local Plan, Deal has failed to be allocated sufficient levels of growth commensurate with the sustainable nature of the town. The justification for channelling so little growth to Deal is not considered to be justified by evidence, when all the evidence points to the settlement being such a logical and sustainable location to channel growth to. The principles of sustainability and sound plan making appear to have been absent in key decision taking over spatial choices at the heart of the spatial strategy presented in the draft Plan.

Market and affordable housing delivery

Paragraph 35 of the NPPF outlines how plans are effective where they are found to be deliverable over the plan period. The disproportionately high dependence on Whitfield Strategic Allocation (SAP1) results in a plan which raises considerably uncertainty as to this key soundness test.

Quinn Estates has no objection to large-scale housing development at strategic sites playing an important role in meeting housing need. However, what looks good on paper needs to deliver in practice. However, in a District like Dover where there is a need for the benefits of growth to translate across the District, the spatial strategy should be seeking to unlock growth and inward investment at other key settlements, such as Deal, and this is a significant weakness of the Plan in its current form.

Spatial strategies should reflect that building homes is a complex and risky business. Stronger local markets have higher annual delivery rates, and where there are variations within districts, this should be factored into spatial strategy choices. Further, although

large sites can deliver more homes per year over a longer time period, they also have longer lead-in times. Research by Lichfield1 found the average lead in time for large sites prior to the submission of the first planning application is 3.9 years

This issue with delivery is found to be the case with Whitfield. Of the 5,750 dwellings proposed for the allocation, 3,483 dwellings are considered deliverable in the emerging Plan period. The Council acknowledges that the 2010 Core Strategy included provision for the Site to deliver 5,750 dwellings. Phase 1 of the SAP1 allocation (Dover ref. 10/01010) is underway and as of the 2020/2021 monitoring year, 185 dwellings had been completed with a delivery rate of approximately 50dpa for the past three years. Given this slow progress, it seems likely that although the existing outline planning permission should be completed over the Plan period, a more cautious approach should be taken in terms of the remaining dwellings allocated for the site given its proven issues in delivering housing to date.

Without clear evidence by way of a planning application for these additional dwellings, it is questioned whether Whitfield will ramp up to delivery of 120dpa from 2023/24 and then up to 200dpa from 2026/27 for the remainder of the Plan period. More consideration should therefore be made to the current planning position of the Site and the length of time it has taken so far to deliver housing. Paragraph 73D of the NPPF recommends the inclusion of realistic delivery rates within Local Plans, and the Council should therefore review those proposed for Whitfield and consider building more flexibility and more volume into the pipeline to be able to respond to delivery issues.

It is considered that, particularly with the deliverability issues of the Whitfield Urban Extension to date, additional sites should be allocated for housing to ensure that there is sufficient choice and flexibility in the supply so that the Council can meet its housing requirement throughout the Plan period, as well as to meet the Government's objective to significantly boost the supply of housing as set out in Paragraph 60 of the NPPF.

The delivery of affordable housing also paints a bleak picture within the District. The Council's existing policy on affordable housing, DM5 of the Core Strategy (2010), requires residential development of 15 or more dwellings to provide 30% of the total homes as affordable homes and the Council's affordable housing strategy remains unchanged, save for reducing the requirement to deliver affordable housing within Dover town.

The latest Authority Monitoring Report (2020-2021) profiles how the affordable housing policy has consistently struggled to deliver sufficient levels of affordable housing, with the average being 20%. The failure to deliver sufficient affordable housing is set against a backdrop of worsening affordability in the District. Affordability ratios for Deal show a continued trend of worsening to 9.25 in 2021, with year-on-year worsening from 2012-2018. For the lowest earners, this reaches 9.62 in 2021. The District is less affordable than the national average of 9.05. Median house prices in the District have soared to £285,000, compared to the UK average of £278,000.2 In addition, statutory homelessness within the District sits at 137 people and 136 households, 68 with children, are in temporary accommodation within the District as of 2021.3 Whilst there may be a number of factors contributing to these outcomes, a new spatial strategy that identifies limited housing at Deal is going to deliver limited affordable housing at Deal and the absence of housing will only exacerbate local affordability pressures.

The proposed allocation at Land at St Edmunds Road would therefore assist with relieving local affordability pressures with the proposed 7 affordable units.

Self and custom build

Policy H5 of the Draft Local Plan states that the Council will support self-build and custom house building schemes on housing sites allocated in the Local Plan and on non-allocated windfall developments subject to compliance with the other Policies in the Local Plan, and where overall this would not result in an over-provision of this type of housebuilding when compared to the Council's supply/demand evidence.

The Self-Build and Custom Housebuilding Act 2015 requires relevant authorities, including District Councils, to keep a register of individuals and associations of individuals who are seeking to acquire serviced plots of land for self-build and custom housebuilding. Councils are also required under sections 2 and 2A of the Act to have regard to this and to give enough suitable development permissions to meet the identified demand. The benefits of self and custom build housing are recognised as diversifying the housing market and increasing customer choice. The NPPF supports the delivery of a variety of land coming forward to meet the needs of groups with specific housing requirements including for those wishing to commission to build their own homes.

The Self-Build and Custom House building need as identified from the Council's register is reported annually through the Authority Monitoring Report. The latest Authority Monitoring Report (2019-20) states that since the introduction of the self-build and custom house building requirements in 2015, there has been 1 plot allowed at appeal, where at appeal it was identified as self-build (planning reference 16/01101). There have also been 18 plots marketed as self-build since April 2020 by the developer from planning application 16/01026, however these were not identified as self-build on the planning application. On 31st October 2020, there has only been one planning application identified as including self-build

and customhouse building, reference 20/00419, which is also a Quinn site, for which a reserved matters application (ref: 22/01379) is currently pending determination.

The Self-Build Need Assessment submitted as part of the application (22/01379), points towards a very strong relative demand for self-build plots in Dover and also identifies Dover as being one of the authorities with the highest demand per capita in the country. Moreover, it is important to highlight that when considering demand in the context of the Local Authority's self-build register; an Ipsos Mori poll undertaken for NaCSBA in 2016 found that only one in eight people interested in self-build were aware of the introduction of Right to Build Registers in England. As a result, the number of expressions of interest on a Local Authority's self-build register may substantially underestimate demand.

Crucially, the Council's method of updating the self and custom build register, and resultant understanding of demand within the District, is flawed. The Council reviewed and updated its register in March 2020. All persons and organisations on the first (2016) version of the register were invited to re-register in February 2020, with reminders sent out in March 2020. Those who re-registered and passed the local connectivity and financial solvency tests, had their interest back dated to their original registration date and were placed on part 1 of the register. Those who did not pass the tests but still wished to register their interest in self-build customhouse building were placed on part 2 of the register.

It is not clear from the Council's Authority Monitoring Report and evidence base for the draft Local Plan whether additional independent survey work has been undertaken to fully understand the demand for self and custom build housing in the District. As mentioned previously, public knowledge and understanding of Right to Build in England is generally low. The method of the Council to understand demand has wholly relied upon people who had joined the register in 2016 and has not sought to further publicise Right to Build or develop a clearer understanding of demand in the District through additional surveys. This results in an incomplete picture of demand in the local area and resultant lack of allocations for self-build sites within the draft Local Plan.

Quinn Estates are the leading provider of self-build in Kent and have assembled their own database of interested self-builders. Having facilitated self-build development in East Kent, the company is ideally positioned to understand the market requirements and best placed to assist the District in meeting its growing demand for plots. Quinn Estates propose the land subject to this representation as suitable for a self-build site of 16 dwellings which would assist with addressing the Council's underestimated demand for this housing type.

Land at St Edmunds Road

The land subject to this representation was previously assessed through the Call for Sites process as part of a significantly larger land parcel (GTM008 – Land North of Ellens Hill). The Call for Sites Submission proposed 450 dwellings across a 10.74ha land parcel, and was assessed to be unsuitable due to heritage and landscape impact.

Quinn Estates are pleased to submit for consideration a revised proposal for the smaller land parcel which would deliver much needed new homes, including self-build and affordable homes, for Deal, whilst respecting and responding to the site constraints, namely the sensitive historic setting of the surrounding area to the north-west.

Vehicular and pedestrian access to the Site is proposed from the end of St Edmunds Road, utilising the existing gap in the hedgerow serving the field. The indicative site layout plan submitted with this representation details the proposed scheme which would comprise 16 self and custom build plots and 7 affordable units, set within a landscaped setting. The public right of way to the eastern edge of the site is retained, forming part of the landscaped, spacious entrance to the Site. In addition, the existing hedgerows are retained and enhanced, along with an enhanced tree buffer to the north-western boundary of the site where it adjoins the Mongeham Road Conservation Area. Overall, the proposal represents a

c. Conclusion

On behalf of Quinn Estates, we thank you for the opportunity to contribute to the Dover District Local Plan Regulation 19 Consultation.

The current approach to the spatial strategy in the Draft Local Plan requires amendment to address a significant soundness issue concerning the level of growth identified for Deal, the District's second largest settlement. It is considered that the Plan currently fails to positively plan for a commensurate level of housing and employment at the settlement, as expressed in Policy SP3 and that the available evidence does not support or justify this approach. Moreover, the evidence does support channelling a greater quantum of growth to Deal.

Quinn's proposal at the Land at St Edmunds Road presents a sustainable location for growth due to its existing connections to the public transport network and close proximity to a range of services on St Richards Road. The small nature of the site would provide early and accelerated delivery and would assist with reducing the current over reliance on the Whitfield Urban Expansion to provide housing growth for the District. In addition, the site would deliver self-build and affordable housing to address local affordability issues, which the current Plan fails to address.

I trust that these comments are of assistance and that these representations will be taken into account in consideration of the current consultation. Quinn would also welcome the opportunity to participate in the forthcoming Examination-in-Public into the Plan and contribute to the debate to ensure that the best strategy for the District is found.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Include GTM008 in the Local Plan for approx 16 self-build and 7 affordable dwellings
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

<p>possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>SP3: Housing Growth We welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period. Within the Policy, reference is made to the Council's overall spatial strategy i.e. the majority of growth will be focused towards the principal town, Dover, and the further expansion/new settlement at Whitfield. Hume Planning supports the spatial strategy which distributes a proportion of its growth to medium/smaller sized settlements in the district, i.e. local centres such as Eastry, receive some growth to sustain their role in the settlement hierarchy over the plan period, serving the needs of its own residents and those within surrounding villages and hamlets. Eastry contains a range of local services including a primary school, a local food store, a pub and Post Office facilities. The allocation of just under 100 dwellings across various sites is therefore considered appropriate for Eastry when considering its role in the settlement hierarchy.</p>

If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Lee Evans On behalf of Mr and Mrs Tobin. Full Representation attached to SDLP1411. This document has been split across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1411.)</p> <p>POLICY SP3 – Housing Growth</p> <p>3.12 This policy deals with the overall housing strategy for the plan period and clearly reflects the housing delivery aspirations of the overarching vision for the Plan. It is equally clear that SP3 seeks to focus growth at sustainable locations providing greater choice of high-quality housing to meet identified needs. Housing need is informed directly by household projections and targets set by central government. At least 611 dwellings per annum, with a minimum of 10,998 new dwellings over the plan period, are reflected in the LPA's housing growth strategy for the District. As an overall baseline position, this aspiration to both provide sufficient minimum growth to meet identified housing need, and to focus growth in sustainable locations is supported.</p> <p>3.13 It is essential that this figure is not viewed as a cap to development, that could otherwise unduly constrain the delivery of housing in sustainable locations. It is emphasised that policy word must continue to reflect these as 'minimum' figures. Such wording reflects an appropriate basis in encouraging sustainable growth; a cap should not be applied.</p> <p>3.14 It is agreed that the allocation of a number of sites is appropriate in ensuring a consistent and identifiable supply of housing over the plan period. It is agreed that the settlement hierarchy is a reasonable basis in assessing broad settlement sustainability credentials to underpin such, albeit site-specific assessment must be robust in the LPA's proposed allocations.</p> <p>3.15 Woodnesborough is identified as a 'Smaller Village' in the settlement hierarchy, described at Paragraph 4.288 of the Plan as having limited services and facilities but otherwise being well connected by public transport, and unconstrained in landscape terms.</p> <p>3.16 Paragraph 4.2889 confirms that: "To help sustain and strengthen the role of these smaller villages and hamlets, additional housing over the lifetime of this Plan is considered appropriate. In accordance with SP3 development in the rural areas of the District will be of a scale that is consistent with the relevant settlement's accessibility, infrastructure provision, level of services available, suitability of sites and environmental sensitivity"</p> <p>3.17 It is wholly agreed that the Plan should support growth at the Smaller Villages to support their functions.</p> <p>3.18 It is agreed that this policy should reflect the potential for further delivery to the settlements, subject to site suitability. It is recognised that SP3 seeks the allocation of 'in the region of 1,112 homes' in the rural areas. As above, it is important that this is not seen as a ceiling to development. As drafted, this policy is positively prepared insofar as it does not seek to restrict development, and as such it should be retained as drafted.</p> <p>3.19 It is also agreed that "windfall housing development will be permitted where it is consistent with the spatial strategy outlined above and is consistent with other policies of this Local Plan". It is noted that SP4 deals with Windfall Housing Development.</p>

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Response by the Home Builders Federation to the consultation on the Dover District Local Plan. 1. Thank you for consulting the Home Builders Federation (HBF) on the Dover District Local Plan that is being proposed for submission to the Secretary of State for examination. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.

SP3 – Housing Growth

The policy is unsound as it not effective and is not sufficiently justified by the evidence base

Housing needs

2. The housing requirement of 10,998 over the plan period 2022 to 2040 is consistent with the minimum number of homes the Council should plan for using the standard method. However, what is not clear from the Council's evidence is whether this level of growth will be sufficient to meet the growth aspirations of the Council. Strategic Policy 6 sets out the Council's aspiration to deliver a minimum of 117,290 sqm of additional employment floorspace over the plan period but we could not find evidence to indicate that this number of homes will be sufficient to support the level of economic growth the Council is aspiring to deliver. The NPPF sets out at paragraph 82c that the potential barriers to investment in an area, such as a lack of housing, needs to be addressed in the plan and the Council need to be certain that the housing requirement set out in SP3 is supportive of its aspirations around economic growth.

Older people's housing needs

3. The HBF is concerned with the limited references to the needs to provide special accommodation for older people. It is noted that the mix of homes on allocated

sites will need to take account of the need for such accommodation but there appears to be no indication of whether this will be sufficient to meet the needs identified in the 2019 SHMA update. It also completely ignores the potential to allocate standalone sites to deliver homes for older people and there is no specific policy setting out the need for such accommodation and how the Council will support such development to come forward outside of the strategic allocations. The HBF would recommend that a policy setting out the Council's support for older people's accommodation is include in the plan. In order to be effective, we would suggest that this policy sets out the need for such accommodation and that there a presumption in favour of such development where needs are not being met.

Housing supply

4. Table 3.1 in the Local Plan states that overall housing supply to meet needs is 11,924, leaving a contingency buffer of 924 homes between housing needs and supply - around 8% of needs. Whilst the HBF welcomes the provision of a buffer between needs and supply we do not consider 8% to be sufficiently large to ensure that needs are met in full over the plan period, especially given that around half of the homes will come from the Whitfield Urban Expansion. In order to ensure the Council's needs are met in full the HBF recommends that a buffer of around 20% is necessary. The additional buffer should be brought forward through the allocation of smaller sites which will deliver earlier in the plan period and provide a buffer in overall supply should there be delays in the delivery of the larger strategic sites in Dover.

Meeting affordable housing needs

5. The most recent Strategic Housing Market Assessment undertaken by the Council is the 2019 update to the 2017 SHMA. This sets out that there is a need for 3,387 new affordable homes between 2020 and 2040. No further assessments appear to have been undertaken since that period. However, the latest AMR indicates that 75 affordable homes were built in 2020/21 with permissions for a further 108 units which can be expected to come forward in 2021/22. As such if the SHMA update is used as the basis for affordable housing needs there remains a need for 3,204 homes over the plan period – around 30% of expected supply on sites that are likely to deliver affordable housing¹.

6. Whilst this would appear to show that on the basis of SP5 the need for affordable housing would be addressed we note that the delivery of affordable housing in the past has been well below what has been expected. The 2020/21 Authority Monitoring Report indicates on page 19 that delivery since 2010/11, the year the Core Strategy was adopted, has been at around 20% of housing completions. In addition, the viability study indicates that the strategic sites will find it challenging to deliver 30% affordable housing. This would suggest that in order to meet needs the Council will need to allocate additional sites.

¹ Total supply of 11,924 less small site windfall allowance of 1,050

Conclusions on housing supply

7. To conclude on housing supply the HBF would recommend that further sites are allocated in this local plan. This would have the twin benefits of meeting the need for affordable housing in the district as well as providing an additional buffer between housing needs and supply.

SP5 – Affordable housing

The policy is unsound as it is not fully justified.

8. This policy requires residential development of 10 or more units to deliver 30% of the homes provided as affordable housing. The update notes on the viability study notes at paragraph 56 that this level of affordable housing requirement is deliverable in high and medium value areas alongside the other costs placed on development by the local plan. However, the study outlines that this level of provision will be challenging on the strategic sites and shows that it would not be viable in lower value areas and in the urban area of Dover. The Council recognises these concerns in part by removing the requirement to provide affordable housing in the urban area of Dover. However, no allowance is made with regard to the lower value areas or strategic sites.

9. Whilst the Council states that aside from the strategic allocation there is little planned development in the lower value area it is still necessary for the policy should reflect this evidence presented by the Council. Paragraph 58 of the NPPF recognises that decision makers should be able to assume that development that a policy compliant scheme is viable. This requires policies that place additional costs on development to reflect the evidence and in cases such as this set different requirements for different areas regardless of the development expectations in those areas. As such the HBF would recommend that the policy is amended to remove the requirement for affordable housing contributions in the lower value areas.

10. It is also notable in tables 10.17 and 10.18 of the Whole Plan Viability Study that the outside of greenfield sites at Deal extra care and sheltered housing for older people is not able to viably deliver affordable housing. Given that such development often comes forward on sustainable PDL sites close to services such development should be specifically excluded within SP5 from providing affordable housing contributions.

CC1 – Reducing Carbon Emissions

The policy is unsound as not consistent with national policy, justified or effective.

11. Through policy CC1 the Council indicate that they expect development to meet the Future Homes Standard (FHS) if this becomes a requirement that is delivered

through local plans. However, the expectation from Government is clear that FHS will be delivered through amendments to the Building Regulations and will not be an optional standard adopted as part of a local plan. The improvements to energy efficiency standards in new buildings and the transition to FHS has already started with the improvements to part L of the Building Regulations that came into force in June of 2022. These will see a circa 30% improvement in CO2 emissions prior to the introduction of FHS which will ensure that new homes are zero carbon ready from 2025. As such it is not necessary to refer to the Future Homes Standard and the Council should remove reference to the standard in policy which will be delivered as part of changes to part L of the Building Regulations.

12. The HBF is also concerned that the Council do not appear to have tested the Future Homes Standard within the update note on the viability assessment. The update note sets out at paragraph 23 that the initial improvements to the energy efficiency introduced in June of 2022 were included but no additional costings have been made with regard to the Future Homes Standard. The Government expects this to cost the house building industry an extra £100 million per year though this fails to recognise that there is likely to be additional electricity connection costs with the move away from gas and that the assumed reduction in the cost of air source heat pumps is unlikely². Given the significant increase in costs from these new standards will come into force in 2025, not long after the expected adoption of this local plan, these costs should have been considered through the viability assessment.

NE1 – Biodiversity Net Gain

Policy is not needed as this will be delivered through the Environment Act and support regulations.

13. Given that the requirement to provide a 10% Biodiversity Net Gain is set out in legislation and supporting regulations and guidance and will be in force when the plan is adopted, the HBF would question whether it is necessary to include a detailed policy on BNG. Including a detailed policy could lead to inconsistency between policy and legislation should this change either prior to the introduction of BNG at the end of 2023, or if there be changes to regulation and guidance in future. As council notes in para 11.6 the policy is intended to reflect the requirements of the Act and as and we would suggest that it would be more appropriate to refer in policy SP14 to the need to deliver a 10% BNG in line with relevant legislation and guidance.

Conclusion

14. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, in the following key areas:

Economic growth has not been taken into account when considering the minimum number of homes to be planned for;

Greater flexibility required in the local plan to ensure needs are met in full;

No specific policy with regard to the needs of older people

	<p>Affordable housing policy does not reflect the full evidence on viability References to Future Homes Standard in policy CC1 unnecessary and unjustified No need to include detailed policy on BNG given that this is a requirement of legislation with associated regulations and guidance</p> <p>15. We hope these representations are of assistance in taking the plan forward to the next stage of plan preparation and examination. I would also like to express my interest in attending any relevant hearing sessions at the Examination in Public. Should you require any further clarification on the issues raised in this representation please contact me.</p> <p>2 Building Homes in a changing business environment: an assessment of new and forthcoming additional costs of housing delivery. (HBF, 2022) https://www.hbf.co.uk/documents/12117/HBF report - Building Homes in a Changing Business Environment.pdf</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>To conclude on housing supply the HBF would recommend that further sites are allocated in this local plan. This would have the twin benefits of meeting the need for affordable housing in the district as well as providing an additional buffer between housing needs and supply.</p> <p>It is also notable in tables 10.17 and 10.18 of the Whole Plan Viability Study that the outside of greenfield sites at Deal extra care and sheltered housing for older people is not able to viably deliver affordable housing, Given that such development often comes forward on sustainable PDL sites close to services such development should be specifically excluded within SP5 from providing affordable housing contributions.</p> <p>The HBF is also concerned that the Council do not appear to have tested the Future Homes Standard within the update note on the viability assessment.</p> <p>Given that the requirement to provide a 10% Biodiversity Net Gain is set out in legislation and supporting regulations and guidance and will be in force when the plan is adopted, the HBF would question whether it is necessary to include a detailed policy on BNG. Including a detailed policy could lead to inconsistency between policy and legislation should this change either prior to the introduction of BNG at the end of 2023, or if there be changes to regulation and guidance in future. As council notes in para 11.6 the policy is intended to reflect the requirements of the Act and as and we would suggest that it would be more appropriate to refer in policy SP14 to the need to deliver a 10% BNG in line with relevant legislation and guidance.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>I would also like to express my interest in attending any relevant hearing sessions at the Examination in Public.</p>

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Hume Planning. Full Representation attached to SDLP1565. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1565.)</p> <p>SP3: Housing Growth</p> <p>Whilst we welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period, it is considered additional sites if suitable and available should be included within the Plan especially brownfield opportunities in central locations that are so close to the rail station. A large proportion of growth is being directed towards the further expansion of Whitfield (over 2,000), and a large proportion to land to the south of Aylesham (640). Large strategic sites delivery rates can easily slow down during the plan period and under-deliver. Whilst there is a buffer within the Plan, it is considered appropriate not to use this as a limit, and allocate other suitable sites in sustainable locations where available.</p> <p>As detailed above, the former Youth Centre in Aylesham, as a brownfield site is considered suitable for residential development. It is also available and can be delivered within the short to medium term, and in our view this site should be allocated within the Plan.</p>

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>5 Housing Growth</p> <p>5.1 The Green Integration Plan and the local housing plan originally identified considerable growth for Dover District with land initially to be allocated for 14,000 new homes with a target to complete 10,100 homes by 2026. This target now appears to have been reduced and the new plan identifies the broad areas where the growth of the additional homes will be located; notably sites within the Dover urban area, Whitfield, Deal, Sholden and Sandwich.</p> <p>5.2 The Dover District Council Plan justifies its housing allocation growth on the grounds of identified need in line with NPPF and the Department of Levelling Up Housing and Communities criteria and as such has identified a number of choices for housing based on supply, demand, windfall sites etc. As a result, a number of small development sites have been identified throughout the District including one in Alkham as well as a plan for a major Urban expansion site at Whitfield.</p> <p>5.3 The District Plan identifies a requirement for an additional 42 traveller pitches throughout the district and identifies two such pitches in Alkham and three others elsewhere.</p> <p>Comment 5 New Homes (DDC Plan – 7)</p> <p><i>a) The council and community would appreciate being included in any development plans in Alkham and ask to be informed well in advance of any plans for housing or sites in the Alkham Valley, so we can provide our proposed residential plans and constructive advice on the current infrastructure and impacts on the community.</i></p> <p><i>b) I must raise severe concerns re the planned development at Whitfield</i></p> <ul style="list-style-type: none"> <i>• The DDC highlights the requirement for 6350 homes at Whitfield stating that this will be supported by education, primary health and social care, utility services retail and leisure provision as well as the development of the Whitecliff Business Park area at Whitfield which will not only have retail but also light industrial and haulage uses.</i> <i>• The Plan talks at length on the landscaping and it highlights transport networks and in particular references the upgrades required for the Whitfield and the Duke of York Roundabouts It also says that consideration must be given to the local transport links, the Alkham road, the A256 and Whitfield Hill</i>

	<ul style="list-style-type: none"> • This matter was raised in 2014 when the Transport Plan for 2015 -2030 was adopted and no action was taken. • Since that time traffic along the Alkham Valley has hugely increased. Representations have been made to the local MP, KCC and a Highway improvement plan submitted all to no avail. • The current plan makes a flawed assumption that householders and businesses will access routes to London via the A20/M20 or A2/M2 whereas in reality they use the Alkham Valley Road , a DECLASSIFIED Road to access the M20. This matter is the subject of more detailed comment later in the report under transport. <p>c) As housing increases traffic will continue to expand and radical options to consider the Valley a green space in the middle of urban development with road only open for business residents leisure use and emergency vehicles offering a range of bridleways, walks, cycle routes should be explored. This type of scheme has been successfully carried out in other areas such as the Goyt Valley Derbyshire and can lead to vibrant rural community improved air quality and improved traffic management.</p> <p>(DDC note - The full representation from Alkham PC is attached to representation SDLP1653. However, specific comments from the full representation document have been extracted into separate consultation points/policy areas, relevant to the comments made)</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Representation submitted by Hume Planning. Full Representation attached to SDLP1587. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1587.) SP3: Housing Growth Whilst we welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period, it is considered additional sites, if suitable and available, should be included within the Plan. A large proportion of growth is being directed towards Dover with further units at Whitfield (over 2,000) and with large strategic sites, delivery rates can easily slow down during the plan period and under-deliver. Whilst there is a buffer within the Plan, it is considered appropriate not to use this as a limit and allocate other suitable sites in sustainable locations where available. In this respect, it is noted that Deal sits towards the top of the settlement hierarchy, as the district's only District Centre. Yet, due to the perceived constraints in Deal, only 223 units are being allocated in this settlement compared to over 600 in Aylesham, which is a settlement located lower down the settlement hierarchy. As detailed above, land off Station Road is considered suitable for residential development for some 75 dwellings which would help to slightly rebalance the spatial strategy more toward Deal which is considered to be justified. It is also available and can be delivered by Sunningdale within the short term (as an extension to the early phases that are already under construction) and, in our view, this site should be allocated within the Plan.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Full Representation attached to SDLP1883. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1883.)</p> <p>(DDC Note - rep states SAP1 however more appropriate to SP3)</p> <p>Draft Site Allocation Policy 1: Non-Strategic Housing Allocations- COMMENT NPPF Paragraph 69 sets out small and medium sized sites can make an important contribution to meeting housing requirement. These sites are often built-out quickly. It is noted that non-strategic sites have been allocated through Draft Policy SA Policy 1. However, there are few sites of 100 – 200 units whereby additional benefits can be accommodated and delivered as part of planning consent. As set out above, it is considered that the DDC's Spatial Strategy is too reliant on the delivery major allocations and other larger sites. Therefore, it does not meet the requirement (b) set out at NPPF paragraph 16 which states that plans should be: "Prepared positively, in a way that is aspirational but deliverable". Instead, the Local Plan should identify further medium sized sites of 100-300 units which are able to be deliver quickly and provide wider community benefits. These type of development could be provide across Local Centres and Larger Villages allowing for gaps in housing and infrastructure needs to be met across the District.</p> <p>Recommendation: DDC reassess their Spatial Strategy and provide more medium sized sites across Local Centres and Larger Villages. This will ensure that the housing need is deliverable. The Local Plan does not seek to allocate any sites within Ash and instead DDC is relying on housing allocations in the neighbourhood plan. NPPF paragraph 30 states:</p> <p>Once a neighbourhood plan has been brought into force, the policies it contains take precedence over existing non-strategic policies in a local plan covering the neighbourhood area, where they are in conflict; unless they are superseded by strategic or non-strategic policies that are adopted subsequently.</p> <p>The Ash Neighbourhood Plan was Made in 2021 and prepared with the currently Adopted Local Plan. Once adopted, the Local Plan will supersede the policy within the Ash Neighbourhood Plan. DDC needs to ensure that the sites allocated within the Ash Neighbourhood Plan do not conflict with the newly proposed policies within this draft Local Plan or updated national policy to ensure the allocated sites are deliverable. Therefore, DDC should undertake a comprehensive assessment of all sites available within Ash to ensure the most suitable and deliverable sites are allocated within Local Plan.</p>

	Recommendation: DDC undertake an assessment of all sites within Ash and allocated site that are able to deliver housing and employment opportunities to meet the needs of the district in accordance with the draft policies set out in the Local Plan Review.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1860.)</p> <p>REPRESENTATION TO THE DOVER DISTRICT LOCAL PLAN REGULATION 19 CONSULTATION IN RESPECT OF THE SPATIAL DEVELOPMENT STRATEGY AND DEVELOPMENT MANAGEMENT POLICIES</p> <p>Iceni Projects, on behalf of Quinn Estates, welcomes the opportunity to submit representations to the Dover District Local Plan (Regulation 19 Consultation). Quinn Estates is one of the leading and most prominent developers in Dover, with the company promoting a range of development projects of different scale and complexity around the District. Economic, social and environmental growth and regeneration underpin all of Quinn's projects and the company always strives to work with local communities and the District Council to deliver transformational development that unlocks growth and inward investment into the District to forge significant societal benefits.</p> <p>Quinn Estates has submitted a number of separate representations to the Local Plan that are specific to individual sites, but this representation is made against the strategic policies and development management policies that are set out in the Plan, rather than site specific allocations. Quinn Estates wants the Dover District Local Plan to serve as an effective and sound Development Plan for the long term, and would like to be able to support the Council in delivering development that is wholly consistent with the District's strategic aims and objectives. Whilst the majority of the Plan is wholly supported, there are considered to be elements of the Plan that in their current form, affect the Plan's soundness, and these are articulated in the representation below.</p> <p>a. Policy SP3 and the Housing Distribution in Policy Table 3.3 Housing Quantum being Positively Planned</p> <p>Quinn Estates acknowledges the approach taken in formulating the minimum housing requirement for the District, with the minimum quantum of 10,998 homes considered to be in conformity with the standard method. However, in order to deliver the vision and objectives of the Plan, specifically the objectives of achieving growing a more prosperous economy, creating new and more vibrant communities and thriving places, it is considered that a greater level of housing is required in the Plan and a more proactive and positive spatial approach, especially at settlements such as Deal, which have been neglected and where the general principle of attributing growth based on the settlement hierarchy has been abandoned.</p> <p>Table 3.1 outlines an overall housing supply of 11,924, building in a contingency of 924 homes between supply and minimum housing need, which equates to 8% of need. The size of this buffer is</p>

not considered to be large enough, given the heavy reliance on a single location (the Whitfield Urban Expansion) to deliver such a significant proportion of growth. A buffer of around 20% is considered to be necessary and therefore Quinn would respectfully request that the Plan be amended to positively plan for and identify land for a greater level of housing. This is considered to be easily achievable through revisiting sites that have not been identified for development and reviewing those sites that have to consider their suitability for accommodating more homes. Quinn has a number of landholdings in the District that have been identified for housing in the Plan with the development capacity to unlock further housing, as well as landholdings that have not been selected for development that offer the potential to achieve high quality, sustainable development outcomes that would improve the overall spatial strategy of the Plan and correct this important issue of Plan soundness.

The Distribution of Housing

The Council's Sustainability Appraisal option testing reveals that the most strongly performing spatial option would be a combination of Option C (distributing growth by settlement hierarchy) and Option D (distributing growth in Dover town-centric way based on the existing Plan approach). However, the spatial strategy has veered away from the most strongly performing option by focusing growth away from the second most sustainable settlement in the District - namely Deal - despite the very clear evidence of need for homes and employment at this location. Quinn Estates considers that under the current draft plan, Deal's evident importance as settlement is not being reflected by commensurate amounts of growth being directed to it. It is clear that the constraints that do exist around the settlement should not preclude significantly more growth to come forward than has been identified for the settlement, as is demonstrated through site specific representations.

Making positive provision in the Plan for growth at Deal, subject to robustly resolving environmental constraints, should be considered through additional site allocations, and site specific representations have been made concerning land at Deal that we consider to be highly suitable for development and which should be proactively and positively identified for development in the Local Plan. However, if further allocations are not to be made as part of the current Local Plan, it is respectfully suggested that revision of Policy SP3 should be made as follows, to reinforce the importance of Deal as part of the District's long term spatial strategy and to cross-reference Policy SP4:

"Housing Growth Provision is made for at least 10,998 net additional homes, in the District over the Plan period. In order to achieve this target, additional housing sites are proposed to provide choice and competition in the market up to 2040.

The housing target will be met through a combination of committed schemes, site allocations and suitable windfall proposals, which could comprise traditional windfall sites within existing settlements or extensions to settlements where the growth is commensurate with the size of the existing settlement, in accordance with Policy SP4.

The majority of new housing development will be in Dover Town and at Whitfield. Land is therefore identified to deliver a minimum of 3,381 homes in addition to existing commitments. Development will then be focused in the District Centre of Deal, and the Rural Service Centres of Sandwich and Aylesham. Development in Deal, Sandwich and Aylesham will be at a more limited scale than Dover Town, compatible with the more limited range of job opportunities, shops, services and other facilities available in these locations. There may be scope for additional growth over and above that identified in the Plan at Deal, but this would be subject to addressing environmental constraints. Land is therefore allocated to deliver in the region a minimum of 1,099 homes, in addition to existing commitments...

i. Conclusion

6

Quinn Estates wishes to support Dover in bringing forward a successful, effective and sound Local Plan that can serve the District across the Plan period. In its current form, it is considered that amendments are required and that the following Strategic and Development Management policies should be amended:

- Policy SP3;
- Policy SP4;
- Policy SP6;
- Policy CC8;
- Policy PM3;
- Policy H5;
- Policy E1; and
- Policy E4

Quinn Estates would welcome the opportunity to participate in the forthcoming Examination-in-Public in respect of the above policies, as well as the opportunity to attend sessions related to individual settlements where the company has a land interest, as profiled in site-specific representations that have been made to the Regulation 19 consultation.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s)

you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Quinn Estates is a developer with significant land interests in the District, who has an important role in delivering the Plan strategy

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as	<ul style="list-style-type: none"> • Immoral to use grade 1 / 2 for new developments. X field sites are available • Unsuitable development in South East with no infrastructure in place, high demand on doctors, hospitals/schools • Highway safety

possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

Legal Compliance (1)

Land use. Grade 1 and 2 high grade agricultural farmland is being used for new housing developments because it is cheaper and quicker with housing speculators making huge profits with greenfield house building schemes. This is immoral. The Campaign for Rural England's (CPRE) latest report confirmed there are plenty of disused sites available for new homes, especially in places people want to live. 965,000 new housing units could be accommodated on currently registered brownfield land. Farmland ('food security/sustainable farming') is for growing food/raising livestock (with UK high standards of animal welfare)/flood plains. Concreting over farmland is not adapting to climate change with its increased rainfall, flooding and droughts. Cheaper imports of food are causing English farmers to go out of business therefore selling their farmland. The impact on biodiversity, particularly birds and invertebrates, is huge. The importance of field margins, trees and isolation contribute to their existence.

Soundness (2)

- 1 This plan does not achieve sustainable development (11,000 houses) in the South East and is unjustified. Areas within the South East, particularly Deal, are already overdeveloped. The 'Garden of England' is becoming a 'Concrete Jungle'
- 2 Brownfield sites (see above), as identified by the Campaign for Rural England, give alternative sites across the country. More housing and businesses should be built in the Northern areas contributing to 'levelling up'. The South East is being 'swarmed' by housing, local traffic congestion and population increases put huge demands on doctors, hospitals, schools etc. quotas should be reduced. New housing, with built in 'green' features, should serve 'local' needs.
- 3 unsustainable development. Government quotas are being decided by those not understanding local areas, local roads, traffic etc. and the implications of massive housing developments upon surrounding areas.
- 4 Type of development should be those with small carbon footprint such as modular-constructed modern homes and small developments. Traditional constructed houses produce massive waste resulting in huge carbon footprint: - example Guildcrest Homes, in their development of White Post Farm, used tons and tons of concrete due to problems with the high-water level content (flood plain).

Duty to cooperate (3)

Localism Act 2011. Residents 'know their patch'. Small areas for biodiversity, open spaces, landscape features are important and the need for housing must be plan led. Despite valid points in objection letters planning permission is usually granted ignoring local views. Results are loss of biodiversity; local village roads being used as 'rat runs' and speeding particularly on the A257 resulting in two Ash residents' death this year. Rogue farmers ripping out important habitats during the breeding season with nests of red listed species: - turtle dove, sparrow, starling, mistle and song thrush destroyed and the annihilation of every living creature. Local authorities have done nothing to address this destruction (do they even care?). government ministers should hand back power to the local people to scrutinize and influence planning decisions. They are deciding what gets built and where with Clause 83 giving favour of the national development management policy which should be scrapped otherwise quick-fix developments will be imposed on local people against their will.

Betteshanger Country Park. In 2004 section 106 was for a Nature Park which did not materialize and wildlife 'hotspots' are now to be developed for housing by Quinn estates despite objections (Localism Act) by local people, the RSPB and Campaign for Rural England. To now consider a hotel development for an aquapark is preposterous (we have one in Sandwich, why do we need another one?). Plant trees, trees and more trees and involve local school, clubs, and local people in the process. Betteshanger is a Country Park and stronger protections for wildlife and open spaces for people are essential. European Law does nothing to address the above issues and is not fit for purpose. Stronger protection for biodiversity is critical.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful

- Reduce quota of housing for stash
- Use brown field sites
- Protect farmland needed to grow food
- Protect biodiversity – local people know their 'patch' localism
- Also breaches highway safety

if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

(DDC Note - Representation submitted by Hume Planning. Full Representation attached to SDLP1460. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1460.) Whilst we welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 seeking to provide at least 10,998 net additional homes over the Plan period, it is considered smaller size additional sites, if suitable and available, should be additionally included within the Plan (especially where high scoring in the HELAA such as this site). This is because a large proportion of the plan's growth is again being directed towards Dover,

with further units at Whitfield (over 2,000 dwellings), and also Aylesham. With large strategic sites delivery rates can easily slow down during the plan period and under-deliver. This has been evidenced by the track record of slow delivery rates at earlier phases of planned development at Whitfield upon which previous approved development plans were very heavily reliant; a factor that explains the very high contribution of windfall opportunities to housing land supply over the last 15 years. Whilst it is acknowledged that there is a planned buffer within the emerging Local Plan, it is considered appropriate not to use this as a limit, and allocate other suitable sites in sustainable locations such as Preston where available. Whilst it is acknowledged that emerging SP4 'Residential Windfall Development' allows for residential development or infilling of a scale that is commensurate with that of the existing settlement will be permitted within or immediately adjoining the settlement boundaries of Preston, subject to all of the listed criteria being met, it is considered preferable, in order to allow more certainty for small housebuilders (for the site-specific reasons outlined below and the positive HEELA scoring compared with other land opportunities), that the site is individually allocated. We believe will provide more certainty and accelerate housing delivery.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Full Representation attached to SDLP1520. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1520.)</p> <p>SP3: Housing Growth</p> <p>We welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period. Within the Policy, reference is made to the Council's overall spatial strategy i.e. the majority of growth will be focused towards the principal town, Dover, and the nearby further expansion of Whitfield. It is appropriate that medium/smaller sized settlements in the district, i.e. local centres such as Wingham, receive some growth to sustain their role in the settlement hierarchy over the plan period, serving the needs of its own residents and those within surrounding villages and hamlets and also to provide a good choice of sites. Wingham contains a range of local services including a primary school, a local food store, a pub and Post Office facilities. The allocation of around 100 dwellings across various sites is therefore considered appropriate for this settlement when considering its role in the settlement hierarchy. A large proportion of growth is being directed towards further expansion of Whitfield (over 2,000) where delivery rates in the past have not matched the local plan housing trajectory. Large strategic sites delivery rates can easily slow down during the plan period and under-deliver. Whilst there is a buffer within the Plan, it is considered appropriate not to use this as a limit and allocate other suitable sites in sustainable locations where available.</p> <p>Wingham is a sustainable location for growth and delivering a choice and this allocation is attractive to smaller housebuilder. The expansion of the settlement in other directions is constrained by flood risk, access, landscape and heritage considerations which are constraints which do not affect this site (if the assumption that KCC will support the detailed pedestrian crossing design which was its position at the recent Informal Hearing). It was established through the work undertaken as part of the recent planning application and support of LPA Officers that the Gobery Hill site is considered suitable for residential development. It is also available and can be delivered within the short to medium term, and in our view this site should be allocated within the Plan.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1915.)</p> <p>Iceni Projects, on behalf of Quinn Estates, welcomes the opportunity to submit representations to the Dover District Council Local Plan Regulation 19 Consultation in respect of a strategic proposal at Cottington (herein referenced as 'the Site'). This representation should be considered alongside and with regard to supporting technical appendices to this letter which comprise:</p> <ul style="list-style-type: none"> • Appendix 1 – Sketch Site Plan • Appendix 2 – Local Connectivity Plan • Appendix 3 – Transport Appraisal • Appendix 4 – Actual and Residual Flood Risk Plans <p>Collectively, these documents demonstrate that high quality growth of a scale commensurate to Deal's position within the settlement hierarchy can be suitably and successfully delivered at Deal. The proposals are a revision of the site previously put forward as part of the original Call for Sites and subsequent Regulation 18 Consultation, which included land within Flood Zone 3. The revised Masterplan is for a reduced level of growth that could be delivered in a way that successfully adapts to and mitigates against environmental issues at Deal. The scale of the proposal has been revised significantly throughout the Local Plan process, initially proposing 975 dwellings, the current submission now proposes up to 585 dwellings and addresses all constraints previously identified, including flood risk, wildlife designations and transport.</p> <p>The vision for the Draft Local Plan reflects the growing importance of new challenges facing local communities in regard to climate and ecological emergency, and greater emphasis on the protection and enhancement of retail, leisure, cultural and commercial development across the district</p>

area, and promoting the health and social wellbeing of communities. The corresponding objectives strive for a more prosperous economy, as well as vibrant new communities. Quinn Estates considers that there is much to welcome in the new Plan, however, the company considers the opportunity to deliver an appropriate and badly needed quantum of growth at Deal has not been positively planned for, and that the Plan would be strengthened by promoting additional growth at Deal.

Quinn Estates considers that its proposal at Cottington presents a unique opportunity to deliver a transformative development of value to the District and that it should accordingly be allocated within the new Local Plan for residential led mixed-use development to contribute towards meeting Dover District's housing and employment needs over the Local Plan period to 2040.

a. The Site and Surroundings

The wider Site comprises approximately 200ha of land in various uses including agricultural fields, and fishing lakes and a country park (Betteshanger Park). The Site adjoins Sholden and Deal to the south, beyond the settlement boundary. The Site is bound by Sandwich Road (A258) and agricultural fields to the west and by agricultural fields and Fowlmead Farm to the north, with further fields and the HS1 rail line also located further to the east. To the south it is bound by the existing residential dwellings at Sholden and Deal. The land immediately to the south-east of the Site is currently being constructed for 230 dwellings by Persimmon Homes (planning permission ref. DOV/10/1012 and DOV/13/00945).

The Site is relatively flat, with the exception of Betteshanger Country Park which includes undulating landscaped areas of the former colliery spoil tip. The Site boundary excludes Cottington Court Farm and its curtilage. A Public Right of Way (PRoW) cuts across the Site from west to east around the edge of the residential dwellings at Sholden and along the bottom of the fishing lakes. The Country Park also includes a number of walking routes alongside mountain biking trails and a road cycling track. Existing access to the Site is from Sandwich Road to the west of the Site. Deal train station is located 1.5km walking/cycling distance to the east of the Site.

Most of Betteshanger Country Park and the fields fronting onto Sandwich Road are in Flood Zone 1. Whilst the land to the rear of Cottington Court Farm and the fishing lakes across to South Wall are located within Flood Zone 2 and 3, this land is mostly benefitting from flood defences. The Site is wholly within the Lower Stour Wetlands Biodiversity Opportunity Area, whilst the fishing lakes are located within the Sandwich Bay to Hacklinge Marshes SSSI and the Thanet Coast & Sandwich Bay Ramsar. These designations also incorporate land to the north-east and north-west beyond the site boundaries. The Thanet Coast & Sandwich Bay SPA is also located to the north-east of the site

b. The refined Site proposal

The Site was previously promoted in a different and larger form in the earlier stages of the Local Plan development but was not progressed due to matters of flood risk and drainage. Detailed work has been undertaken to demonstrate that Cottington is deliverable and that the potential constraints identified can be overcome.

The refined Masterplan for Cottington proposes the delivery of up to 585 new homes for Deal, and 2,030sqm of commercial floorspace in the northernmost parcel of the scheme. Cottington will also provide new premises to support the work of The Dover Outreach Centre charity to help rough sleepers, the homeless and those threatened with homelessness. Securing premises will be a crucial step for the charity to support their existing work. Cottington would also deliver new facilities for Deal and Betteshanger Rugby Club and secure funding for new facilities for Deal Town Football Club at their current location ensuring that both clubs can grow and expand their sporting offer, community use and outreach programmes. In addition, the Cottington proposal would also fund improvements for Deal Rowing Club at their current premises on Deal seafront.

Crucially, Cottington will have a fully independent drainage network adopted by a statutory undertaker to the point of discharge including environmental permits. Quinn Estates are in advanced discussions with Severn Trent Connect on this deliverable solution which would enable housing growth around Deal town to be unlocked without increasing the flow and burden on the Southern Water network in Deal and relieving residual pressure for higher levels of development in close proximity to smaller settlements within the district. It is also proposed that the Site delivers a primary school, complimentary commercial floorspace and an electric bus park and ride facility alongside a network of pedestrian and cycle infrastructure to stimulate sustainable travel patterns and strengthen connectivity between the settlement of Deal and the natural environment that adjoins it, including an expanded Betteshanger Country Park. The concept of creating a new community on the subject land is an intrinsic component of a wider strategy to establish Betteshanger Country Park as a thriving and successful health and community asset for the District.

c. Objection to Tables 3.3 and 4.2 (under the auspices of Policy SP3)

Quinn Estates considers that the spatial approach to the allocation of housing in Deal, as detailed in Tables 3.3 and 4.2 of the Regulation 19 Submission Version of the Draft Local Plan is not a result of sound plan-making. Quinn Estates consider that additional growth should be directed to Deal to reflect its position in the settlement hierarchy, deliver badly needed growth at the settlement and a more sustainable pattern of development. Accordingly, additional sites must be allocated to Deal in Table

4.2. The current approach to the development strategy raises several issues which can be addressed through the allocation of additional housing and employment growth to Deal, including the Site subject to this representation.

Sustainable distribution of growth

Sustainability is defined as 'meeting the needs of the present without compromising the ability of future generations to meet their own needs', and functions as a confluence of social, economic, and environmental factors. The vision for the District outlined in Paragraph 3.29 requires new development to be focused at accessible and sustainable locations which can utilise existing infrastructure, facilities, and services and to ensure that development contributes to the sustainability of local communities and services. When translating sustainability into site allocations, the Council should therefore ensure that new residents can reach established nearby town centres using sustainable modes of transport, to limit pollution arising from motor travel and to support the vitality of the existing community and local economy, without creating environmental harm.

Deal is recognised in the Draft Local Plan as the second largest settlement in the District, benefitting from a vibrant town centre, which benefits from a good level of accessibility and an attractive environment. It's well used by residents and visitors and has a low vacancy rate, as a result of the diverse retail offer. In addition, the town is highly sustainable in regard to public transport accessibility, being served by mainline rail, the high-speed train service to London and numerous bus routes. As the Transport Assessment appended to this letter notes, Deal has good connectivity within the town, as well as with wider areas in Kent and London.

Despite the sustainability of Deal, the Draft Local Plan approaches development for the town with caution. A total of 7 sites are allocated for development with a combined housing number of just 218 dwellings. This growth quantum is completely inconsistent with Deal's position in the settlement hierarchy and constitutes a disproportionately small increase in the town's size, given its population of circa 30,000. Moreover, the growth quantum assigned is more akin to that of a rural settlement with limited services, population and potential to achieve sustainable development.

It is our contention that the level of growth identified for Deal is insufficient for its position as the second most sustainable location in the District, and that the Council's strategy has skewed large amounts of growth away from one of the most sustainable locations to areas that are far less sustainable, with rural areas with lesser sustainability taking a higher housing number than the second largest settlement. The justification for channelling so little growth to Deal is not considered to be justified by evidence, when all the evidence points to the settlement being such a logical and sustainable location to channel growth to. The principles of sustainability and sound plan making appear to have been absent in key decision taking over spatial choices at the heart of the spatial strategy presented in the draft Plan.

Deal's connectivity to public transport and strategic highway infrastructure means that the settlement clearly offers greater scope to sustainably accommodate growth than has been identified in the Plan.

Quinn Estates recognises that there is land with environmental constraints at Deal, but the land at Cottington represents a significant strategic site that can sustainably and successfully deliver a vibrant mixed-use community in a manner that respects and mitigates environmental constraints and this opportunity has been overlooked in the preparation of the Plan.

Addressing identified constraints

Paragraph 4.153 of the Draft Local Plan states that 'limited site allocations have been identified in Deal due to the constraints that exist including: flood risk, wildlife sites, heritage and highways. In accordance with SP3, development in Deal should be compatible with the level and range of job opportunities, shops, services and other facilities available.' We contend that the constraints identified by the Council as the cause for the lack of site allocations to Deal are typical constraints facing any seaside town, namely flood risk, wildlife sites, heritage and highways. These constraints should not be considered insurmountable as to rule out housing growth for Deal.

The suite of technical assessments submitted with this representation letter outline how constraints at Cottington can be appropriately addressed to deliver a sustainable mixed-use scheme. The proposals for the Site have been refined to remove land from areas of residual flood risk, as detailed in the plans appended to this letter. The Transport Appraisal outlines how highways and traffic do not represent a significant constraint for Deal, stating:-

The modelling confirms earlier assertions that the traffic network in Deal is not currently, nor is forecast in the future, to be subject to significant capacity constraints. Furthermore, it is anticipated that the current and reduced development quantum on the site would result in a slight improvement in the operation of the surrounding network compared with the higher quantum incorporated within the model assessment. Although the development proposal focuses on supporting and encouraging a wide- spread shift of travel patterns to sustainable modes, it will also seek to have a minimal impact on the highway network.'

Moreover, the Transport Appraisal finds that the proposed development would not result in severe impact on the local highway network. The development would deliver an extensive and innovative package of sustainable travel measures, including a car-free Sustainable Movement

Corridor linking the development directly to the centre of Deal, prioritising movement for walking, cycling and by electric bus, supporting a wider shift in transport patterns to active modes, as well as relieving pressure on the A258 movement corridor into and out of Deal town as stated in the extract from the Transport Appraisal below:-

'The development would deliver an extensive and innovative package of sustainable travel measures, including a car-free Sustainable Movement Corridor linking the development directly to the centre of Deal, prioritising movement for walking, cycling and by bus. This will be supported by a Sustainable Movement Hub allowing the benefits of the new corridor to be used by others travelling to the centre of Deal and allow such trips to be intercepted and mode shifted before entering the town – reducing car travel and improving connectivity on the A258 corridor.'

The scheme proposes substantial open space and ecology habitat provision, including new semi-natural open space within existing arable land whilst securing long-term ecological management of the existing Betteshanger Country Park and Cottington Lakes.

Approximately 13ha of natural open space is proposed in association with the residential development parcels, forming areas for new habitat creation including wildflower grassland, mixed scrub and woodland planting and pond creation. Based on habitat creation within these areas, it is considered that a biodiversity net gain of up to 20% can be achieved within the development parcels alone.

Cottington Lakes, totalling around 50ha, is to be established as a dedicated area for wildlife and ecological enhancement, with measures such as naturalising existing fishing lakes and sensitive grassland and woodland management providing substantial wildlife benefits. The development would enable enhanced management of the existing Betteshanger Country Park in accordance with its various open space, cultural and wildlife interests, allowing for a site-wide ecological management plan, additional wardening and habitat enhancement projects.

Together, these measures will provide in the region of 150ha of open space, forming a substantial green infrastructure resource linking to existing wildlife habitats within the surrounding Sandwich Bay ecological designations.

The key site constraints referenced by the Council when discounting the site at Regulation 18 stage have therefore been addressed, and we respectfully request that the reduced and revised scheme is re-assessed.

The Council's assessment of land at Cottington

As part of the preparation of the Local Plan the Council identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA), which provides an assessment of how different options perform in environmental, social, and economic terms, to help inform which option should be taken forward. The Council's Sustainability Appraisal scores the principle of housing at the wider proposal for this site positively across effects on housing, access to services and facilities, economy, sustainable transport and climate change mitigation (site ref: DEA012A). The employment proposals for the Site similarly score well.

The sustainability of the Site is clearly demonstrated in the Transport Appraisal submitted with this representation, which concludes that development of the Site represents a 'forward-thinking proposal, bound into a strong sustainable ethos with the inclusion of a package of sustainable transport measures.' The sustainable movement corridor proposed for walkers, cyclists and buses will provide an attractive, purpose built, shorter alternative route to Deal town centre. This will benefit both new and existing residents at Deal, as well as opening up options for current users of the A258, potentially relieving pressure on this corridor into the town.

Whilst the site scored poorly on flood risk, the assessment considered a land area to accommodate in the region of 1,200 homes, with no consideration given as to whether a lower level of growth could be accommodated outside of areas of actual and residual flood risk, as currently embodied by the Cottington proposal.

New market and affordable housing delivery

Paragraph 35 of the NPPF outlines how plans are effective where they are found to be deliverable over the plan period. The disproportionately high dependence on Whitfield Strategic Allocation (SAP1) results in a plan which raises considerably uncertainty as to this key soundness test.

Quinn Estates has no objection to large-scale housing development at strategic sites playing an important role in meeting housing need. However, what looks good on paper needs to deliver in practice. However, in a District like Dover where there is a need for the benefits of growth to translate across the District, the spatial strategy should be seeking to unlock growth and inward investment at other key settlements, such as Deal, and this is a significant weakness of the Plan in its current form.

Spatial strategies should reflect that building homes is a complex and risky business. Stronger local markets have higher annual delivery rates, and where there are variations within districts, this should be factored into spatial strategy choices. Further, although large sites can deliver more homes per year over a longer time period, they also have longer lead-in times. Research by Lichfield1 found the average lead in time for large sites prior to the submission of the first planning application is 3.9 years

This issue with delivery is found to be the case with Whitfield. The delivery of Whitfield is hampered by its reasonably isolated location away from existing services and facilities. The allocation of this site has not been based on a demand for houses in this area, and has resulted in slow delivery, a need for huge infrastructure investment and public intervention for the new FastTrack rapid transit bus service to facilitate the site's sustainability.

Of the 5,750 dwellings proposed for the allocation, 3,483 dwellings are considered deliverable in the emerging Plan period. The Council acknowledges that the 2010 Core Strategy included provision for the Site to deliver 5,750 dwellings. Phase 1 of the SAP1 allocation (Dover ref. 10/01010) is underway and as of the 2020/2021 monitoring year, 185 dwellings had been completed with a delivery rate of approximately 50dpa for the past three years. Given this slow progress, it seems likely that although the existing outline planning permission should be completed over the Plan period, a more cautious approach should be taken in terms of the remaining dwellings allocated for the site given its proven issues in delivering housing to date.

Without clear evidence by way of a planning application for these additional dwellings, it is questioned whether Whitfield will ramp up to delivery of 120dpa from 2023/24 and then up to 200dpa from 2026/27 for the remainder of the Plan period. More consideration should therefore be made to the current planning position of the Site and the length of time it has taken so far to deliver housing. Paragraph 73D of the NPPF recommends the inclusion of realistic delivery rates within Local Plans, and the Council should therefore review those proposed for Whitfield and consider building more flexibility and more volume into the pipeline to be able to respond to delivery issues.

It is considered that, particularly with the deliverability issues of the Whitfield Urban Extension to date, additional sites should be allocated for housing to ensure that there is sufficient choice and flexibility in the supply so that the Council can meet its housing requirement throughout the Plan period, as well as to meet the Government's objective to significantly boost the supply of housing as set out in Paragraph 60 of the NPPF.

The delivery of affordable housing also paints a bleak picture within the District. The Council's existing policy on affordable housing, DM5 of the Core Strategy (2010), requires residential development of 15 or more dwellings to provide 30% of the total homes as affordable homes and the Council's affordable housing strategy remains unchanged, save for reducing the requirement to deliver affordable housing within Dover town. The latest Authority Monitoring Report (2020-2021) profiles how the affordable housing policy has consistently struggled to deliver sufficient levels of affordable housing, with the average being 20%. The failure to deliver sufficient affordable housing is set against a backdrop of worsening affordability in the District. Affordability ratios for Deal show a continued trend of worsening to 9.25 in 2021, with year-on-year worsening from 2012-2018. For the lowest earners, this reaches 9.62 in 2021. The District is less affordable than the national average of 9.05. Median house prices in the District have soared to £285,000, compared to the UK average of £278,000.2 In addition, statutory homelessness within the District sits at 137 people and 136 households, 68 with children, are in temporary accommodation within the District as of 2021.3 Whilst there may be a number of factors contributing to these outcomes, a new spatial strategy that identifies limited housing at Deal is going to deliver limited affordable housing at Deal and the absence of housing will only exacerbate local affordability pressures.

A compelling case can therefore be made for additional sites to be allocated for housing both at Deal and in the wider District to assist with alleviating the affordability issues facing the town and wider District. The development of Cottington would assist in ensuring a variety of housing sites are allocated in accordance with Paragraph 68 of the NPPF, the provision of circa 585 homes would be proportionate to the size of the town, and the provision of circa 176 affordable homes at Deal would likely have a significant beneficial effect in addressing local affordability needs.

d. Conclusion

On behalf of Quinn Estates, we thank you for the opportunity to contribute to the Dover District Local Plan Regulation 19 Consultation.

The current approach to the spatial strategy in the Draft Local Plan requires amendment to address a significant soundness issue concerning the level of growth identified for Deal, the District's second largest settlement. It is considered that the Plan currently fails to positively plan for a commensurate level of housing and employment at the settlement, as expressed in Policy SP3 and that the available evidence does not support or justify this approach. Moreover, the evidence does support channelling greater quantum of growth to Deal.

Quinn's proposal at Cottington constitutes a sustainable location for growth owing to its existing connections to public transport, proposed electric bus route, mixed use village centre, network of pedestrian and cycle infrastructure, relocated primary school and commercial floorspace to deliver a truly mixed-use scheme which would bring economic, social and environmental benefits to existing and future residents. The latest Masterplan can deliver a holistic development of significant benefit that addresses and sufficiently mitigates identified environmental issues at the settlement and the evidence profiling this opportunity enables the authority to evolve the Plan to provide a more commensurate level of growth to this important town.

	<p>Cottington represents the only sustainable and deliverable option at Deal to reflect the settlement's position in the hierarchy and for the settlement to play its proportionate role in meeting the District's growth requirement. The proposed development would provide early and accelerated delivery through multiple outlets, including affordable housing to address local affordability pressures, which the current draft Plan fails to address.</p> <p>Finally, as set out above and detailed in the appended documents, there are no significant constraints to the development coming forward as proposed. As such the site should be re-assessed against the new development proposal and using the updated evidence base provided. It is considered that if the Council undertake this work and consider the potential of Cottington to help Deal play a more proportionate role in meeting the District's growth in line with its position in the settlement hierarchy and status as a main town, a compelling case will exist for allocating the land for development in the emerging Local Plan.</p> <p>I trust that these comments are of assistance and that these representations will be taken into account in consideration of the current consultation. Quinn would also welcome the opportunity to participate in the forthcoming Examination-in-Public into the Plan and contribute to the debate to ensure that the best strategy for the District is found.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Allocate additional sites at Deal such as Cottington
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Iceni Projects Limited ('Iceni') is writing on behalf of Quinn Estates Ltd ('Quinn Estates') to submit representations to the Dover District Local Plan Regulation 19 Consultation in respect of land to the east of Great Cauldham Farm, Capel-le-Ferne ('the Site').</p> <p>These representations should be considered alongside the following supporting documents appended to this letter:</p> <ul style="list-style-type: none"> • Appendix 1 - Indicative Site Layout Plan; • Appendix 2 - Landscape Briefing Note; • Appendix 3 – Transport Note; and • Appendix 4 – Cultural Heritage and Archaeology Note. <p>Quinn Estates supports the allocation of the Site within the new Local Plan for 70 dwellings in order to support the Council's target of 11,924 homes over the Local Plan period to 2040. Nevertheless, as set out in further detail below, the Site can sustainably accommodate additional housing to deliver further dwellings in the Plan period, as demonstrated by the documents appended to this letter.</p> <p>The vision for the Draft Local Plan reflects the growing importance of new challenges facing local communities in regard to climate and ecological emergency, and greater emphasis on the protection and enhancement of retail, leisure, cultural and commercial development across the district area, and promoting the health and social wellbeing of communities. The corresponding objectives strive for a more prosperous economy, as well as vibrant new communities. Nevertheless, Quinn Estates considers that the approach to assessing settlements, and the resultant amount of housing allocated to settlements, is based on an ineffective method of understanding the sustainability of villages. Quinn Estates considers that the Plan would be strengthened by increasing the amount of housing allocated to settlements which can suitably accommodate such growth.</p> <p><u>a. Relevant Background</u></p> <p>Quinn Estates Quinn Estates is the south east's foremost mixed-use developer with numerous development interests within Dover District, Kent and the wider South East area. The company has delivered both successful community extension schemes and stand-alone development sites both within rural and urban locations within the District. Quinn Estates' track record of housing delivery should be a material consideration that should inform key planning decisions, including which sites to allocate for development. Furthermore, Quinn has demonstrated through its' actions that it can formulate and deliver development solutions of high community value, always working hard to identify through community engagement how the company's developments can support and strengthen communities by delivering community infrastructure needed. They have a track record of delivery in Dover, with over 200 new homes and 45,000 sq.ft of commercial space delivered.</p> <p>Site and Surroundings The Site adjoins the existing settlement of Capel le Ferne, though it is centrally located within the settlement given the proposed Site lies between Capel Street and Cauldham Lane. The Site is approximately 4ha and currently comprises farmland. It is located outside the settlement boundary as defined by the Core Strategy 2010.</p> <p>The Site is well connected to the local footway network with a footway running alongside Capel Street. The path is approximately 2.0m in width and provides links to the north and to the south as well as excellent connectivity to the centre of the village, including a network of interconnected public rights of way and bridleways.</p> <p>The Kent Downs Area of Outstanding Natural Beauty (AONB) borders the Site to the west and the Capel le Ferne settlement boundary bounds the site to the east. Notably, the landholding comprises the only land adjoining the settlement that lies outside of the AONB, which makes the land the best suited and the most sequentially preferable development option for the settlement. The Site is not located within a Conservation Area and there are no heritage assets or Scheduled Ancient Monuments within the site boundary. The whole of the Site is located within Flood Zone 1.</p> <p>To the north-west, the Site is bound by agricultural fields whilst the north-east corner is bound by residential properties. To the south and east of the site are further existing residential dwellings fronting onto Cauldham Lane and Capel Street. Existing dwellings also border the western boundary of the Site on the southern section and farmland on the northern section. The existing settlement is characterised by one and two</p>

storey dwellings. The rear gardens of the existing dwellings directly adjoin the Site. The gardens are generally substantial in size and therefore setback from Site.

The Site is well located in proximity to services, facilities, amenities and public transport making it a sustainable location for residential development. Capel le Ferne Primary School and Village Hall are located approximately 200m north-east of the Site (less than 5-minute walk), a convenience store is located less than 200m from the Site to south-east and so the most important components of a sustainable settlement are already in situ. In addition, the Site is served via nearby bus stops located on New Dover Road, approximately 200m to the south of the Site. The bus service runs every 15 minutes between Dover, Folkestone, New Romney, Rye and Littlestone-on-Sea and as such, there is a frequent and reliable public transport option to access a variety of high order settlements. This connectivity is an important and sometimes overlooked factor in determining the sustainability credentials of settlements such as Capel.

Capel le Ferne is defined in the adopted Dover District 2010 Core Strategy as a Local Centre providing a range of shops and services for the local communities and surroundings. There are also a variety of nearby employment areas including Folkestone and Dover that provide work opportunities for residents of Capel le Ferne and surrounding areas. Dover is the principal town in the District and therefore hosts a range of employment opportunities including those relating to the international port and retail related employment, whilst Folkestone is a sub-regional town in the Folkestone & Hythe Local Plan which provides “(inter-) national transport links, and a good choice of employment, retail, cultural/leisure and public services for the whole of the district, adjoining districts and visitors.”.

b. Response to Draft Dover District Local Plan

The draft Dover District Local Plan Regulation 19 Consultation seeks comments on the legal compliance, soundness, and compliance with the duty to cooperate of the Submission Version of the

plan. This section responds to the draft Local Plan and assesses its soundness in relation to the housing growth strategy (Policy SP3) and proposed allocation at Great Cauldham Farm (Policy SAP44).

Quinn Estates welcomes the inclusion of the Site within the Draft Local Plan for residential development. However, Quinn Estates consider that the Settlement Hierarchy, particularly for Capel- le-Ferne, is based on an assessment methodology which fails to appropriately assess the sustainability of the village. Accordingly, the village could accommodate additional growth and the Table 4.12 should be amended to propose a minimum of 70 dwellings on the site. The current approach to the development strategy raises several issues which can be addressed through the allocation of additional housing growth to Capel le Ferne, including the Site subject to this representation.

Housing Need and Supply

Table 3.1 of the draft Local Plan outlines an overall supply of 11,924 dwellings across the plan period. This equates to an 8% buffer over the minimum housing requirement derived from the standard method. This is proposed to be met through a combination of committed schemes, site allocations and windfall sites. This is not considered to be sufficient due to the over reliance on one strategic site - the Whitfield Urban Expansion.

Quinn Estates has no objection to large-scale housing development at strategic sites playing an important role in meeting housing need. However, what looks good on paper needs to deliver in practice. However, in a District like Dover where there is a need for the benefits of growth to translate across the District, the spatial strategy should be seeking to unlock growth and inward investment at other settlements, such as Capel le Ferne, and this is a significant weakness of the Plan in its current form. Paragraph 35 of the NPPF outlines how plans are effective where they are found to be deliverable over the plan period. The disproportionately high dependence on Whitfield Strategic Allocation (SAP1) results in a plan which raises considerably uncertainty as to this key soundness test.

Strategic scale sites typically have long lead-in times and often require infrastructure to be delivered up-front. As a result, they may not begin to deliver housing until the later in the Plan period. Smaller scale sites, such as the subject Site at Great Cauldham Lane, which is rightly allocated to ensure the plan is positively prepared in line with the requirements of the NPPF is supported. In this regard, Paragraph 60 of the NPPF highlights that “to support the Government’s objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed”. The allocation of the site at Great Cauldham Lane is supported by Quinn Estates, it can come forward early in the period, it is capable of delivering a mix of housing types and tenures and therefore makes an important contribution to local housing needs in the near future.

Quinn therefore encourages Dover District Council (DDC) to make every effort to meet, and if possible, exceed this target to ensure the Government’s objective to significantly boost the supply of housing can be met. As part of this a wide range of sites of different sizes and locations should be allocated to ensure choice and flexibility in the supply, in accordance with paragraph 67 of the NPPF. Sites such as Great Cauldham Farm should therefore be utilised to their full extent to reduce this over reliance on the Whitfield Urban Expansion to deliver housing across the plan period.

Settlement Hierarchy

Quinn Estates considers that the approach taken to the delivery of housing in Dover as set out within Table 3.3 of the Regulation 19 Submission Version of the Draft Local Plan is not a result of sound plan-making. It is considered that the Settlement Hierarchy inappropriately assesses settlements using a bizarre matrix system which does not reflect how residents use services, and the resultant ability for a settlement to support additional residential development and deliver benefits to existing residents.

The Council's evidence base for the Local Plan comprises a range of technical reports and topic papers including a Rural Settlement Hierarchy Study (2022). Quinn Estates are disappointed to note that the previous comments made at Regulation 18 stage have not been taken into account, and that Capel le

Ferne remains downgraded to a 'Larger Village' rather than as a 'Local Centre' as the 2010 Dover Core Strategy currently acknowledges. Within the 2010 Dover Core Strategy Capel le Ferne was identified as a Local Centre and therefore a secondary focus for development in the rural area; suitable for a scale of development that would reinforce its role as a provider of services to its home and adjacent communities.

The Rural Settlement Hierarchy Study is an important document, as it has clearly directly led to the spatial approach presented in the Plan. However, the methodology to assess the sustainability of settlements is flawed and consequently this undermines the soundness of the whole spatial strategy. A simple matrix exercise has been used to count the number of facilities within the settlement, yet limited consideration is given to the level or value of service these facilities provide or any objective and balanced measure of sustainability of settlement based on critical elements such as their characteristics or spatial relationship in relation to other settlements and connections to them. It is disappointing to note that this matrix exercise has been used again for the Regulation 19 draft of the Local Plan.

A quantified points system has been used in which each service is awarded a certain number of points based on the amount and range of facilities provided within the settlement. It is clear there are some significant shortcomings in using this inventory method to assess the sustainability of a settlement and thus determining its position within the settlement hierarchy. For example, each shop unit is worth one point whilst a primary school or train station is only worth three points in total. The result of this is a settlement could score points if it contains shops that do not provide an everyday service to the settlement, for example a car dealership or a furniture store. It is clear that these uses will make a limited contribution to sustainability, they have a limited day to day function, they make a negligible contribution to day-to-day sustainable travel patterns and indeed, if anything, they could serve to weaken the potential to achieve more sustainable travel patterns if such uses are sited at remote settlements. As such, the methodology inflates the sustainability credentials of some settlements, whilst failing to identify the high sustainability credentials of others. When considering the sustainability of the site, the Council should consider a settlement's respective connectivity to other settlements and the way that settlements inter-relate to support and foster sustainable development. This more nuanced qualitative approach was taken through the previous Local Plan Review, but appears to have been discarded in the current Plan review for no discernible reason. As such, the method used to review settlements calls into question the soundness of the Local Plan as it would not be considered appropriately justified under Paragraph 35B of the NPPF.

In the case of Capel le Ferne, the settlement is supported by its own services, as detailed the Housing and Economic Land Availability Assessment submission for the subject site in 2022, and the Sustainability Appraisal Appendix F 2022.

These services include regular bus services to Dover and Folkestone, general public store, public house, café, village hall, two churches, weekly farmers market and a primary school. This range of services meets the everyday needs of existing and future residents of Capel le Ferne and a new residential population would ensure that the vitality and viability and the range of local service provision is enhanced. Focusing growth at the settlement offers the potential to achieve highly sustainable development through a combination of the existing facilities at the settlement to meet a day-to-day convenience function, and the settlement's superb connectivity and proximity to the main town of Dover and the Sub-Regional town of Folkestone to provide sustainable access to a host of major employment opportunities. No other rural settlement boasts such connectivity to the two primary towns in this part of the County, yet this factor has been entirely overlooked.

Quinn Estates currently have land under option adjacent to the existing primary school for expansion. A larger allocation could provide the opportunity to include additional services, such as GP surgery, which is identified as lacking in the village. Nevertheless, this can only be delivered in tandem with additional housing allocation to support it.

The downgrading of Capel le Ferne from a Local Centre to a Larger Village is unsound and appears to have resulted in the development allocation at Great Cauldham Lane being reduced in size, to the detriment of the settlement and the District. Within the existing Dover Local Plan Capel le Ferne was identified as a Local Centre to 'reinforce its role as provider of services to its home and adjacent communities'. Therefore, the settlement was presumed to support the retention of existing services and attract new services within the area. The proposed downgrading of the settlement implies this objective has been met, although there is no evidence to support this. Capel Le Ferne should therefore continue to be identified as a Local Centre to continue to support this objective, with allocations such as that at Land east of Great Cauldham Lane being able to come forward to support this.

Given the range and suitability of the services available to residents in Capel le Ferne, along with its strong connections to employment centres via public transport, the settlement should be re-designated as a Local Centre. Moreover, the allocation of Land east of Great Cauldham Farm amended to a minimum of 70 dwellings to make full use of the site, strengthen the sustainability of the village and enable Quinn Estates to explore the delivery of additional services which would further enhance the settlement for existing and future residents.

Site Allocation Policy SAP44 – Land to the east of Great Cauldham Farm (CAP006)

Quinn Estates supports the allocation of the land to the east of Great Cauldham Farm within the draft Policy SAP44 for residential development. The site is available, suitable and achievable, as confirmed by the Housing and Economic Land Availability Assessment 2022. There are no obvious barriers to delivery, including that there are no constraints on the site such as ecology, trees, flooding and heritage, and the site is not dependent on the delivery of infrastructure before coming forward.

Quinn Estates consider that the land to the east of Great Cauldham Lane can comfortably accommodate additional housing. The appended Indicative Site Layout Plan details the ability of the site to accommodate up to 100 homes whilst retaining existing trees and hedgerows and providing sufficient screening along the western boundary of the Site, in accordance with the above assessment under the HELAA.

The Landscape Briefing Note submitted confirms that the site is more closely associated with the settlement edge than the open countryside to the north-west. It is considered that views are highly localised, and the visual envelope of the site is limited to a small area to the north. The site is not considered to be reflective of the special qualities or characteristics of the AONB, nor would the proposal bear any significant or detrimental impact on its setting. Furthermore, its redevelopment provides an opportunity to reinstate hedgerow planting that was lost due to intensive agricultural use and therefore a more sensitive transition to the AONB can be achieved.

Finally, it is considered to be a logical approach to extend the allocation further to the north, due to a localised dip in the land here meaning this part of the site is far less prominent and can ensure that a robust landscape buffer can be provided. Additional dwellings in this location are therefore suitable in landscape and visual terms, and the amendment of the allocation to 'minimum 70' can be supported. It is also significant to note that the site is the only site at the settlement outside of the AONB which can deliver housing, therefore, it is imperative that the Council makes best use of the site by expanding the allocation, or at the least revising the policy wording to a minimum of 70 dwellings.

A Cultural Heritage and Archaeological Scoping Report has been prepared in relation to the site and is appended to these representations. This Report confirms that there are no heritage assets on or near the site that would be directly affected by development. It is however considered that there may be archaeological remains, however it is not clear due to the limited archaeology works undertaken in the area. As such it is proposed that as part of any planning permission, a programme of archaeological evaluation would be agreed to confirm whether any remains exist, and any mitigation required.

This provision would enable greater benefits for the wider local community to be delivered, including:

- Contributing further to the local housing need;
- More affordable housing provision;
- Provision for community facilities;
- Increased amount of open space;
- Financially enables the delivery of the additional school land and potential GP surgery; and
- Opportunities to meet local self/custom build need

c. Conclusion

Quinn Estates wishes to support Dover in bringing forward a successful, effective and sound Local Plan that can serve the District across the Plan period. The allocation of the Site within the draft local plan is welcomed by Quinn and they are committed to delivering a successful housing scheme. However, Quinn seeks a minor amendment to the wording of the policy to support additional housing numbers on site, of which it has been demonstrated that the Site is suitable to do so.

It is considered that Capel le Ferne should be reconsidered as a Local Centre due to a number of factors including the facilities and services it currently provides, its proximity to Dover and Folkestone and its sustainable transport links to these settlements and the potential for future development to support existing and new facilities in the village. The matrix exercise used to determine the settlement hierarchy has taken a very narrow view on settlement sustainability and its position in the hierarchy must be reviewed. In this regard, it is recommended that the Council exercise planning judgement to ensure that the settlement hierarchy for the District reflects the potential to achieve and deliver a sustainable growth strategy.

The benefits of increasing the size of the allocation have been detailed as providing a more significant contribution to the housing needs for the local area, provision for a community facility and enhanced provision of open space. Given the range of benefits a larger allocation would be

	<p>able to provide, Quinn Estates request the wording of the allocation in Table 4.12 to be amended to a minimum of 70 dwellings to enable these significant benefits to be utilised by new and existing residents.</p> <p>We trust that the above amendment is acceptable to the Council and that these representations will be taken into account in consideration of the current consultation. We also confirm that Quinn Estates would welcome the opportunity to be involved in the forthcoming Examination-in-Public and contribute to the debate to ensure that the best strategy for the District is found.</p>

	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Hume Planning. Full Representation attached to SDLP1568. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1568.)</p> <p>SP3: Housing Growth</p> <p>Whilst we welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 committing to providing at least 10,998 net additional homes over the Plan period, it is considered additional sites if suitable and available should be included within the Plan. A large proportion of growth is being directed towards the expansion of Dover/Whitfield (over 2,000), and with large strategic sites delivery rates can easily slow down during the plan period and under-deliver. Whilst there is a buffer within the Plan, it is considered appropriate not use this as a limit, and allocate other suitable sites in sustainable locations where available.</p> <p>In this respect, it is noted that Deal sits towards at the top of the settlement hierarchy, as the district's only District Centre. Only Dover/ Whitfield sit above Deal. Deal is also an area that has attracted strong market demand which is a relevant factor to the delivery of the district's housing requirement. The emerging Plan due to the perceived constraints in Deal, only allocates 223 units in this settlement compared to over 600 in Aylesham which is a settlement located lower down the settlement hierarchy and the provision of a greater number of small sites such as this will inbuild choice and assist with the planned delivery trajectory.</p> <p>As detailed above, land off West Lea, is considered suitable for residential development. It is also available and can be delivered within the short to medium term, and in our view this site should be allocated within the Plan.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP3
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I am very concerned about the amount of developments scheduled in and on the outskirts of villages, as opposed to the government's dictum that Brownfield sites should be the main focus for developments. I note that many of the proposals in towns are designated as medium timescale whereas many in the villages are designated short term. I feel that the brownfield sites in towns should be developed first then, if needed, the villages should be considered.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Shepherdswell is not the place for large-scale developments, and I hope you will take this into consideration. If builders wish to build estates, they must be prepared to improve the infrastructure at their expense.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Representation submitted by Rubix Estates. Full Representation attached to SDLP1624. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1624.)</p> <p>POLICY SP3 – Housing Growth</p> <p>3.14 This policy deals with the housing strategy for the Plan period. It expresses clear linkages to the overarching vision for the Plan, and its objectives in focusing growth at sustainable locations providing greater choice of high quality and sustainable housing to meet identified needs.</p> <p>3.15 Need is derived from household projections and targets set by central government, here identified as at least 611 dwellings per annum, with a minimum of 10,998 new dwellings over the Plan period.</p> <p>3.16 The housing growth strategy at SP3 is geared towards delivery of such. This baseline position of meeting identified need is wholly supported. It is noted that the policy wording recognises 'a minimum of 10,998 dwellings over the Plan period'. It is considered that this wording is most appropriate in encouraging sustainable growth; a cap should not be applied.</p> <p>3.18 The Plan allocates a number of sites to ensure a consistent supply of housing to facilitate demonstration of a continuous five-year housing land supply. Again, it is pleasing that the Plan seeks to clearly satisfy this basic requirement. It is essential that the Plan is able to meet identified need, and the allocation of multiple sites across the Plan area at different scales should enable a reliable supply of dwellings to meet need – again as a minimum target only, rather than a capped 'ceiling' figure.</p>

	<p>3.19 The Settlement Hierarchy is supported, particularly as far as it concerns the higher order settlements as a Local Centre alongside Eastry, Wingham, Ash, Shepherdswell, St Margarets, Kingsdown.</p> <p>3.20 In recognition for its sustainability and its role as a Local Centre, Elvington & Eythorne is ranked highly within the district. It benefits from high connectivity and a range of services and facilities.</p> <p>3.21 It is a highly sustainable location for development and it is agreed that it's place in the Settlement Hierarchy sufficiently recognises this.</p> <p>3.22 It is considered that the apportionment of growth across the hierarchy is appropriate in distributing sustainable growth to support communities in multiple locations in the District. Table 3.3. of the Plan identifies that over 300 dwellings and employment land will be delivered in Elvington and Eythorne under the Plan.</p> <p>3.23 As an indicative figure, this ambitious level of growth is supported in realising the overarching vision for the District. Detailed commentary on the precise quantum of development to the settlements is not provided here, though it is emphasised that the aspiration of meeting growth in sustainable locations such as Elvington and Eythorne gains significant support from the Promoter.</p> <p>3.24 Assessment of precise scale and quantum of development will be undertaken at the application stage following a housing allocation, though the indicative capacity of over 300 dwellings across multiple sites in Elvington and Eythorne is supported.</p> <p>3.25 It should be noted however that revision to SP3 should look to clarify the meaning of 'disproportionate growth', which at present is too subjective to rely upon in the policy wording as drafted. Minor amendment may simply refer to [amendments in bold text]: "development that would result in disproportionate growth to any of the District's settlements, which cannot be supported by the necessary infrastructure and services or would result in a loss of services and facilities which are considered to be key to supporting local communities will be resisted".</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Yes</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>the Plan has not considered the potential of the settlements in the Dover-Deal corridor to provide distributed sustainable development. (DDC Note - Text extracted from Attachment)</p> <p>We are making submissions concerning land between Dover and Deal. We have made direct representations on the Coldblow site in Walmer (DEA009), and will be supported by another party, Esquire Developments Limited, who have options on other sites for early delivery. Over the past 3 years the progress of the draft Local Plan has seen some notable changes. You have sought submissions at this stage which portray the widest possible perspective. We believe that our proposals will help give security to the local plan and deliver a more sustainable settlement infrastructure.</p> <p>All of the land proposed can be rapidly delivered to the plan. Moving from Guston towards Deal along the Dover to Deal Corridor of land.</p> <p>1. Guston. Not in plan but available. We made a representation for 100+ hectares. We consider that this is the obvious “elephant in the room” in respect of the Dover Plan. There has been no effective consideration of our submission for this strategic site although the site fits plan policy criteria well. There are implications for: The housing target. The Lower Thames Crossing and the A2/M2. The HS1 route and the Railtrack Canterbury Link. The efficacy of the Fastrack System and the regions transport plan. The structural development of Dover Town and the UK’s face to the EU and Kent’s overall development. The change of policy whereby villages now should take forward part of the housing burden. Various options exist from one or more smaller sites of 10, through to fields adjacent to the Fastrack system that could accommodate 100 houses or more, right up to a mixed development of 1000+ houses that would see a new heart to Dover set about a new land transport node as we proposed to the current portfolio holder for planning and development.</p> <p>We have national house builders interested in the land and are surprised that officers from Colas have approached our client in respect of the land. Immediate opportunities which we can easily fulfil are the fields to the east of Dover Road and those that abut the A2 and Dover Road.</p> <p>2. Land at East Langdon. Not in plan but available. We are advised that the site promoted to the North West of The Street has significant challenges. We proposed a site to South East of The Street. Our site remains available and could provide benefits for the village and the school. We have a developer engaged and our client has signed an option agreement. Esquire Developments Limited made an appropriate representation.</p> <p>3. STM03 Land of Station Road St Margaret’s at Cliffe. In plan and available for early delivery. We have a developer engaged and our client has signed an option agreement. Esquire Developments Limited have made an appropriate representation.</p> <p>4. Land to the West of the A258 Ringwould. Not in plan but available. We received feedback from DDC suggesting that this was not appropriate for development. Lately the thrust of the draft plan changed, opening the door for developments to make the villages more sustainable. An alternative site with access challenges from Dover Road is being progressed in this parish. Esquire Developments Limited have been informed that it is too late to consider Ringwould for a medium scale development although the original proposals were made some 3 years ago.</p> <p>5. Small parcel of land to the North East of Church Lane Ringwould. Not in plan but available. We submitted a HELAA. DDC suggested that it was inappropriate. With the iterations the plan has been through the site now looks appealing. We have many developers interested many of which are local.</p> <p>6. Southwall Road. We believe a limited mixed development with a commercial leaning would be appropriate at this site and have interest from local, regional and national players.</p> <p>In respect of 1, 5, and 6 these are our representations In respect of 2,3,4 Esquire Developments Limited will respond to the consultation.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>inclusion of land at Guston and Ringwould in housing allocations</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Full Representation attached to SDLP1883. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1883.) Draft Strategic Policy 3: Planning for Housing Growth - COMMENT Strategic Policy 3 sets out the Council's current housing supply position and shows that in order to meet the Local Housing Need for the District, the Council will need to allocate housing sites in the Local Plan to deliver 3,316 homes over the Plan period. This number has been reduced since the Regulation 18 draft which made allocation of 5,288 homes. Draft Strategic Policy 3 confirms that in total the provision is made for at least 11,924 additional homes across the Plan Period (2020 – 2040) – the baseline growth. Dover Council makes provision of a buffer between needs and supply of approximately 8% which is not considered to be sufficiently large enough to ensure that needs are met over the plan period, especially given that around half of the homes will come from urban expansions. BDW agrees with the representations submitted by the Housing Building Federation (HBF) which states that a buffer of around 20% would be more appropriate, including the allocation of smaller sites which will deliver earlier in the plan period. This would also provide an

additional buffer in overall supply should there be delays in the delivery of the larger sites in Dover. The council should actively be seeking to boost housing in accordance with NPPF paragraph 60. NPPF paragraph 69 explains the important role that small and medium sized site can make in meeting the housing need and that they are often brought forward quickly. Thus, to ensure that sufficient housing can come forward within the early years of the Plan Period, further small and medium scale sites should be allocated. This will alleviate the risk of the larger allocations under-delivering within the Plan Period which is historically documented in the District. NPPF Paragraph 11 sets out that a Local Plan should apply a presumption in favour of sustainable development and this means that strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses. This is unless the protection of areas or assets restrict development or there would be adverse impacts that demonstrably outweigh the benefits of the development. It is considered that Regulation 19 Local Plan is not ambitious enough in the planning for the baseline of housing growth, especially given that the housing target is less than that which was provided for under Regulation 18. Paragraph 3.45 of (page 31) of the Regulation 19 Document states that housing delivery in Deal and Sandwich is constrained by a number of factors including: flood risk, wildfire sites, heritage and highways. As such it is claimed that the potential growth of these settlements are considered to be limited. BDW considered the Land North of Sandwich Road to be a logical option for additional development, outside of Sandwich and the listed constraints, whilst still in close proximity.

Paragraph 3.47 also states that a key part of the Council's growth strategy is to promote the sustainable development of rural areas, to support the vitality of rural communities in line with national policy. At the same time national policy advises that a balance must be achieved between allowing new housing and the need to protect the character and heritage of the settlements themselves, as well as the surrounding countryside. Within SP3 there are several allocated sites that are not confined by the listed constraints and are capable of delivering more housing across the District. This should include the Land North of Sandwich Road, where BDW has a firm commitment to delivering a high quality proposal of circa 110 dwellings.

Recommendation: DDC seek to meet their higher housing growth target, taking into account small and medium sized sites that are unconstrained and able to meet the overarching vision for the district.

The housing requirement of 10,998 over the plan period 2022 to 2040 is consistent with the minimum number of homes the Council should plan for using the standard method. However, what is not clear from the Council's evidence is whether this level of growth will be sufficient to meet the growth aspirations of the Council. The current housing strategy seeks to distribute housing across the District but with the majority in and around Dover Town. A secondary focus will be in Deal, Sandwich and Aylesham. The housing strategy is reliant on the delivery of major allocations which have historically been slow to deliver new homes. This is acknowledged by DDC at paragraph 6.7 where it is stated: "the proportion of housing development in Dover Town has been significantly less than the 70% envisaged in the Core Strategy. There does not currently appear to be any evidence to demonstrate that the delivery of the major allocations will improve. Paragraph 060 (Ref: 61-060-20190315) of the Planning Practice Guidance explains that:

"Should issues arise which would adversely affect the delivery of the adopted strategy then the authority should consider alternative strategies, through a plan review, if these issues are unlikely to be resolved." There is clear evidence that there are issues with the delivery the major allocations. At paragraph 6.8 DDC states that there are issues with the existing housing growth strategy. DDC appears to be dismissing alternative strategies including the allocation of small/medium scale site alongside the major allocation as part of the preparation of this new Local Plan. Alternative strategies should be considered otherwise the Local Plan will fall short of the tests of soundness.

Recommendation: DDC reconsider their reliance on major allocations and alternative strategies are considered.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We refer to the above mentioned document that is currently available for public consultation. We act on behalf of the owner of the property [redacted] in relation to this matter.</p> <p>We wish to provide the following comments on the Councils proposed housing strategy:</p> <p>Policy DP3 Housing Supply and Growth</p> <p>We consider the policy is Unsound for the following reasons</p> <p>We are concerned that the Council will continue to rely heavily upon large strategic sites to deliver its housing land supply needs. Whilst we have no issue the housing land supply figures, as they are based upon the Government standard methodology calculations, we would advocate it necessary and prudent to provide an additional contingency buffer. We note that the majority of homes are anticipated to come forward in the Whitfield Urban Expansion area.</p> <p>The additional buffer supply or contingency should be brought forward by allocating smaller sites that do not require a large upfront investment in infrastructure costs to facilitate delivery. These smaller sites can also be brought forward by small medium sized (SME) developers in the short term and will deliver earlier in the current plan period. Although this may be considered by some to be an over supply above the current housing land supply targets, it is necessary to factor in delays in the delivery of larger sites in the Council's area by the volume or national house builders; especially in the current economic climate.</p> <p>It is also an important consideration that Government advocates smaller sites for SME developers in the National Planning Policy Framework (2021) document (paragraph 68). The identification of these smaller sites in the local plan document as opposed to identifying a projected windfall figure allowance provides more certainty for SME developers in pursuing sites for planning permission.</p>

	<p>Our client has a site that would be suitable for inclusion as a site allocation in the village of Staple. The site itself currently forms part of an extended garden area of Warren House and is well screened from the surrounding rural area by mature trees and landscaping. This site is by definition previously developed land (PDL) as defined in the latest version of the NPPF (2021)</p> <p>Attached is a red line plan of the site and we consider the site is of sufficient size to accommodate a small residential development for between five- six dwellings (see plan 1 attached). Photographs attached for reference.</p> <p>At present, Staple has a very restricted tightly drawn settlement boundary surrounding the village as shown on the attached plans. There is already a small site within the settlement confines identified in the plan document as suitable for development. Therefore, the village is considered a suitable area by the Council for new housing development and is a sustainable location.</p> <p>We therefore ask for the settlement boundary to be expanded to include a residential site allocation as shown on the attached plan (reference plan 2).</p> <p>We trust these comments will be taken into consideration.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>We therefore ask for the settlement boundary to be expanded to include a residential site allocation as shown on the attached plan (reference plan 2).</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Not Applicable</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP4 1.
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Effective
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	It is questioned whether the wording of this policy is adequate to achieve the intended purpose or whether it opens a door to aggressive developers to submit applications for sites that have been rejected by this local plan. In relation to Dover or Deal, commensurate with the scale of the existing settlement could be argued to include developments of 100 houses or more.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Addition of the word Minor at the start of part 1 if that would be recognised as having the same meaning that differentiates between minor and major in other planning terminology or the additional of a maximum number of dwellings that would be considered in any one application.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	The hear and potentially counter any argument as to the intended scope of the policy or possible interpretation of the wording at an appeal.

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The proposed LDP as stands in light of the government announcement of 5/12/22 is not positively prepared or justified. Pressure to build large developments outside local centres is now lifted and DDC can look again at the reasonable alternatives including allowing only windfall developments in these rural locations, particularly where there are heritage and landscape conservation considerations eg Kingsdown should not be designated as a local centre as it is bordered by the AONB, heritage coast and Ripple F3 (LCA 2020) and has a large conservation area. Instead it should only be carefully developed through windfall.</p> <p>3.72 I agree that there should not be erosion of countryside between settlements. Unfortunately this has happened at Walmer, which due to the Station Road developments is now edging closer to Ringwould and Deal.</p> <p>SP4 c - i agree strongly that the beauty of the heritage coast and AONB must be preserved, proposals like SAP34 - Woodhill Farm Kingsdown and SAP15 Rays Bottom, Walmer are contrary to this.</p> <p>h - SAP34 would have a large impact on adjoining residents of Glen Rd and the whole of Kingsdown village as it would impact on the poor but characterful roads.</p> <p>i <i>Where development would result in the loss of active employment, open space, sport or community facilities within the settlement that such development is consistent with the requirements of policies EN2, PM5 and PM6 of this Plan;</i> It is not justified to include Kingsdown as a village centre as this will result in loss of unique heritage and charm which will cause a decline in tourism, which employs locals and allows the small number of businesses in the village to thrive.</p>

	<p>j- traffic movements through villages have already been increased through the larger developments allowed in the current LDP. The proposed LDP must therefore take into account the already strained infrastructure particularly the A258 which has seen a number of fatalities. The proposed LDP is not consistent with NPPF 21 as the unsustainable development figures of nearly 11,000 houses will result in excessive car movements in rural communities with reduced bus services.</p> <p>I agree with 3.74 - the AONB will need careful protection. Buffers should be carefully maintained between the built environments of villages and these landscape assets.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Reduce rural developments to careful windfall, maintaining buffers between AONB and other landscape and biodiversity assets. Also stop developments that may lead to coalescence between settlements, particularly when these settlements have character, heritage and landscape assets and are important to tourism.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>REPRESENTATION TO REVIEW SITE TC4S067</p> <p>THE GLEBE PLOT, STATION ROAD (OFF SHORT STREET)</p> <p>CHILLENDEEN, CT3 1PR AND INCLUDE IN THE LOCAL PLAN</p> <p>Representation</p> <p>I am making a representation against the Dover District Council (DDC) Local Plan, which is currently subject to Regulation 19 Local Plan Consultation. I believe it is unsound and that The Glebe Plot Station Road (off Short Street) Chillenden (TC4S067) has been wrongly omitted from the Local Plan. I believe the site TC4S067 has been omitted from the Local Plan when it should have been included as an allocation, this is because I believe the HELAA assessment carried out by DDC is incorrect. I would ask that during your examination process you consider my representation, confirm the failings of the HELAA assessment and add site TC4S067 to the Dover District Council Local Plan.</p> <p>I also want to confirm that should this be included under the Examination process that I would like to attend the examination process and, if it is felt necessary, to support this representation.</p> <p>Background to Representation</p> <p>The Glebe Plot, Station Road (off Short Street) Chillenden (TC4S067) submission was made to DDC, following its Call for Sites in 2021. The submission was sent to the DDC Local Plans team and receipt acknowledged on 15th March 2021.</p> <p>When the Regulation 19 Local Plan Consultation was released in October 2022, by DDC, the Glebe Plot (TC4S067) was referenced by inclusion on the list of eliminated sites. The reason for the elimination is set out in the Evidence Base as having been eliminated at the Stage 1 Assessment, which is the initial desktop study, the reason stated is that the site is “isolated in the Countryside”. This meant that there was no further consideration of the site and its suitability, availability and achievability to bring forward much needed housing in a sustainable and sympathetic location for the local community.</p> <p>My representation is that the Stage 1 assessment is wrong, and that The Glebe Plot (TC4S067) is clearly within the boundaries and confines of Chillenden Village and represents an opportunity for the development of an infill site for the village.</p> <p>To support this view, in addition to the absolute fact that The Glebe Plot is within the village and is not “isolated in the Countryside” I present the evidence of DDCs own information. Four sites were submitted for consideration from Chillenden village. These are set out on the Settlement maps for Goodnestone and Chillenden sites which were included at Stage 1 Assessment. This map is shown below.</p> <p>This shows clearly that The Glebe Plot (TC4S067) sits between two sites that were not eliminated at stage 1, if these plots were not eliminated for being “isolated in the countryside” it cannot be correct that The Glebe Plot was eliminated for that reason, and it should have been carried forward for further assessment.</p> <p>This first stage assessment also considered the following criteria and sites could have been eliminated if they were:</p> <ul style="list-style-type: none"> • Too small • Covered by National designations <p>and/or</p> <ul style="list-style-type: none"> • Contrary to policy. <p>None of these criteria were identified as the reason for the elimination of The Glebe Plot, and I can confirm that the plot could not be eliminated for these reasons because:</p> <ul style="list-style-type: none"> • The site area extends to 0.38 hectares (3,800 metres squared). As part of the targeted call for sites 2021, the evidence base states that Housing sites would be considered between 0.25 and 1 hectare in size and therefore, The Glebe Plot, TC4S067 meets these criteria. • The Glebe Plot TC4S067 is not covered by any National designations. • Following discussions and e mail correspondence with DDC Local Plans team in November 2022, I understand that the reason The Glebe Plot TC4S067 was rejected is that it was considered that the site was “Isolated in the countryside”. This is the reason given and why the Glebe Plot, TC4S067 was included in the HELAA document Appendix 2a (Initial assessment housing sites eliminated on page 3. Please see the link below.

<https://www.doverdistrictlocalplan.co.uk/uploads/pdfs/appendix-2a-tc4s-initial-assessment-housing-sites-eliminated.pdf>

In preparing to make this representation, on 21st November 2022, I asked the DDC Local Plan team to confirm the definition they had used of "Isolated in the Countryside". On 1st December 2022, DDC Local Plans team responded stating that the term "Isolated in the countryside" is explained in Paragraph 3.73 of the Local Plan (Page 39) and is also set out within National Guidance - See NPPF National Planning Policy Framework - 5. Delivering a sufficient supply of homes - Guidance - GOV.UK (www.gov.uk) Paragraphs 78 onwards. I have also researched numerous legal cases around the interpretation of the term 'isolated' in the NPPF.

I have read the explanation on Strategic Policy 4 (SP4) on page 39 Paragraph 3.73. The Local Plan states "National Policy is clear that new isolated dwellings in the countryside, outside of settlement boundaries are only permissible in exceptional circumstances"

The Local plan identifies in SP4 2, Chillenden "as a settlement suitable for minor residential development or infilling of a scale that is commensurate with that of the existing settlement and that "residential development or infilling will be permitted within the settlement boundaries, as shown on the Policies Map of the settlements" and which includes the settlement of Chillenden subject to criteria a) to k) being met (reference SP4 page 39 of the Local Plan).

With the above in mind, I would request that the Planning Inspector reviews the conclusion reached by the Stage 1 assessment that the Glebe Plot TC4S067 is "Isolated in the Countryside" for the following reasons:

- As can be seen from the map, The Glebe Plot TC4067 site is quite clearly within the well-defined settlement confines and boundary of the settlement of Chillenden.
- The TC4S067 site meets NPPF and SP4 policy subject to criteria 2a)-k) being met.
- The Glebe Plot Site TC4S067 is just 50m from the GOO006 site, (Land adjacent to short street, Chillenden) which has been included in the Consultation Local plan Regulation 19 submission on page 211.
- From further research, I understand that the definition of "isolated in the countryside" is a dwelling that is physically separate or remote from a settlement (Court of appeal judgement Lord Justice Lindblom). The Glebe Plot TC4S067 is neither physically separate nor remote from the settlement of Chillenden.

In summary, I believe it to be absolutely clear that The Glebe Plot site (TC4S067) should not have been eliminated from consideration for inclusion in the DDC HELAA at stage 1 desk top assessment, because it is not "isolated and in the countryside". Further to this, I consider that the site would not have been excluded at the Site, Suitability, Availability and Achievability assessments as it meets the same standards as the site, GOO006, that has been included in the Local Plan on page 212, but with the added advantage of not being a site which is subject to flooding.

In summary The Glebe Plot TC4S067 site is:

- Highly accessible to Chillenden Village, being centrally located.
- Not affected by Flood Risk
- Suitably accessed from an existing access point off Station Road with the ability to improve the access further.
- Visually contained by surrounding topography and existing mature hedgerow and trees and will be seen against the backdrop of the existing neighbouring dwellings.
- Not affected by any recognised landscape designations.
- Adjacent to a sole Heritage asset, with significant screening between them and the ability to further mitigate the impacts.
- Not subject to any ecological constraint.

We have engaged fully with Goodnestone Parish Council (GPC) regarding the proposal to include, The Glebe Plot site, as part of the HELAA process and we are sympathetic to the comments made in the GPC letter dated 11th March 2021 as part of their response to the District Plan consultation. Due to its unique location in the middle of the settlement of Chillenden, The Glebe Plot site will not impact adversely on the surrounding landscape. It does not suffer from surface water flooding. The site is well screened by mature trees, hedgerows and bushes and a preliminary study has been undertaken by a heritage expert, to ensure that any heritage concerns of the nearby Grade 2 listed building can be mitigated. Importantly, The Glebe Plot site benefits from its own access off Station Road with no other shared properties or driveways.

In addition to the documents submitted on 15th March 2021 as part of the targeted call for sites 2021, I would request that the details of the site's suitability, achievability and availability appended to this representation to be considered (Appendix 1).

In conclusion, my representation is that the Glebe Plot was wrongly excluded at the first stage assessment, because it is not "isolated in the Countryside" as it is within the confines and boundary of the village of Chillenden, and it should have been considered suitable for inclusion in the Local Plan, as at least equal to the site that has been included (GOO006), if not better given the lack of impact of flooding, and should be added to Dover District Council Local Plan.

	Thank you for your attention to this and I look forward to receiving confirmation that you have accepted my formal representation and will consider the matters during your Examination process.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I believe the Dover District Plan is unsound and that The Glebe Plot Station Road (off Short Street) Chillenden (TC4S067) has been wrongly omitted from the Local Plan. I believe the site TC4S067 has been omitted from the Local Plan when it should have been included as an allocation, this is because I believe the HELAA assessment carried out by DDC is incorrect. I would ask that during your examination process you consider my representation, confirm the failings of the HELAA assessment and add site TC4S067 to the Dover District Council Local Plan.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	I also want to confirm that should my representation be included under the Examination process that I would like to attend the examination process and, if it is felt necessary, to support this representation.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP4 - Residential Windfall Development, Paragraph 1
2 - Do you consider this part of the Plan sound?	No

<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Justified Effective</p>
<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>Yes</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>Yes</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Langdon Parish remains concerned about the categorisation of East Langdon as a 'Large Village'– see comments below this table. It is unclear as to whether the settlement confines are to be amended to incorporate the proposed site allocation at East Langdon (Policy SAP46 - Land adjacent Langdon Court Bungalow, The Street, East Langdon (LAN003)). The Parish Council would like to see clarity on this, as extending the boundary would potentially open up additional countryside to windfall development. As an aside, the Policies map describes these as the 'settlement confines' as opposed to the 'settlement boundaries'</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Settlement hierarchy- East Langdon as a 'larger village': The Parish Council remains concerned about the categorisation of East Langdon as a 'larger village' The criteria for this category states that larger villages have a good range of services and facilities, which serve their own residents and those of nearby hamlets. East Langdon village has no retail facilities. There is a Post Office operated from the village hall two mornings per week. One bus serves the village 5 times a day, although there is no evening service. The main facility is the primary school, however it is unclear as to the viability of the school. The KCC Schools Plan states that there is likely to be a surplus of spaces in the coming years: "<u>District commentary</u>: We forecast a significant surplus of Year R and Year R-6 places over the Plan period. This surplus is the result of the falling birth rate, with some planning groups having around one quarter increase of Year R surplus in the coming years. As schools are primarily funded on the number of pupils on roll, low Year R numbers will impact on future budgets with some schools choosing to reduce their published admissions numbers." "<u>Dover East Planning Group</u>: Surplus places are forecast throughout the Plan period. However, in the longer term places will be required to support the planned development of Connaught Barracks. Ideally this will be via the expansion of Guston Church of England Primary School. We are continuing to work with interested parties to secure the additional land that will be required to enable the expansion to happen." The supporting text for the policy says that to help sustain and strengthen the role of these larger villages, additional housing over the lifetime of this Plan is considered appropriate. Criteria (a) of the policy itself states that any development is to be of "a scale that is appropriate to the size of the settlement and the range of services and community facilities that serve it, taking account of the cumulative impact of any allocated sites and committed development". This is further emphasised in Policy SP2 (Planning for Healthy and Inclusive Communities) which includes the following text: "Ensuring that new development is well served by services and facilities (for example education, health care, community, cultural facilities, play, youth, recreation, sports, faith and emergency facilities) and that a mix of uses are provided in new development that support daily life." East Langdon currently comprises some 87 dwelling, 69 being concentrated central to the village in the vicinity of The Street, a narrow through-route to other hamlets of the parish. The proposed land allocation SAP46 at East Langdon is for 40 dwellings adjacent to the current north-eastern settlement boundary on BMV quality agricultural land. This location would be accessed via the network of narrow country lanes which lead from the A258 – A256 – A2 district highways into East Langdon Road and The Street. Although SAP46 has been identified as the most suitable allocation site in East Langdon, increasing the village core from 69 to 109 dwellings (58%) would have a profound impact on the local infrastructure, road network and access to services. It is considered that there is a discrepancy between the allocation of 40 additional dwellings to the village (with no requirement for mixed development to include space for other services/ retail/ economic use etc.) in the context of Policy SP2 and clause (a) of Policy SP4 particularly in the context of lack of certainty over the school, which is the primary service in the village, and the rural nature of the road network. The Parish Council consider that either the categorisation of East Langdon as a larger village should be reconsidered, or the number of dwellings in the proposed site allocation should be reconsidered to ensure that it is sustainable in the context of the lack of local services.</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Langdon Parish Council wishes the opportunity to explain the specific issues with East Langdon being categorised as a "Large Village" and the consequential issues it raises if a development was proposed which would increase the dwellings by nearly 60% on the infrastructure, road safety and infrastructure services.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP3 Housing growth
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Due to the governments announcement 5/12/22 the plan is not positively prepared as the development needs must be reassessed. This means it is no longer justified as there now is the room without central government pressure to find reasonable alternatives. It is also not effective as the pressure put on local communities and existing infrastructure is unreasonable and means that it is not deliverable. The plan is also not consistent with NPPF 2021 as the many landscape and heritage assets in Dover District are being compromised by the level of unsustainable overdevelopment which the current plan has allowed.</p> <p>The Housing Growth statement that the aim is to , "provide a greater choice of high-quality housing to meet the needs of Dover districts's growing population and changing demographic and address affordability issues", does not seem internally consistent with the details provided in the plan which underestimates the evidence showing a large part of district population growth is due to aging. The details thus render SP 3 and SP 5 less effective and less sound.</p> <p>Under the current LDP developers have shied away from the badly needed regeneration of Dover and concentrated on building maximum profit, minimum affordability developments of large homes around the more desirable town of Deal and out in Whitfield. The supposed regeneration</p>

of Dover has resulted in another generic shopping centre and a more depressed high street and has not lifted the rest of Dover. The promenade area is uplifted but there seems to be little connectivity to the rest of Dover.

The government department (DLUHC) decision that Dover needs 611 new dwellings a year and a minimum of 10,998 new homes between now and 2040 we find very incompatible with legally binding Net Zero Strategy, Climate Emergency Declaration 2019 and Climate Change Act 2008, and unsound. We should be transforming existing housing stock into zero carbon homes as is happening in East Sussex, led by Lewes DC. Combining these numbers with 3.51 and the statement '76.7% of the new homes are on greenfield sites, while 23.3% are on brownfield sites' is unsound and unacceptable to the public.

We feel that our communities are being harvested by developers and our worries are not being heard or needs met in terms of infrastructure. Thanks to certain national newspaper Sunday supplements, Deal is desired as a 2nd home location by the wealthy from London and elsewhere. Holiday homes which spend most of the year empty in Deal, Dover and coastal villages of Kingsdown and St Margarets are stopping locals from buying affordable homes in their own area from existing housing stock.

It must also be pointed out that at least one of the sites included in the 23.3% of brownfield sites is actually a site intended by SEEDA as local nature reserve having rewilded on unstable slag (only rendered stable by tree-planting, a site which DDC forgot to make a local nature reserve in 2004, and it has become a biodiversity hotspot well known to genuine ecologists nationally; Betteshanger Park.

Central government in London, according to Housing Today is imposing a disproportionate amount of housing growth on Kent and the SE.

There is a grievous lack of democratic accountability across Kent. So the chances of protecting Kent, of achieving a Growth Strategy that creates climate-friendly jobs and suitably sized, suitably-priced zero-carbon homes for the next generation of local families, are not good. The space available for infrastructure, functions well for compact coastal towns of the size that Deal / Walmer and Sandwich were 5 years ago.

The level of greenfield overdevelopment which has been disastrous under the current weak LDP is putting Deal infrastructure under strain now, so in-fill should make up the majority of the allocations for Deal and that the housing growth specified for District Centre of Deal and around its boundaries needs to be stopped or radically reduced. Either or both of SAP 15 / SAP 34 would destroy the only road access alternative for diverted traffic. (See detailed comments under SAP 15/ SAP 34 below). Housing Growth that threatens gridlock, blocking off a conurbation of 30,000 from access by emergency vehicles, commuters, school buses is not sustainable housing growth and is very unsound.

3.29 I note and welcome a degree of shift from the Reg 18 draft, in that more sites have been selected with a view to using 'existing infrastructure, facilities and services, with a greater professed purpose to ensure development contributes to the sustainability of local communities and services'.

I note with appreciation both the increase in the number of sites in Dover town SAP 6 – SAP 13, and the SAP 26 Former Snowdown Colliery, Aylesham near a rail station for example. It should be possible to state a determination to 'make best use of brownfield – non-rewilded – land) without giving developers the opt-out qualification 'wherever possible'.

On Five Year Housing Land Supply. 3.39 Having stated the Council had 6.03 years land supply plus a 5% buffer; it is not sound, effective or legally compliant to then state 'the provision of additional sites within the first 5 years of plan period is needed to ensure resilience and promote flexibility;'.! Instead of ensuring resilience, it will create exactly the

destructive suburbanisation of a rural district that many, many of the resident electorate are most worried about.

3.46 It is the conspicuous lack of a secondary school in Aylesham that prevents Aylesham becoming the small garden town planners aspire to. The provision of a secondary school by 2028 should be a condition of SAP 23. There seems to be a complete lack of planning in the statement that now

3.48 Many, many of the current residents of ex mining village Elvington were / are dependent on buses that have recently (2022) been cut, (following KCC cut to bus subsidies) to get to work in Canterbury, Folkestone, Sandwich, Thanet or Dover, or to get to secondary school, or to get to doctors, or to shop. These people had environmentally sustainable public transport service that has been cut. KCC is saying it is looking at potential bankruptcy in 2023, so promises of new services and facilities are met with some disbelief. The selection of this site is ONLY sound with cast-iron conditions to provide all of the services we mention below, including new drainage infrastructure. Council housing in Elvington has been subject to flooding from the sewage system, long overdue for replacement. As in Dover deprived wards, there are unhealthy EPC EFG homes in Elvington that need to be transformed into zero carbon home to lift residents out of fuel and therefore food poverty.

3.68 Windfall. Unless existing settlement boundaries are respected, there is suburban ribbon development creep from field to field to field. To render the plan sound it should contain a statement 'Previously existing settlement boundaries will be respected, until such time as town and parish councils may have agreed changes with Dover District Council, in accordance with the principles of Localism Act 2011.' In the current economic climate, it seems very naïve to hope that 'new housing in

villages can help them retain existing services such as public transport, retail (many pubs are going under because lack of staff and sky high energy bills) and schools'. Indeed we have lost a large proportion of our bus services in the district.

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Push back to central government and demand a reduction in the housing allocation of 10,998 new homes. Now possible after announcements 5/12/22 from Prime Minister.</p> <p>Regenerate Dover as a priority, retrofitting existing housing stock to provide well insulated renewable energy powered homes. Windfall development only should be allowed in Deal, Sandwich and surrounding villages. Create a self sufficient sustainable garden village at Aylesham with secondary school and green infrastructure and homes far beyond future homes standard.</p> <p>Provide better facilities and transport links for Whitfield to ensure that homeowners are not car dependent.</p> <p>Lobby central government for changes to the rules for ownership of second homes. Priority should be given to locals.</p> <p>Make the wording in the plan stronger in favour of brownfield sites eg 3.32 <i>sufficient amount and variety of land</i> should also state that brownfield must be used before greenfield as per stated in NPPF 21.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

The Group is currently chaired by Paul Henry, Managing Director of Esquire Developments, an SME Housebuilder based in Longfield near Dartford, Kent.</p> <p>The Network was formed in November 2019 and presently comprises approximately 30 participants including SME Housebuilders and Developers (of varying size and scale) and Registered Providers. In addition, the Network includes representatives of Local Planning Authorities including Medway Council, Swale Borough Council, Tonbridge and Malling Borough Council, Tunbridge Wells Borough Council and Maidstone Borough Council. It is the intention that the Network grows over time to cover all of Kent including additional SME Developers and Local Planning Authorities. The Network has recently engaged with Dover District Council.</p> <p>The Network was set up to provide a platform for SMEs to discuss relevant planning and delivery issues associated with bringing forward smaller developments and to positively and proactively engage with Local Planning Authorities at the plan making and decision taking stages.</p> <p>The Government has recognised the need to support existing SMEs and encourage more into the market in order to diversify the housing market from the volume housebuilders and generate choice and improve quality of homes being built. The Government has described SMEs as being of 'National Importance'. Appendix 1 sets out the narrative behind the support and role for SME Housebuilders.</p> <p>The Network meets on a quarterly basis to discuss and explore relevant SME related issues, including working through planning related matters. Notable attendees at past meetings including Steve Quartermain (prior to his retirement as Chief Planner at the then MHCLG) and Homes England.</p> <p>In addition to the meetings acting as a discussion platform, the SME Network is also designed to act as a support and mentoring network, where land opportunities can be shared, or knowledge/experiences drawn from in-house teams in order to help each other and strengthen the SMEs. The Network can also act as a collective voice in the preparation of Local Plans or other consultations - such as this.</p> <p>The Network comprises the following:</p> <p><u>SME Housebuilders and Developers</u></p> <p>Esquire Developments Fernham Homes Wealden Homes Fernfield Homes Meridian Construction Aile Homes</p>

The Network welcomes ongoing engagement with Dover District Council and any other interested party.

For clarity, the representation contained in this response relate to the Members of the Network that are SME Housebuilders and Developers and not the Registered Providers, LPAs or Agents.

1 ii) Content of Representations

These representations have been prepared by the Network which seek to address strategic matters. Any site-specific matters will be addressed by individual SMEs within their own representations.

The representations are structured to respond to each relevant question posed within the document.

In summary the headline points are as follows:

We support the council identifying the need to meet the small sites requirements and support SME developers.

However, we are not convinced that the requirements of Paragraph 69 have been met in respect of 10% of allocations being on 1ha or less:

We support the principle of a Policy such as SP4, however we consider that amendments to the policy wording and the defined policies map are required in order to ensure it is 'effective' and therefore 'sound'.

We encourage the Council to continue to work with the Network, including the consideration of a small sites policy to help support SME developers within the plan period.

RESPONSE

Requirement of Paragraph 69

Paragraph 69 of the NPPF requires Local Planning Authorities to identify land to accommodate at least 10% of their housing requirement on sites no larger than one hectare. This is a clear requirement and therefore 1,099 dwellings need to be allocated on sites of this nature.

Central Government recognises the problem of bringing SMEs into the market and has sought to 'level the playing field' in the context of supporting small and medium sized sites at the plan making stage. Crucially, the NPPF 2019 confirms in paragraph 68 that:

Small and medium sized sites can make an important contribution to meeting the housing requirement of an area and are often built-out relatively quickly. To promote the development of a good mix of sites local planning authorities should:

- 1 a) identify, through the development plan and brownfield registers, land to accommodate at least 10% of their housing requirement on sites no larger than one hectare; unless it can be shown, through the preparation of relevant plan policies, that there are strong reasons why this 10% target cannot be achieved;
- 2 b) use tools such as area-wide design assessments and Local Development Orders to help bring small and medium sized sites forward;
- 3 c) support the development of windfall sites through their policies and decisions – giving great weight to the benefits of using suitable sites within existing settlements for homes; and
- 4 d) work with developers to encourage the sub-division of large sites where this could help to speed up the delivery of homes.

The NPPF provides for a clear direction to LPAs, that it must identify land to accommodate at least 10% of their housing requirement that are 1ha or less.

Paragraph 3.52 of the Reg 19 plan sets out that 11.4% of the housing requirement are on small sites. These sites are listed out in Appendix 3 of the Housing Topic Paper September 2022 and the table shows that the total of 1,249 dwellings are considered to be identified for delivery on small sites.

The Local Plan states (para. 3.52) that these small sites have been identified through the Local Plan and the brownfield register. Of the 1,249 dwellings, a total of 516 dwellings are allocated under 'small sites' within the Regulation 19 plan.

The remaining dwellings (733 dwellings) are to be found in the Brownfield Register. The Register is available on the Dover District Council website and was last updated in February 2021- nearly 2 years ago. Shown at Appendix 02 of this statement is the list of sites that make up the 11.4% as suggested by the council which fulfils this requirement, alongside comments taken from the Brownfield Register. A number of the sites listed in the Brownfield Register are noted to be 'complete' or 'built out'. This equates to a total of 313 units.

We consider a site that has been noted as complete or built out can no longer be counted as a site that will contribute towards meeting the housing need. Accordingly, this element should be removed from the total supply which would reduce the figure to 936 dwellings or 8.8% of the total requirement of 10,998 dwellings.

Further to this figure, there are a number of sites that are listed as 'under construction' (209 in total). It is not clear when these comments have been added to the Brownfield Register, but for a number of the sites listed, it is clear from sold house price data that a number of these dwellings have now been completed.

We consider it important, therefore for Dover District Council acknowledge that there could be as many as 522 dwellings on the Brownfield Register that are no longer available and that the Brownfield Register should be re-assessed.

We expect that following this review, the number would fall from 1,249 dwellings to 727 dwellings or 6.6% of the required total.

The SHLAA is a critical piece of work in this regard and it is crucial that sites of this scale are identified and that they are being promoted by SME developers (or capable of being delivered by an SME developer). It is not simply a numbers game but a qualitative exercise to ensure that a sufficient number of these small sites are identified to support the intent of paragraph 69 – which is to support SME developers.

Small sites have a significant advantage as they can deliver quickly. Accordingly, in allocating smaller sites (of 1ha), or indeed supporting SME developers in bringing forward larger 'small sites' (there are a number of SME Developers capable of delivering sites in excess of 1ha and up to 100 dwellings or more per site), it will help deliver housing in the short term and firstly seek to rectify the existing housing land supply issue and deliver in early years of the plan period whilst the larger, longer term sites move through the planning and delivery process.

It is critical to have a good blend of sites and small site and SME developers are key to the success of delivery. SMEs also seek to deliver good design and set a good standard in the Borough.

Support for SME's/Small Sites

We support the principle of Policy SP4- Residential Windfall Development which seeks to deliver small scale windfall development in certain locations. This allows SME's to come forward with development in sustainable locations.

However, we consider the wording of the policy is too restrictive and will not result in an effective policy. This is in part because the wording is too restrictive when referencing land that is within our immortally adjacent to settlement boundaries and that the settlement boundaries themselves are tightly drawn around these areas. The Regulation 19 Policy Map settlement boundaries do not include all existing built form and the proposed new allocations are also excluded from within the boundaries.

In order for this policy to be effective and to meet the windfall requirement (1,050 dwellings) we consider amendments are required to the wording of the policy and that the settlement boundaries as shown on the Policies Map should be modified to include the existing built form and the built form proposed in the Local Plan.

The wording of Policy SP4 should be amended as follows:

SP4 - Residential Windfall Development

1 Residential development or infilling of a scale that is commensurate with that of the existing settlement will be permitted within, or immediately adjoining or close to the existing built up confines of the settlement boundaries, as shown on the Policies Map, of the following settlements:

Ash, Alkham, Aylesham, Capel-le-Ferne, Deal, Dover, East Langdon, Eastry, Elvington, Eythorne, Guston, Goodnestone, Kingsdown, Lydden, Northbourne, Preston, Ripple, Sandwich, Shepherdswell, St Margarets at Cliffe, Wingham, and Worth.

1 Minor residential development or infilling or adjoining or close to the existing built up confines of the settlement boundaries of a scale that is commensurate with that of the existing settlement will be permitted within the settlement boundaries, as shown on the Policies Map, of the following settlements:

Ashley, Barnsole, Betteshanger, Chillenden, Coldred, Denton, East Studdal, Finglesham, Great Mongeham, Martin, Martin Mill, Nonington, Ringwould, Staple, East Stourmouth, Sutton, Tilmanstone, West Hougham, Wingham Green, Woodnesborough and Wootton.

Subject to all of the following criteria being met:

- 1 a) It is of a scale that is appropriate to the size of the settlement and the range of services and**

community facilities that serve it, taking account of the cumulative impact of any allocated sites and committed development;

1 b) It is compatible with the layout, density, fabric and appearance of the existing settlement and individually or cumulatively, would not result in the coalescence or merging of two (or more) separate settlements, or the significant erosion of a gap between settlements, so as to result in the loss of individual settlement identity or character;

1 c) In the case of settlements in, adjoining or surrounded by, the Kent Downs AONB or Heritage Coasts, that the proposal complies in the first instance with the primary requirement of conserving and enhancing landscape and scenic beauty, and, where this is demonstrated, that the scale and extent of development is limited, sensitively located and designed to avoid or minimise adverse impacts on these designated landscapes;

1 d) It would conserve and enhance landscape character and biodiversity and not result in an unacceptable intrusion into the open countryside or the loss of, important green spaces within the confines that contribute positively to the existing character of that settlement;

1 e) It would preserve or enhance any heritage assets within its setting;

2 f) It would not result in the significant loss of best and most versatile agricultural land currently used for agriculture;

1 g) Where the site adjoins open countryside, an appropriately designed landscape buffer is included;

2 h) It would not have an adverse impact on the living conditions of existing adjoining residents;

3 i) Where development would result in the loss of active employment, open space, sport or

community facilities within the settlement that such development is consistent with the requirements of policies EN2, PM5 and PM6 of this Plan;

1 j) Traffic movements generated from the development do not result in severe impacts to the highway network that cannot be mitigated. This should be considered through transport assessments carried out in accordance with Policy TI2 which must take account of the cumulative impact of sites allocated for development. Proposals must not prejudice the ability of sites allocated for development to come forward due to limited highway capacity; and

1 k) It would be in accordance with all other relevant policies in the Plan.

2 New dwellings (both isolated and non-isolated) elsewhere in the countryside outside of settlement

boundaries will only be permitted in exceptional circumstances under one or more of the criteria

1 to v), and subject to meeting criteria a) to k) above:

2 i) there is an essential need for a rural worker, including those taking majority control of a farm business, to live permanently at or near their place of work in the countryside;

1 ii) the development would represent the optimal viable use of a heritage asset or would be appropriate enabling development to secure the future of heritage assets;

iii) the development would re-use redundant or disused buildings and enhance its immediate setting;

1 iv) the development would involve the subdivision of an existing residential building; or

2 v) the design is of exceptional quality, in that it: - is truly outstanding, reflecting the highest standards in architecture, and would help to raise standards of design more generally in rural

areas; and – would significantly enhance its immediate setting, and be sensitive to the defining characteristics of the local area

In order to help meet housing needs as well as support SMEs and Self and Custom Builders, we consider the Council could still include a small sites policy or a policy which recognises the role of rural communities and supports windfall developments.

The Network is championing a small sites policy, which is presently being endorsed by a number of LPAs including Swale and Medway Council.

Any future plan should provide for a policy framework to allow SMEs to deliver throughout the lifetime of the plan, particularly in rural areas.

As part of the Network's objective, it has sought to introduce a policy into emerging Local Plans that seeks to support small and medium sized developments that builds on the 1ha site requirement but expands this into a policy framework that can allow SMEs to successfully operate within the policy framework of a Local Plan where there are limited opportunities through the allocations in which the Council has made (i.e. on larger sites).

In this respect, there is often a large windfall figure required to be met, or LPAs find themselves in a position where the presumption in favour of sustainable development is applicable. The SME policy set out below is a policy in which the Network considers would provide the opportunity for SME sites to come forward, whilst offering the LPA an enhanced development coming forward that is typically delivered by an SME – i.e. in respect of design quality or for instance carbon efficiencies.

Whilst the ideal scenario would be for the same policy to be adopted by each Council (and therefore apply a level of consistency in understanding and application of the policy), we also recognise that each LPA has a specific set of circumstances that may require the policy wording to be tweaked. This maybe the case in DDC and the Network would welcome further discussions as to how such a policy could be introduced into the Plan.

The suggested wording of the policy is as follows, but can be tailored to suite each LPA.

Policy [insert Policy Number] Small Sites

In order to recognise the value of SMEs and small scale sites, the Council will support development of unallocated or windfall small scale housing (C3) and approve applications providing the harm does not demonstrably outweigh the benefits; and where:

- 1 The site does not exceed 60 dwellings (net) and is of an appropriate scale to its location;

- 1 The site is being brought forward by a recognised SME Developer and is not part of a larger site;

III. The proposed development delivers;

- 1 A bespoke design approach;
- 2 A high quality design that is locally distinctive;
- 3 Is sympathetic to the character of its location;
- 4 All dwellings meet National Design Standards and endeavor to deliver a

range of Carbon reduction build techniques;

- 1 The proposed development preserves residential amenity, designated heritage assets and core environmental assets and increase net biodiversity.

- 1 A flexible approach will be encouraged to the delivery of Affordable Housing assessed on a site by site basis. Where on site provision is demonstrated through evidence to be unviable or unattractive (less than 70% Open Market Value) to recognised Registered Providers, the Council

will permit alternative levels of Affordable Housing or alternative forms of tenure, including First Homes, payment in-lieu of on site provision or another form of recognised Affordable Product as defined in the NPPF.

It is recognised that SMEs can deliver quickly and applicants are encouraged to explore if a reduced implementation period is appropriate.

A Small Sites policy will allow for SMEs to operate within the Plan Led system and will allow both Small and Medium sites to come forward (i.e. sites above 1ha and up to 60 dwellings). Such a policy will allow an SME to come forward with a planning application that meets locally defined specific criteria, such as high-quality design, low carbon footprint, reduced time limits for implementation etc and a flexible approach to the delivery of Affordable Housing. On the other side of the coin, the Council will receive higher quality developments being submitted that are in character with more rural fringe locations (remembering the SME site typology), but that those Rural Fringe locations can be supported with an appropriate amount of growth that will assist in preventing, slowing or reversing their cycle of decline.

Such a policy would provide for additional weight to be afforded to an SME application, and thus allow greater weight to be applied to the application in the overall planning balance. This would reduce risk to an SME and increase certainty at the planning stages, as the SME can tailor their scheme to meet the specific criteria. The LPA also recognises that it would result in a development that meets Building Better Building Beautiful objectives and potentially addressing Climate Change issues.

Crucially, the policy is designed to deliver up to 60 dwellings (and thus meet the M of SME as much as the S) but is worded in a way that seeks to ensure the development coming forward in any given location is consistent and respectful to the area that it is in i.e. a scheme of 60 dwellings may not be appropriate for a small village, but 20 maybe, and therefore a policy that refers up to a figure of 60 dwellings is deemed acceptable ? i.e. the policy is fully flexible.

In addition, the 60 dwelling threshold is very much seen as the scale of developments where larger SME's start to compete with Volume housebuilders on sites. A volume housebuilder will tend not to drop below 60 dwellings and thus the Policy is desgnd to really assist SME delivery and support the delivery of bespoke high-quality development, but also directly respond to certain SME challenges, such as how to deliver small numbers of Affordable Housing on any given site.

The Network recognises that other Kent LPAs are seeking to introduce a Small Sites Policy and a key aim for the policy is that there is a level of consistency in the wording across a number of LPAs, in order that the interpretation and understanding of the policy is also consistent on a cross boundary level – again seeking to reduce the risk at the planning stages to an SME.

In addition to the Policy itself, we also consider that an SME protocol should be prepared which provides guidance and clarity for SMEs at the pre-application and post-submission stages. The protocol would recognise the need to engage with SMEs and understand that a flexible approach is needed to certain issues (such as site typology/affordable housing provision).

The protocol could include a standard PPA timeframe and fixed cost to ensure that sufficient officer time is allocated to an SME application. Whilst SME applications tend to be on the smaller scale (when compared to larger volume housebuilder submissions), those applications are critical to the SME themselves, and accordingly the Network often discusses the frustration at the lack of engagement from LPAs on their applications – often perceived by SMEs in the Network as being at the bottom of the pile.

This position is especially so at the pre-application stage, where often paid pre-application advice is sought, but either never received or delayed, in some cases up to 9 months. Whilst this is a matter than may extend beyond Dover District Council, this is a 'real life' significant issue as a pre-application response is so important to an SME to determine the extent of risk that a site may carry.

The importance of a planning consent is vital to the success of an SME, no matter how small (or large) that scheme is, and greater engagement is always encouraged. This works both ways and greater engagement can improve the submission material of an SME and thus also reducing risk.

A further burden on SME's, and a point that the above policy is seeking to assist with is delivery of Affordable Housing. This is a wider matter than DDC, but it is well recognised that Registered Providers are rarely interested in sites unless the number of affordable homes being offered equates to at least 20 affordable dwellings. For DDC, this means that any site that falls under a 67-dwelling threshold will likely struggle to gain interest in a registered provider (at 30% AH requirement). The policy seeks a flexible approach to how Affordable Housing can be delivered by an SME in instances where it is the RP that is not interested, not that the SME does not wish to provide affordable homes.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>The Council has set out that the previous unintended consequences of the pattern of windfall development has meant that Deal has had to assimilate unplanned development.</p> <p>In realising the disbenefits of this type of development on implementing a sustainable spatial strategy, it is curious that the Council places such reliance on windfalls going forward.</p> <p>Windfall delivery is estimated to be 1,050 across the Plan period – this amounts to a ‘strategic’ development in its own right. Not so much a strategy, as leaving the delivery of a significant number of homes to chance – with development, quite possibly, being unsustainably located.</p> <p>Local Plan supply comprises the urban expansion at Whitfield (2,200), allocations (3,392) and windfalls (1,050); or put another way 33% of housing need will be provided for at Whitfield, 51% will be allocations across the District and 16% will be windfalls.</p> <p>CPRE Kent is sceptical about the soundness of a strategy that allows nearly one-fifth of the required housing provision to be left to chance. In the event developments at Whitfield and Aylesham aren’t built out at the anticipated rate, then even greater reliance will be placed on windfalls – as has occurred in the recent past where historically high windfalls have been experienced in response to allocated sites being slow to come forward.</p> <p>If a ‘spectacular and sustainable environment’ is a vision of the plan, then acceptance of windfall sites should be tied to active travel connections. CPRE queries what the test is for ‘commensurate scale’ will be when all development sites are required by the NPPF to make efficient use of land.</p> <p>CPRE as an organisation strongly believes that where new land is given over to development, it should be used as efficiently as possible - as appropriate for that site’s location. The higher the density, the more benefits accrue, and the more land is saved.</p> <p>High density building does not equate to high rise apartment blocks. CPRE London published a report in 2019 on this issue called “Double the density, halve the land needed”https://www.cprelondon.org.uk/wp-content/uploads/sites/10/2020/02/DoubleTheDensityHalveTheLandNeeded_1.pdf. This sets out both the benefits of higher density design along with providing examples of higher density developments being achieved by a variety of means. This includes a mixed-use residential development at Springhead Park, Ebbsfleet, Kent where 160dph is being achieved.</p> <p>Further research undertaken by CPRE and Place Alliance (A housing design audit for England, 2020) https://placealliance.org.uk/research/national-housing-audit/ concludes that housing schemes performed more poorly with distance from the urban core and with reduced density. The additional constraints imposed by stronger pre-existing urban context, were considered to encourage a more sensitive design response.</p> <p>Building at low density and on green fields is not being done well in terms of design quality. The most successful schemes (as audited in the study of 142 developments) were those at 56dph – which is almost double the national average of 31dph. Moreover, the National Design Code (July 2021) states that density is an essential component of an effective design code.</p> <p>While CPRE welcomes the detail set out in criteria (a) and (b), but it is concerned for the reasons set out above the densities will be suppressed, resulting in larger homes on larger plots which will not address the need for more affordable homes across the District.</p> <p>In respect of the reference in criteria (b) to the protection of gaps between settlements this is also welcomed – but would appear to contradict the stance taken with the strategic allocation at the two villages of Eythorne and Elvington. If gaps are to be protected, they should be protected across the board in the interests of visual distinctness, social cohesion and in the interests of health and wellbeing.</p> <p>Criteria (f) is also welcomed. However, it’s not clear what constitutes a “significant loss of best and most versatile agricultural land”. CPRE queries whether this is consistent with stance on allocated greenfield sites, which account for 76.7% of all allocated site and presumably will result in a greater loss of best and most versatile agricultural land.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	CPRE Kent would wish to participate at the examination hearings to explore these issues further.

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>SP4 Residential Windfall Development p.37: 3.71 Separation of Settlements : <i>Unplanned erosion of Countryside between confines of settlements . . . therefore has the potential to have a serious adverse impact on the overall landscape character . . . and on the individual identity of villages through the loss of important elements of their setting or more seriously through coalescence. Around Deal particularly at risk.</i> There is a contradiction between this Strategic Policy 4 statement which is very sound and the inclusion of SAP 34 / 35 and 15 in the Local plan. Any development of any of these sites would compromise the 'individual identity' of Kingsdown village and lead to 'coalescence and loss of identity'.</p> <p>It is unsound and ineffective to a damaging extent, to list Kingsdown as being a '<i>Local Centre ; a village providing services for a local rural area and a secondary focus for development in the rural area</i>' Any development at SAP 34 would do the opposite of 'reinforcing the role of the village'; it would in fact choke off the existing parish economy, reducing its attractiveness to tourists, a key location on the Deal Welcomes Walkers</p>

	initiative. Any development at SAP34 would endanger life given the unique highways situation of the village, the district-wide need for traffic to flow through village on narrow lanes with single lane passing whenever the A258 is blocked.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	The loss of defined boundary to the village will destroy the individual identity of our village. Coalescence is damaging many local areas and does not bring benefits to existing residents or new alike. It will erode the rural aspect of our village. The geography and road system simply cannot cope with expansion in this way. We will be come gridlocked 24 hours a day. Ringwould rd is a vital access rd to the village and Kingsdown already suffers in both winter and summer from traffic congestion. The reduction in air quality and additional light pollution from all the new housing are also of concern in addition to the devastating impact on our wildlife.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>(DDC Note - Text Extracted from Document sent from Savills on Behalf of the Church Commissioners. Representation has been split across relevant areas of the Local Plan. Full attachment and introduction to Policy comments can be found under reference SDLP1265 for Shepherdswell Site and SDLP1266 for Eastry Site.)</p> <p>Policy SP4 – Residential Windfall Development – COMMENTS Policy SP4 states that residential development or infilling of a scale that is commensurate with that of the existing settlement will be permitted within or immediately adjoining the settlement boundaries, as shown on the Policies Map, of the following settlements: Ash, Alkham, Aylesham, Capel-le-Ferne, Deal, Dover, East Langdon, Eastry, Elvington, Eythorne, Guston, Goodnestone, Kingsdown, Lydden, Northbourne, Preston, Ripple, Sandwich, Shepherdswell, St Margarets at Cliffe, Wingham, and Worth. Whilst our Client supports this approach to allowing suitable windfall development adjoining settlements including Shepherdswell and Eastry, it is noted that Policy SP4 only allows for minor residential development within the settlement boundaries of the following settlements: Ashley, Barnsole, Betteshanger, Chillenden, Coldred, Denton, East Studdal, Finglesham, Great Mongeham, Martin, Martin Mill, Nonington, Ringwould, Staple, East Stourmouth, Sutton, Tilmanstone, West Hougham, Wingham Green, Woodnesborough and Wootton. We also note that the justification for the approach outlines that 45% of new housing completions in the previous 10 years have been as a result of windfall development. As a result of this, limiting the amount and location of development in specific settlements means that the plan is not justified or positively prepared. If the draft plan were amended to allow for greater flexibility in all locations, it would serve to provide a degree of mitigation against a situation whereby site allocations do not deliver as expected. Furthermore, considerations such as scale, amount and design of development would still be controlled by criterion a-k of the policy, which our Client feels are generally appropriate with the exception to the below. In addition to the above, our Client considers that Policy SP4 is not fully justified and should be amended to omit reference to the ‘cumulative impact of any allocated sites and committed development’. It is our view that each development should be assessed on their own merits, especially having regard to the fact that allocated sites and committed development do not always actually result in built development as anticipated, as aforementioned. As such, criteria a should be amended to read as follows: “It is of a scale that is appropriate to the size of the settlement and the range of services and community facilities that serve it. taking account of the cumulative impact of any allocated sites and committed development.” Recommendation: DDC should provide greater flexibility for windfall development in all locations and each site should be judged on its own merits.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Text has been extracted from PFD document sent by Kent Planning Consultancy. Images that accompany this text can be seen within the Full Document Attached to on SDLP1240 Text has also been extracted and split across relevant places within the Local Plan .)</p> <p>SP4 - Residential Windfall Development</p> <p>Kent Planning Consultancy broadly support the provision of policy SP4 'Residential Windfall Development' with regards to windfall development, but consider that the policy should also include a broader provision for brownfield, or previously developed land where this may not fall inside existing settlement boundaries.</p> <p>Dover District, particularly around Deal and its hinterlands, have a number of small, brownfield sites, often associated with historic mining activity, that should not be excluded from the opportunity to re-development on the basis of their location within the countryside.</p> <p>There will, on occasion, be sites suitable for redevelopment that may not always have substantial remnants of development, such as the one subject to this submission, but where their redevelopment would represent a benefit to the wider sense of place, and, where they are of little other value to the countryside (in that they are not agricultural land), and offer little to a sense of place, or even a detraction.</p> <p>Given such examples, we recommend that policy be amended to be sufficiently flexible to allow for the delivery of historically developed sites outside of development boundaries,</p>

where this would not otherwise conflict with the aims of the preservation of the countryside. We believe our site represents a perfect example of this.

To aid, we consider that the most appropriate amendment should be to SP4 3iii) to read:

*iii) the development would re-use redundant, disused buildings, **previously developed land, or land subject to historic development** and enhance its immediate setting;*

7.0 CONCLUSION

This submission has been prepared and made by Kent Planning Consultancy with a view to highlighting and promoting the development potential for a residential development at **'Land at The Street/Broad Street, Finglesham, Kent, CT14 0LZ'**

The site is considered to be in a sustainable location, offers the opportunity to re-utilise an existing area of brownfield land, and crucially, offers the potential benefit of enhancing and strengthening the village entrance to Finglesham.

The site is broadly in accordance with the requirements of emerging policy SP4, identifying clear that the site follows the broad plans and parameters for growth the Council has identified.

With an estimated capacity, with good quality design, to provide **8-10 units**, Kent Planning Consultancy recommend that the site provides a good opportunity for the Council to re-enforce its proposed housing supply with a small, sustainable site allocation.

Kent Planning Consultancy thus request that the Council consider this late submission for the Local Plan as a potential opportunity to provide a small, sustainable, site within the Local Plan.

Further, KPC believe that, in light of sites such as that subject to this submission, policy SP4 should be amended to include a greater flexibility, particularly with regards to land subject to a historic use, and previously developed land, where this is outside of the defined settlement boundaries but would not undermine the general aims of protecting the countryside.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We consider that the plan is sound, but object to elements of Policy SAP15 - Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002) and Policy SP3 - Housing Growth. These objections are set out in the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359).</p> <p>1 Introduction</p> <p>1.1 Purpose of this Representation</p> <p>1.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited in response to the Dover District Council 'DDC' Local Plan (Regulation 19) consultation which runs until 9th December 2022.</p> <p>1.1.2 We understand that DDC is in the process of preparing a new Local Plan to set out a strategy for development for the period to 2040 and that the Council are presently seeking comments on the pre-submission Plan prior to its submission for examination in early 2023.</p> <p>1.1.3 Our client is promoting 'Land at Rays Bottom, Walmer, Deal' (hereafter referred to as 'Land at Rays Bottom' or 'the site') for the residential allocation of the site as part of the new Dover District Local Plan preparation process. The site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 75 dwellings under policy reference 'SAP15'.</p> <p>1.1.4 It is highlighted that as part of the Regulation 18 Local Plan, the Site was allocated under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' for approximately 100 dwellings (reference WAL 002).</p> <p>1.1.5 The purpose of the representation is to support the allocation of Land at Rays Bottom as a suitable and deliverable location for residential development and provide comment on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan but to object to the indicative capacity set out in the policy.</p>

1.1.6 In this regard, we remain wholly supportive of the principle of the residential allocation of Land at Rays Bottom and agree that the Site represents a logical and sustainable location to direct growth in Deal consistent with the growth strategy of the Plan as a whole.

1.1.7 Accordingly, we say that the allocation of Land at Rays Bottom is necessary in order for the Council in meeting the growing need for new homes in the district and help to ensure the DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan.

1.1.8 It is submitted that the SAP15 policy wording should be amended to reflect the capability of the Site to accommodate approximately 80 dwellings, deliverable early in the Plan period.

1.1.9 Based on the current national and local planning context, we consider the Site to be a highly suitable edge-of-settlement location to allocate land for housing to help meet the need for new homes in the district and its effective use should be appropriately maximised in accordance with national policy objectives.

1.1.10 Further details regarding the Site and commentary on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan are set out in the following sections of this document.

1.2 About Fernham Homes

1.2.1 Fernham Homes Ltd are a local award winning small and medium sized (SME) housebuilder, established in 1997 and has a strong track record of delivering high quality residential and mixed use developments in Kent over the last 25 years. This has been acknowledged through the receipt of nationally recognised awards, including the gold Evening Standard Awards best family home 2022 and 2019 bronze WhatHouse Best Small Housebuilder.

1.2.2 SME housebuilders are recognised in the National Planning Policy Framework ('NPPF') at paragraph 69 as making an important contribution to meeting the housing requirements of an area, and being able to build out relatively quickly. Similarly, this has also been recognised by the Planning Inspectorate. This is particularly the case with Fernham Homes, which is privately owned with access to significant resources. This provides significantly more flexibility than national and other regional housebuilders, and allows Fernham Homes to deliver housing rapidly and to a high quality, beautiful and sustainable standard (para 126 of the NPPF).

1.2.3 Fernham Homes has embarked on a sustained period of growth, with an adopted and robust business plan to deliver around 300 houses per year in five years time.

1.2.4 A key element of Fernham Homes' operations is to take a careful approach to site selection: a huge amount of due diligence is undertaken as part of this, and therefore Fernham Homes only invests in those sites which meet the NPPF requirements of being available, suitable, and deliverable. As set out below land at Rays Bottom, Walmer ('SAP15') is firmly considered to be such a site.

1.2.5 Similarly, a key feature of Fernham Homes' approach is to work positively and proactively with local planning authorities (LPAs), both during the preparation of local plans and at planning application stage. Fernham Homes are fully committed to engaging with DDC in the preparation of its Local Plan, and firmly subscribe to the national policy approach set out in paragraphs 15 and 16 c) of the NPPF that "the planning system should be genuinely plan-led" and should be shaped by early, proportionate and effective engagement between LPAs and others, including businesses and developers. Accordingly, Fernham Homes would welcome the opportunity to discuss the matters contained in this representation, including the availability, suitability, deliverability and capacity of land Rays Bottom, Walmer ('SAP15') directly with DDC members and officers, ahead of the submission of the Local Plan for examination.

1.3 Representation Structure

1.3.1 The representation structure is outlined below for ease of reference:

Chapter 2 (Consultation Background) – Sets out the context of the Dover District new Local Plan preparation, relevant national planning requirements and a summary of our current position.

Please refer to paragraph 52 of Appeal Decisions: APP/M2270/W/21/3283924 & APP/M2270/W/21/3288645

Chapter 3 (Legal Tests of Soundness) - Assessing whether the plan is sound, having regard to the tests of soundness outlined by paragraph 35 of the NPPF.

Chapter 4 (Duty to Co-operate) - Assessing whether the plan is sound, having regard to the duty to cooperate outlined by paragraph 24 of the NPPF.

Chapter 5 (Housing Need) - Consideration of market and affordable housing need and assessment of proposed housing allocations and supply sources.

Chapter 6 (Assessment of Suitability) - Re-introduces our client's Site and provides a summary of planning constraints and opportunities, including the quantum of development that could be accommodated, why the Site is suitable for development and why the principle of the draft allocation for residential development is both justified and consistent with the DDC's strategy for growth in the district.

Chapter 7 (Conclusion) - Summarises the key points raised throughout the representation and re-affirms our client's support for the principle of the Site's allocation and the principle of proposed strategy ahead of the submission of the Plan for examination, and the objections in terms of capacity.

2 DDC – Draft for Submission Local Plan (Regulation 19)

2.1 Consultation Background

2.1.1 DDC are required to prepare a new Local Plan, as the current suite of development plan documents were adopted in 2002, 2010 and 2015. The Core Strategy (CS) (adopted 2010) in particular has a time horizon up to 2026. The plans, and the policies contained within, pre-date current national policy, practice guidance and local evidence and consequently require updating.

2.1.2 The new Local Plan will set out the vision, strategic objectives and overarching development strategy for the growth of the District over the period to 2040. It provides the planning policy framework to guide the future development of the area, addressing needs and opportunities for housing, the economy, community facilities and infrastructure, as well as the basis for conserving and enhancing the natural and historic environments, mitigating and adapting to climate change, and achieving well designed places.

2.1.3 For the avoidance of doubt, the new Local Plan, on adoption, will replace the CS 2010 and the Land Allocations Plan 2015, as well as saved policies from the 2002 Local Plan.

2.1.4 DDC's Regulation 19 Local Plan outlines the key issues that need to be addressed between now and 2040. In particular, the Plan sets out the following key planning issues for the District:

- Ensuring that new development in the District contributes to the mitigation of, and adaptation to, climate change.
- Supporting DDC to deliver its intention to be a carbon neutral district by 2050.
- Managing flood risk and coastal change.
- Ensuring that a sufficient amount and variety of land is identified to deliver a continuous supply of housing across the Plan period and that DDC maintains a five-year housing land supply.
- Delivering growth in a way that focuses development in the least sensitive areas of the District in order to conserve and enhance the District's rich natural and historic environments.
- Supporting sustainable development in rural areas to enhance the vitality of rural communities.
- Working with partners to facilitate the delivery of the Whitfield Urban Expansion. Ensuring a range of housing tenures, types and sizes are provided across the District to meet the needs of the local community and provide choice and flexibility in the housing market.
- Promoting economic growth, tourism, and investment in the District's Town Centres in line with DDC's Economic Growth Strategy.
- To address the impact of the COVID-19 pandemic.
- Delivering strategic transport improvements, including upgrades to the Duke of York and Whitfield roundabouts to support the scale of housing and economic growth identified in the Plan.
- Promoting sustainable transport initiatives to encourage a modal shift to more sustainable forms of transport like walking and cycling.
- Ensuring that infrastructure is delivered, in the right place, at the right time, to meet the needs of the District and support the levels of development identified in the Local Plan.
- Supporting the delivery of attractive, high-quality, design led developments and the creation of healthy, inclusive and safe communities, that are well served by good quality services and facilities to support people's lives.
- Conserving and enhancing the District's rich and diverse natural landscape, including the five international sites within the district, the Kent Downs Area of Outstanding Natural Beauty (AONB), five Sites of Special Scientific Interest (SSSIs), two National Nature Reserves (NNRs), two stretches of Heritage Coasts and two Marine Conservation Zones.
- Delivering a net gain in biodiversity in the District over the plan period.

- To promote the conservation, restoration and where appropriate the enhancement of the District's heritage assets, in order to protect their significance and to ensure that they can be best appreciated and enjoyed by current and future generations.

2.1.5 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'.

2.1.6 This submission will comment on each of the above, highlighting where we believe any areas of concern lie or where modifications may be required.

2.2 DDC's Local Development Scheme

2.2.1 The District Council has a duty to review the policies contained within the development plan every five years. The 2014/2015 Authority Monitoring Report signalled the need to review key parts of DDC's adopted CS evidence base.

2.2.2 DDC's Local Development Scheme (LDS) first outlined the delivery timetable for the Local Plan Review (LPR) in the March 2017 publication. Since then, the LDS has been updated on an annual basis. The most recent September 2022 LDS summarises that following the preparation of the principal evidence base

documents, the Local Plan Review Regulation 18 consultation took place for 8 weeks in January 2021. The Regulation 19 consultation was scheduled for 7 weeks during Q4 of 2022 and is the subject of this representation.

2.2.3 Moving forward, submission of the Plan is anticipated in Q1-2 2023 with the Examination in Public in Q3-4 2023. The new Local Plan is currently scheduled for adoption in 2024.

2.2.4 As planned, DDC are now undertaking the Regulation 19 Draft Local Plan Consultation, for which this submission is made

3 Legal Test of Soundness

3.1 Legislation and Guidance

3.1.1 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. It is a statutory requirement that every development plan document must be submitted for independent examination to assess when it is "sound", as well as whether other statutory requirements have been satisfied (s.20(5) of the 2004 Act). By s.19 of the 2004 Act, in preparing a development plan document a local planning authority must have regard to several matters including national policies and advice contained in guidance issued by the Secretary of State. Such guidance currently exists in the form of the NPPF and is summarised below. This states that Plans must be:

(a) Positively Prepared: based on a strategy which seeks to meet objectively assessed development and infrastructure requirements

3.1.2 This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The NPPF set out principles through which the Government expects sustainable development can be achieved.

(b) Justified: an appropriate strategy when considered against the reasonable alternatives, based on proportionate evidence

3.1.3 This sets out the requirement that the Local Plan should be based on a robust and credible evidence base involving:

I. Research/fact finding: the choices made in the plan are backed up by facts.

II. Evidence of participation of the local community and others having a stake in the area.

3.1.4 The Local Plan should demonstrate an appropriate strategy, taking into account reasonable alternatives and based on proportionate evidence. These alternatives should be realistic and subject to sustainability appraisal. The Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.

(c) Effective: deliverable over its period based on effective joint working on cross-boundary strategic priorities

3.1.5 This makes clear that the Local Plan should be deliverable, requiring evidence of:

- Sound infrastructure delivery planning;
- Having no regulatory or national planning barriers to delivery;
- Delivery partners who are signed up to it; and
- Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.
- The new Local Plan should be flexible and able to be monitored.

3.1.6 The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important

that policies are flexible, the Local Plan should make clear that major changes may require a formal review including public consultation. Any measures which DDC has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.

d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national policy.

3.1.7 This submission comments on each of the above in further detailing, highlighting areas of support and where modifications are required as appropriate.

3.2 Legal Compliance

3.2.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

3.2.2 In addition to the above, the NPPF states² that: "Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that:

a) All plans should promote a sustainable pattern of development that seeks to: meet the development needs of the area; align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effect.

b) Strategic policies should as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

(i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or

Paragraph 11, National Planning Policy Framework 2021

(ii) Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole."

3.2.3 In addition, to the above, the NPPF states³ that Plans should:

a) be prepared with the objective of contributing to the achievement of sustainable development;

b) be prepared positively, in a way that is aspirational but deliverable;

c) be shaped by early, proportionate and effective engagement between planmakers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;

d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;

e) be accessible through the use of digital tools to assist public involvement and policy presentation; and

f) serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).

3.2.4 It is important to note that the NPPF⁴ requires strategic policies to set out an overall strategy for the pattern, scale, and design quality of places, and make sufficient provision for:

a) housing (including affordable housing), employment, retail, leisure and other commercial development;

b) infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat);

c) community facilities (such as health, education and cultural infrastructure); and;

d) conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation.

3.2.5 It is clear from the above, that any local plan should set out a comprehensive and cohesive approach to future development.

Paragraph 16, NPPF 2021

Paragraph 20, NPPF 2021

4 Duty to Co-Operate

4.1 Legal and NPPF Requirements

4.1.1 Section 33A of the Planning and Compulsory Purchase Act 2004 sets out a statutory 'Duty to Cooperate' (DtC) – i.e. a legal obligation - to all bodies as prescribed by Regulation 4 of the Town and Country Planning (Local Planning) England Regulations 2012 (the Regulations).

4.1.2 The duty requires DDC to cooperate with other persons to 'maximise the effectiveness' with which named activities are undertaken. Those activities include the preparation of development plan documents (such as this local plan) and activities that support that activity 'so far as relating to a strategic matter'.

4.1.3 A strategic matter is defined by S33A(4) in summary as: (a) 'sustainable development or use of land that has or would have a significant impact on at least two planning areas' (a planning area in this case is the area of a borough or district council); and (b) 'sustainable development or use of land in a two tier area' (as this is) 'if the development or use (i) is a county matter, or (ii) has or would have a significant impact on a county matter'. County matters broadly relate to minerals and waste and associated developments as defined by Paragraph 1 of schedule 1 to the Town and Country Planning Act 1990 (as amended).

4.1.4 Section 33A (7) requires DDC (and persons subject to the DtC) to have regard to any guidance issued by the Secretary of State about how the duty is to be complied with. In that regard Paragraph ID 9-004-29140306 of the Government's Planning Practice Guidance (PPG) confirms amongst other things that the DtC is not a duty to agree (albeit that local planning authorities should make every effort to secure the necessary cooperation on strategic cross border matters before they submit local plans for examination).

4.1.5 The NPPF establishes that effective and on-going joint working is an integral part of the plan making process that will, amongst other things, determine whether development needs that cannot be met wholly within a plan can be met elsewhere. The NPPF goes on to state at paragraph 27 that in order to demonstrate effective and on-going joint working strategic policy making authorities should: "... prepare and maintain one or more statements of common ground documenting the cross-boundary matters being addressed".

4.1.6 In addition to the District's own housing pressures, part of the DtC involves considering whether neighbouring authorities' unmet housing need can be accommodated. It is worth highlighting that recent amendments to the London Plan have identified that the City's housing need has become increasingly more difficult to deliver and therefore areas outside London will be faced with having to absorb more of London's housing need. Consequently, DDC has a duty to explore whether it can accommodate some of this overspill of London's unmet need.

4.2 Assessment of DDC's discharging of the Duty to Co-operate

4.2.1 It is recognised that work to discharge the DtC remains ongoing by DDC and will continue prior to submission as part of the preparation of the Local Plan evidence base.

4.2.2 Notwithstanding the above, at this stage it is understood that DDC have engaged with the members of the East Kent Regeneration Board including neighbouring East Kent planning authorities, Kent County Council (KCC) and its subsidiary departments:

- Folkestone and Hythe District Council
- Canterbury City Council
- Thanet District Council
- KCC
 - KCC Highways & Transportation
 - KCC Minerals & Waste
 - KCC Heritage Conservation
 - KCC Flood & Water Management
 - KCC Natural Environment & Coast
 - KCC Infrastructure including Education

4.2.3 In February 2016, DDC adopted a Memorandum of Understanding (MOU) in respect of the DtC between the East Kent Regeneration Board members. A review of the MOU took place and was agreed in January 2021.

4.2.4 The East Kent MOU sets out the framework in which the authorities will work together on strategic issues and will actively engage. It forms the overarching framework and context within which Statements of Common Ground (SoCG) will be agreed between individual authorities.

4.2.5 Further engagement is also confirmed to have taken place between the following prescribed bodies and other relevant bodies:

- Environment Agency
- National Highways
- Historic England
- Natural England
- Network Rail
- NHS Kent and Medway Clinical Commissioning Group (CCG) – now known as Integrated Care Board (ICB) since July 2022
- Kent Downs AONB Unit
- Other infrastructure providers

4.2.6 Whilst work remains ongoing, at this stage it is understood that SoCGs have been agreed and signed between the following parties:

DDC and Folkestone & Hythe District Council

DDC and Canterbury City Council

DDC and Thanet District Council

DDC and Kent County Council

DDC and National Highways

4.2.7 As part of the DtC Evidence Base documents, DDC prepared a detailed DtC Statement (dated September 2022) which sets out a summary of the engagement that has taken place, firstly by organisation, and then by issue. Whilst the statement focuses on strategic issues and duty to co-operate bodies it also includes information relating to engagement on non-strategic issues and co-operation with other bodies that are not prescribed by the regulations. In addition, Appendices 1, 3 and 4 identify the main meetings and other correspondence that has taken place throughout the plan making process.

4.3 Summary

4.3.1 On account of the above and the documents published within the DDC's Local Plan Evidence Base, we are satisfied that DDC as the strategic policy making authority has demonstrated effective and on-going joint working with neighbouring authorities, the county council, prescribed bodies and other relevant bodies. Further, we agree that DDC has prepared and maintained SoCG documenting the cross-boundary matters being addressed in accordance with the Framework and the DtC may be discharged by the Planning Inspector under Section 20(5) (c) of the Planning and Compulsory Purchase Act 2004.

4.3.2 Without prejudice to the above, should ongoing work by DDC result in significant changes in circumstances such that the signed SoCGs may be amended or withdrawn, our client reserves the right to alter their consultation response accordingly and be present at the examination of the Plan to discuss further.

5 Housing Need

5.1 Context

5.1.1 Paragraph 11 of the NPPF is explicit in its requirement for strategic policy-making authorities to promote a sustainable pattern of development that seeks to meet the need in full.

5.1.2 Paragraph 20 of the Framework is equally clear that strategic policies should set out an overall strategy for the pattern, scale and design quality of places. Policies should make sufficient provision for the development that is required as well as associated infrastructure, community facilities and should set out a strategy for the conservation and enhancement of the natural, built and historic environment.

5.1.3 Given this national planning context, the emerging Local Plan should provide a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic environment.

5.1.4 National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate.

5.1.5 In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.

5.1.6 Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.

5.2 DDC's Housing Need

5.2.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover District of 596 dwellings per annum. However, the affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total housing need of 10,998 dwellings for the Plan period to 2040. We understand that the Regulation 19 Local Plan seeks to meet this need in full and in addition to the minimum figures, DDC have set an appropriate contingency buffer of 926 dwellings of the Plan period, equating to 8.4% of the total Plan period figure.

5.2.2 For context, the current adopted CS requirement is 700 dwellings per annum. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.

5.2.3 For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate sufficient land to accommodate a minimum of 6,642 new homes over the remaining plan period to 2040. It is understood that this will be derived from the following sources:

- Whitfield Urban Expansion Allocation: 2,200 dwellings
- Local Plan Allocations (excluding Whitfield): 3,392 dwellings
- Windfall Allowance (70 a year from year 4): 1,050 dwellings

5.2.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target. Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs AONB, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, meeting Dover's housing needs inevitably will require the release of significant greenfield land.

5.2.5 In our view, sustainable and accessible sites logically located adjacent to existing higher-order urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan Period, to deliver the significant number of new homes that are required and are most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the District.

6 Site Specific Assessment

6.1 Overview

6.1.1 The previous chapters of this representation (Chapter 3-5) outline our client's position relating to the soundness of the Plan in which our client is confirmed to be supportive of the Local Plan as a sound strategy for the growth of the district to 2040.

6.1.2 Paragraph 4.146 of the Local Plan states that the urban area of Deal encompasses the built-up areas of the parishes of Walmer and Sholden. Deal is identified in the Settlement Hierarchy and Confines Topic Paper (2022) as a 'District Centre', where there is a secondary focus for development. This position is reinforced by draft policy SP3 which states that development in Deal will be at a more limited scale than Dover Town, compatible with the more limited range of job opportunities, shops, services, and other facilities available in these locations.

6.1.3 As introduced in the preceding sections, Fernham Homes Limited are supporting the residential allocation of the Site 'Land at Rays Bottom, Walmer' and. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan with an indicative capacity of 75 dwellings under policy reference 'SAP15' (WAL002).

6.1.4 Appendix 1a of the Housing and Economic Land Availability Assessment (HELAA) 2022 provides the following summary:

- No heritage concerns other than archaeology.
- Site will need to reflect character of surrounding area – low density, generous landscaping, well designed.
- Potential site for executive homes.
- Risk of surface water flooding.

- Transport Assessment required.

6.1.5 The Site was considered 'Green' in the red/amber/green (RAG) rating in terms of suitability, availability and achievability, with an anticipated timescale for delivery in the medium term (2027-2031). The information contained in the summary could be addressed as part of any future planning application.

6.1.6 We agree that the Site represents a logical and sustainable location to direct the growth required within Deal and consider that the land promoted at Rays Bottom, Walmer must remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered to be wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040.

6.1.7 We are firmly of the view that the allocation of Land at Rays Bottom is a necessary component of the balanced growth strategy put forward within the Pre-submission

DDC Settlement hierarchy (2022): <https://www.doverdistrictlocalplan.co.uk/uploads/pdfs/settlement-hierarchy-and-confines-topic-paper-aug-2022.pdf>

Dover District Local Plan, comprising an appropriate mix of small, medium and strategic-scale sites deliverable across the Plan period. The allocation of well-located, reliable, greenfield sites such as our client's at Land at Rays Bottom is necessary in order for DDC to meet the growing need for new homes in the district and ensure that DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan.

6.1.8 Notwithstanding our client's support of the draft allocation within the Regulation

19 Plan in principle, we suggest that the policy text be re-visited prior to submission, to allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential. It is submitted that the SAP15 policy wording should be amended to more accurately reflect the capability of the Site to accommodate approximately 80 dwellings deliverable early in the Plan period. Further commentary on this point is provided below in section 6.3.

6.2 Site and Surroundings

6.2.1 The Site is situated to the south of Walmer, Deal between Liverpool Road to the east and Hawksdown to the west immediately adjacent to existing residential development.

6.2.2 The Site comprises an undeveloped regular parcel of land in arable use totalling approximately 4.43 hectares, forming part of a larger arable unit to the south. The Site is bound primarily by hedgerow vegetation to the east along Liverpool Road with dense woodland and mid-storey vegetation to the north. The west boundary comprises a mix of hedgerows and trees set along the perimeter abutting residential development on Hawksdown.

Figure 6.1: Approximate Site Location (courtesy of Google Earth)

6.2.3 The wider surroundings are characterised by its edge-of-settlement location with low density existing residential development along Hawksdown to the north and west and undeveloped agricultural land to the east and south. The landscape assessment which informed the HELAA recognises that the site is:

"...relatively discrete, having housing on two sides and being located on the side of a dry valley. The sensitivity of the site is moderate as views in are limited and the flow of housing down the slope would not detract. The impact of development on the wider landscape would be minimal and this could be reduced further by providing additional buffer of landscaping along the southern boundary".

6.2.4 The Site enjoys access to a number of day-to-day facilities and services which are within a reasonable walk distance, including primary and secondary schools, local shops, healthcare, employment, and public transport links within Walmer and Deal including Walmer mainline station and frequent buses along Dover Road between Dover, Deal, Sandwich and Canterbury.

6.2.5 In terms of overarching planning constraints, the site is not subject to any overarching landscape or ecological designations and is not itself subject to any heritage constraints.

6.2.6 To the north east of the site – with intervening land - is the grade II Registered Park and Garden of Walmer Castle which is a scheduled monument, and nearby to the east is an undesignated historic First World War Aerodrome and Second World War radar station within an area of Archaeological Potential.

6.2.7 There is a low risk of a surface water flow path through the non-wooded area of the site, and along the western boundary – both of which can be easily accommodated in a residential layout.

6.3 Development Capacity

6.3.1 As set out above, the proposed allocation is for 75 dwellings, reduced from 100 dwellings at the Regulation 18 stage. The reasoning set out in the "selection of Site Allocations" (September 2022) supporting document for the reduction in capacity is "To enable a scheme to come

forward which reflects the character of the surrounding area, and enable sufficient landscaping to be provided". Excluding the wooded area to the north of the site, the provision of 75 dwellings would equate to a density of 21 dwellings per hectare, with 100 dwellings equating to 28 dwellings per hectare. For the reasons set out subsequently, we consider that sites located in sustainable locations such as Land at Rays Bottom, adjacent to Deal, should take opportunities to maximise the potential for housing – whilst respecting the context and character of the area. For this reason we consider that the appropriate capacity is a little greater at approximately 80 dwellings, as part of a high-quality, landscape-led residential scheme capable of delivery within the early phase of the Plan period.

6.3.2 At this early stage, detailed proposals have not yet been advanced, however it is anticipated that any future development of the site – at 80 dwellings - will be of appropriate density, reflecting local patterns of development and sensitively designed to respect the existing character of the area, the topography of the site and to allow transition to the rural landscape and respond to its coastal location.

6.3.3 Particular care will be taken with regard to the low-risk surface flow route, impact on nearby heritage assets and ecologically sensitive sites with a particular emphasis on opportunities for biodiversity habitat creation and enhancement. Fernham Homes have a strong track record of delivering high quality housing whilst respecting such characteristics and constraints.

6.3.4 In terms of access, primary vehicular, pedestrian and cycle access to the site shall be provided from Liverpool Road. Road widening and traffic management should be provided to Liverpool Road along the frontage of the site and where possible up to the junction with Gram's Road; along with an extension to the 30mph speed limit zone. Appendix 1 indicates how this can be achieved, with the provision of a footway and suitable carriage width which meets relevant highways requirements. Alternatively, the footway could not be provided, and instead a wider carriage way could be provided. Appendix 1 also clearly shows how the required visibility splays can be achieved on land either within the site, or within the public highway.

6.4 Draft Policy Allocation 'Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer' (SAP15)

6.4.1 As introduced in the preceding sections, our client's Site at Land at Rays Bottom is allocated for residential development within the Dover Pre-submission (Regulation 19) Local Plan. For ease of reference, the draft policy wording is as follows:

"SAP15 - Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002)

The site, Land at Rays Bottom between Liverpool Road and Hawksdown, as shown on the policies map is allocated for an indicative capacity of 75 dwellings.

Development proposals for the site shall include the following:

- a) Development should be low density and sensitively designed to respect the existing character of the area, the topography of the site and to allow transition to the rural landscape;
- b) A sensitive landscaping scheme and appropriate landscape buffer to the south, determined by a Landscape Visual Impact Assessment is required to mitigate the impact of development on the wider countryside and to provide opportunities for biodiversity habitat creation and enhancement responding to the nearby BOA and local wildlife site;
- c) The existing wooded area to the north of the site and the tree and shrub line along the western boundary, shall be maintained and enhanced as areas for biodiversity habitat creation.
- d) Primary vehicular, pedestrian and cycle access to the site shall be provided from Liverpool Road. Road widening and traffic management should be provided to Liverpool Road along the frontage of the site and where possible up to the junction with Gram's Road; along with an extension to the 30mph speed limit zone;
- e) The Transport Assessment that is required to be carried out in accordance with Policy TI2, must consider and identify mitigation (potential widening/traffic management measures/junction improvements) for the surrounding local road network, taking into account the cumulative impact of this and other sites allocated in this Plan, including (but not limited to) Liverpool Road and Gram's Road up to and including the Gram's Road/Dover Road junction.
- f) A site-specific Flood Risk Assessment must be carried out in accordance with Policy CC5. This shall also inform the application of the Sequential Approach to the layout of the site by locating the most vulnerable elements in the lowest risk areas;
- g) In accordance with Policy SP13, a wintering bird survey must be undertaken in advance of a planning application on the site. If the bird survey identifies that the development will exceed the threshold of significance, mitigation will be required. A suitable scheme of mitigation will need to be submitted with the planning application for the site;
- h) An Archaeological Assessment for the site must be carried out in accordance with Policy HE3 Archaeology, the results of which should inform the layout and design of the development which is necessary to avoid harm to any archaeological assets identified through the assessment;
- i) A Heritage Assessment carried out in accordance with Policy HE1 is required to identify any necessary measures to avoid or minimise harm to the nearby heritage assets; and

j) The occupation of the development should be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider. Development should provide a connection to the sewerage system at the nearest point of adequate capacity and ensure future access to the existing sewerage infrastructure for maintenance and upsizing purposes.”

6.4.2 To be clear, our client remains wholly supportive of the principle of the allocation of the Site for residential development. Fernham Homes has a strong track record of swift delivery, and commits to being able to deliver the Site within the early phase of the Plan period. We agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client’s Site can be made – and therefore object to the capacity identified.

6.4.3 Accordingly, we say that the allocation of Land at Rays Bottom is necessary in order for DDC deliver proportionate and high-quality sustainable growth within Deal, meet the growing need for new homes in the district and ensure that DDC can have greater confidence in meeting its market and affordable housing targets in full.

6.4.4 It is submitted that the SAP15 policy wording is sound and appropriately reflects the capability of the site to deliver a sensitive, landscape-led residential development but the wording should be amended to reflect the capability of the Site to accommodate approximately 80 dwellings, deliverable with the early phase of the forthcoming Plan period.

6.4.5

6.5 Strategic Justification for Development

Spatial Strategy

6.5.1 The proposed Housing Distribution for the district across the Plan period is established within Policy SP3 ‘Housing Growth’ which sets out that the distribution of housing growth in the district is primarily based on the settlement hierarchy and influenced by site availability, environmental constraints and factors of delivery.

6.5.2 Rightly, a key aim of the growth strategy is to focus development in the least sensitive areas of the district in order to conserve and enhance the Dover’s rich natural and historical environment.

6.5.3 A retained theme from the adopted Plan, is that DDC’s settlement strategy continues to focus on the development and regeneration of Dover Town and Whitfield (3381 dwellings). Approximately half of the district’s planned housing is in this location, the majority of which again is to come forward as part of the strategic urban expansion of Whitfield ‘SAP1’ (2200 minimum dwellings).

6.5.4 Development will then be focused in the District Centre of Deal (223 dwellings), and the Rural Service Centres of Sandwich (227 dwellings) and Aylesham (649 dwellings). Following the settlement hierarchy rigidly would distribute housing in the preceding order, however the Plan recognises that housing delivery in Deal and Sandwich continues to be constrained by a number of factors including flood risk, ecological designations, heritage and highways. Further, Deal has experienced generally high levels of windfall development across the previous Plan period and accordingly there is now a dwindling supply of available, suitable sites in both settlements. On account of this context, DDC have sought to direct the majority of the remaining higher order settlement growth (outside of Dover & Whitfield) to Aylesham, through the strategic expansion to the town.

6.5.5 Outside of the four principal district settlements, the Rural Settlement Hierarchy (August 2022) identified that the majority of lower-order settlements in the district emerge as having a low level of facilities within the hierarchy and six settlements having none of the key indicators of sustainable services. Plainly, these settlements offer very limited opportunities for growth and it is evident that the forthcoming Plan will remain reliant on the settlements of Dover (including Whitfield), Deal, Sandwich and Aylesham to deliver the housing growth that is required.

6.5.6 Given this context, it is clear that where available and suitable opportunities for residential development do exist within the district’s higher order settlements, including our client’s Site at Land at Rays Bottom, Walmer which can provide a policy compliant level of much-needed affordable housing, it is imperative that the effective use of these sites are appropriately maximised in accordance with national policy objectives.

6.5.7 Notwithstanding our client’s in principle support or the proposed strategy, we are concerned that highly sustainable, edge-of-settlement sites, particularly in higher tier settlements such as Deal have not been fully maximised to reflect their accessible location and capability to accommodate a greater quantum of development. On this basis, we are concerned that the strategic objectives underlying draft policy SP3 ‘Housing Growth’ may not be fully realised, to the detriment of market and affordable housing delivery and the wider policies seeking to conserve and enhance the district’s natural and historic environment.

6.5.8 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Deal (whilst ensuring that sensitive characteristics are reflected), and this has not been

undertaken – for example at Rays Bottom, Liverpool Road. It is our view that the site has sufficient capacity to deliver approximately 5 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

6.5.9

Greenfield Development and Consistency with Housing Trajectory

6.5.10 Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs Area of Outstanding Natural Beauty, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, greenfield development will inevitably be required if DDC is to meet its housing and development commitments in full moving forward.

6.5.11 In our view, sustainable and accessible unconstrained sites logically located adjacent to existing urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan period, to support the role and timescales of strategic urban extensions and to deliver the significant number of new homes that are required within the forthcoming Plan period.

6.5.12 Within Deal itself, meaningful housing growth is inherently constrained on three sides due to the restrictive effect of the coast to the east and Flood Zone 2/3 land and ecologically sensitive sites including SSSIs to the north and west. Alongside overarching objectives to minimise the incursion of widespread development into the rural countryside, the scope for significant Plan-led development in Deal is becoming increasingly limited. Accordingly, we firmly agree that sites to the south of Deal, including that of our clients in Walmer, represent the least sensitive and most logical locations for future Plan-led growth, making effective use of the availability of sites in close proximity to the Urban Area and key infrastructure including Walmer train station.

6.5.13 In terms of housing delivery in Deal, the development of Land at Rays Bottom (75 dwellings) is anticipated to deliver completions with Years 9-11 of the Plan period, although as detailed above our clients have a strong track record of swift delivery, and consider that it could be delivered ahead of this. When combined with extant permissions within Deal and nearby allocations at Land off Cross Road, Deal (SAP14) and Deal Small Housing Sites (SAP16) totalling 100 dwellings and 48 dwellings respectively, our client's site will assist in delivering a steady supply of new homes within Deal across the majority of the early and middle phases of the Plan period and contribute to providing genuine choice in the market.

6.5.14 Moreover, in our experience, greenfield edge-of-settlement sites are typically most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that are urgently needed in the district.

6.5.15 The Sustainability Appraisal Scoping Report (2018) sets out that over the course of the adopted Plan period, the key sustainability issues facing Dover District in relation to housing are as follows:

Population growth, household growth and demographic change will place additional demand on key services and facilities such as housing, health, education and social care. The Local Plan offers a new opportunity to manage these pressures, encouraging mixed communities;

There is a need for affordable housing across the District. At present, the mean price of dwellings is higher than the national average. The Local Plan will help to expedite its delivery; and,

There is the need for a mix of housing types that cater for the needs of a range of people, including the growing number of single person and elderly households. Without an up-to date Local Plan, the required housing is less likely to be delivered.

6.5.16 It is evident that the new Dover Local Plan must allocate a mix of reliable sites capable of steadily delivering not only the quantum of housing that is required, but also the associated public infrastructure, affordable housing and a mix of unit types and tenures suitable for a wide range of future occupants.

6.5.17 The Housing Topic Paper (September 2022) provides further context and summarises under Chapter 7 'Historical Housing Delivery' that Dover has historically placed significant reliance on windfall development over the current adopted Plan period, with windfall sites accounting for 44% of all completed dwellings over the preceding 10-year period.

Figure 1: DDC Brownfield / Greenfield Completions 2010/11 to 2020/21
(source: Housing Topic Paper September 2022)

6.5.18 Moreover, it is highlighted that at the beginning of the 10 year period, the majority of new dwellings were being built on brownfield land. However, from the monitoring year 2013-14 onward development on greenfield land began to play a much greater part in the location for new development as show in figure 1 above. This trend of increased housing development on greenfield land is a result of the allocations within the CS and Land Allocation DPD being built out and is associated with an approximate doubling of completions in the district. From 2013-14 onwards the average number of completed dwellings per annum has doubled to that of the early years of the CS, as the strong

delivery rates of greenfield sites formed the predominant source of housing. This is despite an overall declining trend of brownfield completions towards the latter half of the Plan period. This is not an uncommon trend whereby in the majority of local planning authorities areas, opportunities for available and suitable sites in urban centres typically dwindle throughout the Plan period.

6.5.19 In light of the above context, it is clear that the adopted Dover Local Plan suffered from an initial under delivery of Plan-led housing growth in which windfall development sources were largely required to take up the slack in the early phases of the Plan period, as major allocated sites failed to deliver at the rates initially expected.

6.5.20 It is equally apparent that initial slow completions rates were quickly renewed once greenfield allocations commenced development, feeding into strong completions in the latter half of the Plan period. In our experience, greenfield sites are typically associated with stronger delivery rates and provide a reliable source of housing growth. The allocation of an appropriate mix of sites and scales is required in order to ensure steady and sustained Plan-led housing delivery across the Plan period and to avoid a reliance on windfall development to address the shortfall.

6.5.21 Consequently, given all of the above, it is imperative that the new Local Plan allocates a sufficient variety and scales of site capable of both ensuring steady and sustained housing completions and capable of making necessary contributions to public infrastructure and services, affordable housing and mix of unit types to address the key issue raised in the Sustainability Appraisal.

6.5.22 In our view, edge-of-settlement greenfield sites such as our client's Site Land at Rays Bottom, Walmer represents the most reliable and sustainable source of housing delivery for the Plan period. Such sites are typically less constrained by wider factors and less affected by unforeseen delays such as land contamination. Moreover, greenfield sites typically are more capable of delivering the policy compliant affordable housing, unit mix and developer contributions that are urgently needed.

6.5.23 It is understood that the Plan is predicated on the delivery of strategic scale development at Whitfield comprising the development of circa 2,200 new homes. Consequently, in order to avoid a repetition of the previous Plan, DDC have sought to ensure that a pool of reliable greenfield allocation, including that of our client's are included within the Plan, capable of delivering the early and middle phase growth that is required within the housing trajectory prior to the commencement of stronger delivery from major allocations later in the Plan period.

6.5.24 We note that within the Housing Trajectory 'Appendix D', DDC have included allocated units from Years 4 onwards, with extant permissions (accounting for 5% non-implementation) demonstrated to be solely capable of delivering the growth required in Years 1-3. Notwithstanding our client's considerations that it can deliver at Land at Rays Bottom early in the plan period, we support this pragmatic approach and suggest this represents a sound basis on which to set the district's housing trajectory. We note also the inclusion of an appropriate windfall allowance and the included contingency buffer to further ensure reasonably flexibility in the housing supply.

6.5.25 On account of all of the above, we submit that the allocation of Land at Rays Bottom, Walmer forms part of a sound strategy for growth in the district for the forthcoming Plan period. The Site is capable of delivery within the early phase of the Plan period. The Site represents a reliable source of housing growth in a highly sustainable and accessible location adjacent to the existing settlement boundary of Deal and Walmer mainline station, consistent with DDC's preferred settlement strategy. Proposals remain at an early stage, however the Site is unconstrained and is considered capable of providing a high-quality landscape-led residential development including a mix of unit types and tenures, a meaningful contribution to the supply of affordable housing and contributions to public services and infrastructure, benefiting both existing residents and future occupiers. However, we object on the submission that the Site is capable of making a greater contribution to the district's housing need and suggest an amended wording of the policy to allocate the Site for approximately 80 dwellings.

Policy SP4 'Windfall Development'

6.5.26 Separately, we note the provisions of policy SP4 windfall development. Proposals at Rays Bottom, Walmer would likely be acceptable in principle under this policy and we support the inclusion within the Plan for appropriate, proportionate windfall development.

6.5.27 Our client is fully committed to the delivery of the Site which is available and anticipated for delivery in the early phase of the Plan period. Notwithstanding the provisions of SP4, it is reiterated that our client fully supports the allocation of the Site under SAP15 as the most appropriate mechanism for delivery of the Site and the opportunity for genuinely Plan-led development in Deal, the provision of associated benefits to public services and infrastructure, contribution to affordable housing supply and the delivering of a mix of house types and tenures.

Infrastructure Delivery

6.5.28 Paragraph 11 of the Framework is clear that all plans should promote a sustainable pattern of development. This includes aligning growth and infrastructure. Paragraph 20 goes on to confirm that strategic polices will be expected to make sufficient provision for associated development infrastructure.

6.5.29 In this regard, draft policies SP11 'Infrastructure and Developer Contributions' and SP12 'Strategic Transport Infrastructure' of the emerging Plan form the key strategic policies for infrastructure delivery. We agree that where development would create a need, or would have an impact, or would exacerbate an existing deficiency in infrastructure provision, appropriate developer contributions may be sought.

6.5.30 It is however emphasised that in all developments, infrastructure requirements must be demonstrated to be necessary through assessment during determination of the application on a case-by-case basis. Where new development is proposed, it does not automatically follow that major infrastructure contributions are always required or contribution to strategic infrastructure proposals are appropriate. For instance, it is our client's view that any infrastructure requirements must be demonstrated through a robust and transparent assessment at application stage, taking into account the submission of detailed supporting evidence, for example following consideration of the Transport Assessment in the case of highway infrastructure contributions.

Alignment with Sustainability Appraisal Findings

6.5.31 As part of the preparation of the Local Plan, the Council has identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA) which provides an assessment of how different options perform in environmental, social and economic terms, to help inform which option should be taken forward and combined with wider evidence documents, have been used to determine the growth and spatial strategy set out in the Plan.

6.5.32 Five potential distributions of growth were identified during preparation of the draft Regulation 18 Local Plan:

- Spatial Option A: Distributing growth to the District's suitable and potentially suitable housing and employment site options (as needed to deliver the scale of growth required).
- Spatial Option B: Distributing growth proportionately amongst the District's existing settlements based on their population.
- Spatial Option C: Distributing growth proportionately amongst the District's existing settlements based on the District's defined settlement hierarchy.
- Spatial Option D: Distributing growth in the same way as the adopted Local Plan, focussing most growth in and around Dover town.
- Spatial Option E: Distributing growth more equally across the District's settlements: Dover, Deal, Sandwich and Aylesham, as well as the rural villages.

6.5.33 The conclusion of the SA was that Spatial Options C (settlement hierarchy) and D (adopted Core Strategy with Dover focus) generally perform the most strongly against the SA objectives, particularly when delivering the baseline growth scenario. However, given the environmental constraints that exist around Deal and Sandwich, very few suitable and potentially suitable sites have been identified in these towns. Given this, the Council's preferred option for the distribution of housing and economic growth comprises a combination of options A (HELAA sites), C (settlement hierarchy) and D (Dover focus). The distribution of housing and economic growth in the District is therefore primarily based on the settlement hierarchy, and influenced by site availability, environmental constraints and factors of delivery.

6.5.34 On account of the above, our client agrees that the proposed growth strategy, and by extension, policy SP3 in principle represents a sound and evidence-led strategy for growth. However, given the clear acknowledgement of the dwindling supply of available sites in the higher order settlements of Deal and Sandwich, which has necessitated a minor deviation from the strongest performing spatial options, we submit that where sites are available and suitable for development in Deal and Sandwich, these must be fully maximised, reflecting their accessible location and their ability to reduce the need to develop into less accessible and more sensitive sites elsewhere in the district to accommodate the growth that is required.

Site Specific Sustainability Appraisal

6.5.35 Land at Rays Bottom between Liverpool Road and Hawksdown is included under HELAA reference 'WAL002' within the SA Site Assessment (Appendix F). The site generally performs strongly, with particular positives identified with regards to SA Objectives related to housing and the economy.

6.5.36 We contest the assessment of 'minor negative' in regard to sustainable transport. To the contrary, the site is well-located adjacent to the settlement boundary of Deal with access to a range of high-quality day-to-day services and access to Walmer train station for convenient access to larger settlements. In what is otherwise a largely rural district, we strongly disagree with the suggestion that an edge-of-settlement site represents a less than preferable location in respect of sustainable travel and day-to-day access to amenities.

6.5.37 We also note negatives associated with the development of a greenfield site, including loss of agricultural land, however this would be true of the majority of greenfield sites and it is abundantly clear that Dover's housing need cannot be met solely on brownfield sites. We note also minor negatives / uncertain associated with biodiversity, the historic environment and landscape, however it is not clear whether these take into account the potential for high-quality design, biodiversity enhancement and landscape mitigation. Irrespective, these are not considered to

outweigh the clear and tangible sustainability benefits associated with edge-of-settlement development, the site's consistency with the preferred spatial options and the wider benefits associated with reducing the need to develop into lesser accessible, more sensitive sites to otherwise deliver the housing growth that is required.

Summary

6.5.38 Taking all of the above into consideration, our client is wholly supportive of the inclusion of land promoted at Rays Bottom, Walmer as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040.

6.6 Deliverability

6.6.1 Prior to the current appeal proposal, the Site has had no recent planning history of a residential nature or a history of unimplemented permissions. There are not considered to be any impediments to the Site being allocated for development commencing within the early (or mid) phase of the Plan period.

6.6.2 Fernham Homes – a local SME with a strong history and track record of delivery, together with an adopted and robust business plan for growth – is promoting the site, and are poised to commence work on its residential development promptly after the adoption of the Local Plan.

6.6.3 Combined with the delivery of extant permissions, an appropriate number and scale of wider allocations within Deal (including SAP 14 and SAP 16) and elsewhere across the district, this would ensure the steady delivery of housing both in Deal and in Dover district across the majority of the Plan period and support the role and timescales of strategic housing delivery at Whitfield towards the latter half of the Plan period.

6.6.4 For the reasons set out in this representation, the Site is considered suitable for the residential development of approximately 80 dwellings. The Site is adjacent to the overarching urban area of Deal, one of the four higher order settlements in the district and DDC's preferred locations for Plan-led growth within the district. Development at land at Rays Bottom would form a natural and logical development south of Walmer, Deal with excellent accessibility to day-to-day services and amenities via active travel modes within Deal itself and convenient access to public transport infrastructure including Walmer train station for onward travel to key neighbouring settlements including Dover, Ramsgate, Canterbury and Ashford.

6.6.5 Finally, in respect of suitability there are no physical limitations or problems such as access, infrastructure, flood risk, hazardous risks, pollution or contamination.

6.6.6 On behalf of the landowner, we submit that there are no known financial restrictions that would impact upon the viability of a future housing scheme or that would prohibit development coming forward within the mid-stages of the Plan period. To the contrary, we consider there to be an opportunity to deliver a high-quality, sustainably located residential development scheme consistent with DDC's proposed growth strategy comprising an appropriate mix of market and affordable housing and capable of contributing to a range of community facilities, public infrastructure and services locally.

6.6.7 At the time of writing, proposals at Rays Bottom, Walmer remain at an early stage, however our clients are firmly committed to progressing the delivery of the Site on adoption of the Plan. The project team therefore does not anticipate any absolute constraints to the commencement of delivery on-site early in the plan period (potentially 2025-26) and completion by 2028/9).

6.6.8 The Site is in single ownership and there are no complicated legal agreements or covenants that would prohibit the ability to bring forward the Site in line with DDC's housing trajectory within the mid-phase of the Plan period. The Site is therefore considered available and achievable for the purposes of the tests of deliverability.

7 Conclusion

7.1 Summary

7.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited in response to the DDC Local Plan (Regulation 19) consultation which runs until 9th December 2022.

7.1.2 Our client is promoting 'Land at Rays Bottom, Walmer, Deal' for the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan within an indicative capacity of 75 dwellings under policy reference 'SAP15'.

7.1.3 Taking the above representation contents into consideration, we remain wholly supportive of the principle of the allocation of Land at Rays Bottom and agree that the Site represents a logical and sustainable location to direct necessary growth within Deal.

7.1.4 Accordingly, we consider that the land promoted at Rays Bottom, Walmer must remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered to be wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040. However, it is imperative that the effective use of these higher-order settlement sites are appropriately

	<p>maximised in accordance with draft policy SP3 of the emerging Plan, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and object solely on this basis.</p> <p>7.1.5 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Deal, and this has not been undertaken – for example at Land at Rays Bottom, where it is considered that the site has sufficient capacity to deliver approximately 5 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.</p> <p>7.1.6 Outside of the point regarding capacity, it is submitted that the SAP15 policy wording is sound and appropriately reflects the capability of the site to deliver a sensitive, landscape-led residential development with an indicative capacity of 80 dwellings, deliverable with the early phase of the forthcoming Plan period. Without prejudice to our client's support in principle of the proposed allocation, we would urge the Council to re-visit the allocation policy text and allow a higher dwelling capacity.</p> <p>7.1.7 Accordingly, we say that the allocation of Land at Rays Bottom forms part of a balanced growth strategy comprising an appropriate mix of small, medium and strategic-scale sites deliverable across the Plan period. The allocation of well-located, reliable, greenfield sites such as our client's at Land at Rays Bottom is necessary in order for DDC to meet the growing need for new homes in the district and ensure that DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan.</p> <p>7.1.8 In addition to being a highly sustainable and logical edge-of-settlement allocation, the Site is deliverable in a single land ownership with no viability issues, legal or third-party constraints present. Our client is fully committed to the delivery of land at Rays Bottom Farm and there are no impediments to the Site being capable of delivery within the mid-phase of the Plan period.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	For the reasons set out in the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359), the capacity of Land at Rays Bottom between Liverpool Road and Hawksdown, Walmer (WAL002) and Policy SP3 - Housing Growth should be increased to approximately 80 dwellings.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Please refer to the consultation response submitted on behalf of Fernham Homes Limited (ref DHA/30359).

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP4
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	I have concerns on the sp4 in the local plan. We have recently purchased the pub, The Crown Inn at Finglesham tho when we purchased this property we never thought we would like to develop the land, however unfortunately since August when we took over this property we have seen a huge increase energy bills, traffic to the holiday lodges dwindle to a small amount of rent to the point they are not paying for their selfs at the moment. If this local plan is put in place it would stop us from using the whole piece of land to gain the return needed to help keep the pub open. What we would consider if business doesn't pick up is to maybe take down the holiday lodges all the outbuildings and wedding barn. We would then develop this land we believe we could build 10 Homes on this site. In doing this we would then have the resources to change the pub for the better In doing this we believe that we could make the pub a huge success and keeping it a village asset with the advantage of not having no financial strains to all the other buildings. This was never our intention when buying this venture we are fully committed to keeping this as a village asset, however we have huge worries going forward in the present climate. Could you please consider moving the confines so all of the property in within the boundaries, or consider struggling businesses in sp4 of the local plan.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	I worried that there could be no consideration for arguments against this part of the policy
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Local Plan Consultation Point	Strategic Policy 4 - Residential Windfall Development
Rep ID	SDLP1313
Rep Status	Processed

Consultee ID	1331922
Consultee Full Name	Matthew Porter
Consultee Company / Organisation	Fernham Homes Ltd & Walker Residential Ltd
Agent Full Name	Matt Porter
Agent Company / Organisation	DHA Planning
1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	Policy SAP22 - Land at Archers Low Farm, St Georges Road Sandwich (SAN023) Policy SP3 - Housing Growth Policy SP4 - Windfall Development Policy SP11 - Infrastructure and Developer Contributions Policy SP12 - Strategic Transport Infrastructure
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>We consider that the plan is sound, but object to elements of Policy SAP22 - Land at Archers Low Farm, St Georges Road Sandwich (SAN023) and Policy SP3 - Housing Growth. These objections are set out in the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245).</p> <p>1 Introduction</p> <p>1.1 Purpose of this Representation</p> <p>1.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited and Walker Residential Limited in response to the Dover District Council 'DDC' Local Plan (Regulation 19) consultation which runs until 9th December 2022.</p> <p>1.1.2 We understand that DDC is in the process of preparing a new Local Plan to set out a strategy for development for the period to 2040 and that the Council are presently seeking comments on the pre-submission Plan prior to its submission for examination in early 2023.</p> <p>1.1.3 Our client controls 'Land at Archers Low Farm, Sandown Road, St Georges Road, Sandwich' (hereafter referred to as 'Land at Archers Low' or 'the Site') and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.</p> <p>1.1.4 It is highlighted that as part of the Regulation 18 Local Plan, the Site was allocated under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' for approximately 40 dwellings (reference SAN023).</p> <p>1.1.5 The purpose of the representation is to support the allocation of 'Land at Archers Low' for a greater quantum of development and provide comment on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan, but to object to the indicative capacity set out in the policy.</p> <p>1.1.6 In this regard, we remain wholly supportive of the principle of the residential allocation of the Site and agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client's Site can be made – and object (solely) to this element of the policy.</p> <p>1.1.7 Accordingly, we say that Land at Archers Low can further assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.</p> <p>1.1.8 Based on the current national and local planning context, we consider the Site to be a highly suitable edge-of-settlement location to allocate land for housing to help meet the need for new homes in the district and its effective use should be appropriately maximised in accordance with national policy objectives.</p>

1.1.9 Further details regarding the Site and commentary on the consistency of the allocation with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan are set out in the following sections of this document.

1.2 About Fernham Homes

1.2.1 Fernham Homes Limited are a local award winning small and medium sized (SME) housebuilder, established in 1997 and has a strong track record of delivering high quality residential and mixed use developments in Kent over the last 25 years. This has been acknowledged through the receipt of nationally recognised awards, including the gold Evening Standard Awards best family home 2022 and 2019 bronze WhatHouse Best Small Housebuilder.

1.2.2 SME housebuilders are recognised in the National Planning Policy Framework ('NPPF') at paragraph 69 as making an important contribution to meeting the housing requirements of an area, and being able to build out relatively quickly. Similarly, this has also been recognised by the Planning Inspectorate. This is particularly the case with Fernham Homes, which is privately owned with access to significant resources. This provides significantly more flexibility than national and other regional housebuilders, and allows Fernham Homes to deliver housing rapidly and to a high quality, beautiful and sustainable standard (para 126 of the NPPF).

1.2.3 Fernham Homes Limited has embarked on a sustained period of growth, with an adopted and robust business plan to deliver around 300 houses per year in five years time.

1.2.4 A key element of Fernham Homes' operations is to take a very careful approach to site selection: a huge amount of due diligence is undertaken as part of this, and therefore Fernham Homes Limited only invests in those sites which meet the NPPF requirements of being available, suitable, and deliverable. As set out below land at Archers Low Farm, Sandwich ('SAP22') is firmly considered to be such a site.

1.2.5 Similarly, a key feature of Fernham Homes' approach is to work positively and proactively with local planning authorities (LPAs), both during the preparation of local plans and at planning application stage. Fernham Homes Limited are fully committed to engaging with Dover District Council in the preparation of its Local Plan, and firmly subscribe to the national policy approach set out in paragraphs 15 and 16 c) of the NPPF that "the planning system should be genuinely plan-led" and should be shaped by early, proportionate and effective engagement between LPAs and others, including businesses and developers. Accordingly, Fernham Homes Limited would welcome the opportunity to discuss the matters contained in this representation, including the availability, suitability, deliverability and capacity of land at Archers Low Farm, Sandwich ('SAP22') directly with Dover District Council members and officers, ahead of the submission of the Local Plan for examination.

1.3 Representation Structure

1.3.1 The representation structure is outlined below for ease of reference:

Chapter 2 (Consultation Background) – Sets out the context of the Dover District new Local Plan preparation, relevant national planning requirements and a summary of our current position.

Please refer to paragraph 52 of appeal decisions: APP/M2270/W/21/3283924 and APP/M2270/W/21/3288645

Chapter 3 (Legal Tests of Soundness) - Assessing whether the plan is sound, having regard to the tests of soundness outlined by paragraph 35 of the NPPF.

Chapter 4 (Duty to Co-operate) - Assessing whether the plan is sound, having regard to the duty to cooperate outlined by paragraph 24 of the NPPF.

Chapter 5 (Housing Need) - Consideration of market and affordable housing need and assessment of proposed housing allocations and supply sources.

Chapter 6 (Assessment of Suitability) - Re-introduces our client's Site and provides a summary of planning constraints and opportunities, including the quantum of development that could be accommodated, why the Site is suitable for development and why the principle of the draft allocation for residential development is both justified and consistent with the Council's strategy for growth in the district. It also sets out why we consider there is scope for a higher number of dwellings at the site. This consideration amounts to an objection to one element of the strategy – namely that those sites around the most sustainable settlements should be maximised.

Chapter 7 (Conclusion) - Summarises the key points raised throughout the representation and re-affirms our client's support for the principle of the Site's allocation and the principle of the proposed strategy ahead of the submission of the Plan for examination, and the objections in terms of capacity.

2 Dover District Council – Draft for Submission Local Plan (Regulation 19)

2.1 Consultation Background

2.1.1 DDC are required to prepare a new Local Plan, as the current suite of development plan documents were adopted in 2002, 2010 and 2015. The Core Strategy (CS) (adopted 2010) in particular has a time horizon up to 2026 and requires updating.

2.1.2 The new Local Plan will set out the vision, strategic objectives and overarching development strategy for the growth of the District over the period to 2040. It provides the planning policy framework to guide the future development of the area, addressing needs and opportunities for housing, the economy, community facilities and infrastructure, as well as the basis for conserving and enhancing the natural and historic environments, mitigating and adapting to climate change, and achieving well designed places.

2.1.3 For the avoidance of doubt, the new Local Plan, on adoption, will replace the CS 2010 and the Land Allocations Plan 2015, as well as saved policies from the 2002 Local Plan.

2.1.4 DDC's Regulation 19 Local Plan outlines the key issues that need to be addressed between now and 2040. In particular, the Plan sets out the following key planning issues for the District:

- Ensuring that new development in the District contributes to the mitigation of, and adaptation to, climate change.
- Supporting the Council to deliver its intention to be a carbon neutral district by 2050.
- Managing flood risk and coastal change.
- Ensuring that a sufficient amount and variety of land is identified to deliver a continuous supply of housing across the Plan period and that the Council maintains a five-year housing land supply.
- Delivering growth in a way that focuses development in the least sensitive areas of the District in order to conserve and enhance the District's rich natural and historic environments.
- Supporting sustainable development in rural areas to enhance the vitality of rural communities.
- Working with partners to facilitate the delivery of the Whitfield Urban Expansion.
- Ensuring a range of housing tenures, types and sizes are provided across the District to meet the needs of the local community and provide choice and flexibility in the housing market.
- Promoting economic growth, tourism, and investment in the District's Town Centres in line with the Council's Economic Growth Strategy.
- To address the impact of the COVID-19 pandemic.
- Delivering strategic transport improvements, including upgrades to the Duke of York and Whitfield roundabouts to support the scale of housing and economic growth identified in the Plan.
- Promoting sustainable transport initiatives to encourage a modal shift to more sustainable forms of transport like walking and cycling.
- Ensuring that infrastructure is delivered, in the right place, at the right time, to meet the needs of the District and support the levels of development identified in the Local Plan.
- Supporting the delivery of attractive, high-quality, design led developments and the creation of healthy, inclusive and safe communities, that are well served by good quality services and facilities to support people's lives.
- Conserving and enhancing the District's rich and diverse natural landscape, including the five international sites within the district, the Kent Downs Area of Outstanding Natural Beauty (AONB), five Sites of Special Scientific Interest (SSSIs), two National Nature Reserves (NNRs), two stretches of Heritage Coasts and two Marine Conservation Zones.
- Delivering a net gain in biodiversity in the District over the plan period.
- To promote the conservation, restoration and where appropriate the enhancement of the District's heritage assets, in order to protect their significance and to ensure that they can be best appreciated and enjoyed by current and future generations.

2.1.5 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. This submission will comment on each of the above, highlighting where we believe any areas of concern lie or where modifications may be required.

2.2 DDC's Local Development Scheme

2.2.1 The District Council has a duty to review the policies contained within the development plan every five years. The 2014/2015 Authority Monitoring Report signalled the need to review key parts of the Council's adopted CS evidence base.

2.2.2 The Council's Local Development Scheme (LDS) first outlined the delivery timetable for the Local Plan Review (LPR) in the March 2017 publication. Since then, the LDS has been updated on an annual basis. The most recent September 2022 LDS summarises that following the preparation of the principal evidence base documents, the Local Plan Review Regulation 18 consultation took place for 8 weeks in January 2021. The Regulation 19 consultation was scheduled for 7 weeks during Q4 of 2022 and is the subject of this representation.

2.2.3 Moving forward, submission of the Plan is anticipated in Q1-2 2023 with the Examination in Public in Q3-4 2023. The new Local Plan is currently scheduled for adoption in 2024.

2.2.4 As planned, DDC are now undertaking the Regulation 19 Draft Local Plan Consultation, for which this submission is made

3 Legal Test of Soundness

3.1 Legislation and Guidance

3.1.1 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. It is a statutory requirement that every development plan document must be submitted for independent examination to assess when it is "sound", as well as whether other statutory requirements have been satisfied (s.20(5) of the 2004 Act). By s.19 of the 2004 Act, in preparing a development plan document a local planning authority must have regard to several matters including national policies and advice contained in guidance issued by the Secretary of State. Such guidance currently exists in the form of the NPPF and is summarised below. This states that Plans must be:

(a) Positively Prepared: based on a strategy which seeks to meet objectively assessed development and infrastructure requirements

3.1.2 This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The NPPF set out principles through which the Government expects sustainable development can be achieved.

(b) Justified: an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence

3.1.3 This sets out the requirement that the Local Plan should be based on a robust and credible evidence base involving:

I. Research/fact finding: the choices made in the plan are backed up by facts.

II. Evidence of participation of the local community and others having a stake in the area.

3.1.4 The Local Plan should demonstrate an appropriate strategy, taking into account reasonable alternatives and based on proportionate evidence. These alternatives should be realistic and subject to sustainability appraisal. The Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.

(c) Effective: deliverable over its period based on effective joint working on cross-boundary strategic priorities

3.1.5 This makes clear that the Local Plan should be deliverable, requiring evidence of:

- Sound infrastructure delivery planning;
- Having no regulatory or national planning barriers to delivery;
- Delivery partners who are signed up to it; and
- Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.
- The new Local Plan should be flexible and able to be monitored.

3.1.6 The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the Local Plan should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.

d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national policy.

3.1.7 This submission comments on each of the above in further detailing, highlighting areas of support and where modifications are required as appropriate.

3.2 Legal Compliance

3.2.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

3.2.2 In addition to the above, the NPPF states² that: "Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that:

a) all plans should promote a sustainable pattern of development that seeks to: meet the development needs of their area; align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects;

b) Strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

(i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or

Paragraph 11, NPPF 2021

(ii) Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.”

3.2.3 In addition, to the above, the NPPF states³ that Plans should:

a) be prepared with the objective of contributing to the achievement of sustainable development;

b) be prepared positively, in a way that is aspirational but deliverable;

c) be shaped by early, proportionate and effective engagement between plan-makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;

d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;

e) be accessible through the use of digital tools to assist public involvement and policy presentation; and

f) serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).

3.2.4 It is important to note that the NPPF⁴ requires strategic policies to set out an overall strategy for the pattern, scale, and design quality of places, and make sufficient provision for:

a) housing (including affordable housing), employment, retail, leisure and other commercial development;

b) infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat);

c) community facilities (such as health, education and cultural infrastructure); and;

d) conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation.

3.2.5 It is clear from the above, that any local plan should set out a comprehensive and cohesive approach to future development.

Paragraph 16, NPPF 2021

Paragraph 20, NPPF 2021

4 Duty to Co-Operate

4.1 Legal and NPPF Requirements

4.1.1 Section 33A of the Planning and Compulsory Purchase Act 2004 sets out a statutory ‘Duty to Cooperate’ (DtC) – i.e. a legal obligation - to all bodies as prescribed by Regulation 4 of the Town and Country Planning (Local Planning) England Regulations 2012 (the Regulations).

4.1.2 The duty requires DDC to cooperate with other persons to ‘maximise the effectiveness’ with which named activities are undertaken. Those activities include the preparation of development plan documents (such as this Local Plan document) and activities that support that activity ‘so far as relating to a strategic matter’.

4.1.3 A strategic matter is defined by S33A(4) in summary as: (a) ‘sustainable development or use of land that has or would have a significant impact on at least two planning areas’ (a planning area in this case is the area of a borough or district council); and (b) ‘sustainable development

or use of land in a two tier area' (as this is) 'if the development or use (i) is a county matter, or (ii) has or would have a significant impact on a county matter'. County matters broadly relate to minerals and waste and associated developments as defined by Paragraph 1 of schedule 1 to the Town and Country Planning Act 1990 (as amended).

4.1.4 Section 33A (7) requires DDC (and persons subject to the DtC) to have regard to any guidance issued by the Secretary of State about how the duty is to be complied with. In that regard Paragraph ID 9-004-29140306 of the Government's Planning Practice Guidance (PPG) confirms amongst other things that the DtC is not a duty to agree (albeit that local planning authorities should make every effort to secure the necessary cooperation on strategic cross border matters before they submit local plans for examination).

4.1.5 The NPPF establishes that effective and on-going joint working is an integral part of the plan making process that will, amongst other things, determine whether development needs that cannot be met wholly within a plan can be met elsewhere. The NPPF goes on to state at paragraph 27 that in order to demonstrate effective and on-going joint working strategic policy making authorities should: "... prepare and maintain one or more statements of common ground documenting the cross-boundary matters being addressed".

4.1.6 In addition to the District's own housing pressures, part of the DtC involves considering whether neighbouring authorities' unmet housing need can be accommodated. It is worth highlighting that recent amendments to the London Plan have identified that the City's housing need has become increasingly more difficult to deliver and therefore areas outside London will be faced with having to absorb more of London's housing need. Consequently, DDC has a duty to explore whether it can accommodate some of this overspill of London's unmet need.

4.2 Assessment of DDC's discharging of the Duty to Co-operate

4.2.1 It is recognised that work to discharge the DtC remains ongoing by DDC and will continue prior to submission as part of the preparation of the Local Plan evidence base.

4.2.2 Notwithstanding the above, at this stage it is understood that DDC have engaged with the members of the East Kent Regeneration Board including neighbouring East Kent planning authorities, Kent County Council (KCC) and its subsidiary departments:

- Folkestone and Hythe District Council
- Canterbury City Council
- Thanet District Council
- KCC
 - KCC Highways & Transportation
 - KCC Minerals & Waste
 - KCC Heritage Conservation
 - KCC Flood & Water Management
 - KCC Natural Environment & Coast
 - KCC Infrastructure including Education

4.2.3 In February 2016, the Council adopted a Memorandum of Understanding (MOU) in respect of the DtC between the East Kent Regeneration Board members. A review of the MOU took place and was agreed in January 2021.

4.2.4 The East Kent MOU sets out the framework in which the authorities will work together on strategic issues and will actively engage. It forms the overarching framework and context within which Statements of Common Ground (SoCG) will be agreed between individual authorities.

4.2.5 Further engagement is also confirmed to have taken place between the following prescribed bodies and other relevant bodies:

- Environment Agency
- National Highways
- Historic England
- Natural England
- Network Rail
- NHS Kent and Medway Clinical Commissioning Group (CCG) – now known as Integrated Care Board (ICB) since July 2022
- Kent Downs AONB Unit
- Other infrastructure providers

4.2.6 Whilst work remains ongoing, at this stage it is understood that SoCGs have been agreed and signed between the following parties:
DDC and Folkestone & Hythe District Council

DDC and Canterbury City Council

DDC and Thanet District Council

DDC and Kent County Council

Dover District Council and National Highways

4.2.7 As part of the DtC Evidence Base documents, DDC prepared a detailed DtC Statement (dated September 2022) which sets out a summary of the engagement that has taken place, firstly by organisation, and then by issue. Whilst the statement focuses on strategic issues and duty to co-operate bodies it also includes information relating to engagement on non-strategic issues and co-operation with other bodies that are not prescribed by the regulations. In addition, Appendices 1, 3 and 4 identify the main meetings and other correspondence that has taken place throughout the plan making process.

4.3 Summary

4.3.1 On account of the above and the documents published within the Council's Local Plan Evidence Base, we are satisfied that the Council as the strategic policy making authority has demonstrated effective and on-going joint working with neighbouring authorities, the county council, prescribed bodies and other relevant bodies. Further, we agree that DDC has prepared and maintained SoCG documenting the cross-boundary matters being addressed in accordance with the Framework and the DtC may be discharged by the Planning Inspector under Section 20(5) (c) of the Planning and Compulsory Purchase Act 2004.

4.3.2 Without prejudice to the above, should ongoing work by the Council result in significant changes in circumstances such that the signed SoCGs may be amended or withdrawn, our client reserves the right to alter their consultation response accordingly and be present at the examination of the Plan to discuss further.

5 Housing Need

5.1 Context

5.1.1 Paragraph 11 of the NPPF is explicit in its requirement for strategic policy-making authorities to promote a sustainable pattern of development that seeks to meet the need in full.

5.1.2 Paragraph 20 of the Framework is equally clear that strategic policies should set out an overall strategy for the pattern, scale and design quality of places. Policies should make sufficient provision for the development that is required as well as associated infrastructure, community facilities and should set out a strategy for the conservation and enhancement of the natural, built and historic environment.

5.1.3 Given this national planning context, the emerging Local Plan should provide a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic environment.

5.1.4 National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate.

5.1.5 In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.

5.1.6 Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.

5.2 DDC's Housing Need

5.2.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover District of 596 dwellings per annum. However, the affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total housing need of 10,998 dwellings for the Plan period to 2040. We understand that the Regulation 19 Local Plan seeks to meet this need in full and in addition to the minimum figures, DDC have set an appropriate contingency buffer of 926 dwellings of the Plan period, equating to 8.4% of the total Plan period figure.

5.2.2 For context, the current adopted CS requirement is 700 dwellings per annum. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.

5.2.3 For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate sufficient land to accommodate a minimum of 6,642 new homes over the remaining plan period to 2040. It is understood that this will be derived from the following sources:

- Whitfield Urban Expansion Allocation: 2,200 dwellings
- Local Plan Allocations (excluding Whitfield): 3,392 dwellings
- Windfall Allowance (70 a year from year 4): 1,050 dwellings

5.2.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target. Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs AONB, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, meeting Dover's housing needs inevitably will require the release of significant greenfield land.

5.2.5 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Sandwich, represent the most sustainable and reliable sources of growth for the Plan period, consistent with the overarching strategic objectives of draft policy SP3 within the emerging Plan. Such sites are best placed to deliver the significant number of new homes that are required and are most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the District as well as further balancing the role of strategic-scale development at Whitfield within the emerging Plan's proposed growth pattern.

6 Site Specific Assessment

6.1 Overview

6.1.1 The previous chapters of this representation (Chapter 3-5) outline our client's position relating to the soundness of the Plan in which our client is confirmed to be supportive in principle of the Local Plan as a sound strategy for the growth of the district to 2040. It is clear that Sandwich must continue to form a principal location for focusing sustainable housing delivery in Dover district and will assist in ensuring an appropriate balance of sites are identified, capable of supporting the strategic role of Whitfield within the forthcoming Plan Period.

6.1.2 As introduced in the preceding sections, Fernham Homes Limited and Walker Residential Limited control 'Land at Archers Low, Sandwich' and are continuing to promote the residential allocation of the Site. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.

6.1.3 As aforementioned, the Site was allocated in the Regulation 18 Local Plan for approximately 40 dwellings under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' (reference SAN023).

6.1.4 Notwithstanding our client's support of the draft allocation within the Regulation 19 Plan in principle, we suggest that the policy text be re-visited prior to submission, to allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential. It is submitted that the SAP22 policy wording should be amended to more accurately reflect the capability of the Site to accommodate approximately 40 - 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.

6.1.5 Fernham Homes Limited and Walker Residential Limited are fully committed to the delivery of the Site within the next five years, and subject to a grant of planning permission in Spring 2023 – please see below – anticipate starting developing on site in 2023. Indeed, for the avoidance of doubt it is confirmed that Fernham Homes Limited and Walker Residential Limited have previously submitted a planning application ('ref: 22/00274') for the residential development of the Site for 44no. dwellings with associated access, parking, open space, landscaping, drainage, and infrastructure. (Amended plans and details).

6.1.6 Following a positive recommendation to grant planning permission by Officers at the DDC Planning Committee, the application was refused following consideration at Planning Committee on 31st March 2022. The application is now the subject of an appeal with a date confirmed for a two day hearing on the 17th - 18th January 2023. The site layout is shown in Figure 6.2.

6.1.7 For the avoidance of doubt, our client's support of the proposed allocation, subject to their objection to the capacity and considerations that it can accommodate an increased capacity of approximately 40 – 45 dwellings, is made without prejudice to the ongoing appeal. Should the appeal be allowed, this would realise the delivery of the residential allocation in accordance with the policy requirement (albeit more dwellings), which is consistent in its key elements with the submitted appeal scheme.

6.2 Site and Surroundings

6.2.1 The Site is situated to the southeast of St. George's Road and southwest of Sandown Road, on the southern edge of Sandwich.

6.2.2 The Site is a predominately undeveloped parcel of land totalling approximately

2.37 hectares, with tall and dense hedge and tree planting around the perimeter of the Site and an existing agricultural access point off St Georges Road to the north-west of the Site

6.2.3 The Site comprises a level enclosed field mainly formed of uniform improved grassland bounded on all sides by trees mixed in age, species, condition and character. There are also semi-derelict agricultural buildings in the southwest corner.

Figure 6.1: Site Location Plan (Drawing no. 29923A/01)

6.2.4 The Site comprises a level enclosed field mainly formed of grassland bounded on all sides by trees mixed in age, species, condition and character. There are also semi derelict agricultural buildings in the southwest corner.

6.2.5 The Site is bounded by existing residential development along St Georges Road to the north and west, undeveloped land to the east and south, Sandown Road to the north-east and a small area of residential development fronting Sandown Road further to the east of the Site.

6.2.6 The Site enjoys access to a number of local facilities and services which are within a reasonable walking distance, including schools, local shops, healthcare, employment, and public transport links. The Sir Roger Manwood Secondary School, Sandwich railway station and the historic town centre (including convenience stores) are all located within 800m of the Site. Sandwich Junior School and the local supermarket are located just over 800m from the Site. Larger shops and supermarkets are available in the local area, including Westwood Cross 8 miles to the north and Deal, 6 miles to the south. In terms of planning constraints, a Tree Preservation Order (TPO) protects trees on the northwest boundary of the Site and the belt of trees bounding the northeast and southeast.

6.3 Development Capacity

6.3.1 For the purposes of this representation, Land at Archers Low Farm, Sandwich is submitted with capacity for approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), as part of a high- quality, landscape-led residential scheme capable of delivery early in the Plan period.

6.3.2 Significant work has already been advanced by the project team as part of the submitted planning application and the subsequent appeal in which the proposed development has been informed following a thorough analysis of the Site opportunities, constraints and surroundings. The key design principles have been to create an attractive, permeable and legible layout set with a strong landscape framework, utilising existing landscape features, to accommodate a mixture of high-quality and attractive homes, of a scale and design that reflect its setting and surroundings.

6.3.3 In summary the vision for the Site is to create a high quality residential development which includes:

- Circa 40 – 45 no. residential dwellings, comprising 30% Affordable Housing and a mixture of 2, 3 and 4 bedroom properties.

- A series of open spaces that perform multiple functions including informal space, a local area of play (LAP), ecological mitigation areas and incorporation of native and wildflower meadow planting.

- Retention of trees on the northern and southern boundaries and the provision of new woodland planting. This will include proactive management of the retained and proposed woodland belts to encourage structural and species diversity and improve the overall health and longevity of these assets. The provision of significant biodiversity net gain is envisaged, and has been demonstrated can be delivered through the application and appeal.

- Low key principle vehicular access point onto Sandown Road through landscaped entrance with trees and vegetation maintained, introduction of wildflower planting.

- Footpath connectivity onto St Georges Road.

- Tree lined connecting avenue creating strong legibility and navigation throughout the layout.

Figure 6.2: Proposed Site Plan as amended in December 2021 (Produced by Clague Architects – Drawing no. 29923A/11)

6.3.4 For context, at the time of determination of application ref: '22/00274', full planning permission was sought for the erection of 44 dwellings, together with associated access to Sandown Road, a pedestrian crossing point on St Georges Road, parking, open space, landscaping, drainage, and infrastructure works.

6.3.5 It is highlighted that draft policy PM1 seeks to provide a density typically between 30-50 net dwellings per hectare (dph). In this respect, it is highlighted that at 45 dwellings, the Site would provide a density of approximately 22.5 dph. Whilst it is acknowledged that lower density development may be more appropriate in edge of settlement locations, this demonstrates that even at a capacity 45 dwellings, the density is relatively low. Furthermore, as part of the previous application 22/00274, DDC confirmed at paragraph 2.23 of the Committee Report that subject to a detailed assessment of visual impacts, a proposed scheme of 44 dwellings on the Site is considered appropriate.

6.3.6 The above proposed Site plan submitted during the determination of the application demonstrates the capability of the Site to comfortably accommodate circa 40 – 45 residential units, together with significant boundary and internal landscaping elements.

Draft Allocation in the Regulation 18 Local Plan:

6.3.7 As aforementioned, the Site was proposed to be allocated for a capacity of approximately 40 dwellings in the Regulation 18 Local Plan under the 'Site Allocations Policy 1 Non-Strategic Housing Allocations' (reference SAN023).

6.3.8 The Site was considered as part of DDC's Housing and Economic Land Availability Assessment (HELAA) (December 2020) for the development of approximately 40 dwellings. The summary of suitability as provided by DDC is summarised as follows:

- The Site is in an Area of Archaeological potential and a Heritage Assessment will be required.
- The Site clips Flood Zone 2 and 4, along the boundary and an FRA would need to be undertaken.
- The Site was removed from the LALP (Local Allocations Local Plan) by the Inspector on landscape grounds, however, with the provision of an enhanced landscape buffer to the east, south and west of the site to provide year-round screening, it is considered that the impact on the landscape can be mitigated. The housing number on the site has also been reduced to address landscape concerns.
- Access to this site would be possible via Sandown Road, however vehicle access onto St Georges Road is likely to be challenging due to limited footway width and subsequent sightline requirements, so would need to be restricted to emergency/pedestrian access only.
- The provision of 40 dwellings is unlikely to create a severe impact on the surrounding highway network, however St Georges Road and Sandown Road (including Knightrider Street and the route to the High Street/Quay) are subject to constrained geometry due to on street parking, as such, a review on-street parking controls may be required to manage any increase in traffic-flow.
- There is a general concern over the potential cumulative impact of development in and around Sandwich and on routes within the town, which should be considered as part of future traffic modelling exercises.
- A Transport Assessment is required.
- Further information should be provided to demonstrate that access is achievable. However, cumulative impact on the highways network needs to be assessed.

6.3.9 At the time, owing to the matters set out above the Site was considered 'Amber' in the reg/amber/green (RAG) rating. However the clients have since demonstrated within the planning application and subsequent appeal submission that the proposed development for 44 dwellings would address the queries above.

6.4 Draft Policy Allocation 'Land at Archers Low Farm, Sandwich Road, Sandwich' (SAP22)

6.4.1 As introduced in the preceding sections, our client's Site at Archers Low is allocated for residential development within the Dover Pre-submission (Regulation 19) Local Plan. For ease of reference, the draft policy wording is as follows:
"SAP22 – Land at Archers Low Farm, St Georges Road, Sandwich (SAN023)

The Site, Land at Archers Low Farm, St Georges Road, Sandwich, as shown on the policies map is allocated for an indicative capacity of 35 dwellings.

Development proposals for the Site shall include the following:

- a) Development should be laid out to protect the residential amenity of the existing residential properties to the north-east and designed to take account of the character of the Sandwich Walled Town Conservation Area;
- b) The existing trees on the boundaries of the site should be retained and enhanced to mitigate the impact of development on the landscape and provide opportunities for biodiversity habitat creation and enhancement;
- c) Trees which need to be removed to enable an access to be provided to the site, shall be kept to the minimum needed to provide necessary visibility, and will be required to be replaced on-site;
- d) The layout of the scheme should provide a sufficient buffer between the existing mature trees on the site and residential properties, to ensure appropriate residential amenity for future residents and the protection of existing trees once the site is developed;
- e) A site-specific Flood Risk Assessment must be carried out in accordance with Policy CC5, including a comprehensive investigation into surface water flood risk. This shall also inform the application of the Sequential Approach to the layout of the site by locating the most vulnerable elements in the lowest risk areas;

- f) Primary vehicular, pedestrian and cycle access to the site shall be provided from Sandown Road;
- g) In accordance with Policy SP13 a wintering bird survey must be undertaken in advance of a planning application on the site. If the bird survey identifies that the development will exceed the threshold of significance, mitigation will be required. A suitable scheme of mitigation will need to be submitted with the planning application for the site;
- h) Environment assessment study required to address any potential impact on the Sandwich Bay SPA and Ramsar;
- i) A Heritage Assessment, to include appropriate archaeological investigations must be carried out in accordance with Policy HE1 and Policy HE3, the results of which should inform the layout and design of the development which is necessary to avoid harm to any heritage assets identified through the assessment; and
- j) The occupation of the development should be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider. Development should provide a connection to the sewerage system at the nearest point of adequate capacity.”

6.4.2 To be clear, our client remains wholly supportive of the allocation of the Site for residential development and is committed to delivering the Site early in the Plan period (start on site in 2023). We agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of our client’s Site can be made – and therefore object to the capacity identified.

6.4.3 Accordingly, we say that Land at Archers Low can further assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.

6.4.4 It is submitted that the SAP22 policy wording should be amended to reflect the capability of the Site to accommodate approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.

6.5 Strategic Justification for Development

Spatial Strategy

6.5.1 The proposed Housing Distribution for the district across the Plan period is established within Policy SP3 ‘Housing Growth’ which sets out that the distribution of housing growth in the district is primarily based on the settlement hierarchy and influenced by site availability, environmental constraints and factors of delivery.

6.5.2 Rightly, a key aim of the growth strategy is to focus development in the least sensitive areas of the district in order to conserve and enhance the Dover’s rich natural and historical environment.

6.5.3 A retained theme from the adopted Plan, is that the Council’s settlement strategy continues to focus on the development and regeneration of Dover Town and Whitfield (3381 dwellings). Approximately half of the district’s planned housing is in this location, the majority of which again is to come forward as part of the strategic urban expansion of Whitfield ‘SAP1’ (2200 minimum dwellings).

6.5.4 Development will then be focused in the District Centre of Deal (223 dwellings), and the Rural Service Centres of Sandwich (227 dwellings) and Aylesham (649 dwellings). Following the settlement hierarchy rigidly would distribute housing in the preceding order, however the Plan recognises that housing delivery in Deal and Sandwich continues to be constrained by a number of factors including flood risk, ecological designations, heritage and highways. Further, Deal has experienced generally high levels of windfall development across the previous Plan period and accordingly there is now a dwindling supply of available, suitable sites in both settlements. On account of this context, the Council have sought to direct the majority of the remaining higher order settlement growth (outside of Dover & Whitfield) to Aylesham, through the strategic expansion to the town.

6.5.5 Outside of the four principal district settlements, the Rural Settlement Hierarchy (August 2022) identified that the majority of lower-order settlements in the district emerge as having a low level of facilities within the hierarchy and six settlements having none of the key indicators of sustainable services. Plainly, these settlements offer very limited opportunities for growth and it is evident that the forthcoming Plan will be reliant on the settlements of Dover (including Whitfield), Deal, Sandwich and Aylesham to deliver the housing growth that is required.

6.5.6 We further note the findings of the Strategic Housing Market Assessment (2017) which identified that Sandwich and the north is the most expensive part of district with median property prices for all sizes of homes significant in excess of prices in Deal and Dover town and the south. It is suggested that issues of unaffordability are most likely to effect entry-level properties and result in existing residents being forced to seek more affordable properties elsewhere in Dover district or neighbouring authority areas.

6.5.7 Given this context, it is clear that where available and suitable opportunities for residential development do exist within the district’s higher order settlements, including our client’s Site at Land at Archers Low which can provide a policy compliant level of affordable housing, it is

imperative that the effective use of these sites are appropriately maximised in accordance with draft policy SP3 of the emerging Plan and national policy objectives.

6.5.8 Notwithstanding our client's in principle support of the proposed strategy, we are concerned that highly sustainable, edge-of-settlement sites, particularly in higher tier settlements such as Sandwich have not been fully maximised to reflect their accessible location and capability to accommodate a greater quantum of development. On this basis, we are concerned that the strategic objectives underlying draft policy SP3 'Housing Growth' may not be fully realised, to the detriment of market and affordable housing delivery and the wider policies seeking to conserve and enhance the district's natural and historic environment.

6.5.9 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Sandwich, and this has not been undertaken – for example at Land at Archers Low, where it has previously been demonstrated that the site has sufficient capacity to deliver approximately 5-10 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

Greenfield Development and Consistency with Housing Trajectory

6.5.10 Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs Area of Outstanding Natural Beauty, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, release will be required if the Council is to meet its housing and development commitments moving forward.

6.5.11 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Sandwich, represent the most sustainable and reliable sources of growth for the Plan period, to support the role and timescales of strategic urban extensions and to deliver the significant number of new homes that are required within the forthcoming Plan period.

6.5.12 Moreover, greenfield edge-of-settlement sites are, in our experience, typically most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the district.

6.5.13 The Sustainability Appraisal Scoping Report (2018) sets out that over the course of the adopted Plan period, the key sustainability issues facing Dover District in relation to housing are as follows:

Population growth, household growth and demographic change will place additional demand on key services and facilities such as housing, health, education and social care. The Local Plan offers a new opportunity to manage these pressures, encouraging mixed communities;

There is a need for affordable housing across the District. At present, the mean price of dwellings is higher than the national average. The Local Plan will help to expedite its delivery; and,

There is the need for a mix of housing types that cater for the needs of a range of people, including the growing number of single person and elderly households. Without an up-to date Local Plan, the required housing is less likely to be delivered.

6.5.14 It is evident that the new Dover Local Plan must allocate a mix of reliable sites capable of steadily delivering not only the quantum of housing that is required, but also the associated public infrastructure, affordable housing and a mix of unit types and tenures suitable for a wide range of future occupants.

6.5.15 The Housing Topic Paper (September 2022) provides further context and summarises under Chapter 7 'Historical Housing Delivery' that Dover has historically placed significant reliance on windfall development over the current adopted Plan period, with windfall sites accounting for 44% of all completed dwellings over the preceding 10-year period.

6.5.16 Moreover, it is highlighted that at the beginning of the 10 year period, the majority of new dwellings were being built on brownfield land. However, from the monitoring year 2013-14 onward development on greenfield land began to play a much greater part in the location for new development as show in figure 1 below. This trend of increased housing development on greenfield land is a result of the allocations within the CS and Land Allocation DPD being built out and is associated with an approximate doubling of completions in the district. From 2013-14 onwards the average number of completed dwellings per annum has doubled to that of the early years of the CS, as the strong delivery rates of greenfield sites form the predominant source of housing. This is despite an overall declining trend of brownfield completions towards the latter half of the Plan period. This is generally not an uncommon trend in the majority of local planning authorities areas, where opportunities for available and suitable sites in urban centres dwindle throughout the Plan period.

Figure 1: DDC Brownfield / Greenfield Completions 2010/11 to 2020/21 (source: Housing Topic Paper September 2022)

6.5.17 In light of the above context, it is clear that the adopted Dover Local Plan suffered from an initial under delivery of Plan-led housing growth in which windfall development sources were largely required to take up the slack in the early phases of the Plan period, as major allocated sites failed to deliver at the rates initially expected.

6.5.18 It is equally apparent that initial slow completion rates were quickly addressed once greenfield allocations commenced development, feeding into strong completions in the latter half of the Plan period. In our experience, greenfield sites are typically associated with stronger delivery rates and provide a reliable source of housing growth. The allocation of an appropriate mix of sites and scales is required in order to ensure steady and sustained Plan-led housing delivery across the Plan period and to avoid a reliance on windfall development to address the shortfall.

6.5.19 Consequently, given all of the above, it is imperative that the new Local Plan allocates a sufficient variety and scales of site capable of both ensuring steady and sustained housing completions and capable of making necessary contributions to public infrastructure and services, affordable housing and mix of unit types to address the key issues raised in the Sustainability Appraisal.

6.5.20 In our view, edge-of-settlement greenfield sites such as our client's Site Land at Archers Low represents the most reliable and sustainable source of housing delivery for the Plan period. Such sites are typically less constrained by wider factors and less affected by unforeseen delays such as land contamination. Moreover, greenfield sites typically are more capable of delivering the policy compliant affordable housing, unit mix and developer contributions that are urgently needed and in the case of our client's Site, have already been demonstrated within the present planning application and appeal submission.

6.5.21 It is understood that the Plan is predicated on the delivery of strategic scale development at Whitfield comprising the development of circa 2,200 new homes. Consequently, in order to avoid a repetition of the previous Plan, the Council have sought to ensure that a pool of reliable greenfield allocation, including that of our client's are included within the Plan, capable of delivering the early growth that is required within the housing trajectory prior to the commencement of major allocations later in the Plan period.

6.5.22 We note that within the Housing Trajectory 'Appendix D', the Council have included allocated units from Years 4 onwards, with extant permissions (accounting for 5% non-implementation) demonstrated to be solely capable of delivering the growth required in Years 1-3. Notwithstanding our client's commitment to commencement on site in 2023 and the initial delivery of units at Land at Archers Low in 2024 (subject to successful appeal), we support this pragmatic approach and suggest this represents a sound basis on which to set the district's housing trajectory. We note also the inclusion of an appropriate windfall allowance and the included contingency buffer to further ensure reasonable flexibility in the housing supply.

6.5.23 On account of all of the above, we submit that the allocation of Land at Archers Low forms part of a sound strategy for growth in the district for the forthcoming Plan period. Land at Archers Low is capable of delivery early in the Plan period, representing a reliable source of housing growth in a highly sustainable and accessible location adjacent to the existing settlement boundary of Sandwich, consistent with the Council's preferred settlement strategy. However, we object on the submission that the Site is capable of making a greater contribution to the district's housing need and suggest an amended wording of the policy to allocate the Site for approximately 40-45 dwellings. Nonetheless, the Site is unconstrained and capable of providing a high-quality residential development including a mix of unit types and tenures, a meaningful contribution to the supply of affordable housing and contributions to public services and infrastructure, benefiting both existing residents and future occupiers.

Policy SP4 'Windfall Development'

6.5.24 Separately, we note the provisions of policy SP4 windfall development. Proposals at Land at Archers Low would likely be acceptable in principle under this provision and we support the policy inclusion for appropriate, proportionate windfall development.

6.5.25 Our client is fully committed to the delivery of the Site which is available and suitable for delivery early in the Plan period and is presently pursuing an appeal on the Site for a greater quantum of units than the allocation in the Regulation 19 Plan. There is consequently little to be gained from potentially delaying delivery of the Site by withdrawing the allocation. Notwithstanding the provisions of SP4, it is reiterated that our client fully supports the allocation of the Site under SAP22 for residential development as the most appropriate mechanism for delivery of the Site and the opportunity for genuinely Plan-led development in Sandwich and the provision of associated benefits to public services and infrastructure, contribution to affordable housing supply and the delivering of a mix of house types and tenures.

Infrastructure Delivery

6.5.26 Paragraph 11 of the Framework is clear that all plans should promote a sustainable pattern of development. This includes aligning growth and infrastructure. Paragraph 20 goes on to confirm that strategic policies will be expected to make sufficient provision for associated development infrastructure.

6.5.27 In this regard, draft policies SP11 'Infrastructure and Developer Contributions' and SP12 'Strategic Transport Infrastructure' of the emerging Plan form the key strategic policies for infrastructure delivery. We agree that where development would create a need, or would have an impact, or would exacerbate an existing deficiency in infrastructure provision, appropriate developer contributions may be sought.

6.5.28 It is however emphasised that in all developments, infrastructure requirements must be demonstrated to be necessary through assessment during determination of the application on a case-by-case basis. Where new development is proposed, it does not automatically follow that major infrastructure contributions are always required or contribution to strategic infrastructure proposals are appropriate. For instance, it is our client's view that any infrastructure requirements must be demonstrated through a robust and transparent assessment at application stage, taking into account the submission of detailed supporting evidence, for example following consideration of the Transport Assessment in the case of highway infrastructure contributions.

Alignment with Sustainability Appraisal Findings

6.5.29 As part of the preparation of the Local Plan, the Council has identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA) which provides an assessment of how different options perform in environmental, social and economic terms, to help inform which option should be taken forward and combined with wider evidence documents, have been used to determine the growth and spatial strategy set out in the Plan.

6.5.30 Five potential distributions of growth were identified during preparation of the draft Regulation 18 Local Plan:

- Spatial Option A: Distributing growth to the District's suitable and potentially suitable housing and employment site options (as needed to deliver the scale of growth required).
- Spatial Option B: Distributing growth proportionately amongst the District's existing settlements based on their population.
- Spatial Option C: Distributing growth proportionately amongst the District's existing settlements based on the District's defined settlement hierarchy.
- Spatial Option D: Distributing growth in the same way as the adopted Local Plan, focussing most growth in and around Dover town.
- Spatial Option E: Distributing growth more equally across the District's settlements: Dover, Deal, Sandwich and Aylesham, as well as the rural villages.

6.5.31 The conclusion of the SA was that Spatial Options C (settlement hierarchy) and D (adopted Core Strategy with Dover focus) generally perform the most strongly against the SA objectives, particularly when delivering the baseline growth scenario. However, given the environmental constraints that exist around Deal and Sandwich, very few suitable and potentially suitable sites have been identified in these towns. Given this, the Council's preferred option for the distribution of housing and economic growth comprises a combination of options A (HELAA sites), C (settlement hierarchy) and D (Dover focus). The distribution of housing and economic growth in the District is therefore primarily based on the settlement hierarchy, and influenced by site availability, environmental constraints and factors of delivery.

6.5.32 On account of the above, our client agrees that the proposed growth strategy, and by extension, policy SP3 in principle represents a sound and evidence-led strategy for growth. However, given the clear acknowledgement of the dwindling supply of available sites in the higher order settlements of Deal and Sandwich, which has necessitated a minor deviation from the strongest performing spatial options, we submit that where sites are available and suitable for development in Deal and Sandwich, these must be fully maximised, reflecting their accessible location and their ability to reduce the need to develop into less accessible and more sensitive sites elsewhere in the district to accommodate the growth that is required.

Site Specific Sustainability Appraisal

6.5.33 Land at Archers Low Farm, St George's Road, Sandwich is included under HELAA reference 'SAN23' within the SA Site Assessment (Appendix F). The site performs strongly, with particular positives identified with regards to SA Objectives related to housing, accessibility, the economy, sustainable transport and climate change mitigation, in large parts due to the edge-of-settlement location and proximity of the site to key services in Sandwich.

6.5.34 We note negatives associated with the development of a greenfield site, including loss of agricultural land, however this would be true of the majority of greenfield sites and it is abundantly clear that Dover's housing need cannot be met solely on brownfield sites. We note also minor negatives / uncertain associated with biodiversity, the historic environment and landscape, however it is not clear whether these take into account the high-quality design, biodiversity enhancement and landscape mitigation proposed under the application/appeal. Irrespective, these are not considered to outweigh the clear and tangible sustainability benefits associated with edge-of-settlement development and the site's consistency with the preferred spatial options.

Summary

6.5.35 Taking all of the above into consideration, our client is wholly supportive of the inclusion of land promoted at Archers Low, as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered wholly consistent with the objectives of the Plan

and forms part of a sound evidence-led growth strategy consistent with the recommendations of the Sustainability Appraisal for the district to 2040, subject to the sole objection in relation to capacity.

6.6 Deliverability

6.6.1 Prior to the current appeal proposal, the Site has had no planning history of a residential nature or a history of unimplemented permissions. There are not considered to be any impediments to the Site being allocated for development commencing within the first five years of the Plan period. Combined with an appropriate number and scale of wider allocations in Sandwich and elsewhere across the district, this would ensure steady delivery of housing in Dover district across the majority of the Plan period and support the role and timescales of strategic housing delivery at Whitfield towards the latter half of the Plan period.

6.6.2 Fernham Homes Limited – a local SME with a strong history and track record of delivery, together with an adopted and robust business plan for growth – has control over the site, and are poised to commence work on its residential development very promptly after the receipt of planning permission, potentially (subject to the successful outcome of the current appeal) in 2023. Delivery of housing is expected from 2024.

6.6.3 For the reasons set out in this representation, the Site is considered suitable for the residential development of approximately 40 – 45 dwellings. The Site is adjacent to the urban area of Sandwich, one of the four higher order settlements in the district and the Council's preferred locations for Plan-led growth within the district. Development at Land at Archers Low would form a natural and logical development east of Sandwich with excellent accessibility to day-to-day services and amenities via active travel modes within Sandwich itself and convenient access to public transport infrastructure (including Sandwich train station) for onward travel to key neighbouring settlements including Dover, Ramsgate, Canterbury and Ashford.

6.6.4 Finally, in respect of suitability, there are no physical limitations or problems such as access, infrastructure, flood risk, hazardous risks, pollution or contamination.

6.6.5 On behalf of the landowner, we submit that there are no known financial restrictions that would impact upon the viability of a future housing scheme or that would prohibit development coming forward within the early stages of the Plan period. To the contrary, we consider there to be an opportunity to deliver a high-quality, sustainably located residential development scheme consistent with the Council's proposed growth strategy comprising an appropriate mix of market and affordable housing and capable of contributing to a range of community facilities, public infrastructure and services locally.

6.6.6 Given the advanced nature of the proposals by virtue of the submitted planning application, in terms of specific timescales, should the ongoing appeal be allowed, we understand that Fernham Homes Limited and Walker Residential Limited are capable of commencing work on-site in early 2023, with delivery in 2024 and completion of the Site anticipated in 2025.

6.6.7 The Site is in single ownership and there are no complicated legal agreements or covenants that would prohibit the ability to bring forward the Site early in the Plan period. The Site is therefore considered available and achievable for the purposes of the tests of deliverability.

7 Conclusion

7.1 Summary

7.1.1 This representation has been prepared by DHA Planning on behalf of Fernham Homes Limited and Walker Residential Limited, in response to the Dover District Council Local Plan (Regulation 19) consultation which runs until 9th December 2022.

7.1.2 Our client controls 'Land at Archers Low Farm, Sandown Road, St Georges Road, Sandwich' and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site is allocated for residential development in the Regulation 19 Pre-submission Plan for the provision of 35 dwellings under policy reference 'SAP22'.

7.1.3 Taking all of the above into consideration, we consider that the Site promoted at Land at Archers Low should remain included as a future housing allocation within the Dover District emerging Local Plan. The allocation is considered, in principle, wholly consistent with the objectives of the Plan and forms part of a sound growth strategy for the district to 2040. However, it is imperative that the effective use of these higher-order settlement sites are appropriately maximised in accordance with draft policy SP3 of the emerging Plan, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and object solely on this basis.

7.1.4 Consequently, our clients object to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Sandwich, and this has not been undertaken – for example at Land at Archers Low, where it has previously been demonstrated that the site has sufficient capacity to deliver approximately 5-10 additional units over the draft allocation, that will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

7.1.5 Without prejudice to our client's support in principle of the proposed allocation at Land at Archers Low, we would urge the Council to re-visit the allocation policy text and allow a higher dwelling per hectare guide to ensure the Site is developed to its full potential and the objectives of

	<p>draft policy SP3 are most effectively realised. It is submitted that the SAP22 policy wording should be amended to more accurately reflect the capability of the Site to accommodate approximately 40 – 45 dwellings (broadly in line with the previous site allocation in the Regulation 18 Local Plan), deliverable early in the Plan period.</p> <p>7.1.6 In addition to being a highly sustainable and logical edge-of-settlement allocation, the Site is deliverable in a single land ownership with no viability issues, legal or third-party constraints present. Our client is fully committed to the delivery of Land at Archers Low and there are no impediments to the Site being capable of delivery within the initial 0-5 years of the Plan period.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>For the reasons set out in the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245), the capacity of Land at Archers Low Farm, St Georges Road Sandwich (SAN023) should be increased to 40 - 45 dwellings.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>Please refer to the consultation response submitted on behalf of Fernham Homes Limited and Walker Residential Limited (ref DHA/30245).</p>

It is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound'. These objections are set out in the consultation response submitted on behalf of Persimmon Homes South East (ref DHA/30289)</p> <p>1 Introduction</p> <p>1.1 Context</p> <p>1.1.1 This representation has been prepared by DHA Planning on behalf of Persimmon Homes South East in response to the Dover District Council 'DDC' Local Plan (Regulation 19) consultation which runs until 9th December 2022.</p> <p>1.1.2 We understand that DDC is in the process of preparing a new Local Plan to set out a strategy for development for the period to 2040 and that the Council are presently seeking comments on the pre-submission Plan prior to its submission for examination in early 2023.</p> <p>1.1.3 The new Local Plan will set out the vision, strategic objectives and overarching development strategy for the growth of the District over the period to 2040. It provides the planning policy framework to guide the future development of the area, addressing needs and opportunities for housing, the economy, community facilities and infrastructure, as well as the basis for conserving and enhancing the natural and historic environments, mitigating and adapting to climate change, and achieving well designed places.</p> <p>1.1.4 The new Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. This submission will comment with reference to the above, highlighting where we believe any areas of concern lie or where modifications may be required.</p> <p>1.2 Purpose of this Representation</p> <p>1.2.1 Our client controls 'Land Golf Road, Deal' (hereafter referred to as 'Land at Golf Road' or 'the Site') and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site was submitted as an available, suitable and deliverable location for residential development with capacity for approximately 60 dwellings as part of the new Local Plan preparation, however the Site has not been taken forward within the Regulation 19 Pre- submission Plan.</p> <p>1.2.2 The purpose of this representation is to support DDC's new Local Plan in principle, however our client objects to a component of the Plan, such that the Plan should be considered 'unsound'. It is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound', in which the quantum of Plan-led housing delivery within Deal should be increased to accurately reflect its second tier settlement status. Our client considers that given historic strategic under delivery in the district and wider uncertainties in the planning system, the Council should sensibly demonstrate an oversupply of reliable, deliverable sites early in the Plan period to ensure sufficient flexibility in housing delivery, should extant permissions or larger allocated sites not come forward or deliver as anticipated.</p> <p>1.2.3 To be clear, Persimmon Homes South East support the premise of DDC's growth strategy, which includes further Plan-led development within Deal in line with its higher-order settlement status. However, we are concerned that DDC have planned at a significantly reduced level of growth in Deal, citing a dwindling supply of available land within and around the settlement. Consequently, the Plan fails to appropriately maximise the sustainable credentials of Deal and has resulted in a marginal supply of available, deliverable small and medium sites, insufficient to provide the flexibility in housing delivery that is required in accordance with national planning policy.</p> <p>1.2.4 The Plan is predicated on the delivery of a major urban extension at Whitfield, Dover comprising a new community and a minimum of 2,200 homes within the Plan period. It is anticipated that Whitfield will deliver a significant quantum of new homes primarily towards the latter half of the forthcoming Plan period. Consequently, DDC must demonstrate a sufficient supply of reliable small and medium sizes sites capable of delivery early in the Plan period to ensure consistent housing delivery in accordance with national planning policy and Plan-making guidance.</p>

1.2.5 This representation provides comment on the consistency of our client's proposed allocation site with the proposed strategy, draft policies and sets out our client's position in respect of the 'soundness' of the Plan. To reiterate, whilst our client is supportive of DDC's new Local Plan in principle, Persimmon Homes South East object to a component of the Plan, such that the Plan is considered 'unsound'. Our client is concerned that the growth strategy as drafted fails to fully maximise available sites within the higher order settlement of Deal and by extension, our client objects to the exclusion of Land at Golf Road within the Regulation 19 Local Plan.

1.2.6 Our client is also concerned that given the recent constraints to housing delivery associated with nutrient neutrality in East Kent, the historic under delivery previously experienced at Whitfield and the wider uncertainty within the planning system more generally, the growth strategy as drafted may not include sufficient small and medium sites to demonstrate the necessary flexibility should allocated sites not come forward or deliver as anticipated.

1.2.7 In this regard, our client remains wholly supportive of the premise of further residential development within Deal and agree that it represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole. However, it is submitted that Deal is capable of making a far greater contribution to the delivery of new homes within the forthcoming Plan period than drafted. In line with its higher-order status within the settlement hierarchy and excellent access to day-to-day services and amenities, it is put forward that Deal is wholly capable of delivery significantly greater than the 223 dwellings allocated.

1.2.8 For the reasons set out within this representation, we say that available and suitable sites do exist, including that of our client's Land at Golf Road, Deal capable of delivering logically located, highly sustainable new homes in accessible location early in the Plan period, sufficient to provide greater flexibility and assurance of steady and sustained housing delivery across the Plan period, balance the scale of delivery from strategic urban extensions and further assist in reducing the need to develop into more rural, typically less accessible and more sensitive locations within the district to otherwise deliver the growth that is required.

1.2.9 The inclusion of Golf Road, Deal would provide a medium sized site for the Council that could come forward quickly, complying with the Framework's requirement to provide a mix of sites and include specific sites for years 1-5 of the Plan period. Accordingly, we say that Land at Golf Road, Deal can further assist the Council in meeting the growing need for new homes in the district and is necessary to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full as well as delivering wider public benefits to the local community within Deal.

1.2.10 Based on the current national and local planning context, we consider the Site to be a highly suitable edge-of-settlement location to allocate land for housing to help meet the need for new homes in the district. Its effective use should therefore be appropriately maximised in accordance with national policy objectives.

1.2.11 Further details regarding the Site and commentary on the consistency of the Site with the proposed strategy, draft policies and our client's position in respect of the 'soundness' of the Plan are set out in the following sections of this document.

1.3 About Persimmon Homes

1.3.1 Building over 13,500 beautifully-designed new homes a year in more than 350 prime locations nationwide, Persimmon is proud to be one of the UK's most successful housebuilders, committed to the highest standards of design, construction and service. As a reflection of their commitment to delivering excellence always and delivering great customer care, the Home Builder's Federation (HBF) have awarded Persimmon 5 stars. Persimmon have a track record of delivery, and have been building new homes for over 50 years. Local Authorities up and down the country rely on national-scale housebuilders to deliver significant quantities of new homes each year, to meet the ever growing demand for new housing. Persimmon Homes remains committed to building new houses in the Dover District area and has over the last few years been developing two sites in the district, one in Aylesham which is a joint venture with Barratt Homes and one in Deal.

1.3.2 Persimmon's approach is to work positively and proactively with local planning authorities (LPAs), both during the preparation of local plans and at planning application stage. Persimmon Homes South East are fully committed to engaging with Dover District Council in the preparation of its Local Plan, and firmly subscribe to the national policy approach set out in paragraphs 15 and 16 c) of the NPPF that "the planning system should be genuinely plan-led" and should be shaped by early, proportionate and effective engagement between LPAs and others, including businesses and developers. Accordingly, Persimmon Homes South East would welcome the opportunity to discuss the matters contained in this representation, including the availability, suitability, deliverability and capacity of Land at Golf Road, Deal directly with Dover District Council members and officers, ahead of the submission of the Local Plan for examination.

1.4 Representation Structure

1.4.1 The representation structure is outlined below for ease of reference:

Chapter 2 (Housing Need) - Consideration of market and affordable housing need and assessment of proposed housing allocations and supply sources.

Chapter 3 (Assessment of Suitability) - Re-introduces our client's Site and provides a summary of planning constraints and opportunities, including the quantum of development that could be accommodated, why the Site is suitable for development and why the principle of the draft allocation for residential development is both justified and consistent with the Council's strategy for growth in the district. It also sets out why we consider there is scope for a higher number of dwellings at the site. This consideration amounts to an objection to one element of the strategy – namely that those sites around the most sustainable settlements should be maximised.

Chapter 4 (Conclusion) - Summarises the key points raised throughout the representation and re-affirms our client's support for the Site's allocation and proposed strategy ahead of the submission of the Plan for examination.

2 Housing Need

2.1 Context

2.1.1 Paragraph 11 of the NPPF is explicit in its requirement for strategic policy-making authorities to promote a sustainable pattern of development that seeks to meet the need in full.

2.1.2 Paragraph 20 of the Framework is equally clear that strategic policies should set out an overall strategy for the pattern, scale and design quality of places. Policies should make sufficient provision for the development that is required as well as associated infrastructure, community facilities and should set out a strategy for the conservation and enhancement of the natural, built and historic environment.

2.1.3 Given this national planning context, the emerging Local Plan should provide a comprehensive and cohesive approach to future development in Dover district, capable of making sufficient provision for the identified needs, whilst balancing the conservation and enhancement of the natural, built and historic environment.

2.1.4 National guidance states that strategic policy-making authorities will need to calculate their local housing need figure at the start of the plan-making process. This number should be kept under review and revised where appropriate.

2.1.5 In calculating the local housing need, paragraph 61 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance - unless exceptional circumstances justify an alternative approach.

2.1.6 Paragraph 68 is clear in its requirement that strategic policy-making authorities should have a clear understanding of the land available in their area and should ensure that planning policies identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability. Planning policies should identify a supply of:

- a) specific, deliverable sites for years one to five of the plan period
- b) specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15 of the plan.

2.1.7 In this vein, paragraph 69 of the Framework goes on to stress that small and medium sized sites (such as that of our client's land at Golf Road) can make an important contribution to meeting the housing requirement of an area, and are often built-out relatively quickly.

2.1.8 Further, in addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.

2.2 DDC's Housing Need

2.2.1 The Standard Method for assessing housing need, issued alongside the Ministerial Statement on 16 December 2020, sets an indicative housing need figure for Dover

District of 596 dwellings per annum. However, the affordability ratio which factors into the local housing need assessment is updated annually. For Dover District the latest housing need calculation is 611 dwellings per annum (dpa), equating to a total minimum housing need of 10,998 dwellings for the Plan period to 2040. We understand that the Regulation 19 Local Plan seeks to meet this need in full and in addition to the minimum figures, DDC have a set a contingency buffer of 926 dwellings for the Plan period, equating to 8.4% of the total Plan period figure.

2.2.2 For context, the current adopted CS requirement is 700 dwellings per annum. This followed the adoption of a high-growth strategy in 2010 of 14,000 homes to 2026 based around the recommendations of the Dover Regeneration Strategy and above the minimum 10,100 requirement across the same period, as set out in the emerging (at the time) Regional Spatial Strategy.

2.2.3 For the avoidance of doubt, accounting for the Committed Supply Total of 5,282 dwellings, the new Local Plan will be required to allocate sufficient land to accommodate a minimum of 6,642 new homes over the remaining plan period to 2040. It is understood that this will be derived from the following sources:

- Whitfield Urban Expansion Allocation: 2,200 dwellings
- Local Plan Allocations (excluding Whitfield): 3,392 dwellings

- Windfall Allowance (70 a year from year 4): 1,050 dwellings

2.2.4 On this basis, it is evident that a substantial quantum of Plan-led housing delivery will be required in order to meet the new Local Plan's housing target. Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs AONB, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, meeting Dover's housing needs inevitably will require the release of significant greenfield land.

2.2.5 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan period, consistent with the overarching strategic objectives of draft policy SP3 within the emerging Plan.

2.2.6 Such sites are best placed to deliver the significant number of new homes that are required and are most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the District as well as further balancing the role of strategic- scale development at Whitfield within the emerging Plan's proposed growth pattern in the event that Whitfield or indeed any of the major allocations upon which DDC seek to rely to not come forward or do not deliver as anticipated.

2.2.7 On this basis, we set out below why our client's site Land at Golf Road, Deal is suitable to be included within the submission Dover Local Plan and is necessary for inclusion in order for DDC to demonstrate sufficient supply and flexibility within the early phase of the housing trajectory as required by national planning policy, such that the Plan may be considered 'sound'.

3 Site Specific Assessment

3.1 Overview

3.1.1 The previous chapters of this representation outline our client's position relating to the soundness of the Plan in which our client is confirmed to be supportive in principle of the Local Plan as a strategy for the growth of the district to 2040, however our client objects to a component of the Plan, such that the Plan should be considered 'unsound'. It is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound', in which the quantum of Plan-led housing delivery within Deal should be increased to accurately reflect its second tier settlement status.

3.1.2 Paragraph 4.146 of the Local Plan states that the urban area of Deal encompasses the built-up areas of the parishes of Walmer and Sholden. Deal is identified in the Settlement Hierarchy and Confines Topic Paper (2022) as a 'District Centre', where there is a secondary focus for development.

3.1.3 It is clear that Deal must continue to form a principal location for focusing sustainable housing delivery in Dover district and will assist in ensuring an appropriate balance of sites are identified, capable of supporting the strategic role of Whitfield within the forthcoming Plan Period and minimising the need for housing growth in typically less accessible and more sensitive rural settlement with limited development capacity.

3.1.4 As introduced in the preceding sections, our client controls 'Land Golf Road, Deal' and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site was submitted for residential development with capacity for approximately 60 units as part of the new Local Plan preparation, however the Site has not been taken forward within the Regulation 19 Pre-submission Plan.

3.1.5 Land at Golf Road represents an excellent opportunity for the delivery of approximately 60 high-quality new homes in a logical, highly accessible location in north Deal with capability to deliver a policy compliant quantum of much- needed affordable housing, a mix of house types, sizes and tenures and ability to make a significant contribution to wider public infrastructure through developer contributions. The land itself is of no particular ecological value and is in private ownership, offering limited public benefit. The Site is capable of delivering strong biodiversity net gain, attractive internal and boundary landscaping, open space, play facilities and a development pattern which facilitates pedestrian permeability and encourages active travel in north Deal.

3.1.6 Given the dwindling supply of available sites within the District and the growing housing need, it is imperative that the sustainable credentials of these higher- order settlement sites are appropriately maximised to deliver the housing that is required in accordance with the underlying objectives of draft policy SP3, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and our client objects solely on the basis that the growth strategy component of the Plan as drafted is 'unsound'.

3.1.7 Consequently, our clients object to policy SP3 as drafted. On the basis that there is a clear need to maximise the delivery of housing sites within Deal, our clients consider the Plan 'unsound'. Our site, Land at Golf Road, Deal, has been excluded from the Plan primarily on flood risk grounds, without further consideration or detailed evidence; without acknowledging the presence of high-quality 1 in 200 year flood defences and without any regard to the prevalence of recent residential developments permitted nearby (having passed the Sequential and Exception test with Environment Agency support on flood risk). Additionally, we submit that the Site is capable of providing a residential development which would be safe for its lifetime, owing to the high-quality flood defences and on site mitigation measures.

3.1.8 The consequent omission of potentially circa 60 units, in our view fails to make effective use of Dover's second tier settlement and will otherwise require further new homes to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

3.1.9 Without prejudice to our client's support to the premise of the growth strategy, which primarily directs growth at higher order settlements, we would urge the Council to re-visit its growth strategy and proposed allocations to allow a greater quantum of development within Deal, by including suitable sites such as Land at Golf Road to fully reflect its excellent sustainability credentials and provide a pragmatic oversupply of reliable, deliverable small and medium sites capable of delivery early in the Plan period.

3.1.10 We submit that Deal is wholly capable of delivering significantly greater than the 223 dwellings allocated. We say that available and suitable sites do exist, including that of our client's Land at Golf Road, Deal which is being promoted by a national housebuilder fully committed to the Site and with an excellent track record of delivery.

3.1.11 It is put forward that Deal is capable of delivering further logically located, highly sustainable new homes in accessible locations early in the Plan period. An additional supply would; provide greater assurance of steady and sustained housing delivery across the Plan period, balance the scale of delivery from strategic urban extensions and, further assist in reducing the need to develop into more rural, less accessible and sensitive locations within the district to otherwise deliver the growth that is required.

3.1.12 We agree that Deal represents a logical and sustainable location to direct the growth required within the district and consider that the land promoted at Golf Road, Deal should be included as a future housing allocation within the Dover District emerging Local Plan. The Site is considered to be wholly consistent with the objectives of the Plan and would form part of a sound growth strategy for the district to 2040 whilst delivering policy compliant affordable homes, a mix of house types and tenures and wider ecological, landscape and public benefits.

3.1.13 Our client is firmly of the view that the allocation of additional housing sites is necessary to ensure that balanced growth strategy put forward within the Pre- submission Dover District Local Plan is 'sound', comprising an appropriate balance of small, medium and strategic-scale sites deliverable across the Plan period. The allocation of well-located, reliable, greenfield sites such as our client's at Land at Golf Road is necessary for DDC to meet the growing housing need. The Site is being promoted by Persimmon, a firmly committed national housebuilder with an excellent track record for delivery, and the inclusion of the Site would ensure that DDC can have confidence in consistently meeting its market and affordable housing targets in full throughout the life of the new Dover District Plan in the event that identified sources of housing do not come forward or fail to deliver as anticipated.

3.2 Site and Surroundings

3.2.1 The Site is situated to the west of Golf Road, north of West Lea and west of the Fairway on the north-western edge of Deal.

Figure 3.1: Approximate Site Location (courtesy of Google Earth)

3.2.2 The Site comprises an undeveloped regular parcel of land in agricultural use totalling approximately 1.9 hectares. The site is bound by residential development on three sides which detached the site from the wider open countryside to the west. The Site is consequently characterised by its edge-of-settlement location with typical suburban residential development the predominant development pattern in the area.

3.2.3 In terms of overarching planning constraints, the site is not subject to any overarching landscape or ecological designations and is not itself subject to any heritage constraints. The site is located within defended Flood Zone 3, albeit this covers the majority of this part of north Deal which is subject to coastal flood defences.

3.2.4 In terms of accessibility, the Site enjoys excellent access to a number of day-to-day facilities and services which are within a reasonable walk distance, including primary and secondary schools, local shops, healthcare, employment, and public transport links within Deal and Walmer including Deal mainline station and frequent buses along Dover Road between Dover, Deal, Sandwich and Canterbury.

Consideration of Flood Risk

3.2.5 The site is located entirely within Flood Zone 3a as defined by the Environment Agency Flood Risk mapping.

3.2.6 Owing to its strategic nature, Deal is subject to significant coastal defences. These defences provide protection from coastal erosion as much as they do flooding, and are actively maintained, as part of a 'hold the line' policy in this Shoreline Management Plan area (SMP).

3.2.7 As part of the Deal Coastal Flood Defence Scheme (completed in 2013), a recurved concrete sea wall was constructed from Sandown Castle to Deal Castle. Beach nourishment provides an additional level of protection to this frontage.

3.2.8 The NPPF requires the actual risk of flooding to a development to be appraised. The actual risk considers the likelihood of flooding under extreme conditions (e.g. the design flood event), whilst considering the influence of any defence infrastructure, or drainage systems, which may provide a level of protection to the site. Given the presence of high-quality defences at Deal, it is evident that the actual risk of flooding under the design event is reduced, leaving only the residual risk, which falls outside of the scope of the NPPF and relates to extreme circumstances in the event the defences, or drainage system were to fail (i.e. due to a breach or a blockage), or if an event greater than the design flood event was to occur and overtop the defences.

3.2.9 The Strategic Flood Risk Assessment (2019) prepared by Herringtons Consulting is included within the DDC Local Plan Evidence Base and has identified that the coastal towns of Deal and Dover are protected from sea flooding under an extreme storm event with a 1 in 200 year return period (0.5% AEP) and the construction of the defence infrastructure has significantly reduced the actual risk of flooding at these coastal locations. The risk of coastal flooding to these two towns is therefore limited to a residual risk event only, which would require a catastrophic failure of the new defence infrastructure (e.g. a failure in the seawall).

3.2.10 On account of the above, we do not consider it appropriate for the Plan-led growth of north Deal to be automatically excluded on account of flood risk. DDC acknowledge that following high-levels of windfall development within the previous (adopted) Plan period, there are limited available and suitable sites for development within Deal and consequently have sought to reduce the level of Plan-led growth within the forthcoming Plan period, with a greater reliance on strategic development at Whitfield and alternative third tier settlements in response. Our client's disagree with this approach and object to the proposed growth strategy as an unsound basis on which to reliably deliver the growth that is required in the district.

3.2.11 Our client's site, Land at Golf Road, Deal is evidence that suitable small and medium sites are available in Deal and are being promoted for delivery early in the Plan period. It is accepted that sites such as that of our client's will be subject to Flood Risk Assessment and be required to pass both the Sequential and Exception tests.

3.2.12 Taking each test in turn, the Sequential Test is a risk-based test which aims to steer development to areas at the lowest risk of flooding. DDC already acknowledge that there is a dwindling supply of available sites in Deal. Moreover, we emphasise that two small sites within Deal have been allocated for residential development under policy SAP16 'Deal Small Housing Sites' (Ethelbert Road Garages (5 units) and 104 Northwall Road, Deal (8 units). Both sites as shown in figure 3.2 below are in close proximity to our client's site. Both sites are in Flood Zone 3a and protected by the Deal coastal defences. Land at 104 Northwall Road is plainly highly comparable to our client's site and there appears no sound justification for the exclusion of Land at Golf Road on this basis. For the purposes of the Sequential Test, the allocation of sites within Flood Zone 3a is clear acknowledgment that sequentially preferable sites do not exist in Deal and some development within the defended flood zone is required in order to deliver the growth that is required.

Figure 3.2: Extract of Reg 19 Policies Map showing our client's site (red line) and proposed residential allocations (green shading). Flood Zone 3 shown in blue.

3.2.13 In addition to the Sequential Test, the Exception Test must also be passed which requires proposals to demonstrate

- a) the development would provide wider sustainability benefits to the community that outweigh the flood risk; and
- b) the development will be safe for its lifetime taking account of the vulnerability of its users, without increasing flood risk elsewhere, and, where possible, will reduce flood risk overall.

3.2.14 In this regard, the provision of the housing that is required, in addition to wider biodiversity, accessibility, open space and public infrastructure benefits is considered sufficient to outweigh the flood risk. With respect to (b), exact details would be provided as part of a detailed planning application, however in combination with the existing flood defences, it is anticipated that any future development could be subject to land raising and all living and sleeping accommodation is proposed above the ground floor level, above the predicted design flood level. Further early flood warning systems, evacuation plans and a raised area of safe refuge could be included to ensure the development would be safe for its lifetime.

3.2.15 Further to the above, we note the following planning applications for residential development have also been permitted recently in north Deal, within Flood Zone

3a and without Environment Agency objection having passed both the Sequential and Exception tests without issue. Examples of granted planning applications within Flood Zone 3a include:

- 21/01233 – 17 Godwyn Road, Deal (1no. dwelling)
- 20/00341 – 269 Sandown Road, Deal (1no. dwelling)
- 20/00787 – Land adjacent 56 Golf Road, Deal (1no. dwelling)
- 19/00425 – Land rear of 92 & 94 Northwall Road, Deal (1no. dwelling)
- 15/00176 – Site at 90 Golf Road, Deal (2no. dwellings)
- 14/01211 – Land off Ark Lane, Deal (14no. dwellings)
- 14/00852 - 22 Harold Road, Deal (1no. dwelling)
- 13/00522 – Bede and Dunstan Houses, College Road, Deal (16no. dwellings)

3.3 Development Capacity

3.3.1 At this early stage, significant design work has not yet progressed. However, for the purposes of this representation, Land at Golf Road, Deal is submitted with capacity for approximately 60 residential dwellings (subject to detailed design and flood risk assessment) deliverable early in the Plan period.

3.3.2 The scale and nature of the Site is considered highly conducive to the delivery of a high-quality, landscape-led scheme capable of making a significant contribution to the delivery of market and affordable housing in a logically contained location that would assimilate with the existing pattern of development.

3.3.3 Land at Golf Road represents an excellent opportunity for the delivery of approximately 60 high-quality new homes in a logical, highly accessible location in north Deal with capability to deliver a policy compliant quantum of much-needed affordable housing, a mix of house types, sizes and tenures and ability to make significant developer contributions to support existing and future public infrastructure.

3.3.4 The land itself is of no particular ecological value and is in private ownership, offering limited public benefit. To the contrary, the Site is capable of delivering strong biodiversity net gain, attractive internal and boundary landscaping, opening up public access to open space, play facilities and a development pattern that facilitates pedestrian permeability and encourages active travel in north Deal.

3.3.5 Detailed proposals have not yet been advanced, however it is anticipated that any future development of the site will be of an appropriate density, reflecting the local character of development and responding to local needs for housing. Any future development will be sensitively designed to respect the existing character and materiality of the area, the topography of the site and to allow a positive transition to the rural landscape and respond to its coastal location.

3.3.6 It is acknowledged that the site is located within Flood Zone 3a, however this is true of the majority of north Deal which is nonetheless protected by coastal flood defences. Subject to detailed flood risk assessment and site layout design, for the reasons set out above, flood risk is not considered to represent an absolute constraint preventing the future development of the site.

3.3.7 Exact flood risk design details would be provided as part of a detailed planning application, however in combination with the existing flood defences, it is anticipated that any future development could be subject to land level raising and all living and sleeping accommodation is proposed above the ground floor level, above the predicted design flood level. Further early flood warning systems, evacuation plans and a raised area of safe refuge could be included to ensure the development would be safe for its lifetime.

3.3.8 Particular care will also be taken with regard to opportunities for biodiversity habitat creation and enhancement, publicly accessible open space and high-quality play space to serve the local community.

3.3.9 In terms of access, opportunities for safe, direct and convenient primary vehicular, pedestrian and cycle access are achievable onto the adopted highway. The Site will be capable of facilitating a permeable pattern of development in northwest Deal, providing convenient access for future and existing residents to a range of day-to-day facilities including grocery stores, medical facilities and Deal train station.

3.3.10 To be clear, our client agrees that Deal represents a logical and sustainable location to direct growth consistent with the growth strategy of the Plan as a whole, however we submit that more effective use of available land within Deal can be made – and therefore object to policy SP3 'housing growth strategy' and the exclusion of Land at Golf Road on this basis.

3.3.11 Accordingly, we say that Land at Golf Road is not subject to any absolute development constraints and can further assist the Council in meeting the growing need for new homes in the district and help to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full.

3.4 Strategic Justification for Development

Spatial Strategy

3.4.1 The proposed Housing Distribution for the district across the Plan period is established within Policy SP3 'Housing Growth' which sets out that the distribution of housing growth in the district is primarily based on the settlement hierarchy and influenced by site availability, environmental constraints and factors of delivery.

3.4.2 Rightly, a key aim of the growth strategy is to focus development in the least sensitive areas of the district in order to conserve and enhance the Dover's rich natural and historical environment.

3.4.3 A retained theme from the adopted Plan, is that DDC's settlement strategy continues to focus on the development and regeneration of Dover Town and Whitfield (3381 dwellings). Approximately half of the district's planned housing is in this location, the majority of which again is to come forward as part of the strategic urban expansion of Whitfield 'SAP1' (2200 minimum dwellings).

3.4.4 Development will then be focused in the District Centre of Deal (223 dwellings), and the Rural Service Centres of Sandwich (227 dwellings) and Aylesham (649 dwellings). Following the settlement hierarchy rigidly would distribute housing in the preceding order, however the Plan

recognises that housing delivery in Deal and Sandwich continues to be constrained by a number of factors including flood risk, ecological designations, heritage and highways. Further, Deal has experienced generally high levels of windfall development across the previous Plan period and accordingly there is now a dwindling supply of available, suitable sites in both settlements. On account of this context, DDC have sought to direct the majority of the remaining higher order settlement growth (outside of Dover & Whitfield) to Aylesham, through the strategic expansion to the town.

3.4.5 Outside of the four principal district settlements, the Rural Settlement Hierarchy (August 2022) identified that the majority of lower-order settlements in the district emerge as having a low level of facilities within the hierarchy and six settlements having none of the key indicators of sustainable services. Plainly, these settlements offer very limited opportunities for growth and it is evident that the forthcoming Plan will be reliant on the settlements of Dover (including Whitfield), Deal, Sandwich and Aylesham to deliver the housing growth that is required.

3.4.6 Given this context, it is clear that where available and suitable opportunities for residential development do exist within the district's higher order settlements, such as our client's site Land at Golf Road, which can provide a policy compliant level of affordable housing, it is imperative that the effective use of these sites are secured and appropriately maximised consistent with draft policy SP3 of the emerging Plan and national policy objectives.

3.4.7 Notwithstanding our client's in support of the premise of the proposed strategy, we are concerned that highly sustainable, edge-of-settlement sites, particularly in higher tier settlements such as Deal have been omitted to reflect their accessible location and capability to accommodate a significant quantum of high-quality development. On this basis, our client is concerned that the strategic objectives underlying draft policy SP3 'Housing Growth' may not be fully realised, to the detriment of market and affordable housing delivery and the wider policies seeking to conserve and enhance the district's natural and historic environment.

3.4.8 Consequently, our client objects to policy SP3 which is considered 'unsound' as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites around Deal, and this has not been undertaken – for example at Land at Golf Road, where the Site has the site has been omitted despite clear justification for the suitability of development in Flood Zone 3a and indeed site allocations being included for residential development in the immediate vicinity. The Site has sufficient capacity to deliver approximately 60 additional units over the draft allocations for Deal, which will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

Greenfield Development and Consistency with Housing Trajectory

3.4.9 Due to the nature and dwindling supply of available urban land in Dover town and the remaining higher order settlements of Deal and Sandwich, the restrictive effect of the coast, the Kent Downs Area of Outstanding Natural Beauty, environmental constraints and the limited capacity of the district's remaining mid- and lower order settlements to accommodate significant levels of growth, release will be required if DDC is to meet its housing and development commitments moving forward.

3.4.10 In our view, sustainable and accessible sites logically located adjacent to existing urban areas, including Deal, represent the most sustainable and reliable sources of growth for the Plan period, to support the role and timescales of strategic urban extensions and to deliver the significant number of new homes that are required within the forthcoming Plan period.

3.4.11 In terms of housing delivery within Deal, just 223 new dwellings are proposed to be delivered, the fourth most number of dwellings despite Deal's secondary status within the settlement hierarchy. We understand this reflects the previously high levels of growth seen within the previous (adopted) Plan period and the reduced supply of sites now available in the town. However, our client's site is testament to the continuing availability of sites and in our view, delivery within the previous Plan period does not preclude further development within the following Plan period, particularly where a settlement has proven to provide a reliable and sustainable source of much-needed new housing in a highly accessible location.

3.4.12 Moreover, greenfield edge-of-settlement sites are, in our experience, typically most capable of making meaningful contributions to the associated public infrastructure, affordable housing and mix of new homes that is urgently needed in the district.

3.4.13 The Sustainability Appraisal Scoping Report (2018) sets out that over the course of the adopted Plan period, the key sustainability issues facing Dover District in relation to housing are as follows:

Population growth, household growth and demographic change will place additional demand on key services and facilities such as housing, health, education and social care. The Local Plan offers a new opportunity to manage these pressures, encouraging mixed communities;

There is a need for affordable housing across the District. At present, the mean price of dwellings is higher than the national average. The Local Plan will help to expedite its delivery; and,

There is the need for a mix of housing types that cater for the needs of a range of people, including the growing number of single person and elderly households. Without an up-to date Local Plan, the required housing is less likely to be delivered.

3.4.14 It is evident that the new Dover Local Plan must allocate a mix of reliable sites capable of steadily delivering not only the quantum of housing that is required, but also the associated public infrastructure, affordable housing and a mix of unit types and tenures suitable for a wide range of future occupants.

3.4.15 The Housing Topic Paper (September 2022) provides further context and summarises under Chapter 7 'Historical Housing Delivery' that Dover has historically placed significant reliance on windfall development over the current adopted Plan period, with windfall sites accounting for 44% of all completed dwellings over the preceding 10-year period.

3.4.16 Moreover, it is highlighted that at the beginning of the 10 year period, the majority of new dwellings were being built on brownfield land. However, from the monitoring year 2013-14 onward development on greenfield land began to play a much greater part in the location for new development as show in figure 1 below. This trend of increased housing development on greenfield land is a result of the allocations within the CS and Land Allocation DPD being built out and is associated with an approximate doubling of completions in the district. From 2013-14 onwards the average number of completed dwellings per annum has doubled to that of the early years of the CS, as the strong delivery rates of greenfield sites form the predominant source of housing. This is despite an overall declining trend of brownfield completions towards the latter half of the Plan period. This is generally not an uncommon trend in the majority of local planning authority areas, where opportunities for available and suitable sites in urban centres dwindle throughout the Plan period.

Figure 1: DDC Brownfield / Greenfield Completions 2010/11 to 2020/21 (source: Housing Topic Paper September 2022)

3.4.17 In light of the above context, it is clear that the adopted Dover Local Plan suffered from an initial under delivery of Plan-led housing growth in which windfall development sources were largely required to take up the slack in the early phases of the Plan period, as major allocated sites failed to deliver at the rates initially expected.

3.4.18 It is equally apparent that initial slow completion rates were quickly addressed once greenfield allocations commenced development, feeding into strong completions in the latter half of the Plan period. In our experience, greenfield sites are typically associated with stronger delivery rates and provide a reliable source of housing growth. The allocation of an appropriate mix of sites and scales is required in order to ensure steady and sustained Plan-led housing delivery across the Plan period and to avoid a reliance on windfall development to address the shortfall.

3.4.19 Consequently, given all of the above, it is imperative that the new Local Plan allocates a sufficient variety and scales of site capable of both ensuring steady and sustained housing completions and capable of making necessary contributions to public infrastructure and services, affordable housing and mix of unit types to address the key issues raised in the Sustainability Appraisal.

3.4.20 In our view, edge-of-settlement greenfield sites such as our client's Site, Land at Golf Road, represents one of the most reliable and sustainable source of housing delivery for the Plan period. Such sites are typically less constrained by wider factors and less affected by unforeseen delays such as land contamination. Moreover, greenfield sites typically are more capable of delivering the policy compliant affordable housing, unit mix and developer contributions that are urgently needed.

3.4.21 It is understood that the Plan is predicated on the delivery of strategic scale development at Whitfield comprising the development of circa 2,200 new homes. Consequently, in order to avoid a repetition of the previous Plan, the Council have sought to ensure that a pool of reliable greenfield allocation, including sites not dissimilar to that of our client are included within the Plan, capable of delivering the early growth that is required within the housing trajectory prior to the commencement of major allocations later in the Plan period.

3.4.22 We note that within the Housing Trajectory 'Appendix D', the Council have included allocated units from Years 4 onwards, with extant permissions (accounting for 5% non-implementation) demonstrated to be solely capable of delivering the growth required in Years 1-3. Notwithstanding our client's commitment to the Site, we support this pragmatic approach and suggest this represents a sound basis on which to set the district's housing trajectory. We note also the inclusion of an appropriate windfall allowance and the included contingency buffer to further ensure reasonably flexibility in the housing supply.

3.4.23 On account of all of the above, we submit that Land at Golf Road, Deal is required as a minor modification to form part of a sound strategy for growth in the district for the forthcoming Plan period. Land at Golf Road is capable of delivery early in the Plan period, representing a reliable source of housing growth in a highly sustainable and accessible location adjacent to the existing settlement boundary of Deal, consistent with the Council's preferred settlement strategy.

3.4.24 Our client objects to the omission of the Site and objects to policy SP3 as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites within Deal, and this has not been undertaken – for example at Land at Golf Road, Deal.

3.4.25 Without prejudice to our client's support in for the premise of the proposed growth strategy which primarily directs growth at higher order settlements, we would urge the Council to re-visit its growth strategy and proposed allocations through a minor modification to allow a greater quantum of development within Deal to fully reflect its excellent sustainability credentials.

Policy SP4 'Windfall Development'

3.4.26 Separately, we note the provisions of policy SP4 windfall development. Proposals at Land at Golf Road would likely be acceptable in principle under this provision and we support the policy inclusion for appropriate, proportionate windfall development.

3.4.27 Our client is fully committed to the delivery of the Site which is available and suitable for delivery early in the Plan period. Notwithstanding the provisions of SP4, it is reiterated that our client fully supports the promotion of the Site for allocation as the most appropriate mechanism for delivery of the Site. The inclusion of Land at Golf Road would provide the opportunity for genuinely Plan-led development in Deal and the provision of associated benefits to public services and infrastructure, contribution to affordable housing supply and the delivering of a mix of house types and tenures.

Alignment with Sustainability Appraisal Findings

3.4.28 As part of the preparation of the Local Plan, the Council has identified and appraised a range of growth and spatial options through the Sustainability Appraisal (SA) which provides an assessment of how different options perform in environmental, social and economic terms, to help inform which option should be taken forward and combined with wider evidence documents, have been used to determine the growth and spatial strategy set out in the Plan.

3.4.29 Five potential distributions of growth were identified during preparation of the draft Regulation 18 Local Plan:

- Spatial Option A: Distributing growth to the District's suitable and potentially suitable housing and employment site options (as needed to deliver the scale of growth required).
- Spatial Option B: Distributing growth proportionately amongst the District's existing settlements based on their population.
- Spatial Option C: Distributing growth proportionately amongst the District's existing settlements based on the District's defined settlement hierarchy.
- Spatial Option D: Distributing growth in the same way as the adopted Local Plan, focussing most growth in and around Dover town.
- Spatial Option E: Distributing growth more equally across the District's settlements: Dover, Deal, Sandwich and Aylesham, as well as the rural villages.

3.4.30 The conclusion of the SA was that Spatial Options C (settlement hierarchy) and D (adopted Core Strategy with Dover focus) generally perform the most strongly against the SA objectives, particularly when delivering the baseline growth scenario. However, given the environmental constraints that exist around Deal and Sandwich, very few suitable and potentially suitable sites have been identified in these towns. Given this, the Council's preferred option for the distribution of housing and economic growth comprises a combination of options A (HELAA sites), C (settlement hierarchy) and D (Dover focus). The distribution of housing and economic growth in the District is therefore primarily based on the settlement hierarchy, and influenced by site availability, environmental constraints and factors of delivery.

3.4.31 On account of the above, our client agrees that the proposed growth strategy, and by extension, policy SP3 in principle represents a sound and evidence-led strategy for growth. However, given the clear acknowledgement of the dwindling supply of available sites in the higher order settlements of Deal and Sandwich, which has necessitated a minor deviation from the strongest performing spatial options, we submit that where sites are available and suitable for development in Deal and Sandwich, these must be fully maximised, reflecting their accessible location and their ability to reduce the need to develop into less accessible and more sensitive sites elsewhere in the district to accommodate the growth that is required.

3.5 Site Specific Justification for Allocation

3.5.1 Land at Golf Road is considered highly conducive to the delivery of a high-quality, landscape-led scheme capable of making a significant contribution to the delivery of market and affordable housing in a logically contained location that would assimilate with existing patterns of development and is demonstrated to be acceptable in terms of flood risk.

3.5.2 Land at Golf Road represents an excellent opportunity for the delivery of approximately 60 high-quality new homes in a logical, highly accessible location in north Deal with capability to deliver a policy compliant quantum of much-needed affordable housing, a mix of house types, sizes and tenures and ability to make significant developer contributions to support existing and future public infrastructure.

3.5.3 The land itself is of no particular ecological value and is in private ownership, offering limited public benefit. To the contrary, the Site is capable of delivering strong biodiversity net gain, attractive internal and boundary landscaping, opening up public access to open space, play facilities and a development pattern that facilitates pedestrian permeability and encourages active travel in north Deal.

3.5.4 In terms of flood risk, it is apparent that no sequentially preferable sites are available and the allocation of sites in this location is justified. We note that two other sites in north Deal have been allocated under policy SAP16 'Deal Small Housing Sites'. However, neither of these sites meet the threshold of 'major development' and are highly unlikely to deliver affordable housing or meaningful developer contributions and are not of a scale conducive to delivering a genuine mix of house types, tenures and sizes. Moreover, neither site is anticipated to deliver any further public benefit beyond housing, with no capacity for open space, play space and limited scope of significant biodiversity or landscape enhancement. To the contrary, our client's site is capable of delivering significant benefits in all of the above areas and can assist in achieving the government's objectives of creating mixed and balanced communities as set out within the Framework and is the only site capable of delivering direct benefits to existing and future residents of north Deal.

Site Specific Sustainability Appraisal

3.5.5 Land at Golf Road, Deal was removed from consideration following the 2022 HELAA assessment (ref: DEA004) which defined the site 'unsuitable' primarily due to flood risk. The Site consequently was not considered against the SA objectives, however for the purposes of this representation, we consider the Site in the context of the SA objectives below.

3.5.6 We consider that the Site would generally perform strongly, with particular positives associated with SA Objectives related to housing, accessibility, the economy, sustainable transport and climate change mitigation, in large parts due to the edge-of-settlement location and proximity of the site to key services in Deal.

3.5.7 We accept likely disbenefits associated with the development of a greenfield site, including loss of agricultural land, however this would be true of the majority of greenfield sites and it is abundantly clear that Dover's housing need cannot be met solely on brownfield sites. We suggest that potential minor negatives / uncertainty associated with biodiversity and landscape, however these could be overcome via high-quality design, biodiversity enhancement and landscape mitigation proposed under a future planning application. Irrespective, these would not be considered to outweigh the clear and tangible sustainability benefits associated with edge-of-settlement development and the site's consistency with the preferred spatial options.

Summary

3.5.8 Taking all of the above into consideration, our client is supportive of the premise of the growth strategy, however objects to the quantum of allocations within Deal, which in our view fails to fully maximise the sustainability credentials of the settlement and the capacity for growth, such that the Plan is unsound as drafted and requires minor modification to the growth strategy component. Land at Golf Road is considered wholly consistent with the objectives of the Plan and would form part of a sound evidence-led growth strategy consistent with the recommendations of the Sustainability Appraisal for the district to 2040, sufficient to ensure the Plan is found sound.

3.6 Deliverability

3.6.1 There are not considered to be any impediments to the Site being allocated for development commencing within the first five years of the Plan period. Combined with an appropriate number and scale of wider allocations in Deal and elsewhere across the district, this would ensure steady delivery of housing in Dover district across the majority of the Plan period and support the role and timescales of strategic housing delivery at Whitfield towards the latter half of the Plan period.

3.6.2 Persimmon Homes South East – a national housebuilder with a strong history and track record of delivery, together with an adopted and robust business plan for growth – has control over the site, and are committed to delivery of the site for residential development early in the Plan period.

3.6.3 For the reasons set out in this representation, the Site is considered suitable for the residential development of approximately 60 dwellings. The Site is adjacent and well contained by the urban area of Deal, one of the four higher order settlements in the district and the Council's preferred locations for Plan-led growth within the district. Development at Land at Golf Road would form a natural and logical development in Deal with excellent accessibility to day-to-day services and amenities via active travel modes within Deal itself and convenient access to public transport infrastructure (including Deal train station) for onward travel to key neighbouring settlements including Dover, Ramsgate, Canterbury and Ashford.

3.6.4 Finally, in respect of suitability, there are no physical limitations or problems such as access, infrastructure, hazardous risks, pollution, flood risk or contamination that would prevent development coming forward. It is acknowledged that the site is located within Flood Zone 3a, however this is true of the majority of north Deal which is protected by coastal flood defences. For the reasons set out within this representation, flood risk is not considered to represent an absolute constraint preventing the future development of the site, subject to detailed flood risk assessment and site layout design.

3.6.5 On behalf of our client, we submit that there are no known financial restrictions that would impact upon the viability of a future housing scheme or that would prohibit development coming forward within the early stages of the Plan period. To the contrary, we consider there to be an opportunity to deliver a high-quality, sustainably located residential development scheme consistent with the Council's proposed growth strategy comprising an appropriate mix of market and affordable housing and capable of contributing to a range of community facilities, public infrastructure and services locally.

3.6.6 At the time of writing, proposals at Land at Golf Road, Deal remain at an early stage, however our clients are firmly committed to progressing work on a future planning application in the short term and have a strong record of steady and sustained housing delivery once permission is secured.

3.6.7 The Site is in single ownership and there are no complicated legal agreements or covenants that would prohibit the ability to bring forward the Site early in the Plan period. The Site is therefore considered available and achievable for the purposes of the tests of deliverability.

4 Conclusion

4.1 Summary

4.1.1 This representation has been prepared by DHA Planning on behalf of Persimmon Homes South East in response to the Dover District Council Local Plan (Regulation 19) consultation which runs until 9th December 2022.

4.1.2 Our client controls 'Land Golf Road, Deal' and is promoting the residential allocation of the Site as part of the new Dover District Local Plan preparation process. The Site was submitted for residential development with capacity for approximately 60 units as part of the new Local Plan preparation, however the Site has not been taken forward within the Regulation 19 Pre-submission Plan.

4.1.3 Taking all of the above into consideration, we consider that the Site promoted at Land at Golf Road should have been included as a future housing allocation within the Dover District emerging Local Plan. The Site is considered, in principle, wholly consistent with the objectives of the Plan and would form part of a sound growth strategy for the district to 2040.

4.1.4 Our client is supportive of DDC's new Local Plan in principle, however our client objects to a component of the Plan, such that the Plan should be considered 'unsound'. It is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound', in which the quantum of Plan-led housing delivery within Deal should be increased to accurately reflect its second tier settlement status. Our client considers that given historic strategic under delivery in the district and wider uncertainties in the planning system, the Council should sensibly demonstrate an oversupply of reliable, deliverable sites early in the Plan period to ensure sufficient flexibility in housing delivery, should extant permissions or larger allocated sites not come forward or deliver as anticipated.

4.1.5 To be clear, Persimmon Homes South East support the premise of DDC's growth strategy, which includes further Plan-led development within Deal in line with its higher-order settlement status. However, we are concerned that DDC have planned at a significantly reduced level of growth in Deal, citing a dwindling supply of available land within and around the settlement. Consequently, the Plan fails to appropriately maximise the sustainable credentials of Deal and has resulted in a marginal supply of available, deliverable small and medium sites, insufficient to provide the flexibility in housing delivery that is required in accordance with national planning policy.

4.1.6 Given the dwindling supply of available sites within the District and the growing housing need, it is imperative that the sustainable credentials of these higher-order settlement sites are appropriately maximised to deliver the housing that is required in accordance with draft policy SP3 of the emerging Plan, and wider policies seeking to otherwise conserve and enhance the district's natural and historic environment and national planning policy objectives. We are concerned that this has not been fully undertaken and object solely on this basis.

4.1.7 Consequently, our clients object to the growth strategy component as drafted, on the basis that there is a clear need to maximise the delivery of housing at sites within Deal, and this has not been undertaken – for example at Land at Golf Road, Deal, where it the Site has been excluded primarily on flood risk ground without further consideration of detailed evidence or the capability of suitable mitigation to be put in place. The consequent omission of potentially circa 60 units, will otherwise be required to be delivered elsewhere in the district, in potentially less accessible and more sensitive locations.

4.1.8 Without prejudice to our client's support in principle of the proposed growth strategy which primarily directs growth at higher order settlements, we would urge the Council to re-visit its growth strategy and proposed allocations to allow a greater quantum of development within Deal to fully reflect its excellent sustainability credentials.

4.1.9 We submit that Deal is wholly capable of delivery significantly greater than the 223 dwellings allocated. We say that available and suitable sites exist, including that of our client's at Land at Golf Road, Deal capable of delivering logically located, highly sustainable new homes in accessible location early in the Plan period, sufficient to provide greater assurance of steady and sustained housing delivery across the Plan period, balance the scale of delivery from strategic urban extensions and further assist in reducing the need to develop into more rural, typically less accessible and more sensitive locations within the district to otherwise deliver the growth that is required.

	<p>4.1.10 Accordingly, we submit that the inclusion of Golf Road, Deal would provide a medium sized site for the Council that could come forward quickly, complying with the Framework's requirement to provide a mix of sites and include specific sites for years 1-5 of the Plan period. Accordingly, we say that Land at Golf Road, Deal can further assist the Council in meeting the growing need for new homes in the district and is necessary to ensure the Council can have greater confidence in meeting its market and affordable housing targets in full as well as delivering wider public benefits to the local community within Deal.</p> <p>4.1.11 In addition to being a highly sustainable and logical edge-of-settlement allocation, the Site is deliverable in a single land ownership with no viability issues, legal or third-party constraints present. Our client is fully committed to the delivery of Land at Golf Road and there are no impediments to the Site being capable of delivery within the initial 0-5 years of the Plan period.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>For the reasons set out in the consultation response submitted on behalf of Persimmon Homes South East, it is put forward that a minor modification to the growth strategy is required in order for the Plan to be found 'sound'. These suggest modifications are set out in the consultation response submitted on behalf of Persimmon Homes South East (ref DHA/30289).</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>Yes</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>	<p>Please refer to the consultation response submitted on behalf of Persimmon Homes South East (ref DHA/30289).</p>

<p>1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.</p>	<p>SP4</p>
<p>2 - Do you consider this part of the Plan sound?</p>	<p>No</p>
<p>3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)</p>	<p>Positively prepared Justified</p>

	Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Full Representation attached to SDLP1860. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1860.)</p> <p>Quinn Estates supports Policy SP4 and the principle of commensurate scale development within or adjoining settlement boundaries at larger settlements. In this regard, it is evident from the table below that the development needs of Deal and strong sustainability benefits of locating development at the settlement have not been reflected in the identified commitments in the Plan:</p> <p>(DDC Note - See table 1 in attachment)</p> <p>Quinn Estates would also question the approach to minor residential development at smaller specified settlements. In this regard, the approach is not considered to be justified or effective, as there will still be local housing need at these settlements, and the settlement boundaries do not necessarily create any opportunities for windfall development within the settlement boundaries at these settlements. Accordingly, to make the policy sound, it is suggested that the policy be amended to allow for exceptional cases where local housing need cannot be delivered within settlement boundaries, through the insertion of the following text into Policy SP4 2:</p> <p>“Minor residential development or infilling of a scale that is commensurate with that of the existing settlement will usually only be permitted within the settlement boundaries, or exceptionally on land adjoining settlement boundaries, as shown on the Policies Map, of the following settlements:”</p> <p>With respect to those settlements in the District that are not specifically listed in Policy SP4, Quinn Estates raises concern that these settlements having the same categorisation as open countryside. Some of these settlements will have local housing need and the policy should only be considered sound if it enables this need to be met at or around these settlements.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	Quinn Estates is a developer with significant land interests in the District, who has an important role in delivering the Plan strategy

This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1460.)</p> <p>Whilst we welcome DDC's commitment to meeting its housing need, with Strategic Policy SP3 seeking to provide at least 10,998 net additional homes over the Plan period, it is considered smaller size additional sites, if suitable and available, should be additionally included within the Plan (especially where high scoring in the HELAA such as this site).</p> <p>This is because a large proportion of the plan's growth is again being directed towards Dover, with further units at Whitfield (over 2,000 dwellings), and also Aylesham. With large strategic sites delivery rates can easily slow down during the plan period and under-deliver. This has been evidenced by the track record of slow delivery rates at earlier phases of planned development at Whitfield upon which previous approved development plans were very heavily reliant; a factor that explains the very high contribution of windfall opportunities to housing land supply over the last 15 years. Whilst it is acknowledged that there is a planned buffer within the emerging Local Plan, it is considered appropriate not to use this as a limit, and allocate other suitable sites in sustainable locations such as Preston where available.</p> <p>Whilst it is acknowledged that emerging SP4 'Residential Windfall Development' allows for residential development or infilling of a scale that is commensurate with that of the existing settlement will be permitted within or immediately adjoining the settlement boundaries of Preston, subject to all of the listed criteria being met, it is considered preferable, in order to allow more certainty for small housebuilders (for the site-specific reasons outlined below and the positive HEELA scoring compared with other land opportunities), that the site is individually allocated. We believe will provide more certainty and accelerate housing delivery.</p>

4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Representation submitted by Lee Evans On behalf of Mr and Mrs Tobin. Full Representation attached to SDLP1411. This document has been split across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1411.) POLICY SP4 – Residential Windfall Development 3.20 This policy sets out a series of criteria under which windfall development (i.e. non-allocated

development) may come forward. In respect of development in the Smaller Villages such as Woodnesborough it is noted that “minor residential development or infilling of a scale that is commensurate with that of the existing settlement will be permitted within the settlement boundaries, as shown on the Policies Map”.

3.21 It is understood that SP4 retains the overall focus for residential development at settlements atop the settlement hierarchy, and this is again supported in principle. However, it must also be recognised that the settlement boundaries have been tightly drawn per the policies map. Taking the example of Woodnesborough, the boundary as proposed is elongated in a ribbon manner and in parts- is separated into clusters. It excludes all land between component parts of the village in its current configuration (Figure 2).

3.22 As drafted, the Plan would preclude most development supporting housing delivery of any note at Woodnesborough. The case is made at Section 4 of this response that the evidence base underpinning the Plan is flawed in its omission of Land off The Street, Woodnesborough given its sustainability credentials including its central location within the village. It is therefore considered that the tight boundary drawn is also flawed in its limitation of sustainable development opportunities over the plan period up to 2040.

Smaller settlements may present opportunities for short-term delivery in a manner which otherwise meets the above criteria, albeit just adjacent to settlement boundaries. This is true of Land off The Street, Woodnesborough.

3.24 It is suggested that either the settlement boundary is amended to provide sufficient opportunity for sustainable development (as windfall or additional allocations) to come forward; or that an amendment to SP4 be made to capture further delivery opportunities.

3.25 Amendment to ensure that development at commensurate scales adjacent to or close to the settlement boundaries can come forward over the plan period would assist in the delivery of its overall Vision and Objectives. It is emphasised that the Ashford Borough Local Plan 2030 (adopted in 2019) benefits from similar provisions, with its own Policy HOU5 – ‘Residential Windfall Development in the Countryside’ noting that: “Proposals for residential development adjoining or close to the existing built up confines of the following settlements will be acceptable...”, followed by similar detailed criteria. There is thus precedent for a similar approach here, that has been accepted as a sound basis for plan-making in recent years elsewhere in Kent.

3.26 Amendment may simply refer to [amendments to Regulation 19 policy wording in bold text]:

2. Minor residential development or infilling of a scale that is commensurate with that of the existing settlement will be permitted within and adjoining or close to the settlement boundaries, as shown on the Policies Map, of the following settlements: Ashley, Barnsole, Betteshanger, Chillenden, Coldred, Denton, East Studdal, Finglesham, Great Mongeham, Martin, Martin Mill, Nonington, Ringwould, Staple, East Stourmouth, Sutton, Tilmanstone, West Hougham, Wingham Green, Woodnesborough and Wootton.

3.27 SP4 otherwise contains detailed criteria-based policies which all windfall development must meet – it is considered that these criteria would sufficiently protect against inappropriate development in its own right.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Unless existing settlement boundaries are respected, there is suburban ribbon development creep from field to field to field. To render the plan sound it should contain a statement 'Previously existing settlement boundaries will be respected, until such time as town and parish councils may have agreed changes with Dover District Council, in accordance with the principles of Localism Act 2011.' In Nov 2022, it seems very naïve to hope that 'new housing in villages can help them retain existing services such as public transport, retail (many pubs are going under because lack of staff and sky high energy bills) and schools (again oversubscribed local schools fear they will go bankruptcy with sky-high energy bills).</p> <p>SP4 Residential Windfall Development</p> <p>As stated below on SP5, the policy of Dover Urban Area nil provision of affordable housing is both unsound and non-legally compliant. Moreover, the reality is that during the life of the last Local Plan, Deal experienced 30% more housing development than was planned. So this policy would only be sound if it were amended as follows: 'In the case of planning applications on developments of over 8 dwellings on windfall development</p>

	<i>sites, within 3 miles of the outer boundaries of Deal / Walmer, permission will only be given if the developer applicant has previously undertaken a development of a similar scale within Dover Urban area which provides a minimum of 30% affordable housing'. (See our comments on DM - H1 below. (Comments on SP9 refer.)</i>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Tilmanstone Village is not mentioned by name anywhere in the documents probably because there are no identified sites within the village confines. The part of our Parish that adjoins Whitfield is still in the plan but as part of the Whitfield expansion. Tilmanstone Village is included ,but not by name, when 'other' settlements are referred to especially when it comes to the drainage element of the infrastructure document and it is a stated aim that settlements dependent on cesspool drainage should be especially considered for improvement. Small, infill development within the confines of 'other' settlements will still be considered under the current NPPF. <i>(DDC note - this is an extract from full representation SDLP1639)</i>

3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The Local Plan in respect to the Policies Map, where it considers the village of Preston, is not sound as it is not based on sound evidence. The following comments are made in relation to the land to the rear of Meadow Cottage, The Street, Preston, which was incorrectly assessed within the HELAA Housing Site Assessment. The HELAA Housing Site Assessment that has informed the local plan has failed to draw upon the extensive evidence that was gathered in support for an approved planning application for 5 no. dwellings on that land at Meadow Cottage. The conclusions drawn in the HELAA Housing Site Assessment are not made objectively and run contrary to conclusions from the detailed technical assessments that supported the planning application. Consequently, the settlement boundary for Preston has not accurately been drawn and needs to be reconsidered. The planning application mentioned above [LPA Ref: 20/00544] sought the demolition of Meadow Cottage and the erection of 5 no. detached dwellings, new a vehicle access, associated car parking and landscaping on land to the rear of this existing property. Planning permission was granted on 27th September 2022. The decision notice, proposed layout and site location plan are appended to this representation. The HELAA Housing Site Assessment inaccurately concluded that this site should not be allocated for development or included in the settlement boundary due to: landscape impact; the need to demolish Meadow Cottage to gain access; tree coverage; and impact on the conservation area. Each of these issues were considered by the Council in detail during planning application ref: 20/00544. In approving this application, the Council [see delegated report, which is appended to this representation] concluded that:</p> <ul style="list-style-type: none"> • The demolition of the existing dwelling and arrangement of 5 no dwellings in a courtyard form would be an acceptable development that reflects the building arrangements prevalent in rural areas. • The proposed landscaped landscape strategy for the site allowed for the development to create a rural transition between the village and surrounding countryside. • The Landscape Visual Impact Assessment found that the proposed mitigation strategy would ensure that the landscape impact would be low to neutral. • The proposed design, form and appearance would be would not cause harm to the character and appearance of the street scene, the Conservation Area or the setting of listed buildings in the vicinity of the site. • The tree survey found that a number of trees on site were with Category C or U trees and should be removed irrespective of the development. <p>These planning application conclusions confirm that the HELAA Housing Site Assessment supporting the local plan is not a robust evidence document and does not include an appropriately and objective assessment of the sites.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>To make the Dover Local Plan sound, it is necessary for the defined settlement boundary for Preston to be enlarged to include the approved boundary under planning application 20/00544. The wider site actually extends beyond the approved planning application boundary and the conclusions drawn during the planning application could equally be applied to a development across the wider site, that is, development could be acceptable if:</p> <ul style="list-style-type: none"> • The development takes on a rural form and pattern of development; and • An appropriate landscaping strategy is applied that allows the site to transition from village to countryside. <p>It is therefore also requested that the village boundary be extended to include the land marked in blue on the approved site location plan, but in any event, as a minimum, the land marked in red on the same plan.</p> <p>It is also requested that the HELAA Housing Site Assessment evidence base documented to confirm that the development of land to the rear of Meadow Cottage, The Street, Preston be updated to confirm that it is a suitable site for residential development.</p>

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP4
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>(DDC Note - Full Representation attached to SDLP1883. This document has been split / duplicated across the relevant locations within the Plan. This representation may include maps and images which have not been copied across and can be seen in the attachment on SDLP1883.)</p> <p>Draft Strategic Policy 4: Residential Windfall Development - COMMENT Given the poor delivery at major allocations over the adopted Plan period, DDC has recognised at paragraph 6.8 that there have been higher levels of windfall development in the district. Further to this, paragraph 6.84 notes that windfall allowance accounted for 45% of housing delivery across the district in the adopted Plan period. From year 4, the Housing Trajectory makes allowance for 70 windfall sites a year.</p> <p>As there is currently no evidence for the delivery of larger strategic allocations, it is likely that this windfall allowance will be larger and account for a large percentage of housing delivery in the District. It is likely that windfall development will come forward in the early stages of the Plan</p>

	<p>period resulting in housing growth that is not genuinely plan-led in accordance with NPPF paragraph 15. DDC should allocate further sites that are deliverable within the first five years of the Plan period to ensure that the number of windfall sites does not conflict with the objectives of the Local Plan. By allocating further deliverable sites in the early stages of the Plan period, the over-reliance of delivery at large strategic sites is less. This will alleviate the risk of windfall development leading development in the area and risking the delivery of the overarching objectives. BDW consider that the Land North of Sandwich Road can deliver a high quality housing development efficiently within the early stages of the Plan period. Further consideration for sites such as the Land North of Sandwich Road should be given to ensure a plan-led approach is delivered. Recommendation: DDC consider the housing delivery within the early years of the Plan period and seek to allocate quickly deliverable sites to ensure a plan-led approach is adopted.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	Yes
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	3.80, 3.82, 3.85, SP5.2
2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	N/A
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	<p>In relation to policy 3.80 the evidence to discount Dover Centre from any and all obligations to provide affordable housing seems weak. The area is a large one, and developments can be assessed individually for viability and the timespan of this local plan means that developments to have no contribution to affordable housing is both unjustified. This policy will only create an imbalance of house pricing in the area, one deeper than if the 30% was beholden too. Shared ownership and Intermediate Rent are other forms of affordable housing that would not impact viability. By not providing affordable housing there is an inherent discrimination between who is able to live in Dover Centre. Those not able to live in the centre how had previously done so will be pushed away from their jobs, childrens schools etc. There is also a shorter term consideration - the impact of the cost of living crisis which will likely push more towards needing affordable housing. If there is no provision for affordable housing in the centre the issues I raised above about being forced out will affect these people.</p> <p>In regards to policy 3.82 the need for affordable housing continues to grow and therefore the possibility of all-affordable housing schemes become more and more important. With the grant funding that can be tapped into with all-affordable developments they can be both financially viable for the developer and provide the type of social development that only all-affordable schemes can.</p> <p>Policy 3.85 - Stress if the local connection/key worker/income cap requirements will or will not be implemented rather than it being discussed as possibility. A feature like that needs to be concrete. It also needs to be drafted without affecting mortgageability of intermediate (SO or rent) for Registered providers and prospective purchasers.</p> <p>Policy SP5.2 - Stress the necessity of social rented housing over affordable rented, SR can gain higher grant funding and therefore can be both competitive to the developer and more affordable to those moving into the units.</p>

	<p>To summarise:</p> <ul style="list-style-type: none"> • S106 levels to be maintained at policy (national policy) levels. • Tenure split should again follow. • Affordable Home Ownership Shared Ownership to have option to convert to Intermediate Rent to Homebuy • SP5 to stipulate Social rent not Affordable Rent • First Homes should not be introduced at the expense of rented housing. • First Homes technically are not as affordable as SO in our opinion. • Management/Estate charges should be apportioned on a floor area and not on a unit basis. • 100% affordable projects should be prioritised and supported through the local plan. • Large sites should be broken into smaller parcels to allow SME's and RP's to develop – thereby allowing a competitive position against housebuilders and to increase the rate of construction.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	N/A

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>3.79 Provision of affordable housing. It is both unsound and not legally compliant to assess Dover urban area as not viable to require affordable housing including the minimum requirement in the NPPF 2021 for 10% affordable homeownership. until after the Thanet Local Plan adopted 2020 includes a requirement for 30% affordable housing / homeownership throughout the district, with no urban exclusions, in accordance with the previous version of NPPF. (Cross reference DM policy H1 / SP 9). We note that https://www.labcwarranty.co.uk/media/2694/land-development-report.pdf shows that return on investment for developers in Kent in 2021 was running at 29.34% . The vast majority of the public in Dover district (whether they are among the 35% of the electorate who are engaged enough in local elections to vote, or not), are keen for Dover urban area to get the warm, healthy, affordable homes that it is crying out for.</p> <p>3.81 Pleased to see 30% requirement affordable for the rest of the district referred to here, but it will not become sound or effective unless it becomes a real requirement and not just 'a starting point'.</p> <p>3.83 and 3.84 should be strengthened to become sound.</p> <p>Alas 3.86, about helping people move out of the private rented sector seems unsound and wildly over optimistic in the current climate. And it is the transformation of council housing into zero carbon homes, and an increase in social rented, zero carbon homes at scale, homes that will be publicly owned in perpetuity and cannot be lost to private landlords through right to buy, that will address Dover's most urgent needs.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Developers to provide at least 30% affordable housing needed in Dover Town, this is where it is most needed.</p>

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Support the requirement for affordable housing on schemes of 6 units or more within Designated Rural Areas (which includes AONBs), which is in compliance with the NPPF paragraph 64. The provision of well designed, sustainable and affordable housing, particularly for workers employed in the land-based economy is an identified aim of the AONB Management Plan and its provision is supported in Principle VC3 which seeks the provision of suitably located affordable housing that is of a high-quality design and of an appropriate scale.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	No
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>3.79 Provision of affordable housing. We believe it is both unsound and not legally compliant for DDC dept of Planning to say 'for Dover urban area it is not viable to require affordable housing including the minimum requirement in the NPPF 2021 for 10% affordable homeownership. (See our recommendation on SP4 above on how to incentivise developers to provide affordable housing needed in Dover Town). We note some mitigation in 3.91 since the Reg 18 consultation, but it is still completely unsound. We very much regret that DDC Local Plan was delayed until after the NPPF was changed in this respect in 2021. We note that the Thanet Local Plan adopted 2020 included a requirement for 30% affordable housing / homeownership throughout the district, with no urban exclusions, in accordance with the previous version of NPPF. (Cross reference DM policy H1 / SP 9). We note that https://www.labcwarranty.co.uk/media/2694/land-development-report.pdf shows that return on investment for developers in Kent in 2021 was running at 29.34% . The vast majority of the public in Dover district (whether they are among the 35% of the electorate who are engaged enough in local elections to vote, or not), are keen for Dover urban area to get the warm, healthy, affordable homes that it is crying out for.</p> <p>3.81 We are relieved to see 30% requirement affordable for the rest of the district referred to here, but it will not become sound or effective unless it becomes a real requirement and not just 'a starting point'.</p> <p>3.83 and 3.84 should be strengthened to become sound.</p> <p>Alas 3.86, about helping people move out of the private rented sector seems unsound and wildly over optimistic in Nov 2022. And it is the transformation of council housing into zero carbon homes, and an increase in social rented, zero carbon homes at scale, homes that will be publicly owned in perpetuity and cannot be lost to private landlords through right to buy, that will address Dover's most urgent needs.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	As stated below on SP5, the policy of Dover Urban Area nil provision of affordable housing is both unsound and non-legally compliant. Moreover the reality is that during the life of the last Local Plan, Deal experienced 30% more housing development than was planned. So this policy would only be sound if it were amended as follows <i>In the case of planning applications on developments of over 8 dwellings on windfall development sites, within 3 miles of the outer boundaries of Deal / Walmer, permission will only be given if the developer applicant has previously undertaken a development of a similar scale within Dover Urban area which provides a minimum of 30% affordable housing.</i> (See our comments on DM - H1 below. (Comments on SP9 refer.)

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	CPRE welcomes 30% requirement for affordable housing and recognises that such a requirement for affordable homes within the Dover Urban Area, in terms of plan making, would render such developments unviable and therefore housing schemes in this area undeliverable. CPRE would encourage the Council to work in partnership with Homes England to progress the delivery of affordable homes where they are most needed; and to ensure that any forthcoming commuted affordable housing payments be directed towards Dover, ahead of Deal and Sandwich.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). 2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	No
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>The plan is unsound as it does not comply with the legally binding commitment made by DDC when they declared a climate emergency in 2020 and prepared their climate change strategy. The plan will not do enough to meet the target of the district being net zero by 2050. DDC should be much more ambitious about the green credentials of new housing. If new homes generated their own power, were insulated to the highest standards, and collected rain water, it would greatly help stretched local services and go a long way towards making the housing stock fit for the coming decades.</p> <p>The regulation 19 stage of the consultation is not fit for purpose as it is overly complicated and very difficult to use. The process has left many members of the public including me and my wife feeling overwhelmed and confused as to how to make a representation. For those who are working full time this has been a task for which they do not have enough time. As a result those who may have wanted to make a submission have not been able to. The format of the submission form is also difficult to navigate. Without prior experience of planning law it is difficult to say whether a part of the plan is legal or not. As to the duty to cooperate it is impossible to know. The unsound plan needs updating after the government announcement on 5/12/22 that mandatory housing targets are not to be imposed. The figure of nearly 11,000 is unsustainable and should now be reviewed, particularly with respect to allocated land around Station Rd Walmer and proposed developments around villages.</p>

	<p>The character and landscape value of the district is being rapidly eroded under the current plan and this must not continue as it is contrary to NPPF 21. It is not sustainable to build on agricultural land which is in short supply as we are only 50% self sufficient in producing food in the UK. The CPRE has found that almost 14,500 hectares of farmland has been permanently lost to development since 2010. The contribution from the districts agricultural land is of vital importance. Much of the agricultural land is also vital for flood protection, and field margins are important for wildlife and biodiversity, forming corridors between habitats for vertebrates and nesting and roosting sites for birds. Dover District also has a wealth of character landscapes, AONB, heritage coast, nature reserves, internationally rare chalk grassland and rewilded areas such as Betteshanger Park. Overdevelopment under the last weak plan has meant that these areas are under pressure and being denuded as their boundaries are eroded and wildlife corridors between sites are cut off. The new plan does not do enough to protect these areas, wildlife and biodiversity. Developments should not be allowed to remove ancient woodlands and trees and biodiverse rich habitats even if it is argued that this is for the greater good. This is not sustainable as all nature is interconnected and if it fails then we all fail. The UK is one of the worst countries in the world for biodiversity loss, we have lost half of our biodiversity since the 1970's.</p> <p>Development has been at such a pace that infrastructure cannot keep up. Buses have been cut recently, cycle and pedestrian routes have not been upgraded sufficiently to connect some developments to main bus and train routes without car dependence. Aylesham has not had a secondary school which would mean children could walk to school. Many rural communities are entirely car dependent due to lack of buses and the roads not being safe to use their bikes. Not enough emphasis is put on renovating existing housing stock to provide greener, insulated, fuel efficient homes. Each new build generates around 56 tonnes of embedded carbon. The NPPF states that we should prioritise brownfield sites over greenfield but although there are many opportunities to develop brownfield sites in Dover, this has not been prioritised. Many developments have been for larger houses in villages and there is not enough provision for affordable housing.</p> <p>The wording of the local plan is not definitive, it leaves too many loop holes and vague preferences which enable large developers to argue and get what they want, to maximise profits, not what the people of the Dover area need.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Better mapping and understanding of the Dover District, taking into account internationally rare areas of chalk grassland, woodland and trees wherever they occur.</p> <p>Large buffers around the AONB to protect its character from the built environment. Stronger protection for the AONB and the Ripple LCA F3.</p> <p>Tighter protections on our remaining biodiversity.</p> <p>Tighter definitions in the local plan so that developers have no room to argue what has been specified in the local plan.</p> <p>Hire several biodiversity officers to monitor closely and prevent loss of ancient woodland, chalk grassland, veteran trees, protected wildlife and rich habitats and to actively go out into the community, looking for ways to improve biodiversity by such things as accessing grants for hedge planting and the creation of ponds where ever possible in our district.</p> <p>Employ experts to liaise with farmers in our area to encourage the most environmentally friendly farming and land management practices which will encourage maximum biodiversity in the countryside and maximum sequestration of carbon in soils and biomass.</p> <p>Stop the use of agricultural land for development.</p> <p>Renovate and insulate rather than build new houses, brownfield not greenfield.</p> <p>Turn attention away from destroying village communities with unsustainable housing estates outside their village boundaries.</p> <p>Do not give developers the get out clause of financial mitigation for destruction of wildlife and habitat. No development should further deplete our critically low levels of biodiversity.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>
<p>9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.</p>

1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP5
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Justified Effective Consistent with National Policy Positively prepared
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Policy SP5 Affordable Housing</p> <p>Policy SP5 was previously policy DM 12 in the regulation 18 consultation. We responded to the previous consultation recommending amendments to the policy but this appears to have been disregarded and therefore it is still felt that this policy is not justified, effective or consistent with national policy and therefore unsound.</p> <p>The Local Plan Whole Viability Study which must underpin the proposed affordable housing states at paragraph 10.83 to 10.85</p> <p><i>'In the case of Sheltered housing, the appraisals produce a residual value that is over the BLV at 30% Affordable Housing on greenfield sites, but only 5% on brownfield sites.</i></p> <p><i>In the case of Extracare housing, the Residual Value does not exceed the BLV, even without Affordable Housing</i></p> <p><i>Care should be taken when considering additional policy requirements in this sector'</i></p> <p>Whilst we would take issue with some of the viability inputs (and respectfully reserves the rights to do so if the Policy is not amended as per recommendation), it is noteworthy that the preferred location for older persons housing is in proximity to established local facilities and services – ie brownfield locations, and the Study determines that schemes will only be viable with a 5% affordable housing provision.</p> <p>The study then goes on to somewhat casually dismiss this finding with its reference at 10.86:</p> <p><i>When considering the above, it is important to note that paragraph 10-007-20180724 of the updated PPG specifically anticipates that the viability of specialist older people's housing will be considered at the development management stage. It is therefore not necessary to develop a specific Affordable Housing policy for Sheltered and Extracare Housing'.</i></p> <p>The approach is a complete misinterpretation of the PPG on viability, which also states at Paragraph: 002 Reference ID: 10-002-20190509 that <i>'The role for viability assessment is primarily at the plan making stage. Viability assessment should not compromise sustainable development but should be used to ensure that policies are realistic, and that the total cumulative cost of all relevant policies will not undermine deliverability of the plan'</i> and that <i>'Policy requirements, particularly for affordable housing, should be set at a level that takes account of affordable housing</i></p>

and infrastructure needs and allows for the planned types of sites and development to be deliverable, without the need for further viability assessment at the decision making stage'.

Para 10.86 and 12.90 of the viability study in effect provides the consultant, who undertook the viability study's, interpretation of paragraph 10-007-20180724 of PPG. It should also be noted that the paragraph referenced has been superseded and this is now Paragraph: 007 Reference ID: 10-007-20190509. This now states 'It is up to the applicant to demonstrate whether particular circumstances justify the need for a viability assessment at the application stage' and 'Such circumstances could include, for example where development is proposed on unallocated sites of a wholly different type to those used in viability assessment that informed the plan; where further information on infrastructure or site costs is required; where particular types of development are proposed which may significantly vary from standard models of development for sale (for example build to rent or housing for older people); or where a recession or similar significant economic changes have occurred since the plan was brought into force'.

Therefore, as the affordable housing requirement for older people's housing has been tested through the viability study supporting the submission Local Plan and the typology found to be largely unviable, requiring such sites to deliver affordable housing or requiring a viability study through the application stage is contrary to PPG. Any affordable housing requirement creates an unrealistic over aspirational policy requirement that will undermine deliverability of a form of development with a clear need.

The council has not translated the evidence from the Viability Study through to policy SP5 and therefore the policy is not justified, effective or consistent with national policy. The policy as written, will not deliver sites for older peoples housing in line with need without further viability assessment and is therefore not justified or effective. As older people's housing has been included within the viability assessment to inform the Local Plan and been found to not be viable the affordable housing requirement should be removed from older person's housing to ensure the Local Plan is in accordance with national policy. In addition, if any affordable housing requirement was required of older persons housing schemes this would no doubt result in protracted discussion at the decision making stage which would be contrary to the PPG and hinder the delivery of the Local Plan objectives. The policy and supporting paragraphs should therefore be amended to make it clear that older person's housing is exempt from all types of affordable housing in line with the viability study to ensure the plan is sound, deliverable, justified and consistent with national policy.

For these reasons, Policy SP5 is considered to be **unsound**.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

That Policy SP5 be amended to make clear that it does not apply to older persons housing developments, possibly by use of the following reference:

"Development proposals for older persons housing or other specialist housing are exempt from delivering affordable housing".

This would make the plan justified, effective and in line with national policy.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Text relating to Strategic Policy Extracted from SDLP1294. For Full representation including attachments please see original representation.) Affordable Housing Dover District has an increasingly growing population and changing demographic, making it a key priority of the Government to deliver more homes, including more affordable homes. To enforce this policy SP5 (affordable housing) of the draft Local Plan explains that for this site, at least 30% of the housing provided should be affordable housing. A scheme that optimises the capacity of the site will also optimise the number of affordable homes that can be delivered at this site, helping to ensure that sufficient affordable housing is delivered at Preston. Raising the development capacity of the site to at least 75 home will increase the affordable housing delivery to a minimum of 23 affordable homes.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note	

the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	The aspiration for delivery of 30% affordable housing outside the Dover Urban Area is noted, however, it is essential that the viability of individual sites identified as being liable for significant highway infrastructure provision is clarified to sufficient detail to manage stakeholder expectations at the earliest possible juncture, which will potentially speed up future development planning decisions. Such an approach will also assist KCC in making informed infrastructure planning/funding decisions at the earliest possible juncture.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	(DDC Note - Text Extracted from Document sent from Savills on Behalf of the Church Commissioners. Representation has been split across relevant areas of the Local Plan. Full attachment and introduction to Policy comments can be found under reference SDLP1265 for Shepherdswell Site and SDLP1266 for Eastry Site.) Draft Policy SP5 (Affordable Housing) proposes a minimum requirement of 30% affordable housing on developments of: "10 dwellings or more (and on sites of 0.5 hectares or more), and in Designated Rural Areas, on schemes of 6 dwellings or more". This policy is in accordance with paragraph 65 of the NPPF which requires a minimum of 10% affordable housing on major schemes. Whilst Draft Policy SP5 appears to meet the affordable housing need of the district set out in most recent SHMA (2019), the last few years of Authority Monitoring Reports demonstrate a significant under-delivery of affordable housing. In addition, the viability study indicates that the strategic sites will find it challenging to deliver 30% affordable housing. Therefore, it is recommended that DDC allocate additional sites to meet the affordable housing need in the district. This representation highlights the capacity to deliver additional dwellings at the Land at Botolph Street Farm in a sympathetic manner, demonstrating that there is scope to increase housing provision across the site and improve its contribution to the requisite growth in the district. There is also the potential for longer-term development at the site in Eastry if additional land is sought by DDC to help distribute the

	<p>risk of large-scale strategic developments across the Local Plan period. These sites lie within the medium value area set out within the Local Plan's supporting Viability Assessment (2020) whereby, it is a viable option to deliver affordable housing. As such, the development of these site would support the delivery of affordable housing in the area.</p> <p>Recommendation: DDC should provide a larger buffer than 8% on the required housing need due to the over-reliance on the Whitfield Urban Expansion and to ensure that the affordable housing needs of the district are met. Therefore, DDC should allocate more smaller sites to reliably meet this housing need since these sites can be delivered earlier in the Plan Period.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>DDC Note <i>The text below is an extract from the original representation which is attached to SDLP1438.</i></p> <p>SP5 Affordable Housing</p> <p>3.79 Provision of affordable housing. We believe it is both unsound and possibly not legally compliant for DDC dept of Planning to say 'for Dover urban area it is not viable to require affordable housing including the minimum requirement in the NPPF 2021 for 10% affordable homeownership. (See our recommendation on SP4 above on how to incentivise developers to provide affordable housing needed in Dover Town). We note some mitigation in 3.91 since the Reg 18 consultation, but it is still completely unsound. We very much regret that DDC Local Plan was delayed until after the NPPF was changed in this respect in 2021. We note that the Thanet Local Plan adopted 2020 included a requirement for 30% affordable housing / homeownership throughout the district, with no urban exclusions, in accordance with the previous version of NPPF. (Cross reference DM policy H1 / SP 9). We note that https://www.labcwarranty.co.uk/media/2694/land-development-report.pdf shows that return on investment for developers in Kent in 2021 was running at 29.34% . The vast majority of the public in Dover district (whether they are among the 35% of the electorate who are engaged enough in local elections to vote, or not), are keen for Dover urban area to get the warm, healthy, affordable homes that it is crying out for.</p> <p>3.81 We are relieved to see 30% requirement affordable for the rest of the district referred to here, but it will not become sound or effective unless it becomes a real requirement and not just 'a starting point'.</p> <p>3.83 and 3.84 should be strengthened to become sound.</p> <p>Alas 3.86, about helping people move out of the private rented sector seems unsound and wildly over optimistic in Nov 2022. And it is the transformation of council housing into zero carbon homes, and an increase in social rented, zero carbon homes at scale, homes that will be publicly owned in perpetuity and cannot be lost to private landlords through right to buy, that will address Dover's most urgent needs.</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes

6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Policy SP5 determines that of schemes of 10 dwellings or more, or 6 or more in Designated Rural Areas, at least 30% of the total housing provided on site must be affordable. Dover Urban Area, as defined on the Policies Map is exempt from this policy and there will be no requirement for affordable housing to be provided on sites in this area. Gladman note that the proposed tenure split is now 55% affordable/social rent, 25% First Homes (30% discount rate) and 20% other affordable home ownership products. Gladman support that the Council have adjusted this to align with the most up to date evidence but consider that the policy itself must be worded so that this level of flexibility continues across the course of the plan period and the tenure splits can be adjusted according to changing circumstances. Gladman welcome the flexibility in terms of viability and consider that this will help ensure the continued delivery of both market and affordable homes across the plan period.</p> <p>(DDC Note - Text Extracted from Document sent from Gladman Developments Ltd. Full attachment can be found under the introduction comment reference SDLP1192)</p>
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Not Applicable
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

1. Thank you for consulting the Home Builders Federation (HBF) on the Dover District Local Plan that is being proposed for submission to the Secretary of State for examination. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.

SP3 – Housing Growth

The policy is unsound as it not effective and is not sufficiently justified by the evidence base

Housing needs

2. The housing requirement of 10,998 over the plan period 2022 to 2040 is consistent with the minimum number of homes the Council should plan for using the standard method. However, what is not clear from the Council's evidence is whether this level of growth will be sufficient to meet the growth aspirations of the Council. Strategic Policy 6 sets out the Council's aspiration to deliver a minimum of 117,290 sqm of additional employment floorspace over the plan period but we could not find evidence to indicate that this number of homes will be sufficient to support the level of economic growth the Council is aspiring to deliver. The NPPF sets out at paragraph 82c that the potential barriers to investment in an area, such as a lack of housing, needs to be addressed in the plan and the Council need to be certain that the housing requirement set out in SP3 is supportive of its aspirations around economic growth.

Older people's housing needs

3. The HBF is concerned with the limited references to the needs to provide special accommodation for older people. It is noted that the mix of homes on allocated

sites will need to take account of the need for such accommodation but there appears to be no indication of whether this will be sufficient to meet the needs identified in the 2019 SHMA update. It also completely ignores the potential to allocate standalone sites to deliver homes for older people and there is no specific policy setting out the need for such accommodation and how the Council will support such development to come forward outside of the strategic allocations. The HBF would recommend that a policy setting out the Council's support for older people's accommodation is include in the plan. In order to be effective, we would suggest that this policy sets out the need for such accommodation and that there a presumption in favour of such development where needs are not being met.

Housing supply

4. Table 3.1 in the Local Plan states that overall housing supply to meet needs is 11,924, leaving a contingency buffer of 924 homes between housing needs and supply - around 8% of needs. Whilst the HBF welcomes the provision of a buffer between needs and supply we do not consider 8% to be sufficiently large to ensure that needs are met in full over the plan period, especially given that around half of the homes will come from the Whitfield Urban Expansion. In order to ensure the Council's needs are met in full the HBF recommends that a buffer of around 20% is necessary. The additional buffer should be brought forward through the allocation of smaller sites which will deliver earlier in the plan period and provide a buffer in overall supply should there be delays in the delivery of the larger strategic sites in Dover.

Meeting affordable housing needs

5. The most recent Strategic Housing Market Assessment undertaken by the Council is the 2019 update to the 2017 SHMA. This sets out that there is a need for 3,387 new affordable homes between 2020 and 2040. No further assessments appear to have been undertaken since that period. However, the latest AMR indicates that 75 affordable homes were built in 2020/21 with permissions for a further 108 units which can be expected to come forward in 2021/22. As such if the SHMA update is used as the basis for affordable housing needs there remains a need for 3,204 homes over the plan period – around 30% of expected supply on sites that are likely to deliver affordable housing¹.

6. Whilst this would appear to show that on the basis of SP5 the need for affordable housing would be addressed we note that the delivery of affordable housing in the past has been well below what has been expected. The 2020/21 Authority Monitoring Report indicates on page 19 that delivery since 2010/11, the year the Core Strategy was adopted, has been at around 20% of housing completions. In addition, the viability study indicates that the strategic sites will find it challenging to deliver 30% affordable housing. This would suggest that in order to meet needs the Council will need to allocate additional sites.

1 Total supply of 11,924 less small site windfall allowance of 1,050

Conclusions on housing supply

7. To conclude on housing supply the HBF would recommend that further sites are allocated in this local plan. This would have the twin benefits of meeting the need for affordable housing in the district as well as providing an additional buffer between housing needs and supply.

SP5 – Affordable housing

The policy is unsound as it is not fully justified.

8. This policy requires residential development of 10 or more units to deliver 30% of the homes provided as affordable housing. The update notes on the viability study notes at paragraph 56 that this level of affordable housing requirement is deliverable in high and medium value areas alongside the other costs placed on development by the local plan. However, the study outlines that this level of provision will be challenging on the strategic sites and shows that it would not be viable in lower value areas and in the urban area of Dover. The Council recognises these concerns in part by removing the requirement to provide affordable housing in the urban area of Dover. However, no allowance is made with regard to the lower value areas or strategic sites.

9. Whilst the Council states that aside from the strategic allocation there is little planned development in the lower value area it is still necessary for the policy should reflect this evidence presented by the Council. Paragraph 58 of the NPPF recognises that decision makers should be able to assume that development that a policy compliant scheme is viable. This requires policies that place additional costs on development to reflect the evidence and in cases such as this set different requirements for different areas regardless of the development expectations in those areas. As such the HBF would recommend that the policy is amended to remove the requirement for affordable housing contributions in the lower value areas.

10. It is also notable in tables 10.17 and 10.18 of the Whole Plan Viability Study that the outside of greenfield sites at Deal extra care and sheltered housing for older people is not able to viably deliver affordable housing, Given that such development often comes forward on sustainable PDL sites close to services such development should be specifically excluded within SP5 from providing affordable housing contributions.

CC1 – Reducing Carbon Emissions

The policy is unsound as not consistent with national policy, justified or effective.

11. Through policy CC1 the Council indicate that they expect development to meet the Future Homes Standard (FHS) if this becomes a requirement that is delivered

through local plans. However, the expectation from Government is clear that FHS will be delivered through amendments to the Building Regulations and will not be an optional standard adopted as part of a local plan. The improvements to energy efficiency standards in new buildings and the transition to FHS has already started with the improvements to part L of the Building Regulations that came into force in June of 2022. These will see a circa 30% improvement in CO2 emissions prior to the introduction of FHS which will ensure that new homes are zero carbon ready from 2025. As such it is not necessary to refer to the Future Homes Standard and the Council should remove reference to the standard in policy which will be delivered as part of changes to part L of the Building Regulations.

12. The HBF is also concerned that the Council do not appear to have tested the Future Homes Standard within the update note on the viability assessment. The update note sets out at paragraph 23 that the initial improvements to the energy efficiency introduced in June of 2022 were included but no additional costings have been made with regard to the Future Homes Standard. The Government expects this to cost the house building industry an extra £100 million per year though this fails to recognise that there is likely to be additional electricity connection costs with the move away from gas and that the assumed reduction in the cost of air source heat pumps is unlikely². Given the significant increase in costs from these new standards will come into force in 2025, not long after the expected adoption of this local plan, these costs should have been considered through the viability assessment.

NE1 – Biodiversity Net Gain

Policy is not needed as this will be delivered through the Environment Act and support regulations.

13. Given that the requirement to provide a 10% Biodiversity Net Gain is set out in legislation and supporting regulations and guidance and will be in force when the plan is adopted, the HBF would question whether it is necessary to include a detailed policy on BNG. Including a detailed policy could lead to inconsistency between policy and legislation should this change either prior to the introduction of BNG at the end of 2023, or if there be changes to regulation and guidance in future. As council notes in para 11.6 the policy is intended to reflect the requirements of the Act and as and we would suggest that it would be more appropriate to refer in policy SP14 to the need to deliver a 10% BNG in line with relevant legislation and guidance.

Conclusion

14. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, in the following key areas:

Economic growth has not been taken into account when considering the minimum number of homes to be planned for;

	<p>Greater flexibility required in the local plan to ensure needs are met in full; No specific policy with regard to the needs of older people Affordable housing policy does not reflect the full evidence on viability References to Future Homes Standard in policy CC1 unnecessary and unjustified No need to include detailed policy on BNG given that this is a requirement of legislation with associated regulations and guidance</p> <p>15. We hope these representations are of assistance in taking the plan forward to the next stage of plan preparation and examination. I would also like to express my interest in attending any relevant hearing sessions at the Examination in Public. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.

POLICY SP5: AFFORDABLE HOUSING

The Dover District Local Plan (Regulation 19) Consultation is one of an alarmingly limited number of emerging Local Plans that have set a differential affordable housing rates with a nil affordable housing rate in the Dover Urban Area. This is, of itself, highly commendable and suggests a greater focus on viability at the Plan making stage.

The affordable housing targets set out in Policy SP5: Affordable Housing are informed by the corresponding evidence base – namely the Dover Whole Plan Viability Study (WPVS) undertaken by HDH Planning & Development (2020). We note that the WPVS has assessed the viability of older persons' housing typologies, which is welcomed.

In reviewing the methodology for assessing specialist older persons' housing, we note that many of the inputs align with the methodology detailed in the Briefing Note on Viability Prepared for the Retirement Housing Group (hereafter referred to as the RHG Briefing Note) by Three Dragons, although a number do not.

The results of the viability modelling for older persons' housing typologies are provided in Table 10.17 and 10.18 of the WPVA. This concludes that:

10.83 In the case of Sheltered housing, the appraisals produce a residual value that is over the BLV at 30% Affordable Housing on greenfield sites, but only 5% on brownfield sites.

10.84 In the case of Extracare housing, the Residual Value does not exceed the BLV, even without Affordable Housing.

10.85 Care should be taken when considering additional policy requirements in this sector.

10.86 When considering the above, it is important to note that paragraph 10-007-20180724 of the updated PPG specifically anticipates that the viability of specialist older people's housing will be considered at the development management stage. It is therefore not necessary to develop a specific Affordable Housing policy for Sheltered and Extracare Housing

Churchill Retirement Living are strongly of the view that it would be more appropriate to set a nil affordable housing target for sheltered and extra care development, at the very least in urban areas. This approach accords with the guidance of the PPG which states that 'Different (affordable housing)

Page 2

requirements may be set for different types or location of site or types of development' (Paragraph: 001 Reference ID: 10-001-20190509).

The guidance in the NPPF and the PPG is that the role for viability assessment is primarily at the Plan making stage:

Where up-to-date policies have set out the contributions expected from development, planning applications that comply with them should be assumed to be viable. It is up to the applicant to demonstrate whether particular circumstances justify the need for a viability assessment at the application stage. The weight to be given to a viability assessment is a matter for the decision maker, having regard to all the circumstances in the case, including whether the plan and the viability evidence underpinning it is up to date, and any change in site circumstances since the plan was brought into force (paragraph 57.)

Council Members, Officers and the general public will assume that applications for sheltered or extra care housing will be able to support a policy compliant level of affordable housing. This would however be wholly at odds with the viability evidence underpinning the Local Plan.

The Dover Urban Area offers a nil affordable housing requirement based on viability, which as the principal town will be amongst the most suitable areas in the District for specialist older persons' housing. This is commendable.

Other large settlements such as Sandwich and Deal will however also be suitable locations for specialist older person's housing. In the urban areas outside of the Dover Urban Area, these forms of development will be subject to the 30% requirement, despite the evidence base clearly demonstrating that this is an unviable requirement.

The requirement for affordable housing contributions from specialist older persons' housing typologies is therefore speculative rather than based on the evidence presented. The Local Plan is therefore considered to be unsound on the grounds the affordable housing targets are not justified, positively prepared or effective.

We therefore respectfully request that a new subclause is added stating that:

a) Specialist older persons' housing will be subject to a nil affordable housing requirement on brownfield / urban sites and a 30% affordable housing requirement on greenfield sites.

To that end, we would like to draw the Council's attention to Paragraph 5.33 of Policy HP5: Provision of Affordable Housing in the emerging Fareham Borough Local Plan which advises that:

5.33 ... The Viability Study concludes that affordable housing is not viable for older persons and specialist housing. Therefore, Policy HP5 does not apply to specialist housing or older persons housing.

A nil affordable housing rate could facilitate a step-change in the delivery of older person's housing in the District, helping to meet the diverse housing needs of the elderly. The benefits of specialist older persons' housing extend beyond the delivery of planning obligations as these forms of development contribute to the regeneration of town centres and assist Council's by making savings on health and social care.

Thank you for the opportunity for comment.

<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 1 - Which Part of the Local Plan does this comment relate to? Please state clearly a chapter, paragraph number, policy number or a map/diagram title.	SP 6 Economic growth
2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>This section of the plan is not consistent with NPPF 21 - development must be sustainable - there is no mention of green economic growth.</p> <p>Quality of 'growth' is more important in crisis-ridden 2020 to 2040 than quantity of 'growth'. Because it is more sustainable as we look ahead to 2040 – 2060 and beyond.</p> <p>In the current economic climate energy prices, business rates, public sector cuts are making public and private sector employers (care homes, schools, health centres, hospitality, police (£30 million cut in Kent), buses, independent retail) fear for their survival.</p> <p>To be sound, effective and compliant with the realities of here and now, this is the direction DDC Local Plan should take. The local economy needs pump-priming, national fuel security needs to be enhanced, people need lifting out of fuel poverty. The local plan could do more than allocating sites and floor space.</p> <p>Transition to a greener economy, a means of making us more resilient economically, will be helped considerably by the ambitions of Port of Dover to decarbonize its estate by 2025 and to take seriously its scope 3 corporate responsibility in an inclusive manner to support local communities and economic players as they transition to a greener business too.</p> <p>There appears to be little mention of using the Local Plan to improve educational attainment by, for example, specific policies to</p> <ol style="list-style-type: none"> forge deeper links with FE institutions (eg Dover Technical College) given the skills gap relating to the Green Homes agenda, encourage higher education establishments to develop facilities in the district, and thereby to develop a knowledge-based economy beyond the former Pfizer's site. encourage the long-promised incubation hubs for the newly qualified in the district. This would contribute to raising the average level of earnings in the district and to combating the high levels of deprivation experienced in some wards. <p>A glaring omission relates to new economic opportunities created by climate-friendly recovery sectors. Three are essential in Dover District. With a 70% rural economy, which is severely challenged by increased costs of imports, and climate problems including water shortage. Diversification into agri-forestry could become popular among the farming community. It is recommended by Nature-Friendly Farming Network. Examples include</p>

	<p>a) protecting arable yields in cases of drought, by planted strips of suitable, native, drought-tolerant trees, (which counter soil erosion, while increasing carbon sequestration) and,</p> <p>b) bringing back to life existing but neglected, traditionally coppiced woodland, causing it to be harvested for small-scale biomass on a rotational basis. Similarly, short rotation forestry would create rural income and mitigate climate change.</p> <p>Another key to meeting climate targets is increasing the amount of land used for growing food for people rather than livestock. This would create new outdoor jobs as would replacing imported market-gardened food, with locally grown fruit, vegetables and pulses, this is a growth sector too, and is especially sustainable where zero / minimal pesticides are used, and Nature Friendly Farming practices are used. So rural areas, fields and woodland should be valued as locations of employment in themselves.</p> <p>The up-grading of all rented housing stock (both public and private sector) to zero homes standard, would mean, it doesn't need to be done again before the local and legally-binding national target of 2050, and is thus a pre-requisite for the Local Plan to become legally compliant, and this can be made to benefit the local economy. It will be necessary to ensure that publicly owned rented housing stock stays in public hands. To incentivise private landlords, DDC should set up a register of private landlords, and to qualify for registration, landlords should have to show that homes rented are EPC C in 2023, EPC B in 2024, and zero carbon in 2025. As this will push up the value of their property, landlords should not find it difficult to access cheap loans to carry out the retrofit, (DDC could plan an intermediary role or suggest sources of finance). Tenants will benefit in terms of heating costs saved and improved standards of health, which is also a saving to the public purse. The economy will benefit in terms of jobs created for local trades people.</p> <p>A third sector would include the fitting and maintenance of renewable energy installations, e.g. small-scale on-shore wind, small and medium scale solar (on domestic or non-residential roofs or to be combined with grazing land below, also on car parks), micro-tidal (tidal currents we are advised are very suitable locally), or 'green gas' as pioneered by Ecotricity in Hampshire (as the grass-cuttings from Dover's many golf courses and campsites are likely to be suitable). To maintain the returns on investment in these sectors within the regional economy, and stop them being off-shored, a priority should be given to schemes which are 51% or more community-owned.</p> <p>The Dept for Transport bought the site they wanted for Dover Inland Border Facility from a farmer in Guston for £22million, and in 2022 DfT publicly said the site would not be needed as Dover IBF. Could this become a combination of grazing under solar canopies? Near 2 schools and a sports centre, it is an unsuitable location for the HGV park that is needed at a site further outside the Dover urban area.</p> <p>Tourism and Tourist / Visitor Accommodation.</p> <p>It is very unsound, for DDC to fail to make AirB&B owners register with them, so that they can be charged business rate council tax. In terms of housing provision, AirB&B, both nationally, and in Kent's coastal towns especially, have a very negative effect of reducing the private rental market in 2022 and thus forcing up the average monthly rents for private tenants.</p> <p>The local plan would be more compliant with legality, if DDC regeneration took the greening of the economy more seriously and looked at smaller zero-carbon tourism /transport activity projects within Dover town; harbour trips with zero carbon, solar-powered boats. Better coach and toilet facilities are needed to boost tourism in Dover.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Public Works Loan Board or municipal loans could be used in Dover as in East Sussex, where they've invested in skilled jobs transforming existing homes into zero carbon homes across seven district councils. (The Lewes Model explained Green World).</p> <p>Businesses to be encouraged and helped to have more solar PV and Wind turbines.</p> <p>Solar canopies over the marshalling yards of Port of Dover, to generate energy that fridge trucks (whose engine-idling contaminates Dover) could plug into while waiting to board ferries.</p> <p>Rural economy growth through new farming initiatives (see above).</p> <p>Upgrade housing stock - so creating green jobs</p> <p>Improve facilities to promote tourism in Dover town.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	Regarding SP6 - Economic Growth, we are concerned about the inclusion of Fort Burgoyne as a site allocation for economic growth. This is due to the importance of the site as a hibernation site for hundreds/thousands of bats, which are a protected species. The redevelopment of Fort Burgoyne could have a significant detrimental effect on Dover's local bat population, and therefore go against the Spectacular and Sustainable Environment Strategic Objective, which states <i>"to conserve and enhance the District's biodiversity [...] priority habitats and species"</i> . There are seven species of bat listed as UK BAP Priority Species.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? 2 - Do you consider this part of the Plan sound?	Yes
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	
4 - Do you consider the Local Plan is Legally Compliant?*	Yes
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Yes
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>Dover Harbour Board supports Strategic Policy SP6 - Economic Growth which supports the expansion of port facilities at Dover's Western Docks and (having regard to the Economic Growth Strategy 2021 and the Economic Development Needs Assessment 2021) the allocation of further sites including at Dover Waterfront which offer significant opportunity to regenerate brownfield sites in key locations in the District and deliver flexible employment use to support the achievement of a step change in the delivery of economic growth in the District. However, we consider that the development potential of this area is understated in the 'Estimated Employment Floorspace Supply' in Table 3.5 Employment Land Supply in the supporting text to Policy SP6.</p> <p>Dover Harbour Board considers that the estimated employment floorspace of 2,350 sqm shown in Table 3.5 significantly understates the development potential and deliverable floorspace of this area within the plan period. Dover Harbour Board's plans for the regeneration of the Waterfront include the replacement of a number of existing buildings, re-purposing of others and construction of new buildings particularly in the area around the Cut and the Marina Curve. As was identified in the Dover Waterfront Strategic Plan – March 2021, there is at least some 4,500 sqm of existing commercial space within the Waterfront which is to be replaced and, with the opportunities for new buildings on the</p>

	development platforms being created, we consider that an estimated floorspace figure of 10,000 sqm should be included in Table 3.5. We request that the Local Plan is amended to reflect the greater potential of this area to deliver the Council's economic growth aspirations.
7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.	Amend Table 3.5 Employment Land Supply to substitute the figure of 2,350 sqm with the figure 10,000 sqm in the 'Estimated Employment Floorspace Supply' column in respect of Dover Waterfront.
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	No
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	N/A

5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable

<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>SP6 fails to consider the very small business or self-employed who will not easily fit in larger centralised employment zones. Fencing contractors, small builders, and landscape gardeners to name but a few. Many of who would be better placed within the communities they serve. This policies aims appear somewhat restrictive and exclusionary in that respect. Many of the smaller employment sites that would better suit these businesses seem to be being converted to housing, in an attempt to tidy up an area, SAN008, Woods Yard in Sandwich is a prime example of just such a site. Curiously, this site was marked positively for employment creation in the site assessment document. Despite the planned change to housing.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Reconsider the conversion of employment sites to housing allocation in an attempt to tidy up an area. This could easily be achieved with employment uses if the desire was there. Often this is a ploy used by landowners to achieve planning status for houses. Consider wider ranges of employment needs, other than those on an industrial estate.</p>
<p>8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?</p>	<p>No</p>

<p>4 - Do you consider the Local Plan is Legally Compliant?*</p>	<p>No</p>
<p>5 - Do you consider the Local Plan complies with the Duty to Co-operate?</p>	<p>No</p>
<p>6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.</p>	<p>Quality of 'growth' is more important in crisis-ridden 2020 to 2040 than quantity of 'growth'. Because it is more sustainable as we look ahead to 2040 – 2060 and beyond. Quick fixes, gig economy and nail-bars do not a climate-friendly sustainable economy make. November 2022. Energy prices, business rates, public sector cuts are making public and private sector employers (care homes, schools, health centres, hospitality, police (£30 million cut in Kent), buses, independent retail) fear for their survival. The reality.</p>
<p>7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.</p>	<p>Public Works Loan Board or municipal loans could be used in Dover as in East Sussex, where they've invested in skilled jobs transforming existing homes into zero carbon homes across seven district councils. (The Lewes Model explained Green World) To be sound, effective and compliant with the realities of here and now, this is the direction DDC Local Plan should take. The local economy needs pump-priming, national fuel security needs to be enhanced, people need lifting out of fuel poverty. The local plan could do more than allocating sites and floor space.</p> <p>Transition to a greener economy, a means of making us more resilient economically, will be helped considerably by the ambitions of Port of Dover to decarbonize its estate by 2025 and to take seriously its scope 3 corporate responsibility in an inclusive manner to support local communities and economic players as they transition to a greener business too. Our team, which included 2 councillors elected to Dover Town council in 2019/2020, have put the following suggestions forward at DoverTC; Port of Dover to be approached regarding more solar PV on their buildings and the installation of wind turbines on the harbour walls like the ports of Boulogne and Liverpool, Eurotunnel to be approached about wind turbines on the Samphire Hoe breakwaters, Network rail to be approached about solar PV on Dover priory station buildings, similarly for Stagecoach and the planned new bus station at York street. We have since become aware of PoD's interest in hydro renewables too. We also recommend high solar canopies over the marshalling yards of Port of Dover, to generate energy that fridge trucks (whose engine-idling contaminates Dover) could plug into while waiting to board ferries.</p> <p>There appears to be little mention of using the Local Plan to improve educational attainment by, for example, specific policies to a) forge deeper links with FE institutions (such as the laudable, forward-looking Dover Technical College) given the skills gap relating to the Green Homes agenda, b) encourage higher education establishments to develop facilities in the district, and thereby to develop a <u>knowledge-based economy</u> beyond the former Pfizer's site. And c) encourage the long-promised incubation hubs for the newly qualified in the district, have fallen victim to central gov't's stop/start sound-byte culture, these a, b, c, should be a requirement. This would contribute to raising the average level of earnings in the district and to combating the high levels of deprivation experienced in some wards.</p> <p>A glaring omission relates to new economic opportunities created by climate-friendly recovery sectors. Three are essential in Dover District. With a 70% rural economy, which is severely challenged by increased costs of imports, and climate problems including water shortage, our agricultural advisor tells us that diversification into agri-forestry could become popular among the farming community. It is recommended by Nature-Friendly Farming Network and featured on BBC Countryfile 28/2/21. Examples include a) protecting arable yields in cases of drought, by planted strips of suitable, native, drought-tolerant trees, (which counter soil erosion, while increasing carbon sequestration) and, b) bringing back to life existing but neglected, traditionally coppiced woodland, causing it to be harvested for small-scale biomass on a rotational basis. Similarly, short rotation forestry would create rural income and mitigate climate change. Another key to meeting climate targets is increasing the amount of land used for growing food for people rather than livestock. This would create new outdoor jobs as would replacing imported market-gardened food, (on which red-tape has increased) with locally grown fruit, vegetables and pulses, this is a growth sector too, and is especially sustainable where zero / minimal pesticides are used, and Nature Friendly Farming practices are used. (See comments on opportunity to protect and expand Horticultural Belt LCT D in north of district in NE2 below) So rural areas, fields and woodland should be valued as locations of employment in themselves.</p> <p>The up-grading of all rented housing stock (both public and private sector) to zero homes standard, mentioned above, would mean, it doesn't need to be done again before the local and legally-binding national target of 2050, and is thus a pre-requisite for the Local Plan to become legally compliant, <u>and this can be made to benefit the local economy</u>. It will be necessary to ensure that publicly owned rented housing stock stays in public hands. To incentivise private landlords, DDC should set up a register of private landlords, and to qualify for registration, landlords</p>

should have to show that homes rented are EPC C in 2023, EPC B in 2024, and zero carbon in 2025. As this will push up the value of their property, landlords should not find it difficult to access cheap loans to carry out the retrofit, (DDC could plan an intermediary role or suggest sources of finance). Tenants will benefit in terms of heating costs saved and improved standards of health, which is also a saving to the public purse. **The economy will benefit in terms of jobs created for local trades people.**

A third sector would include the fitting and maintenance of renewable energy installations, e.g. small-scale on-shore wind, small and medium scale solar (on domestic or non-residential roofs or to be combined with grazing land below, also on car parks), micro-tidal (tidal currents we are advised are very suitable locally), or 'green gas' as pioneered by Ecotricity in Hampshire (as the grass-cuttings from Dover's many golf courses and campsites are likely to be suitable). To maintain the returns on investment in these sectors within the regional economy, and stop them being off-shored, a priority should be given to schemes which are 51% or more community-owned.

The Dept for Transport bought the site they wanted for Dover Inland Border Facility from a farmer in Guston for £22million, and in 2022 DfT publicly said the site would not be needed as Dover IBF. Could this become a combination of grazing under solar canopies? Near 2 schools and a sports centre, it is an unsuitable location for the HGV park that is needed at a site further outside the Dover urban area.

It is very unsound, for DDC to fail to make AirB&B owners register with them, so that they can be charged business rate council tax. In terms of housing provision, AirB&B, both nationally, and in Kent's coastal towns especially, have a very negative effect of reducing the private rental market in 2022 and thus forcing up the average monthly rents for private tenants, while we have a cost-of-living crisis, so homelessness, hidden and audited, increases. Green tourism, and 'safe' country lanes, are East Kent assets that would be very unsound to trash.

The local plan would be more compliant with legality, if DDC regeneration took the greening of the economy more seriously and looked at smaller zero-carbon tourism /transport activity projects within Dover town; harbour trips with zero carbon, solar-powered boats (like La Rochelle has had for 15 years), like electric hopper mini-buses (like the ones which have been coping with the 1 in 6 gradients of Aix-en-Provence for over 10 years).

Economic Growth in a coastal town aspiring to attract tourists would be unsound unless it included trebling the number of toilets installed. Tourists as well as residents have toilet needs. For a town with the iconic, historical importance of Dover NOT to have any coach park with lavatorial comfort facilities is a disgrace. The ratio of inhabitants to toilet blocks in Dover town is treble the ratio in other urban areas in the District, 1 : 10,000 or higher. The only coach park in Dover Town has, for 5 years, had 2 signs on Maison Dieu Road telling coach drivers and visiting car drivers that a toilet exists when in fact it doesn't. At this location in Maison Dieu car park, behind the police station, visitors get out, pay to park and find nothing, merely a sign to a 15 minute walk to Pencester Gardens, difficult when legs are crossed. The DDC website misleads the public on this issue. The lack of toilets is a public health problem which we have referred to Kent Director of Public health.

8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?

Yes

9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.

We are making detailed suggestions (using examples from recently adopted Local Plans in other parts of England) on why DDC Local Plan Reg 19 version is unsound, and some is not legally compliant and how it ought to have been more positively prepared. These can be summed up as 'Less fuel poverty, more honesty, more action for nature and climate: transform Dover homes into zero carbon homes'.

2 - Do you consider this part of the Plan sound?	No
3 - If you consider the Plan is 'unsound', on which grounds do you consider this to be? (select all that apply)	Positively prepared Justified Effective Consistent with National Policy
4 - Do you consider the Local Plan is Legally Compliant?*	Not Applicable
5 - Do you consider the Local Plan complies with the Duty to Co-operate?	Not Applicable
6 - Please give details in the box below of why you consider the Dover Local Plan is not legally compliant, or is unsound, or fails to comply with the Duty to Cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the plan, please also use this box to set out your comments.	<p>These representations to the Regulation 19 stage local plan consultation are made by Dover Harbour Board. The Harbour Board is responsible for the administration, maintenance and improvement of the harbour at the Port of Dover, which itself is the busiest international roll-on roll-off ferry port in the UK.</p> <p>The Port of Dover is one of the UK's most important strategic economic assets. The Port of Dover is the UK's busiest international ferry port, handling more lorries than all other UK ports. Its operation is capable of facilitating 120 ferry movements and 110 miles of freight per day. £144bn worth of UK trade and 33% of all trade with the EU is handled by the Port of Dover.</p> <p>Further, Dover is the UK's second busiest cruise port. Over 200,000 cruise passengers visit the Port of Dover, a number The Harbour Board is actively looking to grow. Embarkations on day trips and excursions directly boost the local and regional economy, with an average passenger spend equivalent to £322 pre-embarkation, and £84 during a port visit. The benefits to the local Dover economy are significant; it is estimated that this generates circa £47m of direct passenger spending annually in the local economy. The Port of Dover indirectly supports over 5,000 jobs, many of them in the local area, many of which would be affected by any reduction in cruise calls.</p> <p>The Port of Dover therefore is a significant stakeholder in Dover District with a large influence on the local economy, both directly in terms of visitors, passenger throughput and employment, and indirectly by its impact on the highway network. The Harbour Board considers that the emerging Dover Local Plan needs to appropriately consider and account for the aspirations of The Harbour Board to improve operations more widely and plan for a low carbon future.</p> <p><u>Port Operations</u></p> <p>Port activity and operations can have a wide impact on the District and County. This is particularly the case in terms of highways given the volume of freight and passenger traffic experienced each year. This results in logistical challenges to ensure effective port operations which safeguard the economic benefits delivered by the Port, whilst also ensuring any adverse impacts on the locality are limited.</p> <p>In recent years the Port of Dover has experienced more periods of travel disruption (outside of The Harbour Board's control) than has previously been the case, resulting in national and international media coverage. This has had an adverse impact on the Port itself and Dover District. The Harbour Board is therefore committed to reducing wider impacts on both the highway network and the amenity of local residents from future disruptions to channel crossings.</p> <p>Draft Policy T14 – Overnight Lorry Parking Facilities</p> <p>Paragraph 109 of the National Planning Policy Framework (NPPF) notes that “<i>Planning policies and decisions should recognise the importance of providing adequate overnight lorry parking facilities, taking into account any local shortages, to reduce the risk of parking in locations that lack proper facilities or could cause a nuisance.</i>”</p> <p>A lack of overnight parking in Dover District has been identified by Kent County Council and Draft Policy T14 seeks to address this issue through a criteria-based policy for a lorry park and associated facilities. The Harbour Board supports the principle of such provision to remove HGVs</p>

from the highway, but the provision of a truck stop alone deals with only part of the identified problem, especially at times of channel crossing disruption.

Dover District Council are aware of the Harbour Board's intention to deliver an Inland Terminal. This is considered a vital piece of Port infrastructure which will need to come online during the plan period (see below for further detail). Lorry parking facilities and the Inland Terminal are compatible and complementary land uses (as evidenced by the facilities provided at Sevington in Ashford) and The Harbour Board considers that there are significant benefits of co-joining these facilities.

Inland Terminal

Dover Harbour Board needs to deliver an Inland Terminal Facility. This is required to ease pressure on the Port of Dover by supplementing existing facilities or, in some cases, relocating them entirely to the inland site. There are a number of reasons why the Port needs this facility.

EU Entry/Exit System (EES)

The Council will be very aware of the Dover Traffic Assessment Project (TAP) and the associated Brexit Operations Across Kent, otherwise known as Operation Brock. These are measures put in place to deal with HGV traffic when Port operations have been disrupted, for example as a result of delays to channel crossings. The aim is to regulate the flow of HGVs into Dover along the A20 and M20 to ease congestion and allow residents and other users of the strategic road network to access Dover and go about their business.

The measures include left hand lane only use of the A20 by HGVs, queuing on the A20, contraflows on the M20, separation of traffic between Euro Tunnel and the Port, and the use of Manston Airport as a temporary lorry park.

TAP and Operation Brock are emergency measures to keep non-freight traffic moving and allow HGVs and their drivers to be safely located whilst the problems causing issues at the Port are dealt with, and until such time as crossings and travel return to normal. However, events in the past 12 months have demonstrated that significant disruption can still occur, particularly at times of prolonged delays. This results in an economic cost in terms of time lost by both freight business and other road users, and also a social cost given the number of lorry drivers held for long periods on motorway and trunk road verges with no welfare facilities.

The Harbour Board have been looking at more permanent solutions. However, the pending introduction of the EU Entry/Exit System (EES) is a further driver to pursue this goal. EES is a large-scale IT system that is being implemented as part of the European Union's 'Smart Borders Package', and is due to launch in May 2023. It will enable automatic monitoring of border crossings by 'third-country nationals' into and out of the EU. This includes UK nationals in addition to all members of non-EU states outside the Schengen Area.

The system will register a person's name, type of travel document, biometric data (fingerprints and captured facial images) and the date and place of entry and exit, and will fully replace the system of manually stamping passports. The Port of Dover has undertaken an assessment of the impacts of EES and has concluded it is very likely to have a profound effect on its operations if undertaken within the bounds of the Port itself. In a worst case scenario this would include excessive queues outside the Port for up to 365 days per year, necessitating the permanent operation of TAP and Operation Brock.

The provision of an appropriately located Inland Terminal facility would help to alleviate pressure on the Port and A20 given it would allow certain checks to be undertaken prior to entry to the main Port facility, speeding up operations whilst also removing large numbers of HGVs off the road and allowing drivers to rest and use welfare facilities.

Facilities/Welfare

An Inland Terminal facility would allow provision of significant improvements to HGV driver facilities in the District. This would enable the Port of Dover to contribute toward the wider government objective of improving conditions for HGV drivers and logistics workers more generally.

The Government's Road Freight Supply Chain Transport Committee¹ noted the difficulties the sector has had with recruitment and retention of staff, both of which contributed to the wider supply chain shocks experienced since the start of the pandemic. The committee heard evidence that one of the key reasons drivers do not stay in the sector is the lack of high-quality rest facilities, especially on key road freight routes.

Therefore improving the working conditions of HGV drivers is an important element of both retaining staff and encouraging others to choose transport logistics as a career.

This issue is also raised in the Department for Transport's publication "Future of Freight: a long-term plan" (June 2022)² which includes 'People and Skills' as one of its priority areas. One strategic goal is to ensure "*the freight and logistics sector will be seen as an industry of choice for a diverse group of talented and skilled people at all stages of their career and will have the people and skills that it needs to thrive*". Improving general working conditions through the provision of better facilities for drivers will be an important part of the wider strategy to improve the UK's freight and logistics sector.

Sustainability

The Inland Terminal would also be an important element of The Harbour Board plans to decarbonise Port of Dover activity and respond to wider changes in logistics such as the predicted increase in electric vehicles. This is explored more generally later in this representation, but the Inland Terminal would provide opportunities for on-site microgeneration of power and opportunities for electric vehicles to recharge where necessary before proceeding to the port.

Co-location of Inland Terminal and Overnight Lorry Park

An overnight lorry park and the Inland Terminal facility share a common set of site search criteria. They both require a large, level site which can be appropriately accessed from the Strategic Highway Network without causing disruption for other road users. They should also be located in close proximity to the Port, provide opportunities for landscaping to limit visual impact, be able to deliver biodiversity net gains and be located an appropriate distance from sensitive receptors such as residential properties.

There is a need to deliver the Inland Terminal and overnight Lorry Parking in Dover, but the very specific site criteria noted above reduces the amount of suitable sites in the District. The Local Plan should therefore seek to co-locate these facilities in order to increase the chances of delivery of both pieces of important infrastructure.

7 - What changes do you suggest to make the Dover Local Plan legally compliant or sound? Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Recommended Policy

The Harbour Board proposes amendments to Policy TI4 so that it includes an area of search for the co-joined Inland Terminal and Lorry Park. The most appropriate location for an Inland Terminal would be to the east of the Roundhill Tunnels. This would ensure the facility is located wholly within Dover District and reduces the potential for conflict with Eurotunnel traffic and operations. It would also allow The Harbour Board to manage Port traffic more efficiently (through use of traffic cameras etc).

Land within the Kent Downs Area of Outstanding Natural Beauty (AONB) should not be excluded from the Area of Search. The NPPF provides a high degree of protection against inappropriate development in AONBs. Paragraph 177 notes applications for major development (such as an Inland Terminal/Lorry Park) should only be allowed in “*exceptional circumstances*” and where it can be demonstrated that “*the development is in the public interest*”.

The need for the Inland Terminal within the area of search suggested by The Harbour Board is significant and could meet these tests, which set a high bar for development proposals. This should be tested at Planning Application stage rather than excluded by Local Plan Policy.

The Harbour Board is therefore proposing an area of search along the A20 corridor, east of the Roundhill Tunnels.

An amended criteria-based policy should then be applied to potential development sites which come forward. The following amended Policy text is recommended:

TI4 – Inland Terminal and Overnight Lorry Parking Facilities

Inland Terminal Facilities to serve the Port of Dover to include overnight lorry parking facilities will be supported, subject to other policies in the Local Plan, within the following areas of search:

- *A20 corridor east of the Roundhill Tunnels*
- *A2/M2 Corridor*

Development will be subject to the following criteria:

- 1 *The site must be accessed from the Strategic Road Network (A20);*
- 2 *Applications must be supported by a Landscape and Visual Impact Assessment which informs the site layout, capacity and mitigation requirements;*
- 3 *A comprehensive landscape scheme should be provided to conserve and enhance the AONB and/or its setting;*
- 4 *Proposals for the mitigation of noise and air quality impacts from lorry movements and any associated commercial, welfare and support services will need to be provided as part of any application;*
- 5 *A lighting strategy must be submitted with any application and suitable mitigation will be required to deal with artificial lighting, to restrict the impact of the development on neighbouring residential properties or vulnerable uses;*
- 6 *Adequate space for access, sight lines, turning and manoeuvring must be provided in addition to the required parking spaces*

The inclusion of a Policy which seeks to deliver inland terminal facilities will ensure Dover District Council retains control over the provision and location of these facilities.

Summary

	<p>The NPPF sets out that the purpose of the planning system is to contribute to the achievement of sustainable development. Achieving sustainable development includes an economic objective – to help build a strong responsive competitive economy. Local planning policies and decisions are expected to help create the conditions in which businesses can invest, expand and adapt.</p> <p>The NPPF makes clear that planning policies and decisions should recognise and address the specific locational requirements of different sectors and that planning policies should also provide for large scale transport facilities, located in areas of need, taking into account any local shortages.</p> <p>The 'Future of Freight' document notes that <i>"In 2021, the Department for Transport made a Written Ministerial Statement with the Department for Levelling Up, Housing and Communities, which made clear that in preparing local plans and deciding planning applications, the specific locational requirements of different industrial sectors should be recognised and addressed by local planning authorities."</i></p> <p>The Inland Terminal will be needed by Dover Harbour Board during the life of the plan. It is a key piece of infrastructure required to support The Port of Dover and its continued substantial contribution to the local and national economy. There is a need to provide significantly improved driver welfare facilities as part of the wider government strategy to create attractive working conditions within the transport and logistics sector. Further, there is an identified local need for a facility to take HGVs off local roads.</p> <p>Delivery of a site that can provide a co-located facility would represent a positively prepared, justified and effective strategy consistent with national policy. The plan would be unsound without these proposed amendments to the policy.</p>
8 - If your representation is seeking a modification to the plan, do you consider it necessary to participate at the oral part of the examination?	Yes
9 - If you wish to participate in the oral part of the examination, please outline why you consider this to be necessary. Please note the Inspector will determine who is to be invited to the hearings from those who have selected "yes" to the question above.	The Port of Dover is a significant stakeholder within Dover District. Matters relating to its effective operation have a direct impact on the wider district with implications to the national economy. Therefore it would benefit the Inspector to have Dover Harbour Board present at the examination in public.
